Computer scientists are among the professionals who conceive, design, build and deploy critical software and hardware to support and advance the infrastructure that runs our globally connected world. The 30-credit Master of Science in Computer Science program prepares computer scientists who can contribute to the broad field of computer science. Computer science graduates possess a solid grounding in core knowledge and, through a variety of electives, an understanding of the vast breadth of the discipline, enabling them to solve emerging problems with innovative solutions. The program allows students to pursue either a thesis or non-thesis track.

Student Learning Outcomes
Graduates of the program will have an ability to:

1. Work collaboratively on projects of significance, managing a common codebase.
2. Apply computer science theory and software development fundamentals to solve significant problems creatively.
3. Design, develop, deploy and maintain complex solutions using modern tools and techniques.
4. Develop solutions to problems that are mindful of the role of computers in society.
5. Demonstrate ethical behavior and explain its importance.

Admission
To qualify for admission into the MS Computer Science program, a student must have completed a bachelor’s degree from a regionally accredited institution and either completed 30 or more semester credit hours in computing or received approval from the program director. Applications may be obtained from the Office of Graduate Admissions and are accepted for fall or spring enrollment. A complete application consists of the following:

1. Application form and fee
2. A letter of intent including an autobiographical account of personal, professional and educational achievements
3. One letter of recommendation
4. Official transcripts of all undergraduate and graduate work completed
5. TOEFL/IELTS scores (if the medium of instruction for the undergraduate degree is not English)

A cumulative undergraduate GPA of 3.00 is preferred. Although Graduate Record Examination (GRE) scores are not required, the scores can provide another indication of a student's academic readiness. Applicants should refer to the Graduate Admission Requirements (http://catalog.qu.edu/graduate-studies/#admissionstext) found in this catalog.
