BACHELOR OF ARTS IN GAME DESIGN AND DEVELOPMENT

Program Contact: Elena Bertozzi (elena.bertozzi@qu.edu) 203-582-7998

The Bachelor of Arts in Game Design and Development is a pre-professional program that prepares students for a variety of career options including many types of interactive media, the highly competitive game design industry, or the pursuit of additional study at the graduate level. This is an applied, interdisciplinary major that focuses on the meaningful application of game technologies in the commercial entertainment industry and the application of those skills to serious topics regarding the environment, healthcare and education including STEM and STEAM (science, technology, engineering, arts and math) initiatives. Students acquire a solid foundation in critical thinking and writing, foundations of design, user behavior and systems thinking, as well as an understanding of the cultural impacts of games. They develop specialized technical skills and competence in game design including coding, content development, outcomes assessment and quality assurance. The major provides students with skills that are readily applied to the real world and the curriculum supports and enables experiential learning opportunities such as internships, study abroad and collaborations with external partners.

There are a total of 42 credits in the major. The major has 11 required courses. Students build a core skillset and learn to collaborate with others in Game Labs where cross-disciplinary teams build complete polished games. Students choose which areas they wish to specialize in by taking two classes from any one of the concentrations and one elective from any other concentration. Concentrations include: Programming, Technology, Design Process, Art, Game Studies, Business, Writing and Audio. In the senior year, the program culminates in a capstone experience when students take the Senior Project and Seminar.

A grade of C- or better is required in all game design and development courses and prerequisites. Students with a GPA of less than 2.00 will be put on probation. After two semesters on probation, students will be advised to change majors.

It is recommended that students majoring in Game Design and Development pursue a minor, or double major, or take courses in a complementary discipline such as graphic interactive design or computer science.

All majors are required to participate in some form of experiential learning: study abroad, internship or academic/professional product collaboration.

Students majoring in Game Design and Development must meet the following requirements for graduation:

<table>

### Bachelor of Arts in Game Design and Development

**Design Process**
- GID 110 Design Research and Methods
- GDD 175 Special Topics in Game Design
- GDD 301 Game Design Tools and Processes
- GDD 350 Board Game Design
- GDD 370 Acting and Directing for Game Design

**Programming**
- CSC 111 Data Structures and Abstraction
- GDD 316 Advanced Topics in Game Development
- SER 120 Object-Oriented Design and Programming
- SER 225 Introduction to Software Development

**Free Electives** 23-26

**Total Credits** 114-120

1. All students must complete the University Curriculum (http://catalog.qu.edu/academics/university-curriculum/) requirements.
2. Participating in the QU in LA Program or study abroad can also fulfill this requirement.
3. Students wishing to take courses from this list must complete any prerequisites required by individual departments/programs or schools.

Elective substitutions are permitted with prior approval of the program director.

### Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (http://catalog.qu.edu/general-information/admissions/) page of this catalog.

Shown below is one of many possible paths through the curriculum. Each student’s individual academic plan is crafted in consultation with their academic adviser.

### Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

a. **Computational and Systems Thinking**: Be fluent in at least one programming language and associated game engine to construct fully functional working games.

b. **Critical/Analytical Thinking and Communication**: Play and analyze games using academic research methods, exhibit effective written and verbal communication skills and apply this analysis to the game design process.

c. **Design Process Thinking**: Prototype, reflect critically on workflow and process, incorporate feedback, and iterate.

d. **Creative Thinking and Problem Solving**: Generate inventive, novel and imaginative ideas for game design concepts and nimbly respond to design and implementation challenges.

e. **Multidisciplinary and Diverse Perspective Thinking**: Understand the issues surrounding topics of representation and diversity in game development and be able to discuss them and design games that address them.

f. **Teamwork and Experiential Learning Expertise**: Collaborate with teams of colleagues with different skillsets to produce work using established game development best practices with a clear definition of scope, responsibilities, progress and assessment of results.
**Bachelor of Arts in Game Design and Development**
