The College of Arts and Sciences offers undergraduate certificates, minors and majors. At the graduate level, the College of Arts and Sciences offers a MS in Molecular and Cell Biology and a graduate certificate. The College of Arts and Sciences also offers a range of accelerated and dual-degree opportunities. For a complete list of undergraduate opportunities, please visit this page (p. 4). For a complete list of graduate opportunities, please visit this page (p. 4).

The College of Arts and Sciences places every student, upon matriculation, with an individual faculty adviser who can best help them form a personalized academic plan. An outcome of each academic adviser’s individualized guidance is that students come to understand the relationship between a particular discipline and a range of satisfying careers. Students also learn how an arts and sciences major can prepare them especially well for a life of consequence and meaning. Although the primary responsibility for setting academic goals and selecting courses rests with the student, the academic adviser fosters an ongoing conversation that cultivates self-reflection and development.

Students who enter the College of Arts and Sciences with a declared major are matched with a faculty adviser in that department. Each undeclared student works individually with an academic adviser to design a plan that is uniquely tailored to their needs and interests. During the pre-registration period each semester, all students in arts and sciences meet with their academic advisers before selecting and registering for courses.

In the College of Arts and Sciences, the career development office works with students to create and navigate a personalized career development program including major choice, personal branding, resume and LinkedIn development, networking, job search, professional development opportunities and graduate school advisement. Students can gain valuable work experience and explore career options through participation in credit-bearing experiential learning opportunities, including internships, research projects, shadowing, community service and part-time and summer employment.

Requirements

The requirements for the bachelor of arts and bachelor of science degrees are qualitative and quantitative. Completion of 120 credits with a grade point average of C or better is not in itself sufficient to qualify for graduation. In addition to the general Quinnipiac requirements, eligibility for most bachelor of arts and bachelor of science degrees requires the satisfactory completion of both arts and sciences requirements and those in a major or field of concentration. Specific major requirements are noted under the individual departmental or area descriptions. Students should be cautioned that an average of C, or 2.00, in the student's major is a minimum requirement for each major and that some departments may require higher standards as noted.

Of the 120 credits required for the bachelor's degree, only 6 credits of workshop courses and/or physical education courses may be applied. Primary responsibility for knowing and completing all course requirements rests with the student.

All CAS students must complete one modern language through the 102 level. Modern language courses may also count toward the University Curriculum. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher are not required to fulfill the language requirement.

Mission Statement

The faculty and students of the College of Arts and Sciences share a belief in the value of a comprehensive college education—an education that requires foundational study in the natural sciences, social sciences, humanities and fine arts. A degree in arts and sciences helps students build fulfilling and meaningful lives and is a strong basis for a preprofessional education. Careers in the 21st century require great creativity, critical thinking and fine writing. The ability to think is more important than any narrow job preparation. The arts and sciences curricula require demanding study while providing extensive faculty support in small classes and laboratories.

Whether a student is pursuing a bachelor of science or bachelor of arts degree, they are part of a learning community in which students and faculty are makers of knowledge, not simply receivers and dispensers. Faculty and students study and experience a society increasingly defined by global, scientific and cultural awareness and a diversity of populations. The course of study provides ample opportunity for students to participate in internships that help to bridge their education and its application. The college also offers several combined programs that connect undergraduate studies directly to graduate degrees and professional preparation. Most importantly, students in the arts and sciences engage in an exciting, well-rounded program of study that is both fulfilling and rewarding.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page of this catalog.

Transfer Requirements

Transfer students should apply for admission by mid-November for the Spring (January) semester, or by April 1 for fall (August) entry. Official transcripts from all institutions attended must be provided. Most programs look for a minimum grade point average of 2.50 (some higher) for consideration.
Quinnipiac normally grants transfer credit for courses appropriate to the chosen curriculum, completed with a grade of C or better, at a regionally accredited post-secondary institution.
