The MS in Organizational Leadership guides working professionals through a process of uncovering and evolving their personal leadership style. Specifically developed for prospective and current leaders with at least 3 years of professional work experience, this program helps students strengthen their leadership toolkit through the learning and application of critical skills necessary to thrive in the new economy. The 30-credit program is delivered in a highly supportive, modern online format and can be completed in under 2 years on a part-time basis.

The core courses of the program focus on identifying personal leadership style in all situations with a flexible curriculum that enables students to explore specific areas of interest such as emotional intelligence, ethics and governance, the digital organization, and human resources. Coursework is rounded out with a hands-on consulting project designed to address a business problem relevant to the student's current role or professional/personal interests. Students are challenged to think critically about this issue before developing, building and implementing an appropriate solution.
