MARKETING (MK)

MK 610. Research for Marketing and Business Decisions. 3 Credits.
The course provides a managerial approach to market research activities. The goal is to enable students to evaluate market research projects and to interpret and apply research information toward marketing decisions. The research process is discussed and qualitative as well as quantitative methodologies are systematically reviewed. Attention is paid to how to analyze and present research findings.
Prerequisites: Take MBA 645.
Offered: As needed

MK 612. New Product Marketing. 3 Credits.
This course introduces students to the specialized areas, within marketing management, of product development, brand management and pricing strategy. The primary topic of the course is new product management. This includes strategic planning, idea generation, business analysis, design, testing and introduction of new products to market. Related topics are issues in brand management and pricing strategy and tactics.
Prerequisites: Take MBA 645.
Offered: As needed

MK 615. Managing Marketing Channels. 3 Credits.
This is an introduction to the design, evaluation and management of distribution channels. Topics include strategic issues in designing distribution channels, channel member roles, managing channel conflict, evaluation of channel performance, motivation of channel members, managing a hybrid mix of traditional and non-traditional channels, and channel logistics (transportation, inventory, materials handling and information management).
Prerequisites: Take MBA 645.
Offered: Every year, Spring

MK 616. Digital Marketing. 3 Credits.
This course introduces students to topics and issues employed by marketing managers as they develop and implement their digital marketing strategies. Topics include: marketing analytics, digital business models, digital marketing channels, search engine marketing, social media and mobile marketing. The class incorporates experiential learning opportunities which enable students to bridge the gap between marketing theory and managerial practice.
Prerequisites: Take MBA 645.
Offered: As needed

MK 619. Marketing Analytics. 3 Credits.
Topics covered in this course include market segmentation, marketing mix analysis, product bundle optimization and social network analysis. In addition, students are introduced to the basics of effective visual presentation of quantitative information. Weekly homework with real business data allows students to explore a variety of analytic techniques and answer actual problems. Students leave with a knowledge of a variety of advanced techniques, in-demand analytic reasoning skills, and an understanding of methodological debates, trade-offs, and resource allocation for data projects.
Prerequisites: Take MBA 645.
Offered: As needed

MK 620. Applied Consumer Behavior Research. 3 Credits.
This course provides a basic understanding of the major concepts and theories in consumer decision-making and behavior and how these can be used as the basis for empirical research on the way consumers process information, form preferences and make buying choices. This is a course in which theories from psychology, sociology and economics are applied to the study of consumer behavior.
Prerequisites: Take MBA 645.
Offered: As needed

MK 697. Special Topics in Marketing. 3 Credits.
This special topics course includes treatment level of one or more issues in marketing. Subject matter varies at each course offering depending upon the interest of students and faculty, and changes in the marketplace.
Offered: As needed
