BACHELOR OF SCIENCE IN PSYCHOLOGY

Program Contact: Paul LoCasto (Paul.LoCasto@qu.edu) 203-582-3725

Psychology explores phenomena from multiple perspectives and is an ideal starting point for many careers. Our students go on to graduate-level work in psychology and pursue careers in a wide range of fields including school psychology, industrial-organizational psychology and many mental health fields. This degree also prepares students for success in fields such as law, education and business, which require strong critical thinking skills and a solid understanding of interpersonal relationships. In this program, students work with experienced faculty members who research intriguing topics, such as how we read stories, workplace relationships, aggressive behaviors and mindfulness.

Academic studies will be augmented by lab courses that involve designing psychological studies and collecting data. Students can participate in supervised fieldwork in one of our concentrations to gain experience applying their knowledge of psychology to a realworld setting. Quinnipiac provides real-world experience based on students' interests. In addition to participating in summer research projects at institutions across the country, our students have interned at a battered women's center, psychiatric in-patient clinics and national corporations. Our psychology majors graduate well prepared to enter the workforce or to pursue an advanced degree.

Students majoring in psychology must complete a psychology concentration, a minor, or a second major in addition to the following requirements for graduation:

Code	Title	Credits
University C	Curriculum ¹	46
Modern Lan	guage Requirement	3-6
Professiona	l Development	
PS 190	Career Development Through Psyc Literacy	1
Developing	Psychological Literacy	
PS 101	Introduction to Psychology	3
Methods of	Knowing in Psychology	
PS 206	Introduction to Statistics in Psychology ²	3
PS 307	Introduction to Research Methods in Psychology with Lab ²	3
Perspective	s in Psychology	
Take a cours areas ³	se in four of the following perspective	12
Biologica	I Perspective	
PS 251	Learning and Memory	
or PS 2	25æiological Psychology	
Clinical P	Perspective	
PS 225	Health Psychology	
or PS 2	272Psychopathology	
Cognitive	Perspective	
PS 233	Cognitive Psychology	
or PS 2	235Communicating Effectively: A Cognitive Perspectiv	e
Developn	nental Perspective	

PS 236	Child and Adolescent Development	
or PS 25@arenting Science		
Social Pe	rspective	
PS 244	Psychology of Prejudice	
or PS 2	261Social Psychology

Work & Oo	ccupations Perspective	
PS 265	Psychology in the Workplace	
or PS 2	26&Dccupational Health Psychology	
Additional R	equirements	
PS elective a	at the 200 level or higher	3
PS elective a	at the 200 level or higher	3
PS elective at the 300 level or higher		
Diversity or multi-cultural course		3
Demonstrating Psychology Literacy		
PS 401	Integrative Capstone for Psychology and Behavioral Neuroscience Majors	3
Total Credits	3	86-89

- ¹ All students must complete the 46 credits of the University Curriculum (http://catalog.qu.edu/academics/university-curriculum/). Students in the psychology major must complete MA 140 or higher. MA 170 is recommended if a student earns a score of two or higher on the placement exam.
- ² Students must earn a grade of C- or higher before moving on to the next course.
- ³ Students must take three of the four required perspectives at Quinnpiac University.

Psychology majors also have the opportunity to engage in supervised fieldwork and intensive study within one of three concentrations.

Applied Clinical Science Concentration

Students may apply to enroll in the applied clinical science (ACS) concentration within the psychology major. The program prepares students for careers related to clinical psychology and provides the basis for graduate work in fields such as social work, counseling and school psychology. A minimum 3.00 overall GPA is required to participate in the ACS concentration fieldwork courses. Space is limited in the fieldwork courses and, therefore, in some years enrollment in the concentration may be awarded on a competitive basis.

ACS students must take:

Code	Title	Credits
PS 272	Psychopathology	3
PS 371	Clinical Psychology	3
PS 391	Applied Clinical Science Seminar (SL: Service Learning)	3
PS 393	Fieldwork in Applied Clinical Science (SL: Service Learning)	3
PS 394	Fieldwork in Applied Clinical Science (SL: Service Learning)	3
Total Credits		15

The ACS program emphasizes:

- 1. Mental health fields as possible careers.
- 2. Conceptions of mental illness, both past and present.
- 3. Evidence-based treatment techniques in clinical psychology and related fields.

Applied Cognition Concentration

The applied cognition concentration focuses on providing students with the opportunity to gain job-relevant skills while exploring cognition. Students are exposed to major theories and methods in cognitive psychology, along with applications of cognitive psychology to the workplace (e.g., design thinking, task analysis, survey design) and careers that use insights and methods from cognitive psychology (e.g., behavioral engineering). Because cognitive psychology draws on a range of disciplines, students will also have the opportunity to explore cognition from a different field.

Applied Cognition students must take:

Code	Title	Credits
PS 233	Cognitive Psychology	3
PS 333	Applied Cognition	3
Elective from a related discipline ¹		3
Skill-Building ²		0-3
Total Credits		9-12

- Elective from a related discipline (e.g. computer science, philosophy, industrial or software engineering) to be decided upon by student in consultation with a faculty member in the cognitive perspective.
- 2 Skill-building through internship, independent research or relevant training (e.g. certification of technical skill) to be decided upon by student in consultation with a faculty member in the cognitive perspective.

The Applied Cognition program emphasizes:

- 1. Applying theories and methods from cognitive psychology to realworld contexts.
- 2. Exploring and experiencing multidisciplinary careers in cognitive psychology.
- 3. Building marketable skills that are relevant for a range of careers (e.g., public speaking, collaboration), as well as specific skills that are relevant for jobs in cognitive psychology (e.g., task analysis, survey design).

Applied Work and Organizational Psychology Concentration

Students may elect to enroll in the applied work and organizational psychology program within the psychology major. The program exposes students to career possibilities in industrial-organizational (I-0) psychology areas and provides the basis for further study related to fields such as I-O psychology and management. Applied work and organizational psychology students must take:

Code	Title	Credits
PS 265	Psychology in the Workplace	3
Take one of	the following	3
PS 366	Advanced Personnel Psychology	

Total Credits		9
	Organizational Psychology	
PS 397	Fieldwork in Industrial/	3
	Advanced Organizational Psychology	

Total Credits

The applied work and organizational psychology program emphasizes:

- 1. Using psychological principles to study and improve working conditions.
- 2. Developing and practicing marketable skills that are relevant for a range of careers (e.g., public speaking, collaboration), as well as specific skills that are relevant for jobs in industrial-organizational psychology or human resource management (e.g., job analysis, test validation, training design).
- 3. Gaining relevant, hands-on experience in careers related to industrialorganizational psychology and human resource management.

Student Learning Outcomes

- 1. Breadth of Knowledge of Psychology: Use and evaluate various psychological perspectives to evaluate and predict complexities in affect, behavior and cognition; understand the history of the field and how psychology fits with other disciplines.
- 2. Scientific Reasoning: Conduct, interpret and evaluate scientific studies in terms of the reliability, validity and generalizability of the research designs; develop open-mindedness, curiosity and amiable skepticism toward claims.
- 3. Ethical Responsibility: Apply ethical standards to research and practice situations; demonstrate interpersonal sensitivity in work and communities.
- 4. Communication Skills: Demonstrate flexibility and clarity of argument in both written and oral communication.
- 5. Personal Development: Apply psychological thinking to issues encountered in work and personal life, such as using evidence to solve problems; engage in teamwork as well as self-reflection and self-management.
- ¹ *Note, our discussion draws upon APA Guidelines for the Undergraduate Psychology Major.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective firstyear students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first guarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (http://catalog.gu.edu/general-information/ admissions/) page of this catalog.

Transfer into the Psychology Major

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.00 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for BS in Psychology

A minimum of 60 credits is required for transfer into the BS in Psychology program. Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Course Title First Year	Credits
First Year Fall Semester	
English I	3
Statistics	3
	3
General Psychology I Elective	3
Elective	
Credits	3
	15
Spring Semester	3
English II	
Psychology Elective	3
Elective	3-4
Elective	3
Elective	3
Credits	15-16
Second Year	
Fall Semester	
Abnormal Psychology	3
Elective	3-4
