The Department of Rehabilitation, Health and Wellness is a vibrant six member group with expertise across multiple aspects of human health, fitness, injury prevention and rehabilitation; faculty are active in aspects of fitness, health care and education at the state, regional and national level. Faculty members collaborate with other health care educators across the School of Health Sciences, School of Medicine and School of Nursing to deliver an interprofessional educational experience.

The department is not currently accepting new students into its BS in Athletic Training nor into its Dual-Degree BS in Athletic Training/ DPT (4+3) program. The Department offers classes to the broader campus community in areas of Fitness, Leisure and Wellness (FLW) and collaborates with the Department of Biomedical Sciences in offering the Minor in Nutrition. Athletic training encompasses the prevention, examination, diagnosis, treatment and rehabilitation of emergent, acute or chronic injuries and medical conditions. Athletic training is recognized by the American Medical Association (AMA), Health Resources Services Administration (HRSA) and the Department of Health and Human Services (HHS) as an allied health care profession.

Athletic trainers (ATs) are highly qualified, multiskilled health care professionals who collaborate with physicians to provide preventive services, emergency care, clinical diagnosis, therapeutic intervention and rehabilitation of injuries and medical conditions. Athletic trainers work under the direction of a physician as prescribed by state licensure statutes.

At Quinnipiac, the program in athletic training emphasizes practical clinical experience along with a strong foundation in anatomy and physiology, nutrition and fitness and conditioning, among other subjects. The program values personal responsibility and critical decision making in the development of high-quality, patient-centered care. Students work with student-athletes from Quinnipiac's Division I volleyball, soccer, field hockey, cross country, tennis, basketball and ice hockey teams as well as athletes in local high schools and community-based healthcare settings, all under the supervision of certified athletic trainers and other licensed healthcare providers.
