BACHELOR OF ARTS IN GERONTOLOGY

Program Contact: Catherine Richards Solomon
(Catherine.Solomon@quinnipiac.edu) 203-582-5264

Quinnipiac is one of the few universities to offer an undergraduate major that anticipates one of the growing realities in our society: the rise in the number of older Americans. Every aspect of our society will be affected by the rapidly growing number of people over age 65. Gerontology prepares students to have careers that can address these societal changes. Jobs related to gerontology are among the fastest growing in the U.S. right now, and can be found in a range of professions, from health and business to policy and social programs. Nearly every profession entails working with clients over 65. Our curriculum is unique in that it provides students with a broad understanding of the various issues older individuals and their families face in later life: how our families and social networks change as we age, the effects of aging on our minds and bodies, and which social programs and policies exist to help older people and families. Because the effects of an aging population are so far-reaching, the program is interdisciplinary, including courses from sociology, psychology, biology, health sciences, philosophy and law.

Gerontology majors also complete two semester-long internships in public or private agencies involved directly with the elderly, such as senior centers, retirement complexes, hospitals, rehabilitation facilities, community aging services, case management agencies and nursing homes. Students are prepared to continue their education or assume careers in aging-related areas such as social work, law, public health, medicine, health administration and public policy.

Gerontology Curriculum

Students majoring in gerontology must meet the following requirements for graduation:

Select two of the following: 6

- SO 241 Sociology of Race and Ethnicity 2
- SO 244 Social Inequalities
- SO 255 Sociology of Families (WGS 255) 2
- SO 266 Population and Society 2
- SO 280 Sociology of Health and Illness 2
- SO 305 Sociology of Death and Dying (GT 305)
- SO 360 Sociology of Mental Health
- PL 368 Philosophy of Death and Dying
- PS 325 Health Psychology
- HSC 220 Health Care Essentials: Structure, Policy and Professionalism
- HSC 262 Nutrition in Health and Illness

Select one of the following: 3

- GT 211 Introduction to Social Work (SO 211)
- GT 270 Community Program Development (SO 270)
- GT 315 Case Management (SO 315)
- GT 365 Aging and Social Problems (SO 365)
- LE 322 Health Care Law (HSC 322)

Free Electives 13-16

Total Credits 102-108

1 All students must complete the University Curriculum (http://catalog.qu.edu/academics/university-curriculum/) requirements.
2 These courses also satisfy University Curriculum requirements.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

a. Diversity Awareness: Students learn to identify the perspectives of diverse groups among the older population and the effect of group membership on the aging processes and later life experiences.

b. Social Scientific Literacy: Students learn the logic of research methodology and be able to understand and critique the results of scientific research generated by scholars in the discipline.

c. Critical Thinking: Students apply interdisciplinary theories and concepts to interpret various social phenomena and scholarship from multiple perspectives through clear oral and written articulation.

d. Critical Understanding of Aging Society: Students are able to discuss the theories, critical concepts and ideas that form the basis of gerontology’s interdisciplinary knowledge and will understand how social structure affects the distribution of cultural and material
resources among older Americans as well as how it shapes the aging experience.

**Admission Requirements: College of Arts and Sciences**

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (http://catalog.qu.edu/general-information/admissions/) page of this catalog.
