THE OFFICIAL BULLETIN OF QUINNIPIAC UNIVERSITY

2019–20 Catalog

Quinnipiac University’s online catalog provides descriptions of courses, majors and minors offered by academic departments and programs, as well as other university-wide information such as the academic calendar, academic regulations, facilities, financial aid and tuition costs. Degree, major and minor requirements specified in the 2019–20 Catalog are valid for the Class of 2023. Other classes should follow the degree, major and minor requirements specified in the catalog for the year in which they entered Quinnipiac University. For additional questions, please contact the Dean’s Office for the associated school.

Sustainability Initiatives

We, as members of the Quinnipiac Community, strongly believe it is our responsibility to work toward a more environmentally sustainable society. The university utilizes renewable electricity and single-stream recycling. Campus buildings feature energy-efficient heating and cooling units, energy-efficient lighting fixtures, Green Guard carpeting and windows with energy-efficient thermal glazing. Whenever possible, environmentally friendly paper and supplies are used. In fact, the initiative to move to an online catalog was approved in part because of the savings in paper for printed copies.

No section of this catalog may be copied or reproduced without the permission of the Office of Public Affairs, Quinnipiac University.

Admission requirements, fees, rules and regulations and academic programs are updated in official bulletins of the university. The university reserves the right to change the contents of this catalog at any time.

STATISTICS ON NONDISCRIMINATION AND COMPLIANCE

Quinnipiac University has a strong commitment to the principles and practices of diversity throughout the university community. Women, members of minority groups and individuals with disabilities are encouraged to consider and apply for admission. Quinnipiac does not discriminate on the basis of race, color, creed, gender identity or expression, age, sexual orientation, national and ethnic origin, or disability status in the administration of its educational and admissions policies, employment policies, scholarship and loan programs, athletic programs or other university-administered programs.

Quinnipiac is in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, and inquiries should be directed to the Learning Commons or to the Office of Human Resources. Quinnipiac complies with the Student Right to Know and Campus Security Act (PL 103-542) and those reports are available from the Office of Public Affairs. Quinnipiac maintains all federal and state requirements for a drug-free campus and workplace; information on student drug and alcohol programs is published in the Student Handbook and employee information is distributed through the Office of Human Resources. Graduation reports are available upon request from the Offices of Admissions and Registrar. Reports on athletic programs are available from the Department of Athletics and Recreation.

Title IX Policy Against Gender-Based Discrimination and Sexual Misconduct

Title IX of the Education Amendments of 1972 prohibits discrimination based on sex in educational programs and activities that receive federal financial assistance. To ensure compliance with Title IX and other federal and state laws, Quinnipiac University has developed policies that prohibit discrimination and misconduct on the basis of gender, such as sexual misconduct, sexual violence, sexual harassment, intimate partner violence, stalking and any other gender-based harassment or misconduct.

Quinnipiac University is committed to providing an environment free from all forms of gender or sex discrimination and sexual misconduct. Members of the university community, guests and visitors have a right to be free from sexual harassment, violence and of gender-based discrimination and harassment. The policy is intended to define community standards and to outline the investigation and grievance process when those standards are violated.

These policies apply regardless of the complainant's or respondent's sexual orientation, sex, gender identity or expression, age, race, nationality, religion or ability. Harassment or discrimination based upon an individual's sexual orientation may be considered gender-based and be subject to the policy. Also, prohibitions against discrimination and harassment do not extend to statements or written materials that are germane to the classroom or academic course of study.

Title IX inquiries may be referred to the Title IX coordinator, Catlin Wells, Title IX Coordinator, at 203-582-7327.

Please see the Title IX (p. 135) page for the full policy.
ACCREDITATIONS AND PROFESSIONAL MEMBERSHIPS

Quinnipiac University is accredited by the New England Commission of Higher Education. Accreditation of an institution of higher education by the commission indicates that it meets or exceeds criteria for the assessment of institutional quality periodically applied though a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the commission is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding the accreditation status by the commission should be directed to the administrative staff of the institution. Individuals also may contact:

New England Commission of Higher Education
3 Burlington Woods Drive, Suite 100, Burlington, MA 01803-4514
781-425-7785
Email: cihe@neasc.org

Quinnipiac also is accredited by the Board of Education of the state of Connecticut and is authorized by the General Assembly of the state to confer such degrees and grant such diplomas as are authorized by the board.

The State Bar Examining Committee has approved the undergraduate programs of Quinnipiac for pre-law education.

Specific school accreditations are listed below.

College of Arts and Sciences
The legal studies minor/certificate has been approved by the American Bar Association as a paralegal education program.

School of Business
Quinnipiac’s undergraduate and graduate business programs are accredited by AACSB International—the Association to Advance Collegiate Schools of Business. As a school of business with AACSB-accredited business programs, Quinnipiac meets or exceeds established standards, as determined by periodic AACSB peer group review. The AACSB quality standards relate to curriculum, faculty resources, admission, degree requirements, library and computer facilities, financial resources and intellectual climate.

School of Education
The master of arts in teaching program is fully accredited by the National Council for Accreditation of Teacher Education (NCATE) and the Connecticut Department of Education. The U.S. Department of Education recognizes NCATE as a specialized accrediting body for schools, colleges and departments of education. The educational leadership program is fully accredited by the Connecticut State Department of Education and is aligned with the leadership standards of NCATE.

School of Engineering
The BS in civil engineering, industrial engineering, mechanical engineering and software engineering programs are accredited by the Engineering Accreditation Commission of ABET Inc., abet.org (http://www.abet.org).

School of Health Sciences
All programs in the Schools of Health Sciences have been approved by appropriate state and national agencies or are in the process of accreditation.

- The athletic training program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).
- The cardiovascular perfusion program is accredited by the Commission on Accreditation of Allied Health Education Programs.
- The social work program is fully accredited by the Council on Social Work Education (CSWE).
- The occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE).
- The pathologists’ assistant program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).
- The physical therapy program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE).
- The physician assistant graduate program is accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA).
- The radiologic sciences bachelor’s degree program is accredited by the Joint Review Committee on Education in Radiologic Technology.
- The radiologist assistant program is formally recognized by the American Registry of Radiologic Technologists (ARRT).

School of Law
Quinnipiac has received full approval from the American Bar Association to award the JD degree through the Quinnipiac University School of Law. The American Bar Association also has acquiesced in the offering by the Quinnipiac University School of Law of the Master of Laws in Health Law (the “Health Law LLM”). (Under its standards, the ABA does not “approve” post-JD programs such as the LLM, but only considers whether it will or will not “acquiesce” in such proposed programs at an accredited law school.) The Quinnipiac University School of Law is also a member of the Association of American Law Schools.

School of Medicine
The Frank H. Netter MD School of Medicine is accredited by the Liaison Committee on Medical Education. The school is also authorized by the state of Connecticut to award the MD degree. The Frank H. Netter MD School of Medicine is a member of the American Association of Medical Colleges.

On March 22, 2017, Quinnipiac University became an institutional participant in the SARA initiative and an approved member of the National Council for State Authorization Reciprocity Agreements (NC-SARA). The State Authorization Reciprocity Agreement (SARA) is an agreement among its member states, districts and U.S. territories...
that establishes comparable national standards for interstate offering of postsecondary distance-education courses and programs. The Connecticut Office of Higher Education is the portal agency for administration of SARA in Connecticut and is responsible for the resolution of out-of-state students’ complaints against SARA institutions located in Connecticut.

School of Nursing

- The bachelor of science in nursing program is accredited by the Commission on Collegiate Nursing Education (CCNE).
- The master of science in nursing program is accredited by the Commission on Collegiate Nursing Education (CCNE).
- The doctor of nursing practice program is accredited by the Commission on Collegiate Nursing Education (CCNE).
- The doctor of nursing practice program for nurse anesthesia is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs (COA).

Students may review information on the various accrediting agencies and accrediting reports by contacting the Office of Academic Innovation & Effectiveness.

Quinnipiac reserves the right to change any provisions of this catalog at any time.
ABOUT QUINNIPIAC UNIVERSITY

Quinnipiac is a thriving, three-campus university located in southern Connecticut. As an independent, not-for-profit institution, it offers more than 110 programs to an estimated 7,000 undergraduates and 3,000 graduate, medical and law students. The university, founded in New Haven in 1929 with an emphasis on business, was known as the Connecticut College of Commerce until it changed its name in 1951 to Quinnipiac College. Soon thereafter, having outgrown its New Haven surroundings, the school moved to its 250-acre Mount Carmel Campus in Hamden, Connecticut, 90 minutes north of New York City, two hours from Boston and eight miles from metropolitan New Haven.

In 2000, the name Quinnipiac University was adopted to better reflect the quality and diversity of the school’s programs at both the undergraduate and graduate levels. Over the years, Quinnipiac has experienced dramatic and steady growth in the quality and scope of its academic programs. Our eight professional schools and the College of Arts and Sciences offer programs in business, communications, education, engineering, health sciences, law, medicine, nursing and the arts and sciences.

The Mount Carmel Campus, next to Sleeping Giant State Park, contains academic buildings and residence halls. The nearby 250-acre York Hill Campus houses the People’s United Center, residence halls for 2,000 students, the Rocky Top Student Center, a fitness facility and a 2,000-car parking garage. A third 150-acre campus in North Haven serves as home to the School of Education, School of Health Sciences, School of Law, School of Nursing, the Frank H. Netter MD School of Medicine and other graduate programs.

Quinnipiac consistently ranks among the top regional universities in the North in U.S. News & World Report’s America’s Best Colleges issue. Throughout its history, Quinnipiac has remained true to its three core values: high-quality academic programs, a student-oriented environment and a sense of community. The university is easily reached via the Connecticut Turnpike (Interstates 95 and 91), the Merritt Parkway (Route 15) and Interstate 84.

QUINNIPIAC’S MISSION

University Mission Statement

An education at Quinnipiac embodies the university’s commitment to three core values: high-quality academic programs, a student-oriented environment and a strong sense of community. The university prepares undergraduate and graduate students for achievement and leadership in business, communications, engineering, health, education, law, medicine, nursing and the liberal arts and sciences.

Quinnipiac University educates students to be valued and contributing members of their communities through a vital, challenging and purposeful educational program. Students engage real-world issues through practice and the consideration of different perspectives.

To fulfill its educational mission Quinnipiac:

• Offers degree programs centered on effective practice that are strengthened by the integration of a liberal education
• Cultivates critical thinking, intellectual integrity, curiosity and creativity in the pursuit of knowledge
• Provides a variety of learning and service experiences to facilitate student achievement
• Maintains a strong commitment to a diverse and inclusive student body, faculty and staff
• Fosters an understanding of and respect for the multiplicity of human perspectives and belief systems
• Supports faculty teacher-scholars who are effective teachers and who engage in scholarship with valuable intellectual and practical results

A Student-Oriented University

Quinnipiac is committed to making each student’s experience a satisfying and rewarding one. It strives to do this in both personal and academic contexts. Students are represented on all key bodies involved in decision making, including the Board of Trustees.

The Student Government Association is involved in fundamental university issues, as well as ongoing campus events. Activity clubs, organizations, societies, fraternities, sororities and ethnic, religious, cultural and political groups all play important roles in the day-to-day life of the community.

In keeping with the value system at Quinnipiac, emphasis is on the individual, not on social or economic standing. Students are selected solely on the basis of merit and qualifications, with major consideration given to the innate qualities of motivation and character.

As a result, the student body reflects a wide spectrum of racial, religious and economic backgrounds, personalities and lifestyles that provide diverse social and cultural experiences. The cosmopolitan student community represents 48 states throughout the United States as well as 45 countries abroad.
Admissions Procedures

Consistent with the university mission, Quinnipiac welcomes inquiries from serious students of all ages and backgrounds who are interested in professional preparation in fields related to business, communications, education, engineering, health sciences, nursing, public service, and the theoretical and applied disciplines in arts and sciences. An education at Quinnipiac integrates technical, professional and liberal studies. The students who benefit most from Quinnipiac are those who are motivated for a life of professional service and prepared to undertake a program of studies that is broad in its cultural perspectives, while being focused in its technical and professional dimensions. Quinnipiac University seeks students who wish to pursue professional careers, including those who, as yet, are undecided on their fields.

Students interested in Quinnipiac University are urged to acquaint themselves thoroughly with Quinnipiac as early in their decision-making process as possible. A campus visit and admissions interview is strongly recommended. If a campus visit is not possible, prospective students are advised to meet with one of Quinnipiac’s representatives when they visit the student’s school, or to make arrangements for a telephone conference. The admissions office hosts on-campus interviews Monday through Friday year-round and group information sessions weekdays throughout the year and on Saturday mornings during the fall and spring semesters. Fall and spring open houses, Admitted Student Days (in late March or early April) and online interactive sessions also provide opportunities to learn more about Quinnipiac. We welcome your interest. Please call our toll-free number, 800-462-1944 or 203-582-8600, visit our Quinnipiac webpage (http://www.qu.edu/visit), or email us at admissions@qu.edu.

Admissions Process

Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available. Students applying for entry into the Physician Assistant (PA) program should apply by Oct. 15. Those applying for entry into the Nursing, Occupational Therapy (OT) or Physical Therapy (PT) programs should apply by Nov. 15. Students may apply using the Common Application or the Quinnipiac University application. Click here (http://www.qu.edu/apply) for more information or to apply.

File review begins as applications become complete beginning September 15, and students are notified of an admissions decision starting in the late fall. February 1 is the recommended application deadline. Students who are placed on a wait list are notified by June 1 of any movement opportunity. There is an early decision option (with an application deadline of November 1) available for all majors for freshman applicants for the fall. See the Quinnipiac application webpage (http://www.qu.edu/apply) for details.

Transfer students should apply for admission by mid-November for the Spring (January) semester, or by June 1 for fall (August) entry. Applicants for athletic training, nursing and the radiologic sciences are considered on a space-available basis only for the Fall term. The recommended application deadline is June 1. Official transcripts from all institutions attended must be provided. Most programs look for a minimum grade point average of 2.5 (3.0 for health sciences) for consideration. Those interested in the PT and PA programs may only apply at the graduate level.

Quinnipiac works closely with the community and technical colleges in Connecticut and elsewhere, and recommends that students follow a transfer curriculum of study if their plan is to move to a four-year university. Students may wish to arrange an admissions appointment to discuss program requirements.

Admissions Requirements

Admission to Quinnipiac University is competitive, and applicants are expected to present a strong college preparatory program in high school. Official SAT or ACT scores are required for all applicants in health sciences and nursing. Quinnipiac is test optional for applicants considering programs in arts and sciences, business, communications, education and engineering. The admissions staff looks for a B or higher grade point average in a challenging academic program through the senior year. If the high school does not provide a rank in class, we will estimate based on the high school profile. We will use the highest individual scores on the SAT in evidence-based reading and writing and math or the highest ACT composite score. The admissions website provides a range of information on the number of applicants and average scores, including ethnic and geographic information about the recent incoming class.

All freshman applicants for admission are expected to present:

1. A high school diploma from an approved secondary school or its equivalent prior to enrolling.

2. A secondary school transcript showing as completed, or in progress, a college preparatory sequence including: English, four units; mathematics, three units (physical and occupational therapy, nursing, physician assistant and engineering applicants should have four years); science, three units (all health science, nursing and engineering applicants are expected to have four years including biology and chemistry; physical therapy applicants should also have physics); social science, two units; academic (college preparatory) electives, four units. Total academic units expected: 16. First quarter grades in the senior year should be sent as soon as they are available.

3. All official score results for the Scholastic Reasoning Test (SAT I) of the College Entrance Examination Board (CEEB) or of the American College Testing Program (ACT). The writing portion is not required. Official Test scores are REQUIRED for the following individuals:

- Students applying to the School of Health Sciences or School of Nursing
- International Students (SAT, ACT or TOEFL or IELTS)
- Students who have been home-schooled
- Athletes playing a Division I sport (as required by the NCAA)
- Students who are interested in our dual-degree programs or accelerated dual-degree programs:
  - Accelerated Dual-Degree BS/MBA in Business (3+1)
  - Accelerated Dual-Degree BA/MS in Communications (3+1)
  - Accelerated Dual-Degree BS in Biology or Biochemistry/MS in Molecular and Cell Biology (3+1)
  - Accelerated Dual-Degree BA in Theater/MBA in Business (3+1)
  - Accelerated Dual-Degree BA or JD (3+3) with the School of Law
• Dual-Degree BA or BS/Master of Arts in Teaching (4+1) as a certain score will waive a portion of the PRAXIS exam
• Accelerated Dual-Degree BA or BS/Master of Social Work (3+2)
• Accelerated Dual-Degree BS/MHS in Advanced Medical Imaging and Leadership (3+1)

Test scores are OPTIONAL for those applying to the College of Arts and Sciences, School of Business, School of Communications or School of Engineering.

4. A completed Quinnipiac University application, or the Common Application with a nonrefundable application fee of $65.
5. A personal statement or essay (250-word minimum).
6. An interview is encouraged but not required.
7. A teacher or counselor letter of recommendation.

Transfer Requirements
Transfer applicants must submit the documents listed above for freshmen with the following exceptions:

1. An official transcript from each post-high school institution attended, even if no courses were completed.
2. Applicants who graduated from high school more than five years ago or have successfully completed the equivalent of one year (30 credits) of college study are not required to submit entrance examination scores. Students applying to health science majors with less than 30 credits must submit test scores.
3. Students seeking a second bachelor’s degree need only submit the application form and official transcripts from all colleges or universities attended even if no courses were completed.
4. The application fee for transfer applicants is $65.

International Student Admissions
Quinnipiac University welcomes applications for undergraduate study from international students. Upon application, international students are requested to submit English language descriptions of secondary schools, colleges and universities attended.

Applicants from non-English-speaking countries also must submit the following:

1. Certified translations of all prior secondary and collegiate academic records.
2. A teacher or counselor letter of recommendation.
3. Proof of English proficiency: TOEFL, IELTS, SAT or ACT scores. Students who have studied entirely in English throughout secondary school may qualify to receive a waiver for the English proficiency requirement, although we still highly recommend that you submit a TOEFL or IELTS score. All waiver requests may be made by contacting the Office of Admissions. Requests should provide evidence as to why the English proficiency requirement should be waived and will be considered on a case-by-case basis.
4. Official documentation of financial support for undergraduate study and living expenses must be submitted to the admissions office before an I-20 can be issued to the student. The statement of financial support can be downloaded from the website.

Online Admissions
For information on Quinnipiac University online programs, click here (p. 497).

Advanced Standing/Placement
Freshman Advanced Standing
Advanced standing or placement will be considered for entering freshmen who have successfully completed college-level credit courses (with a grade of C or better on an official transcript) through a regionally accredited college or university, or who have achieved an acceptable score on an appropriate examination:

1. Advanced Placement Program of the College Entrance Examination Board
2. International Baccalaureate

Transfer Student Credit
An unofficial evaluation of credit is completed as part of the evaluation process for transfer students. Quinnipiac University normally grants transfer credit for college-level courses appropriate to the chosen curriculum completed with a grade of C or better at a regionally accredited college or university. Certain majors may request course completion within a five-year period. Official transfer of credit occurs once an admitted student matriculates into a program of study.

A student who has completed courses at an institution not granting degrees, or who has extensive experience in a specialized field, may request comprehensive examinations or the College Level Examination Program (CLEP) to help determine placement.

Tuition and Fees
Summary of Undergraduate Charges

Tuition and Fees for 2019–20

<table>
<thead>
<tr>
<th>Fee</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full-time undergraduate students taking 12–16 credits per semester</td>
<td>$48,560 per year ($24,280 per semester)</td>
</tr>

<td>$1,075 per credit</td>
</tr>
<tr>
<td>Technology Fee: Full-time students</td>
<td>$720 per year</td>
</tr>
</tbody>
</table>

A number of undergraduate health science and engineering programs generally require students to take more than the traditional 12–16 credits. For more information about tuition and fees for these specialized programs, please visit the academic website (https://www.qu.edu/academics/undergraduate.html#ourschools) of the respective school.

For tuition and fees associated with graduate programs, School of Law, School of Medicine, QU Online or the Business Four-Year BS/MBA program, please visit the respective websites below.

Graduate Tuition and Financial Aid (https://www.qu.edu/graduate-tuition-financial-aid.html)
School of Law Financial Aid (https://www.qu.edu/schools/law/financial-aid.html)
School of Medicine Financial Aid (https://www.qu.edu/schools/medicine/financial-aid.html)
QU Online (https://quonline.quinnipiac.edu)
Accelerated Dual-Degree BS/MBA (3+1) (https://www.qu.edu/schools/business/programs/mba/accelerated-dual-degree-bs-mba.html)

Miscellaneous expenses (books, travel and personal) average $1,400 per year.

The university offers a variety of payment plans to help you meet your educational expenses. These plans are available for the fall and spring terms, both on an annual and semester basis. Please note that payment plans are not available for the summer terms. The payment plan is not a loan program, and there are no interest or finance charges. The only initial cost to you is a small, nonrefundable enrollment fee per agreement.

Families are encouraged to enroll online at the Bursar's website (https://parents.qu.edu/finances.html#billingandpayments). Once you have set up your account through this secure website, you can authorize your monthly payments to be electronically sent from your checking, savings or credit card account.

Resident Fee (Room and Board)
The resident fee (room and board) is an all-inclusive fee for students living in on-campus housing. The resident fee for students living in a standard room is $15,140 per year. The resident fee for students living in a standard room with a kitchen is $15,900. The resident fee for students living in a single with a kitchen is $18,270 per year. The resident fee for students living in off-campus houses and Whitney Village is $14,360 per year.

All costs are based on the 2019–20 figures. The Office of Undergraduate Admissions and the Quinnipiac University website (https://www.qu.edu/tuition-financial-aid.html) can supply financial information.

Quinnipiac requires that all students obtain a university ID card, known as the QCard. Various accounts are associated with the QCard, chiefly the required dining service and QCash.

Required Dining Service
All full-time undergraduate resident students may choose one of three levels of dining service: Silver for $1,685 per semester, Gold for $1,785 per semester, or Platinum for $1,885 per semester. Any unused balance from the fall semester may be carried over to the spring semester (provided that the student is enrolled for the spring semester), but no carryover is permitted from spring to the following fall.

All commuter students are required to pay $200 per semester for dining service. Any unused balance from the fall semester may be carried over to the spring semester (provided that the student is enrolled for the spring semester), but no carryover is permitted from spring to the following fall.
Please visit the Quinnipiac website (https://www.qu.edu/life/student/dining.html) to find out more information about the required dining service plans.

**Quinnipiac**

Quinnipiac also offers QCash, a prepaid debit account that can be used to make a variety of cashless purchases. QCash can be used at the campus post office, the bookstore, the dining areas on all three campuses, and for copy/print, laundry and vending machines. It also is accepted at many popular off-campus business establishments and restaurants. Students may open an account with a deposit of any amount; additional deposits may be made as needed throughout the semester. Balances are carried forward from semester to semester so long as the student is enrolled at Quinnipiac. Refunds of unused QCash, less an administrative fee of $25, are made upon a student’s graduation (upon request) or withdrawal from the university.

Please visit the Quinnipiac website (https://parents.qu.edu/finances.html#qcardinformation) to find out more information about the QCash.

**University Laptop Program**

All incoming students are expected to have a laptop that meets academic requirements and technical standards. Quinnipiac has a laptop program that is both cost effective and well supported. See the Student Resources and Services section (p. 26) for more information on the program.

**Financial Aid**

Quinnipiac seeks to assist each of its students and his or her parents to receive the maximum federal, state and institutional financial aid for which they are eligible. Institutional financial aid is available to full-time undergraduate students demonstrating eligibility according to Quinnipiac application procedures and funding policies. Aid is provided as a “package,” which may include grants, scholarships, campus employment (Work Study) and loans. It is the goal of Quinnipiac to coordinate aid eligibility so that a Quinnipiac education is within the means of each student and his or her family.

Quinnipiac’s financial aid policy is built on the principle of supplementing student and family contributions toward the cost of attending college. This principle is rooted in the belief that primary responsibility for meeting college costs rests with the student and the family. Financial aid eligibility, therefore, is measured between the cost of attending Quinnipiac and the reasonable support expected from student earnings and savings and from family income, assets and resources. To help Quinnipiac stretch its funds to assist as many students as possible, financial aid applicants are expected to explore all sources of external support for which they might qualify. Check your high school, community and other affiliations for opportunities.

Students should apply for financial aid by filing the Free Application for Federal Student Aid (FAFSA) by March 1. All currently attending students who wish to apply for or renew their aid must file the FAFSA for renewal prior to April 1. Detailed information and links to both forms can be found on Quinnipiac’s Tuition and Financial Aid webpage (http://www.quinnipiac.edu/finaid). All financial aid applicants are required to meet Quinnipiac’s standards for satisfactory academic progress for financial aid recipients and applicants. The policy is available here (p. 69), and is also published in the Student Handbook and is available online (https://www.qu.edu/admissions/undergraduate-admissions/)

tuition-and-financial-aid/undergraduate-financial-aid/satisfactory-academic-progress) and from the Office of Financial Aid.

**Academic Scholarships**

A variety of academic scholarships are awarded at the time of entry and are renewable. The value of most academic scholarships ranges from $7,000-$28,000 per year. Consideration for all scholarships is given to students who have provided all application materials by Feb. 1. Visit Quinnipiac’s Scholarships webpage (https://www.qu.edu/tuition-financial-aid/scholarships.html) for current academic scholarship award information as well as the criteria for renewal.

**Veterans Benefits**

Quinnipiac University accepts all U.S. Department of Veterans Affairs (VA) Education and Vocational Rehabilitation and Employment (VR&E) benefits available to eligible veterans and dependents. In addition, Quinnipiac is a proud participant of the Yellow Ribbon program. Any student eligible and electing to utilize VA education benefits should apply for a Certificate of Eligibility (COE) via the VA Online Application (VONAPP) website (http://vabenefits.vba.gov/vonapp). The COE must be submitted to Quinnipiac’s director of veteran and military affairs prior to the start of classes. For more information or questions concerning VA benefits, contact 203-582-8867 or visit Quinnipiac’s Veterans and Military Benefits webpage (https://www.qu.edu/tuition-financial-aid/veterans-benefits.html).

**Military Tuition Assistance (TA)**

Quinnipiac University has recently partnered with the Department of Defense via a Memorandum of Understanding (MOU), which provides eligible active and reserve military members the opportunity to receive TA from their respective service. To find out eligibility requirements, service members must visit their military installations’ college office or visit their command career counselor.

**Reserve Officer Training Corps (ROTC)**

**Air Force ROTC (Detachment 0009)**

Quinnipiac students meeting Air Force requirements may participate in Air Force Reserve Officer Training Corps (AFROTC) cross-town at Yale University.

The AFROTC program is available to Quinnipiac University students at Yale University’s main campus in New Haven. Through the AFROTC program, Quinnipiac University students, without paying extra tuition, can pursue a commission as an officer in the United States Air Force. The freshman and sophomore courses carry no military obligation and are open to all students. Air Force ROTC scholarships also are available for qualified students. These scholarships pay up to full tuition and fees, as well as money for books and a monthly tax-free stipend. Visit the Air Force ROTC Scholarship website (https://www.afrotc.com/scholarships) for more information concerning scholarships.

Students enroll in a four-year or three-year (if they join at the start of sophomore year) AFROTC sequence. Students commute to New Haven on the days listed below for AFROTC-specific classes and events. Up to 17 credits may be transferred to Quinnipiac and counted toward degree requirements as free electives.
Qualified students should contact the AFROTC office at 203-432-9431 or visit the Yale AFROTC website (https://afrotc.yalecollege.yale.edu).

**AFROTC Courses**

- **USAF 101/102 “The Foundations of the USAF”**
  Thursdays, 1–1:50 p.m. or Fridays, 10:15–11:05 a.m.

- **USAF 201/202 “The Evolution of Air & Space Power”**
  Thursdays, noon–12:50 p.m. or Fridays, 11:15–12:05 p.m.

- **USAF 301/302 “USAF Leadership Studies”**
  Tuesdays, 8:30–11:20 a.m.

- **USAF 401/402 “National Security Affairs/Prep for Active Duty”**
  Contact the ROTC department for class days/times.

- **Leadership Laboratory**—Thursdays, 7:30–9:10 p.m.

- **Physical Training**—Tuesdays, 6:30–7:30 a.m. and Thursdays, 6–7 a.m.

**Army ROTC**

The Army ROTC program is available to Quinnipiac University students at the University of New Haven's (UNH) campus in West Haven. The program is open to all physically qualified students who are U.S. citizens and meet other specific requirements. Students are required to be non-matriculated at UNH and enrolled in MSL-1101 (Military Science). Successful completion of the program can qualify the student for a commission in the United States Army, Army Reserve or Army National Guard. Potential students are required to interview with Army ROTC leadership prior to acceptance. For more information, contact the Army ROTC Recruiting Office at 203-931-2998 or visit the UNH Army ROTC website (https://www.newhaven.edu/lee-college/undergraduate-programs/rotc). Visit the Army ROTC Scholarship website (https://www.goarmy.com/rotc/scholarships.html) for more information concerning scholarships.

Albert Schweitzer Institute

The Albert Schweitzer Institute cultivates the legacy of Albert Schweitzer — in thought and action — at Quinnipiac University and on a worldwide basis.

Albert Schweitzer, the 1952 Nobel Peace Prize Laureate, was recognized for his contributions to peace by serving the medical needs of underserved populations in Africa, bringing attention to the harms perpetrated upon humans and the biosphere by atmospheric nuclear testing, and his philosophy of Reverence for Life. In these ways, he became an advocate for peace, for humanitarian values, for medical care, for (social, economic and political) development, for service to others, and for a growing environmental movement.

The institute’s programs include:
• Including students and faculty in an annual peace summit abroad, organized around the activities and interests of the living Nobel Peace laureates and laureate organizations;
• Engaging students in projects that promote public awareness of Schweitzer’s philosophy and its potential for cultivating a more peaceful, sustainable world.

The institute, located adjacent to the campus at 660 New Road, houses the offices of its staff as well as the Albert Schweitzer museum, which consists of artifacts and archives from Schweitzer’s collections.

Carl Hansen Student Center

This multipurpose facility located on the Mount Carmel Campus provides opportunities for the Quinnipiac community to come together in a relaxed atmosphere. The Carl Hansen Student Center is home to Quinnipiac’s main dining hall and a variety of services and functions which include:

Banking

As the official banking partner of Quinnipiac University, People’s United Bank is available on campus via multiple automated teller machines (ATMs), nearby full-service branches at 3496 Whitney Avenue (203-248-1115) and 2165 Dixwell Avenue (203-281-0531) in Hamden, and online via peoples.com (http://www.peoples.com).

Bookstore

The bookstore, open to the Quinnipiac community and the public, is located in the lobby of the Carl Hansen Student Center, between the post office and the bank. The bookstore carries textbooks, general books, school supplies, licensed merchandise, insignia giftware, greeting cards, snacks, as well as health and beauty aids. The store hours are Monday through Thursday, 9 a.m. to 7 p.m.; Friday, 9 a.m. to 5 p.m.; Saturday, 11 a.m. to 4 p.m. The bookstore is closed on Sundays.

Commuter Lockers

There are commuter lockers conveniently located on the second floor. Lockers are available at the beginning of the academic year on a first-come, first-served basis. Interested commuter students should contact the Office of Student Centers & Student Involvement or fill out a Commuter Locker Request Form, which can be found on Do You QU, under the the Office of Student Centers & Student Involvement profile page.

Campus Information Center

The Information Center is centrally located on the first floor of the Carl Hansen Student Center near the main entrance. It is a resource for the Quinnipiac community and visitors. The Information Center, staffed by student employees, is open Monday through Friday and some weekend hours. Student staff members are available to provide information pertaining to campus events and directions for procedures unique to student activities.

Office Locations

The Carl Hansen Student Center is home to several offices for student organizations such as the Student Government Association, the Student Programming Board, student media groups, fraternities and sororities. The center offers a multipurpose programming space, meeting space, a student media suite, a fraternity and sorority life suite, a student organization and graphic arts suite, multicultural suite, and prayer space.
In addition, the Office of Campus Life (p. 23) is housed on the second floor of the Student Center in suite 202.

**Post Office**
The main post office, located on the first floor of the Carl Hansen Student Center, is open Monday through Thursday, 11 a.m. to 4:45 p.m. and Friday, 11 a.m. to 4 p.m. All resident students are assigned boxes.

**Office of Campus Life**
Campus Life is the center for co-curricular engagement where students find their place, pursue interests and develop passions, cultivate their leadership capability and nurture affinity for Quinnipiac University.

Campus Life empowers students to take ownership of their educational journey. We create spaces where students develop as leaders, citizens and critical thinkers who are prepared to lead change in our global society. Our collaborative co-curricular approach engages members of the Quinnipiac community in experiential learning opportunities, comprehensive campus-wide programming, high-impact service projects and dynamic leadership ventures. We cultivate an environment where resiliency, spirit, inclusive excellence, lifelong learning and affinity for Quinnipiac thrive.

The Office of Campus Life is located on the second floor of the Carl Hansen Student Center (p. 22) on Mount Carmel Campus in suite 202, as well as the fourth floor of the Rocky Top Student Center (p. 29) on the York Hill Campus. The staff can be reached at 203-582-8673 or at student.center@qu.edu.

**Student Learning Outcomes**
Through engaging with Campus Life staff, programs and initiatives, students will:

- Lead within a variety of situational contexts.
- Gain the skills necessary to implement effective resolutions to challenges.
- Actively engage with the broader Quinnipiac and Hamden communities.
- Develop a strong affinity for the university.
- Articulate the impact of experience-based co-curricular experiences on their overall development.
- Articulate the impact of their co-curricular experience on their overall development.
- Model ethical and responsible behavior.
- Be advocates for the welfare of themselves and others.

**CARE (Community, Assessment, Response and Evaluation) Team**
Guided by the university values of a student-oriented environment and a strong sense of community, the CARE (Community, Assessment, Response and Evaluation) team employs a caring, preventive, early-intervention approach with students who exhibit concerning or disruptive behaviors. The multidisciplinary team meets weekly to review and discuss new referrals, ongoing cases and the best course of action to support the student of concern. CARE team members are trained through the National Behavioral Intervention Team Association (NaBITA) in both behavioral intervention and threat assessment. Objective risk rubrics are utilized for consistent and objective assessments of potential risks and emerging threats toward self or others. By partnering with members of the Quinnipiac community, the CARE team works to promote student well-being and success in the context of community safety.

**Behaviors of Concern**
As members of the Quinnipiac University community, we are all responsible for identifying and assisting students who exhibit behaviors that could threaten their well-being or safety or that of the greater community. Students exhibiting any of the behaviors listed below should be referred to the CARE team.

**Health and Wellness Concerns**
- Excessive stress or anxiety
- Bizarre/disjointed thoughts or behavior
- Depressive symptoms
- Exaggerated change in mood
- Self-injurious behavior
- Suicidal ideation or statements
- Hygiene or eating concerns/change in appearance
- Illness/injury
- Substance use/misuse (alcohol and/or other drugs)

**Behavioral Concerns**
- Bias/discrimination (on the basis of race, color, creed, gender identity or expression, age, sexual orientation, national and ethnic origin, disability status or other protected category)
- Destructive behaviors
- Display/use of and/or preoccupation with weapons
- Disruptive behaviors
- Hazing
- Hostile, aggressive and/or intimidating behaviors
- Impulsive and/or risk-taking behaviors
- Inappropriate/concerning written or verbal communication (including course assignments and social media posts)
- Physical assault
- Reports being victimized, targeted or harassed
- Threats (made or received)

**Situational Concerns**
- Withdrawal or isolation
- Transition issues: homesickness, trouble making friends, etc.
- Death of a family member/loved one
- Issues at home/family concerns
- Financial concerns including food insecurity and homelessness
- Unresponsive/unable to locate student
- Interpersonal conflict

**Academic Signs of Concern**
- Inappropriate communication with and/or behavior toward faculty/instructor or classmates
- Concerning written material/class discussion

**NOTE:** Consecutive absences, excessive absences, poor grade on an assignment or quiz/test, and/or other at-risk behaviors (such as late assignments, late arrivals, sleeping in class, among others) should be referred to the Learning Commons (p. 27) through the Retention Alert system.
Making a CARE Referral

CARE and Conduct Incident Reporting Form
The CARE and Conduct Incident Reporting Form (https://cm.maxient.com/reportingform.php?QuinnipiacUniv&layout_id=0) should be used to report any behaviors of concern to the appropriate individuals at Quinnipiac University including but not limited to: concerns related to the well-being of a student, potential violations of the Student Code of Conduct (https://catalog.qu.edu/handbook-undergrad/#policiesext), and general student behavioral concerns regardless of whether they occur on or off campus.

NOTE: The form should NOT be used to report emergencies. If you or another person is in immediate danger, a student is about to harm themselves or others, and/or if a student is found gravely disabled and cannot care for their health and safety please call 911 immediately. If you need immediate assistance in non-emergency situations or are concerned about the well-being of a student outside of business hours, please call Public Safety at 203-582-6200.

Questions and Consultations
The CARE team is always willing to provide consultation to members of our community when questions arise about a potential or existing CARE referral. If you are unsure what steps to take next in a non-emergency situation, call 203-582-CARE or a member of the CARE team during business hours. You can also email CARE@qu.edu.

Additional information can be found via MyQ at myq.quinnipiac.edu/CARE (https://myq.quinnipiac.edu/CARE)

Career Development
Quinnipiac University offers an array of career services specifically geared to students in each of the schools. These services include:

- Individual career counseling and advising sessions
- Assistance with resume/cover letter writing and other job search correspondence
- Interview practice and preparation
- Connections with alumni and employers
- Career fairs, panels and workshops
- Job and internship listings and strategy sessions
- Graduate school information
- School-specific career information

For further information please email qucc@qu.edu (qucc@qu.edu) or visit the appropriate career development page on our website:

General Career Development (http://www.quinnipiac.edu/career-development)

College of Arts and Sciences (https://www.qu.edu/schools/arts-sciences/career-development.html)

School of Business (https://www.qu.edu/schools/business/career-development.html)

School of Communications (https://www.qu.edu/schools/communications/career-development.html)

School of Engineering (https://www.qu.edu/schools/engineering/career-development.html)

School of Health Sciences (https://www.qu.edu/schools/health-sciences/career-development.html)

School of Nursing (https://www.qu.edu/schools/nursing/career-development.html)

Clubs and Organizations
The Office of Campus Life is available to assist all student organizations and campus groups in program development and implementation of cocurricular activities. The staff, in conjunction with other student affairs personnel, provides a support system to foster personal growth and social competency through the development of group activities.

Additional information and guidelines for organizations, as well as procedures for initiating new clubs, are available in the Quinnipiac University Student Handbook and the Office of Campus Life. All policies and guidelines pertaining to organizations are subject to the interpretation of the Office of Campus Life.

Student organizations are listed according to the following categories:

- Academic
- Arts & Entertainment
- Cultural, Spiritual & Identity
- Government & Program Boards
- Fraternity & Sorority Life
- Multimedia
- Political & Advocacy
- Recreational
- Service
- Spirit
- Student Media

For a detailed description of each organization visit DoYouQU (https://qu.campuslabs.com/engage).

Community Service
The Office of Community Service offers a variety of opportunities throughout the year to engage students in local community service. Activities include publishing a directory of local nonprofits, alerting the community to specific nonprofit requests for service and working with faculty to develop service learning courses and projects. The office also organizes special service events including the Bobcat Community Builders, Service Series in the fall and spring semesters, and an end-of-the-year food drive.

The Office of Community Service offers alternative break trips that engage students in community service during spring break in a variety of national locales. Students also have the opportunity to work with a local nonprofit or elementary school through the Community Work Study employment program. Additionally, the office organizes special events and trips including walking tours of New Haven and New York City, and student conferences, and supplements student service initiatives with the Seed Grant program. Students interested in starting new service-focused organizations or initiatives are encouraged to contact the office for guidance and support.

Many student clubs and organizations perform service including Community Action Project, Habitat for Humanity and Alpha Phi Omega. Students interested in regular, ongoing community service opportunities
are highly encouraged to join a student organization to complement the activities offered by the office.

Counseling Services

The Quinnipiac University Health and Wellness Center offers a variety of counseling-related services. Students who are seeking help for emotional distress have access to care. The goal is to assist students through brief therapy while addressing concerns that may be affecting academic performance or the student’s quality of life within the university community.

Our counselors are a resource for students struggling with stress, anxiety, depression, relationship problems, eating disorders and alcohol or drug abuse. Other common problems include difficulty making decisions, low self-esteem, procrastination or the stress of leaving home while adjusting to college life. Counseling staff members are available to assist any student who has been affected through physical or sexual violence or who may be grieving the loss of a loved one. Counseling services are available to all undergraduate and graduate students at no cost.

Location and Hours

Counseling offices are located in the Health and Wellness Centers on the Mount Carmel and York Hill campuses. Services are provided Monday through Friday, from 9 a.m. to 5 p.m. On the North Haven Campus, counseling services are available by appointment.

Making an Appointment

Students wishing to schedule an appointment must complete a confidential counseling form. To schedule an appointment, please call Counseling Services at 203-582-8680 or fill out an Appointment Request Form (https://forms.quinnipiac.edu/CounselingIntake/Form.html) via the Counseling Services MyQ (https://myq.quinnipiac.edu/Student%20Life/Counseling%20Center/Pages/default.aspx) page.

In cases of emergency, call 911 or contact the Department of Public Safety at 203-582-6200.

Services Offered

Diagnostic Evaluation
Each student seeking help through the counseling office is first evaluated by the counselor assigned to the case. At the end of the first visit, the diagnostic evaluation is complete, and the student is given feedback regarding the nature of the problem and the recommendation of how it might be treated.

Individual Counseling
The primary method of intervention is individual counseling. Private consultation with a counselor provides an atmosphere of safety and confidentiality.

Family Intervention
Family intervention is offered when needed to protect the safety of the student or when the student requests assistance with a family problem. Family therapy sessions may be conducted through conference calls or by a scheduled, in-person appointment with parents.

Consultation to Faculty, Staff and Medical Staff
Counselors frequently provide consultation to faculty and staff members as well as medical staff who may have concerns about the well-being of a student. For consultation, counselors are easily reached by phone or via email.

Urgent Visit Services

Emergency evaluation and intervention services are available Monday through Friday, from 9 a.m. to 5 p.m. For emergencies that occur after-hours, students are advised to seek help from the Department of Public Safety or call 911.

Confidentiality

All contacts with the counseling center are confidential except in situations where laws or ethics require notifying a family member or the appropriate authority. Such disclosure is for the purpose of providing the necessary care and protection of the student and community.

Department of Cultural and Global Engagement

Quinnipiac University fosters respect for each individual by honoring the differences inherent among people. As an intellectual community of learners and scholars, we recognize and appreciate our common humanity. Acknowledging that we live in a pluralistic society, we have a genuine desire to ensure that all members of the Quinnipiac community feel empowered to express their own individuality. These principles underscore our central mission of teaching and learning and are vital to achieving national prominence and excellence in education. They also serve as the foundation for promoting the economic, social and cultural well-being of our community, our nation and beyond.

The role of the Department of Cultural and Global Engagement (DCGE) is to engage the campus and surrounding community and to help define, enable and foster an inclusive campus culture that embraces the diversity of identities, ideas and values. For more information, please contact the office at 203-582-7987.

The Department of Cultural and Global Engagement promotes and sustains multicultural and global education by mentoring and advising students, facilitating transformative cultural experiences, preparing students to be responsible global citizens and enhancing creative and critical thinking through local and global academic engagement.

We believe in working in the intersection of internationalization and multicultural education, which provides creative opportunities for faculty, staff and administrators to:

- Help students understand multiculturalism and social justice in a global context.
- Develop intercultural skills.
- Broaden intercultural skills.
- Examine values, attitudes and responsibilities for local/global citizenship.
- See how power and privilege are shifting the local/global context.
- Prepare students to cooperate and compete in a multicultural and global workplace.
Multicultural Education
Multicultural education provides advocacy for the cultivation of a sustainable campus environment that is supportive of a diverse student body. This area:

- Works collaboratively with academic and administrative units to foster intercultural dialogue and programming.
- Delivers academic and social mentorship for underrepresented students to live, work, lead and succeed in a multicultural and global world.
- Assists cultural student organizations in leadership development, program planning and advising to enhance their active engagement and participation in the University and local community.
- Offers programming that enhances students’ understanding and appreciation of various social identities including race, sexual orientation, socioeconomic class and other cultural identities.
- Provide space for high impact learning around issues of diversity, equity and justice through intergroup dialogues.
- Offers transitional support for incoming students of color, first generation and international students through programs such as the QUEST Mentoring Program.
- Provides opportunities for students and faculty to learn about, embrace and celebrate diverse ethnic, racial and cultural identities through trainings, workshops and programming.

Global Education
Global education promotes, supports and develops a wide range of international and intercultural opportunities for all members of the community. This office:

- Provides international experiences through education abroad.
- Maintains a supportive and stimulating environment for international students, faculty and staff.
- Hosts events and programs to increase the international activities at Quinnipiac.

See separate section for Study Abroad (p. 59) information.

International Services
Many Quinnipiac academic programs have developed one- to two-week programs that take place during winter, spring or summer break. These trips enable students to put their knowledge into use while providing service to developing countries around the world. The programs are coordinated with the College of Arts and Sciences and the Schools of Business, Communications, Education, Health Sciences, Nursing and Law. For more information, contact the Department of Cultural and Global Engagement at 203-582-3596.

International Students
The Department of Cultural and Global Engagement supports the international student population at Quinnipiac University. The department organizes on- and off-campus programs and events that are open to both international and domestic students. From the time of acceptance through completion of the program and beyond, the department provides timely information about immigration benefits along with practical guidance about living as a student in the U.S. Additionally, the department hosts a comprehensive orientation program each semester to prepare newly arrived international students and scholars for life and study at Quinnipiac University. The DCGE partners with Residential Life to host Global Living, a first-year, Living-Learning Community for domestic and international students.

For more information, contact the Department of Cultural and Global Engagement at 203-582-8425 or via email at international.student@qu.edu.

Fraternity and Sorority Life
Currently, over 21 percent of Quinnipiac undergraduate students are members of the 21 fraternities/sororities on campus. The Office of Fraternity and Sorority Life is committed to advancing fraternities and sororities through intellectual and interpersonal development within the Quinnipiac University community and beyond. The office is guided by a set of shared values, known as “Pillars,” which shape all community programming and initiatives from the new member experience through Commencement.

The Pillars are:

- Leadership through strength of character
- Growth through intellectual excellence
- Service through civic engagement
- Community through diversity and inclusion

The office provides programs that exemplify the values of the community, such as the Greek Leadership Series, Officer Training Academy, FOUNDATIONS New Member Experience, Social Event Manager Training and more.

Staff in the Office of Fraternity and Sorority Life offer advisement, programming and experiences that are intended to complement the numerous occasions for leadership and involvement provided by individual chapters and their respective governing councils. These experiences afford students opportunities to gain proficiency in the Quinnipiac Essential Learning Outcomes.

Women have the opportunity to join one of nine National Panhellenic Conference (NPC) sororities, one National Pan-Hellenic Council (NPHC) sorority, or one National Association of Latino Fraternal Organizations (NALFO) sorority, which are governed by the Quinnipiac Panhellenic Council.

Governed by the Interfraternity Council, men have the opportunity to join one of 10 North-American Interfraternity Conference (NIC) fraternities.

Quinnipiac also has a chapter of the national honor society for fraternity/sorority students, Order of Omega. Order of Omega is an academic and leadership honor society. Juniors and seniors with a GPA above or equal to the all-fraternity/sorority GPA are able to seek membership.

For more information call 203-582-8673 or email FSLife@qu.edu.

University Laptop Program
Faculty design their courses with the expectation that students will have computer technology in the classroom when requested. For that reason, all incoming students must have a laptop that meets our academic requirements and technical standards. To facilitate this need, Quinnipiac offers a laptop program (https://parents.qu.edu/resources/laptop-technology.html) that is cost effective and exceptionally well supported both on and off campus. The recommended laptops are configured so that they meet the core needs of academic programs and are a key
Learning Commons

The Learning Commons serves as a centralized resource for academic support to students as well as all other members of the university community. In particular, the Learning Commons provides support to students seeking help in their course work, to students with metacognitive development goals, and to students with access needs.

There are two Learning Commons locations: for the Mount Carmel Campus, the Commons is located in the north wing of the Arnold Bernhard Library (phone: 203-582-8628); on the North Haven Campus, the Commons is on the second floor of the School of Law Center (phone: 203-582-5252). Students and others seeking academic support can inquire in person or by phone about accessing the Learning Commons services.

Peer Academic Support

Many students find that their needs for academic support are satisfied by a combination of professors’ office hours and work with a peer educator. The Learning Commons selects, trains and manages a range of peer educators who interact with students during class meetings and outside of the classroom, depending on the course and the peer educational program. Students who have questions should contact the Learning Commons to determine what types of assistance are available for their classes. The following peer educator programs are staffed by students who have earned an A or A- in the class, who have been recommended by faculty, and who have passed a Learning Commons hiring and training process:

• Peer Tutors – The peer tutoring program is certified by the College Reading and Learning Association to the highest level of tutor training available (master level). Tutors are available by appointment at both the Mount Carmel and North Haven Learning Commons for individual and small group meetings. Supporting a wide range of courses from the 100- to graduate level, peer tutors work with students to understand course content, build sustainable and effective learning skills, and plan strategically for test preparation, paper writing or project management as needed.

• Peer Fellows – The peer fellow program is led by a certified coordinator trained at UMKC’s International Center for Supplemental Instruction. Peer fellows support courses identified by faculty and the Learning Commons for their challenging nature. Meeting students in weekly voluntary group study sessions, peer fellows model a critical understanding of course content and effective study methods. Peer fellows inform work with students by attending all class lectures and coordinating with faculty.

• Peer Catalysts – The peer catalyst program primarily supports Quinnipiac’s general education curriculum, with the goals of increasing learning through interaction, building student autonomy and promoting intellectual engagement. Peer catalysts attend and participate in all class meetings, serving to facilitate class discussion and to exemplify the behaviors of successful college learning. Peer catalysts translate between professors and students, contributing to a more successful transition from high school into college, from course to course in the disciplines, and from general education to the disciplines. They also serve as resources to new students unfamiliar with the workings of the university.

• Study Tables – Peer educators (tutors, fellows or catalysts) hold open-door sessions at regular times throughout the week to field questions from students in classes identified as high-demand activities. Study table users can have specific questions answered or engage in more wide-ranging group discussion. When appropriate, study table leaders refer students to peer tutors, peer fellows or full-time staff at the Learning Commons to address their needs for academic support.

Support for Students with Disabilities

The Office of Student Accessibility provides students with disabilities equal access to all university activities and programs. OSA is an integral part of the Learning Commons at both the Mount Carmel Campus and North Haven Campus, coordinating between the academic support programs and students registered with the office. Accommodations are provided in compliance with university policy, section 504 of the Rehabilitation Act, and the Americans with Disabilities Act. Students seeking accommodations will meet with the OSA director or an ADA coordinator; upon review of appropriate medical documentation, the OSA staff will determine appropriate accommodations and will facilitate their implementation. Collaborating with all university departments, the OSA assists students as they develop self-advocacy skills and pursue their academic goals. Questions can be directed to access@qu.edu or 203-582-7600.

Professional Academic Support

The Learning Commons offers individual support from professional staff who help students make better choices about their learning. The Learning Commons is the place students go when they want to achieve a level of performance that they wouldn’t be capable of on their own. Academic coaches work specifically with first-year students to help them navigate the expectations of academic life at the university. Academic specialists meet with students who have finished their first year of study. Both coach and specialist meet one-on-one with students seeking to augment their study skills, time-management practices, reading and comprehension strategies, problem-solving, motivation, test preparation and organization skills. Academic coaches and academic specialists have advanced degrees in a number of fields that allow them to support the cognitive aspects of the college student experience as they affect academic performance. Academic specialists also act as consultants to the schools and college, working with faculty and departments to develop intentional support measures. First-year students begin working with their academic coaches early. Students typically seek out academic specialists to continue the work begun with their coach or when they find that their academic challenges extend beyond problems with a single class or cluster of concepts. Appointments can be made with academic coaches at the Mount Carmel Learning Commons. Appointments with academic specialists can be made at both the Mount Carmel and North Haven Learning Commons locations.

The Learning Commons’ Role in Retention

The Learning Commons serves as a centralized location for programming, for information exchange, and for practice, all of which promote academic achievement. All faculty and staff at Quinnipiac can submit referrals to help students achieve their academic goals through the Learning Commons’ academic referral system. Learning Commons staff coordinate with faculty advisers, Student Affairs and Residence Life staff, and the college and school deans to get ahead of student challenges before they turn into crises. Faculty also collaborate with learning specialists to develop unique in-class interventions to

part of the campus computing infrastructure, designed to support new teaching and learning.
develop specific and transferrable thinking and learning skills as they manifest themselves in the classroom and beyond. Furthermore, Learning Commons staff serve to assist the Academic Integrity Board’s mission of informing ethical behavior and remediating offenses. In all its activities, the Learning Commons engages in a consistent practice of information gathering as a means of better understanding the needs of the Quinnipiac student and planning the activities and programs to meet those needs.

Department of Public Safety

The Department of Public Safety provides the following services for the university community:

- Vehicle and foot patrol of all three campuses, 24 hours a day, seven days a week.
- 24-hour staffing at campus gate entrances.
- Response to all emergencies and requests for assistance, including medical emergencies.
- Investigation of all complaints and completion of written follow-up reports.
- Regular security checks of all residential and academic buildings.
- Escort service (walking escort) 24 hours a day, seven days a week.
- Security services for all student and university events.

The Department of Public Safety maintains a close working relationship with local, state and federal law enforcement partners and other emergency service agencies on matters related to the security and safety of the university community. For routine inquiries, the department can be reached at 203-582-6200. For emergencies, dial 911.

Office of Religious Life

The Office of Religious Life organizes religious programs and events at the university. The three staff religious leaders (Catholic priest/chaplain, Protestant chaplain and Muslim religious life coordinator) oversee their respective communities at Quinnipiac; they coordinate worship and prayer services, and provide spiritual/pastoral counseling. For those students belonging to a community not represented on campus, the office can provide assistance in making connections with local religious resources. The Office of Religious Life serves as a resource to the university on issues of religion, ethics and spirituality. The staff members work to raise the visibility of religion on campus through tradition-specific as well as interfaith programming, and when required, provide a religious presence at university events.

The Center for Religion

The Center for Religion is an integral part of the Office of Religious Life. Its mission is to bring religious voices, viewpoints, beliefs and practices into an engagement with the larger university community to help our students become more fully flourishing, humane individuals, empowered to change the world for the good. Everyone is welcome to participate in the center regardless of religion, perspective or belief. The center is committed to fostering a truly diverse, respectful and inclusive space at Quinnipiac.

For more information, contact the executive director of university religious life at 203-582-8257.

All Jewish events are held at the Peter C. Hereld House for Jewish Life, 560 New Road. For information about Jewish life at Quinnipiac, contact the rabbi at 203-582-8206.

Student Learning Outcomes

Through its mission to bring religious voices, viewpoints, beliefs and practices into an engagement with the larger university community, the Center for Religion holds programs focused around six areas, or vectors. As a result of participating in a Center for Religion program, students will:

- Consider various viewpoints to expand their religious literacy.
- Identify opportunities for local, national and global advocacy.
- Explore the human experience through social justice.
- Examine meaning and values.
- Engage in community building.
- Appreciate diverse cultures through a global encounter.

Residential Life

Living on campus is one of the most impactful experiences a student will have during college. Students have the unique opportunity to live with students from a variety of diverse backgrounds.

The Office of Residential Life is committed to excellence in the development of a living-learning environment that contributes to student success. All professional and paraprofessional staff provide purposeful experiences that will develop students as engaged, responsible and inclusive members of a community.

Quinnipiac houses approximately 5,000 students in university housing, which includes traditional residence halls, suites, townhouses, apartments and single-family homes. For the convenience of our students, Residential Life offices are located on the Mount Carmel Campus in the Student Affairs Center and on the York Hill Campus in the Rocky Top Student Center.

University Housing Options

The university offers a variety of student housing options. Students progress toward more independent living from year to year.

First-Year Residential Experience (FYRE)

First-year students are offered a variety of living options: Irma and Dana are traditional residence halls with two to three people to a room and a community bathroom; Ledges and Commons feature quad-style rooms for four people with a community bathroom; Troup, and Mountainview are suite-style housing consisting of four double-occupancy rooms and a bathroom in the suite; and Founders is apartment-style housing with three double-occupancy rooms and a bathroom and private kitchen in each apartment.

Sophomore Year Experience (SYE)

The sophomore year experience provides second-year students with a residential living environment that supports intellectual and interpersonal growth, self-reflection and co-curricular involvement through the development of intentional connections between students, faculty and staff in the Quinnipiac community. Sophomore students live on the Mount Carmel Campus in the Complex, Hill, Village, Larson and Perlroth or on the York Hill Campus in the Crescent.

Junior/Senior Housing

Juniors can choose to live on the York Hill Campus in apartment-style housing offered in the Crescent, Westview and Townhouses. Another option is at Whitney Village, which is located off campus on Whitney Avenue. Apartments provide one to four bedrooms, a furnished living room, oversized bathroom and a kitchen. Seniors may select from
available apartment-style housing at Eastview and university-owned houses. Most seniors have single bedrooms and all have an extended housing contract. Students living in university-owned houses are minutes away from the Mount Carmel and York Hill campuses.

Graduate Housing
The Office of Residential Life provides housing to graduate students on a limited basis when space is available.

Residential Curriculum
The Office of Residential Life provides intentional learning experiences for all residential students through the implementation of our residential curriculum. The curriculum is a framework for providing sequential learning to students throughout their academic careers. Our curriculum focuses on four key competencies: personal competence, interpersonal competence, practical competence and societal competence. Our educational priority is to provide purposeful experiences that develop students as engaged, responsible and inclusive members of a community.

There are 12 learning outcomes of the Residential Curriculum.

- Students will critique their personal, professional and academic goals.
- Students will analyze how their residential experience has impacted their values.
- Students will assess how aspects of their identity intersect and interact.
- Students will adapt their communication styles to their environment. Students will choose the communication style that best relates to their environment.
- Students will utilize effective conflict management strategies.
- Students will develop and evaluate personally significant relationships.
- Students will encourage healthy behaviors in others.
- Students will apply necessary personal and professional skills.
- Students will develop and revise strategies for achieving professional success.
- Students will articulate a global perspective.
- Students will demonstrate a commitment to a cause.
- Students will demonstrate civic responsibility.

Rocky Top Student Center
The Rocky Top Student Center serves as the living room for the York Hill Campus. This lodge-inspired design, which uses 10 different types of wood, instantly transports students and community members with expansive vistas of New Haven and Long Island Sound. It is easy to marvel at the attention to detail in every aspect of the Rocky Top Student Center as students are surrounded by 293 representations of the Quinnipiac mascot.

Similar to the Carl Hansen Student Center, the Rocky Top Student Center aims to provide opportunities for the Quinnipiac community to come together in a relaxed atmosphere and also offers a variety of services and functions for all members of the Quinnipiac community which include:

Banking
There is an ATM located by the Information Center on the second floor of the Rocky Top Student Center near the main entrance for use during normal business hours.

The Den
The Den at Rocky Top is the largest space in the building and can be reserved for functions of up to 125 people. The space traditionally features large tables perfect for a dinner event, but can also be converted to accommodate a dance floor or informational fair.

Fitness Center
The Fitness Center on York Hill is located on the third floor of the Rocky Top Student Center and is open Monday through Thursday, 7 a.m. to 11 p.m., Friday, 7 a.m. to 9 p.m., Saturday, 10 a.m. to 9 p.m., and Sunday, 10 a.m. to 11 p.m. The center offers group classes and houses free weights, strength and cardiovascular equipment and a spin room.

Information Center
The Information Center is centrally located on the second floor of the Rocky Top Student Center near the main entrance. It is a resource for the Quinnipiac community and visitors. The Information Center, staffed by student employees, is open Monday through Friday. Student staff members are available to provide information pertaining to campus events and directions for procedures unique to student life on campus.

Office Locations
The fourth floor houses additional workspaces for the Office of Campus Life, the Office of Residential Life, Athletics Fitness and Wellness. In addition to these offices there is a shared organizational suite for the Student Government Association, Student Programming Board, and Residence Hall Council and a reservable conference room for students, faculty, and staff.

Post Office
A post office, located in the Rocky Top Student Center on the second floor near the Information Center, is open Monday through Thursday, 11 a.m. to 4:45 p.m.; and Friday, 11 a.m. to 4 p.m.

Public Safety
The York Hill Public Safety office is located on the first floor of the Rocky Top Student Center. Students can call or drop in to address any questions or concerns. Questions regarding parking can be addressed at this location with the Parking and Transportation Coordinator.

Student Health Services
Student health services are available on the first floor of the building. Click here (p. 30) for further information or use the Patient Portal (https://studenthealthservices.quinnipiac.edu) to schedule an appointment.

Division of Student Affairs
Student Affairs Vision Statement
To engage, educate and empower students.
Student Affairs Mission Statement
The Division of Student Affairs cultivates vibrant co-curricular experiences and partnerships that prepare students to discover and pursue their personal and professional goals. To foster a sense of belonging and affirm the value of all students, we develop inclusive and supportive learning environments. We provide exceptional services and opportunities that encourage students to thrive as responsible citizens.

The Division of Student Affairs includes the following offices:

- Dean of Students
- Campus Life: New Student Orientation, Student Centers and Student Involvement, Fraternity and Sorority Life, and Community Service
- CARE Team
- Graduate Student Affairs
- Health and Wellness: Counseling Services, Student Health Services, and Prevention and Wellness Education
- Religious Life
- Residential Life
- Student Conduct

Student Learning Outcomes
Student Affairs has integrated the Quinnipiac University Essential Learning Outcomes (p. 44) throughout the student experience. As such, students who engage in Student Affairs programs and experiences will:

- Demonstrate, integrate and apply knowledge
- Think critically and creatively
- Communicate effectively
- Conduct inquiry and analysis effectively
- Engage collaboratively and responsibly
- Act as responsible intercultural citizens of a diverse world

For office-specific programmatic learning outcomes, please see the following:

- Campus Life Learning Outcomes (p. 23)
- Religious Life Learning Outcomes (p. 28)
- Residential Life Learning Outcomes (p. 29)
- Student Conduct Learning Outcomes (p. 30)

Office of Student Conduct
The mission of the Office of Student Conduct is to assist students in making positive decisions and being responsible citizens in the Quinnipiac and surrounding communities. Using the Student Code of Conduct as a foundation for community standards, the office offers resources and education to students, staff and parents.

The Office of Student Conduct:

- advises and assists parties involved in conduct proceedings
- trains and advises student conduct officers and student leaders
- reviews decisions of the code of conduct process
- maintains all student disciplinary records
- collects and disseminates research and analysis concerning student conduct
- provides educational outreach programs for students

The Office of Student Conduct is located in the Student Affairs Building on Bobcat Way and is open Monday through Friday, 8 a.m. to 5 p.m. For more information please call 203-582-8753.

Making a Referral to the Office of Student Conduct
CARE and Conduct Incident Reporting Form
The CARE and Conduct Incident Reporting Form (https://cm.maxient.com/reportingform.php?QuinnipiacUniv&layout_id=0) should be used to report any behaviors of concern to the appropriate individuals at Quinnipiac University, including but not limited to: concerns related to the well-being of a student, potential violations of the Student Code of Conduct (http://catalog.qu.edu/handbooks/undergraduate/student-organizations/student-organization-conduct-process), and general student behavioral concerns regardless of whether they occur on or off campus.

NOTE: The form should NOT be used to report emergencies. If you or another person is in immediate danger, a student is about to harm themselves or others, and/or if a student is found gravely disabled and cannot care for their health and safety please call 911 immediately. If you need immediate assistance in non-emergency situations or are concerned about the well-being of a student outside of business hours, please call Public Safety at 203-582-6200.

Student Learning Outcomes
As a result of participating in the Student Conduct process, students will:

1. Critical Thinking and Reasoning: Analyze their behavior and its effect on the community.
2. Responsible Citizenship: Identify the impact of personal decisions.
3. Social Intelligence: Define their personal values.

Student Health Services
The mission of Quinnipiac University Student Health Services is to restore health, educate and support the Quinnipiac community by providing student-centered acute and preventive health services. Our vision is to promote a healthy campus community where students can enjoy optimal health as they pursue their academic, career and personal goals. Our highest priority is to meet the emergent health needs of the student population through assessment, triage, treatment, education and referral.

Services Offered
Services are available only to students who have completed and submitted the student health services requirements within the Patient Portal (https://studenthealthservices.quinnipiac.edu).

- Acute care
- Allergy injections
- Rides to local appointments and pharmacies
- Flu vaccine clinics
- Health education materials
- Dietitian on staff
- Referral services
• STI screenings
• Women's health services
• After hours Nurse Telephone Triage

Student Health Services does not participate in third-party insurance billing. All charges for referrals, diagnostic procedures and lab work will be billed directly to the student at the student's home address. Quest Diagnostics is the default laboratory unless the student advises the health care provider at the time of service. A nominal fee is charged for gynecological exams. Routine services and supplies are provided without charge. Prescriptions may be taken to local pharmacies to be filled at the usual and customary fee. Students have the option to purchase some medications through Student Health Services.

Student Requirements

Quinnipiac University requires all students to be adequately immunized against measles, mumps, rubella and varicella, according to Connecticut state requirements. A meningitis vaccine is required for anyone living in campus-owned housing within five years from the first day of classes.

Students are responsible for completing their student health requirements through the Patient Portal (https://studenthealthservices.quinnipiac.edu).

All students must maintain major medical insurance. Quinnipiac University, along with Gallagher Student Health, has developed a health insurance plan especially for students. The plan provides coverage for illnesses and injuries that occur on and off campus and includes special cost-saving features to keep the coverage as affordable as possible. A student may waive health insurance coverage if he or she presents evidence of other health insurance under a plan that provides benefits equal to or greater than the Quinnipiac University Student Health Insurance Plan. Students must document evidence of coverage and make an online waiver decision by the waiver deadline of June 15. For additional information regarding the plan, please visit the Gallagher Student Health & Special Risk website (https://www.gallagherstudent.com).

Making an Appointment

To schedule an appointment, please access your Patient Portal (https://studenthealthservices.quinnipiac.edu) or call Student Health Services at 203-582-8742.

Hours

Mount Carmel Campus
During the Academic Year
Monday - Friday: 8 a.m. - 8 p.m.
Saturday - Sunday: 10 a.m. - 4 p.m.

During summer and winter breaks: 8 a.m. - 4 p.m., Monday - Friday

York Hill Campus
During the Academic Year
Monday - Friday: 12 p.m. - 8 p.m.

During summer and winter breaks: Closed

Class excuses are not issued to students. Students who are ill are expected to contact their respective professors to inform them of their illness. Professors may contact Student Health Services to verify this information and will be told the student was or was not seen by a professional staff member. Particulars of student visits are not shared unless a student completes a release of information form. Parents or legal guardians are notified of serious illness and emergencies at the discretion of the professional staff.

Additional Resources

There is a full-time Prevention and Wellness Educator on staff to build, develop, coordinate and administer programs and initiatives that address alcohol/other drug use, gender-based discrimination, sexual misconduct, physical and mental health, as well as other related issues that contribute to the health and wellness of Quinnipiac students.

After Hours Nurse Telephone Triage: 203-582-8742
Counseling Services: 203-582-8680
Public Safety: 203-582-6200

For additional information, please click Student Health Services (https://my.q Quinnipiac.edu/Student%20Life/Student%20Health%20Services/Pages/default.aspx).

Technology Assistance

All incoming students are required to have a laptop computer readily available to them with no exceptions. Information Services annually recommends a specific hardware and software laptop configuration that meets or exceeds these technical standards (specific information on the most current program can be found on the Quinnipiac laptop technology (https://parents.qu.edu/resources/laptop-technology.html) webpage). By selecting the recommended laptop, students will receive exceptional service and support on and off campus. Students who elect to bring their own laptops to campus (other than the recommended ones) also will be afforded technology assistance often of a less comprehensive nature due to the many possible variations of alternatives. Quinnipiac has two Technology Centers, where faculty and students can receive computer repair services as well as assistance with various equipment and computer software programs licensed to Quinnipiac University. Ultimately, it is the responsibility of the student to perform in the classroom.

Although laptops meet the vast majority of student needs, for those disciplines that require more specialized hardware or software, the university has more than 800 computers in 36 computer laboratories throughout the campus. In addition there are numerous virtual labs which host program-specific software available through virtual desktops that can be accessed from anywhere. The university maintains a secure and advanced data network that connects all university computers on all three Quinnipiac campuses. Students, faculty and staff are able to access this secure network through wired and wireless access. Wireless access is found across all three campuses, including the residence halls, classrooms, athletic fields and public areas.

The Arnold Bernhard Library is open 24 hours a day during the academic year, and contains more than 100 publicly available computers. The library also provides an extensive collection of online bibliographic databases and full text journals for use in the library or remotely through the campus network.

Transitional Services for Underrepresented Students

Quinnipiac is committed to ensuring that underrepresented students (international students, students of color and first-generation students) have a successful educational experience. The Quinnipiac University
Enriching Student Transitions Program (QUEST) is a mentoring program focused on easing the transition of incoming underrepresented students (students of color, first generation and international students) to the university. The Department of Cultural and Global Engagement pairs incoming students with a faculty or staff mentor and a peer mentor to assist with the academic and social transitions to campus. First-year students are recruited during the summer prior to their arrival in the fall semester.

For further information and assistance, please contact the Department of Cultural and Global Engagement at 203-582-8425.
ATHLETICS AND RECREATION

Quinnipiac recognizes the importance of athletics and recreation in student life. The university supports 21 highly competitive, Division I intercollegiate teams, as well as an extensive campus recreation program. The campus recreation program, which provides access to fully equipped fitness centers consists of intramurals, fitness and many leisure-time offerings. For specific program information, email athletics@qu.edu.

Athletics

NCAA Division I intercollegiate athletic teams for men include baseball, basketball, cross-country, ice hockey, lacrosse, soccer and tennis. Women compete in acrobatics and tumbling, basketball, cross country, field hockey, golf, ice hockey, indoor and outdoor track, lacrosse, soccer, tennis, rugby, softball and volleyball.

Quinnipiac has full memberships in the following NCAA Division I conferences:

- Metro Atlantic Athletic Conference (MAAC)
- ECAC Men’s and Women’s Ice Hockey
- Big East (Field Hockey)
- National Collegiate Acrobatics and Tumbling Association
- National Intercollegiate Rugby Association (NIRA)

Spirit Groups

Several spirit groups lend their support to athletic teams. The Quinnipiac Pep Band, Boomer the Bobcat (mascot), Sideline Cheer and Ice Cats perform at a variety of athletic events. The university dance teams are often regular performers and crowd favorites as well!

Campus Recreation

Club Sports

The 2019–20 Quinnipiac University calendar year will be the inaugural year of club sports. The university will recognize 10 club sport teams beginning in the fall. Club sport teams compete against other universities without the time commitment of an NCAA Division I team.

Club sport teams also are student-run and allow for leadership opportunities. Elected positions include: president, vice president and treasurer.

Each team will announce its tryout process at the Quinnipiac Involvement Fair.

For more information on sports offered and contact info, please visit the Club Sports MyQ page. (https://myq.quinnipiac.edu/Athletics/ClubSports/Pages/default.aspx)

Intramural Program

The Quinnipiac intramural program offers a variety of competitive sports activities in a recreational setting. Participants have freedom of choice, equality of opportunity and responsibility for sharing in the planning, supervision and administration of their sports programs. Participants create their own teams, select their level of competition and vie for coveted championship T-shirts. Nearly 75 percent of the student body participates in one or more intramural activities.

The intramural program has work-study positions available for referees and statisticians. Intramural offerings include:

- Basketball (5-on-5 and 3-on-3)
- Dodgeball
- Flag football
- Ice Hockey
- Kickball
- Soccer (indoor and outdoor)
- Tennis (singles & doubles)
- Ultimate Frisbee
- Volleyball (4-on-4 and 6-on 6)
- Wiffle ball
- Open skate (figure skating)

For more information about intramural sports, visit the Quinnipiac Athletics website (http://www.quinnipiacbobcats.com/sports/2015/8/23/GEN_Fitness%20Recreation.aspx).

Fitness Classes and Programs

Campus Recreation offers a full schedule of free lunchtime and evening activities taught by certified student instructors. Activities include a variety of the latest trends including: Spinning®, Barre, Ugift®, Boot Camp, Zumba(R), Yoga and Pilates.

Classes usually begin during the second week of the fall and spring semesters. Classes are not scheduled during summer. The schedule is available to the Quinnipiac community via MyQ, on IMLeagues.com (http://www.IMLeagues.com) as well as at the Fitness Centers.

For more information about fitness and aerobics classes, visit the Quinnipiac Athletics website (http://www.quinnipiacbobcats.com/sports/2015/8/23/GEN_Fitness%20Recreation.aspx).

Open Recreation

“Open Rec” hours are scheduled in both the Recreation Center and the dance studios on Mount Carmel Campus. Quinnipiac community members are encouraged to walk or jog on the track; and to play basketball or volleyball in the Recreation Center or use the mirrored dance studios to rehearse. Hours are posted beside the entrance doors of each facility.

Athletic and Recreation Facilities

People’s United Center

The People’s United Center is a state-of-the-art, 185,000-square-foot facility featuring separate arenas for Quinnipiac University’s NCAA Division I men’s and women's basketball and ice hockey teams. The two arenas at the sports center are connected by a three-story structure featuring a common lobby and ticket box office, the University Club, administrative and team offices, professional-style locker rooms with student athlete lounges, conference and meeting rooms, athletic training and equipment rooms, and a strength and conditioning center. The People’s United Center is located on Quinnipiac’s 250-acre York Hill Campus on Sherman Avenue, less than a mile from the Mount Carmel Campus.

Burt Kahn Court/Gymnasium

This hardwood floor facility located in the Athletic and Recreation Center on Mount Carmel Campus serves as the competitive site for Quinnipiac
home volleyball games. The gymnasium also is occasionally used for intramurals and "open recreation."

**Recreation Center**
The Recreation Center on Mount Carmel Campus has four multipurpose courts that are used for tennis, basketball and volleyball. Curtains between each court allow for a variety of activities to take place simultaneously.

**Fitness Centers**
There are three fitness centers at Quinnipiac University. One is located in the Athletic and Recreation Center on the Mount Carmel Campus; another is located in the Rocky Top Student Center on the York Hill Campus. Both have a full line of strength equipment, free weights and cardiovascular equipment including:

- Adaptive motion trainers (AMT)
- Bicycles (recumbent, upright)
- Elliptical
- Free climbers/steppers
- Treadmills

The third fitness center is a satellite space on the North Haven Campus, with a few pieces of cardio equipment and free weights.

The fitness centers are open to all members of the Quinnipiac community. Prospective users must complete an online waiver. Please review the online waiver rules and regulations located in your WebAdvisor account to initiate your usage of the facilities. A validated Quinnipiac ID must be presented for entrance to the facility at all time.

**Dance Studios**
Fitness classes, dance groups and many other campus groups all share the university’s three studios. The mirrored studios each contain state-of-the-art stereo equipment for professional and student use. Each studio also is equipped with audio and video systems. Equipment for all scheduled activities and classes is provided. Mats, steps, power bars and hand weights usually are available in the studio equipment storage area.

Quinnipiac community members may drop in during free time to use the studios for exercising or rehearsals.

**Indoor Track**
The suspended track encircles the four Recreation Center courts on the Mount Carmel Campus. Students and staff may walk and jog upstairs while games and practices are being conducted downstairs. Nine laps of the track equal one mile.

**Cardio Corners**
All four corners of the indoor track on the Mount Carmel Campus have been outfitted with various pieces of cardiovascular equipment. Each corner (approx. 2,800 square feet) has treadmills, elliptical, steppers and bikes. Additionally, one corner is outfitted with multipurpose mats, stability balls and light weights.

**Spinning® Room**
There is a Spinning® room located in the fitness center on the York Hill Campus. There is an online bike reservations process. Use of this room is available during classes only.
Bioanthropology Research Institute
Quinnipiac's Bioanthropology Research Institute, administered through the College of Arts and Sciences, provides research opportunities for students and faculty in a variety of disciplines. Research projects, field experiences and international course work provide unique opportunities to experience current and ancient cultures. Research projects often lead to publications and presentations at professional conferences. The field of bioanthropology naturally crosses many disciplines, including both science and arts. The Bioanthropology Research Institute has formal relationships with international research groups such as Centro Mallqui in Peru as well as with many well-known domestic and international museums.

Students should contact the College of Arts and Sciences (https://catalog.qu.edu/arts-sciences) for more information.

Clarice L. Buckman Center
This building houses science laboratories, faculty offices and classrooms. In the center is the Clarice L. Buckman Theater, a 177-seat auditorium, which is used for guest lectures.

Center for Communications and Engineering
The Center for Communications and Engineering houses the School of Communications, the School of Engineering and the Mount Carmel Auditorium. The main floor includes collaborative classrooms, a multimedia computer classroom, a design studio, an open media lab and an audio/video equipment loan facility. The lower level includes engineering workshops and a machine shop. The building also houses the Office of Multicultural and Global Engagement, the Center for Psychological Science, Academic Innovation and Effectiveness, plus faculty and administrative offices.

Echlin Center
Echlin Center houses the offices of Undergraduate Admissions and Financial Aid, faculty offices and classrooms. The Kresge Foundation Lecture Hall and Perlroth Boardroom are located here.

Terry W. Goodwin '67 Financial Technology Center
Quinnipiac University created its own state-of-the-art Wall Street trading room with the Terry W. Goodwin '67 Financial Technology Center in the Lender School of Business Center. The 2,000 square-foot center allows students to make real-time investment decisions and learn how the financial markets work by managing a real-life student portfolio. Software installed in the center's 43 computer workstations allows students to access real-time financial data, practice analytical finance methods, conduct trading simulations, analyze economic databases and develop financial models.

Ireland’s Great Hunger Institute
Ireland’s Great Hunger Institute is a scholarly resource for the study of the Great Hunger, also known as An Gorta Mór—the Famine that devastated Ireland from 1845 to 1852. Through a program of exhibitions, lectures, conferences, course offerings and publications, the institute fosters a deeper understanding of this tragedy and its causes and consequences. The Institute's collection includes rare primary and secondary sources and artifacts relating to the history of modern Ireland. The institute is located on the Mount Carmel Campus. For more information about its work and program of events, please contact 203-582-6576 or ighi@quinnipiac.edu (ighi@quinnipiac.edu).

Ireland’s Great Hunger Museum
Ireland’s Great Hunger Museum, Músaem An Ghorta Mhóir, is home to the world's largest collection of visual art, artifacts and printed materials relating to the Irish Famine. The museum is located at 3011 Whitney Avenue, near Quinnipiac's Mount Carmel and York Hill campuses and is open to the public. Its collection focuses on the famine years from 1845–52, when blight destroyed virtually all of Ireland's potato crops for consecutive years. The crop destruction, coupled with British governmental indifference to the plight of the Irish, who at the time were part of the United Kingdom, resulted in the deaths of more than 1 million Irish men, women and children and the emigration of more than 2 million to nations around the world. The 4,750-square-foot museum offers publications, lectures, concerts and other events designed to educate the general public, scholars, researchers, artists and students about the richness of Irish culture and the high quality of its visual arts in particular. Visit the IGHM website (http://www.ighm.org) for more information.

Lender School of Business Center
The Lender School of Business Center at Quinnipiac University is a multipurpose complex that houses state-of-the-art collaborative classrooms with multi-screen, interactive technology; lecture capture classrooms with the latest learning support technology; student collaboration spaces for informal collaboration, meetings, and study; a student collaboration and app development lab; dedicated student team meeting rooms; a Career Development Resource Center with dedicated student and employer resources, interview rooms, and networking space; and faculty and dean's offices. This complex is also home to the People's United Center for Innovation and Entrepreneurship, where students can meet with their mentors for financial, legal, marketing and technical guidance in turning their ideas into viable business solutions.

Libraries
The Arnold Bernhard Library on Quinnipiac's Mount Carmel Campus and the Edward and Barbara Netter Health Sciences Library on the North Haven Campus serve the undergraduate and graduate populations of the university and provide support for the Quinnipiac University School of Law.

Approximately 48,000 square feet in size, the Arnold Bernhard Library provides 600 seats, 16 group rooms, a 30-seat instructional facility, more than 60 public computers and wireless connectivity. In addition to the group study rooms, the library features individual study carrels, tables, soft seating and rocking chairs, all with magnificent views. Supporting this facility are the combined staffs of the library, academic technology and media services. The Arnold Bernhard Library building also houses the clock tower, the executive suite, the Provost suite, the Learning Commons, the Offices of Administrative Services, the Bursar, Registrar and Procurement.

The Edward and Barbara Netter Health Sciences Library is the primary library for Quinnipiac University's Schools of Medicine, Nursing and Health Sciences. The library is equipped with 17 public computer
Campus Resources

workstations, printers, scanners, copiers, study carrels and plenty of soft seating, which provides spectacular views of the North Haven Campus.

Each library offers a large variety of web-based resources, including ebooks, e-journals and databases as well as print volumes, microforms and audiovisual materials.

Ed McMahon Communications Center

Housed within the Lender School of Business Center is the Ed McMahon Communications Center (McMahon Center), a first-class digital media production facility providing students with a spacious, professional-level high-definition television (HDTV) studio, a wireless multi-platform newsroom with the Associated Press wire service through the Electronic News Production System (ENPS), advanced digital video editing suites, multiple 4K collaborative edit suites, production labs for mobile application design, website development, and motion graphics, a remote media production resource depot, and a screening room with HD video projection and theater-quality 7.1 surround sound. Additionally, there are over 90 iMac stations running the latest applications for digital media production including 360 technology and acquisition and a Virtual Reality Lab utilizing the latest hardware and software. Two cable television channels originate from the McMahon Center, as well as a Facebook live feed for all curricular and student organization distribution.

Quinnipiac University Poll

Quinnipiac University Poll, at 20–60 West Woods Road, regularly surveys residents in Colorado, Connecticut, Florida, Iowa, New Jersey, New York, Pennsylvania, Ohio, Virginia and nationally about political races and issues of local, regional and national concern.

Quinnipiac University Science Teaching and Learning Center Funded by Bristol-Myers Squibb

The Quinnipiac University Science Teaching and Learning Center (QUeST-LC) is committed to bridging the gap between the research on science teaching and learning and the teaching practices used every day in science classrooms. The center helps passionate practitioners who critically reflect on their teaching practices and want to enhance their own classroom practices through two outreach programs.

Weekly workshops are designed to meet the needs of science teachers as they negotiate their understanding of how to implement the Next Generation Science Standards (NGSS). The greatest leverage point for reaching students is highly prepared teachers. This format provides an opportunity for a greater, sustained impact on the education of Connecticut students.

QUeST-LC Hangout is a monthly collaboration designed to provided time and space for Connecticut science teachers to meet with colleagues to work on NGSS-based instructional units, NGSS-based assessments and implementation strategies. This four-hour block of time is designed to: support a “critical friends” collaboration, encourage an eagerness, energy and enthusiasm for meaningful science teaching, prevent teacher isolation as they work to enact NGSS in their classrooms, schools and school districts, and provide a safe, supportive space to negotiate the paradigm shift toward the NGSS.

Albert Schweitzer Institute

Albert Schweitzer Institute at Quinnipiac University, 660 New Road, enhances the student experience through various travel and experiential learning opportunities; hosting world leaders on campus; and exploring issues related to the Schweitzer philosophy. See the Albert Schweitzer Institute (p. 22) page for more information.

Theatre Arts Center

Located at 515 Sherman Avenue, this flexible 12,000-square-foot center is a specifically designed performance space, featuring a baby Steinway piano and a completely customizable layout. The facility includes a costume shop and storage, a scene shop, a lighting and management booth and academic spaces, making it a hub for theater and music performances. It also includes a black box theater.
ACADEMICS

Schools and Colleges
All Quinnipiac University programs fall within nine major academic areas:

• College of Arts and Sciences (p. 152)
• Frank H. Netter MD School of Medicine (p. 478)
• School of Business (p. 217)
• School of Communications (p. 244)
• School of Education (p. 379)
• School of Engineering (p. 261)
• School of Health Sciences (p. 273)
• School of Law (p. 418)
• School of Nursing

Programs
For information on any of Quinnipiac's programs, click on the appropriate link below:

• Bachelor's Degree Programs (p. 40)
• Undergraduate Minors (p. 51)
• Graduate and Dual-Degree Programs (p. 48)
• Special programs, such as Pre-Law (p. 54), Pre-Dental (p. 52)
  and Pre-Medical Studies (p. 55) as well as the Honors Program (p. 50).
ACADEMIC HONORS

Dean’s List
Students who excel in scholarship by earning a grade point average of at least 3.5 with no grade lower than C are recognized by being placed on the dean’s list. Full-time students must complete at least 14 credits in a semester, with at least 12 credits that have been graded on a letter grade basis (A through C) to be eligible. Part-time students must complete at least 6 credits during a semester.

Degrees with Honors
Students who have demonstrated superior scholarship, who have fully completed all course work and requirements for their bachelor’s degrees and who have attended Quinnipiac for at least 60 credits immediately prior to graduation are eligible to receive degrees with honors. Designation on diplomas and transcripts is based on grade point averages as follows:

<table>
<thead>
<tr>
<th>Honor</th>
<th>GPA Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summa Cum Laude</td>
<td>3.90–4.00</td>
</tr>
<tr>
<td>Magna Cum Laude</td>
<td>3.70–3.89</td>
</tr>
<tr>
<td>Cum Laude</td>
<td>3.50–3.69</td>
</tr>
</tbody>
</table>

A complete list of academic awards and honor societies, is available in the Academic Awards and Honor Societies (p. 502) section of the catalog.

Undergraduate students with strong academic records and extensive intellectual curiosity may apply to the Honors Program (p. 50).
ACADEMIC OUTCOMES ASSESSMENT

Academic outcomes assessment at Quinnipiac University is based on objectives identified by faculty and administrators for specific academic and support programs. The process employs a variety of measurements to discover, as accurately as possible, whether the programs are achieving the student learning outcomes in areas such as general education and major programs of study.

The purpose of academic outcomes assessment is to produce feedback to the department, school/college or administrative unit on the performance of the curriculum, learning process and/or services, thereby allowing each unit to improve program offerings. As part of providing feedback to faculty, student work (that has been de-identified) may be used for faculty development. This type of assessment is not for the purpose of evaluating performance of an individual student, faculty member or staff member.

Measurements may be drawn from surveys, course evaluations, placement tests and a variety of other standardized or locally developed tests. For example, required course assignments and examinations may be used first as a basis for course placement or for assigning grades to a student, and then later used again in an outcomes assessment for an academic or support program. In these cases, the outcomes assessment is conducted as a process separate from and without influence on the course placement or grading process for individual students.

Whenever academic performances are used in outcomes assessment, confidentiality of individual student identities is strictly maintained. Outcomes assessment results for academic and support programs do not disclose analyses at the level of the individual student without written permission from the student.

CENTER FOR EXCELLENCE IN TEACHING AND SERVICE TO STUDENTS

The Center for Excellence in Teaching and Service to Students encourages, supports and recognizes superior teaching and service to students at the university. The center serves as an important vehicle in helping the university achieve its educational mission, consistent with its three core values: high-quality academic programs, a student-oriented environment and a sense of community. The annual Excellence in Service to Students Award and Excellence in Teaching Award reflect the highest recognition of excellence at Quinnipiac University.

The work of the center is intended to supplement, not supplant or duplicate, the many excellent professional development initiatives and programs that are sponsored and supported each year in all areas of the university. The center gives institution-wide recognition and validation to these activities and the offices that sponsor them. The center is guided by a rotating board of directors consisting of representatives from the faculty, staff and students.
The Center for Interprofessional Healthcare Education at Quinnipiac University strives to achieve the university’s three core values: high-quality academic programs, a student-oriented environment and a strong sense of community in the development of health care professionals who work collaboratively to provide evidence-based and coordinated patient or client-centered health care. The mission of this center is to develop, promote and measure the effectiveness of interprofessional learning opportunities for faculty and students that lead to effective team-based practice.

Interprofessionalism is a process by which two or more professionals work collaboratively to critically examine issues in health care education and practice. The overarching purpose of the center is to develop opportunities for faculty, students and community partners to learn together to promote team practice that meets the challenges of future health care systems. The center provides support for educational opportunities in three areas. The first focus is on a program that allows students to earn graduation transcript designation of Distinction in Interprofessional Healthcare. This is a 140-hour co-curricular program where students from different disciplines learn with-by-from each other to address health care issues to improve the patient or client experience and reduce health care costs. The second focus is to develop learning opportunities for faculty and students within the curriculum such as case studies and experiential learning. Finally, the center supports interprofessional practice opportunities between the university and community health care partners.
CENTER FOR TEACHING AND LEARNING

The mission of the Center for Teaching and Learning is to foster the development of our faculty and staff as members of a community of engaged and effective educator-scholars, committed to excellence in student learning.

The center offers a variety of services for members of the university community:

- Workshops on a variety of pedagogical topics and innovative teaching strategies.
- Individual consultation with faculty on effective pedagogy, including department-based consulting.
- Research opportunities for faculty and student affairs personnel.
- Classroom observations for all faculty for preparation of promotion and tenure files.
- Resources for topics related to teaching and learning including books, journals and consultation.

The Center for Teaching and Learning coordinates with both the Quinnipiac University Writing Across the Curriculum and the Service Learning (p. 58) Committee.

Writing Across the Curriculum

Formed in 2001, Quinnipiac University Writing Across the Curriculum (QUWAC) is an interdisciplinary faculty committee that promotes practices that lead to better student thinking and stronger student writing. Quinnipiac endorses the position taken by the National Commission on Writing for America’s Families, Schools and Colleges that good writing is a “threshold skill” for employment virtually anywhere in the professions. Since its inception, QUWAC has embraced four basic assumptions in its core mission:

- That writing is an active, recursive process that reflects and promotes critical thinking.
- That the most effective approach to improving student writing is through improving students’ critical-thinking skills.
- That good writing and critical thinking may take different forms across different disciplines and tasks.
- That some combination of informal writing and formal writing provides the best means to model critical thinking and writing with students.

QUWAC facilitates faculty workshops on critical thinking and writing development, awards faculty research in the scholarship of teaching and learning, hosts a biennial conference on critical thinking and writing on the Quinnipiac campus, and sponsors Double Helix: A Journal of Critical Thinking and Writing, that publishes faculty scholarship from across the globe.
ESSENTIAL LEARNING OUTCOMES

Approved by the Faculty Senate on February 12, 2016

A Quinnipiac University education provides students with both specialized knowledge of a discipline, and a broad understanding of human cultures and the physical and natural world. Quinnipiac graduates can integrate and apply knowledge from multiple perspectives found inside and outside of the classroom. They have a sufficient command of key forms of literacy, as well as the requisite intellectual, social, and personal skills and understanding, to identify and respond effectively to contemporary problems. Quinnipiac graduates demonstrate a number of key outcomes essential to the life and practice of a responsible, educated citizen, consciously and decisively. Graduates acquire these Essential Learning Outcomes (ELOs) through a purposeful integration of the University Curriculum, requirements within one’s major, and co-curricular experiences.

• Knowledge and Literacies
• Critical and Creative Thinking
• Effective Communication
• Inquiry and Analysis
• Social and Emotional Intelligence
• Intercultural Citizenship and Responsibility

By acquiring the Essential Learning Outcomes, Quinnipiac University graduates can...

• Demonstrate, integrate and apply knowledge
• Think critically and creatively
• Communicate effectively
• Conduct inquiry and analysis effectively
• Engage collaboratively and responsibly
• Act as responsible intercultural citizens of a diverse world

For more information about the Essential Learning Outcomes, please see Quinnipiac’s internal website (https://myq.quinnipiac.edu/LearningParadigm/Pages/Essential-Learning-Outcomes.aspx).
EXPERIENTIAL LEARNING CERTIFICATES

SQUID Certificate Program

SQUID stands for Scholars at Quinnipiac University Integrating Difference. Many students seek out opportunities to learn about people in societies who have been historically underrepresented and underprivileged. This certificate program, offered through the College of Arts and Sciences, is designed to acknowledge the effort students have made to learn about the broad variety of human experience. Students in any undergraduate program who are interested and who complete three SQUID-designated courses of their choice are eligible to achieve a certificate from the College of Arts and Sciences that reflects the commitment they have made to diversify their college curriculum. Applications for the SQUID certificate are accepted in the spring semester as announced. More information can be found at the SQUID Certificate Program page (https://cas360.qu.edu/squid-certificate-program).

Albert Schweitzer Certificate for Ethics and Responsibility

This certificate program, affiliated with the Albert Schweitzer Institute, enables students to be recognized for their service to others in keeping with the ideals of the 1952 Nobel Peace Prize Laureate, Dr. Albert Schweitzer. Students earn credit toward this certificate through directed academic engagement and volunteer activities. To earn the certificate, eligible students take pre-approved courses or those that have a service learning designation, and participate in a variety of service-based activities. Examples of these activities include Albert Schweitzer Institute-sponsored programs, an alternative spring break, a semester-long internship program with a service organization on or off campus, or a leadership role in a campus organization or off-campus non-governmental organization. Given the strong interest by potential employees, graduate schools and professional schools in ethical leadership and service to others, this program is structured to help a student easily demonstrate his or her dedication to these important values.

Community and Civic Engagement Certificate

Students who are interested and meet the requirements are eligible to receive a certificate from the Committee for Community and Civic Engagement that reflects the commitment they have made to be engaged community and world citizens through opportunities in designated courses and co-curricular community and civic engagement activities. Detailed information and application information can be found on the Department of Cultural and Global Engagement page on MyQ (https://na01.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmyq.quinnipiac.edu%2Fimagine%2FPages%2FCertificates-and-Awards.aspx&data=02%7C01%7CElizabeth.Brown%40quinnipiac.edu%7C7C75742d34f5ec47bae65108d6907e7ce4%7C0940985869fb4de9987990db22b5eaf%7C0%7C0%7C636855270265493133&sdata=9C49HQXetiq%2FyimiK2JvUyu9DQvzGryH%2FSG2Zj%2Ffif3s%3D&reserved=0).
Grading System

Achievement in a particular course is indicated by a letter grade that is translated into grade points for the student’s record. Final grades are issued by the registrar at the close of each semester. Mid-semester standings are issued to first-year students in 100-level courses, apprising them of their progress.

Grade points earned in a course are determined by multiplying the point value of the letter grade (shown in the table below) by the number of credits of the course. A cumulative average is obtained by dividing the total number of grade points by the total number of credits taken at Quinnipiac.

Faculty members are the most appropriate judges of how students perform academically. Except when a grade of Incomplete has been submitted, faculty shall not accept late work from students after the final course grade has been submitted to the Registrar or after the final grade due date, whichever comes first. Except when there are verifiable errors in the final grade calculation, faculty members shall not request changes in final course grades after submission to the Registrar.

AU (audit) Indicates the course was audited. This grade type is in effect for the Fall 2017 semester and beyond.

I (incomplete) A grade of “Incomplete” or “I” indicates that a student has not satisfied all of the course requirements and has come to an agreement with the faculty member for an extension in order to complete the work. In addition, if grades are awarded while an academic integrity case is in progress, the faculty member must assign a temporary grade of “incomplete” to the student pending the outcome of the academic integrity hearing board review process. Apart from academic integrity cases, the decision to issue a grade of Incomplete is made solely at the discretion of the faculty member. Incomplete grades must be requested by the student, and will be granted only if justified by compelling individual circumstances requiring additional time beyond the end of the semester to complete course requirements. A grade of Incomplete should not serve primarily as a mechanism to allow a failing student to earn a passing grade. Grades of Incomplete should be accompanied by a written plan for resolving the Incomplete grade, which includes documentation of outstanding work and the timeline for completion. This written plan shall be retained by the student, the faculty member and the department chair. An Incomplete grade automatically becomes an “F” if it is not removed within 30 calendar days following the end of the semester (last day of final exams) in which it was issued, or within a lesser period specified by the instructor. In exceptional cases, extensions beyond that normal period are permitted only with the written approval of the department chairperson. Any change in an Incomplete to a grade other than “F” after one year requires the written permission of the dean of the school, college or division.
W (withdrawal) | A student may withdraw from a course offered in a traditional semester (15 week) format up to the end of the 10th week of classes. For courses offered during the summer or in accelerated or other nontraditional formats, the withdrawal period extends up to the completion of 60 percent of the scheduled class sessions. Prior to the start of each semester, the specific withdrawal deadlines for all classes are published by the Office of the Registrar. Withdrawals must be recorded on an official form available in the Registrar's Office.

P (pass) | Indicates "passed with credit" when no letter grade is given.

Z (audit) | Indicates the course was audited. This grade type will no longer be offered after the Spring 2017 semester.

S (satisfactory) | Indicates "passed with no credit."

U (unsatisfactory) | Indicates "unsatisfactory work."

IP (In-Progress) | IP Grade in Progress. This grade is intended for internships, research-based courses, thesis, dissertation, individual study, projects and seminar offerings. Other course types must have dean's approval and must have been filed with the Registrar's Office prior to grading. Failure to complete the work according to the agreed upon timeline will result in a grade of "F." For courses required for degree completion, a grade must be given before the credential may be granted. Syllabi for courses approved for the IP grade option should note the reason for the provisional IP grade to be assigned at the end of the semester, as well as the timeframe within which the students' final coursework will be evaluated and the IP grade will be replaced with a permanent grade. IP grades are not used in calculating grade point averages. Undergraduate students with grades of "IP" in a course(s) are not eligible for the Dean's List.
GRADUATE AND DUAL-DEGREE PROGRAMS

Arts and Sciences
- Accelerated Dual-Degree Bachelor's/JD (3+3) (http://catalog.qu.edu/academics/dual-degree-ba-bs-jd-3-3)
- Accelerated Dual-Degree Bachelor's/MSW (p. 346) (3+2) (p. 346)

- Accelerated Dual-Degree (p. 162) BS/MS in Molecular and Cell Biology (p. 162) (3+1) (p. 162)
- Dual-Degree (p. 348) BA/MAT (p. 348) or BS/MAT in Elementary Education (4+1) (p. 348)
- Dual-Degree (p. 350) BA/MAT (p. 350) or BS/MAT in Secondary Education (4+1) (p. 350)
- Dual-Degree (p. 353) BA/MBA (p. 353) (4+1) (p. 353)
- Dual-Degree (p. 163) BS/MS in Molecular and Cell Biology (p. 163) (4+1) (p. 163)
- Master of Science in Molecular and Cell Biology (p. 164)

Business
- Accelerated Dual-Degree BS/MBA (3+1) (p. 357)
- Certificate in Health Care Compliance
- Certificate in Long-term Care Administration
- Dual-Degree BA/MBA (4+1) (p. 353)
- Dual-Degree BS/MBA (4+1) (p. 359)
- JD/MBA (Juris Doctor) (p. 360)
- Master of Business Administration (p. 355) (online or on campus)
- MBA-Finance Track (p. 360)
- MBA-HCM Track (Health Care Management) (p. 361) (online or on campus)
- MBA-SCM Track (Supply Chain Management) (p. 360) (online or on campus)
- Master of Science in Accounting (p. 362)
- Master of Science in Business Analytics (p. 364) (online only)
- Master of Science in Organizational Leadership (p. 365) (online only)

Communications
- Accelerated Dual-Degree BA/MS or BFA/MS (3+1) (p. 260)
- Dual-Degree BA/MS or BS/MS in Interactive Media and Communications (4+1) (p. 372)
- Dual-Degree BA/MS or BS/MS in Journalism (4+1) (p. 374)
- Dual-Degree BA/MS or BS/MS in Public Relations (4+1) (p. 375)
- Dual-Degree BA/MS or BS/MS in Sports Journalism (4+1) (p. 377)
- Master of Science in Interactive Media and Communications (p. 367) (online)
- Master of Science in Journalism (p. 368)
- Master of Science in Public Relations (p. 369)
- Master of Science in Public Relations – Online/Professional Track (p. 370)
- Master of Science in Sports Journalism (p. 371)

Education
- Certificate of Completion (p. 390) in Special Education (p. 390)
- Certificate in Social and Emotional Learning and School Climate (p. 379)
- Dual-Degree (p. 348) BA/MAT or BS/MAT in Elementary Education (p. 348) (4+1) (p. 348)
- Dual-Degree (p. 350) BA/MAT or BS/MAT in Secondary Education (p. 350) (4+1) (p. 350)
- Master of Arts in Teaching – Elementary Education (p. 382)
- Master of Arts in Teaching – Secondary Education (p. 380)
- Master of Science in Instructional Design (p. 383) (online only)
- Master of Science in Special Education (p. 385) (online only)
- Master of Science in Teacher Leadership (p. 387) (online only)
- Sixth-Year Diploma in Educational Leadership (p. 389)

Engineering
- Master of Science in Cybersecurity (p. 391)

Health Sciences
- Accelerated Dual-Degree Bachelor's/Master's in Social Work (3+2) (p. 346)
- Bachelor's/Doctor of Physical Therapy (DPT) (p. 310)
- Certificate of Advanced Graduate Studies in Occupational Therapy (p. 408) (post-professional)
- Master of Health Science in Advanced Medical Imaging and Leadership (p. 394)
- Master of Health Science in Biomedical Sciences (p. 395)
- Master of Health Science in Cardiovascular Perfusion (p. 398)
- Master of Health Science in Pathologists’ Assistant (p. 411)
- Master of Health Science in Physician Assistant (p. 413)
- Master of Health Science in Radiologist Assistant (p. 416)
- Master of Social Work (p. 404)
- Post-Professional Occupational Therapy Doctorate (OTD) (p. 409) (online)

Law
Admission is through the School of Law. The School of Law has its own section of the academic catalog (p. 418) and student services handbook, to which readers should refer for information about School of Law policies, procedures and requirements for academic and other matters.

- Accelerated Dual-Degree Bachelor’s/Juris Doctor (3+3) (http://catalog.qu.edu/academics/dual-degree-ba-bs-jd-3-3)
- Certificate in Health Care Compliance (p. 452)
- Juris Doctor/Master of Business Administration (p. 437) (JD/MBA)
• Juris Doctor/Master of Environmental Law and Policy (p. 437) (JD/MELP)
• Juris Doctor/Master of Social Work (p. 437) (JD/MSW)
• Juris Doctor Program (full-time) (p. 421)
• Juris Doctor Program (part-time) (p. 429)
• Master of Laws in Health Law (LLM) (p. 451)

**Medicine**

Admission is through the Frank H. Netter MD School of Medicine.

• Anesthesiologist Assistant (MMSc) (https://www.qu.edu/schools/medicine/academics/anesthesiologist-assistant-program.html)
• Medical Doctor (MD) (p. 323)

**Nursing**

• Doctor of Nursing Practice – Nurse Anesthesia (p. 481) (post-bachelor’s study)
• Doctor of Nursing Practice – Care of Populations (p. 483) (post-master’s study)
• Doctor of Nursing Practice – Nursing Leadership (p. 484) (post-master’s study)
• Master of Science in Nursing – Adult-Gerontology Nurse Practitioner (p. 488)
• Master of Science in Nursing – Family Nurse Practitioner (p. 490)
• Master of Science in Nursing – Operational Leadership (p. 491)
• Master of Science in Nursing – RN to MSN Completion (p. 493)
HONORS PROGRAM

University Honors Program

The University Honors Program has been developed to foster the needs and interests of our most academically talented and committed students. The program creates a strong internal sense of community that is founded on core values of intellectual curiosity, academic leadership, and service.

Honors students participate in small seminar courses with instructors dedicated to working cooperatively to mold a unique learning environment. This student-centered approach supports increasingly independent learning and also engages students in the larger campus as well as regional, national and world communities.

Honors students also participate in and contribute to campus culture through lectures, book discussions and unique events that enhance the distinctive learning opportunities available in the University environment. Quinnipiac honors students have access to a special space on campus—the honors student lounge, which includes a small collection of books, informal seating, coffee and a kitchen that facilitates studying, conversation and honors committee meetings. In addition, honors students have the opportunity for off-campus learning experiences in nearby areas such as Boston, New Haven and New York City.

Honors students take a minimum of 8 honors level courses and experiences designated at the honors level as part of their existing University Curriculum or major courses; the program does not add additional credit requirements to the students’ major work, and preserves freedom to pursue electives and minors.

Each year, the honors program welcomes incoming first-year students with strong academic records and extensive intellectual curiosity. Entry to the program is by application. Students who have received their acceptance to Quinnipiac may apply for admission to the honors program in February and will learn of their status before May 1. Students also may apply after the February deadline and, if accepted, will be admitted on a wait-list basis. Interested students may inquire with the director or the admissions office at any time during the admissions process and into the summer. After their first or second semester, students with strong records of achievement and a demonstrated desire to share their intellectual curiosity and engagement with others may apply to join the program.

For details please see the Quinnipiac Honors Program webpage (https://www.qu.edu/academics/undergraduate.html#honorsprogram).
The purpose of a minor is to provide students with the opportunity to pursue an interest in a field outside of their major. Minors generally consist of six courses within a discipline or set of related disciplines with a progression of course levels. If a minor requires additional prerequisite courses, these courses are clearly indicated in the description of the minor within the University Catalog.

A student may earn a minor in an area of study concurrently with the major degree but not subsequently. Normally credits counted toward the requirements of the major may not be used to meet the requirements of a minor. Each individual school/college may have additional policies on meeting minor requirements, which are listed in the University Catalog. Completed minors are noted on student transcripts.

To ensure sufficient time to complete a minor, students should submit an application to declare a desired minor prior to the end of their sophomore year. Completing a minor often necessitates taking additional courses beyond degree requirements.

To have a minor appear on their transcript, students should apply to declare a minor prior to their senior year. Applications to declare a minor may be obtained in the dean's office of the school/college offering the minor, which will refer the student to the designated adviser for the minor. The adviser will indicate on the application for the student the number of credits and the specific courses required. At least one-half of the credits needed for a minor must be taken at Quinnipiac. Under special circumstances a dean, with the permission of the executive vice president and provost, may suspend the admission of new students into a minor for an academic year.

The following is a list of approved minors:

- Accounting
- Advertising and Integrated Communications
- Anthropology
- Applied Statistics and Data Science
- Asian Studies
- Biology
- Biomedical Sciences
- Business
- Business Analytics
- Chemistry
- Computer Information Systems
- Computer Science
- Criminal Justice
- Dispute Resolution
- Economics
- English
- Entrepreneurship and Small Business Management
- Film and Television
- Finance
- Fine Arts
- Game Design and Development
- Gerontology
- Global Public Health
- History
- History and Philosophy of Science
- International Business
- International Studies
- Irish Studies
- Italian
- Journalism
- Law in Society
- Legal Studies
- Management
- Marketing
- Mathematics
- Media Studies
- Microbiology and Immunology
- Middle Eastern Studies
- Music
- Philosophy
- Political Science
- Psychology
- Public Relations
- Sociology
- Spanish
- Sports Studies
- Theater
- Women's and Gender Studies
PRE-DENTAL STUDIES

The pre-dental studies designation ("pre-dental designation") is designed for undergraduate students who are planning on pursuing DDS or DMD. Pre-dental designation status is not intended for students enrolled in QU’s entry-level professional track programs. The pre-dental designation is not a stand-alone program and is completed in addition to the student's undergraduate degree and major. Application to dental school may require coursework outside of a specific major. The pre-dental designation allows students to enroll in and track completion of these core requirements. While the pre-dental designation will cover the majority of standard pre-requisite courses, requirements may vary by dental school. Students are responsible for checking their intended dental programs in advance of the AADSAS application process to determine if additional coursework is required. Interested students may enroll in the pre-dental designation after the start of classes.

To receive the pre-dental studies designation upon graduation, the following are required:

a. Cumulative GPA of 3.3 or above in required pre-dental designation courses
b. Minimum of 18 credit hours of pre-dental designation coursework must be completed at Quinnipiac

Grades received for pre-dental designation courses taken at other universities may be utilized for transfer student GPA calculations. Congruent with the American Dental Education Association policy and dental school admissions policies, grades will not be “replaced” for repeated coursework to determine the final pre-dental designation GPA and online courses will not be accepted.

In addition to strong academic performance, pre-dental designation enrollees must actively pursue experiences and opportunities throughout their undergraduate years to gain exposure to dentistry and patient interaction. A wide range of skills and competencies should be developed through experiences such as:

- extended exposure to healthcare and dentistry (shadowing, clinical work, volunteering, etc.),
- research outside of the curriculum,
- substantial volunteer efforts and community involvement,
- leadership experiences.

Activities and experiences that develop and exhibit strong manual dexterity skills should also be pursued. Active participation in Pre-Health Advising Office educational workshops, advising, and events is expected.

Transfer Students

Students who transfer to Quinnipiac University and wish to receive the pre-dental studies designation must complete a minimum of 18 credits of the required designation coursework at Quinnipiac. Grades received for pre-dental designation courses taken at other universities may be utilized for transfer student GPA calculations to determine eligibility. Online courses will not be accepted for any pre-dental designation requirements.

Advanced Placement Credits

Many dental schools will not accept AP credits as replacement for prerequisite courses. Some dental schools may accept AP credits provided that the applicant completes advanced level coursework in the same discipline. Students are encouraged to check with the specific AP policies and course requirements of dental schools through the ADEA website (http://www.adea.org) and the ADEA Official Guide to Dental Schools.

Course Requirements

All courses listed in this section may count toward both the major (if applicable) and the pre-dental studies designation.

Required Courses (All Courses Required for a Minimum of 46 Credits)

Students must complete all of the listed required courses, as they are the minimum prerequisites for application to dental schools and cover content tested on the Dental Admission Test (DAT).

In addition to required pre-dental designation courses, students should complete any two (2) English courses (p. 51) and Psychology 101 (PS 101) to meet many dental school admission requirements. Advanced sciences such as Anatomy & Physiology, Genetics, Histology,
and Cell Biology, as well as ethics and philosophy courses, are highly recommended.
PRE-LAW STUDIES

Students interested in attending law school must have a BA or BS degree. Completion of the Law School Admission Test (LSAT) is also required by most American Bar Association-approved law schools. No single pre-law course of study is required or recommended. Several broad objectives of pre-legal education, however, have been set forth by the Association of American Law Schools: developing fundamental reading skills; the ability to think and write clearly and succinctly; logical reasoning and analytical skills; and an appreciation of the social, political and economic foundations and complexities of our society.

Toward this end, every pre-law student should carefully choose, with the assistance of his or her academic adviser and/or the pre-law adviser, courses that will help build these skills and areas of knowledge. Students or graduates who have an interest in law school should contact the Quinnipiac University pre-law adviser, via email at prelawadvising@qu.edu, for further information and should join the Pre-Law Society to learn more about the LSAT, law school admissions and financial aid.

Undergraduate students who wish to attend the School of Law at Quinnipiac may take one of two paths. The traditional path entails obtaining a BA or BS degree in four years followed by three years of law school. The accelerated path, via the Accelerated Dual-Degree Bachelor’s/ JD (3+3) program (http://catalog.qu.edu/academics/dual-degree-ba-bs-jd-3-3), allows students to complete their undergraduate and their law degree in six years, one year less than the traditional path.

(Please note: Attending Quinnipiac University as an undergraduate student does not guarantee admission to the Quinnipiac School of Law.)
PRE-MEDICAL STUDIES

The pre-medical studies designation ("pre-med designation") is designed for undergraduate students who are interested in pursuing doctoral or advanced professional degrees in medicine such as MD, DO, DDS/DM, PharmD, OD, DPM, DPT, DVM or PA. Pre-med designation status is not necessary for students enrolled in QU’s entry-level PA program or other professional track degrees. Interested students may enroll in the pre-dental designation after the start of classes.

The pre-med designation is not a stand-alone program and is completed in addition to the student’s undergraduate degree and major. Application to professional school may require course work outside of a specific major. The pre-med designation allows students to enroll in and track completion of these core requirements. While the pre-med designation will cover the majority of standard prerequisite courses, requirements will vary by program type and school. Students must check their intended programs in advance of the application process to determine whether additional course work is required to apply.

Enrolled pre-health students may seek advice on preprofessional development and the professional school application process from the Pre-Health Advising Office. Advising services include: preparatory workshops, individual advising, assessment of readiness, long-term planning, application strategy, essay critiques, school selection assistance, mock interviews and guest speaker events. The Pre-Health Advising Office, along with the Health Professions Advisory Committee, provides committee letters of evaluation for eligible applicants to medical school.

For more information, please contact the director of pre-health advising at prehealthadvising@qu.edu (PreHealthAdvising@qu.edu).

Requirements

To receive the pre-medical studies designation upon graduation, the following conditions must be met:

a. Student must maintain a cumulative GPA of 3.3 or above in required pre-med designation courses
b. Minimum of 18 credits of pre-med designation course work must be completed at Quinnipiac

Congruent with professional school admissions requirements and the national educational association policies of the above referenced programs, grades will not be “replaced” for repeated course work to determine the final pre-med designation GPA and online courses will not be accepted.

In addition to strong academic performance, pre-med designation enrollees must actively pursue opportunities throughout their undergraduate years that help them gain knowledge about the health care field and their intended profession. A wide range of skills and competencies should be developed through experiences such as:

- extended exposure to health care (shadowing, clinical work, volunteering, etc.)
- research outside of the curriculum
- substantial volunteer efforts and community involvement
- leadership experiences

Active participation in Pre-Health Advising Office educational workshops, advising and events is expected. Students should carefully review the “Core Competencies for Entering Medical Students” and other student resources available through the Association of American Medical Colleges (http://www.aamc.org).

Transfer Students

Students who transfer to Quinnipiac University and wish to receive the pre-medical studies designation must complete a minimum of 18 credits of the required designation course work at Quinnipiac. Grades received pre-med designation course work taken at other universities may be utilized for transfer student GPA calculations to determine eligibility. Online courses will not be accepted for any pre-med designation requirements.

Advanced Placement Credits

Some professional schools may accept AP credits provided that applicants complete courses for which AP credit has been granted with a higher level course in the same discipline. Other schools, including many medical schools, do not accept AP credits as a replacement for prerequisite science courses. Students are encouraged to check with the specific AP policies and course requirements of any graduate health profession program to which they intend to apply.

Course Requirements

All courses listed in this section may count toward both the major (if applicable) and the pre-medical studies designation.

Required Courses (39 credits)

Students must complete all of the listed required courses, as they are the minimum prerequisites for application to most medical schools and form the basis of standardized admission tests such as Medical College Admission Test, Dental Admission Test, Optometry Admission Test or Pharmacy College Admission Test.

Total Credits 39

In addition to the required pre-med designation courses, students applying to medical school must plan to complete two English courses (p. ), Psychology 101 (PS 101), Sociology 101 (SO 101), and one additional math course (p. ) (Statistics recommended) to meet many medical school admissions requirements and prepare for the MCAT exam. Humanities such as ethics and philosophy, and advanced sciences such as genetics, cell biology, and anatomy & physiology are highly recommended.

Students are encouraged to check the specific prerequisite course requirements of the professional program to which they intend to apply. Many professional schools recommend additional elective course work to prepare for admission.

Pre-medical students should refer to the Association of American Medical Colleges (AAMC) and the online database of Medical School Admission Requirements (MSAR®) for full information regarding the required and recommended course work for medical school. Resources can be found on the AAMC website (http://www.aamc.org).
REQUIREMENTS FOR GRADUATION

Degrees are awarded three times a year: January, May and September. Commencement exercises are held in the spring. Students may participate in the ceremony provided that:

1. they have completed all requirements for their degree or are within 6–8 credits (two courses) of their degree;
2. if they have credits to complete, they are enrolled in summer school; and
3. they have a minimum 2.0 quality point average.

Although faculty advisers assist each student in the selection of courses, the responsibility for fulfilling the requirements of the program and all Quinnipiac University program and departmental academic requirements of study rests with the individual student.

For the Bachelor’s Degree

1. The satisfactory completion of at least 120 credits, of which the final 45 must be taken at Quinnipiac University. (Certain majors require the completion of more than 120 credits; see specific program requirements.)
2. Completion of the University Curriculum common to all bachelor’s degree programs.
3. The satisfactory completion of the specific course standards and requirements of a student’s chosen major (see curriculum descriptions).
4. A grade point average of at least 2.0, with at least that average maintained during the final 60 credits of study, and any other GPA requirements imposed by the school, department or program.
5. School of Business students must complete a minimum of 50 percent of the business courses required for the degree at Quinnipiac (exclusive of 6 credits of economics).
6. Up to 6 credits of workshop courses and/or fitness, leisure and wellness courses may be applied toward the degree requirement.

Majors

A student’s major must be approved in advance by the department chair or program director (if applicable), and the student must follow the prescribed course of study leading to the completion of this major. At least one-half of the courses in a major must be taken at Quinnipiac University.

Dual Majors

A student may request to major in two areas of study in the same school or college. He or she must fulfill all department requirements in both areas and complete all school requirements in the school granting the degree. The student receives one diploma.

Dual Degrees

A student may earn two undergraduate degrees in two separate schools provided that:

1. all requirements for each degree are completed successfully, and concurrently
2. all pertinent requirements of Quinnipiac and of the departments and schools involved are completed successfully, and
3. both degrees are conferred concurrently.

Second Degree

A second bachelor’s degree may be earned, provided a minimum of 45 additional credits in residence have been earned, and all requirements have been satisfied.

Posthumous and In Memoriam Degrees

The conferral of Posthumous and In Memoriam Degrees provides a means by which Quinnipiac can honor students whose education at Quinnipiac was tragically halted due to an untimely death, while at the same time upholding the requirements of integrity in the award of academic degrees.

Posthumous Degrees can be awarded to an undergraduate or graduate student who was in academic good standing when he/she passed away during the last semester of his/her degree program at Quinnipiac. If the deceased student had completed sufficient work in order to be awarded course grades for his/her final semester, the student will be issued either the grade for which he/she was eligible at the time of his/her death or a passing grade. Grade determinations are made following discussion with the faculty member teaching the course in question and are approved by the school dean. If the deceased student had not completed sufficient course work in order to be issued a passing grade, course substitutions permitting the completion of the degree will be approved and implemented via the variant procedure process.

Posthumous degrees are regular degrees included in the official count of degrees and thus are awarded with an official diploma. Hence any Latin Honors for which the deceased student was eligible will be conferred.

In Memoriam Degrees can be awarded to an undergraduate or graduate student whose death occurred prior to the student’s last semester in his/her degree program. The In Memoriam Degree honors a deceased student’s progress towards a degree, but is not included in the official count of degrees. To be eligible for the In Memoriam Degree, at the time his/her studies at Quinnipiac were halted due to an illness or accident leading to death, a deceased student must have been: 1) enrolled in classes in the current term or the most recent fall/spring term; and 2) in good academic standing. For any courses the student was enrolled in at the time of their death, he/she will be issued either the grades he/she earned if sufficient course work had been completed, or grades of W. The In Memoriam Degree is awarded with a distinct document that affirms the student’s good academic standing and progress toward a degree. Latin Honors are not applicable.
SERVICE LEARNING COURSES

The Community and Civic Engagement Committee in conjunction with the Center for Teaching and Learning works to ensure that students have access to courses that are rooted in best-educational practices and that enhance the university experience by offering courses and experiences that are uniquely designed to expose students to Community and Civic Engagement and Service Learning opportunities.

Course offerings designated SL in the catalog indicate classes or sections of classes that integrate meaningful community service with instruction and reflection to enrich the learning experience, teach civic responsibility and strengthen communities. The SL designation helps faculty advisers and students identify Community and Civic Engagement/Service Learning courses to plan and prepare for registration. Quinnipiac University is a member of Connecticut Campus Compact. Campus Compact is a national coalition of college and university presidents dedicated to promoting community service, civic engagement and service-learning in higher education.

Service learning is not volunteerism; nor is it an internship. Service learning is a curriculum-based initiative bringing together faculty, students and community organizations. Service Learning courses incorporate the following basic principles:

- Engagement is fostered through service projects with a community partner.
- Reflection on the experience of working on the community project is both an academic and personal process.
- Reciprocity is promoted by addressing real community needs.
- Dissemination means that previous courses serve as models of best practices for new courses.

The purpose is to assist community organizations by providing situation-specific student resources in activities consistent with the goals of a specific course. Through Service Learning, community organizations are more able to meet their objectives, faculty are more able to demonstrate key course concepts, and students are more able to relate course theory with actual situations and practices. For details, visit Quinnipiac’s Unique Learning Opportunities [https://www.qu.edu/academics/a-quinnipiac-education/unique-learning-opportunities.html] webpage.

A Service Learning Certificate (p. 45) is available to students who complete three or more Service Learning designated courses or two courses plus a learning experience.
STUDY ABROAD

Education Abroad

At Quinnipiac University, we feel a sense of obligation to work toward a more diverse environment. We do this by increasing intentional global engagement opportunities for students, faculty and staff to learn both in and outside the classroom. Quinnipiac students participate in semester, short-term, internships, community engagement, clinical, research and faculty-led programs abroad in various countries such as Ireland, Dominican Republic, Australia, Costa Rica, Guatemala, Poland, Spain, Italy, China, Germany and South Africa to name a few. Administered by the Department of Cultural and Global Engagement, study abroad programs have the opportunity to develop responsible and engaged citizens by cultivating their cultural awareness and sensitivity, as well as skills and knowledge necessary to participate respectfully in the global community. All students are advised to plan early for study abroad and to discuss with their academic adviser to determine whether they can fulfill their graduation requirements through a study abroad program. Students also must attend an information session to understand the policies and procedures for our education abroad opportunities.

For more information, contact the Department of Cultural and Global Engagement or visit the Quinnipiac Study Abroad website. (https://educationabroad.qu.edu)

Semester Abroad Policies

1. Students must maintain a minimum cumulative GPA of 3.0 at the time of applying.
2. Students must not have any current and/or pending conduct sanctions at the time of applying.
3. The study abroad program must be preapproved by the Quinnipiac University Department of Cultural and Global Engagement.
4. Students must maintain full-time status (12–16 QU credits) while abroad. Some countries limit enrollment to 12 QU credits.
5. Students studying abroad are required to obtain approval from their academic advisers and respective dean(s) for all courses listed on the Study Abroad Course Preapproval Form. In addition, nursing and health science students are required to sign a statement of understanding prior to receiving approval to study abroad.
6. The cost of study abroad includes, but is not limited to: a registration fee, Quinnipiac’s study abroad tuition and residence fees (less the dining service fee) and an obligatory overseas emergency medical insurance and security assistance fee. If the cost of the study abroad program exceeds the sum of Quinnipiac’s tuition and housing, the difference will be paid to Quinnipiac by the student. The student is also responsible for paying any refundable security deposits, program application fees and/or program withdrawal fees. Additional expenses include but are not limited to: airfare, visas, meals, academic materials, lab fees, Internet usage, public transportation, personal travel, etc.
7. Students are required to live at the study abroad program residence facility.
8. Students who receive financial assistance at Quinnipiac may apply their financial aid for study abroad, including federal aid, state grants, college grants and scholarships. Work study cannot be applied.
9. Withdrawal from a program initiated by the student, Quinnipiac, the program affiliate and/or the host institution will result in a loss of fees and tuition in accordance with Quinnipiac’s refund policy. Depending on the circumstances of the withdrawal, the student may be subject to action based on Quinnipiac’s Student Conduct System.
10. For Quinnipiac students studying abroad, the credits and grades for approved courses taken abroad become part of the student’s academic transcript and all grades are included in the calculation of the student’s GPA. Grades are the exclusive prerogative of the faculty members teaching the courses. If students have questions about grading in any particular course, they must consult the faculty member teaching that course. Quinnipiac will not change grades issued by another institution.
11. Students may not take classes for a pass-fail grade.
12. Students who have not completed the Study Abroad Course Preapproval Form and complied with policy and procedure will not receive transfer credit and will be ineligible to study abroad through Quinnipiac University.

Short-Term Study Abroad Policies

1. Students must maintain a minimum cumulative GPA of 3.0 and must not have any current and/or pending conduct sanctions at the time of applying.
2. The short-term study abroad program must be preapproved by the Department of Cultural and Global Engagement.
3. Students shall be limited to two courses taken abroad during their short-term program. Students are not exempt from the Undergraduate Summer Credit Policy as outlined in the Course Schedule and Registration Bulletin, which prohibits students from taking more than 7 credits during the summer. If more courses are requested, then the student must file a variant procedure with the dean of their college or school.
4. Students may be eligible to apply for financial aid if they are enrolled in 6 credits. Please inquire with the Financial Aid Office for further information.
5. Students studying abroad are required to obtain approval from their academic advisers and respective dean(s) for all courses listed on the Study Abroad Course Preapproval Form.
6. A grade of “C” or better will be accepted for transfer credits for all short-term study abroad programs. No letter grade is given for these credits. If the short-term program course grades are less than C, the credits are not accepted at Quinnipiac University.
7. Students who have not completed the Study Abroad Course Preapproval Form or complied with Quinnipiac Study Abroad policies and procedures will not receive transfer credit and will be ineligible to study abroad through Quinnipiac University.
8. When studying through a Quinnipiac-approved short-term study abroad program, the student is required to pay the program cost directly to the program or affiliates. The student is responsible for paying Quinnipiac’s obligatory overseas emergency medical insurance and security assistance fee. Payment must be given to the Department of Cultural and Global Engagement by set deadlines. This fee will be paid for the duration of the program. Failure to make the required payments will disqualify a student from receiving transfer credit.

Quinnipiac in Cork, Ireland

All Quinnipiac students have the opportunity to study at University College, Cork (UCC), in Ireland for a semester, academic year or summer term. Through this direct program, students are encouraged to fully participate in the programs and courses offered by UCC. Cork, Ireland, is a unique mix of a quaint Irish life with the bustle and convenience of a city.
It is a hub of Irish music, culture, traditions, food and modern Irish life. The program includes:

- On-site orientation led by Quinnipiac faculty and staff: safety, protocol, academic advisement, cultural transitions, group meals, events, etc.
- UCC International student orientation
- Academic courses for many majors
- Discipline-focused workshops
- Involvement/community engagement opportunities
- Previous field excursions have included: Ring of Kerry, Blarney Castle, west coast of Ireland, family farm weekend in West Cork.

For more information about the UCC direct program, visit the Quinnipiac Study Abroad website. ([https://educationabroad.qu.edu](https://educationabroad.qu.edu))

**Washington, D.C., Semester Programs**

Please visit the QU in DC (p. 194) page under the College of Arts and Sciences Department of Philosophy and Political Science.

**Quinnipiac in LA Program**

The Quinnipiac in Los Angeles program is offered during the fall and spring semesters as well as during the summer, giving undergraduate and graduate students the experience of working and studying in the nation’s second largest city. QU in LA is open to all university students.

The program emphasizes experiential learning and is designed to enhance Quinnipiac’s professionally oriented education. It is intended to expand Quinnipiac's career development programs, which prepare students to be contributors in the workplace from day one; meet the interests of students who want to experience and understand first hand the unique working environment of Los Angeles and the West Coast; and enable students to have internships, career practicum experience, a sense of independence and autonomy as part of our academic culture. For more information, go to Quinnipiac in Los Angeles ([https://www.qu.edu/schools/communications/centers-resources.html#quinnipiacuniversityinlosangeles](https://www.qu.edu/schools/communications/centers-resources.html#quinnipiacuniversityinlosangeles)).

**Faculty-Led Programs**

Quinnipiac faculty members also plan courses with a travel component to various countries during the January term, spring break, and summer terms. Some of the countries visited include Canada, Costa Rica, Dominican Republic, various European countries and South Africa. Students interested in participating in a Quinnipiac faculty-led course abroad should contact the Department of Cultural and Global Engagement.

**Community-Engaged Learning**

During summer, winter and spring recess, Quinnipiac offers for-credit and non-credit bearing faculty-led programs to sites in the United States and abroad. These experiential learning programs, to carefully selected locations, are intentionally designed to foster unique educational opportunities made possible by direct contact with other cultures. Pre-trip orientation and on-site instruction are facilitated by faculty and staff from the Department of Cultural and Global Engagement.
UNIVERSITY CURRICULUM

Mission Statement
A Quinnipiac education fosters in-depth learning, the gaining of disciplinary expertise (the major), and promotes an interdisciplinary understanding of the expertise in local and global contexts (the University Curriculum). In addition, a QU education inspires students to learn how to work independently both in and outside the classroom to gain a closer and more complex sense of themselves as citizens, intellectuals and human beings. Through the University Curriculum, intentional learning is fostered by studying human cultures, artistic and literary expressions, the physical and natural worlds, and the forces that have shaped and continue to shape our world. Students develop a flexible and open mind, the capacity to learn from others, effective communication skills and the ability to influence potential solutions to global problems. Students demonstrate their abilities through classroom and civic engagement, in both their local and global communities. A student’s education at Quinnipiac University is a single, reciprocal process with specialized education in the major integrated with general education, with each providing dimension to the other. In the way that the major leads a student to deep, disciplinary knowledge, general education leads a student to broad knowledge gained from multiple perspectives and in concert, they support the students’ achievement as measured by the Essential Learning Outcomes. A Quinnipiac University graduate is a well-rounded individual who demonstrates knowledge of science, cultures, numeracy, the arts, history and society as well as an ability to apply learning to complex problems and challenges.

The requirements of the University Curriculum assure that all students receive a broad education that exposes them to different perspectives and ways of knowing, producing lifelong learners who can, upon graduation, become leaders in their professions, in the communities where they live, and in their role as informed citizens. The University Curriculum also contributes significantly to the development of the Essential Learning Outcomes for the 21st Century (p. 44) that are expected for graduates of Quinnipiac University.

Statement of Purpose for the Breadth Component
As a consequence of personal inquiry and a balanced, purposeful selection of courses representing diverse perspectives, students will:

- Demonstrate knowledge of science, cultures, numeracy, history, arts and society.
- Develop the skills, knowledge and diverse perspectives necessary to address the complexity of their guiding questions.
- Acquire the scientific and cultural literacy necessary to be an informed and ethical citizen who can contribute to local and global society.
- Reflect on and continue to develop meaning in their own lives and to see meaning in the lives of others.

This will be accomplished through a process whereby students:

- Practice and compare a balanced mix of disciplinary perspectives across the natural sciences, social sciences, humanities, math and fine arts.

- Progress toward achievement of the essential learning outcomes.
- Examine multiple perspectives, environments and cultures ranging from the local to the global.
- Interpret complex problems and challenges in novel ways, engendering and nurturing the habit of a flexible and open mind that seeks new opportunities and conceives new solutions.

University Curriculum for Bachelor’s Degree Candidates
For all bachelor’s degree candidates entering Quinnipiac University during or after Fall 2016, the University Curriculum consists of 46 credits as outlined in the following curriculum structure:

Foundations of Inquiry (4 classes = 12 credits)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FYS 101</td>
<td>First-Year Seminar</td>

<tr>
<td>EN 102</td>
<td>Academic Writing and Research</td>
<td>3</td>
</tr>
<tr>
<td>Math Course</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>12</td>
</tr>
</tbody>
</table>

Disciplinary Inquiry (4 classes = 13 credits)
In the “Disciplinary Inquiry” phase of the University Curriculum, students will make their first encounters with specific knowledge and methodologies in the disciplinary areas. This phase will familiarize students with the kinds of knowledge produced in these disciplinary areas and thus inform their choices as they undertake their “Personal Inquiry.” Additionally, students will be proceeding upon their Personal Quest as they take these and all breadth courses, including reflection upon their Guiding Question.

Students will select one course from each of the disciplinary areas:

- Natural Sciences: 4 credits
- Humanities: 3 credits
- Social Sciences: 3 credits
- Fine Arts: 3 credits

Personal Inquiry (6 classes = minimum 18 credits)
The “Personal Inquiry” (PI) phase requires 18 credits with at least three Disciplinary Inquiry areas represented. This allows students significant flexibility in the selection of coursework as they pursue their Guiding Questions. The Personal Inquiry requirement has two parts:

Part 1: In addition to those selected under Disciplinary Inquiry above, students will select one course from three different disciplinary areas:

- Natural Sciences
- Humanities
- Social Sciences
- Fine Arts
Part 2: The remaining three courses can be from disciplinary areas in Part 1 and/or UC Breadth Electives. Students can combine Disciplinary Inquiry areas and UC Breadth Electives in any pattern that totals 9 to 12 credits. (Note: natural science courses that are treated by the Registrar as two separate courses (lecture and lab) shall be treated as one course for the purposes of the PI requirement. Students could thus take up to four lecture-lab pairings in the PI).

**Integrative Capstone Experience (1 course = 3 credits)**

If the Integrative Capstone is completed in the student’s major, then the student selects an additional unrestricted course in the University Curriculum.

**Intercultural Understanding (1 course = minimum 3 credits)**

As students purposefully select courses and progress through the Breadth part of the curriculum, it is imperative that all students develop the skills, knowledge and diverse perspectives necessary to address the complexity of their Guiding Questions, and to acquire the understanding necessary to be informed and ethical citizens who can contribute to the local and global society.

To achieve this goal, within their 31 breadth component credits students are required to take at least 3 credits in classes marked as “I” (Intercultural Understanding). The classes with “I” designation can be chosen from any area in Disciplinary and/or Personal Inquiry.

University Curriculum Breadth Electives (formerly called UC “Electives”)

University Curriculum (UC) Breadth Electives are courses with generalizable and transferrable knowledge that are based in a single academic discipline outside of the four Disciplinary Inquiry areas (Natural Sciences, Social Sciences, Humanities, Fine Arts) or that reflect nationally established interdisciplinary areas. Such courses increase the disciplinary, methodological and cultural perspectives available to students in the University Curriculum, thereby extending the breadth of their knowledge to navigate successfully a complex and dynamic world.

**Policy for Students Who Fail FYS 101**

Freshmen entering the University in the fall semester who withdraw from or fail to receive a passing grade for FYS 101 during that semester are given one chance to repeat the course during the first spring semester that they are enrolled at Quinnipiac. If they fail to complete the course successfully on a second attempt, they may not take FYS 101 again. They may not withdraw from the course on the second attempt. The failing student receives no credit for FYS 101, the failing grade (F) remains and he/she must substitute 3 credits from any other UC-designated course to count toward required general education credits.

**FYS 101 Policy for Transfer Students**

A student who transfers to Quinnipiac with less than sophomore standing (fewer than 27 credits) shall enroll in FYS 101 in his/her first semester at Quinnipiac. Students who transfer to Quinnipiac with 27 or more credits must substitute any UC-designated course for FYS 101, to count toward the general education credits needed to graduate. They also will complete a series of self-guided online modules by the start of their second semester at Quinnipiac, designed to ensure students successfully complete their remaining general education requirements and prepare for the integrative capstone experience.

Students may consult the 2015–16 University Catalog for more information on the University Curriculum required of all bachelor's degree candidates who entered Quinnipiac University prior to Fall 2016.
ACADEMIC GOOD STANDING (GENERAL)

(Revised for May 2015)

Credit and GPA Requirements

To be in Academic Good Standing at Quinnipiac, undergraduate students must meet both minimum grade point average and completed credit requirements.

A student fails to meet Academic Good Standing requirements if his or her:

1. cumulative GPA is below 2.0
2. semester GPA is below 2.0 in any two consecutive semesters.

Any first-time, full-time student or first-time, full-time transfer student earning a GPA less than 2.0, but 1.2 or more, will be placed on Academic Warning in his or her first semester. Any first-time, full-time student or first-time, full-time transfer student earning a GPA less than 1.2 will be placed on Academic Probation. Students on Academic Warning are required to follow the same requirements as those on Academic Probation.

In addition to the GPA requirements, all students must complete coursework over a period no longer than 150 percent of their program length to maintain the satisfactory academic progress standards of the university. For example, a full-time student enrolled in a four-year degree program must successfully complete an average of 10 credits per semester registered.

A part-time student must complete an average of 6 credits per semester registered. Some individual degree programs have higher GPA and credit requirements for students to maintain program eligibility. Consequently, students should consult the program description in the Catalog for the requirements of their individual program.

The Academic Good Standing requirements for transfer students are based on the number of credits accepted for transfer. For example, students who enter Quinnipiac with 20 transfer credits are considered to have completed two semesters and are subject to the requirements of a third-semester student during her/his first semester at Quinnipiac. However, minimum GPA is based only on courses completed at Quinnipiac.

Students should also know that failure to meet the Academic Good Standing requirements may result in the loss of financial aid and or scholarship, and may affect their eligibility for campus housing. Also, individual programs may have other academic requirements to remain in good standing in the specific program. Students should refer to the program section of the catalog for information regarding individual program requirements.

Sanctions

Any student who fails to achieve any of the requirements above is subject to one of the following sanctions:

Academic Probation

Probation serves as an official notification of deficiency that requires students to promptly address their deficiency(s). After the close of the previous semester, the Office of Academic Innovation & Effectiveness notifies students of their probation. Prior to the start of each semester, students on probation and their academic advisers are notified about this sanction through Retention Alert; advisers and probationary students also are directed toward resources that support the Improvement Plan process. Before the end of the first week of classes, students on probation must submit an electronic copy of their Improvement Plan to their academic adviser and the Learning Commons. In their Improvement Plan, they should reflect on their past semester, and indicate how they will improve their academic performance to remedy their academic deficiencies. Probationary students must meet with their adviser within the first two weeks of the next semester to have the adviser approve or amend the plan. Approved plans are forwarded to both their school/college dean’s office and the Learning Commons. Probationary students must meet personally with their adviser a second time during preregistration to discuss their progress in meeting the goals of their Improvement Plan and their course selection for the next semester. Additionally, probationary students must email their adviser with a progress update every two weeks during their semester on probation. The Learning Commons has a variety of programs to support students on probation. Students on probation may register for courses in the usual fashion. However, students on probation must attend and successfully complete an Advanced Learning Tutorial with an academic specialist at the Learning Commons during their probationary semester. These meetings provide students support and strategies to assist them in correcting their deficiencies. Normally, students are not permitted to appeal probationary status. However, students who failed to achieve the completed credits requirement for documented medical reasons may appeal a probation decision.

Students on probation or credit deficient at the close of the semester may use summer or winter classes to regain good standing to the degree this action follows existing academic policies. To remediate a deficiency in GPA, students must take a course offered by Quinnipiac University and comply with existing policies regarding summer and winter courses. To remediate credit deficiency with courses taken at another university, students must comply with the Policy Regarding Transfer Credit (p. 145) from other institutions. If they are able to remediate their deficiency, they must appeal the change of academic status through the office of the associate vice president for retention and academic success no later than the Friday of the first week of the subsequent semester. Appeals should be made in person and should include acknowledgement of current status, actions taken to remediate current status, and discussion of changes intended for the next semester. A change in academic status will not be made without a successful appeal. A successful appeal will result in a notation to the student’s transcript that indicates a new standing of Academic Warning, which is discussed below. Appeals to reinstate financial aid may also be addressed during this appeal process.

Suspension

Students who have serious or repeated deficiencies are subject to suspension. Suspended students must leave Quinnipiac for a period of one semester. Suspended students are required to use this period of suspension to review their academic goals and to improve their academic skills. To facilitate this review and reflection, suspended students are assigned an academic specialist with whom to work during their suspension. Suspended students are encouraged to work closely with Learning Commons staff and other resources to prepare for their return to Quinnipiac. Additionally, credit will not be given for courses taken during the suspension period. Suspended students may return to Quinnipiac after the completion of the suspension period; in the semester of their
return, they will be on Academic Warning and subject to its requirements. Further, suspended students are expected to work with their advisers or their associate deans for course selection prior to their return. Students returning from suspension and intending to enroll in summer or J-term courses that might contribute to their program must meet with their adviser or their associate dean before doing so.

**Dismissal**

Students with serious or repeated academic deficiencies are subject to dismissal from Quinnipiac. After a period of at least one year, dismissed students who have demonstrated academic achievement elsewhere may file a new application for admission to Quinnipiac. Permission to reapply does not guarantee readmission to Quinnipiac or to the program from which the student was dismissed.

**Procedures**

Academic records will be formally reviewed at the end of the fall and spring semesters.

*With the exception of the first-time, full-time students and first-time, full-time transfer students as noted above,* students are usually placed on probation after their first deficient semester. Individual students may be continued on probation for subsequent semesters if they make progress in addressing their deficiency. However, students who are deficient after a total of three semesters on probation, two semesters after the freshman year, or two semesters after transferring to Quinnipiac are suspended or dismissed. Any student who has a GPA below 1.2 after two semesters is dismissed. *Suspended and dismissed students may appeal their sanction to the Academic Appeals Committee,* consisting of a representative from the Office of Academic Innovation & Effectiveness, undergraduate school and college deans or their designee (an associate dean), and two students appointed by the student government president.

The Appeals Committee may change a suspension or a dismissal to a lesser sanction. All notifications of decisions and of meeting times of the Appeals committee are sent to the permanent address of affected students by Federal Express or First-Class Mail (probation notices only). It is the responsibility of students to be sure they can be contacted and, if necessary, respond promptly to committee notices. No parents, family members, attorneys or any other third parties are permitted to attend or participate in any academic hearing.

**Academic Warning**

In an effort to support academic success, the university places under review students whose previous academic performance indicates a risk to academic success. Students whose semester grade point average is less than 2.0 and students who have successfully appealed a change in probationary status, as noted above, will be placed on review. While this review is not an official notification of deficiency and these students are not on probation, both conditions may indicate a challenge to academic success. Like those students on probation, however, students under review are contacted by the Office of Academic Innovation & Effectiveness just after the close of the semester. Prior to the start of the next semester, these students and their academic advisers are reminded of the low semester GPA and directed toward resources. Following a discussion of their academic record with their academic adviser or an academic specialist, students will be asked to develop an Improvement Plan and to meet regularly with an academic specialist. This review semester is intended to help students regain their momentum toward academic success.

**Math and English Requirements**

Full-time students are expected to have completed EN 101, EN 102 and MA 110 (or their equivalent) by the end of three semesters. Part-time students are expected to have met these requirements by the time they have completed 30 credits. Students may not withdraw from EN 101 or EN 101I. The first time a student fails to complete EN 101 or EN 101I successfully, a grade of “U” is issued. Each additional unsuccessful attempt at EN 101 or EN 101I results in a grade of “F.” For more information, please review the course description.
ACADEMIC GOOD STANDING
(PROGRAM LEVEL)

All undergraduate and graduate students are expected to maintain each semester the required minimum GPA and/or course grade requirements set forth by their respective program of study (if applicable). Each program may have additional benchmarks that must be met to progress within the program of study. The student should refer to the program's description in this Catalog and to the program's student handbook (if applicable) for clarification for what is required to maintain his/her status within the program.

At the end of each semester, the program directors will compile a list of students who are deficient in meeting academic or clinical/professional achievement requirements. Utilizing the review process established by his/her program, the student will be notified via email of his/her status in the program. Deficient students may be: a) placed on probation; b) suspended; or c) dismissed. Students placed on probation remain in their program but in order to progress, must meet the performance standards specified in their probation notification letter.

If a deficient student believes her/his final grade was determined in an arbitrary, capricious or prejudicial manner, the student may appeal the final grade by following the Procedure to Appeal a Final Grade (p. 122). Only final grades may be appealed. If the grade appeal process results in a recalculated grade that removes all of the student's academic and/or clinical professional achievement deficiencies, then the sanction of probation, suspension or dismissal is removed. Students who are no longer suspended or dismissed may continue to progress in the program in the semester following the conclusion of the grade appeal process.

If a student is placed on suspension or dismissed, and he/she believes there were errors in facts considered by their program or would like to explain extenuating circumstances affecting his/her academic performance, the student may appeal the suspension or dismissal.

If a suspended or dismissed student believes both that 1) his/her final grade was determined in an arbitrary, capricious or prejudicial manner, and 2) there are errors in the facts considered by their program or extenuating circumstances, then the student must first follow the Procedure to Appeal a Final Grade (p. 122). If after the conclusion of the grade appeal process the suspension or dismissal still stands, then the student may proceed with appealing the suspension or dismissal.

Appeals Process

1. If the student's program has a student handbook or other document outlining a departmental level appeals process, the student should appeal the suspension or dismissal by following the guidelines outlined in their program's student handbook or document. Appeals at the departmental level must be submitted in writing within five business days of the student being sent via email a suspension or dismissal notice from their program. The appeals hearing date/time will be determined by the department based upon programmatic guidelines and the student will have the opportunity to attend if he/she chooses. Students are responsible for checking their Quinnipiac email account even during examination and vacation periods. Excuses for not checking the mailbox, email account, or delays in mail delivery are not acceptable reasons for postponement of any deadline in the process. Following the departmental hearing, if the suspension or dismissal still stands, the student may appeal the sanction to the dean of their school.

2. If the student's program does not have a student handbook or other document outlining a departmental level appeals process, the student should appeal the suspension or dismissal directly to the dean of their school.

3. Appeals to the dean must be submitted in writing within five days of the receipt of the final decision from the department. Appeals to the dean should be based on errors in the facts considered by their program or extenuating circumstances. Upon hearing the appeal, the dean may decide to:
   a. concur with the program's initial decision. In this case the initial decision is final.
   b. send the matter back to be reconsidered by the program.
   c. change the sanctions decided by the program by decreasing or increasing the sanctions. In this case the dean's decision is final.

4. If the decision is upheld and the student is dismissed, he/she is encouraged to contact the Office of Career Development (p. 24) in his/her school to discuss alternative programs and career paths. After a period of at least one year, dismissed students who have demonstrated academic achievement elsewhere may file a new application for admission to Quinnipiac. Permission to reapply does not guarantee readmission to Quinnipiac or to the program from which the student was dismissed.

5. No parents, family members, attorneys or any other third parties are permitted to attend or participate in any academic hearing.
ACADEMIC INTEGRITY

Updated Spring 2019

Introduction

A. Integrity: The Foundation of Quinnipiac University

In its Mission Statement, Quinnipiac University emphasizes its commitment to being an academic community. As an academic community, our students, faculty and staff work together to acquire and extend knowledge, develop skills and competencies and serve the greater good of our nation and local communities. Our individual and collective inquiry and pursuit of knowledge are only possible when each of us in the community is aware of and strives to maintain a code of ethical practice and integrity. All communities, though diverse in their individual members, are based on a shared set of beliefs and values that serve as their foundation. At Quinnipiac, our community has chosen integrity as one of its guiding principles.

Integrity means upholding a code or standard of values. In its most general sense integrity also means being complete. As an academic community, the completeness that we seek includes asking each individual to see her/his life as a whole, and to understand how the actions that he/she takes affect self, others and the community. Individual actions also impact the community of higher education as a whole. In keeping with this commitment to the Quinnipiac community and the larger community of higher learning, Quinnipiac is a member of the Center for Academic Integrity (CAI), a consortium of institutions of higher education committed to the principle of integrity. Our Academic Integrity Policy is based on the five fundamental values outlined by the CAI: honesty, trust, responsibility, fairness and respect.

Quinnipiac expects all members of our community, students, faculty and staff, to uphold these five standards of integrity and to contribute to our larger culture of integrity.

Honesty

Honesty is the bedrock upon which integrity is based. Academic and professional honesty require that each individual conduct herself or himself openly and in keeping with the truth. Even more importantly, honesty requires actively searching for and upholding the truth. Honesty is critical for the production and exchange of knowledge and ideas that are the hallmark of an institution of higher learning.

Trust

Trust is essential for an academic community. Academic work almost always builds upon or extends from the work of others and all members of the community must respect the work of others. Each individual must trust that community members undertake their work in such a way that we build our knowledge, while freely and openly admitting our dependence upon the work of others. Community members also must endeavor to be worthy of the trust others have placed in us. This foundation of trust is vital to our community of inquiry and learning.

Responsibility

An academic or professional community provides its members with support, fellowship and intellectual stimulation. The price of these benefits is responsibility to the community. Therefore, all members of the university community must not only be committed to ethical practices themselves, but also must bear the responsibility of helping to encourage integrity among all community members.

Academic Integrity

ACAID: honesty, trust, responsibility, fairness and respect

CAID is critical for the production and exchange of knowledge and ideas that are the hallmark of an institution of higher learning. Honest requires actively searching for and upholding the truth. Honesty is critical for the production and exchange of knowledge and ideas that are the hallmark of an institution of higher learning.

In its Mission Statement, Quinnipiac University emphasizes its commitment to being an academic community. As an academic community, our students, faculty and staff work together to acquire and extend knowledge, develop skills and competencies and serve the greater good of our nation and local communities. Our individual and collective inquiry and pursuit of knowledge are only possible when each of us in the community is aware of and strives to maintain a code of ethical practice and integrity. All communities, though diverse in their individual members, are based on a shared set of beliefs and values that serve as their foundation. At Quinnipiac, our community has chosen integrity as one of its guiding principles.

Integrity means upholding a code or standard of values. In its most general sense integrity also means being complete. As an academic community, the completeness that we seek includes asking each individual to see her/his life as a whole, and to understand how the actions that he/she takes affect self, others and the community. Individual actions also impact the community of higher education as a whole. In keeping with this commitment to the Quinnipiac community and the larger community of higher learning, Quinnipiac is a member of the Center for Academic Integrity (CAI), a consortium of institutions of higher education committed to the principle of integrity. Our Academic Integrity Policy is based on the five fundamental values outlined by the CAI: honesty, trust, responsibility, fairness and respect.

Quinnipiac expects all members of our community, students, faculty and staff, to uphold these five standards of integrity and to contribute to our larger culture of integrity.

Honesty

Honesty is the bedrock upon which integrity is based. Academic and professional honesty require that each individual conduct herself or himself openly and in keeping with the truth. Even more importantly, honesty requires actively searching for and upholding the truth. Honesty is critical for the production and exchange of knowledge and ideas that are the hallmark of an institution of higher learning.

Trust

Trust is essential for an academic community. Academic work almost always builds upon or extends from the work of others and all members of the community must respect the work of others. Each individual must trust that community members undertake their work in such a way that we build our knowledge, while freely and openly admitting our dependence upon the work of others. Community members also must endeavor to be worthy of the trust others have placed in us. This foundation of trust is vital to our community of inquiry and learning.

Responsibility

An academic or professional community provides its members with support, fellowship and intellectual stimulation. The price of these benefits is responsibility to the community. Therefore, all members of the university community must not only be committed to ethical practices themselves, but also must bear the responsibility of helping to encourage integrity among all community members.

Fairness

True communities celebrate the differences among their members while upholding the general principle that each individual should be treated equally. This basic principle of fairness to all is an aspect of integrity that guarantees each of us freedom to express our own individuality. This standard of fairness also carries the burden, however, of fair sanctions to those who violate the standards of the community.

Respect

The university is a gathering place where students and faculty come to learn about different ideas, cultures and ways of thinking — even those with which we may strongly disagree. This learning environment can be maintained only with mutual respect. This respect must be present in the classroom, in our everyday encounters with each another, and in our individual work. Respect means listening to others, evaluating and criticizing their ideas fairly, and properly acknowledging all sources of material that are not originally ours.

B. Expectations for Integrity at Quinnipiac University

This policy is part of the larger educational effort at Quinnipiac University in which community members learn and practice ethical behavior. All members of the Quinnipiac University community are expected to commit themselves to personal and academic integrity and to the five fundamental values by

- Being honest in what they say, don't say, do and don't do
- Trusting others and being worthy of trust
- Acting responsibly and expecting responsible behavior from others
- Treating other members of the community fairly, and expecting fair consequences when mistakes are made
- Treating other members of the community and the educational process with respect, and expecting respect for oneself, one's views and one's abilities.

In keeping with these values, Quinnipiac University expects its community members to comply with the usual expectations for honest academic work. In general, community members

- May not cheat on any work
- Must properly cite sources in all academic work
- May not provide or procure unauthorized assistance on any assignment or test
- May not falsify or alter university documents, tests or assignments
- May not impede any other student in his/her course work
- May not do any other thing that violates or allows another person to violate the accepted standards of academic integrity. (See Appendix I for more details on specific violations.)

Students, faculty and staff also should promote integrity by

- Educating each other
- Discussing integrity in their classes
- Reporting violations when they occur.

Quinnipiac recognizes that reporting violations is difficult; however, reporting is necessary to maintain fairness as well as standards of integrity on campus. Reporting is part of each individual's responsibility as a member of the community. (See Appendix II for community responsibilities.)
This policy is overseen and administered by the Office of Academic Innovation & Effectiveness.

C. Resources
In its effort to uphold these standards of academic integrity, the university provides numerous educational and support resources to reduce academic integrity violations. These resources may be found on the Academic Integrity MyQ site (https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx).

Academic Judicial Procedures for Student Violations

Students, faculty and staff shall report any violation including minor unintentional violations directly to the director of academic integrity on the report form (see the Academic Integrity MyQ site (https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx)). Once a report of an alleged academic integrity violation has been filed, the case will be considered according to the procedures set forth in this Academic Integrity Policy. All members of the university community are expected to follow this policy and to use its procedures.

Should it be necessary to invoke the academic judicial procedures during the January term or a Summer session, every effort will be made to assemble the necessary committees from the academic integrity board from the preceding academic year. Should that prove impossible due to absences from campus, however, the vice president of academic innovation & effectiveness or his/her designee and the director of academic integrity or his/her designee have joint authority to assemble the necessary committees. They should make every attempt to maintain the same ratios of faculty, staff and student representation described in this policy.

A. Minor Unintentional Violations

Students, faculty and staff shall report any violation including minor unintentional violations, directly to the director of academic integrity on the report form (see form in MyQ (https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx)).

1. If this is a first-time minor and unintentional violation and the faculty member and student can agree on an outcome, whether or not the instructor imposes a sanction, the instructor must submit a report form to the director of academic integrity so the university can monitor types of violations and take appropriate steps to remediate the cause. The student is also required to submit a response form. A joint resolution reflecting the terms of their agreement must be submitted to the director of academic integrity (see form in MyQ website (https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx)). A minor unintentional violation will be considered a first-time violation for the student and a subsequent offense will be treated as a second offense.
2. If the student denies responsibility for the minor and unintentional violation or if the faculty member and the student cannot agree on an outcome, the case will proceed on to case review.

B. Substantial or Intentional Violations

1. Students, faculty and staff shall report all substantial and all intentional violations. This written, formal report, presented on the report form, may be submitted by any member of the university community (student, faculty or staff) to the director of academic integrity. The integrity report form is available on the university's MyQ website (https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx).
2. The report must provide the name of the student, the date(s) and a description of the alleged violation(s), detailed facts surrounding the alleged violation(s), the names of any witnesses and detailed factual information or documentation useful in determining the truth of the charge(s) made. If a report contains private or confidential information that is not related to the claim, extraneous prejudicial information, or information that cannot be verified by the academic integrity process, the director of academic integrity will reject the report. Upon revision, the report may be resubmitted. (See Appendix IV: Guidelines for Reporting Suspected Academic Integrity Violations (p. )
3. Incidents involving multiple students must be reported on separate report forms to preserve each student's confidentiality. The director of academic integrity may, however, determine that two cases either involve collaboration between two students or are otherwise so connected that they should be considered as one case.
4. The director of academic integrity will provide written email notice to the student(s), staff and faculty member(s) involved to confirm that a complaint has been filed, to specify the alleged violation and to outline the academic judicial procedures. This notice will explain to the student that he/she is obligated to respond on the response form (see form in MyQ (https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx)) within 48 hours/two business days of such notice. The parties involved are responsible for checking their Quinnipiac email account even during examinations and vacation periods. Excuses for not checking the mailbox, email account or delays in mail delivery are not acceptable reasons for postponement of any deadline in the Academic Integrity Process.
5. The student must fill out the response form within the required time period. Here the student will indicate whether he/she accepts responsibility for the violation and how he/she wishes to proceed. If a student accepts responsibility, he/she is admitting to having committed the academic integrity violation(s) reported.
6. If the student accepts responsibility and has not been found responsible for a previous violation of the Academic Integrity Policy, the student may request:
   a. The opportunity to communicate with the faculty member to discuss the violation and attempt to develop a joint student/faculty resolution.
      i. If both parties agree to the statement of the violation(s) and the sanction(s), they will prepare the joint resolution form (see form in MyQ (https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx)). On this form they will specify the violation(s) and the jointly agreed sanction(s). This joint resolution will be forwarded to the director of academic integrity for final approval. If a conflict of interest occurs, the director can request Academic Integrity Board approval of joint resolutions.
      ii. Faculty are not required to participate in a joint resolution session and may instead request that the case proceed to case review. It is anticipated and encouraged that a joint resolution will be worked out in a private meeting between the faculty member and the student(s) involved in a case. However, either the student or the faculty member can request that the director of academic integrity assign a member of the Academic Integrity Board to attend a joint resolution meeting as a neutral third party.
7. A student who did not initially accept responsibility may, at any time, change his/her response to accept responsibility in order to have the joint resolution process available to him/her.

8. If the student accepts responsibility for an action which violates the Academic Integrity Policy, but is not related to a particular class, the joint resolution may be completed with the director of academic integrity. An example of this would be giving a fellow student a paper from a class taken in a previous semester. Joint resolutions completed with the director of academic integrity will be approved by the Academic Integrity Board.

9. If the student declares he/she is not responsible for the alleged violation, the case will proceed to a case review (see Case Review (p. 74)).

10. If the student has been found responsible for an academic integrity violation and accepts responsibility for the subsequent violation, the case may proceed to case review unless the student requests a hearing. The case review team will decide on the appropriate sanction(s). If the student has been found responsible for a previous violation of the policy and denies responsibility for the subsequent violation, the case will automatically proceed to hearing (see Hearing (p. 74)). If a student has a second report filed against him/her before there has been a resolution in the first case, whether the second report arises from the same or another course, resolution of the second case will be postponed until there has been a resolution in the first case.

11. If grades are awarded while the case is in progress, the faculty member must assign a temporary grade of “incomplete” to the student pending the outcome of the academic integrity hearing board review process. A faculty member should not automatically assign a grade (other than an “I”) when a student is suspected of a violation of this policy. When an incomplete grade is assigned in a prerequisite course, a student may be permitted to enroll in the subsequent course pending the outcome of the academic integrity case. If upon resolution of the academic integrity case, the student’s grade does not meet the prerequisite requirements, the student will be withdrawn from the subsequent course.

12. If a student withdraws from a class prior to the resolution of an academic integrity violation report, the withdrawal shall not impact the process of the academic integrity case. If the student is found responsible for an academic integrity violation, a grade of WAI will be imposed to indicate that the withdrawal was undertaken after a violation of the university’s Academic Integrity Policy. The Academic Integrity Board has full and unique authority to determine sanctions as part of a case review investigation or academic integrity hearing and may convert the WAI to an FAI grade.

a. The grade of WAI or FAI automatically will appear on a student’s transcript.

b. Students may submit to the vice president of academic innovation & effectiveness a petition to have the WAI or FAI academic integrity notation removed from their record if two semesters/terms have passed from the time of the sanction with no further academic integrity violations or the student completes the requirements for graduation (whichever one occurs first). Students will be required to have completed the Academic Integrity Remediation Process with the Office of Academic Integrity in order to have the notation removed.

13. All members of the university community are encouraged to discuss alleged violations with the director of academic integrity prior to filing a report to clarify and confirm procedures.

C. Case Review

1. When a matter proceeds to case review, the director of academic integrity will act expeditiously to select, from the Academic Integrity Board, a case review team consisting of one student and one faculty or staff board member, and will provide written notification to the student(s), staff and faculty member(s) involved indicating that a case review team has been assigned. Any member of the Academic Integrity Board who has a conflict of interest in the case should make that conflict known to the director of academic integrity.

2. Acting with all reasonable dispatch, the case review team will interview separately the student(s), the faculty member(s) and any witnesses involved in the case. Although a student has the right to have an adviser present at the interview, the student is not permitted to have legal representation, parents, family members or students or faculty from the Quinnipiac University School of Law at the interview. The adviser can be any other member of the Quinnipiac University community. A student may make a written request to have an adviser assigned by the director of academic integrity. If a student requests an assigned adviser and then refuses this adviser, no further advisers will be assigned. An adviser may assist the student in preparing for the interview and may attend the interview but may not speak during the interview process. The adviser is not permitted to provide guidance to the student on how to proceed. It is the responsibility of the student to notify the adviser of the date and time of the interview. As part of the investigation, the case review team will collect and review all evidence relevant to the case.

3. Upon completing the review, the case review team will meet as soon as reasonably possible to determine whether sufficient evidence of a violation exists.

a. If insufficient evidence of the alleged violation(s) is determined, the report and charges will be dismissed. Under these circumstances, no record of the report or the outcome will be retained. The director of academic integrity will inform the student(s) and other involved parties of this decision.

b. If sufficient evidence of a violation is determined, the case review team will determine the appropriate sanction to be issued in the case. This determination shall be the final resolution in the case.

c. The case review team will submit a written report of findings to the director of academic integrity. The director of academic integrity will notify the parties, in writing, of the case review team’s final determination.

D. Hearing

1. When a case requires, the director of academic integrity will act with dispatch to convene a hearing board from the Academic Integrity Board.

2. Each hearing board will consist of five members selected from the Academic Integrity Board: three student and two faculty/staff members. The director of academic integrity or a designated member of the Academic Integrity Board will chair each hearing. Any member of the Academic Integrity Board who has a conflict of interest in the case should make that conflict known to the chair of the Academic Integrity Hearing Board and the director of academic integrity.

3. The director of academic integrity will notify the student(s) and faculty that are involved, in writing, of the academic judicial hearing procedures. The student may choose to meet with the director...
of academic integrity to be sure he/she fully understands the procedures that will be followed during the hearing. The hearing board will meet as soon as reasonably possible.

4. A hearing will be scheduled at a time that neither the student(s) nor faculty member involved in the case has a class conflict. Notice of the time, date and place of the meeting will be sent to the parties involved via electronic mail at least 48 hours/two business days prior to the meeting. This letter will also inform the student that he/she has the right to an adviser, who can be any member of the Quinnipiac University community other than a student or faculty member from the Quinnipiac University School of Law. A single request for postponement of up to five additional business days for an academic integrity hearing may be made to the director of academic integrity. The request must be for good cause and is subject to the availability of the hearing board and other parties involved in the case. Excuses for not checking the mailbox, email account or delays in mail delivery are not acceptable reasons for postponement. Academic integrity cases are heard as scheduled with or without the student present. All communications will be sent to the student’s Quinnipiac email. If the student’s Quinnipiac email has been disabled for any reason it is the responsibility of the student to notify the Office of Academic Integrity.

5. The student appearing before the hearing board will not be permitted to have legal representation, parents, family members or students or faculty from the Quinnipiac University School of Law at the hearing. A student may request, in writing, to have an adviser assigned by the director of academic integrity. If a student requests an assigned adviser and then refuses this adviser, no further advisers will be assigned. An adviser may assist the student in preparing for the hearing and may attend the hearing but may not speak during the hearing process. The adviser is not permitted to provide guidance to the student on how to proceed. It is the responsibility of the student to notify the adviser of the date and time of the hearing.

6. Any cases which involve more than one student, will all be heard prior to any voting by the board on individual cases.

7. The procedure for the hearing will be as follows:
   a. Each party will present a statement. The hearing board will ask questions of each party, examine evidence and interview witnesses if necessary.
   b. Upon conclusion of this discussion, each party will be asked if there is any additional information, discrepancies or questions that need to be presented or addressed.
   c. All parties will be asked to leave the room while the hearing board deliberates. After its discussion, the board will decide if there is clear and convincing evidence that indicates that the student is responsible for violation(s) of the Academic Integrity Policy by way of a simple majority vote.
   d. If the student is found to be responsible, the hearing board shall then be informed of the student’s prior record so that the student’s entire history of academic violation can be considered in issuing sanctions.
   e. If the student is found responsible for the violation(s), the hearing board has full and unique authority to determine the sanction(s).

8. Once the hearing board has reached a decision, the chair of the hearing board will ask the parties involved to return to the room, and the results of the deliberation will be presented. In addition, the chair of the hearing board will notify the parties involved and the director of academic integrity of the decision in writing via electronic mail following the hearing. The notice will explain the sanctions imposed by the hearing board and the appeal process.

9. If insufficient evidence of the alleged violation(s) is determined, the report and charges will be dismissed. Under these circumstances, no record of the report or the outcome will be retained. The chair of the hearing board will inform the parties and the director of academic integrity of this decision in writing via electronic mail.

10. If a student fails to respond to or comply with a letter/notification from the Academic Integrity Office, hearing board or case review team; attend a scheduled meeting with any academic integrity officer, hearing board or case review team member or faculty member; attend an academic judicial hearing; or abide by any of the procedures here noted in this policy, the student has forfeited his/her rights and options presented. The case may proceed without the student or faculty present and a decision will be rendered. If a hearing takes place without the student present, the student will be notified in writing via certified and electronic mail of the outcome of the hearing.

E. Guidelines for Determining Sanctions

Below are guidelines for the Academic Integrity Board to consider when deciding which sanctions are appropriate in a case review determination or hearing board decision. However, the hearing board may deem alternate sanctions appropriate in individual cases.

1. First offenses may result in probation as well as failure on the exam/assignment and/or failure of the course, but could lead to immediate suspension, dismissal or expulsion. Probation is a pre-suspension sanction.

2. Repeat offenses will result in increasingly severe sanctions, including suspension, dismissal and expulsion. When a student on probation is found responsible for a subsequent academic integrity violation during the probationary period, the subsequent violation will automatically result in a one-semester suspension.

3. If the student is sanctioned with failure of the course, a grade of FAI will be imposed to indicate that the failure was a result of an academic integrity sanction.

4. In addition to above, the hearing board has the right to require the student to complete academic integrity projects, write letters of apology or any alternate educational sanction deemed appropriate for any violation, in addition to the automatic educational requirement implemented by the Office of Academic Integrity for every student found to be responsible for a violation of the Academic Integrity Policy.

5. The hearing board has the authority to convert the W grade to an FAI upon finding the student responsible for an academic integrity violation.

6. Any sanction resulting in a grade of WAI or FAI or in a suspension, dismissal or expulsion automatically will appear on a student’s transcript. Students may submit to the vice president of academic innovation & effectiveness a petition to have this academic integrity notation removed from their record if two semesters/terms have passed from the time of the sanction with no further academic integrity violations, or the student completes the requirements for graduation (whichever one occurs first). Students will be required to have completed the Academic Integrity Remediation Process with the Office of Academic Integrity in order to have the notation removed.

F. Non-Compliance

1. Students who fail to comply with the sanctions determined in a joint resolution, will have their case proceed to a hearing where the academic integrity board will determine sanctions.
2. Students who fail to comply with the sanctions determined by a case review team or hearing board will be subject to a one-semester suspension.

3. Procedure:
   a. Any student who appears to be in non-compliance with a joint resolution or a case review or a hearing board sanction will be notified by the director of academic integrity via email of the apparent noncompliance. The student will be informed of the non-compliance issues/facts and will be instructed to reply within 48 hours/two business days. The student also will be informed that he/she can request an extension for compliance, in writing, to the director. No more than one extension will be granted by the director. If the student requests an extension for compliance, he/she will be notified by the director of the extension’s approval/denial and the reasons for such.
   b. If the student does not reply within 48 hours/two business days of the notification of non-compliance, the student will be deemed to be non-compliant and the case will be required to attend a hearing (joint resolution) or the student will be subject to a one-semester suspension (case review or hearing).
   c. Appeal of the suspension will occur in the same manner as all other suspensions. (See Appeal (p. 76) section of the Academic Integrity Policy)

G. Appeal

1. An individual who has been found responsible for a violation of the Academic Integrity Policy may appeal the decision of the case review team or hearing board. Appeals must be made directly to vice president of academic innovation & effectiveness or his/her designee. During this appeal process, the original sanction is held in abeyance until an appeal decision has been made.

2. A detailed formal letter of appeal must be submitted within 48 hours/two business days of the student’s receipt of written notification of the decision and must explain one or more of the following specific grounds for the appeal:
   a. Improper academic judicial procedures that impacted the student’s ability to present his/her case effectively.
   b. Additional or new relevant information has been discovered.
   c. The sanction was not consistent or appropriate with the nature of the violation.

3. The vice president of academic innovation & effectiveness or his/her designee will meet with the individual involved and may meet with other witnesses. He/she then will decide to:
   a. Uphold the original decision on responsibility and the sanction imposed.
   b. Uphold the original decision on responsibility and modify the sanction imposed.
   c. Determine that improper procedures impacted the student’s ability to properly present his/her case and order a new hearing to be held using proper procedures.
   d. Overturn the decision on responsibility.

4. The vice president of academic innovation & effectiveness or his/her designee will notify all appropriate individuals involved in the case, the director of academic integrity and any appropriate Quinnipiac University personnel (dean, registrar, bursar, etc.) of the outcome of the appeal.

H. Record Keeping

1. All records regarding alleged violations and academic judicial procedures are confidential in accordance with The Family Educational Rights and Privacy Act (FERPA).

2. Records will be maintained by the Office of Academic Integrity and will be destroyed seven years after the case is concluded unless the sanction included dismissal or expulsion. These records will be maintained permanently by the Office of Academic Integrity.

3. Records of multiple offenses will be maintained by the Office of Academic Integrity and will be made available to the relevant Academic Integrity Board members in the sanctions phase of a hearing or case review.

I. Student Procedural Rights

A student who has been charged with a violation of the Academic Integrity Policy shall be granted the following procedural rights:

1. Confidentiality: In accordance with FERPA and the Student Records Policy (p. 134), the right to have all records, files and proceedings kept confidential and shared with a Quinnipiac University official only when the official has a legitimate need to know.

2. Notice: The right to be informed in writing of the specific violation(s) and inappropriate behavior in which the student is suspected of being involved.

3. Procedures: The right to be informed orally and/or in writing of the academic integrity procedures.

4. Hearing: The right to be notified in writing of the date, time and place of his/her hearing.

5. Evidence: The right to be informed of the evidence against her/him and to present relevant evidence on his/her behalf.

6. Witnesses: The right to present evidence and witnesses on his/her behalf.

7. Adviser: The right to have any member of the Quinnipiac University community act as an adviser and attend the hearing. If the student so requests, the Office of Academic Integrity will appoint an adviser for the student.

8. Written Decision: The right to have written notice of the results of any case review or hearing.

9. Appeal: The right to appeal a decision of a case review team or hearing board within 48 hours/two business days of receiving written notification of the final decision.

Appendix I: Academic Integrity Violations

Academic integrity violations encompass any act that compromises or subverts the integrity of the educational or research processes. Violations may fall under one or more category or violation. These offenses include, but are limited to:

A. Plagiarism, Misrepresentation and Fabrication

These violations include, but are not limited to, activities that misrepresent one’s ideas, abilities or background.
1. Plagiarism

Plagiarism refers to representing another person's words or ideas as one's own in any academic exercise, whether intentional or not. Examples include:

- Copying information word for word from a source, without using quotation marks and giving proper acknowledgment/citation.
- Paraphrasing (i.e., putting into one's own words) a source's text, without providing proper acknowledgment/citation. This violation occurs when the ideas or arguments of another are presented in such a way as to lead the reader to believe that these ideas originated with the writer.
- Presenting as one's own any work (or portion thereof) that which has been prepared in whole or in part by someone other than oneself. This includes using unauthorized assistance in preparing one's work and acquiring written work from an outside source. Outside sources include other persons, commercial organizations, electronic sources and other sources.
- Reproducing (without proper citation) any other form of work of another person, such as a graphic element, a musical phrase, a proof, experimental data, experimental results, data or laboratory reports, in full or in part. This includes turning in work of another student as one's own work.

It is the responsibility of all students to understand the methods of proper attribution and to apply those principles in all written, oral and electronic submissions.

2. Misrepresentation

Examples include, but are not limited to:

- Arranging for another student to substitute for oneself in class, during an examination session or in the completion of any course work.
- Taking credit for work not done, such as taking credit for a team assignment without participating or contributing to the extent expected.
- “Double Dipping” (multiple uses of the same work) or presenting the same or substantially the same written work (or portion thereof) as part of the course requirement for more than one project or course, without the express prior written permission of the instructor(s) involved.
- If a student does wish to use another assignment as a base for additional credit, faculty should give the student the opportunity to submit in writing an explanation of the unique educational benefits of the new project.

3. Fabrication

Fabrication refers to falsifying or misusing data in any academic exercise. Examples include, but are not limited to:

- Falsifying data collected for any academic purpose.
- Making up or presenting falsified data in papers, manuscripts, books or other documents submitted for publication or as course or degree requirements.
- Making up a source for use in any assignment.
- Citing a source one did not use.
- Falsifying material cited.
- Attempting to deceive any instructor by altering and resubmitting for additional credit assignments, tests, quizzes or exams that have been graded and returned.
- Attempt to deceive any instructor or supervisor with respect to attendance in any class, internship or clinical setting.
- Falsifying any information on any document relating to any course, internship or co-curricular activity (including signatures, hours, etc.)

B. Cheating and Stealing

Cheating refers to using (or attempting to use) unauthorized assistance in any academic exercise. It includes the stealing or unauthorized acquisition of a test or test answers or impeding the fair process of an examination in any way. Examples of this violation include, but are not limited to:

- Copying from someone else's exam, paper or assignment.
- Looking at someone else's exam before or during an examination.
- Unauthorized use or possession of notes, supplemental notes, access passwords or any unauthorized materials during an examination, quiz or other assignment or evaluation.
- Possessing an electronic device that contains unauthorized information for a test or assignment (e.g., programming one's computer or calculator inappropriately).
- Using unauthorized materials (e.g., notes, textbooks, calculators, computers or other online sources) in the preparation of a test or assignment.
- Violating test and assignment procedures and restrictions established by the instructor. If a student is uncertain or unaware of the instructor’s expectations/procedures, the student must consult with the instructor beforehand.
- Communicating or attempting to communicate answers, hints or suggestions during an examination.
- Collaborating (without instructor permission) in the preparation and presentation of reports, laboratory reports or take-home examinations or other course assignments such as copying or giving aid or otherwise failing to abide by the university's or instructor's rules governing the exercise or examination.
- Using another person's answers for an assignment.
- Soliciting, obtaining, possessing or providing to another person an examination or portions of an exam, prior or subsequent to the administration of the exam, without the authorization of the instructor. Unless the instructor has given permission, students may not provide test questions to other students in any form—oral, written or electronic.
- Stealing, or attempting to steal, an examination or answer key.
- Sharing answers for or collaborating on a take-home assignment or examination without explicit permission from the instructor.
- Signing an attendance sheet for another student or having another student sign an attendance sheet on your behalf when attendance is a part of the course grade.
- Recording any portion of a classroom lecture or other instructional activity, or any conversation related to academics or the academic integrity process, without the express consent of the instructor, adviser or administrator.
- The unauthorized sale, purchase, posting, dissemination or use of academic lectures, academic computer software, instructional materials, papers/essays or research for papers/essays.

C. Impeding Fair and Equal Access to the Educational and Research Process

Examples of this violation include, but are not limited to:
• Altering or changing an examination or comparable document so as to mislead other users or the reader.
• Infringing upon the right of other students to fair and equal access to any library materials and comparable or related academic resources, including tampering with or damaging any library materials or comparable academic resources.
• Attempting to prevent access by other users to the university's computer system and its resources, to degrade its system performance, or to copy or destroy files or programs without consent.
• Intentionally disrupting the educational process in any manner.

D. Misrepresenting or Misusing One’s Relationship with the University
Examples of this violation include, but are not limited to:
• Falsifying, misusing, omitting or tampering with information (in any form, including written, oral or electronic) such as test scores, transcripts, letters of recommendation or statements of purpose, to gain initial or continued access to the university's programs or facilities.
• Altering, changing, forging or misusing academic records or any official university form regarding oneself or others.
• Misrepresenting one's status or affiliation with the university.
• Misrepresenting one's own or another's identity for academic purposes or in an academic setting.
• Causing any false information to be presented at an academic proceeding or intentionally destroying evidence important to an academic proceeding.
• Failing to be fully cooperative and truthful if one has direct knowledge of an alleged violation of academic integrity.
• Reporting an academic integrity violation known to be false.
• Offering bribes (e.g., monetary remuneration, gifts or favors) to any university representative in exchange for special consideration or waiver of procedures.

E. Facilitation and Collusion
Facilitation refers to knowingly or intentionally assisting any person in the commission of an academic integrity violation. Students who engage in facilitation are also subject to discipline for integrity violations. Collusion refers to assisting another student in an act of academic misconduct. Collusion differs from collaboration in that collaboration may be permitted in various courses. It is the responsibility of the student to know whether and to what extent collaborative activity is permitted. Examples of these violations include, but are not limited to:
• Giving another student one's assignment or paper (or a portion thereof), for any reason, unless such sharing is specifically authorized by the instructor for whom the assignment was created.
• Giving another student answers to a test or assignment.
• Letting another student copy one's answers during an examination.
• Creating unfair opportunities for students in all sections of a class to do well on tests or other assignments. Thus one may not give any test (or assignment) information, questions or answers to students in another class or sections of the same class because it gives students in later sections an unfair advantage. Instructors also may explicitly ask students not to share information with students in other classes regardless of semesters. In those cases, the sharing of information is also a violation.
• Posting any academic work or information on academic sharing websites or other electronic sites with the intent of providing unauthorized help to current or future students.

F. Retaliation
Quinnipiac University prohibits retaliation against anyone who reports an academic integrity violation, serves as a witness in an academic integrity case or participates in the investigation and resolution of academic integrity case.

Appendix II: Community Responsibilities
A. Academic Integrity Policy
Every member of the community is expected to comply with Quinnipiac's Academic Integrity Policy. Each student must read the university's Academic Integrity Policy and will sign a statement or login to the integrity website during Freshman and Transfer Orientation to attest that he/she understands the policy and the penalties for violating it. Failure to sign the statement does not exempt any student from the requirements of the policy.

B. Promotion and Support of Integrity
Members of the community should support the general culture of integrity at Quinnipiac by maintaining an atmosphere of honesty and integrity on campus, and by talking about the value of integrity to one's educational experience and individual development.

Faculty have a unique opportunity to promote the policy. They are encouraged to do so by:

1. Describing in writing the objectives and requirements of the course at the beginning of the semester.
2. Including a description of the Academic Integrity Policy and other materials promoting academic integrity on each course syllabus.
3. Discussing and reviewing the importance of academic honesty and integrity with students, and reminding students that they must do their own work.
4. Providing to students in writing the requirements and expectations for each academic assignment, including what practice and resources are authorized, to help students avoid inadvertent academic integrity violations.

Staff also can promote academic integrity by:

1. Discussing the Academic Integrity Policy and the importance of integrity in interactions with students, student organizations and faculty.
2. Emphasizing the importance of academic honesty and integrity with students and faculty and encouraging students to do their own work.

C. Proper Acknowledgment
Students, faculty and staff should understand the meaning of plagiarism and misrepresentation, understand how to properly acknowledge another's work, and apply these principles in all written, oral and electronic work.

D. Support of Policy
Each member of the community is expected to adhere to the Academic Integrity Policy personally and to support it generally. In keeping with their responsibility to the community, students, faculty and staff who are
aware of inappropriate behavior and conduct with regard to the policy should report this information to the Academic Integrity Board.

E. Upholding Integrity
The community is expected to comply with the “spirit,” not just the “letter,” of this policy.

F. Mutual Respect
Treat all colleagues in the community (staff, faculty and students) with respect, fairness and honesty.

G. Confidentiality
Community members should ensure that all alleged incidents of academic dishonesty are kept confidential in accordance with FERPA.

H. Special Assignments
Faculty often require students to pursue their academic work according to explicit guidelines or with specific equipment. In these cases, faculty are obligated to make the special conditions of the assignment clear and to avoid arbitrary changes. Students are obligated to be sure they understand the conditions and should question the instructor if they do not understand.

Appendix III: Academic Integrity Board
A. Responsibilities
The Academic Integrity Board is responsible for investigating and adjudicating alleged violations of the Academic Integrity Policy and educating the university community about academic integrity issues. The Academic Integrity Board works closely with the director of academic integrity and co-chairs of the Academic Integrity Board and Integrity Education Council.

B. Composition
The Academic Integrity Board consists of full-time faculty members from each of the university’s schools and colleges; full-time university staff members; and full-time undergraduate and graduate students. Temporary board members may be appointed on an as-needed basis by the director of academic integrity.

C. Selection and Tenure
Positions on the Academic Integrity Board are open to all students, full-time faculty and administrative staff. Faculty board members are appointed by the individual schools and college in accordance with school/college-based processes and approved by the director of academic integrity. At least one board member from each school is required; schools with 25 or more faculty members should have one additional board member for every 25 full-time faculty members. Staff and student board members are selected by the director of academic integrity. Student members must have and maintain a minimum 2.5 GPA and cannot be under any type of academic or disciplinary sanctions. If a member of the Academic Integrity Board is unable to or fails to perform her/his duties for a prolonged period of time, the director of academic integrity will remove the member and appoint a permanent replacement.

Appendix IV: Guidelines for Reporting Suspected Academic Integrity Violations
When a member of the university community suspects that a student has committed an academic integrity violation, that member must submit an academic integrity report. Before reporting the allegation to the Office of Academic Integrity, the following steps should be taken.

Step 1—Investigate the Claim
When a course instructor suspects an academic integrity violation has occurred, the instructor should:

• Meet with the student suspected of violating the policy to discuss the matter.
• Gather information in support of the claim (i.e. papers and assignments).
• Speak with witnesses who may have information about the incident.

If after investigation, there is reasonable suspicion that an academic integrity violation has occurred, the instructor must file a report.

When a member of the university community (other than the course instructor) suspects a violation of the Academic Integrity Policy, he/she must:

• First discuss the matter with the course instructor. This is especially true when the allegation is based solely upon a student’s account of what happened.
• This discussion will not only notify the faculty member of the suspicions but also prompt a preliminary investigation. The preliminary investigation should include gathering information to support the claim and speaking with potential witnesses.
• If after investigation, there is reason to believe a violation has occurred, the report may be filed by any member of the university community. Please note, the reporter’s identity will be disclosed once notice is sent to the accused student.

Step 2—Promptly File the Report
All academic integrity reports must be filed in a timely manner. All suspected violations must be reported within 20 days of the date of the alleged incident or within 20 days of discovery of the alleged violation, whichever is later.

Step 3—Include All Relevant Information in the Report/Documentation
The report must include the name of the student accused of the academic integrity violation, the date and description of the alleged violation, detailed facts surrounding the alleged violation, and the names and contact information of any witnesses.

If witnesses are referred to but not identified within the report, their testimony cannot be verified by the academic integrity process and so the director of academic integrity will reject the report. Each instance of academic dishonesty involving a student must be reported separately unless the claims arise out of the same set of circumstances.

All reports must be substantiated by information that directly relates to proving the claim. Extraplejudicial information will be inadmissible. Information that cannot be verified through the academic integrity process also will be inadmissible.

Examples of inadmissible information:

• The report includes prejudicial information about the accused student’s academic integrity history.
• The report includes hearsay information (i.e., when one witness says another witness told him that the accused student cheated on an exam).
• The report includes the testimony of an anonymous witness.
• Private or confidential information that is not related to the claim and for which there is no “need to know.”

**Step 4—Revision of the Report**

This step will be necessary if inadmissible information is included in the initial report/documentation. When a report/supporting document contains inadmissible information, the director of academic integrity will reject the report. The reporter will be required to revise the report before the Office of Academic Integrity will accept and process the case.

The reporter will also be asked to revise the report if multiple students are accused of academic dishonesty in the same report. Incidents involving multiple students must be reported on separate forms to preserve each student’s confidentiality.

**Step 5—Confirmation of Notice**

Once it has been determined that the report and supporting documents conform to the standards set out in this policy, the student accused of the academic integrity violation will be notified of the claim. The reporter will receive a copy of the notice to confirm that the academic integrity process has been initiated.
ANIMALS ON CAMPUS

Updated Spring 2019

Section 1: General Policy

1.01 Policy Statement
Quinnipiac University (“university”) allows individuals to bring animals on university property in accordance with federal laws and in other situations subject to the rules outlined in this policy.

The university supports the use of service and emotional support animals on campus as defined and regulated by federal and state laws. The university also supports the use of research and therapy animals used in approved research and teaching activities.

At the same time, it recognizes the health and safety risks potentially created by animals on campus. Animals, including pets of any kind (except fish, as noted in the Student Handbook), are not permitted on university campuses or in university housing facilities, with the exception of service animals, approved emotional support animals, approved research animals and approved therapy animals.

1.02 Scope
This policy applies to employees, students, university affiliates, visitors, contractors and applicants for admission to or employment with the university. In addition to the general policy statement in Section 1.01, Section 2 applies specifically to employees. Section 3 applies specifically to students. Section 4 regards research and teaching animals. Sections 5 and 6 pertain to therapy animals.

This policy should not be read to grant an individual access to university property beyond that to which they would normally be granted.

1.03 Definitions
Campus – any university controlled and/or managed building, office or grounds.

Emotional Support Animals (ESA) – As defined by the Fair Housing Act, an emotional support animal may provide physical assistance, emotional support, calming, stability and other kinds of support. The presence of the animal must be necessary to provide the resident with a disability the use and enjoyment of the dwelling. The assistance performed by the animal must be directly related to the individual’s disability. These emotional support animals are not service animals, which are defined in and protected by the Americans with Disabilities Act amendments. Further, non-domesticated, wild, potentially dangerous, venomous, endangered and/or illegal animals, including rodents, arachnids, reptiles and other exotic animals, are not permitted.

Handler – Person accompanying an animal or responsible for bringing it to campus.

Office of Student Accessibility (OSA) – The unit at Quinnipiac University that ensures equal access to academic and programmatic opportunity to students.

Pet – Any domestic animal including but not limited to amphibians, mammals, reptiles and birds kept for pleasure or companionship.

Research and Teaching Animals – Animals approved for use in direct support of the university’s teaching and research missions and used in accordance with guideline established by the Institutional Animal Care and Use Committee (IACUC). The QU IACUC provides policies for meeting the ethical and legal requirements for the humane and ethical use of vertebrate animals.

Residential Living Area – The area defined by Residential Life as areas specific to residential activity. This designation will vary among the campuses. This designation also indicates the area in which an emotional support animal is allowed.

Service Animal – As defined by the Americans with Disabilities Act (ADA), a service animal is any dog that is individually trained to do work or perform tasks for the benefit of a person with a disability, including a physical, sensory, psychiatric, intellectual or other mental disability. The work the dog has been trained to do must be directly related to the person’s disability. Examples include, but are not limited to, guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting/protecting an individual who is having a seizure and reminding an individual to take medication. The provision of emotional support, well-being, comfort or companionship does not constitute work or tasks under this definition. While dogs are the most common service animals, under certain circumstances, a miniature horse may qualify as a service animal. Other animals do not qualify as service animals.

Service Animal in Training – A service animal in training is a dog that is being trained as a service animal and includes a puppy that is being raised to become a service animal in training.

Therapy Animal – An animal working with a health care or mental health care professional in a therapeutic activity. The animal must have received training appropriate for animal assisted therapy/activities (AAT/AAA) as evidenced by receipt of the Canine Good Citizen certificate from the American Kennel Club, or registration by a national therapy animal organization, such as Pet Partners. A therapy animal is not an emotional assistance animal or a service animal.

Section 2: Employees Wishing to Bring Animals on Campus
This policy is section 2.14 of the Quinnipiac University Policy Manual 2016–17.

2.01 Policy Statement
The university prohibits bringing a pet (a domestic animal kept for pleasure or companionship) to work with the exception of animals providing ADA accommodations for a person with disabilities (service animals).

2.02 Service Animals
Service Animals: According to the Americans with Disabilities Act (ADA), a service animal is defined as “any animal individually trained to work or
perform tasks for the benefit of an individual with a disability, including, but not limited to, guiding individuals with impaired vision, alerting individuals to an impending seizure or protecting individuals during one, and alerting individuals who are hearing impaired to intruders, or pulling a wheelchair and fetching dropped items."

A person with a disability uses a service animal, such as a seeing-eye dog, as an auxiliary aid. Service animals are welcome in all buildings on the university property and may attend any class, meeting or other event. There may be an exception to certain areas, such as laboratories and facilities areas, etc.

Employees requesting accommodation for a disability that includes a service animal must provide appropriate documentation to human resources.

Requirements of service animals and their owners include:

- All animals must be immunized against rabies and/or other diseases common to that type of animal. All vaccinations must be current.
- State law requires that all dogs be licensed.
- Service animals must always wear an owner identification tag (which includes the name and phone number of the employee), license tag and rabies vaccination tag.
- Animals must be in good health.
- Animals must be on a leash, harness or other type of restraint at all times, unless the employee is unable to restrain the animal on a leash because of a disability.
- The owner must be in full control of the animal at all times. The care and supervision of the animal is solely the responsibility of the employee.

Reasonable behavior is expected from service animals while on the university property. The owners of disruptive and aggressive service animals may be asked to remove them from the university. If the improper behavior happens repeatedly, the owner may be told not to bring the service animal into any facility until the owner takes significant steps to mitigate the behavior. Cleanliness of the service animal is mandatory. Consideration of others must be taken into account when providing maintenance and hygiene of service animals. The employee is expected to clean and dispose of all animal waste. Owners of service animals are responsible for all actions of the animal while on university property.

**Section 3: Students Wishing to Bring Animals on Campus**

This policy is section 3 of the Guidelines and Procedures for Students with Disabilities (p. 91).

**3.01 Scope**

This policy applies to all students of the university.

**3.02 Policy Statement**

According to university policy (Human Resources Policy Manual (https://myq.quinnipiac.edu/Welcome/HR/Documents/Policy%20Manuals%20and%20Procedures/Quinnipiac%20University%20Policy%20Manual%202016-2017.pdf), 2.14; Student Handbook (https://www.qu.edu/content/dam/qu/documents/policies/undergraduate-student-handbook-2017-18.pdf)): Residential Life, animals, including pets of any kind (except fish, as noted in the Student Handbook (https://www.qu.edu/content/dam/qu/documents/policies/undergraduate-student-handbook-2017-18.pdf)), are not permitted on university campuses or in university housing facilities, with the exception of service animals. The university is, however, committed to providing access to its programs and services. Consequently, the university permits students with disabilities who require one to have an emotional support animal as a reasonable accommodation. Students may not bring a service animal or emotional support animal until it is approved by OSA and the Office of Residential Life, when applicable. Please note the definitions below to understand the difference between a service animal and an emotional support animal.

**3.03 Definitions**

(same as section 1.03)

- **Campus** – any university controlled and/or managed building, office or grounds.
- **Emotional Support Animals (ESA)** – As defined by the Fair Housing Act, an emotional support animal may provide physical assistance, emotional support, calming, stability and other kinds of support. The presence of the animal must be necessary in order to provide the resident with a disability the use and enjoyment of the dwelling. The assistance performed by the animal must be directly related to the individual's disability. These emotional support animals are not service animals, which are defined in and protected by the Americans with Disabilities Act Amendments. Further, non-domesticated, wild, potentially dangerous, venomous, endangered and/or illegal animals, including rodents, arachnids, reptiles and other exotic animals, are not permitted.
- **Handler** – Person accompanying an animal or responsible for bringing it to campus.
- **Office of Student Accessibility (OSA)** – The unit at Quinnipiac University that ensures equal access to academic and programmatic opportunity to students.
- **Pet** – Any domestic animal including but not limited to amphibians, mammals, reptiles and birds kept for pleasure or companionship.
- **Research and Teaching Animals** – Animals approved for use in direct support of the university’s teaching and research missions and used in accordance with guideline established by the Institutional Animal Care and Use Committee (IACUC). The QU IACUC provides policies for meeting the ethical and legal requirements for the humane and ethical use of vertebrate animals.
- **Residential Living Area** - The area defined by Residential Life as areas specific to residential activity. This designation will vary among the campuses. This designation also indicates the area in which an Emotional Support Animal is allowed.
- **Mount Carmel Residential Living Area** – The region south of the stream, north of the Hilltop Lot, west of Hogan Lot, anything on Bobcat Way (including the Bobcat Den);
- **York Hill Residential Living Area** – The area comprised by the Townhouses, Eastview, Westview and Crescent Residence Halls (including the basketball and volleyball courts and outdoor patios);
- **Off-Campus Residential Living Areas** – All university-owned or leased off-campus residential properties.
- **Service Animal** – As defined by the Americans with Disabilities Act (ADA), a service animal is any dog that is individually trained to do work or perform tasks for the benefit of a person with a disability, including a physical, sensory, psychiatric, intellectual or other mental disability. The work the dog has been trained to do must be directly related to
the person’s disability. Examples include, but are not limited to, guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting/protecting an individual who is having a seizure and reminding an individual to take medication. The provision of emotional support, well-being, comfort or companionship does not constitute work or tasks under this definition. While dogs are the most common service animals, under certain circumstances, a miniature horse may qualify as a service animal. Other animals do not qualify as service animals.

**Service Animal in Training** – A service animal in training is a dog that is being trained as a service animal and includes a puppy that is being raised to become a service animal in training.

**Therapy Animal** – An animal working with a health care or mental health care professional in a therapeutic activity. The animal must have received training appropriate for animal assisted therapy/activities (AAT/AAA) as evidenced by receipt of the Canine Good Citizen certificate from the American Kennel Club, or registration by a national therapy animal organization, such as Pet Partners. A Therapy animal is not an emotional assistance animal or a service animal.

### 3.04 Service Animals

Students who have a documented disability that requires the assistance of a service animal are permitted to bring such animals to campus. Service animals are permitted in all areas of campus where students are generally permitted to go. (Note Section 3.08 (p. 83) below for restrictions.)

A service animal shall be kept on a harness, leash or other tether at all times, unless the handler is unable to use such a tether due to a disability or the use of a tether would interfere with the animal’s ability to safely and effectively perform its duties. If a tether is not utilized, the service animal must be otherwise under the handler’s control (e.g., voice control, signals or other effective means). A service animal should wear a leash, harness, cape or other marker that identifies it as a service animal at all times when on campus.

When it is not obvious what service the animal provides, the handler may be asked whether the animal is required because of a disability and what task the animal is trained to perform. The handler need not present proof or documentation of the nature of his or her disability or the training or certification of the service animal.

### 3.05 Emotional Support Animals

Students are permitted to keep emotional support animals in on-campus housing on a case-by-case basis as a reasonable accommodation for a documented disability.

Emotional support animals may not travel throughout campus property with their handlers. To permit a handler with equal opportunity to use and enjoy university housing, emotional support animals are permitted within the handler’s residential living area at all times. A formal agreement between residential life and the handler will be utilized to identify the area where the handler can take the emotional support animal depending upon the housing unit in which the handler resides. The Office of Residential Life defines the handler’s residential living area. When being transported to and from campus, the emotional support animal must be placed in an animal carrier or controlled by leash or harness. While outside the handler’s residential living area, the handler shall carry proof that the animal is an OSA-approved emotional support animal. Emotional support animals are not permitted in other university buildings.

In order to bring an emotional support animal to campus, the handler must contact OSA as early as possible to permit time to gather and review all necessary documentation. The OSA requires a reasonable amount of time to review documentation. The handler will be asked to provide documentation of his or her disability and medical documentation of the need for the emotional support animal. Such documentation must be from a licensed physician, psychiatrist, clinical social worker or other licensed mental health professional and provide that the animal provides emotional support that alleviates one or more of the identified symptoms or effects of an existing disability. Emotional distress from having to give up an animal because of a “no pets” policy does not qualify a student for an accommodation.

The handler also may be asked to provide the following information regarding the emotional support animal: 1) the type of animal; 2) the name of the animal; 3) a description of the animal; 4) whether the animal is housebroken; 5) the date of the animal’s last medical examination; and 6) the date that the animal was acquired. Once the OSA has determined that an ESA is a reasonable accommodation, the handler must meet with staff in residential life to discuss the specifics of the accommodation and sign a formal agreement. Emotional support animals will not be allowed on campus without OSA and residential life approval.

### 3.06 Service Animals in Training

Connecticut law entitles any individual training a service animal to enter public spaces. A service animal in training is not allowed in controlled spaces including classrooms, residence halls and employee work areas. The service animal in training must be wearing a harness or an orange-colored leash and collar. The individual training a service animal must be employed by or authorized to engage in designated training activities by a service animal organization and who carries photographic identification indicating such employment and authorization, or an individual who volunteers for a service animal organization that authorizes such volunteers to raise dogs to become service animals, and causes the identification of such dog with either tags, ear tattoos, identifying bandanas (on puppies), identifying coats (on adult dogs), or leashes and collars.

### 3.07 Pets

Students are not permitted to have pets on university campuses or in university housing facilities, except fish, as noted in the Student Handbook (https://www.qu.edu/content/dam/qu/documents/policies/undergraduate-student-handbook-2017-18.pdf): Residential Life).

### 3.08 Restricted Areas

#### 3.08.1 Service Animals

The university may prohibit the use of service animals in certain locations due to health and safety restrictions, such as areas in which the animal may be in danger, or where the animal's presence may compromise the integrity of research. Restricted areas may include, but are not limited to, food preparation areas, custodial closets, boiler rooms, research laboratories, clinical setting, classrooms or labs that contain research animals, areas requiring protective clothing, wood and metal shops, motor pools, areas with heavy machinery, and other areas as required by state or local law.

Limited exceptions to these restrictions may be made on a case-by-case basis in consultation with OSA and the person/department responsible for the restricted area.

A student who requires the use of a service animal to participate in a clinical training program should contact OSA and the head of his or her
department. In no case may a service animal accompany a student into a patient’s hospital room or examination room if prior approval is not granted.

3.08.2 Service Animals in Training
A service animal in training is not allowed in controlled spaces including classrooms, residence halls and employee work areas.

3.08.3 Emotional Support Animals
Emotional support animals are restricted from all areas except for the handler’s designated living area, which is defined by the Office of Residential Life.

Students are expected to decline all invitations from other students to take the service animals or emotional support animal to restricted areas and non-authorized rooms or residence halls.

3.09 Conflicting Health Conditions
Residential life personnel will notify any roommates of the handler, and will make a reasonable effort to notify the residents of neighboring units to where the service animal or emotional support animal will be located.

Students with a medical condition that may be adversely affected by animals (e.g., asthma, severe allergies) should contact OSA with any health or safety concerns about exposure to a service or emotional support animal. OSA may request medical documentation of the student’s condition to assist in determining whether the condition is disabling and whether there is a need for an accommodation. OSA will make every effort to resolve any conflict in a timely manner, taking into consideration the conflicting needs and/or accommodations of each person involved.

The university will accommodate individuals with medical conditions that require reasonable accommodation in order to live, work or attend class in proximity to service or emotional support animals, and alternative housing or work space arrangements will be made where appropriate.

3.10 Handler’s Responsibilities
The handler of a service or emotional support animal living in university housing and/or frequenting campus is responsible for the following:

• The handler must meet first with the OSA and then with a representative of the Office of Residential Life in order to review and sign the Animal Agreement form prior to bringing the animal to campus.
• The handler must be in full control of the animal at all times.
• Only the handler may care for the animal. Handlers may not leave the animal in the care of another person on campus. The care of the animal is the responsibility of the handler at all times. The handler is responsible for identifying one alternative caretaker for the animal in case the handler becomes incapacitated for any reason.
• The handler must provide adequate care and supervision of the animal at his or her own expense. This includes training, cleanup and appropriate disposal of waste and proper hygiene. This also includes providing for the health of the animal, such as vaccination, annual check-ups and compliance with any state and local licensing requirements, including pursuant to General Statutes § 22-338 and General Statutes §§ 22-345. The handler is required to provide documentation on an annual basis regarding vaccinations and licensing to the Office of Residential Life. Furthermore, before bringing the animal to campus, the handler is required to provide documentation that the animal has a Certificate of Health from a licensed veterinarian and provide updated documentation on an annual basis. The Certificate of Health must state that the animal is free from clinical signs of infectious, contagious or communicable disease and is not from an area under rabies quarantine. The animal must have proof of current rabies vaccination given by veterinarian prior to date of importation and must have no exposure to rabies within the past 100 days.
• The animal must remain in a crate or other appropriate container in the handler’s assigned bedroom when the handler is not in the room.
• If directed to by OSA, the handler is required to bring the animal to receive veterinarian attention.
• The handler must assure that the animal does not cause undue interference or disruption to other community members. An example of undue interference or disruption may include excessive barking.
• The handler will be liable for any harm caused by the animal, including bodily injury or property damage. This responsibility includes, but is not limited to, any expenses incurred for pest control, maintenance or cleaning above and beyond standard costs. Any such costs will be due at the time of repair and/or move-out, and the university shall have the right to bill the student account for any unmet obligations.
• The handler must notify OSA in writing if the animal is no longer needed or is no longer residing on university property. If the animal will be replaced, the handler must file a new request with OSA.
• The handler must permit scheduled inspection of his or her room for fleas, ticks or other pests as needed, and will be billed for any necessary pest treatment above and beyond standard pest management.
• The animal may not be left overnight to be cared for by another resident. Animals may be left alone for up to 24 hours. Animals must be taken with the handler if the handler leaves campus for a prolonged period (more than 24 hours).
• The handler must abide by all other applicable residential policies.
• Handlers are strongly encouraged to maintain renter’s insurance, including liability coverage for the animal. The handler assumes full personal liability for any damage to property or persons caused by the animal. The handler shall be responsible for all liability and claims related to the animal. Quinnipiac University provides no indemnification to the animal or handler. Likewise, Quinnipiac University provides no personal property insurance coverage. Quinnipiac University is not the owner or keeper of any animal. Quinnipiac University shall not be responsible for any harm to the animal while on campus, including but not limited to, injury to the animal caused by pest management or lawn care products.
• It is strongly encouraged that animals be precluded from a raw protein diet in an effort to protect the public from significant health risks.
• If the handler resides in Quinnipiac University housing, the handler will notify the residence hall director if the animal escapes and is not recovered within one hour.
• Necessary precautions should be made for appropriate university personnel to enter student housing when the handler is not present. Precautions may include sharing pertinent information to appropriate university staff. The animal must be caged or crated, or removed from the room, during the time that university personnel are in the room. The university is not liable if the animal escapes during one of these visits.
• The handler is required to provide assistance and support to the animal during emergencies. University personnel are not responsible to provide any assistance or support to the animal, including but
not limited to, during an emergency evacuation such as a fire alarm. In the event of a power outage or other disruption to university housing, the handler is responsible for making alternative boarding arrangements for the animal off campus. Accommodations are not available on campus during an emergency.

3.11 Responsibility of the Quinnipiac Community
All members of the Quinnipiac community, including faculty, staff and students, are expected to abide by the following:

- Service animals must be allowed to accompany their handlers at all times and in all places on campus, except where specifically prohibited (note section 3.08 (p. ) above).
- Community members should not touch, pet, feed or otherwise distract a service animal without the handler’s permission, and they should avoid any action that might startle the service animal.
- Community members shall not attempt to separate a handler from his/her service animal.
- The nature of a person’s disability is private, and no community member should inquire as to the details of a handler’s disability or their reason for using a service or emotional support animal.
- Community members should contact OSA if they have any questions or concerns relating to any service or assistance animal.
- Community members should provide handlers with service animals with the right of way with respect to pedestrians, cyclists or skateboarders.

3.12 Removal of Animals from Campus
A faculty member or other university official may exclude a service animal from a classroom or other university facility if the handler is unable to control it or the animal is not housebroken (e.g., trained so that it controls its waste elimination, absent illness or accident).

The university reserves the right to remove or exclude a service animal or emotional support animal from campus if:

- The animal poses a direct threat to the health and safety of others. In determining whether the animal poses a direct threat, Quinnipiac University will make an individualized assessment to ascertain the nature, duration and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable modifications will mitigate the risk;
- The animal’s presence causes an undue financial and administrative burden on the university. In determining whether the animal poses an undue financial and administrative burden, Quinnipiac University will make an individualized assessment to ascertain the cost of the requested accommodation; the financial resources of the university; the benefits that the accommodation would provide to the student; and the availability of alternative accommodations that would meet the student’s disability-related needs.
- The animal’s presence results in a fundamental alteration of the university’s programs;
- The animal is ill or in poor health (e.g., animals with health conditions that pose a threat to others);
- The animal exhibits poor hygiene (e.g., visibly dirty, has a strong odor, not groomed, evidence of having fleas or ticks);
- The handler fails to comply with his/her responsibilities under this policy; or
- The animal creates an unmanageable disturbance or interference with the Quinnipiac community.

3.13 Violation of the Policy
Animals other than service animals or approved emotional support are not permitted on university campuses or in university housing facilities. Keeping any animal for a family member or friend or having a family member or friend visit with any animal other than a service animal for any length of time is prohibited.

A handler determined to be responsible for keeping animals other than service animals or approved emotional support animals in violation of this policy will be subject to fines or other sanctions. A handler will also be responsible for all damage or cleaning costs resulting from violation of this policy. The university reserves the right to remove animals other than service animals or approved emotional support animals from campus for violations of this policy. When so directed, the handler must remove the animal from campus and campus housing within 24 hours.

Violations of this policy may result in referral to the Student Code of Conduct process.

Section 4: Research and Teaching Animals

4.01 Policy Statement
Research and teaching animals are animals approved for use in direct support of the university’s teaching and research missions. The animals are used in accordance with guidelines established by the Institutional Animal Care and Use Committee (IACUC). The university will make an individualized assessment to ascertain the health and safety of others.

Section 5: Service Animals in Training

5.01 Policy Statement
Connecticut law entitles any individual training a service animal to enter public spaces. A service animal in training is not allowed in controlled spaces on university property including classrooms, residence halls and employee work areas.

5.02 Conditions
- The service animal in training must be wearing a harness or an orange-colored leash and collar.
- The individual training a service animal must be employed by or authorized to engage in designated training activities by a service animal organization and who carries photographic identification indicating such employment and authorization, or an individual who volunteers for a service animal organization that authorizes such volunteers to raise dogs to become service animals, and causes the identification of such dog with either tags, ear tattoos, identifying bandanas (on puppies), identifying coats (on adult dogs), or leashes and collars.

Section 6: Therapy Animals

6.01 Policy Statement
A therapy animal trained for Animal Assisted Therapy/Activities (AAT/AAA) may be brought into appropriate university property to work with its trained handlers to provide service in conjunction with a university-approved program in one or more therapeutic activities under the following conditions.
6.02 Conditions

- Handlers must be health care or mental health care professionals. Students and other individuals are not allowed to bring therapy animals on campus.

- Each handler provides to the university documentation of the training for the therapy animal, as demonstrated by the attainment of the Canine Good Citizen title through the American Kennel Club or registration with a therapy animal organization, such as Pet Partners.

- Each handler provides to the university documentation showing that the handler has obtained and maintains liability insurance coverage protecting the university from claims arising out of the presence and utilization of the therapy dog and has obtained approval for the presence of the therapy animal from the appropriate university officials.

- Each handler executes an Animal Assisted Therapy-Handler Agreement, waiving claims against the university with respect to any injuries (including death) sustained by the therapy animal during the time the therapy animal is on campus working with its handler to provide service in conjunction with a university-approved program in one or more therapeutic activities.

- Each handler works with the department of facilities to schedule space and time for the Animal Assisted Therapy/Activities so that the university can convey to the university community the place and duration of the event. Notification to the university community must be made no less than one week prior to the event.
BACKGROUND CHECKS

Students should be aware that certain clinical sites or internship locations may require a criminal background check before a student is placed in the clinic or intern site. The university has procedures to assist students in obtaining such a background check. The cost of the background check is the responsibility of each individual student.
CLASS ATTENDANCE

Approved by the Faculty Senate Spring 2012

Students are expected to attend all scheduled classes. In many classes and laboratories active student participation or performance is an essential part of the learning experience and absences may negatively affect the course grade. Each academic department or instructor will set a class attendance policy and feature it prominently in syllabi. Having informed the students of particular attendance requirements, the instructor should refer students with unsatisfactory attendance records to the Learning Commons through Advise, which can be accessed through Self Service in MyQ. Faculty members are reminded that the Early Warning policy of the university defines specific referral polices for attendance in 100-level courses.

Occasionally, students participating in intercollegiate athletics will be absent from classes because of scheduled athletic contests. It is the responsibility of those students to notify their instructors in advance of anticipated absences. If they give such advance notice to their instructors, they will be given the opportunity to make up any requirements for the courses.

Similarly, students who must miss classes because of religious obligations will be given the opportunity to make up course requirements if they have notified their instructors in advance of the anticipated absences. Academic and Student Affairs will notify faculty if students in their classes have been placed on Medical Leave or suspended via a Student Code of Conduct system decision.

Student-Athlete — Class Absence Policy

Class attendance is a student-athlete’s first priority. Quinnipiac University adheres to the NCAA rules that prohibit student-athletes from missing class due to conflicts with a team’s practice. NCAA rules do permit student-athletes to miss class to participate in a home or away contest. During the season of competition, it is likely that class absences will occur. Every attempt is made to keep missed classes to a minimum. Nevertheless, it is Quinnipiac academic policy that should a class or test be missed for in-season athletic competition, the student be given the chance to make up the work provided the student notifies the professor in advance and makes appropriate arrangements. It is the student-athlete’s responsibility to communicate with their professors PRIOR to a class being missed.

Student-athletes are expected to personally deliver the missed class form letter signed by the associate athletic director for academics and the NCAA faculty athletics representative to each professor at the beginning of the semester. The student-athlete’s head coach will provide the team members with the letter detailing departure times of travel dates associated with away games and any home competition conflicts. Arrangements for make-up exams and quizzes MUST be handled before traveling to an athletic event, not after returning from the trip. In the event that an affiliated conference or NCAA Championship occurs during final exam time, the student-athlete is required to contact the appropriate faculty member at least two weeks before the scheduled examination or when the conflict is recognized. The purpose of this meeting is to discuss rescheduling the exam.

It is the student-athlete’s responsibility to schedule classes so they will not regularly conflict with practice times or frequent travel days. It is important for each student-athlete to meet with instructors as early in the semester as possible to assess whether missed class time will be a problem.

If a problem does arise with any of these situations, contact the NCAA faculty athletics representative. Student-athletes may jeopardize their participation in the Quinnipiac University athletic program by failing to comply with the above procedures.
CONFERRAL OF HONORARY DEGREES

The very highest honor bestowed by Quinnipiac University is the conferral of an honorary degree. The awarding of honorary degrees should exemplify and celebrate the values and ideals of the university.

Criteria for selection of recipients will include extraordinary and prolonged professional achievement at the very highest levels; groundbreaking and widely impactful scholarship; highly distinguished and extensive community or governmental service resulting in consequential change; and/or exceptional generosity in, and dedication to, advancing the mission of Quinnipiac University at the national or international levels.

Nomination Procedure

A call for nominations for honorary degrees will be issued twice a year. Nominations may be submitted to the Honorary Degree Committee by students, faculty and staff, parents, alumni and members of the Board of Trustees. The Honorary Degree Committee will consist of the executive vice president/provost, vice president for development & alumni affairs, vice president for public affairs, two senior faculty members with broad community interests selected by the provost, and one dean also selected by the provost. The faculty and dean will serve for two-year periods and may be reappointed after a period of two years off the committee.

Recommendations will be presented to the president after the committee has met and decided on nominations. The nominations are to be made with absolute confidentiality, and no nominee should have advance notice of his/her nomination. Nominees will have been vetted with background checks prior to reaching the president.

The final decision to award an honorary degree rests with the president, who will notify the Board of Trustees.

Awarding of Honorary Degrees

Honorary degrees will be presented at the appropriate forum, which will vary depending on the university’s and the recipient’s needs and interests.
Each course is measured in credits. Following the federal credit hour definition (34CFR 600.2) and accepted practices in higher education, Quinnipiac University defines a credit hour as equivalent to 50 to 60 minutes of direct faculty instruction and two hours of out-of-class student work for approximately 15 weeks. During fall and spring semesters, a 3-credit course typically meets for 150 minutes per week (three 50-minute class meetings or two 75-minute class meetings) for 15 weeks. At least an equivalent amount of work is required for other activities leading to the award of academic credit (e.g., internships, clinical), for modalities in which classroom instruction (“seat time”) is not the primary method of instruction (e.g., online courses), and for work completed in compressed semesters (summer and J-term). For example, to earn 3 credits for an internship or clinical course, students must complete a minimum of 120 hours of supervised work.

Regular class attendance is expected. A student whose attendance is unsatisfactory may be forced to withdraw from a course at the discretion of the instructor and consistent with Quinnipiac's withdrawal policy. See Class Attendance Policy (p. 88).

So far as is practicable, final examinations are regarded as part of the regular work for undergraduate courses. In courses for which a final examination would serve no useful purpose, a term essay or personal conference, problem-solving exercise, or other assignment may be substituted; work on the substitute exercise may take place during the final examination period. In some cases, faculty members may exempt from the final examination students whose work is of high quality. Conditions governing exemptions are determined by the faculty of the school concerned. See Final Exam Policy (p. 115).

**Fall and Spring Course Load**

The usual load for undergraduate students is five courses in the fall and spring semesters. A student with a superior academic record may secure permission to take more than the normal course load. Conversely, a student who enters with deficiencies may be allowed to take only three or four courses. The usual load for graduate students is program-specific. See the program's curriculum for more information.

**J-Term and Summer Registration Credit Limit for Undergraduate Students**

Quinnipiac limits the number of credits for which an undergraduate student can register during the condensed J-term and Summer sessions to ensure academic success. In J-term, undergraduate students may register for up to 4 credits. In the summer I and/or Summer II sessions, undergraduate students may register for up to three courses (10 credits total) each session. Registration for more 4 credits in J-term or 3 courses/10 credits in the Summer I or Summer II sessions requires approval via the Variant Procedure process. When determining the number of credits for which they plan to register, students should consider the rigor of their selected coursework, their history of academic success, work and other personal obligations, and other factors that may impact a student's academic life.

J-term and/or summer course loads for graduate students are program-specific (if applicable). See the program’s curriculum for more information.

Section 1: Policies and Procedures for Students with Disabilities

1.01 Section Statement on Disabilities

Quinnipiac University is committed to providing equal educational opportunities and full participation for students with disabilities. No qualified student will be excluded from participation in any university program or be subject to any form of discrimination based on disability.

Quinnipiac University recognizes its obligations to comply with the Americans with Disabilities Act of 1990, hereafter referred to as ADA, and Section 504 of the Rehabilitation Act of 1973, hereafter referred to as Section 504.

The ADA states: “No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, or accommodations of any place of public accommodation by any private entity who owns, leases (or leases to), or operates a place of public accommodation.” (28 C.F.R. § 36.201a) Section 504 states: “No otherwise qualified individual with a disability [..] shall, solely by reason of her or his disability, be excluded from the participation in, be denied benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.” (29 U.S.C. § 794) Consistent with its responsibilities, Quinnipiac University provides reasonable accommodations to promote equal educational opportunity.

The university provides staff members to ensure compliance with the ADA and Section 504. These staff members work directly with students, faculty and staff regarding reasonable accommodations and other assistance as needed. The university also maintains a grievance procedure for those students with disabilities who seek resolution of particular issues and desire a more formalized process. The grievance procedure is discussed in Section 4: ADA/504 Grievance Procedure (p. 108).

1.02 Procedures for Accessing Services

The university provides reasonable accommodations to students with disabilities to reduce or eliminate any disadvantages that may exist because of the disability. For example, the university may decide to permit a student with a disability to opt out of a foreign language requirement. However, the university is not required by law or this policy to waive specific courses or academic requirements it considers essential to a particular program or degree if it would result in a fundamental alteration of the nature of the program or the degree.

- Students requesting accommodations must self-identify and provide the documentation described in section 2 (p. 94) of this policy to support their request for a reasonable accommodation.
- It is the responsibility of the student requesting a reasonable accommodation to present current documentation and request an accommodation in a timely manner at the beginning of the academic semester.
- Eligibility for reasonable accommodations will be determined on an individual case-by-case basis.

1.03 Housing Accommodations Policy – Undergraduates Only

The university is required to provide reasonable accommodations to students with documented disabilities. A student who requests housing or meal plan accommodations must contact the associate director of residential life and the student must submit all relevant information pertaining to the need for the accommodation. The student is required to complete a Housing Accommodations Form, which is available from the Office of Residential Life. Documentation in support of the request for accommodation may be mailed, faxed or brought to the Office of Residential Life by the student.

Individual accommodations depend on various factors including the nature and severity of the documented disability and available rooms. Consideration will be given to the specific accommodation requested by
the student, but there can be no assurances that the student’s specific request will be granted if the university determines that it is not feasible or another accommodation is appropriate under the circumstances.

1.04 Institutional Rights and Responsibilities
Quinnipiac University through its dedicated offices has the responsibility to:

1. ensure that university courses, programs, services, activities and facilities, when viewed in their entirety, are offered in the most integrated and appropriate setting.
2. provide information regarding policies and procedures to students with disabilities and ensure its availability in accessible formats upon request.
3. evaluate students on their abilities, not their disabilities.
4. provide reasonable and appropriate accommodations, academic adjustments and/or auxiliary aids if the documentation does not identify a specific disability, fails to verify the need for the requested services, is not provided in a timely manner or does not identify the specific accommodation.
5. maintain appropriate confidentiality of records and communication concerning students with disabilities except where disclosure is required by law or authorized by the student.

More specifically, personnel in these dedicated offices have the responsibility to:

1. assist students with disabilities who self-identify and meet university criteria for eligibility to receive reasonable and appropriate accommodations, academic adjustments, and/or auxiliary aids determined on a case-by-case basis.
2. assure appropriate confidentiality of all information pertaining to a student’s disability.
3. assure that the students receive appropriate reasonable accommodations based on documentation of the disability.
4. interact with the faculty, when appropriate.
5. inform students with disabilities of university policies and procedures for filing a formal grievance. See Section 4 – ADA/504 Grievance Procedure (p. 108).

Serving students, the coordinator of learning services and/or the assistant dean for student affairs, has the right to:

1. require that students with disabilities conform with the university’s academic standards.
2. as needed, request from a student current documentation completed by appropriate professional(s) to verify the need for reasonable accommodations, academic adjustments, and/or auxiliary aids. See Section 2 - Criteria for Comprehensive Documentation of Disabilities (p. 94).
3. review the student’s need for reasonable accommodations, academic adjustments, and/or auxiliary aids with the professional(s) providing the documentation. This review is only conducted with the student’s signed consent authorizing such a discussion.
4. select among equally effective and appropriate accommodations, adjustments and/or auxiliary aids in consultation with the student.
5. deny a request for specific accommodations, academic adjustments, and/or auxiliary aids if the documentation does not identify a specific disability, fails to verify the need for the requested services, is not provided in a timely manner or does not identify the specific accommodation.

6. refuse to provide an accommodation, adjustment and/or auxiliary aid that is inappropriate or unreasonable including any that:
   • constitute a substantial change or fundamental alteration to an essential element of a course or program.
   • pose an undue burden on the university.

1.05 Responsibilities of the Student – Undergraduate and Graduate
1. Contact the coordinator of learning services at the beginning of each semester so that appropriate reasonable accommodations can be made in a timely manner.
2. Provide to the coordinator appropriate medical, psychological, psychoeducational or neuropsychological documentation indicating the student’s disability and suggested reasonable accommodations.
3. Provide signed consent authorizing the coordinator to discuss the student’s need for reasonable accommodations, academic adjustments, and/or auxiliary aids with the professional(s) providing the documentation.
4. Meet the timelines and procedural requirements established by the coordinator for scheduling exams and requesting assistance. If the student with a disability fails to provide adequate notice of the need for space and/or assistance, the coordinator will still attempt to provide the accommodation to the extent possible under the circumstances.

1.06 Responsibilities of the Student – School of Law
1. Contact the associate dean of students – School of Law at the time of enrollment in the School of Law so that appropriate accommodations can be made in a timely manner. The student is also responsible for reviewing the need for accommodation on a semester-by-semester basis with the associate dean of students.
2. Provide to the associate dean of students appropriate medical, psychological, psychoeducational or neuropsychological documentation indicating the student’s disability and suggested reasonable accommodations.
3. Provide signed consent authorizing the associate dean of students or designee to discuss the student's need for reasonable accommodations, academic adjustments, and/or auxiliary aids with the professional(s) providing the documentation.
4. Meet the timelines and procedural requirements established by the School of Law for scheduling exams and requesting assistance. If the student with a disability fails to provide adequate notice of the need for space and/or assistance, the associate dean of students will attempt to provide the accommodation to the extent possible under the circumstances.

1.07 Responsibilities of the Faculty Member – Undergraduate and Graduate
1. Provide only the accommodations that are recommended by the coordinator of learning services.
2. Discuss with the coordinator any concerns related to the accommodations that have been requested by the student during the initial contact with the faculty member.
3. With respect to examinations in undergraduate and graduate courses,
a. Discuss the conditions under which the exam is to be administered.
b. If the student’s exam is to be administered outside of the class, ensure the timely delivery of the exam, along with all necessary
instructions and materials for proper administration. The faculty member may also make arrangements with the student for the delivery and return of the exam.

4. Ensure the appropriate confidentiality of information regarding students with disabilities.

5. Include a statement on syllabi similar to the following:

Faculty Syllabi Statement

Students with disabilities who wish to request reasonable accommodations should contact the coordinator of learning services in Arnold Bernhard Library – north wing at 203-582-5390. Quinnipiac University complies with the Americans with Disabilities Act and Section 504 of the Rehabilitation Act.

1.08 Responsibilities of the Faculty Member – School of Law

Law school exams are graded anonymously. Faculty members who administer exams will follow the accommodation request described on the students accommodation letter.

Faculty members will:

1. Include the disability statement on their syllabi:
   Students with disabilities who wish to request reasonable accommodations should contact the associate dean of students (office: SLE 310 K, phone: 203-582-3220). Quinnipiac University complies with the Americans with Disabilities Act and Section 504 of the Rehabilitation Act.

2. Follow precisely the students classroom setting accommodation agreed to by the associate dean of students and described on the accommodation letter presented to the professor;

3. Ensure the utmost confidentiality of information regarding students with disabilities.

1.09 Undergraduate Eligibility for Financial Aid

Quinnipiac University permits students with disabilities to take less than a full-time course load as a reasonable accommodation, if necessary. Students should discuss full-time course load requirements with an academic adviser for their respective program and the impact this might have on financial aid with a financial aid counselor.

Students should be aware that federal Pell Grants will be prorated based on the number of credits taken, and that a student’s financial aid budget will also be reduced accordingly. In addition, students must take at least 6 credits to qualify for the federal Stafford Loan program.

Students who carry less than a full-time load per semester may still be eligible for student financial aid status. In such a case, these procedures must be followed:

1. Students must provide appropriate documentation to the coordinator of learning services to show that their disability substantially limits one or more major life functions and it precludes them from taking a full-time course load.

2. If a student is registered at the beginning of a semester for less than a full-time credit load because of an accommodation for a disability, this must be verified by the coordinator of learning services. Students must contact the coordinator for this verification NO LATER THAN the last day of the university’s ADD/DROP period.

3. If a student is registered at the beginning of a semester for a full-time course load, but, to accommodate his/her disability, withdraws from a course within the approved drop period, the student must contact the coordinator for this verification NO LATER THAN the last day of the university’s ADD/DROP period.

4. The coordinator will notify the financial aid office each semester of those students with disabilities who are carrying less than a full-time course load and who are eligible for financial aid consideration under these procedures.

Students should be aware that, as always, eligibility for financial aid depends upon satisfactory academic progress.

1.10 Course Substitutions for Undergraduate Students

Policy: Recognizing that certain students with disabilities may not be able to achieve academic success in the quantitative or foreign language area with or without reasonable accommodations, the university may permit the substitution of specific courses from its University Curriculum as an accommodation. Because these requirements are important parts of a program of study, each case will be carefully considered on an individual basis before a decision is made by the appropriate dean.

Procedures: The procedures set forth below must be followed if a student with a disability is seeking a modification of either the university’s mathematics or foreign language requirement:

1. The student must file a petition with the coordinator of learning services. The petition process should begin as soon as there is strong objective evidence (e.g., taking the course and using all resources without success) that the student will be unable to fulfill the requirement.

2. The student must provide the coordinator of learning services with documentation that satisfies the requirements of section 2.02 of this policy (p. 94).

Upon completion of these steps, the documentation and the supporting evidence from the case history are reviewed by the coordinator of learning services. If there is evidence that satisfies the coordinator of learning services that a substitution is warranted, the coordinator will consult with the appropriate dean. The student will be notified in a timely manner of the final decision rendered by the dean. The student may appeal an adverse decision through the grievance procedure (p. 108) described in section 4 (p. 108) of this policy.

Any student who receives a course substitution for mathematics or foreign language is expected to fulfill the university’s core requirements as follows:

Mathematics Requirement

Students with math learning disabilities who are majoring in the liberal arts or communications should contact the coordinator of learning services to enroll in a designated section of MA 110, Contemporary Mathematics, a smaller than typical class that is geared toward the student with a math learning disability. This section will be offered only once a year.

Foreign Language Requirement

For majors in the College of Arts and Sciences or the School of Communications, the foreign language requirement may be fulfilled by taking other courses chosen in consultation with the coordinator of learning services and the dean of the appropriate college/school.
A foreign language course substitution may have ramifications in the future (i.e., admission to graduate school). Students from the School of Business majoring in international business will not be allowed a course substitution for foreign language since students must complete 6 credits of 200-level foreign language courses.

**Section 2: Criteria for Comprehensive Documentation of Disabilities in Adolescents and Adults**

**2.01 Introduction**

This document provides students, parents, professional diagnosticians external to Quinnipiac University, and service providers within Quinnipiac University with a common understanding and knowledge base of those components of documentation which are necessary to validate the existence of a disability, to evaluate its impact on the student’s educational performance, and to justify the need for reasonable accommodations for students attending Quinnipiac University.

Under the Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act of 1973, individuals with disabilities are guaranteed certain protections and rights of equal access to programs and services. However, in order to fall within the laws’ protections, an individual must have a physical or mental impairment that *substantially limits* one or more major life activities. Thus the student’s documentation must indicate that the disability substantially limits some major life activity, including learning. The following information is provided in the interest of ensuring that all documentation presented by the student is appropriate to verify eligibility and to support requests for reasonable accommodations, academic adjustments, and/or auxiliary aids.

The information and documentation that establishes a disability must be comprehensive to make it possible for a student to obtain appropriate accommodations in a timely fashion. This document presents requirements in four important areas: 1) qualifications of the evaluator, 2) appropriate clinical documentation to substantiate the specific disability, 3) recency of documentation, and 4) evidence to establish a rationale supporting the need for accommodations.

Quinnipiac University has a responsibility to maintain confidentiality of the evaluation and may not release any part of the documentation without the student’s informed and written consent. Disability information is kept in a separate, secure location and is not included in a student’s general education records.

Students who choose not to disclose their disability forfeit all academic accommodations, including test accommodations. Students who choose not to disclose their disability but later change their minds as the semester progresses must allow at least two weeks for accommodations to begin. There will be no retroactive reconsideration or adjustment to grades. It is very important to note that Quinnipiac University does not evaluate students for a disability nor does it provide documentation of a disability for students requesting accommodations. It is up to the students to provide their own documentation of a disability from a qualified diagnostician.

**2.02 Documentation Requirements**

**2.02A Qualifications of the Evaluator**

Professionals conducting assessments, rendering diagnoses of specific disabilities, and making recommendations for appropriate accommodations must be qualified to do so. Comprehensive training with regard to the specific disability being addressed and relevant experience with an adolescent/adult population are essential.

The name, title and professional credentials of the evaluator, including information about license or certification as well as the area of specialization, employment and state in which the individual practices must be clearly stated in the documentation. All reports should be on letterhead, typed, dated, signed and otherwise legible. It is of utmost importance that evaluators are sensitive and respectful of cultural and linguistic differences in adolescents/adults during the assessment process. It is not considered appropriate for professionals to evaluate members of their own families.

Recommendations for adolescents/adults who must obtain an independent diagnostic evaluation are presented at the end of each specific disability section to assist them in finding and working with a qualified professional in regard to documentation.

**Learning Disabilities** ~ The following professionals would generally be considered qualified to evaluate specific learning disabilities provided they have additional training and experience in differential diagnosis and the assessment of learning problems in adolescents/adults: clinical psychologists, educational psychologists, school psychologists, neuropsychologists, and learning disabilities specialists. Use of diagnostic terminology indicating a learning disability (LD) by someone whose training and experience are not in these fields is not acceptable.

**Attention Deficit Hyperactivity Disorder (ADHD)** ~ Professionals conducting assessments and rendering diagnoses of ADHD must have training in differential diagnosis and pertinent psychological disorders. The following professionals would generally be considered qualified to evaluate and diagnose ADHD provided they have direct experience with an adolescent/adult ADHD population: clinical psychologists, neuropsychologists, psychiatrists, and other relevantly trained medical doctors. A clinical team approach consisting of a variety of educational, medical and counseling professionals with training in the evaluation of ADHD in adolescents/adults may be important. Use of diagnostic terminology indicating an ADHD by someone whose training and experience are not in these fields is not acceptable.

**Psychological Disabilities** ~ Professionals conducting assessments and rendering diagnoses of psychological disabilities must have training in differential diagnosis and the full range of psychological disorders. The following professionals would generally be considered qualified to evaluate psychological disabilities provided they have comprehensive training in differential diagnosis and direct experience with an adolescent/adult population: licensed clinical psychologists, licensed clinical social workers, psychiatrists, advanced practice registered nurses or clinical nurse specialists in psychiatry and other relevantly trained medical doctors. Use of diagnostic terminology indicating a psychological disability by someone whose training and experience are not in these fields is not acceptable.

**Acquired Brain Injury (ABI)/Traumatic Brain Injury (TBI)** ~ Professionals conducting assessments and rendering diagnoses of ABI/TBI must have post-doctoral training in identification and treatment of ABI/TBI. The following professionals would generally be considered qualified to evaluate and develop learning strategies for persons with ABI/TBI: neuropsychologists, educational psychologists with post graduate concentration in cognitive strategy development and remediation, and relevantly trained clinical psychologists. Use of diagnostic terminology indicating an ABI/TBI by someone whose training and experience are not in these fields is not acceptable.
**Sensory Conditions**

*Blindness or Low Vision* – Professionals conducting assessments and rendering diagnoses of blindness or low vision include ophthalmologists. Optometrists provide information regarding the measurement of visual acuity, tracking and fusion difficulties.

*Deaf/Hard of Hearing/Hearing Impaired* – Physicians including otolaryngologists and otologists are qualified to provide diagnosis and treatment of hearing disorders. Audiologists may provide current audiograms.

**Organic Medical Conditions**

*Physical Mobility/Dexterity* – Any physical disability is considered to be in the medical domain and requires the expertise of a physician or other pertinent licensed medical personnel.

*Health-Related Illness* – Any illness, acute or chronic enough to be regarded as a disability, is considered to be in the medical domain and requires the expertise of a physician or other pertinent licensed medical personnel.

### 2.02B Recency of Documentation

Because the provision of all reasonable accommodations and services is based upon Quinnipiac University’s assessment of the current impact of the disability on academic performance, it is in the student’s best interest to provide recent and appropriate documentation. Documentation must reflect the current impact the disability has on the student’s functioning at the postsecondary level. If documentation is inadequate in scope or content, or does not address the student’s current level of functioning and need for accommodations, reevaluation may be required. Furthermore, observed changes may have occurred in the student’s performance, or new medication may have been prescribed or discontinued since the previous assessment was conducted. In such cases, it will be necessary to update the evaluation report. The update must include a detailed assessment of the current impact of the disability, an interpretive integrated summary of relevant information, a rationale for ongoing services and accommodations, and previous diagnostic information. If necessary, the coordinator of learning services at Quinnipiac University will recommend which aspects of the documentation need to be updated or augmented.

### 2.02C Comprehensiveness of the Documentation

Disability documentation must verify the nature and extent of the disability in accordance with current professional standards and techniques, and it must clearly substantiate the need for all of the student’s specific accommodation requests. Documentation should validate the need for reasonable accommodations based on the individual’s current level of functioning in the educational setting. Students requesting reasonable accommodations for the manifestations of multiple disabilities must provide evidence of all such conditions. All reports should be on letterhead, typed, dated, signed and legible. Reports should integrate the various views regarding a student’s specific functioning abilities and the resulting impact of these abilities as they relate to postsecondary educational demands. In a public school system, the planning and placement team recommends the type of evaluations necessary for the educational programming of a student and provides a special education diagnosis. A diagnostic report would synthesize all of the diagnostic information culled from the individual reports of the team members and include the resulting diagnosis.

Quinnipiac University has the discretion to require additional documentation if it is determined that the existing documentation is incomplete or inadequate to ascertain the extent of the disability or the need for reasonable accommodations. With the student’s written permission, a telephone consultation with an evaluator to update or clarify information regarding the disability may be sufficient to complete the existing documentation. Any cost incurred in obtaining additional documentation when the original records are inadequate for postsecondary purposes is borne by the student. If the existing documentation is complete but the postsecondary institution desires a second professional opinion, the postsecondary institution bears the cost.

Comprehensive disability documentation should include the following components:

1. Evidence of existing impairment
2. Background information
3. Specific diagnosis
4. Integrated summary

#### 1. Evidence of Existing Impairment

Statement of Presenting Problem(s): A history of the individual’s presenting problem(s) should be provided, including evidence of ongoing difficulties/behaviors that significantly impact functioning.

#### 2. Background Information

Information collected for the background information summary should be culled from a variety of sources (e.g., interview, review of records) and, whenever feasible, should consist of more than a self-report. Information from third party sources is often invaluable. The diagnostician, using professional judgment as to which areas are relevant, should review pertinent records and conduct an interview which may include, but not necessarily be limited to, the following: history of presenting problem(s)/symptom(s); any significant medical, developmental, psychosocial and employment histories; family history (including primary language of the home and the student’s current level of English fluency); review of pertinent academic history of elementary, secondary, and postsecondary education; review of prior evaluation reports; description of current functional limitations pertaining to an educational setting that are presumably a direct result of the presenting problems; and relevant history of prior treatment, therapy, interventions or accommodations.

#### 3. Specific Diagnosis

The report must include a specific diagnosis of the disability by a qualified evaluator. It is important to rule out alternative explanations for problems such as emotional, attentional or motivational issues that may be interfering with learning but do not constitute a specific disability. If the data indicate that a specific disability is not present, the evaluator should state that conclusion in the report. The evaluator is encouraged to use direct language in the diagnosis and documentation of a specific disability, avoiding the use of terms such as “suggests” or “is indicative of.” It is important to note that the public school system is qualified to diagnose only educationally related disabilities in accordance with state guidelines (e.g., learning disabilities, speech and language impairment). The classification of Serious Emotional Disturbance (SED), that is used in the school systems, is not considered to be an acceptable diagnosis at the postsecondary level.

#### 4. Integrated Summary

A well-written summary based on a comprehensive evaluation process is a necessary component of the report. Assessment instruments and
the data they provide do not diagnose; rather, they provide important elements that must be interpreted and integrated by the evaluator with background information, observations of the student during the testing situation, and the current context. It is essential, therefore, that professional judgment be used in the development of a summary. The summary should include: indication of the substantial limitation to learning or other major life activity presented by the specific disability and the degree to which it impacts the individual in the learning context for which accommodations are being requested; indication of whether or not the student was evaluated while on medication and whether or not there is a positive response to the prescribed treatment; demonstration of the evaluator’s having ruled out alternative explanations for the presenting problems; and indication as to why specific accommodations are needed, how the effects of the specific disability can be accommodated, and any record of prior accommodation or auxiliary aids.

2.02D Recommendations for Accommodations
Accommodation needs can change over time and are not always identified through the initial diagnostic process. The evaluator(s) must describe the impact, if any, of the diagnosed disability on a specific major life activity as well as the degree of impact on the individual. The diagnostic report must include specific recommendations for accommodations that are reasonable. When possible, a detailed explanation must be provided as to why each accommodation is recommended and must be correlated with specific functional limitations determined through interview, observation, and/or testing. Although prior documentation may have been useful in determining appropriate services in the past, to further facilitate the process of requesting accommodations at the postsecondary level, current documentation must validate the need for services based on the individual’s present level of functioning in the educational setting. The documentation must include any record of prior accommodations or auxiliary aids, including information about specific conditions under which the accommodations were used (e.g., standardized testing, final exams, licensing or certification examinations) and whether or not they benefited the individual. A school plan such as an IEP or a 504 Plan is insufficient documentation, in and of itself, but can be included as part of a more comprehensive evaluative report. However, a prior history of accommodations, without demonstration of a current need, does not, in itself, warrant the provision of a like accommodation. If no prior accommodations were provided, the qualified professional and/or the individual must include a detailed explanation as to why no accommodations were used in the past and why accommodations are needed at this time. Reasonable accommodation(s) may help to ameliorate the disability. The determination for reasonable accommodation(s) rests with Quinnipiac University working in collaboration with the individual with the disability and, when appropriate, university faculty. Accommodations may vary based on course content and/or academic programs. If accommodations are not clearly identified in a diagnostic report, the coordinator of learning services will seek clarification and, if necessary, additional information.

2.03 Documentation Guidelines for Specific Disabilities

2.03A Learning Disabilities

2.03A1 Brief Overview
(For more detail please refer to Section 2.03A2 Criteria for Comprehensive Documentation of Learning Disabilities (p. ))

Students requesting accommodation on the basis of a specific learning disability must provide current (within the last three years) documentation from a professional who has undergone comprehensive training and has relevant experience in the assessment of learning problems in adolescents and/or adults (e.g., clinical or educational psychologists, school psychologists, neuropsychologists and learning disabilities specialists). In addition to the requirements specified above, documentation for students requesting accommodations on the basis of a learning disability must include, but is not limited to:

a. An interview including a description of the presenting problem(s); any significant developmental, medical, psychosocial and employment histories; family history (including primary language of the home and the student’s current level of English fluency); and a discussion of dual diagnosis where indicated.

b. A complete assessment of intellectual functioning/aptitude as measured by the Wechsler Adult Intelligence Scale-IV (WAIS-IV) with standard and scaled scores, including subtest scores. The Woodcock-Johnson Psychoeducational Battery-III: Tests of Cognitive Ability or the Stanford-Binet Intelligence Scales, Fifth Edition are also acceptable. The Kaufman Brief Intelligence Test (KBIT-2) and the Slosson Intelligence Test - Revised (SIT-3) are NOT comprehensive measures and therefore are not suitable for use in the initial diagnosis of a learning disability.

c. A comprehensive academic achievement battery that measures current levels of functioning in reading (decoding and comprehension), mathematics, oral language, and written language [e.g., Woodcock-Johnson Psychoeducational Battery-III: Tests of Achievement, Wechsler Individual Achievement Test-III (WIAT-III), Stanford Test of Academic Skills (TASK), Scholastic Abilities Test for Adults (SATA), or specific achievement tests such as Test of Written Language-4 (TOWL-4), Woodcock Reading Mastery Tests-Third Edition, Stanford Diagnostic Mathematics Test]. All standard scores, standard deviations and percentiles must be reported for those subtests administered. The Wide Range Achievement Test-4 (WRAT-4) is NOT a comprehensive measure of achievement and is therefore not suitable. Test selection must be guided by the age of the student and the test norms. Tests used should also be technically sound (e.g., statistically reliable and valid) and standardized for use with an adolescent/adult population.

d. An assessment of specific areas of information processing (e.g., short- and long-term memory, sequential memory, sequential and simultaneous processing, executive functioning, processing speed, auditory and visual perception/processing, and motor ability). Information from subtests on the WAIS-IV, the Woodcock-Johnson Psychoeducational Battery - III: Tests of Cognitive Ability, or the Detroit Tests of Learning Aptitude - Adult (DTLA-A), as well as other instruments relevant to the presenting learning problem(s) may be used to address these areas.

e. Other assessment measures such as non-standard measures and informal assessment procedures or observations may be helpful in determining performance across a variety of domains. Formal assessment instruments may be integrated with these types of measures to help determine a learning disability and differentiate it from co-existing neurological and/or psychological disorders (i.e., to establish a differential diagnosis). In addition to standardized tests, it is also very useful to include informal observations of the student during the test administration.

f. A diagnosis of a specific learning disability. Individual “learning styles,” “learning differences,” “academic problems,” and “test difficulty or anxiety,” in and of themselves, do not constitute a learning disability. It is important for the evaluator to demonstrate that alternative explanations for academic problems as a result of poor education, poor motivation and/or study skills, emotional problems, attentional problems, and cultural/language issues that may be
interfering with learning but do not constitute a learning disability have been ruled out.

g. An indication of how patterns in the student's cognitive ability, achievement, and information processing reflect the presence of a learning disability.

h. An integrated summary which: indicates the substantial limitations to major life activities posed by the specified learning disability, describes the extent to which these limitations impact the academic context for which accommodations are being requested, suggests how the specific effects of the learning disability may be accommodated, and then states how the effects of the learning disability are mediated by the recommended accommodations.

2.03A2 Criteria for Comprehensive Documentation of Learning Disabilities

Introduction

This section provides students, parents, professional diagnosticians external to Quinnipiac University, and service providers with a common understanding and knowledge base of those components of documentation which are necessary to validate a learning disability and to justify the need for reasonable accommodations for students attending Quinnipiac University. The information and documentation that establishes a learning disability should be comprehensive to make it possible for a student to obtain appropriate accommodations in a timely fashion.

This section presents requirements in five important areas: 1) qualifications of the evaluator, 2) recency of documentation, 3) appropriate clinical documentation to substantiate the learning disability, 4) evidence to establish a rationale supporting the need for accommodations, and 5) confidentiality. Section 2.03A3 provides recommendations for parents and students to assist them in finding and working with a qualified professional in regard to appropriate documentation. It also includes a suggested listing of standardized tests for assessing adolescents and adults with suspected learning disabilities.

Under the Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act of 1973, individuals with learning disabilities are guaranteed certain protections and rights of equal access to programs and services; thus the student’s documentation should indicate that the disability substantially limits some major life activity, including learning. The following information is provided in the interest of assuring that all LD documentation presented by the student is appropriate to verify eligibility and to support requests for accommodations, academic adjustments, and/or auxiliary aids.

Documentation Requirements – Learning Disabilities

Qualifications of the Evaluator

Professionals conducting assessments, rendering diagnoses of learning disabilities, and making recommendations for appropriate accommodations must be qualified to do so. Comprehensive training and relevant experience with an adolescent and adult LD population are essential.

The name, title and professional credentials of the evaluator, including information about license or certification as well as the area of specialization, employment, and state in which the individual practices must be clearly stated in the documentation. For example, the following professionals would generally be considered qualified to evaluate specific learning disabilities provided that they have additional training and experience in evaluating adolescent and adult learning disabilities: clinical psychologists, educational psychologists, school psychologists, neuropsychologists, and learning disabilities specialists. Use of diagnostic terminology indicating a specific learning disability by someone whose training and experience are not in these fields is not acceptable. It is of utmost importance that evaluators are sensitive and respectful of cultural and linguistic differences in adolescents and adults during the assessment process. It is not considered appropriate for professionals to evaluate members of their families. All reports should be on letterhead, typed, dated, signed and otherwise legible.

Recency of Documentation

The provision of all reasonable accommodations and services is based upon assessment of the impact of the student's disability on his or her academic performance at a given time in the student's life. Therefore, it is in the student's best interest to provide recent and appropriate documentation relevant to the student’s learning environment. Quinnipiac University is aware that once a person is diagnosed with a qualified specific learning disability under the Americans with Disabilities Act, the disability is believed to be lifelong; however, the severity may change over time.

Flexibility in accepting documentation is important. In some instances, documentation may be outdated or inadequate in scope or content. It may not address the student's current level of functioning or need for accommodations because observed changes may have occurred in the student’s performance since the previous assessment was conducted. In such cases, it may be appropriate to update the evaluation report. Since the purpose of the update is to determine the student’s current need for accommodations, the update, conducted by a qualified professional, should include a rationale for ongoing accommodations.

Substantiation of the Learning Disability

Documentation must validate the need for accommodations based on the individual's current level of functioning in the educational setting. A school plan such as an Individualized Education Program (IEP) or a 504 plan, while insufficient, can be included as part of a more comprehensive assessment battery. A comprehensive assessment battery and the resulting diagnostic report must include a diagnostic interview, assessment of aptitude, academic achievement, information processing and a diagnosis.

a. Diagnostic Interview

An evaluation report must include the summary of a comprehensive diagnostic interview. Learning disabilities are commonly manifested during early childhood, but not always formally diagnosed. Relevant information regarding the student's academic history and learning processes in elementary, secondary, and postsecondary education must be investigated and documented. The diagnostician, using professional judgment as to which areas are relevant, should conduct a diagnostic interview which may include: a description of the presenting problem(s); developmental, medical, psycho-social, and employment histories; family history (including primary language of the home and
the student's current level of English fluency); and a
discussion of dual diagnosis where indicated.

b. Assessment

The neuropsychological or psychoeducational evaluation
for the diagnosis of a specific learning disability must
provide clear and specific evidence that a learning
disability does or does not exist. Assessment, and any
resulting diagnosis, must consist of and be based on a
comprehensive assessment battery which does not rely
on any one test or subtest.

Evidence of a substantial limitation to learning must be
provided. A list of acceptable tests is included in Section
2.03A3. Minimally, the domains to be addressed must
include the following:

1. Aptitude/Cognitive Ability. A complete
intellectual assessment with all subtests and
standard scores reported.

2. Academic Achievement. A comprehensive
academic achievement battery is essential,
with all subtests and standard scores reported
for those subtests administered. The battery
must include current levels of academic
functioning in relevant areas such as reading
(decoding and comprehension), mathematics,
and oral and written language.

3. Information Processing. Specific areas of
information processing (e.g., short-term and
long-term memory, sequential memory, auditory
and visual perception/processing, processing
speed, executive functioning, and motor ability)
should be assessed.

Other assessment measures, such as non-standard
measures and informal assessment procedures or
observations, may be helpful in determining performance
across a variety of domains. Other formal assessment
measures may be integrated with the above instruments
to help determine a learning disability and differentiate
it from co-existing neurological and/or psychological
disorders (i.e., to establish a differential diagnosis). In
addition to standardized tests, it is also very useful to
include informal observations of the student during the
test administration.

c. Specific Diagnosis

Nonspecific diagnoses, such as individual "learning
styles," "slow reader," "learning differences," "academic
problems," and "test difficulty or anxiety," in and of
themselves, do not constitute a learning disability. It
is important to rule out alternative explanations for
problems in learning such as emotional, attentional,
or motivational problems that may be interfering with
learning but do not constitute a learning disability. The
diagnostician must use direct language in the diagnosis
and documentation of a learning disability, avoiding the
use of terms such as "suggests" or "is indicative of." If
the data indicate that a learning disability is not present,
the evaluator must state that conclusion in the report.

d. Test Scores

Standard scores and/or percentiles must be provided
for all normed measures. Grade equivalents must be
accompanied with standard scores and/or percentiles.
The data must logically reflect a substantial limitation
to learning for which the student is requesting
the accommodation. The particular profile of the
student's strengths and weaknesses must be shown
to relate to functional limitations that may necessitate
accommodations. The tests used must be reliable,
valid, and standardized for use with an adolescent/adult
population. The test findings must document both the
nature and severity of the learning disability. Informal
inventories, surveys and direct observation by a qualified
professional may be used in tandem with formal tests in
order to further develop a clinical hypothesis.

e. Clinical Summary

A well-written diagnostic summary based on a
comprehensive evaluation process is a necessary
component of the report. Assessment instruments
and the data they provide do not diagnose; rather, they
provide important elements that must be integrated by
the evaluator with background information, observations
of the client during the testing situation, and the current
context. It is essential, therefore, that professional
judgment be utilized in the development of a clinical
summary. The clinical summary must include:

1. Demonstration of the evaluator's having ruled
out alternative explanations for academic
problems as a result of poor education, poor
motivation and/or study skills, emotional
problems, attentional problems, and cultural/
language differences;

2. Indication of how patterns in the student's
cognitive ability, achievement and information
processing reflect the presence of a learning
disability;

3. Indication of the substantial limitation to
learning or other major life activity presented
by the learning disability and the degree to
which it impacts the individual in the learning
context for which accommodations are being
requested;

4. Indication as to why specific accommodations
are needed and how the effects of the specific
disability are accommodated.

The summary also should include any record of
prior accommodation or auxiliary aids, including any
information about specific conditions under which the
accommodations were used (e.g., standardized testing,
final exams, licensing or certification examinations).

Recommendations for Accommodations

It is important to recognize that accommodation needs
can change over time and are not always identified through
the initial diagnostic process. Conversely, a prior history of
accommodation, without demonstration of a current need,
Disabilities

2.03A3 Recommendations for Parents and Students – Learning Disabilities

1. For assistance in finding a qualified professional:
   • Contact the coordinator of learning services at Quinnipiac University to discuss documentation requirements.
   • Discuss your future plans with the coordinator and, if additional documentation is required, seek assistance in identifying a qualified professional.

2. In selecting a qualified professional:
   • Ask what his/her credentials are.
   • Ask what experience he/she has working with adults with learning disabilities.
   • Ask if he/she has ever worked with the coordinator of learning services at Quinnipiac University.

3. In working with the professional:
   • Take a copy of this document to the professional.
   • Encourage him/her to clarify questions with the coordinator of learning services.
   • Be prepared to be forthcoming, thorough, and honest with requested information.
   • Know that professionals must maintain confidentiality with respect to your records and testing information.

4. As follow-up to the assessment by the professional:
   • Request a written copy of the assessment report.
   • Request the opportunity to discuss the results and recommendations.
   • Request additional resources if you need them.
   • Maintain a personal file of your records and reports.

The diagnostic report must include specific recommendations for accommodations as well as an explanation as to why each accommodation is recommended. The evaluator must describe the impact the diagnosed learning disability has on a specific major life activity as well as the degree of significance of this impact on the individual. The evaluator must support recommendations with specific test results or clinical observations. If no prior accommodations have been provided, a detailed explanation should be included as to why no accommodations were used in the past and why accommodations are needed at this time.

If accommodations are not clearly identified in a diagnostic report, the coordinator of learning services will seek clarification and, if necessary, more information. The final determination for providing appropriate and reasonable accommodations rests with Quinnipiac University. In instances where a request for accommodations is denied at Quinnipiac University, a written grievance or appeal procedure can be initiated with the director of the learning center. See Section 4 – ADA/504 Grievance Procedure (p. 108)

Confidentiality

Quinnipiac University has a responsibility to maintain confidentiality of the evaluation and may not release any part of the documentation without the student’s informed and written consent.

2.03B Attention Deficit Hyperactivity Disorder (ADHD)

2.03B1 Brief Overview

(For more detail please refer to Section 2.03B2: Criteria of Comprehensive Documentation of ADHD. (p.)

Students requesting accommodations on the basis of ADHD must provide current (within the last three years) documentation by a professional who has undergone comprehensive training and has relevant experience in differential diagnosis and the full
range of psychiatric disorders (e.g., psychologists, psychiatrists, neuropsychologists and other relevantly trained medical doctors). In addition to the requirements specified above, documentation for students requesting accommodations on the basis of ADHD must include:

a. Evidence of early impairment. The condition must have been exhibited in childhood in more than one setting.

b. Evidence of current impairment. A history of the individual’s presenting attentional symptoms and evidence of current impulsive/hyperactive or inattentive behaviors that significantly impair functioning in two or more settings must be provided.

c. An interview. The interview must contain self-report and third-party information pertaining to: any significant developmental history; family history of ADHD or other educational, learning, physical, or psychological difficulties; relevant medical and medication history; a thorough academic history; and a review of prior psychoeducational test reports to determine whether a pattern of strengths or weaknesses is supportive of attention or learning problems.

d. Description of relevant employment history.

e. Description of current functional limitations pertaining to an educational setting that are presumably a direct result of problems with attention.

f. Evidence of alternative diagnoses or explanations being ruled out. The documentation must investigate and discuss the possibility of dual diagnoses and alternative or coexisting mood, behavioral, neurological, and/or personality disorders that may confound the ADHD diagnosis. For a diagnosis of ADHD, the symptoms may not occur exclusively during the course of a pervasive developmental disorder, schizophrenia, or other psychotic disorder, and are not better accounted for by another mental disorder (e.g., mood disorder, anxiety disorder, dissociative disorder, or a personality disorder).

g. A discussion of the neuropsychological or psychoeducational assessments administered to determine the current impact of the disorder on the individual’s ability to function in an academic setting. Such data should include standard scores, standard deviations and percentiles reported in table format for those subtests administered.

h. A specific psychiatric diagnosis as per the Diagnostic and Statistical Manual Of Mental Disorders, Fifth Edition, (DSM-5) of the American Psychiatric Association (2013). Symptoms of hyperactivity/impulsivity which were present in childhood and the current symptoms which have been present for at least the past six months and which impair functioning in two or more settings (e.g., school, work, home) must also be identified.

i. An indication of whether or not the student was evaluated while on medication, and whether or not the prescribed treatment produced a positive response.

j. Prescribed medications, dosages and schedules, including any possible side effects, which may influence the types of accommodations provided.

k. An integrated summary which: indicates the substantial limitations to major life activities posed by the disability, describes the extent to which these limitations would impact the academic context for which accommodations are being requested, suggests how the specific effects of the disability may be accommodated, and states how the effects of ADHD are mediately by the recommended accommodations.

2.03B2 Criteria for Comprehensive Documentation of ADHD

Introduction

Although the more generic term Attention Deficit Disorder (ADD) is frequently used, the official nomenclature in the 2013 American Psychiatric Association’s Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition, (DSM-5) is Attention-Deficit/Hyperactivity Disorder (ADHD) which is used in this document. This document provides students, parents, professional diagnosticians external to Quinnipiac University, and service providers with a common understanding and knowledge base of the components of documentation which are necessary to validate the existence of ADHD and its impact on the individual’s educational performance and to justify the need for reasonable accommodations for students attending Quinnipiac University. The information and documentation that establishes this disorder must be comprehensive in order to make it possible for a student to obtain appropriate accommodations in a timely fashion.

This document presents requirements in five important areas: 1) qualifications of the evaluator, 2) recency of documentation, 3) comprehensiveness of the documentation to substantiate the ADHD, 4) evidence to establish a rationale to support the need for accommodations, and 5) confidentiality. Section 2.03B3 (p.) provides recommendations for parents and students to assist them in finding and working with a qualified professional in regard to this documentation.

Under the Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act of 1973, individuals with disabilities are protected from discrimination and assured services. In order to establish that an individual is covered under the ADA, the documentation must indicate that the disability substantially limits some major life activity, including learning. The following documentation requirements are provided in the interest of assuring that documentation of ADHD demonstrates an impact on a major life activity and supports the request for accommodations, academic adjustments, and/or auxiliary aids.

Documentation Requirements - ADHD

Qualifications of the Evaluator

Professionals conducting assessments, rendering diagnoses of ADHD, and making recommendations for appropriate accommodations must be qualified to do so. Comprehensive training and relevant experience in differential diagnosis and the full range of psychological disorders are essential. The name, title and professional credentials of the evaluator, including information about license or certification, as well as the area of specialization, employment and state in which the individual practices must be clearly stated in the documentation. All reports must be on letterhead, typed, dated, signed and otherwise legible. The following professionals would generally be considered qualified to evaluate and diagnose ADHD provided they have comprehensive training in the differential diagnosis of ADHD and direct experience with an adolescent or adult ADHD population: clinical psychologists, psychiatrists, neuropsychologists and other relevantly trained medical doctors. It may be appropriate to use a clinical team approach consisting of a variety of educational, medical and counseling professionals with training in the evaluation of ADHD in adolescents and adults.

Use of diagnostic terminology indicating an ADHD by someone whose training and experience are not in these fields
is not acceptable. It is also not considered appropriate for professionals to evaluate members of their own families.

Recency of Documentation

Because the provision of all reasonable accommodations and services is based upon Quinnipiac University's assessment of the current impact of the disability on academic performance, it is in the student's best interest to provide recent and appropriate documentation. In most cases, this means that a diagnostic evaluation must have been completed within the past three years.

Flexibility in accepting documentation which exceeds a three-year period may be important under certain conditions, if the previous assessment is applicable to Quinnipiac University. If documentation is inadequate in scope or content, or does not address the student's current level of functioning and need for accommodations, reevaluation may be required. Furthermore, observed changes may have occurred in the student's performance since previous assessment, or new medication may have been prescribed or discontinued since the previous assessment was conducted. In such cases, it will be necessary to update the evaluation report. The update must include a detailed assessment of the current impact of the ADHD, an interpretive summary of relevant information (subsection 3G below (p. 101)) and the previous diagnostic report. If necessary, the coordinator of learning services at Quinnipiac University will recommend what aspects of the documentation need to be updated or augmented.

Comprehensiveness of the Documentation

a. Evidence of Early Impairment

Because ADHD is, by definition, first exhibited in childhood (although it may not have been formally diagnosed) and manifests itself in more than one setting, relevant historical information is essential. The following must be included in a comprehensive assessment: clinical summary of objective historical information establishing symptomology indicative of ADHD throughout childhood, adolescence and adulthood as garnered from transcripts, report cards, teacher comments, tutoring evaluations, past psychoeducational testing, and third party interviews when available.

b. Evidence of Current Impairment

In addition to providing evidence of a childhood history of an impairment, the following areas must be investigated:

1. Statement of Presenting Problem
   A history of the student's presenting attentional symptoms must be provided, including evidence of ongoing impulsive/hyperactive or inattentive behaviors that significantly impair functioning in two or more settings.

2. Diagnostic Interview
   The information collected for the summary of the diagnostic interview must consist of more than self-report, as information from third party sources is critical in the diagnosis of ADHD. The diagnostic interview with information from a variety of sources must include, but not necessarily be limited to, the following:
   a. history of presenting attentional symptoms, including evidence of ongoing impulsive/hyperactive or inattentive behavior that has significantly impaired functioning over time;
   b. developmental history;
   c. family history for presence of ADHD and other educational, learning, physical or psychological difficulties deemed relevant by the examiner;
   d. relevant medical and medication history, including the absence of a medical basis for the symptoms being evaluated;
   e. relevant psychosocial history and any relevant interventions;
   f. a thorough academic history of elementary, secondary and postsecondary education;
   g. review of prior psychoeducational test reports to determine whether a pattern of strengths or weaknesses is supportive of attention or learning problems;
   h. relevant employment history;
   i. description of current functional limitations pertaining to an educational setting that are presumably a direct result of problems with attention;
   j. relevant history of prior therapy.

c. Rule out of Alternative Diagnoses or Explanations

The evaluator must investigate and discuss the possibility of dual diagnoses and alternative or co-existing mood, behavioral, neurological and/or personality disorders that may confound the diagnosis of ADHD. This process must include exploration of possible alternative diagnoses, medical and psychiatric disorders as well as educational and cultural factors impacting the student, which may result in behaviors mimicking an attention-deficit/hyperactivity disorder.

d. Relevant Testing

The assessment of the individual must not only establish a diagnosis of ADHD, but must also demonstrate the current impact of the ADHD on the student's ability to function in a classroom and take tests. In addition, neuropsychological or psychoeducational assessment is important in determining the current impact of the disorder on the student's ability to function at Quinnipiac University. The evaluator must objectively review and include with the evaluation report relevant background information to support the diagnosis. If grade equivalents are reported, they must be accompanied by standard scores and/or percentiles. Test scores or subtest scores alone must not be used as a sole measure for the diagnostic decision regarding ADHD. Selected subtest scores from
measures of intellectual ability, memory functions tests, attention or tracking tests, or continuous performance tests do not in and of themselves establish the presence or absence of ADHD. Checklists and/or surveys can serve to supplement the diagnostic profile but in and of themselves are not adequate for the diagnosis of ADHD and do not substitute for clinical observations and sound diagnostic judgment. All data must logically reflect a substantial limitation to learning for which the student is requesting the accommodation.

e. Identification of DSM-5 Criteria

According to the DSM-5, “The essential feature of ADHD is a persistent pattern of inattention and/or hyperactivity-impulsivity that interferes with functioning or development.” (p. 61). A diagnostic report must include a review and discussion of the DSM-5 criteria for ADHD, both currently and retrospectively, and specify which symptoms are present. In diagnosing ADHD, it is particularly important to address the following criteria:

1. symptoms of hyperactivity/impulsivity or inattention that cause impairment which must have been present in childhood;
2. current symptoms that have been present for at least the past six months;
3. impairment from the symptoms present in two or more settings (for example, school, work, and home);
4. clear evidence of significant impairment in social, academic, or occupational functioning;
5. symptoms that do not occur exclusively during the course of a pervasive developmental disorder, schizophrenia or other psychotic disorder and are not better accounted for by another mental disorder (e.g., anxiety disorder, dissociative disorder or personality disorder).

f. A Specific Diagnosis

The report must include a specific diagnosis of ADHD based on the DSM-5 diagnostic criteria. The diagnostician must use direct language in the diagnosis of ADHD, avoiding the use of terms such as “suggests,” “is indicative of,” or “attention problems.” Individuals who report only problems with organization, test anxiety, memory or concentration in selective situations do not fit the proscribed diagnostic criteria for ADHD. Given that many individuals benefit from prescribed medications and therapies, a positive response to medication by itself does not confirm a diagnosis nor does the use of medication in and of itself either support or negate the need for accommodation.

g. An Interpretive Summary

A well-written interpretative summary based on a comprehensive evaluative process is a necessary component of the documentation. Because ADHD is in many ways a diagnosis which is based upon the interpretation of historical data and observation, as well as other diagnostic information, it is essential that professional judgment be utilized in the development of a summary, which must include:

1. demonstration of the evaluator’s having ruled out alternative explanations for inattentiveness, impulsivity, and/or hyperactivity as a result of psychological disorders, medical disorders or non-cognitive factors;
2. indication of how a pattern of inattentiveness, impulsivity and/or hyperactivity across the life span and across setting are used to determine the presence of ADHD;
3. indication of whether or not the student was evaluated while on medication and whether or not there is a positive response to the prescribed treatment;
4. indication and discussion of the substantial limitation to learning presented by the ADHD and the degree to which it impacts the student in the learning context for which accommodations are being requested;
5. indication as to why specific accommodations are needed and how the effects of ADHD symptoms, as designated by the DSM-5, are mediated by the accommodations.

A Rationale for Each Accommodation

The evaluator must describe the impact, if any, of the diagnosed ADHD on a specific major life activity as well as the degree of impact on the student. The diagnostic report must include specific recommendations for accommodations that are realistic and that Quinnipiac University can reasonably provide. A detailed explanation of why each accommodation is recommended must be provided and correlated with specific functional limitations determined through interview, observation, and/or testing. Although prior documentation may have been useful in determining appropriate services in the past, current documentation must validate the need for services based on the student’s present level of functioning in an educational setting. A school plan such as an Individualized Educational Program (IEP) or a 504 plan is insufficient documentation in and of itself but can be included as part of a more comprehensive evaluative report. The documentation must include any record of prior accommodations or auxiliary aids, including information about specific conditions under which the accommodations were used (e.g., standardized testing, final exams, licensing, or certification examinations) and whether or not they benefited the student. However, a prior history of accommodations, without demonstration of a current need, does not in itself warrant the provision of a like accommodation. If no prior accommodations were provided, the qualified professional and/or the student must include a detailed explanation as to why no accommodations were used in the past and why accommodations are needed at this time.

Because of the challenge of distinguishing normal behaviors and developmental patterns of adolescents and adults (e.g., procrastination, disorganization, distractibility, restlessness, boredom, academic underachievement or failure, low self-
Assessing Adolescents and Adults with ADHD

The diagnosis of ADHD is strongly dependent on a clinical interview in conjunction with a variety of formal and informal measures. Since there is no one test, or specified combination of tests for determining ADHD, the diagnosis requires a multifaceted approach. Any tests that are selected by the evaluator should be technically accurate, reliable, valid, and standardized on the appropriate norm group. The following list includes five broad domains that are frequently explored when arriving at an ADHD diagnosis. This listing is provided as a helpful resource but is not intended to be definitive or exhaustive.

1. Clinical Interview
The evaluator should: a) provide retrospective confirmation of ADHD; b) establish relevant developmental and academic markers; c) determine any other co-existing disorders; and d) rule out other problems that may mimic ADHD. Specific areas to be addressed include: family history; results of a neuro-medical history; presence of ADHD symptoms since childhood; presence of ADHD symptoms in last six months; evidence that symptoms cause a “significant impairment” over time; results of clinical observation for hyperactive behavior, impulsive speech, distractibility; extent of functional impairment across settings (e.g., academic, occupational, social); an accounting for periods in which student was symptom-free; presence of other psychiatric conditions (mood or anxiety disorders, substance abuse, etc.); indication that symptoms are not due to other conditions (e.g., depression, drug use, neuromedical problems); relevant medication history; determination of which remediation approaches and/or compensating strategies are and are not currently effective; determination of what accommodations, if any, have alleviated symptoms in the past or in the present setting.

2. Rating Scales
Self-rater or interviewer-rated scales for categorizing and quantifying the nature of the impairment may be useful in conjunction with other data. Selected examples include:

- Wender Utah Rating Scale
- Brown Attention-Activation Disorder Scale
- Beck Anxiety Inventory
- Hamilton’s Depression Rating Scale
- Connors’ Adult ADHD Rating Scales (CAARS)

3. Neuro-Psychological and Psycho-Educational Testing
Cognitive and achievement profiles may suggest attention or information processing deficits. No single test or subtest should be used as the sole basis for a diagnostic decision. Acceptable instruments include, but are not limited to:

- Wechsler Adult Intelligence Scale - IV (WAIS-IV)
- Woodcock-Johnson Psychoeducational Battery - III: Tests of Cognitive Ability
- Kaufman Adolescent and Adult Intelligence Test (KAIT)
- Stanford-Binet Intelligence Scales, Fifth Edition (SB5)

Academic Achievement

- Woodcock-Johnson Psychoeducational Battery - III: Tests of Achievement
- Wechsler Individual Achievement Test – Third Edition (WIAT-III)
- Scholastic Abilities Test for Adults (SATA)
- Stanford Test of Academic Skills (TASK)

or specific achievement tests such as:

- Nelson-Denny Reading Test
This document presents requirements in six important areas: 1) qualifications of the evaluator, 2) recency of documentation, 3) comprehensiveness of the documentation to support the diagnosis of a psychological disability, 4) evidence to establish the functional limitation of the psychological condition supporting the need for accommodations, 5) multiple diagnoses, and 6) confidentiality. Section 2.03C3 (p. __) provides recommendations for parents and students to assist them in finding and working with a qualified professional in regard to this document, including suggestions for assessment measures.

Under the Americans with Disabilities Act (ADA) of 1990 and Section 504 of the Rehabilitation Act of 1973, individuals with disabilities are protected from discrimination and may be entitled to reasonable accommodations and equal access to programs and services. To
establish that an individual is covered under the ADA, documentation must indicate that a specific disability exists and that the identified disability substantially limits one or more major life activities. A diagnosis of a disorder/condition/syndrome in and of itself does not automatically qualify an individual for accommodations under the ADA. The documentation must also support the request for accommodations, academic adjustments, and/or auxiliary aids.

Terms

Psychological disabilities: Comprise a range of conditions characterized by emotional, cognitive, and/or behavioral dysfunction. Diagnoses are provided in the DSM-5 or the ICD-10. Note that not all conditions listed in the DSM-5 are disabilities, or even impairments for purposes of the ADA. Therefore, a diagnosis of a disability does not, in and of itself, meet the definition of a disability necessitating reasonable accommodations under the ADA or Section 504 of the Rehabilitation Act of 1973.

Major life activity: Examples of major life activities include walking, sitting, standing, seeing, hearing, speaking, breathing, learning, working, caring for oneself, and other similar activities. In particular, individuals with psychological disabilities may also experience thinking disorders/psychotic disorders that may interfere with the learning process (e.g., reading, writing, and calculating).

Functional limitation: A substantial impairment in the individual's ability to function in the condition, manner, or duration of a required major life activity.

Documentation Requirements – Psychological Disabilities

Qualifications of the Evaluator

Professionals conducting assessments, rendering diagnoses of psychological disabilities, and making recommendations for appropriate accommodations must be qualified to do so. It is essential that professional qualifications include both comprehensive training and relevant expertise in differential diagnosis of psychological disorders and appropriate licensure/certification. Qualified evaluators are defined as those licensed individuals who are qualified to evaluate and diagnose psychological disabilities or who may serve as members of the diagnostic team. These individuals or team members may include: licensed clinical psychologists, licensed clinical social workers, psychiatrists, advanced practice registered nurses or clinical nurse specialists in psychiatry, and other relevantly trained medical doctors. Documentation may be provided from more than one source when a clinical team approach consisting of a variety of educational, medical, and counseling professionals has been used.

Diagnoses of psychological disabilities documented by family members will not be accepted due to professional and ethical considerations even when the family members are otherwise qualified by virtue of training and licensure/certification. The issue of dual relationships as defined by various codes of professional ethics should be considered in determining whether a professional is in an appropriate position to provide the necessary documentation.

Finally, the name, title, and credentials of the qualified professional writing the report should be included. Information about license or certification, as well as the area of specialization, employment, and state or province in which the individual practices, should also be clearly stated in the documentation. All reports should be in English, typed or printed on professional letterhead, dated, and signed.

Recency of Documentation

Due to the changing nature of psychological disabilities, it is essential that a student provide recent and appropriate documentation from a qualified evaluator. Since reasonable accommodations are based on the current impact of the disability, the documentation must address the student’s current level of functioning and the need for accommodations (e.g., due to observed changes in performance or due to medication changes since previous assessment). If the diagnostic report is more than one year old, the student must also submit a letter from a qualified professional that provides an update of the diagnosis, a description of the student's current level of functioning during the preceding year, and a rationale for the requested reasonable accommodations.

Comprehensiveness of the Documentation

In most cases, documentation must be based on a comprehensive diagnostic/clinical evaluation that adheres to the guidelines outlined in this document. The diagnostic report must include the following components: 1. a specific diagnosis; 2. a description of current functional limitations in the academic environment as well as across other settings; 3. relevant information regarding medications expected to be in use and their anticipated impact on the student in this setting; 4. relevant information regarding current treatment; 5. a specific request for accommodations with accompanying rationale.

a. Historical Information, Diagnostic Interview, and/or Psychological Assessment The information collected for the summary of the diagnostic interview must include, but is not limited to, the following:

1. history of presenting symptoms;
2. duration and severity of the disorder;
3. relevant, developmental, historical and familial data;
4. relevant medical and medication history, including the student’s current medication regimen compliance, side effects (if relevant), and response to medication;
5. a description of current functional limitations in different settings with the understanding that a psychological disorder usually presents itself across a variety of settings other than just the
academic domain and that its expression is often influenced by context-specific variables (e.g., school-based performance);

6. a description of the expected progression or stability of the impact of the condition over time as relevant to the student’s performance;

7. information regarding the kind of treatment and duration/consistency of the therapeutic relationship as relevant to test taking performance.

b. Specific Diagnosis

The report must include a specific diagnosis based on the DSM-5 or ICD-10 diagnostic criteria and include the specific diagnostic section in the report with a numerical and nominal diagnosis from DSM-5 or ICD-10. Evaluators are encouraged to cite the specific objective measures used to help substantiate the diagnosis. The evaluator must use definitive language in the diagnosis of a psychiatric disorder, avoiding such wording as “suggests,” “has problems with,” or “may have emotional problems.”

c. Rule out of Alternative Diagnoses or Explanations

The evaluator must also investigate and rule out the possibility of other potential diagnoses involving neurological and/or medical conditions or substance abuse, as well as educational, linguistic, sensorimotor, and cross-cultural factors that may result in symptoms mimicking the purported psychological disability.

Recommendations for Accommodation

The evaluator must describe the degree of impact of the diagnosed psychological disorder on a specific major life activity, as well as the degree of impact on the student. A link must be established between the requested accommodations and the functional limitations of the student that are pertinent to the anticipated academic and residential settings. Accommodations will be provided only when a clear and convincing rationale is made for the necessity of the accommodation. A diagnosis, in and of itself, does not automatically warrant approval of requested accommodations. For example, test anxiety alone is not a sufficient diagnosis to support requests for accommodations. Given that many students may perceive that they might benefit from extended time in testing situations, evaluators must provide specific rationales and justifications for the accommodation. A prior history of accommodations, without demonstration of current need, does not, in and of itself, warrant the provision of accommodations. If there is no prior history of accommodations, the evaluator and/or the student must include a detailed explanation of why accommodations were not needed in the past, and why they are now currently being requested. Psychoeducational, neuropsychological or behavioral assessments are often necessary to support the need for reasonable academic accommodations based on the potential for psychological disorders to interfere with cognitive performance.

Multiple Diagnoses

Multiple diagnoses may require a variety of accommodations beyond those typically associated with one diagnosis, and therefore the documentation must adhere to Quinnipiac University’s policy for other diagnoses.

Confidentiality

Quinnipiac University has a responsibility to maintain confidentiality of the evaluation and may not release any part of the documentation without the student’s informed and written consent. Furthermore, to safeguard the confidentiality of individuals with psychological disabilities, evaluators may withhold or redact any portion of the documentation that is not directly relevant to Quinnipiac University’s criteria for establishing a rationale for requested reasonable accommodations.

2.03C3 Recommendations for Parents and Students - Psychological Disabilities

1. For assistance in finding a qualified professional (See Section 2.03C2 for definition of a qualified professional):

   • Contact the coordinator of learning services at Quinnipiac University for possible referral sources.
   • Contact your primary care physician who may be able to refer you to a qualified professional with demonstrated expertise in psychological disorders.

2. In selecting a qualified professional:

   • Ask what experience and training he/she has had diagnosing adolescents and adults.
   • Ask whether he or she has training in differential diagnosis and the full range of psychological disorders. Clinicians typically qualified to diagnose psychiatric disabilities include: licensed clinical psychologists, licensed clinical social workers, psychiatrists, advanced practice registered nurses or clinical nurse specialists in psychiatry and other relevantly trained medical doctors.
   • Ask if he/she has ever worked with the coordinator of learning services at Quinnipiac University.
   • Ask whether you will receive a comprehensive written report.

3. In working with the professional:

   • Take a copy of these guidelines to the professional.
   • Be prepared to be candid, thorough and honest in providing requested information.

4. As follow-up to the assessment by the professional:

   • Schedule a meeting to discuss the results, recommendations, and possible treatment.
   • Request additional resources, support group information, and publications if you need them.
   • Maintain a personal file of your records and reports.
Assessing Adolescents and Adults with Psychological Disorders

This subsection contains selected examples of tests and instruments that may be used to supplement the clinical interview and support the presence of functional limitations. All tests used should be current and have sufficient reliability, validity, and utility for the specific purposes for which they are being employed. All tests should also be normed on relevant populations, and the results should be reported in standard scores and/or percentile ranks. Tests that have built-in validity scales or indicators are preferred over those that do not.

1. Neuropsychological and Psychoeducational Testing:

Cognitive, achievement, and personality profiles may suggest attention or information-processing deficits, but no single test or subtest should be used solely to substantiate a diagnosis. Acceptable instruments include, but are not limited to:

Aptitude/Cognitive Ability

- Wechsler Adult Intelligence Scale-IV (WAIS-IV)
- Woodcock-Johnson Psychoeducational Battery-III - Tests of Cognitive Abilities
- Kaufman Adolescent and Adult Intelligence Test (KAIT)
- Stanford-Binet Intelligence Scales, Fifth Edition (SB5)

Academic Achievement

- Woodcock-Johnson Psychoeducational Battery-III - Tests of Achievement
- Wechsler Individual Achievement Test-III (WIAT-III)
- Stanford Test of Academic Skills (TASK)
- Scholastic Abilities Test for Adults (SATA)

or specific achievement tests, such as:

- Nelson-Denny Reading Test
- Woodcock Reading Mastery Tests - Third Edition (WRMT-III)
- Test of Written Language-4 (TOWL-4)
- Stanford Diagnostic Mathematics Test

Information Processing

- Information from subtests on the WAIS-IV or
- Woodcock-Johnson Psychoeducational Battery-III - Tests of Cognitive Abilities
- Detroit Tests of Learning Aptitude-4 (DTLA-Adult)
- Wechsler Memory Scale IV
- Rey-Osterrieth Complex Figure Test
- Stroop Interference Test
- Trail Making Test
- Wisconsin Card Sorting Test
- Halstead-Reitan Neuropsychological Test Battery
- California Verbal Learning Test-II
- Continuous Performance Test
- Category Test
- Other relevant instruments, may be useful

2. Personality Tests

Acceptable instruments may include, but are not limited to:

- Minnesota Multiphasic Personality Inventory-Adolescent-2 (MMPI-2)
- Thematic Apperception Test
- Millon Adolescent Personality Inventory
- Millon Clinical Multiaxial Personality Inventory-III
- NEO Personality Inventory-Revised
- Personality Assessment Inventory
- Sixteen Personality Factor Questionnaire

3. Rating Scales:

Self-rater or interviewer-rated scales for categorizing and quantifying the nature of the impairment may be useful in conjunction with other data, but no single test or subtest should be used solely to substantiate a diagnosis.

Acceptable instruments include, but are not limited to:

- Beck Anxiety Inventory
- Beck Depression Inventory-II
- Brief Psychiatric Rating Scale
- Burns Anxiety Inventory
- Burns Depression Inventory
- Children’s Depression Inventory
- Hamilton Anxiety Rating Scale
- Hamilton Depression Rating Scale
- Inventory to Diagnose Depression
- Multidimensional Anxiety Scale for Children
- Profile of Mood States
- State-Trait Anxiety Inventory
- Taylor Manifest Anxiety Scale
- Yale-Brown Obsessive-Compulsive Scale

2.03D Acquired Brain Injury (ABI)/Traumatic Brain Injury (TBI)

Students requesting accommodation on the basis of an ABI/TBI must provide documentation (in most cases within three years, recent ABI/TBI within one year) from a professional who has undergone comprehensive training and has relevant experience in the assessment of ABI/TBI in adolescents and/or adults (e.g. neuropsychologists, clinical or educational psychologists). In addition to the requirements specified above, documentation for students requesting accommodations on the basis of an ABI/TBI must include but not be limited to:

a. A neuropsychological evaluation containing assessments of intellectual, conceptual and cognitive competence; academic skills; personality status; motor facility of all extremities; sensory, perceptual and processing efficiency; visual, auditory and tactile facility; speech, language and communication ability; and evaluation of memory and attention.

b. Utilization of particular evaluation techniques must be at the discretion of the evaluator. Measures, such as the following, will be expected to appear in the selected battery: Bender-Gestalt, Halstead Reitan Battery (or selected parts), selected parts of the Illinois Test of Psycholinguistic Ability (or other psycholinguistic tests); Detroit Tests of Learning Aptitude-4 or Detroit Tests of Learning Aptitude - Adult; Luria Nebraska Battery (or selected parts); Peabody Individual Achievement
2.03F Organic Medical Conditions
In addition to the requirements specified above, documentation for students requesting accommodations on the basis of physical mobility, physical dexterity, or chronic health-related disabilities must include:

1. An identification of the disabling condition(s)
2. An assessment of the functionally limiting manifestations of the condition(s) for which accommodations are being requested
3. Degree and range of functioning for a chronic or progressive condition
4. Prescribed medications, dosages and schedules which may influence the types of accommodations provided, including any possible side effects
5. Suggestions as to how the functionally limiting manifestations of the disabling condition(s) may be accommodated

2.03G Other Disabilities Not Covered Above
In addition to the requirements specified above, students and professionals are advised to discuss the requirements of appropriate documentation for students requesting accommodations on the basis of other disabilities with the coordinator of learning services.

Section 4 ADA/504 Grievance Procedure
Quinnipiac University

4.01 Grievances

Students who believe they have been subjected to discrimination on the basis of disability or have been denied access to services or accommodations required by law, have the right to use this grievance procedure. In general, the grievance procedure is designed to address disputes concerning the following:

a. Disagreements regarding a requested service, accommodation or modification of a university practice or requirement;
b. Inaccessibility of a program or activity;
c. Harassment or discrimination on the basis of disability;
d. Violation of privacy in the context of disability

Undergraduate and graduate students (excepting students of the School of Law) with inquiries regarding relevant Quinnipiac University policies or procedures should direct inquiries to the coordinator of learning services (203-582-5390), whose office is located in the north wing of the Arnold Bernhard Library. Students of the Quinnipiac School of Law should direct inquiries to the associate dean for students (203-582-3220), whose office is located in the School of Law and Education, 310K.

4.02 Informal Procedure

In the event an individual believes that he/she has received discriminatory treatment and has been unable to resolve the issue with the staff identified above, a student may follow an informal process to resolve the issue. Undergraduate and graduate students working with the coordinator of learning services may contact the associate vice president of retention and academic success (203-582-5338). Students of the School of Law working with the associate dean of students (Law) should contact the dean of the School of Law. Contact with the appropriate person should be made within fifteen (15) days after the alleged discriminatory act or incident. Discretion may be exercised in the event contact is made after the 15-day period.

During this stage in the procedure, the complaining party is designated the “aggrieved individual” and the person(s) whom the aggrieved individual is complaining against should be designated the “alleged discriminating party.”

Neither the associate vice president of retention and academic success nor the dean of the School of Law will serve as an advocate for either the aggrieved individual or the alleged discriminating party, but merely process the allegation(s) and attempt to informally resolve the differences between the two parties within fifteen (15) days after being contacted by the aggrieved individual.

If the aggrieved individual is not satisfied with the outcome of the informal process, he/she may file a formal complaint within fifteen (15) days after the conclusion of the attempt to informally resolve the differences.

As outlined above, the informal process, theoretically, should not exceed forty-five (45) days.
4.03 Formal Procedure

Initial Process
The aggrieved individual initiates the formal procedure by filing a formal complaint in writing to the vice president of academic innovation and effectiveness, whose office is located in the Center for Communications and Engineering CCE 290B. Once the complaint is filed, the status of the aggrieved individual changes to that of “complainant.” The vice president of academic affairs may assist the complainant in properly filing a complaint; however, it is important that the vice president of academic affairs not serve as an advocate for the complainant. The formal complaint may be a simple written statement, but should include the following:

1. The complainant’s name, address, email address and phone number;
2. A full description of the problem;
3. A statement of the remedy requested;
4. A statement setting forth the outcome of the informal procedure described above.

Investigation
Once the complaint has been properly filed, the vice president of academic innovation and effectiveness, who shall serve as grievance officer, shall promptly initiate an investigation. In undertaking the investigation, the vice president may interview, consult with and/or request a written response to the issues raised in the grievance from any individual the vice president believes to have relevant information, including faculty, staff and students.

The complainant and the party against whom the grievance is directed shall have the right to have a representative. Each party shall indicate whether he or she is to be assisted by a representative and if, so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.

Upon completion of the investigation, the vice president will prepare and transmit to the student, and to the party against whom the grievance is directed, a final report containing a summary of the investigation, written findings and a proposed disposition. This transmission will be expected within thirty (30) calendar days of the filing of the formal complaint. The deadline may be extended by the vice president for good cause. The final report shall also be provided, where appropriate, to any university officer whose authority will be needed to carry out the proposed disposition.

Appeal
Within ten (10) calendar days of the issuance of the final report, the complainant or the party against whom the grievance is directed may appeal the vice president’s determination to the executive vice president and provost, located in the North wing of the Arnold Bernhard Library N117, fax number (203-582-8968). The written request for review must specify the particular substantive and or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the proposed disposition. Furthermore, the appeal must be directed only to issues raised in the formal complaint as filed or to procedural errors in the conduct of the grievance procedure itself, and not to new issues.

A copy of the executive vice president and provost’s written decision will be expected within thirty (30) calendar days of the filing of the appeal and shall be sent to the parties, the grievance officer and, if appropriate, to the university officer whose authority will be needed to carry out the disposition. The deadline may be extended by the executive vice president and provost for good cause. The decision of the executive vice president and provost on the appeal is final.

This formal process does not preclude an individual’s right to file a formal complaint with the Office for Civil Rights of the United States Department of Education, or any other federal agency.

Appendices

Appendix 1 – General Recommendations for Students with Disabilities and Parents

In finding a qualified professional:
• Contact the coordinator of learning services at Quinnipiac University to discuss documentation needs and possible referral sources.
• Discuss your future plans with the coordinator and, if additional documentation is required, seek assistance in identifying a qualified professional.

In selecting a qualified professional:
• Ask what his or her credentials are.
• Ask what experience he or she has had working with adolescents and adults with disabilities.
• Ask if he or she has ever worked with the coordinator of learning services at Quinnipiac University.
• Ask whether you will receive a comprehensive written report.

In working with the professional:
• Take a copy of this document to the professional.
• Encourage him or her to clarify questions with the coordinator of learning services.
• Be prepared to be forthcoming, thorough and honest with requested information.
• Know that professionals must maintain confidentiality with respect to your records and testing information.

In following up on the assessment by the professional:
• Request a written copy of the assessment report.
• Request the opportunity to discuss the results and recommendations.
• Request additional resources, support group information, and publications if you need them.
• Maintain a personal file of your records and reports.
• Be aware that Quinnipiac University has a responsibility to maintain confidentiality.

Appendix 2 – Resources and Organizations

Anxiety Disorder Association of America (ADAA)
11900 Parklawn Drive, Suite 100
Rockville, MD 20852
301-231-9350 voice
301-231-7392 fax
adaa.org (http://www.adaa.org)
The ADAA promotes the prevention and cure of anxiety disorders and works to improve the lives of those who have them.

Association on Higher Education and Disability (AHEAD)
107 Commerce Center Drive, Suite 204
Huntersville, NC 28078
AHEAD sponsors numerous training programs, workshops, publications, and conferences for professionals in the field of higher education disability.

**Children and Adults with Attention-Deficit/Hyperactivity Disorder (CHADD)**
8181 Professional Place, Suite 150
Landover, MD 20785
1-800-233-4050 voice - toll free
301-306-7070 voice
301-306-7090 fax
chadd.org (http://www.chadd.org)

CHADD is a national organization with over 32,000 members and more than 500 chapters nationwide that provides support and information for parents of children with ADHD and adults with ADHD.

**The Council for Exceptional Children (CEC)**
1920 Association Drive
Reston, VA 22091-1589
703-620-3660 voice
703-264-9446 TTY
703-264-9494 fax
cecsped.org (http://www.cec.sped.org)

The CEC is the largest international professional organization committed to improving educational outcomes for individuals with disabilities.

**Learning Disabilities Association of America (LDA)**
4156 Library Road
Pittsburgh, PA 15234-1349
412-341-1515 voice
412-344-0224 fax
ldamerica.org (https://ldaamerica.org)

LDA is the largest nonprofit volunteer organization advocating for individuals with learning disabilities. LDA has more than 600 local chapters and affiliates in 50 states, Washington, D.C., and Puerto Rico. LDA seeks to educate individuals with learning disabilities and their parents about the nature of the disabilities and inform them of their rights.

**National Center for Learning Disabilities (NCLD)**
381 Park Avenue South, Suite 1401
New York, NY 10016
212-545-7510 voice
212-545-9665 fax
Toll-free Information and Referral Service: 1-888-575-7373
ncld.org (http://www.ncld.org)

NCLD provides the latest information on learning disabilities and resources available to parents, professionals, and adults with learning disabilities. Specific information about learning disabilities, as well as local referrals to schools, clinics, camps, colleges’ parent support groups, and other sources of help are available.

**National Depressive and Manic-Depressive Association (NDMDA)**
730 North Franklin Street, Suite 501
Chicago, IL 60610-7204
1-800-826-3632 voice – toll free
312-642-0049 voice
312-642-7243 fax
ndmda.org (http://www.ndmda.org)

The NDMDA is a nonprofit organization aimed at helping people with depressive spectrum illnesses and their families.

**Obsessive-Compulsive Foundation, Inc. (OCF)**
337 North Hill Road
North Branford, CT 06471
203-315-2190 voice
203-315-2196 fax
ocfoundation.org (http://www.ocfoundation.org)

The OCF is an international not-for-profit organization composed of people with OCD and related disorders, their families, friends, professionals, and other concerned individuals.

The Internet Mental Health webpage, mentalhealth.com (http://www.mentalhealth.com), is another very good resource.

The material contained in the document *Criteria for Comprehensive Documentation of Disabilities in Adolescents and Adults at Quinnipiac University* was produced following guidelines developed by the Consortium on ADHD Documentation, the AHEAD Ad Hoc Committee on Learning Disabilities, Educational Testing Service’s Task Force on Psychiatric Disabilities, and CT AHEAD Ad Hoc Committee.

The members of these committees are listed below.

**The Consortium on ADHD Documentation**
Loring Brinckerhoff, Chairperson, Educational Testing Service
Kim M. Dempsey, Law School Admission Council
Cyndi Jordan, University of Tennessee - Memphis
Shelby R. Keiser, National Board of Medical Examiners
Joan M. McGuire, University of Connecticut - Storrs
Nancy W. Pompian, Dartmouth College
Louise Russell, Harvard University

**AHEAD Ad Hoc Committee on Learning Disabilities**
Members consisted of those mentioned above and included Catherine Nelson, Educational Testing Services.

**ETS Office of Disability Policy**
Sheree Johnson-Gregory, Director and Loring C. Brinckerhoff, Disability Accommodations Specialist
Task Force on Psychiatric Disabilities

DRUG SCREEN POLICY

Revised April 2019

Purpose
The School of Nursing (SoN), Frank H. Netter MD School of Medicine (SoM), and School of Health Sciences (SHS) recognize that substance abuse is a significant public health problem in the United States, and that drug overdose is now the leading cause of death among Americans under 50 years of age. Unfortunately, the health risks and criminal matters that affect so many individuals include health care providers. Substance abuse may affect the ability of a health care provider to deliver safe, high-quality care. All providers have the legal and ethical responsibility to uphold the law that protects society from drug abuse.

This policy influences and augments the student’s ability to maintain personal and professional integrity and facilitates the student’s success both clinically and didactically. It promotes a healthy learning environment for the student. In the clinical setting, this policy enhances patient safety. It also fosters the development of professional health care providers who are well educated about the prevalence, adverse outcomes and responsibilities related to substance abuse.

For all items in this policy, the primary dean’s representative is as follows (but alternative designees may be named, as appropriate):

The appropriate dean’s representative for SoN is the assistant dean for student services.
The appropriate dean’s representative for SoM is the associate dean for student affairs.
The appropriate dean’s representative for SHS is the assistant dean for career development.

Incoming students from all programs must read this policy as a condition of acceptance into the professional component in their program, whether or not their school/program requires a drug screen prior to matriculation. Addenda may be drafted by any or all of the three schools that modify this policy and its procedures.

Policy Statement
This policy applies to all students who have matriculated in the Schools of Nursing, Medicine and Health Sciences.

No student may consume or be under the influence of, or in possession of, alcohol or drugs, which may impair the student’s ability to function safely while engaged in academic activities, regardless of venue. Students taking prescription drugs or over-the-counter medication are personally responsible for ensuring that, while taking such drugs or medications, they are not a safety risk to themselves or others while engaged in academic activities, regardless of venue. Improper use of alcohol or other unauthorized substances in the academic or clinical setting will result in immediate removal from that setting and may result in dismissal from the program. Students also must comply with all local, state and federal laws and regulations, as well as Quinnipiac University policies, regarding the possession, manufacture, use or distribution of controlled or illegal substances and alcohol.

A student who has a break in enrollment (e.g., academic or other leave of absence, suspension, etc.) must repeat a drug screen prior to beginning classes using the guideline in Figure 1.

In programs that require a negative drug screen prior to matriculation, final program acceptance is contingent upon drug screening clearance as listed in Figure 1. If a student does not submit their drug screen prior to program’s deadline, that student risks delaying their start and may lose their seat in the program and forfeit their deposit.

A drug screen or repeat drug screen may be required as a condition of clinical or fieldwork if requested by that facility. Timelines for completion of this screening are solely at the discretion of each contracted facility and are subject to change without notice. Students are required to comply with the requirements of their assigned clinical sites. A student may be required to have multiple drug screens during the course of his/her enrollment in clinical and/or fieldwork. Costs associated with these screenings are the responsibility of the student. Students who are employed at an agency where they may also be doing clinical or fieldwork as part of the curriculum must comply with this drug screening policy regardless of whether a drug screen was completed as part of the employment process.

In either instance listed above, a negative dilute result is not an acceptable result; any student who has a negative dilute result on a drug screen is required to repeat the drug screen at their expense within 5 business days of receiving notification from the dean’s office.

Any matriculated student found guilty of an alcohol or drug-related offense, including a Quinnipiac Code of Student Conduct violation, or other conviction that may affect the student’s ability to deliver safe, high-quality care, will face sanctions up to and including dismissal from the school. If the confirmed offense involves unlawful possession, use, manufacture, distribution, diversion or improper use of any substances, the sanction is immediate dismissal from the program.

Students who are arrested for an alcohol or drug-related offense and who are matriculated in the Schools of Nursing, Medicine or Health Sciences must notify the appropriate dean of the event, in writing, immediately and no later than the same day the student returns to classes. If the student is enrolled in a clinical or fieldwork course, notification in writing to the appropriate dean is due no later than 24 hours prior to the assigned clinical or fieldwork day. No student with an arrest may attend a clinical or fieldwork experience until cleared by the dean.

A police report of the arrest must also be submitted to the appropriate dean within 10 business days. Students failing to follow the guideline for notification of an arrest and submission of a police report will face sanctions up to and including dismissal from the school.

Procedures

Figure 1: Timing of Drug Screen Requirements

A drug screen or repeat drug screen may be required as a condition of clinical or fieldwork if requested by that facility. Timelines for completion of this screening are solely at the discretion of each contracted facility and are subject to change without notice. Students are required to comply with the requirements of their assigned clinical sites. A student may be required to have multiple drug screens during the course of his/her enrollment in clinical and/or fieldwork. Costs associated with these screenings are the responsibility of the student. Students who are employed at an agency where they may also be doing clinical or fieldwork as part of the curriculum must comply with this drug screening policy regardless of whether a drug screen was completed as part of the employment process.

In either instance listed above, a negative dilute result is not an acceptable result; any student who has a negative dilute result on a drug screen is required to repeat the drug screen at their expense within 5 business days of receiving notification from the dean’s office.

Any matriculated student found guilty of an alcohol or drug-related offense, including a Quinnipiac Code of Student Conduct violation, or other conviction that may affect the student’s ability to deliver safe, high-quality care, will face sanctions up to and including dismissal from the school. If the confirmed offense involves unlawful possession, use, manufacture, distribution, diversion or improper use of any substances, the sanction is immediate dismissal from the program.

Students who are arrested for an alcohol or drug-related offense and who are matriculated in the Schools of Nursing, Medicine or Health Sciences must notify the appropriate dean of the event, in writing, immediately and no later than the same day the student returns to classes. If the student is enrolled in a clinical or fieldwork course, notification in writing to the appropriate dean is due no later than 24 hours prior to the assigned clinical or fieldwork day. No student with an arrest may attend a clinical or fieldwork experience until cleared by the dean.

A police report of the arrest must also be submitted to the appropriate dean within 10 business days. Students failing to follow the guideline for notification of an arrest and submission of a police report will face sanctions up to and including dismissal from the school.

Procedures

Figure 1: Timing of Drug Screen Requirements
Graduate Program: MSN Nurse Practitioner – Prior to program orientation and then annually and as required by the clinical site

Graduate Program: BSN to DNP Nursing Anesthesia – Prior to program orientation and then annually and as required by the clinical site

Online Nursing Programs – August 24 prior to beginning fall semester and then annually and as required by the clinical site

Students matriculating in spring/summer – Prior to beginning spring/summer semester classes and then annually and required by the clinical site

School of Health Sciences

Athletic Training/Sports Medicine – As required by assigned clinical site

Cardiovascular Perfusion – On entry, recheck prior to start of clinical assignment

Diagnostic Medical Sonography – Prior to program orientation

Occupational Therapy – As required by assigned clinical site

Pathologists’ Assistant – As required by assigned clinical site

Physician Assistant – Between May 13–31 prior to the start of clinical rotations

Physical Therapy – As required by assigned clinical site

Radiologist Assistant – Prior to start of clinical assignment

Radiological Sciences – Required

Social Work – As required by assigned clinical site

Testing Procedure

The university will designate the approved vendor (Certiphi Screening, Inc.) to conduct drug screens; students are responsible for payment of any fees charged by the vendor. All issues will be reported from the vendor(s) directly to the designee for the dean of the appropriate school. Results from vendors other than those designated by the university to conduct drug screens are not accepted. Incoming and current students must contact the designated vendor(s) and comply with instructions in obtaining a drug screen. Be advised that students should not drink coffee or too many fluids prior to their lab visit as these may cause a negative dilute result. As stated above, a negative dilute result is not acceptable; students with a negative dilute result are required to repeat the drug screen at their own expense.

Laboratory testing includes collection of the sample, transport to the laboratory, EMIT analysis, GC/MS confirmation by a SAM HSA-certified laboratory, and a test review by a medical review officer, if required. Students need to plan accordingly so that results are available by the deadline set by each school’s dean or dean’s designate. If results are not available prior to the deadline, the student will risk being dismissed after classes have begun. If results are not available prior to the start of a scheduled clinical experience, the start will be delayed, which may result in forfeiture of the clinical assignment.

Incoming and current students have the right to review the information contained in any drug screen required by the university for accuracy and completeness. A student may request verification of the accuracy of these reports from the designated vendor(s). The designated vendor(s) will advise the student of their rights and assist with verifying the accuracy the report. It is the responsibility of the incoming or current student to ensure that any misinformation in the initial drug screening report is corrected with the vendor and that a written statement with supporting documentation indicating the correction is submitted to the appropriate dean or dean’s designate. The designated vendor(s) are not involved in any decision made by the university.

Drug screening reports and other submitted information are confidential and may only be reviewed by university officials and affiliated clinical or fieldwork facilities with a legitimate educational interest in the material in accordance with the Family Educational Records and Privacy Act (FERPA).

Drug screening reports and other submitted information of incoming and current students are maintained in the designated office in accordance with the university’s record retention schedule for student records. Drug screening reports and other submitted information of applicants denied admission into the program are maintained in accordance with the university’s record retention policy.

Drug and alcohol testing required by the Schools of Nursing, Medicine and Health Sciences are conducted utilizing the following measures:

1. The student must be tested at a facility of the approved vendor.
2. The student must comply with the testing facility’s methods and procedures for collecting samples.
3. A Fourteen Panel Drug Screen is required and screens for the use of the controlled substances listed below.

4. Urine testing is the primary method for drug screening.
5. Serum, hair and saliva analysis or a combination of these may be tested to further validate or clarify urine results.

6. The student will disclose any prescribed and over-the-counter medications, as well as any dietary habits that could modify the testing results.
7. If there is a positive result for a prescribed medication(s), a Certiphi medical review officer (MRO) will contact the student and ask for documentation of the student’s prescription. If the MRO determines that the student provided appropriate documentation, the university will recognize the result as a pass. Quinnipiac will not receive a copy of the documentation.

8. If the clinical site requests that the student send a copy of their drug screen report to that site, the student is responsible for sending their results, and the clinical site has the right to deny the student the clinical assignment on the basis of the results. If the student refuses to send their results to the site, then the clinical assignment will be forfeited, and the program’s policies will apply.

9. As per university policy, Connecticut state law permits the use of medical marijuana, however, in accordance with federal law and as a recipient of federal funding, the university does not permit the possession, use or distribution of marijuana. As such, students in possession of medical marijuana (issued in Connecticut or any other state) are not permitted to use or possess marijuana in any form on university owned or leased property, or at any university-sponsored programs, internships, externships or clinical assignments.

10. If the accuracy of a positive test is disputed by the student, the student may request a retesting of samples by the facility; the cost of which to be borne by the student. Testing done outside the appropriate window of time will not be considered valid.

11. Substance abuse is verified if either: a) the positive test result is not disputed or b) if the student-requested retest is positive.

12. If the test is inconclusive (e.g., a negative dilute urine test result) or a retest is requested by the agency or by the faculty for cause, the student will not be permitted to conduct fieldwork or clinical until a conclusive negative result is received. The student may be allowed to attend classes while a result is pending, upon the approval of the dean’s office.

13. Students with samples yielding a urine dilute result must be re-tested within 5 business days of receiving notification from the dean’s office. The student is required to complete an alternative method other than urine testing if a second urine dilute result is found.

14. The testing facility will make a final report of the test results (positive, negative or inconclusive) to the appropriate dean’s office.

15. A student who is required to and submits to a drug and alcohol screening will be expected to authorize the release of the results to the school, other relevant university offices and clinical agencies, if requested.

**Drug Screening Clearance**

The names and test results of all students will be forwarded to the reviewer designee for the school. A drug screen clearance will be reported to the appropriate program with the date of the test.

**Drug Screening Non-Clearance**

Any student who does not receive drug screen clearance will receive an email notification and certified letter from the dean’s office notifying the student that they have not been cleared.

A student who has failed a drug screen or received a negative dilute result is required to repeat the screening and is not allowed to attend clinical training or fieldwork until cleared. Students must be re-tested within 5 business days of receiving notification from the dean’s office. The student is required to complete an alternative method other than urine testing if a second urine dilute result is found. The student is responsible for payment of any fees charged by the vendor(s) for such testing.

Clinical and/or fieldwork rotations are an essential element in the School of Medicine, School of Nursing and School of Health Sciences. Students who cannot participate in clinical or fieldwork rotations due to a third failed drug screen are unable to fulfill the requirements of the program and will be dismissed.

**Appeal Process**

If the incoming student or current student is denied admission to or continuance in his/her program, the student may appeal that decision to the dean of the school. All requests for appeals must be made in writing by the student within seven (7) business days of the student’s notification by the reviewer designee. It is the student’s responsibility to initiate the appeal process by emailing or sending by post a written request to the dean. Should the appeal be approved, the student will be required to sign the Student Waiver Regarding Drug Screening Results before continuing in the program.

Once a final decision is made regarding the student’s appeal, including removal from clinical, leave of absence, and dismissal from the program, the dean will immediately notify the student by email and by certified letter. The dean’s office will copy all related correspondence to the chair, program directors and clinical coordinator(s) of the respective programs.

The decision of the dean regarding the ability of an incoming student or current student to enter into or continue in a professional program is final and cannot be appealed. Admissions and appropriate program chairs will be notified of the decision.

**Maintenance of Records and Confidentiality**

Information obtained for the purpose of conducting a drug screen or obtained during the drug screen will be retained by the Office of Student Affairs, separate from other student educational and academic records. Confidentiality will be maintained consistent with FERPA guidelines. In the event a clinical site requires a copy of any report, students must either email a copy of their report themselves to the requesting facility or sign a release form for the vendor(s) who will submit the report to the email address of the person authorized to receive it.
FINAL EXAMINATION

Insofar as is practicable, a final examination is regarded as part of the regular work for undergraduate courses. In courses for which a final examination would serve no useful purpose, a term report, essay or personal conference may be substituted; work on the substitute exercise may take place during the final examination period.

Final examinations may be given only during the final examination period at the end of each term. Examination schedules are prepared and distributed by the Registrar. Faculty members may exempt from the final examination students whose work is of high quality. Conditions governing exemptions are determined by the department of the school/college/division concerned. No (final) examination may be held in the week immediately preceding the official examination period. This does not exclude the giving of written lessons, quizzes or papers when such exercises form a regular part, week by week, of the work of the course. Faculty members must provide an opportunity for students to review their examination.

Students are expected to take no more than two final exams in one day.

1. If a student has three regularly scheduled examinations in one day and one of these is a common or department exam, the department exam takes precedence.

2. Second preference is given to an examination scheduled in the 6 p.m. to 10:15 p.m. time block.

3. In the event that a student has three examinations scheduled in one day, it is the responsibility of the instructor scheduled for the latest day examination time (between 8 a.m. and 5:30 p.m.) to provide the make-up examination.

4. In all cases, the common or department examination will take precedence.

If any students require a make-up exam, it is the faculty member’s responsibility to administer it. Arrangements may be made between the faculty and the student, or it may be administered during the make-up exam period.

(The final exam schedule, including the designated make-up period, for each semester is posted on MyQ.)
GRIEVANCE

The Quinnipiac University Grievance Policy is an umbrella policy to cover any type of grievance that is not considered under a separately defined policy. Redress for any grievances covered by the following policies must be pursued according to the procedures specified in those policies.

- Appeal of an academic suspension or academic dismissal (p. 69) from the university
- Appeal of an academic suspension or academic dismissal from an individual degree program (individual program requirements as stated in the University Catalog)
- Appeal of a final grade (p. 122)
- Appeal of an academic integrity (p. 72) sanction
- FERPA complaints (p. 134)
- Appeal of the decision to return after an involuntary medical leave of absence (p. 119)
- Grievance procedure for issues regarding disabilities (p. 91)
- Complaints of inappropriate noise (Undergraduate Student Handbook [http://catalog.qu.edu/handbook-undergrad] and Graduate Student Handbook [http://catalog.qu.edu/handbook-grad])
- Title IX Discrimination and Harassment (Title IX Policy (p. 135))
- Financial aid appeal (financial aid website [https://www.qu.edu/tuition-financial-aid/links.html])

When a student has a complaint not covered by one of the above policies and procedures, he or she is encouraged to discuss the matter first with the parties involved. If the matter cannot be resolved informally at this level, then the student may file a written, formal complaint according to the following procedures.

A student grievance originating in any of the school or administrative units is handled by the chair or director responsible for the unit in which the grievance originates. Therefore, the written formal complaint should be submitted to the responsible chair or director within five business days of the failed attempt at an informal resolution. The chair or director should make a decision regarding the grievance within 10 business days of receiving the written complaint. A written appeal may be submitted within five business days either to the school dean exercising jurisdiction over that academic department or to the vice president/dean of students or designee for nonacademic matters. The dean will inform the student within 10 business days of his or her decision. The dean's decision is the final decision.

Grievance Procedures for Students Enrolled in Distance Education under the State Authorization Reciprocity Agreement (SARA)

Pursuant to federal regulations, students enrolled in distance education (i.e., Quinnipiac's online classes or online programs) who are residents of states (other than Connecticut) that participate in SARA, may file a complaint to the Connecticut Office of Higher Education (OHE) after exhausting their options under Quinnipiac’s grievance procedures. Note that issues regarding student life, such as discipline, grading, etc., fall solely within the purview of the Quinnipiac and are not generally investigated. Additionally, the Office of Higher Education does not investigate anonymous complaints or provide legal advice.

Information about how to file a complaint with the Office of Higher Education is available on this website: ctohe.org/SARA/Default.shtml (https://www.ctohe.org/SARA/Default.shtml)

All correspondence, including institutional applications and student complaints, should be sent via email to ctsara@ctohe.org or via post to the following address:

SARA Coordinator
Office of Higher Education
450 Columbus Boulevard, Suite 510
Hartford, CT 06103-1841

[36x750]116
[67x750]Grievance
HARASSMENT AND DISCRIMINATION

Quinnipiac University values diversity, multiculturalism and respect for others. The university is committed to providing a safe and respectful educational experience and work environment free from discrimination and harassment on the basis of an individual's race, color, religion, gender, age, marital status, national origin, ancestry, physical or mental disability, sexual orientation, gender identity or expression, genetic information or any other characteristic protected by law. This commitment is articulated and confirmed in Quinnipiac University's Strategic Plan for Inclusiveness, Multiculturalism and Globalism in Education (IMaGinE) (https://myq.quinnipiac.edu/imagine/Pages/default.aspx) and the Quinnipiac University Title IX Policy Against Gender-Based Discrimination and Sexual Misconduct (p. 135).

Students who believe they have experienced or witnessed an incident of discrimination or harassment should immediately contact the Dean of Students Office:

- Dean of Students Office (undergraduates and graduate students, with the exception of law and medicine) 203-582-8753
- School of Law, 203-582-3220
- Frank H. Netter MD School of Medicine, 203-582-7968

Faculty and staff members who believe they have experienced or witnessed an incident of discrimination or harassment should immediately contact Human Resources or the chief diversity officer:

- Human Resources, Employee Relations and Labor Relations Associate, 203-582-7768 or 203-582-8724
- Chief Diversity Officer, Department of Cultural and Global Engagement, 203-582-7987

Students, faculty or staff who believe they have experienced or witnessed an incident of gender-based discrimination and/or sexual misconduct should immediately contact:

- University Title IX (p. 135) Coordinator, 203-582-7327

Students, faculty or staff who are found to have violated a harassment and discrimination policy are subject to the appropriate disciplinary process. Any form of retaliation against anyone who has reported harassment or a discriminatory act is strictly prohibited.
INCLEMENT WEATHER

It is Quinnipiac's policy to remain open under adverse weather conditions such as snowstorms, so that the university can meet its responsibilities to all of its students. Occasionally, weather conditions will prompt the university to delay, cancel or postpone classes. There are also times when the university shuts down because of adverse weather conditions.

It is ultimately the responsibility of the individual to determine whether he or she can travel safely to and from the university. Staff members who are concerned for their safety or who have additional personal responsibilities resulting from a weather-related closing can use personal or vacation time when the university remains open. Staff members are required to notify their supervisors if they plan to use personal or vacation time.

Faculty members are expected to teach all classes when the university is open, and students are expected to attend them. If extreme conditions prevent a faculty member from meeting a scheduled class, he or she is asked to use email or Blackboard to communicate with students in a timely manner. Faculty members are also expected to notify their chairs and deans if a class is canceled.

Employees who are deemed essential staff are required to report to work regardless of whether the university is closed.

Information related to cancellation and closing is carried by the following university-affiliated media and resources:

Quinnipiac Weather Phone: 203-582-8989
LEAVES OF ABSENCE

General Policies and Conditions for All Leaves

Leaves of absence are defined as a temporary separation from the university. Leaves of absence cannot be granted retroactively.

At the conclusion of the leave of absence, the student receives automatic readmission to the university. The granting of a leave of absence guarantees readmission to the major in which the student is enrolled when applying for a leave and permits the student to graduate by complying with the degree program requirements in effect when the leave is taken, provided that the courses are still offered. If requirements for graduation are changed after a student is first admitted to Quinnipiac, the student can choose to follow either the former or the new requirements. During the leave of absence, Quinnipiac retains the student’s deposit until completion or withdrawal.

Leaves of absence are not granted for the purpose of allowing a student to study at another university. In general, courses taken at another institution while a student is on a leave of absence will not be transferred in for credit at Quinnipiac.

If a student takes a leave of absence and later is suspended, dismissed, or expelled, and then returns to the university, the student must comply with the terms of the medical leave.

Academic Leaves of Absence

Academic (non-medical) leaves of absence may be arranged for one or two semesters subject to departmental and school approval. Students may request a leave using the university’s electronic Leave of Absence form (http://forms.quinnipiac.edu/LeaveOfAbsence/form.html).

Students who do not return after the specified leave of absence period will be administratively withdrawn and will be required to reapply for admission to return to the university. In such instances there is no guarantee of readmission.

Medical Leaves of Absence

Students who wish to withdraw from the university during an academic term for medical reasons (i.e., physical or mental health conditions that necessitate their absence), may request a medical leave of absence.

The student must provide supporting documentation of the medical condition from his or her treating physician to the director of health and wellness or designee, who will review the documentation with the appropriate university staff and with the university’s consulting medical professional, if warranted. A medical leave of absence may be granted for one or two semesters. Students may request a leave using the university’s electronic Leave of Absence form (http://forms.quinnipiac.edu/LeaveOfAbsence/form.html).

Students who do not return after the specified leave of absence period will be administratively withdrawn and will be required to reapply for admission to return to the university. In such instances there is no guarantee of readmission.

Upon conclusion of the medical leave, the student must provide supporting documentation from his or her treating physician to the director of health and wellness or designee that confirms the student is fit to return. This documentation will be shared with the appropriate university staff, including the university’s consulting medical professional, if warranted. The student will be advised of the outcome of this review and whether he or she is cleared to return, with or without a reasonable accommodation.

Involuntary Medical Leaves of Absence

The university may place a student on an involuntary medical leave of absence in situations where it determines, after conducting an individualized and case-by-case assessment, that there is a significant risk that the student will harm himself/herself or another, and that the risk cannot be eliminated or reduced to an acceptable level through reasonable accommodations. The director of health and wellness will make this decision, and the director or the director’s designee will promptly notify the student’s parents, legal guardians or emergency contact accordingly. The director or the director’s designee also will make arrangements to remove the student immediately from the university.

Once the leave begins, in the interim, pending an evaluation by a university consulting medical professional, the director of health and wellness and the Office of Student Accessibility or their designees will conduct an individualized assessment and case-by-case determination as to whether and what reasonable accommodation(s) can be made to allow the student to participate in the educational programs at the university and to continue to attend his or her classes while seeking treatment. The student must undergo an evaluation with one of the university’s consulting medical professionals, which will be arranged and paid for by the university. The student must release all relevant medical information from his or her treating physician to the university’s consulting medical professional prior to the evaluation. The results of the evaluation will be reviewed by the director of health and wellness or designee, and a decision will be made whether the student may return to the university immediately, with or without a reasonable accommodation, or whether the leave will be extended. If the leave is extended, the director of health and wellness and the Office of Student Accessibility or their designees will conduct an individualized assessment and case-by-case determination as to whether and what reasonable accommodations can be made to allow the student to participate in the educational programs at the university and to continue to attend his/her classes while continuing to seek treatment.

In the event the leave is extended, the student must undergo a second medical evaluation shortly before the expiration of the extended leave with the university’s consulting medical professional, at the student’s expense, before returning to the university. The student must release all relevant medical information from his or her treating physician to the university’s consulting medical professional prior to the evaluation. The results of the evaluation will be reviewed by the director of health and wellness or designee, and a decision will be made whether the student may return to the university immediately, with or without a reasonable accommodation, or whether the leave will be extended. If the leave is extended, the director of health and wellness and the Office of Student Accessibility or their designees will conduct an individualized assessment and case-by-case determination as to whether and what reasonable accommodation(s) can be made to allow the student to participate in the educational programs at the university and to continue
to attend his/her classes while continuing to seek treatment. If the student is permitted to return, the director of health and wellness and the Office of Student Accessibility or their designees will conduct an individualized assessment and case-by-case determination as to whether and what reasonable accommodation(s) can be made to allow the student to participate in the educational programs at the university upon his or her return.

A student who has been placed on involuntary medical leave of absence is subject to the same policies as a student granted a voluntary leave of absence regarding financial aid and financial obligations as stated in the university’s refund policy.

Appeals
Students may appeal the decision to require an involuntary medical leave of absence or to return from one. The appeal must be submitted in writing to the vice president and dean of students. All information submitted, including the results of the evaluations, become part of the student’s health record and will be considered confidential.

Military Leaves
Students in the military reserves who are enrolled when they are called to active duty, can choose one of the following options:

1. The student may withdraw from courses with a full tuition refund or tuition credit, in accordance with institutional and federal government guidelines.

2. If a student has completed at least 50 percent of the course work and upon recommendation of the student’s dean, the student may elect to take “incompletes” and make special arrangement for course completion with individual instructors.

Students needing to take a military leave should contact the director of veteran and military affairs at 203-582-8867.

Students are eligible to return within one year following active duty. However, the degree requirements may have changed, and they may be required to comply with degree program requirements in effect at the time of their return to the university.
PREGNANT AND PARENTING STUDENTS

Excused Absences
Absences due to pregnancy or childbirth must be excused for as long as is deemed medically necessary by the student's doctor. Students may make up work they missed while out due to pregnancy or any related conditions, including recovery from childbirth. If a professor awards "points" for class attendance, students must be given the opportunity to earn back the credit from classes missed because of pregnancy. Students need to request any adjustments. A school cannot provide any service, modification or reasonable adjustment when it does not know that one is required. It is the student's responsibility to make her needs known in advance. Title IX (p. 135) prohibits schools from assuming that pregnant students cannot attend school or participate in school activities. Students must apply for pregnancy adjustments in a timely manner. The university cannot go back in time to make adjustments. Students should communicate with their professors and the Title IX coordinator (catlin.wells@qu.edu).

Class Attendance and Participation in Activities
Pregnant and/or parenting students may not be prevented from attending class on the basis of pregnancy. Pregnant or parenting students must be allowed to continue participating in activities and programs outside of class such as sporting, extracurricular activities, labs and career rotations.

Any pregnant students, or students planning to become pregnant, should consult their health care provider to determine what, if any, additional precautions are needed based on their individual situation. It is the responsibility of students to communicate their needs to the Title IX coordinator (catlin.wells@qu.edu) as soon as possible for risk-reduction to begin when it can be most effective, and to determine if additional modifications are necessary. While the university cannot mandate that the student notify it that she is pregnant or is planning to become pregnant, the university strongly recommends that students do provide notification so appropriate steps can be taken to ensure the health of both parent and child.

Scholarships
Schools cannot terminate or reduce athletic, merit or need-based scholarships because of pregnancy.

Parenting Students
Pregnant and parenting students are often discussed as a single group under Title IX (p. 135) of the Education Act of 1972. While Title IX (p. 135) does not legally mandate that parents be excused for taking their children to medical appointments or caring for a sick child, documentation may be provided to the Title IX coordinator (catlin.wells@qu.edu) when seeking information regarding any options for parenting students to make up work and not fall behind.

Quinnipiac University is committed to creating an accessible and inclusive environment for pregnant and parenting students. The U.S. Education Department's Office for Civil Rights addressed guidelines, strategies and best practices in the June 2013 Dear Colleague Letter.
PROCEDURE TO APPEAL A FINAL GRADE

Approved by the Faculty Senate in Spring 2019

This procedure is predicated on the assumption that instructors are always the most appropriate judges of how students perform academically. Therefore, this appeal process applies only in cases in which a student believes her/his final course grade was determined in an arbitrary, capricious or prejudicial manner. Only final course grades may be appealed. Failure of—or dissatisfaction with—a course, are not sufficient grounds to appeal a final grade.

In such a situation, the student must first try to resolve the matter with the instructor who assigned the grade. Students may not contact clinical preceptors/instructors, fieldwork supervisors, or internship supervisors to discuss or appeal a final grade. If a student in clinical/fieldwork course has questions regarding to whom the grade appeal should be submitted, the student should contact the program director.

To initiate a grade appeal, the student must submit a completed written grade appeal request form (available at the Registrar’s Office MyQ page [https://myq.quinnipiac.edu/Campus%20Offices/Registrar/Pages/default.aspx]) to the course instructor within the fifth business day after date when final grades are due (see Academic Calendar in the Catalog to confirm the date). This written grade appeal request must include a description of why the student believes her/his final grade was determined in an arbitrary, capricious or prejudicial manner, and all relevant evidence (e.g., course syllabus, exams, projects, etc.). The department chairperson should be copied on the initial written request to the instructor, so that he or she can follow up if necessary. The instructor will provide the student with a written decision within five business days.

If the matter is not resolved to the student’s satisfaction, the student may submit his/her written grade appeal request form to the chair of the department offering the course (or his/her designee) within two business days of receiving the faculty member’s decision. The chairperson then has five business days in which to consult with the student and instructor, seek to mediate a mutually agreeable solution, and provide the student with a written decision. If the matter is not resolved to the student’s satisfaction, within two business days, the student may submit to the associate dean of the school/college offering the course (or his/her designee) a written request for the formation of an appeal committee. This written request must be accompanied by a copy of the student’s grade appeal request form, the instructor’s written response and the chair’s written decision.

Within five business days of receiving the written request, the associate dean (or his/her designee) will appoint a three-member faculty committee composed of two individuals from within the department offering the course and a full-time faculty member of the student’s choosing. The student must secure the participation of the outside full-time faculty member and provide the associate dean with written confirmation of the faculty’s willingness to participate on the grade appeal committee. As this grade appeal procedure does not apply to the School of Law, law faculty may not serve on a grade appeal committee.

In the absence of a student preference, the associate dean will appoint the third faculty member from another department or another program within the college or school. If the associate dean is unable to appoint two faculty members from within the department, he/she will appoint two or more faculty members from outside the department. The faculty member assigning the grade and the chairperson may not participate in this decision process. The associate dean will provide the appeal committee with copies of the student’s written grade appeal request, along with the instructor’s and chair’s written responses.

Within five business days, the appeal committee will consult with the student and instructor, review the evidence, and forward to the associate dean a written final determination of whether the committee affirms the final grade in the course or requires its recalculation by the course instruction, with chairperson oversight. This determination will be based on whether there is evidence that the final grade was determined in an arbitrary, capricious or prejudicial manner. After the instructor submits to the chairperson the recalculated grade, the chairperson will document the nature and date of any changes and forward the documentation to the associate dean. The associate dean will notify the student, instructor, and chairperson of the final resolution and if applicable, notify the registrar’s office of the recalculated grade.

If the grade appeal process results in a recalculated grade, and the recalculated grade removes an academic deficiency that was preventing the student from progressing in his/her program or to the next sequential course, the student may continue to progress in the program/to the next course. Recalculated grades may not be appealed.

Special Circumstances:
If the chairperson is the instructor who assigned the grade, the student will contact the associate dean after failing to resolve the matter with the faculty member. If the associate dean is the instructor who assigned the grade, the student will contact the chairperson after failing to resolve the matter with the instructor. If the chairperson is unable to mediate a mutually agreeable resolution, within two business days of receiving the chairperson’s response the student may submit to the dean of the school/college offering the course (or his/her designee) a written request for the formation of an appeal committee, as described above.

If the instructor who assigned the final grade is unavailable because he/she is no longer a Quinnipiac University employee, the above process begins with the chairperson.

If a student does not receive a final course grade by the date grades are due, but on a later date, the student may submit a completed written grade appeal request form to the course instructor, with a copy to the department chairperson, within the fifth business day after the date on which the grade is posted or the hold on the student’s record is cleared.

The deadlines and timeframes for courses that do not follow the standard Academic Calendar may vary and be determined on a case-by-case basis.

The grade appeal process for the First-Year Writing (FYW) program follows a different procedure that allows for a re-evaluation of a student’s portfolio of writing; please contact the coordinator directly for additional information. If the FYW appeal does not resolve the issue, the student
then has the option to proceed with the above Procedure to Appeal a Final Grade, beginning with the College of Arts and Sciences associate dean.
Repeat of Courses with Grade of F, D or C-

A student who fails a required course must repeat that course. When the student earns a passing grade for the failed course, that grade and those credits are calculated in the student’s cumulative average. The student’s transcript will continue to display the failed course as part of the student’s complete academic record. A student who fails an elective course may repeat that course to earn a passing grade. The passing grade and credits become part of the student’s cumulative GPA; the record of the failing grade remains on the transcript.

Though the D grade normally is a passing grade, it is the prerogative of each department to set higher grade requirements in certain major courses. When such departmental requirements exist, students are so informed by their respective departments.

Courses with C- or D grades may be repeated only if the course is a foundation for further study or meets a specific graduation requirement. If a C- or D grade is repeated, no credits are added, but the most recent grade in the course applies.
SPEAKER POLICY

(October 18, 2018)

Purpose of this Policy
The purpose of this policy is to protect opportunities for the full and free expression and exchange of ideas while ensuring the safety of the campus community.

Speaker Policy
Quinnipiac University seeks to foster a powerful learning environment where faculty are encouraged and supported to teach and research the most innovative ideas, and students are encouraged to engage in intense dialog and debate. This learning environment is enhanced by a diverse community comprising individuals from varied backgrounds, and with a multitude of viewpoints that may be controversial, uncomfortable to hear, or foreign to listeners’ experiences. As part of our educational mission, it is the role of the University to bring such speakers into the learning environment so that the community hears, is challenged by, and challenges a broad range of ideas from a diverse set of speakers. Critical to achieving these aims is the expectation that all members of the university community will conduct themselves with truthfulness, openness to new ideas, and consideration for the individual rights of others, including the right to hold, hear, consider or condemn opinions different from one’s own views, or life experiences.

An invitation to speak at Quinnipiac does not include any license for unlawful activity, or for any activity that endangers or threatens to endanger the safety of members of the community or the campus physical facilities, or for any activity that disrupts or obstructs the functions of the university or threatens such disruption or obstruction. In the event that an invited speaker’s presence raises concerns that his or her appearance might endanger personal safety or result in damage to facilities, a committee with representation from Academic Affairs, Student Affairs, the Faculty Senate, Public Safety and Facilities will be convened to make an assessment and advise the Cabinet. The Cabinet has final authority on invited speakers.

Nothing in this policy restricts the existing rights of Quinnipiac faculty, staff and students to fully express their ideas and opinions in accordance with university policy. However, each is expected to adhere to high standards of civility and respect in so doing.

Scope of this Policy
This policy pertains specifically to non-university speakers invited by Quinnipiac faculty, staff or student groups to non-class events on campus.

Student groups must consult with the dean of students, or designee, concerning the qualifications and appropriateness of the proposed speaker.

Use of the university’s facilities in no way implies endorsement by the university of the views and opinions of speakers or event organizers.

Political activities on campus must be “permitted activities” as defined by the American Council on Education’s guidelines regarding “Political Campaign-Related Activities of and at Colleges and Universities (https://www.acenet.edu/news-room/Pages/Political-Campaign-Related-Activities-of-and-at-Colleges-and-Universities.aspx).” To ensure that they are “permitted activities,” political activities must be referred in advance to the appropriate office. The appropriate office will respond within one week.

- Faculty: Office of the Executive Vice President and Provost
- Staff: Office of Public Affairs
- Students: Office of the Dean of Students

Other applicable policies include the university’s Event Management Rules and Regulations (https://myq.quinnipiac.edu/Campus%20Offices/Public%20Affairs/Special%20Events%20Office/Pages/EventManagementRulesandRegulations.aspx).
STUDENT EXPOSURE CONTROL PLAN

Approved policy for Quinnipiac University students who incur an accidental exposure to human blood (or other potentially infectious materials), or who may be exposed to airborne pathogens (e.g., the tuberculosis bacterium) while participating in a course/university-related activity (e.g., a laboratory, clinical training, athletics, etc.).

Please reference the Student Incident Policy (accident and injury) (p. 130)

Please reference the Student Incident Report Form (to be completed by student) (http://forms.quinnipiac.edu/IncidentReportForm/form.html)

Background Information:
The university recognizes that some students, in their coursework, clinical practicums or other university-related activities, may accidentally be exposed to another person’s blood/body fluid (including airborne droplets) through various activities such as an athletic injury, a needle puncture wound, a surgical accident, or caring for a patient who has tuberculosis. Exposure to human blood and certain body fluids (semen, vaginal secretions, cerebrospinal fluid, any body fluid containing visible blood and unfixed tissues) may put these students at risk of contracting a bloodborne pathogen. The major bloodborne pathogens are: hepatitis B virus (HBV), hepatitis C virus (HCV) and the human immunodeficiency virus (HIV). Exposure to airborne droplets from a patient with tuberculosis (coughing, sneezing) puts the students at risk of contracting tuberculosis. Students who have exposure to the droplets of patients with pertussis and meningococcal meningitis are also at risk for disease transmission. Students who are at greatest risk of these types of exposures (primarily, but not exclusively, health science students) must be educated about how to minimize or eliminate the likelihood of exposure to these potentially infectious fluids before they participate in these activities. Additionally, they must be informed as to how to proceed if they incur an exposure, either on or off campus, while participating in a course/university-related activity.

Currently, health science students who have a risk of exposure either on or off campus at clinical training sites are trained according to the Occupational Safety and Health Administrations (OSHA) Bloodborne Pathogen Standard, which was developed in an attempt to minimize or eliminate employee risk of exposure to human blood/body fluids during the course of their work. This training includes discussion of the Centers for Disease Control (CDC) Universal Precautions document regarding infection control and information on the hepatitis B vaccine. This training is done either on campus by a faculty member, or at the student’s clinical facility as part of an orientation presentation.

Bloodborne Pathogens:
This following outlines a protocol to be followed by students regardless of location, if they incur an accidental exposure to human blood/body fluids while engaged in coursework or some other university-related activity. Exposure in this case means that another person’s blood/body fluid has come into direct contact with some part of the student’s body. This other person is referred to as the source individual. All bloodborne pathogen exposure incidents should be evaluated immediately since risk of post-exposure infection is dependent upon many factors and that treatment, if indicated, must be started as soon as possible in order to be maximally effective.

Bloodborne pathogens include, but are not limited to Hepatitis B; Hepatitis C; Non A, Non B Hepatitis; Human Immunodeficiency Virus; Syphilis; and Malaria. These pathogens may be transmitted in blood or other potentially infectious materials, including cerebrospinal fluid, synovial fluid, pleural fluid, amniotic fluid, pericardial fluid, peritoneal fluid, semen, vaginal secretions, any body fluid contaminated with blood (saliva in dental procedures), and, in emergency situations, body fluids that cannot be recognized. Unfixed tissue or body organs other than intact skin and blood, organs and tissue from experimental animals infected with HIV or HBV are also considered potentially infectious materials.

Facts about HIV Exposure:
• The average risk for HIV infection from all types of reported percutaneous exposures to HIV-infected blood is 0.3%. Risk is increased for exposures involving:
  • A deep injury to the health care worker
  • Visible blood on the device causing injury
  • A device previously placed in the source patient’s vein or artery (e.g., needle used for phlebotomy)
  • Proven or presumed high viral load as demonstrated through testing of the source patient or in case of source patient death from AIDS complications within 60 days post exposure
• Identification of these risk factors in the case-controlled study suggests that the risk for HIV infection exceeds 0.3% for percutaneous exposures involving a large blood volume and/or higher HIV titer in blood. The risks after mucous membrane exposure on average is approximately 0.1% and on skin exposure less than 0.1% probably also dependent on the volume of blood and titer of HIV.
• Although information about the potency and toxicity of antiretroviral drugs is available from studies of HIV-infected patients, it is uncertain to what extent this information can be applied to uninfected persons receiving post-exposure prophylaxis (PEP).

Facts about Hepatitis B Exposure:
For a needle stick exposure involving hepatitis B, the risk is considerably higher (i.e., 1 in 3 or ~33%) than for HIV. The risk is likely much lower in superficial or trivial needle stick injuries, and in skin/mucous membrane exposures, depending on specific circumstances. It is negligible in individuals who have completed a course of hepatitis B vaccine with confirmatory titers.

Facts about Hepatitis C Exposure:
The average incidence of anti-HCV seroconversion after accidental needle stick injury from an HCV-positive source is about 2%.

Protocol to follow if exposed to human blood or other potentially infectious body fluids

AN EXPOSURE INCIDENT REQUIRES IMMEDIATE ACTION!
1. Exposure Incidents – The following events are considered an exposure:
   • percutaneous injury involving a potentially contaminated needle or other sharp instrument
   • splash of blood or other potentially infectious materials to the eyes, mouth or mucous membranes
• blood or other potentially infectious materials contacting broken skin
• human bites that cause a break in the skin

2. Steps to take in the event of an exposure or needle stick:
• Do not panic! It is not helpful. Clear thinking and immediate action are the best course of action.
• Wash the exposure area immediately for at least two minutes if possible. If it’s a skin wound, wash well with water and disinfectant soap. Irrigate eyes with saline if available, otherwise use water. If it’s a mouth exposure, wash mouth out well with water.
• Students should immediately report the incident to whomever is precepting or supervising them (including but not limited to their Quinnipiac University clinical coordinator).
• Before starting rotations, students should ask their preceptor for a copy of their site’s exposure control plan if they are at a distant location such as out of state.

3. Attempt to obtain the HIV/HBV/HCV status of the source individual. If the exposure is judged to be “high risk,” prophylactic anti-viral therapy may be started immediately in order to be maximally effective.

4. Post-exposure risk evaluation and potential treatment: The CDC now recommends that an individual with a significant exposure to blood or other potentially infectious body fluids of another individual should be seen and evaluated within three hours (or otherwise as soon as possible) of the exposure. An exposure incident is to be treated as a medical emergency.

Assessing risk after an exposure incident
Assessing post-exposure risk is often very difficult to clearly evaluate. The student should try to provide, to the best of his/her ability, the following information about circumstances surrounding the exposure incident:

1. The specific procedure involved (phlebotomy, surgery, etc.)
2. Specific equipment involved (needle type/gauge, scalpel, pipet, etc.)
3. Body surface exposed (skin, eyes, nose, mouth, percutaneous wound depth)
4. Type of fluid exposed to (whole blood, serum/plasma, viral culture, semen, etc.)
5. Personal protective equipment employed (gloves, gown, mask, etc.)

Evaluation of the student’s risk of infection may include drawing the student’s blood for baseline testing for HIV, HBV, HCV, complete blood count, and blood chemistry screening, including liver function tests. Treatment, if indicated, may include initiation of prophylactic anti-viral therapy. The cost of this medication should be submitted as a claim to the student’s health insurance policy. Claims not covered by the student’s health insurance will be covered by Excess Student Accident Insurance.

In general, a “high risk” exposure incident is one based on both transferral of a relatively large volume of infected patient blood (e.g., a deep needle stick injury with a large bore needle) and blood containing a high concentration of viral particles (e.g., early acute retroviral illness or end-stage AIDS). “Increased risk” means exposure to either one of the above. “Low risk” generally means exposure with minimal penetration (e.g., superficial skin injury, solid suture needle injury), low viral concentration fluids (e.g., saliva, urine), or exposure on fully intact skin.

Where to go if you have been exposed
Exposures at a site WITH on-site capability for initial care:
Students who are exposed at a clinical site with on-site capability for providing appropriate care for bloodborne exposure, such as an emergency department, will follow the clinical site protocol and seek immediate initial evaluation and treatment at the clinical site.

Exposures at a site WITHOUT on-site capability for initial care:
If the clinical site is without on-site capability for providing appropriate care for bloodborne or airborne exposure, then the student should be seen at:

MidState Medical Center MediQuick Urgent Care
61 Pomeroy Ave.
Meriden, Connecticut
203-694-5350
(Open 8 a.m. to 7 p.m. seven days a week.)

• It is advised to call ahead to let MediQuick know the student is coming (203-694-5350). Inform them about the accident so that they can expedite getting the student seen as soon as possible.
• If MediQuick is not open, then the student should be seen at a nearby hospital-affiliated urgent care center or hospital emergency department. The preferred site in the Hamden area is: MidState Medical Center Emergency Department in Meriden, Connecticut.
• If the student is out-of-state, he/she should be seen at a nearby hospital-affiliated urgent care center or hospital emergency department.

Post-exposure follow-up care with Infectious Disease Office
Follow-up care, if needed for the exposure, should be arranged with:

MidState Medical Center Infectious Disease Office
61 Pomeroy Ave.
Meriden, Connecticut
203-694-5444
(Note: The Infectious Disease Office is not the same office as MediQuick but they are in the same office building).

If the student is out-of-state, any needed exposure follow up should be arranged at a hospital-affiliated urgent care center, employee health or hospital emergency department.

The student is responsible for using his/her own health insurance or the university-purchased accident only policy through Gallagher Insurance Company to pay for any medical visits associated with their occupational exposure.

Payment of services for an exposure incident
The student is responsible for using his/her own health insurance to pay for any medical visits associated with their occupational exposure. The students are also covered by an “accident only” student insurance.
program that has been coordinated through the university with the Gallagher Insurance company and information can be obtained via the Gallagher website (https://www.gallagherstudent.com/students/student-home.php?idField=1113) under My Student Health. See appendix 2 of the Student Incident Policy (p. 131).

Documentation of an exposure incident

All student incidents, on or off campus, must be fully documented by filing a detailed Student Incident Report Form. Students who need assistance in completing the form should contact their program/department chair or a nurse from Student Health Services.

The report will be electronically routed to the director of the Quinnipiac University Student Health Services (FAX: 203-582-8924, TEL: 203-582-8742). The student is responsible for notifying his/her program director/department chairperson within FIVE (5) days of the incident. The student should then follow up with QU Student Health Services.

If on a clinical, the student will also likely be required to fill out an incident report form at the clinical affiliate site for their records. It is very important that the forms are filled out thoroughly and completely in order to aid in post-exposure evaluation and follow-up, and to protect the student’s legal rights in the future if necessary. The student should obtain copies of any and all post-incident evaluation/testing/treatment documents as follow-up will most likely occur at:

MidState Medical Center Infectious Disease Office
61 Pomeroy Ave.
Meriden, Connecticut
203-694-5444

All information related to an exposure incident will be kept confidential in the student’s medical records file at Student Health Services at the university.

Types of Exposure

Tuberculosis (TB) Exposure

The tuberculosis bacterium is spread from person-to-person through inhalation of small droplets produced during the coughing and sneezing of an infected individual. Close contact with a person with untreated or undiagnosed pulmonary TB places healthy people at risk of acquiring the infection. Tuberculosis is treated with antibiotics.

If a student is exposed to TB during course-related activities, he/she should inform the instructor/clinical coordinator/supervisor as soon as possible. The student should fill out a Student Incident Report Form. The form will be electronically forwarded to the appropriate faculty and staff.

The student should follow up with QU Student Health Services for evaluation. Students are advised to call the QU Student Health Services first. In the event that Student Health Services is not available, such as when school is not in-session, the student is directed to contact:

MidState Medical Center Infectious Disease Office
61 Pomeroy Ave.
Meriden, Connecticut
203-694-5444

If the student is engaged in coursework out of state, the student should check with their preceptor/faculty, and follow the protocols that are established at the facility. In the case where students are not under set protocols or policy, or there is any concern, the student should be evaluated at a nearby hospital-affiliated occupational medicine, urgent care center or primary care center. For students who are out of state, it is important to release, obtain and bring records and results of care and testing with them for follow up at QU Student Health Services upon their return to campus.

Post-exposure evaluation/treatment of an exposure incident may include the following:

1. Evaluation of student’s risk given the exposure situation
2. Tuberculin test at time of exposure and 12 weeks post-exposure
   a. Either the Tuberculin Skin Testing (TST; aka PPD) or the IGRA test are acceptable, but the same type of test must be used for both the baseline and the 12-week follow up.
   b. For students who have had a reaction to the TST/PPD or had the BCG vaccine, the IGRA test is a safe method to determine baseline and 12-week follow up.
3. After the initial and 12-week post exposure evaluation, the decision for specific treatment and follow-up will be made on a case-by-case basis by a qualified health care provider with the students’ consent. Further testing and treatment may include:
   a. A chest X-ray (as indicated)
   b. Prophylactic therapy (as indicated)

Pertussis

Pertussis is a bacterium that is spread from person to person through the inhalation of contaminated droplets from an infected person. Pertussis is a vaccine preventable disease for children who are current on their vaccinations. However, pertussis immunity is not carried through to adulthood, and a booster is required for immunity. The CDC currently recommends any adult who has not had a tetanus diphtheria and pertussis (Tdap) vaccination as an adult to receive at least one dose. Note most adults who have had a tetanus diphtheria booster have NOT received the one with pertussis.

If a student has been exposed to a laboratory-confirmed, documented case of pertussis during course-related activities, he/she should inform the instructor/clinical coordinator/supervisor as soon as possible. The student will then be directed to have a medical evaluation. The student should fill out a Student Incident Report Form (http://forms.quinnipiac.edu/IncidentReportForm/form.html) (available online), which will be electronically routed to QU Student Health Services and the department chairperson/program director.

Within the next 2 business days, the student should follow up with QU Student Health Services for evaluation and prophylaxis if needed. Students are advised to call the QU Student Health Services first. In the event that Student Health Services is not available, such as when school is not in session, the student is directed to contact the Infectious Disease Office at MidState Medical Center (203-694-5444) 61 Pomeroy Ave., Meriden, Connecticut.

If on rotation out of state, the student should check with their preceptor, and follow their protocols. In the case where students are not under the policy, or there is any concern, the student should be evaluated at a nearby hospital-affiliated occupational medicine, urgent care center or primary care center.

Restrictions from clinical duties may occur: the CDC guidelines recommend exclusion from duty for 5 days after initiating prophylaxis/treatment on any symptomatic health care worker after exposure. No restrictions for asymptomatic persons. Treatment may include prophylaxis with, erythromycin, azithromycin, or bactrim (TMP/
SMX) for 14 days. This will be addressed at the time of the evaluation; humans are not contagious immediately after an exposure.

Meningococcal Meningitis

Students in rotations may come in contact with patients infected with neisseria meningitidis, a common causative agent of one of the deadliest forms of meningitis. Although transmission from a patient to a health care worker is rare, unprotected contact with respiratory secretions can lead to infection. Because of the significant morbidity and mortality associated with the disease, students and health care workers with a known exposure are treated with prophylaxis. If a student has been exposed to a laboratory-confirmed, documented case of meningococcal meningitis during course-related activities, he/she should inform the instructor/clinical coordinator/supervisor as soon as possible.

The student should be directed to have a medical evaluation. The student should start by contacting QU Student Health Services, at 203-582-8742, to arrange for prompt evaluation. In the event that Student Health Services is not going to be available for more than 48 hours, the student is directed to be evaluated at:

- MidState Medical Center MediQuick Urgent Care
  61 Pomeroy Ave.
  Meriden, Connecticut
  203-694-5350

or

- MidState Medical Center Infectious Disease Office
  61 Pomeroy Ave.
  Meriden, Connecticut
  203-694-5444

If out of state or at a distant location, the student should check with his/her preceptor and go to the local emergency room/urgent care center for initial evaluation and determination if prophylactic antibiotics are required.

The student should then follow up with QU Student Health Services. The student should fill out a Student Incident Report Form, which will be electronically routed to QU Student Health Services and the department chairperson/program director.

Restrictions from clinical duties may occur; the CDC guidelines recommend exclusion from duty from clinical duties until 24 hours after starting prophylaxis for asymptomatic persons. Treatment may include prophylaxis with, rifampin, ciprofloxin or ceftriaxone. This will be discussed at the time of evaluation. The student is not contagious immediately after exposure.

Prevention

It is our aim to prevent as many exposure incidents as possible by educating students properly and by reminding them to always remain aware of the risks as they perform their duties.

The following are guidelines for preventing student exposure incidents:

3. **Pay careful attention** to instructors and learn/practice good technique for phlebotomy, handling and disposal of needles and sharp instruments, surgical procedures, etc.

4. **Adhere to the principle of Universal Precautions**, which states that anyone's blood/OPIMs may be potentially infectious and therefore everyone's blood and body fluids must be treated accordingly.

5. **Use personal protective equipment** (e.g., gloves, gowns, face mask) as required to protect yourself.

6. **Wash hands frequently** with antimicrobial soap under running water.

7. **Keep hands/fingers** away from face and eyes.

8. **Think about what you are doing.** Most exposure incidents are due to carelessness!

Appendices (p. 131)

STUDENT INCIDENT POLICY (ACCIDENT AND INJURY)

policy reviewed April 1, 2019 by the University Wide Safety Committee and the Clinical Education Compliance Committee.

Approved policy for Quinnipiac University students who are involved in an accident or suffer an injury while participating in a course/university related activity both on or off-site (e.g., a laboratory, clinical training, athletics, etc.).

Please reference the Student Incident Report Form (to be completed by student). (http://forms.quinnipiac.edu/IncidentReportForm/form.html)

Please reference the Student Control Exposure Control Plan for Bloodborne and Airborne Pathogens. (p. 126)

Please reference Appendix 4 (p. 131) for instructions on how to file a claim.

Background information

The university recognizes that some students, in their coursework, clinical practicums, or other university-related activities, may suffer an unforeseen accident. All students must be educated about how to minimize or eliminate the likelihood of an accident before they participate in these activities. Additionally, they must be informed as to how to proceed if they are involved in an accident, either on or off campus, while participating in a course/university-related activity.

If a student is involved in any unusual occurrence such as a fall or other mechanical injury, an allergic reaction, an accident in the lab, an exposure to airborne or bloodborne pathogens, an emergency transport, or a clinical event (e.g., medication error, etc.), either on campus, off campus at a university-related activity or at a clinical site, a Student Incident Report Form (http://forms.quinnipiac.edu/IncidentReportForm/form.html) needs to be completed.

It is to be completed and digitally approved by the student (when appropriate) and will be electronically routed to a supervising faculty/staff member and QU Student Health Services. In addition, if the student is on a clinical rotation, the clinical coordinator (as well as program director and affiliate site preceptor) should be notified about the incident within 24 hours. If a student suspects that they will need outside medical treatment as a result of this occurrence, they are encouraged to complete a Student Incident (http://forms.quinnipiac.edu/IncidentReportForm/BMIForm.pdf) Report (http://forms.quinnipiac.edu/IncidentReportForm/BMIForm.pdf) Form (http://forms.quinnipiac.edu/IncidentReportForm/BMIForm.pdf) as soon as possible.

QU students are expected to continue in their academic and clinical endeavors after an incident or exposure. If a health care provider deems the student unfit for work or if a student is required to be on limited light duty/responsibilities, then the student must make every effort to obtain a written note by the health care provider to be documented with Student Health Services and the program director/administrator. Once medically cleared by a health care provider, the student is expected to return to academic and clinical duties immediately. In regard to a bloodborne pathogen exposure, a quarantine may be needed for the safety of the student and/or public. Also, in the event of contracting a bloodborne pathogen infection, they are to refer to their specific department for bloodborne pathogen infections protocols if applicable (refer to student program handbook).

An Injury Requires Immediate Action!

Instructions: Students shall use the Student Incident Report Form (http://forms.quinnipiac.edu/IncidentReportForm/form.html) to report all injuries – no matter how minor. This helps faculty and staff to identify and correct hazards before they cause serious injuries. This form shall be completed by students as soon as possible and electronically forwarded to the staff member, instructor, clinical coordinator, program director or preceptor for further action.

Assessing Risk After an Injury

Assessing risk is often very difficult to clearly evaluate. The student should try to provide, to the best of his/her ability, the following information about circumstances surrounding the exposure incident:

• Location of incident
• Names of witnesses (if any)
• Why did the unsafe condition(s) exist?
• Why did the unsafe acts occur?
• Were the unsafe acts or conditions reported prior to the incident?
• Have there been similar incidents or near misses prior to this one?
• What changes do you suggest to prevent this incident/near miss from happening again?

Where to go if an injury occurred

An incident at a location WITH on-site capability for initial care

Students who experience an injury at a location with on-site capability for providing appropriate care, such as an emergency department, will follow the site’s protocol and seek immediate initial evaluation and treatment at the site.

An incident at a location WITHOUT on-site capability for initial care

If the site is without on-site capability for providing appropriate care for the injury, then the student should be seen at:

MidState Medical Center’s MediQuick
61 Pomeroy Ave., Meriden, Connecticut
203-694-5350
(Open 8 a.m. to 7 p.m. seven days/week)

• It is advised to call ahead to let MediQuick know the student is coming (203-694-5350). Inform them about the accident so that they can expedite getting the student seen as soon as possible.
• If MediQuick is not open, then the student should be seen at a nearby hospital-affiliated urgent care center or hospital emergency department. The preferred site in the Hamden area is MidState Medical Center Emergency Department. Meriden, Connecticut.
  • If the student is out-of-state, they should be seen at a nearby hospital-affiliated urgent care center or hospital emergency department.
  • If the student is out-of-state, any needed follow up care should be arranged at a hospital-affiliated urgent care center, employee health or hospital emergency department.

The student is responsible for using their own health insurance or the university purchased accident only policy through Gallagher Special Risk to pay for any medical visits associated with their occupational incident.
Students can instruct MidState to directly bill Gallagher once their health insurance has adjudicated a claim.

Payment of Services for Incident
The student is responsible for using their own health insurance to pay for any medical visits associated with their injury. Students also are covered by an "accident only" student insurance program that has been coordinated through the university with the Gallagher Special Risk. See Appendix 2 (p. 131).

Documentation of an Incident
All student incidents, whether on or off campus, must be fully documented by filing a detailed Student Incident Report Form (http://forms.quinnipiac.edu/IncidentReportForm/form.html). If assistance is needed in filling it out, a staff member, a faculty member in the program/department or a nurse from Student Health Services can assist.

The report will be electronically routed to the director of the Quinnipiac University Student Health Services (FAX: 203-582-8924, TEL: 203-582-8742) and the faculty/staff selected on the form. The student is responsible for notifying his/her staff member, program director/department chairperson within FIVE (5) days of the incident. The student should then follow up with QU Student Health Services.

If on a clinical, the student will also likely be required to fill out a site-specific incident report form at the clinical affiliation site for their records. It is very important that the forms are filled out thoroughly and completely in order to aid in post-exposure evaluation and follow-up, and to protect the student’s legal rights in the future, if necessary. The student should obtain copies of any and all post-incident evaluation/testing/treatment documents as follow-up will most likely occur at:

MidState Medical Center’s MediQuick
61 Pomeroy Ave., Meriden, Connecticut
203-694-5350
(Open 8 a.m. to 7 p.m. seven days/week)

All information related to an incident will be kept confidential in the student's medical records file at Student Health Services at the university.

Prevention
It is our aim to prevent as many unusual incidents as possible by educating students properly and by reminding them to always remain aware of the risks as they perform their duties.

The following are guidelines for preventing student exposure incidents:

1. **Attend and listen** carefully at all OSHA training sessions.
2. **Pay careful attention** to instructors and learn/practice good technique while being aware of surroundings.
3. **Adhere to the principle of Universal Precautions**, which states that anyone's blood/OPIMs may be potentially infectious and therefore everyone's blood and body fluids must be treated accordingly.
4. **Use personal protective equipment** (e.g., gloves, gowns, face mask) as required to protect yourself.
5. **Think about what you are doing.** Most incidents are due to carelessness!

Appendix 1: MidState Medical Center Protocol for the Management of Post-Exposure Chemoprophylaxis following Potential Occupational Exposure to Bloodborne Pathogens

General Information

- The student will follow guidelines as listed within the Quinnipiac University Student Exposure Control Plan for Bloodborne and Airborne Pathogens. (p. 126)
- The student is responsible for submitting all claims first through his/her own health insurance, including claims associated with the visits associated with post exposure follow-up. Claims not covered by the student’s health insurance will be covered by Excess Student Accident Insurance.
- Students who are exposed at a clinical site with on-site capability for providing appropriate care for bloodborne exposure will follow the clinical site protocol and seek initial evaluation and treatment at the clinical site.
- Students who are exposed at a clinical site without on-site capability for providing appropriate care for bloodborne exposure will receive initial evaluation and treatment at:

  MidState Medical Center’s MediQuick
  61 Pomeroy Ave., Meriden, Connecticut
  203-694-5350
  (Open 8 a.m. to 7 p.m. seven days/week)

Bloodborne Exposure Protocol

Students who are exposed at a clinical site without on-site capability for providing appropriate care for bloodborne or airborne exposure will follow steps 1–3 below. All students exposed will follow step 4 below.

1. **Notification from Quinnipiac University Student**
   - Notification from Quinnipiac University Student to MediQuick (MQ) charge nurse of student exposure.
   - Student arrives at MQ with copy of:
     - Completed MidState Medical Center Pre-Registration Form (http://forms.quinnipiac.edu/IncidentReportForm/MidStateForm.pdf).
     - Completed Quinnipiac University Release of Information Form. (https://myq.quinnipiac.edu/Student%20Life/Student%20Health%20Services/Document%20Library/Medical%20Release%20Form.pdf)
     - Copy of Student Incident Report Form (http://forms.quinnipiac.edu/IncidentReportForm/form.html) (an electronic copy will emailed to the student upon submission of online form).
     - Copy of hepatitis B vaccine status.
   - Student reports to MQ Registrar and is fast tracked into treatment room where registration process will be completed.
   - CBC, Renal & Hepatic chemical functions, baseline HIV and Hepatitis C antibody will be drawn.

2. **Assessment**
   - The MQ physician and/or Licensed Independent Practitioner (LIP) will assess the extent of exposure and determine risk.

3. **Assessment**
   - The MQ physician and/or Licensed Independent Practitioner (LIP) will assess the extent of exposure and determine risk.

4. **Assessment**
   - The MQ physician and/or Licensed Independent Practitioner (LIP) will assess the extent of exposure and determine risk.

5. **Assessment**
   - The MQ physician and/or Licensed Independent Practitioner (LIP) will assess the extent of exposure and determine risk.
3. Intervention
   - Permission for PEP regimen will be obtained.
   - Perform other testing as indicated (including pregnancy test if indicated).

4. Follow-up (all exposed students)
   - An appointment should be made by the student with the Mid State Infectious Disease Group for 2 weeks post exposure follow-up. This appointment can be made by contacting the Infectious Disease Office at 203-694-5444 on the next business day following the immediate post exposure follow-up.
   - If the immediate post-exposure follow-up was not done at MidState Medical Center, the student should request a copy of the lab work be copied to MidState Medical Center Department of Infectious Disease (FAX: 203-694-5373).
   - The infectious disease physician will evaluate/counsel the student in two weeks for follow-up blood work and additional medication as needed. To make an appointment the student should call 203-694-5444. The office is located at 61 Pomeroy Ave., Meriden, Connecticut (note that the infectious disease office is not the same office as MediQuick but they are in the same office building).
   - The infectious disease physician is available for consultation regarding the effects of PEP medication and medication changes, if appropriate.
   - If the student is out-of-state, any needed exposure follow up should be arranged at a hospital-affiliated urgent care center or hospital emergency department.

Appendix 2: Gallagher Accidental Insurance Program for Students at Quinnipiac University FAQ – Excess Student Accident Insurance

Q. What is “excess student accident insurance” and why does Quinnipiac have a policy?
A. The concept of this is to prevent Quinnipiac students from incurring expenses due to accidents that occur while in school. An “excess” policy covers expenses that the student would otherwise be responsible for in the absence of this policy (i.e., co-pays, deductibles, and other amounts denied by primary insurance and shown as the patient responsibility on the primary Explanation of Benefits (EOB)).

Q. How do I become eligible? How does it work?
A. Every Quinnipiac student is automatically covered by the plan. When an accidental injury occurs a claim form (http://www.gallagherstudent.com/quinnipiac) must be completed and sent to the claims company, BMI Benefits LLC.

Q. Do I need to have a claim form on file for every injury?
A. Yes. A new claim form must be filled out for each new injury.

Q. Do I still need to have primary insurance, since Quinnipiac has this policy?
A. Yes, you do. All full time students must have a primary insurance policy. Our excess student accident policy ONLY covers accidental injury related injury charges not paid by primary insurance and shown as the student’s responsibility on the primary insurance EOB. It does not cover any bills associated with general illness or non-accidental injuries.

Q. What expenses does the Excess Student Accident Insurance policy cover?
A. The policy is designed to cover most expenses beyond your primary insurance coverage for accidental injuries, up to of 100% Usual & Customary. This includes amounts shown as the patient responsibility on the primary insurance EOB: co-pays, co-insurance, high deductibles etc.

Q. What is the benefit period to incur bills/claims?
A. The benefit period is two years/104 weeks from the date of injury. This is on a per injury basis.

Q. Is there a deductible associated with the Student Accident Policy?
A. There is no deductible. This means that any accidental injury medical charges, from $0.00 to $5,000, not covered by your primary insurance, and shown as the student’s responsibility on the primary EOB, will be paid up to 100% Usual & Customary.

Q. What insurance information do I have to give a provider?
A. When you go to hospital, doctor’s office, PT clinic, etc., you must remember to bring proof of your primary insurance coverage and as well as the Excess Student Accident Insurance card for any expense not covered by your primary insurance policy which can be obtained on the QU Student Health Services page on MyQ (https://myq.quinnipiac.edu/Student%20Life/Student%20Health%20Services/Pages/default.aspx) and claim form (http://forms.quinnipiac.edu/IncidentReportForm/BMIForm.pdf). The policy number is on the form.

Q. How will claims be processed?
A. Do NOT pay bills yourself. The provider will take down your primary insurance information, as well as the Excess Student Accident Policy information. Bills will be sent to your primary insurance for processing. If you remember to present the secondary insurance information upfront, providers should automatically send any outstanding balances to BMI Benefits LLC, to process under the excess insurance plan.

Q. What documents are needed for BMI Benefits, LLC. to process a claim?
A. The provider will send BMI Benefits the following documents:
   - Itemized bill – This is called a HCFA or UB92, and it contains the following information:
     - Provider’s Name
     - Provider’s Address
     - Tax ID Number
     - Date(s) of Service
     - Type of Service(s) Rendered
     - The Fee for Each Procedure
   - Primary Explanation of Benefits – This is a statement from your primary insurance company that outlines what charges will be covered and what the patient might owe. If a primary insurance company denies charges for one reason or another, a DENIAL will be sent instead of an EOB.

Q. What can cause a delay in processing and paying a claim?
A. BMI Benefits cannot process a claim that is missing one or more of the following documents: the injury claim form, the itemized bill or the primary EOB/denial. They cannot accept balance due, balance forward, or past due statements for claims processing.

Q. What if I already paid the bills I got from an accidental injury after my primary insurance paid? Can I get reimbursed?
A. You are not supposed to pay bills but if you have, yes, you can get reimbursed for costs you have already paid. To do this you need to submit a receipt or some other proof of payment along with the EOBs and HCFAs/UBs. Keep in mind it usually takes longer for these to be reimbursed. For this reason, we try to have providers “bill” you for fees that are usually paid at the time of office visit. In other words, try to avoid paying any fees to providers up front, so they can be paid by the Excess Student Accident Policy instead.

Q. I felt sick and went to the ER. Will the Excess Student Accident Insurance plan help cover this?
A. Our excess student accident insurance plan will not cover charges due to general illness. Therefore, services for general “non-accident” medical concerns (cold/flu, appendicitis for example) are not covered.

Q. What if I hurt myself playing intramurals or playing another sport in the off season? Will the plan cover me for that?
A. Yes, all student accident claims covered.

Q. Can I go to any doctor or provider for treatment, or do I have to use the Quinnipiac provided physicians for the excess student accident insurance policy to cover costs?
A. Our excess student accident policy will cover services from any provider, for charges up to 100% Usual & Customary, as long as the provider bills your primary insurance first (creating an EOB and itemized bill). This includes physicians in any insurance network, and other providers such as chiropractors, etc.

Appendix 3: MidState Medical Center/ MediQuick Pre-registration form (http://forms.quinnipiac.edu/IncidentReportForm/MidStateForm.pdf)
Appendix 4: BMI Benefits Form and Reimbursement Claims (http://forms.quinnipiac.edu/IncidentReportForm/BMIForm.pdf)
STUDENT RECORDS

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their educational records. These rights include:

1. The right to inspect and review the student’s educational records within 45 days of the day Quinnipiac University receives a request for access. Students should submit to the registrar, dean, head of the academic department, or other appropriate official, written requests that identify the record(s) they wish to inspect. A Quinnipiac official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the Quinnipiac official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s educational records that he or she believes are inaccurate, misleading or otherwise in violation of the student’s privacy rights under FERPA. A student who wishes to ask the university to amend a record should write to the Quinnipiac official responsible for the record, clearly identifying the part of the record the student wants changed, and specify why it should be changed. If Quinnipiac decides not to amend the record as requested by the student, the university will notify the student in writing of the decision and the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when he or she is notified of the right to a hearing.

3. The right to provide written consent before Quinnipiac discloses personally identifiable information contained in the student’s educational records, except to the extent that FERPA authorizes disclosure without consent. One exception that permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by Quinnipiac University in an administrative, supervisory, academic, research or support staff position (including but not limited to law enforcement unit personnel, health staff, and athletic staff and coaches); a person or company with whom Quinnipiac has contracted (such as an attorney, auditor or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

A school official has a legitimate educational interest if the official needs to review an educational record to fulfill his or her professional responsibility. Upon request, Quinnipiac also discloses educational records without consent to officials of another school in which a student seeks or intends to enroll.

Public Notice Designating Directory Information
Quinnipiac University designates the following information as public or “Directory Information” under FERPA, that is, information that can be made available to the general public by Quinnipiac without the student’s prior consent:

- Name
- Address
- Telephone number
- Email address
- Date and place of birth

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Quinnipiac University to comply with the requirements of FERPA. The name and address of the office that administers FERPA are:
   Family Policy Compliance Office
   U.S. Department of Education
   400 Maryland Avenue, SW
   Washington, DC 20202-5920

While students have the right to inspect and review their educational records, Quinnipiac does not release copies of educational records to students or their representatives, including attorneys, even with consent of the student, unless the student would otherwise be unable to obtain access to review his or her records.
TITLE IX

Revised January 2018

Quinnipiac University is committed to providing an environment free from gender-based discrimination and harassment. Consistent with its commitment to addressing gender-based misconduct, the university complies with Title IX of the Education Amendments of 1972, which prohibits discrimination on the basis of sex in educational programs or activities that receive federal financial assistance. As such, Quinnipiac University is dedicated to fostering a healthy and safe environment in which members of the community can realize their full potential in an educational, working and living environment free from all forms of gender or sex discrimination and sexual misconduct.

Quinnipiac seeks to ensure that no student, faculty or staff member is excluded from participation in or denied the benefits of any university program or activity on the basis of sex. This includes all university activities, including, without limitation, academic, athletic, campus life, residential life programs and all aspects of employment. Students, faculty or staff who believe they have been subjected to or witnessed gender-based misconduct are encouraged to report these incidents. As discussed below, faculty, administration, athletic, human resources, public safety and student affairs staff are considered responsible employees under Title IX and are required to immediately report any incidents of sexual violence they observe. Upon receiving a report, the university will respond promptly, equitably and thoroughly. In addition, the university will take steps to prevent the recurrence of the misconduct and correct its effects, if appropriate.

Specifically with respect to athletics, the university is committed to the equitable treatment of male and female student-athletes. This includes, but is not limited to, equitable allocation of athletic participation opportunities, scholarships and benefits. The contact person in Athletics for Title IX inquiries is Tami Reilly, associate athletic director for fitness and wellness.

Prohibitions against discrimination and harassment do not extend to statements and written materials that are germane to the classroom or academic course of study.

When a respondent is found to have violated this policy, serious sanctions will be used to reasonably ensure that such actions are never repeated and steps will be taken to correct any discriminatory effects to the extent possible. This policy has been developed to reaffirm these principles and to provide recourse for those individuals whose rights have been violated. This policy is intended to define community expectations and to establish a mechanism for determining when those expectations have been violated.

This policy is lengthy and detailed because the university takes these issues and its legal obligations very seriously. Any Quinnipiac community member who has questions about the policy or the grievance procedures should seek clarification from the university’s Title IX coordinator.

- Pregnant and Parenting Student Modifications (p. 121)

Notice of the Title IX Coordinator

Catlin Wells serves as the university Title IX coordinator and manages the university’s compliance with Title IX. The Title IX coordinator is the resource available to anyone seeking additional information or wishing to file a complaint. When a student, faculty or staff member, or other participant in the university’s programs and activities feels that she or he has been subjected to discrimination on the basis of sex in any university program or activity, including without limitation being subjected to sexual harassment and sexual assault, she or he may contact the Title IX coordinator or utilize the Title IX grievance procedures to bring concerns forward for the purpose of obtaining a prompt and equitable resolution.

The Title IX Discrimination and Harassment Policy is intended to define university standards and to outline the investigation and grievance processes when those standards are violated.

The University Title IX coordinator is:

Catlin Wells
Title IX Coordinator
catlin.wells@qu.edu (catlin.wells@quinnipiac.edu)
203-582-7327

Deputy Title IX coordinators are designated and trained to address Title IX concerns and investigations.

Deputy Title IX coordinator for faculty, staff and vendors:

Stephanie Mathews
Employee Relations and Labor Relations Associate
554 Mount Carmel Avenue, MC-7, OF-HMN
stephanie.mathews@qu.edu (stephanie.mathews@qu.edu)
203-582-7768

Deputy Title IX coordinator for athletics:

Tami Reilly
Associate Athletic Director of Fitness & Wellness RT-STC
tami.reilly@qu.edu
203-230-8460

Confidential Resources

On-campus resources are available that can provide confidentiality, sharing options and advice without any obligation to inform other university staff members unless requested. Such on-campus confidential resources include Counseling Services, Student Health Services and/or Religious Life and other designated resources. Additionally, community members can seek out assistance from an off-campus crisis center, which can maintain confidentiality. Faculty members and other university staff are not confidential resources and are required to contact the university Title IX coordinator or a deputy coordinator.

Quinnipiac Confidential Resources

- Counseling Services — 203-582-8680
- Student Health Services — 203-582-8742
- Rabbi — 203-582-8206
- Protestant Chaplain — 203-582-6477
- Religious Life — 203-582-8257

Off-Campus Confidential Resources

- Connecticut Sexual Assault Crisis Services 24-hour confidential hotline — 1-888-999-5545
- Women and Families Center/Meriden — 203-235-9297
- Women and Families Center/New Haven — 203-389-5010
- Rape Crisis Center of Milford — 203-878-1212
Reports that are made anonymously or by third parties may not initiate grievance procedures as such. However, Title IX requires the university to investigate all incidents about which the university knows or has reason to know to protect the health and safety of the university community and the university will investigate issues raised anonymously or by third parties.

Similarly, the university will undertake an investigation where appropriate even in cases where the alleged victim and/or complainant choose not to cooperate or participate. When weighing a complainant’s request for confidentiality, to end an investigation and/or to not seek disciplinary action, the university will consider factors which may include circumstances that suggest: there is an increased risk of the alleged perpetrator committing additional acts of sexual violence; an increased risk of future acts of sexual violence under similar circumstances; whether the sexual violence was perpetrated with a weapon; the age of the student subjected to the sexual violence; and whether the university possesses other means to obtain relevant evidence.

The university has a duty to report data about various forms of sexual misconduct in accordance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act). No personally identifiable information is disclosed, but statistical information is disclosed as part of the university’s annual Campus Security Policy & Campus Crime Statistics Report. The information to be shared includes the date, location (residence hall, public property, off campus, etc.) and specific crime category.

Whether the incident occurred on or off campus, community members are encouraged to report sexual assault and other incidents of harassment to local police. Quinnipiac Public Safety can assist community members who wish to make a report to police. Electing not to report an incident to the police will not impact the university’s investigation or Title IX grievance process. If a complainant is a minor, according to Connecticut state law, the university will make a report to the appropriate law enforcement agency.

Privacy and Confidentiality

Reported issues will be investigated and may be resolved through the appropriate grievance procedures and investigation procedures will be conducted with due regard for the privacy of those involved. Only people who have a need to know about the issue will be informed, and materials and information prepared or acquired under Title IX procedures will be shared only as necessary with investigators, witnesses and other relevant parties. Disclosure of such information also may be made if the university Title IX coordinator determines that such disclosure is necessary to protect the health, safety or well-being of the community. While the university Title IX coordinator will take into account any requests made by a grievant for confidentiality or that a Title IX matter not be investigated, the university Title IX coordinator will take appropriate steps to respond to the matter consistent with requirements of Title IX and the university’s obligation to the greater Quinnipiac community.

Retaliation

Retaliation against any person in the university community for alleging a violation of Title IX or for cooperating in any investigation, proceeding or hearing relating to an alleged violation of Title IX is strictly prohibited and may result in disciplinary action, including additional interim or permanent measures. Any concerns regarding retaliation should be addressed immediately with the university Title IX coordinator or deputy coordinator.
Statement Regarding Complaint and Grievance Procedures

The complaint and grievance procedures contained herein have been developed to enable the university to receive, investigate and resolve complaints of discrimination on the basis of sex. These procedures are designed to provide a supportive process for individuals who report discrimination and to ensure a fair process for individuals who are accused of discriminatory conduct. Any Quinnipiac students, faculty or staff members who believe that they have been subjected to discrimination based upon sex in any university program or activity, that the university has failed to meet its Title IX obligations regarding equity in athletics, or that they have been subjected to sexual misconduct may bring such concerns to the attention of the university’s Title IX coordinator to obtain a prompt and equitable resolution.

The U.S. Department of Education, Office for Civil Rights (OCR) is the federal agency charged with enforcing compliance with Title IX. Anyone has the right to contact them directly.

Information regarding OCR can be found at:
Office for Civil Rights, 400 Maryland Avenue, SW, Washington, D.C. 20202-1100
• TDD: 877-521-2172
Email: ocr@ed.gov • Website: ed.gov/ocr

Informal Complaints

Students, faculty and staff may bring concerns to the university Title IX coordinator or deputy coordinator on an informal basis. Where appropriate, the Title IX coordinator/deputy coordinator will provide counseling and advice and may attempt to facilitate an informal resolution. The university Title IX coordinator/deputy coordinator also is available to receive and address such allegations through the formal grievance procedures described below.

Complainants who are considering bringing a formal grievance may at any time meet with the university Title IX coordinator/deputy coordinator, who will discuss the matter and describe the formal grievance process. Where appropriate and with prior notice where applicable, these grievance procedures may be modified or amended by the university Title IX coordinator.

The university Title IX coordinator has the authority to investigate allegations of discrimination prohibited by Title IX even absent the filing of a formal grievance, or after its subsequent withdrawal. The university has an obligation to the entire Quinnipiac community to take appropriate steps to prevent community members from being subjected to discrimination and sexual misconduct. As a result, there may be circumstances that will require the university Title IX coordinator to proceed with investigating a formal or informal grievance even if a complainant specifically requests that the matter not be pursued.

Informal Resolution

In instances where it is deemed possible and safe, the university may choose to resolve reports through informal means. If it is determined that an informal resolution may be appropriate, the Title IX coordinator, deputy Title IX coordinator or designee will speak with the complainant about this option. If the complainant agrees, the Title IX coordinator or deputy coordinator will speak with the person alleged to have engaged in the misconduct. If a satisfactory resolution is reached through this informal process, the matter will be considered completed. If these efforts are unsuccessful, the formal investigation process will commence. The informal resolution process will not be used in cases of sexual assault.

Complaints Regarding Sex Discrimination in a University Program or Activity, Including Equity in Athletics

NOTE: Claims of sexual misconduct are addressed separately. A separate grievance procedure is set forth for claims of sexual misconduct and other related misconduct. See section on sexual misconduct and harassment. (p. 138)

Grievance Procedures for Formal (i.e., Written) Grievances

A formal grievance process is initiated when a complainant submits a written statement to the university Title IX coordinator alleging discrimination on the basis of sex in any university program or activity, including, without limitation, academic programs, athletics, campus life, residential life and all aspects of employment. In the statement, the complainant is encouraged to request any relief sought from the university. Prompt submission of formal grievances is encouraged.

Complaints relating to athletics will be handled by the deputy Title IX coordinator for athletics:

Tami Reilly
Associate Athletic Director of Fitness & Wellness
RT-SC
500-230-8460

Complaints relating to other university programs and activities will be handled by the Title IX coordinator:

Catlin Wells
Title IX Coordinator
CCE 189 B
500-230-8460

catlin.wells@qu.edu (terri.johnson@qu.edu)

The deputy Title IX coordinator will consider the written grievance and may dismiss the grievance without further process or review if it is determined that the allegations, even if true, would not constitute a violation of this policy.

If the grievance is not dismissed, the deputy coordinator will interview the individual who submitted the written statement. Depending on the circumstances, the deputy coordinator also may interview others with relevant knowledge, review documentary materials, and take any other appropriate action to gather and consider information relevant to the grievance.

The deputy coordinator will determine whether there has been a Title IX violation using a preponderance of the evidence standard and will consult with other university offices as necessary in reaching a decision regarding the written grievance. The deputy coordinator will prepare a written report setting forth findings, conclusions and recommended actions to be taken, if applicable. The university Title IX coordinator and the complainant will receive a copy of the report.
In the event the deputy coordinator determines that there has been a violation, a report will be presented to Mark Thompson, executive vice president and provost of Quinnipiac University, or his designee. Upon notification of a violation, Thompson, or his designee, will take appropriate action to ensure that the violation is remedied, prevent its recurrence and correct any discriminatory effects on the complainant to the extent possible.

While the time it may take to investigate and resolve a Title IX grievance will depend on a variety of factors, including the nature and scope of the allegations, the university will seek to resolve the grievance promptly.

**Appeals for Equity Grievances**

If the deputy Title IX coordinator finds there was no violation of Title IX, the complaining party may notify the university Title IX coordinator of an intent to appeal the decision within five business days of learning of the determination. Upon notification of intent to appeal, the complaining party must submit an appeal letter specifying the grounds upon which the appeal is based and any supporting materials within five business days. The Title IX coordinator has the discretion to extend the deadline for submission of a letter of appeal and to solicit any materials deemed necessary to allow all parties to respond to all issues.

Once the appeal materials are submitted, any relevant parties will be notified of the appeal and may respond to the appeal. The university Title IX coordinator may decide to:

• Affirm the deputy coordinator's decision. In this case, the initial decision is final.
• Modify the deputy coordinator's decision and present a report with findings and recommendations to Thompson or his designee. Upon receipt of the university Title IX coordinator's report and recommendations, Thompson, or his designee, will take appropriate action to ensure that any violation is remedied.

Members of the university community, guests and visitors have a right to be free from sexual harassment, violence and gender-based harassment. When an allegation of misconduct is investigated, and a responding community member is found to have violated this policy, serious sanctions may be used in an effort to ensure that such actions are not repeated.

Any attempts to violate this policy are considered sufficient for having committed the violation itself. The use of alcohol or other drugs will not be accepted as a defense or mitigating factor to a violation of this policy. These policies apply regardless of the complainant's or respondent's sexual orientation, sex, gender identity, age, race, nationality, religion or ability. Harassment or discrimination based upon an individual's sexual orientation may be considered gender-based and be subject to this policy. Reasonable accommodations will be provided, as needed, to permit students with disabilities to utilize the procedures set forth herein.

**Definitions and Scope of Sexual Misconduct**

Quinnipiac prohibits any form of sexual misconduct, including but not limited to acts of sexual harassment, nonconsensual sexual contact or intercourse, and other forms of sexual exploitation.

**Sexual harassment** is defined as unwelcome gender-based verbal or physical conduct that is:

• sufficiently severe, persistent or pervasive that it has the effect of unreasonably interfering with, limiting or depriving someone of the ability to participate in or benefit from the university’s educational program, activities and/or employment, and is;
• based on power (quid pro quo), the creation of a hostile environment, or retaliation;

Examples of sexual harassment include, but are not limited to:

• subtle or persistent pressure for sexual activity;
• unnecessary touching, pinching or brushing against a person;
• requesting or demanding sexual favors concerning employment, academic activities or other university activities;
• unwelcome communications (verbal, written, electronic, etc.) of a sexual nature;
• unwelcome conduct based on a person's perceived sexual orientation, gender identity or expression or gender based stereotypes
• failure to accept the termination of a consensual relationship with repeated and persistent requests and behavior.

**Nonconsensual sexual contact** includes any intentional touching, however slight, whether clothed or unclothed, with any object or body part by a person against another person that is without consent and/or by force.

Examples of nonconsensual sexual contact include, but are not limited to:

• intentional contact with the breasts, buttocks, groin or genitals;
• intentional touching of another with breasts, buttocks, groin or genitals;
• making another person touch someone or themselves in a sexual manner;
• any intentional bodily contact in a sexual manner.

**Nonconsensual sexual intercourse** includes any sexual intercourse, however slight, with any object or body part by a person against another person that is without consent and/or by force.

Examples of nonconsensual sexual intercourse include, but are not limited to:

• vaginal penetration by a penis, object, tongue or finger;
• anal penetration by a penis, object, tongue or finger;
• oral copulation (mouth to genital contact or genital to mouth contact).

**Sexual exploitation** includes but is not limited to:

• invasion of sexual privacy and voyeurism (in-person or through audio or video recording);
• knowingly transmitting a sexually transmitted infection;
• exposing of a person's body or genitals;
• prostituting or soliciting another community member.

**Consent** is an active, knowing and voluntary exchange of affirmative words and/or actions, which indicate a willingness to participate in a particular sexual activity. Consent must be freely and actively given. It is the responsibility of the initiator to obtain clear and affirmative responses at each stage of sexual involvement. The lack of a negative response is not consent. A person who is incapacitated by alcohol and/or drugs, whether voluntarily or involuntarily consumed, may not give consent.
Neither consent to one form of sexual activity nor past relationships imply consent to future sexual activity.

**Incapacitation** is a state where someone cannot make rational, reasonable decisions due to a lack of capacity to give knowing consent (e.g., to understand the "who, what, when, where, why and how" of the sexual interaction).

- Sexual activity with someone who is, or based on circumstances should reasonably have known to be, mentally or physically incapacitated (i.e., by alcohol or other drug use, unconsciousness or blackout) constitutes a violation of this policy.
- A person whose incapacity results from mental disability, sleep, involuntary physical restraint, or from the consumption (voluntary or otherwise) of incapacitating drugs cannot give consent.
- To give consent, a person must be of the legal age of consent. Under most circumstances, the age of consent in the state of Connecticut is sixteen. See Connecticut General Statutes § 46b-120, § 46b-127, § 46b-133d, § 53a-70, § 53a-71, and § 54-76b.
- Alcohol-related incapacity results from a level of alcohol ingestion that is more severe than impairment, being under the influence, drunkenness or intoxication.

Evidence of incapacity may be detected by physical cues, e.g., slurred speech, bloodshot eyes, the odor of alcohol, or a person's breath or clothing, inability to maintain balance, vomiting, unusual or irrational behavior and unconsciousness. Context is important in helping to determine incapacitation. Any of these particular cues alone do not necessarily indicate incapacity.

**Force** is the use of physical violence and/or imposing on someone physically to gain sexual access. Force also includes threats, intimidation and coercion that overcomes resistance or produces consent.

**Coercion** is unreasonable pressure for sexual activity. Coercion is the use of emotional manipulation to persuade someone to do something they may not want to do, such as being sexual or performing certain sexual acts. Being coerced into having sex or performing sexual acts is not consenting sex and is considered sexual misconduct.

**Intimate Partner Violence**

**Relationship violence** is a pattern of behavior in an intimate relationship that is used to establish power and control over another person through fear and intimidation. A pattern of behavior is typically determined based on the repeated use of words and/or actions and inaction to demean, intimidate and/or control another person. This behavior can be verbal, emotional and/or physical. Examples include, but are not limited to: striking another person (slapping, punching, etc.), property damage, reckless behavior, name calling and insults, public humiliation, harassment directed toward friends and acquaintances, and verbal and/or physical threats.

**Stalking** involves any behaviors or activities occurring on more than one occasion that collectively instill fear and/or threaten a person’s safety, mental health, and/or physical health. Such behaviors or activities may include, but are not limited to: nonconsensual communications (i.e., face-to-face, telephone, email, social media), threatening or obscene gestures, surveillance, or showing up outside the targeted individual’s classroom, residence or workplace.

**Other Forms of Misconduct**

Other forms of misconduct, when gender-based, will fall under this policy. These include, but are not limited to:

- conduct that interferes with the rights of others and/or demonstrates disregard for the university community;
- assisting another person in committing a violation of this policy;
- personal harassment and/or verbal abuse;
- the threat of physical harm, physical abuse, mental distress or injury;
- actions that inflict physical harm, physical abuse, mental distress or injury;
- slanderous, false or malicious statement(s) about a person or defamation of character;
- endangerment of the health and safety of others;
- hazing;
- damage and/or vandalism to another’s property.

**Jurisdiction**

This policy shall apply to conduct that occurs on university-owned or leased property, at university-sponsored events, as well as off campus. Students shall be responsible for their conduct from the time of application for admission through the awarding of a degree at Commencement, as well as during periods between terms of actual enrollment, study abroad and leaves of absence or suspension. The Title IX grievance committee maintains the authority to adjudicate alleged violations of the Student Code of Conduct that are related to the same incident under review, though may not be directly related to gender-based conduct. While complaints received by responsible employees will be investigated in accordance with this policy, complaints against students who have already withdrawn or graduated from Quinnipiac will not be subject to Title IX grievance procedures.

**Complaint Procedures for Sexual Misconduct**

Any community members who believe they have been subject to sexual assault, sexual harassment or other sexual misconduct or has witnessed or learned of such an incident is encouraged to contact the university Title IX coordinator or a deputy coordinator directly. The Title IX coordinator ensures that complaints are handled by the appropriate deputy coordinator or designee for investigation, possible interim measures, resolution, and thereby ensures complainants have access to medical, mental health, law enforcement and other resources that may be required.

**Preservation of Physical Evidence**

The university encourages all individuals to seek assistance from a medical provider and/or law enforcement immediately after an incident of sexual misconduct. This is the best option to ensure preservation of evidence and to begin a timely investigative and remedial response. The university will assist any community member to get to a safe place and will provide medical assistance, coordination with law enforcement, and information about the university's resources and complaint processes.

**Handling of Complaints**

Complaints against students, visitors and individuals not affiliated with Quinnipiac are handled by the Title IX coordinator.

Catlin Wells, Title IX Coordinator
Complaints against faculty, staff and vendors are handled by the deputy Title IX coordinator for faculty and staff. The deputy coordinator for faculty and programs is:

Stephanie Mathews, Employee Relations and Labor Relations Associate
554 Mount Carmel Avenue, MC-7, OF-HMN
stephanie.mathews@qu.edu (stephanie.mathews@qu.edu)
203-582-7768

In situations in which a complaint is filed against a community member who embodies more than one status at the university (i.e., community member is a student and an employee), the university Title IX coordinator has the authority to appoint investigators (possibly from different areas of the institution) and determine the grievance process for the reported incident (student, faculty or nonfaculty employee). The selected grievance process shall have the authority to make final determinations affecting all individual statuses at the university.

Protective Orders
Students should bring any protective orders to the Department of Public Safety. The university will assist in making any necessary accommodations.

**Sexual Misconduct Grievance Procedures for Students**

**Student Rights — Rights of the Complainant**

- The right to an investigation and appropriate resolution of all credible complaints of sexual misconduct, gender-based discrimination and/or harassment made in good faith to the university;
- The right to be treated with respect by university staff throughout the process;
- The right to be notified of available counseling, mental and physical health services for victims of sexual misconduct, gender-based discrimination and/or harassment on campus and off campus;
- The right to identify witnesses and other parties, and to request the Title IX coordinator or designee contact those individuals as part of the investigation;
- The right to have an adviser of your choice present in a support or advisory role during the investigation and Title IX Grievance Committee (committee) hearing;
- The right to report the incident to off-campus authorities and/or law enforcement and to be assisted by university staff in doing so;
- The right to have a committee of mixed genders, to know the members of the committee ahead of time, and to address concerns of bias and/or conflict of interest in regard to committee members;
- The right to review all documents and reports produced by the investigation, subject to limitations provided by law, as well as the names of all witnesses who may be called to provide statements to the committee, at least 24 hours prior to the hearing;
- The right to know which provisions of the Student Code of Conduct the accused student is charged with violating;
- The right to challenge information and documents prior to the hearing;
- The right to have the university request attendance and accommodate individuals called as witnesses for a hearing;
- The right to have a copy of the committee hearing script at least 48 hours prior to the hearing;
- The right to be present and participate in the committee hearing;
- The right to make an impact statement to the committee, should the committee find the accused student responsible for violating this policy;
- The right to participate in committee hearings by means other than being in the same room with the accused student;
- The right to be informed of the outcome and sanction of any committee hearing within one business day of a decision being rendered, and to receive that decision in writing;
- The right to appeal the finding and sanction of the committee, in accordance with the appeal guidelines established in this policy;
- The right to privacy, and the assurance that information regarding the complaint will be shared only with those necessary.

**Student Rights — Rights of the Accused Student**

- The right to an investigation and appropriate resolution of all credible complaints of sexual misconduct, gender-based discrimination and/or harassment made in good faith to the university;
- The right to be treated with respect by university staff throughout the process;
- The right to be notified of available counseling, mental and physical health services, on and off campus;
- The right to identify witnesses and other parties, and to request the Title IX coordinator or designee contact those individuals as part of the investigation;
- The right to have an adviser of your choice present in a support or advisory role during the investigation and committee hearing;
- The right to have the Title IX grievance process fully explained, and to receive written notice of all Student Conduct Code charges at least 48 hours before a committee hearing;
- The right to be notified of possible sanctions that may result if found responsible of violating this policy and the student code of conduct;
- The right to have a committee of mixed genders, to know the members of the committee ahead of time, and to address concerns of bias and/or conflict of interest in regard to committee members;
- The right to review all documents and reports produced by the investigation subject to limitations provided by law, as well as the names of all witnesses who may be called to provide statements to the committee, at least 24 hours prior to the hearing;
- The right to challenge information and documents prior to the hearing;
- The right to have the university request attendance and accommodate individuals called as witnesses for a hearing;
- The right to have a copy of the committee hearing script at least 48 hours prior to the hearing;
- The right to be present and participate in the committee hearing;
- The right to make an impact statement to the committee, should the committee find the accused student responsible for violating this policy;
- The right to be informed of the outcome and sanction of any committee hearing within one business day of a decision being rendered, and to receive that decision in writing;
Complaints of Sexual Misconduct Against Students

Investigation
The Title IX coordinator or designee will formally investigate student grievances, address inquiries and coordinate the university’s compliance efforts regarding student complaints and grievances. Notice of a formal complaint can be made in writing or orally to an appropriate staff member (Residential Life, Public Safety, Student Affairs, etc.), though the university encourages students to submit grievances in writing (electronically or by hard copy) to the Title IX coordinator or other appropriate staff member. The Title IX coordinator or designee also reserves the right to investigate any incident referred to the dean of students office that may relate to this policy, and, if necessary, refer that incident to the Title IX grievance process.

The complaint should clearly describe the alleged incident, when and where it occurred, and the desired remedy, if known. Additionally, the initiator of a formal complaint should submit any supporting materials in writing as quickly as possible.

Quinnipiac University strives for completion of the investigation and grievance procedures within 60 days of the receipt of the complaint. Should this process last longer than 60 days, the Title IX coordinator will communicate the reasons and expected timeline to all parties. Reasons for extending beyond 60 days could include, but are not limited to: multi-party investigations, the availability of witnesses, disability accommodations approved by the Office of Student Accessibility and periods of university closure and breaks.

Interim Remedial Action
After reviewing the complaint, the Title IX coordinator or designee may enact interim remedial actions in order to stop the alleged harassment or discrimination, and/or to protect the safety and well-being of the individuals and university community. Interim remedial action is preliminary, and only in effect until the process is complete and a decision is rendered. Interim remedial actions include, but are not limited to, no contact orders, changes in university housing accommodations, changes in academic schedule and accommodations, university housing suspensions, campus restrictions and university suspensions. These actions may be instituted or removed at any point during the investigation process.

Preliminary Review
After reviewing the complaint, the Title IX coordinator or designee will:

• determine the identity and contact information of the complainant;
• identify what policies, if any, were allegedly violated;
• meet the complainant to discuss the complaint if necessary;
• conduct an immediate review to determine if there is cause to proceed with further investigation.

If there is insufficient evidence to support a reasonable cause for the complaint, or if the behavior described in the complaint does not violate this policy, the grievance will be closed with no further action.

Formal Investigation
If the Title IX coordinator determines that there is reasonable cause to pursue the complaint, a formal investigation will be initiated. During the formal investigation, the Title IX coordinator or designee will:

• identify two trained investigators to conduct the investigation. The Title IX coordinator may serve as an investigator if necessary;
• commence a thorough and impartial investigation by developing a strategic investigation plan, including a witness list, information list, intended investigation timeframe, and order of interviews for all witnesses and the accused individual;
• give the accused individual proper notice of the investigation and provide an opportunity for the accused individual to provide information;
• complete the investigation in a timely manner, without unnecessary deviation from the intended timeline;
• maintain communication with the complainant and the accused individual on the status of the investigation and overall process.

An investigation may be conducted by a single investigator if appropriate and upon approval by the Title IX coordinator.

At the conclusion of the investigation, the investigator will meet with the complainant and the accused student separately to present the findings. If supported by the investigation findings, the investigator will present the accused student with a notice of alleged violations of the Student Code of Conduct.

Resolution Agreement Option
If the accused student accepts responsibility for the alleged Student Code of Conduct violations presented in investigator’s report, the investigator will present proposed sanctions to the accused student. If the accused student accepts the sanctions, then those sanctions will be presented in a written decision letter. After acceptance of responsibility and sanctions, the accused student has three business days to reconsider that acceptance and request a hearing. Accused students who do not accept responsibility or the investigator’s proposed sanctions will have their matter heard by the Title IX Grievance Committee.

Students who accept responsibility and the sanction recommendation of the investigator cannot appeal the decision.

Title IX Grievance Committee
The Title IX coordinator or designee will convene the Title IX Grievance Committee (committee) to conduct a hearing once charges have been assigned following an investigation, and the accused student has not accepted responsibility or has not accepted the investigator’s proposed sanction. The committee is responsible for determining whether it is more likely than not that the accused individual violated the Student Code of Conduct. If the accused student is found responsible, the committee shall assign appropriate sanctions in accordance with this policy and the Student Code of Conduct process. The goal of the hearing is to provide a resolution through an equitable process, respecting the rights of all participants.

Composition
The Title IX Grievance Committee shall be composed of university staff members who are trained annually on Title IX issues, investigations
and hearing practices. In each hearing, the committee shall consist of three members, with one designated as the chair, who is charged with conducting the hearing.

Jurisdiction
This policy shall apply to conduct that occurs on university-owned or leased property, at university-sponsored events, as well as off campus. Students shall be responsible for their conduct from the time of application for admission through the awarding of a degree, as well as during periods between terms of actual enrollment, study abroad and leaves of absence or suspension. The committee maintains the authority to adjudicate alleged violations of the Student Code of Conduct that are related to the same incident under review, though may not be directly related to gender-based conduct.

Advisers
Advisers serve as a moral and emotional support for students during committee hearings, and can assist with meeting preparation. Advisers are not permitted to advocate for a student or speak on their behalf during a committee hearing. Students who are witnesses to the incident or are otherwise involved in the matter before the committee cannot serve as advisers.

Hearing Process
The investigator(s) will meet with both the complainant and the accused student prior to the hearing to outline the hearing process and answer questions. Prior to the hearing, the Title IX coordinator or designee will:

- be available to both the complainant and accused student to answer questions and address concerns with the process;
- schedule the committee hearing, and select committee members from the pool of eligible members based solely on availability and maintaining a committee of mixed genders;
- select the committee chair from among the three selected committee members;
- contact witnesses and work to ensure their availability for the committee hearing;
- arrange accommodations intended to limit contact between hearing participants (i.e. arranging accommodations in different rooms, setting up physical barriers in the hearing room);
- prepare copies of all reports and documentary information to be disseminated to the committee, complainant and accused student before the hearing.

At the hearing, the following individuals may be present:

- three committee members
- complainant(s)
- adviser for complainant(s) (optional)
- accused student(s)
- adviser for accused student(s) (optional)
- investigator(s)
- witnesses (only one at any one time)
- Title IX coordinator (if not an investigator)
- university counsel

The chair will conduct the hearing in accordance with the hearing script. The script ensures that the investigation report is presented, and that the committee has the opportunity to ask questions of all parties and witnesses, if necessary.

Students needing accommodations may make requests through the Office of Student Accessibility. Audio or video recording devices are not permitted at committee hearings.

Additionally, the hearing script ensures:

- all parties are introduced;
- all conduct code charges are read;
- the accused student is provided an opportunity to plead “responsible,” “not responsible,” or decline to make a plea, for each conduct code charge;
- the investigator(s) will present the results and findings of the investigation;
- the committee can ask questions of the investigator, parties and witnesses.

If any individual should become disruptive during the hearing, including witnesses and advisers, the chair maintains the discretion to remove that individual from the hearing.

At the conclusion of the investigation presentation and questioning, the committee will deliberate privately to determine the accused student's responsibility for the charged conduct code violations. All decisions require a majority vote of the committee.

After the committee makes a decision, the committee will reconvene with the parties and the investigator(s), and the committee chair will announce the committee's decision. If the accused student is found responsible for any conduct code violations, the committee will commence the sanction phase of the hearing. If the accused student is found not responsible for all conduct code violations, the hearing ends.

During the sanction phase of the hearing, the hearing script will direct the committee to:

- accept optional impact statements from both parties, verbally and/or in writing;
- ask the Title IX coordinator or designee to disclose the accused student's past student conduct code violations, if any;
- ask the Title IX coordinator or designee for sanction parameters, as defined by this policy for the applicable code of conduct violations.

At the conclusion of the sanction phase, the committee will deliberate privately. All sanction decisions require a majority vote. After a sanction decision is made, the committee will reconvene with the parties and the investigator(s) to announce the sanction decision and close the hearing.

After the conclusion of the hearing, the investigator(s) will meet with both parties and answer and questions about the sanctions and any post-hearing requirements. The committee has one business day from the close of the hearing to produce a written decision letter to both parties. Responsibility for the decision letter falls to the chair. Once completed, the decision letter is delivered to the investigator(s) for simultaneous delivery to both parties.

Sanctions-only Hearing
Should the accused student accept responsibility for all charged violations of the code of conduct, but disagree with the investigator's proposed sanction, a sanctions-only hearing will be conducted. This hearing, after the presentation of the investigation findings and the opportunity for questioning, moves directly to the sanction phase described above.
Sanctions

The following are possible sanctions for incidents reviewed under this policy:

- Students found responsible for violating this policy in regard to nonconsensual sexual contact or intimate partner violence will likely receive a sanction ranging from probation to expulsion, depending upon the severity of the incident and any previous violations of the Student Code of Conduct.
- Students found responsible for violating this policy in regard to nonconsensual or forced sexual intercourse will likely receive a sanction of suspension, dismissal or expulsion.
- Students found responsible for violating this policy in regard to sexual harassment, sexual exploitation, or other gender-based misconduct will likely receive a sanction ranging from an official reprimand to expulsion, depending upon the severity of the incident and any previous violations of the Student Code of Conduct.
- The committee will sanction students found responsible for violations of the Student Code of Conduct not related to this policy in accordance with sanctions used in the general Student Conduct Process.

The committee reserves the right to increase or decrease the recommended sanction guidelines listed above in the case of significant mitigating or aggravating factors. Neither the committee nor the appeal officer will deviate from the guidelines listed above unless significant mitigating or aggravating factors exist. The committee also reserves the rights to include additional sanctions, educational or otherwise, in accordance with the general student conduct process.

Parental Notification

Quinnipiac reserves the right to communicate with a parent or guardian of the accused student on any student conduct action taken by the university, in accordance with the Family Educational Rights and Privacy Act (FERPA).

Appeals

After receiving notification of the committee's decision, both the complainant and the accused student have five business days to notify the Title IX coordinator of their intent to appeal the decision. An appeal form may be obtained from the Title IX coordinator or designee and a formal letter of appeal specifying the grounds upon which the appeal is based and supporting information must be submitted within five business days of the receipt of the appeal form. The Title IX coordinator has the discretion to extend the deadline for submission of a letter of appeal.

Sanction(s) imposed by the committee will remain in effect while the appeal is pending. The letter of appeal specifies the grounds upon which the appeal is based, and how those grounds materially affected the outcome (responsibility or sanctions) of the original meeting.

The letter of appeal must be completed and signed by the student or submitted directly from the student's Quinnipiac University email account.

Once the appeal materials are submitted, the other party and the investigator(s) may submit materials in response to the appeal. Other parties will be assigned an appropriate deadline for submission of materials by the Title IX coordinator or designee. Complainants or accused students who fail to attend the committee hearing forfeit the right to request an appeal.

The accepted grounds for an appeal are:

- additional and/or new relevant information was not available at the time of the committee hearing.
- an error in the process or an abridgement of rights, as outlined by this policy, which materially impacted the outcome of the hearing.
- the sanction(s) assigned by the committee did not adhere to the sanction guidelines stated in this policy.

The university Title IX coordinator reviews requests for appeals or designates a trained senior university staff member to serve as the appeal officer. If the appeal letter(s) does not bring forward sufficient grounds for appeal, the appeal will be denied and the matter will be closed.

If the Title IX coordinator, or designee, determines that the appeal should be considered, the Title IX coordinator, or designee, may convene a formal appeal panel, which can:

- affirm the decision of the committee. In this case, the initial decision is final.
- remand the matter back to the committee to make a decision in light of the appeal officer or panel's findings.
- initiate a new Title IX Grievance Committee hearing.

Compliance with Sanctions and Accommodations

At the conclusion of the Title IX Grievance Committee process, the Title IX coordinator will be responsible for ensuring compliance with all assigned sanctions, and to make any accommodations with the goal of preventing the recurrence of sexual and/or gender-based harassment.

Complaints of Sexual Misconduct Against a Faculty Member, Staff Member, Administrator or Third Party

Reports of gender-based misconduct by a faculty member, staff member, administrator or third-party affiliated with the university should be filed with the university Title IX coordinator or deputy coordinator for faculty, staff and vendors.

Investigation

The deputy Title IX coordinators in coordination with the university Title IX coordinator, are designated to formally investigate grievances, address inquiries and coordinate the university’s compliance efforts regarding complaints and grievances against faculty members, staff, administrators and third parties. Notice of a formal complaint can be made in writing or orally to an appropriate staff member (Residential Life, Public Safety, Student Affairs, Human Resources, etc.), though the university encourages community members to submit grievances in writing (electronically or by hard copy) to the deputy coordinator, the university Title IX coordinator or other appropriate staff member.

The complaint should clearly describe the alleged incident, when and where it occurred, and the desired remedy, if known. Additionally, the initiator of a formal complaint should submit any supporting materials in writing as quickly as possible.

Completion of the investigation and grievance procedures should be complete within 60 days of the receipt of the complaint, oftentimes
sooner. If this process lasts longer than 60 days, the deputy coordinator will communicate the reasons and expected timeline to all parties.

**Interim Remedial Action**

After reviewing the complaint, the deputy coordinator, or the lead investigator in consultation with the deputy coordinator, may enact interim remedial actions in order to stop the alleged harassment or discrimination, and/or to protect the safety and well-being of the individuals and university community. Interim remedial action is preliminary, and only in effect until the process is complete and a decision is rendered. Interim remedial actions include, but are not limited to, no contact orders, changes in academic schedule and accommodations, campus restrictions and university suspensions. These actions may be instituted at any point during the investigation process.

**Preliminary Investigation**

After reviewing the complaint, the deputy coordinator will:

- determine the identity and contact information of the complainant;
- identify which policies, if any, were allegedly violated;
- meet the complainant to inquire about and finalize complaint;
- conduct an immediate initial investigation to determine if there is cause to proceed with further investigation.

If there is insufficient evidence to support a reasonable cause for the complaint, the grievance will be closed with no further action.

**Formal Investigation**

If the deputy coordinator determines that there is reasonable cause to pursue the complaint, a formal investigation will be initiated. During the formal investigation, the deputy coordinator, or a trained lead investigator identified by the deputy coordinator, will:

- identify and select a second trained investigator to assist with the formal investigation. The deputy coordinator may appoint additional investigators as necessary.
- commence a thorough and impartial investigation by developing a strategic investigation plan, including a witness list, information list, intended investigation timeframe, and order of interviews for all witnesses and the accused individual;
- give the accused individual proper notice of the investigation and provide an opportunity for the accused individual to provide information;
- complete the investigation in a timely manner, without unnecessary deviation from the intended timeline;
- maintain communication with the complainant and the accused individual on the status of the investigation and overall process.

At the conclusion of the investigation, the deputy Title IX coordinator will determine whether there has been a Title IX violation using a preponderance of the evidence standard and will consult with other university offices as necessary in reaching a decision regarding the written grievance. The deputy coordinator will prepare a written report setting forth findings, conclusions and recommended actions to be taken, if applicable.

In the event the deputy coordinator determines that there has been a violation, a report will be presented to Mark Thompson, executive vice president and provost of Quinnipiac University, or his designee. Upon notification of a violation, Thompson, or his designee, will take appropriate action to ensure that the violation is remedied, that it will not recur and that the discriminatory effects upon the complainant are corrected to the extent possible.

While the time it may take to investigate and resolve a Title IX grievance will depend on a variety of factors, including the nature and scope of the allegations, the university will seek to resolve the grievance promptly.

**Informal Resolution**

In instances where it is deemed possible and safe, the university may choose to resolve reports through informal means. If it is determined that an informal resolution may be appropriate, the Title IX coordinator or deputy coordinator will speak with the complainant about this option. If the complainant agrees, the Title IX coordinator or deputy coordinator will speak with the person alleged to have engaged in the misconduct. If a satisfactory resolution is reached through this informal process, the matter will be considered completed. If these efforts are unsuccessful, the formal investigation process will commence. The informal resolution process will not be used in cases involving allegations of sexual assault.

**Appeals**

The complainant or the accused may notify the university Title IX coordinator of an intent to appeal the decision within five business days of learning of the determination. Upon notification of intent to appeal, the complaining party must submit an appeal letter specifying the grounds upon which the appeal is based and any supporting materials within five business days. The Title IX coordinator has the discretion to extend the deadline for submission of a letter of appeal. The only accepted grounds for appeal are:

- additional and/or new relevant information was not available at the time of the investigation; or
- the investigator did not consider evidence that would have materially impacted the outcome of the investigation.

Once the appeal materials are submitted, the other party and the investigator will be notified of the appeal and given an opportunity to submit materials in response to the appeal.

The university Title IX coordinator may decide to:

- affirm the deputy coordinator’s decision. In this case, the initial decision is final.
- modify the deputy coordinator’s decision and present a report with findings and recommendations to Thompson or his designee. Upon receipt of the university Title IX coordinator’s report and recommendations, Thompson, or his designee, will take appropriate action to ensure that any violation is remedied.
TRANSFER CREDIT – CURRENT UNDERGRADUATES

Quinnipiac University is committed to having its students take courses that best fit their required curricula at the appropriate academic level. Once undergraduate students have matriculated at Quinnipiac, they normally are not allowed to take courses for credit elsewhere. If there is a compelling reason, the university will accept up to two courses for transfer credit from an accredited institution, assuming grades of “C” or better. To receive credit, the course(s) must be preapproved by the appropriate dean based on an official course description provided by the student. Ordinarily, permission to take a summer or intersession course elsewhere is NOT given if:

1. the course is offered during the same period by QU Online, or
2. the course is offered during the same period on the Quinnipiac campus and the student is residing in the state of Connecticut.

If either of these two requirements is inappropriate for an individual student, he/she may petition for an exception from the dean through the university’s Variant Procedure (p. 149) process. Once a student has completed (or transferred) a total of 48 credits, he/she will not be permitted to take a course at a junior or community college offering two-year terminal degrees. Students must take their final 45 credits at Quinnipiac. Students who study abroad during the summer or winter intercession are exempt from the two-course limit.

Quinnipiac University has different policies that apply to courses taken elsewhere through its approved Study Abroad (p. 59) and Washington, D.C., Semester (p. 194) programs.

Please see the Advanced Standing/Placement (p. 18) page of the catalog for more information on transferring credit for incoming freshmen and incoming undergraduate transfer students.
TRANSFER CREDIT – GRADUATE STUDENTS

Graduate course credit completed with a grade of B or better at other regionally accredited institutions prior to matriculation at Quinnipiac may be transferred into a graduate program at Quinnipiac. Consistent with State Department of Education policies, upon individual review the MAT program may accept up to 6 transfer credits completed with a grade of B- or higher.

The normal transfer credit limit for each graduate program is indicated below, although additional transfer credits may be considered on an individual basis. Requests for transfer of credit must be submitted to the appropriate graduate program director along with official transcripts from the institution(s) where the credits were earned. Ordinarily, transfer of credit is granted for courses demonstrated to be similar in content, level of instruction and objectives to courses within a student's graduate curriculum at Quinnipiac. Additional program-specific requirements are indicated below.

Graduate programs that do not accept transfer credits:
- MHS in Advanced Medical Imaging and Leadership
- MMSc in Anesthesiologist Assistant
- MHS in Cardiovascular Perfusion
- Master of Occupational Therapy
- Doctor of Physical Therapy
- MHS in Physician Assistant
- MHS in Pathologists’ Assistant
- MHS in Radiologist Assistant
- MD program
- Health Care Compliance Certificate
- Long-Term Care Administration Certificate

Graduate programs that may accept up to 3 transfer credits:
- MS in Accounting
- MS in Business Analytics
- Occupational Therapy Doctorate
- Occupational Therapy Certificate
- Online Course Design Certificate
- MS in Organizational Leadership

Graduate programs that may accept up to 6 transfer credits:
- MAT Elementary Education
- MAT Secondary Education
- MS in Cybersecurity
- MS in Instructional Design
- MS in Special Education
- Special Education Certificate

Graduate programs that may accept up to 9 transfer credits:
- MHS in Biomedical Sciences
- Master of Business Administration
- MS in Molecular and Cell Biology
- Master of Science in Nursing
- Doctor of Nursing Practice
- MS in Teacher Leadership
- Educational Leadership Certificate

All MSN and DNP nursing programs will only consider transfer of course credit taken within the last five years. In addition, the Nurse Anesthesia program will only consider transfer credits of the nursing core essentials, not sciences or anesthesia courses. For the JD program, the maximum number of credits a student can transfer from another law school is 30.

For the MSW program, a maximum of 9 credits may be transferred from CSWE-accredited MSW programs; only 6 of these may be for electives. A maximum of 6 graduate credits from a related discipline may be eligible for transfer credit. Only courses completed a grade of B or higher within five years of matriculation into the Quinnipiac MSW program will be considered for transfer.

Graduate level courses taken to complete a degree program at Quinnipiac may be applied to a second graduate degree. These courses must be part of the approved curriculum of the second degree. Further, a minimum of 15 credits of additional coursework must be completed before the conferral of a second degree. Students in dual-degree programs (combined undergraduate and graduate) may not transfer graduate course credit from another institution.
TUTORIAL STUDY

Quinnipiac University makes every effort to schedule courses so students can complete their curriculum in a convenient period of time. Occasionally, a student may need to take a course not scheduled during a particular semester to complete a program or meet a professional requirement. In such cases, students may request to take a course on an individual, tutorial basis. Courses taught on a tutorial basis may not have regularly scheduled class times. However, tutorial courses have the same academic standards and performance requirements of regularly scheduled courses. Applications for tutorial courses ("Individual Study Form") can be obtained from the program director, who will refer the student to the proper faculty member. The application with the instructor's signature must be filed before the first day of classes together with a registration form.
USE OF GRADUATE COURSE CREDITS BY UNDERGRADUATE STUDENTS

Advanced undergraduate students who lack a bachelor’s degree may take graduate courses in some programs. Graduate courses are taught at an advanced level and no special consideration is made for undergraduate students who have enrolled in graduate classes on a space-available basis. With the permission of the dean’s office of the school/college, up to three courses (9-12 graduate credits) may be used to fulfill undergraduate degree requirements. These credits may be applied to meet the requirements of a subsequent graduate degree program if they are a part of the approved curriculum of the graduate program. Students enrolled in accelerated dual-degree programs may have the opportunity to apply more graduate courses to an undergraduate degree (see the program’s curriculum for details). However, a minimum of 24 graduate credits must be taken after the conferral of the undergraduate degree, to earn a graduate degree. Students also must meet all of the curriculum and graduation requirements of their individual graduate degree program.
VARIANT PROCEDURE

All Quinnipiac University academic policies and requirements are designed to maintain the standards of academic quality and to promote student learning. Students and faculty are bound by the policies and requirements outlined in this catalog. However, individual circumstances may warrant a student to petition to be exempted or granted a variance from a particular policy or requirement. This petition should be stated briefly on a Variant Procedure Form by the student. It is strongly recommended that the variant form be accompanied by a letter of explanation and supportive documentation.

Variant Procedure Form must be examined and signed in turn by the department chair or program director, academic dean of the student’s home school/college (or designee) and the vice president for academic innovation and effectiveness.
WITHDRAWAL FROM A COURSE

Approved by the Faculty Senate in Spring 2019

Regular Withdrawal

Students can drop courses through the fifth class day of the term (fall/spring 15-week courses) or through the second class day of the term (summer sessions I and II, fall/spring 7-week courses, J-term). If a course is dropped during these periods, no record of registration in the course will appear on the student’s academic record. However, tuition charges may still apply. Students should refer to the university’s refund policies (https://parents.qu.edu/finances/withdrawal-refund-policies.html) for more information.

Dropping a course after the add/drop period has ended is considered a course withdrawal. A student may withdraw from a course offered in a traditional semester (15-week) format up to the end of the 10th week of classes. For courses offered during the summer or in accelerated or other nontraditional formats, the withdrawal period extends up to the completion of 60 percent of the scheduled class sessions. Course withdrawals after the end of add/drop period are considered “attempted but not completed” course credits and are noted on a student’s transcript with a non-punitive grade of W, which is not included in GPA calculations.

For full-time undergraduate students, in accordance with the undergraduate refund policy (https://parents.qu.edu/finances/withdrawal-refund-policies.html#undergraduaterrefundpolicy), there is no tuition refund in any circumstance for course withdrawals after add/drop period. Graduate and part-time students should refer to the university website for the graduate and part-time refund policy (https://parents.qu.edu/finances/withdrawal-refund-policies.html#graduateandparttimerefundpolicy).

Course withdrawal also may impact a student’s satisfactory academic progress and financial aid eligibility.

Late Withdrawal

Students are expected to know when the last day to drop a class is and govern themselves accordingly. A late withdrawal may be granted only when a student has experienced circumstances of serious and compelling nature that the student could not reasonably have been expected to satisfactorily complete the academic period or submit a petition for regular withdrawal by the deadline specified in this policy and on the Academic Calendar (p. 12). Such serious and compelling circumstances may include (but are not limited to) hospitalization, debilitating mental illness, or equivalent distress.

Following the regular withdrawal deadline, until the last day of classes but before the course grade has been conferred, students may request a late withdrawal by contacting the dean (or designee) of the student’s home school. The request must be accompanied by appropriate documentation to substantiate the student’s reasons for seeking late withdrawal. If the request is approved, the dean (or designee) will notify the instructor, contact the Office of the Registrar to process the late withdrawal and the student will receive a non-punitive grade of “W” in the course. The decision of the dean (or designee) regarding late withdrawals is final. There is no tuition refund in any circumstance for late course withdrawals.

Exceptional Circumstances

In the event a student experiences circumstances of such serious and compelling nature that the student could not reasonably have been expected to complete the final exam period or submit a petition for regular or late withdrawal by the deadlines specified in this policy and on the Academic Calendar (p. 12), the student may submit a Variant Procedure request to seek a non-punitive “W” in a course.

The variant procedure must be accompanied by appropriate documentation to substantiate the student’s reasons for seeking the course withdrawal. The deadlines for submitting this variant procedure request are February 1 for the immediately preceding fall semester, March 1 for the immediately preceding J-term, July 1 for the immediately preceding spring semester, and October 1 for the immediately preceding summer session(s). Petitions submitted after the deadlines may be summarily denied for untimeliness. If the request is approved, the Vice President of Academic Innovation and Effectiveness will notify the instructor and contact the Office of the Registrar to process the withdrawal so that the student receives a non-punitive grade of “W” in the course. The decision of the Vice President of Academic Innovation & Effectiveness will notify the instructor and contact the Office of the Registrar to process the withdrawal so that the student receives a non-punitive grade of “W” in the course. The decision of the vice president of academic innovation & effectiveness will notify the instructor and contact the Office of the Registrar to process the withdrawal so that the student receives a non-punitive grade of “W” in the course. The decision of the vice president of academic innovation & effectiveness regarding course withdrawals is final. There is no tuition refund in any circumstance for late course withdrawals.

Summary of Course Withdrawal Deadlines

See the Academic Calendar (p. 12) to determine the exact date of the add/drop and withdrawal deadlines. All forms/requests must be submitted by 11:59 pm on the deadline date.

WITHDRAWAL FROM THE UNIVERSITY

Students considering withdrawal from Quinnipiac University should meet with their academic adviser or department chair to explore the available alternatives. If withdrawal is the student's final decision, it is recommended that he/she meet with the dean of his or her school.

Honorable release is granted when all financial obligations to Quinnipiac University have been met. The refund policy is available in the Bursar’s Office.

A student receiving aid for education for the Veterans Administration must consult with the registrar and comply with Veterans Administration regulations. A student holding a Stafford Loan or Nursing Student Loan must have an interview in the financial aid office to ensure a clear understanding of repayment obligations. For details, see the Bursar’s Office webpage (https://parents.qu.edu/parents-resources/bursar).

If a student plans to withdraw and later is suspended, dismissed, placed on warning for unsatisfactory academic performance (including academic integrity sanctions), or suspended or expelled as the result of a judicial decision, the sanctions take precedence over the withdrawal and stand as a matter of record. Any academic warning becomes operative in the event that the student is readmitted to the university.

Administrative Withdrawal

Students are administratively withdrawn by the university if they have not registered for classes by the end of the drop/add period of any semester, if they have not returned to the university when the approved period of leave of absence has expired, or if they have not returned at the time specified after academic or disciplinary suspension and the period of suspension has not been extended.

Students who have been administratively withdrawn from the university must reapply for readmission. Readmission to Quinnipiac University is not guaranteed. A student who is granted readmission to the university may not be guaranteed readmission to the major in which he or she was enrolled at the time of administrative withdrawal. All students who are readmitted after an administrative withdrawal must comply with degree program requirements in effect at the time of readmission.

Readmission

Students who are not on an official leave of absence and who wish to return to Quinnipiac University must apply for readmission through the Admissions Office. Any student who has been away from the university for two full semesters must reapply for admission. Official transcripts of any colleges attended while the student has been away from Quinnipiac must be provided. The Office of Admissions, the Office of Academic Innovation & Effectiveness and the Dean of Students Office will determine the student’s eligibility for readmission.

A student who is granted readmission to the university may not be guaranteed readmission to the major in which he or she was enrolled at the time of administrative withdrawal. All students who are readmitted after an administrative withdrawal must comply with degree program requirements in effect at the time of readmission.

General Requirements

The requirements for the bachelor of arts and bachelor of science degrees are qualitative and quantitative. Completion of 120 credits with a grade point average of C or better is not in itself sufficient to qualify for graduation. In addition to the general Quinnipiac requirements, eligibility for most bachelor of arts and bachelor of science degrees requires the satisfactory completion of both arts and sciences requirements and those in a major or field of concentration. Specific major requirements are noted below under the individual departmental or area descriptions. Students should be cautioned that an average of C, or 2.0, in the student's major is a minimum requirement for each major and that some departments may require higher standards as noted.

Of the 120 credits required for the bachelor's degree, only 6 credits of workshop courses and/or physical education courses may be applied. Primary responsibility for knowing and completing all course requirements rests with the student.

College of Arts and Sciences Curriculum

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study. For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student's major. These areas are fine arts, humanities, natural sciences and social sciences. For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is here identified with a catalog subject code, such as PL, CJ, WS, MA, etc.) A course taken to fulfill the CAS breadth requirement may not simultaneously fulfill any UC requirement.

A student enrolled in the Dual-Degree BA/JD (3+3) or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

Academic Advising

The College of Arts and Sciences places every student, upon matriculation, with an individual faculty adviser who can best help him or her form a personalized academic plan. An outcome of each academic adviser’s individualized guidance is that students come to understand the relationship between a particular discipline and a range of satisfying careers. Students also learn how an arts and sciences major can prepare them especially well for a life of consequence and meaning. Although the primary responsibility for setting academic goals and selecting courses rests with the student, the academic adviser fosters an ongoing conversation that cultivates self-reflection and development.

Students who enter the College of Arts and Sciences with a declared major are matched with a faculty adviser in that department. Each undeclared student works individually with an academic adviser to design a plan that is uniquely tailored to his or her needs and interests. During the preregistration period each semester, all students in arts and sciences meet with their academic advisers before selecting and registering for courses.

Career Development

In the College of Arts and Sciences, the career development office works with students to create and navigate a personalized career development program including major choice, personal branding, resume and LinkedIn development, networking, job search, professional development opportunities and graduate school advisement. Students can gain valuable work experience and explore career options through participation in credit-bearing experiential learning opportunities, including internships, research projects, shadowing, community service and part-time and summer employment.

Degrees in Arts and Sciences

Bachelor’s Degrees

The College of Arts and Sciences offers bachelor of arts (p. 154) and bachelor of science degrees (p. 154).

Collaborative for Interdisciplinary/Integrative Studies (p. 156)
The Collaborative for Interdisciplinary/Integrative Studies affords students opportunities through advising, course work and fieldwork to put into practice the relevance and value of the arts and sciences for their everyday lives. It houses the Interdisciplinary Studies major, the Independent Major, the Independent Minor, and eight interdisciplinary minors (Asian Studies, Global Public Health, History and Philosophy of Science, International Studies, Irish Studies, Middle Eastern Studies, Sports Studies, and Women’s and Gender Studies).

Independent Major (p. 156)

A student may design a unique major program to fit his or her individual goals. The responsibility for the planning of such a program rests with the student proposing it. A proposal for an independent major must contain suitable justification and a coherent curricular plan. The full proposal must be submitted to the dean for approval and also must have the approval of a three-member faculty committee, chosen by the student, which will work with the student to plan the program. Independent major proposals must be submitted no later than the first semester of the junior year. Independent majors must include at least 24 credits of course work at the 300 level or above, as well as a capstone project or final evaluation project that is outlined in the proposal.

Graduate Degrees

Master’s Degree in Molecular and Cell Biology

The Master’s Degree in Molecular and Cell Biology is a two-year program for students who have already earned their bachelor’s degree in a biological, medical or scientific field. The mission of the Department of Biological Sciences is to prepare students for employment in research fields available in pharmaceutical companies, universities and hospitals as well as to provide an excellent foundation for students intending to pursue studies in professional health care fields and doctoral programs.
Dual Degrees
The College of Arts and Sciences offers several dual-degree programs (p. 154) allowing highly motivated students to connect undergraduate studies directly to graduate degrees and professional preparation.

Minors
In addition to major programs, a student may apply to have a minor recorded on his or her transcript. The College of Arts and Sciences offers minors in most of the subjects offering a major as well as a variety of interdisciplinary minors (p. 157) and an Independent Minor (p. 157).

Admission Requirements: College of Arts and Sciences
The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Mission Statement
The faculty and students of the College of Arts and Sciences share a belief in the value of a comprehensive college education—an education that requires foundational study in the natural sciences, social sciences, humanities and fine arts, as well as a concentration in one of 20 majors. A degree in arts and sciences helps students build fulfilling and meaningful lives and is a strong basis for a pre-professional education. Careers in the 21st century require great creativity, critical thinking and fine writing. The ability to think is more important than any narrow job preparation. The arts and sciences curricula require demanding study while providing extensive faculty support in small classes and laboratories.

Transfer Requirements
Transfer students should apply for admission by mid-November for the Spring (January) semester, or by April 1 for fall (August) entry. Official transcripts from all institutions attended must be provided. Most programs look for a minimum grade point average of 2.5 (some higher) for consideration.

Bachelor of Arts
- Bachelor of Arts in Criminal Justice (p. 203)
- Bachelor of Arts in English (p. 172)
- Bachelor of Arts in Game Design and Development (p. 210)
- Bachelor of Arts in Gerontology (p. 204)
- Bachelor of Arts in History (p. 176)
- Bachelor of Arts in Interdisciplinary Studies (p. 156)
- Bachelor of Arts in Law in Society (p. 179)
- Bachelor of Arts in Mathematics (p. 183)
- Bachelor of Arts in Philosophy (p. 189)
- Bachelor of Arts in Political Science (p. 190)
- Bachelor of Arts in Sociology (p. 205)
- Bachelor of Arts in Spanish Language and Literature (p. 186)
- Bachelor of Arts in Theater (p. 212)
- Independent Major - Bachelor of Arts (p. 156)

Bachelor of Science
- Bachelor of Science in Behavioral Neuroscience (p. 196)
- Pre-Medical Studies
- Bachelor of Science in Biochemistry (p. 166)
- Bachelor of Science in Biology (p. 158)
  - Pre-Medical Studies
- Bachelor of Science in Chemistry (p. 167)
- Bachelor of Science in Economics (p. 170)
- Bachelor of Science in Psychology (p. 198)

Dual-Degrees
- Accelerated Dual-Degree Bachelor’s/JD (3+3) (http://catalog.qu.edu/academics/dual-degree-ba-bs-jd-3-3) (p. 54)
- Accelerated Dual-Degree (p. 346) Bachelor’s/MSW (p. 346) (3+2) (p. 346)
- Accelerated Dual-Degree (p. 213) BA/MBA in Theater (p. 213) (3+1) (p. 213)
- Dual-Degree (p. 348) BA/MAT (p. 348) or BS/MAT in Elementary Education (4+1) (p. 348)
- Dual-Degree (p. 350) BA/MAT (p. 350) or BS/MAT in Secondary Education (4+1) (p. 350)
- Dual-Degree (p. 353) BA/MBA (p. 353) (4+1) (p. 353)
- Accelerated Dual-Degree (p. 162) BS/MS in Molecular and Cell Biology (p. 162) (3+1) (p. 162)
- Dual-Degree (p. 169) BS/MS in Molecular and Cell Biology (p. 163) (4+1) (p. 163)

For a complete list of College of Arts and Science minors, please see Minors (p. 154).

COLLABORATIVE FOR INTERDISCIPLINARY/INTEGRATIVE STUDIES

The Collaborative for Interdisciplinary/Integrative Studies provides students with opportunities—through advising, coursework and fieldwork—to put into practice the relevance and value of the arts and sciences for their everyday lives. The Collaborative oversees the administration of interdisciplinary programs, supports the development of interdisciplinary curricula and initiatives, and promotes collaboration among faculty in teaching and research. It houses the Interdisciplinary Studies major, the Independent Major, the Independent Minor and eight interdisciplinary minors (Asian Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/asian-studies-minor), Global Public Health (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/global-public-health-minor), History and Philosophy of Science (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/history-philosophy-science-minor), International Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/international-studies-minor), Irish Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/irish-studies-minor), Middle Eastern Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/middle-eastern-studies-minor), Sports Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/sports-studies-minor) and Women’s and Gender Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/womens-gender-studies-minor)). In addition, the Collaborative sponsors interdisciplinary initiatives, as well as programs and events that are open to and benefit the entire university community.

The Collaborative for Interdisciplinary/Integrative Studies is a signature program of the College of Arts and Sciences at Quinnipiac University, launched in 2016 with generous support from the Davis Educational Foundation. Its mission is to afford students and faculty opportunities to put into practice the relevance and value of the arts and sciences for their everyday lives. The Collaborative oversees the administration of interdisciplinary programs, supports the development of interdisciplinary curricula and initiatives, and promotes collaboration among faculty in teaching and research.

Bachelor of Arts in Interdisciplinary Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-integrative-studies/ba-interdisciplinary-studies)

Independent Major (p. 156)
Independent Minor (p. 157)
Interdisciplinary Minors (p. 157)

Student Learning Outcomes

With an individually designed curriculum, specific student learning outcomes vary. Every student works toward the following outcomes through the advising process alone.

1. Effective Communication: Communicate effectively in speaking and in writing.
2. Social Intelligence: Engage collaboratively and responsibly, interact attentively and appropriately with others.
4. Critical and Creative Thinking: Think independently and creatively from an informed understanding.
5. Analysis: Demonstrate competency in evaluating and constructing arguments based on logic and evidence.

Independent Major

A student may design a unique major program to fit his or her individual goals. The responsibility for the planning of such a program rests with the student proposing it, and a proposal for an independent major must contain suitable justification and a coherent curricular plan. The full proposal must be submitted to the dean for approval by no later than the first semester of the junior year and also must have the approval of a three-member faculty committee, chosen by the student, which works with the student to plan and carry out the program.

Curriculum

The independent major is designed for students who would like to focus their attention in a specific area of study not currently offered by the university. Independent major programs are designed individually by students, in consultation with a faculty member in the College of Arts and Sciences. Therefore, the curriculum for this major will vary by student. All independent majors must meet the following criteria:

- The major must consist of a minimum of 30 credits (may include some courses already completed).
- No fewer than 24 of the 30 credits must be at the 300 level or above. Note: CAS 420 does not count.
- The preponderance of courses must be offered by departments in the College of Arts and Sciences.
- The major plan must include a final assessment, which can take the form of a class or a project. This assessment must be appropriate for a College of Arts and Sciences major. The final assessment plan must be submitted by the second half of the junior year, and the assessment itself must be evaluated by the student’s committee at the end of the senior year.
- All University Curriculum (p. 61) requirements must be completed, outside the major.
- All College of Arts and Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements must be completed, outside the major.

Student Learning Outcomes

With an individually designed curriculum, specific student learning outcomes vary. Every student works toward the following outcomes through the proposal process alone.

1. Effective Communication: Communicate effectively in speaking and in writing.
2. Social Intelligence: Engage collaboratively and responsibly, interact attentively and appropriately with others.
4. Critical and Creative Thinking: Think independently and creatively from an informed understanding.
5. Analysis: Demonstrate competency in evaluating and constructing arguments based on logic and evidence.
Independent Minor

The College of Arts and Sciences offers independent minors. A student may design a unique minor program to fit his or her personal, academic and professional goals. The responsibility for the planning of such a program rests with the student proposing it, and a proposal for an independent minor must contain suitable justification, a coherent curricular plan and an appropriate title. The proposal must be submitted to the Director of the Collaborative for Interdisciplinary/Integrative Studies for approval and must also have the approval of a full-time CAS faculty member, chosen by the student, who will serve as the student’s advisor and work with the student to plan the program.

Independent minors must include at least 18 credits of coursework, at least six of which must be completed at the 300 level or above, and at least 12 of which must be in courses housed in CAS.

Full independent minor proposals should be submitted no later than the second semester of the sophomore year to start by no later than the first semester of the junior year.

The independent minor is designed for students of any major who would like to focus their attention in a specific area of study not currently offered by the University. Independent minor programs are designed individually by students, in consultation with CAS faculty. Therefore, the curriculum for this minor will vary by student. Areas of focus might include

- Single subjects for which no minor currently exists, such as Non-Western Literature or Ethics.
- Interdisciplinary fields, such as African American Studies, French Studies, Forensics, Genomics, Scientific Illustration or Public Policy.
- Problem-based inquiry, such as individual rights vs. public good, violent/non-violent activism or ending water/food insecurity.
- Skill areas, such as public speaking, leadership or creativity/innovation, or skills related to any of the Essential Learning Outcomes.

Program Minimum Requirements

- The minor must consist of a minimum of 18 credits (may include up to three courses already completed).
- No fewer than 6 of the 18 credits must be at the 300 level or above (neither Global Community nor the UC Integrative Capstone may count).
- At least 12 credits for the minor must be completed in courses offered by CAS departments.
- None of the courses included in the minor may overlap with courses in the major subject, or with courses in another declared minor.
- Independent minors may not be declared retroactively or based on more than 9 credits already completed or in progress.

Interdisciplinary Minors

Human culture, creativity and knowledge are often produced and experienced in the spaces across and between the traditional disciplines. Interdisciplinary minors—those that focus on areas of interest rather than established disciplines—afford students an opportunity to examine topics from multiple disciplinary perspectives. Through these cross-departmental minors, students embark on an ambitious, meaningful learning experience that complements their work in their majors and in the University Curriculum. Students hone critical intellectual skills by evaluating facets of human culture and the natural world from various viewpoints and integrating these insights to form new knowledge and understanding.

- Minor in Asian Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/asian-studies-minor)
- Minor in History and Philosophy of Science (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/history-philosophy-science-minor)
- Minor in International Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/international-studies-minor)
- Minor in Irish Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/irish-studies-minor)
- Minor in Middle Eastern Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/middle-eastern-studies-minor)
- Minor in Sports Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/sports-studies-minor)
- Minor in Women’s and Gender Studies (http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/womens-gender-studies-minor)
DEPARTMENT OF BIOLOGICAL SCIENCES

Programs in the Department of Biological Sciences provide scientific training as part of an arts and sciences education and develop an understanding of the nature of biological systems. Courses furnish a broad scientific background for advanced study in various biological and medical areas. Students may be admitted to advanced standing by obtaining satisfactory grades in the Advanced Placement Tests or the College Level Examination Program of the College Entrance Examination Board. Majors in the Department of Biological Sciences must achieve a science GPA of 2.25 (a minimum grade of “C-” is required in all courses with a “BIO” designation used to satisfy Biological Science Core or Biology Elective Requirements), and an overall GPA of 2.0 to qualify for graduation.

A score of 4 in the AP biology exam is required to receive credit for BIO 101—BIO 102, although taking BIO 150 and BIO 151 is highly recommended by the department, regardless of the AP biology score. A score of 3 on the AP biology exam will result in credit being granted for BIO 105—BIO 106. BIO 105—BIO 106 meets the needs of students in non-science areas, but not students in the biology majors.

The mission of the Department of Biological Sciences is to provide students with the breadth and depth of knowledge in biology that will allow them to:

1. Incorporate the biological sciences and its scholarly methodologies into the broad perspectives of an arts and sciences education and their own individual lives.
2. Continually reconstruct a worldview that is consistent with the current state of scientific knowledge.
3. Appreciate the unity of knowledge across disciplinary boundaries, and the ways in which the various fields of knowledge enlighten and illuminate one another.
4. Become useful and productive contributors within their chosen professions.
5. Continue learning independently throughout their lives.
6. Assess, from a critical and analytic perspective, the state of knowledge within a variety of biological subdisciplines.
7. Have at their fingertips the intellectual tools to formulate readily testable hypotheses, design sound experiments, analyze and evaluate data, and draw legitimate conclusions.

Bachelor's Degree

- Bachelor of Science in Biology (p. 158)

Minor

- Minor in Biology (p. 161)

Dual-Degree Programs

- Accelerated Dual-Degree BS/MS in Molecular and Cell Biology (3+1) (p. 162)
- Dual-Degree BS/MS in Molecular and Cell Biology (4+1) (p. 163)

Master of Science

- Master of Science in Molecular and Cell Biology (p. 164)

Bachelor of Science in Biology

Program Contact: Lise Thomas (Lise.Thomas@qu.edu) 203-582-8497

The BS in Biology program provides students with a biological and physical science foundation on which they can build a graduate degree in natural science or education, or use to pursue advanced degrees in the fields of medicine, dentistry, veterinary medicine or other health care professions. Those choosing to end their formal education with the bachelor’s degree will have a sufficient level of sophistication in biological science to assume a variety of positions with research institutions, governmental agencies or industry.

Students choose courses and follow a curriculum determined in consultation with their adviser.

Independent Study in Biology

1. Independent Study/Research can be used to satisfy the departmental requirement for Experiential Learning.
2. Independent Study cannot be used to satisfy departmental requirements other than Experiential Learning.
3. Students may not exceed a total of 8 credits of Independent Study while completing their undergraduate work.

Honors in Biology

1. An overall GPA of 3.0 or better is required. A GPA of 3.5 in biology is required.
2. Students should announce in writing their intention to pursue honors in biology to both the department chair and academic adviser, no later than May 1 in the spring term of their junior year.
3. Departmental honors students are required to take BIO 399H (Honors Research in Biological Sciences).
4. Students are each responsible for obtaining a sponsor for their project prior to May 1 of their junior year.
5. Successful completion of a senior research project is required. The project must include:
   a. a written proposal;
   b. the actual completion of an approved research project under the supervision and sponsorship of a full-time faculty member in the Department of Biological Sciences;
   c. the presentation of the outcome of the research project in the written format approved by the department; and
   d. a seminar presentation of the outcome of the research project.
6. Evidence of excellence in speaking and writing skills, documented by term papers, written work, oral presentations, and grades, as determined by the committee.
7. The actual granting of honors in biology is determined by all full-time faculty in the Department of Biological Sciences.

A list of the department faculty and their research interests is available on the CAS360 website. (https://cas360.qu.edu)

BS in Biology Curriculum

Students majoring in biology must meet the following requirements for graduation:

### Biology Electives

Select a minimum of one course from each of the following categories:

- Molecular and Cell Electives: 3
  - BIO 240 Cellular Communication
  - BIO 282 Genetics and Genetics Lab
  - BIO 317 Developmental Biology and Developmental Biology Lab
  - BIO 346 Cell Physiology and Cell Physiology Lab
  - BIO 365 Cancer Biology
  - BIO 382 Human Genetics and Human Genetics Lab
  - BIO 471 Molecular Genetics and Molecular Genetics Lab

- Organismal Electives: 3
  - BIO 323 Invertebrate Zoology and Invertebrate Zoology Lab
  - BIO 328 Human Clinical Parasitology and Human Clinical Parasitology Lab
  - BIO 352 Botany and Botany Lab
  - BIO 356 Aquatic Ecology and Aquatic Ecology Lab
  - BIO 358 Life on a Changing Planet and Life on a Changing Planet Lab

- Physiology Electives: 3
  - BIO 375 Physiological Models for Human Disease and Physiological Models for Human Disease Lab
  - BIO 383 Evolution

- Experiential Learning (Biological Component):
  - BIO 385 Experiential Inquiry in Biology 1-4
  - BIO 498 Independent Study in Biology 1-4
  - BIO 499 Independent Study in Biology 1-4

### Open Electives: 20 - 31

Total Credits: 120-140

Students choose courses and follow a curriculum determined in consultation with their adviser. The minimum number of credits required for graduation is 120. Students take open electives to fulfill the minimum number of credits for graduation. The recommended curriculum for the completion of the requirements for the BS in biology follows.

### Recommended Curriculum

#### Code   | Title                                                                 | Credits |
#### BIO 150 | General Biology for Majors and General Biology for Majors Laboratory | 4       |
#### CHE 110 | General Chemistry I and General Chemistry I Lab                       | 4       |
#### EN 101  | Introduction to Academic Reading and Writing                          | 3       |
#### MA 140  | Pre-Calculus                                                          | 3       |
#### BIO 151 | Molecular and Cell Biology and Genetics and Molecular and Cell Biology and Genetics Lab | 4       |
#### CHE 111 | General Chemistry II and General Chemistry II Lab                     | 4       |
#### EN 102  | Academic Writing and Research                                         | 3       |
#### MA 141  | Calculus of a Single Variable                                         | 3       |
#### BIO 152 | Ecological and Biological Diversity and Ecological and Biological Diversity Laboratory | 4       |
Students intending to pursue studies in professional health care fields are advised to complete additional courses chosen in consultation with their adviser.

**College of Arts and Sciences Curriculum**

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

**Student Learning Outcomes**

Upon completion of the Bachelor of Science in Biological Sciences, students will demonstrate:

1. **Knowledge and Comprehension**: Successful completion of the following objectives establishes that students have achieved an appropriate understanding of foundational biological concepts.
   1. Apply critical thinking and the scientific method to community/world issues and decision-making.
   2. Evaluate the quality and validity of scientific evidence.
   3. Create an understanding of biology as a whole by integrating and synthesizing information from multiple biological sub-disciplines.

2. **Applications and Analysis**: Successful completion of the following objectives demonstrates that students have the ability to apply foundational knowledge and analyze information/data to make meaning from it.
   1. Demonstrate basic skills and an understanding of safety procedures in the field and/or laboratory.
   2. Organize and interpret experimental data (from their own experiments and/or those in primary literature sources).
   3. Design and perform well-controlled experiments.

3. **Self and Society**: Successful completion of the following objectives indicates that students successfully utilize biological knowledge to present and defend opinions in a variety of arenas.
   1. Develop an in-depth understanding of the complexity of the natural world by understanding how a biologist thinks about complex systems.
Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

Minor in Biology

Program Contact: Lisa Kaplan (lisa.kaplan@qu.edu) 203-582-3588

Biology forms the foundation of a diverse array of fields, from zoology and botany to veterinary medicine and genetics. What’s exciting about this minor is that you’ll have a tremendous amount of control over the direction your experience takes. With an adviser from the Biology Department, you’ll chart your own path through the curriculum, choosing from a range of courses that fit your interests and your career ambitions. Our biology minor perfectly complements majors in the other sciences and related fields, such as chemistry and engineering.

In this program, you’ll have the flexibility to choose electives that broaden your knowledge and understanding of biology, or you can focus on a specific area of interest, such as ecology or physiology.

Biology Minor Curriculum

A minor in biology requires the completion of at least 20 BIO credits, 12 of which must be beyond the 100-level courses. At least one BIO class used to satisfy the minor requirements must be classified as an open, unrestricted or free elective course on the student’s Academic Evaluation/Progress Report. A minimum grade of C- must be achieved in all courses for the minor with an overall minimum cumulative GPA of 2.0. Students who wish to minor in biology are required to consult with the adviser to biology minors within the Biology Department to design a minor that best meets their needs.

### Accelerated Dual-Degree BS in Biology/MS in Molecular and Cell Biology (3+1)

**Program Contact:** Lise Thomas (Lise.Thomas@qu.edu) 203-582-8497

For highly qualified students, the Accelerated Dual-Degree BS/MS in Biology/Molecular and Cell Biology (3+1) provides an opportunity for students to achieve both a Bachelor of Science in Biology and a Master of Science within the field of Molecular and Cell Biology within a 4-year time-frame typically associated with only an undergraduate education. Students must maintain a GPA of at least 3.0 at the end of each school year for continued participation in the program.

**Recommended Curriculum:**

The minimum number of credits required for the undergraduate degree is 120, and the minimum number of credits required for the graduate degree is 34. A maximum of 9 graduate credits may be used to fulfill both undergraduate and graduate requirements.

The Accelerated Dual-Degree BS/MS program is designed for outstanding Biology majors — those who rank in the top 20 percent of their high school class and have a combined SAT score of 1200. Students are invited to join the program prior to matriculation. This program has several features, including flat tuition for the entire four years.

**Admission Requirements: College of Arts and Sciences**

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

### Dual-Degree BS in Biology/MS in Molecular and Cell Biology (4+1)

Program Contact: Lise Thomas (Lise.Thomas@qu.edu) 203-582-8497

The Department of Biological Sciences offers a Dual-Degree BS in Biology and MS in Molecular and Cell Biology. Upon satisfactory completion of all of the undergraduate curriculum requirements, students receive a Bachelor of Science in Biology. Students complete graduate-level biology courses during their senior year. A maximum of 9 graduate credits may be used to fulfill both undergraduate and graduate requirements. Students must maintain an overall GPA of 3.0 for all graduate courses. Students earn the MS in Molecular and Cell Biology upon satisfactory completion of all of the graduate curriculum requirements.

The MS in Molecular and Cell Biology provides an excellent foundation for students intending to pursue studies in professional health care fields and doctoral programs. It also offers a competitive edge for students wishing to pursue a career in biotechnology and biopharmaceutical industries.

### Dual-Degree BS in Biology/MS in Molecular and Cell Biology (4+1) Curriculum

Students who choose to pursue the five-year Master’s Degree in Molecular and Cell Biology are required to complete the following courses by the end of their junior year:

<table>
<thead>
<tr>

</tbody>
</table>

A minimum of two Biology Electives in separate elective categories (Molecular and Cellular Biology, Organismal, Physiology, or Experiential Learning). An elective in Molecular and Cellular Biology is strongly recommended.

### Recommended Curriculum

The minimum number of credits required for the undergraduate degree is 120, and the minimum number of credits required for the graduate degree is 34. A maximum of 9 graduate credits may be used to fulfill both undergraduate and graduate requirements.

Master of Science in Molecular and Cell Biology

Program Contact: Lise Thomas (Lise.Thomas@quinnipiac.edu) 203-582-8497

The College of Arts and Sciences offers a Master of Science in Molecular and Cell Biology program for both part-time and full-time students. Through the graduate program, the mission of the Department of Biological Sciences is to prepare students for employment in research fields available in pharmaceutical companies, universities and hospitals as well as to provide an excellent foundation for students intending to pursue studies in professional health care fields and doctoral programs. To achieve this goal, the program provides the students with highly specialized lecture and laboratory courses relevant in this rapidly growing field.

MS in Molecular and Cell Biology

Program of Study

The 34 credits required for the Master of Science in Molecular and Cell Biology include five courses (20 credits) in the science core, elective courses chosen in consultation with the program director and a thesis or non-thesis option (the non-thesis option requires the successful completion of a comprehensive examination; the thesis option requires 2 additional credits, for a total of 36 credits).

MS Thesis

The MS thesis option involves original laboratory research performed under the guidance of a thesis committee and the director of the molecular and cell biology program. The thesis committee evaluates a student's progress by approving the research project and subsequently advising the student whenever the need arises.

Comprehensive Examination

The written comprehensive exam (BIO 675) is a requirement of the non-thesis option for the MS in Molecular and Cell Biology. Students must demonstrate both breadth and depth of knowledge by illustrating a command of the subject matter obtained from individual courses into unified concepts, which link the student's own specialization to other fields of study. Completion of a minimum of four of the five core curriculum courses is required to register for the comprehensive examination. A minimum grade of a B- is required to pass the comprehensive examination. Students must meet with the program director before registering for the comprehensive exam.

Student Learning Outcomes

Upon completion of a Master of Science in Molecular and Cell Biology (MCB), students will demonstrate the following competencies:

1. **Foundational Knowledge**: Understand fundamental concepts in molecular genetics, cell biology and biochemistry and apply their knowledge to new findings in the field of molecular and cell biology.
2. **Application and Analysis**: Employ modern laboratory techniques used in DNA and protein research and interpret experimental data.
3. **Scientific Knowledge**: Analyze, synthesize and discuss primary scientific literature from peer-reviewed journals in the field.
4. **Communication Excellence**: Present scientific content to an audience in a professional manner.
5. **Advanced Knowledge**: Author scientific critiques and/or reviews in a manner consistent with the standards of professional scientific writing.

Admission

Applicants who have a bachelor's degree in a biological, medical or scientific field are eligible for admission to the Master of Science in Molecular and Cell Biology program. Applications may be obtained from the Office of Graduate Admissions (http://www.qu.edu/gradadmission) and are accepted for fall or spring enrollment. A complete application consists of the following:

- application form and fee
- a letter of intent including a detailed autobiography of personal, professional and educational achievements
- two letters of recommendation (at least one letter should be from a science faculty member)
- official transcripts of all undergraduate and graduate work completed

A cumulative undergraduate GPA of 3.0 is preferred and undergraduate course work in biochemistry, microbiology, molecular biology and/or genetics is highly recommended. Although Graduate Record Examination (GRE) scores are not required, the scores can provide another indication of a student's academic readiness. Applicants should refer to the Graduate Admission Requirements (p. 341) found in this catalog.
DEPARTMENT OF CHEMISTRY AND PHYSICAL SCIENCES

For students majoring in chemistry or biochemistry, the department provides an intensive program of study in the major areas of chemistry with an emphasis on developing skills in analytical thinking and problem-solving, evaluation and interpretation of data, effective communication of scientific information, and research methodologies, while also exploring the applications of chemistry that permeate our lives. Sufficient flexibility through open electives allows students to emphasize personal career goals.

Students are prepared for entry-level positions in chemical, pharmaceutical or academic research laboratory settings or in non-traditional settings, which rely on the background and skills that have been acquired. Their education also prepares them for entry into graduate programs of study in chemistry, biochemistry, environmental science, biomedical sciences, pharmacy, secondary education, medicine or law.

The department also provides a chemistry minor program structured to give students a balanced exposure to the major areas of chemistry and opportunities to develop associated skills. Providing this opportunity is an important asset for students studying in other programs, particularly those pursuing careers in the biomedical and biological sciences.

The department also offers courses in chemistry and physics tailored to the support of programs in the basic and health sciences, nursing and engineering. These programs all have a strong reliance on the ability of students to understand and apply the fundamental concepts of chemistry and physics and to demonstrate clear analytical thinking and problem-solving skills developed in these courses.

The mission of the Department of Chemistry and Physical Sciences is to provide undergraduate course work in chemistry and the physical sciences in a student-centered, supportive learning environment characterized by small classes with access to faculty and well-equipped laboratory facilities where students can actively engage in the investigative process of science.

In addition, it is the mission of the department to offer stimulating course work in the physical sciences for non-science majors as part of the University Curriculum so that all students can develop an appreciation of the process of science, engage in scientific investigative experiences, understand the role of science in their everyday lives and be prepared to make informed value judgments in our highly technological society.

- Bachelor of Science in Biochemistry (p. 166)
- Minor in Chemistry (p. 169)

Bachelor of Science in Biochemistry

Program Contact: Carol Fenn (Carol.Fenn@quinnipiac.edu)
203-582-8254

A BS in Biochemistry gives you the skills to become a research associate studying the ways molecules react with one another, or a laboratory technician analyzing biochemical metabolites in the pursuit of new pharmaceuticals. You may become a biochemist in a food development laboratory, write copy for technical publications or work for a consumer products company developing a more effective sunscreen.

We teach you to evaluate and interpret data, hone your analytical thinking skills and present the results of your scientific research to various audiences. An independent research project strengthens the skills you develop in the classroom. Students are encouraged to pursue real-life work experience in the form of internships at industrial, academic and governmental laboratories.

Your degree in biochemistry qualifies you to work as a research assistant in a chemical, pharmaceutical or academic research laboratory upon graduation, but you’ll also have the foundation to pursue an advanced degree in several fields including medicine, pharmacy, veterinary medicine or law.

An independent research project directed by a full-time faculty member in the department is required of all students in this program. This research project plays a key role for you to develop a deeper understanding of the biochemistry involved, build skills necessary to work independently and to communicate effectively the results of your research.

BS in Biochemistry Curriculum

Initial placement in English and mathematics courses is determined by placement examinations and an evaluation of high school units presented. Students who do not place directly into MA 141 or MA 151 should take MA 140. MA 152 is strongly recommended.

Biochemistry majors must maintain a minimum grade of C- in all required chemistry, physics, biology and mathematics courses. Any required course not listed in the course descriptions may be considered for scheduling when the need arises. All 4-credit science courses have a laboratory component. Chemistry and biology electives must be selected with the advice and approval of the department adviser. Open electives should be selected based upon student interests and career goals from offerings in all schools.

Students majoring in biochemistry must complete the following requirements:

Department of Chemistry and Physical Sciences
The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences, and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill requirements outside the major.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

Student Learning Outcomes

Upon completion of the biochemistry degree program, students will demonstrate the following competencies:

1. **Disciplinary Knowledge**: Develop a broad knowledge base of chemical principles in the areas of general, organic, analytical, physical and biochemistry along with cognate knowledge in the areas of biology, physics and mathematics.

2. **Laboratory Skills**: Develop relevant knowledge and hands-on skills to be able to work safely and independently in a chemistry laboratory setting to collect, record and evaluate experimental data including the utilization of both classical and instrumental techniques.

3. **Scientific Information Literacy**: Conduct relevant field-specific searches of scientific databases to locate research articles related to a topic or problem and gain experience in reading, interpreting and discussing research literature in the field.

4. **Research Experience**: Apply acquired knowledge and skills to investigate problems by working on independent mentored project(s) through a senior research project, independent research, internship(s) and/or summer research study.

5. **Critical Thinking and Problem-Solving**: Apply knowledge and skills to solve increasingly complex conceptual and quantitative problems in the field.

6. **Scientific Communication**: Demonstrate competency in oral and written expression of the results of their laboratory work through written lab reports, poster presentations and seminar presentations.

7. **Career Advancement**: Be competitive for employment in an entry-level field-related position or acceptance into a graduate or professional degree program.

**Admission Requirements: College of Arts and Sciences**

The requirements for admission to the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Bachelor of Science in Chemistry**

Program Contact: Carol Fenn (Carol.Fenn@quinnipiac.edu)

203-582-8254

Chemistry majors explore the world on the molecular level. Students gain knowledge about the wide range of properties and reactions of inorganic, organic and biological compounds. Lab courses enable you to carry out syntheses and analyze materials. You also get hands-on access to a sophisticated array of instruments, which include a variety of spectrophotometers and chromatographic systems build confidence in your ability to solve complex problems in the field. You can
individualize your experience by taking electives in specialized areas, such as environmental chemistry, or pursue a minor in a completely different but complementary field to meet your career goals.

We teach you to evaluate and interpret data, hone your analytical thinking skills and present the results of your scientific research to various audiences. Because of our small class sizes and highly accessible faculty, you’ll get plenty of support and the personal attention you need. An independent research project strengthens the skills you develop in the classroom. Companies such as Alexion Pharmaceuticals, Connecticut Agricultural Experiment Station and Lab Synergy offer real-life work experience in the form of internships which you may pursue.

Your degree in chemistry qualifies you to work as a laboratory or research assistant in an academic, consumer product, pharmaceutical or industrial research or quality control laboratory upon graduation, but you’ll also have the foundation to pursue an advanced degree in a specific area of chemistry or in other fields including medicine, pharmacy, veterinary medicine or law.

**BS in Chemistry Curriculum**

Initial placement in English and mathematics courses is determined by placement examinations and an evaluation of high school units presented. Students who do not place directly into MA 140 should take MA 140. MA 152 is strongly recommended.

Chemistry majors must maintain a minimum grade of C in all required chemistry, physics and mathematics courses. Any required course not listed in the course descriptions may be considered for scheduling when the need arises. All 4-credit science courses have a laboratory component. Chemistry electives must be selected with the advice and approval of the department adviser. Open electives should be selected based upon student interests and career goals from offerings in all schools.

Students majoring in chemistry must complete the following requirements:

1. All students must complete the University Curriculum (p. 61) requirements.
2. Students must complete the College of Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements specific to their major. See details below.
3. Typically CHE 300 (offerings vary); departmental integrated capstone is currently included in this category.
4. Required courses, which support the chemistry major and may be used to satisfy requirements outside of the major
5. MA 151 may be substituted for MA 141. MA 152 is also highly recommended but is not required.
6. PHY 121 and PHY 122 may be substituted.
7. Students take open electives to fulfill the minimum number of credits for graduation.

Minimum number of credits required for graduation is 120.

**College of Arts and Sciences Curriculum**

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.
Student Learning Outcomes

Upon completion of the chemistry program, students will demonstrate the following competencies:

1. **Disciplinary Knowledge**: Develop a broad knowledge base of chemical principles in the areas of general, organic, analytical, inorganic, physical, and biochemistry along with cognate knowledge in the areas of physics and mathematics.

Minor in Chemistry

Program Contact: Carol Fenn (Carol.Fenn@quinnipiac.edu)
203-582-8254

The highly technical nature of our daily living has increased the need for a working knowledge of chemistry in biological sciences, medical sciences, law, business, government, academia and many more areas. Students majoring in programs other than chemistry can be recognized as having additional proficiency in chemistry by successfully completing this balanced program. Candidates must apply to the chemistry department to enter this program and be enrolled concurrently in a major undergraduate program.

The program consists of a minimum of 24 credits of chemistry distributed between 20 credits of required courses and 4 credits of elective courses consistent with the following specifications: The minimum grade required for each course is a C-.

**Chemistry Minor Curriculum**

The program consists of a minimum of 24 credits of chemistry distributed between 20 credits of required courses and 4 credits of elective courses consistent with the following specifications: The minimum grade required for each course is a C-.

**Total Credits**: 24
DEPARTMENT OF ECONOMICS

The Department of Economics places a particularly strong emphasis on a well-rounded liberal arts education, ethical judgment and the ability to assess past and present public policies. We encourage a friendly, supportive environment for all students, promote student-professor interaction and build a community of scholars.

Students who have earned a degree in economics have gone on to careers in banking, consulting, financial research, the government, the hedge fund industry, insurance firms such as Travelers and industrial firms such as General Electric and United Technologies. Besides preparing a student for graduate study in economics, the major provides excellent preparation for graduate study in business, law and public policy.

The mission of the Department of Economics is to offer students educational opportunities that emphasize the relationship of theory to practice to prepare them to become accomplished citizens and professionals capable of critical thinking and independent analysis.

- Bachelor of Science in Economics (p. 170)
- Minor in Economics (p. 171)

Bachelor of Science in Economics

Program Contact: Donn Johnson (Donn.Johnson@quinnipiac.edu)
203-582-8205

The BS in Economics program teaches students the core theories of economics. Students learn to analyze social and business problems and to examine the proper role of the market and the government in solving these problems. They are able to apply their analytical skills to analyze and interpret economic behavior and forecast political and societal trends. Students have the opportunity to take specialized courses such as Environmental Economics (EC 304), Game Theory (EC 355), Law and Economics (EC 320), Money and Banking (EC 341) and Public Finance (EC 330).

Besides studying essential economic theories, students also learn to analyze individual markets and assess the impact public policy has on the economy. This versatile major makes students attractive to employers and prepares students for a successful career in banking, government, law, the insurance industry and elsewhere.

Recent economics majors have secured prominent jobs with the Federal Reserve Board, General Electric, Liberty Mutual, Oppenheimer Funds and other industrial and insurance firms.

BS in Economics Curriculum

Students majoring in economics must meet the following requirements for graduation:

1. All students must complete the University Curriculum (p. 61) requirements
2. Students must complete the College of Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements specific to their major. See details below.
3. Students may request permission from the economics department chair to use one non-economics course to fulfill their major requirements.

College of Arts and Sciences Curriculum

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

Student Learning Outcomes

Upon completion of the program, students will achieve the following competencies:

1. **Knowledge of Economics**: Students demonstrate and can apply the core theories of economics.
2. **Quantitative Reasoning**: Students develop the ability to represent mathematical information symbolically, visually, numerically and verbally, and to interpret mathematical models such as graphs, tables and schematics to draw inferences. They also develop an ability to use arithmetical, algebraic, geometric and statistical methods to solve social and business problems.
3. **Critical Thinking**: Students develop the ability to recognize problems and to acquire, assess and synthesize information to analyze social and business problems.
**Admission Requirements: College of Arts and Sciences**

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Minor in Economics**

Program Contact: Donn Johnson (Donn.Johnson@quinnipiac.edu)
203-582-8205

Acquiring a foundation in economics offers a versatile, big-picture perspective that can prove advantageous in the fields of government, politics, business and the nonprofit world. In addition to mastering the principles of micro and macroeconomics, you will enhance your critical thinking and quantitative reasoning skills in ways that address modern problems facing businesses. You'll also learn about common economic theories and the role they play in the global economy.

Students work with the department chair to select four additional courses based on their interests. These electives can include courses such as Money and Banking, Sports Economics and Public Finance. Whether you plan to pursue a career in law, finance or public policy, this program will complement your major and provide you with additional tools to use in your chosen field.

Students wishing to augment their field of study with the perspective and skills of economics are encouraged to consider an economics minor. In addition to the University Curriculum economics courses (EC 111 and EC 112), students must complete four additional economics courses for the minor. The courses used for the minor are subject to approval by the department chair.

**Economics Minor Curriculum**

In addition to the University Curriculum economics courses (EC 111 and EC 112), students must complete four additional economics courses for the minor. Students may request permission from the Economics Department Chair to use one non-economics course to fulfill their minor requirements.

DEPARTMENT OF ENGLISH

The English major provides a solid foundation in the study of the genres of literature, literary theory, literary history, rhetoric and composition, and creative writing, leading to the senior seminar capstone course in which students produce their own extended, original project. Students consult with advisers regularly to ensure that their personal, intellectual, creative and professional goals are being met. Students in the English major program are well prepared for entering graduate study in English, elementary and secondary education, law, business and library science and for careers in government, public service, not-for-profit foundations, public relations and advertising, print and digital publishing and other business fields that need skilled writers and researchers and creative problem-solvers. The department also offers two optional concentrations within the English major: creative writing and English study for secondary education. Both of these concentrations have more specific requirements than our general major. The English major, whether students choose a concentration or not, is a good preparation for many careers, and graduate study.

The English minor offers the same critical and creative engagements with texts as does the major. Students can choose from a variety of courses to help deepen their critical and writing acumen. The minor is designed to support any major by honing the student’s analytical and writing skills.

The Department of English supports four programs: the first-year writing program, the English major, the English minor and the five-year BA/MAT Program in Elementary or Secondary Education. All freshmen entering Quinnipiac University must take EN 101 and EN 102. Students who wish to major, double major or minor in English can apply to the chair of the English department at any time. Students who are interested in the creative writing or secondary education concentrations are encouraged to declare their concentration with their academic adviser as early as possible. Students who are planning to enter the five-year BA/MAT Programs in Elementary or Secondary Education will need to apply to the School of Education in their sophomore year. All students in all English programs must maintain an overall 2.5 GPA, be in good academic standing and must satisfy all major and minor requirements.

Co-curricular activities are important to the educational goals of many English majors and minors. As a community of readers and writers, the English department supports the English Literary Club, open to all Quinnipiac students, and Montage, the undergraduate literary journal. The department hosts creative writing events, showcasing professional creative writers and artists, and student writers and artists. Students who excel in their studies will be invited to join Sigma Tau Delta, the International Honor Society for English majors.

The mission of the Department of English is to engage students to become:

**Serious Readers**: English majors take reading (and re-reading) seriously. We analyze and discuss the nuances of poetic form, narrative voice and critical argument. We study historical and cultural contexts in order to grasp and internalize new and unfamiliar perspectives. We read to dissect, and we read to enlarge. English majors read the world around them with open minds and critical precision.

**Skillful Writers**: Language is the English major’s medium. We combine words and phrases the way painters combine colors and textures. We write to make sense of our reading, to organize our thoughts, and to express ourselves in clear and compelling ways. In writing workshops, we learn the value of collaboration and constructive criticism as we hone our craft. The practice of effective communication through writing makes the English major a sought-after candidate for a wide variety of 21st-century careers.

**Global Thinkers**: The nature of the English major is to work toward understanding, valuing and respecting the traditions of peoples from a variety of cultures. English majors encounter a wide array of human experience in the literature we study, and we celebrate the ways difference and diversity expand our appreciation for the complex worlds that we navigate.

**Creative Problem Solvers**: Where some see problems, the English major sees possibilities. The world of the English major is the world of the imagination. We learn to read old and familiar expressions in new and unexpected ways. We value innovation over stagnation and novelty over cliche. The ability to confront an issue with a variety of approaches and perspectives gives the English major an edge when it comes to solving problems.

- Bachelor of Arts in English (p. 172)
- Minor in English (p. 174)

**Bachelor of Arts in English**

Program Contact: Patricia Comitini  
(Patricia.Comitini@quinnipiac.edu)  203-582-8253

The English major is designed for the student who enjoys working with all forms of literary expression. It emphasizes strong reading, critical and creative thinking, problem-solving, research and writing, and oral communication, producing successful graduates who are well prepared for a wide range of careers and graduate study.

Students who choose English as a major can choose between two concentrations: creative writing or secondary education. The creative writing concentration is especially recommended to those students who hope to pursue a master of fine arts degree. The secondary education concentration is designed for students who are planning to teach high school. Click here (p. 174) for more information about either of the concentrations.

English majors are also encouraged to pursue internships. The flexible major allows students to pursue 1-credit, repeatable internships (EN 293) in supervised fieldwork related to writing or reading to investigate career opportunities and to develop professional contacts. Interested students should see their adviser and the CAS Career Development Office.

An Honors Thesis in English is also available. Students who have an overall 3.3 GPA, and a 3.5 in the English major may seek the recommendation of any English department faculty member to pursue a Senior Thesis Project (EN 470) in addition to the capstone course (EN 460). Students who are planning to attend graduate school in English or other related fields, might discuss taking advantage of this opportunity with their advisers.

**BA in English Curriculum**

Students majoring in English must meet the following requirements for graduation:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>University Curriculum 1</td>
<td></td>
<td>46</td>
</tr>
<tr>
<td>College of Arts and Sciences Curriculum 2</td>
<td></td>
<td>21-24</td>
</tr>
</tbody>
</table>
**English Major Requirements**

**Flexible Requirements:**
- Select any EN courses at the 200 or 300 level
- Select at least 6 credits at the EN 300 level in each category; courses cannot count for multiple categories:
  - A. Language, Rhetoric, Genre and Form
  - B. Periods, Places, Cultures and Identities

**Advanced Requirements**
- Select one from each of the following categories:
  - 9 credits

**Literary History Underrepresented Writers:**
- EN 223 Hippies, Punks and Rude Boys
- EN 235 Literature by Women (WS 235)
- EN 265 Survey of African-American Literature
- EN 276 African Literature
- EN 277 Literature of the Americas
- EN 338 American Literature by Women of Color (WS 338)
- EN 340 Immigrant Fictions

**Literary History I:**
- EN 341 Chaucer and the Medieval Period
- EN 345 English Literature of the Renaissance
- EN 348 Milton and the 17th Century

---

**College of Arts and Sciences Curriculum**

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student's major. These areas are fine arts, humanities, natural sciences
and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A "subject area" is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

**Student Learning Outcomes**

Upon completion of the program, students will achieve the following competencies:

1. **Written communication:** an increasing command of language use and conventions.
2. **Writing to learn:** growth in writing effectively to learn about and convey knowledge and ideas about literature in essays and/or creative texts.
3. **Writing proficiency:** the ability to summarize and synthesize written materials into a fluent, coherent and edited text.
4. **Inquiry-driven analysis:** the ability to read texts proficiently and critically leading to rigorous analysis that explains the complexities, difficulties, ambiguities and contradictions in texts.
5. **Critical thinking:** the ability to evaluate and compose arguments based on logic and evidence, using counterarguments.
6. **Creative thinking:** strong integrative skills and an ability to see patterns and connections among texts and arguments.
7. **Research methods:** the ability to investigate the contexts of critical and creative writing, including historical context, literary history, canons, language and terms appropriate to literature and textuality; facility with theoretical and scholarly materials; perform research using methods employed in the analysis of various forms of writing.
8. **Cultural understanding:** the ability to determine how forms of writing create meanings, values and ideas, and how writing exposes social and economic perspectives and conflicts among nations, peoples and individuals throughout global history; assess how different forms of writing operate to pose questions about culture and question cultural assumptions.

**Concentration in Creative Writing**

English majors can earn a concentration in creative writing by completing 15 or more credits in creative writing and contemporary literature courses. Students who earn the concentration in creative writing not only hone their compositional, reading and analytical skills in one or more genres, but they also build a foundation for understanding and utilizing the power of creativity in their professional lives after college. This concentration is especially recommended to those students who hope to pursue a master of fine arts degree. Successful completion of the concentration in creative writing is indicated on students’ transcripts.

**Concentration in Secondary Education**

English majors who are planning to teach high school need a more structured curriculum tailored to state requirements and discipline-specific knowledge of literature. To earn the concentration in secondary education, students complete 18 credits in a strong, broadly based literature and expertise in writing foundation. The concentration enables them to move to graduate level work successfully, and greatly benefits them in their professional lives as high school teachers. Students use the flexible and advanced requirements to explore a range of courses in national literatures, genres, authors and writing.

**Admission Requirements: College of Arts and Sciences**

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Minor in English**

Program Contact: Patricia Comitini (Patricia.Comitini@quinnipiac.edu)

203-582-8253

Professional advancement often depends on good reading aptitude, as well as sound writing and rhetorical techniques and critical and creative thinking. With an English minor, you’ll explore literature while you also hone your communication skills. These are must-have talents to work in creative fields, such as screenwriting, advertising and publishing. They are also important in other careers where you may have to write a grant proposal, a contract, a persuasive argument for a legal case, a public policy or a business plan. This minor can complement any major.

The Department of English offers a minor in English for students who wish to study literature and improve their writing abilities—both creative and critical. Students whose professional advancement depends on good reading aptitude, sound writing and rhetorical techniques, and critical and creative thinking are encouraged to apply to the chair of the English department.

**English Minor Curriculum**

To complete the minor, students must take 18 credits of English coursework; at least 9 credits must be at the 300 level.

DEPARTMENT OF HISTORY

The study of history is a long-established foundation for education since it builds critical skills of gathering and interpreting evidence, crafting arguments, engaging in research and developing polished presentations both written and oral. As a result, students earning a degree in history are prepared to pursue a wide range of career options. Some continue their education in graduate school in the humanities, social sciences, education or law; others pursue careers in public service, business and the arts.

Studying history helps students to appreciate their place in the world through a deeper understanding of the connection between the past and the present, a better awareness of the variety of human experience, and a more complete understanding of the rich diversity of cultures.

The faculty regularly reviews and updates the history curriculum to reflect the changing nature of the historical discipline; conducts exit interviews with graduating seniors to assess their experience in the major; and collects and updates survey information from graduates concerning their experiences after graduation.

The mission of the Department of History is twofold. First, it provides an intensive program of study for students majoring in history. Second, the Department of History provides opportunities for all students at Quinnipiac to familiarize themselves with the past through the study of history across time and around the world.

- Bachelor of Arts in History (p. 176)
- Minor in History (p. 177)

Bachelor of Arts in History

Program Contact: David Valone (David.Valone@quinnipiac.edu)
203-582-5269

As a history major, you take a broad range of courses that introduce you to aspects of history from a wide variety of perspectives and time periods. All history majors must take at least two courses in American history, two courses in European history, and two courses in world history. Students also take a required course in historical writing, and majors take a junior level seminar on historiography that introduces them to the actual production of historical knowledge and the creation of historical narratives and interpretive frameworks. In addition, all history majors have an experiential learning requirement that can be filled through a study abroad experience, an internship in history, or by taking the Introduction to Public History course HS 202. In their senior year, all history students write a senior thesis that gives them a chance to put into practice everything they have learned throughout their work in the major. The remainder of the required 36 credits in history is made up of history electives chosen by students based on their interests in consultation with their adviser. Through a history major at Quinnipiac, you will gain a broad understanding of past events, plus critical thinking skills and writing expertise, all of which will prepare you for a number of careers, from curator of a museum exhibit on Middle Eastern art to grant writer for a large teaching hospital. If you have a talent for languages, you could become an intelligence officer with the FBI, or you can choose to continue your education with a graduate degree in education, law or medicine.

Students normally apply for admission to the major during their sophomore year. Applications must be made to, and approved by, the chairperson. Acceptance is usually approved for all applicants in good standing academically.

Continuation in the major is dependent upon a satisfactory level of performance in all courses, with special reference to work in history. In addition to the CAS requirements, students majoring in history must take 6 credits of European history courses, 6 credits of American history courses, 6 credits of global history courses, four elective courses (300 level or above), and several specified history classes including HS 202, HS 303 and HS 408.

Note about internships: The department is able to provide student internships with area historical societies and also attempts to place qualified students in credit-related internships with area governmental organizations.

BA in History Curriculum

1. All students must complete the University Curriculum (p. 61) requirements.
2. Students must complete the College of Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements specific to their major. See details below.
3. No more than three courses may be at the 100 level.
4. The minimum requirement (36 credits) must be met with a grade of C or better in all courses.
5. Some courses will fill more than one requirement. Students take a total of 36 history credits.

Note about internships: The department is able to provide student internships with area historical societies and also attempts to place qualified students in credit-related internships with area governmental organizations.

College of Arts and Sciences Curriculum

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.
For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

**Student Learning Outcomes**

Upon completion of the program, students will achieve the following competencies:

1. **Critical thinking:** Analyze, synthesize and evaluate historical information from multiple sources.
2. **Inquiry and analysis:** Distinguish between fact and fiction by employing a full range of techniques and methods used to gain historical knowledge while understanding that there is no one historical truth.
3. **Effective communication:** Produce a polished and thoroughly researched written work of history that engages with both primary sources and the secondary literature.
4. **Diversity and cultural awareness:** Become familiar with multiple cultures and diverse people from around the world and in different time periods.
5. **Oral communication:** Convey their historical knowledge verbally through public presentations.
6. **Historical knowledge:** Develop an understanding of the general chronology of the past and demonstrate an understanding of cause and effect in history.

**Admission Requirements: College of Arts and Sciences**

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Minor in History**

Program Contact: David Valone (David.Valone@quinnipiac.edu) 203-582-5269

Learning to view our modern world through the lens of history is a valuable skill that will shape your understanding of politics, economics, science and art. This program explores major events in American, European and non-Western history. You’ll enrich your liberal arts experience and develop a background that will prove useful in many fields, such as business, law, education or government. You’ll hone your writing and research skills while discovering the rich histories of countries and cultures from ancient times through modern day.

You’ll have the flexibility to chart your own path through this minor. With the guidance of the department chair, you can focus on your particular areas of interest and choose from a diverse selection of classes in topics such as World War II, ancient Greece, the European Renaissance and Asian and African history. If you’re interested in Irish history, you’ll have the opportunity to explore the subject through Ireland’s Great Hunger Institute at Quinnipiac, which host lectures, conferences and courses.

**Minor in History Curriculum**

A minor in history is recorded upon completion of at least 18 credits with a grade of C or better in all courses. The student must select at least one course (3 credits) from each of the following areas of history: American, European and non-Western. At least two courses (6 credits) must be at the 300-level or above and should be chosen with the consultation of the department chair. No more than three classes can be at the 100 level.

DEPARTMENT OF LEGAL STUDIES

The Department of Legal Studies offers students a humanities-based approach to law and the legal system within the context of a liberal arts education. It provides an avenue for majors to understand the multifaceted dimensions of legal discourse, including the historical context in which the legal system was fashioned, the ethical implications of the construction and implementation of legal rules, and the policy impact that contemporary legal decisions continue to have on various aspects of governance in both the public and private spheres. Our students are exposed to essential aspects of legal practice, procedure and methodology, and are taught to bridge their practical understanding of the legal profession by placing those skills in a broader context and recognizing laws as being reflective of broader elements of social change.

The focus of the department is on how law reflects the values of society and constantly adapts to changes in societal behavior and opinion. We look at how laws affect the relationships between individuals and groups in society, and of groups to each other. We discuss issues such as justice, equity and the balance between the rights of individuals and the public interest, from a legal, historical and societal viewpoint. The Law in Society major develops specific legal research, writing and critical thinking skills, all within a framework of the ethical and statutory constraints confronting the legal professions. After graduation, many of our students continue their education by attending law or graduate school. Others work in law-related settings, such as working as a paralegal in a law office or business. Other graduates have become social workers, teachers and business owners.

The department also offers three minors. The Minor in Law in Society is for students who want to explore law, while retaining flexibility in choosing courses. The Minor/Certificate in Legal Studies, approved by the American Bar Association, provides students with the opportunity to study legal practice and prepares them to work as paralegals. The Dispute Resolution Minor focuses on resolving disputes in different ways and formats.

Quinnipiac University’s Bachelor of Arts in Law in Society approaches the study of law, legal processes and legal institutions in the tradition of the humanities. The classic values of a liberal arts education are combined with the critical thinking, analytical writing and oral presentation skills of the legal profession to prepare graduates to become active and thoughtful citizens in their local and global communities. The Law in Society major culminates with the integration of the classroom component with professional skills development where students complete both a scholarly thesis and an internship in a professional, law-related setting. Graduates of the program are well prepared for a variety of careers in law and law-related fields such as policy, compliance, politics, paralegal, government, social services, criminal justice and conflict resolution, as well as to continue on to law school or to other graduate work in the social sciences or humanities.

Students in the Law in Society major take a wide variety of courses to learn and understand the complexities of the law. The core requirements provide students with the foundation to further explore various areas of law. Students learn to research, reason and write about the law, learn how the civil and constitutional systems work, and work at an internship in a law office setting. Students integrate their education in a senior capstone thesis course, which provides the opportunity to do independent research on a topic of their choosing, pulling together all the courses they have already taken.

A humanities-based approach to law necessitates an exposure to different methodologies and distinct approaches to the understanding of law. While the core component exposes students to the legal methodology and the policy context required to understanding the field of law, the elective requirements provide students with an understanding of how the law shapes and is shaped by particular perspectives, historical contexts and actual practice. The requirement of two Legal Practice courses and one Alternate Perspectives course helps the students to learn different ways of approaching legal problems and exposes them to various ways of problem solving. As part of the major requirements, students complete a legal studies certificate, approved by the American Bar Association.

Quinnipiac’s Minor/Certificate in Legal Studies is approved by the American Bar Association.
Bachelor of Arts in Law in Society

LE 305  Civil Procedures 3
LE 340  American Constitutional Law (PO353) 3
LE 485  Legal Internship Seminar 3
LE 490  Senior Seminar in Law in Society 3

Law in Society Elective Courses
At least 9 credits must be at the 300 level:

Legal Practice Electives
Select two courses of the following: 6

LE 309  Advanced Legal Writing and Advocacy
LE 311  Administrative Agencies
LE 315  Wills, Probate and Estate Administration
LE 320  Land Transfer and Closing Procedures
LE 328  Employment Law
LE 330  Law of Business Entities
LE 345  Intellectual Property
LE 360  Mediation
LE 370  Negotiation

Alternative Perspectives in the Law Electives
Select one of the following: 3

LE 250  Gender and the Law (WS 250)
LE 317  International Law (PO 317)
LE 319  International Law and the Individual
LE 322  Health Care Law (HSC 322)
LE 329  European Union Law (PO 329 IB 329)
LE 342  Comparative Constitutional Law (PO 342)
LE 350  Federal Indian Law and Policy
PL 202  Logical Reasoning
PS 383  Psychology and the Law

Legal Studies Electives
LE 115  Criminal Law
LE 150  Introduction to Mock Trial
LE 160  Competitive Mock Trial (may be taken up to three times, or twice if LE 150 was taken)

LE 200  Special Topics
LE 224  Sports Law (SPS 224)
LE 225  Alternative Dispute Resolution
LE 260  Trial Techniques
LE 300  Special Topics
LE 312  Family Law

Three additional courses chosen from any LE elective, including those in Legal Practice and Alternative Perspectives 9

Additional Requirements 3
SO 101  Introduction to Sociology
Select a 200-level English course 3
Select an American History course 3

Free Electives 5-8
Total Credits 120-126

1. All students must complete the University Curriculum (p. 61) requirements.
2. Students must complete the College of Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements specific to their major. See details below.
3. May be taken in conjunction with the College of Arts and Sciences requirements.

Students also must complete a minor in any other department within the university.

College of Arts and Sciences Curriculum
The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

Student Learning Outcomes
Upon completion of the program, students will achieve the following competencies:

1. Understand and critically assess how law is made, interpreted and applied in different contexts within the United States and abroad.
2. Research, analyze and write a scholarly paper on a chosen topic related to law, incorporating humanities-based inquiry.
3. Formulate and present a coherent, well supported legal argument in both written and oral form to diverse audiences.
4. Apply their legal skills and knowledge of the humanities in a professional law-related setting, consistent with ethical standards governing the legal profession.
5. Understand the political, historical and social conditions underlying and affecting the law.

Admission Requirements: College of Arts and Sciences
The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.
Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Minor in Dispute Resolution**

Program Contact: Jill E. Martin (Jill.Martin@quinnipiac.edu) 203-582-8712

The minor in dispute resolution is for students who are interested in learning more about resolving disputes and conflict in both their personal and professional lives. Students study how disputes arise and various means of resolving them, including negotiation, mediation, arbitration and litigation. The minor teaches students how to use these means to resolve problems on a personal and community basis. The minor is not designed to prepare students to work as paralegals and is not ABA approved. Role play activities enable students to partake in actual dispute resolution.

**Dispute Resolution Minor Curriculum**

Students must complete a minimum of 18 credits. At least 6 credits must be taken at the 300 level.

1. Electives may be taken from all legal studies courses, except LE 485; minors may not take LE 485.

**Minor/Certificate in Legal Studies (ABA-Approved)**

Program Contact: Jill E. Martin (Jill.Martin@quinnipiac.edu) 203-582-8712

Quinnipiac University’s ABA-approved minor/certificate in Legal Studies is designed to provide students with the knowledge and skills needed to be successful in the paralegal profession. The minor is planned and taught by lawyers to provide students with a solid grounding in the fundamentals of the legal system. The courses chosen for the minor prepare students to work as a paralegal in diverse legal settings. The legal studies minor/certificate has been approved by the American Bar Association as a paralegal education program. A paralegal performs specifically delegated substantive legal work under the supervision of an attorney. While paralegals may not give legal advice to clients or appear in court on their behalf, these highly skilled professionals perform a wide range of tasks and play an integral role in the delivery of legal services.

The education focuses on particular core areas of the law and on developing specific legal research, writing, and critical thinking skills, all within a framework of the ethical and statutory constraints confronting the paralegal profession. This combination of theoretical classwork with real-world experience, along with exposure to traditional liberal arts and general education, and a major in another discipline at Quinnipiac, prepares legal studies certificate students for a broad range of professional opportunities.

1 Students must earn a grade of C or better in all 200 level or above required courses in the Legal Studies Minor/Certificate to move to the next required course.

Learning Outcomes

Students who graduate with a Minor/Certificate in Legal Studies will demonstrate the following competencies:

1. Understand and critically assess how law is made, interpreted and applied in the United States.
2. Analyze a legal problem, research and synthesize the law, apply it to a set of facts, and write a legal memo using a generally accepted format for the legal profession with proper legal citation.
3. Draft, review, organize and manage legal documents and correspondence using proper format and appropriate content.
4. Formulate and present a coherent, well-supported legal argument in both written and oral form to diverse audiences.
5. Apply their legal skills and knowledge in a professional legal setting, consistent with ethical standards governing the legal profession.
DEPARTMENT OF
MATHEMATICS AND
STATISTICS

The power of mathematics lies in its focus on precise and logical reasoning to draw conclusions and make discoveries in many domains, both abstract and concrete. The idea of mathematics as a process of carrying out procedures and following rules to produce a single right answer is a misconception. At the college level, the discipline is fully realized as a way of thinking, which can be applied in almost any context, wherever the basis for what is true or false can be understood while minimizing fuzziness or ambiguity.

The starting point in mathematics is not a large body of facts, but instead a small number of ideas that are made precise and thoroughly understood. Mathematical knowledge is built from these in a way that gives us access to the steps that form the logical basis for why something makes sense.

Times have changed. We live in a world where decisions need to be justified with data and conclusions need to be quantified. To be effective, we must critically evaluate judgments based on data and quantifiable observations, and present arguments in a logical fashion. Presenting conclusions alone is not enough; they must be explained in a way that convinces others, supported by sound logical reasoning. This kind of argument focus of mathematics.

Ultimately, mathematics builds our ability to create new knowledge, justify new conclusions, and make new discoveries in any realm where logical thought yields power—which is to say, just about everywhere.

Consequently, the study of mathematics will better enable you to succeed in other disciplines, from chemistry to political science to sociology, at a more advanced level. This is also why mathematics majors find careers doing advanced work in consulting, government, analytics, engineering, education and more.

Mathematics is the symbolic language of nature. More than numbers and symbols, it encompasses the logic and methodology of reasoning and provides the tools for making decisions, interpreting observations, explaining natural phenomena and solving problems. It is both a subject with widespread applications to the sciences and social sciences and a subject of intrinsic intellectual interest.

Students majoring in mathematics acquire the mathematical skills necessary to be successful in their chosen field and become an informed and responsible citizen, and learn to appreciate the relevance of mathematics in society.

- Bachelor of Arts in Mathematics (p. 183)
- Minor in Mathematics (p. 185)

Bachelor of Arts in Mathematics

Program Contact: Cornelius Nelan (cornelius.nelan@qu.edu)

College of Arts and Sciences Curriculum
The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student's major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A "subject area" is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

Student Learning Outcomes
Students graduating with a major in mathematics will demonstrate the following competencies:

1. Application: Apply the fundamental concepts of calculus and linear algebra to solve both abstract and applied problems.
2. Communication: Communicate mathematics effectively, both orally and in writing.
3. Collaboration: Collaborate effectively to understand and solve mathematical problems.
4. Abstraction: Recognize and describe abstractions that unify mathematical structures and problems.
5. Appreciation: Articulate an understanding of the nature and value of mathematics and the unique epistemology of the subject.
6. Technology: Apply appropriate technology in exploring mathematical concepts and solving mathematical problems.
7. Independence: Independently investigate and acquire mathematical knowledge and formulate strategies to solve mathematical problems.
8. Analysis: Read and judge the validity of mathematical proofs and write proofs that are clear and valid.

Admission Requirements: College of Arts and Sciences
The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the
senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

Minor in Mathematics

Program Contact: Cornelius Nelan
(Cornelius.Nelan@qu.edu) 203-582-8003

Math is a universal language that is essential in the natural and social sciences, business and engineering. This minor gives you more than just a way to fine-tune specific mathematical skills; it also offers an opportunity to strengthen your logic, reasoning and problem-solving capabilities.

In the mathematics minor, courses in advanced statistics teach you to analyze complex data and perform high-level research, while cryptography courses provide an introduction to the world of securing data and IT security. Geometric concepts apply as much to set design and the visual arts as they do to architecture and civil engineering. You’ll develop expertise that is applicable in nearly every field, from computer science and finance to education and health care, and obtain tools that will give you a competitive advantage.

To complete a minor in mathematics, a student is required to complete 18 credits of mathematics classes.

Mathematics Minor Curriculum

1 At least one of the three electives must be at the 300-level. Courses numbered below MA 141 may be approved at the discretion of the department chairperson. Students are required to maintain a GPA of 2.0 or better for all courses used to fulfill the Mathematics Minor.
DEPARTMENT OF MODERN LANGUAGES, LITERATURES AND CULTURES

The Department of Modern Languages, Literatures and Cultures offers a major in Spanish Language and Literature and minors in Italian and Spanish. It also offers instruction in Chinese and German through the intermediate level, and instruction in Japanese, Hebrew and Arabic through the elementary level.

The study of modern languages along with the literatures and cultures associated with them, is a valuable entry point into parts of the world that use such languages. Students develop effective communication skills as well as cultural critical thinking and knowledge commensurate with the level of study achieved. In this way, the Department of Modern Languages, Literatures and Cultures contributes to their educational foundation for a changing world of diverse cultures and people.

Language Placement
Students who continue the study of a modern language begun prior to college must take a placement test to be placed at the course level for which they qualify.

Study Abroad
Study abroad, especially for students enrolled in the appropriate major/minor program, is encouraged. Quinnipiac facilitates organized opportunities for study abroad, and accepts relevant credit from colleges and universities abroad. Visit the Study Abroad page (p. 59) for additional information.

The mission of the Department of Modern Languages, Literatures and Cultures is to have students develop effective communication skills as well as cultural critical thinking and knowledge commensurate with the level of study achieved. In this way, students build a strong foundation to thrive in a changing world of diverse cultures and people.

- Bachelor of Arts in Spanish Language and Literature (p. 186)
- Minor in Italian (p. 187)
- Minor in Spanish (p. 188)

Bachelor of Arts in Spanish Language and Literature

Program Contact: Luis Arata (Luis.Arata@quinnipiac.edu) 203-582-8658

The study of Spanish Language and Literature offers a number of advantages. In addition to major cultural benefits, the study of how important populations outside and within our borders communicate from day to day enhances the individual's value in the workplace.

The program has three components: Spanish language (written and oral); culture of Spain and Latin America; and major literary works in Spanish.

Students undertaking the Spanish major are prepared for careers dependent in part on facility with the language and familiarity with the culture. These include employment in international business, journalism and mass communications, health care, government, education, criminal justice and law, among others. The Spanish major requires completion of 36 credits, with a grade of C or higher. At least 18 credits of the 36 credits required for the major must be completed on campus.

Double majors are encouraged.

Honor Society
The department rewards students who do outstanding work in Spanish language courses with membership in Sigma Delta Pi, the national Spanish language honor society.

BA in Spanish Language and Literature Curriculum

Total Credits: 120-126
College of Arts and Sciences Curriculum

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

Student Learning Outcomes

Upon completion of the bachelor’s degree in Spanish Language and Literature, students will demonstrate the following proficiencies:

1. Oral and Written Communication: Attain a high degree of linguistic proficiency in spoken and written expression.

2. Critical and Creative Thinking: Re-envision new ways to think about themselves and the rich multidimensionality of the world in which they live.

3. Diversity Awareness and Sensitivity: Demonstrate intercultural competency to interpret and address complex problems that require knowledge and understanding of diverse perspectives to work collaboratively and constructively with others.

4. Analysis: Evaluate ideas, sources and contexts to base arguments on evidence and reason.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

Minor in Italian

Program Contact: Filippo Naitana (Filippo.Naitana@qu.edu) 203-582-3334

The Minor in Italian program offers a strong foundation in Italian language and culture, giving access to the country's extraordinarily rich tradition as well as the significant professional advantages of being proficient in a world language. In particular, it can open the door to careers in government, international business, fashion and design, the food and automotive industries and education. A distinct feature of the Minor in Italian is the breadth of its curriculum, which includes full-immersion language courses at the beginning, intermediate and advanced levels, literature seminars taught entirely in Italian, and interdisciplinary courses such as "Florence and the Making of the Renaissance" and "Italy: A Journey Through Its Food, History and Culture," which are taught in English.

You’ll also have a wide variety of opportunities to explore Italian art and culture and hone your language skills through study abroad programs with our partners in Florence and Perugia, Italy. Quinnipiac will also coordinate internships and service-learning projects abroad for you at a range of sites: you could be learning about the international wine business at the Roccafiore Winery, helping teachers design English language workshops and curriculum at a local high school, or perhaps gaining valuable management and marketing experience at a luxury textiles business thriving in the new global economy.

The minor consists of six courses, at least two of which must be at the 300 level.

Italian Minor Curriculum

The minor consists of six courses (18 credits), at least two of which must be at the 300 level. A grade of C or higher must be achieved in all courses for the minor. At least 9 credits must be taken on campus.
Minor in Spanish

Program Contact: Luis Arata (Luis.Arata@quinnipiac.edu) 203-582-8658

Spanish is the official language of 21 countries and territories, and is spoken by nearly half a billion people around the world. Acquiring a basic foundation in Spanish can be a valuable asset in many fields, from government and business to health care and education. Though not as comprehensive as our major, this program will immerse you in the language, offering each course entirely in Spanish. You'll gain a cultural understanding of Spanish-speaking countries and communities around the world.

You'll have the flexibility to shape your minor and hone your language skills in electives that explore a broad range of topics from culture to literature. Quinnipiac's Albert Schweitzer Institute is an exciting resource, sponsoring service trips, educational projects and internship opportunities in countries including Nicaragua, Guatemala and Costa Rica.

The minor in Spanish offers students a solid foundation in Spanish and a well-rounded entry to the Spanish-speaking cultures with practical benefits in travel and work. The minor includes six courses (18 credits), all of which must be taught in Spanish. At least two of the six courses must be at the 300 level. A grade of C or higher must be achieved in all courses for the minor. At least 9 credits must be taken on campus.

DEPARTMENT OF PHILOSOPHY AND POLITICAL SCIENCE

The Department of Philosophy and Political Science supports programs in philosophy and political science: each provides a balanced offering of courses that offer both a broad overview of each discipline and the opportunity to focus more specifically in special topic areas. The department also is committed to experiential learning, and offers opportunities to study both philosophy and political science topics in ways that allow for a personal engagement with the topic area through study abroad, seminars in Washington, D.C., Service Learning courses and internship opportunities, and close collaboration with the Albert Schweitzer Institute at Quinnipiac.

The department offers minors in philosophy and political science that are tailored to complement a student’s major field of study, and supports a variety of multidisciplinary minor programs including women’s studies, the history and philosophy of science, international studies, Latin American studies, European Union studies, and Middle East studies.

The mission of the Department of Philosophy and Political Science is to develop educated students who are responsible for recognizing and respecting diverse worldviews, capable of evaluating systems of thought, oppression and power in communities, and motivated to engage in personal and social action.

Bachelor of Arts in Philosophy

Program Contact: Scott McLean (scott.mclean@quinnipiac.edu) 203-582-8686

Philosophy is an ancient project, but one that continues to evolve as humans respond ethically to challenges in the coming century: peace, environmental sustainability, globalization, technology, the needs for health and security, and the yearning for love and justice. The philosophy major is structured to equip students with the conceptual tools and techniques of inquiry necessary to arrive at thoughtful responses to the world’s challenges through their knowledge of different eras, themes and figures in the history of philosophy, both inside and outside the Western tradition.

Students learn to reflect critically, ethically and holistically on the significance of these tools and techniques to their own lives and to the world they are about to inhabit. Students develop analytical and research skills in philosophical inquiry as they explore the history of philosophy and the current status of the main problems in epistemology, metaphysics and ethics.

Students who major in philosophy develop competence in reasoning techniques, and will appraise the validity (and invalidity) of arguments, expose hidden assumptions, recognize fallacies and make a precise and coherent case in support of their own views. Philosophy graduates will be skilled in combining and synthesizing information from a wide range of sources, and in reflecting on their own thinking and experience. Students complete the major with a senior seminar in which they isolate and define a specific philosophical question that they explore in a senior thesis.

BA in Philosophy Curriculum

Students must obtain a minimum grade of C in all philosophy courses. No more than 6 credits of independent study (PL 299, PL 396, PL 399) may count toward completion of the major. Students majoring in philosophy must meet the following requirements:

Code | Title | Credits
--- | --- | ---
PL 202 | Logic Reasoning | 3
PL 220 | Ethics and Human Values | 3
PL 332 | Ancient Philosophy | 3
PL 333 | Modern Philosophy | 3
PL 401 | Senior Seminar | 3

Electives

Select six philosophy or cognate courses: 18

**Philosophy courses:**

- PL 217 Contemporary Social and Political Philosophy (PO 217)
- PL 222 Bioethics
- PL 234 Philosophies of Health, Healing and Medicine
- PL 235 Philosophy of Science
- PL 236 Philosophy of Language
- PL 237 Philosophy of Mind
- PL 238 Philosophy of Technology and Social Transformation
- PL 240 Philosophy of Sport (SPS 240)
- PL 250 Philosophy of Art
- PL 265 Living Religions of the World
- PL 266 Diverse Global Philosophies
- PL 267 Philosophy of Religion
- PL 299 Independent Study in Philosophy
- PL 312 Philosophy of War and Peace (PO 312)
- PL 320 Thought and Work of Albert Schweitzer (SL: Service Learning)
- PL 330 Philosophy and Gender (WS 330)
- PL 331 Philosophy of Humor
- PL 334 Medieval Philosophy
- PL 335 Contemporary Philosophy
- PL 337 Human Rights: Theory and Practice (PO 337)
- PL 338 Paradoxes
- PL 340 Philosophy of Sex and Love
- PL 368 Philosophy of Death and Dying
- PL 395 Critical Game Studies (GDD 395)
- PL 396 Philosophy Internship
Upon completion of the program, students will achieve the following learning outcomes:

1. **Knowledge**: Demonstrate understanding of the major traditions, themes and figures in metaphysics, epistemology and ethics across global history and as they emerge in specific cultures, regions or nations of the world.

2. **Reflection**: Ability to reflect critically, ethically and holistically on human problems affecting their lives (e.g., peace, environmental sustainability, globalization, technology, health, death, social and political justice), and to isolate and define specific philosophical questions for further inquiry.

3. **Critical thinking**: Ability to use inquiry and critical thinking techniques for detecting fallacies and for appraising the validity of arguments.

4. **Synthesis**: Skills of creatively synthesizing new ideas, based on knowledge from a diverse range of historical, regional and cultural perspectives.

5. **Communication**: Ability to communicate effectively one's own views and judgments in precise, reasoned, coherent and persuasive writing and speaking.

**Admission Requirements: College of Arts and Sciences**

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Bachelor of Arts in Political Science**

Program Contact: Scott McLean (Scott.McLean@quinnipiac.edu)
203-582-8686

The Bachelor of Arts in Political Science program provides courses that balance social scientific analysis of power relations with a focus on the politics and values of community, wherever community can be found, restored or created. Through their coursework and activities, students develop foundational knowledge regarding the causes and consequences of socioeconomic inequalities in the U.S. and around the world; the rise of the U.S. as a global power and how that power is used; the major environmental, political and socioeconomic threats facing the global community; and the historical development of American democracy and its application to contemporary political challenges.

Political science majors also develop the ability to engage in normative and empirical forms of inquiry: they can explain how different subfields in the discipline approach the study of politics scientifically, and they can critically analyze the justifications for individual political actions and governmental policies using normative and ethical reasoning. Students complete the major in one of three ways: a) the traditional majors, b) the public policy and leadership track, or c) the global affairs track. For more information about these three tracks, see the Tracks tab (p. 193). The department strongly advises students as they design their academic and professional development outside the political science major. Extracurricular leadership activities, courses in diversity, and a background in statistics and economics are encouraged as ways to support learning in the public policy and leadership track.

Because experiences in government or politics are key to learning how to apply and transfer knowledge gained in the classroom to the professional or civic realm, political science majors at Quinnipiac are required to have a for-credit “Experiential Learning” course or internship. Students may choose between an advanced internship, a course in the Quinnipiac...
Washington, D.C., Semester (p. 60) program, a political science course taken as part of a Study Abroad (p. 59) semester, or a course where academic learning is integrated with a community service learning project. More information about the experiential learning requirement can be found on the Curriculum tab (p. 191).

BA in Political Science Curriculum

The BA in Political Science requires the completion of courses in the University Curriculum, the CAS curriculum and the political science core curriculum, with a minimum grade of C in all courses. No more than 6 credits of internship (PO 295, PO 395) may count toward the completion of the major. Students majoring in political science must meet the following requirements for graduation:

Free Electives: 17

Total Credits: 120-126

**Experiential Requirement**

At Quinnipiac, political science majors are required to have a for-credit “Experiential Learning” course or internship. Students may choose between an advanced internship, a course in the Quinnipiac Washington, D.C., Semester (p. 60) program, a political science course taken as part of a Study Abroad (p. 59) semester, or a course where academic learning is integrated with a community service learning project. Students should plan with their academic advisers early to complete this requirement before the start of their senior year. With department approval, this requirement may be completed with one of the following:

- A political science advanced internship PO 395 of 3 or more credits;
- A political science course taken in a study abroad (p. 59) program;
- A political science course taken in the Washington, D.C. (p. 60), program or PO 365;
- A service learning course in any discipline (must have “SL” designation).

**Electives: Tracks in Political Science**

Students choosing to focus their studies in the politics track, the public policy and leadership track, or the global affairs track may choose from among the following electives beyond the core required courses:

---

1. All students must complete the University Curriculum (p. 61) requirements.
2. Students must complete the College of Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements specific to their major. See details below.
3. In addition to political science courses, a student may count up to two of the cognate courses toward completion of the political science major.

### College of Arts and Sciences Curriculum

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

### Student Learning Outcomes

Upon completion of the program, students will achieve the following competencies:

1. **Understanding:** Knowledge and understanding of the scope of political theory, history, diverse human interests and cultures, and a wide range of political phenomena (e.g., intercultural relations, institutions, systems of power, electoral systems, political behavior, policy issues, forms of political action, and rival accounts of political stability and change).

2. **Empirical inquiry:** Ability to assess diverse theories and empirical evidence in the political science field, to independently frame a research question with a research design, and to then carry out a basic exploratory investigation.

3. **Normative Inquiry:** Capacity for normative analysis of politics, founded on knowledge of the core concepts and history of political
theory. Major texts, multiple schools of thought, and diverse cultural theoretical perspectives.

4. **Responsible Engagement**: Capability for reflection on one’s own experiences of action in civic or political engagement, in a way which synthesizes empirical inquiry, normative inquiry, ethical responsibility, and respect for diverse perspectives in the political world.

5. **Communication**: Verbal and written ability to communicate one’s political judgments in clear, organized, concise and reasoned persuasive arguments, supported by analysis of moral norms, empirical evidence.

### Politics Track

The politics track provides students with a general background in political issues, policies and topics according to the interests of the student. Students may select any of the electives offered in the department to complete this track. The politics track is ideal for students interested in experiencing a wide variety of topics and exploring diverse forms of political phenomena—from local government to national policy to global issues.

### Global Affairs Track

The global affairs track provides students with the experience and intellectual tools for service and leadership in governmental and nongovernmental organizations that operate in the international/global realm. The program of study emphasizes an interdisciplinary approach to the study of politics and organization at the international level, in addition to work in political science, a student following this track is encouraged to pursue upper-level courses in anthropology, sociology, history, economics, language and management. Students may choose to further specialize with a geographic region of focus based around the study of comparative politics or an institutional focus based around the study of international law and organizations.

### Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

### Minor in Philosophy

Program Contact: Scott McLean (Scott.McLean@qu.edu) 203-582-8686

A basic understanding of philosophy complements virtually every subject, from science to the humanities. With a minor in philosophy, students discover how the wisdom of ancient philosophers applies to our modern world and study a vast array of global philosophies, cultures and religions. You will examine some of the most pressing moral and ethical questions facing the world today. You’ll learn not only how to think independently and logically, but also how to effectively communicate your thoughts—essential and transferrable professional skills, particularly in the fields of medicine, politics, law and teaching.

Students have the flexibility to design your minor by choosing from a wide selection of courses that explore areas such as philosophy of art, human rights, bioethics, war and technology.

Quinnipiac’s minor in philosophy offers an adventure in thinking and talking about our own ideas as well as those of great philosophers, past and present, with reference to the moral life, power and wealth, and humanity’s relation to nature and to the future of the planet.

Political science is profoundly relevant in fields beyond government, such as medicine, business, technology, economics and law. This minor examines the history, theory and science behind how governments operate and how they relate to the people they serve. In your classes, you will discuss politics in local, national and international contexts and explore the ways in which politics influences society.

You will have the flexibility to design a program based on your interests and that complements your major. You can choose from courses that focus on international relations, political communication, public opinion and presidential politics. You are also free to experience the political arena first-hand through an internship with the Connecticut Legislature in Hartford or a local campaign. Working at a media outlet, you'll learn about politics in most cases, the net cost to the student for a semester in D.C. is $8,000. Costs may vary depending on the type of D.C. internship selected, but in most cases, the net cost to the student for a semester in D.C. is $8,000. Quinnipiac students are eligible for additional merit-based scholarships.

A minor in political science is awarded upon completion of 18 credits in political science with a grade of C or better. At least 6 credits must be earned at the 300 level or above. No more than 3 credits of internship in political science (PO 295 or PO 395) may count toward completion of the minor.

Political Science Minor Curriculum

A minor in political science is awarded upon completion of 18 credits in political science with a grade of C or better. At least 6 credits must be earned at the 300 level or above. No more than 3 credits of internship in political science (PO 295 or PO 395) may count toward completion of the minor.

**QU in DC**

Program Director: Scott McLean (scott.mclean@qu.edu) 203-582-8686

Quinnipiac in Washington, D.C. ("QU in DC") encompasses both individual seminars in D.C., as well as semester-long programs combining a seminar with a semester-long internship in the student’s field of choice. The program is open to students in any major. Grades earned in the program automatically apply to completion of the BA degree. With major department approval, courses and internships may be counted toward completion of a major or minor. Quinnipiac financial aid applies, and Quinnipiac students are eligible for additional merit-based scholarships.
equal to, or less than, the cost of a semester on the Quinnipiac campus. Internships and courses are available for students who are interested in advocacy, business, media, journalism, national security, diplomacy and public policy. Students who are interested in pursuing this program are urged to begin the planning and consultation process with their academic advisers a year prior to the projected start of a semester in D.C. Quinnipiac students must have a 3.0 GPA or better to be eligible, and they should not be under any judicial sanctions. Students may have the GPA requirement waived by application to the QU in DC program director. For details about the programs and application deadlines, please go to QU in DC webpage (https://cas360.qu.edu/resources/qu-in-dc) and contact the director of the program by email or at 203-582-8686.
DEPARTMENT OF PSYCHOLOGY

Psychologists study phenomena such as behavior, emotions, cognitions and interactions from many perspectives. Given the diversity of ways of investigating psychological phenomena, students in both psychology and behavioral neuroscience study the discipline from several vantage points, including the biological, cognitive, social, developmental and scientist-practitioner perspectives. In this way, students come to appreciate the complexity of the field.

In both majors, the BS in Psychology and the BS in Behavioral Neuroscience, the department offers preparation for admission to graduate and professional schools and employment after graduation. Students are encouraged to engage with their learning in various ways, both in the classroom and in co-curricular activities, such as internships, independent study and/or by concentrating their studies in a particular area of psychology. They learn to design and conduct research, analyze data using statistical software and use academic search engines. Students learn the importance of first impressions and how to behave professionally. They also learn how to be self-disciplined; all seniors complete a substantial piece of scholarly work in which they demonstrate their understanding of the science of psychology or behavioral neuroscience and how these areas are connected with other areas of inquiry.

The mission of the Department of Psychology is to introduce students to the broad field of scientific psychology while offering them an education in the true liberal arts tradition. The psychology faculty members are committed to helping students become more sophisticated readers of scientific texts, more effective writers and more articulate speakers. These skills are linked to the development of critical thinking, a primary goal of the faculty. Courses require students to read primary research publications, to write in expository style and to speak their minds. Students engage in these activities as a way to learn about different kinds of research and about competing theories. The psychology program is designed to produce independent thinkers and lifelong learners.

Bachelor of Science in Behavioral Neuroscience

Program Contact: Adrienne Betz (Adrienne.Betz@quinnipiac.edu) 203-582-5259

Behavioral neuroscience is an interdisciplinary field that studies brain and behavior in a multifaceted and integrative way. The behavioral neuroscience major is a course of study that emphasizes the interaction between the psychological and biological foundations of behavior. Behavioral neuroscience majors choose one of two tracks (natural science or psychological science) based on their individual goals and interests.

The natural science track is a science-intensive program that provides training to students who have primary interests in the biological sciences as applied to psychology and behavior. The curriculum in this track can fulfill the science prerequisites for most professional schools.

The psychological science track includes a core set of courses in biology, chemistry and physics, but is more psychology-intensive than the natural science track. This track would be appropriate for those who are most interested in aspects of psychology that are most directly related to physiology and brain function, and how they relate to behavior. The curriculum in this track prepares students for entry to graduate programs or employment in behavioral neuroscience and related fields.

Students seeking a BS in Behavioral Neuroscience must complete requirements for the University Curriculum and a foreign language up to the 102-level. Initial placement in English and mathematics scores is determined by examination and evaluation of high school units presented. Within the major, behavioral neuroscience students take a set of courses that emphasize scientific reasoning. After taking PS 101, all majors take PS 206, PS 307, PS 308 or PS 353, and PS 401 in separate semesters. The capstone course, PS 401, must be taken in the senior year, taken as a seminar during the regular academic year, and following completion of PS 308. In each of the following sequence courses, students must earn a grade of C- or higher before moving on to the next course: PS 206, PS 307, PS 308 or PS 353. Students must earn a grade of C- or higher in PS 101 before moving on to any 200-level PS courses and in PS 252 before moving on to the PS 357 course. All majors are encouraged to work closely with their academic adviser to plan their progress through the major.

BS in Behavioral Neuroscience: Natural Science Track

Students on the natural science track must complete a biological and physical science core, and a psychology core.

1 All students must complete the 46 credits of the University Curriculum (p. 61)
2 Students must complete the College of Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements specific to their major. See details below.
3 Students who do not directly place into MA 141 should take MA 140.
4 Some of these courses can fulfill the University Curriculum requirements.

All majors are encouraged to work closely with their academic adviser to plan their progress through the major.

BS in Behavioral Neuroscience: Psychological Science Track

All students majoring in Behavioral Neuroscience: psychological science track must complete a biological and physical science core and a psychology core.

All majors are encouraged to work closely with their academic adviser to plan their progress through the major.

College of Arts and Sciences Curriculum

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.
In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student's major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

**Student Learning Outcomes**\(^1\)

1. **Breadth of Knowledge of Psychology**: Use and evaluate various psychological perspectives to evaluate and predict complexities in affect, behavior and cognition; understand the history of the field and how psychology fits with other disciplines.

2. **Scientific Reasoning**: Conduct, interpret and evaluate scientific studies in terms of the reliability, validity and generalizability of the research designs; develop open-mindedness, curiosity and amiable skepticism toward claims.

3. **Ethical Responsibility**: Apply ethical standards to research and practice situations; demonstrate interpersonal sensitivity in work and communities.

4. **Communication Skills**: Demonstrate flexibility and clarity of argument in both written and oral communication.

5. **Personal Development**: Apply psychological thinking to issues encountered in work and personal life, such as using evidence to solve problems; engage in teamwork as well as self-reflection and self-management.

\(^1\) Note, our discussion draws upon APA guidelines for the undergraduate psychology major.

**Admission Requirements: College of Arts and Sciences**

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Pre-Medical Studies Program**

Students majoring in Health Science Studies, Biology, Biomedical Sciences or the natural science track of Behavioral Neuroscience may fully participate in the pre-medical studies program. The curriculum in this degree program can fulfill the science prerequisites for most professional schools. Students should refer to Pre-Medical Studies (p. 55) for more information about the pre-medical studies program and contact the Health Professions Advisory Committee for further academic advising.

**Bachelor of Science in Psychology**

Program Contact: Anne Eisbach  
(anne.eisbach@quinnipiac.edu)  203-582-8455

Psychology explores phenomenon from multiple perspectives and is an ideal starting point for many careers. Our students go on to graduate level work in psychology and pursue careers in a wide range of fields including school psychology, industrial-organizational psychology, and many mental health fields. This degree also prepares students for success in fields such as law, education and business, which require strong critical-thinking skills and a solid understanding of interpersonal relationships. In this program, students work with experienced faculty members who research intriguing topics, such as how we read stories, workplace relationships, aggressive behaviors, and mindfulness.

Academic studies will be augmented by lab courses that involve designing psychological studies and collecting data. Students can participate in supervised fieldwork in the applied clinical science concentration, preparing them for careers in counseling. Or, students can choose the industrial-organizational psychology track, which focuses on relationships in work environments. Our psychology majors graduate well prepared to enter the workforce or to pursue an advanced degree.

Quinnipiac provides real-world experience based on students’ interests. In addition to participating in summer research projects at institutions across the country, our students have interned at a battered women’s center, psychiatric in-patient clinics and national corporations.

**BS in Psychology Curriculum**

In addition to the lab-based science required by the University Curriculum, psychology majors must complete one additional lab-based science course outside of psychology, one additional social science outside of psychology, one course that explores issues of multiculturalism and/or diversity, and a foreign language up to the 102-level. **NOTE:** The department strongly encourages psychology majors to take courses in biology.

Students majoring in psychology must meet the following requirements for graduation:

<table>

### Psychology Electives

- Select one psychology course at the 200-level or higher
- Select one psychology course at the 300-level

### Additional Degree Requirements

- Select one additional Natural Science course with a Lab
- Select one Diversity/Multicultural course
- Select one Social Science course outside of Psychology

### Free Electives

- 23 credits

**Total Credits:** 120

1. All students must complete the 46 credits of the University Curriculum (p. 61).
2. Students must complete the College of Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements specific to their major. See details below.
3. Students must earn a grade of C- or higher before moving on to the next course.
4. Senior standing required. Must be taken as a seminar during the regular academic year.
5. Additional courses may be designated to fulfill this requirement.

Psychology majors also have the opportunity to engage in supervised fieldwork and intensive study within one of two concentrations.

### Applied Clinical Science Concentration

Students may elect to enroll in the applied clinical science program within the psychology major. The program prepares students for careers related to clinical psychology and provides the basis for graduate work in fields such as social work, counseling and school psychology. A 3.0 overall GPA is required to participate in the ACS concentration fieldwork courses.

ACS students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PS 272</td>
<td>Abnormal Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PS 371</td>
<td>Clinical Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PS 391</td>
<td>Applied Clinical Science Seminar (SL: Service Learning)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits:** 15

The ACS program emphasizes:

1. Mental health fields as possible careers.
2. Conceptions of mental illness and the history of therapeutic methods.
3. Counseling and other treatment techniques.

### Industrial-Organizational Psychology Concentration

Students may elect to enroll in the industrial/organizational psychology program within the psychology major. The program exposes students to career possibilities in I-O psychology areas and provides the basis for further study related to fields such as I-O psychology and management. I-O psychology students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PS 265</td>
<td>Industrial-Organizational Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PS 397</td>
<td>Fieldwork in Industrial/Organizational Psychology</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PS 366</td>
<td>Advanced Personnel Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PS 367</td>
<td>Advanced Organizational Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PS 368</td>
<td>Occupational Health Psychology</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits:** 9

The I-O psychology program emphasizes:

1. The traditional research and practice of industrial-organizational psychology.
2. Using psychological principles to study and improve working conditions.
3. Mindfulness of the changing nature of work and the ability of the field to make innovations to match such changes.

### College of Arts and Sciences Curriculum

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements.
with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

**Student Learning Outcomes**

1. **Breadth of Knowledge of Psychology:** Use and evaluate various psychological perspectives to evaluate and predict complexities in affect, behavior and cognition; understand the history of the field and how psychology fits with other disciplines.

2. **Scientific Reasoning:** Conduct, interpret and evaluate scientific studies in terms of the reliability, validity and generalizability of the research designs; develop open-mindedness, curiosity and amiable skepticism toward claims.

3. **Ethical Responsibility:** Apply ethical standards to research and practice situations; demonstrate interpersonal sensitivity in work and communities.

4. **Communication Skills:** Demonstrate flexibility and clarity of argument in both written and oral communication.

5. **Personal Development:** Apply psychological thinking to issues encountered in work and personal life, such as using evidence to solve problems; engage in teamwork as well as self-reflection and self-management.

*Note, our discussion draws upon APA Guidelines for the Undergraduate Psychology Major.

**Admission Requirements: College of Arts and Sciences**

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Minor in Psychology**

Program Contact: Anne Eisbach (Anne.Eisbach@quinnipiac.edu) 203-582-8455

Psychology is a fascinating and complex discipline with a rich history and a range of subfields that intersect in some capacity with nearly every other field of academic study. The minor allows you to select topics that most complement your academic and career goals. Courses offered focus on the major perspectives in the field (namely, the biological, cognitive, social, developmental and scientist-practitioner) as well as other specialized areas of interest (e.g., clinical psychology, school psychology, forensic psychology, health psychology and the like).

The minor requires 18 credits of psychology courses, no more than 6 of which can be at the 100-level. Course selection should be based on the student’s interest and goals; however the following courses are reserved for majors only: PS 206, PS 307, PS 308, PS 391, PS 393, PS 394 and PS 401.

**Psychology Minor Curriculum**

Students wishing to minor in psychology take 18 credits in psychology. No more than two courses (6 credits) may be at the 100-level. Course selection should be based on the student’s interest and goals.

DEPARTMENT OF SOCIOLOGY, CRIMINAL JUSTICE AND ANTHROPOLOGY

The Department of Sociology, Criminal Justice and Anthropology embraces a range of disciplines and their related subfields: anthropology, criminal justice, gerontology and sociology. Our graduates are represented in careers such as social work, teaching, health care, politics, policing, law, corrections, nonprofits, public administration and social policy. In addition to course content, students who choose one of these majors or minors acquire a valuable set of skills useful in their future professions or in graduate education:

Diversity Awareness. Students go outside their comfort zone to not only witness but identify with and appreciate the perspective of diverse groups.

Social Scientific Literacy. Students learn the logic of research methodology and are able to understand and critique the results of scientific research generated by scholars in the discipline.

Critical Thinking. Students apply disciplinary theories and concepts to interpret various social phenomena and scholarship from multiple perspectives through clear oral and written articulation.

Sociological Understanding of Society. Students discuss the theories, critical concepts and ideas that form the basis of disciplinary knowledge and understand how social structure affects the distribution of cultural and material resources across social groups.

The three primary majors are Sociology, Criminal Justice and Gerontology. For more information about the different majors, click here (p. 202). Coursework in the department provides students with skills that make them invaluable as workers, as community leaders, and as citizens of a diverse, interconnected nation and world. Our majors graduate with the ability to appreciate diversity, to facilitate discussions across diverse viewpoints, to gather and assess evidence, and to evaluate programs and then “think outside the box” to act as leaders of innovation and change in the workplace.

The core of the Criminal Justice, Gerontology and Sociology majors is our internship program. As one of the first departments at Quinnipiac to have centered our majors around an applied internship, we have 35 years of experience in helping students translate their classroom knowledge into real-world, in-demand job skills. In addition to rigorous academic preparation, the department stresses the applicability and usefulness of this training through an upper-division experience in any number of internships at professional settings.

Anthropology, Gerontology, Sociology and Criminal Justice are united by a core set of classes designed to cultivate an appreciation for social and cultural diversity as well as to give students applied data analysis skills relevant to a career in any field. Students are taught to observe the ways that social and cultural forces shape both groups and individuals, and are provided with the skills of scientific inquiry that will enable them to be critical thinkers who can analyze the causes and consequences of social interaction in a wide range of settings.

Majors in the Department

Sociology

Sociology is the discipline of understanding society and social groups. Quinnipiac University offers a sociology degree, in which students can choose all their elective coursework from courses within the program, or students may choose a concentration in social services or in medicine and health to focus their course of study. Through their study, students learn how groups interact and the social reasons for individual and group behaviors. Coursework is enriched by a required internship. Internships let students apply their classroom experiences in professional settings. Our internship program is unique as we meet with each student to assess their professional interests before recommending appropriate internship sites. In addition to 120 hours at the internship site, students participate in a weekly seminar to connect skills they take from the internship to their course work and to form a community among their peers. Sociology majors also have the option to complete two different internships that teach them about working in diverse settings. Our major equips students with the applied skills, capabilities and work experience to enable them to begin careers immediately upon graduation or to pursue graduate education in related areas. As such, sociology is applicable to a wide range of fields for which understanding groups, social interactions, and diversity are essential: social work, teaching, health care, politics, law, nonprofits, public administration and social policy among others. Our program requirements incorporate the skills needed for the 21st-century workforce: diversity awareness, critical thinking, quantitative social scientific reasoning, and a sociological understanding of society.

Criminal Justice

The Criminal Justice program prepares students for work in the diverse and challenging criminal justice field. Recent developments, including growth of the prison population and increasing numbers of prisoners returning to communities, create challenges our criminal justice majors are prepared to meet. Our program combines theory with practice as our majors learn in the classroom and the professional world. While students take courses dealing with topics such as policing, crime by juveniles, corrections and forensic science, a required 120-hour internship lets them apply their classroom experiences in a professional setting. Our internship program is unique as we meet with each student to assess their professional interests before recommending appropriate internship sites. In addition to 120 hours at the internship site, students participate in a weekly seminar to connect skills they take from the internship to their course work. Students have the option to complete two different internships that teach them about criminal justice work across diverse settings. Our graduates are employed in a range of fields including policing (local, state and federal), law, social work and probation, and some pursue advanced degrees in criminal justice or related fields. As with all disciplines in the Department of Sociology, Criminal Justice and Anthropology, criminal justice majors benefit from small class sizes and advising loads so they have ready access to faculty to help them shape their educational experience to best fit their professional and personal aspirations.

Gerontology

Older Americans comprise the fastest growing age group in the country and careers in aging are growing right along with the elderly population. Our state-licensed interdisciplinary program in gerontology focuses on the diverse needs and characteristics of America’s rapidly growing senior population. This program builds the foundation for you to enter a rewarding profession in a field with incredible demand—among the highest of all occupational fields. Our program is intentionally designed.
to blend the academic and the professional from your first year through your senior year. You will build your knowledge of aging and older people with diverse topical courses in gerontology, sociology, psychology and biology. You’ll also develop skills with courses on research methods and statistics, which provide valuable tools for any career. During your junior year and under the direction of our dedicated internship coordinator, you’ll continue to incorporate professional skills, build ties to the community, and connect with potential employers in our required year-long internship. In your senior year, you will have the opportunity to synthesize your knowledge and skills by writing a grant proposal in our senior seminar. This course integrates content, skills, and professional connections in the community in order to prepare you for excellence in any career you may choose in the field of gerontology.

### Bachelor of Arts in Criminal Justice

Program Contact: Alan S. Bruce (alan.bruce@quinnipiac.edu) 203-582-8458

This distinctive criminal justice degree program offers students a well-integrated education, placing criminal and deviant behavior within a wider sociological context. Students are exposed to courses ranging from crime response philosophy to criminal justice public policy. Carefully structured internships assure students of practical applications of course material. Upon successful degree completion, students are prepared to continue their education or assume careers in fields such as policing, corrections, law, social work, public administration, teaching, international peacekeeping and many fields related to crime control and administration of justice.

### Criminal Justice Curriculum

Students majoring in Criminal Justice must meet the following requirements for graduation:

| CJ 394 | Advanced Internship in the Community (SO 394/GT 394) |
| CJ 399 | Independent Study in Criminal Justice |

### Free Electives 16-19

Total Credits 120-126

1. All students must complete the 46 credits of the University Curriculum (p. 61).
2. Students must complete the College of Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements specific to their major. See details below.
3. Can count as either a crime typologies or criminal justice in practice option.

### College of Arts and Sciences Curriculum

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences
and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

Student Learning Outcomes

Upon completion of the program, students will achieve the following competencies:

1. Diversity – Students will recognize the influence that different forms of diversity have upon their worldview and how diversity impacts the criminal justice system.
2. Scientific Literacy – Students will be able to identify the steps of the scientific process, formulate scientific questions and distinguish between anecdotal and empirical evidence.
3. Social Responsibility – Students will understand how the criminal justice system functions as one part of the larger environmental system, understand that its current format is not inevitable but the products of historical factors and the interconnectedness of individual actions and societal decisions.
4. Communication – Students will be able to argue a clearly defined position with civility, using credible evidence with appropriate citation of sources.
5. Critical Thinking – Students will understand multiple perspectives on significant crime-related topics and the importance of examining these from multiple perspectives and the significance of utilizing different data sources when examining these concepts. Basic disciplinary theory and terminology are applied.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

Bachelor of Arts in Gerontology

Program Contact: Catherine Richards Solomon (Catherine.Solomon@quinnipiac.edu) 203-582-5264

Quinnipiac is one of the few universities to offer an undergraduate major that anticipates one of the growing realities in our society: the rise in the number of older Americans. Every aspect of our society will be affected by the rapidly growing number of people over age 65. Gerontology prepares students to have careers that can address these societal changes. Jobs related to gerontology are among the fastest growing in the U.S. right now, and can be found in a range of professions, from health and business to policy and social programs. Nearly every profession entails working with clients over 65. Our curriculum is unique in that it provides students with a broad understanding of the various issues older individuals and their families face in later life: how our families and social networks changes as we age, the effects of aging on our minds and bodies, and which social programs and policies exist to help older people and families. Because the effects of an aging population are so far-reaching, the program is based on interdisciplinary studies, including courses from sociology, psychology, biology, philosophy and law.

Gerontology majors also complete two semester-long internships in public or private agencies involved directly with the elderly, such as senior centers, retirement complexes, hospitals, rehabilitation facilities, community aging services, case management agencies and nursing homes. Students are prepared to continue their education or assume careers in aging-related areas such as social work, law, public health, medicine, health administration and public policy.

Gerontology Curriculum

Upon completion of the program, students will achieve the following Student Learning Outcomes:

1. **Diversity awareness**: Students learn to identify the perspectives of diverse groups among the older population and the effect of group membership on aging processes and the experience of being old in America.

2. **Social scientific literacy**: Students learn the logic of research methodology and be able to understand and critique the results of scientific research generated by scholars in disciplines related to gerontology.

3. **Critical thinking**: Students apply disciplinary theories and concepts to interpret aging and experiences of being old as well as scholarship from multiple perspectives through clear oral and written articulation.

4. **Sociological understanding of society**: Students are able to discuss the theories, critical concepts and ideas that form the basis of gerontological knowledge and will understand how social structure affects the distribution of cultural and material resources across social groups in the older population.

### Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

### Bachelor of Arts in Sociology

Program Contact: Lauren Sardi (Lauren.Sardi@quinnipiac.edu)  
203-582-8215

American society is in the midst of rapid social change, which affects families, schools, the economy, health care systems and social institutions. Students in this major study and analyze this change and explore potential solutions to a number of societal problems.

Sociology majors examine invisible structural forces and learn how these affect organizations and individuals. They analyze broader social trends, including trends in illness and wellness, changes in marriage and family formations, rates of educational attainment or patterns of hiring in organizations. They gain valuable sociological skills, which can be used to study nearly any aspect of social life—schooling, health and well-being, religious devotion, immigration patterns and more. In this major, students find a place to explore and develop their own unique interests and talents with thoughtful mentorship and guidance from faculty in the department.

Within the sociology major, there are two concentrations (p. 207) in which students may elect to enroll: social services or medicine and health. All students take the same core classes, including courses that show students how to apply their sociological skills to real-world situations, particularly the required internship course, which is one of the program's capstone experiences. Through the close mentorship of our departmental internship coordinator, students gain valuable insight into and experience with how their acquired knowledge and capabilities translate into marketable job skills. The program retains a long list of possible placement sites—from work in schools, hospitals and foster care settings to providing assistance with newly arrived immigrants to working with disadvantaged youth—to ensure that students can match their internship experience to their interests. Students are well prepared to continue their education or assume careers in areas including teaching, social work, public administration, health care, law and criminal justice.

1. All students must complete the University Curriculum (p. 61) requirements.
2. Students must complete the College of Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements specific to their major. See details below.
3. If students take MA 206 to fulfill the university quantitative literacy requirement, MA 206 can be used to fulfill the sociology statistics requirement. The sociology statistics course (SO 382) cannot be used for the university quantitative literacy requirement.
4. One of the electives could include AN 101 or AN 103; and one could be a criminal justice (CJ) course, so long as it is not cross-listed with sociology.

If students wish to focus their electives, they may take three classes (9 credits) of their 6 electives in either a social services concentration or a medicine and health concentration.

Social Services Concentration

For this applied concentration, students must take:

<table>

College of Arts and Sciences Curriculum

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

Student Learning Outcomes

Upon completion of the program, students will achieve the following competencies:

1. **Diversity awareness**: Students learn to identify the perspectives of diverse groups and the effect of group membership on life experiences and life chances.
2. **Social scientific literacy**: Students learn the logic of research methodology and be able to understand and critique the results of scientific research generated by scholars in the discipline.
3. **Critical thinking**: Students apply disciplinary theories and concepts to interpret various social phenomena and scholarship from multiple perspectives through clear oral and written articulation.
4. **Sociological understanding of society**: Students are able to discuss the theories, critical concepts and ideas that form the basis of disciplinary knowledge and will understand how social structure affects the distribution of cultural and material resources across social groups.

**Social Services Concentration**

A sociology degree with a concentration in social services integrates a traditional liberal arts education with the specialized training and field background for students who intend to pursue a career in social services or pursue graduate education in social work, health-related fields or public administration. Society is increasingly faced with challenges in delivery of social services to a growing set of underserved populations. For students who want to work for a social service agency, for nonprofits who help disadvantaged individuals or families, for mental health and counseling services, in social work or for local and state government, this concentration provides a perfect background. Students focus their coursework in the areas of social institutions, social inequalities and social issues. They also complete an advanced internship in the field, providing them with the experience and expertise to work with a wide range of client needs. For those wishing to pursue graduate education in social work, the concentration provides necessary background coursework helpful for success in graduate programs as well as work experience that will help distinguish students in the application process.

**Medicine and Health Concentration**

In our increasingly diverse nation, there is a growing need for medical professionals who understand how cultural and social factors affect individuals’ health statuses, behaviors and interactions with the medical community. This concentration is well suited for students who wish to pursue careers and/or graduate work in any health-related field: medicine, mental health, drug and alcohol abuse prevention/treatment or nonprofits addressing the mental and physical health of their clients. Students focus their coursework in such areas as sociology or anthropology of medicine, death and dying, disability, illness and mental health. Through this coursework, students learn about the varying medical and health needs of diverse populations, including the causes and consequences of health disparities, that will enable them to improve the health of groups with different cultural and social needs. Students in this concentration may complete their internships in hospitals, hospices or other health-related settings.

**Admission Requirements: College of Arts and Sciences**

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Minor in Anthropology**

Program Contact: Jaime Ullinger (jaime.ullinger@qu.edu) 203-582-6428

Anthropology is the study of humans in the broadest sense: through time and across geographical space, as social beings and as biological creatures. Anthropologists are interested in the big questions about what makes us human, and how living and past cultures are similar and different. Most importantly, anthropologists explore what we can learn from other people cross-culturally, from our ancestors in the past, and from our primate relatives.

Studying anthropology allows students to understand the complexity of human diversity and to develop confidence in one’s ability to work collaboratively with people from vastly different backgrounds and life experiences. Anthropology is a perfect area of study for anyone interested in learning about other cultures and ways of life, and offers excellent preparation for any career choice. Anthropology students find work in such fields as medicine, nongovernmental and nonprofit organizations, government, public health, development and international aid, and education. Anthropology offers students important training in persuasive writing, scientific research and data analysis, and critical thinking.

To complete the minor, students must take 18 credits of anthropology coursework.

**Minor in Criminal Justice**

Program Contact: Alan S. Bruce (Alan.Bruce@quinnipiac.edu) 203-582-8458

Exploring the fundamental issues inherent in the criminal justice system can provide valuable insight into some of today’s most complex societal
challenges, including growth of the prison population and the ever-increasing number of prisoners returning to communities. From the role mental illness plays in crime to the impact of drugs and alcohol on our communities, this minor examines an eclectic array of subjects that can complement many majors including sociology, psychology, and political science.

You’ll have the flexibility to shape the program in a way that reflects your interests and enhances your professional goals, and you’ll have plenty of support and guidance from a faculty with a broad range of expertise in the criminal justice field. You will meet one-on-one with the program director, and together design a minor that’s right for you, choosing from a varied selection of courses such as Dispute Resolution, Sexual Violence, Organized Crime and Investigative Techniques.

Criminal Justice Minor Curriculum

To complete the minor, students must complete 15 credits in criminal justice studies at any level, and one 300-level criminal justice class for a total of 18 credits. Students should meet with the program director to select appropriate courses. A student majoring in gerontology or sociology can minor in criminal justice. Courses taken for a minor may not count toward a GT or SO major. Courses taken for a GT or SO major may not count toward a minor.

Students in the Criminal Justice minor may choose from the following courses:

Minor in Gerontology

Program Contact: Catherine Richards Solomon (Catherine.Solomon@quinnipiac.edu) 203-582-5264

The Minor in Gerontology familiarizes you with one of our society’s most prevalent issues: the dramatic increase in its aging population. Interdisciplinary courses teach you about the many dimensions of the aging process, and help you to understand the range of social, psychological and physiological issues facing our country’s advanced-age population. You’ll gain the skills to interpret and perform statistical analysis and research, as well as learn about the variety of programs, products, services and other resources available to older adults.

The study of gerontology complements a range of majors, including law, sociology, psychology and public health. Whether your primary interest includes the direct care of seniors, or the legislature that protects them, a variety of electives enable you to focus on an area most related to your goals. The Gerontology minor opens the door to future volunteering opportunities, or to careers dedicated to making a direct, positive impact on the lives of the elderly and their families.

Gerontology Minor Curriculum

For the Gerontology minor, students should work with the program director to select 18 credits of coursework in gerontology. A student majoring in Criminal Justice or Sociology can minor in Gerontology. Courses taken for a minor may not count toward a CJ or SO major. Courses taken for a CJ or SO major may not count toward a minor.

Minor in Sociology

Program Contact: Lauren Sardi (Lauren.Sardi@quinnipiac.edu) 203-582-8215

Through a minor in sociology, you’ll explore the diverse communities and social groups that make up our society, and also examine the many factors influencing their behaviors—from work opportunities and educational attainment to health care availability, law enforcement policies, and pop-culture trends. You’ll understand how factors such as these determine social relationships and organization and learn...
how various economic and political forces affect the creation of social legislation and the availability of resources.

You will choose from a variety of elective courses that enable you to focus the minor on topics that not only align with your academic interests and career goals, but also broaden your perspective in your chosen field as well. Courses in family dynamics, gender, race, immigration, and deviance complement majors such as anthropology and criminal justice. The ability to examine broader social trends and apply observations in everyday interactions is a crucial skill for social workers, members of law enforcement, and educators at all levels.

For the sociology minor, students are welcome to work with the program director to select 18 credits of coursework that align with the student’s interests in the field. A student majoring in criminal justice or gerontology can minor in sociology. Courses taken for a minor may not count toward a GT or CJ major. Courses for a GT or CJ major may not count toward a minor.

DEPARTMENT OF VISUAL AND PERFORMING ARTS

The Department of Visual and Performing Arts is an interdisciplinary department that offers students the opportunity to study the history, theory and practice of art, design, theater, game design and music. The visual arts programs foster the development of creative processes for the creation of innovative works of art and design while situating the work in the broader contexts of history and culture. The performing arts programs include courses in the history of the disciplines and techniques of performance, which are enriched by an active theater production program and performing ensembles.

Programs in the Department of Visual and Performing Arts offer students a foundation in creative thinking that is recognized as critical to problem-solving and conceptualization, qualities increasingly valued by leaders and organizations in all areas of society.

The Department of Visual and Performing Arts at Quinnipiac University is committed to providing our students with the opportunity to develop creative thinking skills through experiential learning as a part of their general education and in pre-professional programs. By studying the practice, theory and history of: music, theater, visual art, and game design, we provide an opportunity for students to explore their creative abilities in a hands-on environment.

Bachelor’s Degrees
- Bachelor of Arts in Game Design and Development (p. 210)
- Bachelor of Arts in Theater (p. 212)

Bachelor of Arts in Game Design and Development

Program Contact: Elena Bertozzi (elena.bertozzi@qu.edu) 203-582-7998

The Bachelor of Arts in Game Design and Development is a pre-professional program that prepares students to enter the highly competitive industry of game design or to pursue studies at the graduate level. This is an applied, interdisciplinary major that focuses on the meaningful application of game technologies beyond commercial entertainment by addressing serious topics regarding the environment, health care and education including STEM and STEAM (science, technology, engineering, arts and math) initiatives. Students receive a solid foundation in fundamental 21st-century skills, design thinking, fine arts principles, and develop specialized technical skills and competence in game design and systems thinking. The experiential learning focus of the major provides students with skills that are readily applied to the real world and the program supports collaboration with external partners when possible.

There are a total of 42 credits in the major. The major has 10 required core courses. With the recommendation of the student’s adviser and/or the program director, students take two required and two elective courses from either the game design track (designing, producing and making games) or the game art track (creating and designing the artwork and assets such as characters, props, costumes, architecture, levels and sound). A unique feature of the program is the game lab where students come together in interdisciplinary teams to build game prototypes. The game lab is offered as a multi-semester sequence beginning in the sophomore year. In the senior year, the program culminates in a capstone experience when students take the Senior Project and Seminar.

A grade of C- or better is required in all game design and development courses and prerequisites. Students with a GPA of less than 2.0 will be put on probation. After two semesters on probation, students will be advised to change majors.

BA in Game Design and Development Curriculum

It is recommended that students majoring in Game Design and Development pursue a minor, or double major, or take courses in a complementary discipline such as graphic interactive design or computer science. Majors can elect to pursue internships and take electives that complement their interests in the field. Students choosing the game art track are encouraged to take art history and fine arts courses.

Students majoring in Game Design and Development must meet the following requirements for graduation:

Game Design & Art Tracks

With the recommendation of the student’s adviser and/or the program director, students take two required and two elective courses from either the game design or game art track. Substitutions for track requirements are permitted with the recommendation of the student’s advisor and/or the program director.

Game Design Track Requirements:
GDD 201 Game Design I  
GDD 301 Game Design II

Game Art Track Requirements:
GDD 202 Game Art I  
GDD 302 Game Art II

Game Design & Game Art Track Electives
Select 6 credits of the following:  
GDD 202 Game Art I  
GDD 302 Game Art II

GDD 202 Game Art I  
GDD 302 Game Art II  
GDD 250 Interactive Storytelling and Narrative  
GDD 290/390/490 Internship  
GDD 301 Game Design II  
GDD 302 Game Art II  
GDD/EN 303 The Art of Audio Narrative (FTM 380 EN 303)

GDD 311 Game Lab IV: Team Projects  
GDD 350 Board Game Design  
GDD 370 Acting and Directing for Game Design  
GDD 380 The Business of Games  
GDD 394 History of Video Games  
GDD 395 Critical Game Studies Seminar (PL 395)  
GDD 396 Games, Learning & Society  
GDD 399 Independent Study  
GDD 402 Game Art III  
GDD 405 Game Audio Design  
GDD 499 Independent Study

A course from the following list can be taken to satisfy the GDD elective requirement:  
COM 350 Media Culture and Arts of Los Angeles  
CSC 110 Programming and Problem Solving  
DR 220 Voice and Movement  
DR 230 Directing I  
ENT 290 Creating New Enterprises  
FTM 280 Visual Effects (VFX) Techniques  
FTM 330 Emerging Cinematography Techniques  
FTM 372 Screenwriting  
FTM 393 Animation Techniques  
GID 110 Design Research and Methods  
GID 301 Motion Graphics I  
MSS 231 Media and Society  
MSS 345 Media Users and Audiences (WS 345)

Free Electives  

Total Credits

1. All students must complete the University Curriculum (p. 61) requirements.  
2. Students must complete the College of Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements specific to their major. See details below.  
3. Students wishing to take courses from the above list must complete any prerequisites required by individual departments/programs or schools.

Elective substitutions are permitted with prior approval of the program director.

College of Arts and Sciences Curriculum
The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student's major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A “subject area” is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

A student enrolled in the Accelerated Dual-Degree BA/JD or BS/JD (3+3) program is exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement. A student pursuing a double major is likewise exempt from these College of Arts and Sciences requirements, with the exception of the foreign language requirement.

Student Learning Outcomes
Upon completion of the program, students will demonstrate the following competencies:

1. Computational and Systems Thinking: Be fluent in at least one programming language and associated game engine to construct fully functional working games.
2. Critical/Analytical Thinking and Communication: Play and analyze games using academic research methods, exhibit effective written and verbal communication skills and apply this analysis to the game design process.
3. Design Process Thinking: Prototype, reflect critically on workflow and process, incorporate feedback, and iterate.
4. Creative Thinking and Problem Solving: Generate inventive, novel and imaginative ideas for game design concepts and nimbly respond to design and implementation challenges.
5. Multidisciplinary and Diverse Perspective Thinking: Understand the issues surrounding topics of representation and diversity in game development and be able to discuss them and design games that address them.
6. Teamwork and Experiential Learning Expertise: Collaborate with teams of colleagues with different skill sets to produce work using
established game development best practices with a clear definition of scope, responsibilities, progress and assessment of results.

Admission Requirements: College of Arts and Sciences
The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

Bachelor of Arts in Theater
Program Contact: Kevin Daly (Kevin.Daly@quinnipiac.edu) 203-582-3500

The Bachelor of Arts in Theater at Quinnipiac University prepares students for meaningful careers and graduate studies in all areas of theater performance and production.

After completing the core requirements, upperclassmen enroll in advanced electives and participate in a senior seminar where they engage in a culminating project. All theater majors are required to complete at least one competitive internship, professional experience, or conservatory semester. Students are strongly encouraged to take on portfolio building roles within our MainStage season and at local professional theaters.

The MainStage season includes contemporary and classical plays, popular musicals and a New Play Festival produced in collaboration with The Barrow Group, a professional theater company in New York City. In this unique setting, students are exposed to professional practices and develop career-enhancing relationships that will serve them long after they graduate.

The BA in Theater is a great choice for students who enjoy collaboration and wish to explore creative careers within the theater arts and allied disciplines.

BA in Theater Curriculum

In addition, students earning a bachelor of arts degree must fulfill separate requirements for breadth and depth of study.

For the breadth requirement, students must complete at least 3 credits in each of the four CAS disciplinary areas other than the area of the student’s major. These areas are fine arts, humanities, natural sciences and social sciences. A course taken to fulfill the CAS breadth requirement may not also be used to fulfill a UC requirement.

For the depth requirement, students must complete at least 9 credits within a single subject area other than that of the major. (A "subject area" is identified with a catalog subject code, such as PL, CJ, WS, MA, etc.)

College of Arts and Sciences Curriculum
The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102-level, and all students are encouraged to pursue a balanced program of study.

Free Electives 17-20
Total Credits 120-126

1 All students must complete the University Curriculum (p. 61) requirements.
2 Students must complete the College of Sciences Curriculum (http://catalog.qu.edu/arts-sciences/cas-curriculum) requirements specific to their major. See details below.
and Sciences requirements, with the exception of the foreign language requirement.

**Student Learning Outcomes**

Upon completion of the BA in Theater, students will demonstrate the following competencies:

1. **Understanding**: Students develop an understanding of the roles and responsibilities of theater artists: actor, director, scenic/lighting/costume designer, technical director and playwright.

2. **Conceptual and Critical Thinking**: Students develop skills to think conceptually and critically about text, performance and production.

3. **Self-Appraisal**: Students will develop the skills to self-assess, critique and revise their own work.

4. **Literacy**: Students will develop a fundamental knowledge of theatrical history as well as dramatic literature.

5. **Production Skills and Knowledge**: Students will develop the skills and techniques necessary for realizing a variety of theatrical styles.

6. **Collaboration Skills**: Students will develop skills in collective problem-solving.

**Admission Requirements: College of Arts and Sciences**

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Accelerated Dual-Degree BA in Theater/MBA (3+1)**

Program Contact: Kevin Daly (Kevin.Day@qu.edu) 203-582-3500

The Accelerated Dual-Degree BA/MBA (3+1) program offers highly motivated students an opportunity to earn a BA in Theater and an MBA from the School of Business in just 4 years. Both degrees are completed in full without compromise.

This program offers advantages to students who have a passion for theater and ambitions for a career in the global business landscape. The study of theater sharpens self-confidence and public speaking skills while developing empathy. Theater students engage in hands-on problem solving, take on leadership roles, and become creative thinkers with intrinsic, "get the job done" work ethics. A student who wishes to have his or her resume stand out from the pack, while developing the above skills and earning a respected degree in business might consider this 3+1 program as a differentiator.

Additionally, this program offers advantages to students who wish to pursue leadership roles within the professional entertainment industry. There is a demand within the industry for skilled leaders who possess strong business administration skills paired with a core understanding of theater arts. Examples of high-paying jobs that 3+1 students would be uniquely qualified for include: executive director, producer, managing director, artistic director, director of development, business manager and operations manager. By pairing their passion for theater with the MBA degree, theater students substantially increase their employability and earning power upon graduation without compromising the personal, interpersonal and intellectual growth that a liberal arts education offers.

**BA in Theater/MBA Program of Study**

This rigorous program of study includes extra courses during the fall and spring sessions, as well as summer sessions to complete the degree requirements for both a BA and an MBA in just four years.

Minor in Fine Arts

Program Contact: Stephen Henderson
(Stephen.Henderson@quinnipiac.edu) 203-582-3751

Student Outcomes
Upon completion of the BA in Theater, students will develop the following competencies:

1. **Understanding**: Develop an understanding of the roles and responsibilities of theater artists: actor, director, scenic/lighting/costume designer, technical director and playwright.

2. **Conceptual and Critical Thinking**: Develop skills to think conceptually and critically about text, performance and production.

3. **Self-Assessment**: Develop the skills to self-assess, critique and revise their own work.

4. **Literacy**: Develop a fundamental knowledge of theatrical history as well as dramatic literature.

5. **Production Skills and Knowledge**: Develop the skills and techniques necessary for realizing a variety of theatrical styles.

Upon completion of the MBA program, students will develop and emphasize skills in the following areas:

1. **Business Analytics**: Demonstrate facility with quantitative methods and tools and an ability to interpret financial metrics.

2. **Managing People**: Demonstrate an ability to understand models and applications of leadership and social intelligence.

3. **Managing Organizations**: Demonstrate an ability to understand organizational behavior and structures and the importance of effective communication.

4. **Strategic Integration**: Assess and diagnose a situation and to formulate and implement effective decisions and responses to business problems.

5. **Ethics**: Identify ethical issues related to business situations and to develop appropriate situational responses consistent with organizational and societal values.

6. **Knowledge of Business Disciplines**: Demonstrate knowledge of business disciplines (marketing, management, finance and managerial accounting) and the connection between disciplines.

Admission Requirements: College of Arts and Sciences
The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

Minor in Fine Arts

Program Contact: Stephen Henderson
(Stephen.Henderson@quinnipiac.edu) 203-582-3751
The Department of Visual and Performing Arts offers a minor for students interested in exploring the fine arts. The different tracks in fine arts are designed to advance each student’s unique abilities in creative thinking and artistic processes, in addition to developing a basic foundation in visual literacy.

A Minor in Fine Arts not only expands your knowledge of artists and their work, but also refines the lens through which you view, understand and critique works of art—from the medieval period to the present day. Whether your interest is focused exclusively in the history and interpretation of art, or whether you are seeking a more hands-on approach to develop your artistic skills, three separate tracks enable you to engage with subject matter on terms that match your personal goals.

The art history track traces the development of aesthetic movements and the artists associated with them. It also enriches your understanding of how the visual arts shape various cultural and social contexts. The studio art track enables you to experiment with materials, artistic strategies, composition and form. Regardless of your level of skill, courses in visual design, drawing, photography and other disciplines give you the opportunity to express your own concepts. The interdisciplinary track blends art history with courses in music, drama and film to illustrate the degree to which the visual arts have inspired and informed other expressive mediums.

**Fine Arts Minor Curriculum**

Students electing this minor must complete the courses under one of the following three tracks (18 credits).

**Fine Arts: Studio Art Track**

In consultation with the chair, certain film courses may be applicable. At least two courses must be at the 200 level or higher. Due to the interdisciplinary nature of this minor, courses from at least two disciplines must be taken with a maximum of four courses from any single discipline.

**Minor in Game Design and Development**

Program Contact: Elena Bertozzi (Elena.Bertozzi@qu.edu) 203-582-7998

This Game Design and Development minor focuses on the meaningful application of game technologies beyond commercial entertainment by addressing serious topics in health care and education, including STEM and STEAM (science, technology, engineering, arts and math) initiatives. Students receive a solid foundation in fundamental arts principles and concepts, and develop specialized technical skills and competence in game design. A minor may be combined with any major inside or outside the College of Arts and Sciences, complementing majors or minors in other disciplines on campus (18 credits).

Minor in Music

Program Contact: George Sprengelmeyer (George.Sprengelmeyer@quinnipiac.edu) 203-582-6426

The music minor offers students a broad spectrum of the subject both as an art form and as a global "language." Students are required to master the rudiments of musical theory and to emerge with a comprehensive view of music history as well as the fundamentals of informed listening. Students also study an instrument of their choosing and participate in one of the university’s performing ensembles. Given the prominence music continues to hold culturally, its interdisciplinary relationships make it well-suited to the interests of students majoring in a variety of fields and also offers students an outlet for artistic expression. The music minor is 18 credits.

Minor in Theater

Program Contact: Kevin Daly (Kevin.Daly@quinnipiac.edu) 203-582-3500

The theater minor provides students with a background in the primary areas of theater study and production while allowing them the flexibility to explore their particular interests.

Students select courses from an array of offerings in acting, directing, playwriting, design, stagecraft, theater administration and theater history. Students also may earn theater practicum credit by working on the Main Stage productions. A total of 18 credits is required to complete the minor.

Theater Minor Curriculum

Students select courses from an array of offerings in acting, directing, playwriting, design, stagecraft, theater administration and theater history.

Career Development

In the School of Business, members of the Office of Career Development work with students to plan the academic and professional components of each student’s education. They explore career interests, guide students through a career development process and provide assistance with internships, resume preparation and employment interviews.

Internship Program

Undergraduate business students are encouraged to gain valuable career experience by participating in our internship program. Both paid and unpaid internships are available in a range of industries.

With the approval of their department chair and dean, students who have completed a minimum of 57 credits with a GPA of 2.6 or higher and have completed the business core courses within their major are eligible to earn up to 6 academic credits for internship experiences. Students who do not meet these standards may complete an internship, but are not eligible to earn academic credit for that experience. Unless a student is completing a double major, only 3 credits can be earned for internship experiences in the major. Students who are completing a double major can earn up to 3 credits in each major (for a total of 6 credits) for internship experiences. Students may not receive internship credit toward the completion of a minor.

Mission Statement

The School of Business is a student-centered educational community focused on preparing students for achievement and leadership in their professional careers.

Values

The development of our students as passionate learners and emerging professionals.

The impact of alumni, students and faculty in business and in the community.

Applied learning that integrates the classroom with meaningful and impactful activities such as internships, student competitions, faculty-student research, student consulting, international opportunities (study abroad, student exchange, immersion experiences, internships).

The active support of faculty scholarship that emphasizes contributions to practice and pedagogy.

Mutually beneficial collaborations with the business community that advances the education of our students and the research of our faculty.

A collegial, respectful and responsible environment where members of the community act with integrity, honesty, fairness and tolerance.

Diversity in people and in ideas.

Learning Goals

**Business Knowledge:** Apply the basic business theories and concepts to understand and solve business problems.

**Business Analytics:** Effectively gather, assess and utilize data to understand, improve and communicate business decisions.

**Communication:** Communicate business ideas effectively through written communications, oral communications and presentations, and digital media.

**Critical Thinking:** Utilize information or research findings to analyze problems and determine appropriate solutions.
Business Ethics: Apply ethical frameworks to evaluate situations and determine appropriate solutions.

Cultural Adaptability: Recognize and apply knowledge and diversity within and across individual and groups.

Professionalism: Exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

Bachelor’s Degrees
- Accounting (p. 225)
- Biomedical Marketing (p. 239)
- Computer Information Systems (p. 227)
- Computer Information Systems and Accounting (p. 228)
- Entrepreneurship and Small Business Management (p. 230)
- Finance (p. 232)
- International Business (p. 234)
- Management (p. 237)
- Marketing (p. 240)

Dual-Degree Programs
- Accelerated Dual-Degree BS/MBA (3+1) (p. 357)
- Dual-Degree BA/MBA (4+1) (p. 353)
- Dual-Degree BS/MBA (4+1) (p. 359)
- Accelerated Dual-Degree BS/MS in Accounting (3+1) (p. 362)
- Dual-Degree BS/MS or BA/MS in Accounting (4+1) (p. 363)

Bachelor’s Degree Completion Program
- Business Administration (p. 224)

Minors
- Accounting (p. 226)
- Business (p. 243)
- Business Analytics (p. 229)
- Computer Information Systems (p. 229)
- Entrepreneurship and Small Business Management (p. 231)
- Finance (p. 233)
- International Business (p. 235)
- Management (p. 238)
- Marketing (p. 241)

Certificate Programs
- Global Supply Chain (p. 235)
- Global Business Affairs Polish Certificate Program (p. 242)

Master of Business Administration
- Master of Business Administration (p. 355)\(^1\) with electives available in:
  - Computer Information Systems
  - Finance
  - Entrepreneurship
  - Health Administration
  - International Business
  - Management
  - Marketing
  - Strategy
  - MBA-Finance Track (p. 360)
  - MBA-HCM Track (Health Care Management (p. 361))\(^1\)
  - MBA-SCM Track (Supply Chain Management (p. 360))

Master of Science
- Master of Science in Accounting (p. 362)
- Master of Science in Business Analytics (p. 364) (online only)
- Master of Science in Organizational Leadership (p. 365) (online only)
  - Health Care Management Track
  - Human Resources Leadership Track
  - Public Service/Nonprofit Leadership Track
  - Strategic Leadership Track

Dual-Degree Programs
- Accelerated Dual-Degree BS/MBA (3+1) (p. 357)
- Dual-Degree BA/MBA (4+1) (p. 353)
- Dual-Degree BS/MBA (4+1) (p. 359)
- JD/MBA (Juris Doctor) (p. 360)
- Accelerated Dual-Degree BS/MS in Accounting (3+1) (p. 362)
- Dual-Degree BS/MS or BA/MS in Accounting (4+1) (p. 363)

Certificates in Health Care Administration
- Health Care Compliance (p. 452)\(^1\)
- Long-Term Care Administration (p. 355)

\(^1\) Program also offered online.

For specific information about the mission and learning goals for each of the graduate programs, please visit the university website at qu.edu (http://www.qu.edu).

Business Core Curriculum
The common requirements for graduation with the bachelor of science degree for all business majors include completion of the University Curriculum (that covers fundamental areas such as English, mathematics, science, social sciences, the humanities and the arts), the business core curriculum and the major requirements. The business core challenges each student to develop a knowledge and skill base for further study within the business disciplines, and the major requirements provide students with specialized knowledge within a field of business.

In addition to the traditional business core coursework in accounting, business law, economics, finance, international business, management and marketing, the school also offers a seminar designed to begin the professional development process required to be successful in today’s competitive business world.

Disciplinary Inquiry (four classes = 13 credits)

In the “Disciplinary Inquiry” phase of the University Curriculum, students make their first encounters with specific knowledge and methodologies in the disciplinary areas. This phase familiarizes students with the kinds of knowledge produced in these disciplinary areas and thus informs their academic discipline outside of the four Disciplinary Inquiry areas (Natural Sciences, Social Sciences, Humanities, Fine Arts) or that reflect nationally established interdisciplinary areas. Such courses increase generalizable and transferrable knowledge that are based in a single academic discipline outside of the four Disciplinary Inquiry areas (Natural Sciences, Social Sciences, Humanities, Fine Arts) or that reflect nationally established interdisciplinary areas. Such courses increase the disciplinary, methodological and cultural perspectives available to students in the University Curriculum, thereby extending the breadth of their knowledge to navigate successfully a complex and dynamic world.

Personal Inquiry (six classes = minimum 18 credits)

The “Personal Inquiry” (PI) phase requires 18 credits with at least three Disciplinary Inquiry areas represented. This allows students significant flexibility in the selection of coursework as they pursue their Guiding Questions. The Personal Inquiry requirement has two parts:

Part 1 (three courses): In addition to those selected under Disciplinary Inquiry above, students select EC 112 from the Social Sciences and a course from two of the remaining disciplinary areas: Natural Sciences, Humanities and Fine Arts.

Part 2 (three courses): The remaining courses are IB 201 and any two other UC courses from the disciplinary areas in Part 1 and/or UC Breadth Electives. Students can combine Disciplinary Inquiry areas and UC Breadth Electives in any pattern that totals 9 to 12 credits. [Note: natural science courses that are treated by the Registrar as two separate courses (lecture and lab) shall be treated as one course for the purposes of the PI requirement. Students could thus take up to four lecture-lab pairings in the PI).

Integrative Capstone Experience (one course = 3 credits)

The Integrative Capstone is offered in the School of Business. Students select an additional unrestricted course in the University Curriculum.

Intercultural Understanding (one course = minimum 3 credits)

As students purposefully select courses and progress through the Breadth part of the curriculum, it is imperative that all students develop the skills, knowledge and diverse perspectives necessary to address the complexity of their Guiding Questions, and to acquire the understanding necessary to be informed and ethical citizens who can contribute to the local and global society.

To achieve this goal, within their 31 breadth component credits students are required to take at least 3 credits in classes marked as “I” (Intercultural Understanding). The classes with “I” designation can be chosen from any area in Disciplinary and/or Personal Inquiry.

University Curriculum Breadth Electives (formerly called UC “Electives”)

University Curriculum (UC) Breadth Electives are courses with generalizable and transferrable knowledge that are based in a single academic discipline outside of the four Disciplinary Inquiry areas (Natural Sciences, Social Sciences, Humanities, Fine Arts) or that reflect nationally established interdisciplinary areas. Such courses increase the disciplinary, methodological and cultural perspectives available to students in the University Curriculum, thereby extending the breadth of their knowledge to navigate successfully a complex and dynamic world.

**Policy for Students Who Fail FYS 101**

Freshmen entering the University in the fall semester who withdraw from or fail to receive a passing grade for FYS 101 during that semester are given one chance to repeat the course during the first spring semester that they are enrolled at Quinnipiac. If they fail to complete the course successfully on a second attempt, they may not take FYS 101 again. They may not withdraw from the course on the second attempt. The failing student receives no credit for FYS 101, the failing grade (F) remains and he/she must substitute 3 credits from any other UC-designated course to count toward required general education credits.

**FYS 101 Policy for Transfer Students**

A student who transfers to Quinnipiac with less than sophomore standing (fewer than 27 credits) shall enroll in FYS 101 in his/her first semester at Quinnipiac. Students who transfer to Quinnipiac with 27 or more credits must substitute any UC-designated course for FYS 101, to count toward the general education credits needed to graduate. They also will complete a series of self-guided online modules by the start of their second semester at Quinnipiac, designed to ensure students successfully complete their remaining general education requirements and prepare for the integrative capstone experience.
Bachelor of Business Administration

Program Contact: Amy Paros (amy.paros@qu.edu) 203-582-7755

Degree Completion Program

This online program is designed for business professionals who already have an associate's degree and would like to pursue a four-year degree in business.

Nontraditional, adult professionals who are looking to change careers or increase their opportunities as well as recent associate's degree graduates who wish to continue their studies may complete this program part-time via a distance education format through QU Online with a curriculum that builds on the individual's prior educational preparation.

Open Electives (30 credits) 30

Total Credits 121

1. 3 credits of fine arts, 6 credits of humanities, 7 credits of science and 9 credits of UC electives. Students can complete this requirement in part with up to four 4-credit advanced core courses.

Student Learning Outcomes

Upon completion of the Bachelor of Business Administration program, students will demonstrate the following competencies:

1. Effective Communication and Social Intelligence: Capabilities with respect to effective written and oral communications, and the interpersonal skills required to work effectively as a member of a team.

2. Business Strategy and Integration: An understanding of the interdependence of the various functional areas of business, and the ability to make a well-reasoned recommendation concerning a business situation.

3. Knowledge of Core Business Functions: An understanding of core business functions and an ability to apply functional knowledge to practical business problems.

4. Ethics, Diversity and Globalization: Ability to identify ethical issues related to business practices, to recognize the complexity and ambiguity of those issues, to apply of an ethical decision-making framework, and to formulate an ethically justifiable solution; an awareness and appreciation of the diversity in the workplace; and an awareness of issues surrounding the globalization of both domestic and international business activities as well as the ability to develop strategies to address those issues.

Admission requirements include an associate's degree from a regionally accredited college or university, or equivalent coursework totaling a minimum of 60 transferable credits, with a grade point average of at least 2.5; transcripts from all post-secondary institutions attended; and a resume.

The application process is managed through QU Online Admissions (https://quonline.quinnipiac.edu/become-a-student/admissions-process.php).
DEPARTMENT OF ACCOUNTING

Quinnipiac’s accounting curriculum provides a blend of relevant expertise and rigor that will set a foundation for your career. The Bachelor of Science in Accounting program features a broad business education, designed to foster the technical competence and analytical skills required to maximize each student’s potential as a business professional. Sometimes referred to as the language of business, accounting is used to communicate financial and other information to people, organizations and governments, and is integral to effective management.

An understanding of accounting is necessary to thrive in various accounting, finance and management settings. The accessibility of Quinnipiac’s faculty and staff, the resources provided to students, and the school's contacts in the business world all contribute to the success of accounting majors.

Mission Statement

The mission of the Department of Accounting is to prepare students for successful careers in accounting and related fields. The department’s mission is guided by the missions of the university and the School of Business. To fulfill our mission, we strive to:

Create and support a learning environment that produces students who are inquisitive, thoughtful and engaged participants in the process of continuous learning and development, and who have:

- an understanding of business and accounting concepts and requisite technical skills
- critical thinking skills required to identify problems, gather and interpret information with an appropriate level of professional skepticism, evaluate alternatives and formulate solutions
- an understanding of ethical issues in accounting, personal responsibility and integrity
- skills for working in collaborative environments
- respect for diverse opinions and cultural backgrounds
- effective verbal and written communication skills.

Recruit and retain faculty who, in collaboration with students, accounting professionals and the business community:

- deliver current and engaging curricula informed by practice and research
- foster an engaging learning environment that promotes an expectation of the highest ethical standards and practices
- produce research that advances knowledge and informs their teaching, including contributions to practice, pedagogical, case and discipline-based scholarship
- contribute to department service, school and university communities and the broader academic community
- Bachelor of Science in Accounting (p. 225)
- Bachelor of Science in Computer Information Systems and Accounting (p. 228)

Students who wish to specialize in computer information systems with applications in accounting may earn a dual degree in computer information systems and accounting.
- Minor in Accounting (p. 226)

- Master of Science in Accounting (p. 362)
- Accelerated Dual-Degree BS/MSA (3+1) (p. 362)
- Dual-Degree BS/MSA or BA/MSA (4+) (p. 363)

Bachelor of Science in Accounting

Program Contact: Nelson Alino (Nelson.Alino@qu.edu) 203-582-3827

The Bachelor of Science in Accounting program at Quinnipiac University provides a foundation in the principles, concepts and practices of accounting, and equips graduates with general business knowledge along with technical expertise that is necessary for success in early careers in accounting and related fields.

Quinnipiac accounting graduates often receive job offers in the summer before their senior year. They connect with potential employers early in their studies by participating in career fairs and accounting networking events on campus, which bring representatives from local, regional and international accounting firms, as well as representatives from industry and government. Accounting majors also use these opportunities to interact with alumni and other representatives from their future profession.

Through these contacts and through the support of career services staff, many students obtain internships. These on-the-job experiences provide opportunities to integrate classroom learning into a real-world environment to clarify career goals.

Upon graduation, many accounting majors join public accounting firms. These firms generally offer services including auditing, consulting, income tax planning and preparation, and the compilation and review of financial statements. Some graduates go into management and private industry accounting, where they prepare financial statements, develop budgets, perform cost analyses or conduct internal audits. An accounting background is highly valued in business; many CEOs and presidents come from accounting and finance departments.

BS in Accounting Curriculum

A total of 122 credits is required for graduation with the degree of BS in Accounting. Accounting majors must earn a minimum grade of a B- in the following courses to receive credit.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AC 211</td>
<td>Financial Accounting (formerly AC 101)</td>
<td>3</td>
</tr>
<tr>
<td>AC 212</td>
<td>Managerial Accounting (formerly AC 102)</td>
<td>3</td>
</tr>
<tr>
<td>AC 305</td>
<td>Intermediate Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>AC 306</td>
<td>Intermediate Accounting II</td>
<td>3</td>
</tr>
<tr>
<td>AC 307</td>
<td>Intermediate Accounting III</td>
<td>3</td>
</tr>
</tbody>
</table>

An Accounting major earning a grade below B- in any of these courses must repeat the course. In addition, Accounting majors must earn a minimum grade of C- in all other accounting and law courses.

A minimum cumulative GPA of 3.0 is required for entry into the Accounting major. In addition, a minimum cumulative GPA of 3.0 is required for graduation with a degree in Accounting.
Minor in Accounting

Program Contact: Nelson Alino (nelson.alino@qu.edu) 203-582-3827

Students wishing to augment their field of study with the perspective and tools of accounting are encouraged to consider a minor in accounting. You don't have to work in business or finance to reap the benefits of accounting. The tools and broad perspective the accounting minor offers can prove useful in virtually every profession, as well as in your personal life. If you're interested in augmenting your major and broadening your professional skills, this is a great way to gain a familiarity with the central tenets of accounting.

This six-course program examines managerial and financial accounting and offers a number of electives such as Auditing Theory and Practice and Advanced Federal Income Tax Procedure. Our faculty members bring a wealth of experience to the classroom, having worked as certified public accountants, business professionals and lawyers.

Accounting Minor Curriculum

The minor in accounting requires six courses. Students wishing to minor in accounting must complete:

Student Learning Outcomes

Upon completion of the program, students will achieve the following competencies:

1. Business knowledge: Students apply basic business theories and concepts to understand and solve business problems.
2. Business Analytics: Students effectively gather, assess and utilize data to understand, improve and communicate business decisions using Excel and other analytical tools.
3. Communication: Students communicate business ideas effectively through written communications, oral communications and presentations, and digital media.
4. Critical Thinking: Students utilize information and research findings to analyze problems and determine appropriate solutions.
5. Business Ethics: Students apply ethical frameworks to evaluate situations and determine appropriate solutions.
6. Cultural Adaptability: Students recognize and apply knowledge of diversity within and across individual and groups.
7. Professionalism: Students exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

Admission Requirements: School of Business

The requirements for admission into the undergraduate School of Business programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.
DEPARTMENT OF COMPUTER INFORMATION SYSTEMS

Graduates of the Computer Information Systems program are business problem solvers who assist firms to be more competitive via the use of technology. Those who choose the Computer Information Systems major enjoy technology and also enjoy working with people.

The department prides itself on excellence in teaching, and fosters a supportive learning environment that provides students with the opportunity to develop the expertise required to distinguish themselves both academically and professionally. Career tracks of program graduates include high-demand positions in data management, network management, information systems security administration, systems analysis, web development and mobile applications support.

The demand for CIS graduates over the next decade is outstanding with job growth projected to increase rapidly. Currently there are more career openings for CIS majors than there are graduates available to fill the positions; consequently, starting salaries are among the highest of all undergraduate business majors. All CIS students who qualify complete internships, many resulting in offers of full-time employment upon graduation.

- Bachelor of Science in Computer Information Systems (p. 227)

Bachelor of Science in Computer Information Systems

Program Contact: Wendy Ceccucci (wendy.ceccucci@qu.edu)
203-582-8269

Computer-based information systems have become a critical component to both the development of products and services as well as the management of organizations. Information systems are vital to problem identification, analysis and decision making at all levels of management. The major in computer information systems focuses on the development of computer systems that improve the performance of people in organizations. Information systems professionals must analyze the evolving role of information and organizational processes. Their work includes the design, creation, implementation and maintenance of the information systems that form the backbone of today's global economy.

Students who major in computer information systems are in high demand. They acquire advanced skills, including an understanding of the role information systems play in organizations. Graduates are able to analyze and design information systems that meet their company's needs, use data management tools to develop databases, and effectively manage communications and security.

With this degree, you can work as a project manager, computer programmer, systems analyst, security specialist or database manager. You'll study the role of information systems in organizations, including the use of information technology for strategic decision making and competitive advantage, effective and efficient electronic business and electronic commerce strategies. You'll manage projects and develop applications.

BS in Computer Information Systems Curriculum

As with all programs within the School of Business, students must meet the requirements of the University Curriculum (p. 61), the School of Business Core Curriculum, and the specific requirements of the major for a total of 122 credits:

Bachelor of Science in Computer Information Systems and Accounting
Program Contact: Wendy Ceccucci (Wendy.Ceccucci@qu.edu)
203-582-8269

There is a great industry demand for students who wish to specialize in computer information systems with applications in accounting.

In the digital age, the languages of business and technology are mutually inclusive. Dual competency doubles your skill set, and positions you for success in a multitude of roles. We’ll teach you to design and maintain financial databases, assess the cost of hardware and software, and manage teams of IT professionals. These skills are crucial to commercial businesses, hospitals, banks, law offices and nonprofit organizations.

As the architect of a company’s technological infrastructure, you’ll implement and secure its accounting information system. You’ll ensure that financial information is accurate and accessible to managers, CFOs, auditors and others. These responsibilities prepare you for leadership roles as an information technology accountant, systems auditor, IT director and chief information officer.

Internships with companies such as Aetna, BBC America, The Hartford and United Technologies help you hone your skills and prepare you for immediate employment in the area of your interest.

A minimum cumulative GPA of 3.0 is required for entry into this program, and a minimum cumulative GPA of 3.0 is required for graduation with this degree.

BS in Computer Information Systems and Accounting Curriculum
Students may earn a Bachelor of Science in computer information systems and accounting by completing the requirements of the University Curriculum (p. 61), the Business Core Curriculum, and specific requirements outlined below for a total of 128 credits. Computer Information Systems/Accounting majors must earn a minimum grade of B- in the following courses to receive credit: AC 211, AC 212, AC 305, AC 306 and AC 307. A Computer Information Systems/Accounting major earning a grade below B- in any of these courses must repeat the course. In addition, Computer Information Systems/Accounting majors must earn a minimum grade of C- in all other accounting and law courses.

**Minor in Computer Information Systems**

Information systems are vital to businesses. They are used in problem solving, analysis and decision making at all levels of management. This minor provides you with a strong, functional background in information technology. Proficiency in web programming, data management, networking and data security help you to resolve a range of business issues for many different employers. The ability to track supply chains, and improve electronic business and e-commerce strategies gives you an additional advantage in administrative and managerial roles.

Courses not only make you a more effective user of information technology, but a more informed consumer as well. You’ll be able to assess the strengths and weaknesses of various programs, hardware and software on the market, ensuring that the right ones are chosen and implemented. Whether you plan to work for yourself, or in fields as diverse as telecommunications, health care and law, you’ll know that the technology you depend on functions effectively and reliably, and that important information is protected at all times.

The minor in computer information systems complements the major in a wide variety of disciplines. It provides the students with the skills to serve as effective users of information technology within their respective major areas and allows them to become more savvy personal consumers of information technology. The minor is structured to provide each student with the opportunity to select courses that support his or her own interests.
DEPARTMENT OF ENTREPRENEURSHIP AND STRATEGY

Although some Entrepreneurship and Small Business Management majors will indeed launch their own new business upon graduation, most opt to begin their careers in already established organizations. Other students in the program come from a family business, and ultimately use their knowledge and skills to develop ideas and plans to be implemented when they join the business after graduation. Successful completion of the major provides students with the ability to integrate and apply their business acumen in both directed and self-managed activities.

The department values experiential learning and direct contact with businesses, practitioners and entrepreneurs, and provides students majoring in Entrepreneurship and Small Business Management with many extracurricular opportunities to expand their skills and stretch their capabilities. These currently include: 1) the Entrepreneurship Club, a Quinnipiac University chapter of the national Collegiate Entrepreneurs’ Organization, dedicated to bolstering inventive students, their ideas and their entrepreneurial spirit; and 2) the Connecticut Venture Group and the Connecticut State Department of Economic and Community Development, which sponsors an annual statewide business model competition; and 3) many other national entrepreneurship and business plan competitions.

- Bachelor of Science in Entrepreneurship and Small Business Management (p. 230)
- Minor in Entrepreneurship and Small Business Management (p. 231)

Bachelor of Science in Entrepreneurship and Small Business Management

Program Contact: Patrice Luoma (Patrice.Luoma@quinnipiac.edu) 203-582-8320

Entrepreneurship is an important driver of growth for both the national and international economy. Students are prepared to think innovatively, develop new ideas for existing businesses, and create new business ventures. However, entrepreneurship is even more than the creation of a new business venture. Entrepreneurship encompasses seeking opportunity, identifying and acknowledging risk and, most importantly, persisting until the idea becomes reality. Entrepreneurial thinking can be applied to all contexts and organizations. At Quinnipiac University, we facilitate the development of an entrepreneurial mindset and attitude in our students; this enables them to apply their unique attributes and skills to realize innovative ideas in a variety of settings including profit and not-for-profit organizations, new and existing ventures, and in business and non-business activities. The development of an entrepreneurial mindset creates career opportunities for students whether starting their own business or going to work in a large or small organization.

The Entrepreneurship and Small Business Management program includes a rigorous and rounded academic curriculum complemented by extracurricular and service learning involvement in the region’s business activity. The program develops entrepreneurial thinking, establishes a foundation in sound business practices along with an appreciation and understanding of the arts and sciences, and hones the skills necessary for successful entrepreneurship and small business management. This is accomplished through a distinct and innovative curriculum.

The program is highly experiential, allowing students to work on team and individual projects to develop and improve businesses and business ideas. Students compete in regional and national business plan competitions and interact with various agencies and financial institutions supportive of entrepreneur and small business success. The program includes local, regional and national companies and small business owners sharing their expertise and experiences as an important element in the program’s educational process.

BS in Entrepreneurship and Small Business Management Curriculum

Students majoring in entrepreneurship are required to complete 122 credits.

Minor in Entrepreneurship and Small Business Management

Program Contact: Patrice Luoma
(Patrice.Luoma@quinnipiac.edu) 203-582-8320

A minor in entrepreneurship and small business management gives you a strong foundation in sound business practices, sharpens your business management skills and teaches you how to think like an entrepreneur. This minor provides the expertise necessary for professionals in any field who must run their own business operation. You’ll create business plans, engage in entrepreneurial activities and work on team and individual projects to develop and improve business ideas.

You’ll learn from a rich network of faculty and staff that provides the guidance necessary to launch a business or join a bourgeoning company. In the classroom, during internships and at networking events, you can tap into the expertise and experience of local and national company executives, as well as small business owners who have achieved success.

Both business and non-business school students are encouraged to minor in entrepreneurship and small business management. The minor enables students to supplement their main area of interest with the basic skills necessary to create a business plan and engage in the entrepreneurial activities and learning experiences offered by the university.

DEPARTMENT OF FINANCE

The Department of Finance is committed to providing high-quality teaching and learning activities so that graduates are well prepared to compete in the global community.

The BS in Finance prepares graduates for career opportunities in both the financial services sector as well as in non-financial businesses. Students can focus on courses that include investment management, including equities and fixed income analysis, asset valuation and portfolio management; wealth management and financial planning; and corporate finance. The program also prepares students for graduate work in finance, business administration, law and other related disciplines.

Mission Statement

The mission of the Department of Finance is to provide a high-quality educational experience for students; produce high-quality scholarly research; and contribute to the intellectual and cultural life of the university and community.

- Bachelor of Science in Finance (p. 232)
- Minor in Finance (p. 233)

Bachelor of Science in Finance

Program Contact: Osman Kilic (osman.kilic@qu.edu) 203-582-8267

Students who choose to major in Finance gain an understanding of key financial skills and concepts, and hone their analytical and scientific reasoning skills. They will receive hands-on experience in money management, develop proficiency in data gathering and also learn the importance of ethical considerations in financial decision making. Our graduates are able to explain core financial terms and concepts and apply them to real business and financial problems. They understand modern financial theory and its application to corporate financial decision making, valuation, financial markets and institutions, and portfolio management.

Student learning opportunities are enhanced by the resources available within the Terry W. Goodwin '67 Financial Technology Center. The center allows students to access real-time financial data, develop financial models, conduct trading simulations and analyze financial and economic data. Students have the opportunity to participate in the Student-Managed Portfolio, an extension of the University's endowment fund. Leadership and educational opportunities come from participating in the Global Asset Management Education (G.A.M.E.) Forum as well as intercollegiate “Fed Challenge,” “Investment Research Challenge” and Rotman Trading competitions.

Extracurricular activities include the Investment Club and the Economics and Finance Club. These student-led organizations sponsor investment challenges, campus speakers and trips to financial markets and institutions. The clubs also provide students peer-centered opportunities to develop their networking, team building and leadership skills.

Outstanding students are eligible to be inducted into the Financial Management Association (FMA) National Honor Society.

Investment Management Focus

Students who seek to focus on a program that prepares them to pursue their interest in careers within the financial services sector, specifically working in the areas of investment banking, portfolio management and investment analysis. Upon completion of the finance core and suggested investment management courses, students will have the educational requirements to sit for the Chartered Financial Analyst (CFA) Level I examination.

Wealth Management and Financial Planning Focus

The purpose of offering a financial planning track is so students can pursue their interest in careers in wealth management, financial planning and retail investment and insurance brokerage services. Graduates have the opportunity to work within law and accounting firms that provide comprehensive financial planning and services. As part of the curriculum, students receive instruction in risk management and insurance services, investment planning, retirement and estate planning, employee benefit planning and tax planning. Upon completion of the finance core and suggested wealth management and financial planning courses, students will have the educational requirements to sit for the Certified Financial Planner (CFP) certification examination. Also, students may elect to sit for the FINRA Series 7, 63, and 66 licensing exams. Alternately, students who take additional required mathematics courses may elect to sit for the Financial Risk Manager (FRM) exams.

Corporate Finance Focus

Students may wish to focus in courses that prepare them for careers in the nonfinancial sector, mainly the management and operations of large and small corporations. Upon completion of the finance core and suggested corporate finance courses, students will have the educational requirements to sit for the Certified Management Accountant (CMA) certification exam, which demonstrates knowledge and proficiency in corporate financial planning and analysis, decision support and ethics. Alternatively, students may prepare to sit for the Certified Treasury Professional (CTP) designation, which exhibits knowledge and skills needed of treasury professionals.

You’ll examine issues of financial management, global investment, financial markets and corporate finance. And, while developing a foundation in these core areas, you’ll have some flexibility to complement the program with one non-finance course. Our Terry W. Goodwin ’67 Financial Technology Center is a great resource for exploring your interest in finance and offers opportunities to practice building financial models and analyzing real-time economic data.

### Finance Minor Curriculum

Students may request permission to use one non-finance course to fulfill their minor requirements.
DEPARTMENT OF INTERNATIONAL BUSINESS

The world around us is fast changing and bringing new challenges for future managers every single day. As new technologies bring international buyers and sellers closer together, opportunities expand for entrepreneurs, small business managers and multinational corporations. In addition, it is critical that we—as voters, as future employees and as citizens of our increasingly globalized world—understand the pros and cons of this process.

What goes on outside of the United States affects us, and the better we understand it, the better we can operate within it. Recognizing the necessity of global awareness for success in today’s business world, the Department of International Business at Quinnipiac prepares students for a wide range of careers in practically every field and type of organization: business, not-for-profit, and government.

The program’s purpose is to offer a curriculum that helps nurture and develop students’ abilities and interests. Students are exposed to a multiplicity of perspectives and challenged to develop a broad and inquisitive mindset. Concurrently, practical knowledge and skills also are emphasized through the active development of technical and business-related skills. This dual focus is accomplished through specific functional courses that provide students with the theoretical foundations needed for sound practical decisions; a focus on developing key conceptual, analytical and practical competencies; the development of an additional area of competence early in the program with a broad range of options including in business, arts, and sciences; frequent interaction with the local business community through adjunct faculty, guest speakers, participation in smaller projects for local businesses, field trips and international as well as domestic internships; and hands-on experience with two certificate programs: export marketing and international purchasing.

Study abroad programs (p. 59) offer the opportunity for immersion in a foreign country to better understand its language, history, politics, business and culture. Quinnipiac University has semester-abroad programs in various countries such as Austria, Australia, China, England, Ireland, Italy, France, Germany, Mexico, New Zealand, South Africa and Spain. The university also assists students in seeking out opportunities in a broad spectrum of other countries. A growing number of students take advantage of internships while studying abroad, greatly enhancing their insights into those countries as well as enhancing their resumes.

The International Business Society is a student organization that provides opportunities to visit internationally oriented companies in the Northeast, and is active in establishing and strengthening ties with local companies through projects on export and foreign market entry for local business and entrepreneurs.

- Bachelor of Science in International Business (p. 234)
- Minor in International Business (p. 235)
- Global Supply Chain Certificate (p. 235)

Bachelor of Science in International Business

Program Contact: Robert Engle (Robert.Engle@qu.edu) 203-582-3610

Corporations, nonprofits and government agencies all over the world need talented professionals with the ability to successfully work in culturally diverse environments and have a knowledge of global markets and international business trends. As an international business major, you’ll learn how to work with culturally diverse businesses and populations, and further develop your critical thinking and analytical skills. You will also develop a foundation in international finance, international marketing, global supply chain, and international management and strategy, as well as learn how to work with international data and its sources. Graduates with this background have the ability to develop careers in a wide range of areas including, but not limited to, global supply chain, international marketing and marketing research, business development, financial analysis and business consulting.

IB majors can graduate with a certificate in Global Supply Chain (p. 235). As an IB major you are encouraged to immerse yourself in a foreign country with our study-abroad program to better understand its history, politics, business and culture. Many students complete an internship while studying abroad in such countries as Italy, Argentina, China and Japan.

Collaboration with local businesses, as well as major firms in neighboring New York City, allows you to apply the knowledge you’ve gained in a real-world setting. Internships with companies such as Aetna, Johnson & Johnson, Deloitte, Sikorsky, and Perrier provide you with further experience and opportunities to network.

On completion of the BS in Business Administration with a major in International Business, students are able to produce a professional integrated business plan for potential investors that reflects their understanding of informal and formal institutional aspects of the target market and their ability to critically apply functional business knowledge to a global context. They develop both quantitative skills and communication skills, and are able to apply those skills to appraise financial risks and returns, analyze online surveys and interpret the results of their research.

BS in International Business Curriculum

The BS in International Business requires the completion of 122 credits.

Select 18 credits

Total Credits 122

1 Students can choose any course they want. However, it is recommended that students choose open courses that could be applied to their minor. Note: Students placed in MA 107 have 15 credits available under electives.

Study Abroad Requirement
Students are required to study abroad, ideally for a semester but in special circumstances a shorter program is possible (e.g., J-term, Summer etc.). Please see the department chair if you have further questions. Foreign students are exempt from this requirement.

Student Learning Outcomes
On completion of the BS in international business, students will demonstrate the following competencies:

1. Business Knowledge: Students apply basic business theories and concepts to understand and solve business problems.
2. Business Analytics: Students effectively gather, assess and utilize data to understand, improve, and communicate business decisions using Excel and other analytical tools.
3. Communication: Students communicate business ideas effectively through written communications, oral communications, and presentations, and digital media.
4. Critical Thinking: Students utilize information and research findings to analyze problems and determine appropriate solutions.
5. Business Ethics: Students apply ethical frameworks to evaluate situations and determine appropriate solutions.
6. Cultural Adaptability: Students recognize and apply knowledge and diversity within and across individual and groups.
7. Professionalism: Students exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

Admission Requirements: School of Business
The requirements for admission into the undergraduate School of Business programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page of this catalog.

Global Supply Chain Certificate
Program Contact: Robert Engle (Robert.Engle@qu.edu) 203-582-3610

Facing a growing demand for trained global supply chain personnel in virtually all industries today, this career-directed program is designed in response to the growing needs of companies to globally source their raw materials and components, as well as, export their products to foreign markets. This certificate addresses a range of knowledge and skills necessary for a strong foundation in global supply chain activities.

The five courses of the certificate program can be applied to the BS in International Business (p. 234).

Minor in International Business
Program Contact: Robert Engle (Robert.Engle@qu.edu) 203-582-3610

Multinational corporations and nonprofits alike look for talented professionals who have the core business skills and the technological competence to represent and grow their interests abroad. A minor in international business increases your knowledge of both the global marketplace and global business trends. You’ll learn how traditional disciplines such as finance, marketing and sales vary in international settings, as well as how to adapt managerial and leadership techniques to the needs of foreign environments.

This program also helps develop vital communication skills as well as a sense of cultural awareness. Electives ground you in the social, economic and political context of international business. You’ll learn to think globally, and how to effectively negotiate across many different cultures. Whatever your career goals entail, the international business minor contributes an important level of depth to your education, and can open doors to careers both at home and abroad.

Total Credits 18
The mission of the Department of Management is driven by a faculty commitment to serving students in ways that develop them as whole managers and leaders capable of excelling in and integrating both behavioral and technical skills. Students completing the Bachelor of Science in Management gain foundational knowledge of management theory and research. In addition, they garner real-world, hands-on application of those skills to assist organizations in achieving their strategic plans and goals.

In particular, students completing a degree in management are able to administer a variety of management systems to assess employee and organizational needs in different types of organizational environments; communicate models, theories and concepts in written, oral and digital formats to management at any level; develop recommendations for improvement to organizational processes, practices or policies; demonstrate persuasion, empathy, fairness and an ability to handle conflict when dealing with and responding to coworkers, supervisors, subordinates, customers or suppliers; and acquire advanced knowledge of theoretical underpinnings and current best practices in organizational processes.

- Bachelor of Science in Management (p. 237)
- Minor in Management (p. 238)

**Bachelor of Science in Management**

Program Contact: Julia Fullick (Julia.Fullick-Jagiela@quinnipiac.edu)
203-582-5034

Students in the Bachelor of Science in Management program develop the behavioral and technical skills they need to become effective managers and leaders. Students completing the degree in management gain foundational knowledge of management theory and research. In addition, they garner real-world, hands-on experience and build skills that can help them assist organizations in achieving their strategic plans and goals.

Management professionals have the big picture perspective to navigate the challenges businesses face in a modern economy. We’ll teach you the organizational and critical thinking skills necessary to be an effective leader in human resources, operations and supply chain and project management.

You’ll learn to assess an organization’s unique operational needs and how to apply a variety of management strategies to ensure greater efficiency. Effective communication and interpersonal skills are essential, and you’ll hone those skills during group work and with cultural awareness and behavioral courses that train you to lead a diverse team of employees.

**Minor in Management**

Program Contact: Julia Fullick (Julia.Fullick-Jagiela@quinnipiac.edu) 203-582-5034

Whether you plan to work at a startup, a large business or a nonprofit, having the skills to guide your staff through the challenges of a modern working environment will make you a valuable asset in any field. Our management minor gives you the foundational skills and knowledge to assess employee and organizational needs, develop effective communication practices and conflict resolution skills to ensure that employees are content and effective members of a team. You also will gain a broad perspective on how businesses operate efficiently.

This program can be largely customized. Of the six courses you’ll take to complete the minor, only one—Essentials of Management & Organizational Behavior—is required. You are free to choose the remaining five from courses that explore key areas such as supply chain management, human resources and project management.

**Management Minor Curriculum**

The minor in management requires a total of 18 credits.

DEPARTMENT OF MARKETING

The Department of Marketing seeks to empower students with the knowledge and tools necessary to compete successfully in today's challenging global business environment. Ethical considerations, international aspects and cultural diversity topics are included throughout the department's programs of study. The department aims to offer high-quality teaching and a small-group learning environment. Through a variety of classroom and internship experiences, and global exchange programs, majors are prepared to apply academic concepts to business situations and also to use them as personal resources in planning their future. In addition, students are prepared to enhance their knowledge of the field through active pursuit of lifelong learning. In support of these objectives, the department offers resources to carry out and enhance faculty activities such as classroom teaching, supervision of internships and independent studies, individual and club advising, professional development, research and the ongoing development of these majors.

Bachelor of Science in Biomedical Marketing

Program Contact: Abhik Roy (Abhik.Roy@qu.edu) 203-582-8465

The marketing of biomedical products, including pharmaceuticals, is a fast growing industry, and a large number of companies specializing in biomedical sciences are located in the Northeast, many in Connecticut. The department offers a degree in biomedical marketing, aimed at satisfying the need for students with knowledge of the fundamentals of marketing as well as an understanding of the science behind the development of biomedical products. At completion of the program, a Quinnipiac graduate has a degree unique among colleges and universities of biomedical products and biotechnology firms, as medical sales representatives, marketing diagnostic testing products to laboratories or medical equipment to hospitals and clinics, or marketing over-the-counter drugs for consumer product companies.

BS in Biomedical Marketing Curriculum

Student Learning Outcomes

Upon completion of the program, students will achieve the following competencies:

1. **Business knowledge:** Students apply basic business theories and concepts to understand and solve business problems.

2. **Business Analytics:** Students effectively gather, assess and utilize data to understand, improve and communicate business decisions using Excel and other analytical tools.

3. **Communication:** Students communicate business ideas effectively through written communications, oral communications and presentations, and digital media.

4. **Critical Thinking:** Students analyze problems and determine appropriate solutions.

5. **Business Ethics:** Students utilize information and research findings to analyze problems and determine appropriate solutions.

6. **Cultural Adaptability:** Students recognize and apply knowledge of diversity within and across individual and groups.
The Bachelor of Science in Marketing requires the completion of 122 credits as outlined below.

### Bachelor of Science in Marketing

Program Contact: Abhik Roy (abhik.roy@qu.edu)  203-582-8465

The Bachelor of Science in Marketing is designed to provide students with a comprehensive understanding of marketing concepts and practices. The marketing major combines core business courses with specialized marketing courses focusing on technical skills such as market research and on decision making in marketing communications, channels, product strategy and general marketing strategy.

A student chapter of the American Marketing Association is active on campus, and the Quinnipiac University Polling Institute offers opportunities for students to gain hands-on experience conducting survey research. Students are encouraged to take advantage of the many internship opportunities available to Quinnipiac marketing students.

Graduates find career opportunities in a variety of businesses such as pharmaceutical manufacturers, financial institutions, high-tech firms, retailers and small businesses. In addition, marketing career opportunities exist outside business organizations, in government, trade associations, health organizations and not-for-profit institutions. The marketing program also provides students with the necessary prerequisites for graduate education.

### Student Learning Outcomes

Students who graduate with this degree will demonstrate the following competencies:

1. **Business Knowledge**: Students apply basic business theories and concepts to understand and solve business problems.
2. **Business Analytics**: Students effectively gather, assess and utilize data to understand, improve and communicate business decisions using Excel and other analytical tools.
3. **Communication**: Students communicate business ideas effectively through written communications, oral communications and presentations, and digital media.
4. **Critical Thinking**: Students utilize information and research findings to analyze problems and determine appropriate solutions.
5. **Business Ethics**: Students apply ethical frameworks to evaluate situations and determine appropriate solutions.
6. **Cultural Adaptability**: Students recognize and apply knowledge of diversity within and across individual and groups.
7. **Professionalism**: Students exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

### Admission Requirements: School of Business

The requirements for admission into the undergraduate School of Business programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page of this catalog.
Throughout modern history, the field of marketing has adapted and evolved with each new breakthrough in technology, from the printing press to radio to the Internet. And now with mobile technology and social media, marketing professionals can find an audience virtually anytime, anywhere, with some creative and innovative ideas. But the fundamentals of marketing aren’t only useful for selling products. Those skills play a crucial role in politics, education and the nonprofit world as well.

This program will familiarize you with the essential concepts of marketing and consumer behavior, and you’ll have the flexibility to tailor the minor to your interests by choosing half the courses you take from our diverse marketing curriculum. With the approval of the department chair, you can select classes that examine areas such as advertising, media planning, internet marketing and marketing history.

Marketing Minor Curriculum

The marketing minor requires the completion of 18 credits.

MINOR IN BUSINESS

Program Contact: Michael Taylor (michael.taylor@qu.edu) 203-582-3949

Business acumen doesn’t just apply to traditional business owners, marketing executives and financial planners. Sound judgment and the ability to make quick decisions are skills that translate to virtually every field and trade. The business minor gives you a broad understanding of the major disciplines at work daily in companies of all sizes and specialties. Whether you’re an independent photographer, a website designer or a software engineer, you’ll learn how to effectively market your services to stand out from the competition. Accounting skills enable you to better manage your own money and personal resources, while a working knowledge of finance and investment strategies may help you to one day turn a side passion into a viable business.

The business world is about more than just dollars and cents. Leadership qualities are universal, whether you’re in a boardroom, classroom or operating room. Organizational skills, creative problem solving and an ability to assess strengths and weaknesses make you a valuable asset to a host of employers, and prepare you for future supervisory and management roles.

The minor in business is available to students outside of the School of Business who are enrolled in bachelor of arts or the bachelor of science programs. The intention of this minor is to provide students with a broad perspective of the disciplines that affect organizations. Students wishing to receive a minor in business must receive written approval from the assistant dean of academic services.

Business Minor Curriculum

Students must complete the following four classes, in addition to any two business courses, for which the student has completed the prerequisites.

**Undergraduate Studies**

**School Requirements**

Beyond the University Curriculum requirements, students pursuing a bachelor of arts degree in the School of Communications must complete the following:

- 9 credits in the school-wide core
- all major requirements (outlined below)
- a minor (typically 18 credits) to be chosen in consultation with the student’s adviser
- 2 credits in the Seminars for Success: COM 101 and COM 201
- 6 credits in the area of “global issues and cultures.” The School of Communications maintains a list of acceptable courses to satisfy this requirement.
- two additional courses outside the School of Communications, one of which must be at the 200 level or higher.
- **Note:** The BA and BFA degrees in film, television and media arts requires DR 150, DR 160 or DR 220 and one additional course outside the School of Communications at the 200-level or higher. Students pursuing the BFA degree are not required to complete a minor.

**Academic Expectations:** Students are expected to achieve a B- (2.67 GPA) or better in School of Communications courses during their first semester in the School of Communications. Students who do not meet this standard will be notified and are required to meet with a representative from the dean’s office to address their academic progress and develop a plan for improvement.

**Transfer credits:** The School of Communications accepts up to 18 transfer credits toward major requirements. Additional courses may apply to UC or elective courses as appropriate.

**Advising**

Academic advising in the School of Communications fosters a collaborative relationship between student and adviser. Our academic advising program is dedicated to guiding undergraduates in achieving intellectual and personal growth and preparing them for professional success in a diverse and changing global community. Faculty and staff of the School of Communications advise all students. During each student’s undergraduate career, he or she is paired with a faculty adviser who will serve as a guide and mentor. Although the primary responsibility for course selection rests with the student, the adviser assists in reviewing the student’s program plan and discussing course selection during a mandatory advising meeting each semester prior to course registration. Students are required to schedule and attend a meeting with their assigned adviser each semester by their advising deadline.

**Note:** The primary responsibility for the completion of all prerequisites for courses belongs to the student. Students who take courses without the proper prerequisites, or who complete the prerequisites after taking the courses, may lose credits toward their degree requirements. Students may not repeat a course for credit except to remove an F grade or, under special circumstances, to remove a C- or D grade in a school requirement, a prerequisite, or a major.

**Career Development**

In the School of Communications, staff work with students to explore majors and career interests through individual appointments and group sessions, guide them through the career development process, and
provide assistance with resume and cover letter writing, interview preparation, conducting a job search and graduate school applications. Students can participate in experiential learning through internships and community service, as well as part-time and summer employment. Workshops on career-related topics are presented each semester, as well as programs connecting students with alumni and employers.

Mission Statement

The School of Communications fosters student success and leadership in a rapidly changing world of communication by offering a liberal education built on a practical and theoretical foundation of scholarship and ethics, a command of evolving technologies, and a respect for diversity.

Our faculty members are scholars, artists and professionals who excel in teaching, research and creative endeavors. They remain engaged in their professions, leading to a highly relevant teaching environment for our students.

The school offers bachelor’s degrees in advertising and integrated communications; film, television and media arts; graphic and interactive design; journalism; media studies; and public relations, as well as master’s degrees in interactive media; journalism; public relations and sports journalism. The school also has well-established relationships with more than 1,000 private and nonprofit communications organizations, offering advanced students internship opportunities in professional settings. Students are encouraged to explore and advance their educational and professional interests while gaining the critical practical experience and training to develop a portfolio of work before they graduate.

To assist in the twin goals of offering our faculty a high-level view of innovations in the media world as well as to offer our students high-quality internships and post-graduation employment, the school has created the School of Communications Advisory Board (https://www.qu.edu/schools/communications/advisory-board.html), consisting of CEOs and other high-level media industry leaders.

On campus, students work in one of the finest university educational facilities in the Northeast — the Ed McMahon Mass Communications Center. The center features a spacious, professional level, all-digital high-definition television studio, media innovation classroom, 4K collaborative editing suites, and a 7.1 surround sound screening theater. The center is equipped with state-of-the-art technology, including numerous iMac stations running the latest applications for digital media production, and is staffed with highly skilled media professionals to instruct and assist students. Additional classrooms and labs, along with the "Hub" student computer center, the Virtual Reality/360 lab, a design studio, a Remote Equipment Depot, and independent study facilities, are located in the Center for Communications Engineering, which also houses the school’s faculty and administrative offices.

School of Communications graduates enter the communications professions equipped with the training, education and experience to excel in their chosen career.

**DEPARTMENT OF FILM, TELEVISION AND MEDIA ARTS**

The Department of Film, Television and Media Arts offers specialized programs that educate students in contemporary media practice, and demand that they excel as technically accomplished, aesthetically grounded and expressively mature professionals. These programs are dedicated to skilled storytelling and the creation of documentary and narrative works in visual and audio media as well as other informative and entertaining programming for delivery on film, television, DVD, the Internet, mobile devices and all emerging media platforms.

To achieve these goals, students in the Department of Film, Television and Media Arts are immersed in techniques of visual storytelling that demand expertise in single and multi-camera video production and writing and producing for film, radio, television and the Internet. Because we believe that good media practice requires a solid understanding of media history and theory, this curriculum is balanced with courses that explore the role and impact of mass media in society. Formal course work is not only taught on campus but in recent years has taken place in Tralee, Ireland; Nice, France; and in Cape Town and Kruger National Park, South Africa.

- Bachelor of Arts in Film, Television and Media Arts (p. 246)
- Bachelor of Fine Arts in Film, Television and Media Arts (p. 247)
- Minor in Film and Television (p. 249)

**Bachelor of Arts in Film, Television and Media Arts**

Program Contact: Liam O’Brien (William_OBrien@qu.edu) 203-582-8438

Students in Film, Television and Media Arts explore sequentially all dimensions of visual and audio storytelling beginning with the historical, cultural, business and professional contexts within which their own work will develop. They learn to conceive and organize ideas clearly and forcefully through writing and to shape those ideas for expression through image and sound. After mastering a full spectrum of basic techniques, students are immersed in the complex grammar of image and sound editing and the challenging artistry of lighting for both single and multi-camera environments. Mastering the acquisition, composition and manipulation of moving images and sound, they are expected to create and execute compelling stories—factual or fictional—for current and developing distribution platforms.

Graduates of the Film, Television and Media Arts programs are well positioned to pursue careers in the creation and distribution of a broad range of digital material for all current and emerging media platforms. They are prepared to work for corporate, entertainment and not-for-profit institutions engaged in delivering entertainment and information programming to audiences around the world and have a firm foundation to pursue graduate (MFA) work.

**Programs of Study**

The standard degree in Film, Television and Media Arts is the 45-credit bachelor of arts. Students enrolled in the BA in Film, Television and Media Arts are required to complete a minor (typically 18 credits) that will complement their career and/or personal interests. This minor can be from any program either inside or outside the School of Communications.

However, a student majoring in Film, Television and Media Arts may not minor in Film and Television.

**BA in Film, Television and Media Arts Curriculum (with minor)**

1. All students must complete the 46 credits of the University Curriculum (p. 61). Students majoring in Film, Television and Media Arts will complete their Integrative Capstone Requirement within the major with FTM 495. In place of those credits, the student will select an additional unrestricted course in the University Curriculum.

2. Core must be completed by end of sophomore year.

### Minor Requirement

Students majoring in the BA in Film, Television and Media Arts program are required to take a minor (typically 18 credits) that will complement their career and/or personal interests. This minor can be from any program either within or outside the School of Communications. However, a student enrolled in the BA in Film, Television and Media Arts program may not minor in the film and television minor offered by the School of Communications.

### Student Learning Outcomes

Upon completion of the program, students should be able to demonstrate the following competencies:

1. **Creative Thinking and Visual Literacy**: Develop the ability to conceptualize and produce visual stories demonstrating aesthetic competence, fluency with visual grammar, and an appreciation of the historical context from which new forms and stories are created.

2. **Written and Oral Communication**: Acquire the facility to create effective content for visual media, as well as an ability to demonstrate both written and oral proficiency within a variety of professional formats and delivery platforms.

3. **Critical Thinking and Reasoning**: Develop the skills needed to critically analyze the work of others as a means to problem-solve and better inform students’ own original creative output. Achieve a proficiency in creating professional quality work within the parameters and practical limitations of a broad spectrum of production environments. Recognize works of art as visual arguments, and be able to use analytical skills to assess their effectiveness.

4. **Information Fluency**: Learn to plan and produce effectively across a wide array of technical contexts, demonstrating facility and expertise with preproduction, production and postproduction phases of film, television and interactive media creation.

5. **Social Intelligence**: Demonstrate an ability to work effectively within groups and production teams, to understand and manage collaborations and to act ethically, constructively and responsibly in the process of achieving individual and common goals.

6. **Diversity Awareness and Sensitivity**: Acquire an understanding of and respect for the similarities and differences among human communities, including a recognition and appreciation for the unique talents and contributions of all individuals.

7. **Responsible Citizenship**: Learn to recognize and analyze media-related issues and influence decisions and actions at the local, national and global community, and to become engaged as responsible citizens.

### Admission Requirements: School of Communications

The requirements for admission into the undergraduate School of Communications programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early as possible in the senior year, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

### Bachelor of Fine Arts in Film, Television and Media Arts

Program Contact: Liam O’Brien (William.OBrien@qu.edu) 203-582-8438

Students in Film, Television and Media Arts explore sequentially all dimensions of visual and audio storytelling beginning with the historical, cultural, business and professional contexts within which their own work will develop. They learn to conceive and organize ideas clearly and forcefully through writing and to shape those ideas for expression through image and sound. After mastering a full spectrum of basic techniques, students are immersed in the complex grammar of image and sound editing and the challenging artistry of lighting for both single and multi-camera environments. Mastering the acquisition, composition and manipulation of moving images and sound, they are expected to create and execute compelling stories—factual or fictional—for current and developing distribution platforms.

Graduates of the Film, Television and Media Arts programs are well positioned to pursue careers in the creation and distribution of a broad range of digital material for all current and emerging media platforms. They are prepared to work for corporate, entertainment and not-for-profit institutions engaged in delivering entertainment and information programming to audiences around the world and have a firm foundation to pursue graduate (MFA) work.

### Programs of Study

The department offers a highly competitive 63-credit bachelor of fine arts degree. Candidacy for this degree can only be obtained through a successful separate application that includes a portfolio review. Candidates for the BFA are selected in September or February of a student’s sophomore year or by separate application after admission to Quinnipiac.

Students enrolled in the BFA program in film, television and media arts are not required to take a minor.

### BFA in Film, Television and Media Arts Curriculum

Students majoring in Film, Television and Media Arts must meet the following requirements for graduation:

Total Credits: 123

---

1. All students must complete the 46 credits of the University Curriculum (p. 61). Students majoring in Film, Television and Media Arts will complete their Integrative Capstone Requirement within the major with FTM 495. In place of those credits, the student will select an additional unrestricted course in the University Curriculum.

2. Core must be completed by end of sophomore year.

### Student Learning Outcomes

Upon completion of the program, students should be able to demonstrate the following competencies:

1. **Creative Thinking and Visual Literacy**: Develop the ability to conceptualize and produce visual stories demonstrating aesthetic competence, fluency with visual grammar, and an appreciation of the historical context from which new forms and stories are created.

2. **Written and Oral Communication**: Acquire the facility to create effective content for visual media, as well as an ability to demonstrate both written and oral proficiency within a variety of professional formats and delivery platforms.

3. **Critical Thinking and Reasoning**: Develop the skills needed to critically analyze the work of others as a means to problem-solve and better inform students’ own original creative output. Achieve a proficiency in creating professional quality work within the parameters and practical limitations of a broad spectrum of production environments. Recognize works of art as visual arguments, and be able to use analytical skills to assess their effectiveness.

4. **Information Fluency**: Learn to plan and produce effectively across a wide array of technical contexts, demonstrating facility and expertise with preproduction, production and postproduction phases of film, television and interactive media creation.

5. **Social Intelligence**: Demonstrate an ability to work effectively within groups and production teams, to understand and manage collaborations and to act ethically, constructively and responsibly in the process of achieving individual and common goals.

6. **Diversity Awareness and Sensitivity**: Acquire an understanding of and respect for the similarities and differences among human communities, including a recognition and appreciation for the unique talents and contributions of all individuals.

7. **Responsible Citizenship**: Learn to recognize and analyze media-related issues and influence decisions and actions at the local, national and global community, and to become engaged as responsible citizens.

**Please note**: Current high school students, transfer students and matriculated Quinnipiac University students who wish to be considered for the BFA program should download a BFA application from the Film, Television and Media Arts ([https://www.qu.edu/schools/communications/programs/ba-bfa-film-television-media-arts.html#ourprograms](https://www.qu.edu/schools/communications/programs/ba-bfa-film-television-media-arts.html#ourprograms)) page on Quinnipiac’s website.

### Admission Requirements: School of Communications

The requirements for admission into the undergraduate School of Communications programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the...
senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Minor in Film and Television**

Program Contacts:

Film History/Analysis Track  Frederick Staudmyer  
(Frederick.Staudmyer@qu.edu)  203-582-6554

Production/Writing Track  Ashley Brandon  
(Ashley.Brandon@qu.edu)  203-582-7277

A minor in film and television will broaden your appreciation for visual storytelling as an art form, and familiarize you with the basics of screenwriting and film production. You’ll explore the rich history of cinema and television and develop a foundation in the theories and techniques that make characters and stories spring to life.

Quinnipiac’s proximity to the media epicenter of New York City provides exciting opportunities to enrich your academic experience through internships. You will benefit from access to a vast network of alumni who work as media professionals and are eager to mentor you. You’re also free to explore the many facets of multimedia production with the sophisticated equipment in Quinnipiac’s Ed McMahon Mass Communications Center, an all-digital, state-of-the-art production environment where students create sophisticated broadcast-quality video content and programming, as well as high tech multimedia productions for web and mobile.

**Film and Television Minor Curriculum**

Students electing this minor must complete the courses under one of the following two tracks (18 credits). Either track is for students majoring from within or outside of the School of Communications.

**Film and Television: Film History/Analysis Track**

Interaction design involves the careful study of how people interact with products, systems and services, and how to make those experiences more usable, meaningful and persuasive. While immersed in practicing the multi-phase design process, students become skilled in typography, storytelling, sketching, prototyping and delivering design solutions that include printed matter, motion graphics, websites and mobile applications.

Each student in the program has the opportunity to specialize and distinguish his or her experience and portfolio through internships, study abroad, the Quinnipiac in LA program (p. 60), a complementary minor and a range of other experiential workshops and activities offered throughout the year.

The need for interaction designers continues to increase across all industries. Our students are highly sought after for their cutting-edge skill set—demand exceeds supply. Our capstone course prepares the students for entry into the workforce and culminates in a formal portfolio review conducted by industry professionals. Our graduates leave the program with the ability to discuss their work and process while prepared to meet any design challenge.

- Bachelor of Arts in Graphic and Interactive Design (p. 250)
- Master of Science in Interactive Media and Communications (p. 367)

### Bachelor of Arts in Graphic and Interactive Design

Program Contact: Pattie Belle Hastings (PattieBelle.Hastings@qu.edu)
203-582-8450

The Graphic and Interactive Design major provides students with in-depth, hands-on experience in the design and authoring of original interactive work for a range of media including web, print, motion graphics and mobile devices. Students have the opportunity to study graphic design and interactive design, emphasizing creative thinking, visual literacy and technological proficiency. The program provides a rigorous curriculum of conceptualization, problem solving, innovation, critical thinking and visualization. It acknowledges that design is a cultural catalyst that bridges commerce and social causes. Students graduating from this program are well prepared to meet the challenges within the field of interactive and graphic design. The areas of study are always evolving and include typography, print design, motion graphics, web design and mobile interaction design.

There are a total of 33 credits in the major. The first 24 credits are derived from graphic and interactive design required courses. An additional 9 credits (three courses) are chosen from a list of graphic and interactive design electives.

### Minor Courses

Total Credits 120

---

1. All students must complete the 46 credits of the University Curriculum (p. 61). Students majoring in Graphic and Interactive Design will complete their Integrative Capstone Requirement within the major with GID 480. In place of those credits, the student will select an additional unrestricted course in the University Curriculum.
2. Core must be completed by end of sophomore year.
Minor Requirement

Students enrolled in the BA in Graphic and Interactive Design program are required to complete a minor (typically 18 credits) that will complement their career and/or personal interests. This minor can be from any program either within or outside the School of Communications.

Student Learning Outcomes

The BA in Graphic and Interactive Design program encompasses the full spectrum of visual communication. It acknowledges that design is a cultural catalyst that bridges commerce and social causes. The program provides a rigorous curriculum of conceptualization, problem solving, innovation, critical thinking and visualization. Students graduating from this program are well prepared to meet the challenges within the field of interactive and graphic design. The areas of study are always evolving and include typography, print design, motion graphics, web design, UI, UX, and mobile interaction design. The following competencies are critical to the effective contribution of entry-level designers in professional design practice and they construct a framework that contributes to the overall effective practice of the discipline.

Upon completion of the program, students should be able to demonstrate the following competencies:

1. **Solve creative problems** – Solve creative problems within the field of design, including research and synthesis of technical, aesthetic, and conceptual knowledge. This is demonstrated by the ability to create and develop visual responses to communication problems, including understanding of hierarchy, typography, aesthetics, composition and construction of meaningful images.

2. **Communicate ideas** – Communicate their ideas professionally and connect with their intended audience using visual, oral, and written presentation skills relevant to their field. This is evident in the ability to construct verbal and written arguments for solutions that address the needs of the organization or community.

3. **Actualize concepts** – Actualize technical, aesthetic, and conceptual decisions based on an understanding of design principles and by using appropriate tools and technology. This includes knowing how to learn technology with the recognition that technological change is constant.

4. **Evaluate solutions** – Evaluate work in their field, including their own work, using professional terminology and demonstrating fluency in the use of the formal vocabulary and concepts of design. This includes recognizing the influence of major cultural and aesthetic trends, both historical and contemporary, on design products and services.

5. **Implement processes** – Implement design processes with a strategic understanding of how communication is planned, produced and distributed. This is exhibited by the ability to solve communication problems including identifying the problem, researching, analysis, solution generating, prototyping, user testing and outcome evaluation.

6. **Produce professional design** – Produce a body of design work suitable for seeking professional opportunities in their chosen branch of design. This body of work demonstrates effective use of typography, images, diagrams, motion, sequencing and color with an informed consideration of content, elements, structure and style.

---

*Substitutions to this list are permitted with prior approval of the student's adviser and the director of graphic and interactive design.*

---

**Admission Requirements: School of Communications**

The requirements for admission into the undergraduate School of Communications programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.
DEPARTMENT OF JOURNALISM

The Quinnipiac undergraduate program in journalism focuses on the principles and practices of news writing and reporting across multiple platforms in a perpetually evolving media landscape. Required courses provide a strong foundation in writing, reporting and diverse storytelling skills.

The wide range of elective courses enables students to focus on a specific medium (such as television), or news subject (such as sports), or take courses across platforms based on their interests and career goals.

The program culminates in a capstone course during which students demonstrate their acquired knowledge and execute a sustained investigative project under the guidance of a faculty adviser.

- Bachelor of Arts in Journalism (p. 252)
- Master of Science in Journalism (p. 368)
- Master of Science in Sports Journalism (p. 371)
- Minor in Journalism (p. 253)

Bachelor of Arts in Journalism

Program Contact: Margarita Diaz (Margarita.Diaz@qu.edu) 203-582-8785

The Quinnipiac undergraduate Bachelor of Arts in Journalism program focuses on the principles and practices of news writing and reporting across multiple platforms. The program's mission is to prepare journalism professionals who are superior writers and can effectively report on the diversity of the human experience.

The wide range of elective courses enables students to focus on a specific medium (such as television) or news subject (such as sports) or take courses across platforms based on their interests and career goals.

All students must complete the 46 credits of the University Curriculum (p. 61). Students majoring in Journalism will complete their Integrative Capstone Requirement within the major with JRN 498. In place of those credits, the student will select an additional unrestricted course in the University Curriculum.

Minor Requirement

Students enrolled in the Bachelor of Arts in Journalism program are required to complete a minor (typically 18 credits) that will complement their career and/or personal interests. Students are encouraged to minor outside the School of Communications to acquire subject knowledge beyond their primary field of study, but may choose to minor in any program within or outside the School of Communications in consultation with their advisers.

Student Learning Outcomes

Upon completion of the program, students should be able to demonstrate the following competencies:

1. Ability to research, report, write, shoot and edit news stories that conform to professional journalism standards, including the ability to apply basic numerical and statistical concepts.
2. Command of the techniques used to produce and present news in digital, broadcast and print environments, and understand the interconnectedness of these systems.
3. Familiarity with the history of journalism, its social responsibility and the underpinnings of its practice in a culturally and racially diverse society.
4. Understanding of the implications of the First Amendment and the role journalism plays in a democracy.
5. Engagement in the ethical practice of journalism.

Admission Requirements: School of Communications

The requirements for admission into the undergraduate School of Communications programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

Minor in Journalism

Program Contact: Margarita Diaz (Margarita.Diaz@qu.edu) 203-582-8785

News media continue to evolve as the trends, tools and technologies of the digital age bring vast quantities of information to new generations of audiences. The journalism minor teaches you to harness these technologies, and to apply techniques of news gathering, interviewing and story creation. Courses expose you to the many elements of multimedia production, and develop the skills necessary to produce timely and informative content for traditional print, television, radio and digital formats.

The minor focuses on the production of quality journalistic content as well as becoming a more sophisticated consumer of it. You'll gain an understanding of the professional ethics underpinning news reporting, as well as the importance of journalism to the first amendment and the vital role it plays in a free society. A refined voice, strong storytelling capability and a sharp editorial eye are beneficial to PR specialists, advertisers, publishers and a range of other professions in the communications fields and beyond.

Students wishing to minor in journalism must complete 18 credits.

The breadth and flexibility of the Bachelor of Arts in Communications/Media Studies program allows students to pursue their specific interests while developing the effective communication skills and critical and creative thinking abilities employers are seeking. With the guidance of a faculty adviser, students craft individualized programs of study based on their personal and professional goals. Our graduates work in a variety of professional fields including film and television, music and radio, magazines, news, sports, fashion, public relations, marketing, advertising and media research. Some of our alumni also have pursued graduate degrees in business, law, education, journalism, public relations and interactive media.

- Minor in Media Studies (p. 255)

**Bachelor of Arts in Communications**

Program Contact: Nancy Worthington (Nancy.Worthington@qu.edu) 203-582-8059

The BA in Communications program aims to equip students with an adaptable approach to the rapidly evolving nature of media-related careers. The breadth and flexibility of the major enables a strategic integration of courses in which students learn professional practices, analytical techniques and expertise on the media’s wider social, cultural and economic relationships.

Communications students obtain positions in diverse professional environments, including television networks, the music industry, public relations and marketing firms, advertising agencies and media research organizations. The program also prepares students to enter graduate training in business, law, journalism, public relations and education.

1. All students must complete the 46 credits of the University Curriculum (p. 61). Students majoring in Communications (Media Studies) will complete their Integrative Capstone Requirement within the major with MSS 495. In place of those credits, the student will select an additional unrestricted course in the University Curriculum.
2. Core must be completed by end of sophomore year.
3. MSS 220 can also be taken as a UC Humanities under Disciplinary Inquiry or under Part 1 or 2 of UC Personal Inquiry.

**Minor Requirement**

All students majoring in communications are required to take a minor (typically 18 credits) that will complement their career and/or personal interests. This minor can be from any program either within or outside the School of Communications. However, a student majoring in communications/media studies may not minor in media studies.

**Student Learning Outcomes**

The program’s required courses emphasize the skills and expertise sought by both demanding employers and competitive graduate programs, fostering students’ abilities to do the following:
1. **Apply** knowledge gained from their coursework and creative problem-solving skills to real-world situations facing media organizations, producers and users, showing a capacity for innovation and imaginative thinking.

2. **Plan, conduct, analyze and report** original media research findings based on a survey, focus group, social media tracking or content analysis.

3. **Interpret** secondary media research for media professionals and media consumers/users.

4. **Critically analyze** current media issues, trends and events and convey in written and oral reports their observations on how media theory relates to industry practice and audience/user interpretation.

5. **Demonstrate** a professional level of written and oral communication skills and the ability to effectively communicate ideas to various audiences through a variety of traditional and new media message delivery formats.

6. **Articulate** the importance of media literacy and how understanding the media's influence benefits media consumers and professionals in a democracy like the U.S. and in an information-based global economy.

7. **Recognize** the diversity of groups and perspectives in a global society in relation to the media’s influence on the construction of culture and identity.

**Admission Requirements: School of Communications**

The requirements for admission into the undergraduate School of Communications programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

**Minor in Media Studies**

Program Contact: Nancy Worthington (Nancy.Worthington@qu.edu)

203-582-8059

Media outlets have the power to influence the government, society and the business world. News stories can shape perceptions and public opinion in profound ways. This program examines how the media landscape has evolved over time and addresses the industry's need to continually adapt to new technology to remain relevant and effective. You’ll learn to spot trends and analyze consumer behavior in ways that complement your major in fields such as political science, advertising, marketing and business.

The program is flexible and can be adapted to match your interests and career goals. You will take several required courses focused around media industries and trends, then choose from a diverse range of communications electives. Plus, you’ll have access to our Ed McMahon Mass Communications Center—an all-digital media production environment where students create sophisticated broadcast-quality video content and programming, as well as high-tech multimedia productions for web and mobile.

Students wishing to minor in media studies must complete 18 credits.

DEPARTMENT OF STRATEGIC COMMUNICATION

The mission of the Department of Strategic Communication is to prepare our students, through theory and practice, for success in public relations, advertising and related industries. The department offers two degrees: a Bachelor of Arts in Advertising and Integrated Communications and a Bachelor of Arts in Public Relations.

The BA in Advertising and Integrated Communications program prepares students to understand and apply principles of advertising, branding and audience analytics in creating campaigns that maximize the strategic impact of content for web, social media, mobile devices and traditional media.

The BA in Public Relations program prepares students to be entry-level practitioners for careers in agency, corporate, government and nonprofit public relations. Among the most important essential learning outcomes stressed in the major are critical thinking and reasoning skills. Our graduates offer strategic counsel to their employers and clients through writing, research and implementation.

- Bachelor of Arts in Advertising and Integrated Communications (p. 256)
- Bachelor of Arts in Public Relations (p. 257)
- Master of Science in Public Relations (p. 369)
- Master of Science in Public Relations - Online/Professional Track (p. 370)
- Minor in Advertising and Integrated Communications (p. 258)
- Minor in Public Relations (p. 258)

Bachelor of Arts in Advertising and Integrated Communications

Program Contact: Hilary Fussell Sisco
(Hilary.FussellSisco@qu.edu) 203-582-3682

The BA in Advertising and Integrated Communications program prepares students to understand and apply principles of advertising, branding and audience analytics in creating campaigns that maximize the strategic impact of content for web, social media, mobile devices and traditional media. Students use their knowledge of planning, media systems, audience and consumer trends, principles of storytelling, visual design and multimedia production to strategize and create content appropriate for such environments as advertising, public relations and social media agencies, branded content newsrooms, media organizations and corporate communications.

BA in Advertising and Integrated Communications Curriculum

Students majoring in Advertising and Integrated Communications must meet the following requirements for graduation:

<table>

Minor Requirement

All students majoring in advertising and integrated communications are required to complete a minor (typically 18 credits) that will complement their career and/or personal interests. This minor can be from any program either within or outside the School of Communications. However, a student majoring in advertising and integrated communications may not minor within the Department of Strategic Communication in advertising and integrated communications or public relations.

Student Learning Outcomes

Upon completion of this program, students will be able to demonstrate the following competencies:

1. **Information fluency and analysis** — Analyze, assess and strategically employ data related to audiences and media content.
2. **Media Literacy** — Understand the modern media landscape and how to capitalize on the strengths of different media technologies.
3. **Social intelligence** — Demonstrate an ability to work effectively and responsibly within groups and manage relationships with clients,
team members, and audiences to achieve individual and common goals.

4. **Design thinking and production** – Implement basic multimedia production techniques and work effectively with content creators to produce deliverables related to campaigns.

5. **Effective communication** – Write effectively in a variety of formats for maximum audience impact.

6. **Critical and creative thinking** – Understand the principles of branding, cohesive messaging, and reputation management to apply how communication strategies and tactics integrate for a large-scale campaign from concept to delivery.

### Admission Requirements: School of Communications

The requirements for admission into the undergraduate School of Communications programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

### Bachelor of Arts in Public Relations

Program Contact: Hilary Fussell Sisco (Hilary.FussellSisco@qu.edu) 203-582-3682

The Bachelor of Arts in Public Relations program prepares entry-level practitioners for various careers in agency, corporate, government and nonprofit public relations. Among the most important essential learning outcomes stressed in the major are critical thinking and reasoning skills. Our graduates must have the ability to be more than just communicators. They need to be able to offer strategic counsel to their employers and clients. Coursework culminates in the capstone experience, in which students carry out activities for a real-world client including conducting primary research, reviewing secondary research, proposing strategies and objectives, and producing a full campaign plan that includes collateral materials and evaluation methods.

### BA in Public Relations Curriculum

Students majoring in Public Relations must meet the following requirements for graduation:

<table>

1 All students must complete the 46 credits of the University Curriculum (p. 61). Students majoring in Public Relations will complete their Integrative Capstone Requirement within the major with STC 495. In place of those credits, the student will select an additional unrestricted course in the University Curriculum.

### Minor Requirement

All students majoring in public relations are required to take a minor (typically 18 credits) that will complement their career and/or personal interests. This minor can be from any program either within or outside the School of Communications. However, a student majoring in public relations may not minor within the Department of Strategic Communication in public relations or advertising and integrated communications.

### Student Learning Outcomes

Upon completion of the program, students should be able to demonstrate the following competencies:

1. **Information fluency and analysis** – Plan, conduct, analyze and report primary research findings based on a survey, focus group or other appropriate research means, as well as interpret secondary industry research for a client.

2. **Critical and creative thinking** – Propose measurable, attainable objectives for a client based on primary and secondary research.
findings and produce a campaign strategy designed to help the client achieve its goals.

3. **Effective communication** – Demonstrate both written and oral proficiency within a variety of traditional and new industry communication vehicles and message delivery formats.

4. **Social intelligence** – Demonstrate an ability to work effectively and responsibly within groups and manage relationships with clients, team members and publics to achieve individual and common goals.

5. **Quantitative and qualitative literacy** – Propose an evaluation of a campaign to measure the campaign's effectiveness.

### Admission Requirements: School of Communications

The requirements for admission into the undergraduate School of Communications programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

### Minor in Advertising and Integrated Communications

**Program Contact:** Hilary Fussell Sisco (Hilary.FussellSisco@qu.edu)

203-582-3682

This minor teaches the foundational elements of advertising and integrated communications. Students are able to think creatively and strategically about digital and social media strategy, content production, media buying and planning, branding and writing for diverse audiences.

This program perfectly complements majors inside and outside the School of Communications, such as psychology, marketing, political science, media studies or journalism. Students take required courses, such as Principles of Advertising and Integrated Communications, and then select elective courses that focus on their own particular areas of interest in the field.

Students wishing to minor in advertising and integrated communications must complete 18 credits. This minor is not available to public relations majors.

**Advertising and Integrated Communications Minor Curriculum**

The Advertising and Integrated Communications minor is only available to those students in Catalog Year 2016-17 or later. Students wishing to minor in advertising and integrated communications must complete 18 credits. This minor is not available to public relations majors.

### Minor in Public Relations

**Program Contact:** Hilary Fussell Sisco (Hilary.FussellSisco@qu.edu)

203-582-3682

This minor provides a solid foundation in the principles of public relations and teaches you to think strategically when crafting a media relations plan. You'll also learn to write persuasively for a diverse audience.

This program perfectly complements majors inside and outside the School of Communications, such as those in marketing, political science or journalism, but it also can be customized. You will take required courses, such as the Principles of Public Relations, and Writing for Strategic Communications, and then select elective courses that focus on your own particular areas of interest, such as sports public relations, international public relations and event planning.

Students wishing to minor in public relations must complete 18 credits.

**Public Relations Minor Curriculum**

ACCELERATED DUAL-DEGREE (3+1)

The Accelerated Dual-Degree BA/MS and BFA/MS (3+1) programs are designed for outstanding School of Communications students—those who rank in the top 20 percent of their high school class and have a combined SAT score of 1200 (or ACT of 25).

Students are invited to the program as freshmen and complete the bachelor’s degree at an accelerated pace (three years as opposed to the typical four).

Students taking part in one of the accelerated dual-degree programs are required to live in university housing for the first three years of study.

Undergraduate programs available include Media Studies; Film, Television and Media Arts; Graphic and Interactive Design; Journalism; Public Relations; and Advertising and Integrated Communications. Options for the graduate year include master's programs in Journalism; Sports Journalism; Public Relations; and Interactive Media. In certain cases, the MBA program may also be an option. Students who are interested in pursuing the MBA as their graduate degree should discuss it with their academic adviser for approval.

More information about the accelerated dual-degree program can be found on the Quinnipiac website, Accelerated Dual-Degree BA/MS or BFA/MS (3+1) (https://www.qu.edu/schools/communications/programs/accelerated-four-year-ba-bfa-ms-program.html) page.

Career Development

In the School of Engineering, various career development personnel work with students to plan the academic and professional components of each student’s education. They explore career interests, guide students through a career development process and provide assistance with internships, resume preparation and employment interviews.

Internship Program

School of Engineering students gain valuable career experience by participating in a professional experience. The professional experience may be either an internship, typically paid, or a research project.

Mission Statement

Educate and inspire students in a high-quality engineering learning community that facilitates their transformation into professionals, leaders, citizens and lifelong learners.

Student Outcomes

Graduates of the engineering programs are prepared for professional practice in engineering and industry as well as for advanced study at the graduate level. Specifically graduates of the engineering programs will have:

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Graduates of the computer science program are prepared for professional practice as well as advanced study at the graduate level. Specifically graduates of the computer science program will have an ability to:

1. analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions
2. design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program’s discipline
3. communicate effectively in a variety of professional contexts
4. recognize professional responsibilities and make informed judgements in computing practice based on legal and ethical principles
5. function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline
6. apply computer science theory and software development fundamentals to produce computing-based solutions

The Department of Engineering prepares students for careers that allow them to change the world for the better. The challenges of the 21st century for both the U.S. and the world are great, but for engineers and computer scientists, they offer exciting challenges and a world of possibilities. Our programs are aimed at developing creative problem solvers, who learn math, science and fundamentals so that they can apply them in solving the ever-changing problems of tomorrow. Our emphasis on application and learning by doing, all in a small class setting, prepares our graduates to successfully enter the workforce or pursue further education.

Quinnipiac’s Bachelor of Science programs in Civil, Industrial, Mechanical and Software Engineering are accredited by the Engineering Accreditation Commission of ABET, abet.org (http://www.abet.org).

Program Contact: Jonathan Blake (Jonathan.Blake@quinnipiac.edu) 203-582-8539

Computers and computing have become increasingly integrated into our society and continually shape our lives. One does not have to look far to find examples of computing’s significant impact, from smart phone applications to credit checking systems to self-driving cars. Society needs graduates with not only strong technical skills but also significant knowledge in these application domain areas. The Bachelor of Arts in Computer Science program offers a balanced curriculum that supports students as they combine study in computer science with other disciplines across the university. The program promotes this interdisciplinary work by providing a technical core with breadth requirements, a flexible elective structure, and required directed study outside the major. The curriculum is designed to prepare students to contribute to both established and emerging application domains.

Courses must be from different areas.
Counts in this category only if MA 141 is taken.
Can be a software engineering elective (SER 210 or any 300-level or above SER course).
Must meet a minimum of 18 credits in Personal Inquiry I & II.
Must be MA 140 or higher.
A minor or second major will satisfy this requirement.

Complete additional coursework to reach 120 credits. This coursework must include any missing UC credits from Personal Inquiry above.

**Student Learning Outcomes**

Upon completion of the program, graduates will have the following abilities:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program’s discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

**Program Educational Objectives:**

Graduates of the Computer Science BA or BS programs shall become successful professionals who are recognized for:

1. Advanced grasp of core computer science knowledge and skill.
2. Ability to communicate complex ideas and problems to a professional audience.
3. Ethical behavior and capacity for finding engineering solutions that consider both the technical and social consequences of their work.
4. Leadership, mentorship and contributions to their profession and community.
5. Pursuit of intellectual, personal and professional development.

**Admission Requirements: School of Engineering**

The requirements for admission into the undergraduate School of Engineering programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page of this catalog.

---

**Bachelor of Science in Civil Engineering**

Program Contact: John Greenleaf  
(john.greenleaf@quinnipiac.edu) 203-582-5018

The BS in Civil Engineering has a broad-based curriculum that provides exposure to technical issues and design in a number of civil engineering sub-disciplines including: structural, environmental, geotechnical, hydraulic/water resources and construction management. Civil engineering projects are often multidisciplinary in nature and can involve large public works. Specifically, civil engineers design, build and maintain a variety of projects including: roads, buildings, tunnels, retaining walls, dams, bridges, airports, water supplies and sewerage systems.

Through exposure to the University Curriculum, foundational coursework in science and mathematics, major field courses and extracurricular activities, students graduating with a BS in Civil Engineering achieve intellectual proficiencies in critical thinking and reasoning, scientific literacy, quantitative reasoning, information fluency, creative thinking and visual literacy. They also achieve interpersonal proficiencies in written and oral communication, responsible citizenship, diversity awareness and sensitivity, and social intelligence.

**BS in Civil Engineering Curriculum**

The program requires 126 credits as outlined here:

A minimum grade of C- is required to satisfy the prerequisites of all civil engineering courses having the CER designation.

### Program Educational Objectives:

Within four to seven years following graduation, graduates of the civil engineering program shall become successful professionals recognized for their:

1. Resourcefulness in the application of new knowledge, tools and technology to changing problems and circumstances in the natural and built environment.
2. Communication of complex ideas and problems to a professional audience.
3. Ethical behavior and capacity for finding engineering solutions that consider both the technical and social consequences of their work.
4. Leadership, mentorship and contributions to their profession and community.
5. Pursuit of intellectual, personal and professional development.

### Admission Requirements: School of Engineering

The requirements for admission into the undergraduate School of Engineering programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the
senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

**Bachelor of Science in Computer Science**

Program Contact: Jonathan Blake (Jonathan.Blake@quinnipiac.edu) 203-582-8539

Pervasive and ever-changing computing technology provides the infrastructure for our globally connected world. Computer scientists are among the professionals who conceive, design, build and deploy critical software and hardware to support and advance this infrastructure. The Computer Science program prepares computer scientists who are able to contribute immediately and effectively to this project. Computer Science graduates possess a solid grounding in core knowledge that they can apply to solve new and emerging problems with innovative solutions. Since new computing knowledge is regularly generated, computer science graduates are able to independently identify, learn and apply new concepts.

**BS in Computer Science Curriculum**

Note: a minimum grade of C- is required for all computer science course prerequisites unless otherwise stated.

CSC Electives (Take 9 credits of CSC elective courses) 9

Total Credits 108-110

1. Must take the full-year sequence.
2. Courses must be from different areas.
3. Can be a software engineering elective (SER 210 or any 300-level or above SER course).
4. Must meet a minimum of 18 credits in Personal Inquiry I & II.
5. Total math credits must equal a minimum of 15.
6. Total math/science credits must equal a minimum of 30.

Complete additional course work to reach 120 credits. This course work must include any missing UC credits from Personal Inquiry above.

Student Learning Outcomes
Graduates of the program will have an ability to:

1. **Analyze** a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. **Design, implement and evaluate** a computing-based solution to meet a given set of computing requirements in the context of the program’s discipline.
3. **Communicate effectively** in a variety of professional contexts.
4. **Recognize** professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. **Function effectively** as a member or leader of a team engaged in activities appropriate to the program’s discipline.
6. **Apply** computer science theory and software development fundamentals to produce computing-based solutions.

Program Educational Objectives:
Graduates of the Computer Science BA or BS programs shall become successful professionals who are recognized for:

1. Advanced grasp of core computer science knowledge and skill.
2. Ability to communicate complex ideas and problems to a professional audience.
3. Ethical behavior and capacity for finding engineering solutions that consider both the technical and social consequences of their work.
4. Leadership, mentorship and contributions to their profession and community.
5. Pursuit of intellectual, personal and professional development.

Admission Requirements: School of Engineering
The requirements for admission into the undergraduate School of Engineering programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page of this catalog.

**Bachelor of Science in Industrial Engineering**

**Program Contact:** Emre Tokgoz (emre.tokgoz@quinnipiac.edu)
203-582-7909

Industrial engineers are employed throughout various industries, including manufacturing, health care and service, to determine the most effective and efficient ways to utilize resources. Industrial engineers are concerned with increasing productivity through the effective management of people, processes and technology. Through exposure to the University Curriculum, foundational coursework in science, mathematics, major field courses and extracurricular activities, students graduating with a BS in Industrial Engineering achieve intellectual proficiencies in critical thinking and reasoning, scientific literacy, quantitative reasoning, information fluency and creative thinking and visual literacy. They also achieve interpersonal proficiencies in written and oral communication, responsible citizenship, diversity awareness and sensitivity and social intelligence.

**BS in Industrial Engineering Curriculum**
The program requires 120 credits. Students must complete the following requirements:

### Industrial Engineering Electives

1. IER Technical Electives  
2. CER, IER, MER, SER Technical Electives

### Open Electives

9-10 credits

---

1. All IER courses that are not required for an IE degree.
2. One additional IER technical elective or any 300-level or higher ENR, CER, MER, SER courses that are not required for an IE degree.
3. 10 credits if CSC 106 is taken instead of CSC 110 and CSC 110L.

Depending on math sequence taken, additional UC electives may be required.

### Student Learning Outcomes

Attainment of the following outcomes prepares graduates to enter the professional practice of engineering:

1. Ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
2. Ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
3. Ability to communicate effectively with a range of audiences.
4. Ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
5. Ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
6. Ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. Ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

### Program Educational Objectives:

Within four to seven years after graduation, industrial engineering alumni are expected to:

1. Attain sustained employment in professional positions of increasing responsibility and impact;
2. Successfully pursue professional training, engineering certification, advanced professional degrees or graduate studies;
3. Demonstrate professional and intellectual growth as managers and leaders in their profession, society and communities.

### Admission Requirements: School of Engineering

The requirements for admission into the undergraduate School of Engineering programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page of this catalog.

### Bachelor of Science in Mechanical Engineering

Program Contact: Lynn Byers (Lynn.Byers@quinnipiac.edu) 203-582-5028

Mechanical engineers are employed in the research, design, development and manufacturing of a broad range of tools, engines, machines and other mechanical devices and components. Through exposure to the University Curriculum, foundational course work in science, mathematics, major field courses, and extracurricular activities, students graduating with a BS in Mechanical Engineering achieve intellectual proficiencies in
critical thinking and reasoning, scientific literacy, quantitative reasoning, information fluency, creative thinking and visual literacy. They are prepared to enter the profession or to pursue graduate studies with a solid foundation in the breadth of mechanical engineering. They also achieve interpersonal proficiencies in written and oral communication, responsible citizenship, diversity awareness and sensitivity and social intelligence.

**BS in Mechanical Engineering Curriculum**

The Bachelor of Science in Mechanical Engineering program requires 127 credits.

**Total Credits**: 127
Student Learning Outcomes:
Attainment of the following outcomes prepares graduates to enter the professional practice of engineering:

1. Ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
2. Ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
3. Ability to communicate effectively with a range of audiences.
4. Ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
5. Ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
6. Ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. Ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives
Within four to seven years after graduation, mechanical engineering alumni are expected to achieve the following objectives:

1. Attain position(s) of responsibility in which they:
   a. work effectively in teams
   b. manage resources
   c. solve complex problems
   d. communicate information
   e. influence decisions
   f. act ethically
   g. balance constraints
2. Continue self-development through formal and informal learning opportunities.
3. Obtain sustained employment and/or further education in a technical/professional field.
4. Develop a capacity to engage independently in meaningful creative endeavors.

Admission Requirements: School of Engineering
The requirements for admission into the undergraduate School of Engineering programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page of this catalog.

Bachelor of Science in Software Engineering
Program Contact: Jonathan Blake (Jonathan.Blake@quinnipiac.edu) 203-582-8539

Computers are ubiquitous, and thus so is the code to run devices, applications and even the machines themselves. The most complicated artifacts built by humans are software systems, and software engineers design and develop these systems. Using cutting edge engineering principles and practices in a hands-on team-oriented environment, software engineering students learn how to build the code of the future.

Through exposure to the University Curriculum, foundational course work in science, mathematics, major field courses and extracurricular activities, students graduating with a BS in Software Engineering achieve intellectual proficiencies in critical thinking and reasoning, scientific literacy, quantitative reasoning, information fluency and creative thinking and visual literacy. They also achieve interpersonal proficiencies in written and oral communication, responsible citizenship, diversity awareness and sensitivity and social intelligence.

BS in Software Engineering Curriculum
Note: a minimum grade of C- is required for all computer science and software engineering course prerequisites, unless otherwise stated.

Total Credits: 118

1. The second Natural Science course must be a continuation of the first course.
2. Courses must be from different areas.
3. Take two classes, each from a different area.
4. Total math/science credits must equal a minimum of 30.
5. Waived with approved minor.

### Student Learning Outcomes

Attainment of the following outcomes prepares graduates to enter the professional practice of engineering:

1. An ability to **identify, formulate and solve** complex engineering problems by applying principles of engineering, science and mathematics.
2. An ability to **apply** engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
3. An ability to **communicate** effectively with a range of audiences.
4. An ability to **recognize** ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
5. An ability to **function effectively** on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
6. An ability to **develop and conduct** appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to **acquire and apply** new knowledge as needed, using appropriate learning strategies.

### Program Educational Objectives

Within four to seven years of graduation, Software Engineering majors are expected to:

1. Be seen as models of ethical behavior in their profession and community.
2. Achieve sustained employment in a professional field and/or pursue additional educational opportunities.
3. Continue lifelong learning as they develop professionally and maintain currency with software engineering knowledge and skills.
4. Demonstrate professional and personal growth through leadership and mentoring roles.

### Admission Requirements: School of Engineering

The requirements for admission into the undergraduate School of Engineering programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the
senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page of this catalog.

Dual-Degree BA/MS or BS/MS in Cybersecurity (4+1)

Program Contact: Fred Scholl (frederick.scholl@qu.edu) 203-582-7394

Quinnipiac students have the rare opportunity to earn a bachelor’s degree in their field of interest and then continue their education to earn a Master of Science in Cybersecurity. Qualifying students can complete their undergraduate degree in four years and obtain their MS in Cybersecurity after one additional year. Students apply to the MS program in the spring of their junior year. In today’s competitive market, a graduate degree is often the key to success, and there is a higher demand than ever for cybersecurity experts.

Complementary undergraduate programs include: Computer Science, Software Engineering, Criminal Justice, Political Science, Computer Information Systems, Business Administration, plus a variety of health science programs. Qualified candidates are automatically admitted to the graduate program upon completion of their undergraduate degree. Students have access to a dedicated adviser who is also the MS in Cybersecurity program director. Special programming and networking opportunities are available through a dedicated career development specialist.

The online MS in Cybersecurity program is the same program offered to graduate-level students. Courses are taught by world-class security experts, and cover concepts and practices in cloud security and software security. Individual 1-credit courses include emphasis on hands-on projects using real-world cybersecurity tools. Students complete a hands-on capstone project using commercial or open source security tools, and will then have the opportunity to become part of a security community, both regionally and nationally.

## Dual-Degree BA/MS or BS/MS in Cybersecurity (4+1) Program of Study

For information on the undergraduate portion of the dual-degree, please refer to the page for the desired major. The program is open to students from any major with a 3.0 GPA or higher who have taken Programming & Problem Solving (CSC 110) and Data Structures and Abstraction (CSC 111).

The core of the 30-credit master of science in cybersecurity is made up of coursework that embodies the knowledge units set forth by the National Centers of Academic Excellence in Cyber Defense Education (CAE-CDE). Degree coursework culminates with a capstone project that challenges students to examine the architecture of a complex system, identify vulnerabilities, and determine the specific security approaches that should be employed.

## Minor in Computer Science

Program Contact: Jonathan Blake (Jonathan.Blake@quinnipiac.edu) 203-582-8539

Computer literacy is a vital asset in nearly every modern profession. The minor in computer science teaches you the basic computing and problem solving expertise necessary to address a wide range of issues, from cyber-attacks to software glitches and server overload. A working knowledge of operating systems, network security and database maintenance increases not only your independence, but also your value
to employers in business, media, higher education, health care and many other fields.

The minor’s deep list of electives gives you the opportunity to focus on the topics that best complement your major and future career goals. Proficiency in programming languages and computer graphics enables you to handle web design and other creative needs for employers, while skills such as cryptography and algorithm analysis are especially useful in many engineering disciplines.

To complete a minor in computer science, a student is required to take a total of six courses (20 or 21 credits).

### Computer Science Minor Curriculum

Career Development

In the School of Health Sciences, the assistant dean for career development works with students to explore majors and career interests through individual consultations and group sessions, and guides them through a career development process. Assistance is provided with resume and cover letter writing, interview preparation, conducting a job...
search and graduate school applications. Students can participate in experiential learning through community service as well as internships, part-time and summer employment. A health professions career fair is held every spring at the North Haven Campus.

Additional Requirements
Academic programs with clinical components use multiple clinical education centers. Students are responsible for their transportation to and from these clinical agencies.

Background Checks
Students should be aware that certain clinical sites or internship locations may require a criminal background check before a student is placed in the clinic or intern site. The university has procedures to assist students in obtaining such a background check. The cost of the background check is the responsibility of each individual student.

Technical Standards for Admission
Students admitted to all programs in the School of Health Sciences must be able to meet their program’s technical standards and or essential functions. Technical standards are developed by accreditation agencies and organizations to establish the essential qualities and standards considered necessary to achieve the skills, knowledge and competencies for entry-level practice. Information on technical standards and essential functions may be found in the catalog, on the website or by contacting the individual program chairperson.

Academic Good Standing
All undergraduate and graduate students in the School of Health Sciences are expected to maintain the required minimum GPA set forth by their respective program of study (if applicable). Each program may have additional benchmarks that must be met to progress within the program of study. The student should refer to the program’s description in the Quinnipiac University Catalog and to the program’s student handbook (if applicable) for clarification for what is required to maintain his/her status within the program.

At the end of each semester, the program directors will compile a list of students who are deficient in meeting academic or clinical/professional achievement requirements. Utilizing the review process established by his/her program, the student will be notified via email of his/her status in the program. Deficient students may be: a) placed on probation, b) suspended or c) dismissed. Students placed on probation remain in their program but in order to progress, must meet the performance standards specified in their probation notification letter. For further clarification please see the Program Level Academic Good Standing Policy (p. 71).

Mission Statement
The Quinnipiac University School of Health Sciences offers a comprehensive spectrum of health science programs designed to address both the evolving health needs of society and the practical implementation of innovative methods and procedures based on the latest scientific discoveries. Building upon a solid foundation in the basic sciences and liberal arts, the School of Health Sciences offers a student-centered learning environment with interprofessional collaboration, innovative teaching and hands-on experience. The School of Health Sciences seeks to integrate theory, research and practice to best prepare health care practitioners and biomedical scientists who can demonstrate leadership in their disciplines and in the global community.

Vision Statement
The School of Health Sciences strives to develop forward-thinking, compassionate practitioners and scientists with broad professional competencies who can shape a rapidly changing biomedical and social landscape in pursuit of excellence in health care delivery. The school will be a nationally recognized school of choice for students, faculty and employers who share this vision.

Values Statement
The School of Health Sciences values an interprofessional, client/patient-centered health care model and the translational science that supports it. Students are held to high ethical standards as they utilize critical thinking, scientific evidence and knowledge of diverse cultures and communities to improve health outcomes. We value an experiential learning environment where faculty integrate inquiry with their professional expertise and build collaborative relationships that empower students to solve health-related challenges in a socially responsible manner.

Bachelor of Science
- Bachelor of Science in Athletic Training (http://catalog.qu.edu/health-sciences/athletic-training-sports-medicine/athletic-training-bs)
- Bachelor of Science in Biomedical Sciences (p. 278)
- Bachelor of Science in Diagnostic Medical Sonography (p. 297)
- Bachelor of Science in Health Science Studies (p. 281)
- Bachelor of Science in Microbiology and Immunology (p. 284)
- Bachelor of Science in Radiologic Sciences (p. 299)
- Online Health Science Studies (p. 291)
  - BS Completion Track

Dual-Degree Programs
- Entry-Level Dual-Degree BS in Health Science Studies/MOT (p. 303) (Freshman Entry)
- Accelerated Dual-Degree BS/MHS in Advanced Medical Imaging and Leadership (3+1) (p. 293)
- Entry-Level Master's Physician Assistant (p. 317) (Freshman Entry)
- Entry-Level Doctor of Physical Therapy (p. 308) (Freshman Entry)
  - Dual-Degree BS in Health Science Studies/DPT (3+3) (p. 313)
  - Dual-Degree BS in Health Science Studies/DPT (4+3) (p. 314)
  - Dual-Degree BS in Athletic Training/DPT (4+3) (p. 311)
  - Dual-Degree BS/MHS in Biomedical Sciences (concentrations in Medical Sciences or Microbiology) (p. 286)
  - Accelerated Dual-Degree BS in Health Science Studies/Master of Social Work (3+2) (p. 276)

Minors
- Minor in Biomedical Sciences (p. 289)
- Minor in Microbiology and Immunology (p. 290)

Graduate Programs
Master of Health Science
- Advanced Medical Imaging and Leadership (p. 394)
- Cardiovascular Perfusion (p. 398)
- Biomedical Sciences (p. 395) with concentrations in:
  - Medical Sciences
  - Microbiology
• Pathologists’ Assistant (p. 411)
• Physician Assistant (p. 413)
• Radiologist Assistant (p. 416)

**Master of Social Work**
• Master of Social Work (p. 404)

**Doctoral Degrees**
• Entry-Level Professional Doctor of Occupational Therapy (OTD) (p. 402)
• Online Post-Professional Occupational Therapy Doctorate (OTD) (p. 409)
• Entry-Level Doctor of Physical Therapy (DPT) (p. 310)

**Certificate Programs**
• Certificate of Advanced Graduate Studies in Occupational Therapy (p. 408) (Post-Professional)
DEPARTMENT OF BIOMEDICAL SCIENCES

The programs within the Department of Biomedical Sciences provide students with knowledge and skills of the rapidly expanding fields of basic science, medicine and research. The integration of courses from these areas with a broad range of courses taken from other disciplines—such as the arts and sciences and business—provides the student with the maximum educational background and the critical thinking skills required to succeed in the increasingly demanding field of biomedical sciences.

The department offers four programs leading to the bachelor of science degree: Biomedical Sciences, Health Science Studies, Microbiology and Immunology, plus a Dual-Degree Bachelor/Master of Health Science in Biomedical Sciences. Because of the expansion of medical information and techniques, the department also offers several graduate degree programs including Cardiovascular Perfusion, Pathologists’ Assistant and Biomedical Sciences (with concentrations in Medical Sciences and Microbiology). The focus of each of these programs is to educate students for the critical thinking necessary to function successfully within their chosen profession.

The Department of Biomedical Sciences integrates and coordinates the activities of related biomedical sciences programs that may be conveniently grouped under the generic title “biomedical sciences.” The inclusion of these programs, which have many elements in common, under the direction of a single administrative unit, encourages the mixing of ideas and disciplines. It allows both the lateral and the upward mobility of students enrolled in closely related curricula and permits the faculty to cut across traditional disciplinary boundaries.

The rapid expansion of basic medical information, methodology and technology in recent years has increased the demand for specially trained personnel to perform in the clinical and research laboratories of hospitals, medical schools and government health facilities, and in the pharmaceutical and biotechnology industries. The health care system has a need for development of interdisciplinary skills to keep pace with sophisticated scientific developments and their applications in the biomedical sciences.

Students in biomedical science programs can enroll in independent study courses in biomedical science, microbiology and health sciences that enable them to collaborate with faculty in research laboratories. By definition, an independent study includes course content not offered by another Quinnipiac Catalog course. However, it must involve contact hours and scholarly activities equivalent to any regularly offered course. These courses often include review of the scientific literature in the field of the research project and creation of a “product,” such as a term essay, a series of short papers, laboratory or project reports, a portfolio or presentation at a scientific meeting. Students are limited to no more than 8 credits of Biomedical Science (BMS) and/or Health Science (HSC) independent studies.

Students should refer to Pre-Medical Studies (p. 55) for information about the Pre-Medical Studies Program.

Accelerated Dual-Degree BS in Health Science Studies/Master of Social Work (3+2)

Program Contact: Christine G. Fitzgerald
(Chris.Fitzgerald@quinnipiac.edu) 203-582-8688

The Accelerated Dual-Degree BS in Health Science Studies/Master of Social Work program is designed for students entering the School of Health Sciences who have interest in health care and want to pursue a career in the field of social work. Upon admission, students choosing this option are assigned to academic advisers who will assist them in designing a customized program to meet their career goals.

First-year students are automatically enrolled in a career exploration course to help them increase the breadth and depth of their professional interests. A strong emphasis on individualized academic advising is at the core of this program. The student-adviser relationship provides opportunity and support for each student, while pursuing their goals within the Quinnipiac University educational experience.

Social work is one of the fastest growing occupations in the United States. As social workers, graduating students have the ability to enter a broad range of high-demand fields. Emergency rooms, rehabilitation facilities and youth centers all rely on social workers to treat veterans with PTSD, neglected children, people with chronic illnesses and many others. Our program prepares you for licensure and gives you the tools you’ll need to provide patients with counseling, crisis intervention and access to social welfare and community resources.

You’ll act as a crucial link between patients and their caregivers, ensuring that they are receiving proper attention. Our curriculum emphasizes interprofessional education to familiarize you with a team-based health care approach while also giving you the freedom to tailor your degree to your specialty.

Through this accelerated dual-degree program, you’ll complete both your bachelor’s degree and your Master of Social Work (p. 404) in just 5 years.
Accelerated Dual-Degree BS in Health Science Studies/MSW Program of Study

Undergraduate BS in HSC Curriculum

A total of 120 credits is required for completion of the BS in Health Science Studies.

1 Chemistry courses and additional math courses depend on intended professional goal or career plan and math placement score.

Subsequent Course and GPA Requirements

Following the first year of study, Health Science Studies students meet with their academic advisers and develop a customized plan of study that incorporates their academic and career goals. To remain in good standing within the program, students must maintain an minimum overall science GPA of 2.25 and earn 120 credits for degree completion. Course selections must fulfill the following:

Please visit the Admissions for detailed admission requirements, including required documents, their high school counselor as soon as they are available. Freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

Bachelor of Science in Biomedical Sciences

Program Contact: Thomas Martin (thomas.martin@qu.edu) 203-582-3368

The Department of Biomedical Sciences offers a Bachelor of Science in Biomedical Sciences. The curriculum for this degree program provides the student with a solid foundation in the basic and biomedical sciences, which allows the student to pursue many different avenues of opportunity depending upon his/her goals and interests. Students completing this degree may qualify for employment in the pharmaceutical and biotechnology industries; the medical diagnostics industry; university-based biomedical research; and city, state and federal health/research laboratories. Additionally, a student with this degree may wish to continue his/her education in graduate/professional school in: biological and/or biomedical sciences, medicine, dentistry, veterinary medicine, physician assistant, pathologists’ assistant, forensic sciences, microbiological sciences, molecular biology, biotechnology, toxicology, neurobiology, plus many other areas.

Students who excel in this program (>3.0 GPA overall and in science/math) may be eligible to participate in a research project with a faculty member or an internship in an area company sometime during their junior or senior year. This depends upon the availability of mentors and internships at the particular time. Upper-level BMS students in good academic standing (>3.0 GPA overall and in science/math) may also be permitted to take 2–3 graduate courses to fulfill undergraduate degree requirements. See policy here (p. 340).

The technical standards for individuals working in the biomedical field may include the following abilities: to effectively communicate via oral and written expression; exhibit general fine motor skills and hand-eye coordination appropriate to performing delicate procedures; distinguish between subtle shades of color; read comprehend, and interpret scientific/medical information from professional sources. Reasonable accommodations will be considered on a case-by-case basis.

Students may choose to minor in any area of study, although BMS students often choose to pursue one (or more) of these particular minors:

1. Microbiology and Immunology
2. Chemistry
3. Psychology

Students should work with their BMS major adviser and with their minor adviser to choose appropriate courses.

BS in Biomedical Sciences Curriculum

In addition to courses in science and mathematics, students are required to take a selection of University Curriculum (p. 61) courses (designated UC on the curriculum). The entire curriculum is designed to provide students with a strong program in basic and biomedical sciences, as well as a well-rounded educational experience through the University Curriculum. To remain in good academic standing within the program, the student must maintain a GPA of 2.5 overall, as well as in math and science.

1 Minimum mathematics requirement: MA 140. For those interested in graduate or professional schools, MA 141 is recommended.

Students interested in graduate or professional school should investigate research and/or an independent study.

**Science Electives**
Take 15-18 credits from any BIO, BMS, HSC, CHE or PHY course at the 200 level or above. Three courses must be BMS.

**Open Electives**
Students may take 6 credits of 1-, 2-, 3-, or 4-credit courses. BMS majors may not take 100 level "science for non-science majors" classes as open electives.

**Minors**
Science and open electives may be taken to complete minors from a variety of disciplines such as microbiology/immunology, chemistry and psychology. Students should discuss course selection for minors with their academic adviser.

**Biomedical Sciences Electives**

Student Learning Outcomes
Upon completion of the Bachelor of Science in Biomedical Sciences program, students will demonstrate the following competencies:

1. Foundational Knowledge: Demonstrate advanced knowledge of the major disciplines in the biomedical sciences (biology, chemistry, physics, physiology, microbiology, immunology, pathophysiology).
3. Translational Science: Critically analyze how new research discoveries can be translated into effective patient treatments/interventions.
5. Effective Scientist: Engage in scientific research and effectively communicate the dissemination of results to various audiences.
6. Responsible Citizen: Evaluate the social and ethical impact of scientific discoveries on medical practice.

BMS Mission Statement
The mission of the Biomedical Sciences program is to provide students with a solid basic science foundation in preparation for studying the upper-level biomedical-related sciences. This is meant to provide maximum flexibility to students who are interested in pursuing one of the medical-related professions (e.g., physician, physician assistant, dentist, veterinarian, pharmacist, chiropractor, etc.), or graduate programs (MS/PhD) in the biomedical sciences (e.g., cancer biology, stem cell technology, cloning technology, molecular genetics, microbiology, immunology, etc.). Additionally, students who choose not to go on to graduate or professional school are able to apply for research and development positions in pharmaceutical and biotechnology companies.

BMS students have the opportunity to learn valuable skills that may be applicable in a variety of biomedical fields after graduation, including effective communication via oral and written expression; exhibition of general fine motor skills and hand-eye coordination appropriate to performing delicate procedures; reading comprehension, critical thinking, visual literacy, interpretation of scientific/medical information from professional sources, etc.

Admission Into the Program
Admission into the Biomedical Sciences program is dependent on the applicant’s potential to pursue a university program and on past academic performance. The high school student applying for admission into the Biomedical Sciences program should have a strong background in the biological sciences. To remain in good standing within the program, the student must maintain a GPA of 2.5 overall, as well as in math and science.

Transfer Students from within Quinnipiac University
Students currently attending Quinnipiac in another program may be accepted into the Biomedical Sciences program based upon a review of qualifications by the program director. Students may apply upon completion of at least one semester at Quinnipiac. Students transferring in as a junior (i.e., 57 credits or more) must have completed both the general biology requirements, specifically, 8 credits of BIO 101 & BIO 102 or BIO 150 & BIO 151, and the general chemistry requirements, specifically, 8 credits of Quinnipiac’s CHE 110 & CHE 111 prior to entry into the upper-class component of the program. Student must also meet the performance standards of the program (GPA of 2.5 overall, as well as in math and science).

Transfer Students from Other Colleges and Universities
Transfer students from other colleges and universities may be accepted into the Biomedical Sciences program. These students must meet the program’s performance standards and course requirements. For all transfer students, a minimum GPA of 2.67 is required. Students transferring in as a junior (i.e., 57 credits or more) must have completed both the general biology requirements, specifically, the equivalent of 8 credits of Quinnipiac’s BIO 101 & BIO 102 or BIO 150 & BIO 151, and the general chemistry requirements, specifically, the equivalent of 8 credits of Quinnipiac’s CHE 110 & CHE 111 prior to entry into the upper-class component of the program. Transfer students wishing to enter this program will be given appropriate transfer credit for previous college work.

Pre-Medical Studies Program
Students majoring in Health Science Studies, Biology, Biomedical Sciences or the natural science track of Behavioral Neuroscience may fully participate in the pre-medical studies program. The curriculum in this degree program can fulfill the science prerequisites for most...
professional schools. Students should refer to Pre-Medical Studies (p. 55) for more information about the pre-medical studies program and contact the Health Professions Advisory Committee for further academic advising.

**Bachelor of Science in Health Science Studies**

Program Contact: Christine G. Fitzgerald
(Chris.Fitzgerald@quinnipiac.edu) 203-582-8688

The Health Science Studies bachelor’s degree program is designed for students entering the School of Health Sciences who have interest in health care/health science related career paths. Upon admission, students choosing this option are assigned to academic advisers who will assist them in designing a customized program to meet their career goals. A strong emphasis on individualized academic advising is at the core of this program.

First-year students are automatically enrolled in a career exploration course to help them increase the breadth and depth of their professional interests. By their second year, students choose between the Clinical Preparation Track, Exercise & Nutrition Track, or the most flexible, Health & Science Track. This decision may change at anytime during their undergraduate program. A select number of students accepted into the Health Science Studies major may be invited into the Physician Assistant (PA) Prep Track. The student-adviser relationship provides opportunity and support for each student, while pursuing their goals within the Quinnipiac University educational experience.

All students are strongly encouraged to declare a minor early in their undergraduate program to help broaden their foundational knowledge to help prepare them for their future careers or graduate programs. Qualified students have applied and attended graduate programs such as medical school, dental school, physician assistant, physical therapy, occupational therapy, nutrition, social work, speech language pathology, genetic counseling, medical laboratory sciences, pathology assistant or one of the many other health care related programs. Successful students have been accepted into combination programs such as the Dual-Degree BS/MBA (4+1) (p. 359) Health Care Management program, Accelerated Dual-Degree BS/JD (3+3) (http://catalog.qu.edu/academics/dual-degree-bs-jd-3-3) Pre-Law program, and Accelerated Dual-Degree BS/MSW (3+2) (p. 276) Master of Social Work program. Other options are to prepare for application to Accelerated BSN program for Second-Degree Students (https://catalog.qu.edu/nursing/nursing-accelerated-bsn) Nursing BS, or apply for a double major in health science studies along with psychology or sociology. The flexibility of program allows students the option to graduate early by taking summer and or J-term classes.

Students completing this bachelor’s degree may also qualify for employment in the health science or health care related professions with or without direct patient interaction. Some examples would be as research assistant, biotechnology industry position, pharmaceutical/ medical sales, community public health worker, environmental health advocate and more. We have also seen an increase in graduates of BS programs choosing to do a “Gap” year and work entry-level jobs such as patient care associate, pharmacy technician and physical therapy assistant.

**BS in Health Science Studies Curriculum**

A total of 120 credits is required for completion of the BS in Health Science Studies. Below is a sample first year plan of study.

1 Chemistry courses and additional math courses depend on intended professional goal or career plan and math placement score.

**Subsequent Course and GPA Requirements**

Following the first year of study, Health Science Studies students meet with their academic advisers and develop a customized plan of study that incorporates their academic and career goals. During the first two years of study, students select a specific track. To remain in good standing within the program, students must maintain an minimum overall science GPA of 2.25 and earn 120 credits for degree completion. Course selections must fulfill the following:

<table>

Choose one of the following courses:

- HSC 380: International Health Care - Field Research
- HSC 388 & 388L: EMT I Training and EMT I Training Lab
- HSC 397: Pre-Health Professions Clinical Affiliation

Choose 8-9 credits from the following courses:

- HSC 205: Interprofessional Community-Based Service Learning Seminar: Age-Related (HSC 505)
- HSC 206: Interprofessional Community-Based Service Learning Seminar: International (HSC 506)
- HSC 207: Interprofessional Community-Based Service Learning Seminar: Special Populations (GT 207) (HSC 507)
- HSC 210: Introduction to Evidence-Based Health Care
- HSC 230: Counseling and Teaching for Health Care Professionals
- HSC 301: Health Care Challenges and Team-Based Solutions
- HSC 305: Emotional/Social Intelligence for the Health Sciences
- HSC 315: Bioethical Issues in the 21st Century
- HSC 380: International Health Care - Field Research
- HSC 388 & 388L: EMT I Training and EMT I Training Lab
- HSC 389 & 389L: EMT Training II and EMT Training II Lab
- HSC 397: Pre-Health Professions Clinical Affiliation

**Exercise & Nutrition Track**

This track provides students with a foundation in exercise prescription and nutrition. This foundation helps prepare students for graduate studies in areas such as Physical Therapy, Occupational Therapy, Exercise Physiologists, and Nutrition/Dietitian. Students in the Exercise & Nutrition Track are required to take the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HSC 202</td>
<td>Medical Terminology</td>
<td>2</td>
</tr>
<tr>

<td>Health Care Essentials: Structure, Policy and Professionalism</td>
<td>3</td>
</tr>
<tr>
<td>HSC 221</td>
<td>Introduction to Health Care</td>
<td>2</td>
</tr>
<tr>
<td>HSC 262</td>
<td>Nutrition in Health and Illness</td>
<td>3</td>
</tr>
<tr>
<td>HSC 326</td>
<td>Therapeutic Exercise</td>
<td>3</td>
</tr>
</tbody>
</table>

Choose two of the following courses:

- AT 330: Nutrition for Sport and Fitness
- AT 440: Biomechanics
- BMS 300 & 300L: The Physiology of Human Performance I and The Physiology of Human Performance I Lab
- BMS 301 & 301L: Physiology of Human Performance II and Physiology of Human Performance II Lab
- HSC 214: Care and Prevention of Athletic Injuries
- HSC 230: Counseling and Teaching for Health Care Professionals
- HSC 460: Advanced Nutrition (AT 460)

Take 10-12 credits of science electives  10-12
Take 30 credits of open electives  30

**Health & Science Track**

The most flexible curriculum to prepare for careers or graduate studies in one of the many other fields a student may go in with this degree, such as Health Care Management, Health Science Research, or to tailor one of the above tracks to best meet their academic needs. Students in the Health & Science Track are required to take the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HSC 202</td>
<td>Medical Terminology</td>
<td>2</td>
</tr>
<tr>

<td>Health Care Essentials: Structure, Policy and Professionalism</td>
<td>3</td>
</tr>
<tr>
<td>HSC 221</td>
<td>Introduction to Health Care</td>
<td>2</td>
</tr>
</tbody>
</table>

Take 6 credits of health science studies electives  6
Take 18 credits of science electives  18
Take 30 credits of open electives  30
Physician Assistant (PA) Preparation Track (Invitation Only)

A limited number of Health Science Studies students also may be invited into the Physician Assistant (PA)-Prep Track. This track is a means for well-qualified students to advance their interests in the PA profession but did not get accepted into the Entry-Level Master’s in Physician Assistant (ELMPA) program. During the junior year, depending upon the number of seats available in the ELMPA cohort, approximately 3-5 students will be selected to transition into the ELMPA program. The remaining PA-Prep students not admitted into the ELMPA program will continue to follow a curriculum that mirrors that of the ELMPA program. As a result, the PA-Prep students will have a robust CASPA (Central Application Service for Physician Assistants) application making them a competitive applicant for other PA programs. Students interested in the PA profession who are not invited into the PA-Prep track may take similar courses via the Clinical Preparation Track. Students invited to the PA Prep Track will be required to take the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>

Student Learning Outcomes

Upon completion of the Health Science Studies program, students will demonstrate the following competencies:

1. **Scientific Knowledge**: Demonstrate proficiency in understanding and explaining fundamental scientific principles in the disciplines of biology, chemistry and physics.
2. **Interprofessional Skills**: Effectively communicate information across the medical professions using advanced medical vocabulary.
3. **Teamwork**: Apply an advanced understanding of the interprofessional nature of health care.
4. **Health Systems**: Develop an advanced knowledge of the U.S. health care system and effectively describe challenges/issues that affect it.
5. **Evidence Informed Practice**: Critically evaluate biomedical information and sources to confirm validity and reliability.
6. **Responsible Citizen**: Evaluate the social, moral and ethical implications of scientific discoveries on medical practice.

Additional Track-Specific SLOs

Clinical Preparation & PA-Prep Track

- **Patient Communication**: Develop fundamental clinical skills to effectively interview and communicate with patients.

Exercise & Nutrition Track

- **Essential Nutrition**: Effectively understand the role that food and nutrients play for optimal health and disease processes.
- **Exercise Prescription**: Apply an advanced understanding of the proper exercise techniques, indications, contraindications and progression as related to injury, prevention, reconditioning, and return to work/participation guidelines.

Mission Statement

The mission of the Health Science Studies bachelor’s degree program is to facilitate and enrich students’ development into knowledgeable, proficient and culturally competent interprofessional collaborators, who are leaders and lifelong learners, equally prepared for advanced health care education or direct entry into a health science career.

Admission Requirements

Admission into the Health Science Studies program is dependent on the applicant’s potential to pursue a university program and on past academic performance. The high school student applying for admission into the Health Science Studies program should have a strong background in the biological sciences. To remain in good standing within the program, the student must maintain a science GPA of 2.25. Freshman biology (8 credits) must be successfully completed, at the latest, by the end of a student’s sophomore year.

Transfer Students from within Quinnipiac University

Students currently attending Quinnipiac in another program may be accepted into the Health Science Studies program based upon a review of qualification by the program director. Students, with a science GPA of 2.25 minimum, may apply upon completion of at least one semester at Quinnipiac. Students transferring in as a junior (i.e., 57 credits or more) must have completed the general biology requirements, specifically, the equivalent of 8 credits of Quinnipiac’s BIO 101 & BIO 102, or BIO 150 & BIO 151 or BIO 211 & BIO 212, prior to entry into the upper-class component of the program.

Transfer Students from Other Colleges and Universities

Transfer students from other colleges and universities may be accepted into the Health Science Studies program. These students must meet the program’s performance standards and course requirements. For all transfer students, a minimum GPA of 2.67 is required. These students must have earned at least 8 credits of biology if entering their junior or senior year (i.e., having earned 57 credits or more), and performance standards of the program (science GPA minimum 2.25).

Pre-Medical Studies Program

Students majoring in Health Science Studies, Biology, Biomedical Sciences or the natural science track of Behavioral Neuroscience may fully participate in the pre-medical studies program. The curriculum in this degree program can fulfill the science prerequisites for most professional schools. Students should refer to Pre-Medical Studies...
Bachelor of Science in Microbiology and Immunology

Program Contact: Thomas Martin (Thomas.Martin@qu.edu)
203-582-3368

Rapid and expanding advances in the field of microbiology and immunology have created a need for employees with expertise in a variety of areas. Our graduates are prepared for exciting careers in the expanding medical, clinical, pharmaceutical, biotechnological, molecular and health industries. This program also prepares the student for advanced study in specialized graduate science, health and medical programs.

The program offers students a range of classroom, laboratory and independent research experiences. All courses consist of lecture and hands-on laboratories where students perform the most current research techniques. In addition to courses in the sciences, the University Curriculum (p. 61) course offerings prepare students with a broad-based conceptual understanding of science and its role in society.

Included in this program is a two-semester required undergraduate seminar/research experience performed with faculty in research laboratories. This experience allows the student to develop the expertise and experience to be successful in beginning a career or in graduate study. All of our students give formal presentations of their independent research projects. Many have presented the results of research experiences at professional scientific meetings.

Successful third- and fourth-year students may be able to obtain internships or part-time work experiences during the school year and/or summer in government labs and major pharmaceutical or biotechnology companies located in the region. To remain in good standing within the program, the student must maintain a math and science GPA of 2.25.

Additional electives may be selected with the approval of the department chair.

### Student Learning Outcomes

Upon completion of the microbiology and immunology program, students will demonstrate the following competencies:

1. **Core Disciplines**: Demonstrate advanced knowledge of the foundational principles in the disciplines of biology, chemistry and physics.
2. **Advanced Knowledge**: Demonstrate advanced knowledge of the fundamental concepts of microbiology and immunology.
3. **Organisms and Host**: Understand the symbiotic relationships that can exist between microorganisms and humans (mutualistic, commensal and pathogenic).
4. **Professional Skills**: Master the essential technical and analytical skills of the microbiologist/immunologist.
5. **Effective Scientist**: Engage in scientific research and effectively communicate the dissemination of results to various audiences.
6. **Responsible Citizen**: Evaluate the social and ethical impact of scientific discoveries on medical practice.

### Mission Statement

The mission of the Microbiology and Immunology degree program is to provide students with a solid basic science foundation in preparation for studying the upper-level sciences related to immunology and microbiology. This is meant to provide many opportunities to students who are interested in pursuing graduate programs (MS/PhD) in the microbiological sciences (e.g., bacteriology, virology, public health, etc.), as well as sciences related to immunology (e.g., vaccines, epidemiology, cancer biology, etc.).

Additionally, students may pursue one of the medical-related professions (e.g., physician, physician assistant, dentist, veterinarian, pharmacist, chiropractor, etc.). Students who choose not to go on to graduate or professional school are able to apply for research and development positions in pharmaceutical and biotechnology companies.

Students learn about molecular biology with hands-on student-directed laboratory projects where thinking, planning and problem-solving skills are developed. Independent research projects under the guidance of faculty allow development of these skills with “real-world” experiences.

Student skills are evaluated continuously with written and oral presentations, encouraging the refinement of communication skills critical to a successful career. Products of student research activity are presented in seminars and at regional or national scientific meetings.

### Admission

Admission into the Microbiology and Immunology program is dependent on the applicant's potential to pursue a university program and on past academic performance. The high school student applying for admission into the Microbiology and Immunology program should have a strong background in the biological sciences. To remain in good standing within the program, the student must maintain a math and science GPA of 2.25.
Transfer Students from within Quinnipiac University

Students currently attending Quinnipiac University in another program may be accepted into the Microbiology and Immunology program based upon a review of qualification by the program director. Students may apply upon completion of at least one semester at Quinnipiac University. Students transferring in as a junior (i.e., 57 credits or more) must have completed both the general biology requirements, specifically, 8 credits of BIO 101 & BIO 102 or BIO 150 & BIO 151, and the general chemistry requirements, specifically, 8 credits of Quinnipiac’s CHE 110 & CHE 111 prior to entry into the upper-class component of the program. Student also must meet the performance standards of the program (minimum math and science GPA of 2.25).

Transfer Students from Other Colleges and Universities

Transfer students from other colleges and universities may be accepted into the Microbiology and Immunology program. These students must meet the program’s performance standards and course requirements. For all transfer students, a minimum GPA of 2.67 is required. Students transferring in as a junior (i.e., 57 credits or more) must have completed both the general biology requirements, specifically, the equivalent of 8 credits of Quinnipiac’s BIO 101 & BIO 102 or BIO 150 & BIO 151 and the general chemistry requirements specifically, the equivalent of 8 credits of Quinnipiac’s CHE 110 & CHE 111 prior to entry into the upper-class component of the program. Transfer students wishing to enter this program will be given appropriate transfer credit for previous college work.

Pre-Medical Studies Program

Students majoring in Health Science Studies, Biology, Biomedical Sciences or the natural science track of Behavioral Neuroscience may fully participate in the pre-medical studies program. The curriculum in this degree program can fulfill the science prerequisites for most professional schools. Students should refer to Pre-Medical Studies (p. 55) for more information about the pre-medical studies program and contact the Health Professions Advisory Committee for further academic advising.

Dual-Degree BS/MHS in Biomedical Sciences (4+1)

Program Contact: Thomas Martin (Thomas.Martin@qu.edu)
203-582-3368

The Department of Biomedical Sciences offers a five-year program leading to a Dual-Degree BS in Biomedical Sciences/MHS in Biomedical Sciences (4+1) with concentrations in Medical Sciences or Microbiology. The curriculum for this dual-degree program provides a solid foundation in the basic and biomedical sciences, which allows students to pursue many different avenues of opportunity depending upon their goals and interests. Students completing this graduate program may qualify for employment in the pharmaceutical and biotechnology industries; the medical diagnostics industry; university-based biomedical research; and city, state and federal health/research laboratories. Additionally, a student with this degree may wish to continue his/her education in graduate/professional school in: biomedical sciences, medicine, dentistry, veterinary medicine, physician assistant, pathologists’ assistant, cardiovascular perfusion, microbiology and immunology, molecular biology, biotechnology, neurobiology, pharmacology, toxicology, cancer biology, plus many other areas.

To remain in good standing within the program, students must maintain a GPA of 3.0 overall, as well as in math and science for the remainder of their undergraduate careers. Students also must maintain an overall GPA of 3.0 for the graduate portion and successfully pass the comprehensive examination in their final semester of their graduate year.

Credits  14-15

Total Credits  150-155

1 Minimum mathematics requirement: MA 140. For those interested in graduate or professional schools, MA 141 is recommended.
2 The comprehensive exam must be completed by April 15 of the fifth year.

Comprehensive Examination
The comprehensive examination in biomedical sciences (2 credits) is a requirement for the non-thesis option in the Biomedical Sciences program. The purpose of the exam is two-fold. First, the student must demonstrate broad and specific knowledge expected of someone holding a master's degree. Second, the student must be able to integrate knowledge obtained from individual courses into unified concepts which link the student's own specialization to other fields of study. The student is given two opportunities to demonstrate competency. A written essay exam is administered by a designated faculty member. Students should schedule an appointment with the program director before registering for the comprehensive exam.

**Mission Statement**

The mission of Quinnipiac University's Dual-Degree BS/MHS in Biomedical Sciences (4+1) program (with concentrations in Medical Sciences or Microbiology) is to provide students with the cutting-edge skills they need to manage the more complex operations carried out today in hospitals and research facilities, as well as allowing students to develop their critical thinking skills and knowledge of the biomedical sciences, sought after by PhD programs and medical schools. The program provides the student with a comprehensive knowledge to meet the education and technical needs of the biomedical profession in pharmaceutical, biotechnology, diagnostics and medical research. Students are guided in the principles and methods of scientific research, and they gain knowledge of the latest advances in biomedical, biotechnological and laboratory sciences—all directly applicable to real-world work environments.

**Student Learning Outcomes**

Upon completion of the Dual-Degree BS/MHS in Biomedical Sciences (4+1) program, students will demonstrate the following competencies:

1. **Foundational Knowledge**: Demonstrate advanced knowledge of the major disciplines in the Biomedical Sciences (Biology, Chemistry, Physics, Physiology, Microbiology, Immunology, Pathophysiology).
2. **Disease Mechanisms**: Identify factors that influence human health and disease.
3. **Translational Science**: Critically analyze how new research discoveries can be translated into effective patient treatments/interventions.
4. **Professional Skills**: Master the essential technical skills critical for success in a laboratory environment.
5. **Effective Scientist**: Engage in scientific research and effectively communicate the dissemination of results to various audiences.
6. **Responsible Citizen**: Evaluate the social and ethical impact of scientific discoveries on medical practice.
Admission to the Program

Students interested in applying to the Dual-Degree BS/MHS in Biomedical Sciences (4+1) with concentrations in Medical Sciences or Microbiology must meet with the program contact during the spring semester of their junior year. Following the meeting, the student may apply for admission into the program. Admission into the program is dependent on the applicant's potential to pursue a university program and past academic performance. At the time of application submission, students must have a GPA of 3.0 overall, as well as in math and science. To remain in good standing within the program and be eligible to enter the graduate curriculum, the student must maintain a GPA of 3.0 overall, as well as in math and science for the remainder of their undergraduate careers.

Students in the Health Science Studies program who successfully complete (BIO 212/BIO 212L, CHE 211/CHE 211L, PHY 111/PHY 111L & BMS 370/BMS 370L) also may be eligible for admittance into the graduate portion of the program and should contact the program director.

Pre-Medical Studies Program

Students majoring in Health Science Studies, Biology, Biomedical Sciences or the natural science track of Behavioral Neuroscience may fully participate in the pre-medical studies program. The curriculum in this degree program can fulfill the science prerequisites for most professional schools. Students should refer to Pre-Medical Studies (p. 55) for more information about the pre-medical studies program and contact the Health Professions Advisory Committee for further academic advising.

Independent Study Opportunities

Students in Biomedical Science programs may take independent study courses in biomedical science, microbiology and/or health sciences. Students who excel in the BMS program (>3.0 GPA overall and in science/math) may be eligible to work on a research project, enabling them to collaborate with faculty in research laboratories. The independent study courses, BMS 481, BMS 498 and BMS 499 are for topics in biomedical sciences, BMS 482 and BMS 483, are for microbiology topics and HSC 498 and HSC 499 for topics in health sciences. A maximum of 8 independent study credits may count toward the science, health science or open electives in the biomedical sciences, microbiology and immunology, or health science studies curriculum.

By definition, an independent study includes course content not offered by another QU Catalog course. However, it must involve contact hours and scholarly activities equivalent to any regularly offered course. These courses can include performing a research project, review of the scientific literature in the field of the research project and creation of a "product," such as a term essay, a series of short papers, laboratory or project reports, a portfolio, or presentation at a scientific meeting. Students register for these courses by first finding a mentor and then submitting the paper registration form (available on the second floor of Echlin).

For more information about the undergraduate biomedical sciences program, please contact the chair of the Department of Biomedical Sciences: Thomas Martin (Thomas.Martin@qu.edu) 203-582-3368.

Minor in Biomedical Sciences

Program Contact: Thomas Martin (Thomas.Martin@qu.edu) 203-582-3368

The Department of Biomedical Sciences offers a minor in Biomedical Sciences, which provides students with a fundamental knowledge of the theories, principles and advances in these basic sciences. Completing this area of concentration may help students qualify for employment in the pharmaceutical and biotechnology industries; the medical diagnostics industry; university-based biomedical research; and city, state and federal health/research laboratories or to continue their education in graduate/professional school. This concentration helps students develop critical thinking skills and understand and utilize modern research laboratory technologies.

Biomedical Sciences Minor Curriculum

The BMS minor consists of a minimum of 18 credits, all with a grade of "C" or better. At least two courses must be lab-based. No more than two classes may be transferred in from other institutions. The same course cannot count toward both a minor in Microbiology and Immunology and a minor in Biomedical Sciences.

Graduate courses may count for the BMS minor with permission from the department chair.

BMS 370 & 370L | General Microbiology and General Microbiology Lab | 4

**Minor in Microbiology and Immunology**

Program Contact: Thomas Martin (Thomas.Martin@qu.edu) 203-582-3368

The Department of Biomedical Sciences offers a minor in microbiology and immunology, which provides students with a fundamental knowledge of the theories, principles and research techniques in this exciting and rapidly evolving field. The program is committed to helping students develop the ability to ask significant scientific questions and then utilize critical thinking skills and modern research laboratory technology to solve these problems successfully.

**Microbiology and Immunology Minor Curriculum**

The Microbiology and Immunology Minor consists of a minimum of 19 credits, all with a grade of “C” or better. Students are required to complete BMS 370 General Microbiology and one of the following Immunology Based courses listed below. They also are required to take an additional 11-12 credits of elective courses. Students may only receive credit for BMS 375 or BMS 522. Students may only receive credit for BMS 378 or BMS 525 or HSC 378.

**Code** | **Title** | **Credits**
--- | --- | ---
BMS 375 & 375L | Immunology and Immunology Lab | 4
BMS 378 Vaccines and Vaccine-Preventable Diseases & 522L and Immunology Lab | 3-4
BMS 375 Immunology & 522L and Immunology Lab | 4
HSC 375 Immunology | 4
HSC 378 Vaccines and Vaccine-Preventable Diseases | 4

**Electives (select at least three of the following):** 11-12

BIO 328 Human Clinical Parasitology & 328L and Human Clinical Parasitology Lab | 3-4
BIO 346 Cell Physiology & 346L and Cell Physiology Lab | 3-4
BIO 471 Molecular Genetics & 471 and Molecular Genetics | 3-4
BMS 319 Public Health: Epidemiology of Infectious Diseases | 3-4
BMS 372 Pathogenic Microbiology & 372L and Pathogenic Microbiology Lab | 3-4
BMS 373 Mycology & 373L and Mycology Lab | 3-4
BMS 375 Immunology & 375L and Immunology Lab | 3-4
BMS 378 Vaccines and Vaccine-Preventable Diseases | 3-4
BMS 470 Virology & 470L and Virology Lab | 3-4
BMS 472 Biotechnology (Laboratory Component) | 3-4
BMS 473 Infections of Leisure | 3-4
BMS 474 Power of Plagues | 3-4
BMS 475 Special Topics in Microbiology | 3-4
BMS 476 Environmental Microbiology | 3-4
BMS 481 Research Methods in Biomedical Sciences I | 3-4
BMS 482 Independent Study in Microbiology | 3-4
BMS 483 Independent Study in Microbiology | 3-4
HSC 375 Immunology | 3-4
HSC 378 Vaccines and Vaccine-Preventable Diseases | 3-4

**Graduate courses for the Microbiology and Immunology Minor (permission required):**

BMS 375 Immunology & 375L and Immunology Lab | 4

---

1 Take BMS 378 or BMS 525, not both.
2 Take BMS 470 or BMS 570, not both.
Online Health Science Studies—BS Completion Track

Program Contact: Christine G. Fitzgerald (Chris.Fitzgerald@quinnipiac.edu) 203-582-8688

This program is designed for health care professionals who already have an associate's degree in science (e.g., an AS in an imaging field or respiratory therapy) and would like to pursue a bachelor's degree (BS) in health science studies. Nontraditional, adult professionals who are looking to change careers and/or increase their opportunities in the growing health care industry as well as recent AS graduates who wish to continue their studies may complete this program part time via a distance education format through QU Online with a curriculum that builds on the individual's prior educational preparation.

For more information visit the Quinnipiac Online website (https://quonline.quinnipiac.edu/online-programs/online-undergraduate-programs-bs-in-health-science-studies).

1. Course offered only during the summer semester. These courses are required, unless similar courses are transferred from another institution.

Courses and curriculum requirements are subject to change.

Student Learning Outcomes

Upon completion of the Health Science Studies online BS completion program, students will demonstrate the following competencies:

1. **Scientific Knowledge**: Demonstrate proficiency in core scientific principles in the disciplines of biology, chemistry and physics.
2. **Interprofessional Communication**: Effectively and professionally share information across the medical professions via written and oral communication.
3. **Health Systems**: Develop an advanced knowledge of the US Healthcare system and effectively describe challenges/issues that affect it.
4. **Evidence Informed Practice**: Critically evaluate biomedical information and sources to confirm validity and reliability.
5. **Responsible Citizen**: Weigh the historical, social, moral and ethical implications of scientific practices and discoveries on medical care.
Admission

Admission requirements include an associate's degree from a regionally accredited college or university with a grade point average of at least 2.5; two letters of recommendation; transcripts from all post-secondary institutions attended; and a resume or curriculum vitae. Prerequisites for the program include 8 credits of human biology. Students requesting transfer of college-equivalent learning (i.e., hospital-based programs and/or professional certifications), should request information from the program director.

Application procedures are managed through Quinnipiac University Online (https://quonline.quinnipiac.edu/online-programs/online-undergraduate-programs/bs-in-health-science-studies).

Progression

To progress and remain in good standing, students must maintain a science GPA of 2.25 minimum.

Advanced Placement Credits

Students with an associate's degree may transfer 60 credits for this program. Students who have earned more than 60 credits may request a transcript evaluation that may result in additional credits transferred to the degree.

Advanced Core Credits

The advanced core courses developed by faculty in the College of Arts and Sciences, with the learning needs of health science adult students in mind, will enable part-time students to earn 20 credits from the University Curriculum.

The advanced core reflects the aims and goals of the traditional University Curriculum and the Essential Learning Outcomes while acknowledging the prior general education work completed at the associate's degree level. The advanced core, consisting of five 4-credit courses, are completed in seven-week blocks online and are designed to move students through in cohorts. Students can complete up to 8 credits during the fall and spring semesters and up to 7 credits in the summer. Students may start the program in the fall or spring.
DEPARTMENT OF DIAGNOSTIC IMAGING

The Department of Diagnostic Imaging at Quinnipiac University provides a quality and comprehensive education, through didactic, laboratory and clinical experiences, that prepares students for careers in diagnostic imaging and introduces them to the subspecialty areas.

We offer two bachelor of science degrees:

• BS in Diagnostic Medical Sonography, which prepares students for careers as ultrasound technologists
• BS in Radiologic Sciences, which prepares students for careers as radiologic technologists

Students who complete the BS program in Radiologic Sciences have the option to apply for advanced studies here at Quinnipiac University. Advanced study options within the Diagnostic Imaging Department include the two-year MHS Radiologist Assistant Program (p. 416) and the one-year MHS Advanced Medical Imaging and Leadership Program (p. 394).

• Bachelor of Science in Diagnostic Medical Sonography (p. 297)
• Bachelor of Science in Radiologic Sciences (p. 299)
• Master of Health Science—Radiologist Assistant (p. 416)
• Master of Health Science—Advanced Medical Imaging and Leadership (p. 394)

Accelerated Dual-Degree BS/MHS in Advanced Medical Imaging and Leadership (3+1)

Program Contact: Alicia Giaimo (alicia.giaimo@qu.edu) 203-582-3814 or Emily Amento (emily.amento@qu.edu) 203-582-3674

The Accelerated Dual-Degree program consists of two distinct degrees: the Bachelor of Science in Radiologic Sciences and the Master of Health Science in Advanced Medical Imaging and Leadership.

The Bachelor of Science in Radiologic Sciences is a three-year accelerated degree. The mission of the Radiologic Sciences program at Quinnipiac University is to develop students’ technical and interpersonal communication skills through a logical, organized and rigorous sequence of didactic, laboratory and clinical experiences. The program offers multiple clinical assignments to provide maximum exposure to diversified radiographic procedures and imaging protocols. In addition, the program prepares graduates competent in the art and science of radiography.

Graduates of the program will meet the needs of the community as efficient and highly qualified professionals. The program prepares students, upon successful completion of all didactic and clinical work, to move on to advanced study in the Advanced Medical Imaging and Leadership program.

The Advanced Medical Imaging and Leadership program is an interprofessional program, serving as a collaboration between the Department of Diagnostic Imaging within the School of Health Sciences and the Department of Healthcare Management and Organization Leadership within the School of Business. The integrated curriculum features core business discipline courses, guided health management courses, and advanced imaging modalities in three distinct pathways: magnetic resonance imaging (MRI), computed tomography (CT), and women’s imaging (WI). Graduates of the MHS-AMIL program will be prepared to become advanced imaging professionals possessing the foundational education necessary for future entry-level leadership and managerial roles within their respective radiology health care organizations.

Accelerated Dual-Degree BS/MHS in Advanced Medical Imaging and Leadership Curriculum

The designated Advanced Medical Imaging (3+1) course curriculum is subject to modification as deemed necessary to maintain a high-quality educational experience. The Academic Standing and Progression Committee recommendations regarding student progression, discipline or dismissal will be considered on a case-by-case basis.

---

1. BIO 101 – BIO 102 are required courses for the Radiologic Sciences program and may be used to meet the university core sciences requirement.

2. Initial placement in the English and mathematics courses is determined by placement examination and an evaluation of high school units presented. The minimum mathematics requirement is MA 275 or its equivalent.

3. Associated lab is required for both Chemistry and Physics. CHE 110 or PHY 110 with lab are acceptable to fulfill the requirement. Students may take in the fall or spring of their first year.

4. If taking Chemistry or Physics in the spring, this UC elective should be taken in the fall semester.

### Student Learning Outcomes

Upon completion of the Bachelor of Science in Radiologic Sciences component of the AMIL (3+1) program, students will demonstrate the following competencies:

**Goal:** Students will be clinically competent.

1. **Clinically Knowledgeable:** Apply skills and knowledge from foundational courses.
2. **Procedurally Knowledgeable:** Demonstrate growth in procedural knowledge from all RS coursework.

**Goal:** Students will demonstrate effective communication skills.

1. **Effective Communication:** Execute interpersonal communication with patients.
2. **Oral Proficiency:** Demonstrate their ability to present clear and creative ideas related to a case study.
3. **Image Analysis:** Evaluate images for quality and diagnostic value.

**Goal:** Students will demonstrate critical thinking.

1. **Critical Decision Making:** Demonstrate their ability to perform non-routine and routine procedures.
2. **Image Analysis:** Evaluate images for quality and diagnostic value.

**Goal:** The program will continuously monitor and strive to sustain its effectiveness.

1. **Completion Rate:** Students who start the program will complete the program.
2. **Employer Satisfaction:** Employers will be satisfied with the education of the graduates of the program.
3. **Graduate Satisfaction:** Graduates will be satisfied with the education received from the program.
4. **Employment Rate:** Graduates of the program will become employed within six months of completion of the program.

Upon completion of the Advanced Medical Imaging and Leadership program, students will demonstrate the following competencies:

**Goal:** Students will be clinically competent.

1. **Clinically Knowledgeable:** Apply skills and knowledge from foundational courses.
2. **Procedurally Knowledgeable:** Demonstrate growth in procedural knowledge from all AMIL coursework.

**Goal:** The students will demonstrate effective communication skills.

1. **Effective Communication:** Execute interpersonal communication with patients.
2. **Oral Proficiency:** Demonstrate their ability to present clear and creative ideas in a formal manner.
Goal: Students will demonstrate critical thinking.
1. Critical Decision Making: Demonstrate their ability to navigate typical and atypical clinical scenarios while performing non-routine and routine procedures.

2. Image Analysis: Evaluate images for quality and diagnostic value.

Goal: Students will grow and develop as professionals.
1. Professionalism: Conduct themselves professionally and understand and apply ethical decision making.
2. Professional Research: Create a culminating capstone project.

Student Learning Outcomes for both components of the AMIL (3+1) program are designed to mirror one another. The AMIL (3+1) program represents a natural progression from undergraduate to graduate studies. Students in the graduate component of the program will expand upon the outcomes achieved in the BSRS component and will continue growing as Registered Radiologic Technologists and health care workers.

Quinnipiac University's Accelerated Dual-Degree Radiologic Science and Advanced Medical Imaging and Leadership (3+1) program provides prospective students with the opportunity to obtain both bachelor’s and master’s degrees as well as certification in two radiographic modalities within a four-year time frame, a rarity among health science programs. Obtaining a master’s degree in health science studies is a great benefit to students as the curriculum not only advances their knowledge within the radiologic field and specialty, but also delves into health policy, health administration, and prepares these students to take on leadership roles within health care departments.

Quinnipiac University’s Accelerated Dual-Degree BS/MHS in Advanced Medical Imaging and Leadership (3+1) program supports the mission statements of both Quinnipiac University and the School of Health Sciences and their commitment to excellence in education. The mission of the program is to develop each student’s technical, professional and interpersonal communication skills through a logical and organized sequence of didactic, laboratory and clinical experiences. The program offers multiple clinical assignments to provide maximum exposure to advanced imaging modalities and associated protocols. In addition, the program prepares skilled graduates competent in the art and science of radiography, fluoroscopy and interventional procedures. Graduates of the Advanced Medical Imaging & Leadership program meets the needs of the community for highly qualified professionals, and the program prepares students for career entry and advanced study.

The Accelerated Dual-Degree BS in Radiologic Sciences/MHS in Advanced Imaging and Leadership (3+1) program does not have a separate application process. Incoming freshman students admitted to the School of Health Sciences Radiologic Sciences BS who meet the dual-degree program criteria will be invited to enter the program. To be considered for this program, students must be ranked in the top 20 percent of their high school class, and must have a total SAT score (critical reading and math) of 1200 or higher, or an ACT composite score of 25 or higher.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshman are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first-quarter grades sent from their high school counselor as soon as they are available.

Accreditation information for the BSRS component of the AMIL 3+1 program included below per the JRCERT accreditation guidelines.

The Radiologic Sciences program at Quinnipiac University is accredited by:
The Joint Review Committee on Education in Radiologic Technology (jrcert.org (http://www.jrcert.org))
20 N. Wacker Drive, Suite 2850
Chicago, IL 60606-3182
Phone: 312-704-5300

The program received a five-year accreditation in 2014. The re-accreditation process will commence in Spring 2019 with the submission of a self-study report to the JRCERT.

Outcomes and Statistics
2018 Student Outcomes
• ARRT Credentialing Examination first-time pass rate – 92% (23 out of 25)
• Job placement rate – 100% (12 out of 12)
• Program completion – 73% (24 out of 33)

Five-Year Statistics 2014–2018
• Five-year average ARRT Credentialing Examination First-Time Pass Rate – 98% (135 out of 138 students passed on first attempt)
• The five-year job placement rate from May 2014 to May 2018 is 93% (65 of 70 students actively seeking employment obtained jobs). Prior to May 2015, this was based on those seeking employment after earning a certificate and did not include those students continuing at the university to complete their bachelor’s degree as full-time students.
  • The ARRT defines “not actively seeking employment” as a graduate who fails to communicate with the program regarding employment status after multiple attempts, or a graduate who is unwilling to seek employment that requires relocation, or a graduate who is unwilling to accept employment due to salary or hours, or a graduate on active military duty or a graduate who is continuing his or her education.
  • Due to an update to the ARRT eligibility requirements effective January 2015, students must earn their degree to be board eligible. Upon graduation, students will have met the bachelor’s degree requirements and may actively seek employment. This statistic does not include those students pursuing graduate degrees as full-time students.

Additional Program Costs
As a clinical education program, the Radiologic Sciences major requires some expenses that go beyond standard university tuition and fees:

1. Clinical Education Travel (gas, parking, public transportation) – variable
   Students will have clinical rotation experiences that take them off campus. For these rotations, students will typically be traveling two to three times per week. Clinic begins in the sophomore year and students are responsible for providing their own transportation. Costs

296  Accelerated Dual-Degree BS/MHS in Advanced Medical Imaging and Leadership (3+1)
2. **Immunizations** – Consistent with the School of Health Sciences policy, all students must have a full battery of immunizations and in some cases titer affirmation of immunity for common diseases including but not limited to: MMR, HepB, varicella, polio, TDAP, TB and influenza. These must be documented prior to the start of clinical experiences during the sophomore year and must be maintained through the undergraduate education. The students are made aware of the requirements during the freshman year to allow ample time to complete. **Costs – approximately $60**

3. **Background Check** – All students must undergo a background check prior to the start of clinical observations in the sophomore year. This check must be updated yearly. **Costs – approximately $38 per check.**

4. **Drug Screening** – All students must undergo a drug screening prior to the start of clinical observations in the sophomore year. The check must be updated yearly. **Costs – approximately $30 per year**

5. **Liability Insurance** – All students have liability insurance coverage through the university, free of charge, while performing required clinical activity. Students may choose to purchase additional coverage at their own expense.

6. **My Record Tracker** – Consistent with School of Health Sciences policy, students must sign up for and maintain an online account with MRT. This program tracks all student health and safety records, provides documentation to prospective clinical sites, and provides notification of impending expiration dates. **Cost – approximately $30 per year**

Please note – All fees are subject to change.

**Bachelor of Science in Diagnostic Medical Sonography**

Program Contact: Marisa Hale  
(Marisa.Testa@quinnipiac.edu) 203-582-8264

Diagnostic medical sonographers play a critical role in the health care team. The sonographer provides patient services using high-frequency sound waves that produce images of internal structures. Working under the supervision of a physician responsible for the use and interpretation of ultrasound procedures, the sonographer helps gather sonographic data to diagnose a variety of conditions and diseases, as well as monitor fetal development.

To prepare students for careers in sonography and certification examinations in the subspecialty areas, Quinnipiac offers a BS in Diagnostic Medical Sonography. The Diagnostic Medical Sonography program offers didactic, laboratory and clinical training in multiple subspecialties of sonography including abdominal and small parts, breast, vascular technology, OB/GYN and musculoskeletal imaging for the student who is motivated to become a multi-credentialed member of this profession.

The first two years of the bachelor’s degree program consists of University Curriculum studies in addition to an introductory course into the field of diagnostic medical sonography. The professional component of the program begins in the third year of study. Each student spends two full years concentrating on didactic sonography classes, laboratory sessions on campus and clinical education at multiple clinical education centers. The curriculum is structured so students can apply the knowledge and skills developed in the classroom and laboratory to the care of patients in the clinical setting. Throughout the professional component of the program, didactic and clinical courses are taken simultaneously to provide the opportunity for immediate application and reinforcement.

Upon completion of their Bachelor of Science in Diagnostic Medical Sonography, students are eligible to apply for the American Registry of Diagnostic Medical Sonography certification. Graduates may take the Sonography Physics and Instrumentation examination in addition to the following ARDMS specialty examinations: abdomen and small parts, breast, vascular technology and obstetrics/gynecology.

**Diagnostic Medical Sonography Curriculum**

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession. The Academic Standing and Progression Committee recommendations regarding student progression, discipline or dismissal will be considered on a case-by-case basis.

Credits: 15

Total Credits: 121

1. BIO 101–102 and PHY 101 are required courses for the Diagnostic Medical Sonography program and may be used to meet the university core science requirements.
2. Initial placement in the English and mathematics courses is determined by placement examination and an evaluation of high school units presented. The minimum mathematics requirement is MA 275 or its equivalent.
3. Associated lab is required for Physics. PHY 110 with lab is acceptable to fulfill the requirement. Students may take the lab in the fall or spring of their first year.

All diagnostic medical sonography course requirements must be completed in the appropriate semester as indicated above. All diagnostic medical sonography courses, beginning with DMS 101 and DMS 101L, are reserved for DMS majors only.

Student Learning Outcomes

Upon completion of the Diagnostic Medical Sonography program, students will demonstrate the following competencies:

Goal: The students will be clinically competent.

1. Clinically Knowledgeable: Apply foundational skills and knowledge from didactic and laboratory courses to clinical practice.
2. Procedurally Knowledgeable: Demonstrate procedural knowledge from all DMS coursework.

Goal: The students will demonstrate effective communication skills.

1. Effective Communication: Execute effective communication with patients.
2. Oral Proficiency: Demonstrate the ability to present clear and creative ideas related to a case study.

Goal: The students will demonstrate critical thinking.

1. Critical Decision Making: Demonstrate the ability to obtain, review and integrate patient history, physical examination and sonographic findings to provide a physician with an oral or written interpretation of technical findings.
2. Image Analysis: Evaluate images for quality and diagnostic value.

Goal: The students will grow as professionals.

1. Professional Ethics: Understand and apply ethical decision making.
2. Professional Behaviors: Conduct themselves professionally.
3. Professional Research: Create a culminating capstone research project.

Mission Statement

The mission of the Diagnostic Medical Sonography program at Quinnipiac University is to provide a quality and comprehensive education, through didactic, laboratory and clinical experiences, that will prepare students to become multi-credentialed sonographers. The program offers multiple clinical assignments to provide maximum exposure to diversified sonographic procedures.

The program prepares students to be competent in the art and science of diagnostic medical sonography, both for career entry and advanced study. Graduates of the program are prepared to meet the needs of the community for highly qualified professionals.

Admission to the Program

Candidates applying for admission to the Diagnostic Medical Sonography program are required to have at least three years of high school college preparatory mathematics and one year of biology. One year of anatomy and physiology and one year of general physics is highly recommended. In addition, the scores of the SAT or the ACT are an important consideration. Related health care experience is highly desirable. Prospective candidates also must satisfy general Quinnipiac University Admission Requirements (p. 17).
Program Policies

In addition to the general policies of Quinnipiac University, such as due process and academic honesty, the following apply to students enrolled in the Diagnostic Medical Sonography program:

Progression in the Program

The Diagnostic Medical Sonography program has both GPA and final course grade requirements.

A cumulative university GPA of 2.85 and programmatic GPA of 3.0 must be maintained each semester. The expectation is that all DMS courses be completed with a final course grade of B or better. Final course grades of D or F in any DMS course are unacceptable. Programmatic GPA calculation and final course grade requirements begin with DMS 100 and include all DMS coursework thereafter.

Any student who does not maintain GPA requirements or earns a grade of a B- or lower in any DMS course will be referred to the Diagnostic Imaging Department’s Academic Standing and Progress Committee (ASPC) for review. Students who fail to meet the minimum cumulative university GPA requirement of 2.85 and/or the minimum programmatic GPA requirement of 3.0 will be subject to sanctions up to and including program dismissal. Students who earn a final course grade of D or F for any DMS course will be subject to program dismissal.

Technical Standards

The Diagnostic Medical Sonography program is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals. The technical standards set forth by the Diagnostic Medical Sonography program establish the essential qualities considered necessary for admitted students to this program to achieve the knowledge, skills and competencies of an entry-level sonographer.

All students admitted to the program must meet the established abilities and expectations. In the event a student is unable to fulfill these technical standards, with or without reasonable accommodation, the student will not be admitted or may be dismissed from the program.

Students are required to verify they understand and meet the technical standards or that they believe that, with certain reasonable accommodations, the technical standards can be met. Verification of understanding includes the student reading, signing and returning a copy of the Technical Standards Agreement to the program director. A listing of the technical standards and an agreement form is located in the Diagnostic Medical Sonography student handbook as well as on the program's web page (https://www.qu.edu/schools/health-sciences/programs/bs-diagnostic-medical-sonography.html).

Transportation

Multiple clinical education centers are used throughout the professional component of the program. Students are responsible for their own transportation to and from these sites.

Summer Study

All students are required to perform one clinical assignment during the summer semester, third year (DMS 270). This clinical practicum is performed during summer sessions I and II and may be performed only in a clinical education site currently affiliated with Quinnipiac's Diagnostic Medical Sonography program.

Transfer Students from within Quinnipiac

The admission of internal transfer students to the Diagnostic Medical Sonography major is on a space-available, competitive basis only and will be reviewed on a yearly basis every fall. These students must meet the course requirements, performance standards and technical standards of the program.

Internal transfers who wish to transfer to the Diagnostic Medical Sonography program must meet the following criteria:

1. A programmatic GPA of 3.0, starting with RS 100/DMS 100
2. A cumulative GPA of 2.85
3. Successful completion of RS 100/DMS 100
4. Successful completion of BIO 101 and BIO 101L

Internal transfer students will be selected competitively, based on the highest programmatic GPA, cumulative GPA and BIO grades respectively. Completion of the course RS 100/DMS 100, does not guarantee any internal transfer student a spot in the Diagnostic Medical Sonography program. All applicants must submit a change of major request form during the fall advisement period. Change of major forms will be held for approval by the Diagnostic Imaging department chair until the final grades are posted.

Transfer Students from Other Colleges and Universities

The admission of external transfer students to the Diagnostic Medical Sonography major is on a space-available, competitive basis only and will be reviewed on a yearly basis at the end of every fall semester. These students must meet the course requirements, performance standards and technical standards of the program. The program director will notify Admissions of available spots at the end of the fall semester after final grades have posted and internal transfers have been accepted. External transfer students will have the ability to take RS 100/DMS 100 online over the J-Term.

External transfers must meet the following criteria for acceptance into the major and progression into DMS 101/DMS 101L in the spring:

1. A cumulative GPA of 2.85
2. Successful completion of RS 100/DMS 100 by the end of J-term
3. Successful completion of BIO 101 and BIO 101L

All diagnostic medical sonography courses must be taken and completed at Quinnipiac University. Diagnostic medical sonography courses from the student’s previous institution will not be considered for replacement for any of the diagnostic medical sonography courses offered at Quinnipiac.

Bachelor of Science in Radiologic Sciences

Program Contact: Alicia Giaimo (alicia.giaimo@qu.edu) 203-582-3814

Radiographers are essential members of the health care team. Their knowledge of radiation protection, physics and biology, as well as technical procedures, allows them to deliver the safest and highest quality patient care through the use of multiple imaging modalities. In the evolving world of medicine, high technology imaging has become multifaceted, both in modalities and operationally.
To prepare students for careers in radiography, Quinnipiac University’s Department of Diagnostic Imaging offers a BS in Radiologic Sciences. The program offers didactic, laboratory and clinical training in diverse aspects of radiography including patient care, radiation safety, image production and procedures for the student who is motivated to become a member of the imaging profession. Students complete the program in a three-year accelerated format.

The first year of the bachelor’s degree program consists of University Curriculum studies. The component of the program accredited by the Joint Review Committee on Education in Radiologic Technology begins in the second year of study. During the second and third years, the students concentrate on didactic radiography classes and laboratory sessions on campus and clinical education at multiple clinical education centers. The curriculum is structured so students can apply the knowledge and skills developed in the classroom and laboratory to the care of patients in the clinical setting. Beginning in the spring semester of the sophomore year and continuing throughout the program, didactic and clinical courses are taken simultaneously to provide the opportunity for immediate application and reinforcement.

At the end of the third year, students are eligible for graduation with a bachelor’s degree in Radiologic Sciences, and are board-eligible for the American Registry of Radiologic Technologists (ARRT) certification examination. Students would be eligible to apply for one of two advanced studies options here at Quinnipiac University. Options within the Diagnostic Imaging Department include the two-year MHS Radiologist Assistant (p. 416) program and the one-year MHS Advanced Medical Imaging and Leadership program (p. 394).

BS in Radiologic Sciences Curriculum

The designated Radiologic Sciences course curriculum is subject to modification as deemed necessary to maintain a high-quality educational experience. The Academic Standing and Progression Committee recommendations regarding student progression, discipline or dismissal will be considered on a case-by-case basis.

RS 290 Advanced Radiographic Procedures IV 4
& 290L and Laboratory Practicum
RS 499 Capstone (DMS 499) 3
UC Elective 3

Total Credits 120

1. BIO 101 – BIO 102 are required courses for the Radiologic Sciences program and may be used to meet the university core sciences requirement.
2. Initial placement in the English and mathematics courses is determined by placement examination and an evaluation of high school units presented. The minimum mathematics requirement is MA 275 or its equivalent.
3. Associated lab is required for both Chemistry and Physics. CHE 110 or PHY 110 with lab are acceptable to fulfill the requirement. Students may take the lab in the fall or spring of their first year.
4. If taking Chemistry or Physics in the spring, this UC elective should be taken in the fall semester.

All radiologic sciences course requirements must be completed in the appropriate semester as indicated above.

Student Learning Outcomes

Upon completion of the BS in Radiologic Sciences program, students will demonstrate the following competencies:

Goal: The students will be clinically competent.
1. Clinically Knowledgeable: Apply skills and knowledge from foundational courses.
2. Procedurally Knowledgeable: Demonstrate growth in procedural knowledge from all Radiologic Sciences coursework.

Goal: The students will demonstrate effective communication skills.
1. Effective Communication: Execute interpersonal communication with patients.
2. Oral Proficiency: Demonstrate their ability to present clear and creative ideas related to a case study.

Goal: The students will demonstrate critical thinking.
1. Critical Decision Making: Demonstrate their ability to perform non-routine and routine procedures.
2. Image Analysis: Evaluate images for quality and diagnostic value.

Goal: The students will grow and develop as highly qualified professionals.
1. Professional Ethics: Understand and apply ethical decision making.
2. Professional Behaviors: Conduct themselves professionally.
3. Professional Research: Create a culminating capstone project.

Goal: The program will continuously monitor and strive to sustain its effectiveness.
1. Completion Rate: Students who start the program will complete the program.
2. Employer Satisfaction: Employers will be satisfied with the education of the graduates of the program.
3. Graduate Satisfaction: Graduates will be satisfied with the education received from the program.
4. Employment Rate: Graduates of the program will become employed within six months of completion of the program.

Mission Statement

The Quinnipiac University Radiologic Sciences program supports the mission statements of both Quinnipiac University and the School of Health Sciences and their commitment to excellence in education. The mission of the Radiologic Sciences program at Quinnipiac University is to develop students’ technical and interpersonal communication skills through a logical sequence of didactic, laboratory and clinical experiences. The program offers multiple clinical assignments to provide maximum exposure to diversified radiographic procedures and imaging protocols. In addition, the program prepares graduates to be competent in the art and science of radiography. Graduates of the Radiologic Sciences program will meet the needs of the community as competent and highly qualified professionals. The program will prepare students for career entry and the ability to pursue advanced study.

Candidates applying for admission to the Radiologic Sciences program are required to have at least three years of high school college preparatory mathematics and one year of biology. One year of anatomy and physiology and one year of general chemistry or physics is recommended. In addition, the scores of the SAT or the ACT are an important consideration. Related health care experience is highly desirable. Prospective candidates also must satisfy general Quinnipiac University Admission Requirements (p. 17).

Policies

In addition to the general policies of Quinnipiac University, such as due process and academic honesty, the following apply to students enrolled in the Radiologic Sciences program.

Progression in the Program

The Radiologic Sciences Program has both GPA and final course grade requirements.

A cumulative GPA of 2.5 and a programmatic GPA of 3.0 must be maintained each semester. The expectation is that all RS courses be completed with a final course grade of B or better. Final course grades of D or F in an RS course are unacceptable. Programmatic GPA calculation and final course grade requirements begin with RS 100 and include all RS coursework thereafter.

Any student who does not maintain GPA requirements or earns a grade of a B- or lower in any RS course will be referred to the Diagnostic Imaging Department’s Academic Progression and Retention Committee (APRC) for review. Students who fail to meet the minimum cumulative university GPA requirement of 2.5 and/or the minimum programmatic GPA requirement of 3.0 will be subject to sanctions up to and including program dismissal. Students who earn a final course grade of D or F for any RS course will be subject to program dismissal.

Transportation

Multiple clinical education centers are used throughout the professional component of the program. Students are responsible for their own transportation to and from these sites.
Summer Study
All students are required to perform one clinical assignment during the summer semester, second year (RS 253). This clinical practicum is performed during summer sessions I and II and may be performed only at a clinical affiliation currently approved by the Joint Review Committee on Education in Radiologic Technology (JRCERT) for the program.

Technical Standards
The Radiologic Sciences program is a rigorous program that places specific demands on its students. As stated in the mission of the program, graduates of the program will meet the needs of the community as efficient and highly qualified professionals.

The technical qualifications set forth by the American Registry of Radiologic Technologists combined with the program’s views provides a guide to the essential qualities necessary to pursue a career in radiologic sciences as well as meet the expectations of the programs accrediting body (Joint Review Committee on Education of Radiologic Technologists: JRCERT).

Students in the program will be required to verify their understanding and compliance with the technical standards, or their belief that with reasonable accommodations these standards can be met, through reading, signing and returning the form to the program director.

Transfer Admissions
Internal and external transfer candidates are evaluated on a space-available, competitive basis.

The Radiologic Sciences program at Quinnipiac University is accredited by.

The Joint Review Committee on Education in Radiologic Technology (jrcert.org (http://www.jrcert.org))
20 N. Wacker Drive, Suite 2850
Chicago, IL 60606-3182
Phone: 312-704-5300

The program received a five-year accreditation in 2014. The re-accreditation process will commence in Spring 2019 with the submission of a self-study report to the JRCERT.

Outcomes and Statistics
2018 Student Outcomes
• ARRT Credentialing Examination first-time pass rate – 92% (23 out of 25)
• Job placement rate – 100% (12 out of 12)
• Program completion – 73% (24 out of 33)

Five-Year Statistics 2014–2018
• Five-year average ARRT Credentialing Examination First-Time Pass Rate – 98% (135 out of 138 students passed on first attempt)
• The five-year job placement rate from May 2014 to May 2018 is 93% (65 of 70 students actively seeking employment obtained jobs). Prior to May 2015, this was based on those seeking employment after earning a certificate and did not include those students continuing at the university to complete their bachelor's degree as full-time students.
• The ARRT defines “not actively seeking employment” as a graduate who fails to communicate with the program regarding employment status after multiple attempts, or a graduate who is unwilling to seek employment that requires relocation, or a graduate who is unwilling to accept employment due to salary or hours, or a graduate on active military duty or a graduate who is continuing his or her education.
• Due to an update to the ARRT eligibility requirements effective January 2015, students must earn their degree to be board eligible. Upon graduation, students will have met the bachelor degree requirements and may actively seek employment. This statistic does not include those students pursuing graduate degrees as full-time students.

Additional program costs
As a clinical education program, the Radiologic Science major requires some expenses that go beyond standard university tuition and fees:

1. Clinical Education Travel (gas, parking, public transportation) – Students will have clinical rotation experiences that take him/her off campus. For these rotations, the student will typically be traveling two to three times per week. Clinic begins in the sophomore year and students are responsible for providing their own transportation. Cost – variable

2. Immunizations – Consistent with the School of Health Sciences policy, all students must have a full battery of immunizations and in some cases titer affirmation of immunity for common diseases including but not limited to: MMR, HepB, varicella, polio, TDAP, TB and influenza. These must be documented prior to the start of clinical experiences during the sophomore year and must be maintained through the undergraduate education. The students are made aware of the requirements during the freshman year to allow ample time to complete. Cost – variable

3. Background Check – All students must undergo a background check prior to the start of clinical observations in the sophomore year. Cost – approximately $60

4. Drug Screening – All students must undergo a drug screening prior to the start of the main component of the program in the sophomore year. Cost – approximately $38

5. Liability Insurance – All students have liability insurance coverage through the university, free of charge, while performing required clinical activity. Students may choose to purchase additional coverage at their own expense.

6. My Record Tracker – Consistent with School of Health Sciences Policy, students must sign up for and maintain an online account with MRT. This program tracks all student health and safety records, provides documentation to prospective clinical sites, and provides notification of impending expiration dates. Cost – approximately $30 per year

Please note – All fees are subject to change.
DEPARTMENT OF
OCCUPATIONAL THERAPY

Occupational therapy is a client-centered health profession concerned with promoting health and well-being and enabling participation in everyday life activities. Occupational therapists work with individuals, groups, communities and populations to enhance their capacity and ability to engage in the occupations they want to, need to, or are expected to do. Occupational therapists also may work collaboratively with clients to modify tasks, activities and/or environments to better support their engagement and participation [adapted from World Federation of Occupational Therapists, 2012].

Mission and Vision

The mission of the Department of Occupational Therapy at Quinnipiac University is to provide high-quality education to develop occupational therapy practitioner-scholars at both entry and advanced practice levels, who possess broad-based knowledge, and can influence meaningful change in the health and functioning of individuals, populations and communities.

We strive to be recognized for:

• Our programs that are models for innovative occupational therapy practice;
• Our faculty who are role models in practice, service leadership, teaching and clinical scholarship; and
• Our graduates who are forward thinkers, ethical, compassionate and competent occupational therapists.

We do so by striving for excellence in educating students to meet and exceed our program learning outcomes.

• Dual-Degree BS in Health Science Studies/Master of Science in Occupational Therapy (BS/MOT) (p. 303) (Freshman Entry)
• Entry-Level Professional Doctor of Occupational Therapy (OTD) (p. 402)
• Online Post-Professional Occupational Therapy Doctorate (p. 409) (OTD)
• Certificate of Advanced Graduate Studies in Occupational Therapy (p. 408) (Post-Professional)

Dual-Degree BS in Health Science Studies/Master of Occupational Therapy

Program Contact: Sal Bondoc (salvador.bondoc@qu.edu) 203-582-3727

Our five-and-a-half-year, entry-level, Dual-Degree Bachelor of Science/Master of Occupational Therapy program prepares students with a breadth and depth of knowledge and skills to practice autonomously or collaboratively at entry-level, within various health care, educational and social systems. Our curriculum consists of three overlapping tiers: University Curriculum, professional component and fieldwork. Upon successful completion of the fourth year, the BS in Health Science Studies is awarded.

• Tier 1: University Curriculum. During the first two years, students take most of their University Curriculum (UC) courses. Concurrently, students take prerequisite science courses for the OT program (PHY 101+ PHY 101L, BIO 211 + BIO 211L, BIO 212 + BIO 212L, and MA 275) as well as OT foundational courses (OT 101, OT 201, OT 214, and OT 250). Prior to entry in the junior year, students must satisfy the following requirements: acquire a grade of B- or better in 100- and 200-level OT courses; satisfactorily complete a minimum of 40 credits of the University Curriculum; achieve a cumulative grade point average (GPA) of 3.0 or better; and achieve a science prerequisite GPA of 2.75 or better.

It is highly recommended that students take all prerequisite science courses at Quinnipiac University. If a student is granted permission to take a science course at another four-year institution, the science grade will be factored into the required science GPA of 2.75. Failure to meet the cumulative GPA of 3.0 with Quinnipiac University courses only or the science prerequisite GPA of 2.75 by the end of the sophomore year will result in dismissal from the program.

• Tier 2: Professional Component. The professional component of the program consists of all occupational therapy courses from the junior, senior and graduate years. Upon entry into the professional component, students must maintain a GPA of 3.0 each semester in the occupational therapy courses. To progress through the program, students must meet the minimum GPA of 3.0 and must earn a grade of C+ or above in all didactic courses and B+ or above in all fieldwork level I courses.

• Tier 3: Fieldwork Component. All fieldwork level II experiences (OT 501F, OT 580 and/or OT 581) must be completed with a “P” (pass) to graduate.

Fieldwork Requirements

All students are responsible for transportation to all fieldwork experiences. All students are required to maintain a viable health insurance, malpractice insurance, CPR certification and current immunization record according to their fieldwork placements. A fieldwork site may have additional requirements as part of its affiliation agreement such as background checks and site-specific mandatory in-services. Failure to comply with fieldwork requirements may negatively impact a student’s ability to participate in fieldwork. The department also requires current membership with the American Occupational Therapy Association.

Accreditation

The Quinnipiac Dual-Degree BS/MOT program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA). The ACOTE address is:

c/o Accreditation Department
American Occupational Therapy Association
4720 Montgomery Lane, Ste. 200
Bethesda, MD 20814-3449
Phone: 301-652-6611 (ext. 2914)
Fax: 301-652-1417
Email: accred@aota.org
Website: acoteonline.org

Program Sponsorship

Quinnipiac University assumes primary responsibility for appointment of faculty, admission of students, and curriculum planning for the Dual-Degree BS/MOT program. This responsibility includes the delivery of course content, satisfactory completion of the educational program, and granting of the degree. The university also is responsible for the coordination of classroom teaching and supervised fieldwork practice.
and for providing assurance that the practice activities assigned to students in a fieldwork setting are appropriate to the program.

Quinnipiac University complies with the administrative requirements for maintaining accreditation of the Dual-Degree BS/MOT program.

**Dual-Degree BS/MOT Curriculum**

The curriculum for the professional courses in the program are reviewed regularly and are subject to modification in both content and credit as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

2 Twelve weeks of full-time supervised experience. All FWII policies must be followed according to the OT program manual available from the chairperson.

### Progression, Retention and Graduation Requirements

All policies and procedures regarding progression, retention and graduation are found in the OT Student Manual. These policies and procedures are routinely reviewed with the students at the beginning of each semester and/or during advising.

### University Curriculum and OT Prerequisite Phase

Prior to entry in the junior year, students must satisfy the following requirements:

- Complete a minimum of 40 credits of the University Curriculum, all OT prerequisites and all OT foundational courses with a minimum cumulative grade point average of 3.0;
- All foundational OT courses must be at a grade of B- or better; and
- Achieve a minimum science GPA of 2.75. Courses that are considered in the science GPA are BIO 101 + BIO 101L, BIO 102 + BIO 102L and all the OT prerequisites

### Professional Component and Fieldwork Phases

To progress through the program, students must meet the minimum semester GPA of 3.0 and must earn a grade of C+ or above in all didactic courses and B+ or above in all fieldwork level I courses. In addition, all students must acquire a “Pass” in their fieldwork level II. Failing to meet the aforementioned requirements will result in a referral to the Occupational Therapy Progression and Retention Committee (PRC). The outcome of such referral may be: program probation with course remediation; a program probation with a course repeat (and repay); or a program dismissal.

All courses must be taken sequentially as indicated in the program of study. Students may request in writing to the department chairperson, any deviations from the course sequence, waivers from occupational therapy courses, and/or transfer credits from other occupational therapy programs. All requests must be approved by the Occupational Therapy PRC and the department chairperson.

Successful completion of all didactic and fieldwork requirements is necessary for graduation with the degree of Master of Occupational Therapy.

### Student Learning Outcomes

Upon completion of the Dual-Degree Bachelor of Science/Master of Occupational Therapy (BS/MOT) program, students will demonstrate the following competencies:

1. **Advocate** for the distinct value of the occupational therapy (OT).
2. **Apply** effective clinical and professional reasoning in the delivery of the OT Process.
3. **Identify and Define** the OT role/s in various settings and client populations.
4. **Use** evidence to inform practice and support the delivery of OT services.
5. **Demonstrate** an emerging OT professional identity that includes habits of lifelong learning competency.
6. **Articulate** the integral relationship among occupation, health and participation.

**Mission Statement**

The Department of Occupational Therapy aims to provide high-quality education to develop occupational therapy practitioner-scholars, who possess broad-based knowledge and can influence meaningful change in the health and functioning of individuals, populations and communities.

**Philosophy**

The OT Department views the entry-level educational experience with a developmental-humanistic lens. This approach acknowledges that each student has unique experiences and possesses varying abilities, which are brought to the university environment and further developed through liberal and disciplinary inquiry as well as, co-curricular, community-based/ experiential learning and professional experiences.

The department conceptualizes “development” not merely as a sequential ontological event but rather as a complex iterative, heterarchical and hierarchical sets of processes that are situated in various contexts. This developmental curriculum concept is reflected below using Fink's Taxonomy of Significant Learning:

- Foundational Knowledge (and Caring and Learning to Learn) – refers to understanding, remembering information and ideas; developing interests and professional values; and developing the skills to learn or self-direct one's learning
- Application and Integration (and Learning about Oneself/Others) – refers to development of practical, creative and critical thinking skills by connecting ideas/concepts, events and realms of life; as well as developing a depth of awareness of oneself and of others
- Application and Synthesis – refers to continued refinement of practical, creative and critical thinking skills through understanding of systems and embracing one's agency

Through advising, mentorship and curricular experiences, the faculty applies a **humanistic approach** to support students in their personal and professional growth toward becoming an entry-level occupational therapist. Students are also taught the value and potential of every human being and their capacity to self-determine.

**Admission to the Program**

The high school student applying for admission to the Occupational Therapy program should present four years of mathematics and four years of science. The general Quinnipiac University requirements for admissions must be met. All students applying for admission are strongly encouraged to have 10-20 hours of observation in occupational therapy. The department is prepared to provide reasonable accommodations for students who have special needs or challenges.

**Transfer Students**

The Occupational Therapy Department has procedures in place for transfer admission into the Dual-Degree Bachelor of Science/Master of Occupational Therapy program. Information may be accessed upon request from Professor Roseanna Tufano (roseanna.tufano@qu.edu).

Given the popularity of the program, acceptance into the BS/MOT program is on a space-available basis. When the number of qualified applicants exceed the number of available slots, prospective students will be ranked. The highest-ranking applicants will be given priority admission into the program.

The Quinnipiac Dual-Degree BS/MOT program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA). The ACOTE address is:

c/o Accreditation Department
American Occupational Therapy Association
4720 Montgomery Lane, Ste. 200
Bethesda, MD 20814-3449
Phone: 301-652-6611 (ext. 2914)
Fax: 301-652-1417
Email: accred@aota.org
Website: acoteonline.org

**Accreditation**

The combined Bachelor of Science/Master of Occupational Therapy program at Quinnipiac University is an entry-level master's degree program accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449. ACOTE’s telephone number c/o AOTA is 301-652-AOTA, and its web address is acoteonline.org (http://www.acoteonline.org). Graduates of the program are eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an occupational therapist, registered (OTR). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT certification examination. Program outcomes in the NBCOT exam **may be accessed through** secure.nbcot.org/data/schoolstats.aspx ([link](https://na01.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsecure.nbcot.org%2FDATA%2FSCHOOLSTATS.ASPX&data=02%7C01%7CTracy.VanOss%40quinnipiac.edu%7C7C9243de83bc8b4332af8708d68877c89d%7C0940985869fb4de9987990db22b52eaf%7C0%7C0%7C636846444537677272757&data=9nnml4ynWpR%2FXu99rzzJBDB6Hu3hrDpCh4z7LbdexfTA%3D&reserved=0)). Note that a felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.

Quinnipiac University complies with the administrative requirements for maintaining accreditation of the Dual-Degree BS/MOT program.
**DEPARTMENT OF PHYSICAL THERAPY**

Program Contact: Katherine Harris (katherine.harris@qu.edu) 203-582-8511

The Department of Physical Therapy at Quinnipiac is a member of the Early Assurance Consortium for physical therapy education. Qualified students are admitted as freshmen undergraduate students to one of the Dual-Degree BS in Health Science Studies/Doctor of Physical Therapy (p. 308) (3+3, 4+3) programs or Dual-Degree BS in Athletic Training/Doctor of Physical Therapy (p. 311) (4+3) program. Upon successful completion of the bachelor of science degree requirements and meeting specific departmental requirements, students are guaranteed admission to the graduate DPT program. The health science studies curriculum can be completed in either three or four years. The athletic training curriculum is completed in four years.

The Doctor of Physical Therapy (DPT) program at Quinnipiac prepares students to be outstanding clinicians equipped for contemporary practice through a three-year, 12-month graduate program. Students develop the essential skills of a 21st century health care professional by having access to expert academic and clinical faculty and the benefit of learning in state-of-the-art facilities. The program is an integrated curriculum of foundational knowledge and clinical training and is located in the Center for Medicine, Nursing and Health Sciences. Students learn the foundation of movement science through full body dissection in the Human Anatomy Lab and application in the Motion Analysis Laboratory. The learning environment for clinical skills, clinical decision-making, and professionalism is supported in classrooms, well-equipped laboratories, and progressive technology. Students can practice and are assessed on skills utilizing simulation, standardized patients, and clinical-readiness practicums. The program integrates frequent client-based opportunities throughout the curriculum in addition to three full-time clinical experiences completed at various domestic or international clinical sites. Although the goal of the program is to prepare entry-level physical therapists, faculty value establishing close mentoring relationships through in-depth research or innovative projects which allow students to grow intellectually and professionally.

DPT students at Quinnipiac University take advantage of a myriad of student opportunities, which include leadership or participant roles in the campus student-run pro-bono rehabilitation clinic, graduation with Distinction in Interprofessional Education through the extensive opportunities within the university’s Center for Interprofessional Healthcare Education, international delegations involved in Global Solidarity through a Fair-Trade Learning Model, sustainable local community service, attendance and presentation at professional conferences, a vibrant graduate council, as well as a variety university sponsored specialized camps.

The physical therapy program at Quinnipiac University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) 1111 North Fairfax Street Alexandria, Virginia 22314 telephone: 703-706-3245; email: accreditation@apta.org; (accreditation@apta.org) website: capteonline.org (http://www.capteonline.org)

**Mission Statement**

The Department of Physical Therapy at Quinnipiac University provides an innovative, student-oriented environment to prepare students who can meet the evolving health needs of society. The program is dedicated to developing lifelong learners who will enhance the profession through a commitment to reflective practice, interprofessional collaboration, leadership and socially responsible action. The educational experience embodies both the university and APTA’s core values. Students provide patient-centered care using evidence-informed practice to optimize movement and positively transform society.

To achieve its mission, the Doctor of Physical Therapy program:

- Cultivates critical and reflective thinking, clinical decision-making, and lifelong learning by utilizing an evidenced-based learning model, authentic assessments and a variety of learning experiences that include interactive technology. This learning model features small lab sizes, hands-on activities, visits to area clinics and opportunities to engage in professional development forums and community interdisciplinary collaboration.
- Provides both in-class and in-clinic opportunities for students to engage in the essential elements of patient/client management.
- Supports faculty teacher-scholars who are effective teachers and who collectively engage in scholarship, professional development, direct patient care and university and community service.

**Essential Functions**

**Sensory Ability**

To provide quality care, a student is expected to possess functional use of the senses of vision, touch, hearing and smell. All data received by the senses must be integrated, analyzed and synthesized in a consistent and accurate manner. In addition, the student is expected to possess the ability to distinguish color, perceive pain, pressure, temperature, position, equilibrium, and movement. The student is expected to be able to observe the patient/client to accurately assess any alteration in functional abilities. Inherent in this observational process is the functional use of the senses of vision, touch, hearing and smell. All data received by the senses must be integrated, analyzed and synthesized in a consistent and accurate manner.

**Communication Ability**

The student is expected to be able to communicate verbally and non-verbally in an effective and sensitive manner, at a competency level that allows one to safely carry out the essential functions of physical therapy care. This requires the ability to see, speak, hear, read, write effectively in English, and utilize technology effectively. Students are also expected to be able to communicate effectively with fellow students, faculty and members of the health care team.

**Motor Ability**

The student is expected to be able to perform gross and fine motor movements bilaterally in order to provide competent care. Examples of care that the student must be able to perform include, but are not limited to, lifting, turning, transferring, transporting, and ambulating individuals. The student is expected to have the manual dexterity and/or psychomotor skills necessary to perform and/or to assist with procedures, treatments and emergency interventions in a variety of settings with individuals across the lifespan. The student must be able to administer CPR without assistance. The student is expected to
Freshman Entry Bachelor of Science to Doctor of Physical Therapy

have sufficient motor function to elicit information from individuals by palpation, auscultation, percussion and other diagnostic maneuvers. The student is expected to be able to maintain consciousness and equilibrium, and to have the physical strength and stamina to perform satisfactorily in clinical physical therapy experiences on multiple days per week during the semester.

**Intellectual-Conceptual Ability**
The student is expected to have the ability to develop problem-solving skills, make clinical decisions, demonstrate the ability to establish care plans, and set priorities. This includes the ability to measure, calculate, analyze, and synthesize objective and subjective data and make decisions that reflect consistent and thoughtful deliberation of the appropriate data. Students need to demonstrate the ability to perform these cognitive skills efficiently and with the flexibility that is inherent to the needs in the clinical environment. Students need to be mindful of the degree of personal risk, and take proper precautions to prevent incidents associated with commonly occurring hazards in the work environment such as blood borne pathogens and environmental allergens such as latex or iodine preparations.

**Behavioral/Social/Professional Attributes**
The student is expected to have the emotional stability required for the full utilization of his/her intellectual abilities, the exercise of sound judgment, complete assessment and intervention activities, and develop sensitive interpersonal relationships with patients/clients, families, and others responsible for health care. The individual is expected to have the ability to function effectively under stress, and exhibit the professional values of accountability, altruism, compassion/caring, excellence, integrity, professional duty and social responsibility.

**Admission**
Candidates applying for admission to the Physical Therapy program from high school are required to have no less than three years of high school college preparatory mathematics (four years are preferred), one year of biology, one year of chemistry and one year of physics. In addition, the scores of the Scholastic Assessment Test or the College Entrance Examination board of the American College Testing program are important considerations. Related health care experience is highly desirable. Prospective candidates also must satisfy general Quinnipiac University Admission Requirements (p. 17).

All applications must include two letters of reference, and a personal interview may be required with representatives of the admissions office to discuss program requirements and the applicant’s professional interests and commitments. Applicants must have observation hours in at least two different clinical settings, preferably one in a rehabilitation facility and one in an acute care setting. A minimum of 10 hours in at least two settings (20 hours total) is required.

Applicants should forward to the Undergraduate Admissions Office a signed note from the physical therapist at each setting verifying observation hours. Applications are accepted for admission to the fall semester only. All applications are processed and screened by the vice president and dean for admissions for selection to the program. Reference letters, other correspondence and inquiries relating to an application should be directed to the dean of undergraduate admissions. Admission to Quinnipiac University does not guarantee admission to the professional graduate DPT program in physical therapy, unless officially accepted into the program as a freshman.

**Freshman Entry Bachelor of Science to Doctor of Physical Therapy**

Program Contact: Katherine Harris (Maureen.Helgren@quinnipiac.edu)
203-582-8511

The Department of Physical Therapy at Quinnipiac University is a member of the Early Assurance Consortium for physical therapy education. Qualified students are admitted as freshmen to the Dual-Degree BS in Health Science Studies/Doctor of Physical Therapy (3+3) program or BS in Athletic Training/Doctor of Physical Therapy (4+3) program. Upon successful completion of the Bachelor of Science in HSS or Bachelor of Science in AT and meeting specific departmental requirements, students are guaranteed admission to the graduate DPT program. The HSS program of study can be completed in 3 or 4 years.

At the end of the spring semester of the first undergraduate year, students are required to select and adhere to coursework in either the three- or four-year preprofessional track. If the three-year track is selected, students will not be allowed transfer into the four-year curriculum at a later date. The decision for a three-year versus four-year track is individual, yet multifactorial. Factors to be considered include, but are not limited to, the following: accumulation of college credits upon entering the university, involvement in athletics, financial aid, necessity of summer and/or J-term coursework and study abroad opportunities.

**Student Learning Outcomes**
Upon completion of the Health Science Studies program for physical therapy, students will demonstrate the following competencies:

**Goal:** Students will have a strong foundation in sciences to prepare them for the graduate doctor of physical therapy program.

1. **Foundational Science Knowledge:** Demonstrate a knowledge of foundational sciences.
2. **Interprofessional Health Care:** Identify the roles of various health care professionals.

**Goal:** Students will demonstrate diverse and innovative thinking.

1. **Creative Thinking:** Define and devise imaginative and original solutions to various challenges.
2. **Diversity:** Identify the role and impact diversity plays in health.
Admission to the Program

Candidates applying for admission to the Physical Therapy program from high school are required to have no less than three years of high school college preparatory mathematics (four years are preferred), one year of biology, one year of chemistry and one year of physics. In addition, the scores of the Scholastic Assessment Test or the College Entrance Examination board of the American College Testing program are important considerations. Related health care experience is highly desirable. Prospective candidates also must satisfy general Quinnipiac University admission requirements.

All applications must include two letters of reference, and a personal interview may be required with representatives of the admissions office to discuss program requirements and the applicant’s professional interests and commitments. Applicants must have observation hours in at least two different clinical settings, preferably one in a rehabilitation facility and one in an acute care setting. A minimum of 10 hours in at least two settings (20 hours total) is required.

Applicants should forward to the Office of Admissions a signed note from the physical therapist at each setting verifying observation hours. Applications are accepted for admission to the fall semester only. All applications are processed and screened by the vice president and dean for admissions for selection to the program. Reference letters, other correspondence, and inquiries relating to an application should be directed to the dean of undergraduate admissions. Admission to Quinnipiac does not guarantee admission to the professional graduate DPT program in physical therapy, unless officially accepted into the program as a freshman.

AP Credits and Course Substitutions

A student who scores a 4 on the AP exam for biology will take BIO 101-BIO 102 at Quinnipiac University and have alternative credits awarded.

A student who scores a 4 on the AP exam for calculus may choose to be awarded credit for MA 141. If AP credits are awarded and accepted for CHE 110-CHE 111, the student will discuss other sciences to be considered as replacements.

A student who receives a 4 on the AP exam for biostatistics may choose to be awarded credit for MA 275. No other AP credits in the math and science categories will be accepted for program substitution without permission. AP credits for other non-math and science core curriculum requirements will be accepted.

The Progression and Retention Committee for the program in physical therapy is responsible for evaluating and screening candidates during the preprofessional and professional graduate components of the program. Requirements for the program in physical therapy were approved in conjunction with the accreditation of the program and are acceptable to the School of Health Sciences and Quinnipiac University administration.

Preprofessional Bachelor’s Degree Program Requirements

To be eligible for the professional graduate DPT program, students must achieve a minimum overall GPA of 3.2 during the preprofessional component of the program. In addition, a 3.2 cumulative GPA in preprofessional program science and math coursework is required for admission to the professional graduate DPT component of the program. (D and F grades in the required preprofessional science and math courses are unacceptable.) Initial placement in the English and mathematics courses is determined by examination and an evaluation of high school units presented. The minimum mathematics requirement is MA 141. All students are required to complete a minor or concentration in a subject area of their choice. The following courses in the preprofessional component must be successfully completed with a C- or better and are calculated into the GPA for science and math coursework.

Preprofessional Undergraduate Courses Calculated into 3.2 Math/Science Requirement

Essential Function Requirements

Admission to Quinnipiac University is open to all academically qualified students without regard to age, race, color, religion, sex, handicap or national origin. One of the purposes of the Quinnipiac’s Physical Therapy program is to provide graduates with a broad and basic preparation for professional physical therapy practice. The Entry-Level Doctor of Physical Therapy program offered at Quinnipiac prepares graduates for roles in state-of-the-art practice. Therefore, a student who is accepted to the program must be able to meet the cognitive, affective and psychomotor requirements of the required curriculum. A graduate is expected by employers, consumers and other health care providers to assume specific roles and responsibilities in a competent and safe manner. Therefore, all knowledge and skills that are part of the physical therapy curriculum must be mastered for successful completion of the program.
This includes successful demonstration of these skills in both campus laboratory simulations and in actual clinical settings.

The Physical Therapy faculty has developed a set of essential functions that provide performance guidelines necessary for mastery of the knowledge and skills necessary to meet physical therapy curriculum objectives. They are designed to ensure the safety of the student and those who are entrusted to his/her care.

For enrollment, continued progression and completion of the physical therapy program, each student must be able to perform pursuant to certain essential functions. The term “essential function” refers to all nonacademic criteria used for admission and participation in a program. They evolve from the practice of physical therapy, and apply to all students. They are not established to discriminate for or against a person with a disability, and ensure that a student can benefit from the program offerings. The skills and abilities that have been identified as necessary to meet physical therapy curricula essential function requirements include, but are not limited to, the following:

**Sensory Ability**

To provide quality care, a student is expected to possess functional use of the senses of vision, touch, hearing and smell. All data received by the senses must be integrated, analyzed and synthesized in a consistent and accurate manner. In addition, the student is expected to possess the ability to distinguish color, perceive pain, pressure, temperature, position, equilibrium and movement. The student is expected to be able to observe the patient/client to accurately assess any alteration in functional abilities. Inherent in this observational process is the functional use of the senses and sufficient motor capability to carry out the necessary assessment activities, such as auscultation, percussion and palpation. The student also should be able to observe a patient accurately and completely at both from a distance and close at hand.

**Communication Ability**

The student is expected to be able to communicate verbally and nonverbally in an effective and sensitive manner, at a competency level that allows one to safely carry out the essential functions of physical therapy care. This requires the ability to see, speak, hear, read and write effectively in English, and utilize technology effectively. Students also are expected to be able to communicate effectively with fellow students, faculty and members of the health care team.

**Motor Ability**

The student is expected to be able to perform gross and fine motor movements, bilaterally to provide competent care. Examples of care that the student must be able to perform include, but are not limited to, lifting, turning, transferring, transporting and ambulating individuals. The student is expected to have the manual dexterity and/or psychomotor skills necessary to perform and/or assist with procedures, treatments, administration of medications by all routes, and emergency interventions in a variety of settings with individuals of various ages. The student must be able to administer CPR without assistance. The student is expected to have sufficient motor function to elicit information from individuals by palpation, auscultation, percussion and other diagnostic maneuvers. The student is expected to be able to maintain the physical strength, equilibrium and stamina to perform satisfactorily in clinical physical therapy experiences on multiple days per week during the semester. In addition, students are required to participate in full-time clinical experiences.

**Intellectual-Conceptual Ability**

The student is expected to have the ability to develop problem-solving skills, demonstrate the ability to establish care plans, and set priorities. This includes the ability to measure, calculate, analyze and synthesize objective and subjective data and make decisions that reflect consistent and thoughtful deliberation of the appropriate data. Students need to be mindful of the degree of personal risk, and take proper precautions to prevent untoward incidents associated with commonly occurring hazards in the work environment such as blood borne pathogens, and environmental allergens such as latex or iodine preparations.

**Behavioral/Social/Professional Attributes**

The student is expected to have the emotional stability required for the full utilization of his/her intellectual abilities, the exercise of sound judgment, complete assessment and intervention activities, and develop sensitive interpersonal relationships with patients/clients, families and others responsible for health care. The individual is expected to have the ability to function effectively under stress, and exhibit the professional values of accountability, altruism, compassion/caring, excellence, integrity, professional duty, and social responsibility.

**Professional DPT Program Requirements**

Students in the professional graduate DPT component of the curriculum are required to achieve a GPA of 3.0 in each semester. In addition, a grade of C+ or better is required in all professional graduate component courses. Students whose averages for each semester fall below 3.0 or receive a grade below C+ may be subject to dismissal from the program. Transfer students are considered for admission to the professional graduate DPT program on a space-available basis.

For continuation in the program, all students must successfully complete all course work in the sequence identified. In addition to these academic requirements, all DPT students must be aware that there are additional requirements necessary to participate in scheduled clinical affiliations. Specific health requirements, including but not limited to: titers for mumps, measles and rubella, varicella and hepatitis B, annual physical exams, two-step PPDs, flu shots, current CPR certification and other mandates must be completed within the timeframe established by the clinical site at which a student has been placed. In addition, criminal background check updates and drug testing also may be required. These mandates are facility-specific and change frequently without notice. Quinnipiac University has no authority over any clinical facilities' protocols. Students must comply with what is required at their specific clinical affiliation.

Clinical education is a vital component of physical therapy student education and is a significant part of the physical therapy curriculum at Quinnipiac University. Clinical education experiences occur through both integrated and full-time clinical experiences in a variety of settings throughout the country. Placement in specific settings, locations and clinical facilities is not ever guaranteed and individual student assignment occurs at the discretion of the faculty. Students may be required to travel for clinical assignments. All associated housing and travel costs are the responsibility of the student.

- Dual-Degree BS in Health Science Studies/Doctor of Physical Therapy (3+3) (p. 313)
- Dual-Degree BS in Health Science Studies/Doctor of Physical Therapy (4+3) (p. 314)
Dual-Degree BS in Athletic Training/Doctor of Physical Therapy (4+3)

Program Contacts: Katherine Harris (katherine.harris@quinnipiac.edu) 203-582-8511 and Stephen Straub (stephen.straub@quinnipiac.edu) 203-582-8443

Select candidates from high school may apply to the Dual-Degree BS in Athletic Training/DPT (4+3) program. Upon completion of four years of study, students receive a Bachelor of Science in Athletic Training/Sports Medicine and are guaranteed admission into the three-year graduate DPT program. All preprofessional requirements of the professional graduate DPT program are required for those students selected for admission into the combined AT-DPT degree.

Undergraduate students should follow the course selection grid as outlined under the undergraduate AT program with the appropriate dual major alternatives. See Physical Therapy (p. 307) for the additional required standards to successfully complete the preprofessional component of that program. Additionally, all athletic training classes must be completed with a B- or better and an overall GPA of 3.2.

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Curriculum for Dual-Degree BS in Athletic Training/DPT (4+3)

A total of 132 credits is required for completion of the BS in Athletic Training.

1 These AT courses have a laboratory and/or clinical component.

For information about the graduate portion of the program, please see Doctor of Physical Therapy (p. 399).

**Mission Statement**

The mission of the Department of Rehabilitation, Heath and Wellness is to provide a quality education program through which students obtain the knowledge and psychomotor skills necessary to practice as athletic trainers certified by the Board of Certification. Importance is placed upon the provision of opportunities within the curriculum for the development of skills encompassing the domains of athletic training. Strong emphasis is placed on the practical clinical experience coupled with specific professional coursework. Recognizing the importance of excellence in teaching and instruction, the faculty, in its commitment to the combination of diverse clinical and intellectual experiences, collaborates in educating students.

The athletic training education program offers a highly personalized learning environment featuring small classes and ready access to faculty; reflecting the university's commitment to excellence in teaching. The faculty share a service orientation toward the students and their needs. The program also strives to prepare graduates who manifest critical and creative thinking, effective communication skills, informed value judgments and who possess an educational foundation for continued growth and development in a changing world of diverse cultures and people.

**Admission**

Candidates applying for admission to the physical therapy program from high school are required to have no less than three years of high school college preparatory mathematics (four years are preferred), one year of biology, one year of chemistry and one year of physics. In addition, the scores of the Scholastic Assessment Test or the College Entrance Examination board of the American College Testing program are important considerations. Related health care experience is highly desirable. Prospective candidates also must satisfy general Quinnipiac University Admission Requirements (p. 17).

All applications must include two letters of reference, and a personal interview may be required with representatives of the admissions office to discuss program requirements and the applicant's professional interests and commitments. Applicants must have observation hours in at least two different clinical settings, preferably one in a rehabilitation facility and one in an acute care setting. A minimum of 10 hours in at least two settings (20 hours total) is required.

Applicants should forward to the Undergraduate Admissions Office a signed note from the physical therapist at each setting verifying observation hours. Applications are accepted for admission to the fall semester only. All applications are processed and screened by the vice president and dean for admissions for selection to the program. Reference letters, other correspondence and inquiries relating to an application should be directed to the dean of undergraduate admissions. Admission to Quinnipiac University does not guarantee admission to the professional graduate DPT program in physical therapy, unless officially accepted into the program as a freshman.

**Dual-Degree BS in Health Science Studies/Doctor of Physical Therapy (3+3)**

Program Contact: Katherine Harris (Katherine.Harris@qu.edu)
203-582-8511

This program is for freshman entry only. Students accepted into the HSS-DPT program as freshmen may complete the Bachelor of Science in Health Science Studies in three years. All students must complete 122 university credits to include the required University Curriculum (UC) courses, DPT required courses, and a minor in an area of interest.

Students must achieve a 3.2 cumulative GPA and a 3.2 average for 46 credits of selected math and science courses for admission to the graduate Doctor of Physical Therapy (DPT) program. In this fast-paced curriculum, students are expected to enroll in course work during summer terms (two courses per summer) and a J-term (one course in one J-term). Online courses are available for summer and J-term course work.

**AP Credits and Course Substitutions**

A student who scores a 4 or 5 on the AP exam or transfer credits for biology will take BIO 101-BIO 102 at Quinnipiac University and be awarded alternate credits.

A student who scores a 4 or 5 on the AP exam for calculus or transfer credits may choose to be awarded credit for MA 141. If AP credits are awarded and accepted for CHE 110-CHE 111, the student will discuss other sciences to be considered as replacements.

A student who receives a 4 or 5 on the AP exam for biostatistics or transfer credits may choose to be awarded credit for MA 275. No other AP credits in the math and science categories will be accepted for program substitution without permission. AP credits or transfer credits for other non-math and science core curriculum requirements will be accepted.

The Review and Evaluation Committee for the program in physical therapy is responsible for evaluating and screening candidates during the preprofessional and professional graduate components of the program.
Requirements for the program in physical therapy were approved in conjunction with the accreditation of the program and are acceptable to the School of Health Sciences and Quinnipiac University administration.

**Curriculum for Dual-Degree BS in Health Science Studies/DPT (3+3) for Freshman Entry**

A total of 122 credits is required for completion of the BS in Health Science Studies.

1. MA 141, program requirement  
2. PS 101  
The sequencing of course work for the preprofessional track is flexible; however, all requirements in the curriculum must be completed prior to entry into the graduate DPT program.

For information about the graduate portion of the program, please see Post-Bachelor’s Doctor of Physical Therapy (p. 399).

**Student Learning Outcomes**

Upon completion of the Health Science Studies program for physical therapy, students will demonstrate the following competencies:

**Student Goal:** Students will have a strong foundation in sciences to prepare them for the graduate doctor of physical therapy program.

1. **Foundational Science Knowledge:** Demonstrate a knowledge of foundational sciences.

2. **Interprofessional Health Care:** Identify the roles of various health care professionals.

**Student Goal:** Students will demonstrate diverse and innovative thinking.

1. **Creative Thinking:** Define and devise imaginative and original solutions to various challenges.

2. **Diversity:** Identify the role and impact diversity plays in health.
Mission Statement
The Department of Physical Therapy at Quinnipiac University provides an innovative, student-oriented environment to prepare students who can meet the evolving needs of society. The program is dedicated to developing lifelong learners who will enhance the profession through a commitment to reflective practice, interprofessional collaboration, leadership and socially responsible action. The educational experience embodies both the university and APTA’s core values. Students provide patient-centered care using evidence informed practice to optimize movement and positively transform society.

To achieve its mission, the Doctor of Physical Therapy program:

• Cultivates critical and reflective thinking, clinical decision-making and lifelong learning by utilizing an evidenced-based learning model, authentic assessments and a variety of learning experiences that include interactive technology. This learning model features small lab sizes, hands-on activities, visits to area clinics and opportunities to engage in professional development forums and community interdisciplinary collaboration.

• Provides both in-class and in-clinic opportunities for students to engage in the essential elements of patient/client management.

• Supports faculty teacher-scholars who are effective teachers and who collectively engage in scholarship, professional development, direct patient care and university and community service.

Admission
Candidates applying for admission to the physical therapy program from high school are required to have no less than three years of high school college preparatory mathematics (four years are preferred), one year of biology, one year of chemistry and one year of physics. In addition, the scores of the Scholastic Assessment Test or the College Entrance Examination board of the American College Testing program are important considerations. Related health care experience is highly desirable. Prospective candidates also must satisfy general Quinnipiac University Admission Requirements (p. 17).

All applications must include two letters of reference, and a personal interview may be required with representatives of the admissions office to discuss program requirements and the applicant’s professional interests and commitments. Applicants must have observation hours in at least two different clinical settings, preferably one in a rehabilitation facility and one in an acute care setting. A minimum of 10 hours in at least two settings (20 hours total) is required.

Applicants should forward to the Undergraduate Admissions Office a signed note from the physical therapist at each setting verifying observation hours. Applications are accepted for admission to the fall semester only. All applications are processed and screened by the vice president and dean for admissions for selection to the program. Reference letters, other correspondence and inquiries relating to an application should be directed to the dean of undergraduate admissions. Admission to Quinnipiac University does not guarantee admission to the professional graduate DPT program in physical therapy, unless officially accepted into the program as a freshman.

Dual-Degree BS in Health Science Studies/Doctor of Physical Therapy (4+3)

Program Contact: Katherine Harris (Katherine.Harris@qu.edu)
203-582-8511

This program is for freshman entry only. Students accepted into the Dual-Degree BS/DPT (4+3) program as freshmen receive a Bachelor of Science in Health Science Studies. All students must complete 122 university credits to include the required University Curriculum (UC) courses, DPT required courses, and a minor in an area of interest. Students must achieve a 3.2 cumulative GPA and a 3.2 average for 46 credits of selected math and science courses at the completion of all credits for admission to the graduate Doctor of Physical Therapy (DPT) program.

• Cultivates critical and reflective thinking, clinical decision-making and lifelong learning by utilizing an evidenced-based learning model, authentic assessments and a variety of learning experiences that include interactive technology. This learning model features small lab sizes, hands-on activities, visits to area clinics and opportunities to engage in professional development forums and community interdisciplinary collaboration.

• Provides both in-class and in-clinic opportunities for students to engage in the essential elements of patient/client management.

• Supports faculty teacher-scholars who are effective teachers and who collectively engage in scholarship, professional development, direct patient care and university and community service.
Admission

Candidates applying for admission to the Dual-Degree BS in Health Science Studies/Doctor of Physical Therapy (4+3) program from high school are required to have no less than three years of high school college preparatory mathematics (four years are preferred), one year of biology, one year of chemistry and one year of physics. In addition, the scores of the Scholastic Assessment Test or the College Entrance Examination board of the American College Testing program are important considerations. Related health care experience is highly desirable. Prospective candidates also must satisfy general Quinnipiac University Admissions Requirements (p. 17).

All applications must include two letters of reference, and a personal interview may be required with representatives of the admissions office to discuss program requirements and the applicant’s professional interests and commitments. Applicants must have observation hours in at least two different clinical settings, preferably one in a rehabilitation facility and one in an acute care setting. A minimum of 10 hours in at least two settings (20 hours total) is required.

Applicants should forward to the Undergraduate Admissions Office a signed note from the physical therapist at each setting verifying observation hours. Applications are accepted for admission to the fall semester only. All applications are processed and screened by the vice president and dean for admissions for selection to the program. Reference letters, other correspondence and inquiries relating to an application should be directed to the dean of undergraduate admissions. Admission to Quinnipiac University does not guarantee admission to the professional graduate DPT program in physical therapy, unless officially accepted into the program as a freshman.
DEPARTMENT OF PHYSICIAN ASSISTANT STUDIES

The physician assistant profession has grown to meet the health care needs of our communities and nation. The Department of Physician Assistant Studies at Quinnipiac University educates qualified individuals to be highly skilled licensed health care providers who practice team-based medicine in collaboration with physicians. The department offers a dual-degree program, which consists of an undergraduate pre-PA program known as the Entry-Level Master’s Physician Assistant (ELMPA) program and the accredited graduate Master of Health Science (MHS) Physician Assistant program.

The ELMPA program provides students who are serious about entering the physician assistant profession with a well-rounded education and a strong focus in biological and health science studies. This very structured and organized undergraduate program not only prepares students for the rigors of the professional component of the program, but also introduces students to the role and responsibilities of physician assistants as well as the six competencies for the physician assistant profession. Upon successful completion of all of the requirements of the ELMPA program, students receive a Bachelor of Science in Health Science Studies and are directly matriculate into reserved seats in the MHS program.

The graduate MHS Physician Assistant program is a 27-month intensive educational experience that prepares students with the core competencies to be a caring, compassionate, competent, and highly skilled health care provider. The program consists of a total of 15 months didactic and 12 months clinical education. Students are required to meet core professional competencies, standards of professionalism, and mission-driven program requirements prior to graduation from the program. Each graduate cohort is composed of students entering from the ELMPA program as well as external candidates who apply for admissions through the Central Application Service for Physician Assistants (CASPA).

Undergraduate Program
• Entry-Level Master’s Physician Assistant (p. 317)

Graduate Program
• Master of Health Science (p. 413)

Entry-Level Master’s Physician Assistant
Program Contact: Laurie Seeger (p. 1) 203-582-3882

The Entry-Level Master’s Physician Assistant (ELMPA) is a dual-degree program that offers the qualified pre-physician assistant students an opportunity to pursue a Bachelor of Health Science Studies and a Master of Health Science in the Physician Assistant program at Quinnipiac University. The program is divided into a four-year preprofessional component and a 27-month professional component. To progress to the professional phase, all ELMPA courses and program requirements must be completed within four years.

Student Learning Outcomes
Upon completion of the Entry-Level Master’s Physician Assistant Program, students will demonstrate the following competencies:

Goal: Students will have a strong foundation in sciences and the health care system preparing them for the rigors of the graduate PA program.

1. Core Science Knowledge: Demonstrate a knowledge of core sciences.
2. Interprofessional Health Care: Understand the roles and shared values of various health care professionals.

Goal: Students will become advocates of professional responsibility.

1. Professionalism: Demonstrate the attributes of a high-quality professional.
2. Interpersonal and Communication Skills: Possess the ability to safely and effectively communicate with various populations.
3. Community Service: Engage all students in active and ongoing community outreach.
4. Leadership: Support a culture of leadership in the university and the community.

Preprofessional Component
The mission of the Quinnipiac University Entry-Level Master’s Physician Assistant (ELMPA) program is to begin the education and preparation of master’s-level physician assistants who practice medicine with physicians and other members of the health care team. The program has been designed to benefit from faculty expertise in both the graduate and undergraduate divisions as well as practitioners from a variety of clinical settings and specialties. These collaborative strategies are intended to prepare graduates to enter the physician assistant profession and ultimately become outstanding health care providers.

Admission to the Program
Candidates applying for admission to the Dual-Degree BS in Health Science Studies/MHS Physician Assistant program must have: a minimum of three years of high school mathematics including geometry, algebra and precalculus; one year of biology; one year of chemistry and one year of physics. In addition, advanced electives in the biological sciences are recommended. Related health care experience and shadowing is highly desirable.

Prospective candidates must also satisfy the admission requirements of Quinnipiac. Transfer students are not admitted to the entry-level master’s physician assistant program. Admission into the preprofessional component of the program does not guarantee admission into the professional component of the program, unless all requirements are met.

Technical Standards
All students entering the MHS Physician Assistant program at Quinnipiac University must be able to meet the established abilities and expectations of the graduate PA program technical standards, which can be found on the program’s website (p. 415). Upon admission to the ELMPA program, students are required to review and verify that they understand the technical standards requirement. Prior to participation in the preclinical experiences, the student’s primary care provider must verify, based on a complete history and physical examination, that the student meets the technical standards of the graduate PA program. In the event that a student is unable to fulfill these technical standards, he/she
may not be able to participate in preclinical affiliations and may not be able to progress to the graduate PA program.

**Background Checks/Drug Screens**

Students should be aware that certain preclinical sites may require a criminal background check and/or urine drug screen before a student is placed in the clinic or intern site. The university has procedures to assist students in obtaining these requirements. The cost of the background check and drug screen is the responsibility of each individual student. All students are required to have a new or updated background check upon progression to the MHS Physician Assistant program.

**Undergraduate Program**

- **Dual-Degree BS in Health Science Studies/MHS Physician Assistant** (p. 317)

**Graduate Program**

- **MHS Physician Assistant** (p. 413)

**Dual-Degree BS in Health Science Studies/MHS Physician Assistant**

Program Contact: Laurie Seeger (p. 1) 203-582-3882

This entry-level dual-degree Physician Assistant program leading to a Bachelor of Health Science Studies and Master of Health Science is divided into a 4-year preprofessional component and a 27-month professional component.

The preprofessional component provides students with a well-rounded education and a strong focus in biological and health science studies. This very structured and organized undergraduate program not only prepares students for the rigors of the professional component of the program, but also introduces students to the role and responsibilities of physician assistants as well as the six competencies for the physician assistant profession. The program addresses the need for medical experience by providing students with emergency medical technician (EMT) training (PY 388/389) as well as extensive time shadowing practicing physician assistants (PY 397/400). EMT ride time and preclinical experiences take place at off-campus sites, and students are responsible for transportation to and from all off-campus sites beginning in the sophomore year. In addition, students must meet specific program health and immunization requirements for participation in the preclinical experiences. Program costs associated with the preclinical affiliations and EMT course, including uniform, parking, certification exam, health requirements documentation, background check and additional program fees are the responsibility of the student.

BIO/BMS Core science elective  3-4
UC Personal Inquiry 1 (Fine Arts, Humanities, Social Sciences)  3
UC Personal Inquiry 2 (Fine Arts, Humanities, Social Sciences)  3

Credits  15-16

Spring Semester
PY 204  Physician Assistant Seminar II - The Interdisciplinary Team  1
BMS 332  Histology and Lab  4
BIO/BMS/HSC Science electives  3-4
UC Personal Inquiry 2 (Fine Arts, Humanities, Social Sciences)  3
QU 420  Integrative Capstone  3

Credits  14-15

Total Credits  124-129

1 If student has current EMT licensure on admission to the program, two additional science electives are taken instead of PY 388 and PY 389.
2 CHE 315L (Biochemistry Lab) is optional. Students who are pursuing a minor in chemistry are required to complete CHE 315L.

Students who have earned advanced placement credit or other college credit in an introductory-level science course are encouraged to still take BIO 101/BIO 102 and CHE 110/CHE 111 at Quinnipiac. Students opting out of those courses are required to take the equivalent number of hours at a higher level in the same area of course work. Students with AP credits in nonscience courses may elect to take only 14 credits in the fall semester of the first year.

Acceptable Core Science Electives

### Program Requirements

Formal evaluation of the pre-physician assistant student by the Academic Progression and Retention Committee takes place at the end of the spring semester of the first year. To continue in the program, students must have a minimum cumulative GPA of 3.2 and a minimum cumulative science GPA of 3.2. Following the initial evaluation, students are evaluated after completion of each semester. Failure to maintain a minimum cumulative GPA of 3.2 and a minimum cumulative science GPA of 3.2 results in dismissal from the program. In addition, a minimum GPA (both cumulative and science) is required for participation in preclinical affiliations. All required courses must be completed with a course grade of C- or better.

By February 1 of the fourth year, students are required to have accumulated at least 1,000 hours of documented direct patient contact through paid and/or volunteer experiences (e.g., certified nurse’s aide, medical assistant, phlebotomy technician, emergency room technician, EMT). While patient contact hours must be preapproved by program faculty, students are responsible for making their own arrangements to obtain these direct patient contact hours. In addition, all students are required to obtain student membership in the American Academy of Physician Assistants (AAPA).

### Requirements for Progression to the MHS Physician Assistant Program

For a student in the Entry-Level Master’s Physician Assistant (ELMPA) program to progress to the MHS Physician Assistant program at Quinnipiac University, the student must successfully complete all requirements to obtain a BS degree in Health Science Studies, including all prerequisite courses for the PA program admission. Students progressing to the professional phase of the program may not have any course failures or grades of incomplete, and no outstanding academic integrity or professionalism issues at the time of progression. In addition, students must meet the established requirements for direct patient contact hours and EMT certification. Prior to beginning the Physician Assistant program, students meet with a faculty member from the Department of Physician Assistant Studies for a final academic review.

The student must meet all academic, curricular, professional, health and immunization, background check and technical standards requirements of the PA program to matriculate into the program.

For information on the professional component of the Entry-Level Master’s Physician Assistant program, please see the Graduate Studies section (p. 413).
DEPARTMENT OF REHABILITATION, HEALTH AND WELLNESS

The Department of Rehabilitation, Health and Wellness is a vibrant eight member group with expertise across multiple aspects of human health, fitness, injury prevention and rehabilitation; faculty are active in aspects of fitness, health care and education at the state, regional and national level. Faculty members collaborate with other health care educators across the School of Health Sciences, School of Medicine and School of Nursing to deliver an interprofessional educational experience.

The department sponsors educational programming culminating in a BS in Athletic Training, qualifying the student to sit for the national certification exam, and collaborates with the Department of Physical Therapy in offering a Dual-Degree BS in Athletic Training/DPT (4+3) program while also offering classes to the broader campus community in areas of Fitness, Leisure and Wellness (FLW).

- Bachelor of Science in Athletic Training (http://catalog.qu.edu/health-sciences/athletic-training-sports-medicine/athletic-training-bs)
- Dual-Degree BS in Athletic Training/Doctor of Physical Therapy (p. 311) (4+3)

Athletic training encompasses the prevention, examination, diagnosis, treatment and rehabilitation of emergent, acute or chronic injuries and medical conditions. Athletic training is recognized by the American Medical Association (AMA), Health Resources Services Administration (HRSA) and the Department of Health and Human Services (HHS) as an allied health care profession.

Athletic trainers (ATs) are highly qualified, multiskilled health care professionals who collaborate with physicians to provide preventive services, emergency care, clinical diagnosis, therapeutic intervention and rehabilitation of injuries and medical conditions. Athletic trainers work under the direction of a physician as prescribed by state licensure statutes.

At Quinnipiac, the program in athletic training emphasizes practical clinical experience along with a strong foundation in anatomy and physiology, nutrition and fitness and conditioning, among other subjects. The program values personal responsibility and critical decision making in the development of high-quality, patient-centered care. Students work with student-athletes from Quinnipiac’s Division I volleyball, soccer, field hockey, cross country, tennis, basketball and ice hockey teams as well as athletes in local high schools and community-based health care settings, all under the supervision of certified athletic trainers and other licensed health care providers.

The department sponsors educational programming culminating in a BS in Athletic Training, qualifying the student to sit for the national certification exam, and collaborates with the Department of Physical Therapy in offering a Dual-Degree BS in Athletic Training/DPT (4+3) program.

Fitness, Leisure and Wellness
Program Contact: Debora H. Lavigne (debora.lavigne@qu.edu)
203-582-7943
The Master of Social Work (MSW) program at Quinnipiac University prepares social workers for advanced practice in the context of health and behavioral health settings through a curriculum that focuses on clinical practice, organizational practice and interprofessional teamwork. This program is guided by a person-in-environment construct, a global perspective, respect for human diversity and knowledge based on scientific inquiry, for the purpose of educating social work professionals to promote human and community well-being.

The Master of Social Work program prepares students for achievement and leadership in the field of social work. The curricular approach of the MSW program is unique in that it directly engages students in interprofessional education and the health care team approach.

Quinnipiac’s MSW program embraces the university’s commitment to the development of professional expertise through practice experience. The two field placements offer students the opportunity to practice skills learned in the classroom in real-world settings. A seminar that supports the student in integrating academic and fieldwork is held monthly. Upon completion of the MSW degree, the student will have at least 1,000 hours of professional preparation in the field.

Students entering Quinnipiac as undergraduates who are interested in the social work program also have the option of pursuing a dual-degree bachelor’s/master’s program. There are two options: the Accelerated Dual-Degree BS in Health Science Studies/Master of Social Work (3+2) (p. 276) or the Accelerated Dual-Degree Bachelor’s/Master of Social Work (3+2) (p. 346) program, which begins with undergraduate study in the College of Arts and Sciences.

Mission Statement

The mission of the Quinnipiac University MSW program is to prepare social workers for specialized practice in the context of health and behavioral health settings through a curriculum that focuses on clinical practice, organizational practice, and interprofessional teamwork. This MSW program is guided by a person-in-environment framework, a global perspective, respect for human diversity, and knowledge based on scientific inquiry, for the purpose of educating social work professionals to promote human and community well-being. The program’s core values are as follows and reflect the NASW Code of Ethics for Social Workers: service, social justice, the dignity and worth of the person, the importance of human relationships, integrity and competence.

The MSW program has the following four goals:

1. Prepare social workers to be specialized practitioners in diverse systems of various sizes, emphasizing competent, ethical clinical and organizational practice toward the advancement of the human condition. The specialized curriculum builds upon the generalist curriculum, which is focused on the necessity of knowledge and skills to practice with individuals, families, groups, organizations and communities.
2. Prepare social workers to practice without discrimination with diverse populations.
3. Prepare social workers to engage in professional activities that promote interprofessional collaboration and advocacy within diverse environments toward the enhancement of the human condition.
4. Prepare students for lifelong professional development.

- Master of Social Work (p. 404)
- Accelerated Dual-Degree BS in Health Science Studies/MSW (3+2) (p. 276)
- Accelerated Dual-Degree Bachelor’s/MSW (3+2) (p. 346)
The Frank H. Netter MD School of Medicine has been designed to be a model for educating diverse, patient-centered physicians who are partners and leaders in an interprofessional workforce responsive to health care needs in the communities they serve. Students from diverse backgrounds attain their highest personal and professional potential in a collaborative student-centered environment that fosters academic excellence, scholarship, lifelong learning, respect and inclusivity. The school embodies the university’s commitment to the core values of academic excellence, a student-oriented environment and a strong sense of community. Accordingly, the school values:

- excellence in education that places the student at the center of the learning experience, and nurtures the student’s independence as a lifelong learner
- diversity and inclusiveness in all students, faculty and staff
- a learning environment that promotes the provision of holistic, patient-centered care
- interprofessional education and service-learning experiences to promote teamwork in the care of patients
- clinical partners who support and promote the school’s vision, mission and values
- social justice and the education of physicians to address health care inequalities
- partnerships within our community that provide students with learning and service opportunities to improve the health of the community
- advancement and support of primary care education and health services research through the school’s Institute for Primary Care
- advancement of global health through the school’s Institute for Global Public Health by promoting community medicine, public health and international partnerships
- advancement of rehabilitation medicine, through the school’s Institute for Rehabilitation Medicine by promoting interprofessional care, services and research programs especially for wounded military personnel

The four-year curriculum leading to the MD degree is comprehensive and integrated. Core biomedical principles are correlated temporally and contextually with behavioral, clinical and allied health sciences. The curriculum emphasizes active student learning designed to equip graduates with the tools to be effective lifelong learners. Learning occurs in a variety of settings: small-group conferences, case-based learning seminars, lectures, with patients, standardized patients and independent study.

The curriculum is holistic in scope; content such as prevention and wellness promotion, population health, complementary and alternative medicine, and the study of contemporary health care systems are incorporated into discussions of the traditional diagnosis and treatment of medical diseases.

Each course has longitudinal themes that anchor the content in a pedagogically relevant and cohesive manner. These significant learning experiences shift the focus from “what is taught” to “what and how students learn.” The longitudinal themes include medical informatics, biostatistics, epidemiology, ethics, nutrition and sociobehavioral science.

Students begin clinical experiences in their first year and assume increased clinical responsibility in their second through fourth years. They have opportunities to formally learn and hone clinical skills during the clinical arts and sciences course, which uses standardized patients and state-of-the-art simulation labs. Students also meet weekly with a primary care physician, seeing patients, practicing clinical skills, and learning how to work effectively with other health care team members. The first year follows an organ system approach to biomedical sciences, focusing primarily on normal human function. To increase the medical context of this approach, students learn the fundamentals of common diseases in each curricular area. Year 2 follows a pathophysiological approach to content, exploring topics in greater depth and with enhanced sophistication and understanding. Students are exposed to a broad array of human diseases and best practices for diagnosis and management.

Students are allowed to individualize their medical education by selecting a field of concentration for elective course work. The elective course work provides the foundation for a student’s capstone project, an independent research project. Elective concentration areas may include health management, policy, economics, law, education (including interprofessional education), global health, communications, ethics, humanities, or the student may design a novel concentration area with the support of a faculty adviser.

The School of Medicine also offers an anesthesiologist assistant program. For details, visit the Quinnipiac Anesthesiologist Assistant Program (https://www.qu.edu/schools/medicine/academics/anesthesiologist-assistant-program.html) webpage.

Student Learning Outcomes

Quinnipiac University Frank H. Netter MD School of Medicine MD Degree Educational Program Objectives

Upon completion of the MD degree, students will demonstrate competencies in the following 10 categories:

1. Care of Individual Patients
   1.1 Demonstrate respect and compassion for all patients.
   1.2 Practice sensitive and culturally effective patient-centered care, by identifying patient-specific context and preferences.
   1.3 Gather accurate, organized and efficient medical histories from patients and families, attending to patient symptoms, beliefs, concerns, expectations and illness experience.
   1.4 Perform accurate and relevant, focused and comprehensive physical examinations, distinguishing normal from abnormal findings.
   1.5 Access and interpret written and electronic medical records to obtain a thorough patient data set.
   1.6 Use decision analysis and evidence-based reasoning to interpret clinical data.
   1.7 Identify individualized risk factors operative in any patient.
   1.8 Assess patient information accurately in formulating a prioritized differential diagnosis.
1.9 Apply best practice, ethical and cost-effective principles in ordering
tests and procedures.

1.10 Compose comprehensive and focused medical chart notes (written
and electronic); accurately documenting medical history, physical exam
and diagnostic test data.

1.11 Draft prioritized, comprehensive and focused problem lists,
assessing each problem in cogent, organized and comprehensive prose.

1.12 Understand therapeutic interventions for common medical
conditions; applying evidence-based reasoning for ordering medications
and other therapies.

1.13 Develop accurate verbal and written medical orders, incorporating
patient input and respecting patient autonomy.

1.14 Demonstrate proficiency with common medical procedures (listed in
clinical arts and sciences course description).

1.15 Identify when additional input is needed and effectively
communicate with consultants.

2. Professionalism

2.1 Demonstrate honesty, integrity and respect in all interactions with
patients, colleagues and faculty

2.2 Display empathy, altruism and compassion toward patients and
colleagues alike.

2.3 Apply the highest ethical standards of the profession, as set forth in
the AMA Code of Ethics.

2.4 Recognize ethical dilemmas encountered in educational and clinical
settings, and take appropriate steps (by reporting to authorities, or
seeking counsel).

2.5 Maintain confidentiality, respect individual autonomy, and treat all
persons with dignity.

2.6 Demonstrate equal and just treatment of all patients and colleagues.
This includes but is not limited to diversity in gender, race, culture,
language, age, sexual orientation, religious beliefs or disability.

2.7 Maintain professional deportment and demeanor.

2.8 Dress and maintain personal hygiene in a professional manner
appropriate to the educational or patient care setting.

2.9 Prepare for educational experiences in a thorough, intellectually
engaged, and timely fashion as mature graduate students of medicine.

2.10 Display sophisticated self-awareness skills and willingly engage in
self-improvement.

2.11 Maintain appropriate professional boundaries with patients, peers
and faculty.

2.12 Recognize personal limitations of knowledge, skills and behaviors;
and seek appropriate educational support to address the self-identified
deficiencies.

2.13 Accept responsibility for mistakes or omissions, and disclose errors
to appropriate supervisors.

2.14 Maintain and monitor physical, psychological and emotional health;
seek appropriate health and counseling services when ill or impaired,
and not engage in patient care if personal health might endanger another
individual.

2.15 Recognize and refrain from conduct where patients are exploited
(e.g., sexually, financially or for other personal gain).

2.16 Represent the ideals of altruism, justice and patient advocacy.

2.17 Understand the legal and ethical principles inherent to informed
consent, end-of life decisions, and HIPAA, applying them to the care of
patients.

2.18 Identify and avoid when possible, and manage potential conflicts of
interest with industry and other organizations, as these may compromise
ethical behavior and patient care.

2.19 Strive to place patient interests before self-interest at all times.

2.20 Engage in peer education, accepting and delivering constructive
feedback.

2.21 Recognize breach of professional standards in others and respond
appropriately, following School of Medicine Code of Conduct policies and
procedures.

3. Knowledge and Scholarship

3.1 Describe the essential concepts within the foundations of human
biology—molecular, biochemical, genetic, immunologic and cellular
mechanisms.

3.2 Explain the comprehensive physiology underlying normal human
function.

3.3 Identify the normal histology and anatomy of the human body.

3.4 Discuss the fundamentals of human behavior and development, from
fertilization and embryology through aging.

3.5 Explain the homeostatic mechanisms of multi-organ systems.

3.6 Recognize the biological and cultural aspects of human nutrition in
health and disease.

3.7 Recognize the critical contributions of the biopsychosocial
determinants of “health”—global, national, community, family and lifestyle
choices.

3.8 Explain the essential principles of clinical epidemiology, population
and public health.

3.9 Apply the biostatistical and critical analytical skills needed to
interpret basic science and clinical literature.

3.10 Discuss the health law and medical ethical principles inherent to the
practice of medicine.

3.11 Recognize the influences of health care systems—political,
economic and future perspectives—on health and disease management.
3.12 Recognize the nonmedical components of medical practice—financial, personnel management and team leadership, regulatory systems and insurance models.

3.13 Describe the components of a focused and comprehensive medical history and physical examination.

3.15 Describe the core principles of gross and microscopic, analytical/diagnostic and forensic pathology.

3.16 Explain the etiological mechanisms of human diseases—microbial, environmental, inherited, acquired/lifestyle and idiopathic.

3.17 Discuss the pathophysiology, clinical manifestations and prognosis of medical illnesses.

3.18 Discuss fundamental principles of diagnostic imaging and laboratory testing.

3.19 Explain principles of therapeutics—molecular, pharmacological, surgical, radiological and behavioral.

3.20 List the most commonly used types of complementary and alternative therapeutic approaches and explain the rationale for their use.

3.21 Identify and appreciate the roles, responsibilities, training and skills of other health professionals.

3.22 Effectively and efficiently gather and interpret medical evidence, to apply new knowledge at the point of care.

3.23 Develop a clinical question and effectively search medical literature utilizing electronic databases.

3.24 Recognize the principles of information technology, to prepare for future innovations in data management.

3.25 Develop in-depth scientific knowledge in a selected concentration area.

4. Interpersonal and Communication Skills

4.1 Exhibit “relational” empathy in clinical settings, conveying an understanding of a patient’s physical, emotional, and psychological state through verbal and nonverbal behaviors.

4.2 Demonstrate cultural sensitivity by engaging in respectful and positive interactions with all patients.

4.3 Actively listen and observe during patient encounters, attending to verbal and nonverbal cues.

4.4 Apply comprehensive interviewing skills with patients and families, including effective use of interpreters.

4.5 Provide effective anticipatory guidance during physical examinations, giving appropriate verbal prompts.

4.6 Accurately communicate patient data to other health professionals through oral presentations and written and electronic medical records.

4.7 Deliver medical information to patients, including but not limited to diagnosis, prognosis, diagnostic and therapeutic plans, delivering unwelcome news, and communicating ambiguity and uncertainty. Information will be adapted to individual patient needs, at a level appropriate to health literacy, language, hearing and cultural expectations.

4.8 Effectively use lifestyle counseling, respecting patient autonomy and lifestyle choices.

4.9 Engage in shared decision-making with patients and health care colleagues, as evidenced by listening, understanding and negotiating with flexibility and empathy.

4.10 Effectively teach colleagues in clinical and educational settings.

4.11 Respectfully function as a partner and consultant to other health professionals.

5. Practice-Based Learning and Improvement

5.1 Assess the care of patients, identify areas for improvement of expertise, and implement plans to address self-perceived deficits.

5.2 Appraise and assimilate best-evidence scientific information into patient care.

5.3 Set and meet personal learning goals.

5.4 Contribute to enhancing quality care and patient safety, using best evidence.

5.5 Use information technology effectively to maximize education, by acquiring, storing, retrieving and analyzing new medical data.

5.6 Practice population-based care, by learning and employing practice guidelines, best-practice and clinical pathways in the care of individual patients.

6. Systems-Based Practice

6.1 Identify the key principles of health care financing and delivery.

6.2 Explain existent and planned organizational models for health care.

6.3 Identify factors that contribute to health care disparities.

6.4 Work collaboratively to coordinate patient care within the health care system.

6.5 Recognize the impact of time management, case management, referral management and patient satisfaction surveys on health care delivery.

6.6 Work effectively in a variety of health care delivery settings and systems (including outpatient, inpatient, nursing home and free clinic).

6.7 Incorporate cost awareness and risk-benefit analysis in patient care.

6.8 Advocate for quality, equal access, and optimal patient care systems.

6.9 Help to identify system errors and implement potential systems solutions.

7. Interprofessional Collaboration

7.1 Identify the fundamentals of other health science educational programs—training, capabilities, and the unique contributions each profession brings to patient care.
7.2 Recognize national and international models of team care, such as Accountable Care Organizations (ACOs) and the Patient-Centered Medical Home.

7.3 Work respectfully and positively with health professionals from all disciplines in learning teams and patient-care teams.

7.4 List the principles of effective medical consultation and supervision.

7.5 Represent the physician’s role in health care teams, reflecting on personal strengths and shortcomings and how these influence team function.

7.6 Add to their knowledge of basic medical science topics by engaging in interprofessional seminar groups. Examples include medical ethics (in a mock ethics committee) and fundamentals of radiology (with radiology imaging students).

7.7 Effectively engage in real and simulated patient experiences with health professionals from other disciplines. Examples include home visits, comprehensive evaluation for patients with disabilities, physical examination, mock cardiac arrests with high-fidelity mannequins.

7.8 Apply principles of team dynamics and strategies to prevent and resolve conflict.

7.9 Teach and learn from health professional student colleagues.

7.10 Accept evaluation from other health professional student colleagues.

7.11 Work collaboratively in interprofessional teams to enhance patient safety and quality of care.

8. Citizenship and Service

8.1 Prepare and deliver educational sessions for peers to enhance the academic culture for all.

8.2 Actively participate in the school of medicine and university community.

8.3 Identify the resources and barriers to health of the local and regional practice community, identifying vulnerable and marginalized populations within those communities served.

8.4 Become functional members of our practice community by meeting (and ideally exceeding) the formal graduation requirement of 40 hours of community service.

9. Medical Practice Management

9.1 List the business principles underlying successful health care delivery models.

9.2 Practice team building, personnel management and motivational strategies to promote a functional and successful office practice.

9.3 Advocate for other members of the health care team.

9.4 Discuss reform efforts impacting health care delivery.

10. Concentrated and Independent Learning

10.1 Demonstrate commitment to their education by actively engaging in the Concentration/Capstone project.

10.2 Produce a self-directed capstone project in a selected concentration area.

10.3 Effectively present their completed capstone project within the university, and ideally, to the national or international scientific community.

School of Nursing values include:

- diversity of ideas, persons and cultures
- supportive learning environments
- scholarly undertakings to advance education and practice
- ethical conduct in personal and professional arenas
- holistic nursing across the spectrum of health care
- interprofessional education and collaboration
- innovative learning methodologies

Nursing is a profession based on science, a culture of compassion, commitment to best practices, and connection to individuals. The practice of nursing is research-based, goal-directed, creative and concerned with the health and dignity of the whole person. The art of delivering quality nursing care depends upon the successful mastery and application of intellectually rigorous nursing knowledge.

Undergraduate Program Information

The undergraduate nursing curriculum, which integrates holism, fosters professional socialization for future roles and responsibilities within the profession. Graduates are prepared as generalists to provide evidence-based care. Bachelor's degree nursing education prepares the graduate for entry into professional nursing practice and provides the foundation for graduate study. Three programs are offered: a Bachelor of Science in Nursing for high school graduates, an Accelerated BSN program for second-degree students, and an RN to BSN completion program (online).

Graduate Program Information

The School of Nursing offers four programs leading to a Master of Science in Nursing: Operational Leadership (p. 491), RN to MSN Completion (p. 493), Adult Gerontology Nurse Practitioner (p. 488) and Family Nurse Practitioner (p. 490). In addition, those completing one of the nurse practitioner programs have the option to continue to the DNP degree immediately or up to two years after MSN conferral without reapplying.

A doctoral-level graduate program preparing nurse anesthetists is available for post-bachelor's degree nurses. The school offers three doctoral-level post-master's programs. For more information about these offerings, please see the Graduate Studies (p. 479) section of the catalog.

Career Development

In the School of Nursing, the assistant dean for student services works with students to explore majors and career interests through individual consultations and group sessions, and guides them through a career development process. Assistance is provided with resume and cover letter writing, interview preparation, conducting a job search and graduate school applications. Students can participate in experiential learning through community service as well as internships, part-time and summer employment. A health professions career fair is held every spring at the North Haven Campus.

Mission Statement

To provide leadership in nursing and health care through innovative undergraduate and graduate education that embraces holism, interprofessionalism and inclusivity.

Vision

To prepare transformational leaders in health care.

Values

School of Nursing values include:
• systematic assessment and evaluation
• lifelong learning

**Transforming health care . . . one student at a time**

**Endorsement**
Both undergraduate and graduate nursing programs in Quinnipiac University's School of Nursing are endorsed by the American Holistic Nurses Credentialing Corporation.

**Admission Requirements: Graduate Nursing**
The requirements for admission to the graduate nursing program are detailed in the graduate portion of this catalog.

**Admission Requirements: Undergraduate Nursing**
The requirements for admission into the undergraduate nursing program are the same as those for admission to Quinnipiac University.

**Advanced Standing/Placement**
The Policy for Advanced Standing/Placement, as stated in this catalog, applies to students seeking admission into the undergraduate nursing program. Advanced standing or placement is considered for entering freshmen who have completed college-level credit courses through a recognized college or university, achieved an acceptable score on an appropriate examination of:

1. the Advanced Placement Program of the College Entrance Examination Board;
2. the International Baccalaureate; or
3. the College Level Examination Program.

**Transfer Credit**
Quinnipiac normally grants transfer credit for courses appropriate to the chosen curriculum, completed with a grade of C or better, at a regionally accredited post-secondary institution. Undergraduate nursing students who take courses at another university to repeat a failed course or to repeat a course withdrawal must do so at a four-year institution.

**Transfer Students from Other Colleges/Universities**
Current undergraduate enrollment does not allow for transfer students. In the rare case that space becomes available, prospective students will be informed of the application process.

**Transfer Students from Other Majors within Quinnipiac**
Current undergraduate enrollment does not allow for transfer students. In the rare case that space becomes available, prospective students will be informed of the application process.

**Bachelor’s Degree**
• Bachelor of Science in Nursing (p. 331)
  • Traditional BSN Program for High School Graduates (p. 331)
  • Accelerated BSN Program for Second Degree Students (p. 329)
  • RN to BSN Completion Program (online) (p. 334)

**Graduate Degrees**
• Master of Science in Nursing (p. 487)
  • Post-bachelor’s study
    • Adult-Gerontology Nurse Practitioner (p. 488)
    • Family Nurse Practitioner (p. 490)
    • Operational Leadership (p. 491)
    • RN to MSN Completion program (p. 493)
• Doctor of Nursing Practice (p. 479)
  • Post-bachelor’s study
    • Nurse Anesthesia (p. 481)
  • Post-master’s study
    • Care of Populations (p. 483)
    • Nursing Leadership (p. 484)
    • Nurse Practitioner (p. 486)

**Accreditation**
The baccalaureate degree in nursing program, the master’s degree in nursing program, and the doctor of nursing practice program at Quinnipiac University are accredited by the Commission on Collegiate Nursing Education, 655 K Street NW, Suite 750, Washington DC 20001, 202-887-6791.

The Doctor of Nursing Practice (DNP) program for Nurse Anesthesia is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs (COA).

**Council on Accreditation of Nurse Anesthesia Educational Programs**
Date of next review: April 2024
Attrition: 0
Certification exam pass rate: First-time takers: 80% (8 students); second-time takers: 100%
Employment rate: 100%

ACCELERATED BSN PROGRAM FOR SECOND DEGREE STUDENTS

Program Contact: Mary Peterson (mary.peterson@qu.edu) 203-582-7672

The Accelerated BSN program is designed for individuals with a bachelor's degree in another discipline, who are interested in pursuing nursing as a second bachelor's degree. The curriculum builds on the individual's prior educational preparation, and the degree is completed in one calendar year, starting in August with students concentrating solely on nursing courses. The curriculum is framed using The American Association of Colleges of Nursing (AACN) Essentials of Baccalaureate Education.

Accelerated BSN students complete a traditional junior year curriculum in the nursing program and then an intensive senior summer session. The accelerated BSN must be pursued on a full-time basis and consists of one full calendar year.

**Accelerated BSN Curriculum**

The BSN degree under this program is 127 credits, including: prerequisites, general education requirements and nursing courses, which are distributed as follows:

<table>

- NUR 440L Holistic Nursing Integration Lab IV

Total Credits 127

The curriculum for the professional component is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines. Nursing courses must be taken in the sequence presented in the Accelerated BSN curriculum and students must successfully complete one semester before progressing to the next.

Graduates are eligible to take the NCLEX-RN® examination, and qualify for entry-level nursing positions or graduate study. Those students contemplating applying for graduate study in nursing at Quinnipiac should refer to the Graduate Studies (p. 479) section of the catalog.

**Student Learning Outcomes**

Upon completion of the program, the BSN graduate will demonstrate the following competencies:

1. **Integrate** the university's core liberal education into generalist nursing practice.
2. **Apply** principles of basic organizational and system leadership to deliver high-quality and safe patient care.
3. ** Employ** evidence to deliver best practices in health care.
4. **Utilize** information management and patient care technologies to deliver safe and effective health care.
5. **Recognize** the impact of health care policy, finance and regulatory environments on the delivery of patient care.
6. **Demonstrate** interprofessional communication and collaboration for improving health outcomes.
7. **Incorporate** the concepts of prevention and population health in the delivery of health care.
8. **Exhibit** professional standards and values.

**Admission Requirements: Undergraduate Nursing**

Admission requirements include graduation from a regionally accredited college or university with a cumulative GPA of at least 3.0 (B) and completion of prerequisite course work. All prerequisite courses must be taken within the last five years with a grade of C or better; and must be completed prior to entering the accelerated program. Transfer credit is evaluated according to university policy. A criminal background check and drug screening are required prior to attending the mandatory orientation. Incoming and current students are advised...
that final acceptance and continuation is dependent on a successful background investigation and clearance. The application deadline is January 2; decision letters are sent during the month of March. Applicant information is available on the Quinnipiac website (https://www.qu.edu/admissions).

**Professional Progression Policy**

1. To progress and remain in good standing, accelerated nursing students must attain a semester GPA of 3.0 (B) and receive a grade of C or higher in each classroom and laboratory experience (73 or higher) and a Pass (P) in all clinical practica.
   a. A student who receives less than a C (73) in one nursing course (C, D, F) is unable to progress to the next semester. This student will be given the opportunity to repeat the failed nursing course the next academic year.
   b. Any student who receives less than a C (73) in more than one nursing course (C, D, F) will not be permitted to progress in the program and will be required to change his/her major out of nursing.
   c. A student who receives a grade of Incomplete (I) in any nursing course (lecture, lab or practicum) must meet ALL course requirements for conversion to a letter grade or Pass (P) before the start of the subsequent semester. Failure to do so will require the student to withdraw from the nursing major.

2. A student who earns grades of C or better in all nursing courses yet has less than a 3.0 semester GPA will be placed on academic probation and will receive an academic plan to progress in the nursing major. This student must achieve a 3.0 semester GPA by the end of the next semester. Any student who does not meet these academic criteria will be required to change his/her major out of nursing.

3. Nursing students must achieve a 3.0 semester GPA and a cumulative GPA of 3.0 in their final semester to meet the graduation requirements for the bachelor of science in nursing.

4. A student who is performing at an unsatisfactory level either academically or clinically at the mid-semester point will be notified by the program chair. Written notification will be sent to the student via email. Any student who is having difficulty with academic performance and needs help with study skills or test taking strategies will be advised to utilize the resources offered by the Learning Commons.

5. At the end of each semester, course grades, semester and cumulative GPAs for each nursing student are reviewed by the program chair.

**Appeal Process**

1. A student who wishes to appeal a progression decision must write a letter to the chair of the undergraduate nursing program within one week of receiving notice of his/her inability to progress.

2. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.

3. A student wishing to appeal a course grade should follow the grade appeal process detailed in the University Catalog.

**Eligibility for Licensure**

Graduates are eligible for registered nurse licensure in Connecticut or other states upon satisfactory achievement of the National Council Licensure Examination for Registered Nurses (NCLEX-RN®). In Connecticut, the laws of the state limit the licensure eligibility for any person convicted of a felony or an act that does not conform to the accepted standards of the profession. (Section 19a-14 of the Connecticut General Statutes.) A copy of the act is available for review in the School of Nursing.

**Clinical Requirements**

Students must arrange their own transportation to and from clinical agencies. CPR certification for the health care provider or professional rescuer must be obtained prior to enrolling in the first nursing course, and maintained throughout the program. The School of Nursing has additional health and clinical readiness requirements in addition to those required by the university. A criminal background check and drug screening are required. Incoming and current students will be advised that final program acceptance and continuation is dependent on a successful background investigation and clearance.
BACHELOR OF SCIENCE IN NURSING

Program Contacts: Cory Ann Boyd (Cory.Boyd@quinnipiac.edu)  203-582-8542

The undergraduate nursing program at Quinnipiac University prepares students with the knowledge, skills and attitudes to provide holistic care for diverse individuals, families and populations across the lifespan. Achievement of the program outcomes (p. 331) enables graduates to practice as nurse generalists within complex health care systems. The curriculum is framed using The American Association of Colleges of Nursing (AACN) Essentials of Baccalaureate Education (2008).

The curriculum for the professional component is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines. Nursing courses must be taken in the sequence presented in the curriculum and students must successfully complete one semester before progressing to the next. Initial placement in English and mathematics courses is determined by examination.

Graduates are eligible to take the NCLEX-RN® examination, and qualify for entry-level nursing positions or graduate study. Those students contemplating applying for graduate study in nursing at Quinnipiac should refer to the Graduate Studies (p. 479) section of the catalog.

Student Learning Outcomes

Upon completion of the program, the BSN graduate will demonstrate the following competencies:

1. Integrate the university’s core liberal education into generalist nursing practice.
2. Apply principles of basic organizational and system leadership to deliver high-quality and safe patient care.
3. Employ evidence to deliver best practices in health care.
Admission Requirements: Undergraduate Nursing

The requirements for admission into the undergraduate nursing program are the same as those for admission to Quinnipiac University.

Advanced Standing/Placement

The Policy for Advanced Standing/Placement, as stated in this catalog, applies to students seeking admission into the undergraduate nursing program. Advanced standing or placement is considered for entering freshmen who have completed college-level credit courses through a recognized college or university, achieved an acceptable score on an appropriate examination of:

1. The Advanced Placement Program of the College Entrance Examination Board;
2. The International Baccalaureate; or
3. The College Level Examination Program.

Transfer Credit

Quinnipiac normally grants transfer credit for courses appropriate to the chosen curriculum, completed with a grade of C or better, at a regionally accredited post-secondary institution. Nursing students who take courses at another university to repeat a failed course or to repeat a course withdrawal must do so at a four-year institution.

Transfer Students from Other Colleges/Universities

Current undergraduate enrollment does not allow for transfer students. In the rare case that space becomes available, prospective student will be informed of the application process.

Transfer Students from Other Majors within Quinnipiac

Current undergraduate enrollment does not allow for transfer students. In the rare case that space becomes available, prospective students will be informed of the application process.

Progression Requirements

Preprofessional Progression Policy

1. Students must complete all preprofessional component courses, including all sciences, by the end of the spring semester of their sophomore year prior to starting the professional component in the fall.
2. Students who fail or withdraw from a course in the sophomore year and have a cumulative GPA less than 3.0 by the end of the spring semester of the sophomore year will not be approved to repeat the course toward progression in the nursing program.
3. A minimum cumulative grade point average of 3.0 is required for progression. A student who does not meet these progression requirements will be required to transfer to another major.

Professional Progression Policy

1. To progress and remain in good standing, junior and senior students must attain a semester GPA of 3.0 (B) and receive a grade of C or higher in each classroom and laboratory experience (73 or higher) and a Pass (P) in all clinical prac.
   a. A student who received less than a C (73) in one nursing course (C, D, F) is unable to progress to the next semester. This student will be given the opportunity to repeat the failed nursing course the next academic year.
   b. A student who receives less than a C (73) in more than one nursing course (C, D, F) will not be permitted to progress in the program and will be required to change his/her major out of nursing.
   c. A student who receives a grade of Incomplete (I) in any nursing course (lecture, lab or practicum) must meet ALL course requirements for conversion to a letter grade or Pass (P) before the start of the subsequent semester. Failure to do so will require the student to withdraw from the nursing major.
2. A student who earns grades of C or better in all nursing courses yet has less than a 3.0 semester GPA will be placed on academic probation and will receive an academic plan to progress in the nursing major. This student must achieve a 3.0 semester GPA by the end of the next semester. The student who does not meet these academic criteria will be required to change his/her major out of nursing.
3. A student must achieve a 3.0 semester GPA and a cumulative GPA of 3.0 in the final semester to meet the graduation requirements for the bachelor of science in nursing.
4. A student who is performing at an unsatisfactory level either academically or clinically at the mid-semester point will be notified by the program chair. Written notification will be sent to the student via email. A student who is having difficulty with academic performance and needs help with study skills or test taking strategies will be advised to utilize the resources offered by the Learning Commons.
5. At the end of each semester, course grades, semester and cumulative GPAs for each nursing student are reviewed by the program chair.

Appeal Process

1. A student wishing to appeal a progression decision must write a letter to the chair of the undergraduate nursing program within one week of receiving notice of his/her inability to progress.
2. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
3. A student wishing to appeal a course grade should follow the grade appeal process detailed in the University Catalog.

Eligibility for Licensure

Graduates are eligible for registered nurse licensure in Connecticut or other states upon satisfactory achievement of the National Council Licensure Examination for Registered Nurses (NCLEX-RN®). In Connecticut, the laws of the state limit the licensure eligibility for any person convicted of a felony or an act that does not conform to the accepted standards of the profession. (Section 19a-14 of the Connecticut General Statutes.) A copy of the act is available for review in the School of Nursing.

Clinical Requirements

Students must arrange their own transportation to and from clinical agencies. CPR certification for the health care provider or professional rescuer must be obtained prior to enrolling in the first nursing course,
and maintained throughout the program. The School of Nursing has additional health and clinical readiness requirements in addition to those required by the university. A criminal background check and drug screening are required. Incoming and current students will be advised that final program acceptance and continuation is dependent on a successful background investigation and drug screen clearance.
RN TO BSN COMPLETION PROGRAM (ONLINE)

Program Contact: Laima Karosas (laima.karosas@qu.edu) 203-582-5366

The RN to BSN completion program is designed for individuals who are licensed as a registered nurse and are interested in pursuing a part-time bachelor’s degree in nursing using a distance education format through QU Online. The curriculum builds on the individual’s prior educational preparation and incorporates the American Association of Colleges of Nursing (AACN) Essentials of Baccalaureate Education.

An RN to MSN completion program is available. For more information, please visit the Graduate Studies (p. 493) section of the Catalog.

Nursing Major Requirements

Students take 32 required credits for the nursing major: nursing courses (29 credits), and an open elective (3 credits). All nursing courses are offered online. Fieldwork is a required component of several courses to successfully complete this program of study.

Graduation Requirement: 120 credits

The nursing curriculum is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

Note: if less than 88 credits are awarded, then Advanced Core courses and/or electives are required.

Student Learning Outcomes

Upon completion of the program, the BSN graduate will demonstrate the following competencies:

1. **Integrate** the university’s core liberal education into generalist nursing practice.
2. **Apply** principles of basic organizational and system leadership to deliver high-quality and safe patient care.
3. **Employ** evidence to deliver best practices in health care.
4. **Utilize** information management and patient care technologies to deliver safe and effective health care.
5. **Recognize** the impact of health care policy, finance and regulatory environments on the delivery of patient care.
6. **Demonstrate** interprofessional communication and collaboration for improving health outcomes.
7. **Incorporate** the concepts of prevention and population health in the delivery of health care.
8. **Exhibit** professional standards and values.

Admission Requirements: RN to BSN Completion Program

Admission requirements include graduation from a regionally accredited college or university with an associate’s degree or a diploma in nursing with a cumulative grade point average of at least 2.7; a current registered nurse license in good standing; two letters of recommendation (one from a current supervisor); a personal statement, transcripts from all postsecondary institutions attended; and a resume or curriculum vitae. A criminal background check and drug screening is required prior to entering the program. Incoming and current students will be advised that final acceptance and continuation is dependent on a successful background investigation and clearance.

Application and orientation procedures are managed through Quinnipiac University Online (https://quonline.quinnipiac.edu/online-programs/online-undergraduate-programs/bs-in-nursing).

Qualified students enrolled in the RN to BSN completion program may pursue a seamless transition into the MSN in Operational Leadership (p. 491) program. 7-9 credits from the undergraduate RN to BSN program may be utilized in the MSN program.

Advanced Placement Credits

Students with an associate’s degree in nursing may transfer up to 88 credits for this program. Those students who do not have 88 transfer credits can make up the deficit with Advanced Core credits and electives taken at Quinnipiac.

Advanced Core Credits

BSN completion students can take up to 20-credit advanced core. The advanced core reflects the aims and goals of the traditional University Curriculum and the Essential Learning Outcomes while acknowledging the prior general education work completed at the associate’s degree level.

Progression

1. To progress and remain in good standing, RN-BSN students must attain a semester GPA of 2.0 (C) and receive a grade of C or higher
in all nursing courses and fieldwork experiences (73 or higher). Students enrolled in the RN-BSN program should additionally refer to the University Academic Policies (p. 68).

Appeal Process
1. A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of his/her inability to progress.
2. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
3. A student wishing to appeal a course grade should follow the grade appeal process (p. 122).

Fieldwork Requirements
Students must arrange their own transportation to and from clinical agencies. CPR certification for the health care provider or professional rescuer must be obtained prior to enrolling in the fieldwork course, and maintained annually until all fieldwork is completed. The School of Nursing has health requirements and technical standards, criminal background check and drug screening requirements. Incoming and current students are advised that final program acceptance and continuation is dependent on a successful background investigation and clearance.

Quinnipiac University offers the ability to obtain a degree on a part-time basis in select programs. Part-time students are an integral part of the university and benefit from the many resources and services (p. 22) available to students. For example, academic support is available in the Learning Commons (p. 27), which maintains evening hours. In addition, Quinnipiac offers several ways to use previous collegiate and noncollegiate learning experiences to award college credit and also recognizes student financial needs through payment plans and financial assistance.

Non-Matriculated Students

Part-time students may take a limited number of courses without applying for admission (non-matriculated) if they are attempting to build an academic record after many years of absence from school, or are not ready to pursue a degree program. To be considered for non-matriculated study, the student must have earned a high school diploma. A maximum of 6 credits may be taken in any semester on a space-available basis. Advanced courses may require specific prerequisites and permission for registration. Non-matriculated students must contact the registrar’s office for further information about registration.

A student who does not meet the above requirements may not register as a non-matriculated student and must contact the admissions office at 203-582-8612 to apply for part-time study and provide official high-school and college transcripts. Current non-matriculated students are encouraged to apply for admission/change of status as soon as possible to ensure guidance with course selection and a degree program. No more than 12 credits may be completed by non-matriculated students in the School of Business.

Changing Status—Non-degree to Degree

Students who have earned credit at Quinnipiac and wish to apply for matriculation into a degree program in the College of Arts and Sciences or the Schools of Business, Engineering, Communications or Health Sciences, should initiate the admission process by filing a “Change of Status” form available from the Office of Part-time Admissions. All appropriate documents required by the university for admission should be sent to the same office. Course work already completed at Quinnipiac as a non-degree student is considered in the admission process, as well as course work from other institutions. Students should contact the Office of Transfer and Part-time Admissions at 203-582-8612 with any questions.

Academic Good Standing Policy

All part-time students, whether matriculated or non-matriculated, are subject to the Academic Good Standing Policy of the University. See Academic Good Standing Policy for Undergraduate Students (p. 69).

Academic Policies

The detailed academic policies that govern all students are found in the undergraduate Student Handbook (https://www.qu.edu/student-resources/university-policies.html), Graduate Student Handbook (https://www.qu.edu/content/dam/quin/documents/policies/graduate-student-handbook-2017-18.pdf) and in the policy section of this catalog (p. 68). Below are the basic academic policies that govern part-time students.

Placement Tests

To ensure appropriate placement in English courses, all transfer students with only one semester of English transferring in from another school must take the English placement test.

A math placement exam is also required to determine appropriate placement before registering for math courses required in all majors; and a language placement test is required for students continuing in a language from high school.

There is no fee for the placement exams, and arrangements can be made for taking the tests through the appropriate academic department.

Transfer of Credit

Credits for college courses taken at other regionally accredited institutions normally may be transferred if they carry a grade of C or better. Evaluation of University Curriculum transfer credit is completed by the transcript evaluator. Additional credits are reviewed by the school to which the student has transferred. Official acceptance of transfer credit is completed upon matriculation.

AP and CLEP Exam Policies

Quinnipiac University participates in the Advanced Placement (AP) program and the College Level Examination Program (CLEP), which provides an opportunity for students to obtain credit through examination (credits are accepted as transfer) for AP and CLEP exams taken prior to matriculation at Quinnipiac. Information regarding AP and CLEP exams may be obtained from the Office of Transfer and Part-time Admissions.

Military Credit for Prior Learning

Quinnipiac evaluates military training and experience according to the American Council on Education (ACE) standards for recommended college credit. Veterans and service members may be eligible for college credit based on their military experience, coursework, or other training as documented on their Joint Services Transcript—(JST)/ Community College of the Air Force (CCAF) transcript. Determination of credit award is based on competencies and approved by school or college dean’s offices. Students must be matriculated at Quinnipiac to earn credit for military experience.

Registration

Course offerings and registration forms are available on the Registrar’s Office website (https://www.qu.edu/info-for/registrar.html). Registration is completed by submitting the electronic forms. Currently enrolled students may register via Student Planning within their scheduled window each semester. Students should check course descriptions for any specific prerequisites prior to registering.

Special Programs

Accelerated Online Courses

Part-time students may be able to complete some requirements more rapidly and shorten the path to their degrees with these options. A limited
number of accelerated (seven-week) online courses are offered year round.

Auditing Courses
Alumni and seniors (65 and older) may audit courses on a space-available basis. The student is responsible for the registration fee and any technology fees. In addition, seniors may take courses for credit, on a space-available basis, by paying the registration fee and any technology fees. Questions should be directed to the Registrar’s Office.

Bachelor’s Degrees
• Bachelor of Arts in Liberal Studies (p. 338)
• Bachelor of Science in Health Science Studies (p. 339)

Bachelor of Arts and Bachelor of Science Degrees
Traditional Majors
Part-time students may enroll in the bachelor’s degree programs offered by the College of Arts and Sciences, School of Business, School of Communications and School of Engineering. Part-time students may only enroll in the following bachelor’s degree programs offered by the School of Health Sciences: Biomedical Sciences, Health Science Studies and Microbiology/Immunology. While some evening courses may be available, most degree programs cannot be completed solely through evening work. More information on these programs can be found in the sections for the Schools of Business (p. 217), Communications (p. 244), Engineering (p. 261), Health Sciences (p. 273) and College of Arts and Sciences (p. 152).

Part-time Admission Procedures
Adult students starting college for the first time, returning to school after an absence, or considering transferring to the College of Arts and Sciences or the Schools of Business, Communications, Engineering or Health Sciences should contact the Office of Transfer and Part-time Admissions at 203-582-8612 for an appointment at any time of the year to discuss the courses or programs offered by Quinnipiac.

Applications for admission may be obtained from the Quinnipiac website (https://www.qu.edu). The admissions requirements for undergraduate applicants listed in this catalog are the same for part-time candidates, with the following exceptions:

1. Applicants who graduated high school more than five years ago or who have successfully completed the equivalent of one year (30 credits) of college study are not required to submit score results for the Scholastic Assessment Test (SAT) of the College Entrance Examination Board (CEEB) or of the American College Testing Program (ACT).
2. Applicants who have earned an associate’s degree from a regionally accredited college need not submit high school transcripts.
3. An interview is recommended.

Financial Assistance
Quinnipiac Tuition Assistance Program
Undergraduate part-time students who are beginning their study in traditional on ground course work and those who have special financial needs can apply for Quinnipiac Tuition Assistance (QTAP) grants. QTAP grants are awarded shortly before the start of the fall and spring semesters and may be used only to defer tuition costs. The application and a copy of the applicant’s most recent tax return should be submitted by the deadline dates: Jan. 4 for the spring semester and Aug. 15 for the fall semester. Students must file a new application for each semester they request aid. Applications may be obtained through the Office of Transfer and Part-time Admissions.

Federal Financial Aid Programs
Undergraduate part-time students who have been admitted by Quinnipiac into a degree program and are registered for a minimum of 6 credits each semester are eligible to apply for federal financial aid programs (loans and grants). The free application for Federal Student Aid (FAFSA) is available online (http://www.fafsa.ed.gov). Students taking fewer than 6 credits may be eligible for federal Pell Grants. Contact the Financial Aid Office for information and assistance.

Employer Tuition Benefits
Quinnipiac University works with students to make the most of their employer’s educational benefits plan. If your company does not have a formal agreement with Quinnipiac but does offer educational benefits, you can defer two-thirds of your tuition charges. All that is needed is an original employer letter verifying participation in the company tuition reimbursement plan during the semester for which they are registering. At registration, the student pays one third of the tuition plus fees and signs a promissory note for the tuition balance. The final tuition payments are due five weeks after the last day of the semester, which allows time for tuition reimbursement checks to be issued by the employer. Contact the Bursar’s Office for information.

Payment Plans
Students who do not participate in company tuition reimbursement plans can still set up a tuition payment plan. Plans are offered through Nelnet Business Solutions on an annual semester basis. There is a charge of $75 to enroll. Contact the Bursar’s Office for assistance.
The Liberal Studies degree program offers the opportunity for adult and nontraditional students to choose concentrations in a number of fields. Eligible students have maximum flexibility in the utilization of previously earned credit and in the selection of new courses to meet their personal and academic goals. Each program is individually designed by the student with approval by the dean of the College of Arts and Sciences. Students complete the College of Arts and Sciences requirements, 15 credits at the 300-level and at least 27 credits in the area of concentration.
BACHELOR OF SCIENCE IN HEALTH SCIENCE STUDIES

The Health Science Studies program provides an excellent opportunity for health care and science professionals who hold an associate's degree to obtain the bachelor's degree. The program provides the maximum utilization of previously acquired credits from academic and clinical training. An individual curriculum plan, approved by an academic adviser, can be designed that allows flexibility in choosing courses to build concentrations in the health science fields, as well as in other areas such as business, management, psychology and sociology.

Mission Statement

Through its graduate programs, Quinnipiac University recognizes a substantial trend toward greater professionalism and the rapidly expanding body of knowledge in the fields of business, communications, education, social work, health management and the health care, rehabilitative and laboratory sciences. The provision of graduate degrees is a logical extension of Quinnipiac’s special mission, which is “to provide opportunity for an integrated liberal and technical education” that will enable students to prepare for and advance in their professional careers and to “make responsible decisions in a society that increasingly demands understanding of the humanities, the social and natural sciences and technology.”

All graduate programs at Quinnipiac share three foundations. Instruction is provided by a team of academicians who hold the highest available academic credentials and practicing professionals who hold advanced positions in their field. Every graduate student is provided with the opportunity to obtain practical experience through supervised residencies, thesis research, special projects or small laboratory classes. Study in all graduate programs is advanced and builds on both undergraduate education and professional experience. Additional prerequisite courses are needed by students who enter new fields at the graduate level.

Graduate Admission

Applications for all graduate programs, except law and medicine, may be obtained and submitted from the Quinnipiac Admissions website (http://www.qu.edu/gradadmission). For information about online admissions, visit QU Online Admissions (https://quonline.quinnipiac.edu/become-a-student/admissions-process.php). Applicants are required to submit an application fee and official transcripts of all college-level work completed at other institutions. Applicants also are required to submit a letter of intent and resume (as stipulated by each specific program) and to make arrangements to have two letters of reference submitted.

Individual graduate programs have additional application requirements. For example, GMAT or GRE scores are required for admission into the MBA program.

The Quinnipiac physician assistant program participates in the Central Application Service for Physician Assistants. Go to the CASPA website (https://caspa.liaisoncas.com) for more information regarding the application process and fees. All applications, transcripts, references and other supporting materials are submitted directly to CASPA. Applicants may contact the Office of Graduate Admissions for information.

Submission of Graduate Record Examination scores is not required for admission into Quinnipiac’s master’s degree programs except for the MMSc in anesthesiologist assistant program (however, this program will accept the MCAT in lieu of the GRE). However, many program faculty find GRE scores a useful indication of a student’s ability. Information about specific admissions requirements or standardized exams can be obtained from the Office of Graduate Admissions, the Admissions website (http://www.qu.edu/gradadmission) or the Quinnipiac Online website (https://quonline.quinnipiac.edu).

International Student Admission

Applications for graduate study from international students are welcomed. International applicants must complete their application at least three months prior to their intended start term. Upon application, international students are requested to submit English language
descriptions of universities and colleges attended including status as a public or private institution as well as recognition by government and accrediting agencies of the respective country.

All applicants from non-English-speaking countries must, in addition to all of the regular admissions requirements, provide TOEFL (Test of English as a Foreign Language) scores (go to ets.org ([http://www.ets.org](http://www.ets.org))). In general, a minimum Toefl IBT score of 90, Internet-based (575 paper-based, 233 computer-based) is required for admission. In lieu of TOEFL, applicants may submit IELTS (International English Language Testing System) scores (go to ielts.org ([http://www.ielts.org](http://www.ielts.org))). A minimum score of 6.5 on this exam, “B” or above on the CAE (Certificate of Advanced English), or “C” or above on the CPE (Certificate of Proficiency in English) is required. In lieu of TOEFL or IELTS, applicants may submit PTE-A (Pearson Test of English Academic) scores (available at pearsonPTE.com ([http://www.pearsonPTE.com](http://www.pearsonPTE.com))). A minimum PTE-A score of 61 is required. TOEFL, IELTS and PTE scores are valid for two years.

Candidates holding degrees from foreign institutions must provide notarized English translations and an official evaluation of their post-secondary records from an academic credential evaluation service. Applicants for the PA program must possess a bachelor’s degree from a regionally accredited institution in the United States or a nationally recognized foreign institution and all PA program prerequisites must be completed at a regionally accredited institution in the U.S.

International applicants are required to submit proof of adequate funds to complete their study at Quinnipiac before a visa application can be issued.

**Graduate Financial Assistance and Scholarship Information**

**Graduate Financial Assistance**
Financing a graduate education is a significant investment for students. To assist students, Quinnipiac provides several financial aid programs to help graduate students fund their education. Financial aid is available to both full-time and part-time students. Graduate students who are matriculated, enrolled at least half-time (5–8 credits) and making satisfactory academic progress in a degree programs are eligible to receive financial aid.

**Graduate Assistantships**
Graduate assistantships are available on a limited basis to both full-time and part-time graduate students. There are two types of assistantships. Students whose services and skills are utilized in practical, clinical or laboratory sciences, molecular and cell biology, nursing, pathologists’ assistant, physician assistant, radiologist assistant and social work. Candidates are evaluated based on academic potential in their chosen graduate degree field, as evidenced by academic and related performance to date. Eligibility is determined by a scholarship committee based on the program director’s recommendations during the admissions application process. Financial need is not a factor in the selection.

 Candidates interested in merit scholarships are encouraged to apply early in the admissions application process. Every admitted full-time applicant is considered for the scholarship and recipients are determined no later than March 15 for programs that begin in the summer. Scholarship recipients for programs that begin in the fall are determined no later than July 15. Due to limited funding, these scholarships are not available to international students.

Scholarships are renewable so long as students maintain full-time enrollment and a cumulative grade point average of 3.25 each semester.

**Quinnipiac University Graduate Merit Scholarship**
Quinnipiac University’s graduate merit scholarships are awarded on a competitive basis to a select number of newly admitted full-time on-campus graduate students who demonstrate exceptional promise of achieving academic excellence. The scholarships are offered to full-time students who are entering the following traditional on-campus programs: business administration, cardiovascular perfusion, journalism, medical laboratory sciences, molecular and cell biology, nursing, pathologists’ assistant, physician assistant, radiologist assistant and social work.

Candidates are evaluated based on academic potential in their chosen graduate degree field, as evidenced by academic and related performance to date. Eligibility is determined by a scholarship committee based on the program director’s recommendations during the admissions application process. Financial need is not a factor in the selection.

Candidates interested in merit scholarships are encouraged to apply early in the admissions application process. Every admitted full-time applicant is considered for the scholarship and recipients are determined no later than March 15 for programs that begin in the summer. Scholarship recipients for programs that begin in the fall are determined no later than July 15. Due to limited funding, these scholarships are not available to international students.

Scholarships are renewable so long as students maintain full-time enrollment and a cumulative grade point average of 3.25 each semester.

**Quinnipiac Graduate Grant**
Quinnipiac University provides institutional grants to our full-time, on-campus graduate students with the highest financial need. To determine who should be appropriately funded by this grant, we use an institutional application in conjunction with the FAFSA. The grant is nonrenewable.

**Loan Programs**
Graduate students may be eligible for several different types of loan programs offered at the university. Federal loans are available to students who:

1. meet the general requirements;
2. are U.S. citizens or eligible noncitizens; and
3. are registered with Selective Service (male students only).

Private alternative loans also are available and do not require the same criteria as listed above. These types of loans are based on enrollment and an individual’s personal credit standings.

**Applying for Financial Aid**
Students seeking financial aid should complete, as soon as possible, a “Free Application for Federal Student Aid.” This may be completed online at fafsa.gov ([http://www.fafsa.gov](http://www.fafsa.gov)). Be sure to indicate the federal school code 001402. In addition, a financial aid application is required to award student aid. The form can be downloaded from the Graduate Financial Aid ([https://www.qu.edu/graduate-tuition-financial-aid/forms-policies.html](https://www.qu.edu/graduate-tuition-financial-aid/forms-policies.html)) section of Quinnipiac’s website.

**Requirements for Graduation**

**Master of Arts in Teaching Program**
1. Satisfactory completion of all MAT program requirements.
2. Satisfactory completion of the Connecticut State Department of Education’s certification requirement of demonstrated competence in language arts, mathematics, natural sciences, social sciences
343

(including a U.S. history course), the fine arts, physical education and health, a world language, and computer and other technology.
3. Satisfactory results on the appropriate PRAXI II and CT Foundation of Reading tests.
4. A preferred cumulative GPA of at least 3.0.
5. Completion of the full-time internship.

Master of Business Administration
1. Satisfactory completion of all MBA program requirements (46 credits).
2. A cumulative GPA of at least 3.0.
3. A minimum grade of C in all MBA program courses taken at Quinnipiac.

Master of Science in Accounting
1. Satisfactory completion of all MS in Accounting program requirements (30 credits).
2. A cumulative GPA of at least 3.0.
3. A minimum grade of C in all MS program courses taken at Quinnipiac.

Master of Science in Business Analytics
1. Satisfactory completion of all MS in Business Analytics program requirements (33 credits).
2. A cumulative GPA of at least 3.0.
3. A minimum grade of C in all MS program courses taken at Quinnipiac.

Master of Science in Cybersecurity
1. Satisfactory completion of all MS in Cybersecurity program requirements (36 credits).
2. A cumulative GPA of at least 3.0.
3. A minimum grade of C in all MS program courses taken at Quinnipiac.

Master of Science in Organizational Leadership
1. Satisfactory completion of all MS in Organizational Leadership program requirements (33 credits).
2. A cumulative GPA of at least 3.0.
3. A minimum grade of C in all MS program courses taken at Quinnipiac.

Master of Health Science
(Radiologist Assistant)
1. Satisfactory completion of all MHS-RA curriculum requirements.
2. Satisfactory completion of all American Registry of Radiologic Technologists (ARRT) examination requirements.
3. A cumulative GPA of at least 3.0.

Master of Science in Instructional Design
1. Satisfactory completion of all MS in Instructional Design program requirements, including capstone project (30 credits).
2. A cumulative GPA of at least 3.0, with no course grade below B-.

Master of Science in Interactive Media and Communications
1. Satisfactory completion of 30 credits of graduate study.
2. A cumulative GPA of at least 3.0 and no grade less than a C.
3. Completion of the capstone course.

Master of Science in Journalism
1. Satisfactory completion of 36 credits of graduate study.
2. A cumulative GPA of at least 3.0 and no grade less than a C.
3. Completion of research thesis or professional project.

Master of Science in Molecular and Cell Biology
1. Satisfactory completion of at least 34 credits of graduate study.
2. Satisfactory completion of specific course requirements.
3. Candidates must maintain a minimum cumulative GPA of 3.0 to remain in the MCB program.

Master of Science in Nursing
1. Satisfactory completion of all core courses and appropriate specialty courses.
2. A cumulative GPA of at least 3.0.
3. Satisfactory completion of the precepted practice hour requirement.
4. A minimum grade of B- in all nursing courses.

Doctor of Nursing Practice
1. Satisfactory completion of all core courses and appropriate specialty courses.
2. A cumulative GPA of at least 3.0.
3. Satisfactory completion of the precepted practice and fieldwork hour requirement.
5. A minimum grade of B- in all doctoral nursing courses; B for nurse anesthesia courses.

Entry-level Professional Doctor of Occupational Therapy
1. Satisfactory completion of all graduate curriculum requirements.
2. A minimum grade of B- in all didactic courses.
3. A “pass” in all Level II Fieldwork and Doctoral Capstone courses.
4. A cumulative GPA of at least 3.2 for each semester of graduate study.
Master of Occupational Therapy
1. Satisfactory completion of all graduate curriculum requirements.
2. A minimum grade of C+ in all didactic courses.
3. A “pass” in all Level II Fieldwork courses.
4. A cumulative GPA of 3.0 for each semester of graduate study.

Post-Professional Occupational Therapy Doctorate
1. Satisfactory completion of all OTD program requirements (32 credits).
2. A cumulative GPA of at least 3.2.

Doctor of Physical Therapy
1. Satisfactory completion of all graduate curriculum requirements.
2. A minimum grade of C+ in all graduate courses.
3. A cumulative GPA of 3.0 for each semester of graduate study.

Master of Science in Public Relations
1. Satisfactory completion of 36 credits of graduate study.
2. A cumulative GPA of at least 3.0 and no grade less than a C.
3. Completion of research thesis or professional project.

Master of Science in Teacher Leadership
1. Satisfactory completion of all MS in Teacher Leadership program requirements (30 credits).
2. A cumulative GPA of at least 3.0, with no course grade below B-.
3. Satisfactory completion of the specialization area capstone project.

Master of Social Work
1. Satisfactory completion of all MSW program requirements (60 credits), including a capstone project and field placements.
2. A cumulative GPA of at least 3.0.

Sixth-Year Diploma in Educational Leadership
1. Satisfactory completion of all program course work, including the internship.
2. Satisfactory results (passing) on the Connecticut Administrator test (CAT).
3. Successful completion of all performance tasks.
4. A cumulative GPA of at least 3.0, with no course grade below B-.

The Accelerated Dual-Degree Bachelor’s/Master of Social Work (3+2) program is an excellent choice for the highly motivated student seeking a rewarding and successful career as a social worker.

Social work is one of the fastest growing occupations in the United States. As social workers, graduating students have the ability to enter a broad range of high-demand fields. Emergency rooms, rehabilitation facilities and youth centers all rely on social workers to treat veterans with PTSD, neglected children, people with chronic illnesses and many others. Our program prepares you for licensure and gives you the tools you’ll need to provide patients with counseling, crisis intervention and access to social welfare and community resources.

You’ll act as a crucial link between patients and their caregivers, ensuring that they are receiving proper attention. Our curriculum emphasizes interprofessional education to familiarize you with a team-based health care approach while also giving you the freedom to tailor your degree to your specialty.

Through this accelerated dual-degree program, you’ll complete both your bachelor’s degree and your Master of Social Work (p. 404) in just 5 years.

Accelerated Dual-Degree Bachelor’s/MSW (3+2) Curriculum Requirements

The most common majors for students who are anticipating graduate study in social work are Sociology, Criminal Justice, Gerontology and Psychology1; however this accelerated program is open to students in any Arts and Sciences major. Students are advised that this accelerated degree will require overloads and summer coursework to complete the bachelor’s degree in three years.

Students must work with their advisers to carefully plan their course of study to ensure completion of the BA or BS degree in three years. Students admitted to the program take 9 credits of graduate coursework in their third year. Suggested curriculum is as follows:

Total Credits 120-121

Once admitted to the program, students must maintain an undergraduate GPA of 3.0, complete 20 credits in liberal arts, and a statistics course with a grade of C or higher. Additionally, students must achieve a grade of B or higher in their three graduate courses. A maximum of 9 credits may be used to fulfill both undergraduate and graduate requirements. Students earn their Master of Social Work upon satisfactory completion of all of the graduate curriculum requirements.

1  Psychology majors who are interested in the dual-degree program follow a different curriculum, and should consult with their adviser.
2  Courses are chosen in consultation with an adviser to meet the requirements for Personal Inquiry I and Personal Inquiry II.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 17) page of this catalog.

Please note: Students cannot be added to the Accelerated Dual-Degree Bachelor’s/MSW (3+2) program after matriculating at Quinnipiac.
Dual-Degree BA/MAT or BS/MAT in Elementary Education (4+1)

Program Contact: Christina Pavlak
(christina.pavlak@qu.edu), 203-582-3192

The purpose of Quinnipiac’s Dual-Degree BA/MAT or BS/MAT program is to prepare graduates with perspectives, knowledge and skills to become master educators. The School of Education recognizes that the concept of educator is three-dimensional, and that successful educators must be teachers, learners and leaders. Therefore, graduates of the Master of Arts in Teaching program are teachers who lead all students to learn, learners who continue to learn as they continue to teach, and leaders who influence the culture of their schools in ways that support best practices in teaching and learning.

The program reflects the spirit and mission of Quinnipiac University with close attention to the teaching standards for the state of Connecticut and to the standards of the National Council for the Accreditation of Teacher Education (NCATE). The three values of “excellence in education, a sensitivity to students, and a spirit of community” which are at the heart of Quinnipiac’s mission statement are woven through the program.

General Information
The dual-degree program provides the means for Quinnipiac students to earn a bachelor’s degree in an academic major and a master of arts in teaching degree leading to certification through the Connecticut State Department of Education. Consistent with the university’s mission, arts and sciences studies are integrated with professional studies to prepare graduates who have depth and breadth of content knowledge and strong pedagogical skills.

The dual-degree program is divided into a two-year preprofessional component and a three-year professional component. The two-year preprofessional program includes a required introductory course (ED 140) that acquaints prospective teacher candidates with the teaching profession. Students are encouraged to take this course during their freshman year but no later than the fall semester of their sophomore year. Additional courses required before the junior year include educational philosophy and diversity (ED 250 and ED 260).

Students begin their professional component in the fall semester of their junior year. Supervised fieldwork, an integral part of the professional component, includes undergraduate observation and fieldwork, a graduate internship/residency, and student teaching. Following completion of the fourth year of study, students receive a bachelor of arts or bachelor of science degree in their academic major. Students begin their graduate work immediately following graduation. Any teacher candidate enrolled in the dual-degree program who does not complete all the requirements for undergraduate completion of the bachelor of degree as anticipated will not be allowed to enter any graduate fifth year without the written consent of the program director.

Note: Because the MAT program is subject to state review on a regular basis, prospective and current students are advised to see the School of Education for up-to-date program information.

Dual-Degree BA/MAT or BS/MAT in Elementary Education

The elementary education program is designed to prepare the teacher candidate with in-depth content knowledge across the elementary school curriculum and exemplary skills in teaching and classroom management. Students interested in elementary education may major in any discipline or have an interdisciplinary major.

Central to candidates’ professional studies are undergraduate service-based courses (ED 341L, ED 342L, ED 466L and ED 468L) in which candidates gain 80 hours of hands-on experience, and the full-year graduate internship/residency experience in partner schools.

General Requirements
The following courses meet the Connecticut State Department of Education’s general education requirements. A grade of “C” or better is required in these courses (except as noted).

candidates will demonstrate the following competencies:

1. **Content Knowledge**: Identify and define the major concepts of their discipline and understand that content is dynamic and ways of knowing are constantly changing.

2. **Instructional Strategies**: Recognize varied instructional practices and apply appropriate instructional strategies based upon principles of effective teaching.

3. **Learning Differences, Learner Development**: Recognize the complexity of human diversity and provide an instructional program that is responsive to the needs of diverse students.

4. **Instructional Strategies**: Apply appropriate technology to enhance the teaching and learning process.

5. **Professional Learning and Ethical Practice**: Demonstrate the skills and commitment to engage in reflective, mindful practice.

6. **Assessment**: Use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.

7. **Professional Learning and Ethical Practice**: Recognize that since content is dynamic and ways of knowing are constantly changing, the profession requires a commitment to continuous learning.

8. **Leadership and Collaboration**: Recognize that education has the power to be transformative and that their role as educators includes the responsibility to advocate on behalf of their students in order to promote social justice.

9. **Professional Learning and Ethical Practice, Leadership and Collaboration**: Demonstrate a willingness to work collaboratively with peers, practitioners in the field and/or MAT instructors to sustain a professional learning environment to support student learning.

10. **Leadership and Collaboration**: Demonstrate an understanding that scholarly research is essential to improving their own practice and to enhancing the knowledge base of the profession.

### Admission

Admission to the dual-degree program is based on a holistic review by MAT program faculty of the following admission requirements:

- A 3.0 minimum overall undergraduate GPA (from all colleges and universities attended) for 45 credits of coursework with a subject area major or appropriate interdisciplinary major.

- Students applying to the MAT program are required to take one of the following tests: Praxis Core Mathematics, Reading and Writing tests, the SAT or the ACT. Scores will be reviewed by School of Education faculty as part of the retention review process.

- At least two written recommendations from individuals who have recent knowledge (within the last two years) of the applicant’s suitability as a prospective educator, including one from a college instructor.

- A written essay completed in ED 140 that meets program standards.

- A formal retention review interview during which the applicant is expected to demonstrate: an ability to communicate clearly; a demeanor appropriate to the teaching profession; and a maturity and attitude necessary to meet the demands of the MAT program.

### Retention

Students who are accepted into Quinnipiac University as full-time students and who indicate a desire to teach are admitted into the MAT program upon acceptance, with the understanding that a retention review will be done by MAT faculty in the sophomore year.

Continuation in the dual-degree program is based on a holistic retention review during the spring sophomore semester by MAT faculty. The review requires that specific criteria have been met in order to remain in the teacher preparation program:

1. A 3.0 minimum overall undergraduate GPA (from all colleges and universities attended) for 45 credits of coursework with a subject area major or appropriate interdisciplinary major (applicants with an overall GPA below 2.67 will not be considered).

2. At least two written recommendations from individuals who have recent knowledge (within the last two years) of the applicant’s suitability as a prospective educator, including one from a college instructor.

3. A written essay completed in ED 140 that meets program standards.

4. Evidence of strong basic skills in math, reading and writing in order. Evidence can be provided through SAT or ACT scores. Alternatively, evidence may also be provided through completion of the Praxis Core Academic Skills Test. SAT, ACT or Praxis Core results will be reviewed by the program director. Any MAT candidate whose scores indicate an area of weakness will be required to participate in a non-credit bearing remediation program that addresses any area of underperformance in math, reading or writing. Once completion of the remediation process is done by the candidate, the status of the candidate will be reviewed. All candidates will be considered probationary status until the improvement of basic skills are documented and remediated.

5. A formal retention review interview during which the applicant is expected to demonstrate: an ability to communicate clearly; a
demeanor appropriate to the teaching profession; and a maturity and attitude necessary to meet the demands of the MAT program.

6. Effective July 1, 2010, Connecticut law requires all teacher candidates to undergo a criminal background check prior to being placed in a public school setting for field study, internship and student teaching. Because a clinical experience is an integral part of each semester, failure to abide by this law will make an applicant ineligible for admission to the program. The School of Education has procedures in place to assist candidates in obtaining the background check. The cost of the background check is the responsibility of the teacher candidate.

Teacher candidates in the MAT program at Quinnipiac are expected to demonstrate the professional behaviors and dispositions articulated in both the School of Education’s Professional Attributes and Dispositions document and the CT Code of Professional Responsibility for Teachers. Candidates must maintain an overall B (3.0) undergraduate GPA with a C or better in all general education courses required for the MAT program. In addition, candidates must earn a B or better in all education courses (undergraduate and graduate), as well as maintain 3.0 GPA for all education coursework to remain in good standing in the program. A grade of C+ or below in any education course (including the graduate content area courses) requires the candidate to retake the course at his/her expense and earn the minimum B grade.

If the candidate fails to maintain the minimum GPA, that candidate may be allowed to remain in the program for a single semester on probationary status. If a candidate on probation fails to meet the minimum GPA by the end of the single probationary semester, that candidate is dismissed from the program. Granting of probationary status is subject to the director’s approval and is neither automatic nor guaranteed.

All candidates must maintain a minimum 3.0 GPA in all major coursework to remain in good standing in the program to be recommended for certification. In addition, teacher candidates who earn a C+ or below in two or more undergraduate courses in their major will be required to meet with the MAT program director to discuss continuation in the program.

Candidates failing to meet professional standards in the program may be subject to suspension or dismissal. In addition, candidates who exhibit a lack of effort or responsibility in the program, or who reveal interpersonal skills unsuited or inappropriate for teaching, will be required to meet with the MAT program director to discuss continuation in the program.

Completion
To qualify for teacher certification, students must complete all requirements of the MAT program. Candidates must complete all course work, fulfill the internship/residency responsibilities and successfully complete all performance tasks, including the required licensure tests.

Clinical Experiences
Field Study
Candidates are required to complete a laboratory field study course in each semester of their junior and senior year. As part of the course requirements, each candidate must complete a minimum of 20 hours per semester in her/his assigned classroom, under the guidance of the classroom teacher who serves as the field study adviser. Candidates are assigned to one school during their junior year and a different school during their senior year. Candidates are responsible for their transportation to and from these clinical sites.

Internship/Residency
Candidates participate in an internship/residency during their graduate year. Quinnipiac has developed collaborative partnerships with school districts throughout central and southern Connecticut to provide graduate students with guided, hands-on professional practice while defraying some costs of the graduate portion of the program.

During the internship semesters, candidates serve in area schools in a variety of capacities and as substitute teachers with guidance from an on-site teacher advisor and a School of Education faculty member. Candidates have the opportunity to participate in staff meetings and take part in all school operations; in short, to become full members of the school community. During a residency, teacher candidates remain in a single classroom for 10 weeks or more as a co-teacher with a cooperating teacher and a university supervisor providing guidance and support.

Candidates must continue serving in their internship/residency through the last day of the public school calendar. Therefore, although classes end in May, the internship and the completion of the five-year MAT program do not occur until mid- to late June. Candidates are allowed to “walk” during graduation ceremonies but do not formally receive their degrees until all of the internship/residency responsibilities are met.

The School of Education is fully accredited by the National Council for Accreditation of Teacher Education (NCATE). The U.S. Department of Education recognizes NCATE as a specialized accrediting body for schools, colleges and departments of education.

Dual-Degree BA/MAT or BS/MAT in Secondary Education (4+1)

Program Contact: Christina Pavlak (Christina.Pavlak@quinnipiac.edu), 203-582-3192
The purpose of Quinnipiac’s Dual-Degree Bachelor’s/MAT program is to prepare graduates with perspectives, knowledge and skills to become master educators. The School of Education recognizes that the concept of educator is three-dimensional, and that successful educators must be teachers, learners and leaders. Therefore, graduates of the Master of Arts in Teaching program are teachers who lead all students to learn, learners who continue to learn as they continue to teach, and leaders who influence the culture of their schools in ways that support best practices in teaching and learning.

The program reflects the spirit and mission of Quinnipiac University with close attention to the teaching standards for the state of Connecticut and to the standards of the Council for the Accreditation of Educator Preparation. The three values of “excellence in education, a sensitivity to students, and a spirit of community” which are at the heart of Quinnipiac’s mission statement are woven through the program.

General Information
The dual-degree program provides the means for Quinnipiac students to earn a bachelor’s degree in an academic major and a master of arts in teaching degree leading to certification through the Connecticut State Department of Education. Consistent with the university’s mission, arts and sciences studies are integrated with professional studies to prepare graduates who have depth and breadth of content knowledge and strong pedagogical skills.

The dual-degree program is divided into a two-year preprofessional component and a three-year professional component. The two-year preprofessional program includes a required introductory course (ED 140)
that acquaints prospective teacher candidates with the teaching profession. Students are encouraged to take this course during their freshman year but no later than the fall semester of their sophomore year. Additional required courses before the junior year include educational philosophy and diversity (ED 250 and ED 260).

Students begin their professional component in the fall semester of their junior year. Supervised fieldwork, an integral part of the professional component, includes undergraduate observation and fieldwork, a graduate internship, and student teaching. Following completion of the fourth year of study, students receive a bachelor of arts or bachelor of science degree in their academic major. Students begin their graduate work immediately following graduation. Any teacher candidate enrolled in the five-year MAT program who does not complete all the requirements for undergraduate completion of the bachelor’s degree as anticipated will not be allowed to enter any graduate fifth year without the written consent of the program director.

Note: Because the MAT program is subject to state review on a regular basis, prospective and current students are advised to see the School of Education for up-to-date program information.

**Dual-Degree BA/MAT or BS/MAT in Secondary Education Curriculum**

The secondary education program is designed to prepare the teacher candidate with strong teaching skills and a depth of content knowledge in the discipline they wish to teach. Students interested in secondary education must select a major from among the following: biology, English, history, mathematics or Spanish.

Central to candidates’ professional studies are undergraduate service-based courses (ED 341L, ED 342L, ED 343L, ED 409L, ED 452L) in which candidates gain 80 hours of hands-on experience, and the full-year graduate internship/residency experience in partner schools.

**General Requirements**

The following courses meet both the University Curriculum requirements and the Connecticut State Department of Education’s general education requirements. A grade of "B" or better is required in these courses.

**Student Learning Outcomes**

Upon completion of the Master of Arts in Teaching program, teacher candidates will demonstrate the following competencies:

1. **Content Knowledge**: Identify and define the major concepts of their discipline and understand that content is dynamic and ways of knowing are constantly changing.

2. **Instructional Strategies**: Recognize varied instructional practices and apply appropriate instructional strategies based upon principles of effective teaching.

3. **Learning Differences, Learner Development**: Recognize the complexity of human diversity and provide an instructional program that is responsive to the needs of diverse students.
4. Instructional Strategies: Apply appropriate technology to enhance the teaching and learning process.

5. Professional Learning and Ethical Practice: Demonstrate the skills and commitment to engage in reflective, mindful practice.

6. Assessment: Use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.

7. Professional Learning and Ethical Practice: Recognize that since content is dynamic and ways of knowing are constantly changing, the profession requires a commitment to continuous learning.

8. Leadership and Collaboration: Recognize that education has the power to be transformative and that their role as educators includes the responsibility to advocate on behalf of their students in order to promote social justice.

9. Professional Learning and Ethical Practice, Leadership and Collaboration: Demonstrate a willingness to work collaboratively with peers, practitioners in the field and/or MAT instructors to sustain a professional learning environment to support student learning.

10. Leadership and Collaboration: Demonstrate an understanding that scholarly research is essential to improving their own practice and to enhancing the knowledge base of the profession.

Admission

Admission to the dual-degree program is based on a holistic review by MAT program faculty of the following admission requirements:

- A 3.0 minimum overall undergraduate GPA (from all colleges and universities attended) for 45 credits of course work with a subject area major or appropriate interdisciplinary major.

- At least two written recommendations from individuals who have recent knowledge (within the last two years) of the applicant’s suitability as a prospective educator, including one from a college instructor.

- A written essay completed in ED 140 that meets program standards.

- A formal retention review interview during which the applicant is expected to demonstrate: an ability to communicate clearly; a demeanor appropriate to the teaching profession; and a maturity and attitude necessary to meet the demands of the MAT program.

Retention

Students who are accepted into Quinnipiac University as full-time students and who indicate a desire to teach are admitted into the MAT program upon acceptance, with the understanding that a retention review will be done by MAT faculty in the sophomore year.

Continuation in the dual-degree program is based on a holistic retention review during the spring sophomore semester by MAT faculty. The review requires that specific criteria have been met in order to remain in the teacher preparation program:

1. A 3.0 minimum overall undergraduate GPA (from all colleges and universities attended) for 45 credits of coursework with a subject area major or appropriate interdisciplinary major (applicants with overall GPAs below 2.67 will not be considered).

2. At least two written recommendations from individuals who have recent knowledge (within the last two years) of the applicant’s suitability as a prospective educator, including one from a college instructor.

3. A written essay completed in ED 140 that meets program standards.

4. Evidence of strong basic skills in math, reading and writing. Evidence can be provided through SAT or ACT scores. Alternatively, evidence may also be provided through completion of the Praxis Core Academic Skills Test. SAT, ACT or Praxis Core results will be reviewed by the program director. Any MAT candidate whose scores indicate an area of weakness will be required to participate in a non-credit bearing remediation program that addresses any area of underperformance in math, reading or writing. Once completion of the remediation process is done by the candidate, the status of the candidate will be reviewed. All candidates will be considered probationary status until the improvement of basic skills are documented and remediated.

5. A formal retention review interview during which the applicant is expected to demonstrate: an ability to communicate clearly; a demeanor appropriate to the teaching profession; and a maturity and attitude necessary to meet the demands of the MAT program.

6. Effective July 1, 2010, Connecticut law requires all teacher candidates to undergo a criminal background check prior to being placed in a public school setting for field study, internship and student teaching. Because a clinical experience is an integral part of each semester, failure to abide by this law will make an applicant ineligible for admission to the program. The School of Education has procedures in place to assist candidates in obtaining the background check. The cost of the background check is the responsibility of the teacher candidate.

Teacher candidates in the MAT program at Quinnipiac are expected to demonstrate the professional behaviors and dispositions articulated in both the School of Education’s Professional Attributes and Dispositions document and the CT Code of Professional Responsibility for Teachers. Candidates must maintain an overall B (3.0) undergraduate GPA with a C or better in all general education courses required for the MAT program. In addition, candidates must earn a B- or better in all education courses (undergraduate and graduate), as well as maintain 3.0 GPA for all education coursework to remain in good standing in the program. A grade of C+ or below in any education course (including the graduate content area courses) requires the candidate to retake the course at his/her expense and earn the minimum B- grade.

If the candidate fails to maintain the minimum GPA, that candidate may be allowed to remain in the program for a single semester on probationary status. If a candidate on probation fails to meet the minimum GPA by the end of the single probationary semester, that candidate is dismissed from the program. Granting of probationary status is subject to the director’s approval and is neither automatic nor guaranteed.

Candidates in the secondary program must maintain a minimum 3.0 GPA in all content area coursework to remain in good standing in the program to be recommended for certification. In addition, secondary teacher candidates who earn a C+ or below in two or more undergraduate content area courses will be required to meet with the MAT program director to discuss continuation in the program.

Candidates failing to meet professional standards in the program may be subject to suspension or dismissal. In addition, candidates who exhibit a lack of effort or responsibility in the program, or who reveal interpersonal
skills unsuited or inappropriate for teaching, will be required to meet with the MAT program director to discuss continuation in the program.

Completion
To qualify for teacher certification, students must complete all requirements of the MAT program. Candidates must complete all course work, fulfill the internship/residency responsibilities and successfully complete all performance tasks, including the required licensure tests.

Clinical Experiences
Field Study
Candidates are required to complete a laboratory field study course in each semester of their junior and senior year. As part of the course requirements, each candidate must complete a minimum of 20 hours per semester in her/his assigned classroom, under the guidance of the classroom teacher who serves as the field study adviser. Candidates are assigned to one school during their junior year and a different school during their senior year. Candidates are responsible for their transportation to and from these clinical sites.

Internship/Residency
Candidates participate in an internship/residency during their graduate year. Quinnipiac has developed collaborative partnerships with school districts throughout central and southern Connecticut to provide graduate students with guided, hands-on professional practice while defraying some costs of the graduate portion of the program.

During the internship semesters, candidates serve in area schools in a variety of capacities and as substitute teachers with guidance from an on-site teacher advisor and a School of Education faculty member. Candidates have the opportunity to participate in staff meetings and take part in all school operations; in short, to become full members of the school community. During a residency, teacher candidates remain in a single classroom for 10 weeks or more as a co-teacher with a cooperating classroom teacher who serves as the field study adviser. Candidates participate in an internship/residency during their graduate year. Candidates are responsible for their transportation to and from these clinical sites.

The School of Education is fully accredited by the National Council for Accreditation of Teacher Education (NCATE). The U.S. Department of Education recognizes NCATE as a specialized accrediting body for schools, colleges and departments of education.

Dual-Degree BA/MBA (4+1) Program of Study
It is recommended that students interested in the Dual-Degree BA/MBA (4+1) program take the following undergraduate courses or equivalents early in their undergraduate program. These will prepare students for the recommended MBA classes during their senior year.

Students may complete up to 10 credits of MBA courses during the senior year, 9 credits of which also fulfill undergraduate open elective requirements. Students must work with their undergraduate adviser and the MBA director to ensure that the courses fit into both degree programs. Students must present satisfactory performance in their graduate coursework completed during their senior year to be officially admitted into the graduate program upon completion of their BA degree. The BA/MBA curriculum consists of the MBA core courses including a requirement to complete MBA 660 with an international travel component and MBA 688, a graduate internship.

Graduate Electives

1. 
2. 

Dual-Degree BA/MBA (4+1) Program
The Dual-Degree BA/MBA (4+1) program is designed for exceptional undergraduate students outside of the School of Business. The program enables students from a wide variety of disciplines to add a core of business knowledge to their academic portfolio. Students with appropriate prerequisite knowledge are allowed to take courses toward an MBA during the senior year and complete their MBA in one year beyond the bachelor's degree. Students interested in pursuing the BA/MBA option are strongly encouraged to declare the general business minor early in their undergraduate program to ensure they have an adequate foundation for graduate business coursework.
Dual-Degree BA/MBA (4+1)

Select six graduate electives either in a specific concentration/discipline or customized by the student 18

Total Credits 46

1. Students who are in the BS/MBA program are required to take MBA 660, which includes an international experience.
2. MBA students take 18 credits of electives.

MBA students may choose to take elective courses within one area, creating a concentration in a specific discipline, or may choose to take electives across multiple business disciplines, enhancing a broad interdisciplinary perspective.

Electives are available in computer information systems, finance, health care management, international business, management and marketing.

Interested students must apply for admission to the BA/MBA program during the last semester of the junior year using a special application form available in the School of Business.

Admission into the combined program is competitive. Only students who have earned at least 75 credits with an overall GPA of 3.0 are considered for admission to this program. Meeting the minimum criteria for consideration does not guarantee admission.

Certificate in Long-Term Care Administration
Program Contact: Angela Mattie (angela.mattie@qu.edu) 203-582-3630

Individuals who wish to become licensed nursing home administrators in the state of Connecticut must pass a licensure examination offered by the Department of Public Health. To be eligible for this examination, applicants must complete either the master's degree (MBA/HCM (p. 361)) with HM 669 as part of the degree program and a 500-hour residency requirement or the non-degree Certificate in Long-Term Care Administration.

The certificate course of study consists of two components: an academic course and a 900-hour residency in a skilled nursing facility. The academic course, HM 669, is generally offered once a year in the fall semester.

The residency program is offered in a two-course sequence—HM 790 and HM 791, each of which grants 450 hours of residency (for 4 credits each). Two restrictions apply to the residency program. First, the residency must be started within one year of the completion of the academic course. (Students may petition the Department of Public Health in writing if there is justification to begin the residency at another time.) Second, at least one half of the residency (450 hours) must be completed at a site where the student has had no previous financial or employment relationship. Information on this program is available in the Office of Graduate Admissions.

Master of Business Administration

Program Contact: Lisa Braiewa (Lisa.Braiewa@qu.edu) 203-582-3710

The School of Business offers an MBA program for working professionals as well as for individuals who may not have attained significant levels of work experience. The program can be completed on a part-time or full-time basis and is available fully online.

The MBA program provides students with broad coverage of the various functional areas of the firm, as well as an understanding of how these fit together into a high-performing organization. Students also are acquainted with the theories, principles and strategies necessary to succeed in careers in business, government or nonprofit management.

Beyond acquiring the knowledge of course content and an understanding of the functionality of an organization, students are taught to be innovative in their approach to solving problems and making decisions. The curriculum was recently revised to be fully reflective of the contemporary and dynamic domain of business practice. The focus of the curriculum is explicitly placed on students developing decision-making capabilities based on a foundation of core business functions and their interrelatedness. Integral parts of the curriculum include exposure to decision-making models, global business considerations, financial markets and analysis, leadership, organizational behavior and strategy.

Graduates are action-oriented and encouraged to think critically so that they can effectively and immediately apply the competencies and skills acquired in the MBA program to their organizations. Students also
have the option of developing domain knowledge through participation in one of the tracks offered: chartered financial analyst, health care management and supply chain management. Numerous electives are available through which students may customize their experience based on their own professional and other goals. Courses are offered in a traditional on-campus, classroom format as well as in a completely online format. Students may elect to complete their classes entirely on campus, entirely online or through a combination of on-campus and online delivery to best suit their personal and professional needs.

Electives are available in computer information systems, finance, health care management, international business, management and marketing.

Student Learning Outcomes

Students who graduate from the MBA program will develop and emphasize skills in the following areas:

1. **Business Analytics**: Demonstrate facility with quantitative methods and tools and an ability to interpret financial metrics.

2. **Managing People**: Demonstrate an ability to understand models and applications of leadership and social intelligence.

3. **Managing Organizations**: Demonstrate an ability to understand organizational behavior and structures and the importance of effective communication.

4. **Strategic Integration**: Assess and diagnose a situation and to formulate and implement effective decisions and responses to business problems.

5. **Ethics**: Identify ethical issues related to business situations and to develop appropriate situational responses consistent with organizational and societal values.

6. **Knowledge of Business Disciplines**: Demonstrate knowledge of business disciplines (marketing, management, finance and managerial accounting) and the connection between disciplines.

- Dual-Degree BS/MBA (4+1) (p. 359)
- JD/MBA (p. 360)(Juris Doctor) (p. 360)

1 Program also offered online.

MBA Admissions

Admission to Quinnipiac's graduate business programs is competitive. The following criteria apply for admission to the MBA. Please note: Separate admissions requirements apply for Quinnipiac Dual-Degree BS/MBA and BA/MBA (4+1) students and students entering the Accelerated Dual-Degree BS/MBA (3+1) program in the School of Business. Please refer to the appropriate sections of this catalog for further information on these programs.
All prospective MBA students must submit the following:

1. Appropriate application form for either the online MBA or the part-time or full-time on-campus program. Online submission is preferred. Go to Quinnipiac’s How to Apply (http://www.qu.edu/gradhowtoapply) webpage.

2. Official transcripts from all institutions attended, two letters of recommendation, a current resume and a personal statement.

3. Scores obtained on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE), unless one or more of the conditions discussed below apply.

4. A request for GMAT/GRE waiver may be submitted as part of the application process. In general, applicants meeting any of the criteria below may be eligible for such a waiver with documentation of the specific circumstances under which the waiver is being requested. These include, but are not limited to:
   • Completion of a minimum of five years of post-bachelor’s, professional and progressive work experience that reflects increasing levels of responsibility, particularly in such areas as budgets, finance, operations and staff supervision.
   • Completion of a master’s or doctoral level degree from an accredited institution within 10 years of the application to the QU MBA program. This includes the JD, MD, PhD and other related degrees. Passage of the CPA or CMA exam series and possession of a license to practice.
   • Completion of all CFA examinations and designation as a CFA charterholder.
   • Prospective international students must submit certified translations of official transcripts prepared by World Education Services (WES) wes.org (http://www.wes.org) or another acceptable organization that is approved by Quinnipiac for this purpose. In addition, prospective international students must submit the materials covered in #1, #2 and #3 above.

5. All applicants from non-English-speaking countries must indicate that they have the language capability to understand business instruction in English and must provide official Test of English as a Foreign Language (TOEFL) scores. In general, a minimum TOEFL Internet-based score of 90 is required for admission (or 233 for computer-based, or 575 for paper-based). In lieu of TOEFL, applicants may submit International English Language Testing System (IELTS) scores. A minimum score of 6.5 on this exam, a B or above on the Certificate of Advanced English or a C or above on the Certificate of Proficiency in English is required. TOEFL and IELTS scores are valid for two years.

6. International applicants are required to submit proof of adequate funds to complete their study at Quinnipiac University before an eligibility form (I-20) can be issued. Complete the Statement of Financial Support and submit along with supporting documentation. In addition, a copy of a passport or national ID is required. The Statement of Financial Support can be found online here (https://www.qu.edu/admissions/undergraduate/international-students.html).

Applications for the MBA program are accepted throughout the year for both full- and part-time study. Full-time students may begin their studies in January, May or August. Part-time, on-campus students are encouraged to start in August, but may start in January or May in the online program. Candidates are encouraged to submit applications as early as possible to ensure consideration for the semester desired.

---

Accelerated Dual-Degree BS/MBA (3+1)

Program contact: Michael Taylor (Michael.Taylor@qu.edu) 203-582-3949

The Accelerated Dual-Degree Bachelor of Science/Master of Business Administration (3+1) is designed for outstanding School of Business students—those who rank in the top 20 percent of their high school class and have a combined critical reading and math SAT score of 1200 or a composite ACT of 27. Students enter the program as freshmen and learn at an accelerated pace to earn a bachelor’s degree in three years and an MBA in the fourth. This select program features total savings over the traditional five-year BS/MBA option and additional features including:

- dedicated housing for students in the program with private study hall
- dedicated resident assistant and academic adviser
- flat tuition and fees for the entire four years with any academic scholarships carrying from the third to the fourth, graduate year

Unique Program Features

- Total savings of up to 25 percent over traditional five-year BS/MBA option
- An optional residential cohort freshman experience with other four-year BS/MBA students
- Dedicated resident assistant and study lounge in freshman cohort housing
- Community-building welcome event in August
- Dedicated program director
- Two Accelerated Dual-Degree BS/MBA program field trips during first year
- Scholarship carried from year three to year four, subject to a 3.0 GPA and continued program enrollment

This program provides a flat tuition rate that will not increase each year resulting in a substantial savings over four years.

Classes are offered both in a traditional on campus setting as well online in the summer and for some MBA options.

The four-year experience includes applied learning experiences such as internships-for-credit and faculty-led international travel in both undergraduate and graduate segments of the program. Options include:

- Undergraduate study abroad, School of Business immersion trips, university seminar travel courses
- Graduate MBA international travel courses to China, France/Germany, Hungary/Poland, Peru

Students in the Accelerated Dual-Degree BS/MBA (3+1) program live in one of the university’s housing options for all four years.

1 Program of study may vary depending on major, choice of international option, AP or other college-level credits.
2 Continuation in the program requires maintenance of 3.0 GPA; 3.25 GPA required to begin MBA courses.
3 up to 7 credits (online)

**Admission Requirements: Accelerated Dual-Degree BS/MBA (3+1)**

The Accelerated Dual-Degree BS/MBA (3+1) program does not have a separate application process. Students admitted to the School of Business who meet the program criteria will be invited to enter the program. To be considered for this accelerated program, students generally must be ranked in the top 20 percent of their high school class, and must have a total SAT score (critical reading and math) of 1200 or higher, or an ACT composite score of 27 or higher.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective
freshmen are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page (p. 17) of this catalog.

**University Honors Program**

The University Honors Program has been developed to foster the needs and interests of our most academically talented and committed students. Honors students participate in small seminar courses with instructors dedicated to working cooperatively to mold a unique learning environment. This student-centered approach supports increasingly independent learning and also engages students in the larger campus as well as regional, national and world communities.

Each year, the honors program welcomes incoming first-year students with strong academic records. Entry to the program is by application. Students who have received their acceptance to Quinnipiac may apply for admission to the honors program in February and will learn of their status before May 1. Students also may apply after the February deadline and, if accepted, will be admitted on a wait-list basis. Interested students may inquire with the director or the admissions office at any time during the admissions process and into the summer. After their first or second semester, students with strong records of achievement and a demonstrated desire to share their intellectual curiosity and engagement with others may apply to join the program.

Visit the University Honors Program (p. 50) page for more information.

**Dual-Degree BS/MBA (4+1)**

Our MBA dual-degree programs are designed for outstanding students who want to reap the benefits of completing a dual degree in less time than it would take to complete the two degrees separately. The path to the dual-degree MBA is completed in five years, and is open to both students enrolled in bachelor of science and bachelor of arts programs. In both the BS/MBA and BA/MBA paths, students begin taking graduate courses during their senior year that count toward both an undergraduate degree and an MBA.

Our dual-degree curriculum emphasizes collaboration and critical thinking, and you’ll hone your leadership and presentation skills through group projects. You’ll explore the major challenges of today’s global business world and examine key topics, such as organizational behavior and financial analysis. Each program fosters the development of both hands-on skills and a global perspective through an experiential learning component and executive study abroad course.

Career development is central to both programs. You’ll receive guidance not only from our dedicated faculty and staff, but also a vast network of alumni eager to assist in internship and job search. Job fairs and recruiting events also connect you with representatives from prominent firms including Goldman Sachs, JPMorgan Chase, Morgan Stanley, GE, Citi and Johnson & Johnson. With an intimate understanding of business, practical experiences and a foundation in subjects such as economics, finance and chemistry, you’ll graduate with a step up on your competition, ready to excel in a range of careers.

**Dual-Degree BS/MBA (4+1) Program of Study**

Students in the dual-degree (4+1) program may complete up to 9 credits of graduate courses during their senior year, which also fulfill undergraduate open electives. Students must work with their undergraduate adviser and the MBA director to ensure that the courses fit into both degree programs. Students must present satisfactory performance in their graduate course work completed during their senior year to be officially admitted into the graduate program upon completion of their BS degree. The BS/MBA curriculum consists of the MBA core courses plus a requirement to complete MBA 660 (https://quinnipiac-curr.courseleaf.com/search/?P=MBA%20660) with an international travel component and MBA 688 (https://quinnipiac-curr.courseleaf.com/search/?P=MBA%20688) MBA Internship.

1. Students who are in the BS/MBA program are required to take MBA 660, which includes an international experience.
2. MBA students take 18 credits of electives.

MBA students may choose to take elective courses within one area, creating a concentration in a specific discipline, or may choose to

---

**Dual-Degree BS/MBA (4+1) Total Credits**

MBA students take 18 credits of electives.
take electives across multiple business disciplines, enhancing a broad interdisciplinary perspective.

Electives are available in computer information systems, finance, health care management, international business, management and marketing.

Interested students must apply for admission to the BS/MBA program during the last semester of the junior year using a special application form available in the School of Business. Admission into the combined program is competitive. Only students who have earned at least 75 credits with an overall GPA of 3.0 are considered. Meeting the minimum criteria for consideration does not guarantee admission.

Dual-Degree JD/MBA

Students may apply for acceptance to both the Quinnipiac School of Law and the MBA program and, upon completion of both programs, receive a business and a law degree. This specialized joint program shortens the length of time necessary to receive the degrees. Four law courses are used to fulfill the four-elective course requirement of the MBA program.

Admissions for these programs are handled separately, but a student should inform both admissions offices of an interest in this joint degree program. Students accepted into the School of Law are not required to take the GMAT or GRE.

Once accepted to both programs, a student typically completes one year of law studies and then begins taking courses from both programs concurrently, finishing both programs’ requirements in the same semester. However, students who wish to complete the joint program in three years can accomplish this by starting their MBA courses in the summer before their first year in the School of Law. A student may be admitted to one program and, prior to meeting the graduation requirements for that program, apply for the joint degree program.

More information about this joint program is available on the School of Law JD/MBA page (p. 437).

MBA-Finance Track

MBA-Finance is a specialized track within the MBA program for students whose career choices require extensive finance training and preparation beyond the MBA foundation and core courses. For those students who seek preparation for investment management careers, we offer a select set of five courses, taken as a group, that provide the body of knowledge necessary to sit for the Level 1 exam that is part the Chartered Financial Analyst (CFA®) designation. Students with career interests in other areas of finance may choose from these or other finance elective courses.

Students who are interested in the MBA-Finance track must designate this choice to their adviser prior to completing the Foundations for Effective Management core courses.

The MBA-Finance track program of study is listed below.

MBA-SCM Track (Supply Chain Management)

The MBA-SCM is a specialized track within the MBA program. The field of supply chain management is experiencing significant growth in the number of opportunities for individuals who combine the right education, skills and perspective. Supply chain management is a truly interdisciplinary field that requires skills in logistics and analytics with global awareness and team building. Manufacturing, distribution, retail and even banking all need to manage their supply chain efficiently and effectively in a global environment that is characterized by competition.
and change. Leadership opportunities and compensation packages are among the most competitive across industries.

The MBA-SCM track has the same number of credits as the MBA program. The first 28 credits of the track are the MBA core. Students then take specialized concentration courses to complete the 46 credits required for the MBA. A student interested in the MBA-SCM track should indicate this to his/her adviser early in the program.

MBA–HCM Track (Health Care Management)

Quinnipiac University, as part of its long tradition of education in health sciences and health care administration, offers a Master of Business Administration with a track in Health Care Management. This track prepares students for administrative roles in the health care industry and emphasizes the training of managers who work collaboratively with highly trained professionals from a variety of clinical disciplines in all health care settings. Students gain a comprehensive knowledge of business subjects that are increasingly important in the complex health care industry.

¹ BS/MBA students must complete MBA 688 (3 credits)
The Master of Science in Accounting program is designed to prepare candidates to satisfy the 150 credit hours requirement and to position them for success in the CPA exam. The program will position successful graduates for careers in professional services firms, business corporations, governmental agencies, and business consulting firms among others. The program provides students with in-depth accounting knowledge and skills necessary to be successful accounting professionals. Notably, there is a large demand for well-trained accounting professionals in public and private accounting, as well as in government.

### Master of Science in Accounting

Program Contact: Nelson Alino (Nelson.Alino@qu.edu) 203-582-3827

The Master of Science in Accounting program is designed to prepare candidates to satisfy the 150 credit hours requirement and to position them for success in the CPA exam. The program will position successful graduates for careers in professional services firms, business corporations, governmental agencies, and business consulting firms among others. The program provides students with in-depth accounting knowledge and skills necessary to be successful accounting professionals. Notably, there is a large demand for well-trained accounting professionals in public and private accounting, as well as in government.

### Dual-Degree Programs

- **Accelerated Dual-Degree BS/MSA (3+1)** (p. 362)
- **Accelerated Dual-Degree BS/MSA or BA/MSA (4+1)** (p. 363)

Applicants are required to submit a resume, letter of intent, three letters of recommendation, official transcripts (recommended GPA of 3.0 or higher), and either GMAT or GRE exam results. (Recommended GMAT score of 500 or better, recommended GRE score of 150 or better in each section).

### Accelerated Dual-Degree BS/MS in Accounting (3+1)

Program contact: Michael Taylor (Michael.Taylor@qu.edu) 203-582-3949

The Accelerated Dual-Degree Bachelor of Science/Master of Science in Accounting (3+1) is designed for outstanding School of Business students—those who rank in the top 20 percent of their high school class and have a combined critical reading and math SAT score of 1200 or a composite ACT of 27.

The MS in Accounting program is designed to prepare candidates to satisfy the 150 credit hours requirement and to position them for success in the CPA exam. The program will position successful graduates for careers in professional services firms, business corporations, governmental agencies, and business consulting firms among others. The program provides students with in-depth accounting knowledge and skills necessary to be successful accounting professionals. Notably, students will demonstrate:

### Student Learning Outcomes

Students who graduate with this degree will demonstrate:

1. **Professional Communication**: an ability to communicate complex accounting reports and other financial information in both technical and common language; a proficiency in the use of information technology packages to process information and to effectively complete tasks in applicable areas.

2. **Business Analytics and Critical Thinking**: proficiency in the use of statistical and analytical tools to analyze complex accounting problems and will be able to make practical and reliable decisions as appropriate in order to resolve problem.

3. **Business Environment**: the capacity to recognize ethical issues encountered in public and private accounting environments and consider resolutions that are legal and ethical with appropriate consideration on the firm’s material stakeholders; knowledge of the issues involved in Multinational Corporation accounting including a strong understanding of the issues in international financial reporting standards.

4. **Accounting Integration**: knowledge of the principles and standards applied to financial reporting for U.S. corporations (U.S. GAAP) and to financial reporting for specialized industries and organizations such as non-profits and governments; an understanding of the relevant professional standards.

### Student Learning Outcomes

Students who graduate with this degree will demonstrate:

1. **Professional Communication**: an ability to communicate complex accounting reports and other financial information in both technical and common language; a proficiency in the use of information technology packages to process information and to effectively complete tasks in applicable areas.

2. **Business Analytics and Critical Thinking**: proficiency in the use of statistical and analytical tools to analyze complex accounting problems and will be able to make practical and reliable decisions as appropriate in order to resolve problem.

3. **Business Environment**: the capacity to recognize ethical issues encountered in public and private accounting environments and consider resolutions that are legal and ethical with appropriate consideration on the firm’s material stakeholders; knowledge of the issues involved in Multinational Corporation accounting including a strong understanding of the issues in international financial reporting standards.

4. **Accounting Integration**: knowledge of the principles and standards applied to financial reporting for U.S. corporations (U.S. GAAP) and to financial reporting for specialized industries and organizations such as non-profits and governments; an understanding of the relevant professional standards.

### Master of Science in Accounting

- Master of Science in Accounting

### Dual-Degree Programs

- Accelerated Dual-Degree BS/MSA (3+1) (p. 362)
- Accelerated Dual-Degree BS/MSA or BA/MSA (4+1) (p. 363)

Applicants are required to submit a resume, letter of intent, three letters of recommendation, official transcripts (recommended GPA of 3.0 or higher), and either GMAT or GRE exam results. (Recommended GMAT score of 500 or better, recommended GRE score of 150 or better in each section).
there is a large demand for well-trained accounting professionals in public and private accounting, as well as in government.

Students enter the program as freshmen and learn at an accelerated pace to earn a bachelor’s degree in three years and an MSA in the fourth.

Unique Program Features

- Total savings of up to 25 percent over traditional five-year BS/MSA option
- An optional residential cohort freshman experience with other four-year BS/MSA students
- Dedicated resident assistant and study lounge in freshman cohort housing
- Community-building welcome event in August
- Dedicated program director
- Scholarship carried from year three to year four, subject to a 3.0 GPA and continued program enrollment

This program provides a flat tuition rate that will not increase each year resulting in a substantial savings over four years.

Classes are offered both in a traditional on campus setting as well online in the summer.

The four-year experience includes an applied learning experience such as internships-for-credit.

Students in the Accelerated Dual-Degree BS/MSA (3+1) program live in one of the university’s housing options for the first three years.

Accelerated Dual-Degree BS/MSA (3+1) Program of Study

The MS in Accounting program is designed to prepare candidates to satisfy the 150 credits requirement and to position them for success in the CPA exam. The program will position successful graduates for careers in professional services firms, business corporations, governmental agencies, and business consulting firms among others.

The program provides students with in-depth accounting knowledge and skills necessary to be successful accounting professionals. Notably, there is a large demand for well-trained accounting professionals in public and private accounting, as well as in government.

In the first three years, students complete the undergraduate Accounting major (p. 225) or any other undergraduate business major in conjunction with the Accounting minor. (p. 226)

Admission Requirements: Accelerated Dual-Degree BS/MSA (3+1)

The Accelerated Dual-Degree BS/MSA (3+1) program does not have a separate application process. Students admitted to the School of Business who meet the program criteria will be invited to enter the program. To be considered for this accelerated program, students generally must be ranked in the top 20 percent of their high school class and must have a total SAT score (critical reading and math) of 1200 or higher, or an ACT composite score of 27 or higher.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective freshmen are strongly encouraged to file an application as early in the senior year as possible and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page of this catalog.

University Honors Program

The University Honors Program has been developed to foster the needs and interests of our most academically talented and committed students. Honors students participate in small seminar courses with instructors dedicated to working cooperatively to mold a unique learning environment. This student-centered approach supports increasingly independent learning and also engages students in the larger campus as well as regional, national and world communities.

Each year, the honors program welcomes incoming first-year students with strong academic records. Entry to the program is by application. Students who have received their acceptance to Quinnipiac may apply for admission to the honors program in February and will learn of their status before May 1. Students also may apply after the February deadline and, if accepted, will be admitted on a wait-list basis. Interested students may inquire with the director or the admissions office at any time during the admissions process and into the summer. After their first or second semester, students with strong records of achievement and a demonstrated desire to share their intellectual curiosity and engagement with others may apply to join the program.

Visit the University Honors Program (https://catalog.qu.edu/academics/honors-program) page for more information.

Dual-Degree Bachelor’s/MS in Accounting (4+1)

Program contact: Christopher Neidig (Chris.Neidiq@qu.edu) 203-582-3868

Our Dual-Degree BS/MS and BA/MS in Accounting (4+1) programs answer the widespread demand for well-trained certified public
accountants. The curriculum takes 5 years and provides a foundation in the principles, concepts and technical practices of accounting, while the master of science degree covers the advanced skills and accounting theory to maximize your success on the Certified Public Accountant certification exam. The curriculum is designed to help you seamlessly transition from undergraduate to graduate study and complete the 150-credit education requirement to sit for the CPA exam.

The dual-degree program is primarily designed for outstanding undergraduate accounting majors or minors, but students in other majors also may apply. Qualified students apply for this program in the Spring of their junior year or the Fall of their senior year.

Dual-degree accounting students have access to the same internship opportunities as the traditional BS, BA and MS program students. They also can take advantage of networking events and career fairs that bring representatives from Big 4 accounting firms and other employers from the public, private and government sectors to campus.

Career development is central to both programs. You’ll receive guidance not only from our dedicated faculty and staff, but also a vast network of alumni eager to assist in internship and job search. Job fairs and recruiting events also connect you with representatives from prominent firms. With a comprehensive understanding of business, practical experiences and a foundation in related subjects such as economics and finance, you’ll graduate with a step up on your competition, ready to excel in a range of careers.

**Dual-Degree BS/MSA or BA/MSA (4+1) Program of Study**

The MS in Accounting program is designed to prepare candidates to satisfy the 150 credits requirement and to position them for success in the CPA exam. The program will position successful graduates for careers in professional services firms, business corporations, governmental agencies, and business consulting firms among others. The program provides students with in-depth accounting knowledge and skills necessary to be successful accounting professionals. Notably, there is a large demand for well-trained accounting professionals in public and private accounting, as well as in government.

**MSA Elective** 3

**Total Credits** 30

Interested students must apply for admission to the BS/MSA or BA/MSA program during the last semester of their junior year or the first semester of their senior year using a special application form available in the School of Business. Admission requires a cumulative GPA of 3.0 in an accounting major or accounting minor. Students not enrolled as an accounting major or accounting minor must meet with the program director to discuss their candidacy for the program.

Meeting the minimum standards as listed above does not guarantee admission to the program. Students are not admitted officially into the MS in Accounting program until they graduate with their bachelor’s degree and meet all other requirements. Once admitted, students begin full-time study in the MS in Accounting program.

## Master of Science in Business Analytics

Program Contact: Christopher Neidig (christopher.neidig@qu.edu)  
203-582-3868

The MS in Business Analytics program is designed to develop the skills to extract, analyze, interpret and present data for business decision making. These skills are critical to decision making in every sector of industry, government and nonprofit organizations. The program emphasizes analytical and statistical tools that enable graduates to use sophisticated means to mine, analyze, evaluate and present data in a variety of organizational environments.

1 Additional elective business courses are available to students at the discretion of the program director.
Student Learning Outcomes

Upon completion of the MS in Business Analytics program, students will demonstrate the following competencies:

1. **Data Analysis**: Evaluate different techniques used to analyze data.
2. **Data Management**: Explain how data is stored, accessed and retrieved.
3. **Analytical Reasoning**: Apply business analytics techniques and utilize analytical tools for organizational decision making.
4. **Critical Thinking**: Demonstrate skills in interpreting and presenting analytical results.

Admission

To be admitted to the program, an applicant must have completed an undergraduate degree program with a GPA of at least 3.0. Work experience and recommendations also are strongly considered in the admission process. Standardized test scores (such as GMAT or GRE) submitted by the students in support of the application also are considered, but are not required.

In addition, applicants to the MS in Business Analytics program must possess an undergraduate major, graduate degree or other significant coursework in a quantitatively oriented area, including but not limited to mathematics, actuarial science, statistics, computer science, engineering, operations management, accounting, finance, economics or the natural sciences.

A complete application consists of the following: an application form, application fee, three letters of recommendation, including at least one from a professional contact, a recent resume, a personal statement and official transcripts of all undergraduate and graduate work completed.

Master of Science in Organizational Leadership

Program Contact: Christopher Neidig (Christopher.Neidig@qu.edu) 203-582-3868

The MS in Organizational Leadership program is a rigorous online program specifically designed to be highly valuable to working professional adult students trying to advance their careers by developing a more sophisticated understanding of leadership in their organizations.

The MS in Organizational Leadership program provides a rare opportunity to develop the self-awareness and understanding of others that is so essential to effective leadership. Students must have at least four years of full-time professional experience to enter the program. The core courses of study focus on communication, ethics, analysis and organizational leadership. The MSOL program is writing intensive, building on the university's emphasis on written communication. Students may focus on one of four tracks: Health Care Management, Human Resource Leadership, Public Service/Nonprofit Leadership, or Strategic Leadership.

MS in Organizational Leadership Program of Study

The program consists of 33 credits, including eight required core courses (24 credits) and three elective courses (9 credits) in a professional focus track.

Strategic Leadership Track
Students pursuing this track complete three additional courses (9 credits). They may select any combination of courses from the Human Resources Leadership Track, the Public Service/Nonprofit Leadership Track, the Health Care Management Track or from a specified list of electives across the graduate business curriculum.

Student Learning Outcomes
Upon completion of the MS in Organizational Leadership students will demonstrate the following competencies:

1. Communication Skills: Students will demonstrate capabilities with respect to effective communication with varied organizational stakeholders.
2. Personal Development: Students will exhibit an understanding of mechanisms/tools to maintain an ongoing awareness of personal characteristics, how these impact interactions with others and how to re-evaluate these regularly toward continuous improvement as leaders.
3. Critical Thinking: Students will be able to utilize analytical tools applicable to the leadership function in reviewing and enhancing organizational and individual performance.
4. Leadership Development: Students will be able to evaluate and understand organizational design issues, organizational learning issues and motivation issues toward becoming effective leaders of diverse organizations.
5. Strategic Thinking: Students will demonstrate understandings of the formulation of strategy and implications for its implementation within diverse organizations.
6. Ethical Behavior: Students will recognize choices in ethical contexts and effectively use frameworks to make decisions as leaders that are ethical.

Admission
Applicants to the MSOL program must possess four years of professional, post-bachelor’s degree experience.

In addition to an application for admission, students also must submit:

1. official transcripts of all undergraduate and graduate programs/courses completed
2. personal statement
3. resume
4. three letters of recommendation (one being from a professional contact)
5. application fee

Master of Science in Interactive Media and Communications

Program Contact: Phillip Simon (Phillip.Simon@quinnipiac.edu)
203-582-8274

The Master of Science in Interactive Media and Communications program merges creative, visual and critical thinking to mold expert digital storytellers and designers who are able to reach audiences on any platform in the world.

The program not only prepares students to design, produce and manage a range of content but also to become strong creative thinkers and visual leaders. Students learn principles of human-centered design to better understand and connect with a wide range of audiences and apply design thinking strategies to solve creative, technical and business-related obstacles.

The program provides a deep exploration into all aspects of media, including web design and production; social media analytics; digital audio, video and graphics; and UX and UI.

Regardless of the specialty, the completion of a practice-based portfolio capstone is central to the program experience. This capstone is not a singular project, but a robust, web-based portfolio generated over time that will showcase accumulated work and skill set depth. The student’s portfolio is influenced by every course and program experience and can be shown to employers in a range of fields from marketing, public relations and advertising to journalism, publishing, entertainment and health care.

The program encourages applications from prospective students who want to apply skills acquired during their undergraduate education or professional careers. Students come from a diverse range of experiences such as journalism, information technology, graphic design, web design/management, game design, broadcasting, filmmaking, media studies and public relations; as well as liberal arts and sciences.

MS in Interactive Media and Communications Program of Study

To earn the master’s degree, students must complete 30 credits with a minimum 3.0 GPA and no grades less than a C. Any course with a grade less than C must be retaken.

The program has 9 credits of required courses and 21 credits of electives. A flexible elective structure allows students to customize the degree to coincide with career goals. Students have the opportunity to enroll in an optional 3-credit internship as part of the program. Also available is a 3-credit independent study course for students who want to do advanced work or research on a particular topic.

A required master’s capstone experience is included in the 30 credits. For the capstone, the students create a professional quality web portfolio selected from the best work from their courses and experiences while in the program.

The program may be completed in 21 months, provided students complete two courses per semester including summer. The program is designed to be completed online, however, there will be some courses available on-campus. Full-time students can finish in 16 months. Fall and spring starts are available.

Current Quinnipiac undergraduate students may apply for the five-year dual-degree bachelor’s/master’s program.

Student Learning Outcomes

The Interactive Media and Communications program (ICM) encompasses
a wide spectrum of interactive media. The program acknowledges that
interactive media is a cultural catalyst that has revolutionized the way
people communicate. It prepares students to think and act critically,
creatively and ethically. The program provides a rigorous curriculum
of research, writing, conceptualization, problem-solving, innovation
and creative practice. Students graduating from this program are well
prepared to meet the challenges within the field of interactive media
and to develop ethical cross-media communication strategies. The areas of
study are always evolving and include visual design, web technology,
motion graphics, UX, social media, content creation, audio/video design,
and writing. The program concludes with a capstone experience that is
a culmination of work created throughout the program. The following
competencies are critical for interactive media practitioners, and they
construct a framework that contributes to the overall effective practice of
the discipline.

Upon completion of the program, students should be able to demonstrate the following competencies:

1. **Conduct In-Depth Research:** Conduct in-depth research using
   professional methods and terminology that demonstrates fluency
   in the use of the formal vocabulary and concepts. This includes
   recognizing the influence of major cultural, historical, technological
   and aesthetic trends on contemporary interactive products and
   services.

2. **Practice Creative and Critical Thinking:** Practice processes and
   methods that cover empathy, the psychology of the user, problem
   definition, and ideation methods. They build a knowledge base and
   skill set required to practice across media and to conduct the “deep
   work” required of master’s level study.

3. **Solve Creative Problems:** Solve creative problems using the
   synthesis of technical, aesthetic and conceptual knowledge. This
   is demonstrated by the ability to create and develop visual and
   written responses to communication problems using research,
   preproduction, storyboarding and media production techniques.

4. **Implement Processes:** Use industry standard processes and methods
   to produce communications that incorporate a high level of strategy,
   planning, production and distribution. This is exhibited by the ability
   to solve communication challenges by using analysis, prototyping,
   user testing and outcome evaluation, among other methods.

5. **Develop Strategies:** Know how to use words, visuals, video, social
   media and mobile media to build an audience and deliver content.
   They create an effective media presence and apply their knowledge to
   strategic challenges within real-world situations.

6. **Actualize Concepts:** Actualize technical, aesthetic and conceptual
   decisions based on using appropriate tools and technology. This
   includes knowing how to learn techniques with the recognition that
   technological change is constant.

7. **Produce Professional Media:** Produce a body of media suitable
   for seeking professional opportunities in their chosen branch of
   communication. This is facilitated through the process of identifying
   and packaging works, creating a consistent message, and using the
   results of their research and practice. The focus is on a unique and
   persuasive body of work to be distributed across mediums.

Admission

The School of Communications invites applications from prospective
students who wish to pursue the professional practice of interactive
media and communications. Recent graduates of a bachelor’s program
outside of the communications field are welcome to apply, as are
prospective students who are presently working and wish to either shift
careers or enhance their professional standing.

Admission is based on the following:

- Undergraduate degree from a regionally accredited institution with a
  GPA of 3.0 or greater
- Cover letter expressing interest in pursuing graduate education
- A resume showing experience either as a student or professional
- Two professional or academic recommendations
- Online portfolio of written, visual, media or interactive work
- An original piece of writing (1,000 word minimum). This can be an
  academic, professional or creative work you have already produced
  or a new original piece of writing on a topic of your choice. We
  are looking for depth of thought, depth of research, the ability to
  formulate ideas, and writing skills.

Master of Science in Journalism

Program Contact: Molly Yanity (Molly.Yanity@quinnipiac.edu)
203-582-5031

The MS in Journalism program emphasizes the command of journalism
fundamentals and new technologies—all in the service of effective and
innovative storytelling. A core of foundational courses stresses the
development and practice of reporting and digital skills, and provides a
solid underpinning in media ethics.

The program is designed so that students, in consultation with their
adviser, develop areas of inquiry to engage in a deep exploration of
current issues. By taking elective courses in communications and other
areas of the university, students are equipped with the knowledge and
insight that lead to high-quality journalistic work.

Our graduates are nimble and adaptable journalists who excel at
gathering facts, conducting interviews, writing and producing informative
and engaging stories, and expertly using a variety of digital tools.

Courses and labs are offered in our professional all-digital broadcast
production environment. Our facilities include a high-definition
studio, two 4K video editing suites, HD editing suites for single or group
projects and other areas designed to support both studio and remote
productions.

Video cameras, audio recorders, lights and other gear required to capture
interviews and events in the field are available to students through our
well-stocked and expertly maintained equipment inventory.

Prior to entering the program, students who do not have a journalism
background must complete the boot camp course.

MS in Journalism Curriculum

The MS in Journalism is offered in collaboration with the College
of Arts and Sciences. In the School of Communications, students
receive journalism-specific theoretical grounding and skills-based
instruction. Once matriculated, students must choose an area of inquiry.
In collaboration with their academic advisor, students design a course of
study that uses elective courses—selected from a pre-approved menu—to deepen their understanding of particular areas of interest.

To earn the master’s degree, students must complete 30 credits with a minimum 3.0 GPA and no grade less than a C. Any course with a grade of less than C must be retaken. Full-time students can complete the program in two semesters and one summer term.

Students may take other electives with permission of their adviser. Electives are offered on an as-needed basis and may not be available during a given student’s program of study.

Student Learning Outcomes

Upon completion of the program, students should be able to demonstrate the following competencies:

1. **Understand** professional journalistic practices, ethical standards and technologies and be able to apply reason to develop ideas within these structures.
2. **Analyze** information based on journalistic practices of research, interviews and observation.
3. **Evaluate** information in determining the story’s narrative structure and reach via social media and other applications.
4. **Report and compose** a story, either visual, multimedia or text, that informs, enlightens, entertains and is useful to the reader or audience within professional journalistic reporting and writing practices and ethical standards.

Admission

To qualify for admission, candidates must have earned a bachelor’s degree from a regionally accredited institution of higher learning and have a minimum GPA of 3.0. Journalism experience is not required.

Admission to the MS in Journalism program is competitive and based on undergraduate performance as measured by GPA, experience in any career field for students returning to school and the required documents listed below.

Applications are considered on a rolling basis, and students apply to enter during the fall. Applications are evaluated once all materials are received by Quinnipiac.

A complete application consists of the following:

- application form
- application fee
- two professional recommendations
- personal statement explaining decision to pursue graduate study
- current resume
- portfolio of writing or work samples (i.e., college papers, videos, audio clips or published work of any kind)
- official transcripts of all undergraduate and graduate work

Master of Science in Public Relations

Program Contact: Alexander V. Laskin (alexander.laskin@quinnipiac.edu)
203-582-8470

The Master of Science in Public Relations program offers students the opportunity to pursue an advanced degree in a highly competitive and growing field. The program is designed for those interested in advancing their careers in public relations and/or transitioning into public relations from complementary fields such as (but not limited to) finance, law, health care, technology, human resources, journalism, and marketing. The program helps recent graduates with bachelor's degrees in public relations and other disciplines gain a competitive edge as they enter the workforce. Quinnipiac University undergraduate students may apply for the combined, five-year bachelor/master’s dual degree program (p. 375).

Graduates of the program are qualified to work as public relations specialists in both the public sector and private sector with expertise and skills applicable to corporate, nonprofit and government institutions. Students study the conceptual and theoretical foundations of public relations, learn how to conduct and analyze public relations research and evaluation, and hone their skills in contemporary public relations practices and techniques. The program stresses professional
competence, global consciousness, and professional and social responsibility.

Also available is a Social Media Track for students who want to delve deeper into social media. Students who choose the Social Media Track take courses that cover social media practices, social and web analytics, and strategic planning. In this track, students learn the fundamental practices that have led to the rise of social media and how to deploy them across multiple platforms and disciplines. Students who complete this track have a firm understanding of the role social media plays in today’s communications landscape as well as the tools to deploy new solutions as this media continues to grow and evolve.

MS in Public Relations Program of Study

To earn the master’s degree, students must complete 36 credits with a minimum 3.0 GPA and no grades less than a C. Any course with a grade of less than C has to be retaken.

Students have three options to complete the program: fast track, full time or part time. Students on a fast track complete the 36-credit program in one calendar year. They take 15 credits in the fall and spring terms, respectively, and complete a 6-credit research thesis or professional project during the summer or subsequent terms. Full-time students take 9 credits every fall and spring semester and complete the program in two years. Students may also elect to complete the program on a part-time basis.

Students pursuing the Social Media Track must complete the following electives: STC 514 and two ICM electives focused on social media (Graduate Director approval required).

### Student Learning Outcomes

Upon completion of the program, students should be able to demonstrate the following competencies:

1. **Information Fluency and Analysis**: Plan, conduct, analyze and report primary research findings based on a survey, focus group or other appropriate research means, as well as interpret secondary industry research for a client.
2. **Critical and Creative Thinking**: Propose measurable, attainable objectives for a client based on primary and secondary research findings and produce a campaign strategy designed to help the client achieve its goals.
3. **Effective Communication**: Demonstrate both written and oral proficiency within a variety of traditional and new industry communication vehicles and message delivery formats.
4. **Social Intelligence**: Demonstrate an ability to work effectively and responsibly within groups and manage relationships with clients, team members and publics to achieve individual and common goals.
5. **Quantitative and Qualitative Literacy**: Propose an evaluation of a campaign to measure the campaign’s effectiveness.

### Admission

New students are admitted only in the fall term. Applications are accepted on a rolling basis. Admission is competitive and based on the following application requirements:

- application form and fee
- resume
- personal statement explaining decision to pursue graduate study in public relations
- two letters of reference (preferably from individuals familiar with the applicant’s academic potential)
- official undergraduate and graduate transcripts from all institutions attended
- writing or other media samples that demonstrate the applicant’s ability to communicate effectively with diverse audiences
- minimum 3.0 undergraduate GPA

### Master of Science in Public Relations – Online/Professional Track

Program Contact: Alexander V. Laskin (alexander.laskin@quinnipiac.edu) 203-582-8470

The Master of Science in Public Relations – online/professional track is geared toward early- to mid-career professionals who are interested in advancing their careers in public relations and/or transitioning into public relations from complementary fields such as finance, health, technology, human resources, journalism, marketing and law.

The overriding goal of the program is to develop professionally competent, socially responsible and globally conscious graduates.
who are familiar with the conceptual and professional foundations of public relations, capable of assessing and applying public relations research, and skilled in contemporary public relations practices and techniques. In keeping with Quinnipiac University’s mission, graduates of this online program will be prepared to make contributions as responsible professionals and community leaders in a culturally diverse society.

The online program prepares students for the Accreditation in Public Relations (APR) exam from the Public Relations Society of America. The core courses are aligned with the 10 Knowledge, Skills and Abilities (KSA) areas tested in the APR exam.

Students admitted to the Master of Science in Public Relations – online/professional track enroll on a part-time basis. Students must complete a 3-credit Capstone project.

Also available is a social media track for students who want to delve deeper into social media. Students who choose the social media track take courses that cover social media practices, social and web analytics and strategic planning. In this track, students learn the fundamental practices that have led to the rise of social media and how to deploy them across multiple platforms and disciplines. Students who complete this track have a firm understanding of the role social media plays in today’s communications landscape as well as the tools to deploy new solutions as this media continues to grow and evolve.

**MS in Public Relations – Online/Professional Track Program of Study**

To earn the master’s degree, students must complete 36 credits with a minimum 3.0 GPA and no grades less than a C. Any course with a grade of less than C must be retaken.

Total Credits: 36

1. Students pursuing the Social Media Track must complete the following courses as electives: STC 507, STC 514, ICM 524.

**Student Learning Outcomes**

Upon completion of the program, students should be able to demonstrate the following competencies:

1. **Information Fluency and Analysis**: Plan, conduct, analyze and report primary research findings based on a survey, focus group or other appropriate research means, as well as interpret secondary industry research for a client.
2. **Critical and Creative Thinking**: Propose measurable, attainable objectives for a client-based on primary and secondary research findings and produce a campaign strategy designed to help the client achieve its goals.
3. **Effective Communication**: Demonstrate both written and oral proficiency within a variety of traditional and new industry communication vehicles and message delivery formats.
4. **Social Intelligence**: Demonstrate an ability to work effectively and responsibly within groups and manage relationships with clients, team members, and publics to achieve individual and common goals.
5. **Quantitative and Qualitative Literacy**: Propose an evaluation of a campaign to measure the campaign’s effectiveness.

**Admission**

Applications are accepted on a rolling basis. Admission is based on the following:

- An undergraduate degree from a regionally accredited institution with a GPA of 3.0 or greater
- A resume showing experience either as a student or professional
- Two professional or academic recommendations
- Online samples of written, visual, media or interactive work
- A 500-word personal statement (see application)

**Master of Science in Sports Journalism**

Program Contact: Molly Yanity (Molly.Yanity@quinnipiac.edu)
203-582-5031

The Master of Science in Sports Journalism prepares students from all academic and professional backgrounds for careers in broadcast/ multimedia sports and in traditional and emerging media companies that focus on reporting and analysis of sports.

The program features training in the principles, tools, craft, history and ethics of contemporary sports journalism in the context of innovative approaches to reporting and presenting information via social media and other forms. Our goal is simple: to transform a lifelong passion for sports into a successful career.

The curriculum prepares students for careers in local, cable and network television news and for websites with a strong visual component.

Students are challenged to develop story ideas through reasoning and observation, to analyze data and public documents, to wisely conduct
interviews, to learn the technical skills to acquire and edit video and audio, and, above all, to write with discipline, poise and creative vitality. In short, our program prepares students for the daily test-of-strength that is sports reporting in the 21st century regardless of the distribution platform.

Students who successfully complete the program will be properly trained for a number of career opportunities including on-camera reporters and anchors for broadcast, cable and network television news, play-by-play announcers, analysts, and talk show hosts for terrestrial, online and satellite radio, producers for broadcast, cable and network television news, producers for news websites, and writers for broadcast news and websites.

Courses and labs are offered in our professional all-digital broadcast production environment. Our facilities include a high-definition studio, two 4K video editing suites, HD editing suites for single or group projects, and other areas designed to support both studio and remote productions.

Video cameras, audio recorders, lights and other gear required to capture interviews and events in the field are available to students through our well-stocked and expertly maintained equipment inventory. In addition, students will have access to the People’s United Center for the coverage of games and interviews.

**MS in Sports Journalism**

To earn the master’s degree, students must complete 36 credits with a minimum 3.0 GPA and no grade less than a C. Any course with a grade of less than C must be retaken. Full-time students can complete the program in one calendar year. Part-time students can do it in two.

**Elective Courses**

Select one elective from those available in consultation with your adviser. Students may take any course in any School of Communications graduate program with permission of program director. Electives are offered on an as-needed basis and may not be available during a given student’s program of study.

Total Credits: 36

Courses and curriculum requirements are subject to change.

### Student Learning Outcomes

Upon completion of the program, students should be able to demonstrate the following competencies:

1. **Understand** professional sports journalistic practices, ethical standards and technologies and be able to apply reason to develop ideas within these structures.

2. **Analyze** information based on sports journalistic practices of research, interviews and observation.

3. **Evaluate** information in determining the story’s narrative structure and reach via social media and other applications.

4. **Report and compose** a story, either visual, multimedia or text, that informs, enlightens, entertains and is useful to the reader or audience within professional sports journalistic reporting and writing practices and ethical standards.

### Admission

To qualify for admission, candidates must have earned a bachelor’s degree from a regionally accredited institution of higher learning and have a minimum GPA of 3.0. Journalism experience is not required.

Admission to the MS in Sports Journalism program is competitive and based on undergraduate performance as measured by GPA, experience in any career field for students returning to school and the required documents listed below.

Applications are considered on a rolling basis, and students apply to enter during the fall. Applications are evaluated once all materials and fees are received by Quinnipiac.

A complete application consists of the following:

- application form
- application fee
- two professional recommendations
- personal statement explaining decision to pursue graduate study
- current resume
- portfolio of writing or work samples (i.e., college papers, videos, audio clips or published work of any kind)
- official transcripts of all undergraduate and graduate work

### Dual-Degree BA/MS or BS/MS in Interactive Media and Communications (4+1)

Program Contact: Phillip Simon (Phillip.Simon@quinnipiac.edu)
203-582-8274

Quinnipiac offers a five-year Dual-Degree BA/MS or BS/MS in Interactive Media and Communications (4+1) program for students who are currently enrolled in any Quinnipiac undergraduate program and wish to pursue graduate studies at the university. If accepted, students can take up to 6 credits of graduate courses during their senior year beginning in the fall semester. Those credits can be applied to both undergraduate and graduate programs. Applications for the dual-degree program are available through the School of Communications.
The Master of Science in Interactive Media and Communications program merges creative, visual and critical thinking to mold expert digital storytellers and designers who are able to reach audiences on any platform in the world.

The program not only prepares students to design, produce and manage a range of content but also to become strong creative thinkers and visual leaders. Students learn principles of human-centered design to better understand and connect with a wide range of audiences and apply design thinking strategies to solve creative, technical and business-related obstacles.

The program provides a deep exploration into all aspects of media, including web design and production; social media analytics; digital audio, video and graphics; and UX and UI.

Regardless of the specialty, the completion of a practice-based portfolio capstone is central to the program experience. This capstone is not a singular project, but a robust, web-based portfolio generated over time that will showcase accumulated work and skill set depth. The student’s portfolio is influenced by every course and program experience and can be shown to employers in a range of fields from marketing, public relations and advertising to journalism, publishing, entertainment and health care.

**Dual-Degree BA/MS or BS/MS (4+1) Program of Study**

Current Quinnipiac undergraduate students may apply for the five-year dual-degree program in their junior year.

Students in the Dual-Degree BA/MS or BS/MS in Interactive Media and Communications (4+1) program complete up to 6 credits of graduate courses during their senior year, which also fulfills undergraduate electives. Students must work with their undergraduate adviser to ensure that the courses fit into their degree programs.

To earn the master’s degree, students must complete 30 credits with a minimum 3.0 GPA and no grades less than a C. Any course with a grade less than C must be retaken.

The program has 9 credits of required courses and 21 credits of electives. A flexible elective structure allows students to customize the degree to coincide with career goals. Students have the opportunity to enroll in an optional 3-credit internship as part of the program.

Students create a master’s blog, to keep a unique record of their research, perspectives and work through the program.

A required master’s capstone experience is included in the 30 credits. For the capstone, the students create a professional quality web portfolio, selected the best work from their courses and experiences.

**Student Learning Outcomes**

The Interactive Media and Communications program (ICM) encompasses a wide spectrum of interactive media. The program acknowledges that interactive media is a cultural catalyst that has revolutionized the way people communicate. It prepares students to think and act critically, creatively and ethically. The program provides a rigorous curriculum of research, writing, conceptualization, problem-solving, innovation and creative practice. Students graduating from this program are well prepared to meet the challenges within the field of interactive media and to develop ethical cross-media communication strategies. The areas of study are always evolving and include visual design, web technology, motion graphics, UX, social media, content creation, audio/video design, and writing. The program concludes with a capstone experience that is a culmination of work created throughout the program. The following competencies are critical for interactive media practitioners, and they construct a framework that contributes to the overall effective practice of the discipline.

Upon completion of the program, students should be able to demonstrate the following competencies:

1. **Conduct In-Depth Research**: Conduct in-depth research using professional methods and terminology that demonstrates fluency in the use of the formal vocabulary and concepts. This includes recognizing the influence of major cultural, historical, technological
and aesthetic trends on contemporary interactive products and services.

2. **Practice Creative and Critical Thinking**: Practice processes and methods that cover empathy, the psychology of the user, problem definition, and ideation methods. They build a knowledge base and skill set required to practice across media and to conduct the “deep work” required of master’s level study.

3. **Solve Creative Problems**: Solve creative problems using the synthesis of technical, aesthetic and conceptual knowledge. This is demonstrated by the ability to create and develop visual and written responses to communication problems using research, preproduction, storyboarding and media production techniques.

4. **Implement Processes**: Use industry standard processes and methods to produce communications that incorporate a high level of strategy, planning, production and distribution. This is exhibited by the ability to solve communication challenges by using analysis, prototyping, user testing and outcome evaluation, among other methods.

5. **Develop Strategies**: Know how to use words, visuals, video, social media and mobile media to build an audience and deliver content. They create an effective media presence and apply their knowledge to strategic challenges within real-world situations.

6. **Actualize Concepts**: Actualize technical, aesthetic and conceptual decisions based on using appropriate tools and technology. This includes knowing how to learn techniques with the recognition that technological change is constant.

7. **Produce Professional Media**: Produce a body of media suitable for seeking professional opportunities in their chosen branch of communication. This is facilitated through the process of identifying and packaging works, creating a consistent message, and using the results of their research and practice. The focus is on a unique and persuasive body of work to be distributed across mediums.

**Admission**

Quinnipiac University students from any undergraduate major may apply to the dual-degree bachelor’s/master’s in Interactive Media and Communications (ICM) program during their junior year. The deadline is the third Friday in February. Students must have a cumulative GPA of 3.0 or greater by the end of their junior year.

An application should be submitted to the ICM program director in the School of Communications and must consist of the following:

- Application form
- Resume
- A cover letter that explains your decision to pursue graduate education.
- An original piece of writing (1,000 word minimum). This can be an academic, professional or creative work you have already produced or a new original piece of writing on a topic of your choice. We are looking for depth of thought, depth of research, ability to formulate ideas and writing skills.
- Two letters of reference (one from a professor in the student’s major).

**Dual-Degree BA/MS or BS/MS in Journalism (4+1)**

Program Contact: Molly Yanity (Molly.Yanity@quinnipiac.edu)
203-582-5031

Quinnipiac offers a five-year Dual-Degree BA/MS or BS/MS in Journalism (4+1) for students who are currently enrolled in any Quinnipiac undergraduate program and wish to pursue graduate studies at the university. If accepted, students can take up to 3 credits of graduate courses during their senior year beginning in the fall semester with the permission of the graduate program director. Those credits can be applied to both undergraduate and graduate programs. Applications for the dual-degree program are available through the School of Communications.

The MS in Journalism program emphasizes the command of journalism fundamentals and new technologies—all in the service of effective and innovative storytelling. A core of foundational courses stresses the development and practice of reporting and digital skills, and provides a solid underpinning in media ethics.

The program is designed so that students, in consultation with their adviser, develop areas of inquiry to engage in a deep exploration of current issues. By taking elective courses in communications and other areas of the university, students are equipped with the knowledge and insight that lead to high-quality journalistic work.

Our graduates are nimble and adaptable journalists who excel at gathering facts, conducting interviews, writing and producing informative and engaging stories, and expertly using a variety of digital tools.

Courses and labs are offered in our professional all-digital broadcast production environment. Our facilities include a high-definition studio, two 4K video editing suites, HD editing suites for single or group projects and other areas designed to support both studio and remote productions.

Video cameras, audio recorders, lights and other gear required to capture interviews and events in the field are available to students through our well-stocked and expertly maintained equipment inventory.

Prior to entering the program, students who do not have a journalism background must complete the boot camp course.

**Dual-Degree BA/MS or BS/MS in Journalism (4+1) Program of Study**

Current Quinnipiac undergraduate students may apply for the five-year dual-degree bachelor’s/master’s program in their junior year.

Students in the dual-degree program complete up to 3 credits of graduate courses during their senior year, which also fulfills undergraduate electives. Students must work with their undergraduate adviser to ensure that the courses fit into their degree programs.

The MS in Journalism is offered in collaboration with the College of Arts and Sciences. In the School of Communications, students receive journalism-specific theoretical grounding and skills-based instruction. Once matriculated, students must choose an area of inquiry. In collaboration with their academic adviser, students design a course of study that uses elective courses—selected from a pre-approved menu—to deepen their understanding of particular areas of interest.

To earn the master’s degree, students must complete 30 credits with a minimum 3.0 GPA and no grade less than a C. Any course with a grade of less than C must be retaken. Full-time students can complete the program in two semesters and one summer term.

Student Learning Outcomes

Upon completion of the program, students should be able to demonstrate the following competencies:

1. Understand professional journalistic practices, ethical standards and technologies and be able to apply reason to develop ideas within these structures.
2. Analyze information based on journalistic practices of research, interviews and observation.
3. Evaluate information in determining the story's narrative structure and reach via social media and other applications.

Admission

Quinnipiac University students from any undergraduate major may apply to the dual-degree bachelor's/master's program during their junior year. The deadline is the third Friday in February. Students must have a cumulative GPA of 3.0 or greater by the end of their junior year.

An application should be submitted to graduate programs director in the School of Communications and consists of the following:

- application form
- resume
- two letters of reference (one from a professor in the student's major)
- a personal statement

Dual-Degree BA/MS or BS/MS in Public Relations (4+1)

Program Contact: Alexander V. Laskin (alexander.laskin@quinnipiac.edu) 203-582-8470

Quinnipiac offers a five-year Dual-Degree BA/MS or BS/MS in Public Relations (4+1) program for students who are currently enrolled in any Quinnipiac undergraduate program and wish to pursue graduate studies at the university. If accepted, students typically take 6 credits of graduate courses during their senior year beginning in the fall semester. In some circumstances, 9 graduate credits will be allowed with the permission of the graduate public relations director. Those credits can be applied to both undergraduate and graduate programs. Applications for the dual-degree program are available through the School of Communications.

The Master of Science in Public Relations program offers students the opportunity to pursue an advanced degree in a highly competitive and growing field. The program is designed for those interested in advancing their careers in public relations and/or transitioning into public relations from complementary fields such as (but not limited to) finance, law, health care, technology, human resources, journalism, and marketing. The program helps recent graduates with bachelor's degrees in public relations and other disciplines gain a competitive edge as they enter the workforce.

Graduates of the program are qualified to work as public relations specialists in both the public sector and private sector with expertise and skills applicable to corporate, nonprofit and government institutions. Students study the conceptual and theoretical foundations of public relations, learn how to conduct and analyze public relations research and evaluation, and hone their skills in contemporary public relations practices and techniques. The program stresses professional competence, global consciousness, and professional and social responsibility.

Also available is a Social Media Track for students who want to delve deeper into social media. Students who choose the Social Media Track take courses that cover social media practices, social and web analytics, and strategic planning. In this track, students learn the fundamental practices that have led to the rise of social media and how to deploy them across multiple platforms and disciplines. Students who complete this track have a firm understanding of the role social media plays in
today's communications landscape as well as the tools to deploy new solutions as this media continues to grow and evolve.

**Dual-Degree BA/MS or BS/MS (4+1) Program of Study**

Current Quinnipiac undergraduate students may apply for the five-year dual-degree program in their junior year.

Students in the Dual-Degree BA/MS or BS/MS in Public Relations (4+1) program complete 6 credits of graduate courses during their senior year, which also fulfills undergraduate electives. Students must work with their undergraduate adviser to ensure that the courses fit into their degree programs.

To earn the master's degree, students must complete 36 credits with a minimum 3.0 GPA and no grades less than a C. Any course with a grade of less than C has to be retaken.

### Free elective

Select one public relations elective (from list above) or elective from other School of Communications graduate programs approved by adviser.

### Capstone requirement

STC 601 Public Relations Professional Project or STC 602 Public Relations Research Thesis

**Total Credits** 36

---

1 Students pursuing the Social Media Track must complete the following electives: STC 514 and two ICM electives focused on social media (graduate director approval required).

### Student Learning Outcomes

Upon completion of the program, students should be able to demonstrate the following competencies:

1. **Information Fluency and Analysis**: Plan, conduct, analyze and report primary research findings based on a survey, focus group or other appropriate research means, as well as interpret secondary industry research for a client.

2. **Critical and Creative Thinking**: Propose measurable, attainable objectives for a client based on primary and secondary research findings and produce a campaign strategy designed to help the client achieve its goals.

3. **Effective Communication**: Demonstrate both written and oral proficiency within a variety of traditional and new industry communication vehicles and message delivery formats.

4. **Social Intelligence**: Demonstrate an ability to work effectively and responsibly within groups and manage relationships with clients, team members and publics to achieve individual and common goals.

5. **Quantitative and Qualitative Literacy**: Propose an evaluation of a campaign to measure the campaign’s effectiveness.

**Dual-Degree BA/MS or BS/MS in Sports Journalism (4+1)**

Program Contact: Molly Yanity (Molly.Yanity@quinnipiac.edu)  
203-582-5031

Quinnipiac offers a five-year Dual-Degree BA/MS or BS/MS in Sports Journalism (4+1) for students who are currently enrolled in any Quinnipiac undergraduate program and wish to pursue graduate studies at the university. If accepted, students can take up to 6 credits of graduate courses during their senior year beginning in the fall semester with the permission of the graduate sports journalism director. Those credits can be applied to both undergraduate and graduate programs. Applications for the dual-degree program are available through the School of Communications.

The Master of Science in Sports Journalism prepares students from all academic and professional backgrounds for careers in broadcast/multimedia sports and in traditional and emerging media companies that focus on reporting and analysis of sports.

The program features training in the principles, tools, craft, history and ethics of contemporary sports journalism in the context of innovative approaches to reporting and presenting information via social media and other forms. Our goal is simple: to transform a lifelong passion for sports into a successful career.

The curriculum prepares students for careers in local, cable and network television news and for websites with a strong visual component.

Students are challenged to develop story ideas through reasoning and observation, to analyze data and public documents, to wisely conduct interviews, to learn the technical skills to acquire and edit video and audio, and, above all, to write with discipline, poise and creative vitality. In short, our program prepares students for the daily test-of-strength that is sports reporting in the 21st century regardless of the distribution platform.

Students who successfully complete the program are properly trained for a number of career opportunities including on-camera reporters and anchors for broadcast, cable and network television news, play-by-play announcers, analysts, and talk show hosts for terrestrial, online and satellite radio, producers for broadcast, cable and network television news, producers for news websites, and writers for broadcast news and websites.

Courses and labs are offered in our professional all-digital broadcast production environment. Our facilities include a high-definition studio, two 4K video editing suites, HD editing suites for single or group projects, and other areas designed to support both studio and remote productions.

Video cameras, audio recorders, lights and other gear required to capture interviews and events in the field are available to students through our well-stocked and expertly maintained equipment inventory. In addition, students have access to the People’s United Center for the coverage of games and interviews.

Certificate in Social and Emotional Learning and School Climate

The Certificate in Social and Emotional Learning and School Climate is an online 15-credit certificate program, which addresses educational institutions’ current and pressing need for systemic changes to school climate to enhance learning and promote safe schools. The Certificate will support professionals who wish to understand and positively affect the social and emotional climate of school-based environments to facilitate the academic achievement of K-12 students, enhance the collaborative and supportive work environment of teachers, and build strong relationships with the families and communities they serve. The program draws from interdisciplinary expertise and teaching faculty including the fields of medicine, social work, psychology and education.

The goal of the certificate program is to develop key personnel who can return to their educational institutions with the knowledge and skills needed to ensure lasting structural changes to positively affect school climate. Based on insights and research from the Comer School Development Model, the courses build upon one another, culminating in a self-defined applied capstone project, which will address a problem of study within each participant’s respective school environment; and follow up with the implementation and studied effectiveness of their project. Throughout the program, participants work closely with a mentor who support the capstone project design and implementation.

### Admission Requirements

Applications for the online Graduate Certificate in Social and Emotional Learning and School Climate are requested by June 30 for enrollment beginning in late July. To qualify for admission to the certificate program, applicants must have a bachelor’s degree in education or a related field from an accredited institution with a minimum GPA of 3.0. Candidates also must be employed in a school-based or educational setting.

Candidates must submit:
1. completed application form  
2. resume  
3. letter of intent  
4. official transcripts of all undergraduate and graduate work completed  
5. two letters of recommendation (professional and/or academic)

**Graduate MAT Degree in Secondary Education**

Program Contact: Christina Pavlak (Christina.Pavlak@quinnipiac.edu), 203-582-3192

The purpose of Quinnipiac’s graduate Master of Arts in Teaching program is to prepare teacher candidates with perspectives, knowledge and skills to become master educators. The School of Education recognizes that the concept of educator is three-dimensional, and that successful educators must be teachers, learners and leaders. Therefore, graduates of the Master of Arts in Teaching program are teachers who lead all students to learn, who continue to learn as they continue to teach, and leaders who influence the culture of their schools in ways that support best practices in teaching and learning.

The program reflects the spirit and mission of Quinnipiac with close attention to the teaching standards for the state of Connecticut and to the standards of the National Council for Accreditation of Teacher Education (NCATE). The three values of “excellence in education, a sensitivity to students, and a spirit of community,” which are the heart of Quinnipiac’s mission statement, are woven throughout the program.

**General Information**

The Quinnipiac University secondary curriculum consists of an intensive five-semester program of study that begins in the fall semester. Each curriculum includes core certification courses that provide eligibility for teacher certification, advanced content (discipline) courses which satisfy master’s degree requirements, and a unique internship experience which provides pre-service teachers the opportunity to learn about schools, students and teaching.

The graduate MAT program offers Quinnipiac teacher candidates a Master of Arts in Teaching degree leading to certification through the Connecticut State Department of Education. Consistent with the university’s mission, arts and sciences studies are integrated with professional studies to prepare graduates who have depth and breadth of content knowledge and strong pedagogical skills.

**Internship/Residency**

Candidates participate in an internship during the first two semesters of the program. Quinnipiac University has developed collaborative partnerships with school districts throughout central and southern Connecticut to provide graduate candidates with guided, hands-on professional practice and to defray some costs of the program. Candidates in the internship receive a tuition reduction during the internship semesters. (An optional second internship/residency is available during the final two semesters, resulting in significant additional tuition reduction.)

Interns serve in area schools in a variety of capacities and as substitute teachers with guidance from an on-site adviser and from a Quinnipiac faculty member. Each intern has the opportunity to participate in staff meetings and take part in all school operations, becoming a valued member of the school faculty. In the late afternoon and early evening, candidates continue their formal studies on the Quinnipiac campus. During a residency, teacher candidates remain in a single classroom for 10 weeks or more as a co-teacher with a cooperating teacher and a university supervisor providing guidance and support.

**Secondary Education MAT Curriculum**

To complete all requirements of the MAT program, a candidate must complete all coursework and successfully complete all performance tasks to qualify for teacher certification.

Student Learning Outcomes

Upon completion of the Master of Arts in Teaching program, teacher candidates will be able to demonstrate the following competencies:

1. **Content Knowledge**: Identify and define the major concepts of their discipline and understand that content is dynamic and ways of knowing are constantly changing.
2. **Instructional Strategies**: Recognize varied instructional practices and apply appropriate instructional strategies based upon principles of effective teaching.
3. **Learning Differences, Learner Development**: Recognize the complexity of human diversity and provide an instructional program that is responsive to the needs of diverse students.
4. **Instructional Strategies**: Apply appropriate technology to enhance the teaching and learning process.
5. **Professional Learning and Ethical Practice**: Demonstrate the skills and commitment to engage in reflective, mindful practice.
6. **Assessment**: Use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.
7. **Professional Learning and Ethical Practice**: Recognize that since content is dynamic and ways of knowing are constantly changing, the profession requires a commitment to continuous learning.
8. **Leadership and Collaboration**: Recognize that education has the power to be transformative and that their role as educators includes the responsibility to advocate on behalf of their students to promote social justice.
9. **Professional Learning and Ethical Practice, Leadership and Collaboration**: Demonstrate a willingness to work collaboratively with peers, practitioners in the field and/or MAT instructors to sustain a professional learning environment to support student learning.
10. **Leadership and Collaboration**: Demonstrate an understanding that scholarly research is essential to improving their own practice and to enhancing the knowledge base of the profession.

Retention

Teacher candidates in the MAT program at Quinnipiac are expected to demonstrate the professional behaviors and dispositions articulated in both the School of Education’s Professional Attributes and Dispositions document and the CT Code of Professional Responsibility for Teachers. Candidates must maintain a GPA of 3.0 or higher for graduate courses in each semester with at least a B- or better in any education course. A grade of C+ or below in any education course (including the graduate content area courses) requires the candidate to retake the course at his/her expense and earn the minimum B- grade.

If the candidate, once formally accepted into the MAT program, fails to maintain the minimum GPA, that candidate may be allowed to remain in the program for a single semester on probationary status. If a candidate on probation fails to meet the minimum GPA by the end of the single probationary semester, that candidate is dismissed from the program.

The School of Education is fully accredited by the National Council for Accreditation of Teacher Education (NCATE). The U.S. Department of Education recognizes NCATE as a specialized accrediting body for schools, colleges and departments of education.

Note: Because the education program is subject to state review on a regular basis, prospective and current students are advised to see the School of Education for up-to-date program information.
Graduate MAT in Elementary Education

Program Contact: Christina Pavlak (Christina.Pavlak@quinnipiac.edu), 203-582-3192

The purpose of Quinnipiac’s graduate Master of Arts in Teaching program is to prepare teacher candidates with perspectives, knowledge and skills to become master educators. The School of Education recognizes that the concept of educator is three-dimensional, and that successful educators must be teachers, learners and leaders. Therefore, graduates of the Master of Arts in Teaching program are teachers who lead all students to learn, learners who continue to learn as they continue to teach, and leaders who influence the culture of their schools in ways that support best practices in teaching and learning.

The program reflects the spirit and mission of Quinnipiac with close attention to the teaching standards for the state of Connecticut and to the standards of the National Council for Accreditation of Teacher Education (NCATE). The three values of “excellence in education, a sensitivity to students, and a spirit of community,” which are the heart of Quinnipiac’s mission statement, are woven throughout the program.

General Information

The Quinnipiac University elementary education curriculum is an intensive five-semester program of study consisting of core certification courses that provide eligibility for teacher certification, advanced course work in literacy, numeracy and pedagogy to satisfy master’s degree requirements, and a unique internship/residency experience which provides pre-service teacher candidates the opportunity to learn about schools, students and teaching.

The graduate MAT program offers Quinnipiac teacher candidates a Master of Arts in Teaching degree leading to certification through the Connecticut State Department of Education. Consistent with the university’s mission, arts and sciences studies are integrated with professional studies to prepare graduates who have depth and breadth of content knowledge and strong pedagogical skills.

Internship/Residency

Candidates participate in an internship during the first two semesters of the program. Quinnipiac University has developed collaborative partnerships with school districts throughout central and southern Connecticut to provide graduate candidates with guided, hands-on professional practice and to defray some costs of the program. Candidates in the internship receive a tuition reduction during the internship semesters. (An optional second internship/residency is available during the final two semesters, resulting in significant additional tuition reduction.)

Interns serve in area schools in a variety of capacities and as substitute teachers with guidance from an on-site adviser and from a Quinnipiac faculty member. Each intern has the opportunity to participate in staff meetings and take part in all school operations, becoming a valued member of the school faculty. In the late afternoon and early evening, candidates continue their formal studies on the Quinnipiac campus. During a residency, teacher candidates remain in a single classroom for 10 weeks or more as a co-teacher with a cooperating teacher and a university supervisor providing guidance and support.

Elementary Education MAT Curriculum

To complete all requirements of the MAT program, a candidate must complete all coursework and successfully complete all performance tasks to qualify for teacher certification.

Student Learning Outcomes

Upon completion of the Master of Arts in Teaching program, teacher candidates will be able to demonstrate the following competencies:

1. **Content Knowledge**: Identify and define the major concepts of their discipline and understand that content is dynamic and ways of knowing are constantly changing.

2. **Instructional Strategies**: Recognize varied instructional practices and apply appropriate instructional strategies based upon principles of effective teaching.
3. **Learning Differences, Learner Development:** Recognize the complexity of human diversity and provide an instructional program that is responsive to the needs of diverse students.

4. **Instructional Strategies:** Apply appropriate technology to enhance the teaching and learning process.

5. **Professional Learning and Ethical Practice:** Demonstrate the skills and commitment to engage in reflective, mindful practice.

6. **Assessment:** Use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.

7. **Professional Learning and Ethical Practice:** Recognize that since content is dynamic and ways of knowing are constantly changing, the profession requires a commitment to continuous learning.

8. **Leadership and Collaboration:** Recognize that education has the power to be transformative and that their role as educators includes the responsibility to advocate on behalf of their students to promote social justice.

9. **Professional Learning and Ethical Practice, Leadership and Collaboration:** Demonstrate a willingness to work collaboratively with peers, practitioners in the field and/or MAT instructors to sustain a professional learning environment to support student learning.

10. **Leadership and Collaboration:** Demonstrate an understanding that scholarly research is essential to improving their own practice and to enhancing the knowledge base of the profession.

**Admission**

Applicants are accepted for admission to the fall semester only and are expected to enroll as full-time graduate students. To ensure admission into the program with a placement in an internship, applicants should complete the application process early. Admission to the graduate MAT program is based on a holistic review by MAT program faculty of the following admission requirements:

1. A 3.0 minimum overall undergraduate GPA (from all colleges and universities attended) with a subject area major or appropriate interdisciplinary major.

2. A transcript review that indicates a “B” or better performance in courses related to mathematics as well as English language arts. (Students whose transcripts do not meet this criteria will be required to provide proof of basic math/reading competencies as determined by the MAT program director.)

3. At least two written recommendations from individuals who have recent knowledge (within the last two years) of the applicant’s suitability as a prospective educator.

4. A written essay completed on-site that meets program standards.

5. Evidence of strong basic skills in math, reading and writing. Evidence can be provided through SAT or ACT scores. Alternatively, evidence may also be provided through completion of the Praxis Core Academic Skills Test. SAT, ACT or Praxis Core results will be reviewed by the program director. Any MAT candidate whose scores indicate an area of weakness will be required to participate in a non-credit bearing remediation program that addresses any area of underperformance in math, reading or writing. Once completion of the remediation process is done by the candidate, the status of the candidate will be reviewed. All candidates will be considered probationary status until the improvement of basic skills are documented and remediated.

6. A formal interview during which the applicant is expected to demonstrate: an ability to communicate clearly; a demeanor appropriate to the teaching profession; and a maturity and attitude necessary to meet the demands of the MAT program.

7. Effective July 1, 2010, Connecticut law requires all teacher candidates to undergo a criminal background check prior to being placed in a public school setting for field study, internship, and student teaching. Because a clinical experience is an integral part of each semester, failure to abide by this law will make an applicant ineligible for admission to the program. The School of Education has procedures in place to assist candidates in obtaining the background check. The cost of the background check is the responsibility of the teacher candidate.

**Retention**

Teacher candidates in the MAT program at Quinnipiac are expected to demonstrate the professional behaviors and dispositions articulated in both the School of Education’s Professional Attributes and Dispositions document and the CT Code of Professional Responsibility for Teachers. Candidates must maintain a GPA of 3.0 or higher for graduate courses in each semester with at least a B- or better in any education course. A grade of C+ or below in any education course (including the graduate content area courses) requires the candidate to retake the course at his/her expense and earn the minimum B- grade.

If the candidate, once formally accepted into the MAT program, fails to maintain the minimum GPA, that candidate may be allowed to remain in the program for a single semester on probationary status. If a candidate on probation fails to meet the minimum GPA by the end of the single probationary semester, that candidate is dismissed from the program. Granting of probationary status is subject to the director's approval and is neither automatic nor guaranteed.

Candidates failing to meet professional standards in the program may be subject to suspension or dismissal. In addition, candidates who exhibit a lack of effort or responsibility in the program, or who reveal interpersonal skills unsuited or inappropriate for teaching, will be required to meet with the MAT program director to discuss continuation in the program.

The School of Education is fully accredited by the National Council for Accreditation of Teacher Education (NCATE). The U.S. Department of Education recognizes NCATE as a specialized accrediting body for schools, colleges and departments of education.

Note: Because the education program is subject to state review on a regular basis, prospective and current students are advised to see the School of Education for up-to-date program information.

**Master of Science in Instructional Design**

Program Contact: Ruth Schwartz (Ruth.Schwartz@quinnipiac.edu)
203-582-8419

The field of instructional design applies what we know about how people learn to the thoughtful design and implementation of instructional materials, such as websites, videos, podcasts, online courses, social media sites, interactive simulations and educational games. Our fully online program prepares students for professional work or advanced study in instructional design by providing opportunities to develop a solid grounding in core competencies of the field, including instructional design models, theories of learning, principles for the design of instructional media, specific technical skills for media production, and approaches to the selection, integration and evaluation of digital
design projects, students need to understand the basics of project management. Elective courses allow students to focus on their own particular interests and goals, such as teaching with technology in the K–12 classroom, designing digital media for museums or after-school programs, or producing instructional materials for higher education, corporate or nonprofit environments.

Courses in Theoretical Foundations of Education address learning theories; theoretical approaches to multimedia design; instructional design models; and elements of the instructional design process, including the needs assessment, generation of a design solution, and formative and summative evaluation of an instructional resource.

Courses in Design Fundamentals emphasize the application of theory to short-term design projects, fostering familiarity and essential competencies in a range of media (e.g., podcasts and videocasts; websites; social media; games and simulations; learning management systems; design for handheld devices and public spaces). The process of working in a team to plan and implement an instructional resource is also a focus.

Graduates of this program are prepared for career opportunities in settings such as higher education, schools or school districts, business environments, nonprofit groups, and educational software or media design firms.

MS in Instructional Design Curriculum

To earn the master’s degree, students must complete 30 credits of coursework, with a minimum GPA of 3.0. The sequence of courses is composed of required foundational courses, electives and the Capstone Experience.

Foundations

15 credits (five courses), required for all candidates, focus on theoretical foundations of education and fundamentals of design. These courses include extensive exposure to research literature investigating the efficacy of media for educational applications, since it is the ability to understand and apply research that allows instructional designers to bridge the gap between theory and practice.

Electives

Individuals select an additional 9 credits (three courses), according to their own areas of interest. Topics include in-depth theoretical and practical aspects of producing educational resources (e.g., web design; design of online courses; video production; interactive digital media) with hands-on use of specific software applications. Other elective options explore the process of selecting, implementing and evaluating digital resources for instruction in a range of environments (K–12; higher education; industry and nonprofit organizations; informal learning, and creating accessible materials for individuals with diverse learning needs).

Capstone Experience

The required 6-credit (two-course) capstone experience includes:

Career Exploration, including preparation of the resume and portfolio. Throughout their coursework, students select their best work to post on an electronic portfolio for critique; in the Capstone, they further refine the portfolio. Consistent with program objectives, this allows the student to demonstrate competence with a range of software applications and serves to present student work to prospective employers.

Introduction to Project Management. To develop effective instructional design projects, students need to understand the basics of project management. In some cases, instructional designers may even be asked to serve as project managers. This component of the Capstone explores the basics of project management and the terminology used in this field.

The Thesis Project. Each student chooses a topic of personal and/or professional interest, researches existing approaches to and resources for instruction on this topic, and prepares a proposal for the design of a learning resource. The proposal includes a needs analysis, design details and evaluation plan. The final step is the creation and presentation of a working prototype of the proposed resource. This project serves to demonstrate the candidate’s fluency with elements of an instructional design analysis as well as with the use of theory to inform design.

Student Learning Outcomes

Upon completion of the Instructional Design program, students will demonstrate the following competencies:

1. Communication: Communicate effectively in visual, oral and written form, taking into account the type of information being delivered
and the diverse backgrounds, roles and varied responsibilities of the audience.

2. **Collaboration**: Collaborate effectively with peers, including the use of consensus-building, negotiation, conflict resolution skills, and constructive feedback.

3. **Research and Theory**: Draw on their understanding of the discipline of instructional design and pertinent research to inform their design decisions, explaining and applying key concepts of instructional design approaches and models, learning theory and multimedia principles.

4. **Ethical Issues**: Identify and respond to ethical, legal and political implications of design in the workplace.

5. **Technology**: Analyze and apply existing and emerging technologies for instruction, with regard for the learning need, the learners and the learning context.

6. **Planning and Analysis**: Utilize the instructional design approach to conduct a needs assessment to recommend appropriate design solutions and strategies; address the needs of the target audience and the learning context; and create a plan for the development, implementation and evaluation of instruction.

7. **Design**: Design instructional interventions in accordance with the instructional design plan, incorporating appropriate principles of visual design, interaction design and learning strategies, and addressing social, cultural, political and individual differences that may influence learning.

8. **Development**: Produce instructional materials in a variety of delivery formats that align with the content analyses, proposed technologies, delivery methods and instructional strategies included in the planning and design phases.

9. **Implementation**: Use technology effectively to implement a design plan; target appropriate strategies to prepare individuals and/or the environment for implementation.

10. **Assessment**: Design assessments; evaluate instructional interventions; utilize evaluation to guide iterative design of learning resources.

**Admission**

Successful applicants to this program come from diverse backgrounds in universities, schools, businesses or the nonprofit world, but all share an interest in using digital media for education. There are no specific technological prerequisites; all students will advance their levels of technical skills as they progress through the program.

Applications for the online Master of Science in Instructional Design program are considered on a rolling basis. Students may begin the program in fall or spring, and can complete the program in five semesters by taking two courses per semester; courses are offered in fall, spring and summer. We encourage candidates to submit applications as early as possible to ensure consideration for the semester desired.

To qualify for admission to the program, students must have earned a bachelor’s degree from an accredited institution with a preferred minimum GPA of 3.0. Candidates must submit:

1. completed application form
2. resume
3. letter of intent
4. official transcripts of all undergraduate and graduate work completed
5. two letters of recommendation (professional and/or academic)

Candidates will be interviewed in person, by phone or online as appropriate.

**Retention**

To remain in the program, a student must maintain a GPA of 3.0. A student who receives a grade of C+ or below in a course may be asked to retake the course to earn a minimum grade of B. Students who fail to maintain the minimum GPA in any semester may be allowed to remain in the program with probationary status at the discretion of the dean of the School of Education; however, granting of probationary status is subject to the dean’s approval and is neither automatic nor guaranteed.

The School of Education is fully accredited by the National Council for Accreditation of Teacher Education (NCATE). The U.S. Department of Education recognizes NCATE as a specialized accrediting body for schools, colleges and departments of education.

**Master of Science in Special Education**

Program contact: Judith Falaro (judith.falaro@qu.edu), JD, 203-582-8868

The School of Education offers two tracks in the Master of Science in Special Education program. One leads to cross-endorsement Connecticut #165, Comprehensive K-12 Special Education for those already holding an initial endorsement, and the second track is for anyone in a related field who is interested in doing research in special education.

**Program Description**

The field of special education requires an in-depth understanding of the laws that frame it, particularly the Individuals with Disabilities Act (IDEA), Section 504 of the Rehabilitation Act, and the Americans with Disabilities Act (ADA). The program provides certified teachers with opportunities to better understand the purposes and protections of these laws, as well as their implications for teaching and working with students with special needs and their families. Through these lenses, program candidates will understand how students identified with special needs learn, and how their particular special needs impact their lives inside and outside of school academically, socially and emotionally. The knowledge and understanding developed through the program will enable graduates to design individual programs of learning for students, with supports that allow all identified students to access the curriculum together with their non-disabled peers in inclusive settings.

The program will provide graduate candidates with two options to achieve their professional goals. Teachers already holding a valid teaching certificate will be able to pursue a cross-endorsement in comprehensive special education along with their master of science in special education in accordance with the requirements and regulations of the Connecticut State Department of Education. Graduate candidates who are in a related field, but still desire an MS in Special Education will complete a similar course of study culminating in a research-centered capstone experience.

- SPED 575 Working with Gifted and Talented Students
- SPED 576 Designing and Utilizing Assistive Learning Technologies

**Total Credits**: 36

1. Both SPED 579 and SPED 580 are required for candidates seeking a cross-endorsement in Connecticut #165 Comprehensive Special Education K-12.

### Student Learning Outcomes

Upon completion of the Master of Science in Special Education, graduates will understand and be able to:

1. **Demonstrate a working knowledge** of federal and state laws and guidelines that govern eligibility, protections and services for students with special needs.
2. **Administer, score and interpret** a wide range of criterion-referenced, norm-referenced and curriculum-based measurements.
3. **Utilize Scientifically-Based Research Interventions (SBRI)** to identify the presence of specific learning disabilities in school-age children.
4. **Collaborate with other professionals** in related services to provide the supports necessary for students with special needs to access the curriculum in inclusive settings with their non-disabled peers wherever possible.
5. **Assume leadership positions** in Planning and Placement Team (PPT) meetings by advocating for the social, emotional and academic needs of students in order to design an appropriate Individual Education Program (or IEP) for each identified student.
6. **Identify and apply** interventions and strategies to meet the unique educational needs of exceptional learners and their families, including but not limited to preparing young adults to self-advocate and develop the life skills necessary for independent living as they transition into adulthood and their respective careers.

### Admission

Applications for the online Master of Science in Special Education program are considered on a rolling basis. Students may apply to enter during the fall or spring semester. We encourage candidates to submit applications as early as possible to ensure consideration for the semester desired.

To qualify for admission to the program, students must have earned a bachelor’s degree from an accredited institution with a preferred minimum GPA of 3.0. Candidates must submit:

1. completed application form
2. resume
3. letter of intent
4. official transcripts of all undergraduate and graduate work completed
5. two letters of recommendation (professional and/or academic)

### Foundations

The 18 credits of foundation courses are designed to provide an in-depth study of the characteristics and outcomes of four of the areas identified under IDEA. The remaining 12 credits include course work in special education law, policy and ethics; assessment, program planning and
evaluation; and evaluation and instruction in reading disorders. Those seeking the cross-endorsement are required to take a 3-credit course in educating young children with special needs.

**Capstone Experience**
Candidates following the cross-endorsement track are required to successfully complete the capstone project consisting of two 3-credit practicums, each in a different area of special education. Those completing the master's-only track will complete a 3-credit thesis based on research in special education as their capstone project.

**Optional Courses**
Although candidates pursuing the cross-endorsement may add these electives to their program, these electives are primarily for those in the MS only program.

- SPED 572 Educating Young Children with Special Needs
- SPED 575 Working with Gifted and Talented Students
- SPED 576 Designing and utilizing Assistive Learning Technologies

**Retention**
To remain in the program, a student must maintain a GPA of 3.0. A student who receives a grade of C+ or below in a course may be asked to retake the course to earn a minimum grade of B-. Students who fail to maintain the minimum GPA in any semester may be allowed to remain in the program with probationary status at the discretion of the dean of the School of Education; however, granting of probationary status is subject to the dean's approval and is neither automatic nor guaranteed.

The School of Education is fully accredited by the National Council for Accreditation of Teacher Education (NCATE). The U.S. Department of Education recognizes NCATE as a specialized accrediting body for schools, colleges and departments of education.

**Master of Science in Teacher Leadership**
Program Contact: Gail Gilmore (Gail.Gilmore@quinnipiac.edu)
203-582-3289

The online Master of Science in Teacher Leadership program, offered through the School of Education, prepares teacher leaders who have a clear vision of the educated person and can work collaboratively with others toward aligning students' experiences and school programs to support that vision. The objectives of the program are aligned with the standards of the Educational Leadership Constituent Council.

Graduates will understand current research on learning theory and human motivation and be able to promote the continuous improvement of student learning. They will value and understand diverse perspectives, establish goals and work cooperatively with colleagues and school administrators to improve the quality of school programs, and utilize multiple strategies to help shape the school culture in a way that fosters collaboration among all stakeholders to establish rigorous academic standards for all students.

The program consists of a planned sequence of 30 credits. The first 21 credits are required of all candidates and focus on the following themes:

- Transforming School Culture
- Leading Instruction to Improve Student Learning
- Understanding Research on Best Practices in Literacy Instruction
- Embracing Diversity in Classroom and School Communities
- Leading School Improvement

The additional 9 credits in the program are related to the teacher's area of specialization, including literacy leadership, mathematics leadership, program improvement or science leadership. Each area of specialization has its own capstone experience.

The School of Education is fully accredited by the National Council for Accreditation of Teacher Education (NCATE). The U.S. Department of Education recognizes NCATE as a specialized accrediting body for schools, colleges and departments of education.
To qualify for admission to the program, students must:

- have earned a bachelor's degree in education or a related field from an accredited institution with a minimum GPA of 3.0.
- have a record of excellent teaching as evidenced by recommendations of supervisors
- demonstrate satisfactory writing skills as evidenced by a written essay

In addition to an application for admission, students also must submit:

1. official transcripts of all undergraduate and graduate work completed
2. a letter of intent
3. resume
4. two letters of recommendation
5. application fee
6. essay

Online Course Design Certificate

Program Contact: Ruth Schwartz (ruth.schwartz@qu.edu), 203-582-8419

The 9-credit graduate certificate in online course design is focused on providing the knowledge and experience needed to develop online courses across a range of disciplines. The sequence of three online graduate-level courses begins with an examination of the instructional design process—using what we know about how people learn to help us design effective educational materials. In the following two courses, students explore best practices of online course design, create a model course, and investigate multimedia project development using a number of tools and resources.

As K–12 programs, higher education and corporate training continue to shift online, there is a growing demand for skilled professionals who can create effective digital education resources. This online certificate program equips students with a deeper understanding of instructional design as well as the skills needed to plan, design and develop a powerful online course.

Please note: candidates in the Master of Science in Instructional Design program who are interested in the Certificate in Online Course design must consult with the program director, Ruth Schwartz, for information on requirements for this credential.

Student Learning Outcomes

Upon completion of the Master of Science in Teacher Leadership, students will demonstrate the following competencies:

1. **Culture**: Utilize group processes to promote a collaborative and inclusive culture, which supports diverse perspectives, educator development and student learning.
2. **Research**: Access, utilize and share research on teacher effectiveness and leadership theory to improve teaching and learning practices.
3. **Reflection**: Engage in and model individual and collective reflection to promote learning and leading communities in the classrooms and schools.
4. **Professional Learning**: Design, implement and evaluate job-embedded professional learning for continuous improvement that is aligned with school and district improvement goals.
5. **Teaching and Learning**: Harness the skills, expertise and knowledge of colleagues to address curricular expectations, instructional practices and student learning needs.
6. **Assessment and Data**: Facilitate the collaborative collection, analysis and use of classroom and school-based data to improve curriculum, instruction, assessment and school culture.
7. **Outreach**: Promote partnerships and proactive interactions with families, communities and other key stakeholders to improve education for all students.
8. **Advocacy**: Collaborate with colleagues to select appropriate opportunities to advocate for the rights and needs of students, secure necessary resources that support student learning and communicate with targeted audiences.
9. **Leadership**: Develop colleagues’ leadership capacity and create new opportunities for teacher leadership in classrooms, schools and districts.

**Admission**

Applications for the online Master of Science in Teacher Leadership program are considered on a rolling basis, and students may apply to enter during the fall or spring semesters. Candidates are encouraged to submit applications as early as possible to ensure consideration for the semester desired.

To qualify for admission to the program, students must:

- have earned a bachelor’s degree in education or a related field from an accredited institution with a minimum GPA of 3.0.
- have a record of excellent teaching as evidenced by recommendations of supervisors
- demonstrate satisfactory writing skills as evidenced by a written essay
- demonstrate satisfactory dispositions concerning the value of diversity, the efficacy of teacher leaders, and the belief that all children can learn as evidenced by a written essay and during the application interview

In addition to an application for admission, students also must submit:

1. official transcripts of all undergraduate and graduate work completed
2. a letter of intent
3. resume
4. two letters of recommendation
5. application fee
6. essay

The School of Education is fully accredited by the National Council for Accreditation of Teacher Education (NCATE). The U.S. Department of Education recognizes NCATE as a specialized accrediting body for schools, colleges and departments of education.

Total Credits: 9

To qualify for admission, candidates must have earned a bachelor’s degree from a regionally accredited institution of higher learning. The ideal candidate will have maintained a 3.0 cumulative GPA and earned no
grade lower than a B- in a single class. No prior technical experience is required.

Interested individuals can apply online (http://www.quinnipiac.edu/online/apply). Applications are accepted throughout the year; however, the admissions committee will not review an application until all of the supporting documents are received.

A complete application consists of the following:

- Application form (http://www.quinnipiac.edu/online/apply)
- $45 application fee
- Current resume
- Official transcripts of all undergraduate and graduate work completed

Candidates will be interviewed either in person or online as appropriate.

Sixth-Year Diploma in Educational Leadership

Program Contact: Gail Gilmore (Gail.Gilmore@quinnipiac.edu) 203-582-3289

The purpose of Quinnipiac University's Sixth-Year Diploma in Educational Leadership is to prepare graduates with the perspectives, knowledge and skills to become exceptional school leaders. The School of Education recognizes that the concept of educational leader is three-dimensional, and that successful educational leaders must be teachers, learners and leaders. Therefore, graduates of the Sixth-Year Diploma in Educational Leadership program are master teachers who have a deep understanding of the teaching and learning process, learners who continue to learn as they continue to lead, and leaders who influence the culture of their schools in ways that support best practices in teaching and learning.

The program reflects the spirit and mission of Quinnipiac University with close attention to the leadership standards for the state of Connecticut and to the standards of the National Council for the Accreditation of Teacher Education. The three values of “excellence in education, a sensitivity to students, and a spirit of community,” which are the heart of Quinnipiac’s mission statement, are woven throughout the program.

General Information

The Sixth-Year Diploma in Educational Leadership program offers Quinnipiac students a post-master’s credential, which prepares them to assume a variety of school leadership roles such as department chair, assistant principal, principal, curriculum coordinator and central office administrator below the rank of superintendent. Candidates who complete the first 18 credits of the 30-credit program, the internship, and pass the Connecticut Administrator Test (#6412) to fulfill the Connecticut State Department of Education certification requirements as an Intermediate Administrator/Supervisor (092).

The program is fully accredited by the Connecticut State Department of Education, which participates in the NASDTEC Interstate Contract.

Note: Because the education program is subject to state review on a regular basis, prospective and current students are advised to see the School of Education for up-to-date program information.

Internship

Candidates must participate in an internship after completing EDL 601, EDL 603 and EDL 605 to gain authentic leadership experience. The Internship in Educational Leadership (EDL 607) consists of a series of coordinated activities related to the national standards for school leaders as established by the Educational Leadership Constituent Council (ELCC). The specific experiences are cooperatively planned by the candidate, a faculty member and a school district mentor. To demonstrate mastery of the ELCC standards, each candidate compiles an internship portfolio, which includes a description and analysis of activities related to the national standards, evidence of evaluating a portion of a school program for the purpose of improving student learning, evaluations from the administrator, mentor and University supervisor, a reflection journal describing leadership strengths and needs, a weekly log of activities and hours (a minimum of 216 hours are required), and artifacts from the internship. The internship is scheduled only during the fall or spring semester to ensure the most authentic experience possible.

Student Learning Outcomes

Upon completion of the Sixth-Year Diploma in Educational Leadership, candidates will be able to demonstrate and sustain the following competencies:

1. Vision, Mission and Goals: Guide the development and implementation of a shared vision and mission of high quality and equitable education that is shared and supported by all stakeholders.

2. Ethics and Professional Norms: Model the leadership and ethical behaviors that promote equity and social justice.

3. Culture and Relationship Building: Advocate, nurture and sustain a school culture and climate that supports educators and meets the needs of diverse learners by guiding academic, social, developmental and emotional needs.

4. Managing Organizational Systems and Safety: Ensure school management, operation and resources to promote a safe, efficient and effective learning environment.

5. Teaching and Learning: Monitor and continuously improve teaching and learning by providing instructional programs conducive to student learning and staff professional development.

6. Collaborating with Families and Stakeholders: Promote and sustain collaboration with families and other stakeholders to respond to
diverse communities, interests and needs, and to mobilize community resources.

7. Change Agent: Understand, advocate and respond to the change process to influence the political, social, economic, legal and cultural context affecting education.

8. Systems Thinking: Align the school improvement plan with the district theory of action drivers for coherence, efficacy and building capacity.

Admission
Students are admitted into the Sixth-Year Diploma in Educational Leadership program upon meeting the following requirements:

1. A master’s degree in education or a related field from an accredited institution with a minimum GPA of 3.0;
2. Evidence of four years of full-time teaching experience in a PK–12 setting;
3. Completion of at least 36 hours (equivalent to 3 credits), of a special education course \(^1\);
4. A record of excellent teaching as evidenced by recommendations of supervisors;
5. Satisfactory writing skills as evidenced by a written essay; and
6. Satisfactory leadership dispositions and a professional maturity to meet the demands of the program as evidenced during a formal interview.

\(^1\)Applicants who have not met the special education requirement may be admitted on the condition that they enroll in a state-approved course.

Retention
To remain in the program, students must maintain academic standards and honor and follow Connecticut’s Code of Professional Responsibilities for Teachers in all interactions in the schools. Students must maintain a 3.0 GPA for graduate courses in each semester with at least B- or better in any leadership course. A grade of C+ or below in any program course requires the student to retake the course and earn a minimum of B-.
If a student fails to maintain the minimum GPA, that student may be allowed to remain in the program for a single semester with probationary status. If a student on probation fails to meet the minimum GPA by the end of the single probationary semester, that student is dismissed from the program. Granting of probationary status is subject to the dean’s approval and is neither automatic nor guaranteed. Students failing to meet professional standards in the program may be subject to suspension or dismissal.

Completion
To fulfill all requirements of the Sixth-Year Diploma in Educational Leadership program, students must complete all course work, including the internship, and successfully complete all performance tasks including passing the Connecticut Administrator Test (#6412).

The School of Education is fully accredited by the National Council for Accreditation of Teacher Education (NCATE). The U.S. Department of Education recognizes NCATE as a specialized accrediting body for schools, colleges and departments of education.

The program is fully accredited by the Connecticut State Department of Education, which participates in the NASDTEC Interstate Contract.

Special Education Certificate of Completion

Program Contact: J (Anne.Dichele@quinnipiac.edu)judith Falaro (judith.falaro@qu.edu), 203-582-8868

The Special Education Certificate of Completion is a 12-credit option for MAT program teacher candidates or for external applicants who hold a current teaching certificate from an approved institution of higher education and/or are practicing teachers. The certificate is not a degree or licensure program. External candidates may earn the certificate by completing 12 credits of online special education courses as listed below. Current certified teachers interested in the Special Education Certificate of Completion online program should contact QU Online.

For internal candidates for the certificate, 3 credits are earned as part of the required program of study for the MAT program. The additional 9 credits required for the Special Education Certificate of Completion are earned through two 4-credit online courses offered during the J-term, and a 1-credit independent study to be completed during the final semester in the program.

MAT program candidates interested in the Special Education Certificate of Completion should notify the coordinator of the Special Education Certificate of Completion program by Sept. 1 of their senior year (or the start of the first semester for candidates in the five-semester MAT program), as the first course in the optional program, SPED 545, is taken online during the J-term of the candidate’s senior year.

Student Learning Outcomes

The mission of the MS in Cybersecurity program is to equip students to succeed as effective cyber defenders in a rapidly changing business and technology environment. Specific objectives include:

1. **Train** students to be able to apply risk management concepts to cybersecurity challenges.
2. **Enable** students to use and evaluate software to manage cybersecurity risk.
3. **Create** the next generation of cloud native security professionals.
4. **Enable** students to design, build and operate resilient systems that meet business objectives.
Admission

Admission to Quinnipiac University's graduate programs is competitive. To be admitted to the MS in Cybersecurity program, a prospective student must have successfully completed a BS or BA degree in an accredited college or university.

There are then three paths to admission:

1. Undergraduate degree in computer engineering, software engineering or computer science OR
2. Successful completion of programming and data structures courses (CSC 110 and CSC 111 or equivalent) OR
3. At least two years of applicable work or military experience along with:
   • >1-year professional programming experience or
   • Successful completion of programming certificate
SCHOOL OF HEALTH SCIENCES

The state of Connecticut is a growing center of nationally known medical facilities, biotechnology development and pharmaceutical research and manufacture. These institutions have increased demands for individuals with up-to-date training. The Master of Health Science program offers several majors that meet these standards. The Cardiovascular Perfusion program provides comprehensive preparation in clinical sciences and clinical internships to prepare perfusionists who provide life support during cardiopulmonary bypass. The Medical Laboratory Sciences/Biomedical Sciences program provides laboratory professionals with the opportunity to specialize in fields such as microbiology and biomedical sciences. A full-time program for Pathologists’ Assistants provides training in pathology, anatomy and the medical sciences. The Physician Assistant studies program provides full-time instruction in the basic medical and clinical sciences needed for certification and a graduate degree in a growing profession. The Social Work program prepares students for achievement and leadership in the field of social work. The Radiologist Assistant program provides students with full-time advanced training in the field of radiology, which is needed for certification and to obtain a master’s degree.

Career Development

In the School of Health Sciences, the assistant dean for career development works with students to explore majors and career interests through individual consultations and group sessions, and guides them through a career development process. Assistance is provided with resume and cover letter writing, interview preparation, conducting a job search and graduate school applications. Students can participate in experiential learning through community service as well as internships, part-time and summer employment. A health professions career fair is held every spring at the North Haven Campus.

Additional Requirements

Academic programs with clinical components use multiple clinical education centers. Students are responsible for their transportation to and from these clinical agencies.

Background Checks

Students should be aware that certain clinical sites or internship locations may require a criminal background check before a student is placed in the clinic or intern site. The university has procedures to assist students in obtaining such a background check. The cost of the background check is the responsibility of each individual student.

Technical Standards for Admission

Students admitted to all programs in the School of Health Sciences must be able to meet their program's technical standards and or essential functions. Technical standards are developed by accreditation agencies and organizations to establish the essential qualities and standards considered necessary to achieve the skills, knowledge and competencies for entry-level practice. Information on technical standards and essential functions may be found in the catalog, on the website or by contacting the individual program chairperson.

Academic Good Standing

All undergraduate and graduate students in the School of Health Sciences are expected to maintain the required minimum GPA set forth by their respective program of study (if applicable). Each program may have additional benchmarks that must be met to progress within the program of study. The student should refer to the program’s description in the Quinnipiac University Catalog and to the program’s student handbook (if applicable) for clarification for what is required to maintain his/her status within the program.

At the end of each semester, the program directors will compile a list of students who are deficient in meeting academic or clinical/professional achievement requirements. Utilizing the review process established by his/her program, the student will be notified via email of his/her status in the program. Deficient students may be: a) placed on probation, b) suspended or c) dismissed. Students placed on probation remain in their program but in order to progress, must meet the performance standards specified in their probation notification letter. For further clarification please see the Program Level Academic Good Standing Policy (p. 71).

Admission

Students who hold a bachelor’s degree in the biological, medical or health sciences are eligible for admission to the Master of Health Science degree program. A detailed autobiography of personal, professional and educational achievements as well as two letters of reference must be submitted with a student’s application. Applications may be obtained from the Office of Graduate Admissions. Applicants should refer to the Graduate Admission Requirements (p. 341) in this catalog.

The Quinnipiac University Physician Assistant program participates in the Central Application Service for Physician Assistants (CASPA). Go to caspa.liaisoncas.com (https://caspa.liaisoncas.com) for more information regarding the application process and fees. All applications, transcripts, references and other supporting materials are submitted directly to CASPA. The Physician Assistant program admits students on a yearly basis. The deadline for completed applications to CASPA is September 1. Interviews are conducted from the early fall through mid-November. Classes begin in late May/early June.

Master of Health Science

• Advanced Medical Imaging and Leadership (p. 394)
• Cardiovascular Perfusion (p. 398)
• Biomedical Sciences (p. 395) with concentrations in:

Advanced Medical Imaging and Leadership

Program Contact: Emily Amento (Emily.Amento@quinnipiac.edu)
203-582-3674

The MHS in Advanced Medical Imaging and Leadership at Quinnipiac University is an interprofessional degree program offered by the Department of Diagnostic Imaging in the School of Health Sciences in conjunction with the Department of Healthcare Management and Organizational Leadership in the School of Business.

The one-year AMIL program provides graduates with the opportunity to obtain additional certification in one of the following three advanced imaging modalities: Magnetic Resonance Imaging, Computed Tomography or Women's Imaging. The advanced imaging courses are coupled with fundamental leadership course work that lays the foundation for future careers and leadership positions in imaging and health care management.

The objectives of the Advanced Medical Imaging and Leadership program are to:

1. Provide excellent education in both the didactic and clinical learning environment.
2. Provide research opportunities that contribute to the clinical and scientific knowledge base in the field of diagnostic radiology.
3. Provide the skills necessary to prepare graduates for practice as advanced modality imaging professionals.
4. Provide essential and fundamental leadership skills to better position graduates for entry-level supervisory opportunities within radiology health care organizations.
5. Foster a sense of commitment to continuing education and professional development.

These objectives are consistent with the mission statement of Quinnipiac University, which is to provide a supportive and stimulating environment for intellectual and personal growth.

Admission Requirements

The eligibility requirements for the MHS-AMIL program include:

1. Bachelor’s degree from an accredited institution;
2. Radiologic Technologist in good standing with the American Registry of Radiologic Technologists; and
3. State of Connecticut Licensure as a radiographer prior to clinical component of the program;
4. Prerequisite course requirements:
   - 3-4 credits of physics or chemistry
   - 3 credits of college-level mathematics
   - 12-15 credits of biology with labs, including:
     - 6-8 credits of anatomy and physiology

Admission to the program is conducted on a rolling basis. Decisions are made individually as an application becomes complete. Final decision on which applicants are selected into the program will be made by the program director, with input from MHS-AMIL program faculty. An interview is required when appropriate with the program director and at least two members of the MHS-AMIL faculty in attendance. Applications will be ranked based on a strong academic record, experience in a relevant clinical area, perceived ability to complete a challenging didactic and clinical program and the strength of recommendation by reference person.

Biomedical Sciences Program

Program Contact: Dwayne Boucaud (Dwayne.Boucaud@quinnipiac.edu)
203-582-3768

Medical laboratory research and diagnostic testing are among today’s most exciting professions. The last decade has brought many exciting
breakthroughs in the diagnosis and treatment of disease as well as new challenges such as AIDS, Lyme disease and the resurgence of tuberculosis. These new developments and challenges require laboratory professionals to stay on the cutting edge of their field. New techniques have to be mastered, new theories and concepts understood, and new means of managing the more complex operations of laboratories developed. The Biomedical Sciences program at Quinnipiac is specially designed to meet the educational needs of students to complete their education toward a degree in medicine or PhD programs or employment in the research/development industry and diagnostic companies. The program provides the training that is necessary to stay current with today’s rapidly changing technology and to assume positions of greater responsibility. A laptop is required for all students enrolled in the MHS in Biomedical Sciences program.

**MHS in Biomedical Sciences Program of Study**

Students may choose either a thesis or a non-thesis option in the biomedical sciences program. Both options require students to take four courses or more in their specialization while allowing students to choose a number of electives to meet their individual needs.

**Thesis Option Requirements (based on availability of faculty)**

The curriculum includes a minimum of 35 credits including 2 credits of thesis (BMS 650, BMS 651). A total of 15–16 credits of core classes in an area of specialization is required along with three classes (9–12 credits) of electives within the specific area of specialization. Open elective courses could be chosen from any area of specialization.

<table>
<thead>
<tr>

<tr>
<td>Total Credits</td>
<td>35-38</td>
<td></td>
</tr>
</tbody>
</table>

Since most courses are either 3 or 4 credits, the total credits from area of specialization and total number of elective courses are based on the number of credits for individual courses.

**Non-Thesis Option Requirements**

The curriculum includes a minimum of 38 credits including 2 credits of comprehensive examination (BMS 670). A total of 15–16 credits of core classes in an area of specialization is required along with three elective classes (9–12 credits) within the specific area of specialization. Open elective courses could be chosen from any area of specialization.

</tr>
</tbody>
</table>

Since most courses are either 3 or 4 credits, the total credits from area of specialization and total number of elective courses are based on the number of credits for individual courses.

**Comprehensive Examination**

The comprehensive examination in medical laboratory sciences (2 credits) is a requirement for the non-thesis option in the Biomedical Sciences program. The purpose of the exam is two-fold. First, the student must demonstrate broad and specific knowledge expected of someone holding a master’s degree. Second, the student must be able to integrate knowledge obtained from individual courses into unified concepts which link the student’s own specialization to other fields of study. The student is given two opportunities to demonstrate competency. A written essay exam is administered by a designated faculty member. Students should schedule an appointment with the program director before registering for the comprehensive exam.

**Student Learning Outcomes**

Upon completion of the program, students will demonstrate the following competencies:

1. **Scientific knowledge**: Demonstrate an advanced understanding of translational science in biomedical and microbiological topics.
2. **Translational science**: Critically analyze scientific literature and develop critical-thinking skills necessary to implement evidence-based translational research.
3. **Effective scientist**: Engage in the scientific process including research ethics, experimental design and data collection and analysis.
4. **Responsible citizen**: Evaluate the social and ethical impact of scientific discoveries on medical practice.

**Mission Statement**

The mission of Quinnipiac University’s Master of Health Science in Biomedical Sciences program is to provide students with the cutting-edge skills they need to manage the more complex operations carried out today in hospitals and research facilities, as well as allowing students to develop their critical thinking skills and knowledge of the biomedical sciences, sought after by PhD programs and medical schools. The two specialties included in the program (biomedical sciences and microbiology) and the integration of courses from these individual specialties provides the student with a comprehensive knowledge to meet the education and technical needs of the biomedical profession in pharmaceutical, biotechnology, diagnostics and medical research. Students are guided in the principles and methods of scientific
research, and they gain knowledge of the latest advances in biomedical, biotechnological and laboratory sciences—all directly applicable to real-world work environments.

To be considered for admission into the biomedical sciences program, applicants must meet the following requirements:

- Bachelor’s degree in the biological, medical or health sciences from a regionally accredited institution in the U.S. or Canada.
- Scores for the tests of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) if the applicant is from a non-English speaking country.
- A minimum undergraduate GPA of 2.75, however the most successful applicants have a GPA of 3.0 or higher.
- All undergraduate transcripts and a detailed autobiography indicating why the student would like admission into the program, as well as personal, professional and educational achievements.
- Two letters of reference detailing the applicant’s academic and interpersonal strengths.

Applications may be obtained from the Office of Graduate Admissions. Applicants should refer to the graduate admission requirements (p. 341) found in this catalog. Applications to this program are accepted throughout the year. Incoming students can start the program in either the fall or spring semester.

Cardiovascular Perfusion Program

Program Contact: Michael Smith (Michael.Smith@quinnipiac.edu) 203-582-3427

The perfusionist provides consultation to the physician in the selection of the appropriate equipment and techniques to be used during extracorporeal circulation. During cardiopulmonary bypass, the perfusionist provides life support to the patient while the heart and lungs are stopped to enable the surgeon to operate. Perfusionists administer blood products, anesthetic agents and drugs through the extracorporeal circuit. The perfusionist is responsible for the induction of hypothermia and other duties, when required. Perfusionists have a role in the implementation and operation of ventricular assist devices designed to provide long-term circulatory support for the failing heart.

You will learn to operate the equipment perfusionists use to support or replace a patient's heart and lungs during cardiac surgery and to monitor vital cardiopulmonary signs to keep the patient stable. You’ll also learn to administer the appropriate medications and anesthesia during surgery.

Our program is one of only eight in the nation that offers graduate-level training in this profession. As cardiovascular disease becomes increasingly common, the employment opportunities in this field continue to expand, and we prepare you to enter the workforce with a competitive advantage.

A strong sense of responsibility and the capacity to work effectively with other professionals in a high-pressure environment are essential qualities of successful cardiovascular perfusionists. You’ll acquire both during group activities and clinical work. Plus, you’ll learn in our technologically sophisticated Center for Medicine, Nursing and Health Sciences.

This program is fully accredited by the Accreditation Committee—Perfusion Education (6663 S. Sycamore St., Littleton, CO 80120) under the Commission on Accreditation of Allied Health Education Programs.

</table>

During the first two didactic semesters, students are introduced to the operating room environment by weekly orientation sessions in one of several affiliated hospitals. Students are required to join the American Society of Extracorporeal Technology and maintain student membership for the duration of the program.

Failure to maintain a 3.0 minimum GPA in all didactic and clinical semesters will result in automatic dismissal from the program. Students must also successfully complete all clinical practicums to graduate from the program.
Student Learning Outcomes

Upon completion of the cardiovascular perfusion program, students will demonstrate the following competencies:

1. **Foundational knowledge**: Demonstrate an advanced understanding of the basic sciences as they pertain to the treatment of disease states in cardiopulmonary pathology.
2. **Critical decision making**: Acquire the concepts and skills necessary to effectively apply technology, equipment and techniques to achieve extracorporeal life support of critically ill patients.
3. **Professional skills**: Master the skilful application of mechanical cardiac assist devices in patients with failing heart and lungs of all age groups: neonatal, pediatric and adult.
4. **Interprofessional education**: Collaborate with colleagues and other health care professionals in providing quality patient care.
5. **Professionalism and effective scientist**: Apply research methods to constantly assess and improve practices, with the goal of enhancing patient safety and outcomes.

Mission Statement

The mission of the Master of Health Science in Cardiovascular Perfusion program is to:

1. Provide excellent education in both the didactic and clinical learning environment;
2. Provide research opportunities that contribute to the clinical and scientific knowledge base in the field of extracorporeal circulation; and
3. Foster a sense of commitment to continuing education and professional development.

This mission is consistent with the mission of Quinnipiac University, which is to provide a supportive and stimulating environment for the intellectual and personal growth of undergraduate, graduate and continuing education students.

Admission

Interested candidates must have earned a bachelor’s degree from a regionally accredited institution in the U.S. or Canada. Scores for the tests of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required if the applicant is from a non-English speaking country. Applicants must have the following course prerequisites:

- two semesters of basic biology (or equivalent)
- two semesters of anatomy and physiology
- two semesters of general chemistry
- one semester of physics
- one semester of microbiology
- one semester of college algebra or calculus
- certification in Basic Life Support from the American Heart Association

Note: It is recommended that applicants also take a course in biochemistry and medical terminology.

Applicants to the program should have a strong background in the health sciences and be able to work for long periods under intense conditions. Individuals already working in the fields of nursing, respiratory care, physician assistant, physical therapy, paramedical and biomedical engineering are ideally suited for admission into the program.

Applicants must have a minimum undergraduate cumulative GPA of 3.0, and at least two years of experience working in a health care field involving patient care.

Applications can be obtained from the Office of Graduate Admissions. Applicants should refer to the graduate admission requirements found in this catalog.

A detailed autobiography of personal, professional and educational achievements, and two letters of recommendation must accompany the student’s application.

All applications, transcripts, reference letters and supporting materials must be submitted to the Office of Graduate Admissions.

Admission to the program is competitive. Personal interviews, required for admission, are offered to the most qualified candidates.

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Background Check and Drug Screen

To ensure their safety and maintain high-quality care of patients, clinical affiliates of the university require students to have a criminal background check and drug screen. All students entering the Quinnipiac University Cardiovascular Perfusion program are required to undergo a criminal background check and drug screen (through the university vendor) prior to beginning classes and prior to beginning the clinical year. This is a mandatory component of the program. In addition, Cardiovascular Perfusion students may be required to undergo a criminal background re-check and/or a drug screen prior to any of their clinical rotations. The results are made available to the student through their own personal and secure online portal. Whenever a Quinnipiac University Cardiovascular Perfusion student may need proof of criminal background check for clinical rotations and/or to be eligible to sit for their certification exam, the student will release the information directly from their personal portal to the clinical site. The cost of the criminal background check and any re-checks and/or drug screens is the responsibility of each individual student.

The Cardiovascular Perfusion program is accredited by:

Commission on Accreditation of Allied Health Education Programs

Doctor of Physical Therapy (DPT)

Program Contact: Katherine Harris (Maureen.Helgren@quinnipiac.edu)
203-582-8511

The Doctor of Physical Therapy (DPT) program at Quinnipiac prepares students to be outstanding clinicians equipped for contemporary practice through a three-year, 12-month graduate program. Students develop the essential skills of a 21st-century health care professional by having
access to expert academic and clinical faculty and the benefit of learning in state-of-the-art facilities. The program is an integrated curriculum of foundational knowledge and clinical training and is located in the Center for Medicine, Nursing and Health Sciences. Students learn the foundation of movement science through full body dissection in the Human Anatomy Lab and application in the Motion Analysis Lab. The learning environment for clinical skills, clinical decision-making and professionalism is supported in classrooms, well-equipped laboratories, and progressive technology. Students can practice and are assessed on skills utilizing simulation, standardized patients and clinical-readiness practicums. The program integrates frequent client-based opportunities throughout the curriculum in addition to three full-time clinical experiences completed at various domestic or international clinical sites. Although the goal of the program is to prepare entry-level physical therapists, faculty value establishing close mentoring relationships through in-depth research or innovative projects that allow students to grow intellectually and professionally.

DPT students at Quinnipiac take advantage of a myriad of student opportunities, which include leadership or participant roles in the campus student-run pro-bono rehabilitation clinic, graduation with Distinction in Interprofessional Education through the extensive opportunities within the university’s Center for Interprofessional Healthcare Education, international delegations involved in Global Solidarity through a Fair-Trade Learning Model, sustainable local community service, attendance and presentation at professional conferences, a vibrant graduate council, as well as a variety university sponsored specialized camps.

**Doctor of Physical Therapy (DPT) degree for Freshman Entry HSS-DPT, AT-DPT and Internal Transfer Students**

A total of 112 credits is required for completion of the DPT.

**Student Learning Outcomes**

Upon completion of the Physical Therapy program, students will demonstrate the following competencies:

**Goal:** Students will become lifelong learners through reflective practice.

1. **Metacognitive Awareness:** Effectively utilize cognitive strategies to learn and problem-solve.
2. **Active Learner:** Engage, participate and collaborate with others across all educational settings.
3. **Social Responsibility:** Employ an ethical framework guiding the professional duty to act for the benefit of society at large.

**Goal:** Students will provide proficient patient-centered care.

1. **Professionalism:** Be accountable for one’s physical therapy judgments, actions and omissions as related to standards of the profession.
2. **Clinical Competence:** Skillfully manage patients in an efficient, safe and effective manner with an ability to seek help accordingly.
3. **Clinical Decision Making:** Use a framework of thinking to analyze and interpret health care information from multiple sources to justify clinical judgements.
4. **Interprofessional Health Care:** Use a framework of understanding of the roles and shared values of various health professionals to facilitate interprofessional communication and teamwork.

**Goal:** Students will demonstrate innovative thinking.

1. **Creative Thinking:** Define and devise imaginative or original solutions to various health care challenges.
2. **Evidence Informed Decision Making:** Generate, critically appraise and integrate evidence into sound professional judgments.

**Philosophy**

Excellence in physical therapy education is developed in cooperation with the larger university and health science community that is student-centered and focused on academic distinction. Our program seeks to enhance the professional development of every student and faculty member through a variety of academic, scholarly and service opportunities. This philosophy is well represented by the program's physical resources and integrated curriculum that links foundational and medical sciences, clinical practice and professionalism.

**Mission Statement**

The department of physical therapy at Quinnipiac University provides an innovative, student-oriented environment to prepare students who can meet the evolving health needs of society. The program is dedicated to developing lifelong learners who will enhance the profession through a commitment to reflective practice, interprofessional collaboration, leadership and socially responsible action. The educational experience embodies the core values of both the university and APTA. Students provide patient-centered care using evidence-informed practice to optimize movement and positively transform society.

To achieve its mission, the Doctor of Physical Therapy program:

- Cultivates critical and reflective thinking, clinical decision-making, and lifelong learning by utilizing an evidenced-based learning model, authentic assessments and a variety of learning experiences that include interactive technology. This learning model features small lab sizes, hands-on activities, visits to area clinics and opportunities to engage in professional development forums and community interdisciplinary collaboration.
- Provides both in-class and in-clinic opportunities for students to engage in the essential elements of patient/client management.
- Supports faculty teacher-scholars who are effective teachers and who collectively engage in scholarship, professional development, direct patient care and university and community service.

**Essential Functions**

**Sensory Ability**

To provide quality care, a student is expected to possess functional use of the senses of vision, touch, hearing and smell. All data received by the senses must be integrated, analyzed, and synthesized in a consistent and accurate manner. In addition, the student is expected to possess the ability to distinguish color, perceive pain, pressure, temperature, position, equilibrium and movement. The student is expected to be able to observe the patient/client to accurately assess any alteration in functional abilities. Inherent in this observational process is the functional use of the senses and sufficient motor capability to carry out the necessary assessment activities, such as auscultation, percussion, and palpation. The student should also be able to observe a patient accurately and completely at both from a distance and close at hand.

**Communication Ability**

The student is expected to be able to communicate verbally and non-verbally in an effective and sensitive manner, at a competency level that allows one to safely carry out the essential functions of physical therapy care. This requires the ability to see, speak, hear, read, write effectively in English, and utilize technology effectively. Students are also expected to be able to communicate effectively with fellow students, faculty and members of the health care team.

**Motor Ability**

The student is expected to be able to perform gross and fine motor movements bilaterally in order to provide competent care. Examples of care that the student must be able to perform include, but are not limited to, lifting, turning, transferring, transporting, and ambulating individuals. The student is expected to have the manual dexterity and/or psychomotor skills necessary to perform and/or to assist with procedures, treatments and emergency interventions in a variety of settings with individuals across the lifespan. The student must be able to administer CPR without assistance. The student is expected to have sufficient motor function to elicit information from individuals by palpation, auscultation, percussion and other diagnostic maneuvers. The student is expected to be able to maintain consciousness and equilibrium, and to have the physical strength and stamina to perform satisfactorily in clinical physical therapy experiences on multiple days per week during the semester.
Intellectual-Conceptual Ability
The student is expected to have the ability to develop problem-solving skills, make clinical decisions, demonstrate the ability to establish care plans, and set priorities. This includes the ability to measure, calculate, analyze, and synthesize objective and subjective data and make decisions that reflect consistent and thoughtful deliberation of the appropriate data. Students need to demonstrate the ability to perform these cognitive skills efficiently and with the flexibility that is inherent to the needs in the clinical environment. Students need to be mindful of the degree of personal risk, and take proper precautions to prevent incidents associated with commonly occurring hazards in the work environment such as blood borne pathogens and environmental allergens such as latex or iodine preparations.

Behavioral/Social/Professional Attributes
The student is expected to have the emotional stability required for the full utilization of his/her intellectual abilities, the exercise of sound judgment, complete assessment and intervention activities, and develop sensitive interpersonal relationships with patients/clients, families, and others responsible for health care. The individual is expected to have the ability to function effectively under stress, and exhibit the professional values of accountability, altruism, compassion/caring, excellence, integrity, professional duty and social responsibility.

The Physical Therapy department is a member of the Early Assurance consortium for physical therapy education. Please see Entry-Level DPT (p. 308) for information concerning admission to the program and course of undergraduate study.

Professional DPT Program Requirements
Students in the professional graduate DPT component of the curriculum are required to achieve a GPA of 3.0 in each semester. In addition, a grade of C+ or better is required in all professional graduate component courses. Students whose averages for each semester fall below 3.0 or receive a grade below C+ may be subject to dismissal from the program. Transfer students are considered for admission to the professional graduate DPT program on a space-available basis.

For continuation in the program, all students must successfully complete all course work in the sequence identified. In addition to these academic requirements, all DPT students must be aware that there are additional requirements necessary to participate in scheduled clinical affiliations. Specific health requirements, including but not limited to: titers for mumps, measles and rubella, varicella and hepatitis B, annual physical exams, two-step PPDs, flu shots, current CPR certification and other mandates must be completed within the timeframe established by the clinical site at which a student has been placed. In addition, criminal background check updates and drug testing also may be required. These mandates are facility-specific and change frequently without notice. Quinnipiac University has no authority over any clinical facilities' protocols. Students must comply with what is required at their specific clinical affiliation.

Clinical education is a vital component of physical therapy student education and is a significant part of the physical therapy curriculum at Quinnipiac University. Clinical education experiences occur through both integrated and full-time clinical experiences in a variety of settings throughout the country. Placement in specific settings, locations and clinical facilities is not ever guaranteed and individual student assignment occurs at the discretion of the faculty. Students may be required to travel for clinical assignments. All associated housing and travel costs are the responsibility of the student.

The physical therapy program at Quinnipiac University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) 1111 North Fairfax Street Alexandria, Virginia 22314 telephone: 703-706-3245; email: accreditation@apta.org; (accreditation@apta.org) website: capteonline.org (http://www.capteonline.org)

Entry-Level Professional Doctor of Occupational Therapy
Program Contact: Sal Bondoc (salvador.bondoc@qu.edu) 203-582-3727

Our Entry-Level Professional Doctor of Occupational Therapy (OTD) program prepares students with a breadth and depth of knowledge and skills to practice autonomously or collaboratively, within various health care, educational, and social systems. Our curriculum consists of three distinct elements:

- Academics: didactics integrated with laboratory and immersive clinical experiences
- Clinicals: two 12-week full-time fieldwork experiences designed to prepare students for entry-level practice
- Capstone: doctoral capstone seminar series that culminate in a 14-week doctoral capstone experience and scholarly project that represents in-depth knowledge in occupational therapy

The Entry-Level Professional OTD program is a full-time, intensive program designed to be completed in 3 years. Students admitted to the program are required to take 11 credits of graduate coursework in Clinical Anatomy, Neuroanatomy, and the Philosophy and Science of Occupational Therapy. Students complete 10 semesters (Fall, Spring, Summer) of coursework for a total of 124 credits.

Curriculum
The Entry-Level Professional OTD curriculum is reviewed regularly and subject to modification in both content and credit as deemed necessary to maintain a high-quality educational experience and to keep current with best practices in the profession.

Fieldwork Expectations
All students are responsible for transportation to all fieldwork experiences. All students are required to maintain a viable health insurance, malpractice insurance, CPR certification and current immunization record according to their fieldwork placements. A fieldwork site may have additional requirements as part of its affiliation agreement such as background checks and site-specific mandatory in-services. Failure to comply with fieldwork requirements may negatively impact a student's ability to participate in fieldwork. The department also requires current membership with the American Occupational Therapy Association.

Capstone Expectations
All students are required to complete a capstone experience and a capstone project.

- CAPSTONE EXPERIENCE: The capstone experience is a mentored process by an individual with demonstrated expertise in the student's
area of interest. The capstone experience may occur in a traditional/clinical site or non-traditional/non-clinical site and is intended for the implementation of the capstone project and the integration of learning. Students are responsible for transportation to all capstone experiences. All students are required to maintain a viable health insurance, malpractice insurance, CPR certification and current immunization record according to their capstone placements. A capstone site may have additional requirements as part of its affiliation agreement or memorandum of understanding such as background checks and site-specific mandatory in-services. Failure to comply with capstone experiential requirements may negatively impact a student's ability to participate.

- **CAPSTONE PROJECT**: The doctoral capstone project is an opportunity for students to demonstrate in-depth knowledge in occupational therapy and the attainment of all program learning outcomes. The project concludes in a scholarly manuscript and oral presentation to the occupational therapy practice community.

**Progression, Retention and Graduation Requirements**

All policies and procedures regarding progression, retention and graduation are found in the OTD Student Handbook. These policies and procedures are routinely reviewed with the students at the beginning of each semester and/or during advising.

**Grade and Course Sequence Requirements**

To progress through the program, students must meet the minimum semester GPA of 3.2 and must earn a grade of B- or above in all lecture courses and B+ or above in all fieldwork level I and laboratory courses. In addition, all students must acquire a “Pass” in their fieldwork level II. Failing to meet the aforementioned requirements will result in a referral to the Academic Progression and Retention Committee (PRC). The outcome of such referral may be: program probation with course remediation; a program probation with a course repeat (and repay); or a program dismissal.

All courses must be taken sequentially as indicated in the program of study. Students may request in writing to the department chairperson (or designee), any deviations from the course sequence, waivers from occupational therapy courses, and/or transfer credits from other occupational therapy programs. All requests must be approved by the APRC and the department chairperson.

**Fieldwork Requirements**

1. Students must complete all the required didactic coursework and be in good academic standing prior to starting Level II Fieldwork.
2. All Level II Fieldwork experiences must be completed within 12 months following completion of the didactic portion of the program.

**Capstone Requirements**

1. Students must complete all preparatory coursework and Level II Fieldwork, be in good academic standing, and pass a comprehensive exam prior to starting the Doctoral Capstone Experience and Project.
2. The Doctoral Capstone Experience and Project must be completed within 12 months following the successful passing of the comprehensive exam.

Successful completion of the Doctoral Capstone Experience and Project is necessary for graduation with the degree of Doctor of Occupational Therapy.

**Student Learning Outcomes**

Upon completion of the Entry-Level Professional Doctor of Occupational Therapy program, students will demonstrate the following competencies:

1. **Advocacy**: Advocate for the distinct value of occupational therapy.
2. **OT Process**: Apply occupation-centered principles and effective professional/clinical reasoning in the occupational therapy process.
3. **Systems**: Demonstrate leadership and competent performance of occupational therapy roles across traditional and emerging settings and systems.
4. **Evidence-Based Practice**: Evaluate and synthesize evidence to inform practice.
5. **Leadership**: Commit to the ongoing development of leadership skills with an OT professional identity within the context of interprofessional practice.
6. **Synthesis**: Synthesize and articulate the integral relationship among occupation, health and participation.

**Program Mission**

The mission of the OTD program is to provide high-quality education to develop occupational therapy practitioner-scholars, who possess broad-based knowledge and skills to influence meaningful change in the health and functioning of individuals, populations and communities. The program aims to graduate entry-level occupational therapists who possess **in-depth knowledge and skills** in advocacy, occupational therapy process, systems, professional leadership, evidence-based practice and in the synthesis of occupation, health and participation.

**Program Philosophy**

The department views the entry-level educational experience with a developmental-humanistic lens. This approach acknowledges that each student has unique experiences and possesses varying abilities, which are brought to the university environment and further developed through disciplinary and interdisciplinary inquiry as well as, co-curricular, community-based/experiential learning and professional experiences.

The department conceptualizes "development" not merely as a sequential ontological event but rather as a complex iterative, heterarchical and hierarchical sets of processes that are situated in various contexts. This developmental curriculum concept is reflected below using Fink’s Taxonomy of Significant Learning:

- **Foundational Knowledge (and Caring and Learning to Learn)** – refers to understanding, remembering information and ideas; developing interests and professional values; and developing the skills to learn or self-direct one’s learning
- **Application and Integration (and Learning about Oneself/Others)** – refers to development of practical, creative and critical thinking skills by connecting ideas/concepts, events and realms of life; as well as developing a depth of awareness of oneself and of others
- **Application and Synthesis** – refers to continued refinement of practical, creative and critical thinking skills through understanding of systems and embracing one’s agency

Through advising, mentorship and curricular experiences, the faculty applies a humanistic approach to support students in their personal and professional growth toward becoming an entry-level occupational therapist. Students are also taught the value and potential of every human being and their capacity to self-determine.
Admission

Application Timeline
Students are admitted to the Entry-Level Professional Doctor of Occupational Therapy (OTD) program on a rolling basis. As the program begins in the Summer I session, applications are accepted until January 15 of the same year the applicant plans to matriculate. Interviews are required and offered to the most qualified candidates. Applicants are notified of their acceptance on or before March 1.

Admission Requirements
1. Bachelor’s degree prior to matriculation into the OTD program.
2. A minimum GPA of 3.0. Stronger candidates have maintained a cumulative GPA of 3.25.
3. A minimum grade of grade of B- or better in all the prerequisites, completed within 8 years of application from an accredited institution of higher learning.
4. A minimum of 40 verifiable observation hours in the past 3 years. These hours may be a combination of traditional/clinical and non-traditional/non-clinical settings and populations.
5. Three letters of recommendation, with at least one from an academic reference, and at least one from a supervisor in an employee or volunteer capacity
6. A letter of intent outlining reasons for pursuing an entry-level professional OTD and how Quinnipiac may assist them in pursuit of their career goals.
7. Successful in-person interview with the OTD Admissions Committee.

GRE is not required. However, the student may submit scores if they believe it can enhance the strength of their application.

OTD Prerequisites
At the time of application, prerequisites may be in progress or pending, but must be completed in May before starting the OTD program. Qualified candidates whose prerequisites are in progress or pending may be granted conditional acceptance until all prerequisites are satisfactorily met. All prerequisites must have a grade of B- or better. The OTD prerequisites are as follows:

- 2 semesters of Anatomy and Physiology with Lab (8 credits)
- 1 semester of Physics with Lab (4 credits)
- 1-2 semesters of Lifespan Development including Child Development and Adult Development (3-6 credits)
- 1 semester of Abnormal Psychology (3 credits)
- 1 semester of Biostatistics or Statistics for Social and Behavioral Sciences (3 credits)

The following courses are not required but strongly recommended:

- Coursework on the disease process (e.g., Pathophysiology, Human Health and Disease, Biology of Aging, etc)
- Coursework on healthcare systems, health policy, or leadership
- Humanities: Philosophy, Ethics and courses on Western thought and ideas
- Social Sciences: Sociology, Anthropology and courses relevant to the study of various cultures and society

Required Documents
1. Application form
2. Letter of intent
3. Nonrefundable application fee

Official transcripts must be submitted from all undergraduate, graduate and professional schools attended.

Accreditation
The Entry-Level Professional Doctor of Occupational Therapy (OTD) program at Quinnipiac University has applied for accreditation by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449. ACOTE's telephone number c/o AOTA is 301-652-AOTA and its web address is acoteonline.org (https://nam04.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.acoteonline.org&data=0%7C0%7C7CSalvador.Bondoc%40quinnipiac.edu%7C47b3b7f17a734481c74e086d2fd53a7%7C0940985869fb4de99879990db22b526%7C0%7C0%7C63692838279804915%&data=aay85a%2Bg07hv%2FM72zR6JkXwvglNmrTvZu3NCA1QpM%3D&reserved=0).

The program must be granted Candidacy Status, have a preaccreditation review, complete an on-site evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an occupational therapist, registered (OTR). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

Program Sponsorship
Quinnipiac University assumes primary responsibility for appointment of faculty, admission of students, and curriculum planning for the entry-level OTD program. This responsibility includes the delivery of course content, satisfactory completion of the educational program, and granting of the degree. The university also is responsible for the coordination of classroom teaching and supervised fieldwork practice and for providing assurance that the practice activities assigned to students in a fieldwork setting are appropriate to the program.

Quinnipiac University complies with the administrative requirements for maintaining accreditation of the Entry-Level Professional OTD program.

Master of Social Work
Program Contact: Carol Awasu (carol.awasu@quinnipiac.edu) 203-582-6433

The Master of Social Work program prepares students for achievement and leadership in the field of social work. The curricular approach of the MSW program is unique in that it directly engages students in interprofessional education and the health care team approach.

Quinnipiac’s MSW program embraces the university’s commitment to the development of professional expertise through practice experience. The two field placements offer students the opportunity to practice skills learned in the classroom in real-world settings. A seminar that supports the student in integrating academic and fieldwork is held monthly. Upon
completion of the MSW degree, the student will have at least 1,000 hours of professional preparation in the field.

The 60 credits required for the MSW degree include 30 credits in the generalist curriculum and 30 credits in the specialized practice curriculum. The degree can be completed full-time in four terms of study or through an extended plan over six or eight terms. Students with a BSW from a CSWE-accredited program may apply for Advanced Standing and complete 36 credits over one or two years.

The specialized practice curriculum has a concentration of health/behavioral health. An integrative seminar/capstone project is completed in the final semester of study and requires an integrative paper or project. The MSW program values interprofessional education and requires students to complete 30 hours of interprofessional education activities before graduation. The MSW program at Quinnipiac University does not give credit for life or work experience.

Students entering Quinnipiac as undergraduates who are interested in the social work program also have the option of pursuing a dual-degree bachelor’s/master’s program. There are two options: the Accelerated Dual-Degree BS in Health Science Studies/Master of Social Work (3+2) (p. 276) or the Accelerated Dual-Degree Bachelor’s/Master of Social Work (3+2) (p. 346) program, which begins with undergraduate study in the College of Arts and Sciences. Students who are interested in earning a JD and a Master of Social Work may earn both degrees on an accelerated basis by enrolling in the joint JD/MSW degree program (p. 437). Please see the Admission (p. 407) tab for additional details.

The MSW degree also meets the academic requirements for licensure as a Licensed Clinical Social Worker (LCSW).

### Traditional MSW Program of Study

Students can choose among three plans of study for the traditional MSW.

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

### Two-Year Full-Time MSW

Students in this plan of study enter the MSW program in the fall semester and complete the degree over four terms of study in two academic years. In addition to their classes, students are required to complete generalist and specialized practice field placements.

### Three-Year Extended MSW

Students complete the generalist curriculum over two years with a reduced course load and then attend classes full time to complete the specialized practice curriculum. In addition to their classes, students are required to complete generalist and specialized practice field placements.

Volume 1

1 Of the four elective courses, two must be clinical elective courses.

Student Learning Outcomes

Upon completion of the MSW program, students will demonstrate the following competencies:

1. **Ethics**: Demonstrate ethical and professional behavior.
2. **Diversity**: Demonstrate and embrace diversity and difference.
3. **Justice**: Advance human rights and social, economic and environmental justice.
5. **Policy**: Engage in policy practice.
6. **Engagement**: Assess, intervene and engage with individuals, families, groups, organizations and communities.
7. **Evaluation**: Evaluate practice with individuals, families, groups, organizations and communities.

Mission Statement

The mission of the Quinnipiac University MSW program is to prepare social workers for specialized practice in the context of health and behavioral health settings through a curriculum that focuses on clinical practice, organizational practice, and interprofessional teamwork. The MSW program is guided by a person-in-environment framework, a global perspective, respect for human diversity, and knowledge based on scientific inquiry, for the purpose of educating social work professionals to promote human and community well-being. The program's core values are as follows and reflect the NASW Code of Ethics for Social Workers: service, social justice, the dignity and worth of the person, the importance of human relationships, integrity and competence.

The MSW program has the following four goals:

1. Prepare social workers to be specialized practitioners in diverse systems of various sizes, emphasizing competent, ethical clinical and organizational practice toward the advancement of the human condition. The specialized curriculum will build upon the generalist curriculum, which is focused on the necessity of knowledge and skills to practice with individuals, families, groups, organizations and communities.
2. Prepare social workers to practice without discrimination with diverse populations.
3. Prepare social workers to engage in professional activities that promote interprofessional collaboration and advocacy within diverse environments toward the enhancement of the human condition.
4. Prepare students for lifelong professional development.

Admission

To qualify for admission to the program, students must have earned a bachelor's degree from a college or university accredited by a recognized regional accrediting association, with a preferred minimum GPA of 3.0 and at least 20 semester credits in liberal arts, and a course in statistics (with a grade of C or higher). Students with a BSW from a CSWE-accredited program may choose to apply for Advanced Standing.
Background Check and Drug Screening
To ensure their safety and maintain high-quality care of patients, clinical affiliates of the university require students to have a criminal background check. All students entering the Quinnipiac MSW program are required to undergo a criminal background check (through the university vendor) prior to beginning classes. This is a mandatory component of the program. In addition, MSW students may be required to undergo a criminal background re-check and/or drug screen prior to any of their field placements. The results are made available to the student through their own personal and secure online portal. Whenever a Quinnipiac MSW student may need proof of his/her criminal background check for field placements, the student will release the information directly from their personal portal to the clinical site. The cost of the criminal background check and any re-checks and/or drug screens is the responsibility of each individual student.

Dual-Degree JD/MSW
Students interested in earning both a JD and a Master of Social Work may earn both degrees on an accelerated basis by enrolling in the Dual-Degree JD/MSW program. Students must apply and be accepted separately to each program. Ideally, students would apply to both programs before starting either but a student enrolled in either program could, during the first year (and possibly later), apply for and be accepted to the other program.

For more information, see the Dual-Degree JD/MSW page (p. 437).

The MSW program is accredited by the Council on Social Work Education (CSWE).

The CSWE address is:

Council on Social Work Education
1701 Duke Street, Suite 200
Alexandria, VA 22314
Phone: 703-683-8080
Fax: 703-683-8099
Email: info@cswe.org
Website: CSWE.org (http://www.cswe.org)

All Council on Social Work Education programs measure and report student learning outcomes. Students are assessed on their mastery of the competencies that comprise the accreditation standards of the Council on Social Work Education. These competencies are dimensions of social work practice that all social workers are expected to master during their professional training. A measurement benchmark is set by the social work programs for each competency. An assessment score at or above that benchmark is considered by the program to represent mastery of that particular competency.

Please click Assessment of Student Learning Outcomes (https://www.qu.edu/content/dam/qu/documents/shs/msw_epas_form_2017.pdf) (PDF) for more information (last completed June 6, 2017).

Occupational Therapy Online Certificate of Advanced Graduate Studies
Program Contact: B (Francine.Seruya@quinnipiac.edu)arbara Nadeau (barbara.nadeau@qu.edu) 203-582-8691

The Certificate of Advanced Graduate Studies in Occupational Therapy (CAGS) is a flexible, online 12-credit program designed to: a) prepare bachelor-level occupational therapists for post-professional occupational therapy doctorate (OTD) studies at Quinnipiac University; or b) provide concentrated studies in a specialized area of practice for occupational therapists regardless of entry-level degree (i.e., bachelor’s, master’s, or doctorate).

The CAGS begins in the spring and consist of four 3-credit courses taken sequentially. Two common courses taken at the start and end of the program will have an emphasis on scholarly writing and integration. The other two courses are based on the student's chosen track and are specifically designed for specialized areas of practice. The CAGS program currently offers three tracks: a) school-based practice; b) teaching and learning in occupational therapy; c) hand therapy.

Certificate of Advanced Graduate Studies in Occupational Therapy Curriculum
The curriculum for the professional courses in the program are reviewed regularly and are subject to modification in both content and credit as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

The CAGS curriculum is framed around the following objectives which support Quinnipiac University’s institutional mission to prepare graduate students for achievement and leadership in their professional fields as well as facilitate students’ ability to be valued and contributing members of their professional communities. Upon completion of the certificate program students will be able to:

- synthesize theory and evidence in a practice concentration
- develop intermediate skills to engage in scholarly writing
Admission Requirements
An entry-level degree in occupational therapy from a program approved by Accreditation Council for Education of Occupational Therapy (ACOTE) or a World Federation of Occupational Therapy (WFOT).

A GPA of 3.0 or higher in the prospective student’s entry-level occupational therapy education.

Proof of initial certification by the National Board for Certification of Occupational Therapy (NBCOT) or American Occupational Therapy Certification Board (AOTCB).

Proof of active licensure to practice.

A background check completed through the Quinnipiac University system.

For students who graduated from a WFOT-program where the primary language is not English, completion of the Test of English as a Foreign Language (TOEFL).

Verification of employment as an occupational therapist: minimum of 6,000 hours of OT practice (three years FTE) or 4,000 hours (two FTE years or four to six part-time years) within the last six years.

Current membership to the American Occupational Therapy Association.

Two professional references. Examples of acceptable references include those from a supervisor, a professional peer, or a faculty member from an academic program you attended.

A personal essay that sets forth the applicant’s professional goals and compatibility with the program’s learning objectives.

Online Post-Professional Occupational Therapy Doctorate (OTD)

Program Contact: B (Francine.Seruya@quinnipiac.edu) or Barbara Nadeau (barbara.nadeau@qu.edu) 203-582-8691

The Post-Professional Occupational Therapy Doctorate (OTD) is designed for practicing registered occupational therapists who want to merge their experience and practical skills with contemporary professional knowledge and scholarship.

The program enables registered occupational therapists to advance their skills to become future leaders and evidence-based scholars of the profession. The degree can be completed in five semesters online with minimal on-campus requirements tailored for the working professional.

Courses run in online modules of varying duration (i.e., 5-week, 7-week, 14-week). Students are required to attend a one-week, on-campus residency during the summer between the first and second year in the program as well as the Symposium Day at the end of the curriculum.

The online program offers an opportunity for practicing occupational therapists to continue their education without interrupting their careers. The pace of the program permits steady accumulation of skills that can be applied immediately to the workplace. Practitioners develop refined skills allowing increased specialization and direct practical application. This program is designed to further the American Occupational Therapy Association “Vision 2025” by creating practitioners who are equipped to lead the profession to meet society’s occupational needs and to be “agents of change” within their communities and the occupational therapy profession.

The Occupational Therapy Department offers multiple avenues for registered occupational therapists to advance their education.

Occupational Therapy Doctorate
To be eligible to apply to the online post-professional Occupational Therapy Doctorate (OTD) program, students need to have completed either a bachelor’s degree in occupational therapy with a separate master’s degree, a master’s degree in occupational therapy, OR the Certificate of Advanced Graduate Studies in Occupational Therapy. The program provides students with an opportunity to integrate clinical experience with theoretical concepts within the clinical literature, incorporate advanced concepts of policy and advocacy into practice, and develop the capacity for clinical scholarship. Students can customize most assignments to their own area of interest so that they can immediately apply what they are learning into their practice environment.

Certificate of Advanced Graduate Studies in OT
In two semesters of online coursework, occupational therapy practitioners can earn a Certificate of Advanced Graduate Studies from Quinnipiac University in their choice of three tracks:

School-Based Practice: This certificate program focuses on advanced topics in school-based practice. Students deeply explore legislation, assessment, intervention and innovative approaches to school-based practice.

or

Teaching and Learning: Students in this certificate program analyze learning theory and the relationship between learning theory and occupational therapy. Additionally, students explore various educational models and tools to enhance teaching and professional presentations.

or

Hand Therapy: Students explore best practices and evidence in hand therapy and synthesize their knowledge through a critique of clinical protocols and practice guidelines.

Bridge from BSOT to OTD: Certificate of Advanced Graduate Studies in OT
This program recognizes the fact that a number of experienced practitioners previously entered the field of occupational therapy when the bachelor’s degree was the accepted entry-level degree. As demands within health care have evolved, so did the educational requirements for students. This certificate program is designed for individuals who currently have an entry-level BS in Occupational Therapy with initial National Certification Board for Occupational Therapy (NBCOT/AOTCB) certification to form a bridge from BS to an OTD. Following successful completion of this program, students receive a Certificate of Advanced Graduate Studies and are able to matriculate into Quinnipiac University’s Occupational Therapy Doctorate program.

On-Campus Residency Requirement
All students are required to attend one summer course at Quinnipiac University for the duration of one week (OT 656). Students also are required to attend the Symposium Day at the completion of the second year to present their final project.
Class Schedule
OTD classes begin in the fall. Program requires five semesters: two academic years and summer between.

1 A portion of this course is taken at Quinnipiac University to fulfill the residency requirement.

Program Mission
The mission of the Occupational Therapy Doctorate (OTD) program is to provide excellent online educational opportunities that build upon the clinical experience of each student, enable students to become an “agent of change” for their professional community and to foster lifelong learning and continued professional growth in the field of occupational therapy.

Program Philosophy
Because the OTD program philosophy is humanistic and developmental in nature, it is recognized that students enter the program with unique experiences and interests. The OTD program is designed to allow students to reflect upon their own experiences and incorporate their particular interests into their coursework. To support students in an individual manner, a faculty adviser is assigned to each student from the beginning of the program. This allows the adviser to guide the student throughout the entire OTD curriculum.

Admission Requirements
To qualify for admission to the Occupational Therapy Doctorate (OTD) program, a student must meet the following admissions criteria:

1. A bachelor’s degree in occupational therapy with a GPA of 3.0 or higher. Students applying for direct entry into the OTD program must also have a related master’s degree, OR an entry-level master’s degree in occupational therapy with a GPA of 3.0 or higher.
2. Official transcript(s), indicating the year of graduation from an Accreditation Council for Education of Occupational Therapy (ACOTE) or a World Federation of Occupational Therapy (WFOT) accredited entry-level professional program.
3. Proof of initial certification by the National Board for Certification of Occupational Therapy (NBCOT) or American Occupational Therapy Certification Board (AOTCB) initial certification (prior to NBCOT). International applicants who do not have NBCOT certification must provide proof of qualification/licensure in their home country.
4. Verification of employment as an occupational therapist with at least three years of full-time OT practice. Strong candidates will have a minimum of five full-time equivalent years of OT practice or 10,000 hours within the past 10 years.
5. Proof of active licensure to practice (if applicable in the state of current practice).
7. When applicable, completion of the Test of English as a Foreign Language (TOEFL).
8. A background check completed through the Quinnipiac University system.

In addition, the student must submit the following documents, which will be used to evaluate the applicant’s fit and potential for success in the OTD program:

1. Two professional references, at least one of which must be from a supervisor or administrator.
2. A personal essay that sets forth the applicant’s professional goals and compatibility with the program’s learning objectives. The essay must address focused questions that coincide with the program’s mission. Question prompts may include:

Graduation Requirements
Completion of all courses with a cumulative GPA of 3.0.

Student Learning Outcomes
Upon completion of the Occupational Therapy Doctorate program, students will demonstrate the following competencies:

1. Leadership: Demonstrate in-depth knowledge of leadership skills.
2. Advocacy: Synthesize knowledge of health care policies and systems to be an advocate at an individual, group and population level.
3. Evidence-Based Practice: Critique clinical practice based on current theoretical concepts and evidence within the clinical literature.
4. Research: Contribute to occupational therapy clinical research and scholarship.
The program is a cooperative educational endeavor involving the technology, the demand for new and more sophisticated pathological results from the tremendous explosion in medical information and there is a nationwide demand for pathologists' assistants. This demand laboratories, private laboratories and medical research centers. Currently, graduates are employed by pathologists in hospital candidates to be pathologists' assistants. Upon successful completion of their training, graduates are notified via email if they are selected for an interview.

Classes begin in August for the fall term. Candidates are advised to submit applications as early as possible.

Program Requirements
1. Students in the OTD program are required to achieve a GPA of 3.0 upon the completion of their first 9 credits, and must maintain a cumulative GPA of 3.0 thereafter, as stated in the Graduate Student Handbook.

2. A student must earn a grade of "C+" or above in all coursework. Any student who receives a grade below a C+ in a course is required to repeat and repay for that course.

In the event that a student does not achieve a 3.0 upon completion of the first 9 credits, he/she will be referred to the Progression and Retention Committee and placed on academic probation. The student must achieve a 3.0 semester GPA thereafter to demonstrate progression.

In the event that the student does not meet the GPA requirement in any semester after the first 9 credits, he/she will referred to the Progression and Retention Committee and placed on academic probation. If the student does not achieve a 3.0 per semester subsequent to being placed on academic probation, he/she will be dismissed from the program. A student may appeal dismissal by writing a letter to the dean. Please refer to the Graduate Handbook for specific policies regarding the appeal process.

Pathologists' Assistant Program
Program Contact: Robert Cottrell (Robert.Cottrell@quinnipiac.edu) 203-582-8676

This program, leading to a Master of Health Science, trains qualified candidates to be pathologists’ assistants. Upon successful completion of their training, graduates are employed by pathologists in hospital laboratories, private laboratories and medical research centers. Currently, there is a nationwide demand for pathologists’ assistants. This demand results from the tremendous explosion in medical information and technology, the demand for new and more sophisticated pathological determinations and a national decline in the number of medical residents in pathology.

The program is a cooperative educational endeavor involving the following:

- Quinnipiac University;
- Veterans Affairs Medical Center, West Haven, Connecticut;
- Yale-New Haven Hospital, New Haven, Connecticut;
- Yale-New Haven Hospital Saint Raphael Campus, New Haven, Connecticut;
- Yale-New Haven Hospital Bridgeport Campus, Bridgeport, Connecticut;
- Norwalk Community Hospital, Norwalk, Connecticut;
- St. Vincent’s Medical Center, Bridgeport, Connecticut;
- St. Francis Hospital, Hartford, Connecticut;
- CT State Medical Examiner Office, Farmington, Connecticut;
- Yale University School of Medicine, New Haven, Connecticut;
- Hartford Hospital, Hartford, Connecticut
- Baylor University, Houston, Texas;
- Massachusetts General Hospital, Boston, Massachusetts;
- Mayo Clinic, Rochester, Minnesota;
- UCLA Medical Center, Los Angeles, California;
- Crouse Hospital, Syracuse, New York;
- Brigham and Women's Hospital, Boston, Massachusetts; and
- Memorial Sloan Kettering Cancer Center, New York, New York.

The program consists of both classroom and clinical training. Quinnipiac University is a charter member of the Association of Pathologists’ Assistant Training Programs, and its program meets criteria established by the American Association of Pathologists’ Assistants (AAPA). This program is fully accredited by The National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

In addition to the college-based classroom coursework taken during the first year, the student is introduced and oriented to the pathologists’ assistant profession by weekly attendance at clinical and gross conferences during their second year. This facilitates integration of the classroom coursework with intensive clinical training during the second year.

To continue in the pathologists’ assistant program, students must maintain the minimum academic and clinical requirements for the program. Students must achieve the following requirements:

1. Maintain an overall GPA of at least a 3.0 following the first didactic year.
2. Maintain an overall GPA of at least a 3.0 during each semester of the clinical year.
3. Successfully complete all clinical rotations.

Failure to meet any of these requirements may result in probation or dismissal from the program.

Student Learning Outcomes

Upon completion of the Pathologists’ Assistant program, students will demonstrate the following competencies:

1. **Accountability**: Possess the emotional health and stability to deal with death, dead bodies, and body parts and exercise good judgment in a professional and caring way.
2. **Organizational Hierarchy**: Understand the operation and services provided by the anatomic pathology laboratories and develop skills for the operation and management of the autopsy suite and surgical cutting room.
3. **Teamwork**: Possess sufficient interpersonal skills to interact with both professional and hospital staff as well as university personnel in a diplomatic and team atmosphere approach.
4. **Problem Solving**: Demonstrate comprehensive knowledge of scientific facts, principles and data that contribute to the practice and operation of a pathology laboratory.
5. **Clinical Reasoning**: Compare the structure and physiological functions of normal organs, tissues and cells to those of abnormal ones.
6. **Inclusivity**: Display core values of mutual respect, academic excellence, open inquiry, free expression and respect for diversity.

Mission Statement

The mission of Quinnipiac University’s Pathologists’ Assistant program is to prepare students with comprehensive knowledge in the practice and operation of an anatomic pathology laboratory. The program aims to maximize the students’ technical proficiency and creative thinking by successfully integrating didactic biomedical knowledge with hospital-based training. The culmination of this type of training assures that the graduates of the program are able to carry out a myriad of functions critical in becoming a successful pathologists’ assistant.

Program Goals

Through their graduate studies, pathologists’ assistant students are able to:

1. Develop a comprehensive knowledge of scientific facts, principles and data that contribute to the practice and operation of a pathology laboratory.
2. Understand performance-based education to assist the anatomic pathologist in the hospital or in other medical environments.
3. Compare the structure and physiological functions of normal organs, tissues and cells to those of abnormal ones.
4. Understand the characteristics of stains and the staining properties of normal and abnormal cells and their cellular constituents.
5. Assist the pathologist who is determining the pathogenesis of disease by:
   a. Properly collecting and handling specimens and keeping appropriate records using biomedical/photography techniques.
   b. Submitting tissues and selecting the necessary and appropriate techniques for processing and proper staining procedures.
   c. Reviewing histological slides for technical quality and collecting clinical information and laboratory data for final diagnosis by the pathologist.
6. Perform a postmortem examination and relate the clinical history to the results of the dissection.
7. Recognize and record anatomic and morphologic changes in relation to clinical manifestations and laboratory data for the pathologist’s interpretation.
8. Understand the operation and services provided by the anatomic pathology laboratories and develop skills for the operation and management of the autopsy suite and surgical cutting room.
9. Interact with the pathologist by integrating didactic biomedical knowledge with practical hospital-based training.
10. Through management training and experience, supervise and coordinate the work of other laboratory professionals.

Admission

Students are admitted to the Pathologists’ Assistant program on a rolling basis. Applications are accepted until September 1. Interviews are conducted during the summer, spring and fall semesters. The six-semester class cycle begins with summer semester I.

The most competitive applicants will ideally possess a minimum undergraduate cumulative GPA of 3.0. Interested candidates must hold a bachelor’s degree from a regionally accredited institution in the United States or Canada and must possess, at a minimum, the following courses to be eligible to apply for admission:
• two semesters of basic biology (or equivalent)
• one semester of microbiology
• two semesters of anatomy and physiology
• two semesters of general chemistry
• one semester of organic chemistry or biochemistry (lab preferred)
• one semester of mathematics
• four semester courses in biology or chemistry, particularly courses in microbiology, physiology, anatomy, and biochemistry.

All prerequisites must be completed at a regionally accredited institution in the United States or Canada. We are not able to accept prerequisite courses that have been completed online. Hybrid courses are acceptable if they include an on-campus lab component.

Scores from the Graduate Record Examination are not required.

Applications may be obtained from the Office of Graduate Admissions. Applicants should refer to the Graduate Admission Requirements (https://na01.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnextcatalog.qu.edu%2Fgraduate-studies%2F%2F3admissionstext&data=02%7C01%7C%7Cbf41626d64c45c3641408d5bb350f6a%7C0940985869b4de9987990db22b52eaf%7C0%7C0%7C63662075899705207&data=2IAwNPLLyg%2FsHBrlyUJRust%2Bgirui4mjjo7ugkFjYM%3D&reserved=0) found in this Catalog. A detailed resume of personal, professional and educational achievements as well as two letters of reference, official transcripts and other supporting materials including copies of relevant professional licenses and/or certifications must be submitted with a student's application directly to the Office of Graduate Admissions.

Admission to the program is competitive. Personal interviews, required for admission, are offered to the most qualified individuals. A personal laptop computer is required.

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Background Check and Drug Screen
To ensure their safety and maintain high-quality care of patients, clinical affiliates of the university require students to have a criminal background check and drug screen. All students entering the Quinnipiac University Pathologists’ Assistant program are required to undergo a criminal background check and drug screen (through the university vendor) prior to beginning the didactic portion of the first year. This is a mandatory component of the program. In addition, pathologists’ assistant students may be required to undergo a criminal background re-check and/or a drug screen prior to any of their clinical rotations. The results are made available to the student through their own personal and secure online portal. Whenever a Quinnipiac University Pathologists’ Assistant student may need proof of criminal background check for clinical rotations and/or to be eligible to sit for their ASCP certification exam, the student will release the information directly from their personal portal to the clinical site. The cost of the criminal background check and any re-checks and/or drug screens is the responsibility of each individual student.

Accreditation
The program consists of both didactic classroom and clinical training. Quinnipiac University is in compliance and fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). The Pathologists’ Assistant program is a member of the American Society of Clinical Laboratories (ASCP) and is a charter member of the Association of Pathologists’ Assistant Training Programs established by the American Association of Pathologists’ Assistants (AAPA).

Physician Assistant Program
Program Contact: Dennis Brown (Dennis.Brown2@quinnipiac.edu)
203-582-8704

The Physician Assistant program, which leads to a Master of Health Science degree, educates qualified individuals to be highly skilled licensed health care providers who practice team-based medicine in collaboration with physicians, in a number of health care facilities ranging from private practices to tertiary care hospitals. This program fosters the development of compassionate and professional health care providers who embody the competencies of the PA profession. These competencies include "the effective and appropriate application of medical knowledge, interpersonal and communication skills, patient care, professionalism, practice-based learning and improvement, systems-based learning as well as an unwavering commitment to continual learning, professional growth and the physician-PA team, for the benefit of patients and the larger community being served." ¹

The vision of the Physician Assistant program at Quinnipiac University is to create a PA workforce that provides high-quality, affordable health care that is accessible to all people in all settings by fostering teamwork, critical-thinking skills, high ethical standards and respect for diverse populations.

Quinnipiac is a member of the Physician Assistant Education Association (PAEA) and accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA).

Students must meet Science and a certificate of completion as a physician assistant. Physician Assistant program, students are granted a Master of Health. Upon successful completion of the 27-month Quinnipiac University Requirements for Graduation

care that is accessible to all people in all settings by fostering teamwork, and development of caring, knowledgeable and competent physician assistants who are dedicated to:

**Vision**

To create a PA workforce that provides high-quality, affordable health care that is accessible to all people in all settings by fostering teamwork,
critical-thinking skills, high ethical standards and respect for diverse populations.

**Core Values**

The PA program core values reflect a commitment to the ethical concepts that guide the PA profession. They stand as the program’s pledge to the profession as well as the patients, families, and communities with which the PA students engage.

These core values include:

**Excellence**—A commitment to teaching excellence and championing quality, patient-centered, evidence-based health care in an innovative and supportive learning environment that fosters the student’s personal effectiveness.

**Accountability**—Demonstrating responsibility to students, the University, patients, society and the PA profession utilizing a continuous process improvement system.

**Integrity**—Honesty and adherence to the highest standards of professional behavior and ethical conduct.

**Teamwork and Collaboration**—Building respectful partnerships within the University and the community to transform the health care system.

**Advocacy and Equity**—Seeking to eliminate disparities and barriers to effective, quality health care through patient advocacy and advocacy of the PA profession.

**Intellectual Curiosity**—Exhibiting self-reflection, intellectual curiosity and initiative, critical thinking and the enthusiastic pursuit of lifelong learning within a supportive environment that encourages research and scholarly work.

**Admission**

The Quinnipiac University Physician Assistant program is committed to accepting a diverse group of qualified individuals from a variety of backgrounds and experiences. The program seeks students who reflect varied social, economic, ethnic, educational and health care experience backgrounds. The program seeks students who possess intellectual capacity, personal maturity, communication and interpersonal skills.

Interested students must possess, at a minimum:

- A bachelor’s degree from a regionally accredited institution in the United States or a nationally recognized institution
- Four semesters of courses in biology with labs (credits must be in mammalian or human biology), including one semester of microbiology (with lab) and two semesters of anatomy and physiology (with labs)
- Three semesters of courses in chemistry with labs, including one semester of organic chemistry (with lab) or biochemistry
- One semester of pre-calculus, calculus or statistics
- All prerequisites must be completed at a regionally accredited institution in Canada
- Prerequisite labs must be completed through an on-campus course (not online)
- All academic requirements must be completed prior to December 31 of the year of application

- Scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) if the applicant received a bachelor’s degree from a non-English speaking country
- Scores from Graduate Record Examination are not required

The most competitive applicants typically possess at a minimum:

- A cumulative GPA of 3.2 and science GPA of 3.2
- A minimum of 2,500 hours direct patient care experience in the U.S. health care system

The Physician Assistant program is a full-time program. There is no part-time status. The program does not accept: transfer credits, advanced placement to the program, applications for challenge examinations and/or credits for experiential learning. Admission to the program is highly competitive. Applications are reviewed relative to undergraduate, post-bachelor’s and graduate cumulative science GPA, direct patient care experience, completion of narrative and letters of reference. Personal interviews, required for admission, are offered to the most qualified individuals.

Quinnipiac University has a pre-PA program known as the Entry-Level Master’s Physician Assistant program (ELMPA). Students who have successfully completed all requirements of the ELMPA program as well as the admissions requirements listed above, also will be granted admission to the Master of Health Science Physician Assistant program.

The Quinnipiac Physician Assistant program participates in the Central Application Service for Physician Assistants (CASPA). Go to caspa.liaisoncas.com (https://caspa.liaisoncas.com) for more information regarding the application process and fees. All applications, transcripts, references and other supporting materials are submitted directly to CASPA. Applicants may contact CASPA or the Office of Graduate Admissions for more information.

**PA Program Technical Standards**

The Physician Assistant program is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. The PA certificate/master of health science degree signifies that the holder is prepared for entry into the practice of medicine. It follows that the graduate PA student must have the skills and knowledge to function in a broad variety of clinical situations and to render a wide spectrum of patient care. The technical standards set forth by the physician assistant program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills and competencies of the physician assistant profession as well as to meet the expectations of the program’s accrediting agency.

Accreditation Review Commission on Education for the Physician Assistant, INC. (ARC-PA)
12000 Findley Road, Suite 150
John’s Creek, Georgia 30097

All students entering the graduate Physician Assistant program at Quinnipiac University must be able to meet the established abilities and expectations of the PA program technical standards. Students must possess ability, aptitude and skills in the following areas: observation, communication, motor, intellectual-conceptual-integrative, behavioral, social and physical. PA students must be able to meet the requirements and worker attributes of a physician assistant as defined by the Bureau of Labor and Statistics, U.S. Department of Labor/Employment and Training.
The Radiologist Assistant pathway was developed by the American College of Radiology and the American Society of Radiologic Technologists to meet the increasing demands of imaging technology. Radiologist assistants function as physician extenders whose focus is strictly within the radiology department. They provide expanded patient management, perform complex procedures and conduct research and teaching. One of the radiologist assistant’s most important functions is providing direct patient care including preprocedure consultations and procedure preparation. In clinical practice, the radiologist assistant works under the supervision of a board-certified radiologist. The Radiologist Assistant program at Quinnipiac University is formally recognized by the American Registry of Radiologic Technologists.

Clinical Experiences
Clinical experiences enable students to apply the knowledge learned in the first two semesters of the program. In total, the program requires approximately 2,100 hours of clinical experience. Quinnipiac provides all clinical placements and clinical preceptors throughout the program. Clinical placements include sites in Connecticut, Massachusetts, New York and Rhode Island. Students are responsible for travel, housing and all other expenses related to clinical rotations.

Student Learning Outcomes
Upon completion of the Radiologist Assistant program, students will demonstrate the following competencies:

1. Integrate professional, ethical and legal standards and interdisciplinary collaboration into radiologist assistant practice.
2. Integrate effective written, oral and nonverbal communication skills into radiologist assistant practice.
3. Utilize Information Technology and Informatics to communicate, manage knowledge, mitigate error and support clinical decision-making in radiologist assistant practice.
4. Synthesize clinical data and scientific evidence, apply appropriate modalities, evaluate findings and make recommendations within the scope of radiologist assistant practice.
5. Provide patient-centered care.
6. Assume a Leadership Role in applying quality-improvement methods.

Mission Statement
The Quinnipiac University Master of Health Science in Radiologist Assistant program is designed to prepare advanced practitioners in the field of radiology. The mission of the program is to develop students’ technical professional and interpersonal communication skills through a logical and organized sequence of didactic, laboratory and clinical experiences. The program offers multiple clinical assignments to provide maximum exposure to diversified radiographic and interventional procedures and imaging protocols. In addition, the program prepares skilled graduates who are competent in the art and science of radiography, fluoroscopy and interventional procedures. Graduates of the radiologist assistant program are prepared for career entry and are capable of meeting the needs of the community for highly qualified professionals.

Admission to the Program
Candidates applying for admission to the Master of Health Science in Radiologist Assistant program are required to be a radiologic technologist in good standing with the American Registry of Radiologic Technologists. They must have a bachelor’s degree, documented evidence of at least 2,000 hours of direct patient care contact post-radiography certification, certification in CPR for Healthcare Professionals and have completed the following prerequisite course requirements:

Pathophysiology  3

Total Credits  26

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Accreditation
The Radiologist Assistant program is formally recognized by the American Registry of Radiologic Technologists (ARRT). The ARRT recently extended the recognition period for the Radiologist Assistant educational program at Quinnipiac University for a period of five years, extending through January 31, 2022. Students who graduate from the program will meet ARRT’s educational eligibility requirement for certification and registration as Registered Radiologist Assistants. To obtain or maintain ARRT recognition, educational programs must meet criteria including accreditation, clinical education and preceptorship requirements. ARRT grants initial recognition for up to three years and continuing recognition for up to five years per reapplication.
SCHOOL OF LAW

The School of Law combines rigorous academics, personalized attention, and a practice-focused curriculum to enable every student to develop the core legal skills that are fundamental to a successful and rewarding legal career. The law school has several legal clinics and numerous externship opportunities through which students acquire client-based legal experience and do pro bono work in the community, supervised by practicing attorneys. Students can further refine their critical problem-solving skills in more than a dozen classroom-based simulation courses.

The School of Law offers full-time, part-time, and flex-time programs leading to the JD degree, as well as joint JD/MBA, JD/MSW, and JD/MELP (Master of Environmental Law and Policy) degrees. Students may also choose to concentrate in one or more of several subject matter areas: Civil Advocacy and Dispute Resolution, Criminal Law and Advocacy, Family Law, Health Law, Intellectual Property, International Law and Policy, Tax Law, and Workplace Law.

The student experience at the School of Law is enhanced through many other activities, including three student-edited scholarly journals – the Law Review, the Health Law Journal, and the Probate Law Journal; intramural and interschool competitions sponsored by the moot Court Society, the Mock Trial Society, and the Society for Dispute Resolution; and a range of student organizations, including affinity bar organizations such as the Black Law Students Association, the Women’s Law Society, the Latin American Law Association, and Outlaws, our LGBTQ organization. The law school’s International Human Rights Law Society travels each year and a course in International Human Rights and Transitional Justice gives students the opportunity to make presentations at the annual Summit of Nobel Peace Laureates.

Quinnipiac’s Accelerated Dual-Degree Bachelor’s/JD (3+3) program offers qualified freshmen and sophomores the opportunity to complete both their BA or BS degree and the JD degree in six years instead of seven. Visit the Pre-Law (p. 54) section of this Catalog for program details.

Nondiscrimination
Quinnipiac University School of Law admits students of any race, color, religion, national origin, sex, gender (including identity and expression), sexual orientation, age or disability to all the rights, privileges, programs and activities generally accorded or made available to students at the school. It does not discriminate on the basis of race, color, religion, national origin, sex, gender (including identity and expression), sexual orientation, age or disability in administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other school-administered programs. Quinnipiac University School of Law is committed to equal educational opportunity and full participation for persons with qualified disabilities. No qualified person will be excluded from participation in any university program or be subject to any form of discrimination.

Mission Statement
At Quinnipiac University School of Law, we seek to imbue our students with the knowledge, skills and attitudes necessary for competent and ethical service in the legal profession. Accordingly, we strive — through rigorous classroom instruction and practical training in lawyering skills — to educate attorneys who prepare carefully, think independently and creatively, reason critically, act with compassion and respect for others, and express themselves cogently, both orally and in writing. We also strive to inspire our students to embrace the professional ethic of service and to appreciate the value of “practical wisdom.” To this end, we work with our students to help them develop sound judgment and personal approaches that will help them to succeed in a changing world and to serve effectively as advocates, problem-solvers and counselors. We also demonstrate our own commitment to professionalism and to the advancement of knowledge and justice, by engaging in scholarship that facilitates the understanding and just solution of complex problems and by providing service to governmental and public interest agencies and to the community at large. In addition, recognizing the important pedagogical benefits realized when an educational community is meaningfully diverse — and conscious of the role that law schools must play in helping diversify the legal profession — we strive to maintain meaningful diversity in our student body and in our faculty and staff.

Right to Modify
This Catalog is intended to serve as a convenient reference source for students. It is not guaranteed to be free from errors. Moreover, the programs, policies and courses described here are subject to continual review and reevaluation and may be changed at any time without prior notice. The School of Law reserves the right to modify the academic requirements, admission requirements and program of study, to change the arrangement and content of courses, the instructional material and the tuition and fees; to alter any regulation affecting students; to refuse readmission at any time; or to dismiss any student at any time, should it appear to be in the best interest of the school or student to do so. The School of Law also reserves the right to change the semester schedule and examination times and locations. Nothing in this Catalog should be regarded as setting terms of a contract between a student or prospective student and Quinnipiac University or its School of Law.

Admission to the Bar
Bar Examination
Some states require registration with their State Board of Law Examiners at the start of law studies for students who expect to take the bar examination upon graduation. Applicants are urged to consult the regulations of the Board of Law Examiners in the states where they expect to practice. The State of Connecticut does not require such registration. Students are also urged to check each state bar’s school credit and residency requirements, including possible limits on non-classroom credits, for bar certification in each state where they expect to take the bar examination. For students planning to sit for the New York Bar, we call attention to that state’s extensive experiential education requirement, which is more demanding than the requirement established by the ABA and Quinnipiac Law School. This New York requirement is set forth in Appendix A to this Catalog.

Character and Fitness for Admission to the Bar
It is extremely important for students to determine the applicable character, fitness, and other qualifications of the bar admission authorities in the state(s) in which he or she intends to practice. In particular, any student who has been subjected to disciplinary action by an educational institution, who has incurred a judgment of civil liability, or who has been charged with or convicted of a criminal offense is strongly encouraged to check with the bar admission authority in the jurisdiction(s) in which he or she intends to practice to determine the effect of such action on the person’s admissibility to the bar.

*Note: The academic calendar includes major holidays and breaks for the 2019–20 academic year. Details on specific events such as orientations, bootcamps, and important dates are also included.*
JURIS DOCTOR

Full-Time JD Program
This program is designed for those students who are able to devote substantially all of their time to the study of law. Classes generally are taken during the day, but students may choose to enroll in evening elective courses during their second and third years, if space is available. The first year curriculum is entirely prescribed. The second year curriculum consists of core electives and general electives. Students must take at least four of the core electives as described below (see Academic Regulations (p. 454), section I.B. and I.C, Requirements for Graduation). In addition, prior to graduation, a student must take the course in Lawyers’ Professional Responsibility, satisfy the Professional Skills Requirement (for students matriculating before Fall 2016) or the Experiential Learning Requirement (for students matriculating Fall 2016 or later), and satisfy the Advanced Writing Requirement (p. 454).

Summer Session
One seven-week session is offered each summer. Summer courses are taught in the late afternoon or evening and are open to all students. Under some circumstances, a full-time or part-time student may accelerate graduation by attending summer sessions.

Bridge to Practice Program
The Bridge to Practice program at Quinnipiac Law is a three-part, three-year series of not-for-credit courses — two of them mandatory for full-time students — intended to contextualize the rest of the students’ legal education, highlighting particularly the ways in which lawyers work with clients to clarify and achieve client goals. The goal is to help students begin the transition to law practice while in school.

1L Gateway to Practice
All full-time, first-year students are required to participate in this mandatory two-day workshop in law and lawyering, which is offered during the first two days of the second semester in January. For part-time students, the program is optional but recommended. Students are assigned to “law firms” as junior associates and work with practitioners who serve as partners, conducting a variety of tasks in simulated cases for mock clients. Over 60 lawyers from the state and the region volunteer to work with students.

The program is intended to provide several benefits:

- **Foundation**: First-year students learn the basics of law and legal analysis. This program shows students how lawyers use doctrine and basic legal skills in helping clients in the everyday practice of law.
- **Balance**: Students supplement their classroom experience with activities ordinarily not part of the first-year curriculum, including deriving facts from a client interview, brainstorming strategies with law firm colleagues, explaining options to clients, and engaging clients in decision-making.
- **Context**: The program integrates transactional lawyering and litigation, and helps students to better understand the relationship between legal theory and practice.
- **Group work and collaboration**: Students work in teams to strategize and solve problems.

- **Immediate preparation**: The program helps students prepare for summer employment and gives them a start in developing networking skills.

2L Business Concepts Bootcamp
All full-time, second-year students are required to participate in a day-and-a-half program to kick off the fall semester in August. Part-time, second-year students are encouraged but not required to attend the program. They will be required to watch related video material and attend a Saturday Business Concepts Bootcamp in September.

The goal of the program is to expose students to basic financial and business concepts, many of which will arise in upper-level courses, both within the core curriculum and in other elective courses. The program should be helpful not only to students who intend to practice business law, but also to those who will practice in a host of other specialties, such as litigation or family law. The program includes both panel presentations and interactive, hands-on workshops. Students select two practice area workshops in which a lawyer specializing in the field will discuss the types of clients served in the practice, the types of problems presented, and the skills and substantive legal expertise needed to work in the area. The practitioner leads the students in solving a typical client problem using the business and financial concepts the students learned in earlier sessions of the Bootcamp.

The program is intended to provide several benefits:

- Provide business context for doctrinal principles in upper-level courses.
- Address employers’ concerns that the lack of business and financial literacy represents a major gap in new lawyers’ knowledge.
- Demonstrate that an understanding of business concepts is critical in all areas of practice: private, government, public interest, and nonprofit.
- Help students to better understand public policy debates.

3L & 4L: Business of Law Workshop
The Business of Law workshop is an optional, one-day program offered on a Saturday in the spring semester to all students preparing to graduate. While the 1L and 2L segments of the Bridge to Practice trilogy have focused on the business of clients as the context for lawyers’ work, this workshop emphasizes the business aspects of the lawyer’s own work. Although students have learned the law, they also need to understand the business and organizational aspects of legal practice to be ready for work. Legal employers of all types — private firms, in-house counsel, government, and public interest — have to deal with the economics of serving clients. Panels of practitioners and recent graduates explain the business aspects of the practice of law whether in private practice, government or public interest. Topics include: the economics of practice, timekeeping, billing, marketing, project management, innovation and work-life balance. Students also choose workshops with practitioners related to the practice environment they hope to join upon graduation: small firm and solo, large firm and government/public interest.

Credits 14

Total Credits 86

1 Full-time students must take 3 core electives in the second year. Core electives are:
LAWS*114 - Administrative Law - 3 credits. Offered fall and spring
LAWS*205 - Business Organizations - 4 credits. Offered spring only.
LAWS*305 - Federal Income Tax - 4 credits. Offered fall only.
LAWS*307 - Trusts & Estates - 3 credits. Offered fall and spring.
LAWS*311 - Evidence - 3 credits. Offered fall only.
LAWS*323 - Commercial Law - 4 credits. Offered spring only.

2 Experiential Learning Requirement (applicable to students matriculating Fall 2016 or later): Each student must also satisfactorily complete “one or more experiential course(s) totaling at least 6 credits,” as provided by current ABA Standard 303(a)(3) and related provisions. Certain courses are always designated as “experiential courses” that will satisfy the requirement. They are: all law clinics except Advanced Clinic; all externships including Field Placement II; Introduction to Representing Clients; Negotiation; Trial Practice and Advanced Trial Practice. Other courses that may satisfy this requirement, depending on the design choices that the particular professor makes, include: Advanced Family Law II: Courtroom Advocacy, Advanced Juvenile Law: Delinquency Proceedings, Alternative Dispute Resolution, Bankruptcy Lab, Commercial Transactions Workshop, Estate Planning and Drafting, Financial Planning: Principles and Taxation, Judicial Clerkship Seminar, Land Use Practicum, Representation in Mediation, and Visual Persuasion in the Law. (This list is subject to revision; each semester the registrar will designate which courses taught the following semester will satisfy the requirement.) Any paper(s) written in connection with a course or courses used to satisfy the Experiential Learning Requirement may be used to satisfy no more than three of the four papers required to satisfy the Advanced Writing Requirement.

I. Introduction
The School of Law has organized its institutional learning outcomes into two general categories: “first tier” learning outcomes and “second tier” learning outcomes.

• First Tier Learning Outcomes are outcomes that all students should achieve by graduation, regardless of the practice area(s) in which they expect to focus in post-law school employment.

• Second Tier Learning Outcomes are tailored to particular areas of the law in which students plan to focus in post-law school employment. For that reason, the law school does not expect that all students will achieve all of these second tier outcomes.

Students who have not yet settled upon a particular focus for post-law school employment should achieve at least the first tier learning outcomes, and they should also aspire to achieve those second tier learning outcomes that relate to their likely future practice focuses.

II. First Tier Learning Outcomes
Outcome 1: Graduates are expected to demonstrate competency in legal analysis and reasoning and legal problem solving.

Specific Criteria
Graduates are expected to demonstrate competency in the following:
1. Reading cases, statutes and regulations effectively to glean rules and—if in play—the developmental history and policies underlying the rules.
2. Recognizing issues and possible rules implicated in new and unfamiliar factual situations.
3. Applying applicable rules effectively to understand potential arguments and counter-arguments in new and unfamiliar factual situations.
4. Assessing what additional facts may need to be gathered for appropriate analysis of a legal issue.
5. Assessing the relative strength of arguments and predicting likely outcomes effectively for legal issues.
6. Analyzing applicable rules and facts to formulate and evaluate potential solutions to legal problems.
Outcome 2: Graduates are expected to demonstrate knowledge and understanding of legal theory, systems and doctrine, including core areas of substantive and procedural law and alternative methods for resolving disputes.

Specific Criteria

Graduates are expected to demonstrate knowledge and understanding of the following:
1. The American federal and state legal systems, including their structures of rule-making and governance and their historical background.
2. Core doctrine and theory in “foundation” areas, including those that will be tested on the bar examination.
3. The range of dispute resolution processes and the ability to advise clients and others on choices of process/forum.
4. Appellate review standards and practices.
5. The impact of law and legal rules on society and its various sub-groups.

Outcome 3: Graduates are expected to demonstrate competency in oral and written communication in the legal context.

Specific Criteria

Graduates are expected to demonstrate the following:
1. Competency in cogently communicating analysis and advice orally in a range of settings and contexts.
2. Competency in listening effectively to clients and others.
3. Competency in cogently communicating analysis and advice in writing across a range of types of writings (e.g., memos, briefs and client letters).
4. At least a basic understanding of principles of logic and rhetoric.
5. At least novice-level understanding of and competency in a spectrum of advocacy skills.

Outcome 4: Graduates are expected to demonstrate competency in legal research and understanding of the factual research needed to solve legal problems.

Specific Criteria

Graduates are expected to demonstrate the following:
1. Competency in legal research, including effective use of technology for that research.
2. Understanding of factual investigation, including an understanding of effective strategies and practices for gathering the facts needed to evaluate legal issues or problems.

Outcome 5: Graduates are expected to demonstrate knowledge and understanding of the attorney’s professional and ethical responsibilities to clients and the legal system.

Specific Criteria

Graduates are expected to demonstrate the following:
1. Knowledge and understanding of the professional rules and the ability to recognize and resolve ethical dilemmas in a range of practice settings.
2. Knowledge and understanding of the attorney’s ethical obligation to represent clients diligently and competently.
3. Knowledge and understanding of the attorney’s ethical obligation to behave professionally and civilly.
4. Knowledge and understanding of the attorney’s ethical obligation to behave in accordance with the rules governing confidentiality and conflicts of interest.
5. Knowledge and understanding of the attorney’s ethical obligation to strive to promote justice (including access to justice) and fairness and to assist the profession in providing legal services to those who cannot afford to pay for them.

Outcome 6: Graduates are expected to demonstrate at least novice-level competency in other professional skills needed for competent, effective and ethical participation as a member of the legal profession.

Specific Criteria

Graduates are expected to demonstrate the following:
1. At least novice-level understanding of and competency in approaches for managing conflict for effective problem solving.
2. At least novice-level competency in collaborative work approaches.
3. At least novice-level understanding of and competency in effective approaches for client interviewing and counseling.
4. At least novice-level understanding of and competency in effective negotiation practices.
5. At least novice-level understanding of and competency in “learning how to learn” (techniques for finding guidance for unfamiliar tasks).
6. Competency in interviewing for employment and planning for long-term career development.

III. Second Tier Learning Outcomes

(Approved December 5, 2018)

FOR ALL GRADUATES EARNING CIVIL ADVOCACY AND DISPUTE RESOLUTION CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/CADR Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
3. Competency in listening and in communication modes and skills in different settings.
4. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.
5. Competency in giving and receiving feedback.

Second Tier/CADR Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of negotiation theory and terminology.
2. Understanding of, and competency in, the use of both cooperative and competitive negotiation strategies.
3. Understanding of the psychology of decision-making.
4. Understanding of the ethical issues in negotiation.
5. Competency in planning for and conducting effective negotiation, both with and without an ongoing relationship between the parties.
6. Competency in conducting negotiation in presence of mediator; by interacting with the mediator effectively.

Second Tier/CADR Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, mediation.

Specific Criteria
Concentration graduates are expected to demonstrate the following:
1. Understanding of mediation theory and terminology, including the fundamental principles of mediation and the range of possible mediator approaches.
2. Understanding of the Standards of Conduct for Mediators.
3. Understanding of the current controversies and issues in the use of mediation as a dispute resolution process.
4. Understanding of effectiveness as a consumer of mediation.
5. Competency as an advocate in the mediation context.
6. Competency in participating in a mediation in accordance with the fundamental principles of mediation, including the appropriate use of joint and caucus sessions, and the ability to encourage the creative generation of potential solutions.

Second Tier/CADR Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of the nature of arbitration.

Specific Criteria
Concentration graduates are expected to demonstrate the following:
1. Understanding of the rules and regulation of arbitration.
2. Understanding of the contractual issues and framework of arbitration.
3. Understanding of the current controversies and issues in the use of arbitration as a dispute resolution process.
4. Understanding of, and competence in, advocating for clients in arbitration.

Second Tier/CADR Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy.

Specific Criteria
Concentration graduates are expected to demonstrate the following:
1. Understanding of the litigation process, and the current issues and controversies in the use of trial as a dispute resolution process.
2. Understanding of the elements of effective advocacy in litigation, including pretrial and trial phases.
3. Understanding of, and competency in, the application of the rules of evidence, including presenting evidence through witness testimony, introduction of documentary evidence, and the making of and defending objections.
4. Understanding of, and competency in, direct and cross examination techniques.
5. Understanding of, and competency in, delivering persuasive argument, including opening and closing arguments.

FOR ALL GRADUATES EARNING CRIMINAL LAW AND ADVOCACY CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term "understanding" to refer to knowledge and the term "competency" to refer to skills. We expect graduates to attain at least a "novice-level" understanding and competence. By "novice-level," we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/CLA Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of criminal law and criminal procedure.

Specific Criteria
Concentration graduates are expected to demonstrate the following:
1. Understanding of the substantive law of crimes including the construction of criminal statutes, elements of crimes, and defenses to crimes, as well as the concepts of causation, criminal responsibility and capacity, justification and excuse.
2. Understanding of the investigative stage of the criminal justice process including the constitutional limitations on law enforcement—and the means of enforcing those limitations—with respect to arrest, stop and frisk, search and seizure, eavesdropping, wiretapping, identification procedures, and questioning of suspects.
3. Understanding of the adjudicative stage of the criminal justice process including the initial appearance following arrest, the decision to prosecute, the preliminary hearing, bail, indictment, pleas and plea bargaining, the trial, double jeopardy, and the constitutional limitations on the adjudication of criminal matters.
4. Understanding of the role and impact of the criminal justice system in the United States including current debates and controversies relating to criminal justice policies and practices.

Second

Second Tier/CLA Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, pretrial, trial, and sentencing advocacy.

Specific Criteria
Concentration graduates are expected to demonstrate the following:
1. Understanding of the pretrial, trial, and sentencing phases of criminal cases.
2. Understanding of the elements of effective advocacy in criminal cases including the pretrial, trial, and sentencing phases.
3. Understanding of, and competency in, the application of the rules of evidence, including presenting evidence through witness testimony, introduction of documentary evidence, and the making of and defending objections.
4. Understanding of, and competency in, direct and cross examination techniques.
5. Understanding of, and competency in, delivering persuasive argument, including opening and closing arguments.
6. Understanding of, and competency in, developing and using mitigating evidence in sentencing advocacy.
Second Tier/CLA Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict and relationship management.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
3. Competency in listening and in communication modes and skills in different settings.
4. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.
5. Competency in giving and receiving feedback.

Second Tier/FAMILY Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of negotiation theory and terminology.
2. Understanding of the psychology of decision-making.
3. Understanding of the ethical issues in negotiation and plea bargaining in criminal cases.
4. Competency in planning for and conducting effective negotiations in criminal cases.

FOR ALL GRADUATES EARNING FAMILY LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/FAMILY Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of doctrine and related topics in family law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of topics in family law such as marriage, divorce, jurisdiction, spousal and child support, property division, and custody and parenting issues.
2. Understanding of the emotional and psychological impact of divorce on family members.
3. Understanding of child development principles and how parental separation and conflict affects child development.
4. Understanding of the dynamics of domestic violence, including child abuse, and the array of criminal and civil responses to it.
5. Understanding of the financial and property aspects of divorce, including the tax implications.

Second Tier/FAMILY Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, working with professionals from other disciplines and navigating the ethical aspects of the practice of family law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, working with mental health professionals, as treating professionals, consultants, witnesses, and expert witnesses.
2. Understanding of, and competency in, working with financial professionals, such as divorce financial planners, business evaluators, and tax advisors.
3. Understanding of, and competency in, the special ethical challenges of serving as an advocate and an advisor for clients in family law, particularly when there are children in the family.
4. Understanding of, and competency in, providing for the physical and emotional safety in the lives of clients.
5. Understanding of, and competency in, educating clients about the need for reducing conflict and enhancing the ability of parents to co-parent children.

Second Tier/FAMILY Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management, managing relationships, and ongoing self-improvement of dispute resolution skills.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in managing relationships with clients, other parties, and with counterparts.
2. Understanding of, and competency in, interviewing and counseling family law clients.
4. Competency in listening, and in using effective communication skills.
5. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.

Second Tier/FAMILY Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation and mediation in the family law context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of negotiation and mediation theory and terminology.
2. Competency in planning for and conducting effective negotiation, especially cooperative strategies for clients with an ongoing relationship.
3. Understanding of the ethical and negotiation principles in Collaborative Practice.
4. Understanding of the psychology of decision-making.
5. Understanding of the ethical issues in negotiation and mediation.
6. Understanding of how to conduct negotiation in the presence of the mediator, by preparing clients for mediation and interacting with the mediator effectively.

Second Tier/FAMILY Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy in the family law context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of the litigation process, and current issues and controversies in the use of trial as a dispute resolution process in family law.
2. Understanding of the elements of effective advocacy in litigation, including pretrial and trial phases.
3. Understanding of, and competency in, the application of the rules of evidence, including presenting evidence through witness testimony and expert witnesses, introduction of documentary evidence, and the making of and defending objections.
4. Understanding of, and competency in, direct and cross examination techniques.
5. Understanding of, and competency in, delivering persuasive argument, including opening and closing arguments.
6. Understanding of, and competency in, working with child advocates in court.

FOR ALL GRADUATES EARNING HEALTH LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/HEALTH Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, business and financial activities and transactions relating to health care organizations.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in negotiating, drafting, and interpreting contracts related to commercial enterprises in the healthcare industry.
2. Competency in reading and interpreting financial reports, profit and loss statements, and budget documents.
3. Understanding of how insurance reimbursement policies affect the healthcare delivery system.
4. Understanding of the federal and state tax implications associated with for-profit and not-for-profit corporations.
5. Competency in demonstrating the necessary personal integrity, sound judgment, and commitment to accountability in negotiating healthcare-related transactions.

Second Tier/HEALTH Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level of understanding of, and competency in, health care regulation including federal, state, and local laws impacting the delivery of health care.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of the major health law statutes including, but not limited to:
   - Medicare
   - Medicaid
   - Patient Protection and Affordable Care Act
   - Health Information and Technology for Economic and Clinical Health Act (HITECH)
   - Emergency Medical Treatment and Active Labor Act (EMTALA)
   - Health Insurance Portability and Accountability Act (HIPAA)
   - The Antitrust Statutes (Sherman Act, Clayton Act, Federal Trade Commission Act, Robinson Patman Act)
   - Fraud and Abuse Statute
   - Ethics in Patient Referrals Act (Stark Act)
2. Understanding of the connection between the legislative process and regulatory agency rule-making.
3. Competency in conducting research and drafting correspondence that interprets statutory and regulatory requirements related to a client’s particular circumstances.
4. Understanding of federal and state regulations affecting labor relations, institutional and professional licensing, not for profit and for profit organizations, and patients’ rights.

Second Tier/HEALTH Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level of understanding of the evolving nature of health care policy and competency in health law practices.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in analyzing the financial, antitrust and patient care-related issues associated with hospital acquisition of physicians’ practices.
2. Understanding of the shift in the focus of patient care from inpatient-centric, sick care to outpatient, technology-centric, preventive well care.
3. Understanding of the key policy questions relating to public health insurance.
4. Understanding of the negative impact on patient care caused by lack of coordination within the United States healthcare system.
5. Understanding of the statutory and historical basis for the peer review process for disciplining physicians.
6. Understanding of the policy and political forces driving a shift away from a fee-for-service payment system to a value-based care payment system.

Second Tier/HEALTH Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level of understanding of, and competency in examining, the connection between health, healthcare, healthcare inequities and social determinants of health.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in describing and analyzing the connection between the practice of medicine, the practice of health law, and the impact of law on medicine.
2. Understanding of, and competency in, examining and discussing the question of whether or not there is a “right” to health care for both citizens and immigrants.
3. Competency in analyzing and discussing the connection between the formation of the doctor-patient relationship and medical malpractice.
4. Understanding of the tension between the ethical expectations and the legal obligations of physicians.
5. Competency in analyzing the police powers of the states to restrict private autonomy in the name of public health promotion and protection.
6. Understanding that shifting legislative priorities in response to political changes have resulted in creation of new health-related rights.

FOR ALL GRADUATES EARNING INTERNATIONAL LAW CONCENTRATION
All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/IL Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, using the foundational international law sources.

Specific Criteria
Concentration graduates are expected to demonstrate competency in the following:
1. Competency in reading and understanding treaties, other dual nation and multilateral accords, international customs, generally recognized principles of international law, and international judicial decisions and juristic writings.
2. Competency in recognizing issues and possible rules implicated in new and unfamiliar factual situations in the international context.
3. Competency in applying applicable rules effectively to understand potential arguments and counter arguments in new and unfamiliar factual situations in the international context.
4. Competency in analyzing applicable rules and facts to formulate and evaluate potential solutions to legal problems in the international context.

Second Tier/IL Learning Outcome 2: Concentration graduates are expected to demonstrate at least novice-level understating of, and competency in, oral and written communication and advocacy in the international legal context.

Specific Criteria
Concentration graduates are expected to demonstrate the following:
1. Competency in cogently communicating analysis and advice orally in a range of settings in the international context.
2. Competency in cogently communicating analysis and advice in written form in a range of settings in the international context.
3. Competency in listening effectively to clients and others in the international context.
4. Understanding of, and competency in, use of the principles of logic and rhetoric as they apply in the international context.
5. Understanding of, and competency in, use of a spectrum of advocacy skills as they apply in the international context.

Second Tier/IL Learning Outcome 3: Concentration graduates are expected to demonstrate at least novice-level competency in legal research and understanding of the factual research needed to solve legal problems in the international context.

Specific Criteria
Concentration graduates are expected to demonstrate the following:
1. Competency in legal research, including effective use of technology for that research, in the international context.
2. Understanding of, and competency in, factual investigation, including an understanding of effective strategies and practices for gathering the facts needed to evaluate legal issues or problems in the international context.

Second Tier/IL Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of the attorney’s professional and ethical responsibilities to clients and the legal system in the international context.

Specific Criteria
Concentration graduates are expected to demonstrate the following:
1. Understanding of the ethical implications of differing political systems.
2. Understanding of the ethical implications of differing legal systems.
3. Understanding of the ethical implications of differing levels of economic development.

FOR ALL GRADUATES EARNING INTELLECTUAL PROPERTY CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/IP Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, the substantive and procedural law of intellectual property, and legal analysis, reasoning and legal problem solving in the context of intellectual property.

Specific Criteria
Concentration graduates are expected to demonstrate the following:
1. Understanding of the law of patents, trademarks, copyrights, and trade secrets.
2. Competency in reading cases, statutes, and regulations effectively to glean rules, and understand the developmental history and policies underlying the rules in the context of IP matters.
3. Competency in analyzing applicable rules and facts to formulate and evaluate potential solutions to clients’ IP problems.
4. Understanding of the structures of rule-making and governance and their historical background with respect to patents, trademarks, copyrights and trade secrets.

Second Tier/IP Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level competency in oral and written communication in the legal context as relates to intellectual property matters.

Specific Criteria
Concentration graduates are expected to demonstrate the following:
1. Competency in listening effectively to clients and others in order to understand and address clients’ IP matters.
2. Understanding of, and competency in, a spectrum of oral and written advocacy skills on behalf of IP clients.
3. Competency in listening and in oral and written communication modes.
Second Tier/IP Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, factual and legal research in intellectual property matters.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, the litigation process in validity and copyright validity and enforceability matters.
2. Understanding of administrative law and procedures, and the role of administrative agencies in the investigative stage of employment discrimination matters.
3. Competency in advising clients on choices of process/forum in the context of intellectual property matters.
4. Understanding of, and competency in, effective strategies and practices for gathering the facts needed to evaluate legal issues relating to IP matters.
5. Understanding of major administrative procedures related to the enactment and enforcement of tax law.

Second Tier/IP Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy in the intellectual property context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
3. Competency in advising clients on choices of process/forum in the context of the specific IP problem.
4. Understanding of, and competency in, the use of both cooperative and competitive negotiation strategies as a means to resolve IP disputes.

Second Tier/IP Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy in the intellectual property context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, the litigation process in validity and enforcement proceedings in one or more of trademark, copyright, or patent matters.
2. Understanding of the current issues and controversies in the use of trial as a dispute resolution process in the context of patent, trademark, and copyright validity and enforceability matters.

FOR ALL GRADUATES EARNING WORKPLACE LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/WP Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, engaging in in-depth study of specific issues in tax law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of tax law, policy, and procedure.
2. Competency in tax research.
3. Competency in written analysis of issues in tax law.

FOR ALL GRADUATES EARNING TAX CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/TAX Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, reading and engaging with the sources of tax law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in reading and comprehending case law related to tax law.
2. Competency in reading and comprehending the Internal Revenue Code and Regulations.
3. Competency in reading and comprehending various other sources of tax law, such as Private Letter Rulings and other administrative pronouncements, legislative histories, tax treaties, and major secondary sources/compilations of tax law.
4. Understanding of the relative importance, and legal weight of authority, of these various sources of tax law.
5. Understanding of major administrative procedures related to the enactment and enforcement of tax law.

Second Tier/TAX Learning Outcome 2: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, applying tax law to specific problems faced by tax clients.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in identifying relevant facts presented by a client and identifying the tax principles implicated by those facts.
2. Competency in determining which provisions of the Internal Revenue Code are relevant to a given factual situation.
3. Competency in assessing the likely tax implications of actions of a client.
4. Competency in communicating analysis and advice regarding tax matters, both orally and in writing.

Second Tier/TAX Learning Outcome 3: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, assessing the likely tax implications of actions of a client.
3. Understanding of the federal and state laws and regulations governing labor law.
4. Understanding of the role and impact of employment and labor law in the United States including current debates and controversies relating to workplace policies and practices.

**Second Tier/WP Learning Outcome 2:** Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management, and managing relationships in the workplace law context.

**Specific Criteria**

Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
2. Competency in interviewing and counseling clients in workplace cases.
4. Competency in listening and in communication modes and skills in different settings in the workplace law context.

**Second Tier/WP Learning Outcome 3:** Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation, arbitration, and litigation in the workplace context.

**Specific Criteria**

Concentration graduates are expected to demonstrate the following:
1. Understanding of negotiation theory and terminology.
2. Understanding of the role and practice of arbitration in the labor and employment context.
3. Understanding of the ethical issues in employment negotiation, labor bargaining, arbitration, and trial practice.
4. Competency in planning for and conducting effective negotiations in labor and employment cases, both with and without a mediator.
5. Understanding of how to plan for and conduct effective arbitrations in labor and employment cases.
6. Understanding of how to plan for and conduct effective litigation in labor and employment cases.

**Concentrations**

There are eight optional concentrations offered within the juris doctor degree program.

- Civil Advocacy and Dispute Resolution (p. 438)
- Criminal Law and Advocacy (p. 439)
- Family Law (p. 440)
- Health Law (p. 442)
- Intellectual Property (p. 444)
- International Law and Policy (new Fall 2017) (p. 445)
- Tax Law (p. 446)
- Workplace Law (p. 447)

**Part-Time Juris Doctor**

**Part-Time Evening JD Program**

This program is designed for those students who are employed or otherwise occupied for most of their time, and who are able to devote only a portion of their time to the study of law. The completion of this program requires four academic years and one or two summer sessions of residence. Part-time students are admitted for evening courses. They may be allowed to enroll in day classes if space is available. All part-time students are required to take the prescribed program of required courses listed below and at least four of the core electives as described below (see Academic Regulations (p. 454), section I.B. and I.C, Requirements for Graduation). In addition, prior to graduation, students must take the course in Lawyers’ Professional Responsibility, satisfy the Professional Skills Requirement (for students matriculating before Fall 2016) or the Experiential Learning Requirement (for students matriculating Fall 2016 or later), and satisfy the Advanced Writing Requirement (p. 454).

**Flex-Time Day JD Program**

This program is designed for a limited number of students who, because of work or family commitments, cannot attend either the full-time day or part-time evening program. Students admitted to this program must meet with the associate dean for academic affairs to arrange an appropriate schedule.

**Summer Session**

One seven-week session is offered each summer. Summer courses are taught in the late afternoon or evening and are open to all students. Under some circumstances, a full-time or part-time student may accelerate graduation by attending summer sessions.

**Part-Time Juris Doctor Program of Study**

² Experiential Learning Requirement (applicable to students matriculating Fall 2016 or later): Each student also must satisfactorily complete “one or more experiential course(s) totaling at least 6 credits,” as provided by current ABA Standard 303(a)(3) and related provisions. Certain courses are always designated as “experiential courses” that will satisfy the requirement. They are: all law clinics except Advanced Clinic; all externships including Field Placement II; Introduction to Representing Clients; Negotiation; Trial Practice and Advanced Trial Practice. Other courses that may satisfy this requirement, depending on the design choices that the particular professor makes, include: Advanced Family Law II: Courtroom Advocacy, Advanced Juvenile Law: Delinquency Proceedings, Alternative Dispute Resolution, Bankruptcy Lab, Commercial Transactions Workshop, Estate Planning and Drafting, Financial Planning: Principles and Taxation, Judicial Clerkship Seminar, Land Use Practicum, Representation in Mediation, and Visual Persuasion in the Law. (This list is subject to revision; each semester the registrar will designate which courses taught the following semester will satisfy the requirement.) Any paper(s) written in connection with a course or courses used to satisfy the Experiential Learning Requirement may be used to satisfy no more than three of the four papers required to satisfy the Advanced Writing Requirement.

³ Taking at least one summer course over the course of study will be necessary to reach the required 86 credits needed for graduation by the end of your fourth year.

I. Introduction

The School of Law has organized its institutional learning outcomes into two general categories: “first tier” learning outcomes and “second tier” learning outcomes.

- **First Tier Learning Outcomes** are outcomes that all students should achieve by graduation, regardless of the practice area(s) in which they expect to focus in post-law school employment.

- **Second Tier Learning Outcomes** are tailored to particular areas of the law in which students plan to focus in post-law school employment. For that reason, the law school does not expect that all students will achieve all of these second tier outcomes.

Students who have not yet settled upon a particular focus for post-law school employment should achieve at least the first tier learning outcomes, and they should also aspire to achieve those second tier learning outcomes that relate to their likely future practice focuses.

II. First Tier Learning Outcomes

Outcome 1: Graduates are expected to demonstrate competency in legal analysis and reasoning and legal problem solving.

**Specific Criteria**

Graduates are expected to demonstrate competency in the following:

1. Reading cases, statutes and regulations effectively to glean rules and—if in play—the developmental history and policies underlying the rules.

2. Recognizing issues and possible rules implicated in new and unfamiliar factual situations.

3. Applying applicable rules effectively to understand potential arguments and counter-arguments in new and unfamiliar factual situations.

4. Assessing what additional facts may need to be gathered for appropriate analysis of a legal issue.

5. Assessing the relative strength of arguments and predicting likely outcomes effectively for legal issues.

---

¹ Part-time students must take two core electives by the end of the second year. Fewer core elective credits in the second year can be taken if one or more core electives in the summer between the first and second years have been completed.

Core electives are:

- LAWS 114 - Administrative Law - 3 credits.
- LAWS 205 - Business Organizations - 4 credits.
- LAWS 305 - Federal Income Tax - 4 credits.
- LAWS 307 - Trusts & Estates - 3 credits.
- LAWS 311 - Evidence - 3 credits.
- LAWS 323 - Commercial Law - 4 credits.

Students must take a total of four core electives. One of the four must be Federal Income Tax or Commercial Law.
Graduates are expected to demonstrate the following:
1. Knowledge and understanding of the professional rules and the ability to recognize and resolve ethical dilemmas in a range of practice settings.
2. Knowledge and understanding of the attorney’s ethical obligation to represent clients diligently and competently.
3. Knowledge and understanding of the attorney’s ethical obligation to recognize and resolve ethical dilemmas in a range of practice settings.
4. Knowledge and understanding of the attorney’s ethical obligation to behave in accordance with the rules governing confidentiality and conflicts of interest.
5. Knowledge and understanding of the attorney’s ethical obligation to strive to promote justice (including access to justice) and fairness and to assist the profession in providing legal services to those who cannot afford to pay for them.
6. Analyzing applicable rules and facts to formulate and evaluate potential solutions to legal problems.

Outcome 2: Graduates are expected to demonstrate knowledge and understanding of legal theory, systems and doctrine, including core areas of substantive and procedural law and alternative methods for resolving disputes.

Specific Criteria
Graduates are expected to demonstrate knowledge and understanding of the following:
1. The American federal and state legal systems, including their structures of rule-making and governance and their historical background.
2. Core doctrine and theory in “foundation” areas, including those that will be tested on the bar examination.
3. The range of dispute resolution processes and the ability to advise clients and others on choices of process/forum.
4. Appellate review standards and practices.
5. The impact of law and legal rules on society and its various subgroups.

Outcome 3: Graduates are expected to demonstrate competency in oral and written communication in the legal context.

Specific Criteria
Graduates are expected to demonstrate the following:
1. Competency in cogently communicating analysis and advice orally in a range of settings and contexts.
2. Competency in listening effectively to clients and others.
3. Competency in cogently communicating analysis and advice in writing across a range of types of writings (e.g., memos, briefs and client letters).
4. At least a basic understanding of principles of logic and rhetoric.
5. At least novice-level understanding of and competency in a spectrum of advocacy skills.

Outcome 4: Graduates are expected to demonstrate competency in legal research and understanding of the factual research needed to solve legal problems.

Specific Criteria
Graduates are expected to demonstrate the following:
1. Competency in legal research, including effective use of technology for that research.
2. Understanding of factual investigation, including an understanding of effective strategies and practices for gathering the facts needed to evaluate legal issues or problems.

Outcome 5: Graduates are expected to demonstrate knowledge and understanding of the attorney’s professional and ethical responsibilities to clients and the legal system.

Specific Criteria
Graduates are expected to demonstrate the following:
1. Knowledge and understanding of the professional rules and the ability to recognize and resolve ethical dilemmas in a range of practice settings.
2. Knowledge and understanding of the attorney’s ethical obligation to represent clients diligently and competently.
3. Knowledge and understanding of the attorney’s ethical obligation to behave professionally and civilly.
4. Knowledge and understanding of of substantive and procedural law and alternative methods for resolving disputes.
5. Knowledge and understanding of the attorney’s professional and ethical responsibilities to clients and the legal system.

Outcome 6: Graduates are expected to demonstrate at least novice-level competency in other professional skills needed for competent, effective and ethical participation as a member of the legal profession.

Specific Criteria
Graduates are expected to demonstrate the following:
1. At least novice-level understanding of and competency in approaches for managing conflict for effective problem solving.
2. At least novice-level competency in collaborative work approaches.
3. At least novice-level understanding of and competency in effective approaches for client interviewing and counseling.
4. At least novice-level understanding of and competency in effective negotiation practices.
5. At least novice-level understanding of and competency in “learning how to learn” (techniques for finding guidance for unfamiliar tasks).
6. Competency in interviewing for employment and planning for long-term career development.

III. Second Tier Learning Outcomes (Approved December 5, 2018)
SECOND TIER LEARNING OUTCOMES
FOR ALL GRADUATES EARNING
CIVIL ADVOCACY AND DISPUTE RESOLUTION
CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/CADR Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management.

Specific Criteria
Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
3. Competency in listening and in communication modes and skills in different settings.
4. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.
5. Competency in giving and receiving feedback.

Second Tier/CADR Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation.
Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of negotiation theory and terminology.
2. Understanding of, and competency in, the use of both cooperative and competitive negotiation strategies.
3. Understanding of the psychology of decision-making.
4. Understanding of the ethical issues in negotiation.
5. Competency in planning for and conducting effective negotiation, both with and without an ongoing relationship between the parties.
6. Competency in conducting negotiation in presence of mediator, by interacting with the mediator effectively.

Second Tier/CADR Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, mediation.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of mediation theory and terminology, including the fundamental principles of mediation and the range of possible mediator approaches.
2. Understanding of the Standards of Conduct for Mediators.
3. Understanding of the current controversies and issues in the use of mediation as a dispute resolution process.
4. Understanding of effectiveness as a consumer of mediation.
5. Competency as an advocate in the mediation context.
6. Competency in participating in a mediation in accordance with the fundamental principles of mediation, including the appropriate use of joint and caucus sessions, and the ability to encourage the creative generation of potential solutions.

Second Tier/CADR Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of the nature of arbitration.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of the rules and regulation of arbitration.
2. Understanding of the contractual issues and framework of arbitration.
3. Understanding of the current controversies and issues in the use of arbitration as a dispute resolution process.
4. Understanding of, and competence in, advocating for clients in arbitration.

Second Tier/CADR Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of the litigation process, and the current issues and controversies in the use of trial as a dispute resolution process.
2. Understanding of the elements of effective advocacy in litigation, including pretrial and trial phases.
3. Understanding of, and competency in, the application of the rules of evidence, including presenting evidence through witness testimony, introduction of documentary evidence, and the making of and defending objections.
4. Understanding of, and competency in, direct and cross examination techniques.
5. Understanding of, and competency in, delivering persuasive argument, including opening and closing arguments.

SECOND TIER LEARNING OUTCOMES
FOR ALL GRADUATES EARNING
CRIMINAL LAW AND ADVOCACY
CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/CLA Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of criminal law and criminal procedure.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of the substantive law of crimes including the construction of criminal statutes, elements of crimes, and defenses to crimes, as well as the concepts of causation, criminal responsibility and capacity, justification and excuse.
2. Understanding of the investigative stage of the criminal justice process including the constitutional limitations on law enforcement—and the means of enforcing those limitations—with respect to arrest, stop and frisk, search and seizure, eavesdropping, wiretapping, identification procedures, and questioning of suspects.
3. Understanding of the adjudicative stage of the criminal justice process including the initial appearance following arrest, the decision to prosecute, the preliminary hearing, bail, indictment, pleas and plea bargaining, the trial, double jeopardy, and the constitutional limitations on the adjudication of criminal matters.
4. Understanding of the role and impact of the criminal justice system in the United States including current debates and controversies relating to criminal justice policies and practices.

Second Tier/CLA Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, pretrial, trial, and sentencing advocacy.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of the pretrial, trial, and sentencing phases of criminal cases.
2. Understanding of the elements of effective advocacy in criminal cases including the pretrial, trial, and sentencing phases.
3. Understanding of, and competency in, the application of the rules of evidence, including presenting evidence through witness testimony, introduction of documentary evidence, and the making of and defending objections.
4. Understanding of, and competency in, direct and cross examination techniques.
5. Understanding of, and competency in, delivering persuasive argument, including opening and closing arguments.
Second Tier/CLA Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict and relationship management.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of negotiation theory and terminology.
2. Understanding of the psychology of decision-making.
3. Understanding of the ethical issues in negotiation and plea bargaining in criminal cases.
4. Competency in planning for and conducting effective negotiations in criminal cases.

SECOND TIER LEARNING OUTCOMES FOR ALL GRADUATES EARNING FAMILY LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term "understanding" to refer to knowledge and the term "competency" to refer to skills. We expect graduates to attain at least a "novice-level" understanding and competence. By "novice-level," we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/CLA Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of negotiation theory and terminology.
2. Understanding of the psychology of decision-making.
3. Understanding of the ethical issues in negotiation and plea bargaining in criminal cases.
4. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.
5. Competency in giving and receiving feedback.

Second Tier/CLA Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy in the family law context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of negotiation and mediation theory and terminology.
2. Understanding of, and competency in, interviewing and counseling family law clients.
4. Competency in listening, and using effective communication skills.
5. Competency in managing relationships with clients, other parties, and with counterparts.

Second Tier/FAMILY Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of doctrine and related topics in family law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of topics in family law such as marriage, divorce, jurisdiction, spousal and child support, property division, and custody and parenting issues.
2. Understanding of the emotional and psychological impact of divorce on family members.
3. Understanding of child development principles and how parental separation and conflict affects child development.
4. Understanding of the dynamics of domestic violence, including child abuse, and the array of criminal and civil responses to it.

Second Tier/FAMILY Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, working with professionals from other disciplines and navigating the ethical aspects of the practice of family law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
2. Understanding of, and competency in, working with mental health professionals, as treating professionals, consultants, witnesses, and expert witnesses.
3. Understanding of, and competency in, working with financial professionals, such as divorce financial planners, business evaluators, and tax advisors.
4. Understanding of, and competency in, the special ethical challenges of serving as an advocate and an advisor for clients in family law, particularly when there are children in the family.
5. Understanding of, and competency in, providing for the physical and emotional safety in the lives of clients.
6. Understanding of, and competency in, educating clients about the need for reducing conflict and enhancing the ability of parents to co-parent children.

Second Tier/FAMILY Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management, managing relationships, and ongoing self-improvement of dispute resolution skills.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in managing relationships with clients, other parties, and with counterparts.
2. Understanding of, and competency in, interviewing and counseling family law clients.
4. Competency in listening, and in using effective communication skills.
5. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.

Second Tier/FAMILY Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation and mediation in the family law context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of negotiation and mediation theory and terminology.
2. Competency in planning for and conducting effective negotiation, especially cooperative strategies for clients with an ongoing relationship.
3. Understanding of the ethical and negotiation principles in Collaborative Practice.
4. Understanding of the psychology of decision-making.
5. Understanding of the ethical issues in negotiation and mediation.
6. Understanding of how to conduct negotiation in the presence of mediator, by preparing clients for mediation and interacting with the mediator effectively.

Second Tier/FAMILY Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy in the family law context.
Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of the major health law statutes including, but not limited to:
   - Medicare
   - Medicaid
   - Patient Protection and Affordable Care Act
   - Health Information and Technology for Economic and Clinical Health Act (HITECH)
   - Emergency Medical Treatment and Active Labor Act (EMTALA)
   - Health Insurance Portability and Accountability Act (HIPAA)
   - The Antitrust Statutes (Sherman Act, Clayton Act, Federal Trade Commission Act, Robinson Patman Act)
   - Fraud and Abuse Statute
   - Ethics in Patient Referrals Act (Stark Act)
2. Understanding of the connection between the legislative process and regulatory agency rule-making.
3. Competency in conducting research and drafting correspondence that interprets statutory and regulatory requirements related to a client’s particular circumstances.
4. Understanding of federal and state regulations affecting labor relations, institutional and professional licensing, not for profit and for profit organizations, and patients’ rights.

Second Tier/HEALTH Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level of understanding of the evolving nature of health care policy and competency in health law practices.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in analyzing the financial, antitrust and patient care-related issues associated with hospital acquisition of physicians’ practices.
2. Understanding of the shift in the focus of patient care from inpatient-centric, sick care to outpatient, technology-centric, preventive well care.
3. Understanding of the key policy questions relating to public health insurance.
4. Understanding of the negative impact on patient care caused by lack of coordination within the United States healthcare system.
5. Understanding of the statutory and historical basis for the peer review process for disciplining physicians.
6. Understanding of the policy and political forces driving a shift away from a fee-for-service payment system to a value-based care payment system.

Second Tier/HEALTH Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level of understanding of, and competency in examining, the connection between health, healthcare, healthcare inequities and social determinants of health.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in describing and analyzing the connection between the practice of medicine, the practice of health law, and the impact of law on medicine.
2. Understanding of, and competency in, examining and discussing the question of whether or not there is a “right” to health care for both citizens and immigrants.
3. Competency in analyzing and discussing the connection between the formation of the doctor-patient relationship and medical malpractice.
4. Understanding of the tension between the ethical expectations and the legal obligations of physicians.
5. Competency in analyzing the police powers of the states to restrict private autonomy in the name of public health promotion and protection.
6. Understanding that shifting legislative priorities in response to political changes have resulted in creation of new health-related rights.

SECOND TIER LEARNING OUTCOMES
FOR ALL GRADUATES EARNING
INTERNATIONAL LAW
CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/IL Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, using the foundational international law sources.

Specific Criteria

Concentration graduates are expected to demonstrate competency in the following:
1. Competency in reading and understanding treaties, other dual nation and multilateral accords, international customs, generally recognized principles of international law, and international judicial decisions and juristic writings.
2. Competency in recognizing issues and possible rules implicated in new and unfamiliar factual situations in the international context.
3. Competency in applying applicable rules effectively to understand potential arguments and counter arguments in new and unfamiliar factual situations in the international context.
4. Competency in analyzing applicable rules and facts to formulate and evaluate potential solutions to legal problems in the international context.

Second Tier/IL Learning Outcome 2: Concentration graduates are expected to demonstrate at least novice-level understating of, and competency in, oral and written communication and advocacy in the international legal context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in cogently communicating analysis and advice orally in a range of settings in the international context.
2. Competency in cogently communicating analysis and advice in written form in a range of settings in the international context.
3. Competency in listening effectively to clients and others in the international context.
4. Understanding of, and competency in, use of the principles of logic and rhetoric as they apply in the international context.
5. Understanding of, and competency in, use of a spectrum of advocacy skills as they apply in the international context.

Second Tier/IL Learning Outcome 3: Concentration graduates are expected to demonstrate at least novice-level competency in legal research and understanding of the factual research needed to solve legal problems in the international context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in legal research, including effective use of technology for that research, in the international context.
2. Understanding of, and competency in, factual investigation, including an understanding of effective strategies and practices for gathering the facts needed to evaluate legal issues or problems in the international context.

Second Tier/IL Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of the attorney’s professional and ethical responsibilities to clients and the legal system in the international context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of the ethical implications of differing political systems.
2. Understanding of the ethical implications of differing legal systems.
3. Understanding of the ethical implications of differing levels of economic development.

SECOND TIER LEARNING OUTCOMES
FOR ALL GRADUATES EARNING
INTELLECTUAL PROPERTY
CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/IP Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, the substantive and procedural law of intellectual property, and legal analysis, reasoning and legal problem solving in the context of intellectual property.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of the law of patents, trademarks, copyrights, and trade secrets.
2. Competency in reading cases, statutes, and regulations effectively to glean rules, and understand the developmental history and policies underlying the rules in the context of IP matters.
3. Competency in analyzing applicable rules and facts to formulate and evaluate potential solutions to clients’ IP problems.
4. Understanding of the structures of rule-making and governance and their historical background with respect to patents, trademarks, copyrights and trade secrets.

Second Tier/IP Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level competency in oral and
written communication in the legal context as relates to intellectual property matters.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in listening effectively to clients and others in order to understand and address clients’ IP matters.
2. Understanding of, and competency in, a spectrum of oral and written advocacy skills on behalf of IP clients.
3. Competency in listening and in oral and written communication modes.

Second Tier/IP Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, factual and legal research in intellectual property matters.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in IP legal research, including effective use of specialized resources for IP matters.
2. Understanding of, and competency in, effective strategies and practices for gathering the facts needed to evaluate legal issues relating to IP matters.

Second Tier/IP Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict and relationship management and dispute resolution skills in the context of intellectual property matters.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
3. Competency in advising clients on choices of process/forum in the context of the specific IP problem.
4. Understanding of, and competency in, the use of both cooperative and competitive negotiation strategies as a means to resolve IP disputes.

Second Tier/IP Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy in the intellectual property context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, the litigation process in validity and enforcement proceedings in one or more of trademark, copyright, or patent matters.
2. Understanding of the current issues and controversies in the use of trial as a dispute resolution process in the context of patent, trademark, and copyright validity and enforceability matters.

SECOND TIER LEARNING OUTCOMES FOR ALL GRADUATES EARNING TAX CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/TAX Learning Outcome 1: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, reading and engaging with the sources of tax law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in reading and comprehending case law related to tax law.
2. Competency in reading and comprehending the Internal Revenue Code and Regulations.
3. Competency in reading and comprehending various other sources of tax law, such as Private Letter Rulings and other administrative pronouncements, legislative histories, tax treaties, and major secondary sources/compilations of tax law.
4. Understanding of the relative importance, and legal weight of authority, of these various sources of tax law.
5. Understanding of major administrative procedures related to the enactment and enforcement of tax law.

Second Tier/TAX Learning Outcome 2: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, applying tax law to specific problems faced by tax clients.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Competency in identifying relevant facts presented by a client and identifying the tax principles implicated by those facts.
2. Competency in determining which provisions of the Internal Revenue Code are relevant to a given factual situation.
3. Competency in assessing the likely tax implications of actions of a client.
4. Competency in communicating analysis and advice regarding tax matters, both orally and in writing.

Second Tier/TAX Learning Outcome 3: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, engaging in in-depth study of specific issues in tax law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of tax law, policy, and procedure.
2. Competency in tax research.
3. Competency in written analysis of issues in tax law.
understanding and competence. By “novice-level” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/WP Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of the legal theory, systems, and doctrine in the law involving the workplace.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
2. Understanding of administrative law and procedures, and the role of administrative agencies in the investigative stage of employment discrimination matters.
3. Understanding of the federal and state laws and regulations governing labor law.
4. Understanding of the role and impact of employment and labor law in the United States including current debates and controversies relating to workplace policies and practices.

Second Tier/WP Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management, and managing relationships in the workplace law context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
2. Competency in interviewing and counseling clients in workplace cases.
4. Competency in listening and in communication modes and skills in different settings in the workplace law context.

Second Tier/WP Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation, arbitration, and litigation in the workplace context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:
1. Understanding of negotiation theory and terminology.
2. Understanding of the role and practice of arbitration in the labor and employment context.
3. Understanding of the ethical issues in employment negotiation, labor bargaining, arbitration, and trial practice.
4. Competency in planning for and conducting effective negotiations in labor and employment cases, both with and without a mediator.
5. Understanding of how to plan for and conduct effective arbitrations in labor and employment cases.
6. Understanding of how to plan for and conduct effective litigation in labor and employment cases.

Dual-Degree JD/MBA

In today's changing and competitive marketplace, there is an increasing need for lawyers who are fully trained in all aspects of business, management and administration. Students who are seeking a comprehensive and sophisticated business education for their legal or business careers will find the Dual-Degree JD/MBA program extremely attractive.

Taken separately, the MBA normally requires 46 credits, and the JD normally requires 86 credits. However, the dual-degree program requires only 34 business credits and 77 law credits, a savings of 21 credits.

Students may apply for acceptance to both the Law School and the MBA program and, upon completion of both programs, receive a business and a law degree. A student in the dual-degree program may not obtain either degree until the requirements for both have been met.

To enroll in the dual-degree program, a student must apply to and be accepted by both of the schools. Students may begin at either school. Each school assists in adapting the program to the needs and interests of the enrolled student by approving schedules and joint credits for courses. Students may apply to both schools before they actually begin classes. Students must file separate applications and take the Law School Admission Test (LSAT). Students who begin a single degree program either in the School of Law or the School of Business may apply to the other school at a later time (prior to the completion of degree requirements) to be considered for the dual-degree program.

Upon admission to the dual-degree program, the enrolled student must meet with the director of the MBA program and the associate dean for academic affairs of the Law School for academic counseling. Students may attend either full-time or part-time.

Dual-Degree JD/MELP

Quinnipiac School of Law has partnered with Vermont Law School to offer students the exciting opportunity to earn a Dual-Degree Juris Doctor/Master of Environmental Law and Policy (JD/MELP). Students in the program earn their JD from Quinnipiac and their MELP from Vermont Law. The program can be completed in three academic years, the same amount of time typically needed to earn the JD degree alone.

This flexible program allows students to pursue their MELP course work online or on campus during the summer. Students also complete a required MELP externship during the summer, which can be scheduled anywhere in the United States or abroad. A number of Quinnipiac law courses have been approved to satisfy the requirements of both programs. In addition, students will be allowed to transfer 6 credits of their Vermont Law MELP course work toward their Quinnipiac JD graduation requirements.

The joint degree requires a 30-credit program (including required courses), comprising: Vermont Law MELP courses (14 credits); Vermont Law MELP externship (7 credits); and Quinnipiac Law courses (from approved course list) (up to 9 credits). Students will participate in the externship during their 2L summer.

Dual-Degree JD/MSW

Students interested in earning both a JD degree and a Master of Social Work degree may earn both degrees on an accelerated basis by enrolling in the Dual-Degree JD/MSW program.

The two degree programs, if completed separately, require 146 credits – 86 for the JD and 60 for the MSW. Students in the dual-degree program are required to complete only 131 total credits. Dual-degree students earn 1) their JD with 77 law credits and 9 social work credits (from courses approved in advance by the law school associate dean for academic affairs); and 2) their MSW with 54 social work credits and 6 law credits.
Civil Advocacy and Dispute Resolution

Students who earn the certificate for this concentration develop an understanding of a variety of advocacy methods, dispute resolution tools, and remedies, in an array of civil law contexts. Skill development focuses on litigation, negotiation, mediation, and arbitration.

The civil advocacy and dispute resolution concentration lets you explore all the varied ways that lawyers help clients solve problems and resolve conflicts. You will hone your skills as a creative negotiator, as a wise adviser and as an effective courtroom litigator. You’ll learn the theory and the practice of the different alternative methods to resolve disputes, make deals and reach settlements outside of court, such as mediation and arbitration. Most important, you can help us achieve our vision: to reimagine the law as a healing profession.

Our dispute resolution program was ranked 14th in the nation by U.S. News & World Report. Our Center on Dispute Resolution — with its Quinnipiac/Yale Workshop Speaker Series, training sessions and student-run Society for Dispute Resolution — are all valuable resources that are at your disposal. The center’s programs offer you the opportunity to learn and train with practicing professionals in the field. The highly decorated student competition teams provide you the stage to hone your advocacy skills through regional and national mock trial, moot court, negotiation, mediation and client counseling competitions.

After two semesters, you’ll have the opportunity to practice what you are learning in the classroom in one of our legal clinics and in our diverse externship program. As a certified legal intern, you can counsel actual clients, negotiate, mediate cases and argue in courts.

For specific information on the program offerings, please contact:

Civil Advocacy and Dispute Resolution Concentration

Prerequisites
To be eligible for the Civil Advocacy and Dispute Resolution concentration, you must take LAWS 311 as one of your core electives. Credits for this course do not count toward the 21-credit concentration requirement, but the grade in this prerequisite does count toward the concentration GPA requirement.

Requirements

1. Coursework
   To receive the certificate for this concentration, you must earn 21 civil advocacy and dispute resolution specialty credits, divided as follows (not all courses are offered every year):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAWS 315</td>
<td>Trial Practice</td>
<td>2-3</td>

<td>Negotiation</td>
<td>2-3</td>
</tr>
<tr>
<td>LAWS 515</td>
<td>Alternative Dispute Resolution (*)</td>
<td>2-3</td>
</tr>
</tbody>
</table>

   (*) In lieu of ADR, students may substitute LAWS 374 Introduction to Mediation.

Remaining Credits
   The balance of the credits are to be earned from the following advocacy and dispute resolution-related courses. Courses marked with an asterisk (*) are particularly recommended for this concentration. (Not all of these courses are offered every year.)

<table>

Criminal Law and Advocacy

Students who earn the certificate for this concentration encounter a variety of experiences to help develop an understanding of criminal law. They explore both the substantive criminal law as well as the constitutional overlay of criminal procedure. In addition, they experience aspects of criminal trial and motion work. Development focuses on advocacy skills: litigation, negotiation and other alternate dispute resolution methods that apply in a criminal context.

You'll develop cutting-edge trial skills, such as the innovative use of visual persuasion techniques in the courtroom, and you'll examine ethical issues unique to criminal practice settings. You'll experience the criminal justice system in action in our clinics and externships, which will refine your ability to engage in both prosecution and defense work. You can advocate for real clients at the trial or appellate levels, represent the government, or help judges in criminal cases. You also can work on national criminal justice reform projects, such as advocating for more humane treatment of children charged with crimes, or challenging the death penalty.

Your negotiation and litigation skills will be honed through participation in mock trials and courtroom simulations, and every year we host the Northeast Regional Criminal Justice Trial Advocacy Competition. Our active Criminal Law Society sponsors several networking events and activities focused on helping you connect with legal professionals.

For specific information on the program offerings, please contact:

Professor Sarah French Russell
Director, Criminal Law and Advocacy Concentration
275 Mount Carmel Avenue, Hamden, CT 06518

Criminal Law and Advocacy Concentration

Prerequisite

To be eligible for the Criminal Law and Advocacy Concentration, you must take Evidence (LAWS 311) as one of your core electives. Credits for this course do not count toward the 21-credit concentration requirement, but the grade in this prerequisite does count toward the concentration GPA requirement in determining whether or not the certificate is awarded with honors. All students must also successfully complete the required course of Criminal Law (LAWS 113).

Requirements

1. Coursework

To receive the certificate for this concentration, you must earn 21 Criminal Law and Advocacy specialty credits, divided as follows (not all courses are offered every year):

Clinical Requirement:

You must earn at least 3 credits through participation in the following programs. No more than 6 clinical credits count toward the 21-credit requirement for the concentration, except with the permission of the concentration director. The credit allotted to coursework in conjunction with a clinic counts as a course credit, not as a clinical credit.

Code Title Credits
Defense Appellate Clinic (LAWS 299 & LAWS 300) 6
An externship placement at a site dedicated to criminal defense or prosecution 3-6
A judicial externship placement in a court at which the director can certify has a significant criminal docket.

**Required Coursework:**
In addition to LAWS 311 (credits for which do not count toward the 21-credit requirement), you must take the following courses. Credits for these courses will count toward your 21-credit concentration requirement.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

1. Alternate Dispute Resolution interscholastic competitions (but not intramural) may count if the concentration director finds there is a substantial criminal law and/or criminal procedure component. The participation must be connected to the legal questions in roles such as advocate, problem draver, etc. The efforts of organizers, coaches, schedulers, while extremely important, are not eligible for credit. (1, 2, or 3 credits)

2. Mock trial interscholastic competitions (but not intramural) may count if the concentration director finds there is a substantial criminal law and/or criminal procedure component. The participation must be connected to the legal questions in roles such as litigator, problem draver, etc. The efforts of organizers, coaches, schedulers, while extremely important, are not eligible for credit. Participation in the legal aspects – i.e., litigator, problem draver – of the Quinnipiac University School of Law Criminal Trial Advocacy Competition will count. (1, 2, or 3 credits)

3. Moot Court interscholastic competitions (but not intramural) may count if the concentration director finds there is a substantial criminal law and/or criminal procedure component. The participation must be connected to the legal questions in roles such as litigator, problem draver, etc. The efforts of organizers, coaches, schedulers, while extremely important, are not eligible for credit. (1, 2, or 3 credits)

### 2. Writing Requirement
You must write a substantial paper (or a series of shorter writings that, taken together, comprise a substantial amount of written work) on a topic or topics related to Criminal Law or Procedure. (If you write a substantial paper, you may use that paper to satisfy the law school's Advanced Writing Requirement, as set forth in the Academic Regulations (p. 454), section I.D., as well as the Criminal Law and Advocacy certification program.) A paper written for a journal may qualify if the concentration director approves the topic. A brief written for a moot court competition or within an externship position may qualify if the student can attest that the work was his or her own. The concentration director must approve the topic and the format for the written work used to satisfy this requirement. Note: It is possible for completed work to count for more than one concentration if there is sufficient coverage of both subject matters.

### 3. Honors
Students who achieve a GPA of 3.2 or better in the coursework used for the concentration will receive certificate for the concentration with honors.

### 4. Options
If you have excess credits, you may designate any course or paper as not counting toward the concentration, so long as it is not required for the concentration, and you meet the concentration requirements with another course. If you have more than 21 credits, the concentration director will count the courses with the highest grades in determining whether or not to bestow the honors designation. Note that the GPA calculation includes all courses required for the concentration, including LAWS 311 — Evidence.

### 5. Waiver
The concentration director and the associate dean for academic affairs may waive any requirement for the concentration (other than the GPA requirement), if both agree to do so. Any waiver requests must be submitted in writing with the application for the concentration.

**Family Law**

The family law concentration uses an innovative, interprofessional approach that gives you an opportunity to collaborate with other professionals — such as social workers — to develop creative solutions to potentially volatile cases. Because litigation is rarely the most appropriate course of action for families, you'll learn alternative methods of dispute resolution, including mediation and other negotiation and
collaborative approaches that promote the abilities of families to thrive and communicate peacefully, well after the legal case has ended.

Quinnipiac’s extensive clinic and externship courses let you go out in the field and serve family law clients while honing your skills. Our Family and Juvenile Law Society is a valuable resource for career development events and networking opportunities with lawyers in the field. And our nationally recognized Center on Dispute Resolution hosts a variety of symposia, professional workshops and special training sessions aimed at building sophisticated problem-solving skills that are particularly key in the practice of family law.

For specific information on the program offerings, please contact:

Professor Carolyn Wilkes Kaas
Director of Experiential Education
Director, Family Law Concentration
Quinnipiac University School of Law
275 Mount Carmel Avenue, Hamden, CT 06518
Phone: 203-582-3234
Fax: 203-582-3237
Email: carolyn.kaas@qu.edu (carolyn.kaas@quinnipiac.edu)

**Family Law Concentration**

**Prerequisites**

To be eligible for the Family Law Concentration, a student must take both LAWS 311 and LAWS 305 as two of the core electives. Credits for these courses do not count toward the 18-credit concentration requirement, but grades in these prerequisites do count toward the concentration GPA requirement.

**Requirements**

To receive the certificate for this concentration, a student must earn 18 family law credits, divided as follows (not all courses are offered every year):

1. **Course Work**
   **Required Course Work**

   In addition to LAWS 311 and LAWS 305 (credits for which do not count toward the 18-credit concentration requirement) a student must take the following courses. Credits for these courses will count toward the 18-credit concentration requirement:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAWS 370</td>
<td>Family Law</td>
<td>3</td>
</tr>

</tr>
</tbody>
</table>

   Other courses or journal work as approved by the concentration director in consultation with the course instructor.

   **Clinical Requirement**

   At least 3, but no more than 3, of the 18 family law credits must be earned in the Civil Justice Clinic and/or in a family and/or juvenile law-related externship placement. Credits for IRC do not count toward the clinical requirement. (A student may exceed 3 credits for the clinical course but may only count 3 credits toward the clinical requirement of this concentration.)

   1. The concentration director will determine the family-law status of any given clinic or externship.
b. The clinical requirement may be waived if the student has substantial family or juvenile law work experience. The concentration director will make this determination.

c. If the clinical requirement is waived, the student must still earn 18 credits elsewhere within the concentration to receive the concentration.

3. Writing Requirement
A student must write a substantial paper – or a series of shorter writings that together comprise a substantial amount of written work – on a topic or topics related to family or juvenile law. (If a student writes a substantial paper, it may be used to satisfy the Advanced Writing Requirement, provided that the guidelines are met as set forth in the Academic Regulations (p. 454, section I.D.) The concentration director must approve the topic or topics for the written work used to satisfy this requirement. A paper written for a journal may qualify, if the concentration director approves the topic.

4. Honors
Students who achieve a GPA of 3.2 or better in the course work used for the concentration will receive the certificate for the concentration with honors.

5. Options
A student may designate any course or paper as not counting toward the concentration, so long as it is not required for the concentration, and the student meets the concentration requirements with another course or paper.

6. Waiver
The concentration director and the associate dean for academic affairs may waive any requirements for the concentration (other than the GPA requirement), if they both agree to do so.

Health Law

This concentration offers a comprehensive foundation in the areas in which health law intersects with business, public policy and a variety of federal regulations concerning the pharmaceutical and biomedical industries.

You’ll examine key topics such as bioethics, public health law, health care fraud and disability law, and you’ll explore methods of dispute resolution used specifically in health care. We also give you the flexibility to chart your own path through the program and select courses that most interest you and that provide the skills to assist the type of clientele you plan to represent.

Because the School of Law shares a campus with our medical, nursing and health sciences schools, you’ll also have opportunities for interprofessional collaboration and access to a wide range of research materials related to the health care industry. Starting in your second year, you can participate in our diverse clinic and externship courses, and be part of our medical-legal partnership, or our Health Law Externship, where you may be placed with the Department of Public Health, a hospital or pharmaceutical legal department, or a law firm practicing health law. And you may apply to write for Quinnipiac’s Health Law Journal, join the Health Law Society and attend our speaker series that invites prominent figures from the health law field to campus.

For specific information on the concentration offerings, please contact:
Professor Leonard Dwarica

Quinnipiac University School of Law
275 Mount Carmel Avenue
Hamden, CT 06518

Health Law Concentration Requirements
(effective for students entering their second year in Fall 2018 or later):

To be eligible for the Health Law Concentration Certificate, a student must complete 21 credits as described below.

- Students must take Administrative Law (LAWS 114) (3 credits) and either Business Planning (LAWS 393) (4 credits) or Business Organizations (LAWS 205) (4 credits) as two of the core electives. Credits for these courses will not count toward the 21-credit concentration requirement, but grades will count toward the GPA honors requirement.
- In addition, students must take Health Law LAWS 345 (3 credits). Credits for Health Law will count toward the 21-credit concentration requirement and grades will count toward the GPA honors requirement. Health Law is a prerequisite for Advanced Health Law (LAWS 544).
- These three courses do not have to be taken prior to taking other courses in the concentration, but it is strongly recommended that Administrative Law and Health Law be taken in a student’s second year, if possible.

1. Coursework
In addition to the above requirements, to receive the Certificate for this Concentration, a student must earn 18 health law specialty credits, divided as follows:

Core Health Law Courses:
At least 12 credits must be earned from the Core Health Law courses. (Not all of these courses are offered every year.)

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Non-Core Health Law Courses:
The balance of the credits (to 21), if any, may be earned from the Core Health Law courses above or from the following Non-Core Health Law courses. (Not all of these courses are offered every year.)
2. Recommended Client-Based Courses

Students should consider what group(s) of clients they plan to represent in their practice of health law. The following recommendations are intended to assist the students in determining which courses are best suited toward different types of clients. These are only recommendations. Students are free to choose any courses they wish, as long as they take the required concentration courses and achieve the required 21 credits, as described above.

1. Online course.

3. Clinical Requirement

Students must earn at least 3 credits (not including IRC) in Clinic (i.e., Civil Justice Clinic, Tax Clinic, Prosecution Appellate Clinic, Defense Appellate Clinic) and/or in a health law externship.

a. Determination of the “health law” status of any given externship will be made by the concentration director and the director of field placement programs.

b. The clinic/externship requirement will be waived only in rare circumstances, and only if the student has substantial health law-related work experience or substantial experience in the health care field. This determination will be made by the concentration director. *A student seeking a waiver from the clinic/externship requirement must apply for the waiver no later than the beginning of the second semester of his/her second year.*

c. If the clinical requirement is waived, the student must earn the 3 credits by taking additional courses in the concentration.
Any credits earned in such courses will apply to the GPA honors requirement.

4. Writing Requirement
The substantial paper written to fulfill the Advanced Writing Requirement (p. 454) must be on an approved health law topic. The topic must be approved, in advance, by the concentration director unless the paper is written in connection with one of the listed “core” courses or for the Quinnipiac Health Law Journal. A paper written for another journal may qualify, if the topic is approved, in advance, by the concentration director.

5. Honors
Students who achieve a GPA of 3.2 or better in the coursework used for the concentration will receive the certificate for the concentration with honors. Grades from all health law courses will be included in the GPA calculation.

6. Waiver of Requirements
The concentration director and the associate dean for academic affairs may waive any requirements for the concentration (other than the GPA requirement), if they both agree to do so.

**Intellectual Property**

Students in our intellectual property concentration investigate key issues related to patents, trademarks, copyrighting and trade secrets.

These students develop a firm grounding in a variety of fields that intellectual property law affects by exploring topics such as computer and Internet law, patent litigation, sports law and cybersecurity law. They also can participate in an externship within a law firm or corporate legal department to gain practical experience regarding the types of intellectual property work that lawyers do, and to gain insight in regard to protecting the creativity of artists, musicians and inventors.

Students in the IP concentration also can utilize externships to gain exposure to Connecticut’s extensive base of biomedical, aerospace and entertainment industries, which are fertile sectors for lawyers who specialize in IP law. Through such an externship opportunity, the student can learn IP law in a hands-on manner, while contributing to social needs at the intersection of law, the arts and technology.

**Intellectual Property Concentration**

**Prerequisite**
To be eligible for the Intellectual Property Concentration, a student must take Administrative Law (LAWS 114) as one of the core electives. Credit for that course does not count toward the 18-credit concentration requirement.

**Requirements:**

1. **Course Work**
To receive the certificate for this concentration, a student must earn 18 intellectual property specialty credits, divided as follows (not all courses are offered every year):

**Required Course Work**
At least 15 of the 18 credits must be earned from the following list of basic intellectual property courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAWS331</td>
<td>Intellectual Property</td>
<td>3-4</td>
</tr>
</tbody>
</table>

</tbody>
</table>

Other course or journal work as approved by the concentration director

IP-related courses taken at other law schools or in summer programs (with approval of the concentration director) up to 5

2. **Writing Requirement**
Students must write a substantial paper—or a series of shorter writings that together comprise the equivalent of a substantial paper—on a topic or topics related to intellectual property. (If a student writes a substantial paper, a student may use that paper to satisfy the Advanced Writing Requirement, provided that the paper meets the guidelines set forth in the
Academic Regulations (p. 454), section I.D.) The concentration director must approve the topic or topics for the written work used to satisfy this requirement. A paper written for a journal may qualify if the concentration director approves the topic and the paper as written.

3. Honors
Students who achieve a GPA of 3.2 or better in the coursework used for the concentration will receive the certificate for the concentration with honors.

4. Opt-out Option
A student may designate any course or paper as not counting toward the concentration, so long as it is not required for the concentration, and the student meets the concentration requirements with another course or paper.

5. Waiver
The concentration director and the associate dean for academic affairs may waive any requirements for the concentration (other than the GPA requirement for honors), if they both agree to do so.

International Law and Policy

Students who earn the certificate for this concentration not only develop an understanding of one or more of the major areas of International Law and Policy, such as International Human Rights, Dispute Resolution, Environmental, Health, Tax, and Criminal Law, but also get the opportunity to develop a literacy in the language of international relations, which can prepare them to advocate, negotiate, mediate, and litigate globally as well as locally. Skill development focuses on cross-cultural understanding, negotiation, and a general proficiency in law on an international stage. As outlined below, the requisites for the International Law and Policy Concentration include course work, an international experience, and a writing component.

For specific information on the program offerings, please contact:
Professor John Thomas
Professor Charles Pillsbury
Co-Directors, International Law and Policy Concentration
Quinnipiac University School of Law
275 Mount Carmel Avenue, Hamden, CT 06518

Other university courses
You may apply toward the 18 credits you need to earn for the International Law and Policy Concentration up to 6 credits earned in other Quinnipiac University departments. You must obtain the permission of the professor teaching the course, a concentration co-director, and the law school’s associate dean for academic affairs before enrolling in these courses.

Modern Languages
You may apply up to 6 credits of modern language study toward your concentration requirements.

2. International Experience Requirement
Concentration earners must also complete one of these international experiences:

- Participation in the World Summit of Nobel Peace Laureates, in conjunction with the International Human Rights Law and Transitional Justice course
- Participation in the Law School’s delegation to the Oxford University Human Rights and Humanitarian Action Seminar

International Law and Policy

Certificate recipients must earn 18 international law credits from the following courses (not all courses are offered every year), including at least 11 credits from the following required and core courses.

<table>

Modern Languages
You may apply up to 6 credits of modern language study toward your concentration requirements.

2. International Experience Requirement
Concentration earners must also complete one of these international experiences:

- Participation in the World Summit of Nobel Peace Laureates, in conjunction with the International Human Rights Law and Transitional Justice course
- Participation in the Law School’s delegation to the Oxford University Human Rights and Humanitarian Action Seminar
• Participation in the Law School's delegation to the annual Human Rights and Humanitarian Action Seminar at Yale, Quinnipiac, and the United Nations
• Participation in the Law School/International Human Rights Law Society Nicaragua experience
• Participation in the Law School’s summer program at Trinity College in Dublin, Ireland (the 6 credits from this program apply toward the concentration requirements)
• Domestic or international externship or other experiences approved by both a concentration co-director and the associate dean for academic affairs; if an externship, the placement must also be approved by the externship professor.

3. Writing Requirement
You must complete a paper of a quality that would satisfy the Advanced Writing Requirement (p. 454) and that addresses an international law topic approved by a concentration co-director. A concentration co-director must approve the topic in advance, unless the paper is written in connection with one of the listed required or core courses. A paper written for a journal may qualify if a concentration co-director approves the topic in advance.

4. Honors
Students who achieve a GPA of 3.2 or better in the course work used for the concentration will receive the certificate for the concentration with honors.

5. Options
A student may designate any course or paper as not counting toward the concentration, so long as it is not required for the concentration and the student meets the concentration requirements with another course or paper.

6. Waiver
A concentration co-director and the associate dean for academic affairs may waive any requirements for the concentration (other than the GPA requirement), if they both agree to do so.

Tax Law
Tax attorneys work to ensure that clients understand the tax implications of business and personal transactions, maximizing tax savings in a manner that is ethical and complies with the tax laws. The knowledge you’ll gain and skill sets you’ll develop in our program will make you an invaluable resource, not only to law firms but to government agencies, accounting firms and businesses of all types. You’ll study the structure of the current income tax system and become familiar with statutes, regulations, case law and legislative history, and apply them to tax planning and tax controversies. You’ll also consider the importance of tax policy and ethics.

While studying the nuances of tax law, you can put your skills into practice in our Tax Clinic — the oldest continuously operating clinic of its kind in the country — or through an externship with a judge, tax attorney or the Internal Revenue Service, or by assisting community residents with income tax preparation through our Tax Law Society’s Volunteer Income Tax Assistance program.

For specific information on the program offerings, please contact:

Professor Jeffrey A. Cooper
Associate Dean for Faculty Research and Development
Director, Tax Concentration

Quinnipiac University School of Law
275 Mount Carmel Avenue, Hamden, CT 06518
Phone: 203-582-3731
Fax: 203-582-3244
Email: jeffrey.cooper@qu.edu

Tax Law Concentration Requirements
To receive the certificate for this concentration, you must earn 21 tax law-related credits (consisting of 18 credits in tax coursework and 3 credits of clinical/externship work) and meet all of the other concentration requirements. In addition, you must take Federal Income Tax (LAWS 305) as one of your core electives. Credits for LAWS 305 do not count toward the 21-credit concentration requirement, but the grade in this prerequisite does count toward the GPA requirement for honors.

1. Required Coursework
In addition to Federal Income Tax (LAWS 305) (credits for which do not count toward the 21-credit requirement), you must take at least 18 credits from the following lists of courses, all of which count toward the 21-credit requirement for the concentration.

Tax Courses
At least 12 of the credits used for the concentration must come from the following list of tax courses. (Note: Not all of these courses are offered every year.)

2. Clinical Requirement
At least 3 credits must be earned through participation in the Tax Clinic and/or externship placement approved by the concentration director. No more than 3 credits count toward the 21-credit requirement for the concentration, except with permission of the concentration director in consultation with the director of the clinic or externship. The director of the clinic may waive IRC as a requirement for the Tax Clinic.

If a student does enroll in IRC, credits for it will not count toward the clinical requirement. If a student meets this requirement through an externship placement, the seminar portion of the externship does not count toward the 3 required clinical credits. If a student meets this requirement through the Tax Clinic, 1 credit of the seminar portion of the externship counts toward the 3 required clinical credits.

The concentration director may waive the clinical requirement if the student has substantial tax law work experience. If the concentration director waives the clinical requirement, the student must earn additional credits in tax courses (or any related courses specifically allowed by the concentration director) to qualify for the concentration.

3. Writing Requirement
A student must write a substantial paper – or a series of shorter writings that together comprise a substantial amount of written work – on a topic or topics related to tax. (If a student writes a substantial paper, the student may use that paper to satisfy the law school’s advanced writing requirement, provided that the paper meets the guidelines set forth in the Academic Regulations (p. 454, section I.D.) The concentration director must approve the topic or topics for the written work used to satisfy this requirement. A paper written for a journal may qualify, if the concentration director approves the topic.

4. Honors
Students who achieve a GPA of 3.2 or better in the coursework used for the concentration will receive the certificate for the concentration with honors. A student may designate any course or paper as not counting toward the concentration, so long as it is not specifically required for the concentration, and the student meets the concentration requirements with another course or paper.

5. Waiver
The concentration director and the associate dean for academic affairs may waive any requirements for the concentration (other than the GPA requirement), if they both agree to do so.

Workplace Law

Students who earn the certificate for this concentration develop an understanding of a variety of workplace law principles and remedies, in an array of civil law contexts involving employment law, employment discrimination law, labor law, arbitration, mediation, negotiation and administrative law.

Workplace law is a dynamic and challenging field that affects about 140 million civilian workers and their employers. Specializing in this field opens the door to working with large government agencies such as the U.S. Department of Labor, the Commission on Human Rights and the National Labor Relations Board. You’ll also build the legal foundation you need to represent unions or corporations, or to start a private practice.

A substantial component of workplace law involves settling disputes, and Quinnipiac is uniquely positioned to ensure that you have a competitive advantage in that area. Our Center on Dispute Resolution’s training and its Quinnipiac/Yale Workshop on Dispute Resolution are both valuable assets for our law students. The center holds workshops, sponsors prominent speaking events on campus and offers opportunities to train with lawyers in the field. You can also gain practical experience participating in national and regional mock trial and dispute resolution competitions.

In our Civil Justice Clinic, you’ll have opportunities to represent real clients with cases relating to unemployment and unpaid wages. And in our employment and labor externship program, you’ll perform the work that workplace lawyers do, whether you choose a law firm, a government agency, or work in-house at a corporation. Because this concentration offers a wide variety of courses, you can individualize your experience and focus on a specific area in workplace law that interests you, such as mediation and arbitration, discrimination law or workers’ compensation.

For specific information on the program offerings, please contact:

Professor Emanuel N. Psarakis
Director, Workplace Law Concentration
Quinnipiac University School of Law
275 Mount Carmel Avenue
Hamden, CT 06518

or emanuel.psarakis@qu.edu (emanuel.psarakis@quinnipiac.edu)

Workplace Law Concentration

Requirements

1. Coursework
To receive the certificate for this concentration, you must take Evidence (LAWS 311) and Administrative Law (LAWS 114) as two of your four required core electives, plus 21 credits of workplace law courses as specified below. Credits for Evidence and Administrative Law do not count toward the 21-credit concentration requirement, but the grades in these courses do count toward the concentration GPA requirement. (Note: Not all courses are offered every year).

Required Courses
In addition to Evidence (LAWS 311) and Administrative Law (LAWS 114), you must take the following courses, which will count toward the 21 required credits:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAWS 434</td>
<td>Employment Law</td>
<td>3</td>
</tr>
<tr>
<td>LAWS 426</td>

<td>Labor Law</td>
<td>3</td>
</tr>
<tr>
<td>LAWS 515</td>
<td>Alternative Dispute Resolution or LAWS 42 Negotiation</td>
<td>2-3</td>
</tr>
</tbody>
</table>

Core Courses
In addition to the required courses, you must also take at least two of the following core workplace law courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAWS 314</td>
<td>Employee Benefits</td>
<td>2</td>

</tr>
</tbody>
</table>
the concentration director and the associate dean for academic affairs. Students who fall short of specific credits or coursework needed to satisfy the concentration requirements (other than the GPA requirement) may apply for a waiver of requirements, to be granted at the discretion of the concentration director and the associate dean for academic affairs.

5. Waiver

Students who fall short of specific credits or coursework needed to satisfy the concentration requirements (other than the GPA requirement) may apply for a waiver of requirements, to be granted at the discretion of the concentration director and the student meets the concentration requirements with another course or paper.

Clinical or externship courses in addition to those required below, as approved by the concentration director.

Remaining Credits

The balance of the credits is to be earned from the following courses, if you have not already fulfilled the 21-credit requirement from the courses listed above:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAWS 205</td>
<td>Business Organizations</td>
<td>4</td>
</tr>
<tr>

<td>2</td>
</tr>
</tbody>
</table>

Clinical or externship courses in addition to those required below, as approved by the concentration director.

Other courses or journal work as approved by the concentration director in consultation with the course instructor.

2. Clinical Requirement

At least 3 credits counting toward the 21-credit requirement must be earned in one or more clinic and/or externship placements approved by the concentration director in consultation with the director of the relevant clinic or externship.

3. Writing Requirement

You must complete a substantial paper or a series of shorter writings that together comprise a substantial amount of written work on a topic or topics related to Workplace Law. If you write a substantial paper, you may also use that paper toward your Advanced Writing Requirement. The concentration director must approve the topic or topics for any written work used to satisfy this requirement. A paper written for a journal may qualify if the concentration director approves the topic and the paper meets the guidelines for satisfying the substantial paper portion of the Advanced Writing Requirement (see Academic Regulations (p. 454)).

4. Honors

Students who achieve a GPA of 3.2 or better in the coursework used to satisfy the concentration requirements will receive the concentration with honors. A student may designate the grade in any course or paper as not counting toward the concentration GPA if the course is not required for the concentration and the student meets the concentration requirements with another course or paper.

5. Waiver

Students who fall short of specific credits or coursework needed to satisfy the concentration requirements (other than the GPA requirement) may apply for a waiver of requirements, to be granted at the discretion of the concentration director and the associate dean for academic affairs.

Beginning in the second year, students may further their individual learning and career goals by enrolling in one or more of the many clinics and externship (field placement) courses that are part of the Law School's upper-level curriculum. These courses help students to develop as lawyers by providing them with opportunities to gain practical lawyering experience in real-life settings and encouraging them to reflect on the role of lawyers, as they learn from their work as lawyers-in-training. The ability to enroll in a clinic or externship is guaranteed for every student, although not necessarily in the student's first choice of course or semester. Students must apply and be accepted before registering for a clinic or externship.

To be eligible for these courses, students must have completed 30 credits (including LAWS 111 and LAWS 112, Legal Skills I & II). They also must take any pre- or corequisite courses. Each course has a seminar component (with the exception of some of the advanced clinical courses). Some seminars meet twice weekly, some once weekly, and others once every two weeks. Students earn both in-class (seminar) and out-of-class (casework/fieldwork) credits. Some courses also satisfy part of the Advanced Writing Requirement.

LAWS 599, Introduction to Representing Clients (IRC), a 2-credit simulation course, is a pre- or corequisite for some clinic and externship courses (except for the Appellate Clinic and the Judicial, Legislative and Mediation Externships). IRC is suggested but not required for Civil Justice Clinic and Tax Clinic. IRC is designed to prepare students for individual client representation and work in other practice settings. Students explore the lawyer's role and develop interviewing, counseling and negotiation skills by representing each other in mock cases.

Law Clinics

The Legal Clinic is an in-house law firm run by the School of Law, offering free legal services in a variety of practice areas to low-income people living in the neighboring communities. The law clinic courses that comprise the Legal Clinic (Civil Justice Clinic and Tax Clinic) are one-semester courses that students may take for 4 to 6 credits and are taught by full-time faculty members. Faculty members may invite a small number of Civil Justice Clinic and Tax Clinic students to take a second-semester course called Advanced Clinic. Other law clinics that are not part of the Legal Clinic offer students alternative scheduling and are taught by experienced practitioners serving as clinical faculty. The Defense Appellate Clinic is a year-long course, for a total of 6 credits, in which students brief and argue appeals in criminal cases. Evening Clinic Projects are one-semester courses for 3 or 4 credits and are designed to permit part-time students to perform case work in the evening, although full-time students may enroll as well. In all in-house clinics, students perform most of their work at the law school, under the direct supervision of a member of the clinical faculty, who is the attorney of record for the client(s).

Defense Appellate Clinic
(LAWS 299 & LAWS 300)

Civil Justice Clinic
(LAWS 294)

Evening Clinic: Legal Ethics Project
(LAWS 626)
Externship Courses

In the externship (or field placement) courses, students work off campus under the supervision of experienced lawyers, judges, legislators, policymakers and mediators at established placements in law offices, legal services organizations, public interest advocacy organizations, state agencies, corporate legal departments, and courthouses throughout the state. Faculty members select or approve the sites, place the individual students, oversee the on-site supervision process, and teach the seminar components of the programs, but do not serve as attorneys for placement-site clients. Externships are usually taken for one semester. Some students spend an additional semester in a similar or different placement, in a 1- to 6-credit externship course (Field Placement II).

All first-time externs come together in a joint, mandatory 1-credit graded seminar, which meets approximately every other week for two hours. Legislative Externship is the only course with a separate class.

In addition to the prerequisites listed, students may be required or encouraged to complete additional courses prior to placement. Placement options may depend upon the number of credits the student elects. Judicial externs earn automatic short paper credit; other externs may earn short paper credit with faculty approval.

All fieldwork programs require hours at the placement according to the following schedule:

- 3 credits (2 out-of-class field credits): 10 hours/week; 150 hours/semester
- 4 credits (3 out-of-class field credits): 14 hours/week; 200 hours/semester
- 5 credits (4 out-of-class field credits): 18 hours/week; 250 hours/semester
- 6 credits (5 out-of-class field credits): 22 hours/week; 300 hours/semester

Note: Students may not drop an externship after the placement process has begun without written permission of the instructor (see Academic Regulations, section V.B, Withdrawal from a Course). Once placement has been arranged, students may drop an externship only for good cause.

Externship courses are divided into two categories: those courses organized by type of placement setting and those categorized by type of law practices at the setting.

Externship Courses Based on Type of Placement Setting

Corporate Counsel Externship (LAWS 527)

Judicial Externship (LAWS 296)

Legal Services Externship (LAWS 607)

Legislative Externship (LAWS 464)

Mediation Externship (LAWS 523)

Public Interest Externship (LAWS 520)

Semester in Practice Externship

Externship placements are also available in remote locations, approved by the externship professor and associate dean for academic affairs, as a “Semester in Practice.” Students may earn up to 10 fieldwork credits for the time spent at the placement and must be enrolled in either Externship Seminar or Advanced Externship Seminar, in which the student will participate online (either synchronously or asynchronously) for an additional credit. Students may enroll in the university’s “QU in LA Law” program or may arrange for their own placement in any national or international location (for instance, recent placements have been approved in Cape Town, South Africa), in any subject area or type of placement, with the approval of the externship professor. Semester in Practice externships are most feasible in the third year. Note: Participation in this externship does not change or waive any other graduation requirements, nor does it extend the cap of 10 fieldwork credits that may count toward graduation. Interested students should plan ahead and contact the externship professor far in advance to apply.

Externship Courses Based on Subject Matter

Business Law Externship (LAWS 415)

Criminal Justice Externship (LAWS 404)

Employment Law Externship (LAWS 444)

Environmental Law Externship (LAWS 446)

Family and Juvenile Law Externship (LAWS 521)

Health Law Externship (LAWS 416)

Intellectual Property Externship (LAWS 417)

Sports and Entertainment Law Externship (LAWS 442)

Tax Law Externship (LAWS 443)

Field Placement II (LAWS 200)
Advanced Externship Seminar
(LAWS 579)
LLM IN HEALTH LAW

Admission is limited to graduates of ABA-accredited law schools who possess a strong record of academic achievement and/or of achievement in practice.

LLM candidates are required to complete 24 credits, at least 18 of which are earned in designated health law courses. Of those 18 credits, 3 are in a required advanced research/thesis course that culminates in the writing of a master's thesis of length and quality suitable for law review publication.

Six of the 24 credits may be earned in non-health law courses, subject to the approval of the program director. Students in the LLM program may not take courses that substantially duplicate those completed in their JD program studies. LLM candidates must maintain a 2.80 GPA.
CERTIFICATE IN HEALTH CARE COMPLIANCE

Quinnipiac University, through a program jointly developed by the School of Business and School of Law, is certified by the Health Care Compliance Association to offer the first university-based program in the country to train health care compliance officers. Recognizing the importance of compliance officers in all areas of the health care industry and the need to raise the level of professionalism of those officers, the two schools jointly offer a six-course certificate program in health care compliance. This program can be completed online.

Quinnipiac’s Health Care Compliance Certificate program provides qualified students with a sound academic foundation and the skills to successfully implement the administrative and management principles required to function as competent and knowledgeable health care compliance professionals.

The program covers the following essential topics in the field: the principles and specifics of health care compliance, general management, legal aspects of health care compliance and financial management. Graduate courses in both the School of Business and the School of Law make up the six-course certificate program. Students without a background in law are required to complete HM 668 as a prerequisite for the other law courses in the program.

After completing this program, Quinnipiac University awards a Health Care Compliance Certificate, which makes students eligible to immediately take the HCCA national certifying examination. Students must take the HCCA exam within one year of completing the Quinnipiac University certificate to qualify for a waiver of residency/work experience/education requirements.

SUMMER PROGRAM ABROAD

Trinity College

Dublin, Ireland

Quinnipiac University School of Law offers an ABA-approved summer program at Trinity College Dublin, one of Ireland's premier institutions of higher education. This program provides an introduction to the Irish legal system and Irish constitutional law as well as a variety of classes in Irish, comparative and international law.

Located in the heart of Dublin, Trinity is the constituent college of the University of Dublin, one of Europe's oldest universities, steeped in history and tradition. Trinity College Law Library, which has holdings in Irish, British and European law, has recently expanded its holding to include North American law. The college's historic Old Library contains not only the Book of Kells, a world-famous volume of ninth-century illuminated manuscripts of the gospels, but an unparalleled collection of books, art and artifacts relating to Irish history.

Enrollment in the program is limited and is open to students who have satisfactorily completed one year of full-time or part-time study at an ABA-approved or state-accredited law school and are in good academic standing. Students are responsible for securing approval, in advance, from their own law school to transfer credit and are encouraged to check with the registrar at their home institution to determine whether residency requirements are satisfied. Early application is strongly encouraged.

It is the applicants' responsibility to check with their financial aid office regarding filing requirements and processing deadlines if they are participating in the Ireland program. Generally, students must take at least 6 credits (three courses) in the summer to qualify for federal financial aid; no student is permitted to register for more than 6 credits.

Students are encouraged to live on campus during the program. Those who choose to stay off campus will be responsible for their own accommodations. Housing information is mailed to applicants upon acceptance into the program. All travel arrangements are the responsibility of the student.

Specific questions regarding the program can be directed to:

Professor William Dunlap
Director of the Trinity Summer Program
Quinnipiac University School of Law

ACADEMIC REGULATIONS

Academic rules and regulations are subject to change by decision of the faculty at any time. The Student Conduct Code and the Honor Code are separate documents, included in the bound copy of the Academic Catalog.

I. Requirements for Graduation

A. In General
To receive the JD degree, a student must meet all of the following requirements:

1. Successfully complete all required courses, the core elective requirement, the Professional Skills Requirement (for students matriculating before Fall 2016 or the Experiential Learning Requirement (for students matriculating Fall 2016 or later).
2. Receive credit for 86 credits.
3. Achieve a cumulative grade point average of 2.0.
4. Complete all requirements no sooner than 24 months and, except in extraordinary circumstances, no later than 84 months after a student has commenced law study at this law school or a law school from which this school accepted transfer credit.
5. Satisfactorily complete the Advanced Writing Requirement (p. ).
6. Complete all work for the above requirements no later than the last day of examinations of the student’s final semester.

B. Required Courses

1. Policy
Because it is important for all lawyers to share a core of common knowledge and skills, the faculty has prescribed a set of required courses (listed elsewhere in this catalog).

2. Course Sequences, Variances
Required courses must be successfully completed. They must be taken in the prescribed sequence (set forth elsewhere in this catalog) unless the student has petitioned for and been granted a variance prior to registration or prior to a change in registration. A student may, however, take a required course earlier than the prescribed semester without petitioning to do so. Authority to grant or deny such variances rests in the associate dean. Variances are granted in only the most extraordinary of circumstances. A student who has been given permission to postpone an exam in a required course must take the exam the next time the course is offered (excluding the summer term).

3. Successful Completion
A student who has received a failing grade in a required course must retake the course. Upon successful completion of this course, the student will receive a grade of “Pass,” but will retain the previous grade of F as well. The “Pass” will have no numerical value and will not affect the CQPA (Cumulative Quality Point Average). The F will be included in the CQPA. The purpose of the rule is to insure at least minimal competency in all required courses but not to provide opportunities to improve a grade. The writing of a paper for a course in which the student failed an examination is prohibited.

C. Core Electives
In addition to Lawyers’ Professional Responsibility, which remains required for all students, the upper-class curriculum consists of core electives and general electives. The core electives are: LAWS 114 Administrative Law, LAWS 205 Business Organizations, LAWS 323 Commercial Law, LAWS 311 Evidence, LAWS 305 Federal Income Tax, and LAWS 307 Trusts and Estates. General electives are all electives other than core electives.

1. Core Elective Requirement
Every student must take at least four of the core electives. One of the four must be either LAWS 323 Commercial Law or LAWS 305 Federal Income Tax. Students who take both Commercial Law and Federal Income Tax will be able to use both in satisfying the requirement of four.

2. Sequencing and Registration Priorities

Full-Time Students
A full-time student must complete at least three of the core electives by the end of his or her second year. Moreover, students who are registering for their second year have priority with respect to all of the core electives. Thus, a student who takes fewer than six of the core electives in his or her second year will be able to register to take the remaining core elective(s) as a third-year student only after the completion of registration by students who are registering to take core electives in their second year.

Part-time Students
A part-time student must complete at least two of the core electives by the end of his or her second year, and the rest of his or her core electives in the third and/or fourth years.

After registration in the fall, the associate dean for academic affairs will determine if there are any students who have not registered for enough core electives to complete at least three (for full-time students) or two (for part-time students) by the end of their second academic year. The associate dean will send a warning letter to such students, stating they have one week to register for sufficient core electives in the spring to total the required number for the year. If they have not done so by the deadline, the associate dean will register them for the number of core electives needed to fulfill the core elective requirement. Courses will be assigned solely in the discretion of the associate dean.

The associate dean’s office is available to answer questions about the requirements and registration priorities.

3. Advice on Course Selection
Although only four of the core electives are required, the faculty recommends that students seriously consider taking all six, for the following reasons.

First, the faculty believes that these six courses are among the most important in the upper-class curriculum. Taking all six gives students exposure to a wide variety of legal areas and disciplines. In the past, students who have had summer jobs after their second years have often found that they were better prepared for their assignments than students from law schools with less extensive requirements.

Second, with the exception of LAWS 305 Federal Income Tax, the six courses cover some, though by no means all, of the most difficult material tested on most bar examinations. Taking all five of the other courses does not, of course, guarantee success on any bar
examination, nor does taking all six guarantee success in practice. Moreover, different instructors may stress different aspects of the material and even different material in different sections of the courses. Yet students who take all six will thereby enhance their chances of passing a bar examination and will become sensitized to potential tax consequences of transactions and other activities in a wide variety of legal practice areas.

Third, all of the six courses provide foundations for other courses in the curriculum. In combination with the required first-year curriculum, they develop students' skills in statutory, administrative, and common-law reasoning. They also introduce students to many of the concepts that clients expect lawyers to understand.

Fourth, students' notions of where their interests lie often change with exposure to new material. In the past, many students who have entered the law school without definite career plans have discovered interests in areas covered in one or more of the six courses. Even students whose plans were definite at the outset have sometimes changed their minds and pursued careers in areas they discovered only when they took one of the six.

D. Advanced Writing Requirement

1. The Requirement
To ensure continued development of those research and writing skills stressed in the first-year Legal Skills Program, each student must write at least four papers after the first year, preferably one each semester. At least one, the "substantial paper," must be at least 10-15 pages in length with a non-trivial research component. The three others constitute the "short paper" requirement. A student may not begin the advanced writing requirement before completing LAWS 101. The courses designated as satisfying the advanced writing requirement shall ordinarily be limited to those taught by full-time faculty. In exceptional circumstances, the associate dean may approve the designation of a course taught by a part-time member of the faculty.

2. Modes of Satisfaction
A student will ordinarily submit a paper as part of the work for a substantive or clinical course. The class schedule published each semester will indicate which courses automatically satisfy either a short paper or substantial paper requirement. Most elective courses that do not automatically satisfy a paper requirement will have a limited number of places for students who wish to write a paper for that course. Procedures for signing up for a paper are published each semester after the close of the add/drop period. The paper must count for at least 25 percent of the final grade for the course. Ordinarily a student may not satisfy two paper requirements in the same semester. An exception will be made if a student takes more than one course that automatically satisfies either a short paper or substantial paper requirement. The associate dean may waive the one-paper limitation for good cause.

A member of the Law Review, the Probate Law Journal, or the Health Law Journal may satisfy the substantial paper requirement by preparing a long note or comment that the editorial board determines is of publishable quality. A student may satisfy the substantial paper requirement by submitting an appellate brief prepared for the intramural competition used to select members for the Moot Court Board. To satisfy the paper requirement, the brief must be critiqued and approved by a faculty member, who may require additional work on the paper. The faculty member must transmit the approval to the registrar.

E. Limit on Out-of-Class Credits
A law student may elect a maximum of 20 out-of-class credits toward the satisfaction of the 86 semester hours required to receive the JD, consisting of up to 10 fieldwork credits and up to 10 non-classroom credits, as follows:

1. Fieldwork Credits
A law student shall be permitted to elect a maximum of 10 fieldwork credits during the student's residency at the school. Fieldwork hours, as currently in the curriculum, include the following:

   a. all but 4 of the credits elected by a student taking for the first time an in-house clinic taught by a full-time faculty member (Civil Justice Clinic and Tax Clinic),

   b. all but 2 of the credits elected by a student taking Civil Justice Clinic (LAWS 294) after taking Tax Clinic (LAWS 295) or vice versa, and

   c. all but 2 of the credits elected by a student taking Appellate Clinic I - Defense (LAWS 299) or another clinic that is not taught by a full-time faculty member, and

   d. all but 1 of the credits for Advanced Clinic (LAWS 611), and

   e. all but 1 of the credits for an externship.

The rules of the various state bar examiners vary in respect to the number of fieldwork credits an applicant may present. Each student is responsible for making certain that his or her curriculum conforms to the requirements of the state or states to which the student may apply.

2. Non-Classroom Credits
In addition to any fieldwork credits under the preceding section, a law student shall be permitted to elect a maximum of 10 non-classroom credits during the student's residency at the school. Non-classroom credits, as currently in the curriculum, include the following: a. all credits elected for Moot Court, and b. all credits elected for Health Law Journal, Law Review or Probate Law Journal, and c. all credits elected for an Independent Research Project.

The rules of the various state bar examiners vary in respect to the number of non-classroom credits an applicant may present. Each student is responsible for making certain that his or her curriculum conforms to the requirements of the state or states to which the student may apply.

3. The following summarizes the limits on out-of-class credits:

   Fieldwork Credits: 10 credits maximum
1. Visitor Policy

G. Visitor and Credit-Transfer Policy

These requirements under exceptional circumstances.

Independent Research Project. The associate dean may waive any of
meetings. Only full-time law school faculty members may supervise an
student is enrolled in at least one other school course with regular class
in which the student is enrolled in a clinical program, subject to the
student may complete more than one Independent Research Project
Research Projects for all semesters or sessions at the School. No
No student shall register for more than one Independent Research
Project in any semester or session, nor more than two Independent
Projects for all semesters or sessions at the School. No
student may complete more than one Independent Research Project
with any individual faculty member. A student may enroll in an
Independent Research Project during the same semester or session
in which the student is enrolled in a clinical program, subject to the
rules regarding Limit on Non-Classroom Credits, and provided that the
student is enrolled in at least one other school course with regular class
meetings. Only full-time law school faculty members may supervise an
Independent Research Project. The associate dean may waive any of
these requirements under exceptional circumstances.

F. Independent Research Project

The Independent Research Project permits a student to conduct a major
research and writing project under the supervision of a full-time member
of the Law School faculty. The paper must be at least 20 pages in length,
exclusive of footnotes, per credit assigned.

A student who wishes to write an independent research paper must
submit to the supervising faculty member a written proposal that
demonstrates that he or she has a viable topic for research. The student
must register for the course, with the approval of the faculty member, no
later than the beginning of the student’s next to last semester of school.
Prior to registration, the student must present to the registrar a contract
signed by the supervising faculty member. Contracts are available in the
associate dean’s office.

An Independent Research Project may satisfy the substantial paper
component of the Advanced Writing Requirement (p. ) if the project
is for either 2 or 3 credits.

The Advanced Writing Requirement provision on Duplicative Use applies
to the Independent Research Project.

No student shall register for more than one Independent Research
Project in any semester or session, nor more than two Independent
Research Projects for all semesters or sessions at the School. No
student may complete more than one Independent Research Project
with any individual faculty member. A student may enroll in an
Independent Research Project during the same semester or session
in which the student is enrolled in a clinical program, subject to the
rules regarding Limit on Non-Classroom Credits, and provided that the
student is enrolled in at least one other school course with regular class
meetings. Only full-time law school faculty members may supervise an
Independent Research Project. The associate dean may waive any of
these requirements under exceptional circumstances.

G. Visitor and Credit-Transfer Policy

1. Visitor Policy

Students may by permission of the associate dean visit at another
law school at any time after completing their second semester,
providing that they complete at least two-thirds of their credits
toward their degree at the Quinnipiac University School of Law.
Such visiting status may be granted when it is determined that an
exceptional change in the student’s personal circumstances
requires the student to relocate for the period of visiting status, or
when some exceptional educational opportunity arises. Credits will
be accepted for transfer only if the visiting student earns at least a
C or its equivalent.

2. Transfer of Credits

This school will grant no more transfer credits for a course taken at
another school than the number of credits granted for the course
by that school. For students who transfer to this school, no credits
are transferred in courses in which the student has earned a grade
below C (2.0). The maximum number of credits a student can
transfer from another law school is 30. For Quinnipiac students who
visit at another law school, see paragraph 1 above. Credits accepted
from other schools are transferred with the grade of “Pass.”

3. Required Courses and Core Electives

Except with express written permission of the associate dean for
reasons of hardship, students may not receive credit for required
courses or core electives taken at other law schools. Written
permission must be obtained before taking the course elsewhere.

4. Summer Sessions

Except with express written permission of the associate dean
for reasons of hardship or sound academic reasons, students
may count toward graduation no more than six credits earned in
summer programs of other law schools. Written permission must be
obtained before taking the course elsewhere.

H. Courses Taken at Another University School or College

For good cause shown, the associate dean may allow a student to
register and earn credit toward the JD for courses taken in another school
or college of the university. Law school credit will be pass/fail only, and
given only for courses in which the student earns a grade of C (2.0) or
better.

II. Grades, Grading and Examinations

A. Grades

The School records letter grades and attributes to those grades a quality
point equivalent based upon a four-point system, as follows:

A .............................................. 4.00
A- ........................................... 3.67
B+ .......................................... 3.33
B ............................................. 3.00
B- ........................................... 2.67
C+ .......................................... 2.33
C ............................................. 2.00
C- ......................................... 1.67
D+ .......................................... 1.33
D ............................................. 1.00
F .............................................. 0.0 and no credit

The school awards honors to graduates according to the following
standards:

3.00 to 3.29 - cum laude
3.30 to 3.59 - magna cum laude
3.60 to 4.00 - summa cum laude

Several courses—including Civil Justice Clinic, Tax Clinic, Appellate Clinic
and Externships—may be graded (at least in part) as Honors, High Pass,
Pass, Low Pass, and Fail. Except for Fail, none of these grades has a
numerical equivalent; hence they do not affect the student’s Cumulative
Quality Point Average. A Fail, however, counts as a 0.0 in calculating the
CQPA. Grades for courses taken at other institutions for which credit is
given shall be recorded as Pass, subject to the Transfer of Credits policy described in section I.G.2 above.

B. Grading
1. Anonymous Examinations
   Except as specified hereunder, grades are based solely on written examinations that are graded anonymously. Approximately one week before examinations each semester, students must obtain from the registrar their examination number. That number must be used on all examinations in lieu of the student’s name.

2. Extensive Written Work
   Some courses involve extensive written work. Such work and such courses need not be graded anonymously. However, written final examinations in such courses are graded anonymously.

3. Clinical Courses
   Clinical Courses and other courses involving extensive non-written performance need not be graded on the basis of anonymous examinations.

4. Classroom Performance
   The faculty believes that student performance in the classroom is an essential part of the educational process. Faculty members have the authority to evaluate such performance and to raise or lower a student’s final grade by one-third of a letter grade, based on such performance. A faculty member who implements this policy must announce it to his or her class beforehand. Failure to adopt such a policy at the beginning of a semester shall not stop the faculty member from doing so thereafter, provided the required notice is given.

5. Attendance and Class Preparation
   Excessive student absences in a required course will lead to an administrative withdrawal from the course with a grade of F. (See section VI.A, Attendance Policy (p. ), below.)

6. Grade Changes
   After submitting grades in a course to the Registrar’s Office, a faculty member has no authority to change a grade except upon satisfying the associate dean that the change is due to mathematical or other clerical error or egregious substantive error. No change requested by a student shall be approved unless the student has sought review from the instructor within three weeks after the posting of the grade, or within three weeks of the beginning of the semester immediately following, whichever is later. In no event shall a grade change be made after the last day of the semester next following the semester or session in which the examination was administered.

7. Grades of Incomplete
   A student who is given a grade of Incomplete in a course, and has not completed all course requirements by the end of the semester following that in which the Incomplete was given, shall automatically have the Incomplete converted to an F. Exceptions to this rule will be made only in cases of extreme hardship (such as extended illness), on proof of same satisfactory to the associate dean.

8. Grading Guidelines
   The recommended median grade in required courses (Contracts, Torts, Civil Procedure, Criminal Law, Constitutional Law, Property, and Legal Skills I & II) is C+ or B-. The recommended median grade in core electives (Tax, Business Organizations, Evidence, Administrative Law, Commercial Law, and Trusts and Estates) and in Lawyers’ Professional Responsibility is B- or B. Faculty may deviate from these recommended medians after consulting with the associate dean. There are no recommended medians for other courses.

C. Examinations
1. Honor Code
   The following honor code pledge will be attached to every examination, take-home and in-class. Students must sign the pledge prior to taking the examination.

   **HONOR CODE PLEDGE**
   “On my honor, I pledge that I will follow the Honor Code regarding this examination. Specifically, I pledge that I have not given or received, and will not give or receive, prohibited assistance on this examination, and that I will neither work on nor retain this examination after the time allotted has elapsed. I understand that it is my duty to report any conduct that I know constitutes a violation of the Honor Code.”

   Signature (please use examination number, not your name):

   Date:

   Course:

   Professor:

2. When Taken; Excuses
   (a) Examinations must be taken at the time and place specified unless the student is excused by the associate dean on account of illness or for other sufficient reason. Where possible, the student shall secure the associate dean’s written permission prior to the date of the examination. To preserve anonymity, the student must not notify the instructor. In the event of an emergency that makes prior written approval impractical, the student shall notify the associate dean as soon as possible of his or her inability to take the examination at the scheduled time.

   (b) A student who becomes ill during an examination and is unable to complete the examination may, in the discretion of the associate dean, be permitted to take the examination in the same course the next time it is offered, provided the student has notified the associate dean or his delegate before the end of the examination.

   (c) A student who has three or more examinations within a 24-hour period may, with the permission of the associate dean, postpone one of the exams until later in the examination period.

3. Rescheduling of Examinations
   If the associate dean has excused a student from taking an examination at the scheduled time, the associate dean may, with the concurrence of the instructor, allow the student to take the same examination at a later time. In no event may a student take an examination prior to the scheduled time. Rescheduled exams cannot be typed.

4. Deferred Examinations
   If the associate dean has excused a student from taking an examination, but the student has not been permitted to take the same examination at a later time under the preceding section, the student will be permitted to take a different examination at a time and place to be determined by the instructor, but in no event later than the end of the examination period in the semester in which the course is next offered.
5. Reexaminations
The school does not permit reexaminations.

D. Class Ranking Policy
1. In general
   - 1L Students: Students who attempted the full-time course load of 30 credits during the academic year are ranked together as full-time students. Students who attempted fewer than 30 credits are ranked together as part-time students.
   - 2L Students: Full-time and part-time are ranked together in one 2L ranking.
   - 3L and 4L Students: Full-time and part-time are ranked together in one 3L/4L ranking.

2. For determining eligibility for law journals
   - Selection of candidates for the Law Review, Probate, and Health Law Journals will take place twice a year, after the fall and the spring semesters. The eligible pool of students shall include those students who at the selection point have attained at least 23 credits as of the conclusion of the immediately preceding semester.
   - At each selection point:
     - Students in the top 7% of the eligible pool of students will be invited to walk on to the journal of their choice.
     - Students in the next 8% of the eligible pool of students will be invited to walk on to the journal of their choice.
     - Students in the top 50% of the eligible pool of students will be eligible to be selected to join the Law Review through the write-on competition.
   - Any student in the eligible pool of students who has attained a cumulative GPA of 2.0 or higher at the selection point will be eligible to be selected to join the Health Law Journal or the Probate Law Journal.
   - Students in the top 50% of the eligible pool of students will be eligible to be selected to join the Law Review through the write-on competition.
   - Any student in the eligible pool of students who has attained a cumulative GPA of 2.0 or higher at the selection point will be eligible to be selected to join the Health Law Journal or the Probate Law Journal through the write-on competition. However, to be selected to join either of these journals, a student who is not in the top 50% of the eligible pool of students shall be required to meet a heightened standard in the write-on competition.

III. Course Loads
A. Full-Time Distinguished from Part-Time
1. Fall and Spring Semesters
   A full-time student for American Bar Association purposes is one who enrolls in at least 13 credits per semester. The normal course load for full-time students, however, is 13-15 credits. A part-time student is one who enrolls in 8-12 credits per semester. Written permission of the associate dean is required to deviate from these norms.

2. Summer Session
   No student may register for more than eight credits in a Quinnipiac summer session. A part-time student (one who is employed for more than 20 hours per week) may not register for more than 6 credits in a summer session. (See sections I.G.3 and I.G.4 above regarding summer credits taken at other institutions.)

B. Transfer between Day and Evening Programs
   Evening students may take day courses, and full-time day students may take evening courses only on a space-available basis.

C. Outside Employment
   A full-time student must devote substantially all of his or her working hours to the study of law. For purposes of this rule, a full-time student is one who is enrolled for 13 or more credits. A student may not work in excess of 20 hours per week while attending school on a full-time basis. This restriction applies during the summer in the same manner as during the normal year if the student is enrolled for a summer session.

D. Maximum Number of Credits per Semester
   Pursuant to ABA requirements, a student may enroll for no more than 17 credits in a semester and no more than 8 credits in a summer session. The law school has no authority to waive this rule.

IV. Continuance in Residence; Review for Academic Deficiency
A. Academic Deficiency; Minimum CQPA
   1. Generally
      Each student will be reviewed for academic deficiency at the end of every academic year. A student must maintain a minimum overall Cumulative Quality Point Average (CQPA) of 1.80 at the end of a year in which the student has attempted 17 or more credits, 1.90 at the end of a year in which the student has attempted 36 or more credits, and 2.00 at the end of a year and every year thereafter in which the student has attempted 54 or more credits.

   2. Transfer Students
      A student who transfers here from another law school must maintain a 1.9 CQPA in all courses taken here by the end of his or her second semester here (excluding summer school), and a 2.0 by the end of the second year and every year thereafter.

   3. Discounting of Course with Most Detrimental Grade
      If a student has not maintained the appropriate minimum CQPA, a second calculation will be performed. Removing from consideration the student’s most detrimental grade, the student must have attained a 2.2 average in all remaining courses. The most detrimental grade is the one that most adversely affects the student’s CQPA. This procedure of discounting the most detrimental grade will be repeated each semester, if necessary, so long as the student maintains a 2.2 CQPA in all other courses from the time he or she entered law school.

B. Dismissal
   Any student falling below the required minimum CQPA will be dismissed automatically.

   1. If the student has completed only two part-time or full-time semesters, the dismissal is final and there is no right of petition or appeal.

   2. If the student has completed three or more semesters, the dismissal is final, with no right of petition or appeal, unless the student is within .05 of the minimum CQPA required to remain in residence. A student who is within .05 of the minimum CQPA may appeal the dismissal to the Academic Status Committee. The appeal should be addressed to the chair of the Academic Status Committee, in care of the associate dean, and must be postmarked no later than 14 days after receipt of a letter from the associate dean notifying the student of his or her dismissal. If the student files an appeal, the dismissal will not become final until the committee has reviewed the case and denied the appeal. A student may apply for a leave of absence during the semester in which an appeal is pending before the committee. (See IV.C.) A student is allowed only one such appeal during the student’s entire time at the school. If the committee grants the appeal and allows the student to remain in residence, the student will be reviewed at the end of the
academic year and must have brought the CQPA up to the minimum required to remain in residence as of the later semester.

3. A student who has been academically dismissed after the second year or later may petition the Academic Status Committee for reinstatement. The committee may reinstate a student upon an affirmative showing that the student possesses the requisite ability, that there is a high probability that the student will successfully complete the course of study, and that the prior disqualification does not indicate a lack of capacity to complete the course of study. A student reinstated under this rule will lose all credit for the academic year in which the CQPA fell below the required level. The committee may impose such conditions as it deems appropriate. The decisions of the committee are final and not subject to appeal to the faculty as a whole.

4. No course, including summer courses, taken after a semester in which a student was dismissed automatically may count toward the student’s CQPA. Even if the later course were to bring the CQPA above the average required to remain in residence, the student will be dismissed from the school and withdrawn from the later course(s) with a 100% tuition refund.

C. Leaves of Absence
Leaves of absence will be granted liberally by the associate dean to students who believe that they have problems that might interfere with academic performance.

V. Withdrawal from a Course
A. Written Permission of Associate Dean; When Required
A student may withdraw from a course only with the prior written permission of the associate dean in the following circumstances:

1. Withdrawal is from a required course, or

2. Withdrawal from the course would reduce the student’s course load below the minimum required (see section III, Course Loads, above), or

3. Withdrawal is from a course in which the student missed more than 20% of the class hours scheduled in the course.

B. Instructor’s Permission; When Required
A student may withdraw from a course only with the permission of the instructor in the following circumstances:

1. In a course in which students are assigned substantial presentations, a student may withdraw within two weeks of his or her assigned presentation only with the written permission of both the instructor and the associate dean.

2. In a clinical course, after the third week of the course a student may withdraw only with the permission of the instructor.

3. Externships

C. Withdrawal as of Right
In all other circumstances a student is entitled to withdraw from a course at any time during the first week of classes by using Student Planning. After the first week, a student must email the registrar. A student who has not followed this procedure has not withdrawn from a course.

VI. Attendance, Preparation, and Participation Policy
A. Statement of Law School Policy
The faculty believes that class attendance, preparation, and participation are critical elements of the educational process.

B. General Attendance Requirement
An instructor may withdraw a student who misses 20% of the class hours in any course. A student so withdrawn from a required course will also receive a grade of F in that course. For purposes of this rule, the term “required course” does not include the courses listed as core electives in Rule I.C. In making the decision to withdraw a student, the instructor may consider such factors as the number of absences and the legitimacy of the reasons for them. In calculating the number of absences, an instructor may not take into account absences from classes held at times other than in the published course schedule. The instructor may deem the failure to sign an attendance sheet as conclusive evidence of a student’s absence if the instructor has notified students of this policy in writing no later than the first class.

C. Additional Rules for Clinical Courses
Students who are enrolled in clinics must appear personally on the first day of the semester or as may be required by the clinic faculty. Absences from clinic courses will be permitted only for illness and pressing personal matters (bereavement, illness in the family, placement interviews, legal matters, inter-law school competitions), and such absences must be made up. The faculty member supervising the clinic shall have the discretion to decide whether the circumstances justify an absence and when the absence shall be made up.

D. Notice
An instructor who withdraws a student shall notify the associate dean of the withdrawal no later than one week after the last class. The associate dean shall notify the student.

E. Constructive Absences
An instructor may mark absent a student who is inadequately prepared for class or refuses to participate when required to do so, whether or not the instructor requires the student to leave the classroom. The instructor must immediately advise the student that he or she has been marked absent.

F. Petitions
1. A student withdrawn from a course may petition the Academic Status Committee for reinstatement. If a student files such a petition, the withdrawal will not become final until the committee has reviewed the case and denied the petition. Attendance, preparation and participation requirements will remain in effect during the pendency of the petition. The committee may reinstate a student in the course if, after giving appropriate deference to the instructor’s determination, the committee finds that the instructor’s decision was not reasonable. In making its determination, the committee may consider any additional failures by the student in complying with the attendance, preparation, and participation requirements that occur after the initial withdrawal and while the appeal is pending. In the event that the committee decides to grant the petition, it may impose such conditions upon reinstatement as it deems appropriate.

Upon request by the losing party, the committee shall issue a written statement explaining the basis for its ruling.
2. The committee's decision is final. Neither party may appeal the decision to the faculty. The committee may refer any matter to the faculty for review.

G. General Preparation Requirement
For each course, a student is expected to spend an amount of time on out-of-class work that satisfies the Law School’s ABA Standard 310 Policy, attached as Appendix B to these regulations.

VII. Good Standing
To be in good standing a student must have the minimum CQPA required under section IV.A.1 above and be current in his or her financial obligations to the law school.
REFUND POLICY

Refund Policy
A student may withdraw from one or more courses during the add/drop period by doing so on Student Planning. After the add/drop period, a student must obtain and file a drop form at the associate dean and Registrar's Office. A student who wishes to withdraw completely from the School of Law must submit a statement to that effect to the associate dean.

Refunds are based on Quinnipiac University Policy and the return of unearned Title IV funds as required by the U.S. Department of Education.

For purposes of clarification and for reference, the policies described below have been categorized into two groups:

1. Quinnipiac University Policy
2. Return of Unearned Title IV Funds — Federal Policy

Federal guidelines require that any unearned Title IV funds be returned to the program(s) that provided the aid. The required order of returning refunds is as follows: Title IV, HEA programs, other federal and state programs, university grants, private or institutional financial assistance and finally to the student. Examples of refund calculations are available upon request.

Quinnipiac University School of Law Refund Policy
The policy described below gives consideration to two groups:

1. prior to the start of classes and
2. after the start of classes

Refund Policies, Prior to the Start of Classes
A new incoming student who has rendered either of the $200 or $600 tuition deposits and then withdraws from the university will forfeit the deposits. In all instances noted above, any balance on the account, less financial aid, will be refunded.

Refund Policies, After the Start of Classes
Law students who withdraw from any of their classes after the published "Last Day for Late Registration/Schedule Changes" will not be entitled to any adjustment of their charges for tuition and fees.

Students who affect a complete withdrawal or leave of absence from the university, regardless of the reason, including medical, will be granted a pro-rata refund of tuition and fees, less an administrative fee of $100. Late fees are non-refundable either in total or pro-ration. The prorata refunds will be computed on the following basis:

Fall and Spring Terms:
- Withdrawal first week 80%
- Withdrawal second week 60%
- Withdrawal third week 40%
- Withdrawal fourth week 20%
- Withdrawal after fourth week 0%

Summer Term:
- Withdrawal first week 80%
- Withdrawal second week 50%
- Withdrawal third week 30%

Withdrawal fourth week 0%

The date of withdrawal for purposes of calculating the refund is the date on which the student makes written notice to the associate dean's office for withdrawal. No retroactive withdrawals are permitted for refund purposes. The refund schedule listed above is applied regardless of the reason for withdrawal, including medical reasons.

Dismissals and Suspensions
A student who is either dismissed or suspended by the university for any reason during either academic semester will receive a refund based on the applicable refund percentage in effect at the time of the student’s dismissal or suspension (first four weeks). After the fourth academic week, the refund policy as stated above will be applied. In addition, a student who is dismissed or suspended will be charged all administrative fees and board fees as prescribed.

Payment Plan
Students using the university's payment plan who withdraw during the refund period (first four weeks) should note that their forfeiture will be computed on the full amount charged regarding tuition and fees, and not on the amount remitted via the payment plan. In addition, the $75 service charge for using the payment plan will also be included in the list of charges. After the fourth week, the balance due under the payment plan will be due and payable on the date of withdrawal.

Return of Title IV Funds
In addition to the university's refund policy that prorates tuition charges during the first four weeks of the semester, the university is obliged to return to the federal government that portion of federal aid that is unearned. An award of Title IV funds is based on a payment period or term.

Please note: It is important to understand that if your withdrawal date is on or before the completion of 60 percent of the semester, "unearned aid" will result. If you have received a refund as a result of aid applied to your account prior to your withdrawal date, you will have a balance due the university on your student account.

A withdrawal requires the university to calculate the unearned portion of aid awarded as of the student’s official withdrawal date.

The university must determine the following:

1. The official date of withdrawal. A student must formally withdraw or request a leave of absence, in writing, to the associate dean of the law school. The date of withdrawal must be documented.
2. The payment period, term identified.
3. The aid that has been disbursed or could have been disbursed.
4. The percentage of federal aid earned by the student as of the withdrawal date.
5. The percentage of Title IV aid that has not been earned by the student.

The percentage of a payment period completed is determined by dividing the number of calendar days in the payment period into the number of calendar days completed as of the withdrawal date.

The university will notify the student if the student is eligible for a post withdrawal disbursement.
1. The offer, (if eligible) of post withdrawal disbursement, will be made in writing within 30 days of the withdrawal date.
2. The student must respond within 14 days of the notification.
3. The university will disburse funds within 90 days of the date of withdrawal.
4. If the student does not respond, no portion of the late disbursement that is not credited to the student’s account will be disbursed.
5. The student will be notified electronically or in writing of the outcome of the late disbursement.

The total amount of unearned assistance to be returned is the lesser of (a) the total amount disbursed minus the total amount earned or (b) the institutional charges time the percentage of aid unearned. The student is responsible for returning the remainder of unearned aid that is calculated by taking the total of unearned aid and subtracting the amount the university is required to return.

The student retains Title IV eligibility for 45 days during which the student must:

1. Repay in full.
2. Make satisfactory arrangements to repay the university.
3. Make satisfactory arrangements to repay the U.S. Department of Education.

The university is required to report all overpayments to NSLDS and must report within 30 days after:

1. The student takes timely action on the options offered.
2. The student fails to repay the overpayment or sign an agreement with the university within a 45-day period.
3. The student fails to meet the terms of the agreement signed with the school.

Title IV funds must be returned in the following order:

1. Unsubsidized Federal Direct Loans
2. Subsidized Federal Direct Loans
3. Federal Direct Plus Loans
4. Other Title IV assistance
HONOR CODE

I. Statement of Purpose
Quinnipiac University School of Law operates under an Honor Code. The legal profession is responsible for enforcing its own standards of conduct, and the School of Law operates accordingly. Law students are preparing for entry into a profession that requires ethical conduct and integrity of its members. In order for graduates to enter the profession, the school must certify that they are of good moral character. Accordingly, students at the School of Law are expected to abide by the standards of conduct contained in this Honor Code in their dealings with members of the School of Law community and in their personal affairs.

Each law student shall be responsible for the Honor Code’s implementation. Students are therefore obligated not only to follow these standards of conduct, but also to take an active role in encouraging other students to respect them. As with the American Bar Association’s Model Rules of Professional Conduct, the keystone of our Honor Code is self-regulation.

The Honor Code Committee will be responsible for administration of the Code. If in doubt as to whether past conduct triggers a duty to report under this code, students are encouraged to make appropriate inquiries of either the committee or a faculty member designated as a “Confidential Advisor” for purposes of this code and obligated to keep all information pertaining to an alleged violation confidential, except as otherwise provided in subsection IV.E(3). If in doubt as to whether future conduct would constitute a violation of this code, students are encouraged to make appropriate inquiries of their professors or, if necessary, the committee. This responsibility to inquire is analogous to the one that students will have in the future, as members of the bar, to make inquiries of the appropriate bar officials if in doubt as to whether particular conduct violates applicable rules of professional conduct.

The Honor Code is based on a common law approach rather than a statutory one. That is, behavior that is impermissible is not defined in exhaustive detail. Instead, broad categories are stated, followed by examples. The broad categories of acceptable behavior refer to standards of the academic world as well as to rules and regulations of the profession and of everyday life.

II. Jurisdiction
A. Persons Subject to this Code
This Honor Code applies to every student enrolled or matriculated in the School of Law, except as provided in subsection IV.AA of this Code (“Administration of Code After Graduation or Other Separation”).

B. Matters Subject to this Code
(1) This Honor Code applies to all academic matters, including, but not limited to:

(a) Any work performed for a course, writing program, or seminar, such as an examination, research, or other assignment;

(b) Any work performed in connection with participation in an activity for which credit may be given, such as law review, moot court, or clinics and externships;

(c) Any work performed in connection with participation in law-related competitions; and

(d) Any written or oral representation made with respect to academic achievement, such as a transcript, resume, educational record, or statement about grade point average or academic honors.

(2) This Honor Code applies to non-academic matters to the extent that they fall within the scope of Rule 8.4 of the ABA Model Rules of Professional Conduct.

C. Broad Construction; Overlapping Jurisdiction
This Honor Code shall be construed broadly in accordance with its Statement of Purpose. Any acts, whether undertaken within the School of Law, on University property, or elsewhere, are subject to all other applicable policies, procedures, rules, sanctions, and conditions of the School of Law and University. Thus, the institution of proceedings and results reached under this Honor Code shall not limit the authority of the School of Law or University, or its faculty or administrators, from enforcing all other applicable policies, procedures, rules, sanctions, and conditions. For example, nothing in this Honor Code shall limit the authority of:

(a) the School of Law or University from acting administratively to protect public safety and the educational mission of the School of Law or University; (b) the School of Law from enforcing the Student Conduct Code; (c) the School of Law Admissions Committee from acting on any misrepresentation made in a student’s application for admission; (d) School of Law faculty from lowering a student’s grade or requiring the student to retake an examination; or (e) School of Law and University administrators from enforcing the law school’s Sexual Harassment Policy. Likewise, enforcement of applicable policies, procedures, rules, sanctions, and conditions by the School of Law or University, or its faculty or administrators, shall not preclude the institution of proceedings or limit the results reached under this Honor Code.

D. Relationship to Rules of Bar Examining Committees and Similar Organizations.

The disclosures and reporting obligations required by this Code (for example, the “Duty to Disclose” and the “Duty to Report” under subsections III.C and IV.E(1) of this Code, respectively) are independent of the disclosures required of students, staff, and faculty by any bar examining committee or similar organization. Nothing in this Code shall expand, limit, or otherwise control the disclosures and reporting obligations required by any bar examining committee or similar organization. For example, a student’s disclosure of a criminal conviction to the Dean of the School of Law (“Dean”) pursuant to this Code does not obviate the need for the student to disclose that conviction to a bar examining committee requesting such information. Similarly, nothing in this Code shall prevent the Dean from making any disclosures that may be required by a bar examining committee or similar organization.

III. Standards of Conduct
A. Honesty in Use of Ideas and Information
(1) Inappropriate use of others’ work. In contexts in which citation is expected, a student may not use the words, thoughts, or ideas of another without attribution consistent with standard legal citation manuals (e.g., ALWD Citation Manual or Bluebook), so that they seem as if they are the student’s own. This type of misconduct can take many forms. The most flagrant forms include a student’s copying someone else’s work word-for-word or turning in a paper written by another with the student’s name as the author. Other examples include, but are not limited to, rewriting
someone else’s work with only minor changes, summarizing another’s
work, or taking another person’s ideas without acknowledging the source
through proper attribution and citation.

Evidence that a student has inappropriately used the work of others
includes, but is not limited to:

(a) when significant sections of the paper match other sources and no
attribution is given to those sources;

(b) when any portion of the paper borrows heavily from a particular
source, including the Internet — whether verbatim or paraphrased — and
the source is not acknowledged; and

(c) when a student fails to follow conventions for indicating direct
quotations (e.g., when a paraphrase is too close to the original or when
an actual direct quotation is not indicated). Failure to identify direct
quotations is evidence of inappropriate usage regardless of whether the
source is actually cited.

Students sometimes make minor mistakes in completing academic
assignments. While one missing citation in a paper will, in most
instances, be considered a careless mistake rather than inappropriate
use of another’s work, multiple instances of failing to provide proper
attribution through quotation marks or citations are evidence that a
student has inappropriately used the work of others. If in doubt as to
whether citation is expected or what constitutes inappropriate use of
others’ work, a student should consult with the professor.

(2) Cheating. A student may not use or attempt to use prohibited materials
or sources in connection with any academic matter. If in doubt as to what
materials or sources are prohibited, a student should consult with the
professor.

(3) Prohibited assistance or collaboration. A student may not give or receive
prohibited aid on any academic matter. If in doubt as to what aid is
prohibited, a student should consult with the professor.

(4) Multiple submissions. Except as provided below, a student may not
submit work that the student has done in connection with any previous
academic matter as if it were new and original work, nor may a student
submit the same work in contemporaneous academic matters. Although
professors occasionally may be willing to let students use previous work
as the basis for new work, professors expect students to do new work
for each class. A student seeking to submit a piece of work for more than
one class must have the express prior approval of both professors. If in
doubt as to what may constitute a multiple submission, a student should
consult with both professors.

B. Honesty with Respect to Academic Achievement
A student may not lie about or misrepresent the student’s work, academic
records, credentials, or other academic matters or information. Examples
of deception and misrepresentation include, but are not limited to, forging
signatures, forging letters of recommendation, forging a transcript,
falsifying internship or clinic documentation, falsifying pro bono records,
and falsifying information in an application or on a resume.

C. Duty to Disclose
(1) Failing to make timely disclosure of factual irregularities, discrepancies,
and material omissions in admissions application. A student has a
continuing responsibility to insure the completeness and correctness of
the student’s admissions application to the School of Law by disclosing
to the Associate Dean for Academic Affairs any factual irregularities,
discrepancies, or material omissions in the student’s application from the
time the student submits the application to the School of Law until the
time the student graduates. Disclosure must be made within thirty (30)
business days of when the student actually or constructively knows of the
irregularity, discrepancy, or omission.

(2) Failure to make timely disclosure of charges, arrests, convictions,
and formal accusations. A student has an obligation to disclose any
conviction on the student’s admissions application to the School of
Law. Furthermore, from the time the student submits an admissions
application to the School of Law until the time the student graduates,
a student has a continuing obligation to disclose to the Associate Dean
for Academic Affairs any charge, arrest, or conviction, and any formal
accusation that the student engaged in conduct involving dishonesty,
_464_

fraud, deceit, harassment, or misrepresentation. When events requiring
disclosure occur after submission of an admissions application,
disclosure must be made within thirty (30) business days of such charge,
arrest, conviction, or formal accusation.

D. Respect for Standards of Conduct
(1) Failure to cooperate with administration of Code. Failure to cooperate
with the administration of this Code as set forth in Section IV
(“Administration of Honor Code”) is, itself, a violation of this Code. Failure
to cooperate with the administration of this Code includes, but is not
limited to, failing to report conduct that a student knows is a violation of
this Code or making an accusation with no reasonable grounds for
believing that the accused student has violated this Code.

(2) Attempting to violate or facilitating a violation of Code. A student may not
attempt to violate, or knowingly help someone else violate or attempt to
violate, this Honor Code. Facilitating a violation includes, but is not limited to,
giving someone work product to submit as his or her own or allowing
someone to cheat from one’s examination, research, or assignment.

E. Fair and Equal Access to the Education Process
(1) Misappropriation of and damage to academic materials. A student may
do not damage, misappropriate, or disable academic resources so that
others cannot use them. This includes, but is not limited to, removing
pages from books, stealing books or articles, and deleting or damaging
computer files intended for others’ use.

(2) Inappropriate use of technology. A student may not use network or
computer access inappropriately. Examples include, but are not limited to:
tampering with another student’s account so that the student cannot
complete or submit an assignment; stealing a student’s work through
electronic means; knowingly spreading a computer virus; or misusing a
Westlaw or Lexis account.

(3) Compromising examination security. A student may not invade the
security maintained for the preparation or storage of examinations,
tamper with exam-making or exam-taking software, identify oneself on
an exam without the express prior approval of the professor, or discuss
any part of an examination with a student who has not yet taken that
examination but is scheduled to do so.

(4) Unfair Advantage. A student may not commit any act that the student
knows may give the student or another student an unfair advantage
or may interfere with the education process. Examples of violations of
this subsection include, but are not limited to: (a) falsification of
hours on a project where the number of hours is a requisite for credit;
(b) use of materials in a research project which are prohibited by the
written assignment instructions; (c) use of unauthorized materials in
the course of preparing for or taking an exam; (d) intentional dishonesty
in oral arguments for Moot Court, Trial Practice courses, or other
Committee becomes unable to serve for any reason. The SBA shall likewise designate one (1) Alternate Student to serve on the Committee if a student on the Committee becomes unable to serve for any reason.

D Questions Regarding Future Conduct If in doubt as to whether future conduct would constitute a violation of this Code (e.g., whether a proposed act would constitute an unfair advantage), a student is encouraged to make appropriate inquiries of their professors or, if necessary, the Committee.

E Reporting Violations

(1) Duty to Report A person who knows that a student has violated the Honor Code must report the alleged violation within a reasonable time to the Associate Dean for Academic Affairs or to any member of the Honor Code Committee. Any person who does not know but has reasonable grounds for believing that a student has violated the Honor Code may report the possible violation within a reasonable time to the Associate Dean for Academic Affairs or to any member of the Honor Code Committee. The Associate Dean or Committee member (other than the Honor Code Committee Chair) shall not conduct an inquiry into the alleged violation but shall instead notify the Honor Code Committee Chair.

(2) Inquiries of Suspected Violator Encouraged A student who observes or learns of an apparent violation is encouraged to make inquiries of the suspected violator. If an explanation is given that clears up the matter, i.e., the witnessing student believes there was no violation, this should end the matter.

(3) Inquiries of “Confidential Advisor” or Honor Code Committee Members Encouraged A student who is uncertain whether past conduct triggers a duty to report under this Code is encouraged to make appropriate inquiries of a faculty member who is designated as a “Confidential Advisor” for purposes of this Code. A Confidential Advisor is obligated to keep all information pertaining to an alleged violation confidential, except that confidentiality is waived if: (a) an accused student invokes the Confidential Advisor’s advice as a defense to an alleged violation; or (b) the alleged violation constitutes criminal conduct or a threat to public safety. At the beginning of each academic year, the Dean shall designate two (2) faculty members who are not Honor Code Committee Members as “Confidential Advisors.” A student who is uncertain whether past conduct triggers a duty to report under this Code may also make appropriate inquiries of the Committee. Members of the Committee are not Confidential Advisors; they have a duty under this Code to report conduct they know constitutes a violation of the Code.

F Preliminary Inquiry/Reasonable Grounds Determination Upon receipt pursuant to Section IV.E(1) of a report of an alleged Honor Code violation, the Honor Code Committee Chair shall conduct a preliminary inquiry to determine whether reasonable grounds exist to support the conclusion that the alleged or possible violation occurred. If the Committee Chair so concludes, the Committee Chair shall refer the matter as soon as possible to an Advocate Team, pursuant to Section IV.G. If the Committee Chair concludes that there are not reasonable grounds for concluding that the alleged violation occurred, the Committee Chair shall deem the matter concluded.

In conducting the preliminary inquiry required by this subsection IV.F, the Honor Code Committee Chair shall consult with the Associate Dean of Academic Affairs.

On a periodic basis, the Honor Code Committee Chair shall report to the Honor Code Committee on any recent matters that the Chair deemed...
concluded after the Chair’s preliminary inquiry revealed no reasonable grounds for concluding that an alleged Honor Code violation had occurred.

G. Advocate Team and Faculty Advisor. The Advocate Team shall consist of two (2) students from the Honor Code Committee, both appointed by the Committee Chair in rotation. The Team shall be responsible for investigating alleged violations of the Honor Code; deciding whether to bring charges against the accused student; preparing and presenting the case against the accused student before a Hearing Panel; and structuring and conducting negotiations with the accused student, or with the student, private attorney, or other person assisting the accused student, after charges have been brought.

The Committee Chair shall also appoint a faculty member on the Committee to serve as a Faculty Advisor to the Advocate Team. Under no circumstances shall the Faculty Advisor present the case against the accused student – that responsibility belongs to the Advocate Team alone.

H. Investigation and Charging Decision. The Advocate Team may investigate in any reasonable manner, including meeting with the accused student.

(1) Request for Meeting and Advisement of Rights. Before meeting with the accused student, the Advocate Team shall give him or her the following Request for Meeting and Advisement of Rights, in writing:

QUINNIPIAC UNIVERSITY SCHOOL OF LAW
HONOR CODE ADVOCATE TEAM
REQUEST FOR MEETING AND ADVISEMENT OF RIGHTS

As members of the Quinnipiac School of Law Honor Code Advocate Team, we are conducting an investigation into allegations that you violated the Honor Code. This is an investigation only, and no charges have been brought against you. As part of our investigation, we would like to speak with you about the alleged violations of the Honor Code.

You have the right to choose not to meet with us. If you choose not to meet with us, or if you choose to meet with us but refuse to answer questions, a Hearing Panel may treat your failure to cooperate as a basis for drawing adverse inferences.

You also have the right to have someone present at the meeting to assist you. In accordance with the Honor Code, you may secure assistance from any student, private attorney, or other individual you choose, provided that the person has familiarized himself or herself with the Honor Code. A law school faculty member, however, may not represent a student in an Honor Code matter.

If we decide to bring charges against you, anything you say at such a meeting may be used against you at an Honor Code Hearing. For the sake of convenience, we will record our meeting (if you agree to such a meeting), on a laptop.

Please complete the following and return to us no later than [date]. The failure to respond to this Request for Meeting in the time allotted constitutes a failure to cooperate with administration of the Honor Code and is therefore, itself, a violation of the Code. If you have any questions about this Request, please contact us immediately.

****

I, [name], have read and understand the QUSL Honor Code Advocate Team Request for Meeting and Advisement of Rights.

Check the appropriate box(es):

# I do not wish to meet with the Honor Code Advocate Team.
# I wish to meet with the Honor Code Advocate Team, and
# I do not wish to be represented at the meeting; or
# I wish to have the following person represent me at the meeting: [name and contact information].

[sign name] [date]

(2) Consultation with Faculty Advisor. Before bringing or declining to bring charges against the accused student, the Advocate Team shall consult with the Faculty Advisor. In the event that the Faculty Advisor and Advocate Team cannot agree on a course of conduct, the Advocate Team shall consult with the Honor Code Committee Chair, whose decision shall govern. If the Chair determines that charges should be brought, the Chair shall not serve on the Hearing Panel.

(3) Decision to Bring Charges. When the investigation discloses insufficient evidence of a violation, the Advocate Team shall promptly inform the Honor Code Committee Chair, in which case no charges shall be brought.

The Advocate Team may, in some circumstances and for good cause consistent with the interest of the School of Law community, decline to bring charges notwithstanding sufficient evidence of a violation. In such circumstances, the student’s record shall reflect that disposition, including the Advocate Team’s reasons for exercising its discretion to decline to bring charges. Factors that the Advocate Team may consider in exercising its discretion include, but are not limited to:

(a) the severity of the violation and extent of the harm caused by the violation;
(b) possible improper motives of the person who reported the alleged violation;
(c) reluctance of the person who reported the alleged violation to testify;
(d) self-reporting by the accused student;
(e) remedial action taken by or negotiated with the accused student;
(f) availability and likelihood of: (1) the institution of criminal proceedings against the accused student under state or federal law; or (2) the enforcement of other applicable policies, procedures, rules, sanctions, and conditions against the accused student by the School of Law or University, or its faculty or administrators; and
(g) the likelihood that the Hearing Panel will not find that the accused student violated the Honor Code.

(4) Advocate Team’s Disclosure Materials. As soon as possible after deciding to bring charges, the Advocate Team shall prepare and give to the Chair of the Honor Code Committee its disclosure materials. These materials shall consist of: a list of the witnesses who will be called to testify against the accused student; brief (one- or two-sentence) summaries of the substance of their expected testimony; and copies of any documents to be offered in evidence against the accused student. The Advocate Team’s disclosure materials shall also include a memo listing and offering to make available for examination by the accused student at a time and location to be agreed on by the parties any tangible objects to be offered in evidence, as well as any evidence known.
to the Advocate Team that tends to exonerate the accused student or
mitigate the degree of culpability.

I. Honor Code Hearing Panel
If the Advocate Team decides to bring
charges, the Team shall promptly inform the Honor Code Committee
Chair, who shall appoint an Honor Code Hearing Panel to hear and
determine the matter.A Hearing Panel shall consist of one (1) faculty
member from the Committee and four (4) students from the Committee,
each appointed by the Committee Chair in rotation.

J. Assistance with Defense
Any student, private attorney, or other
individual may – at the request of the accused student – assist the
student in defense of the charges, provided that the person has
familiarized himself or herself with the Honor Code.A law school faculty
member, however, may not represent a student in an Honor Code matter.
Moreover, any student who is not yet licensed to practice law cannot serve
as the accused student’s “attorney” in connection with an Honor Code
matter. Any assisting student provides such assistance as part of the
educational mission of the law school and not as the practice of law. All
conversations between the accused student and the person assisting the
accused are confidential.

K. Information Furnished to Accused Student
As soon as possible after
receiving the Advocate Team’s disclosure materials and notice that the
Advocate Team has chosen to charge the accused student, the Honor
Code Committee Chair shall give the accused student:

(1) a Written Notice of Charges, setting forth the name of the accused
student, the name of the accuser or accusers, the Honor Code
provision(s) allegedly violated, and the nature of the charges with
sufficient particularity to enable the accused student to answer them;

(2) the Advocate Team’s disclosure materials; and

(3) a copy of the Honor Code.

The Committee Chair shall give these materials to the accused student in
the manner most likely to provide the student with prompt notice.

L. Information Furnished to Advocate Team
The Written Notice of Charges
shall require the accused student to file with the Committee Chair:

(1) a written Answer admitting, denying, or admitting in part and denying
in part the charges.An Answer should contain specific admissions or
denials for each allegation of fact in the charge, and shall not contain
only general denials;

(2) disclosure materials similar to that given to the accused student – i.e.,
a list of the witnesses who will be called to testify on behalf of
the accused student; brief (one- or two-sentence) summaries of the
substance of their expected testimony; copies of any documents to be
offered in evidence in support of the accused student; and a memo listing
and offering to make available for examination by the Advocate Team
at a time and location to be agreed on by the parties any tangible objects to
be offered in evidence; and

(3) a Written Statement of Accused responding to every allegation of fact
in the charge that the accused student has denied in the Answer, and
about which he or she has any information.

The Advocate Team may enter the Answer, the accused student’s
disclosure materials, and, if applicable, the Written Statement of Accused
into evidence at an Honor Code Hearing. The Chair shall specify in the
Written Notice of Charges a date on which these documents shall be
due, but in no event shall the due date be less than ten (10) business
days from the issuance of the Written Notice of Charges. The Chair, upon
request of the accused student and for good cause shown, may extend
the time for filing these documents.

M. Continuing Duty to Disclose.
If either the Advocate Team or the accused student intends to call a
witness not already disclosed or offer into evidence documents or
tangible objects not already disclosed, the Advocate Team or accused
student will promptly make such disclosure to the other party consistent
with subsections IV.H(4) (“Advocate Team’s Disclosure Materials”) and
IV.L(2) (“Information Furnished to Advocate Team”) of this Code. Likewise,
the accused student and the Advocate Team shall correct or supplement
any disclosure that either side learns to be false or incomplete.

There shall be no process prior to the hearing for ruling on disputes
relating to this disclosure process. The Hearing Panel may, however, treat
a failure to disclose or cooperate as a basis for excluding testimony or
evidence, or for drawing adverse inferences.

N. Hearing
As soon as possible following the issuance of the Written
Notice of Charges, but no earlier than ten (10) business days thereafter,
the Honor Code Committee Chair shall schedule a hearing date. The
Chair shall provide the accused with notice of the date, place, and
time of the Hearing. A record of the Hearing shall be made by audio or
videotape recording, or stenographic means, as determined by the Chair.
The Hearing shall be completed no later than the end of the semester
after the one in which the violation was reported, unless the Chair, upon
request of the accused student or Advocate Team and for good cause
shown, grants a continuance. The hearing shall be open or closed at the
election of the accused student, subject to the School of Law’s need
to maintain order. An accused student wishing a continuance, an open
hearing, or both shall notify the Committee in writing at least two (2)
business days prior to the Hearing date.

O. Rights of Accused Student
At the Hearing, the accused student shall
have the following rights:

(1) To be assisted by a student, a private attorney retained by the
accused, or other individual; provided, however, that a law school faculty
member may not represent an accused student in an Honor Code matter.

(2) In person or through his or her representative, to summon and present
witnesses and other evidence on his or her behalf;

(3) In person or through his or her representative, to confront and cross-
examine the accuser and all other witnesses;

(4) To refuse to testify on his or her own behalf. If an accused student
refuses to testify, or chooses to testify but refuses to answer questions,
the Hearing Panel may draw a negative inference from the refusal.

(5) To bring to the attention of the Hearing Panel any facts or
circumstances that would or would appear to compromise the
impartiality of a member of the Panel. Any member of the Panel who
knows of such circumstances, whether or not presented by the student,
shall recuse himself or herself. If a Panel member declines to recuse
himself or herself upon request by the accused or another Panel member,
the Dean shall make the final decision. Any recused member shall be
replaced in the same manner as the member was originally appointed.

P. Evidence
Formal rules of evidence shall not apply to the Honor
Code Hearing. Any oral or documentary evidence may be received,
but irrelevant, immaterial, or unduly repetitious evidence may be excluded. The Hearing Panel will designate one member of the Panel to rule on evidentiary matters at the Hearing. When a hearing will be expedited and the interests of the School of Law or the student will not be prejudiced substantially, evidence may be received in the form of copies and excerpts if the original is not readily available. The Hearing Panel may take notice of the records and written policies of the School of Law and of the University. The parties shall be informed of the materials the Panel notices, and shall have an opportunity to contest those materials.

Q. **Negotiated Settlement.** After bringing charges, the Advocate Team may enter into a settlement with the accused student. Any negotiated settlement between the Advocate Team and the accused shall be subject to approval by the Hearing Panel. In the absence of an admission of an Honor Code violation by the accused, the Panel may impose conditions pursuant to a negotiated settlement, but not sanctions.

R. **Burden of Proof; Panel Decision.** After a contested hearing, the Hearing Panel shall reach a decision regarding the existence of an Honor Code violation and the appropriate sanction or condition for any violation. The decision shall be upon a majority vote of the Panel, based upon clear and convincing evidence, and communicated in writing to the student within ten (10) business days after the decision is made.

S. **Summary of Adverse Decision.** If the decision is adverse to the student, the Panel shall, within twenty (20) business days of mailing the decision, prepare a written summary of the evidence and its findings. A copy of the summary and a record of the Hearing shall be mailed to the student and given to the Dean. If no appeal is taken by the student within the time limit prescribed below, the Dean shall implement the sanction or condition imposed by the Hearing Panel.

**T. Appeal.**

(1) **Timing and Content of Appeal.** The student may, within ten (10) business days after receipt of the written Summary of Adverse Decision, appeal to the Dean who may affirm, reverse or remand the decision, or reduce the sanction or condition. The student must specify in writing the basis of the appeal. The Dean may request a response in writing from the Hearing Panel. No new evidence shall be presented by either the student or the Hearing Panel.

(2) **Standard of Review on Appeal.** Appeals alleging factual errors shall be governed by a clearly erroneous standard. Appeals alleging procedural errors or erroneous interpretation of the Code shall be reviewed for prejudicial error.

(3) **Final Disposition.** The Dean shall specify in writing the reason for any reversal, remand, or reduction. The Dean's disposition of the appeal shall be final and no further appeal of the Hearing Panel's decision may be taken. This subsection represents the extent of appeal rights under this Code – there are no additional School of Law or University appeal rights under this Code.

**U. Petition for Rehearing.** A student who has received a sanction or condition may petition the Honor Code Committee for a rehearing on the grounds of newly discovered evidence. Upon receipt of the petition, the Honor Code Committee Chair shall appoint an Advocate Team to consider whether the petition has merit and whether justice requires a rehearing. If the petition has merit and justice so requires, the Advocate Team shall promptly inform the Honor Code Committee Chair, who shall appoint an Honor Code Hearing Panel. The Panel shall convene a hearing to consider the new evidence and reconsider the findings in light of the new evidence. Following such a hearing, the Hearing Panel shall enter an order affirming, modifying, or reversing its original decision and shall notify the petitioner and Dean of its decision.

**V. Student Witnesses.** A student's refusal to give a statement or attend and testify truthfully at any Hearing upon summons by either the Advocate Team or the accused student shall constitute a violation of this Code.

**W. Confidentiality.**

(1) **General Rule.** Except as provided below, all Honor Code proceedings and accompanying information, including Advocate Team investigations, shall remain confidential to the maximum extent possible.

(2) **Exceptions to General Rule.**

(a) Confidentiality is waived if the accused student elects a public hearing or breaches this Code's Confidentiality provision.

(b) The Honor Code Committee shall issue Public Reports as described in subsection IV.X of this Code ("Public Reports"). Under no circumstances shall the names of any students appear in the Public Reports mandated by this Code, except that the accused student may elect to have his or her own name appear in such Reports.

(3) **Breach of Confidentiality.** Any breach of this Confidentiality provision by any student shall be a violation of this Code.

**X. Public Reports.** The Honor Code Committee shall issue periodic Public Reports, to be posted in the School of Law, summarizing the matters resolved by the Committee in the reported period. Such Public Reports shall omit the names of all students except as provided in subsection IV.W(2)(b) ("Exceptions to General Rule" of Confidentiality). The Public Reports shall also – to the greatest extent possible – omit details about the reported matters that would risk revealing the identity of the student(s) involved.

Copies of all Public Reports shall be kept on file with the Associate Dean for Academic Affairs.

**Y. Sanctions and Conditions.** Sanctions and conditions that may be imposed by the Hearing Panel or Dean include, but are not limited to, one or more of the following:

(1) Expulsion from the School of Law or revocation of School of Law diploma, as the case may be;

(2) Suspension from the School of Law, or any course or other School of Law-related activity, for one or more semesters, or for the balance of any semester;

(3) Withdrawal of credit in a course;

(4) Academic probation;

(5) A written reprimand;

(6) An oral admonition;

(7) Restitution;

(8) Conditions, such as mediation, referral of the accused student to the University Counseling Center, or a letter of apology or explanation of conduct.

**Z. Record-Keeping.**
The following dispositions shall be noted in an accused student's permanent file:

(1) The Advocate Team's decision not to bring charges despite the presence of sufficient evidence of a violation and the reason for that decision, as set forth in subsection IV.H(3) ("Decision to Bring Charges");

(2) An approval of settlement by the Hearing Panel as set forth in subsection IV.Q ("Negotiated Settlement"), including any admission of an Honor Code violation by the accused student and any sanction or condition imposed;

(3) The Hearing Panel's dismissal of charges against an accused student;

(4) After the expiration of the appeal period, the Hearing Panel's determination of an Honor Code violation, and the sanction or condition imposed; and

(5) The Dean's affirmance, reversal, or remand of the Hearing Panel's determination of an Honor Code violation on appeal, and any sanction or condition imposed.

AA. Administration of Code After Graduation or Other Separation. Proceedings may be initiated or continued after the student has graduated or otherwise separated from the School of Law, provided that the alleged violation occurred while the student was enrolled or matriculated in the School of Law. If an Honor Code matter is pending when a student is scheduled to graduate from the School of Law, the student's degree may be withheld at least until the matter is resolved.

V. Periodic Review; Effective Date; No Retroactivity.

The Honor Code Committee shall review this Code periodically and recommend any amendments it deems necessary to ensure that this Code remains consistent with the Statement of Purpose set forth in Section I of this Code.

This Code shall become effective on the date specified by the faculty at the time of adoption. This Code, and any amendment to this Code from time to time, shall be deemed to apply only to conduct occurring on or after the effective date of this Code or such amendment, as the case may be.

1 Initial version adopted by the faculty on May 2, 2012, with an effective date of September 1, 2012. Revised version adopted by the faculty with an effective date of February 14, 2018.
POLICIES, PROCEDURES, REGULATIONS

Alcoholic Beverages Policy
The following Alcoholic Beverages Policy is in effect with respect to all Quinnipiac School of Law student-sponsored functions:

On-Campus Events
Except where permission has been granted by the associate dean of students, alcohol may not be served at student organization-sponsored events at the School of Law. Student organizations seeking to serve beer and/or wine must request permission from the associate dean of students at least two weeks in advance of the event, outlining the specifics of the event. If the associate dean of students grants permission for beer and wine to be served, special conditions may be imposed that the student organization must follow (such as a two-drink ticket system). The event is also subject to the Quinnipiac University Alcohol and Drug Policy and the Student Code of Conduct. (http://catalog.qu.edu/handbook-undergrad/policiestext) and the Student Code of Conduct. (http://catalog.qu.edu/handbook-undergrad/policiestext)

Set forth below are the procedures that must be followed if/when the associate dean of students grants permission for alcohol to be served at student organization-sponsored events:

When alcohol is served at an on-campus School of Law event:

1. The associate dean of students must approve the amount of alcohol purchased for each event.
2. Alcohol may never be consumed or served in classrooms, the library, the student meeting room, student organization offices, or the Courtroom. Non-alcoholic beverages must also be available.
3. Substantial food must be available, such as sandwiches, wraps, etc. Pretzels, potato chips and similar snack foods do not constitute a substantial food for this purpose. When the food is gone, the serving of alcohol must cease.
4. Beer and wine are the only alcoholic beverages that may be served. Mixed drinks are not permitted. If approved for use, kegs must be closed or capped at the end of the event and removed from campus as soon as possible.
5. Two non-drinking representatives of the sponsoring student organization must be present where alcohol is being served. The president of the sponsoring organization must notify the associate dean of students prior to the event who these two representatives will be. These students are responsible for reporting violations of the alcohol policy to the associate dean of students.
6. The sponsoring organization must hire a bartender from the university’s catering department (Chartwells). The bartender must be on duty for the entire length of time alcohol is dispensed.
7. Attendance at alcohol-related events is limited to law school students, faculty, staff and their escorted guests. NO undergraduates are permitted at any time.
8. The faculty adviser for the sponsoring organization or a member of the administration (dean, associate dean) must attend the event.
9. Immediately after the event has concluded, all open bottles of alcohol must be disposed of. Unopened bottles must be placed in a locked and secure location within the law school, such as the associate dean of students office.

When alcohol is served at an off-campus School of Law event:

1. Events held at off-campus establishments require the purchase of any alcohol to be made directly from the off-campus establishment. The associate dean of students may still require a two-drink ticket system be used to ensure that such purchases be limited to no more than two drinks per student.
2. Attendance at alcohol-related events is limited to law school students, faculty, staff and their escorted guests. NO undergraduates are permitted at any time.
3. It is the student organization’s responsibility to ensure that off-campus establishments hold the appropriate municipal and state liquor licenses, as well as the required insurance. All distribution of alcohol must comply with the restrictions indicated in Connecticut law.

The sale of alcoholic beverages: No alcohol shall be sold at on-campus School of Law events.

Legal drinking age: Beer and wine may be dispensed only to individuals who are 21 and older. In accordance with Connecticut state law, alcoholic beverages shall not be dispensed to any intoxicated person.

Damages: Any damage to property incurred at events at which alcohol is served is the responsibility of the sponsoring organization.

Transportation of alcohol: The event sponsoring organization is responsible for preventing attendees from bringing personal alcoholic beverages into the event and for preventing attendees from taking alcohol out of the event. The only exception is where alcohol is being transported by a representative of the sponsoring organization from a retail outlet to the event.

Policy violations: Violation of any of the aforementioned alcoholic beverage policies may result in the loss of privileges to the sponsoring group or organization and the disciplinary sanctions set forth in the University Alcohol and Drug Policy and Student Code of Conduct.

COMPLAINT PROCEDURE

1. In general. There are two types of complaints: those that implicate the ABA Standards for Approval of Law Schools (http://www.americanbar.org/groups/legal_education/resources/standards.html) and those that do not. To determine if the substance of a complaint implicates the Standards, a student should read the Standards.
2. Submitting a formal complaint that implicates the Standards. Any student at the law school who wishes to bring a formal complaint to the administration of the law school concerning a significant problem that directly implicates the school’s program of legal education and its compliance with the ABA Standards should do the following:
   A. If the complaint concerns an academic matter, submit it in writing, via Quinnipiac University email, to the associate dean for academic affairs. If the complaint concerns a nonacademic matter, submit it in writing, via Quinnipiac University email to the associate dean of students.
   B. The writing should describe in detail the behavior, program, process or other matter that is the subject of the complaint. It should explain how the matter implicates the school’s program of legal education and its compliance with one or more specific, identified ABA Standard(s).
C. The writing must provide the name, official law school email address, and a street address of the complaining student, for further communication about the complaint.

D. The administrator to whom the complaint is submitted will acknowledge the complaint within three business days of receipt of it. Acknowledgment will be made by email.

E. Within 10 business days of acknowledgment of the complaint, the administrator, or the administrator's designee, shall either meet with the complaining student, or respond to the substance of the complaint in writing. In this meeting or in this writing, the student will either receive a substantive response to the complaint or information about what steps are being taken by the law school to address the complaint or to further investigate the complaint. If further investigation is needed, when the investigation is completed, the student shall be provided either a substantive response to the complaint or information about what steps are being taken by the law school to address the complaint. The response shall be provided to the student via email within 10 business days after completion of the investigation.

F. Appeals regarding decisions on complaints may be taken to the dean of the law school. The student may further appeal to the university's senior vice president for academic affairs. Any decision on appeal to the academic vice president shall be final.

G. A copy of the complaint and a summary of the process and resolution of the complaint shall be kept in the office of the dean where it was originally filed.

3. Submitting a complaint that does not implicate the Standards.
   A. If the complaint concerns an academic matter, the student should make an appointment to meet with the associate dean for academic affairs or submit the complaint via QU email.
   B. If the complaint concerns a nonacademic matter, the student should make an appointment to meet with the associate dean of students or submit the complaint via QU email.
   C. If the complaint is submitted at a meeting, the student may present the complaint either orally or in writing.
   D. The dean to whom the complaint has been submitted shall respond to the complaint in writing to the student's QU email address within 10 business days.
   E. Appeals regarding decisions on complaints may be taken to the dean of the law school. The student may further appeal to the university's senior vice president for academic affairs. Any decision on appeal to the academic vice president shall be final.

Bias, Harassment and Discrimination Policy

Quinnipiac University values diversity, multiculturalism and respect for others in an environment free from bias. The university is committed to providing a safe and respectful educational and work environment that prohibits discrimination and harassment on the basis of race, color, religion, national origin, sex, gender, (including identity and expression), sexual orientation, age or disability. Such behaviors or attitudes undermine the environment of equity and mutual respect that is essential to fulfill the university's mission.

Discriminatory or bias-related acts by students, faculty or staff will be addressed through the appropriate disciplinary processes. Any act of reprisal, interference, restraint, penalty discrimination, coercion or harassment against the university community for using these policies responsibly interferes with free expression and openness and violates this policy. Accordingly, members of the university community are prohibited from acts of reprisal against those who report incidents to the university, are involved as witnesses or otherwise try to responsibly use this policy. This policy will help to create an atmosphere in which allegations of discrimination or harassment are dealt with in a timely, private, fair and effective manner.

Title IX Policy Against Gender-Based Discrimination and Sexual Misconduct

Title IX of the Education Amendments of 1972 prohibits discrimination on the basis of sex in educational programs and activities that receive federal financial assistance. Quinnipiac University is committed to complying with Title IX and providing an educational, working and living environment free from gender or sex discrimination and sexual misconduct. Quinnipiac seeks to ensure that no student, faculty or staff member is excluded from participation in or denied the benefits of any university program or activity on the basis of sex.

Quinnipiac University School of Law affirms its commitment to an environment that is fair, humane and respectful for all members of the law school community. Behaviors at the School of Law that inappropriately assert sexuality are unacceptable and will not be condoned. Behaviors that constitute sexual harassment include unsolicited verbal, nonverbal and/or physical conduct of a sexual nature that creates an intimidating, hostile or offensive environment.

The School of Law has identified associate dean for academic affairs, Robert Farrell, and associate dean of students, Kathy Kuhar, as administrators to whom law students who believe themselves to have been subjected to harassment or discrimination as defined above may report their complaints. Where appropriate, the School of Law will first try to resolve problems without formal hearings. When such efforts are not successful, individuals have available to them a formal process, outlined further in the University's Student Handbook (http://catalog.qu.edu/handbooks) and in the University's Title IX Policy (p. 135). In all cases, the School of Law will protect the confidentiality of both the complainant and respondent so far as the described process permits.

Policies and Procedures for Students with Disabilities

Quinnipiac University is committed to providing equal educational opportunities and full participation for students with disabilities. Consistent with its responsibilities to comply with the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973, Quinnipiac University provides reasonable accommodations to promote equal educational opportunity. Documentation from a licensed evaluator is required to substantiate the presence of a disability, defined by the ADA as “a physical or mental impairment that substantially limits one or more major life activities,” and to establish the need for reasonable accommodations at Quinnipiac University.

Responsibilities of the student:

1. Contact the associate dean of students at the time of enrollment so that appropriate accommodations can be made in a timely manner. The student is also responsible for reviewing the need for accommodation on a semester-by-semester basis with the associate dean of students.

2. Provide to the associate dean of students appropriate medical, psychological, psychoeducational or neuropsychological documentation indicating the student’s disability and suggested reasonable accommodations.
3. Provide signed consent authorizing the associate dean of students or designee to discuss the student’s need for reasonable accommodations, academic adjustments, and/or auxiliary aids with the professional(s) providing the documentation.

4. Meet the timelines and procedural requirements established by the School of Law for scheduling exams and requesting assistance. If the student with a disability fails to provide adequate notice of the need for space and/or assistance, the associate dean of students will attempt to provide the accommodation to the extent possible under the circumstances.

**Student Conduct Code**

*(Revised to June 2001)*

Quinnipiac University’s Basic Policy and Student Code of Conduct are hereinafter incorporated by reference.

1. **Student Discipline Committee**
   A standing committee shall be appointed by the dean at the beginning of each academic year. The membership of this committee shall be at least six faculty members and four students, the latter to be chosen by the Student Bar Association in any manner it deems suitable.

   The committee chairperson shall appoint one or more members of the faculty, from the committee if possible, to serve as law school advocates and one or more faculty members to serve as defense counsel. For each complaint of a possible violation of this Student Conduct Code, the committee chairperson shall assign one faculty law school advocate and one student to serve as an advocate team.

   All student committee members are eligible to serve as members of an advocate team. The advocate team shall be responsible for investigating alleged offenses, for preparing and presenting the case against the accused at disciplinary hearings, and for conducting negotiations with the accused or accused’s counsel, and shall have sole discretion to decide whether or not to bring charges and whether or not to enter into negotiations. In the event that the faculty and student members of the advocate team cannot agree on a course of conduct, the faculty member’s decision shall govern.

   Hearing panels consisting of one student and two faculty members selected by the chairperson shall hear and determine all cases. The committee chairperson shall select faculty members to serve on the hearing panel from the faculty in rotation, and shall select student members from the committee.

   Any faculty member may serve as defense counsel, at the request of the accused student. Alternatively, the accused student may elect to be represented by a faculty member who serves as appointed defense counsel. Any faculty member representing an accused student, whether appointed or selected by the accused student, shall represent the accused student without fee and shall cooperate with retained outside defense counsel if the latter so requests.

2. **Student Conduct Code: General Statement of Purpose**
   This code shall be construed liberally in accordance with its purpose, which is to promote the highest ethical standards.

   Acts of a non-academic nature, whether undertaken within the law school, on university property or elsewhere may be subject to all applicable law school and university rules and sanctions. Thus, the institution of proceedings under this code shall not preclude the institution of proceedings by the university, and the institution of proceedings by the university shall not preclude the institution of proceedings under this code. When proceedings are instituted by both the law school and the university, neither shall be ousted from jurisdiction by either the institution of proceedings or by the result reached by the other.

   Nothing in these rules or procedures shall limit the authority of the School of Law or Quinnipiac University to act administratively to protect public safety and the educational mission of the School of Law or Quinnipiac University.

3. **Violations**
   The following acts are prohibited. Any student found guilty of one or more such acts shall be subject to the sanctions authorized by this code.

   A. Cheating on any examination or other law school assignment, as illustrated by, but not limited to:
      1. The unauthorized giving or receiving of aid or assistance;
      2. The unauthorized use of information;
      3. The unauthorized submission of work which has already been submitted in satisfaction of other coursework;
      4. The giving or obtaining of any unfair advantage.

   B. Plagiarism on papers or other law school assignments, as illustrated by, but not limited to:
      1. The knowing or reckless copying or paraphrasing without proper attribution of any material written by another;
      2. The knowing or reckless submission as one’s own of research assignment or papers, class work, or other projects which have been prepared in any part by another;
      3. The knowing or reckless use of the exact language of another without identification as a direct quotation, by quotation marks or otherwise, even though the source is cited in the student’s work;
      4. Knowledge or recklessness may be inferred from the circumstances.

   C. Any act which reflects adversely upon fitness to practice law. Relationship to fitness shall be construed in accordance with the American Bar Association Rules of Professional Conduct, and relevant case law.

   D. Any attempt to commit any act prohibited by this code.

4. **Procedures**
   A. When an alleged offense is brought to the attention of the committee, or any member thereof, neither the committee nor any of its members shall conduct any inquiry, but shall instead refer the matter to the advocate team for investigation, as soon as is feasible. The team members may investigate in any reasonable manner. When the investigation discloses insufficient evidence of a violation, the case shall be dismissed at this stage with no notation in the student’s record.

   B. As soon as is practical after receiving notice that the advocate team has chosen to charge the accused student, the chairperson of the committee shall advise the student in writing of the name of the accuser or accusers, and of the nature of the charges with sufficient particularity to enable
the student to answer them. The chairperson shall give notice in the manner most likely to provide the student with prompt notice.

The notice shall require the student to file a written answer to the charges with the committee chairperson, admitting, denying, or admitting in part and denying in part the charges. An answer should contain specific admissions or denials for each allegation of fact in the charge, and shall not contain only general denials. The chairperson shall specify in the notice a date on which the answer shall be due. An accused student shall have at least seven days from the issuance of the notice of charge in which to file an answer. The chairperson, upon request, may extend the time for filing an answer.

C. After the filing of the answer, the accused must prepare a written statement responding to every allegation which he or she has denied in the answer, and about which the accused has any information. The advocate team may enter this statement into evidence at a hearing. As soon as is practical after the filing of the statement, the advocate team and the accused shall each prepare and provide to each other a summary of the testimony of each witness, and copies or descriptions of any physical evidence. The accused and the advocate team shall correct or supplement any disclosure that either side learns to be false or incomplete. There shall be no process prior to the hearing for ruling on disputes relating to this disclosure process. The Hearing Panel may, however, treat a failure to disclose or to cooperate as a basis for excluding testimony or evidence, or for drawing adverse inferences.

D. As soon as is practical following the giving of notice of a pending charge, but no earlier than ten days thereafter, the committee chairperson shall schedule a hearing date. The chairperson shall provide the accused with notice of the date, place and time of the hearing. The hearing shall be completed no later than the end of the semester after the one in which the committee chairperson first receives the complaint, unless the accused student, or his or her representative, requests a continuance. The hearing shall be open or closed at the election of the accused student, subject to the need to maintain order. A student wishing a continuance, an open hearing, or both shall notify the committee in writing at least two days prior to the hearing date.

E. At the hearing the student shall have the following rights:

1. To be advised and represented by the appointed defense counsel, any other faculty member, or by any attorney or representative retained by the accused, including another student;
2. To confront and cross-examine, in person or through his or her representative, the accuser and all other witnesses;
3. To testify;
4. To summon and present witnesses and other evidence in his or her behalf;
5. The student whose case is to be heard by the hearing panel may bring to its attention any facts or circumstances that would or would appear to compromise the impartiality of a member of the panel. Any member of the panel who knows of such circumstances, whether or not presented by the student, shall recuse himself or herself. If a panel member declines to recuse himself or herself upon request by the accused or another panel member, the dean of the law school shall make the final decision. Any recused member shall be replaced in the same manner as the member was originally appointed.

6. The accused student has no right to refuse to testify or give a statement pursuant to Section 4.C. unless the testimony or statement would incriminate him or her under state or federal law. If the accused refuses to testify or give a statement under this provision, the Hearing Panel may draw a negative inference from the refusal.

F. Any oral or documentary evidence may be received, but irrelevant, immaterial or unduly repetitious evidence may be excluded. The Hearing Panel will rule on evidentiary matters at the hearing. The panel shall give effect to privileges recognized by Connecticut law that do not conflict with the express provisions of this code. When a hearing will be expedited and the interests of the law school or of the student will not be prejudiced substantially, evidence may be received in written form of copies and excerpts if the original is not readily available. The panel may take notice of the records and written policies of the law school and of the university. The parties shall be informed of the matter the panel notices, and shall have an opportunity to contest the material so noticed.

G. Any negotiated settlement between the advocate team and the accused or accused's counsel shall be subject to approval by the Hearing Panel. The panel may not impose sanctions pursuant to an agreement of the parties in the absence of an admission of guilt by the accused.

H. After a contested hearing, the panel shall reach a decision regarding guilt or innocence, and sanction. The decision shall be upon a majority vote, based upon clear and convincing evidence, and communicated in writing to the student within 10 days after the decision is made.

I. If the decision is adverse to the student, the panel shall, within 20 days of mailing the decision, prepare a written summary of the evidence and its findings. A copy of the summary shall be mailed to the student.

J. The student may, within 10 days after receipt of the written summary, appeal to the dean who may affirm, reverse or remand the decision, or reduce the sanctions. The student must specify the basis of the appeal. No new evidence shall be presented on appeal. The dean shall specify in writing the reason for any reversal or reduction.

K. Any student who refuses to attend and testify at any hearing upon summons by either the panel or the student accused, shall be guilty of a violation of this code. No witness has a right to refuse to testify or give a statement unless the testimony or statement would incriminate him or her under state or federal law.
L. Prior to a finding or admission of guilt by a panel, all proceedings and accompanying information shall be confidential, except insofar as the student may elect a public hearing. Any breach of confidentiality shall be a violation of the code, and if by the accused, shall also operate as a waiver of any obligation of confidentiality on the part of others. After a finding or admission of guilt and the expiration of the appeal period, or of the affirmance of the decision by the dean, the disciplinary matter may become public information. In the event the panel finds that the student is not guilty, the panel and/or the committee chairperson may inform the complainant and any witnesses who testified at the hearing of the outcome of the matter.

M. If the case is dismissed at any stage prior to the imposition of a sanction, or the accused is found innocent, no record of the matter shall be placed in the student's file.

N. The committee may post a public notice of its disposition of any matter, so long as the information does not violate the confidentiality provision of Section 4.L.

5. Sanctions and Their Imposition
Sanctions which may be imposed by the Hearing Panel include, but are not limited to, one or more of the following which are set forth in descending order of severity:

A. Expulsion from the law school;

B. Suspension from the law school, or any course or courses, for one or more semesters, or for the balance of any semester.

C. A grade of “F” in any course to which the offense pertains;

D. Withdrawal of credit in a course;

E. Lowering of grade in any course to which the offense pertains;

F. A retake of an examination in a course, or the doing or repetition of any work less than the entire course in such a manner and subject to such conditions as the panel shall recommend;

G. Academic probation;

H. A written reprimand;

I. An oral admonition.

J. The committee may direct restitution in addition to or as an alternative to any of the foregoing.

K. In any matter when there is a conviction or an admission of guilt and the panel has imposed a sanction, such action shall be noted in the student's permanent file. After the imposition of a sanction, the notation thereof shall not be erased from the file as a result of the student's later successful completion of certain conditions.

L. In any matter where the dean reverses a conviction, the dean shall state whether or not the reversal has the effect of a dismissal and results in the erasure of the matter from the student's permanent file.

6. Exclusions
Nothing in this code shall preclude:

A. The establishment and enforcement by the Law faculty, administration, librarian or individual instructor, of rules pertaining to the administration of exams, papers, or assignments, or the maintenance of classroom or library decorum;

B. The use of authority on the part of the instructor to do those things believed necessary to fulfill responsibilities in the classroom, including devices to promote effective class participation, to prevent disturbance of the classroom situation, and ensure punctual and regular class attendance.

STUDENT DISCIPLINE COMMITTEE
Under the Student Conduct Code, alleged violations are investigated by a team consisting of one faculty member and one student. If the team decides to bring charges, the matter is heard by a panel of two faculty members and one student, who are appointed in a rotation.

Each year, the dean appoints a committee of several faculty members, and the SBA designates at least four students to serve on the committee. Anyone having reason to believe that a student has violated the Student Conduct Code may bring the matter to the attention of the committee chair, who will assign the team to investigate the matter.
APPENDIX A

Complying with the New York State Bar’s Heightened Experiential Requirement

The School of Law will certify that students taking the New York Bar Exam have satisfied Pathway 1 of 22 NYCRR Part 520.18(a), if they meet the following requirements:

• Completed and passed all required courses, including the four upper-level core courses; and
• Completed and received at least a C in LPR; and
• Received at least a C in each course in one of the following arrays of experiential courses:
  • Option A: [Total of 6 or 7 credits]
    • Introduction to Representing Clients; and
    • Either Negotiation or ADR; and
    • One of the following litigation-based simulation courses:
      • Trial Practice
      • Visual Persuasion and the Law; or
    • One of the following transactional simulation courses:
      • Commercial Transactions Workshop
      • Estate Planning and Drafting
  • Option B: [Total 6 credits]
    • Civil Justice Clinic, for at least 4 credits; and
    • Either Negotiation or ADR.
  • Option C: [Total 7 or 8 credits]
    • Any law clinic other than Civil Justice Clinic, or any externship for at least 3 credits; and
    • Introduction to Representing Clients; and
    • Either Negotiation or ADR.
APPENDIX B

Compliance with ABA Standard 310

A. Classroom Courses

1. Notification in Syllabus

Every faculty member shall include in the syllabus, or other document distributed at the beginning of the course, for each classroom course taught the following language:

Standard 310 of the American Bar Association’s Accreditation Standards requires that for each credit hour earned, a student must do an amount of work that reasonably approximates at least 50 minutes of classroom instruction per week and at least an average of 120 minutes of out-of-class work per week for 15 weeks. Out-of-class work includes class preparation, post-class review, outlining, time spent on written and other class assignments, meeting with study groups, meeting or otherwise communicating with the professor to discuss course-related topics, and exam preparation. The 15-week period includes one week for examinations.

In my judgment, based on the average length and difficulty of the reading assignments and the number and average difficulty of other course exercises and assignments, at least [credit hours x 2] or more hours of out-of-class work will be required on average per week to prepare adequately for class, complete all assignments, master the course material, and perform satisfactorily on all course assessments.

At the end of the course, students will be asked to indicate approximately how much out-of-class time they have spent per week per credit hour in this course, so please be mindful of this requirement as the course progresses.

2. Course Evaluation Form

The course evaluation form for every class will include the following question:

On average, how much out-of-class time did you spend per credit hour working on this course each week? Out-of-class work includes class preparation, post-class review, outlining, time spent on written and other class assignments, meeting with study groups, meeting or otherwise communicating with the professor to discuss course-related topics, and exam preparation.

The question asks how much time you spent outside of class on this course each week, on average, per credit hour. So, for a 3-credit course (e.g.), you should answer “1” if you spent less than 3 hours per week, on average, working on the course outside of class; “2” if you spent 3-6 hours per week; “3” if you spent about 6 hours per week; “4” if you spent 6-9 hours per week; or “5” if you spent more than 9 hours per week.

1. Less than 60 minutes (<1 hour) per credit
2. 60-120 minutes (1-2 hours) per credit
3. About 120 minutes (2 hours) per credit
4. 120-180 minutes (2-3 hours) per credit
5. More than 180 minutes (>3 hours) per credit

B. Clinical and Externship Courses

Credit for clinics and externships includes classroom and out-of-class work, with the exception of some advanced clinical courses. Hours will be computed for all classroom and out-of-class credits together, and will require an aggregate of not fewer than 45 hours per credit per semester. Classroom time for clinical courses will be determined as follows: For clinical courses with a one-credit seminar, not fewer than 12.5 hours will be scheduled as classroom seminar time per the semester, held on a periodic schedule; for clinical courses with a two-credit seminar, not less than 25 hours will be scheduled as classroom seminar time per semester, held on a weekly schedule. For any advanced clinical course without a seminar credit, students may be required to meet together with the faculty member periodically in a classroom setting, but there is no minimum classroom time.

The balance of the required hours will include the aggregate of all other obligations: case work, field work, supervision, preparation for class including reading assignments, written assignments, skill-building exercises, and administrative obligations. For all clinical courses, students will be required to perform case work and field work pursuant to a weekly schedule and to keep contemporaneous records of time spent on all tasks.

C. Journal Credits

Members of each law journal typically earn four credits for the substantive work they perform as members on the journal. The credits are earned over two years but are ordinarily awarded in the member’s second year on the journal. The editors of the law journals and the law faculty have determined that the amount of time devoted to substantive journal work that is required to earn the journal credits is not less than 45 hours per credit, for a total of not less than 180 hours. Students can elect whether or not they wish to take some or all of the credits they have earned, but shall complete journal work of not less than 180 hours in order to satisfy their membership requirements.

The tasks performed by journal members include some or all of the following:

1. Cite-checking.
2. Writing a student note, intended to produce a final paper of publishable quality. In the process of writing a note, each student must identify an original topic, conduct research, write multiple drafts, and coordinate with the Journals Committee and student note editors;
3. Issue editing: confirming student cite-check work, performing more substantial above-the-line edits, and working with authors to finalize papers; and
4. Student note editing. These duties in the aggregate require not less than 180 hours of substantive work over the course of four semesters.

With the permission of the associate dean, who shall consult with the relevant editor-in-chief, students who have completed at least 45 hours of work in their first year of membership may elect to earn one of their journal credits in the spring semester of their first year of journal membership. Students are eligible to earn the balance of the journal credits in the second year of membership. Certification of hours of work:

Each academic year, the Editorial Board of each journal shall prepare a detailed estimate of the number of hours they reasonably believe that members and editors will have to perform in order to complete assignments, for the purpose of assuring that all students will be required to perform at least 45 hours of substantive work per credit. The Editorial Board of each journal may require members to track their time spent...
in whatever way deemed appropriate, such as by time sheets or other means.

For any semester in which a journal member wishes to elect to earn journal credits, the editor-in-chief shall certify to the registrar and to the Journals Committee that the student has performed journal work equal to at least 45 hours per credit. For the editor-in-chief of each journal, the Journals Committee shall certify to the registrar that the editor-in-chief has performed journal work equal to at least 45 hours per credit.

D. Moot Court Credits

Students typically earn three credits for their work with the Moot Court Society. The credits may be earned over two years but are ordinarily awarded in the second year in the Society. The officers of the Moot Court Society and the law faculty have determined that the amount of time devoted to substantive work that is required to earn the Moot Court credits in not less than 45 hours per credit.

Credit 1: Intramural Credit

Students earn one credit by participating in the Quinnipiac School of Law Terrence H. Benbow Moot Court intramural competition. This requires the student to submit a 12-18 page brief and to prepare and argue both sides of the case in front of a panel of judges. At least 45 hours of work are required to earn the first Moot Court credit.

Credit 2: External Competition Credit

Students earn one credit by participating in external competitions. Each participant must submit a 25- to 40 page brief and prepare and argue both sides of the case in front of a panel of judges. At least 45 hours of work are required to earn the second Moot Court credit.

Credit 3: Coaching Credit

Students earn one credit by coaching an extramural team. This work includes the following:

1. learning the fact pattern and legal issues and precedents;
2. preparing participants for oral argument;
3. supervising competition preparation with outside judges; and
4. attending at least two oral arguments at the competition. At least 45 hours of work are required to earn the third Moot Court credit.

Certification of hours of work:

Each academic year, the Moot Court Board shall prepare a detailed estimate of the number of hours they reasonably believe that society members will have to perform in order to complete assignments, for the purpose of assuring that all students will be required to perform at least 45 hours of substantive work per credit earned. The board may require members to track their time spent in whatever way deemed appropriate, such as by time sheets or other means.

For any semester in which a Society member wishes to elect to earn Moot Court credits, the President shall certify to the Registrar and to the faculty adviser of the society that the student has performed substantive moot court work equal to at least 45 hours per credit. For the Moot Court Society president, the faculty adviser shall certify to the registrar that the president has performed substantive society work equal to at least 45 hours per credit.

E. Independent Research

To earn credit for Independent Research, a student must write a paper that is 20 or more pages in length, exclusive of footnotes, per credit earned. In order to produce a final work product that satisfies this requirement, a student must consult with a faculty member on the choice of topic, research the appropriateness of the topic, prepare an initial outline, complete research for the paper, write drafts of the paper, and edit the writing in consultation with the faculty supervisor. It is the judgment of the faculty that this process will require at least 45 hours per credit earned.
SCHOOL OF MEDICINE

For information concerning the course of study and admission to the Frank H. Netter MD School of Medicine, see the School of Medicine (p. 323) page or contact the Office of Admissions at 203-582-7766. Interested students also can visit the Quinnipiac Frank H. Netter MD School of Medicine (http://www.nettersom.qu.edu) webpage.

Nursing is a profession based on science, a culture of compassion, commitment to best practices, and connection to individuals. The practice of nursing is research-based, goal-directed, creative and concerned with the health and dignity of the whole person. The art of delivering quality nursing care depends upon the successful mastery and application of intellectually rigorous nursing knowledge.

Mission Statement

To provide leadership in nursing and health care through innovative undergraduate and graduate education that embraces holism, interprofessionalism and inclusivity.

Vision

To prepare transformational leaders in health care.

Values

School of Nursing values include:

- diversity of ideas, persons and cultures
- supportive learning environments
- scholarly undertakings to advance education and practice
- ethical conduct in personal and professional arenas
- holistic nursing across the spectrum of health care
- interprofessional education and collaboration
- innovative learning methodologies
- systematic assessment and evaluation
- lifelong learning

Transforming health care . . . one student at a time

- Master of Science in Nursing (p. 487)
  - Post-bachelor’s study
    - Adult-Gerontology Nurse Practitioner (p. 488)
    - Family Nurse Practitioner (p. 490)
    - Operational Leadership (p. 491)
    - RN to MSN Completion program (p. 493)
- Doctor of Nursing Practice (p. 479)
  - Post-bachelor’s study

Doctor of Nursing Practice (DNP)

Program Contact: Laima Karosas (Laima.Karosas@quinnipiac.edu)
203-582-5366

The DNP program aims to prepare graduates for advanced nursing practice who are capable of providing holistic health care for diverse individuals, families or populations in a variety of settings.

Post-Bachelor’s Program

Students who are registered nurses and have a bachelor’s degree may pursue doctoral training in nurse anesthesia. All students in the Post-Bachelor’s Nurse Anesthesia program are full time and complete the degree in three years. Clinical experience is graduated throughout the program, beginning with part time hours and ending with full time hours plus a call rotation.

1. Nurse Anesthesia (p. 482)

Post-Master’s Program

For students with a master’s degree in nursing or a related field, the post-master’s doctoral option offers an opportunity to advance career goals in one of three online programs:

1. Care of Populations (p. 483)
2. Nursing Leadership (p. 484)
3. Nurse Practitioner (p. 486)

Students in the Care of Populations program focus on public health and health care system analysis, which is useful for systematic chronic disease management and health care services design. Students in the Nursing Leadership program may come with or without past experiences in management. The courses prepare students for leadership responsibilities and roles across the health care field. The nurse practitioner program is open only to graduates of the MSN within two years of graduation. This program enhances a novice nurse practitioner’s knowledge and leadership skills.
Student Learning Outcomes

The objectives of the DNP program are designed to prepare graduates for advanced nursing practice who are capable of providing holistic health care for diverse individuals, families or populations in a variety of settings. Specifically, the program seeks to produce graduates who:

1. **Demonstrate** clinical reasoning through an understanding of science and evidence-based practice.
2. **Design, implement and evaluate** quality improvement initiatives across the systems in which health care is delivered.
3. **Analyze and critique** the available evidence for best practices in health care.
4. **Apply** technology and information fluency to conduct practice inquiry.
5. **Advocate** for rational health policies to improve patient care and enhance effective use of resources.
6. **Demonstrate** leadership through inter-professional collaboration to improve patient and population health outcomes.
7. **Direct** health promotion and disease prevention efforts to improve patient and population health outcomes.
8. **Provide** competent, culturally sensitive, and ethically based care to individuals and/or populations in a defined specialty of advanced nursing practice.

**Doctor of Nursing Practice programs**

**Post-bachelor's study**
- Nurse Anesthesia (p. 481)

**Post-master's study**
- Care of Populations (p. 483)
- Nursing Leadership (p. 484)
- Nurse Practitioner (p. 486)

**Admission Requirements**

Applicants to the Nurse Anesthesia program must be registered nurses with two years of recent (within the past five years) critical care experience. An undergraduate cumulative GPA of 3.0 or better is required. Additionally, applicants to the post-master’s programs must have a master’s degree in nursing or a related field. Post-master’s applicants are required to provide a letter from their prior master’s program detailing the total number of supervised clinical hours they completed as part of that program. Applicants should submit the following to the Office of Graduate Admissions:

1. A completed admissions application including a resume and a personal statement addressing the following:
   a. professional goals and motivations;
   b. a nursing experience that has influenced or shaped your practice;
   c. a health care problem that interests you for potential doctoral study.
2. Official transcripts from all schools previously attended.
3. Official recent results of the Test of English as a Foreign Language (TOEFL) or (IELTS) International English Language Testing System for international applicants.
4. Two letters of recommendation from persons with authority to evaluate your professional ability.
5. Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.
6. Letter from applicant’s prior master’s program detailing the number of supervised clinical hours completed as part of that program (for post-master’s DNP applicants only).

Candidates applying for full-time admission for the fall term must submit a completed application by July 1 for the Post-MSN programs or October 15 for the Post-Bachelor’s Nurse Anesthesia program. Candidates may be on a wait list for the fall in the event a space becomes available. However, acceptances are not deferred to the following fall and wait listed candidates need to reapply for the following fall. Exceptions may be made in rare circumstances by the chair of the graduate nursing program.

All accepted students also will be required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptances are conditional until satisfactory completion of both.

**Transfer Credits**

Graduate course credit completed with a grade of B or better at another regionally accreditation institution may be considered for transfer credit in place of a similar course. Courses must be at the same level (i.e., an undergraduate course may not be transferred in place of a master’s level course) and taken within the past five years. Transfer credit is granted upon admission to the program only. The course description and/or syllabus and a copy of the transcript with a request for transfer credit must be sent/emailed to the chair of the graduate nursing programs. The Nurse Anesthetist program may accept transfer credit only for these graduate nursing core courses: NUR 514, NUR 516 and NUR 602.

When all application materials are received, an interview with the graduate nursing program director and/or member of the faculty will be arranged for eligible candidates.

**DNP Project**

Upon admission, students are assigned an adviser, who meets with them for academic and scholarly advising over the course of the program. All students in the DNP program engage in scholarly inquiry through a variety of projects in core and specialty courses and in the DNP Project. The DNP Project is conducted in NUR 610DE/NUR 610PBL and NUR 612DE/NUR 612PBL and, based on the AACN’s "Doctor of Nursing Practice: Current Issues and Clarifying Recommendations," it:

- focuses on a change that impacts health care outcomes either through direct or indirect care
- has a systems or population/aggregate focus
- demonstrates implementation in the appropriate arena or area of practice
- includes a plan for sustainability
- includes an evaluation of processes and/or outcomes
- provides a foundation for future practice scholarship

The DNP project is evaluated by the DNP project team, which consists of the faculty members who are teaching in the two courses as well as the student’s liaison at the practice site and a subject matter expert. For example, all nurse anesthesia students have a nurse anesthesia faculty member on their DNP project team. In addition, students maintain an electronic portfolio where they place their final papers from NUR 610 and NUR 612 and a crosswalk table. The crosswalk table summarizes key assignments that demonstrate how each student achieved the program.
outcomes. The electronic portfolio is discussed at advisement meetings and the crosswalk table is graded pass/fail by the student’s adviser.

**Post-Bachelor’s DNP: Nurse Anesthesia**

Program Contact: Karita Kack (Karita.Kack@qu.edu) 203-582-7969

The curriculum of the Nurse Anesthesia program offers entry-level post-bachelor’s to DNP and post-master's CRNA to DNP degree options. The curricula and policies were developed in accordance with The Essentials of Doctoral Education for Advanced Nursing Practice (AACN) and the Standards for Accreditation of Nurse Anesthesia Educational Programs (COA). Core DNP courses taught by experienced nursing faculty and members of the Department of Biomedical Sciences and Health Sciences will be shared collaboratively with the other advanced practice DNP candidates. Nurse anesthesia students receive a strong science foundation as well as course content including patient safety and human factors as outlined in the standards.

The program's goal—to develop knowledgeable, caring and compassionate nurse anesthetists who are committed to excellence in health care, preserving the dignity and rights of patients and advancing the profession—is congruent with the Quinnipiac University mission statement. The nurse anesthesia specialty is organized within the School of Nursing. The DNP program builds on the generalist preparation of the bachelor's-prepared nurse in the context of the DNP program in the School of Nursing. The DNP program is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

Prerequisites for entrance: undergraduate anatomy and physiology with labs (8 credits); chemistry: inorganic and organic (8 credits); microbiology (3–4 credits); pharmacology (3–4 credits); and statistics (3 credits).

Clinical practicum—6 semesters—approximate hours: 2,000.

**Curriculum Note:**

NUR 612PBL (DNP Project II) is repeated for 1 credit each semester until the DNP project is complete.

The semester-by-semester Learning Pathway for this program is available in the School of Nursing.

The curriculum for this program is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

**Student Learning Outcomes**

The objectives of the DNP program are designed to prepare graduates for advanced nursing practice who are capable of providing holistic health care for diverse individuals, families or populations in a variety of settings. Specifically, the program seeks to produce graduates who:
Admission Requirements

An applicant to the DNP program must be a registered nurse or NCLEX eligible nurse and have a bachelor’s degree in nursing or another field. Applicants to the Nurse Anesthesia program must be registered nurses with two years of recent (within the past five years) critical care field. Applicants to the Nurse Anesthesia program must be registered eligible nurse and have a bachelor’s degree in nursing or another field. An applicant to the DNP program must be a registered nurse or NCLEX eligible nurse and have a bachelor’s degree in nursing or another field. Applicants to the Nurse Anesthesia program must be registered eligible nurse and have a bachelor’s degree in nursing or another field.

1. **Demonstrate** clinical reasoning through an understanding of science and evidence-based practice.
2. **Design, implement and evaluate** quality improvement initiatives across the systems in which health care is delivered.
3. **Analyze and critique** the available evidence for best practices in health care.
4. **Apply** technology and information fluency to conduct practice inquiry.
5. **Advocate** for rational health policies to improve patient care and enhance effective use of resources.
6. **Demonstrate** leadership through interprofessional collaboration to improve patient and population health outcomes.
7. **Direct** health promotion and disease prevention efforts to improve patient and population health outcomes.
8. **Provide** competent, culturally sensitive, and ethically based care to individuals and/or populations in a defined specialty of advanced nursing practice.

**Nurse Anesthesia Progression Requirements**

In all of the nurse anesthesia courses (BMS 518, PY 501, NUR 517/NUR 517L, NUR 670, NUR 672, NUR 674, NUR 676, NUR 678, NUR 680, NUR 682, NUR 684, NUR 686, NUR 688, NUR 690, NUR 696, NUR 698) a minimum grade of B (83) in each nurse anesthesia course independent of cumulative GPA is required to progress in the program. If a student earns a grade below a B (83) in one nurse anesthesia course, but has a semester GPA of at least 3.0, the student will be placed on academic probation and will be required to retake the course when it is offered again at Quinnipiac University. Any grade below a C (73-76) in a nurse anesthesia course will result in dismissal from the nurse anesthesia program without probation and without the opportunity to repeat the deficient course.

Since nurse anesthesia courses are in sequence and no course may be taken ahead of any of its prerequisites, a student with a grade below a B (83) in an anesthesia course will not be allowed to 1) take any nurse anesthesia courses for which the deficient course is a prerequisite and 2) participate in the clinical practicum until the deficient course is successfully completed with a minimum grade of B (83). Thus the student will be placed in another student cohort and the student’s program completion date will be delayed.

Only one period of probation is permitted. The student must achieve a minimum grade of B (83) in all subsequent courses, health assessments, and practicums. Failure to meet this requirement will result in dismissal from the program without option to repeat or continue.

A student who earns unsatisfactory grades (grade of less than B) in two or more nursing courses in any semester is not eligible for probation and will be dismissed from the program. Any student who does not earn the required minimum 3.0 semester GPA will be dismissed from the program.

If a student believes his/her final grade was determined in an arbitrary, capricious or prejudicial manner, the student may appeal the sanction of probation or dismissal by following the procedure to appeal a final grade that is stated in the Quinnipiac University Catalog. Only final grades can be appealed. If the grade appeal process results in a recalculated grade of B (83) or higher and the student does not have any other academic deficiencies, then the sanction of probation or dismissal is removed and the student may continue to progress in the program in the semester following the conclusion of the grade appeal process.

If a dismissed student believes there are errors in the facts considered by the nurse anesthesia program or extenuating circumstances, the student may appeal the progression decision according to policies in the School of Nursing Graduate Student Manual.

**Appeal Process**

1. A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of his/her inability to progress.
2. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
3. A student wishing to appeal a course grade should follow the grade appeal process (p. 122).
Post-Master’s DNP: Care of Populations

Program Contact: Laima Karosas (laima.karosas@qu.edu) 203-582-5366

The Post-Master’s Care of Population program is for master’s prepared nurses who want to further develop population health management skills. In addition to the DNP core classes, a select group of classes explore health care systems, organizational dynamics, and population-focused inquiry. 480 hours of field experience related to the student’s interest enhance learning.

Total Credits 31

Curriculum Note:

NUR 612PBL (DNP Project II) is repeated for 1 credit each semester until the DNP Project is completed.

NUR 621 (Post-Master’s Additional Graduate Clinical – 1-4 credits) is required if additional fieldwork credits are needed. Note: this course is mandatory for students who need hours to meet the 1,000-hour DNP program requirement.

A one-day, on-campus residency is required prior to graduation.

The semester-by-semester Learning Pathway for this program is available in the School of Nursing.

The curriculum for this program is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

Student Learning Outcomes

The objectives of the DNP program are designed to prepare graduates for advanced nursing practice who are capable of providing holistic health care for diverse individuals, families or populations in a variety of settings. Specifically, the program seeks to produce graduates who:

1. Demonstrate clinical reasoning through an understanding of science and evidence-based practice.
2. Design, implement and evaluate quality improvement initiatives across the systems in which health care is delivered.
3. Analyze and critique the available evidence for best practices in health care.
4. Apply technology and information fluency to conduct practice inquiry.
5. Advocate for rational health policies to improve patient care and enhance effective use of resources.
6. Demonstrate leadership through inter-professional collaboration to improve patient and population health outcomes.
7. Direct health promotion and disease prevention efforts to improve patient and population health outcomes.
8. Provide competent, culturally sensitive, and ethically based care to individuals and/or populations in a defined specialty of advanced nursing practice.

Admission Requirements

An applicant to the post-master’s programs must have a master’s degree in nursing or a related field. Post-master’s applicants are required to provide a letter from their prior master’s program detailing the total number of supervised clinical hours they completed as part of that program. Download the form (https://quonline.quinnipiac.edu/documents/DNP_Practice_Verification.pdf) (PDF) Applicants should submit the following to the Office of Graduate Admissions:

1. A completed admissions application including a resume and a personal statement addressing the following:
   a. professional goals and motivations
   b. a nursing experience that has influenced or shaped your practice
   c. a health care problem that interests you for potential doctoral study
2. Official transcripts from all schools previously attended.
3. Official recent results of the Test of English as a Foreign Language (TOEFL) or (IELTS) International English Language Testing System for international applicants.
4. Two letters of recommendation from persons with authority to evaluate your professional ability.
5. Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.
6. Letter from applicant’s prior master’s program detailing the number of supervised clinical hours completed as part of that program.

Candidates applying for full-time admission for the fall term must submit a completed application by July 1.

All accepted students will be required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptance will be conditional until satisfactory completion of both.
Progression Requirements

Students are expected to take courses in the order they are presented on the curriculum pathways. Any student wishing to take a course out of sequence must seek permission from the graduate program chair.

According to Quinnipiac University policy, all graduate students are expected to maintain a grade point average (GPA) of at least 3.0 on a 4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA each semester. Part-time graduate students must have an overall GPA of 3.0 upon completion of 9 credits and must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B minus grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and the subsequent curriculum sequence are offered and must achieve a B minus or better. The student must achieve a minimum grade of a B minus in all subsequent nursing courses. Failure to meet this requirement will result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B minus) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

A student who receives a grade of Incomplete (I) in any nursing course must meet all course requirements for conversion to a grade before the start of the subsequent semester.

For post-master’s students, transfer students, or students returning from an elective leave of absence during their course of study, selected courses must have been completed within five years.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student in writing, of the student’s failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation; b) suspended; or c) dismissed. Students placed on academic probation must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B minus grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and the subsequent curriculum sequence are offered and must achieve a B minus or better. The student must achieve a minimum grade of a B minus in all subsequent nursing courses. Failure to meet this requirement will result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B minus) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

Appeal Process

1. A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of his/her inability to progress.
2. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
3. A student wishing to appeal a course grade should follow the grade appeal process (p. 122).

Post-Master’s DNP: Nursing Leadership

Program Contact: Laima Karosas (laima.karosas@qu.edu) 203-582-5366

The Post-Master’s Nursing Leadership program provides leadership development for master’s prepared nurses who aspire to assume or who currently hold leadership positions. In addition to the DNP core classes, a select group of classes explore health care systems and leadership roles and attributes. Students gain 480 hours of field experience related to the their interests to enhance learning and allow them to learn from leaders in the field.

7. **Direct** health promotion and disease prevention efforts to improve patient and population health outcomes.
8. **Provide** competent, culturally sensitive and ethically based care to individuals and/or populations in a defined specialty of advanced nursing practice.

**Admission Requirements**

An applicant to the post-master’s programs must have a master’s degree in nursing or a related field. Post-master’s applicants are required to provide a letter from their prior master’s program detailing the total number of supervised clinical hours they completed as part of that program. Applicants should submit the following to the Office of Graduate Admissions:

1. A completed admissions application including a resume and a personal statement addressing the following:
   a. professional goals and motivations
   b. a nursing experience that has influenced or shaped your practice
   c. a health care problem that interests you for potential doctoral study
2. Official transcripts from all schools previously attended.
3. Official recent results of the Test of English as a Foreign Language (TOEFL) or (IELTS) International English Language Testing System for international applicants.
4. Two letters of recommendation from persons with authority to evaluate your professional ability.
5. Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.
6. Letter from applicant’s prior master’s program detailing the number of supervised clinical hours completed as part of that program.

Candidates applying for full-time admission for the fall term must submit a completed application by July 1.

All accepted students will be required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptance will be conditional until satisfactory completion of both.

**Progression Requirements**

Students are expected to take courses in the order they are presented on the curriculum pathways. Any student wishing to take a course out of sequence must seek permission from the graduate program chair.

According to Quinnipiac University policy, all graduate students are expected to maintain a grade point average (GPA) of at least 3.0 on a 4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA each semester. Part-time graduate students must have an overall GPA of 3.0 upon completion of 9 credits and must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B minus grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and the subsequent curriculum sequence are offered and must achieve a B minus or better. The student must achieve a minimum grade of a B minus in all subsequent nursing courses. Failure to meet this requirement will result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B minus) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

A student who receives a grade of Incomplete (I) in any nursing course must meet all course requirements for conversion to a grade before the start of the subsequent semester.

For post-master’s students, transfer students, or students returning from an elective leave of absence during their course of study, selected courses must have been completed within five years.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student in writing, of the student’s failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation; b) suspended; or c) dismissed. Students placed on academic probation remain in their program but must take specified corrective action to meet program performance standards. Students should meet with their advisers to identify learning strategies to help them accomplish these goals and the student should draft a list or narrative of these strategies, which will serve as a learning contract. A copy of this contract will be placed in the student’s folder and should be reviewed periodically with their adviser. Students must demonstrate a significantly increased GPA at the end of that semester in order to continue in the program. Students placed on suspension may also need to take specified actions as directed by the academic dean, graduate nursing program chair or academic adviser.

**Appeal Process**

1. A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of his/her inability to progress.
2. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
3. A student wishing to appeal a course grade should follow the grade appeal process (p. 122).

***Post-Master’s DNP: Nurse Practitioner***

Program Contact: Laima Karosas (laima.karosas@qu.edu) 203-582-5366

The Post-Master’s Nurse Practitioner DNP program is open only to graduates of the Quinnipiac University School of Nursing Adult-Gerontology (AGNP) or Family Nurse Practitioner (FNP) Master of Science in Nursing (MSN) programs. Students who have completed the AGNP or FNP MSN program may continue seamlessly into the DNP within two years of MSN graduation. Newly graduated nurse practitioners may begin to practice and continue on for their DNP without having to reapply. The curriculum is online and follows the standards set by the American Nurses Association and the American Association of Colleges of Nursing. It provides 480 hours of fieldwork which includes the DNP project and either a leadership or care of populations focus. This program is geared toward enhancing the practice of novice nurse practitioners and, therefore, students work closely with their advisors to choose courses supportive of their practice needs.

**Curriculum Note:**

Sample curriculum, 30 credits required.

NUR 612PBL (DNP Project II) is repeated for one credit each semester until the DNP Project is completed.

Choose between a population focus (NUR 620, NUR 622 and NUR 623 required) or Leadership (NUR 613, NUR 615 and NUR 617 required).

The semester-by-semester Learning Pathway for this program is available in the School of Nursing.

The curriculum for this program is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

### Student Learning Outcomes

The objectives of the DNP program are designed to prepare graduates for advanced nursing practice who are capable of providing holistic health care for diverse individuals, families or populations in a variety of settings. Specifically, the program seeks to produce graduates who:

1. **Demonstrate** clinical reasoning through an understanding of science and evidence-based practice.
2. **Design, implement and evaluate** quality improvement initiatives across the systems in which health care is delivered.
3. **Analyze and critique** the available evidence for best practices in health care.
4. **Apply** technology and information fluency to conduct practice inquiry.
5. **Advocate** for rational health policies to improve patient care and enhance effective use of resources.
6. **Demonstrate** leadership through inter-professional collaboration to improve patient and population health outcomes.
7. **Direct** health promotion and disease prevention efforts to improve patient and population health outcomes.
8. **Provide** competent, culturally sensitive, and ethically based care to individuals and/or populations in a defined specialty of advanced nursing practice.

### Admission Requirements

An applicant to the post-master’s programs must have a master’s degree in nursing or a related field. Post-master’s applicants are required to provide a letter from their prior master’s program detailing the total number of supervised clinical hours they completed as part of that program. Download the form (https://quonline.quinnipiac.edu/documents/DNP_Practice_Verification.pdf) (PDF) Applicants should submit the following to the Office of Graduate Admissions:

1. A completed admissions application including a resume and a personal statement addressing the following:
   a. professional goals and motivations
   b. a nursing experience that has influenced or shaped your practice
   c. a health care problem that interests you for potential doctoral study
2. Official transcripts from all schools previously attended.
3. Official recent results of the Test of English as a Foreign Language (TOEFL) or International English Language Testing System for international applicants.
4. Two letters of recommendation from persons with authority to evaluate your professional ability.
5. Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.
6. Letter from applicant’s prior master’s program detailing the number of supervised clinical hours completed as part of that program.

Candidates applying for full-time admission for the fall term must submit a completed application by July 1.

All accepted students will be required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptance will be conditional until satisfactory completion of both.

**Progression Requirements**

Students are expected to take courses in the order they are presented on the curriculum pathways. Any student wishing to take a course out of sequence must seek permission from the graduate program chair.

According to Quinnipiac University policy, all graduate students are expected to maintain a grade point average (GPA) of at least 3.0 on a 4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA each semester. Part-time graduate students must have an overall GPA of 3.0 upon completion of 9 credits and must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B minus grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and the subsequent curriculum sequence are offered and must achieve a B minus or better. The student must achieve a minimum grade of a B minus in all subsequent nursing courses. Failure to meet this requirement will result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B minus) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

A student who receives a grade of Incomplete (I) in any nursing course must meet all course requirements for conversion to a grade before the start of the subsequent semester.

For post-master’s students, transfer students, or students returning from an elective leave of absence during their course of study, selected courses must have been completed within five years.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student in writing of the student’s failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation; b) suspended; or c) dismissed. Students placed on academic probation remain in their program but must take specified corrective action to meet program performance standards. Students should meet with their advisers to identify learning strategies to help them accomplish these goals and the student should draft a list or narrative of these strategies, which will serve as a learning contract. A copy of this contract will be placed in the student’s folder and should be reviewed periodically with their adviser. Students must demonstrate a significantly increased GPA at the end of that semester in order to continue in the program. Students placed on suspension may also need to take specified actions as directed by the academic dean, graduate nursing program chair or academic adviser.

**Appeal Process**

1. A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of his/her inability to progress.
2. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
3. A student wishing to appeal a course grade should follow the grade appeal process (p. 122).

**Master of Science in Nursing**

Program Contact: Laima Karosas (laima.karosas@qu.edu) 203-582-5366

Students who are registered nurses and have a bachelor’s degree may pursue master’s degree training. Four programs are available: Adult-Gerontology Nurse Practitioner (p. 488), Family Nurse Practitioner (p. 490), Operational Leadership (p. 491) and RN to MSN (p. 493).

For nurses who would like to become nurse practitioners, the Master of Science in Nursing (MSN) degree program is designed for working nurses who want to further their education and expand their credentials without sacrificing hands-on experience through clinical practice. This innovative program accommodates your schedule as well as your specific academic and career goals. Depending on your area of interest, you can choose between two specialized programs: adult-gerontology or family nurse practitioner. Within two years of completing your MSN, you have the option of seamlessly transitioning into the online Doctor of Nursing Practice (DNP) program, without losing any credits or duplicating any coursework.

The Operational Leadership program prepares nurses for operational leadership roles in health care institutions and settings. The program offers courses in health policy, organizational leadership, adult learning strategies, epidemiology, biostatistics, health care finance, informatics, health care management, the uses of data in evaluating practice, human factor analysis, and informational technology project management. The program also makes use of three courses from the Doctor of Nursing Practice (DNP) program, and provides 360 hours of practicum experience. Graduates who wish to continue their education are placed to pursue a clinical doctorate in nursing. The program was designed to provide some of the content required to sit for board certification in Nursing Professional Development or informatics, both offered by the American Nurses Credentialing Center (ANCC). Graduates of this program are prepared to assume positions of middle management, informatics and leadership in a variety of health care settings. Graduates also are qualified to teach undergraduate nursing students in clinical or laboratory courses.

**Student Learning Outcomes**

Graduates of the MSN program are prepared for higher level professional practice and leadership roles in a variety of health care settings, as well as advanced study at the doctoral level.

Specifically, graduates will be able to:
1. **Incorporate** knowledge from the sciences and humanities for improvement of health care across diverse settings.

2. **Demonstrate** leadership abilities encompassing ethical and critical decision-making that embraces a systems perspective.

3. **Apply** appropriate measurement and analysis methods related to organizational quality and safety.

4. **Apply** evidence-based findings to resolve practice problems, and serve as a catalyst for change.

5. **Use** informatics and health care technology to integrate and coordinate care.

6. **Participate** in policy development and advocacy strategies at the system level to influence health and health care.

7. **Collaborate** effectively on interprofessional teams to improve health outcomes.

8. **Integrate** principles of clinical and population health into care delivery and management.

9. **Deliver** direct and/or indirect nursing practice interventions at the master’s level of practice.

**Master of Science in Nursing Programs**

1. Adult Gerontology Nurse Practitioner (p. 488)

2. Family Nurse Practitioner (p. 490)

3. Operational Leadership (p. 491)

4. RN to MSN (p. 493)

**Admission Requirements**

An applicant to the Master of Science in Nursing program must be a registered nurse or NCLEX eligible nurse and have a bachelor's degree in nursing or another field. An undergraduate cumulative GPA of 3.0 or better is required.

Applicants should submit the following to the Office of Graduate Admissions:

1. A completed admissions application including a resume and a personal statement addressing the following:
   a. professional goals and motivations
   b. a nursing experience that has influenced or shaped your practice
   c. a health care problem that interests you

2. Official transcripts from all schools previously attended.

3. Official recent results of the Test of English as a Foreign Language (TOEFL) or (IELTS) International English Language Testing System for international applicants.

4. Two letters of recommendation from persons with authority to evaluate your professional ability.

5. Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.

The preferred application deadline is May 1. Applications will be considered after May 1 on a space-available basis. Candidates may be placed on a wait list for Fall admission should space become available. However, acceptances are not deferred to the following Fall. Exceptions may be made in rare circumstances by the chair of the graduate nursing program. When all application materials are received, an interview with the graduate nursing program director and/or member of the faculty will be arranged for eligible candidates.

All accepted students also are required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptances are conditional until satisfactory completion of both.

**Transfer Credits**

Graduate course credit completed with a grade of B or better at another regionally accreditation institution may be considered for transfer credit in place of a similar course. Courses must be at the same level (i.e., an undergraduate course may not be transferred in place of a master's level course) and taken within the past five years. Transfer credit is granted upon admission to the program only. The course description and/or syllabus and a copy of the transcript with a request for transfer credit must be sent/emailed to the chair of the graduate nursing programs. The Nurse Anesthetist program may accept transfer credit only for the graduate nursing core courses, NUR 514, NUR 516, NUR 602.

**Master of Science in Nursing: Adult-Gerontology Nurse Practitioner**

Program Contact: Susan D’Agostino
(Susan.DAgostino@qu.edu) 203-582-8882

In the Adult-Gerontology Nurse Practitioner program, you’ll develop the necessary skills to provide high-quality, cost-effective primary care across the lifespan from adolescence to geriatrics. This program can be completed either as a full-time or part-time program, requiring a two or three year commitment, respectively. Completion of this program makes you eligible to take a national certification exam for adult-gerontology nurse practitioners.

should submit the following to the Office of Graduate Admissions:

An undergraduate cumulative GPA of 3.0 or better is required. Applicants
who apply as international applicants.

Specifically, graduates will be able to:

1. Demonstrate leadership abilities encompassing ethical and critical
decision-making that embraces a systems perspective.
2. Apply appropriate measurement and analysis methods related to
organizational quality and safety.
3. Apply evidence-based findings to resolve practice problems, and
serve as a catalyst for change.
4. Use informatics and health care technology to integrate and
coordinate care.
5. Participate in policy development and advocacy strategies at the
system level to influence health and health care.
6. Collaborate effectively on interprofessional teams to improve health
outcomes.
7. Integrate principles of clinical and population health into care delivery
and management.
8. Deliver direct and/or indirect nursing practice interventions at the
master’s level of practice.

Student Learning Outcomes

Graduates of the MSN program are prepared for higher level professional
practice and leadership roles in a variety of health care settings, as well as
advanced study at the doctoral level.

Specifically, graduates will be able to:

1. Incorporate knowledge from the sciences and humanities for
improvement of health care across diverse settings.
2. Demonstrate leadership abilities encompassing ethical and critical
decision-making that embraces a systems perspective.
3. Apply appropriate measurement and analysis methods related to
organizational quality and safety.
4. Apply evidence-based findings to resolve practice problems, and
serve as a catalyst for change.
5. Use informatics and health care technology to integrate and
coordinate care.
6. Participate in policy development and advocacy strategies at the
system level to influence health and health care.
7. Collaborate effectively on interprofessional teams to improve health
outcomes.
8. Integrate principles of clinical and population health into care delivery
and management.
9. Deliver direct and/or indirect nursing practice interventions at the
master’s level of practice.

Admission Requirements

An applicant to the MSN program must be a registered nurse or NCLEX
eligible nurse and have a bachelor’s degree in nursing or another field. An
undergraduate cumulative GPA of 3.0 or better is required. Applicants
should submit the following to the Office of Graduate Admissions:

1. A completed admissions application including a resume and a
personal statement addressing the following:
   a. professional goals and motivations
   b. a nursing experience that has influenced or shaped your practice
   c. a health care problem that interests you for potential doctoral study
2. Official transcripts from all schools previously attended.
3. Official recent results of the Test of English as a Foreign Language
(TOEFL) or (IELTS) International English Language Testing System for
international applicants.
4. Two letters of recommendation from persons with authority to
evaluate your professional ability.
5. Proof of current licensure or eligibility for licensure as a registered
nurse in the state of Connecticut.

Candidates applying for full-time admission for the fall term must submit
a completed application by May 1. Candidates may be on a wait list for
the fall in the event a space becomes available. However, acceptances
are not deferred and wait listed candidates need to reapply for the
following fall. Exceptions may be made in rare circumstances by the chair
of the graduate nursing program.

All accepted students also will be required to complete a background
check and urine drug screen following acceptance and before the start of
classes. Acceptances will be conditional until satisfactory completion of
both.

Progression Requirements

Students are expected to take courses in the order they are presented
on the curriculum pathways. Any student wishing to take a course
out of sequence must seek permission from the graduate program
chair. To preserve quality in our clinical placements, we are not able to
accommodate a change in program specialty except on a space-available
basis. If a change is desired, students should speak with the graduate
program director early in the curriculum to check on any opportunities for
change and be placed on a waiting list, if necessary.

According to Quinnipiac University policy, all graduate students are
expected to maintain a grade point average (GPA) of at least 3.0 on a
4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA
each semester. Part-time graduate students must have an overall GPA of
3.0 upon completion of 9 credits and must maintain a cumulative GPA
of 3.0 thereafter. The grading scale of the Graduate Nursing Program is
consistent with that of the university.

A student who earns less than a B minus grade in any nursing course
will not progress into the next semester. The student is allowed to repeat
the course once at Quinnipiac University provided that the course and
the subsequent curriculum sequence are offered and must achieve a B
minus or better. The student must achieve a minimum grade of a B minus
in all subsequent nursing courses. Failure to meet this requirement will
result in dismissal from the program. A student who earns unsatisfactory
grades (grade of less than B minus) in two or more nursing courses in
any semester is not eligible to repeat the courses and will be required to
withdraw from the program.

In clinical practica, students must receive a grade of B minus or better
on the final faculty and preceptor clinical evaluations in order to pass the
course and progress into the next semester. If a student is not performing
satisfactorily in clinical according to the preceptor and/or faculty site
visitor, a final faculty visit and evaluation of clinical performance will be
made by a full-time faculty member, and this final grade must be B minus
or better to pass the course.

A student who receives a grade of Incomplete (I) in any nursing courses
or practica must meet all course requirements for conversion to a grade
before the start of the subsequent semester.

For post-master’s students, transfer students, or students returning
from an elective leave of absence during their course of study, selected
courses must have been completed within a specified period of time. For
Pathophysiology, credit will be recognized if the course was taken during
the previous five years. For Advanced Health Assessment, Pharmacology
and any program specialty course, credit will be recognized if the
course was taken during the previous three years. For any of these
courses which do not meet the specified period of time, the course
must be re-taken for credit. Students may be asked to audit courses
if the interruption to the continuity of their curriculum plan has been
significant.

At the end of each semester, the chair of the graduate nursing programs
reviews the cumulative GPA and academic record of graduate nursing
students. The graduate nursing program chair will notify both the
associate dean and the student in writing, of the student's failure to
meet the academic requirements. Students who are performing at an
unsatisfactory level will be: a) placed on probation; b) suspended; or
c) dismissed. Students placed on academic probation remain in their
program but must take specified corrective action to meet program
performance standards. Students should meet with their advisers to
identify learning strategies to help them accomplish these goals and
the student should draft a list or narrative of these strategies, which will
serve as a learning contract. A copy of this contract will be placed in
the student's folder and should be reviewed periodically with their adviser.

Students must demonstrate a significantly increased GPA at the end of
that semester to continue in the program. Students placed on suspension
may also need to take specified actions as directed by the academic
dean, graduate nursing program chair or academic adviser.

**Appeal Process**

1. A student wishing to appeal a progression decision must write a
   letter to the chair of the graduate nursing program within one week of
   receiving notice of his/her inability to progress.
2. Appeals will be considered by a Faculty Appeals Committee and
   results will be communicated in writing to the student.
3. A student wishing to appeal a course grade should follow the grade
   appeal process (p. 122).

**Master of Science in Nursing: Family Nurse Practitioner**

Program Contact: Susan D'Agostino
(Susan.DAgostino@qu.edu) 203-582-8882

The Family Nurse Practitioner program prepares you to diagnose
and manage most common illnesses for patients of all ages and
to assume the responsibility inherent in prescribing medications.
After graduation, you'll be eligible to sit for the national family nurse
practitioner certification exam. This program can be completed either
part-time or full-time, and enables graduates to significantly expand their
current roles as advanced practice nurse in a multitude of health care
settings.

MSN Operational Leadership (online)
Program Contact: Laima Karosas (laima.karosas@qu.edu) 203-582-5366
Graduates of the MSN program are prepared for higher level professional practice and leadership roles in a variety of health care settings, as well as advanced study at the doctoral level.

The Operational Leadership program prepares nurses for operational leadership roles in health care institutions and settings. The program offers courses in health policy, organizational leadership, adult learning strategies, epidemiology, biostatistics, health care finance, informatics, health care management, the uses of data in evaluating practice and human factor analysis. The program also makes use of three courses from the Doctor of Nursing Practice (DNP) program, and provides 360 hours of practicum experience. Graduates who wish to continue their education are well positioned to pursue a clinical doctorate in nursing. The program provides a portion of the content required for eligibility to sit for board certification in Nursing Professional Development or Informatics, both offered by the American Nurses Credentialing Center (ANCC). Graduates of this program are prepared to assume positions of management, informatics and leadership in a variety of health care settings. Graduates also are qualified to teach undergraduate nursing students in clinical or laboratory courses.

Curriculum Note:

The semester-by-semester Learning Pathway for this program is available in the School of Nursing.

The curriculum for this program is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

### Student Learning Outcomes

Graduates of the MSN program are prepared for higher level professional practice and leadership roles in a variety of health care settings, as well as advanced study at the doctoral level.

Specifically, graduates will be able to:

1. **Incorporate** knowledge from the sciences and humanities for improvement of health care across diverse settings.
2. **Demonstrate** leadership abilities encompassing ethical and critical decision-making that embraces a systems perspective.
3. **Apply** appropriate measurement and analysis methods related to organizational quality and safety.
4. **Apply** evidence-based findings to resolve practice problems, and serve as a catalyst for change.
5. **Use** informatics and health care technology to integrate and coordinate care.
6. **Participate** in policy development and advocacy strategies at the system level to influence health and health care.
7. **Collaborate** effectively on interprofessional teams to improve health outcomes.
8. **Integrate** principles of clinical and population health into care delivery and management.
9. **Deliver** direct and/or indirect nursing practice interventions at the master’s level of practice.

### Admission Requirements

An applicant to the Master of Science in Nursing program must be a registered nurse or NCLEX eligible nurse and have a bachelor’s degree in nursing or another field. An undergraduate cumulative GPA of 3.0 or better is required.

Applicants should submit the following to the Office of Graduate Admissions:

1. A completed admissions application including a resume and a personal statement addressing the following:
   a. professional goals and motivations, 
   b. a nursing experience that has influenced or shaped your practice,  
   c. a health care problem that interests you.
2. Official transcripts from all schools previously attended.
3. Official recent results of the Test of English as a Foreign Language (TOEFL) or (IELTS) International English Language Testing System for international applicants.
4. Two letters of recommendation from persons with authority to evaluate your professional ability.
5. Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.

The preferred application deadline is May 1. Applications will be considered after May 1 on a space-available basis. Candidates may be placed on a wait list for Fall admission should space become available. Exceptions may be made in rare circumstances by the chair of the graduate program. When all application materials are received, an interview with the graduate program director and/or member of the faculty will be arranged for eligible candidates.
All accepted students also will be required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptances will be conditional until satisfactory completion of both.

**Transfer Credits**

Graduate course credit completed with a grade of B or better at another regionally accreditation institution may be considered for transfer credit in place of a similar course. Courses must be at the same level (i.e., an undergraduate course may not be transferred in place of a master's level course) and taken within the past five years. Transfer credit is granted upon admission to the program only. The course description and/or syllabus and a copy of the transcript with a request for transfer credit must be sent/emailed to the chair of the graduate nursing programs. The nurse anesthetist programs may accept transfer credit only for the graduate nursing core courses.

**Progression Requirements**

Students are expected to take courses in the order they are presented on the curriculum pathways. Any student wishing to take a course out of sequence must seek permission from the graduate program chair. To preserve quality in our clinical placements, we are not able to accommodate a change in program specialty except on a space-available basis. If a change is desired, students should speak with the graduate program director early in the curriculum to check on any opportunities for change and be placed on a waiting list, if necessary.

According to Quinnipiac University policy, all graduate students are expected to maintain a grade point average (GPA) of at least 3.0 on a 4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA each semester. Part-time graduate students must have an overall GPA of 3.0 upon completion of 9 credits and must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B minus grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and the subsequent curriculum sequence are offered and must achieve a B minus or better. The student must achieve a minimum grade of a B minus in all subsequent nursing courses. Failure to meet this requirement will result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B minus) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

In clinical practica, students must receive a grade of B minus or better on the final faculty and preceptor clinical evaluations in order to pass the course and progress into the next semester. If a student is not performing satisfactorily in clinical according to the preceptor and/or faculty site visitor, a final faculty visit and evaluation of clinical performance will be made by a full-time faculty member, and this final grade must be B minus or better to pass the course.

A student who receives a grade of Incomplete (I) in any nursing courses or practica must meet all course requirements for conversion to a grade before the start of the subsequent semester.

For post-master's students, transfer students, or students returning from an elective leave of absence during their course of study, selected courses must have been completed within a specified period of time. For Pathophysiology, credit will be recognized if the course was taken during the previous five years. For Advanced Health Assessment, Pharmacology and any program specialty course, credit will be recognized if the course was taken during the previous three years. For any of these courses which do not meet the specified period of time, the course must be re-taken for credit. Students may be asked to audit courses if the interruption to the continuity of their curriculum plan has been significant.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student in writing, of the student’s failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation, b) suspended or c) dismissed. Students placed on academic probation remain in their program but must take specified corrective action to meet program performance standards. Students should meet with their advisers to identify learning strategies to help them accomplish these goals and the student should draft a list or narrative of these strategies, which will serve as a learning contract. A copy of this contract will be placed in the student’s folder and should be reviewed periodically with their advisor. Students must demonstrate a significantly increased GPA at the end of that semester to continue in the program. Students placed on suspension may also need to take specified actions as directed by the academic dean, graduate nursing program chair or academic advisor.

**Appeal Process**

1. A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of his/her inability to progress.
2. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
3. A student wishing to appeal a course grade should follow the grade appeal process detailed in the University Catalog.

**RN to MSN Program (online)**

Program Contact: Laima Karosas (laima.karosas@qu.edu) 203-582-5366

The RN to MSN program is designed for individuals who are licensed as registered nurses and interested in pursuing a master's degree in nursing with a focus in operational leadership. At the completion of this two-year program of study, students will obtain both a Bachelor of Science in Nursing (BSN) and a Master of Science in Nursing (MSN). This program is taught using a distance education format through QU Online. The curriculum builds on the individual’s prior educational preparation and incorporates the American Association of Colleges of Nursing (AACN) Essentials of Baccalaureate Education for Professional Nursing Practice as well as the Essentials of Master’s Education in Nursing.

For Advanced Health Assessment, Pharmacology and any program specialty course, credit will be recognized if the course was taken during the previous three years. For any of these courses which do not meet the specified period of time, the course must be re-taken for credit. Students may be asked to audit courses if the interruption to the continuity of their curriculum plan has been significant.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student in writing, of the student's failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation, b) suspended or c) dismissed. Students placed on academic probation remain in their program but must take specified corrective action in order to meet program performance standards. Students should meet with their advisors to identify learning strategies to help them accomplish these goals and the student should draft a list or narrative of these strategies, which will serve as a learning contract. A copy of this contract will be placed in the student’s folder and should be reviewed periodically with their advisor. Students must demonstrate a significantly increased GPA at the end of that semester in order to continue in the program. Students placed on suspension may also need to take specified actions as directed by the academic dean, graduate nursing program chair or academic adviser.

Appeal Process

1. A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of his/her inability to progress.
2. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
3. A student wishing to appeal a course grade should follow the grade appeal process (p. 122).

### Mission Statement

The mission of Quinnipiac University’s online programs is to partner with all university schools and colleges to deliver high-quality, student-centric academic programs in a virtual, collaborative classroom.

### About Online Learning

Quinnipiac University was an early adopter of online learning, having launched its first online programs in 2001. Over the years, Quinnipiac has developed a high level of expertise in the design and delivery of online learning. Online programs allow students to complete their course work weekly without attending class at a scheduled date and time.

In addition to traditional on-campus programs, Quinnipiac University offers online bachelor’s degree completion, master’s degree, doctoral degree and certificate programs through the university’s School of
Quinnipiac University also offers undergraduate courses online during the summer. This popular option allows students to advance in their programs, catch up on required or prerequisite courses or expedite their time to degree completion. For information on summer program offerings, visit Quinnipiac’s (http://quonline.quinnipiac.edu) or (http://quonline.quinnipiac.edu) online programs (http://quonline.quinnipiac.edu) website.

Quinnipiac University’s online programs offer students the best of both worlds by combining convenience and flexibility with an educational community that encourages personal connections, faculty guidance and the opportunity to consult and collaborate with peers.

Quinnipiac University provides dedicated administrative and technical support to students and faculty for all online programs and courses. Support staff members are available seven days a week via telephone or email to assist you. Email quonline@qu.edu (http://quonline.quinnipiac.edu) or call 203-582-3918. The application, along with the appropriate fee, is to be submitted with official transcripts of all college-level work completed at other institutions. Applicants must also submit a personal statement and resume and supply the names and email addresses of two professional or academic references. Individual graduate programs may have additional application requirements.

**International Student Admission**

Applications for graduate study from international students are welcomed.

All applicants from non-English-speaking countries must, in addition to all of the regular admissions requirements, provide TOEFL (Test of English as a Foreign Language) scores (go to ets.org (http://www.ets.org)). In general, a minimum TOEFL iBT score of 90, Internet-based (575 paper-based, 233 computer-based) is required for admission. In lieu of TOEFL, applicants may submit IELTS (International English Language Testing System) scores (go to ielts.org (http://www.ielts.org)). A minimum score of 6.5 on this exam, “B” or above on the CAE (Certificate of Advanced English), or “C” or above on the CPE (Certificate of Proficiency in English) is required. In lieu of TOEFL or IELTS, applicants may submit PTE-A (Pearson Test of English Academic) scores (available at pearsonPTE.com (http://www.pearsonPTE.com)). A minimum PTE-A score of 61 is required. TOEFL, IELTS and PTE scores are valid for two years.

Candidates holding degrees from foreign institutions must provide notarized English translations and an official evaluation of their postsecondary records from an academic credential evaluation service.

**Admission Standards**

Quinnipiac offers a variety of programs online. Please review program specific admission standards by clicking on the appropriate program below:

**Undergraduate Degree Completion Programs**
- Bachelor of Business Administration (p. 224)
- Bachelor of Science in Health Science Studies (p. 291)
- Bachelor of Science in Nursing (RN to BSN) (p. 334)
- RN to MSN in Operational Leadership (p. 493)

**Graduate Programs**
- Master of Business Administration (p. 342)
- Master of Science in Business Analytics (p. 342)
- Master of Science in Cybersecurity (p. 391)
- Master of Science in Instructional Design (p. 342)
- Master of Science in Interactive Media and Communications (p. 342)
- Master of Science in Nursing in Operational Leadership (p. 491)
- Master of Science in Organizational Leadership (p. 342)
- Master of Science in Public Relations (p. 342)
- Master of Science in Special Education (p. 342)
- Master of Science in Teacher Leadership (p. 342)
- Occupational Therapy Doctorate (p. 342)
- Post-Master’s Doctor of Nursing Practice - Care of Populations (p. 342)
- Post-Master’s Doctor of Nursing Practice - Nursing Leadership (p. 342)
- Certificate in Social and Emotional Learning and School Climate (p. 379)
- Certificate of Advanced Graduate Studies in Occupational Therapy (p. 408)
- Graduate Certificate in Online Course Design (p. 388)
- Health Care Compliance Certificate (p. 452)
- Special Education Certificate of Completion (p. 390)

**Academic Policies**

Undergraduate Academic Policies (p. 68)

**Online Admissions**

For information about online admissions, visit (http://quonline.quinnipiac.edu) (http://quonline.quinnipiac.edu) or (http://quonline.quinnipiac.edu) online programs (http://quonline.quinnipiac.edu) website. A minimum score of 68 on this exam, “B” or above on the CAE (Certificate of Advanced English), or “C” or above on the CPE (Certificate of Proficiency in English) is required. In lieu of TOEFL or IELTS, applicants may submit PTE-A (Pearson Test of English Academic) scores (available at pearsonPTE.com (http://www.pearsonPTE.com)). A minimum PTE-A score of 61 is required. TOEFL, IELTS and PTE scores are valid for two years.

Candidates holding degrees from foreign institutions must provide notarized English translations and an official evaluation of their postsecondary records from an academic credential evaluation service.

**Admission Standards**

Quinnipiac offers a variety of programs online. Please review program specific admission standards by clicking on the appropriate program below:

**Undergraduate Degree Completion Programs**
- Bachelor of Business Administration (p. 224)
- Bachelor of Science in Health Science Studies (p. 291)
- Bachelor of Science in Nursing (RN to BSN) (p. 334)
- RN to MSN in Operational Leadership (p. 494)

**Graduate Programs**

- Master of Science in Business Analytics (p. 365)
- Master of Science in Cybersecurity (p. 391)
- Master of Science in Instructional Design (p. 385)
- Master of Science in Interactive Media & Communications (p. 368)
- Master of Science in Nursing in Operational Leadership (p. 488)
- Master of Science in Organizational Leadership (p. 366)
- Master of Science in Public Relations (p. 371)
- Master of Science in Special Education (p. 386)
- Master of Science in Teacher Leadership (p. 388)
- Occupational Therapy Doctorate (p. 410)
- Post-Master’s Doctor of Nursing Practice - Care of Populations (p. 483)
To be eligible for financial aid students must:

- remain in good standing with the university.
- start of classes, so it is important to allow adequate processing time to their start term. Bills are due approximately one month prior to the beginning of their approved curriculum of the second degree. Further, a minimum of 15 credits of additional coursework must be completed before the conferral of a second degree.

Graduate-level courses taken to complete a degree program at Quinnipiac may be applied to a second graduate degree. These courses must be part of the approved curriculum of the second degree. Further, a minimum of 15 credits of additional coursework must be completed before the conferral of a second degree.

Financial Aid
Our goal at Quinnipiac University Online Financial Aid is to provide students with the adequate financial aid resources needed to pursue their educational goals without financial disruption. Our office provides students with courteous and efficient service while complying with all federal, state and university policies and regulations.

Students seeking financial aid must complete the Free Application for Federal Student Aid (FAFSA) at: fafsa.ed.gov (https://fafsa.ed.gov) and use school code 001402.

Students are encouraged to complete their financial aid paperwork as early as possible to ensure timely processing of aid prior to the beginning of their start term. Bills are due approximately one month prior to the start of classes, so it is important to allow adequate processing time to remain in good standing with the university.

To be eligible for financial aid students must:

1. be a U.S. citizen, permanent resident or eligible non-citizen
2. satisfy any outstanding requirements that arise from the processing of the FAFSA

For complete details on financial aid programs, visit quonline.qu.edu (http://quonline.quinnipiac.edu), email us at online.finaid@quinnipiac.edu (online.finaid@quinnipiac.edu) or call us at 203-582-8430. We would also like to stress that our main mode of communication with our online students is through their Quinnipiac email account, so please remember to check it often!

ACADEMIC AWARDS AND HONOR SOCIETIES

Undergraduate Academic Awards

Academic Affairs

BRAMS Scholar Award
This award is presented annually to a graduating high school senior who is part of the Quinnipiac University/Betsy Ross Arts Magnet School Partnership. Award recipients are selected based on academic achievement.

President’s Scholarship Award
This award by the president of Quinnipiac goes to the student who has attained the highest scholastic standing in his or her graduating class and who has completed at least 90 credits at Quinnipiac.

Student Writing Awards
Quinnipiac University Writing Across the Curriculum recognizes exemplary student writing both in and across the disciplines. Students working in the arts, humanities, social sciences, communications, STEM, business, nursing and health sciences have received cash prizes, gift cards, books and the honor of having their writing published in the Quinnipiac University Casebook, as published by the College of Arts and Sciences and edited by the First-Year Writing Program.

Alumni/Parent Relations

Alumni Association Academic Achievement Awards
At graduation, the Alumni Association presents an award to the honors student from each of the undergraduate schools who has attained the highest scholastic standing and who has completed 90 credits at QU. These awards are made possible by the Alumni Association National Board of Governors.

Alumni Chair Award
This award honors the graduating senior who has demonstrated outstanding leadership, commitment to creating student awareness of the Alumni Association and facilitating increased interaction between alumni and students.

College of Arts and Sciences

Christopher Becker Memorial Prize in History
The History Department awards the Becker Prize to the graduating senior with the highest overall grade point average.

Beta Beta Beta Award
This award is presented to the graduating senior in the Department of Biological Sciences who is a member of the Beta Beta Beta National Biological Honor Society (Upsilon Chapter) and has attained the highest academic standing.

Cengage Law in Society Student Award
This award is given annually to two Law in Society students who have demonstrated outstanding achievement and professional growth in the major, and who have contributed to the departmental culture of excellence.

College of Arts and Sciences Award for Special Achievement
This award is given to the graduating senior in the College of Arts and Sciences who has a record of exceptional achievement in the face of adversity. The award was established in honor of Morris Woskow, former professor of psychology and dean.

James Fickes Award for Excellence in Mathematics
This award is given to the senior mathematics major who has shown the greatest achievement and future promise as a mathematician, and who has demonstrated leadership both in and outside the classroom.

Barry Fritz Award in Psychology
This prize is given each spring to a senior in psychology who has completed an independent study project that is both creative and relevant. These two qualities characterized the research of Professor Barry Fritz, in whose honor the award was established. To be considered, the project must be completed by the fall of senior year, but also could be completed in previous years.

Joan Phillips Gordon Prize in Sociology
This award, in honor of Joan Phillips Gordon, former chair of the sociology department, is presented annually to a student in sociology, social services, criminal justice or gerontology, who has demonstrated outstanding academic and leadership qualities.

The Lynne Gershenson Hodgson Prize in Gerontology
This award, in honor of Professor Emerita Lynne Gershenson Hodgson, former chair of the Department of Sociology, Criminal Justice and Anthropology, is presented annually to a student in gerontology major or a departmental major who has pursued interests related to the field of gerontology, and who has demonstrated outstanding academic and leadership qualities.

Legal Studies Book Award
This prize is given annually to the senior Law in Society student with the highest grade point average who has demonstrated exceptional ability in the major, and who has contributed to the departmental culture of excellence.

Benjamin Page Award in Philosophy
This award, in honor of Professor Benjamin Page, who demonstrated extraordinary commitment to philosophy at Quinnipiac for more than 40 years, is given to the graduating student who has similarly contributed to upholding the value of philosophy at Quinnipiac.

R. Gordon Pauluccy Graduation Prize in Psychology
This award, established by the Pauluccy family, is made annually to the senior major in psychology who has the highest overall grade point average.

Political Science Best Senior Thesis Award
The political science faculty established this award to recognize graduating senior students in political science who have submitted outstanding as well as original theses.

Political Science Outstanding Senior Award
This award recognizes a senior in political science who has shown high academic achievement, made a significant contribution to campus life and/or shown excellent leadership qualities.

Ronald J. Quirk Spanish Writing Contest
The Department of Modern Languages, Literatures and Cultures sponsors an annual Spanish writing contest. Eligible students are junior or senior Spanish majors who write an essay in Spanish, which is judged by departmental professors. The first- and second-place winners are honored at the College of Arts and Sciences award dinner with a commendation and a monetary prize.
The Matt Rafferty Memorial Economics Department Student Achievement Award
This award is given to the student majoring in economics who has shown outstanding academic achievement and contributed significantly to the department.

Rachel Ranis Prize in Social Justice
This award, conferred in recognition of Professor Ranis, is presented to a senior in sociology, social services, criminal justice or gerontology, who has demonstrated a passion for social justice.

Alice B. Remall Memorial Award
This award is presented to the graduating student majoring in Spanish with the highest grade point average.

Aurea C. Schoonmaker Spanish Award
In honor of Professor Aurea C. Schoonmaker’s 43 years of exemplary teaching at Quinnipiac University, this prize is awarded to the senior Spanish major with the highest grade point average.

Senior Service Prize in Criminal Justice
This award is presented to the senior criminal justice major who exhibits extraordinary service to the program, campus life and community.

Alfred P. Stienonte Memorial Prize
This award is presented to the graduating student who has earned distinction in the study of philosophy.

Orville J. Sweeting Memorial Chemistry Award
This award, in memory of Orville J. Sweeting, former faculty member and Quinnipiac provost, is presented to a graduating senior who has exhibited outstanding achievement in both the academic and senior research setting in chemistry or biochemistry.

School of Business

Award for Academic Excellence - Bachelor of Business Administration
This award is presented to a graduating Bachelor of Business Administration student who has demonstrated outstanding academic achievement in the program.

Biomedical Marketing Department Student Achievement Award
This award is presented to a graduating student exhibiting outstanding scholarship, independent creativity and extracurricular activities directly related to biomedical marketing.

Computer Information Systems Outstanding Senior Award
This award is presented to an outstanding CIS senior in recognition of academic excellence and student leadership.

Entrepreneurship Student Achievement Award
This award is presented to the senior entrepreneurship major who has demonstrated outstanding achievement in entrepreneurial activities and academic performance.

Finance Department Outstanding Senior Award
This award is presented to a graduating senior for academic achievement in finance.

International Business Award
This award is given to a graduating senior in international business for demonstrating academic excellence and professional qualities within the international business program.

Management Department Award
This award is given to a graduating senior in management who exemplifies superior academic performance, a high level of campus or community involvement and leadership among his or her peers at the school and the university.

Ronald Marangell Award
This award is presented to an outstanding graduating accounting major in memory of Ronald Marangell, a former Quinnipiac accounting student.

Marketing Department Student Achievement Award
This award is presented to a student possessing expertise in marketing who has made contributions to the field and the marketing department.

Edward J. Scannell Prize
This award, in memory of a former trustee, is given to two graduating business students who have demonstrated outstanding citizenship.

School of Communications

Outstanding Achievement in Public Relations
This award is presented to a graduating senior from the School of Communications in the public relations program, who has shown high academic achievement, made significant contributions to the program, campus life and/or has shown excellent leadership qualities on campus.

Outstanding Achievement in Film, Television and Media Arts (BA)
This award is presented to a graduating senior from the School of Communications in the film, television and media arts bachelor of arts program, who has shown high academic achievement, made significant contributions to the program, campus life and/or has shown excellent leadership qualities on campus.

Outstanding Achievement in Film, Television and Media Arts (BFA)
This award is presented to a graduating senior from the School of Communications in the film, television and media arts bachelor of fine arts program, who has shown high academic achievement, made significant contributions to the program, campus life and/or has shown excellent leadership qualities on campus.

Outstanding Achievement in Graphic and Interactive Design
This award is presented to a graduating senior from the School of Communications in the graphic and interactive design program, who has shown high academic achievement, made significant contributions to the program, campus life and/or has shown excellent leadership qualities on campus.

Outstanding Achievement in Journalism
This award is presented to a graduating senior from the School of Communications in the journalism program who has shown high academic achievement, made significant contributions to the program, campus life and/or shown excellent leadership qualities on campus.

Outstanding Achievement in Media Studies
This award is presented to a graduating senior from the School of Communications in the media studies program who has shown academic achievement, made significant contributions to the program, campus life and/or shown excellent leadership qualities on campus.

Outstanding Achievement in Public Relations
This award is presented to a graduating senior from the School of Communications in the public relations program, who has shown high
academic achievement, made significant contributions to the program, campus life and/or has shown excellent leadership qualities on campus.

**Overall Achievement Award**
This award is presented to a graduating senior from the School of Communications who has shown high academic achievement, made significant contributions to the program, campus life and/or shown excellent leadership qualities on campus.

**School of Engineering**

**Outstanding Achievement in Civil Engineering**
This award is presented to the outstanding civil engineering senior in recognition of academic excellence and student leadership.

**Outstanding Achievement in Computer Science**
This award is presented to the outstanding computer science senior in recognition of academic excellence and student leadership.

**Outstanding Achievement in Industrial Engineering**
This award is presented to the outstanding industrial engineering senior in recognition of academic excellence and student leadership.

**Outstanding Achievement in Mechanical Engineering**
This award is presented to the outstanding mechanical engineering senior in recognition of academic excellence and student leadership.

**Outstanding Achievement in Software Engineering**
This award is presented to the outstanding software engineering senior in recognition of academic excellence and student leadership.

**School of Health Sciences**

**Biomedical Sciences Achievement Award**
This award is given each year to a senior majoring in biomedical sciences who has demonstrated exceptional academic achievement and who has contributed significantly through service to the Quinnipiac community and to the greater community beyond the university.

**Diagnostic Medical Sonography Achievement Award**
This award is given each year to a senior majoring in diagnostic medical sonography who has shown exceptional academic achievement and who has contributed significantly to the department.

**Health Science Studies BS Degree Completion Program Achievement Award**
This award recognizes a graduating senior from the part-time, online, Health Science BS-Completion Program who has shown exceptional academic achievement.

**Health Science Studies Student Achievement Award**
This award is given each year to a senior majoring in health science studies who has shown exceptional academic achievement and has contributed to the program, school or university.

**Microbiology and Immunology Student Achievement Award**
This award is presented annually to a senior microbiology and immunology major who has demonstrated exceptional academic achievement, and who has contributed significantly to the understanding, promotion and advancement of microbiology and immunology.

**Occupational Therapy Academic Achievement Award**
This award recognizes a graduating senior who has demonstrated outstanding academic work in all aspects of the curriculum while demonstrating distinguished contributions to occupational therapy department.

**Occupational Therapy Service Leadership Award**
This award recognizes a graduating senior who has demonstrated distinguished service in the university and the greater community that exemplifies the values of the occupational therapy profession.

**Ryan J. O’Neil Entry-Level Master’s Physician Assistant Award**
This award is presented to the senior ELMPA student who has most exemplified leadership, academic excellence, a cooperative attitude and the strength of character of a future health care professional. The award is in memory of Ryan J. O’Neil, a former ELMPA student.

**Harold Potts Memorial Physical Therapy Award**
The award, given in memory of Harold Potts, former chairman, professor and founder of the physical therapy program at Quinnipiac, is presented from the faculty to an undergraduate third- or fourth-year physical therapy student, who will be entering into the graduate program in the coming year, who has demonstrated academic and leadership excellence, as well as exemplary service to the program, community and has the potential for exemplary service to the profession.

**Radiologic Sciences Student Achievement Award**
This award is given each year to a graduating senior majoring in radiologic sciences who has shown exceptional academic achievement and who has contributed significantly to the department.

**Joseph J. Woods, PhD, Athletic Training/Sports Medicine Outstanding Student Award**
This award is given to a senior athletic training student in good academic standing that emulates the legacy Joseph J. Woods, PhD, set forth by putting others first. This student has demonstrated leadership qualities, commitment to community service, good mentorship and outstanding character. This student has made a meaningful impact to the Athletic Training and Sports Medicine Program, the School of Health Sciences or the Quinnipiac community at large.

**School of Nursing**

**Holistic Nursing Practice Award**
This award recognizes clinical excellence and exceptional potential in the discipline of nursing. It is presented to the senior nursing student who has demonstrated a strong commitment to the unity of body, mind, emotion and spirit in the delivery of health care.

**Keiser Foundation Student Loan Repayment Award**
The Keiser Foundation Award is presented after graduation to two nursing students at the undergraduate or graduate level. Preference will be given to U.S. veterans. The students are chosen based upon financial need, merit and extracurricular commitment in the health care field.

**Judy Lahey Community Service Award**
The Judy Lahey Community Service Award was established by John Lahey, PhD, president emeritus of Quinnipiac University, and is named for Judith Lahey, a former nurse and community service advocate. It is given in recognition of exemplary community service. It is awarded to a graduating senior nursing student with a GPA of 3.0 or higher who has demonstrated impactful community service related to the nursing profession. The recipient has exhibited adherence to the core values of the nursing profession and in particular, the School of Nursing at Quinnipiac University and has the vision of holism, inter-professionalism and inclusivity.

**Benjamin and Juliette Trewin Award for Academic Excellence in Nursing**
This award recognizes academic excellence and exceptional potential in the discipline of nursing. It is presented to a nursing student with
the highest overall grade point average. The award is supported by the Benjamin and Juliette Trewin Memorial Endowed Fund, which was established for the nursing program by Estelle Trewin Beecher in memory of her parents.

**Benjamin and Juliette Trewin Award for Professional Leadership in Nursing**
This award recognizes outstanding leadership and exceptional potential in the discipline of nursing. It is presented to a nursing student who has made significant contributions to the nursing program and the greater community of nursing. The award is supported by the Benjamin and Juliette Trewin Memorial Endowed Fund, which was established for the nursing program by Estelle Trewin Beecher in memory of her parents.

**Student Affairs**

**Cardinal Joseph Bernardin Distinguished Service Award**
This award recognizes a graduating senior who has contributed significantly to the spiritual, religious and moral welfare of the Catholic community at Quinnipiac.

**Outstanding Senior Award**
This award recognizes a senior who has a 3.25 GPA or better, is in good standing with the university and has sustained engagement in a student organization, program or cause on campus or in the community over his or her Quinnipiac career; evidenced learning through the achievement of multiple personal or professional goals; developed excellent collaboration skills; and demonstrated dedication and impact in the university and surrounding communities.

**Outstanding Student Affairs Leadership Award**
This award is given to a graduating undergraduate Quinnipiac student who has achieved at least a 3.25 GPA, is in good standing with the university and has demonstrated outstanding leadership qualities; worked closely with university staff on at least one project, program or initiative; exhibited a cooperative attitude; and measurably improved the student experience at Quinnipiac.

**H. Pearce Family Community Leadership Award**
This award is given to a senior who has best exemplified the spirit of volunteer community service while at Quinnipiac University.

**Philip Troup Achievement Prize**
In honor of the first president of Quinnipiac, this prize is given to a graduating senior who has contributed most to the welfare of Quinnipiac through strength of character and qualities of leadership.

**Graduate Academic Awards**

**Academic Awards**

**Faculty Award for Academic Excellence**
These awards recognize students who have distinguished themselves for both outstanding academic achievement and contributions to the program, as determined by the faculty.

- Master of Business Administration
- Master of Science in Accounting
- Master of Science in Business Analytics
- Master of Science in Cybersecurity
- Master of Science in Interactive Media and Communications
- Master of Science in Journalism
- Master of Science in Organizational Leadership

- Master of Science in Public Relations
- Master of Science in Sports Journalism

**Academic Excellence Awards**
These awards recognize the outstanding academic achievement of graduate students who have completed their programs of study. In the opinion of the program directors, these students have excelled in all phases (didactic and/or clinical/laboratory) of their graduate education.

- Doctor of Nursing Practice
- Entry-Level Master of Occupational Therapy
- Master of Health Science/Advanced Medical Imaging and Leadership
- Master of Health Science/Biomedical Sciences
- Master of Health Science/Physician Assistant
- Master of Health Science/Radiologist Assistant
- Master of Science in Molecular and Cell Biology
- Master of Science in Nursing
- Master of Social Work
- Post-Professional Doctor of Occupational Therapy

**School of Education**

**Excellence in Scholarship and Leadership Award in Educational Leadership**
This award is presented to the candidate who has demonstrated exceptional scholarship as well as a thorough understanding of national leadership standards and their application to school administration throughout the sixth-year diploma in educational leadership program.

**Excellence in Scholarship and Leadership Award in Teacher Leadership**
This award is presented to the candidate who has demonstrated exceptional scholarship as well as a thorough understanding of national leadership standards and their application to school administration throughout the master of science in teacher leadership program.

**Excellence in Scholarship, Practice and Advocacy Award in Special Education**
This award is presented to the candidate who has not only demonstrated exceptional scholarship but has also made advocacy for students a foundational element of practice.

**Excellence in Scholarship and Practice Award in Instructional Design**
The Excellence in Scholarship and Practice Award in Instructional Design is presented to the candidate who has demonstrated exceptional scholarship and academic achievement throughout the master of science in instructional design program.

**Excellence in Teaching and Scholarship Award in Elementary Education**
This award is presented to the teacher candidate who has demonstrated excellence in teaching as well as scholarship during his or her tenure in the master of arts in teaching program in elementary education.

**Excellence in Teaching and Scholarship Award in Secondary Education**
This award is presented to the teacher candidate who has demonstrated excellence in teaching as well as scholarship during his or her tenure in the master of arts in teaching program in secondary education.
School of Health Sciences

Gaylord Specialty Healthcare Scholarship Award
This award is given by Gaylord Hospital to two third-year graduate physical therapy students. The award recognizes students who have exemplified Gaylord Hospital's five values: integrity, compassion, accountability, respect and excellence. These values are the foundation in helping Gaylord provide and achieve the dedicated caring service that has become the hallmark of its employee philosophy.

Dr. Kenneth V. Kaloustian Award
This award is given to a second-year graduate student in the pathologists' assistant program. This award recognizes outstanding performance in both academic and clinical areas of study. The individual is chosen based on high moral character, leadership qualities and a significant contribution to both the program and to Quinnipiac University.

William B. Shaffer Jr. Award
The cardiovascular perfusion program presents this award to a graduate student who has exhibited outstanding performance in both academic and clinical areas of study. The individual is chosen based on high moral character, leadership qualities and a significant contribution to both the program and to Quinnipiac University.

Mark F. Tantorski Memorial Award
In memory of Mark F. Tantorski, a 1980 graduate of the physical therapy program, an award is made to a third-year graduate student in physical therapy who has exhibited academic excellence, high moral character and leadership qualities and, through co-curricular activities in the area of physical therapy, has added to his or her professional growth.

School of Nursing

Holistic Nursing Practice Award
This award recognizes clinical excellence and exceptional potential in the discipline of nursing. It is presented to nursing students who have demonstrated a strong commitment to the unity of body, mind, emotion and spirit in the delivery of health care.

The Keiser Foundation Student Loan Repayment Award
The Keiser Foundation Award is presented after graduation to two nursing students at the undergraduate or graduate level. Preference will be given to U.S. veterans. The students are chosen based upon financial need, merit and extracurricular commitment in the health care field.

Benjamin and Juliette Trewin Award for Academic Excellence in Nursing
This award recognizes academic excellence and exceptional potential in the discipline of nursing. It is presented to nursing students with the highest overall grade point average. The award is supported by the Benjamin and Juliette Trewin Memorial Endowed Fund, which was established for the nursing program by Estelle Trewin Beecher in memory of her parents.

Benjamin and Juliette Trewin Award for Professional Leadership in Nursing
This award recognizes outstanding leadership and exceptional potential in the discipline of nursing. It is presented to nursing students who have made significant contributions to the nursing program and the greater community of nursing. The award is supported by the Benjamin and Juliette Trewin Memorial Endowed Fund, which was established for the nursing program by Estelle Trewin Beecher in memory of her parents.

Undergraduate Honor Societies

College of Arts and Sciences

Alpha Kappa Delta
Alpha Kappa Delta is an international sociology honor society designed to stimulate scholarship and promote the scientific study of society.

Alpha Psi Omega
Alpha Psi Omega recognizes excellence in all areas of theater study and production. Membership is based on cumulative grade point average and achievement during the university main stage theater production season in the areas of performance, technical production and theater administration.

Lambda Epsilon Chi
Lambda Epsilon Chi is the national honor society for Law in Society students and recognizes those students who have demonstrated superior academic performance in a legal studies program.

Psi Chi
Psi Chi is the international psychology honor society designed to stimulate scholarship and promote the scientific study of psychology.

Phi Sigma Biological Honors Society
Phi Sigma is an organization devoted to the promotion of research and academic excellence in the biological sciences. Undergraduate students are invited to become members if they have achieved junior status, are in the top 35 percent of their class and are actively engaged in, or have participated in research at Quinnipiac in an area related to the biological sciences.

Phi Sigma Tau
Phi Sigma Tau is the International Honor Society in Philosophy. Students in all schools of the university who have taken two or more philosophy courses and maintained a GPA of 3.33 or higher in both their philosophy courses and their overall GPA are eligible for induction into Phi Sigma Tau.

Pi Sigma Alpha
Pi Sigma Alpha, the National Political Science Honor Society, is the only honor society for college students of political science and government in the U.S. The political science program annually nominates juniors and seniors who have excelled both in political science and their overall coursework. Its purpose is to stimulate scholarship and intelligent interest in political science, and to honor political science majors and minors who display leadership and academic achievement.

Psi Chi
Psi Chi is the international psychology honor society, founded for the purposes of encouraging, stimulating and maintaining excellence in scholarship and advancing the science of psychology.

Sigma Delta Pi
Sigma Delta Pi, national honor society in Spanish, honors students who attain excellence in the study of Spanish language and the literatures and cultures of Spanish speaking people. To be considered for membership in Sigma Delta Pi, a student must: be a junior, have a GPA of 3.2 overall, maintain a GPA of 3.2 in all Spanish courses, and have completed 18 credits in Spanish at the 200 level or above, including two semesters of
advanced Spanish language courses, as well as an advanced course in Hispanic literature or culture.

**Sigma Phi Omega**
Sigma Phi Omega, the national academic honor society in gerontology, recognizes the excellence of those who study gerontology/aging. The society seeks to promote scholarship, professionalism, friendship and services to older persons, and to recognize exemplary achievement in gerontology/aging studies and related fields.

**Sigma Tau Delta International English Honor Society**
Sigma Tau Delta’s central purpose is to confer distinction upon students of the English language and literature in undergraduate, graduate and professional studies. Our members have the opportunity to be recognized for their outstanding achievements, enrich their education and advance their careers.

**School of Business**
**Beta Alpha Psi**
Beta Alpha Psi is an honorary organization for financial information students and professionals. Membership is open to accounting majors and is based on cumulative grade point average and achievement in accounting courses.

**Beta Gamma Sigma**
Beta Gamma Sigma is the National Business Honor Society. Only schools of business accredited by AACSB International—The Association to Advance Collegiate Schools of Business, may have a chapter of this society. Membership is by invitation only and invitees must be in the top 10 percent of their class.

**Financial Management Association International—National Honor Society**
The FMA National Honor Society recognizes scholastic achievement of students who have demonstrated superior scholarship. Individuals accepted for membership have the distinction of belonging to the only honorary society that specifically recognizes the achievement of finance majors who demonstrate expertise in finance and financial decision making.

**School of Communications**
**Lambda Pi Eta**
Lambda Pi Eta is the National Communication Association’s official honor society. Quinnipiac’s Tau Delta chapter seeks to recognize, foster and reward outstanding scholastic achievement; stimulate interest in the field of communication; promote and encourage professional development; provide an opportunity to discuss and exchange ideas in the field of communication; promote closer relationships between faculty and students; and explore options for graduate education in communication studies.

**School of Engineering**
**Eta Pi**
Eta Pi is the School of Engineering’s honor society for engineering majors. Its goal is to recognize those who have conferred honor upon their alma mater by distinguished scholarship and exemplary character as students in engineering or by their attainments as alumni in the field of engineering. Student membership is based on scholastic performance and exemplary character.

**School of Health Sciences**
**Alpha Eta Honor Society**
Alpha Eta is the national honor society that recognizes scholarship and academic achievement of health professions students.

**Pi Theta Epsilon**
Pi Theta Epsilon is a national honor society that recognizes outstanding scholarship and service to the occupational therapy profession.

**School of Nursing**
**Sigma Theta Tau International Honor Society of Nursing**
Tau Rho is the Quinnipiac University chapter of Sigma Theta Tau International Honor Society of Nursing. The mission of this honor society is to advance world health and celebrate nursing excellence in scholarship, leadership and service. Membership is by invitation to undergraduate and graduate students who demonstrate excellence in scholarship and academics.

**Graduate Honor Societies**
**College of Arts and Sciences**
**Phi Sigma Biological Honors Society**
Phi Sigma is an organization devoted to the promotion of research and academic excellence in the biological sciences. Graduate students are invited to become members if they are in the top 35 percent of their class and are actively engaged in, or have participated in research at Quinnipiac in an area related to the biological sciences.

**School of Business**
**Beta Gamma Sigma**
Beta Gamma Sigma is the National Business Honor Society. Only schools of business that are accredited by AACSB International — The Association to Advance Collegiate Schools of Business, may have a chapter of this society. Membership is by invitation only and invitees must be in the top 20 percent of their class.

**School of Health Sciences**
**Alpha Eta Honor Society**
Alpha Eta is the national honor society that recognizes scholarship and academic achievement of health professions students enrolled in undergraduate and graduate programs.

**School of Nursing**
**Sigma Theta Tau International Honor Society of Nursing**
Tau Rho is the Quinnipiac University chapter of Sigma Theta Tau International Honor Society of Nursing. The mission of this honor society is to advance world health and celebrate nursing excellence in scholarship, leadership and service. Membership is by invitation to undergraduate and graduate students who demonstrate excellence in scholarship and academics.
AC 211. Financial Accounting. 3 Credits.  
This course introduces students to the purposes of financial statements and the recognition, measurement and disclosure concepts and methods underlying financial statements. Students begin to use and interpret financial statements and the related impact of elementary transactions and events on those statements. Minimum grade for accounting majors B-.  
Prerequisites: Take MA 107 or higher.  
Offered: Every year, All  

AC 212. Managerial Accounting. 3 Credits.  
This course provides an introduction to the uses of accounting information by managers for internal reporting and decision making. Students begin to focus on classifying, measuring and analyzing product and service costs for decision making, budget preparation and performance evaluation. Minimum grade for accounting majors B-. Accounting majors must have B- or better in the prerequisite course.  
Prerequisites: Take AC 211.  
Offered: Every year, All  

AC 305. Intermediate Accounting I. 3 Credits.  
This course is the first of three intermediate-level courses. Students study the conceptual framework, standards, roles of standard-setting bodies and presentation of financial statements. Additional topics include the recognition, measurement and reporting of cash, receivables and inventories. In addition to U.S. Generally Accepted Accounting Principles (GAAP) students also are exposed to International Financial Reporting Standards (IFRS). Minimum grade for accounting majors B-. Accounting majors must have B- or better in the prerequisite course.  
Prerequisites: Take AC 211.  
Offered: Every year, Fall and Spring  

AC 306. Intermediate Accounting II. 3 Credits.  
This continuation of intermediate accounting covers such topics as property, plant and equipment, intangible assets, current liabilities and contingencies, long-term liabilities, stockholders’ equity and earnings per share. In addition to U.S. Generally Accepted Accounting Principles (GAAP), students also are exposed to the International Financial Reporting Standards (IFRS). AC 306 may be taken concurrently with AC 307. Minimum grade for accounting majors B-. Accounting majors must have B- or better in the prerequisite course.  
Prerequisites: Take AC 305.  
Offered: Every year, Fall and Spring  

AC 307. Intermediate Accounting III. 3 Credits.  
This continuation of intermediate accounting covers such topics as investments, revenue recognition, accounting for income taxes, pensions, leases, accounting changes and correction of errors, the statement of cash flows, and disclosure issues. In addition to U.S. Generally Accepted Accounting Principles (GAAP), students also are exposed to the International Financial Reporting Standards (IFRS). AC 307 may be taken concurrently with AC 306. Minimum grade for accounting majors B-. Accounting majors must have B- or better in the prerequisite course.  
Prerequisites: Take AC 305.  
Corequisites: Take AC 306.  
Offered: Every year, Fall and Spring  

AC 323. Cost Accounting. 3 Credits.  
This class includes an in-depth treatment of accounting theories and practices used to control and manage costs. Topics include job-order, process, activity-based costing systems, cost variance analysis, budgeting, cost-volume-profit analysis and product mix decisions. Minimum grade for accounting majors C-. Accounting majors must have a B- or better in the prerequisite course.  
Prerequisites: Take AC 212.  
Offered: Every year, Spring  

AC 335. Accounting Systems. 3 Credits.  
This class introduces the use of information technology in accounting systems. Topics include design, development, implementation, control and audit of information systems used to generate and manage accounting information. Minimum grade for accounting majors C-. Accounting majors must have a B- or better in the prerequisite course.  
Prerequisites: Take AC 212.  
Offered: Every year, Spring  

AC 350. Advanced Excel Programming (CIS 350). 3 Credits.  
This course utilizes advanced topics in Excel to solve a range of complex business problems. Topics include: spreadsheet design, the use of complex formulas, functions, list and data management, macros and Visual Basic for Applications.  
Prerequisites: Take CIS 101.  
Offered: Every year, Spring  

AC 402. Accounting Internship. 3 Credits.  
This internship is open to accounting majors. Students must complete the internship application form to receive credit. This course is graded on a pass/fail basis. A minimum of 150 hours is required.  
Offered: Every year, All  

AC 405. Advanced Accounting. 3 Credits.  
This course provides an in-depth study of accounting principles and analysis of problems for business combinations (mergers and acquisitions), international operations and governmental and not-for-profit accounting. Students learn standard-related research skills and complete several research cases using the FASB codification database. Minimum grade for accounting majors C-. Accounting majors must have a B- or better in the prerequisite course.  
Prerequisites: Take AC 306.  
Offered: Every year, Spring  

AC 411. Auditing Theory and Practice. 3 Credits.  
This course focuses on an introduction to auditing standards and to audit practice. It includes an examination of auditor independence and ethical responsibilities, audit risk, audit evidence, internal controls, and development of an overall audit plan. Minimum grade for accounting majors C-. Accounting majors must have B- or better in the prerequisite course.  
Prerequisites: Take AC 305.  
Offered: Every year, Fall  

AC 412. Advanced Auditing. 3 Credits.  
This continuation of AC 411 includes coverage of the steps necessary to complete an audit engagement. These steps include the design and performance of appropriate tests of controls, substantive tests of transactions and tests of details of balances for an audit of a company’s balance sheet and income statement accounts. Minimum grade for accounting majors C-.  
Prerequisites: Take AC 411.  
Offered: Every year, Spring
AC 431. Federal Income Taxation of Individuals.  3 Credits.
This course introduces students to the research, analysis and planning of individual federal income tax with emphasis on the identification of the proper taxpayer, the concepts of income, characterization of income, timing of income (realization and recognition), deductions, deferral and non-recognition of income. Minimum grade for accounting majors C-.
Prerequisites: Take AC 212.
Offered: Every year, Fall

AC 432. Federal Income Taxation of Business Entities.  3 Credits.
This course considers the tax effects of formation, operation and liquidation of business entities. Students identify and analyze data relevant to the taxation of different business entities. Emphasis is placed on issues and data identification, research and analysis of relevant tax information that affects entities' elections and alternative tax treatments. Minimum grade for accounting majors C-.
Prerequisites: Take AC 431.
Offered: Every year, Spring

AC 499. Independent Research.  3 Credits.
Independent research supervised by a faculty member. Requires the approval of the faculty member, chair of the department and dean of the business school.
Offered: Every year, All

Anthropology (AN)

AN 101. Local Cultures, Global Issues: Introduction to Cultural Anthropology.  3 Credits.
This introductory course provides a broad overview of cultural anthropology, giving students the tools to understand, speak and write about human diversities and similarities cross-culturally. Course materials emphasize issues of race, ethnicity, class and gender, making visible for students the inequalities and power dimensions embedded in societies throughout the globe.
Offered: Every year, All
UC: Social Sciences, Intercultural Understand

AN 103. Dirt, Artifacts and Ideas: Introduction to Archaeology.  3 Credits.
This course introduces students to the social science of archaeology, one of the four subdisciplines within anthropology. Students explore the history and methodology of archaeology, human evolution and adaptation. They learn to interpret archaeological data and study the relationship between humans and the natural environment. The ethics of doing archaeological fieldwork and the contemporary debates within the discipline also are discussed.
Offered: Every year, All
UC: Social Sciences, Intercultural Understand

AN 104. Bones, Genes and Everything In Between: Intro to Biological Anthropology.  3 Credits.
In this course, students explore human origins and modern human diversity from a holistic, biocultural evolutionary perspective. Participants begin with the processes of evolution and natural selection, along with the mechanisms of genetic inheritance at the molecular level and its role in modern human diversity. Next they focus on our closest living relatives, the non-human primates, and then discuss the evidence for primate and human evolution found in the fossil record. The course concludes by exploring the origins of modern humans and their dispersal across the globe.
Corequisites: Take AN 104L.
Offered: Every year, Fall
UC: Natural Sciences

AN 104L. Bones, Genes and Everything In Between: Intro to Biological Anthropology Lab.  1 Credit.
Lab to accompany AN 104.
Corequisites: Take AN 104.
Offered: Every year, Fall
UC: Natural Sciences

AN 200. Special Topics.  3 Credits.
Subject varies each semester according to student and faculty interest.
Offered: As needed, All

AN 210. Cross-Cultural Perspectives on Gender, Sex and Sexuality (WS 211).  3 Credits.
This course introduces students to the social and cultural constructions of gender, sex and sexuality around the world. Students discover the way anthropologists approach these topics. They explore the constructions as they relate to notions of biology, family, households, work, migration, inequality/inequity, economics and class status, violence, and race and ethnicity. Discussions focus on what gender, sex and sexuality are, what they mean and how they theoretically and practically matter as categories.
Offered: Every other year
UC: Social Sciences, Intercultural Understand

AN 220. Anthropology of Development.  3 Credits.
This course introduces students to the concept and practice of "development" from an anthropological perspective. Students learn how to assess and critique the ideological threads in development discourses, and are able to identify how anthropological approaches to development differ from other social sciences and allied disciplines. Students also learn how classical social theory continues to influence policy makers and international aid bureaucrats.
Offered: As needed
UC: Social Sciences, Intercultural Understand

AN 227. Traditional Rites of Passage Theory: Turning Points.  3 Credits.
In this course, students examine the study abroad experience as a life turning point, looking through the lens of traditional Rites of Passage Theory, as put forth by anthropologist Arnold van Gennep. They connect each of the traditional Rites of Passage phases to the study abroad experience (i.e., separation, liminality and reincorporation) and begin to develop an understanding of why rites of passage were/are formulated, and how to apply the concepts and elements presented in traditional Rites of Passage Theory not only to the study abroad experience, but also to personal, academic and professional turning points throughout one's life.
Offered: Every year, All
UC: Social Sciences, Intercultural Understand

AN 233. Practicing Archaeology.  3 Credits.
This introductory course provides a broad overview of cultural anthropology, giving students the tools to understand, speak and write about human diversities and similarities cross-culturally. Course materials emphasize issues of race, ethnicity, class and gender, making visible for students the inequalities and power dimensions embedded in societies throughout the globe.
Offered: Every year, Fall
UC: Social Sciences, Intercultural Understand

AN 233L. Practicing Archaeology Lab.  1 Credit.
Lab to accompany AN 233.
Corequisites: Take AN 233.
Offered: Every year, Fall
UC: Natural Sciences

AN 250. Introduction to Cultures and Communicating Across Cultures.  3 Credits.
This course introduces students to the social and cultural constructions of gender, sex and sexuality around the world. Students discover the way anthropologists approach these topics. They explore the constructions as they relate to notions of biology, family, households, work, migration, inequality/inequity, economics and class status, violence, and race and ethnicity. Discussions focus on what gender, sex and sexuality are, what they mean and how they theoretically and practically matter as categories.
Offered: Every other year
UC: Social Sciences, Intercultural Understand

AN 287. Field Experience in Anthropology.  3 Credits.
Field experience in anthropology, in which students may involve themselves in the life of a culture or subculture by living with, working for, or studying a group for an extended period. Minimum grade for accounting majors C-.
Corequisites: Take AN 104.
Offered: As needed, All

AN 299. Independent Research.  3 Credits.
Independent research supervised by a faculty member. Requires the approval of the faculty member, chair of the department and dean of the business school.
Offered: Every year, All

AN 321. Introduction to Social Psychology.  3 Credits.
This course introduces students to the social and cultural constructions of gender, sex and sexuality around the world. Students discover the way anthropologists approach these topics. They explore the constructions as they relate to notions of biology, family, households, work, migration, inequality/inequity, economics and class status, violence, and race and ethnicity. Discussions focus on what gender, sex and sexuality are, what they mean and how they theoretically and practically matter as categories.
Offered: Every other year
UC: Social Sciences, Intercultural Understand

AN 334. Intermediate Biological Anthropology.  3 Credits.
Intermediate course in biological anthropology with a focus on human evolution. Other topics vary. Minimum grade for accounting majors C-.
Prerequisites: Take AN 104.
Corequisites: Take AN 104L.
Offered: As needed, All

AN 344. Social Psychology: The Psychology of Social Experience.  3 Credits.
This course introduces students to the social and cultural constructions of gender, sex and sexuality around the world. Students discover the way anthropologists approach these topics. They explore the constructions as they relate to notions of biology, family, households, work, migration, inequality/inequity, economics and class status, violence, and race and ethnicity. Discussions focus on what gender, sex and sexuality are, what they mean and how they theoretically and practically matter as categories.
Offered: Every other year
UC: Social Sciences, Intercultural Understand

AN 350. Methods in Cultural Anthropology.  3 Credits.
This course introduces students to the social and cultural constructions of gender, sex and sexuality around the world. Students discover the way anthropologists approach these topics. They explore the constructions as they relate to notions of biology, family, households, work, migration, inequality/inequity, economics and class status, violence, and race and ethnicity. Discussions focus on what gender, sex and sexuality are, what they mean and how they theoretically and practically matter as categories.
Offered: Every other year
UC: Social Sciences, Intercultural Understand

AN 364. Introduction to Social Work.  3 Credits.
This course introduces students to the social and cultural constructions of gender, sex and sexuality around the world. Students discover the way anthropologists approach these topics. They explore the constructions as they relate to notions of biology, family, households, work, migration, inequality/inequity, economics and class status, violence, and race and ethnicity. Discussions focus on what gender, sex and sexuality are, what they mean and how they theoretically and practically matter as categories.
Offered: Every other year
UC: Social Sciences, Intercultural Understand

AN 365. Advanced Biological Anthropology.  3 Credits.
Advanced course in biological anthropology with a focus on human evolution. Other topics vary. Minimum grade for accounting majors C-.
Prerequisites: Take AN 104.
Corequisites: Take AN 104L.
Offered: As needed, All

AN 370. Social Psychology: Recent Advances.  3 Credits.
This course introduces students to the social and cultural constructions of gender, sex and sexuality around the world. Students discover the way anthropologists approach these topics. They explore the constructions as they relate to notions of biology, family, households, work, migration, inequality/inequity, economics and class status, violence, and race and ethnicity. Discussions focus on what gender, sex and sexuality are, what they mean and how they theoretically and practically matter as categories.
Offered: Every other year
UC: Social Sciences, Intercultural Understand

AN 387. Field Experience in Anthropology.  3 Credits.
Field experience in anthropology, in which students may involve themselves in the life of a culture or subculture by living with, working for, or studying a group for an extended period. Minimum grade for accounting majors C-.
Corequisites: Take AN 104.
Offered: As needed, All

AN 399. Independent Research.  3 Credits.
Independent research supervised by a faculty member. Requires the approval of the faculty member, chair of the department and dean of the business school.
Offered: Every year, All

AN 427. Thesis in Anthropology.  3 Credits.
This course introduces students to the social and cultural constructions of gender, sex and sexuality around the world. Students discover the way anthropologists approach these topics. They explore the constructions as they relate to notions of biology, family, households, work, migration, inequality/inequity, economics and class status, violence, and race and ethnicity. Discussions focus on what gender, sex and sexuality are, what they mean and how they theoretically and practically matter as categories.
Offered: As needed, All

AG 499. Independent Research.  3 Credits.
Independent research supervised by a faculty member. Requires the approval of the faculty member, chair of the department and dean of the business school.
Offered: Every year, All

Anthropology Lab.

Breadth Elective, University Curriculum Ele

Quinnipiac University
AN 237. Anthropology of Health and Medicine. 3 Credits.
This course takes a comparative study approach by looking at the diverse ways in which societies throughout the world both define and respond to disease and illness. Special attention is paid to how differently people understand the body and its relation to illness, and the importance of cross-cultural understanding for treating and curing illness in pluralistic societies.
Offered: Every other year
UC: Social Sciences, Intercultural Understand

AN 240. Ethnographic Theory and Practice. 3 Credits.
This course introduces students to ethnographic theory, method, practice and application within the discipline of anthropology. The goals are: 1) to provide students with a background of the history of ethnography; 2) to introduce students to the range of ethnographic writings in the contemporary era; 3) to encourage students to think about what ethnographic writings teach us and why they matter; 4) to compare ethnography to other forms of academic and popular writings; and 5) to consider the ethical dimensions and dilemmas of conducting ethnographic research.
Offered: As needed
UC: Social Sciences

AN 243. Ancient Food For Thought. 3 Credits.
In this course, students explore the origins (and consequences) of food production and consumption from an anthropological perspective. Participants examine evidence for ancient diets in a variety of different societies (hunter-gatherer, pastoral and agricultural). They analyze the relationship between our diet and other aspects of culture and explore how these types of societies have changed over the past several thousand years. Students then review contemporary environmental and health problems related to food production and consumption and draw from the past to understand and potentially address these issues.
Offered: Every year, Fall
UC: Social Sciences, Intercultural Understand

AN 245. The Anthropology of Gender-Based Violence. 3 Credits.
This course explores the topic of gender-based violence and related social problems analyzed from an anthropological perspective. Students discuss such issues as family violence within households, community level violence, the politics of reproduction, war crimes against women and girls, and the relationship between political economy, criminalization and social justice. Students analyze such theoretical frameworks as structural violence and social suffering, the in/compatibility of human rights and cultural rights, political-economy and globalization theories. The case studies for this course come from the Middle East, the South Pacific, the Caribbean, Europe, North America, Africa and Asia. Case studies of indigenous peoples’ responses to violence also are used.
Offered: As needed

AN 250. Forensic Anthropology. 3 Credits.
This course provides a general introduction to forensic anthropology, an applied subfield of biological anthropology, wherein human remains of medicolegal significance are analyzed. Students review the history of the field, basic skeletal anatomy and human biological variation, recovery of human remains and how time since death can be established. The course also covers the identification of trauma and disease in both modern and prehistoric skeletons, as well as markers of individualization that may lead to positive identification.
Offered: Every other year
UC: Breadth Elective, University Curriculum Ele

AN 251. Tales from the Crypt: Research Methods in Bioarchaeology. 3 Credits.
Students discover how skeletal studies can provide information about past lives. They learn human osteology (the study of bones) and how to use cutting-edge digital technology to obtain data from the skeleton. They formulate a research design for data collection with skeletons housed on campus, and then conduct original research on an anthropological question related to the bones. Participants discuss and debate major topics in bioarchaeology.
Corequisites: Take AN 251L.
Offered: Every other year

AN 251L. Research Methods in Bioarchaeology Lab. 0 Credits.
This lab accompanies AN 251 (Tales from the Crypt: Research Methods in Bioarchaeology).
Corequisites: Take AN 251.
Offered: Every other year

AN 252. The Science of Human Diversity. 3 Credits.
This course surveys human phenotypic variation through an evolutionary and biocultural perspective. The role of genetics and environment (including culture) is discussed in relation to the heritability of human differences. Participants also consider how culture and society shape an understanding of human biology. Topics as diverse as environmental adaptations, "race," sex differences, aging, growth, nutrition, demography and genetic disorders are addressed from this biocultural perspective.
Offered: As needed
UC: Breadth Elective, University Curriculum Ele, Intercultural Understand

AN 299. Independent Study. 1-6 Credits.
Pursuit in depth of a specific topic. The topic and credit are to be arranged with an instructor.
Offered: As needed, All

Arabic (ARB)

ARB 101. Elementary Arabic I. 3 Credits.
This course introduces students to the Modern Standard Arabic (MSA) language and to cultures of the Arabic-speaking world. Students develop accuracy and fluency in pronunciation and writing of Arabic letters, comprehend basic vocabulary and language structures, learn to use culturally appropriate social greetings and other expressions, learn the basics of grammar, and acquire insight into the culture and diversity of the Arabic-speaking world.
Offered: Every year, Fall and Spring
UC: Breadth Elective

ARB 102. Elementary Arabic II. 3 Credits.
This course is a continuation of Arabic 101.
Prerequisites: Take ARB 101.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

ARB 201. Continuing Elementary Arabic III. 3 Credits.
This course is a continuation of the study of Modern Standard Arabic. Students further develop their listening comprehension, speaking, reading and writing abilities, and their understanding of the cultures of the Arabic-speaking world.
Prerequisites: Take ARB 102.
Offered: As needed
UC: Breadth Elective, University Curriculum Ele
ARB 210. Arab Culture and Society. 3 Credits.
This course examines the historical, social, religious, cultural and artistic aspects of the modern Arab world. Students are exposed to traditions and customs of the Arabs in the Modern Middle East. Also, they become familiar with the diversity of the region and gain knowledge of the history and development of Arabic culture from the classical period to the present and the major cultural institutions of the Arabic-speaking world. The course provides students with a view of the cultural contours of the modern Arab world and the richness of the Arab cultural heritage.
Offered: As needed
UC: Humanities, Intercultural Understanding
ARB 299. Independent Study: Advanced Arabic. 3 Credits.

Art (AR)

AR 101. Introduction to Art. 3 Credits.
This course is a study of major art forms and a probe into the nature of the creative process and public response. The course combines art history with hands-on activities. It is intended for students who plan to take only one art course.
Offered: As needed
UC: Fine Arts

AR 102. Art History: Ancient Through Medieval. 3 Credits.
This introductory course considers art as seen in its cultural and historical context from prehistory through the medieval period. Students explore the stylistic elements that make great works typical of their era.
Offered: Every year, All
UC: Fine Arts

AR 102H. Honors Art History I. 3 Credits.
This introductory course considers art as seen in its cultural and historical context from prehistory through the medieval period. Students explore the stylistic elements that make great works typical of their era.
Offered: As needed
UC: Fine Arts

AR 103. Art History: Renaissance Through Contemporary. 3 Credits.
This introductory course considers art as seen in its cultural and historical context from the Renaissance through the contemporary era. Students explore the stylistic elements that make great works typical of their era.
Offered: Every year, All
UC: Fine Arts

AR 103H. Art History: Renaissance Through Contemporary. 3 Credits.
Honors Course – This introductory course considers art as seen in its cultural and historical context from the Renaissance through the contemporary era. Students explore the stylistic elements that make great works typical of their era.
UC: Fine Arts

AR 104. Survey of Non-Western Art. 3 Credits.
Participants study the major themes and forms of non-Western arts from East Asia, South Asia, Africa, the Pre-Columbian Americas and Oceania, with emphasis on their cultural, philosophical and religious contexts. Students define works of art both formally and within the framework of their method of manufacture, audience and cultural value. They also explore aspects of various non-Western religions, cultural considerations and influences in relation to the works. Students with little experience of or no prior courses in art history learn the basic terminology and methodology of the field.
Offered: Every year, All
UC: Fine Arts

AR 105. American Art. 3 Credits.
This course serves as an introduction to the history of art in the United States from the pre-colonial period to the present. The curriculum includes a careful analysis of representative works reinforced by visits to area art galleries.
Offered: Every year, All
UC: Fine Arts

AR 140. Basic Visual Design. 3 Credits.
This course exposes students to the basics of two-dimensional design. Topics include the elements of design, the principles of order and how these basics combine to create exceptional composition in various forms of art.
Offered: Every year, All
UC: Fine Arts

AR 158. Photography I. 3 Credits.
This beginning course in still photography is designed to teach basic photographic techniques. Additional topics include lighting, advertising, fashion and portrait photography. Students must provide a fully adjustable digital camera, or Digital Single Lens Reflex (DSLR) camera.
Offered: Every year, All
UC: Fine Arts

AR 175. Special Topics in Art History. 3 Credits.
This group of courses introduces art history by way of particular themes. Each covers at least three eras or movements in art history, exploring imagery, sculpture, architecture and decorative arts. Topics include: The Art and Architecture of Health and Medicine; Art and Propaganda; The Art and Imagery of Weaponry and War; Art and Love; Art and Death; and The Image of the Divine.
Offered: As needed
UC: Fine Arts

AR 200. Special Topics Course. 3 Credits.

AR 210. The Creative Process. 3 Credits.
This course introduces students to the creative process in the visual arts. Students learn to evaluate and critique their personal artwork as well as the work of others to develop a working process that enables them to go from initial thought to final product. Topics include: how to expand on initial ideas, the proper use of a sketchbook, looking at and evaluating famous works of art, and how to know when a work of art is finished.
Offered: Every year, All
UC: Fine Arts

AR 240. Graphic Design. 3 Credits.
Students gain practical experience in the creation of pictorial devices used to disseminate product information, including drawing, painting, illustration and typography.
Prerequisites: Take AR 140.
Offered: As needed
UC: Fine Arts

AR 241. Color Theory. 3 Credits.
This course introduces students to the basics of color theory in design. Participants explore different topics through a series of short in-class projects and longer out of class assignments. Topics include the use of the grey scale, color mixing, color harmonies and discord, among others.
Offered: Every year, All
UC: Fine Arts
AR 242. Cartooning. 3 Credits.
This course provides an overview of the history of the comic and cartoon arts, and explores a variety of cartooning techniques. While studying the techniques of the masters, students plan, and eventually execute their own original cartoons. This class is open to absolute beginners as well as students with previous drawing, painting and cartooning experience.
Offered: As needed
UC: Fine Arts

AR 250. Studio Art: Special Topic. 3 Credits.
Students gain hands-on experience in creative art. The medium varies from year to year and from section to section.
Offered: As needed, All
UC: Fine Arts

AR 251. Studio Art: Drawing. 3 Credits.
This studio course serves as an introduction to basic drawing skills. Subjects may include still life, landscape and portraits. Work is done in pencil, ink and other media.
Offered: Every year, All
UC: Fine Arts

AR 252. Studio Art: Painting. 3 Credits.
This studio course serves as an introduction to basic painting skills. Coursework includes specialized painting techniques, color theory and assignments based on both traditional and contemporary styles. All work is completed in acrylic painting media with some mixed media components.
Offered: Every year, All
UC: Fine Arts

AR 253. Studio Art: Sculpture. 3 Credits.
This studio course introduces students to sculpture and three-dimensional design using a variety of materials. Students gain an understanding and appreciation of basic techniques and processes involved in creating sculpture and learn how a three-dimensional object impacts its environment.
Offered: Every year, All
UC: Fine Arts

AR 254. Studio Art: Printmaking. 3 Credits.
This studio course serves as an introduction to the many processes used in printmaking. Techniques studied include those used in woodcut and linoleum cut, etching and drypoint, monotype and monoprint, embossment and lithography.
Offered: Every year, All
UC: Fine Arts

AR 255. Studio Art: Introduction to Darkroom Photography. 3 Credits.
This class covers basic black and white photographic techniques used in both processing and printing.
Offered: As needed
UC: Fine Arts

AR 257. AP Studio Art Introduction to Studio Methods. 3 Credits.
This eight-week accelerated course introduces students to basic studio methods. Both traditional and contemporary techniques are explored through a series of short in-class projects and longer out-of-class assignments. Coursework includes techniques and materials for a variety of media, including drawing, painting, watercolor, sculpture and printmaking.
Offered: As needed
UC: Fine Arts

AR 258. Photography II. 3 Credits.
This course is a continuation of Photography I (AR 158). From daguerreotypes to digital, photography's history and future are discussed through slide lectures and hands-on activities. Each student must provide an adjustable digital or film 35 mm. camera, and photo processing.
Prerequisites: Take AR 158.
Offered: Every year, All
UC: Fine Arts

AR 260. Design Innovations. 3 Credits.
This advanced design course introduces students to the way products are packaged and advertised to the public. The curriculum consists of presentations, design assignments and student participation. Students study the history of packaging and advertising from its inception up to the present day. Design mediums include print, packaging material and video. Students are expected to pursue their own design projects. Prior experience with advertising and packaging design is not necessary, only a curious mind, enthusiasm and the ability to investigate ideas.
Prerequisites: Take AR 140.
Offered: As needed

AR 262. Studio Art: Watercolor. 3 Credits.
This course introduces students to the basics of watercolor. Participants explore different topics through a series of short in-class projects and longer out-of-class assignments. Topics include specialized watercolor painting techniques, color theory and assignments based on both traditional and contemporary styles. All work is completed in watercolor with some mixed media components.
Offered: Every year, All
UC: Fine Arts

AR 263. Studio Art: Collage. 3 Credits.
This hands-on studio course enables students to explore materials and techniques involved in the art of making collage. This course looks at various ways to incorporate pre-made materials into more elaborate finished projects. Participants use a variety of materials including both manmade and natural objects as well as various painting, drawing and sculpture media.
Offered: Every year, All
UC: Fine Arts

AR 280. History of Modern Design. 3 Credits.
Students examine design trends from fashion to product to interior design from the Industrial Revolution to the present day. Distinct from fine arts, design reflects the industrialization of the modern world. Students learn to recognize design styles and classic examples of design as well as the circumstances and creative spirit that have driven design throughout history.
Offered: As needed, Summer
UC: Fine Arts

AR 299. Independent Study. 3 Credits.
Offered: As needed, All

AR 300. Special Topics in Art History. 3 Credits.
Upper level special topics courses in studio art or art history. Prerequisites vary by section.
Prerequisites: Take AR 102 or AR 103 or AR 104 or AR 105.
Offered: As needed, All
UC: Fine Arts
AR 303. Studio Art: Advanced Drawing. 3 Credits.
This advanced drawing class expands on knowledge gained in an introductory level drawing course. Topics include both traditional and contemporary techniques and advanced composition. Work is completed in various drawing materials, including charcoal, pencil, conte and ink.
Prerequisites: Take AR 251.
Offered: Every year, All
UC: Fine Arts

AR 304. Studio Art: Advanced Painting. 3 Credits.
This advanced painting class enhances knowledge gained in an introductory level painting course. Specialized painting techniques include expanded color theory as well as an introduction to contemporary techniques. All work is completed in acrylic paint with some mixed media components.
Prerequisites: Take AR 252.
Offered: Every year, All
UC: Fine Arts

AR 305. Special Topics in Studio Art. 3 Credits.
Offered: As needed
UC: Fine Arts

AR 316. World Architecture. 3 Credits.
Major styles and architects are studied with special emphasis on American architecture.
Prerequisites: Take one of the following; AR 102 AR 103 AR 104 or AR 105.
Offered: As needed

AR 317. Art of the Italian Renaissance. 3 Credits.
This course covers the period from c.1350-1600 in Italy. Participants study the painters, sculptors and architects of the period, including their artistic techniques, styles and use of symbolism. Topics include the writings by artists of the time as well as an examination of those artists and artistic movements that served as precursors to this compelling period of art history. Students further study the political, religious, economic and scientific advances of the period, including opportunities for women and the influence of regional geography on the arts.
Prerequisites: Take AR 102 AR 103 AR 104 or AR 105.
Offered: As needed
UC: Fine Arts

AR 325. Women Artists (WS 315). 3 Credits.
This art history course focuses on the lives and artwork of women such as Hildegard von Bingen, Mary Cassatt, Frida Kahlo and Georgia O’Keefe.
Prerequisites: Take one of the following; AR 102 AR 103 AR 104 or AR 105.
Offered: As needed
UC: Fine Arts

AR 335. Digital Photography. 3 Credits.
This course is designed to help students learn digital camera operation, as well as computer-based image correction and manipulation through the use of Adobe Photoshop. Participants explore relevant topics through class lectures, demonstrations, in-class exercises and out-of-class assignments. Topics include the methods and techniques used to create, edit and critically judge digital images.
Prerequisites: Take one of the following: AR 140 AR 158 or AR 255.
Offered: As needed
UC: Fine Arts

AR 342. Illustration. 3 Credits.
This course introduces students to the art of illustration. Through hands-on assignments and demonstrations, students learn the methodology of an illustrator, including generating ideas, visualization, research, preliminary studies or roughs, comprehensives and the finished picture. A variety of relevant media, materials and techniques are explored. Coursework is supplemented by lectures on historic and contemporary techniques, projects and illustrators.
Prerequisites: Take AR 140 or AR 251.
Offered: As needed
UC: Fine Arts

AR 356. Studio Art: Figure Drawing. 3 Credits.
This course serves as an introduction to the basics of figure drawing. Both traditional and contemporary styles of figurative imagery are explored through a series of short in-class projects and longer out-of-class assignments. Coursework involves the use of various drawing materials and techniques.
Prerequisites: Take AR 251.
Offered: As needed

AR 360. Innovation in the Arts and Sciences(PL 360). 3 Credits.
This course reviews science and art practices to explore how innovations occur. Because discovery and invention go hand in hand, students consider the ethics of constructing according to needs, imagination and a sense of what the world should be. Particular attention is paid to the values of diversity, from disciplines to cultures. Junior or senior status is required.
Offered: As needed
UC: Fine Arts

AR 380. Interactive Art (PL 380). 3 Credits.
This course presents an interdisciplinary examination of the functions in art, literature and theater through readings and discussions of selected creative and critical works. Topics include self-organization, open systems, emergence, complexity, pragmatism and play. Students use the final project to demonstrate a practical understanding of interactive processes. Junior or senior status is required.
Offered: As needed
UC: Fine Arts

AR 399. Independent Study. 3 Credits.
Advanced independent studio work in painting, printmaking, graphic design, photography.
Offered: As needed, All

AR 499. Independent Study. 3 Credits.
Advanced independent studio work in painting, printmaking, graphic design, photography.
Offered: As needed, All

Athletic Training (AT)

AT 114. Introduction to Athletic Training/Sports Medicine. 2 Credits.
This course is designed to familiarize the student with the role of an athletic trainer in sports and health care. AT major only or permission of instructor.
Corequisites: Take AT 114L.
Offered: Every year, Spring
AT 114L. Introduction to the Clinical Environment. 0 Credits.
Lab to accompany AT 114. This eight-week session is required for AT majors or those considering transferring into the major. AT major only or permission of instructor. (2 lab hrs.)
Corequisites: Take AT 114.
Offered: Every year, Spring

AT 115. Introduction to Kinesiology. 3 Credits.
This introductory course explores the way the musculoskeletal system produces movement patterns in humans. Musculoskeletal anatomy, joint articulation, muscular mechanics and biomechanical principals are used to perform muscular analyses of both the upper and lower extremities and the trunk. AT major only or permission of instructor.
Prerequisites: Take BIO 101.
Offered: Every year, Spring

AT 116. Introduction to Fitness and Conditioning. 2 Credits.
This introductory lab and lecture course teaches the fundamentals of basic fitness and exercise. Students engage in fitness assessments and design of personal conditioning programs for healthy subjects. For AT major only or permission of instructor.
Offered: Every year, Spring

AT 201. Medical Aspects of Sports and Activity (SPS 201). 3 Credits.
This course is aimed at individuals who are interested in working in a sports-related field, e.g., coaches, journalists, or managers. It provides an overview of a variety of sports medicine-related topics, including common sports injuries, an introduction to sports psychology and current events in the sports medicine. Students who take AT 201 cannot also receive credit for AT 214.
Prerequisites: Take one 4-credit lab science course.
Offered: Every year, Fall and Spring

AT 210. Introduction to Evidence-Based Practice. 2 Credits.
Evidence-based practice in health care is the integration of the best available research with clinical expertise in the context of patient characteristics, culture and preferences. This is an introductory course in the processes associated with collecting and utilizing evidence to make clinical decisions.
Prerequisites: Take MA 275.
Offered: Every year, Spring

AT 214. Care and Prevention of Athletic Injuries. 3 Credits.
This course is designed to provide an overview of the athletic training profession with an emphasis on the basic fundamentals utilized by the athletic trainer in prevention, recognition, care, treatment and rehabilitation of athletic injuries. AT major only or permission of instructor. Students who take AT 214 cannot also receive credit for AT 201 or HSC 214.
Prerequisites: Take BIO 102 BIO 102L AT 114.
Offered: Every year, Fall

AT 214L. CPR, AED and First Aid. 1 Credit.
Students learn principles of first aid and complete health provider certification in cardiopulmonary resuscitation and automated external defibrillator. For PT majors only. (2 lab hrs.)
Offered: Every year, Fall and Spring

AT 215. Therapeutic Modalities. 3 Credits.
Therapeutic Modalities is an introductory course designed to provide students with knowledge of theory and operation of the most commonly used therapeutic devices.
Prerequisites: Take AT 214 AT 216.
Corequisites: Take AT 215L.
Offered: Every year, Spring

AT 215L. Therapeutic Modalities Lab. 1 Credit.
This lab includes the practical application of therapeutic modalities and must be taken in conjunction with AT 215. (2 lab hrs.)
Corequisites: Take AT 215.
Offered: Every year, Spring

AT 216. Emergency Management of Athletic Trauma. 2 Credits.
This laboratory and lecture course teaches the basic skills and decision-making processes necessary to manage emergency medical situations common to athletic activity. Students also perform general first aid. All students are required to pass Red Cross CPR/AED for the Professional Rescuer and Emergency Oxygen Administration (or equivalent).
Prerequisites: Take BIO 102 AT 115.
Corequisites: Take AT 216L.
Offered: Every year, Fall

AT 216L. Emergency Management of Athletic Trauma Lab. 1 Credit.
This lab includes the practical application of basic skills and decision-making processes necessary to manage emergency medical situations. Must be taken in conjunction with AT 216.
Corequisites: Take AT 216.
Offered: Every year, Fall

AT 232. Leadership in Disruptive Times. 3 Credits.
Leadership is considered a “wicked problem” because it’s impossible to fully frame, always evolving, and based in relationships. In this course, students investigate leadership from multiple perspectives and emerging theories, work to understand the complexity of the leadership environment, how diverse perspectives matter, and how these group/social/cultural differences often manifest on a level of different communities. This course is web-based but has a twice weekly residency requirement with the professor and the students’ team.
Prerequisites: Take FYS 101 or FYS 150 and EN 102.
Offered: Every year, Fall and Spring

AT 240. Strength Training and Conditioning (AT 481). 3 Credits.
This course addresses the scientific and theoretical basis of strength training and conditioning for sports performance. This includes understanding biomechanics, exercise physiology, adaptations to training, exercise technique, prescription and the basic structure of the variables used in the design of strength and conditioning programs. The scientific and theoretical components of this class are reinforced with “hands-on” laboratory experiences.
Prerequisites: Take BIO 211 BIO 211L BIO 212 BIO 212L.
Offered: Every year, Fall

AT 250. Introduction to Evaluation and Treatment of Musculoskeletal Injuries. 3 Credits.
This lecture and laboratory course provides the student with a basic systematic approach to the process of physical evaluation and therapeutic exercise program development. It includes processes of history taking and physical exam techniques, indications and contraindications of therapeutic interventions, and treatment adjustments as related to patient injury, prevention, reconditioning and return-to-activity guidelines.
Prerequisites: Take AT 114 AT 115 AT 116.
Corequisites: Take AT 250L.
Offered: Every year, Fall
AT 250L. Introduction to Evaluation and Treatment of Musculoskeletal Injuries. 1 Credit.
This lab includes the practical application of recognizing, evaluating and treating common musculoskeletal injuries. Must be taken in conjunction with AT 250.
Corequisites: Take AT 250.
Offered: Every year, Fall

AT 251. Evaluation and Treatment of Lower Extremity Musculoskeletal Injuries. 3 Credits.
This lecture and laboratory course provides the student with a basic evaluation process and techniques involved in assessing musculoskeletal injuries of the lower extremity. The assessment information is then used to design and implement treatment and rehabilitative protocols. Emphasis is placed on integrating kinesiological principals with injury/illness recognition skills and rehabilitative concepts.
Prerequisites: Take AT 250.
Corequisites: Take AT 251L.
Offered: Every year, Spring

AT 251L. Evaluation and Treatment of Lower Extremity Musculoskeletal Injuries Lab. 1 Credit.
This lab includes the practical application of recognizing, evaluating and treating common musculoskeletal injuries. Must be taken in conjunction with AT 251.
Corequisites: Take AT 251.
Offered: Every year, Spring

AT 290. Clinical Practicum I, Risk Management and Injury Prevention. 2 Credits.
This practicum introduces students to the general policies and procedures of the Quinnipiac University athletic training room. Students are instructed in taping techniques, proper medical documentation skills, ambulatory aids, the preparticipation examination, and the Quinnipiac University Emergency Action Plan. Hands-on practical experience is emphasized in class sessions.
Prerequisites: Take AT 214 AT 216.
Corequisites: Take AT 290C.
Offered: Every year, Spring

AT 290C. Clinical Practicum I. 1 Credit.
During the semester, students gain minimum 100 hours of supervised clinical experience. Students are required to complete specific NATA clinical competencies and proficiencies. (3 lab hrs.)
Prerequisites: Take AT 214 AT 216.
Corequisites: Take AT 290.
Offered: Every year, Spring

AT 299. AT Independent Study. 1-6 Credits.

AT 330. Nutrition for Sport and Fitness. 3 Credits.
In this foundational course, students learn nutritional concepts related to wellness, injury prevention and maximizing human performance. Students also explore concepts surrounding eating disorders, nutrition for the injured athlete, and dietary supplements.
Prerequisites: Take AT 290 or HSC 262.
Offered: Every year, Spring

AT 350. Evaluation and Treatment of Upper Extremity Musculoskeletal Injuries. 3 Credits.
Students learn the evaluation process and techniques involved in assessing musculoskeletal injuries of the upper extremity. The assessment information is then used to design and implement treatment and rehabilitative protocols. Emphasis is placed on integrating kinesiological principals with injury/illness recognition skills and rehabilitative concepts.
Corequisites: Take AT 350L.
Offered: Every year, Fall

AT 350L. Evaluation and Treatment of Musculoskeletal Injuries Lab. 1 Credit.
This lab includes the practical application of musculoskeletal injury evaluation and rehabilitation. Must be taken in conjunction with AT 350.
Corequisites: Take AT 350.
Offered: Every year, Fall

AT 351. General Medical Conditions and Treatment. 3 Credits.
This course enables the athletic training student to recognize, evaluate and differentiate common systemic diseases, understand appropriate pharmacological interventions, understand the principles of pharmacology and common issues that arise when specific pharmacological agents are employed. Students who take AT 351 may not also receive credit for HSC 351.
Prerequisites: Take AT 251 AT 216.
Corequisites: Take AT 351L.
Offered: Every year, Fall

AT 351L. General Medical Conditions and Treatments Lab. 1 Credit.
This lab includes the practical application of recognizing, evaluating, differentiating and treating common medical conditions. Must be taken in conjunction with AT 351.
Corequisites: Take AT 351.
Offered: Every year, Fall

AT 350L. Evaluation and Treatment of Upper Extremity Musculoskeletal Injuries Lab. 1 Credit.
This lab includes the practical application of recognizing, evaluating, and treating common musculoskeletal injuries of the upper extremity. The assessment information is then used to design and implement treatment and rehabilitative protocols. Emphasis is placed on integrating kinesiological principals with injury/illness recognition skills and rehabilitative concepts.
Corequisites: Take AT 350L.
Offered: Every year, Fall

AT 351L. General Medical Conditions and Treatments Lab. 1 Credit.
This lab includes the practical application of recognizing, evaluating, differentiating and treating common medical conditions. Must be taken in conjunction with AT 351.
Corequisites: Take AT 351.
Offered: Every year, Fall

AT 352. Evaluation and Treatment of Spinal Injuries. 3 Credits.
Students learn the evaluation process and techniques involved in assessing common spinal pathologies in the orthopedic and sport setting. The assessment information is then used to design and implement treatment and rehabilitative protocols. Emphasis is on the evaluation process, critical thinking, choosing appropriate treatment techniques, as well as indications and contraindications of specific spinal disorders and exercise progression as related to spinal dysfunction/disorders. Manual therapy as a treatment technique and current trends for treating spinal disorders is also covered.
Prerequisites: Take AT 350 AT 351.
Corequisites: Take AT 352L.
Offered: Every year, Spring

AT 352L. Evaluation and Treatment of the Spinal Injuries Lab. 1 Credit.
This lab includes the practical application of the evaluation process of all musculoskeletal injuries with emphasis on the spine and demonstration of evidence based treatment techniques and must be taken in conjunction with AT 352.
Corequisites: Take AT 352.
Offered: Every year, Spring
AT 390. Clinical Practicum II, Athletic Protective Equipment. 2 Credits.
Students are introduced to proper fitting of athletic equipment, as well as
sporting rules relevant to safety and the role of the medical professional.
The course includes instruction in fabricating and applying protective
equipment, such as pads, splints and supports, and advanced taping
and wrapping techniques used in athletic training; hands-on practical
experience is emphasized in class sessions.
Prerequisites: Take AT 290.
Offered: Every year, Fall

AT 390C. Clinical Practicum II, Clinical. 1 Credit.
During the semester, students gain a minimum 200 hours of supervised
clinical experience. Students are required to complete specific NATA
clinical competencies and proficiencies. (3 lab hrs.)
Corequisites: Take AT 390.
Offered: Every year, Fall

AT 391C. Clinical Practicum III. 1 Credit.
During the semester, students gain a minimum of 200 hours of
supervised clinical experience. Students are required to complete specific
NATA clinical competencies and proficiencies. (3 lab hrs.)
Prerequisites: Take AT 350 AT 351 AT 390C.
Offered: Every year, Spring

AT 440. Biomechanics. 3 Credits.
This course focuses on the advanced study of human movement,
concentrating on the principles of mechanics they relate to the human
body. Areas of athletic injury, pathology, sport performance, occupational
risks, injury prevention, and rehabilitation are addressed. Projects are
designed not only to achieve scientific insights into biomechanical
problems but also to train students in state-of-the-art interdisciplinary
research procedures. Kinematic and kinetic analyses are conducted.
Prerequisites: Take BIO 211 BIO 212.
Offered: Every year, Fall and Spring

AT 440L. Biomechanics Lab. 1 Credit.
This lab includes the practical application of biomechanics including the
processes involved in data collection for forces, EMG and motion analysis
data. Must be taken in conjunction with AT 440. (2 lab hrs.)
Corequisites: Take AT 440.
Offered: As needed

AT 450. Administration and Management in Athletic Training. 3 Credits.
Organizational and administrative procedures and considerations, as well as
the legal aspects of athletic training and sports medicine are included in
this course.
Prerequisites: Take AT 391C.
Offered: Every year, Fall

AT 460. Advanced Nutrition (HSC 460). 3 Credits.
This advanced-level food and nutrition course examines the composition and
physiological role of nutrients and their relationships to health and
the body. Macronutrient metabolism as well as a detailed examination of
the role of vitamin and mineral metabolism are explored. Current
nutrition issues of supplement use, weight management, sports nutrition,
nutritional ecology and the application of nutrition directly to food and its
preparation also are addressed. Students receive hands-on instruction in
cooking throughout the semester.
Prerequisites: Take AT 330 or HSC 262.
Offered: Every year, Fall

AT 481. Strength Training and Conditioning for the Athletic Trainer (AT
240). 2 Credits.
The purpose of the course is to expand the students’ knowledge of
rehabilitation beyond general concepts. Students learn theory pertaining
to a variety of conditioning methods including: periodization, plyometrics
and functional training. Lifting techniques and injury prevention related
to conditioning are discussed and applied to both the individual athlete
and team training concepts. The course is taught as a combination of
classroom and laboratory experiences to ensure that students are
capable of translating theory into practice.
Prerequisites: Take AT 352 or permission of instructor.
Offered: Every year, Spring

AT 482. Advanced Rehabilitation Options in Sports Medicine. 2 Credits.
This course examines in-depth rehabilitative techniques and advanced
manual therapy skills for the sports medicine setting. Practical
application of current concepts and research-driven rehabilitative
protocols are emphasized. The course also addresses trends in sports
medicine surgical procedures, research behind new rehabilitative
techniques, and effective mechanisms for evaluating clinical relevance of
new products.
Prerequisites: Take AT 352.
Offered: Every year, Fall

AT 490. AT Independent Study. 1-6 Credits.
Offered: As needed

AT 490C. Clinical Practicum IV. 1 Credit.
During the semester, students gain a minimum of 200 hours of clinical
experience. Students are required to complete specific NATA clinical
competencies and proficiencies. (3 lab hrs.)
Prerequisites: Take AT 351 AT 391C.
Offered: Every year, Fall

AT 491. Clinical Practicum V, Professional and Career
Preparation. 2 Credits.
This course provides students with a means to integrate and augment
all concepts, skills and knowledge covered in the athletic training
curriculum. Much of the course is discussion based and requires the
students to be fully participative.
Prerequisites: Take AT 490C.
Corequisites: Take AT 491C.
Offered: Every year, Spring

AT 491C. Clinical Practicum V, Clinical. 1 Credit.
During the semester, students gain a minimum of 200 hours of
supervised clinical experience. Students are required to complete specific
NATA clinical competencies and proficiencies. (3 lab hrs.)
Corequisites: Take AT 491.
Offered: Every year, Fall and Spring
Bachelor of Business Administration (BBA)

BBA 205. Introduction to Information Systems. 3 Credits.
This course introduces students to contemporary information systems and how these systems are used in organizations. The focus is on the key components of information systems—people, software, hardware, data and communication technologies—and how these components can be integrated and managed to create competitive advantage. The course also provides an introduction to systems and development concepts, technology acquisition and various types of application software that have become prevalent or are emerging in modern organizations and society.
Offered: Every year, Spring

BBA 210. Globalization and International Business. 3 Credits.
This course introduces students to issues concerning globalization and international business. Students are introduced to the critical role of foreign exchange and the global monetary system, as well as international trade and the impact of multinational corporations on the globalization process. The role of the business community in reducing the negative effects of globalization while at the same time availing itself of its benefits is considered. Insights are drawn from social sciences disciplines such as economics, political science, sociology and cultural geography.
Offered: Every year, Fall

BBA 215. Financial Accounting. 3 Credits.
This course introduces students to the purposes of financial statements and the recognition, measurement and disclosure concepts and methods underlying financial statements. Students begin to use and interpret financial statements and the related impact of elementary transactions and events on those statements.
Prerequisites: Take MA 107 or higher.
Offered: Every year, Fall

BBA 220. Managerial Accounting. 3 Credits.
This course provides an introduction to the uses of accounting information by managers for internal reporting and decision making. Students begin to focus on classifying, measuring and analyzing product and service costs for decision making, budget preparation and performance evaluation. Minimum grade for accounting majors B-.
Prerequisites: Take BBA 215.
Offered: Every year, Fall

BBA 225. Essentials of Management and Organizational Behavior. 3 Credits.
This course provides an introduction to the functions and processes of management. It provides a foundation for managerial and entrepreneurial thinking. Emphasis is on the foundations of managing large organizations.
Offered: Every year, Fall

BBA 230. Business Law and Society. 3 Credits.
The course helps students develop an understanding of the law as an evolving social institution rather than a static body of rules. Students read and interpret legal case reports as a means of keeping abreast of law that affects the business environment. Students learn the economic and social forces that have shaped and are now dictating the evolution of modern contract principles and the Uniform Commercial Code. Ethics and social responsibility are addressed throughout.
Offered: Every year, Spring

BBA 240. Fundamentals of Financial Management. 3 Credits.
This course introduces students to the theory and practice of financial management. Topics include the uses and valuation of securities, the structure and purpose of capital markets, financial risk, interest rates and yield curves, and corporate financial analysis and decision making.
Prerequisites: Take EC 111.
Offered: Every year, Spring

BBA 245. Marketing Principles. 3 Credits.
This course surveys marketing from the decision-making point of view, with emphasis on the conceptual and analytical components of the subject, and a synthesis of new marketing concepts with economics, behavioral sciences and mathematics.
Prerequisites: Take EC 111.
Offered: Every year, Summer

BBA 310. Advanced Business Communications. 3 Credits.
This course reviews effective communication techniques at the corporate and individual levels. Students are introduced to concepts and best practices, and given a place to practice. Participants have opportunities to practice public speaking in various forms, while also discussing frameworks and the challenges of different types of communication.
Offered: Every year, Spring

BBA 320. Project Management. 3 Credits.
This course introduces students to the initiation, planning and execution of projects with exposure to critical behavioral issues involving intragroup and intergroup collaboration. Special emphasis is on the use of current project management software.
Prerequisites: Take BBA 225.
Offered: Every year, Fall

BBA 330. Digital and Social Media Marketing. 3 Credits.
This course explores the rapidly evolving digital marketing world with particular emphasis on social media marketing. It examines strategies and tactics that organizations can use to utilize digital and social media as effective marketing tools. The course includes discussions about how to market a business on popular digital and social media sites such as Google, Facebook, Instagram, YouTube, Twitter and Pinterest.
Offered: Every year, Spring

BBA 340. Negotiation and Persuasion. 3 Credits.
This course provides an introduction to negotiation, an inescapable form of interaction in business, organizations and everyday life. In this course, students discuss basic negotiation concepts and more advanced negotiation tactics. In this process, they develop a rich framework for thinking about and succeeding in negotiation.
Prerequisites: Take BBA 210 BBA 215 BBA 225 BBA 240 BBA 245.
Offered: Every year, Fall

BBA 350. Applications of Business Analytics. 3 Credits.
This course provides an introduction to business analytics. Students receive hands-on experience utilizing data visualization tools to solve business problems and create new business opportunities. Students learn visualization design and evaluation principles to create meaningful displays of quantitative and qualitative data. They learn techniques for visualizing multivariate, temporal, text-based, geospatial, hierarchical and network/graph-based data.
Prerequisites: Take BBA 205 and EC 271 or EC 272.
Offered: Every year, Spring
BIO 101. General Biology I. 3 Credits.  
This course considers the basic concepts of life science with emphasis on the methods of science and the role of science in society, the chemistry of life, and molecular and cellular evolution. Selected topics include cellular biochemistry, the central dogma of biology, regulation of gene expression, cell structure and function, respiration and photosynthesis, and cell cycles. This course is primarily for students in health science programs or in the School of Engineering. First semester of a full-year course; must be taken in conjunction with BIO 101L.  
Corequisites: Take BIO 101 BIO 101L; Minimum grade C-.  
Offered: Every year, Spring  
UC: Natural Sciences

BIO 102. General Biology II. 3 Credits.  
This course covers the basic concepts of life science with an emphasis on animal anatomy and physiology, animal reproduction and development, the nervous system, evolutionary mechanisms and ecological principles. Selected topics include microevolution, speciation, macroevolution, animal behavior and application of comparative anatomy and physiology to illuminate evolutionary relationships and their ecological context. This course is primarily for students in health science programs or in the School of Engineering. Second semester of a full-year course; must be taken in sequence. Must be taken in conjunction with BIO 102L.  
Prerequisites: Take BIO 101 BIO 101L; Minimum grade C-.  
Corequisites: Take BIO 102L.  
Offered: Every year, Spring and Summer  
UC: Natural Sciences

BIO 102L. General Biology Lab II. 1 Credit.  
Lab to accompany BIO 102. Selected projects develop skills in experimental design, data analysis and scientific writing. (2 lab hrs.) Must be taken in conjunction with BIO 102.  
Prerequisites: Take BIO 101 BIO 101L; Minimum grade C-.  
Corequisites: Take BIO 102.  
Offered: Every year, Spring and Summer  
UC: Natural Sciences

BIO 105. Introduction to the Biological Sciences I. 3 Credits.  
This course introduces natural science to the nonscientist with an emphasis on problems confronting society. Relationships between humans and the environment are included. This course is designed for nonscience majors. Must be taken in conjunction with BIO 105L.  
Corequisites: Take BIO 105L.  
Offered: Every year, Fall  
UC: Natural Sciences

BIO 105L. Introduction to Biological Science Lab. 1 Credit.  
Lab to accompany BIO 105. (2 lab hrs.) Must be taken in conjunction with BIO 105.  
Corequisites: Take BIO 105.  
Offered: Every year, Fall  
UC: Natural Sciences

BIO 106. Science and Society: Concepts and Current Issues. 3 Credits.  
This course introduces natural science to the nonscientist with an emphasis on problems confronting society. Current health and scientific issues in the news are emphasized to help students recognize the importance of science in their daily lives. This course is designed for nonscience majors. May not be taken for credit concurrently with or after completion of BIO 161. Must be taken in conjunction with BIO 106L.  
Corequisites: Take BIO 106L.  
Offered: Every year, Spring  
UC: Natural Sciences

BIO 106L. Science and Society: Concepts and Current Issues Lab. 1 Credit.  
Lab to accompany BIO 106. (2 lab hrs.) May not be taken for credit concurrently or after completion of BIO 161. Must be taken in conjunction with BIO 106.  
Corequisites: Take BIO 106.  
Offered: Every year, Spring  
UC: Natural Sciences

Biology (BIO)

BIO 101L. General Biology I Lab. 1 Credit.  
Lab to accompany BIO 101. Selected projects develop skills in experimental design, data analysis and scientific writing. (2 lab hrs.) Must be taken in conjunction with BIO 101.  
Corequisites: Take BIO 101.  
Offered: Every year, All  
UC: Natural Sciences
BIO 120. The Biology of Beer. 3 Credits.
This lecture course uses the biological processes of beer production and consumption as a framework for examining basic principles of molecular, cellular and organismal biology. Students begin by studying the life cycle of the brewer’s yeast and the process of fermentation. They then consider how the human body responds to beer, and finally, they examine the biological basis of alcoholism and fetal alcohol syndrome. This course is designed for nonscience majors.
Offered: Every year, Fall
UC: Natural Sciences

BIO 121. Human Genetics from ACTG to XY. 3 Credits.
Sequencing of the human genome has allowed, for the first time in history, the ability to read the complete set of instructions for making a human being. This course, which is designed for nonscience majors, introduces students to human genetics, from the micro to the macro level. The structure of DNA and the organization of the human genome is explained as students learn how genes influence development and health. The genetic basis of human disease is utilized as a tool to explore inheritance patterns within families, personalized genetics, genetic testing and new therapeutic approaches from both a biological and an ethical perspective.
Offered: As needed
UC: Natural Sciences

BIO 128. Global Health Challenges: A Human Perspective. 3 Credits.
This course addresses a series of topics that elucidate and address challenges in global public health, with an emphasis on neglected tropical diseases and the profound impact that they have on humanity. Biological information concerning the etiology, pathology and epidemiology of the diseases is presented at the level of the nonscientist. Emphasis is placed on human aspects of the diseases, such as impacts of diseases on education, socioeconomics and stigmatization.
Corequisites: Take BIO 128L.
Offered: Every year, Fall
UC: Natural Sciences

BIO 128L. Global Health Challenges Lab. 1 Credit.
Lab to accompany BIO 128L (2 lab hrs). Selected projects introduce students to the basics of the scientific method, experimental design, data analysis and scientific writing.
Corequisites: Take BIO 128.
Offered: Every year, Fall
UC: Natural Sciences

BIO 150. General Biology for Majors. 4 Credits.
Students develop sound learning strategies and introductory knowledge within five core concepts in biology: science as a way of knowing, chemistry of life, structure and function relationships; major pathways and transformations of energy and matter, as well as living systems as interactive and interconnected. This is the first course of a three-course sequence for biology and related majors. Must be taken in conjunction with BIO 150L.
Corequisites: Take BIO 150L.
Offered: Every year, Fall
UC: Natural Sciences

BIO 150L. General Biology for Majors Laboratory. 0 Credits.
Lab to accompany BIO 150. Students take an investigative/inquiry-based approach and become competent within the process of science including experimental design and analysis, as well as scientific communication and collaboration. Must be taken in conjunction with BIO 150.
Corequisites: Take BIO 150.
Offered: Every year, Fall
UC: Natural Sciences

BIO 151. Molecular and Cell Biology and Genetics. 4 Credits.
Students investigate key concepts in molecular and cell biology and genetics. Topics include evolution, the central dogma, regulation of gene expression, cell structure and physiology, cell communication, immunology, cancer and cell division. Must be taken in conjunction with BIO 151L.
Prerequisites: Take BIO 150 BIO 150L; Minimum grade C-.
Corequisites: Take BIO 151L.
Offered: Every year, Spring
UC: Natural Sciences

BIO 151L. Molecular and Cell Biology and Genetics Lab. 0 Credits.
Lab to accompany BIO 151. Selected projects enable students to develop skills in experimental design through an investigative/inquiry-based approach, data analysis and scientific writing.
Prerequisites: Take BIO 150 BIO 150L; Minimum grade C-.
Corequisites: Take BIO 151.
Offered: Every year, Spring
UC: Natural Sciences

BIO 152. Ecological and Biological Diversity. 4 Credits.
Students develop a deeper understanding of central concepts and issues in ecology and biodiversity by building on information and skills acquired in BIO 150 and BIO 151. Specific areas of interest include populations and forces that regulate them, species concepts, and the ecological roles and evolutionary significance of key organisms. Must be taken in conjunction with BIO 152L.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L; Minimum grade C-.
Corequisites: Take BIO 152L.
Offered: Every year, Fall

BIO 152L. Ecological and Biological Diversity Laboratory. 0 Credits.
Lab to accompany BIO 152. Selected activities, field experiences and exercises develop skills in observation, documentation, experimental design, data analysis and scientific written and oral communication. Must be taken in conjunction with BIO 152.
Corequisites: Take BIO 152.
Offered: Every year, Fall

BIO 161. Introduction to the Biological Aspects of Science and Society. 3 Credits.
This course introduces natural science to the nonscientist with an emphasis on current problems confronting society. Current health and scientific issues in the news are emphasized to help students recognize the importance of science in their daily lives. This course is designed for nonscience majors. May not be taken for credit concurrently or after completion of BIO 106.
Offered: Every year, Spring
UC: Natural Sciences

BIO 205. Bioethics. 3 Credits.
This course explores major ethical issues arising from advances in biomedical technology, such as when human life begins, the ethics of assisted reproduction, cloning, stem cell research, and genetic engineering, among others. Emphasis is on understanding the science behind the various biotechnologies and applying sound moral reasoning to the ethical issues discussed.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L or PL 101 or PS 101.
Offered: Every year, Spring
UC: Natural Sciences
BIO 207. Coral Reef Organismal Diversity - An Immersive Approach. 3 Credits.
In this hands-on course, participants focus on a series of topics related to coral reef and marine ecology, with an emphasis on adaptations to underwater life, conspecific and interspecific relationships, and the role of conservation and education play in developing responsible tourism practices. Students study the underwater world in a way that relatively few people do: directly via SCUBA diving in Bonaire, Netherlands Antilles. Students are expected to complete multiple dives per day and use their observations to discuss reef structure, animal behavior, conservation and eco-tourism. By the start of the course, students must either possess (at a minimum) Open Water SCUBA certification or have completed the online portion of PADI Open Water Certification with the understanding that they will complete the practicum portion in the first two days on Bonaire.
Offered: Every year, Summer

BIO 208. Introduction to Forensic Science. 3 Credits.
This course begins with a historical overview of the discipline as a method of understanding the contemporary field of forensics. Scientific principles and practices are applied to specific examples within crime scene and evidence analysis including, but not limited to physical evidence, glass and soil, organic and inorganic substances, hair and fibers, toxicology, serology and fingerprinting. Additionally, students utilize FBI cases, popular press and television to evaluate the use of science and distinguish among science, law and entertainment. Must be taken in conjunction with BIO 208L.
Corequisites: Take BIO 208L.
Offered: Every year, Spring
UC: Natural Sciences

BIO 208L. Introduction to Forensic Science Laboratory. 1 Credit.
Students develop skills in observation, measurement, microscopy, glass fracture patterns, soil and footprint analysis, chromatography, spectrophotometry, hair and fiber analysis, fingerprinting and DNA analysis. The culmination of the laboratory experience involves synthesis of lecture and laboratory activities into a single class project that begins with control of a simulated crime scene and evidence search patterns, and continues through processing evidence, evidence analysis and presentation of results. Must be taken in conjunction with BIO 208. (3 lab hrs.)
Corequisites: Take BIO 208.
Offered: Every year, Spring
UC: Natural Sciences

BIO 211. Human Anatomy and Physiology I. 3 Credits.
This advanced course provides a comprehensive analysis of human anatomy and physiology, including a detailed examination of molecular and cellular aspects of cell and organ function and metabolism incorporated with system physiology in the human body. Systems studied in the course include integumentary, skeletal, muscle, nervous, special senses and endocrine. Emphasis is on function and homeostasis. Relevant diseases also are presented. Primarily for students in bachelor's degree health science programs. First semester of a full-year course; must be taken in sequence. Must be taken in conjunction with BIO 211L.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L; Minimum grade C-.
Corequisites: Take BIO 211L.
Offered: Every year, Fall and Spring

BIO 211L. Human Anatomy and Physiology Lab I. 1 Credit.
Lab to accompany BIO 211. A detailed study of the major body systems utilizing anatomical models, cadavers, animal specimens, histological slides, physiological experiments and simulations. (3 lab hrs.) Must be taken in conjunction with BIO 211.
Prerequisites: Take BIO 102-BIO 102L or BIO 151-BIO 151L; Minimum grade C-.
Corequisites: Take BIO 211.
Offered: Every year, Fall and Summer

BIO 212. Human Anatomy and Physiology II. 3 Credits.
This course is a continuation of BIO 211 with an emphasis on the anatomy and physiology of the major body systems. Systems studied in this course include cardiovascular, lymphatic, immune, respiratory, urinary, digestive and reproductive. Emphasis is on structure, function, interdependence and the maintenance of homeostasis. Relevant diseases also are presented. Primarily for students in bachelor's degree health science programs. Second semester of a full-year course; must be taken in sequence. Must be taken in conjunction with BIO 212L.
Prerequisites: Take BIO 211 BIO 211L; Minimum grade C-.
Corequisites: Take BIO 212L.
Offered: Every year, Spring and Summer

BIO 212L. Human Anatomy and Physiology II Lab. 1 Credit.
Lab to accompany BIO 212. A detailed study of the major body systems utilizing anatomical models, cadavers, animal specimens, histological slides, physiological experiments and simulations. Must be taken in conjunction with BIO 212. (3 lab hrs.)
Prerequisites: Take BIO 211 BIO 211L; Minimum grade C-.
Corequisites: Take BIO 212.
Offered: Every year, Spring and Summer

BIO 218. Vertebrate Natural History. 4 Credits.
This course involves the observation, collection and identification of terrestrial and aquatic vertebrate animals. Emphasis is on life histories of local species. There are frequent field trips. (2 class hrs., 4 lab hrs.)
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Offered: Every other year, Fall

BIO 225. Physiological Diversity. 3 Credits.
This course provides an analysis of the physical and chemical processes that maintain animal life, including humans. Lectures cover the interdependent function of molecules, cells, organs and tissues as they relate to organismal function and fitness. Physiological principles are examined in a comparative framework and investigated through inquiry-based activities such as case study analyses and the reading of primary literature. Emphasis is on the roles of physiology in the maintenance of homeostasis throughout the life cycle of an animal. Must be taken in conjunction with BIO 225L.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Corequisites: Take BIO 225L.
Offered: Every other year, Fall

BIO 225L. Physiological Diversity Lab. 1 Credit.
This course complements the BIO 225 lecture section by allowing students to investigate physiological principles via experimentation and case study analyses. Must be taken in conjunction with BIO 225.
Corequisites: Take BIO 225.
Offered: Every other year, Fall
BIO 240. Cellular Communication. 3 Credits.
This class focuses on the molecular mechanisms by which cells communicate with each other. Using examples from both prokaryotes and eukaryotes, students examine how cells release signaling molecules, and then consider how target cells recognize and respond to the signals. Participants discuss how the basic processes are altered in diseases of signal processing such as cancer, diabetes and depression.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Offered: Every year, Fall

BIO 250. Biology Journal Club. 1 Credit.
BIO 250 is a scientific journal club in which students present published research papers to their peers, providing the background necessary for their peers to understand the experiments, and discussing the implications of the science.
Prerequisites: Take BIO 101 or BIO 150; Minimum grade C.
Offered: Every year, Spring

BIO 259. Biology Elective. 1-15 Credits.
This course considers the basic principles of inheritance, including data analysis and problem-solving skills. Students gain laboratory experience with a variety of techniques and organisms of current research importance, as well as with solving problems and analyzing data. Emphasis is on sound logic, creative thought and experimental design. Must be taken in conjunction with BIO 282L.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Corequisites: Take BIO 282L.
Offered: Every year, Fall
UC: Natural Sciences

BIO 282L. Genetics Lab. 1 Credit.
Lab to accompany BIO 282. Must be taken in conjunction with BIO 282.
Offered: Every year, Fall
UC: Natural Sciences

BIO 282. Genetics. 3 Credits.
This course considers the basic principles of inheritance, including data analysis and problem-solving skills. Students gain laboratory experience with a variety of techniques and organisms of current research importance, as well as with solving problems and analyzing data. Emphasis is on sound logic, creative thought and experimental design. Must be taken in conjunction with BIO 282L.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Corequisites: Take BIO 282L.
Offered: Every year, Fall

BIO 298. Research Methods in Biology. 3 Credits.
This introduction to biological research includes discussion and demonstrated skills in library use, literature citation, academic integrity, experimental design and statistical and graphical treatment of data. It culminates in the collaborative design, preparation and presentation of a scientific research project. This course also includes exploration of the skills and values important to careers in science. Primary emphasis is given to the development of scientific literacy, critical thinking and reasoning, and written and oral communication.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Offered: Every year, Fall and Spring

BIO 300. Special Topics. 3 Credits.
Special topics in biology.
Prerequisites: Take BIO 101-BIO 102 or BIO 150-BIO 151.
Corequisites: Take BIO 300L.
Offered: As needed

BIO 300L. Special Topics Lab. 1 Credit.
Lab to accompany BIO 300.
Corequisites: Take BIO 300.
Offered: As needed

BIO 317. Developmental Biology. 2 Credits.
This course is an introduction to the basic developmental processes that enable a single cell to differentiate and create entire organ systems. Various animal models are explored, compared and integrated to illustrate key molecular and cellular events that lead to the formation of an entire organism. Must be taken in conjunction with BIO 317L.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Corequisites: Take BIO 317L.
Offered: Every other year, Spring

BIO 317L. Developmental Biology Lab. 2 Credits.
Lab to accompany BIO 317. This project-based laboratory uses a variety of different model systems to examine development. Must be taken in conjunction with BIO 317.
Corequisites: Take BIO 317.
Offered: Every other year, Spring

BIO 323. Invertebrate Zoology. 3 Credits.
This course introduces the basic adaptive features of the major invertebrate groups with emphasis on structure, classification, ecology and evolution, utilizing both lab and field studies. Must be taken in conjunction with BIO 323L.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Corequisites: Take BIO 323L.
Offered: Every other year, Spring

BIO 323L. Invertebrate Zoology Lab. 1 Credit.
Lab to accompany BIO 323. (3 lab hrs.) Must be taken in conjunction with BIO 323.
Corequisites: Take BIO 323.
Offered: Every other year, Spring

BIO 328. Human Clinical Parasitology. 3 Credits.
This course considers the biology of protozoan and helminth parasites of humans and includes an introduction to tropical medicine. Lectures focus on the life cycles of selected parasites and epidemiology and pathology of selected parasitic diseases. Laboratory work focuses on clinical diagnosis, diagnostic techniques (including immunodiagnostic techniques), recognition of vectors, and experimental life cycle studies using both living and preserved materials. Must be taken in conjunction with BIO 328L.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Corequisites: Take BIO 328L.
Offered: Every other year, Spring

BIO 328L. Human Clinical Parasitology Lab. 1 Credit.
Lab to accompany BIO 328. (3 lab hrs.) Must be taken in conjunction with BIO 328.
Corequisites: Take BIO 328.
Offered: Every other year, Spring

BIO 329. Neurobiology. 3 Credits.
This course provides an introduction to molecular, cellular and organismal neuroscience. After exploring basic topics including electrical excitability, neurotransmitters and receptors, the course considers higher-level integrated systems such as the sensory systems. Human disorders are discussed to highlight the importance of proper functioning of the various components of the nervous system.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L and CHE 111 CHE 111L; Minimum grade C.
Offered: Every year, Spring
BIO 346. Cell Physiology. 3 Credits. This course examines the physiology of the cell with emphasis on the structure and function of the eukaryotic cell. Topics include metabolism, intracellular transport, cytoskeleton, movement, communication and control of cellular reproduction. The lab involves current techniques for studying proteins, cellular components and living organisms. Must be taken in conjunction with BIO 346L.
**Prerequisites:** Take BIO 102 BIO 102L or BIO 151 BIO 151L; and CHE 210 CHE 210L.
**Corequisites:** Take BIO 346L.
**Offered:** Every year, Fall

BIO 346L. Cell Physiology Lab. 1 Credit. Lab to accompany BIO 346. This project-based laboratory uses current techniques for separating and studying cellular proteins and components and observing living organisms. The lab culminates with a major project investigating eukaryotic motility and cell structure. (3 lab hrs.) Must be taken in conjunction with BIO 346.
**Corequisites:** Take BIO 346.
**Offered:** Every year, Fall

BIO 350. Cardiovascular Physiology. 3 Credits. The physiology of the mammalian heart is studied in detail. The course examines electrophysiology of the heart, structure and function, cardiac cycle, hemodynamics, capillary dynamics, cardiac output and venous return. Cardiovascular pathologies also are discussed.
**Prerequisites:** Take BIO 212.
**Offered:** Every other year, Fall

BIO 352. Botany. 2 Credits. The biology of plants, focusing on morphology, physiology, growth, genetics, evolution, ecology, ethnobotany and their importance to humans.
**Prerequisites:** Take BIO 102 BIO 102L or BIO 151 BIO 151L.
**Corequisites:** Take BIO 352L.
**Offered:** Every other year, Fall

BIO 352L. Botany Lab. 2 Credits. Lab to accompany BIO 352. (4 lab hrs.)
**Corequisites:** Take BIO 352.
**Offered:** Every other year, Fall

BIO 356. Aquatic Ecology. 2 Credits. This introduction to the study of the biology, chemistry, geology and the physics of ponds, lakes and streams includes studies of life histories of representative freshwater organisms. Students receive field training in limnological techniques.
**Prerequisites:** Take BIO 102 BIO 102L or BIO 151 BIO 151L.
**Corequisites:** Take BIO 356L.
**Offered:** Every other year, Fall

BIO 356L. Aquatic Ecology Lab. 2 Credits. Lab to accompany BIO 356. (4 lab hrs.)
**Corequisites:** Take BIO 356.
**Offered:** Every other year, Fall

BIO 358. Life on a Changing Planet. 2 Credits. The focus of this course is on the unique position of humans in nature-our ability to understand the historical background of current ecological dilemmas and develop realistic possibilities for solving them. Specific course topics include environmental issues of 1) overpopulation; 2) sustainability associated with food, water and energy sources; 3) climate change; 4) protection of biodiversity and other natural resources; 5) reduction and mitigation of pollution; and 6) the economics and politics associated with conservation. Must be taken in conjunction with BIO 358L.
**Prerequisites:** Take BIO 102 BIO 102L or BIO 151 BIO 151L.
**Corequisites:** Take BIO 358L.
**Offered:** Every other year, Spring

BIO 358L. Life on a Changing Planet Lab. 2 Credits. Lab to accompany BIO 358. Must be taken in conjunction with BIO 358.
**Corequisites:** Take BIO 358.
**Offered:** Every other year, Spring

BIO 365. Cancer Biology. 3 Credits. This course provides an overview of cancer biology. With a focus on the molecular genetics of cancer, the course explores the identification of the genes and biochemical pathways which when disrupted lead to a deregulation of cell growth and differentiation. A discussion of disease pathology includes tumor classification, prognosis and current treatment options.
**Prerequisites:** Take BIO 102 BIO 102L or BIO 151 BIO 151L.
**Offered:** Every other year, Spring

BIO 375. Physiological Models for Human Disease. 3 Credits. This course investigates cellular and molecular mechanisms of animal physiology using a variety of animal model systems including Drosophila melanogaster (fruit fly), Caenorhabditis elegans (roundworm), Dugesia tigrina (planaria), Danio rerio (zebrafish) and Gallus gallus domesticus (chicken). Students are introduced to current applications of several experimental models for biomedical research on human health and diseases. Must be taken in conjunction with BIO 375L.
**Prerequisites:** Take BIO 102 BIO 102L or BIO 151 BIO 151L.
**Corequisites:** Take BIO 375L.
**Offered:** Every other year, Fall

BIO 375L. Physiological Models for Human Disease Lab. 1 Credit. Lab to accompany BIO 375. Students work in groups to design and carry out experiments using one of four model systems listed Drosophila melanogaster (Fruit Fly), Caenorhabditis elegans (Roundworm), Dugesia tigrina (Planaria) and Danio rerio (Zebrafish). Students analyze experimental data and present findings via oral presentations. Must be taken in conjunction with BIO 375.
**Corequisites:** Take BIO 375.
**Offered:** Every other year, Fall

BIO 382. Human Genetics. 3 Credits. This course examines the genetic mechanism in humans, including data analysis and problem solving skills. The course includes an exposure to techniques for analysis of genetic variation in humans, the structure of the human genome, the implication of human genetic variation, somatic cell genetics, an introduction to medical genetics, DNA analysis, and the implications of genetic knowledge in the context of modern society and culture. Must be taken in conjunction with BIO 382L.
**Prerequisites:** Take BIO 102 BIO 102L or BIO 151 BIO 151L.
**Corequisites:** Take BIO 382L.
**Offered:** Every other year, Spring
BIO 382L. Human Genetics Lab. 1 Credit.
Lab to accompany BIO 382. (2 lab hrs.) Must be taken in conjunction with BIO 382.
Prerequisites: Take BIO 101 BIO 101L and BIO 102 BIO 102L or; Take BIO 150 BIO 150L and BIO 151 BIO 151L.
Corequisites: Take BIO 382.
Offered: Every other year, Spring

BIO 383. Evolution. 3 Credits.
This course examines the mechanisms of evolutionary change and surveys the evolutionary and phylogenetic history of life on earth. Because evolution is often a focus of social debate about ways of knowing and about the nature of humanity, students also explore the history of this debate and its influence on society.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Offered: Every other year, Spring

BIO 385. Experiential Inquiry in Biology. 1-4 Credits.
In this course, guided individual and group assignments in Blackboard focus on synthesis of foundational knowledge in biology, development of scientific literacy, critical and creative thinking and communication skills and preparation for careers in science as responsible citizens. This course must be completed during the ongoing experiential learning project/experience, which must relate to the biological sciences and occur outside the classroom. The experiential learning project and course credit must be approved by the academic coordinator prior to enrollment.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L and BIO 298; Minimum grade C-.
Offered: Every year, All

BIO 399H. Honors Research in Biological Sciences. 3 Credits.
This course targets students who are majoring in the biological sciences and are seeking University honors and/or departmental honors. In this capstone seminar, students participate in in-depth examination of primary research papers. The material relates to a central theme chosen by the professor.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L and BIO 298.
Offered: Every Fall

BIO 471. Molecular Genetics. 3 Credits.
This course introduces students to the theory and practice of DNA manipulation that is involved in modern molecular biology, including cancer research, cellular development, regulation of differentiation and construction of designer genes in plants, animals, humans, microorganisms and virus. These methods are common in health research, industrial discovery and environmental remediation. The lecture and the laboratory, which involves DNA manipulation and gene cloning, are designed for students interested in careers in medicine, biotechnology, microbiology and graduate programs. Must be taken in conjunction with BIO 471L.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L and CHE 110 CHE 111.
Corequisites: Take BIO 471L.
Offered: Every other year, Spring

BIO 471L. Molecular Genetics Lab. 1 Credit.
Lab to accompany BIO 471. (4 lab hrs.)
Corequisites: Take BIO 471
Offered: Every year, Spring

BIO 498. Independent Study in Biology. 1-4 Credits.
Students may take a total of 8 credits of Independent Study/research through enrollment in BIO 498-BIO 499.
Offered: As needed

BIO 499. Independent Study in Biology. 1-4 Credits.
Students may take a total of 8 credits of Independent Study/research through enrollment in BIO 498-BIO 499.
Offered: As needed

Biomedical Sciences (BMS)

BMS 110. The World of Microbes. 3 Credits.
In this course, which is designed for nonscience majors, students are introduced to the relevance of microorganisms in everyday life. Topics include: microbes in the environment, infectious disease, biotechnology, food microbiology, antibiotics and host defense mechanisms (e.g., the immune system). This course must be taken in association with BMS 110L.
Corequisites: Take BMS 110L.
Offered: As needed

BMS 110L. The World of Microbes Lab. 1 Credit.
Students in this laboratory course explore by experimentation the nature of microorganisms, in particular, bacteria. This includes growing bacteria in culture, staining them and viewing them under the microscope and testing their ability to survive under various conditions. This course must be taken in conjunction with BMS 110.
Corequisites: Take BMS 110.
Offered: As needed

BMS 114. Microbes in Action. 3 Credits.
This course is designed to emphasize the applied aspects and disease potential of microorganisms. Of particular interest is the role microorganisms play in the environment.
Corequisites: Take BMS 114L.
Offered: As needed

BMS 114L. Microbes in Action Lab. 1 Credit.
Lab to accompany BMS 114. (2 lab hrs.)
Corequisites: Take BMS 114.
Offered: As needed

BMS 117. The Human Organism. 3 Credits.
This course, designed for non-science majors, emphasizes the human organism from a basic biological and developmental perspective. These concepts are explored by examining the development of the total human organism beginning with conception and onward into old age and eventual death. This course must be taken in conjunction with BMS 117L, the laboratory component of this course.
Corequisites: Take BMS 117L.
Offered: Every year, Fall and Spring

UC: Natural Sciences

BMS 117L. The Human Organism Lab. 1 Credit.
This lab, which accompanies BMS 117, The Human Organism, includes exercises/experiments designed to reinforce basic biological principles, which form the basis for understanding the biology of all organisms, including the human organism. This course must be taken in conjunction with BMS 117L lecture.
Corequisites: Take BMS 117.
Offered: Every year, Fall and Spring

UC: Natural Sciences
BMS 162. Human Health and Disease. 3 Credits.
This course, which is designed for nonscience majors, describes human disease from a biological viewpoint, and presents human health concerns and issues for discussion. Historical and sociological perspectives on human disease as well as the scientific investigation of disease processes are included. The role of molecular biology and biotechnology in approaching human disease is discussed.
Offered: Every year, Fall
UC: Natural Sciences

BMS 200. Biology and Experience of Human Aging. 3 Credits.
Key concepts of this course include: 1) the natural decline in human capabilities and function; 2) significant elder diseases; 3) elder health care issues; 4) factors that affect aging rates; and 5) death and dying. The course begins with concepts including research techniques, cellular aging and demographics. The second half focuses on the organ systems significantly affected in aging including skin, bones, muscle, the senses, the cardiovascular system and the nervous system.
Prerequisites: Take 1 group; BIO 101 BIO 102 or BIO 150 BIO 151 or BMS 117 BMS 162.
Offered: Every year, Fall and Spring
UC: Natural Sciences, Intercultural Understanding

BMS 213. Microbiology and Pathology. 3 Credits.
This introductory overview of microorganisms presents a detailed study of the interactions of pathogenic microbes and humans, particularly as they apply to a clinical setting; this course is designed primarily for the health practitioner. This course must be taken in conjunction with BMS 213L. Students may receive credit for BMS 213 or BMS 370, but not both.
Prerequisites: Take BIO 101 BIO 102 or BIO 150 BIO 151.
Corequisites: Take BMS 213L.
Offered: Every year, Fall and Spring

BMS 213L. Microbiology and Pathology Lab. 1 Credit.
This lab, which accompanies BMS 213 Microbiology and Pathology, includes exercises/experiments designed to cultivate basic microbiological techniques and reinforce important principles of general and clinical microbiology. This course must be taken in conjunction with BMS 213.
Corequisites: Take BMS 213.
Offered: Every year, Fall and Spring

BMS 276. Drug Development. 3 Credits.
In this course, students study the processes required to develop new drugs, as well as the regulations associated with drug development. Topics include drug discovery, preclinical and clinical testing of drugs, pharmaco-economics and legislation associated with drug development. Specific therapeutic drug examples are discussed throughout the course.
Prerequisites: Take 1 group; BIO 101 BIO 102 or BIO 150 BIO 151 or BMS 117 BMS 162 or BIO 105 BIO 106.
Offered: Every year, Fall and Spring

BMS 278. Research and Technology. 3 Credits.
This course provides a broad, discussion-based investigation of current scientific techniques including scientific writing, presentations, literature searches, as well as bioinformatics, protein and nucleic acid methodologies. Students learn the skills necessary to identify and understand the proper techniques for designing, implementing and evaluating scientific research. This interactive course helps prepare students for independent research projects at Quinnipiac University, graduate/professional programs and careers in the biological, biomedical or health sciences.
Prerequisites: Take BIO 150 BIO 150L.
Offered: Every year, Spring

BMS 300. The Physiology of Human Performance I. 3 Credits.
This course presents a detailed examination of muscle and nerve physiology, and central nervous system control of posture and locomotion. Bioenergetics and exercise metabolism are considered. Anatomical and physiological factors limiting various types of physical performance are discussed. Full-year course; must be taken in sequence. This course must be taken in conjunction with BMS 300L.
Prerequisites: Take BIO 212 and CHE 102 CHE 102L or CHE 111 CHE 111L.
Offered: Every year, Fall

BMS 300L. The Physiology of Human Performance I Lab. 1 Credit.
(3 lab hrs.) Laboratory exercises/experiments are designed to reinforce basic principles of physiology examined in lecture. This course must be taken in conjunction with BMS 300 lecture.
Corequisites: Take BMS 300.
Offered: Every year, Fall

BMS 301. Physiology of Human Performance II. 3 Credits.
This course presents a detailed examination of cardiorespiratory and thermoregulatory responses to exercise. Body composition and diet/nutrition are considered. Anatomical and physiological factors limiting various types of physical performance are discussed. Full-year course; must be taken in sequence. This course must be taken in association with BMS 301L.
Prerequisites: Take BMS 300 BMS 300L.
Corequisites: Take BMS 301L.
Offered: Every year, Fall

BMS 301L. Physiology of Human Performance II Lab. 1 Credit.
Lab to accompany BMS 301 (3 lab hrs.) Laboratory exercises/experiments are designed to reinforce basic principles of physiology examined in lecture. This course must be taken in association with BMS 301.
Prerequisites: Take BMS 300.
Corequisites: Take BMS 301.
Offered: Every year, Spring

BMS 304. Biological Chemistry. 3 Credits.
This course, which is for ELMPA majors only, is a comprehensive study of contemporary biochemistry for pre-physician assistant students. The fundamental chemical and physical principles that underlie living processes are examined with an emphasis on the chemical structure and biological function. Medical and clinical perspectives relate the chemistry to health concerns and/or diagnostic applications. Students who have completed CHE 315 are not eligible to take this course.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L; and BIO 212 BIO 212L CHE 111 CHE 211.
Offered: As needed

BMS 310. Neuroanatomy. 3 Credits.
This course offers the pre-physician assistant student a detailed study of the gross anatomy and development of the central nervous system. Major structures and landmarks within each major brain vesicle and spinal cord are covered.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Offered: Every other year, Fall
BMS 318. Pathophysiology. 3 Credits.
This course takes a mechanistic approach to the regulation of function of organ systems to provide students with the underlying physiological concepts in the homeostasis of each system and its interrelationship to other systems, the pertinent diseases that best exemplify the disarray of the controlling mechanism. Students learn a way of thinking that enables them to conceptualize clinical problems in relation to system functions.
Prerequisites: Take BIO 211 BIO 212 or BIO 227 BIO 228.
Offered: Every year, Fall and Spring

BMS 319. Public Health: Epidemiology of Infectious Diseases. 3 Credits.
This course provides an introduction to the application of epidemiological principles and practice to the study of infectious diseases. Students focus on the study of the frequency, distribution and determinants of infectious diseases of major public health importance. Emphasis also is placed on prevention methods and public health control efforts undertaken locally, nationally and internationally.
Prerequisites: Take BMS 213 or BMS 370.
Offered: Every year, Fall

BMS 320. Pharmacology. 3 Credits.
This course takes a physiological systems approach to the study of the major classes of drugs used in therapeutics. Each class of drugs is studied according to dose-response characteristics, mechanism of action, major physiological effects, toxicity and possible drug interaction.
Prerequisites: Take BIO 211 BIO 212.
Offered: Every year, Spring

BMS 325. Toxicology. 3 Credits.
Toxicology is the branch of science that investigates the complex interactions between exogenous chemicals and physical processes (e.g. radiation) with living organisms. This course entails an examination of the absorption, distribution, toxicokinetics, metabolism and elimination of exogenous substances from the body. Particular emphasis is placed on the effects of toxic agents on the following systems in humans: hepatobiliary, pulmonary, renal, nervous and reproductive. The role of toxic chemicals/physical agents in teratogenesis, mutagenesis and carcinogenesis also is studied.
Prerequisites: Take BIO 102 BIO 102L CHE 211.
Offered: Every year, Spring

BMS 330. Endocrinology. 3 Credits.
This course introduces students to 1) an intensive understanding of the mechanism of hormone action; 2) the importance of the interrelationship among all hormones; 3) a detailed clinical situation dealing with hormonal aberrations; and 4) a theoretical and practical method for hormone assays.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Offered: Every year, Fall

BMS 332. Histology and Lab. 4 Credits.
This course is intended for senior ELMPA students. It entails the microscopic and ultra-microscopic study of the structure of cells, tissues and organs, and emphasizes their functional mechanisms. Students learn how to prepare and stain normal tissue slides for histological and histochemical study, and how to examine these prepared slides.
Prerequisites: Take BIO 211 BIO 212 CHE 210 CHE 211.
Offered: Every year, Spring

BMS 364. Molecular Mechanisms of Cancer Therapies. 3 Credits.
This course examines the cellular biology of cancer and the molecular mechanisms of cancer therapies. Students discuss both traditional and current treatment options, as well as future areas of cancer research and medicine. Students compare the use of generalized cancer therapies, tumor-targeted therapies, and upcoming therapies and their effect on patient prognosis.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L, and CHE 102 CHE 102L or CHE 111 CHE 111L.
Offered: Every other year, Spring

BMS 370. General Microbiology. 3 Credits.
This study of the biology of bacteria and other microorganisms includes the structural features, genetics, biochemistry, ecology and symbiotic relationships of microbes, with particular emphasis on the differences between unicellular microbes and multicellular organisms. Students may receive credit for BMS 370 or BMS 213, but not both. This course must be taken in conjunction with BMS 370L.
Prerequisites: Take BIO 101 BIO 102 or BIO 150 BIO 151; and CHE 110 CHE 111.
Offered: Every year, Fall and Spring

BMS 370L. General Microbiology Lab. 1 Credit.
In the laboratory component of General Microbiology, students master foundational microbiological techniques such as microscopy, staining and culture of microbes, and utilize these techniques to explore various properties of microbes relevant to clinical, industrial, environmental and household settings. Students also identify unknown bacteria using both biochemical assays and molecular techniques. Critical thinking is emphasized through a project-based inquiry approach. This course must be taken in conjunction with BMS 370.
Corequisites: Take BMS 370.
Offered: Every year, Fall and Spring

BMS 372. Pathogenic Microbiology. 3 Credits.
This course involves the study of medically important microbes. Topics include the principles of microbial pathogenesis, host-microbe interactions and etiology of infectious disease. This course must be taken in conjunction with BMS 372L.
Prerequisites: Take BMS 370 BMS 370L.
Corequisites: Take BMS 372L.
Offered: Every year, Spring

BMS 372L. Pathogenic Microbiology Lab. 1 Credit.
The laboratory component of Pathogenic Microbiology includes laboratory exercises/experiments designed to reinforce the biochemical, serological and pathogenic characteristics of disease-producing microorganisms. Special emphasis is placed on techniques used to identify disease-causing microorganisms and differentiating them from closely related members of human indigenous microflora. This course must be taken in conjunction with BMS 372.
Prerequisites: Take BMS 370 370L.
Corequisites: Take BMS 372.
Offered: Every year, Spring

BMS 373. Mycology. 3 Credits.
The morphology, taxonomy and phylogeny of fungi are studied in this course. The laboratory companion to this course (BMS 373L) provides opportunities for culturing and performing biochemical analyses of selected fungi, including human pathogens. This course must be taken in conjunction with BMS 373L.
Corequisites: Take BMS 373L.
Offered: Every year, Spring
BMS 373L. Mycology Lab. 1 Credit.
This lab accompanies BMS 373 Mycology and allows many opportunities for culturing and performing biochemical analyses of selected fungi, including human pathogens. This course must be taken in conjunction with BMS 373.
Corequisites: Take BMS 373.
Offered: As needed

BMS 375. Immunology. 3 Credits.
This course entails a study of the basic principles and regulatory mechanisms of the human immune response. Innate defenses along with cellular and humoral immune defense mechanisms are studied in detail. Abnormal immune system functions are explored via study of acquired and primary immunodeficiencies and autoimmune diseases. Vaccines and transplantation also are discussed. Students may receive credit for BMS 375 or HSC 375, but not both. Students withdrawing from either lecture or lab must withdraw from both. Prerequisite: BMS 370 (or BMS 213 with permission of the instructor); BMS majors must take BMS 375 and BMS 375L together.
Prerequisites: Take BMS 370 BMS 370L.
Corequisites: Take BMS 375L.
Offered: Every year, Fall

BMS 375L. Immunology Lab. 1 Credit.
The laboratory component of Immunology involves laboratory exercises/experiments designed to reinforce immunological concepts. Topics fundamental to both immunological research and clinical diagnostics are covered. Cellular-based and clinically relevant concepts are reinforced via hands-on immunological techniques, class discussions, presentations and case studies. Students withdrawing from either lecture or lab must withdraw from both. BMS majors must take BMS 375 and BMS 375L together.
Prerequisites: Take BMS 370 BMS 370L.
Corequisites: Take BMS 375.
Offered: Every year, Fall

BMS 378. Vaccines and Vaccine-Preventable Diseases. 3 Credits.
This course examines the current understanding of vaccinations, as well as the historical and current implication of vaccine-preventable diseases (VPDs). Students gain knowledge regarding VPDs and the childhood vaccination schedule. They gain an understanding of how vaccines work, why they are still necessary, and how to explain why they are safe. Emphasis is placed on the need to effectively communicate with the public regarding vaccine myths and misconceptions. Also included is a publicly disseminated "change the world" project. Students may only take one of the following for credit: BMS 378, HSC 378 or BMS 525.
Prerequisites: Take BMS 213 BMS 213L or BMS 370 BMS 370L.
Offered: Every year, Spring

BMS 397. Biomedical Sciences Internship. 1-4 Credits.
Students partake in a part-time professional work experience with a sponsoring organization. The experience brings together theory, application and current practice in the translational sciences. Journaling and discussion boards provide students with a reflective and intentional assessment of the field, their work and career development. Students must submit a paper describing their experimental aims, design and outcomes, and also present their findings as a seminar or poster.
Prerequisites: Minimum GPA of 3.0, Permission of Department Chair.
Offered: As needed

BMS 399. Independent Study. 1-6 Credits.

BMS 470. Virology. 4 Credits.
This course covers the strategies employed by different virus families to infect host cells and replicate within them. This includes animal, plant and bacterial viruses. Topics include: viral structure, genetics, molecular mechanism of replication and host response to infection. Students also are exposed to standard research methodologies and cutting-edge research used in the field through reviews of current research articles.
Prerequisites: Take BMS 370 BMS 370L.
Offered: Every year, Fall

BMS 470L. Virology Lab. 0 Credits.
Lab to accompany BMS 470. (4 lab hrs.)
Offered: Every year, Fall

BMS 472. Biotechnology. 4 Credits.
This course addresses the isolation, growth, genetic manipulation and use of organisms (commonly genetically modified) or their products in fermented food production, agriculture, pharmaceutical discovery and production, molecular diagnostics, vaccine production, transgenic animal formation and human gene therapy. Purification, identification, optimization, testing, government regulations and patents are addressed. This hands-on course is designed for students interested in careers in the expanding modern world of applied biology and microbiology in research and industry (4 lab hrs.).
Prerequisites: Take BMS 370 BMS 370L.
Offered: Every year, Spring

BMS 473. Infections of Leisure. 3 Credits.
This course looks at infectious hazards associated with a wide range of human leisure activities, from lazing on a beach to relaxing in a spa, dining out, or simply staying home and gardening. Participants discuss infections linked to salt and freshwater activities, camping and the outdoors, gardening, contact with animals, eating, foreign travel, sports, sexually transmitted diseases, body piercing, tattooing and trekking to high altitudes. Topics such as epidemiology, antibiotic resistance, pathogenicity, plagues and vaccines also are addressed. This course has social organization of the science of infectious diseases.
Prerequisites: Take BMS 370 BMS 370L or BMS 213 BMS 213L.
Offered: Every year, Fall

BMS 474. Power of Plagues. 3 Credits.
This course examines the impact of infectious diseases on humans—in the past, in the present and in the future. From the 14th-century plague to the current HIV/AIDS, diseases have fundamentally altered the shape of society, politics and culture. This class examines some important diseases, including their impact, pathogenicity, infectivity, epidemiology, consequences, costs and lessons learned. Diseases such as smallpox, polio, rabies, tuberculosis, cholera, bubonic plague, influenza, malaria, yellow fever, syphilis and AIDS are investigated. The impact of antibiotics, antibiotic resistance and nosocomial infections also is discussed.
Prerequisites: Take BMS 213 BMS 213L or BMS 370 BMS 370L.
Offered: Every year, Summer

BMS 475. Special Topics in Microbiology. 1-4 Credits.
The latest developments and concepts in the field of clinical and public health microbiology are introduced. Topics may include the oral microbiology, epidemiology of Streptococcal and Staphylococcal infections, antibiotic resistance, drug susceptibility testing, the bacteriology of the hospital environment, vaccine-preventable diseases or quality control in the clinical microbiology laboratory. Recommendation of BMS 213/370 lab instructor and permission of instructor needed. One lecture hour, one research meeting hour, one discussion hour and 4-10 lab hours.
Prerequisites: Take BMS 370 BMS 370L or BMS 213 BMS 213L.
Offered: Every year, All
BMS 476. Environmental Microbiology. 3 Credits.
In this course, students examine the role of the many interesting and unique microorganisms found in the natural environment, especially those from extreme environments (the "extremophiles") such as deep sea vents, hot springs, high salinity areas, extremes of pH, etc. Also included in this course are environmental microbes that may be of interest in the industrial setting. This hands-on course examines air, soil and water microorganisms along with their ecological relationships and significance to the environment.
Prerequisites: Take BMS 370 BMS 370L or BMS 213 BMS 213L.
Offered: As needed

BMS 478. Microbiology Seminar. 1 Credit.
This course introduces students to the microbiology- and immunology-related literature required for the development, implementation and analysis of an independent research project in microbiology and immunology. For microbiology majors.
Prerequisites: Take BMS 370 BMS 370L.
Offered: Every year, Fall

BMS 479. Microbiology Research. 2 Credits.
Independent projects in selected areas of microbiology and biotechnology are completed under the direction of a faculty member. For microbiology majors.
Prerequisites: Take BMS 370 BMS 370L.
Offered: Every year, Fall and Spring

BMS 481. Research Methods in Biomedical Sciences I. 1-4 Credits.
Students learn the basic principles of research methodology. Register by paper with your mentor.
Offered: Every year, Fall and Spring

BMS 482. Independent Study in Microbiology. 1-4 Credits.
This course consists of microbiology content not offered by another QU catalog course. It must involve contact hours and scholarly activities equivalent to any regularly offered course. This course often includes review of the scientific literature in the field of the research project and creating a "product," such as a term essay, a series of short papers, laboratory or project reports, a portfolio or presentation at a scientific meeting. Students cannot register online; registration is via a paper form only. BMS students may take up to 8 credits of BMS 482, BMS 483, BMS 498, BMS 499, HSC 498, HSC 499.
Offered: As needed

BMS 483. Independent Study in Microbiology. 1-4 Credits.
This course consists of microbiology content not offered by another QU catalog course. It must involve contact hours and scholarly activities equivalent to any regularly offered course. This course often includes review of the scientific literature in the field of the research project and creating a "product," such as a term essay, a series of short papers, laboratory or project reports, a portfolio or presentation at a scientific meeting. Students cannot register online; registration is via a paper form only. BMS students may take up to 8 credits of BMS 482, BMS 483, BMS 498, BMS 499, HSC 498, HSC 499.
Offered: Every year, Fall and Spring

BMS 489. Independent Study in Biomedical Sciences II. 1-4 Credits.
This course consists of biomedical sciences content not offered by another QU catalog course. It must involve contact hours and scholarly activities equivalent to any regularly offered course. This course often includes review of the scientific literature in the field of the research project and creating a "product," such as a term essay, a series of short papers, laboratory or project reports, a portfolio or presentation at a scientific meeting. Students cannot register online; registration is via a paper form only. BMS students may take up to 8 credits of BMS 482, BMS 483, BMS 498, BMS 499, HSC 498, HSC 499.
Offered: As needed

Business (SB)

SB 101. The Business Environment. 3 Credits.
This course introduces students to the business environment using a hands-on business simulation. Students work in teams and learn about the importance and interdependence of the functional areas of business. Students also discuss current business events, explore careers, learn basic Excel skills, and apply business ethics in decision making.
Offered: Every year, Fall and Spring

SB 105. Learning Strategies Seminar. 1 Credit.
The purpose of this course is to introduce students to evidence-based learning strategies and to help students become self-regulated learners who are capable of achieving their full academic potential. Students reflect upon the fundamental nature of learning and what types of learning activities best facilitate their learning process. Students also explore topics related to achievement motivation and growth mindset. The ultimate goal of this course is to help students not only develop a deeper understanding of these topics, but learn ways that the strategies and tools discussed in class readings and discussions can inform their personal study habits.
Offered: Every year, Spring

SB 120. Introduction to Doing Business in Poland and Europe. 3 Credits.
This course focuses on the fundamentals of business practice and business culture in Poland. It provides an introduction to European law and European business in the context of the modern global economy. It includes topics of the European financial market, European regulation, Polish industrial structure and history, Polish political economy and history with a focus on the economic transformation and Poland’s position in Europe today.
Offered: As needed

SB 185. Personal Finance. 3 Credits.
This course provides an overview of personal wealth building strategies and explores techniques for setting personal financial goals. Personal budgeting, investments and debt management also are investigated.
Offered: As needed
SB 188. Business Internship.  
1-3 Credits. 
This internship in business provides an opportunity for students to complete an additional internship experience beyond the internship within their chosen major. The business internship may only be used to satisfy open elective credit requirements. It is not a substitute for the internship within the major and does not count as a business elective. This internship may be used as an elective in the business minor. The internship must be approved by the department chair and the dean in accordance with school and departmental regulations. This course is graded on a pass/fail basis. 
Offered: Every year, All

SB 199. Independent Study.  
1-6 Credits. 

SB 205. Special Topics in Business.  
3 Credits. 
This course explores current topics and trends in business. Designed for non-business majors.
Offered: As needed

SB 250. Career Planning and Development.  
1 Credit. 
This comprehensive career development course provides students with the tools to manage a career search through the full internship/job search lifecycle. Course includes resume workshops focused on self-reflection and employer-desired competencies; formatting for business industry; and in-depth content writing. Course also includes hands-on assignments that help students create their brand and stand out to employers including: career research, cover letter, mock interview, elevator pitch and LinkedIn profile. The course wraps up with a review of the value and impact of professionalism in students personal and professional lives. Course is intended for students in their sophomore year.
Offered: Every year, Fall and Spring

SB 320. Internship in Poland.  
3 Credits. 
This internship in Poland must be approved by the Central European Institute and the dean in accordance with school and departmental regulations. Junior/senior status is required. This course is graded on a pass/fail basis.
Prerequisites: Take SB 120.
Offered: As needed

SB 360. International Business Immersion.  
3 Credits. 
Students are immersed in international business and culture through short-term immersion trips led by School of Business faculty. Emphasis is placed on understanding of culture, business customs, and regulatory environment of the international destination(s). Some sections of this course may also involve small business consulting as part of Quinnipiac's microloan program. Additional course/travel fees apply.
Offered: As needed

SB 388. Business 3+1 Experience.  
0 Credits.

SB 399. Special Topics in Business.  
3 Credits. 
Offered: As needed

SB 410. Business Ethics.  
3 Credits. 
This course helps students develop a framework for ethical decision making. Students learn to identify ethical issues, apply various models of ethical decision making, and analyze ethical cases. Topics include assessing and analyzing the ethics environment of business and identifying and managing ethics in a developing world including human rights, environmental sustainability, and technology.
Prerequisites: Junior Standing or higher.
Offered: As needed

SB 420. Strategic Management Integrated Seminar.  
3 Credits. 
This capstone course takes the top management perspective in formulating, implementing, and evaluating business and corporate strategy. The course integrates critical concepts from the business functions including accounting, finance, economics, marketing, operations, and others. Students study core strategic management concepts and apply this knowledge by implementing strategy in a computerized business simulation. In addition, the course serves as a university capstone in which students create a signature work incorporating strategic theory and concepts. For seniors only.
Prerequisites: Take AC 211 AC 212 FIN 201 IB 201 MK 201 MG 210 MG 211 and senior status.
Offered: Every year, All

SB 425. CEO Lessons in Leadership.  
3 Credits. 
This course offers students unique insights into the important topic of leadership, from both theoretical and practical perspectives. Specific skill development includes traits and values of leaders; emotional and social intelligence; crisis management; motivation and influence; building and working in teams; and followership, among other topics. Students explore leadership in practice through cases that simulate and reflect "real world" leadership challenges. Complementing this is the direct involvement of senior executives drawn from American corporate hierarchies who offer their unique insights into leadership done well and its specific challenges following the seminar format of the course. This is a unique opportunity to develop a deeper understanding of the key business dimension of leadership while at the same time networking with actual organizational leaders.
Prerequisites: Take one of the following: MK 201 FIN 201 IB 201 MG 210 CIS 101 or AC 212.
Offered: As needed

SB 450. Strategic Integrated Management Seminar.  
3 Credits. 
This capstone course focuses on the job of top management in formulating and implementing short- and long-term corporate strategy. The course integrates critical concepts from core business subjects including accounting, finance, management, marketing, operations management, international business and economics. Course activities include case studies, individual and/or group projects and computerized business simulations. For seniors only.
Prerequisites: Take AC 211 FIN 201 IB 201 MK 201 MG 210 MG 211.
Offered: Every year, Fall and Spring

SB 450H. Honors Strategic Integrated Management Seminar.  
3 Credits. 
This capstone course focuses on the job of top management in formulating and implementing short- and long-term corporate strategy. The course integrates critical concepts from core business subjects including accounting, finance, management, marketing, operations management, international business and economics. Course activities include case studies, individual and/or group projects and computerized business simulations. For seniors only.
Prerequisites: Take AC 211 FIN 201 IB 201 MK 201 MG 210 MG 211.
Offered: Every year, Fall and Spring

SB 488. Independent Study: Business.  
1-6 Credits.

Business Analytics (BAN)

BAN 300. Statistical Programming.  
3 Credits. 
This course introduces students to R, a widely used statistical programming language. Students learn to read data, write functions, analyze data and create visualizations in R.
Prerequisites: Take AC 211 and EC 271 or EC 272.
Offered: Every year, Fall
BAN 310. Web Analytics. 3 Credits.
This course introduces students to the concept and use of web analytics. Topics covered include measurement planning, data collection, audience characteristics, traffic acquisition, and user behavior. Students use Google Analytics to apply their learning and take the Google Analytics Individual Qualification exam to demonstrate their proficiency at the completion of this course.
Prerequisites: Take CIS 101.
Offered: Every year, Spring

BAN 400. Data Mining. 3 Credits.
Data mining methodologies and the process of formulating and solving problems using data mining techniques are utilized to recognize patterns in data and compute predictions. Predictive models such as decision trees, neural networks, regressions and other techniques are studied.
Prerequisites: Take EC 271 or EC 272; and CIS 350.
Offered: Every year, Fall

BAN 410. Social Media Analytics. 3 Credits.
This course covers social media strategies and applications, implications for business, privacy issues associated with social media, and factors contributing to social change. Business cases evaluating the use and value of social media are examined and social network analysis and visualization are utilized.
Prerequisites: Take BAN 300.
Offered: Every year, Spring

Business Law (BLW)

BLW 221. Business Law and Society. 3 Credits.
The course helps students develop an understanding of the law as an evolving social institution rather than a static body of rules. Students read and interpret legal case reports as a means of keeping abreast of law that affects the business environment. Students learn the economic and social forces that have shaped and are now dictating the evolution of modern contract principles and the Uniform Commercial Code. Ethics and social responsibility are addressed throughout. Minimum grade for accounting majors B-.
Offered: Every year, Fall and Spring

BLW 322. The Law of Property, Sales and Negotiable Instruments. 3 Credits.
This is an advanced business law course covering Uniform Commercial Code provisions governing sales, negotiable instruments and secured transactions. Other topics may include liability of accountants, third party rights, agency law, real property, bankruptcy, business entities and product liability. This course covers topics included in the business law section of the CPA exam. Minimum grade for accounting majors C-.
Prerequisites: Take BLW 221; Minimum grade B-.
Offered: Every year, Spring

BLW 399. Independent Study Law. 3 Credits.
Offered: As needed

BLW 499. Independent Study. 3 Credits.

Career Practicum (CAR)

CAR 150. Introduction to Excel. 1 Credit.
Excel, a spreadsheet program that allows organization, calculation and information analysis has become the most requested skill among employers. Employers in all fields seek candidates who already possess 21st-century skills such as data manipulation. Whether you are keeping a budget, organizing a training log, managing a nonprofit or manipulating and analyzing scientific research data, Excel is your tool. In this online course, students learn the basics of Excel, including sorting, filtering, grouping, functions, formulas, charting and pivot tables.
Offered: As needed

CAR 295. Career Practicum. 1-3 Credits.
This course offers practical training for an occupation requiring a bachelor’s degree. It involves supervised work (paid or unpaid) in an employment setting and career development research and reflection. This course may be repeated for credit up to a total of 6 credits for this course, other workshops, and PE courses combined. The final grade is Pass/Fail.
Offered: Every year, All

CAR 410. LSAT Prep Course. 1 Credit.
LSAT Prep Course is intended for those students who are planning to take the Law School Admissions Test (LSAT) within the next few months. This course reviews the LSAT and provides methods of approaching problems, answering questions and preparing for the exam. Students are advised to take the course in the fall for the January, February, March and April exams. Students are advised to take the course in the spring for the June, July, September, October and November exams.
Offered: Every year, Fall and Spring

Chemistry (CHE)

CHE 101. Fundamentals of General, Organic and Biological Chemistry I. 3 Credits.
Students study the general fundamentals of chemistry which includes atomic theory and radioactivity, bonding (including ions and molecules), stoichiometry, states of matter, and solutions including solubility, acids, bases and buffers. Students who have already received credit for CHE 110 with a grade of C- or higher are not eligible to take CHE 101.
Prerequisites: Take MA 107; Minimum grade C- or Math placement score of 3.
Corequisites: Take CHE 101L.
Offered: Every year, Fall and Spring
UC: Natural Sciences

CHE 101L. Fundamentals of General, Organic and Biological Chemistry I Lab. 1 Credit.
Lab must be taken with CHE 101. (2.5 lab hrs.)
Corequisites: Take CHE 101.
Offered: Every year, Fall and Spring
UC: Natural Sciences

CHE 102. Fundamentals of General, Organic and Biological Chemistry II. 3 Credits.
Students study the fundamental chemistry of carbon and the structural and functional relationships of hydrocarbons, alcohols, aldehydes, ketones, esters, carboxylic acids, amines, carbohydrates, lipids, proteins, and their application to biochemistry.
Prerequisites: Take CHE 101 CHE 101L; Minimum grade C-.
Corequisites: Take CHE 102L.
Offered: Every year, Spring
UC: Natural Sciences
CHE 102L. Fundamentals of General, Organic and Biological Chemistry II Lab. 1 Credit.
Lab must be taken with CHE 102. (2.5 lab hrs.)
Prerequisites: Take CHE 101 CHE 101L; Minimum grade C-.
Corequisites: Take CHE 102.
Offered: Every year, Spring
UC: Natural Sciences

CHE 106. General Chemistry I. 3 Credits.
Students study the atomic theory of matter, nomenclature, chemical formulas and reaction equations, stoichiometry, the gas laws and the kinetic molecular theory, thermochemistry, atomic structure, periodicity of the elements, chemical bonding and molecular structure. (Note: this course is designed for science majors.)
Prerequisites: Take MA 107; Minimum grade C-; or Math placement score of 3.
Corequisites: Take CHE 106L.
Offered: Every year, Fall and Spring
CHE 106L. Chemical Principles with Biological Applications Lab. 1 Credit.
Lab to accompany CHE 106. (3 lab hrs.)
Corequisites: Take CHE 106.
Offered: Every year, Fall and Spring

CHE 110. General Chemistry I. 3 Credits.
Students study the atomic theory of matter, nomenclature, chemical formulas and reaction equations, stoichiometry, the gas laws and the kinetic molecular theory, thermochemistry, atomic structure, periodicity of the elements, chemical bonding and molecular structure. (Note: this course is designed for science majors.)
Prerequisites: Take MA 107; Minimum grade C- or Math placement score of 3.
Corequisites: Take CHE 110L.
Offered: Every year, All
UC: Natural Sciences
CHE 110L. General Chemistry I Lab. 1 Credit.
Lab must be taken with CHE 110. (3 lab hrs.)
Corequisites: Take CHE 110.
Offered: Every year, All
UC: Natural Sciences

CHE 111. General Chemistry II. 3 Credits.
Students study intermolecular forces, properties of solutions, kinetics, chemical equilibrium, pH, acid-base solution chemistry, thermodynamics and electrochemistry. Problem-solving is emphasized.
Prerequisites: Take CHE 110 CHE 110L; Minimum grade C-.
Corequisites: Take CHE 111L.
Offered: Every year, Spring and Summer
UC: Natural Sciences
CHE 111L. General Chemistry II Lab. 1 Credit.
Lab must be taken with CHE 111. (3 lab hrs.)
Prerequisites: Take CHE 110 CHE 110L; Minimum grade C-.
Corequisites: Take CHE 111.
Offered: Every year, Spring and Summer
UC: Natural Sciences

CHE 111L. General Chemistry II Lab. 1 Credit.
Lab must be taken with CHE 111. (3 lab hrs.)
Prerequisites: Take CHE 110 CHE 110L; Minimum grade C-.
Corequisites: Take CHE 111.
Offered: Every year, Spring and Summer
UC: Natural Sciences

CHE 112. Organic Chemistry I. 4 Credits.
Students study the principles that govern the properties, reactions and methods of preparation of organic compounds correlated with reaction mechanisms, stereochemistry, conformational analysis, resonance and transition state theory and the nomenclature of organic compounds. Specific groups studied include alkanes, alkyl halides, alkenes and alkynes.
Prerequisites: Take CHE 111 CHE 111L; Minimum grade C-.
Corequisites: Take CHE 210.
Offered: Every year, Fall and Summer
CHE 112L. Organic Chemistry I Lab. 1 Credit.
Lab must be taken with CHE 212. (3 lab hrs.)
Corequisites: Take CHE 212.
Offered: Every year, Fall and Summer

CHE 115. Analytical Chemistry. 3 Credits.
Students study the principles and practice of modern chemical analysis. The following topics are studied: treatment of analytical data, experimental design and sample preparation, simple and complex equilibria, potentiometry, chromatography and spectrophotometry. Intended for chemistry and biochemistry majors and chemistry minors.
Prerequisites: Take CHE 111 CHE 111L; Minimum grade C-.
Corequisites: Take CHE 215L.
Offered: Every year, Fall and Spring
CHE 215L. Analytical Chemistry Lab. 1 Credit.
Lab must be taken with CHE 215. (3 lab hrs.)
Corequisites: Take CHE 215.
Offered: Every year, Fall and Spring

CHE 202. Chemistry of Macro- and Micronutrients. 4 Credits.
Students investigate the fundamental chemistry of macro- and micronutrients through lectures, projects on current research in the chemistry of food, and integrated online chemistry activities. Emphasis is on the study of the chemistry of food components including: carbohydrates, fats, proteins, vitamins, minerals and water, with the additional assessment of how foods must meet nutrient needs in different ways for animals. Enrollment in this course is restricted to students in the BS in Health Science Studies online degree completion program. Students cannot receive credit for CHE 202 AND either SCI 161 or SCI 105. This course is offered online only.
Offered: Every year, Summer

CHE 210. Organic Chemistry I. 3 Credits.
Students study the principles that govern the properties, reactions and methods of preparation of organic compounds correlated with reaction mechanisms, stereochemistry, conformational analysis, resonance and transition state theory and the nomenclature of organic compounds. Specific groups studied include alkanes, alkyl halides, alkenes and alkynes.
Prerequisites: Take CHE 111 CHE 111L; Minimum grade C-.
Corequisites: Take CHE 210L.
Offered: Every year, Fall and Summer
CHE 212L. Organic Chemistry I Lab. 1 Credit.
Lab must be taken with CHE 212. (3 lab hrs.)
Corequisites: Take CHE 212.
Offered: Every year, Fall and Summer

CHE 212L. Organic Chemistry I Lab. 1 Credit.
Lab must be taken with CHE 212. (3 lab hrs.)
Corequisites: Take CHE 212.
Offered: Every year, Fall and Summer

CHE 213. Analytical Chemistry. 3 Credits.
Students study the principles and practice of modern chemical analysis. The following topics are studied: treatment of analytical data, experimental design and sample preparation, simple and complex equilibria, potentiometry, chromatography and spectrophotometry. Intended for chemistry and biochemistry majors and chemistry minors.
Prerequisites: Take CHE 111 CHE 111L; Minimum grade C-.
Corequisites: Take CHE 215L.
Offered: Every year, Fall and Spring
CHE 215L. Analytical Chemistry Lab. 1 Credit.
Lab must be taken with CHE 215. (3 lab hrs.)
Corequisites: Take CHE 215.
Offered: Every year, Fall and Spring

CHE 215L. Analytical Chemistry Lab. 1 Credit.
Lab must be taken with CHE 215. (3 lab hrs.)
Corequisites: Take CHE 215.
Offered: Every year, Fall and Spring

CHE 300. Special Topics. 3 Credits.
Prerequisites: Take two 200-level chemistry courses.
Offered: As needed
CHE 301. Physical Chemistry I. 3 Credits.
Students investigate the underlying theories of chemical phenomena. The laws and fundamental equations of equilibrium thermodynamics are applied to the quantitative treatment of chemical equilibria, phase equilibria, electrochemical equilibria, and ionic equilibria. The principles of chemical kinetics and reaction mechanisms also are investigated.
Prerequisites: Take CHE 111 CHE 111L; MA 141 or MA 151; and PHY 111 PHY 111L or PHY 122; Minimum grade C-.
Corequisites: Take CHE 301L.
Offered: Every other year, Fall
CHE 301L. Physical Chemistry I Lab. 1 Credit.
Lab must be taken with CHE 301. (3 lab hrs.)
Corequisites: Take CHE 301.
Offered: Every other year, Fall

CHE 302. Physical Chemistry II. 3 Credits.
Students study quantum theory, spectroscopy and statistical thermodynamics. The study of quantum mechanics is used to provide the basis for developing an understanding of atomic and molecular spectroscopy and chemical bonding.
Prerequisites: Take CHE 301; Minimum grade C-.
Corequisites: Take CHE 302L.
Offered: Every other year, Spring
CHE 302L. Physical Chemistry II Lab. 1 Credit.
Lab must be taken with CHE 302. (3 lab hrs.)
Corequisites: Take CHE 302.
Offered: Every other year, Spring

CHE 305. Instrumental Analysis. 3 Credits.
Students investigate the following instrumental analysis techniques: FTIR, NMR, UV-VIS, spectroscopy and separation methods including gas and liquid chromatography, mass spectrometry and other current techniques.
Prerequisites: Take CHE 211 CHE 211L and CHE 215 CHE 215L; Minimum grade C-.
Corequisites: Take CHE 305L.
Offered: Every other year, Spring
CHE 305L. Instrumental Analysis Lab. 1 Credit.
Lab must be taken with CHE 305. (3 lab hrs.)
Corequisites: Take CHE 305.
Offered: Every other year, Spring

CHE 315. Biochemistry I. 3 Credits.
Students engage in a comprehensive study of biologically active compounds and their metabolism, biosynthesis and relationship to biological systems, and a detailed study of bioenergetics, enzyme kinetics and buffer systems.
Prerequisites: Take CHE 211 CHE 211L; Minimum grade C-.
Corequisites: Take CHE 315L.
Offered: Every year, Fall and Spring
CHE 315L. Biochemistry Lab I. 1 Credit.
Students carry out a series of experiments that expose them to the basic principles of biochemical techniques including biomolecule quantitation, protein and carbohydrate purification and analysis, and enzyme kinetics. Lab must be taken with CHE 315. (3 lab hrs.)
Corequisites: Take CHE 315.
Offered: Every year, Fall and Spring

CHE 316. Biochemistry II. 3 Credits.
Students study the biochemical and mechanistic basis of key metabolic pathways and their tie-ins with pathology and pharmacology. Nucleic acids, DNA and RNA, are studied to understand the chemical principles that govern the flow of genetic information with an emphasis on the key roles that RNA plays as an intermediate in the flow of genetic information, a catalyst, a sensor of small metabolites, and a regulator of gene expression.
Prerequisites: Take CHE 315 CHE 315L; Minimum grade C-.
Offered: Every other year, Spring

CHE 399. Independent Study in Chemistry I. 1-3 Credits.
Permission of the chairperson is required. May be taken in more than one semester for up to a total of 6 credits.
Offered: All

CHE 410. Inorganic Chemistry. 3 Credits.
Students study the electronic structure of atoms, ionic and covalent bonding, acid-base chemistry and non-aqueous solvents, coordination chemistry, and periodicity. Symmetry and chemical applications of group theory are introduced.
Prerequisites: Senior status as a chemistry/biochemistry major or approval of Chairperson.
Offered: Every other year, Fall

CHE 420. Chemistry Integrative Capstone. 3 Credits.
Topics in chemistry including history, ethics, environmental issues and current developments are explored from a scientific perspective. Through oral and written work, students demonstrate connections between their Roadmap and Milestones, general education, co-curricular activities, their major coursework and experiential learning project(s) in chemistry.
Prerequisites: Senior status as a chemistry/biochemistry major or approval of Chairperson.
Offered: Every year, Spring

CHE 475. Chemistry Seminar I. 1 Credit.
Students attend research group meetings and outside seminars, and prepare and present a literature-based seminar on a topic approved by their research mentor. (Enrollment restricted to senior chemistry and biochemistry majors.)
Corequisites: Take CHE 490.
Offered: Every year, Fall

CHE 476. Chemistry Seminar II. 1 Credit.
Students attend research group meetings and outside seminars and prepare and present a seminar and a poster presentation on their research project. (Enrollment restricted to senior chemistry and biochemistry majors.)
Prerequisites: Take CHE 475 and CHE 490.
Corequisites: Take CHE 491.
Offered: Every year, Spring

CHE 490. Chemistry Research I. 3 Credits.
Students work closely with a faculty mentor on a chemistry research project. A minimum of 100 lab hours or equivalent is required. (Enrollment restricted to senior chemistry and biochemistry majors.)
Corequisites: Take CHE 475.
Offered: Every year, Fall

CHE 491. Chemistry Research II. 3 Credits.
Students continue their work on a chemistry research project, which they began in CHE 490. A minimum of 100 lab hours or equivalent is required. (Enrollment restricted to senior chemistry and biochemistry majors.)
Prerequisites: Take CHE 475 and CHE 490.
Corequisites: Take CHE 476.
Offered: Every year, Spring
Chinese (CN)

CN 101. Elementary Chinese I. 3 Credits. This course is an introduction to Mandarin Chinese as a spoken and written language. Students develop reading, writing, oral comprehension and speaking ability in basic Chinese. Chinese culture, customs and business practice are introduced. 
Offered: Every year, Fall
UC: Breadth Elective, University Curriculum Elem

CN 102. Elementary Chinese II. 3 Credits. This course is a continuation of Chinese 101.
Prerequisites: Take CN 101.
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Elem

CN 201. Intermediate Chinese I. 3 Credits. Grammar is enhanced for strengthening sentence patterns. Students are expected to communicate mostly in Chinese during class and write a longer essay for presentation. Students are exposed to everyday life topics, and cultural highlights increase understanding of current and past Chinese cultural phenomena.
Prerequisites: Take CN 102.
Offered: As needed
UC: Breadth Elective, University Curriculum Elem

CN 202. Intermediate Chinese II. 3 Credits. This course is a continuation of CN 201.
Prerequisites: Take CN 201.
Offered: As needed
UC: Breadth Elective, University Curriculum Elem

CN 210. Chinese Culture and Civilization. 3 Credits. This course introduces students to Chinese culture and civilization across time and regions. It provides an overview for students to grasp the important cultural concepts and to understand the great inventions created by China. Subjects include food and cuisine, traditional clothes, architecture and scenery, festival celebration, Chinese arts, literature and proverbs, tradition and taboos, religious beliefs, Chinese medicine, and great inventions. The course is conducted in English and does not require prior knowledge of Chinese.
Prerequisites: Take EN 101.
Offered: As needed
UC: Humanities, Intercultural Understand

CN 299. Independent Study. 1-3 Credits.
Offered: As needed, All

CN 399. Independent Study. 3 Credits.

Civil Engineering (CER)

CER 210. Infrastructure Engineering. 3 Credits. This course identifies, analyzes and assesses built infrastructure, which is the foundation for modern society. The complex and interconnected lifecycles are investigated and demands on critical components are calculated. Students explore the nontechnical factors necessary for the functioning of infrastructure including supplies, trained personnel, public policy, ethics and cross-sector dependencies. The course provides a basis for understanding the complexity and cost of maintaining, rebuilding and developing infrastructure. Topics include general infrastructure concepts, water and wastewater, transportation, energy and buildings and cities. Several in-class scenarios are provided to synthesize the connectivity between the major items of infrastructure.
Offered: Every year, Fall

CER 220. Civil Engineering Site Design. 3 Credits. This course provides students with the necessary background to select and develop sites for civil engineering projects as well as review the work of others. Proper site selection and engineering have a significant impact on the economics of a project and long-term utility of the constructed facility. Specifically, the course covers the skills of determining site layout and access, zoning requirements, establishing site contour and drainage, installation of utilities, elementary surveying, creation of drawings using a computer-aided drafting package, and the development of environmental impact statements.
Prerequisites: Take MA 152 or MA 153 and MA 154; or Sophomore standing in the major.
Corequisites: Take CER 220L.
Offered: Every year, Spring

CER 220L. Civil Engineering Site Design Lab. 0 Credits. Lab to accompany CER 220.
Prerequisites: Take MA 153 and MA 154 or MA 142; or Sophomore standing in the major.
Corequisites: Take CER 220.
Offered: Every year, Spring

CER 230. Advanced Surveying. 3 Credits. This course extends the work and concepts covered in CER 220 Civil Engineering Site Design. Students concentrate on larger and more comprehensive projects. A focus on the use of GPS AutoCAD and GIS complements existing surveying skills. Students study coordinate systems and land records as well as field and office practices.
Prerequisites: Take CER 220.
Offered: As needed

CER 300. Special Topics in Engineering. 3 Credits.
Offered: As needed

CER 310. Structural Analysis. 3 Credits. This course addresses the analysis and design of basic structural forms such as beams, trusses and frames, which are found in bridges and buildings. Classical deflection techniques such as direct integration and virtual work; and indeterminate analysis techniques such as the force method and displacement methods (slope deflection, direct stiffness and moment distribution) are used to determine forces and deflections in elastic structures. Structural analysis computer programs are introduced and directly applied in the solution of graded analysis and design problems. Approximate analysis techniques are used to check the general accuracy of computer-based results.
Prerequisites: Take MER 220.
Offered: Every year, Spring

CER 315. Surface Water Hydrology. 3 Credits. This course covers hydrologic processes relevant to surface water hydrology, including precipitation, evapotranspiration, infiltration, surface runoff and streamflow. Global issues including climate change and sustainable development are discussed.
Prerequisites: Take MER 310.
Offered: Every other year, Spring

CER 325. Concrete Materials. 1 Credit. This course introduces the design and control of concrete mixtures. Topics include Portland cement, cement hydration, aggregates, supplementary cementitious materials, fresh and hardened concrete, and concrete durability.
Prerequisites: Take MER 220.
Corequisites: Take CER 325L.
Offered: Every year, Fall
CER 325L. Concrete Materials Lab. 0 Credits.
This laboratory uses concrete mix design and strength testing labs to proportion the constituents of quality concrete and to provide a background in materials testing techniques, quality control, and sound construction practices.
Corequisites: Take CER 325.

CER 330. Fundamentals of Environmental Engineering. 3 Credits.
This course introduces students to the field of environmental engineering with an emphasis on basic principles, design, problem solving, analytical skills and sustainable solutions to environmental engineering problems. Topics include water chemistry, mass balance, water treatment, water quality and pollution control.
Prerequisites: Take CHE 110 MA 153 and MA 154 or MA 142.
Corequisites: Take CER 330L.
Offered: Every year, Fall

CER 330L. Fundamentals of Environmental Engineering Lab. 0 Credits.
Lab to accompany CER 330.
Prerequisites: Take CHE 110.
Corequisites: Take CER 330.
Offered: Every year, Fall

CER 340. Introduction to Geotechnical Engineering and Foundation Design. 4 Credits.
Soil mechanics is the study of soil properties, which govern the use of soil as a construction or foundation material. The course is devoted to describing soils, analyzing soil stresses, determining consolidation settlement, designing earth embankments, determining earth pressures and designing foundations based on applicable engineering principles and recognition of the fundamental concepts of soil behavior. During laboratory periods, students examine soil properties and extract necessary parameters for design.
Prerequisites: Take MER 210.
Corequisites: Take CER 340L.
Offered: Every year, Fall

CER 340L. Introduction to Geotechnical Engineering and Foundation Design Lab. 0 Credits.
Lab to accompany CER 340.
Prerequisites: Take MER 210.
Corequisites: Take CER 340.
Offered: Every year, Fall

CER 350. Hydrology/Hydraulic Design. 4 Credits.
This course studies both hydrology, which is the study of occurrence, movement and distribution of rainfall, and hydraulic design, which is the application of fluid mechanics, physical science and engineering disciplines in the design of structures and development of water resources. Hydrologic principles are applied to model and analyze the distribution and movement of rainfall in a watershed. Hydraulic principles are applied to analyze and design flow-through systems of reservoirs, channels and culverts. The course makes extensive use of computer simulation models used in engineering practice.
Prerequisites: Take MER 310.
Corequisites: Take CER 350L.
Offered: Every year, Spring

CER 350L. Hydrology/Hydraulic Design Lab. 0 Credits.
Lab to accompany CER 350.
Prerequisites: Take MER 310.
Corequisites: Take CER 350.
Offered: Every year, Spring

CER 360. Construction Management. 3 Credits.
This course focuses on the implementation of various projects in which a civil engineer may be engaged, including planning and feasibility studies, design and construction. Students study topics relating to the management of construction, including scope of work, rough order-of-magnitude estimating, scheduling, planning, progress reporting, resource constraining and quality control. The roles of the contractor, owner, public entities and designer are explained.
Prerequisites: Take ENR 210.
Offered: Every year, Spring

CER 370. Materials Engineering for Civil Engineers. 3 Credits.
This course introduces the fundamental properties of civil engineering materials, including mechanical, chemical, physical, surface, fracture and rheological properties. The materials discussed are cements, metals, asphalt, wood and composites. Special effort is directed at learning new sustainable construction materials and practices, including alternative binders for concrete and methods for increasing the service life of civil engineering infrastructure.
Prerequisites: Take CHE 110.
Corequisites: Take MER 220.
Offered: Every other year, Spring

CER 405. Ecological Engineering. 3 Credits.
Ecological engineering is the design of sustainable ecosystems that integrate human society with its natural environment for the benefit of both. This course explores the basic concepts of ecological engineering for design applications including green infrastructure, wetland creation and restoration, restoration/rehabilitation of forests, grasslands, lakes, reservoirs and rivers and the development of engineered sustainable ecosystems.
Prerequisites: Take CER 350 CER 350L.
Offered: Every other year, Spring

CER 410. Design of Steel Structures. 3 Credits.
The course synthesizes the fundamentals of statics, mechanics of materials and structural analysis and applies them to the design of structural members, with emphasis on satisfying real-world needs. Topics include an introduction to the design of structural systems, steel tension and compression members, beams and beam-columns and connections. All design is performed in accordance with codes and specifications used in current engineering practice. A comprehensive design problem requires development of a design methodology, consideration of alternative solutions and design of an optimal steel structure to meet stated functional requirements.
Prerequisites: Take CER 310.
Offered: Every other year, Spring

CER 415. Advanced Structural Analysis. 3 Credits.
This course builds on the material covered in CER 310 to develop a better understanding of structural behavior. Matrix analysis methods, including an introduction to finite elements, are developed as the basis for modern, computer-based structural analysis. These and other advanced analytical techniques are used to analyze and design trusses, beams and frames. Coursework involves extensive use of the computer as an analytical tool. Students use state-of-the-art structural engineering analysis and design software.
Prerequisites: Take CER 310.
Offered: Every other year, Spring
CER 420. Design of Concrete Structures. 3 Credits.
This course introduces the behavior and failure mechanisms of structural concrete. Current codes and industry standards are used to guide the practical design of beams, slabs, and columns.
Prerequisites: Take CER 310.
Offered: Every year, Fall

CER 430. Transportation Engineering. 3 Credits.
This course provides students with a solid introduction to the principles of transportation engineering with a focus on highway engineering and traffic analysis. The material learned provides the basic skill set that enables students to solve transportation problems that are likely to appear in professional practice, on the Fundamentals of Engineering exam (FE), and on the Principles and Practice of Engineering exam (PE).
Prerequisites: Take CER 340.
Offered: Every year, Fall

CER 435. Geotechnical Aspects of Transportation Infrastructure. 3 Credits.
Students are exposed to the geotechnical aspects of transportation systems, with a strong focus on pavement design (both rigid and flexible). Basic transportation topics necessary for the geotechnical design of roads are covered.
Prerequisites: Take CER 340.
Offered: Every other year, Fall

CER 440. Introduction to Power and Energy Systems. 3 Credits.
This course includes an overview of power generation and distribution systems. Students focus on civil and environmental engineering issues as they pertain to power systems. They also learn additional basic-level skills in electrical engineering that enable them to solve straightforward generation and distribution problems. Topics include: the relationship between water and energy, environmental implications of power generation, air quality monitoring, stationary source control, residuals management and current public policy issues related to these systems.
Prerequisites: Take PHY 122.
Offered: As needed

CER 445. Advanced Geotechnical Engineering and Foundation Design. 3 Credits.
This course focuses on the analysis and design of shallow and deep foundations. Other topics include field testing, structural design of footings, and the geotechnical aspects of retaining wall design and excavations.
Prerequisites: Take CER 340.
Offered: Every year, Spring

CER 450. Water and Waste Water Technology. 3 Credits.
Students study technical engineering solutions to problems regarding water processing, water distribution, wastewater collection, and wastewater treatment. Advanced technical topics include: water distribution and sewerage system design, unit process design and environmental biotechnology.
Prerequisites: Take CER 330.
Offered: Every other year, Spring

CER 455. Advanced Environmental Engineering. 3 Credits.
Students extend what they learned in the Fundamentals of Environmental Engineering course. This course provides a more in-depth look at environmental policies and regulations concerning water and air and their implications on design. Case studies and design projects allow students to focus on both technical and nontechnical issues associated with environmental projects. Advanced technical topics include: biological treatment, cell growth kinetics, sludge treatment/disposal, landfills, air pollution control, hazardous waste, contaminant transport, quantitative risk assessment and advanced water treatment.
Prerequisites: Take CER 330.
Corequisites: Take CER 455L.
Offered: Every year, Fall

CER 455L. Advanced Environmental Engineering Lab. 0 Credits.
Lab to accompany CER 455.
Prerequisites: Take CER 330.
Corequisites: Take CER 455.
Offered: Every year, Fall

CER 460. Wood and Masonry Design. 3 Credits.
This course teaches the engineering thought process through the design of wood and masonry structures. The course synthesizes the fundamentals of statics, mechanics of materials, and structural analysis and applies them to the design of structural members, with emphasis on satisfying real world needs. All design is performed in accordance with codes and specifications used in current engineering practice. A comprehensive design problem requires development of a design methodology, consideration of alternative solutions, and design of an optimal timber and masonry structure to meet stated functional requirements.
Prerequisites: Take CER 310.
Offered: As needed

CER 465. Hazardous Waste and Environmental Site Assessment. 3 Credits.
This course provides an introduction to hazardous waste management and preliminary site investigations for environmental hazards. Topics include identification of wetlands, title searches, air photo interpretation for environmental hazards, visual site surveys, operation of environment monitors, current EPA regulations regarding site assessment and investigation, and sampling of surface materials. Additional coursework focuses on hazardous waste; in particular, the legal framework, chemistry, quantitative risk assessment and remediation.
Prerequisites: Take CER 330.
Offered: Every other year, Spring

CER 470. Water Quality. 3 Credits.
This course introduces basic chemical principles and applications to the analysis and understanding of aqueous environmental chemistry in natural waters and wastewaters. Topics include modeling of chemical systems, dissolved oxygen, nutrients, temperature and toxic substances with applications to groundwater, rivers, lakes, estuaries and coastal waters.
Prerequisites: Take CER 330.
Offered: As needed
CER 475. Groundwater Hydrology and Contaminant Transport. 3 Credits.  
Students analyze groundwater flow and contaminant transport in the subsurface. Topics include geologic and physical parameters affecting the movement of water and contaminants, sources of pollution, mathematical formulation and solution of groundwater flow and transport problems, remediation methods and an introduction to computer simulation models.  
Prerequisites: Take CER 330 CER 340 CER 350.  
Offered: Every other year, Spring

CER 485. Slope and Earth Structures Stability. 3 Credits.  
Students deepen their understanding of the mechanical behavior of slopes and earthen structures. The focus of this course is on the design, construction and performance of slopes and earthen structures.  
Prerequisites: Take CER 340.  
Offered: Every other year, Fall

CER 490. Engineering Professional Experience. 1 Credit.  
Students gain experience by employing engineering skills in a professional setting under the guidance of practicing engineers. Students must obtain departmental approval and register prior to starting the experience.  
Prerequisites: Take ENR 395 or permission of the instructor.  
Offered: Every year, All

CER 498. Design of Civil Engineering Systems. 3 Credits.  
This course provides an opportunity for students to apply and synthesize their knowledge of civil engineering. Multidisciplinary teamwork is emphasized. Coursework from the various subdisciplines of civil engineering provides the foundation for this course. Students develop requirements, generate alternatives, make practical engineering approximations, analyze feasibility and make decisions leading to a completed design. The design includes principles of sustainability taking into account realistic constraints. These may include economic, environmental, legal and cultural issues. Deliverables include a comprehensive design report including drawings and a client briefing. This course provides an integrative experience that supports the overarching academic program goal.  
Prerequisites: Take CER 310 CER 330 CER 340 CER 350 or permission of instructor.  
Offered: Every year, Spring

CER 499. Independent Study in Civil Engineering. 3 Credits.  
On an individual or small group basis, students pursue advanced study of a research or design topic in civil engineering. The scope of the course is tailored to the needs of the project and desires of the student, in consultation with the faculty adviser. The student is required to define and analyze the problem, study the fundamentals involved, organize an approach, determine a procedure, perform research and/or achieve a solution, submit a written report and give a formal briefing. Requires permission of the instructor.  
Offered: Every year, Fall and Spring

CAS 420. CAS Integrative Capstone. 3 Credits.  
In this course, students are encouraged to further inquire into a question or problem that is important to them and important to society. Faculty mentors guide students in the process of exploring ideas and in the process of producing a “signature work” that expresses insights, ideas and skills learned from both the major and general education coursework. Signature works are shared with the Quinnipiac community at the conclusion of the course.  
Prerequisites: Take FYS 101 or FYS 150 and junior or senior standing.  
Offered: Every year, Fall and Spring

COM 101. Communications First-Year Seminar. 1 Credit.  
This first-semester course is designed to ease the transition to college and to acquaint first-year School of Communications students with timely and important resources and information. Students hear from faculty members in each of the departments within the School of Communications to learn more about the majors offered. Students also learn how to create their own success in college and as lifelong learners through development of important skills. Topics include effective communication, time management, study skills and degree requirements. This class is required of all first-year and transfer students entering with 0-26 college credits.  
Offered: Every year, Fall and Spring

COM 120. Media Industries and Trends. 3 Credits.  
This course introduces students to the structure, function, uses and social implications of media industries. Students examine the ways individual industries inform, entertain and influence media consumers. Significant focus is placed on media literacy. The course also surveys issues related to ownership, regulation, ethics and globalization. The main objectives of COM 120 are to help students understand media professions, industries and technologies in relation to key trends, including the increasing commercialization of media products, the consolidation and convergence of media industries, and the implications these processes hold for society. The course fosters the development of skills including the ability to access, analyze and properly cite sources for research on the media.  
Offered: Every year, Fall and Spring

COM 130. Visual Design. 3 Credits.  
This course introduces students to the design process using professional-level software for digital image creation and editing, typesetting and typography, page layout and design in preparation for advanced course work. Students produce course projects that demonstrate creativity, design concepts, critical thinking, aesthetic principles and basic technical competence.  
Offered: Every year, Fall and Spring

COM 140. Storytelling. 3 Credits.  
This survey course has been designed to reinforce grammatical standards of the English language while introducing students to the basic tenets of dramatic, journalistic and strategic writing. Through the examination of a single theme, students will learn to tell stories using these three writing styles as they identify and connect with specified audiences.  
Offered: Every year, Fall and Spring

College of Arts and Sciences (CAS)

CAS 110. Intellectual Success. 1 Credit.  
Students engage with faculty in the College of Arts and Sciences to explore the structure and goals of an education in the liberal arts and sciences. Students develop the foundations of their education to identify and successfully pursue their interests, develop personal strengths and prepare for productive, engaged lives after graduation. The course provides the context for strong academic advising in the freshman year. For students new to the College of Arts and Sciences.  
Offered: Every year, Fall
COM 150. Public Speaking: Principles and Practice. 3 Credits.
This course examines the principles of oral communication and presentation skills and puts those principles into practice. Through multiple assignments, students increase their confidence in delivering presentations and demonstrate effective research skills, speech development and preparation, and delivery. Additionally, critical thinking and listening skills are demonstrated through oral and written critiques.
Offered: Every year, Fall and Spring
UC: Breadth Elective

COM 159. Communications Elective. 3 Credits.

COM 201. Media Career Development. 1 Credit.
This course introduces students to the career development process and covers the skills needed to create a personal career plan. It includes topics such as self-assessment, career research, resume and cover letter preparation, networking and interviewing practice, as well as strategies for internship/job searches. Course material is geared specifically toward media/communication careers. The course is graded on a pass/fail basis. Students majoring in communications cannot count COM 201 toward their major electives.
Offered: Every year, Fall and Spring

COM 215. Social Media: Leveraging the Digital Age. 3 Credits.
The focus of this course is to provide students the foundational skills necessary to become “influencers” in the social space. Students evaluate the relationship of social media with various communication industries. They examine the rise of social media and its effect on social interaction and audience behaviors, and analyze social media strategies and their effectiveness from a personal and organizational perspective. Projects require students to engage with a variety of social media platforms and tools.
Offered: Every year, All

COM 250. Song and Dance. 3 Credits.
Music plays a major role in all media where sound is a component. This course explores the nature of music and elements such as rhythm, harmony, resonance and entrainment. Through a series of texts and films, participants seek to understand the power music brings to the world of communication. Using a nontechnical approach, they examine principles that underlie music’s status as the “universal language” and enable it to speak to the mind, heart and soul of humanity.
Prerequisites: Take EN 102 or Sophomore Standing.
Offered: Every other year
UC: Breadth Elective, University Curriculum Ele

COM 301. Communications Career Practicum. 1 Credit.
This course offers practical training in a communications-related occupation. Students complete a minimum of 40 hours of supervised fieldwork (paid or unpaid) in a professional setting. Practicum placements must be approved by the internship program director in accordance with the school policies and prior to earning credit. At least sophomore status required. This course is graded on a pass/fail basis.
Offered: Every year, All

COM 302. Communications Career Practicum II. 1 Credit.
This course continues practical training in a communications-related occupation. Students complete a minimum of 40 hours of supervised fieldwork (paid or unpaid) in a professional setting. Practicum placements must be approved by the internship program director in accordance with the school policies and prior to earning credit. At least sophomore status required. This course is graded on a pass/fail basis.
Prerequisites: Take COM 301 and permission of department chair.
Offered: Every year, All

COM 303. Communications Career Practicum III. 1 Credit.
This course completes the 40 hour experimental learning opportunities in a communications-related occupation. Students complete a minimum of 40 hours of supervised fieldwork (paid or unpaid) in a professional setting. Practicum placements must be approved by the internship program director in accordance with the school policies and prior to earning credit. At least sophomore status required. This course is graded on a pass/fail basis.
Prerequisites: Take COM 302 and permission of department chair.
Offered: Every year, All

COM 305. The Vietnam Era: Images and Reality (HS 305). 3 Credits.
This course examines the Vietnam era and its lessons, and includes an analysis of media coverage of the war and its effect on both national policy and political change.
Prerequisites: Take HS 111 HS 112 HS 131 HS 132 COM 120 or MSS 101.
Offered: As needed

COM 340. Exploring Communications Abroad. 3 Credits.
This multisection, global perspective course introduces students to the worldwide development of communications, including communication practices, infrastructure, environments and specializations. Students conduct primary and secondary research on communications in a specific country or in a cross-cultural context. The topics can range from international cinema though storytelling and global branding to documentary filmmaking depending on the specialty of the instructor. This course includes a short-term study-abroad component directly related to the topic.
Prerequisites: Take FYS 101.
Offered: Every year, Fall and Spring
UC: Breadth Elective, Intercultural Understanding

COM 350. Media Culture and Arts of Los Angeles. 3 Credits.
This course introduces students to the diverse media companies based in Los Angeles as well as the influence of local history, art and culture. The class includes weekly seminars with topics including: journalism, film and television writing, video production, podcasting and web design as well as weekend excursions to local landmarks. Students complete a final multimedia project that focuses on a local media company.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

COM 489. Communications Internship. 0 Credits.
This course aims to support the pursuit of a practicum or internship in a cooperating communications-related business or organization (paid or unpaid). Enrolled students meet with the assistant dean for career development to begin the application and approval process, which is managed through an online database. This course is graded on a pass/fail basis. Approval of instructor is required.
Offered: Every year, All
Every year, Fall

COM 490. Communications Career Internship. 3 Credits.
This course aims to promote professional growth and advancement through observation and participation in jointly supervised fieldwork with a cooperating communications-related business or organization (paid or unpaid). The course also provides the opportunity for students to meet and work with active communications professionals while refining their own career goals and maximizing opportunities. Students complete a minimum of 120-hours of supervised fieldwork in a professional setting evaluated by the internship supervisor and the school's internship coordinator. The internship placements must be approved in accordance with the school policies and prior to student earning credit. Junior/Senior status is required. This course is graded on a pass/fail basis. (Repeatable or concurrent with COM 491 upon department chair approval.)
Prerequisites: Take COM 201.
Offered: Every year, All

COM 491. Communications Career Internship II. 3 Credits.
This course aims to promote professional growth and advancement through observation and participation in jointly supervised fieldwork with a cooperating communications-related business or organization (paid or unpaid). The course also provides the opportunity for students to meet and work with active communications professionals while refining their own career goals and maximizing opportunities. Students complete a minimum of 120-hours of supervised fieldwork in a professional setting evaluated by the internship supervisor and the school's internship coordinator. The internship placements must be approved in accordance with the school policies and prior to student earning credit. Junior/Senior status is required. This course is graded on a pass/fail basis. (Repeatable or concurrent with COM 490 upon department chair approval.)
Prerequisites: Take COM 201 COM 490 and permission of department chair.
Offered: Every year, All

Computer Information Systems (CIS)

CIS 101. Introduction to Information Systems. 3 Credits.
This course introduces students to the analysis, design and development of information systems using the example of a mobile application. In a semester-long, team-based project, students develop a prototype and business case for a mobile application that addresses a defined business need. Students learn how information systems are developed while simultaneously learning how to gather, analyze and present data for decision-making in a business environment.
Offered: Every year, All

CIS 125. Systems Analysis and Design. 3 Credits.
This course provides an introduction to the phased, problem-solving approach commonly used by organizations to examine and improve their information systems. Topics include analysis of a business problem or opportunity; determining what role, if any, computer-based technologies can play in addressing the business need; articulating the business requirements for the technology-based solution; specifying alternative approaches to acquiring the technology capabilities needed to address the business requirements; and specifying the detailed requirements for the information systems solution.
Prerequisites: Take CIS 101.
Offered: Every year, Fall

CIS 245. Object-Oriented Programming. 3 Credits.
This course provides an introduction to object-oriented programming using a high-level programming language such as Python. The course covers the basics of how one constructs a program from a series of simple instructions. Basic features of functional and object-oriented programming are covered. Common programming techniques necessary to create simple but useful applications are explained.
Prerequisites: Take CIS 101.
Offered: Every year, Spring

CIS 265. Mobile Application Development. 3 Credits.
This project-based course covers the use of mobile applications in business and the issues involved in mobile application development. It also explores the principles and tools involved in the design and construction of applications for mobile devices.
Prerequisites: Take CIS 101.
Offered: Every other year, Spring

CIS 267. HTML and CSS. 3 Credits.
This course introduces students to the fundamentals of HTML and CSS, which are two of the core technologies used to build websites. In this project-based course, students learn how to build modern websites using professional tools and workflows. Topics include design principles, responsive layouts, interactivity, video and audio, accessibility, performance optimization and version control systems.
Prerequisites: Take CIS 101.
Offered: Every other year, Fall

CIS 299. Independent Study. 1-6 Credits.

CIS 301. Enterprise Systems. 3 Credits.
An Enterprise Resource Planning (ERP) system is software that runs all areas of an organization including accounting and finance, human resources (HR), sales and distribution, production, purchasing and inventory. ERP systems are cross-functional, process-centered, and based on industry best practices. This course covers both ERP theory and practice; the course content includes the evolution of ERP systems, business process reengineering, process mapping, the ERP life cycle, ERP functionality, ERP add-ons and security and risk management issues.
Prerequisites: Take CIS 101.
Offered: Every year, Spring

CIS 330. Networking and Data Communications. 3 Credits.
This course covers topics related to systems architecture and communication networks, focusing on local and wide area networks, internetworking, network security and business continuity. Students gain the knowledge and skills needed for communicating effectively with professionals whose special focus is on networks, hardware and systems software technology and for designing organizational processes and software solutions that require in-depth understanding of the IT infrastructure capabilities and limitations.
Prerequisites: Take CIS 245.
Offered: As needed

CIS 350. Advanced Excel Programming (AC 350). 3 Credits.
This course utilizes advanced topics in Excel to solve a range of complex business problems. Topics include: spreadsheet design, the use of complex formulas, functions, list and data management, macros and Visual Basic for Applications.
Prerequisites: Take CIS 101.
Offered: Every year, All
CIS 351. Database Programming and Design. 3 Credits.
This course presents the use of database architecture and programming as a tool for developing integrated solutions for the information requirements of a modern business environment. Students work to identify business solutions by identifying the appropriate database design, and to understand how that design supports the business requirements. Students learn how to design, build and query databases using Microsoft SQL Server.
Offered: Every year, Fall

CIS 355. Data Visualization. 3 Credits.
This course provides an introduction as well as hands-on experience in the field of data visualization. Students learn basic visualization design and evaluation principles to create meaningful displays of quantitative and qualitative data. They also learn techniques for visualizing multivariate, temporal, text-based, geospatial, hierarchical and network/graph-based data.
Prerequisites: Take CIS 101.
Offered: Every year, Spring

CIS 381. Web Development. 3 Credits.
This course introduces students to the development of modern web applications. In this project-based course, students learn how to develop web applications that adhere to industry best practices and leverage the latest tools and technologies. Equal emphasis is placed on front end and back end aspects of web development. Topics include architectural patterns, database integration, authentication and authorization, security and web services.
Prerequisites: Take CIS 101.
Offered: Every other year, Fall

CIS 400. Emerging Topics. 3 Credits.
This course introduces students to new and innovative IS technologies and examines how these powerful systems have fundamentally reshaped modern organizations along with our society. Using online collaborative technologies that were developed in the context of social networking and online communities, corporations are reengineering both internal business processes and those related to customers, suppliers and business partners. Developing innovative ways to communicate and collaborate can lead to new business opportunities and new efficiencies. This course investigates the technologies, methods and practices of developing new innovations such as online communities, and how this knowledge and these skills are applied to re-engineer business processes.
Prerequisites: Take CIS 125 CIS 301.
Offered: As needed

CIS 411. Information Systems Security. 3 Credits.
This course introduces students to the fundamental principles and topics of information technology security and risk management at the organizational level. Students learn critical security principles that enable them to plan, develop and perform security tasks. The course addresses hardware, software, processes, communications, applications and policies and procedures with respect to organizational IT security and risk management.
Offered: As needed

CIS 440. IT Project Management. 3 Credits.
This course covers a methodology for initiating, planning, executing, controlling and closing IT projects, and covering processes, methods, techniques and tools that organizations use to manage their information system projects. It assumes that IT project management is a complex, team-based activity where various types of technologies (including both project management and group collaboration software) are an inherent part of the project management process.
Prerequisites: Take CIS 125 CIS 301.
Offered: Every year, Fall

CIS 484. Information Systems Internship. 3 Credits.
Students gain experience by employing their skills in a professional setting under practicing professionals. This internship involves in-depth work related to user-defined information needs and is usually completed in the summer between the student’s junior and senior years. Students must obtain approval and register prior to starting the work experience. Permission of department chair required.
Prerequisites: Take CIS 301.
Offered: Every year, Fall

CSC 105. Introduction to Computer Science. 3 Credits.
This course is an introduction to the field of computer science. Students learn about the history of computers and computing and explore the many disciplines that comprise this dynamic field such as operating systems, graphics and artificial intelligence. The algorithmic thinking necessary in the creation of computer programs is covered as students create 3D "movies" by providing instructions to characters in an animation.
Offered: As needed

CSC 106. Introduction to Programming for Engineers. 3 Credits.
This course serves as an introduction to computer science and computer programming for engineers. Topics include fundamental programming constructs, problem-solving techniques, basic data and control structures, and simple data structures and arrays. This course is for non-CSC and non-SER majors.
Offered: Every year, Fall and Spring

CSC 109. Special Topics. 3 Credits.
Offered: As needed, All

CSC 109. Special Topics. 3 Credits.

Computer Science (CSC)

CSC 101. Introduction to Internet Studies. 3 Credits.
This course covers the history of the internet, software and hardware connected with the internet, the internet and commerce, and education and social issues. The future of the internet also is explored. Browsers, search engines and email software packages are examined. The HTML markup language is introduced.
Offered: As needed

CSC 105. Introduction to Computer Science. 3 Credits.
This course is an introduction to the field of computer science. Students learn about the history of computers and computing and explore the many disciplines that comprise this dynamic field such as operating systems, graphics and artificial intelligence. The algorithmic thinking necessary in the creation of computer programs is covered as students create 3D "movies" by providing instructions to characters in an animation.
Offered: As needed

CSC 106. Introduction to Programming for Engineers. 3 Credits.
This course serves as an introduction to computer science and computer programming for engineers. Topics include fundamental programming constructs, problem-solving techniques, basic data and control structures, and simple data structures and arrays. This course is for non-CSC and non-SER majors.
Offered: Every year, Fall and Spring

CSC 109. Special Topics. 3 Credits.
Offered: As needed, All

<tr>
<td>CSC 110. Programming and Problem Solving.</td>
<td>3 Credits.</td>
<td>This course serves as an introduction to computer science and computer programming. Topics include fundamental programming constructs; problem-solving techniques; basic data and control structures; testing; debugging; arrays; and an introduction to object-oriented programming. A lab is included.</td>
<td></td>
<td>Corequisites: Take CSC 110L.</td>
<td>Offered: Every year, Fall and Spring</td>
</tr>
<tr>
<td>CSC 110L. Programming and Problem Solving Lab.</td>
<td>1 Credit.</td>
<td>Students gain experience in the practice of programming and problem solving by completing a series of hands-on activities, which increase in complexity, covering a range of topics from the CSC 110 course. This course is taken in conjunction with CSC 110.</td>
<td></td>
<td>Corequisites: Take CSC 110.</td>
<td>Offered: Every year, Fall and Spring</td>
</tr>
<tr>
<td>CSC 111. Data Structures and Abstraction.</td>
<td>3 Credits.</td>
<td>This course is a continuation of CSC 110. Topics include advanced data structures (linked lists, stacks, queues, trees, hash tables), recursion, abstract data types, introductory algorithms, and intermediate object-oriented programming. A lab is included.</td>
<td></td>
<td>Corequisites: Take CSC 110 CSC 110L; Minimum grade C-.</td>
<td>Offered: Every year, All</td>
</tr>
<tr>
<td>CSC 111L. Data Structures and Abstraction Lab.</td>
<td>1 Credit.</td>
<td>Students gain experience in data structures programming by completing a series of activities, which increase in complexity, covering a range of topics from the CSC 111 course. This course is taken in conjunction with CSC 111.</td>
<td></td>
<td>Corequisites: Take CSC 111.</td>

<td></td>
</tr>
<tr>
<td>CSC 205. Introduction to Discrete Mathematics (MA 205).</td>
<td>3 Credits.</td>
<td>This course introduces students to basic concepts and structures of discrete mathematics. Topics can include propositional and predicate logic, sets and set operations, functions, proof techniques, counting problems, probability and basic number theory. Applications include computer science, biology, social sciences, law and the physical sciences.</td>
<td></td>
<td>Corequisites: Take CSC 110 CSC 110L or MA 110 or higher; Minimum grade C-.</td>
<td>Offered: Every year, Spring</td>
</tr>
<tr>
<td>CSC 210. Computer Architecture and Organization.</td>
<td>3 Credits.</td>
<td>Students are introduced to the organization and architecture of computers. Topics related to computer organization include digital logic, data representation, computer arithmetic, data path and control unit implementation, memory system organization, and I/O communications. Architecture topics include machine language programming, instruction set design, and factors affecting processor performance. A lab component is included.</td>
<td></td>
<td>Corequisites: Take CSC 210L.</td>
<td>Offered: Every year, Spring</td>
</tr>
<tr>
<td>CSC 210L. Computer Architecture and Organization Lab.</td>
<td>1 Credit.</td>
<td>Students design and implement digital circuits of increasing complexity using abstraction to manage complexity. Students implement Assembly Language programs that demonstrate the instruction set architecture interface between hardware and software. This course is taken in conjunction with CSC 210.</td>
<td></td>
<td>Corequisites: Take CSC 210.</td>
<td>Offered: Every year, Spring</td>
</tr>
<tr>
<td>CSC 215. Algorithm Design and Analysis.</td>
<td>3 Credits.</td>
<td>This course presents a study of the design and analysis of algorithms. Topics include Asymptotic Analysis, Complexity Theory, Sorting and Searching, Underlying Data Structures, Recursion, Greedy Algorithms, Divide and Conquer, Dynamic Programming, and NP-completeness. Additional topics may include Graph Algorithms, Probabilistic Algorithms, Distributed Computing and Parallel Algorithms.</td>
<td></td>
<td>Corequisites: Take CSC 110 CSC 110L.</td>
<td>Offered: Every year, Fall</td>
</tr>
<tr>
<td>CSC 225. Introduction to Software Development (SER 225).</td>
<td>3 Credits.</td>
<td>This course presents introductory software development concepts including group development, large-scale project work and theoretical aspects of object-oriented programming. The course expands on material from previous courses. Professional behavior and ethics represent an important component of this course.</td>
<td></td>
<td>Corequisites: Take CSC 111 CSC 111L; and CSC 205 or MA 205 Minimum grade C-.</td>
<td>Offered: Every year, Fall</td>
</tr>
<tr>
<td>CSC 299. Independent Study.</td>
<td>1-6 Credits.</td>

<td>CSC 300. Special Topics.</td>
<td>3 Credits.</td>
<td></td>
<td></td>
<td>Offered: As needed, All</td>
<td></td>
</tr>
<tr>
<td>CSC 310. Operating Systems and Systems Programming.</td>
<td>3 Credits.</td>
<td>Students are introduced to operating systems and the software to support these systems. Topics include operating system principles, concurrency, scheduling and dispatch, virtual memory, device management, security and protection, file systems and naming, and real-time systems.</td>
<td></td>
<td>Corequisites: Take CSC 210 CSC 225; Minimum grade C-.</td>
<td>Offered: Every year, Fall</td>
</tr>
<tr>
<td>CSC 315. Theory of Computation (MA 315).</td>
<td>3 Credits.</td>
<td>This course provides an introduction to the classical theory of computer science. The aim is to develop a mathematical understanding of the nature of computing by trying to answer one overarching question: &quot;What are the fundamental capabilities and limitations of computers?&quot; Specific topics include finite automata and formal languages (How do we define a model of computation?), computability (What can be computed? and How do we prove something cannot be computed?), and complexity (What makes some problems so much harder than others to solve? and What is the P versus NP question and why is it important?).</td>
<td></td>
<td>Corequisites: Take CSC 215 or MA 301; Minimum grade C-.</td>
<td>Offered: Every other year, Fall</td>
</tr>
</tbody>
</table>
CSC 318. Cryptography (MA 318). 3 Credits.
Students study methods of transmitting information securely in the face of a malicious adversary deliberately trying to read or alter it. Participants also discuss various possible attacks on these communications. Students learn about classical private-key systems, the Data Encryption Standard (DES), the RSA public-key algorithm, discrete logarithms, hash functions and digital signatures. Additional topics may include the Advanced Encryption Standard (AES), digital cash, games, zero-knowledge techniques and information theory, as well as topics chosen by the students together with the instructor for presentations.
Prerequisites: Take MA 229 or CSC 215; Minimum grade C-.
Offered: Every other year, Spring

CSC 320. Compilers. 3 Credits.
This course presents a study of the design and implementation of compilers. Topics include translators and compilers, lexical analysis, syntax analysis and parsing, runtime environments, and code generation.
Prerequisites: Take CSC 210 CSC 215 CSC 225; Minimum grade C-.
Offered: Every other year, Spring

CSC 325. Database Systems (SER 325). 3 Credits.
Students are introduced to the theory and application of database systems. Topics include data modeling and the relational model, query languages, relational database design, transaction processing, databases and physical database design.
Prerequisites: Take CSC 215 and; CSC 225 or SER 325; Minimum grade C-.
Offered: Every other year, Fall

CSC 340. Networking and Distributed Processing. 3 Credits.
This course introduces students to net-centric computing, the web as an example of client-server computing, building internet and web applications, communications and networking, distributed object systems, collaboration technology and groupware, distributed operating systems and distributed systems.
Prerequisites: Take CSC 215 CSC 225; Minimum grade C-.
Offered: Every other year, Spring

CSC 345. Computer Graphics. 3 Credits.
This course is an introduction to theory and programming in computer graphics. Topics include graphic systems, fundamental techniques in graphics, basic rendering, basic geometric modeling, visualization, virtual reality, computer animation, advanced rendering and advanced geometric modeling.
Prerequisites: Take CSC 215 CSC 225; Minimum grade C-.
Offered: As needed

CSC 350. Intelligent Systems. 3 Credits.
Artificial Intelligence is an umbrella topic covering efforts in a variety of fields all searching for one goal: to get computers to perform well at tasks at which humans excel. Topics include fundamental issues in intelligent systems, search and optimization methods, knowledge representation and reasoning, learning, agents, computer vision, natural language processing, pattern recognition, advanced machine learning, robotics, knowledge-based systems, neural networks and genetic algorithms.
Prerequisites: Take CSC 215 CSC 225; Minimum grade C-.
Offered: Every other year, Spring

CSC 355. Programming Language Concepts. 3 Credits.
This course represents an introduction to different paradigms of programming languages and their role in the problem-solving process. Topics covered include history and overview of programming languages, introduction to language translation, language translation systems, models of execution control, declaration, modularity, and storage management, programming language semantics, functional programming paradigms, object-oriented programming paradigms, logic programming paradigms, language-based constructs for parallelism.
Prerequisites: Take CSC 215 CSC 225; Minimum grade C-.
Offered: As needed

CSC 361. Numerical Analysis (MA 361). 3 Credits.
This course covers selected techniques for obtaining numerical values of functions, solving linear and nonlinear equations, interpolation, numerical differentiation and integration, error analysis and numerical stability.
Prerequisites: Take MA 142 or MA 152 and MA 229; Minimum grade C-.
Offered: As needed

CSC 375. Advanced Topics in Computer Science (SER 300). 3 Credits.
This course explores advanced computer science topics not available in other courses, as well as new topics as they emerge in this rapidly evolving discipline. Topics may be interdisciplinary.
Prerequisites: Take CSC 215 CSC 225; Minimum grade C-.
Offered: Every year, Spring

CSC 399. Independent Study. 1-6 Credits.

CSC 490. Computer Science Internship. 1-6 Credits.
Offered: As needed

CSC 491. Senior Project 1. 3 Credits.
This is the first of a two-course sequence required for all computer science majors (beginning with students who entered the program in 2006). Students explore the profession of computing by working independently, under the guidance of a faculty member, on a significant computing project. Participants review professional literature and explore professional ethics, as they work to synthesize their knowledge of computer science. During the first part of the project, students develop a project plan and submit a proposal for approval to their adviser. Students meet regularly to present and discuss progress. Senior status is required.
Prerequisites: Take CSC 215 CSC 225; Minimum grade C-.
Offered: Every year, Fall

CSC 492. Senior Project 2. 1-3 Credits.
This is the second of a two-course sequence required for all computer science majors (beginning with students who entered the program in 2006). Students explore the profession of computing by working independently, under the guidance of a faculty member, on a significant computing project. Participants review professional literature and explore professional ethics, as they work to synthesize their knowledge of computer science. During the second part of the project, students complete work on their project, and create an appropriate formal presentation of their results.
Prerequisites: Take CSC 491; Minimum grade C-.
Offered: Every year, Spring
CSC 493. Senior Thesis I. 1 Credit.
This course is the first part of a two-semester series in which students work independently under the guidance of a faculty member on a significant thesis culminating in the development of a senior thesis. The CSC 493/CSC 494 course sequence provides students with an opportunity to synthesize their knowledge of computer science. Students explore the profession of computing by engaging in the professional literature and exploration of professional ethics. Students meet regularly to present and discuss progress. During the first part of the sequence, students complete the thesis proposed in CSC 493.
Prerequisites: Take CSC 215 CSC 225; Minimum grade C-; senior status is required.
Offered: Every year, Fall

CSC 494. Senior Thesis II. 3 Credits.
This course is the second part of a two-semester series in which students work independently under the guidance of a faculty member on a significant thesis culminating in the development of a senior thesis. The CSC 493/CSC 494 course sequence provides students with an opportunity to synthesize their knowledge of computer science. Students explore the profession of computing by engaging in the professional literature and exploration of professional ethics. Students meet regularly to present and discuss progress. During the second part of the sequence, students complete the thesis proposed in CSC 493.
Prerequisites: Take CSC 493; Minimum grade C-.
Offered: Every year, Spring

CSC 499. Independent Study. 1-6 Credits.

Criminal Justice (CJ)

CJ 101. Crime and Society. 3 Credits.
This course examines crime as a cultural phenomenon and as a problem of social control. Topics include the nature of law, characteristics of the criminal justice system, types of crime, as well as the critical evaluation of theories of crime.
Offered: Every year, All
UC: Social Sciences, Intercultural Understand

CJ 200. Special Topics. 3 Credits.
A variety of special topics courses are periodically offered.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: As needed

CJ 205. From College to Career (SO/GT 205). 1 Credit.
This course introduces sociology, gerontology and criminal justice majors to the preprofessional skills and knowledge they need to practice prior to obtaining their internship. Students are introduced to practical skills that will benefit them throughout their professional careers ranging from self-reflection to resume writing and email etiquette. Students meet regularly to discuss the breadth of potential careers in sociology, criminal justice and gerontology through interaction with departmental faculty and practitioners in the field. For criminal justice majors only. This course is graded on a pass/fail basis.
Prerequisites: Take CJ 101.
Offered: Every year, Spring

CJ 232. Women in the Criminal Justice System (SO/WS 232). 3 Credits.
This course examines the changing patterns of women's criminality, the experiences of women who are processed as crime victims, and the evolution of women's role in law, law enforcement and corrections.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Spring
UC: Social Sciences, Intercultural Understand

CJ 240. Organized Crime. 3 Credits.
This course considers the history of organized crime, its functions in distributing goods and services, in establishing order and disorder, its role in the integration of marginal ethnic groups, and the response of law enforcement and government agencies.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Spring

CJ 241. Police and Policing. 3 Credits.
This course considers the history and development of functions in policing. Issues and controversies in policing such as: training, police ideology, police management styles, the development of a working police "personality," the appropriate use of force, racial profiling, police corruption, patrol, professionalism, due process and vocational considerations are examined.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, All
UC: Social Sciences

CJ 243. Investigative Techniques. 3 Credits.
This course provides students with knowledge of basic concepts of case and crime scene investigation; scene and investigative personnel management; nature of investigative personnel roles; steps in the processing of scenes and evidence; methods of documentation; general and specialized techniques for the recognition, identification and individualization of evidence; sources of investigative information; interview techniques; reconstruction of events; and legal and ethical considerations during criminal investigations. For majors only.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Spring

CJ 250. Youth Crime (SO 250). 3 Credits.
This course deals with youth crime as distinct from adult offending. Students examine the development of the juvenile delinquency concept and justification for classifying juvenile offenders as separate from adults. Factors contributing to the onset of juvenile delinquency and relevant research also are examined. The course considers development and current functions of the juvenile justice system, paying particular attention to the challenges juvenile officials face daily. A range of widely used treatment strategies for dealing with juvenile offenders is examined.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Fall
UC: Social Sciences, Intercultural Understand

CJ 251. Probation Parole and Community Corrections. 3 Credits.
Offenders are sentenced to one of these alternatives to incarceration in order to change or control behavior. Methods of supervision, special goals such as shock probation or parole, electronic and other "high-tech" monitoring, controversies over effectiveness and punitive aspects of these technologies are considered.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Spring

CJ 253. Sexual Violence. 3 Credits.
This course takes a historical perspective on the societal and psychological aspects of sexual violence as it applies to the criminal justice system. It includes an examination of the etiology of sexual abuse as a law enforcement issue and explores the societal impact of sexual violence upon both those who commit violence and those who are the victims of it. The course encourages students to deepen their understanding of the social structural and individual treatment modalities that are employed within the system to decrease sexual violence.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Spring
CJ 261. Prisons and Jails. 3 Credits.
This course covers incarceration in both prisons and jails. Students examine incarceration as a social phenomenon, exploring its connections to political, economic and cultural forces in society. Participants investigate the history of imprisonment, theories of punishment and the (intended and unintended) societal ramifications of incarceration. Topics include prison architecture, social classifications, prison culture and inmate social structure, violence in prison, “Supermax” prisons, rehabilitation and prisoner reentry.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year
UC: Social Sciences, Intercultural Understand

CJ 271. Public Order Crimes (SO 271). 3 Credits.
Approximately two-thirds of the inmates in U.S. correctional institutions have been found guilty of public order crimes, "moral crimes" or crimes not likely to have a self-identified victim. This course concentrates on crimes associated with such activities as illegitimate gambling, consensual sex and the criminal use and sale of both legal and illegal substances.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Spring

CJ 290. Criminal Justice Research Methods. 3 Credits.
This course provides an introduction to social science research methods used in the criminal justice field. Students examine how qualitative and quantitative research methods apply to social science research. The course places particular emphasis on the importance of scientific methods in reaching informed conclusions. Students examine a number of methods commonly used in social science disciplines and learn how to interpret the results of research conducted using these methods. Understanding how social scientists investigate social phenomena allows students to accurately interpret and apply findings from criminal justice research. Students should complete the course by the end of their sophomore year or second year in the major.
Prerequisites: Take CJ 101.
Offered: Every year, All

CJ 299. Independent Study in Criminal Justice. 1-6 Credits.

CJ 300. Special Topics. 3 Credits.
A variety of advanced special topics courses are periodically offered.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: As needed

CJ 320. Victimology. 3 Credits.
Historically, the primary concern of the justice system was the apprehension and punishment of offenders. More recently, however, the needs of crime victims are increasingly recognized both formally and informally in the justice process. This course examines the emergence of victimology as a field of study and the origins and impacts of victim stigma. Students learn about the range of harms crime victims experience and the importance of addressing victim needs throughout the justice process.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Spring

CJ 330. Perspectives on Violence (SO 330). 3 Credits.
This course explores the many ways that violence is viewed in our society. Topics include types of violence, empirical evidence of incidence, characteristics of violent crimes, offender motivation, victim profiles and sociological and theoretical explanations.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Fall

CJ 333. Drugs, Alcohol and Society (SO 333). 3 Credits.
This analytical discussion-based course explores the use of drugs and alcohol in U.S. society. The emphasis is on drug and alcohol use and abuse as a social phenomenon. Students explore issues such as the relationship of drug use to particular groups in society (age, sex, race/ethnicity); patterns of drug use and abuse; the promotion of drugs by the media; and drug and alcohol abuse in historical perspective. Students also learn about drug categories, drug education, prevention and treatment and about drug laws.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Summer
UC: Breadth Elective, University Curriculum Ele

CJ 343. Forensic Issues in Law Enforcement. 3 Credits.
This course presents an overview of the scientific method and its application to the analysis of physical evidence as it impacts law enforcement investigations. Topics include the study of basic methods of documentation, collection and preservation of physical evidence; general schemes for the analysis of chemical and biological evidence; identification and individualization of firearms, fingerprints, imprints, hairs, fibers, blood and body fluids, paint, drugs and poisons, and other materials associated with crimes. The course material is reinforced through the use of actual case studies, hands-on exercises and class exercises.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Fall

CJ 355. Crime and Media (SO 355). 3 Credits.
Despite little direct contact with offenders or the criminal justice system, people typically hold strong opinions about crime-related issues. The goal of this course is to understand how media sources shape our attitudes and beliefs about crime and how we "should" respond to it. To this end, participants examine media involvement in constructing the reality of crime and justice and its implications for the justice process.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Ele

CJ 360. Inside-Out Prison Exchange Seminar. 3 Credits.
The “Inside-Out” Prison Exchange Seminar is part of a national movement giving undergraduate students (outside students) and prisoners (inside students) an opportunity to learn together. This course, being offered to outside students at Quinnipiac and male inside students at a Connecticut state prison, asks students to examine the impact of status upon American life by considering issues of personal and collective voice in communities, variation in access to conventional success opportunities, and the effect of status upon ability to effectively engage in local and national communities. Through application of theoretical perspectives and consideration of practical experience students are exposed to a diversity of material that allows them to more fully examine and understand the complex impact of social status upon American life. Note: this course takes place inside a Connecticut State Prison.
Prerequisites: Instructor discretion.
Offered: Every year, Fall

CJ 370. Constitution, Ethics and Policing. 3 Credits.
Students are introduced to the constitutional limitations and ethical considerations that affect police behavior. These include use of force, coercion, entrapment, right to counsel, wiretapping, confessions and exclusionary rule.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Fall
CJ 385. Senior Seminar in Criminal Justice Policy. 3 Credits.
This senior-level course examines social policy as applied to a selected aspect of the criminal justice field. Senior status in criminal justice major required.
Prerequisites: Take CJ 290.
Offered: Every year, All

CJ 392. Internship in the Community (SO 392/GT 392). 3 Credits.
For criminal justice majors in their junior or senior year only. Students complete 120 hours of supervised fieldwork in a community agency along with one hour per week in a classroom setting. Coursework and class content include written and oral reflection, focusing on professional issues, along with criminal justice concepts and theory. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator one semester prior to begin the placement process.
Prerequisites: Take SO 101 SO 101H CJ 101 or CJ 205.
Offered: Every year, Fall and Spring

CJ 394. Advanced Internship in the Community (SO 394/GT 394). 3 Credits.
This is a second internship available to criminal justice majors in their junior or senior year only. Students complete 135 hours of supervised fieldwork in a community agency along with one hour per week in the advanced internship class. Students build upon the knowledge gained from their first internship experience to deepen their understanding of concepts and theory through extended written and oral reflection. Students also assess their interpersonal strengths and weaknesses in preparation for graduate school and/or future employment. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator one semester prior to begin the placement process.
Prerequisites: Take CJ 392.
Offered: Every year, Spring

CJ 399. Independent Study in Criminal Justice. 1-6 Credits.
By arrangement with individual instructor. This course addresses the special intellectual interests of a student and focuses on an issue of special or timely importance.
Offered: As needed, All

CJ 499. Independent Study in Criminal Justice. 3 Credits.
This course addresses the special intellectual interests of a student or focus on an issue of special or timely importance.
Offered: As needed, All

Radiologic Sciences (RS)

RS 100. Fundamentals of Diagnostic Imaging. 1 Credit.
This course provides the student with a basic knowledge of the fundamentals of diagnostic imaging practice. Topics include defining diagnostic imaging as it relates to all imaging modalities, historical development of the profession, introduction to current and emerging practice arenas, and application of professional terminology. Students complete a self-study in medical terminology.
Offered: Every year, Fall

RS 101. Introduction to Diagnostic Imaging. 3 Credits.
Designed to provide an orientation to radiologic sciences, this course includes history, ethics and basic principles of radiation protections, medial and medicolegal terminology, as well as preclinical observation.
Prerequisites: Take RS 100.
Offered: Every year, Spring

RS 201. Human Anatomy Imaging I. 1 Credit.
This course presents in-depth consideration of human anatomy within systems located in the chest, abdomen and upper extremity of the body. Students discuss the structure and function of each anatomic component within each region. Conventional anatomic illustrations are correlated with their radiographic counterpart. The radiographic appearance of specific structures as demonstrated on conventional radiographic images is correlated to images obtained using other advanced imaging modalities such as computed tomography, magnetic resonance and sonography.
Prerequisites: Take BIO 212 BIO 212L RS 222.
Corequisites: Take RS 232.
Offered: Every year, Fall

RS 202. Human Anatomy Imaging II. 1 Credit.
This course presents in-depth consideration of human anatomy within systems located in the head, neck, pelvis and lower extremity. For each region, students discuss the structure and function of each anatomic component. Conventional anatomic illustrations are correlated with their radiographic counterpart. The radiographic appearance of specific structures as demonstrated on conventional radiographic images is correlated to images obtained using other advanced imaging modalities such as computed tomography, magnetic resonance and sonography.
Prerequisites: Take RS 201.
Offered: Every year, Spring

RS 212. Radiographic Procedures I. 2 Credits.
This course introduces the student to the basic concepts, principles and applications of radiographic and radiologic procedures. Additional applications related to orthopaedic terminology, pathologies and procedures, trauma and patient-related modifications also are presented.
Prerequisites: Take RS 101 MA 275 and BIO 102.
Corequisites: Take RS 212L.
Offered: Every year, Fall

RS 212L. Laboratory Practicum I. 2 Credits.
This practicum develops preclinical competency in radiographic procedures studied in RS 212, as well as routine hospital procedures and radiographic tasks, basic radiographic analysis, patient management, communications and manipulation of imaging equipment.
Corequisites: Take RS 212.
Offered: Every year, Fall

RS 215. Radiation Safety and Protection. 3 Credits.
Students are introduced to the effects of ionizing radiation on biological systems at the molecular, cellular, organism, and community levels, with emphasis on medical implications and radiation protection.
Prerequisites: Take RS 260.
Offered: Every year, Spring

RS 222. Radiographic Procedures II. 3 Credits.
This course builds on the foundations developed in RS 212. This course provides continued integration and expansion on the concepts, principles and applications of radiographic and radiologic procedures.
Prerequisites: Take RS 212.
Corequisites: Take RS 222L.
Offered: Every year, Spring
RS 222L. Laboratory Practicum II.  
2 Credits.
Designed to develop preclinical competency in radiographic procedures studied in RS 222, this practicum focuses on radiographic tasks, basic radiographic analysis, patient management, communications and manipulation of imaging equipment.
Prerequisites: Take RS 212.
Corequisites: Take RS 222.
Offered: Every year, Fall

RS 232. Radiographic Procedures III.  
3 Credits.
This course provides continued integration and expansion on the concepts, principles and applications developed in RS 212 and RS 222.
Prerequisites: Take RS 222.
Corequisites: Take RS 232L.
Offered: Every year, Fall

RS 232L. Laboratory Practicum III.  
2 Credits.
This practicum is designed to develop preclinical competency in routine hospital procedures and radiographic tasks, basic radiographic analysis, patient management, communications and manipulation of imaging equipment.
Prerequisites: Take RS 222.
Corequisites: Take RS 232.
Offered: Every year, Fall

3 Credits.
This course presents the basic principles, concepts and practical applications of radiographic image production and diagnostic quality. Topics include radiation production, description and proper selection of exposure factors, radiation protection, imaging media, imaging equipment and basic imaging formulas.
Prerequisites: Take RS 101 MA 275 and BIO 102.
Corequisites: Take RS 241L.
Offered: Every year, Fall

RS 241L. Radiographic Image Production and Evaluation Lab I.  
1 Credit.
The laboratory, which accompanies RS 241, is designed to demonstrate and reinforce the concepts and principles presented in class. (2 lab hrs.)
Corequisites: Take RS 241.
Offered: Every year, Fall

RS 242. Radiographic Image Production and Evaluation II.  
3 Credits.
This course expands on the foundations developed in RS 241. Integration and application of these foundations includes the development of exposure charts, methods of image processing, and the causation and identification of image artifacts. The course also incorporates quality control concepts and testing, and introduces basic terminology and principles of quality control and digital imaging systems.
Prerequisites: Take RS 241.
Corequisites: Take RS 242L.
Offered: Every year, Spring

RS 242L. Radiological Processing and Exposure Lab.  
1 Credit.
This laboratory, which accompanies RS 242, is designed to demonstrate and reinforce the concepts and principles presented in class. (2 lab hrs.)
Corequisites: Take RS 242.
Offered: Every year, Spring

RS 250. Radiologic Clinical Education I.  
2 Credits.
Students are provided with their initial clinical experience under the supervision of certified clinical instructors and clinical staff. Focus is on developing clinical competency and proficiency related to radiologic procedures and concepts taught in RS 212 and RS 241.
Prerequisites: Take RS 212 RS 241.
Corequisites: Take RS 222 RS 242.
Offered: Every year, Spring

RS 253. Radiologic Clinical Education II.  
4 Credits.
This course, a continuation of RS 250, is a 12-week, 35 hour-per-week summer clinical experience under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of radiographic procedures and concepts are continually developed and assessed.
Prerequisites: Take RS 250.
Offered: Every year, Summer

RS 254. Radiologic Clinical Education IV.  
3 Credits.
This course, a continuation of RS 253, is a clinical experience under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of radiographic procedures and concepts are continually developed and assessed.
Prerequisites: Take RS 253.
Corequisites: Take RS 232.
Offered: Every year, Fall

RS 255. Radiologic Clinical Education.  
3 Credits.
This clinical experience is under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of radiographic procedures and concepts are developed and assessed.
Prerequisites: Take RS 254.
Corequisites: Take RS 290.
Offered: Every year, Fall

3 Credits.
This course presents an analysis of the production of X-rays and the interaction of radiation with matter, units of radiation measurements and radiation protection.
Prerequisites: Take RS 242.
Offered: Every year, Fall

RS 290. Advanced Radiographic Procedures IV.  
3 Credits.
This course provides continued integration and expansion on the concepts, principles and applications developed in RS 232. Students are introduced to the basic principles of CT, DEXA, MRI and mammography.
Prerequisites: Take RS 232.
Corequisites: Take RS 290L.
Offered: Every year, Spring

RS 290L. Laboratory Practicum.  
1 Credit.
This practicum is designed to develop preclinical competency in routine hospital procedures and radiographic tasks, basic radiographic analysis, patient management, communications and manipulation of imaging equipment.
Prerequisites: Take RS 232.
Corequisites: Take RS 290.
Offered: Every year, Spring

RS 297. Methods of Patient Care.  
2 Credits.
This course focuses on a study of skills in providing humanistic care for the well, acute or chronically ill individual, including preparing patients for invasive as well as non-invasive imaging studies; basic clinical skills in infection control, including aseptic technique, venipuncture, vital signs and O2 administration; effective communication with emphasis on problem-solving skills.
Prerequisites: Take RS 101.
Corequisites: Take RS 297L.
Offered: Every year, Spring
RS 297L. Methods of Patient Care Lab. 1 Credit.
This lab develops preclinical competency for the procedures described and demonstrated in RS 297. (2 lab hrs.)
Corequisites: Take RS 297.
Offered: Every year, Spring

RS 299. Independent Study. 1-4 Credits.
This course presents the student with an opportunity to expand his or her professional expertise in areas that enhance managerial or research capabilities.
Offered: As needed

RS 318. Pathology for Imaging Sciences. 3 Credits.
This course provides an introduction to the basic study of disease, including etiology, pathophysiology and current diagnostic procedures. Normal structure and function are reviewed prior to the discussion of each anatomic system.
Prerequisites: Take RS 222 BIO 212.
Offered: Every year, Spring

RS 336. Pharmacology for the Radiographer. 2 Credits.
The major classifications/categories, clinical applications and implications of pharmaceuticals used in diagnostic imaging and interventional procedures are presented.
Prerequisites: Take RS 255.
Offered: As needed

RS 352. Radiologic Clinical Education. 2 Credits.
This clinical experience is under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of radiographic procedures and concepts are developed and assessed.
Prerequisites: Take RS 297.
Offered: Every year, Spring

RS 399. Independent Study. 1-3 Credits.
This independent study is designed to provide the student with an opportunity to expand his or her professional expertise in areas that enhance teaching, managerial or research capabilities. The study may consist of either advanced clinical experience or literature research or both.
Offered: As needed, All

RS 414. Research: Analysis and Critique (DMS 414). 3 Credits.
This course explores the basic elements of health care research including different types of research models and research strategies. Students explore the differences between a variety of publication types, including editorials, case studies and peer-reviewed research articles. Students also learn techniques for database queries.
Prerequisites: Take RS 101.
Offered: Every year, Summer

RS 489. Independent Study. 1-6 Credits.
Offered: As needed, All

RS 491. Open Topic. 1 Credit.
The course presents a current topic in diagnostic imaging.
Offered: As needed

RS 493. Open Topic. 3 Credits.
The course presents a current topic in diagnostic imaging.
Offered: As needed

RS 499. Capstone (DMS 499). 3 Credits.
This capstone course is intended for radiologic sciences majors and diagnostic medical sonography majors in their final semester. Students are required to develop a research project as it relates to the field of diagnostic imaging. The project may relate to the student’s chosen focus and must include either a formal thesis paper or poster presentation.
Prerequisites: Take RS 414.
Offered: Every year, Spring

Diagnostic Medical Sonography (DMS)

DMS 100. Foundations of Diagnostic Imaging. 1 Credit.
This course provides the student with a basic knowledge of the fundamentals of diagnostic imaging practice. Topics include defining diagnostic imaging as it relates to all imaging modalities, historical development of the profession, introduction to current and emerging practice arenas, and application of professional terminology. Students complete a self-study in medical terminology.
Offered: Every year, Fall

DMS 101. Introduction to Diagnostic Medical Sonography. 3 Credits.
This is an introductory course to the field of diagnostic medical sonography. This course is taken in conjunction with DMS 101L. Throughout the course, the career of sonography is defined. Students are introduced to terminology pertaining to ultrasound as well as the physics responsible for its production. Cross-sectional anatomy pertaining to the abdomen, thyroid gland, scrotum and prostate is presented. Normal sonographic anatomy of the abdomen and small parts also is presented.
Prerequisites: Take DMS 100.
Corequisites: Take DMS 101L.
Offered: Every year, Spring

DMS 101L. Sonography Laboratory Practicum I. 1 Credit.
This is an introductory lab course to the field of diagnostic medical sonography. This course is taken in conjunction with DMS 101. To produce high-quality diagnostic images, it is necessary for the students to have a thorough understanding of image orientation, acoustic properties, scanning techniques and image documentation. The students have the opportunity to utilize ultrasound equipment to learn to identify normal sonographic anatomy of the abdomen and small parts and begin to develop scanning techniques.
Prerequisites: Take DMS 100.
Corequisites: Take DMS 101.
Offered: Every year, Spring

DMS 200. Sonography Physics and Instrumentation I. 3 Credits.
This core course is designed to prepare the student toward eligibility for the Sonography Physics and Instrumentation portion of the American Registry of Diagnostic Medical Sonographers (ARDMS) registry exam. The course encompasses the theoretical concepts and practical applications related to ultrasound physics and instrumentation. Concepts include: sound, sound waves, pulse waves, intensities, interaction of sound and media, transducers, sound beams and display modes. These concepts are tied in with terms used in Introduction to Sonography course and how they apply to practical, daily scanning skills.
Prerequisites: Take DMS 101DMS 101L PHY 101 MA 275.
Offered: Every year, Fall
DMS 201. Sonography Physics and Instrumentation II. 3 Credits.
This core course is designed to prepare the student toward eligibility for the Sonography Physics and Instrumentation portion of the American Registry of Diagnostic Medical Sonographers (ARDMS) registry exam. The course encompasses the theoretical concepts and practical applications related to ultrasound physics and instrumentation. Concepts include: two dimensional imaging, real-time imaging, displays, harmonics, contrast agents, hemodynamics, Doppler, artifacts, quality assurance and bioeffects. These concepts are tied in with terms used in the Physics and Instrumentation I course and how they apply to practical, daily scanning skills.
Prerequisites: Take DMS 200.
Offered: Every year, Spring

DMS 205. Human Anatomy Lab I. 1 Credit.
This course presents in-depth consideration of human anatomy within systems located in the neck, abdomen and pelvis. Students discuss the structure and function of each anatomic component within each region. Conventional anatomic illustrations are correlated with their sonographic counterpart. The sonographic appearance of specific structures is correlated to images obtained using other advanced imaging modalities such as computed tomography and magnetic resonance imaging.
Prerequisites: Take BIO 212 BIO 212L.
Offered: Every year, Fall

DMS 206. Human Anatomy Lab II. 1 Credit.
This course presents in-depth consideration of human anatomy within systems located in the upper and lower extremity. For each region, students discuss the structure and function of each anatomic component. Conventional anatomic illustrations are correlated with their sonographic counterpart. The sonographic appearance of specific structures is correlated to images obtained using other advanced imaging modalities such as computed tomography and magnetic resonance imaging?
Prerequisites: Take DMS 205.
Offered: Every year, Spring

DMS 210. Abdominal and Small Parts Sonography. 3 Credits.
This course is designed to prepare the student toward eligibility for the abdomen (AB) portion of the ARDMS Registry. This course is taken in conjunction with DMS 210L. The course encompasses all aspects of abdominal and small parts scanning including: anatomy and vasculature, normal variants and congenital abnormalities, pathology, organ function and laboratory tests. The course continues to emphasize cumulative learning to include materials covered in prior ultrasound directed courses.
Prerequisites: Take DMS 101 DMS 101L BIO 102.
Corequisites: Take DMS 210L.
Offered: Every year, Fall

DMS 210L. Abdominal and Small Parts Sonography Lab Practicum. 1 Credit.
This lab course is designed to prepare the student toward eligibility for the abdomen (AB) portion of the ARDMS Registry. This course is taken in conjunction with DMS 210L. The course encompasses all aspects of abdominal and small parts scanning including: anatomy and vasculature, normal variants and congenital abnormalities, pathology, organ function and laboratory tests. The students utilize ultrasound equipment to learn to identify sonographic anatomy of the abdomen and small parts and develop scanning techniques. The students learn to review and critique sonographic images.
Prerequisites: Take DMS 101-DMS 101L BIO 102.
Corequisites: Take DMS 210L.
Offered: Every year, Fall

DMS 220. Vascular Sonography. 3 Credits.
This course is dedicated to the instruction of vascular sonography. It is designed to prepare students for the (VT) portion of the ARDMS registry exams. This course is taken in conjunction with DMS 220L. Anatomy pertaining to the vascular system is reviewed. Sonographic anatomy and pathologic conditions of the upper and lower extremity veins, the aorta, abdominal vasculature, the upper and lower extremity arteries, the carotid arteries and intracranial arteries are presented. Venous and arterial physiologic testing, interventional vascular procedures, surgery and other treatment options are introduced.
Prerequisites: Take DMS 101 DMS 101L BIO 102.
Corequisites: Take DMS 220L.
Offered: Every year, Spring

DMS 220L. Vascular Sonography Lab Practicum. 1 Credit.
This lab course is dedicated to the instruction of vascular sonography. It is designed to prepare students for the (VT) portion of the ARDMS registry exams. This course is taken in conjunction with DMS 220. Sonographic anatomy and pathologic conditions of extremity veins, the aorta, abdominal vasculature, extremity arteries, the carotid arteries and intracranial arteries are presented. The students utilize ultrasound equipment to learn to identify sonographic anatomy of the vascular system and develop scanning techniques. The students learn to review and critique sonographic images.
Prerequisites: Take DMS 101 DMS 101L BIO 102.
Corequisites: Take DMS 220.
Offered: Every year, Spring

DMS 250. Sonography Clinical Education I. 3 Credits.
This course is designed to develop the student's sonographic scanning skills and interpersonal communication skills through experiences in the clinical setting.
Prerequisites: Take DMS 101 BIO 102 MA 275.
Offered: Every year, Fall

DMS 260. Sonography Clinical Education II. 3 Credits.
This course, a continuation of DMS 250, is a clinical experience under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of the sonographic procedures are developed and assessed.
Prerequisites: Take DMS 250.
Offered: Every year, Spring

DMS 270. Sonography Clinical Education III. 5 Credits.
This course, a continuation of DMS 260, is a clinical experience under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of the sonographic procedures are developed and assessed.
Prerequisites: Take DMS 260.
Offered: Every year, Summer

DMS 297. Methods of Patient Care. 2 Credits.
This course focuses on a study of skills in providing humanistic care for the well, acute or chronically ill individual, including preparing patients for invasive as well as non-invasive imaging studies; basic clinical skills in infection control, including aseptic technique, venipuncture, vital signs and O2 administration; effective communication with emphasis on problem-solving skills. (2 lab hrs.)
Prerequisites: Take DMS 101 DMS 101L.
Corequisites: Take DMS 297L.
Offered: Every year, Spring
DMS 297L. Methods of Patient Care Lab.  
1 Credit. 
This lab develops preclinical competency for the procedures described and demonstrated in DMS 297. 
Prerequisites: Take DMS 101 DMS 101L. 
Corequisites: Take DMS 297. 
Offered: Every year, Spring

DMS 330. OB/GYN Sonography.  
3 Credits. 
This course is designed to prepare the student toward eligibility for the OB/GYN ARDMS Registry exam. This course is taken in conjunction with DMS 330L. The course encompasses all aspects of gynecology, and obstetrical scanning including: anatomy and vasculature, normal variants and congenital anomalies, pathology, organ function and laboratory tests. The course continues to emphasize cumulative learning to include materials covered in prior ultrasound directed courses. 
Prerequisites: Take DMS 101 DMS 101L BIO 102. 
Corequisites: Take DMS 330L. 
Offered: Every year, Fall

DMS 330L. OB/GYN Sonography Lab Practicum.  
1 Credit. 
This lab course is designed to prepare the student toward eligibility for the OB/GYN ARDMS Registry. This course is taken in conjunction with DMS 330. The course encompasses all aspects of gynecology, and obstetrical scanning including: anatomy and vasculature, normal variants and congenital anomalies, pathology, organ function and laboratory tests. The students utilize ultrasound equipment to learn to identify sonographic anatomy of the female pelvis and develop scanning techniques. The students learn to review and critique sonographic images. 
Prerequisites: Take DMS 101 DMS 101L BIO 102. 
Corequisites: Take DMS 330. 
Offered: Every year, Fall

3 Credits. 
This course is dedicated to the instruction of the growing field of breast sonography. It is designed to prepare the student toward eligibility for the breast portion of the ARDMS Registry. This course is taken in conjunction with DMS 340L. To produce high-quality diagnostic images, it is necessary for students to have a thorough understanding of the anatomy and physiology of the breast as well as the normal and abnormal sonographic appearance of breast tissue. 
Prerequisites: Take DMS 101 DMS 101L BIO 102. 
Corequisites: Take DMS 340L. 
Offered: Every year, Spring

DMS 340L. Breast Sonography Lab Practicum.  
1 Credit. 
This course is dedicated to the instruction of the growing field of breast sonography. This lab course, taken in conjunction with DMS 340, prepares the student toward eligibility for the breast portion of the ARDMS Registry. The students utilize ultrasound equipment to identify sonographic anatomy of the breast and develop scanning techniques. The students learn to review and compare sonographic and mammographic images. 
Prerequisites: Take DMS 101 DMS 101L BIO 102. 
Corequisites: Take DMS 340. 
Offered: Every year, Spring

DMS 350. Musculoskeletal Sonography.  
3 Credits. 
This course, taken in conjunction with DMS 350L, is designed to prepare the student toward eligibility for the MSK ARDMS Registry. The course encompasses all aspects of MSK scanning including: anatomy and vasculature, normal variants, physiology, pathology, interventional procedures. The course continues to emphasize cumulative learning to include materials covered in prior ultrasound directed courses. 
Prerequisites: Take DMS 101 DMS 101L BIO 102. 
Corequisites: Take DMS 350L. 
Offered: Every year, Spring

DMS 350L. MSK Sonography Lab Practicum.  
1 Credit. 
This lab course, taken in conjunction with DMS 350, is designed to prepare the student toward eligibility for the MSK ARDMS Registry. The course encompasses all aspects of MSK scanning including: anatomy and vasculature, normal variants, physiology, pathology and interventional procedures. The students utilize ultrasound equipment to identify MSK sonographic anatomy of the upper and lower extremities and develop scanning techniques. The students learn to review and critique sonographic images. 
Prerequisites: Take DMS 101 DMS 101L BIO 102. 
Corequisites: Take DMS 350. 
Offered: Every year, Spring

DMS 380. Sonography Clinical Education IV.  
3 Credits. 
This course, a continuation of DMS 270, is a clinical experience under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of the sonographic procedures are developed and assessed. 
Prerequisites: Take DMS 270. 
Offered: Every year, Fall

DMS 390. Sonography Clinical Education V.  
3 Credits. 
This course, a continuation of DMS 380 is a clinical experience under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of the sonographic procedures are developed and assessed. 
Prerequisites: Take DMS 380. 
Offered: Every year, Spring

3 Credits. 
This course explores the basic elements of health care research including different types of research models and research strategies. Students explore the difference between a variety of publication types, including editorial, case studies and peer-reviewed research articles. Students also learn techniques for database queries. 
Prerequisites: Take DMS 101. 
Offered: Every year, Fall

DMS 499. Capstone (RS 499).  
3 Credits. 
This capstone course is intended for radiologic sciences majors and diagnostic medical sonography majors in their final semester. Students are required to develop a research project as it relates to the field of diagnostic imaging. The project may relate to the student’s chosen focus and must include either a formal thesis paper or poster presentation. 
Prerequisites: Take DMS 414. 
Offered: Every year, Fall
Drama (DR)

DR 101. Understanding Theater. 3 Credits.
This course presents an introduction to the practices and purposes of theater through play-going, readings in theater history, dramatic theory and stage production work.
Offered: Every year, All
UC: Fine Arts

DR 140. Stagecraft. 3 Credits.
Stagecraft is a practical, semester-long workshop on the process of transforming a design concept into a workable end. This course provides an introduction to the theory, techniques, materials and equipment of theater technology with an emphasis on the ways in which practical considerations inform the process and product of theater making. Areas of study include set and costume construction, scene painting, lighting, projection and sound. The course incorporates extensive practical work both in and outside of class; and students are required to complete 28 hours of technical production work for the mainstage production season.
Offered: Every year, Fall and Spring
UC: Fine Arts

DR 150. Performance Fundamentals. 3 Credits.
This course provides an introduction to the basic vocal, physical and improvisational skills necessary for successful performance in a variety of areas. Skills to be emphasized include vocal support and projection, physical relaxation and focus, diction, articulation and improvisational techniques. Students interested in broadcast journalism, newscasting, public relations and advocacy, as well as more theatrical areas of public performance, learn to work effectively in front of an audience while maintaining focus and energy.
Offered: Every year, Fall and Spring
UC: Fine Arts

DR 160. Acting I. 3 Credits.
Students are introduced to the basic principles of acting, including scene analysis, motivation, intention and character work. Students perform exercises, monologues and scenes.
Offered: Every year, Fall and Spring
UC: Fine Arts

DR 181. Improvisational Acting. 3 Credits.
This course introduces students to long-form improvisational theater. In this form, actors build scenes from scratch with only a one-word suggestion from the audience. This course is an introductory course and is suitable for students with or without prior performance experience. The semester culminates with a class performance for an invited audience.
Offered: Every year, Fall and Spring
UC: Fine Arts

DR 191. Theater Practice I. 1-4 Credits.
All basic theater components through the active production of a full-length play are studied in this course. Students may participate as actors, designers, stage managers, assistant directors, dramaturges and in various production roles. (Minimum 40 hours production work.) Requires permission of instructor.
Offered: As needed

DR 199. Independent Study. 1-3 Credits.
A student may, in collaboration with an instructor, create course which focuses on specific area of dramatic study. Internships and work on university theater program productions are possible areas of focus.
Offered: As needed

DR 200. Special Topics. 3 Credits.
This course focuses on a specialized area of theater study. Past topics have included scenic and lighting design and special topics in theater history and dramatic literature. Course may be repeated for credit.
Offered: As needed
UC: Fine Arts

DR 210. Hands On: An Introduction to Puppetry. 3 Credits.
Students learn the art of puppetry by studying the theory and history of the form. They actively participate in the creation and manipulation of various forms of puppets.
Offered: As needed
UC: Fine Arts

DR 220. Voice and Movement. 3 Credits.
This course covers practical laboratory work in vocal production and movement, utilizing developmental techniques of Kristen Linklater, Alexander Feldenkrais, Jerzy Grotowski, Michael Chekhov, with special emphasis on individual coaching and problem solving. Studio work also may include techniques of characterization, including neutral and character mask exploration, work with classical texts, and acquisition of dialect skills.
Offered: Every year, Fall
UC: Fine Arts

DR 230. Directing I. 3 Credits.
This course serves as an introduction to the craft of the theatrical director. Topics include play analysis and interpretation, director’s concept, visual composition and the history and theories of directing. Also included: methods of actor coaching, rehearsal techniques and working with the creative team of designers, dramaturges and production staff. As a final project, each student directs a scene that is presented in a student workshop performance at the end of the semester.
Offered: Every year, All
UC: Fine Arts

DR 257. Design for the Theater. 3 Credits.
This course provides an introduction to theatrical design history, process and implementation. Students explore the concept of design and what it is in the theater. They read first- and second-hand accounts of historic designers and movements in theatrical design. They examine the design process and apply it to class projects. They also reflect and evaluate on their personal process. These topics are presented through readings, lectures and discussions, and applied through group and individual assignments. Although the main focus is scenic, lighting and costume design, all aspects of theater are explored. This course is suitable for students with or without prior theater experience.
Offered: Every year, All
UC: Fine Arts

DR 260. Acting for Film/TV. 3 Credits.
This is an intermediate studio course in which students gain experience in the specialized performance skills demanded by the film and television media. Students work on monologues and scenes that emphasize truth and emotional reality and receive training in the techniques of Stanislavski, Lee Strasberg and Sanford Meisner. When scheduling permits, students collaborate with a mass communications video production class in filming/taping acting scenes.
Offered: Every year, All
UC: Fine Arts
DR 270. World Theater History and Dramatic Literature I.  3 Credits.
In this course, students integrate a multicultural history of world theater with the study of performance traditions and dramatic literature. Participants study the ritual foundations of theater through the theater of the early Renaissance period, emphasizing the importance of historical and literary research in devising actual production concepts for period plays. Students apply their knowledge in active and creative projects. Does not have to be taken in sequence with DR 275.
Offered: Every other year, Spring
UC: Fine Arts

DR 270H. Honors World Theater History and Dramatic Literature I.  3 Credits.
This course covers the historical development of European theater, covering the Classical, Medieval and Early Modern periods. It also examines various types of non-Western performance traditions with a focus on India, Africa, Japan and China. Plays from each time period are read and placed within their historical, political and cultural contexts. The historical development of theater architecture, stage craft, acting theory, and the changing status of the theater artist also is explored. Students apply their knowledge in scholarly and creative projects. Does not have to be taken in sequence with DR 275.
Offered: Every other year, Spring

DR 275. World Theater History and Dramatic Literature II.  3 Credits.
This course traces the development of European theater from the Renaissance through the late 19th century and the beginning of modern drama. It also examines non-Western performance traditions in India, China, Japan and Africa. Students learn the importance of locating dramatic literature within its cultural, political and historical contexts. The historical development of theater architecture, stage craft, acting theory, and the changing status of the theater artist also is explored. Students apply their knowledge in scholarly and creative projects. Does not have to be taken in sequence with DR 270.
Offered: Every other year, Spring
UC: Fine Arts

DR 286. Comparative Drama/Play Analysis.  3 Credits.
Students learn methods of script analysis that can be used to successfully interpret plays for the theater. This skill is essential for all theater practitioners and can be useful to any student who wishes to sharpen his or her analytical and interpretive skills. Each class meeting centers on the discussion of a new play. Selected motifs and structures in drama are examined. Plays with common themes are compared to illuminate differing playwriting strategies.
Offered: Every Third Year, Spring
UC: Fine Arts

DR 290. Acting for Classical Stage.  3 Credits.
This intermediate studio course emphasizes the performance skills necessary to execute a classical role. Students work on monologues and scenes drawn from the plays of the Greek tragedians, Shakespeare, Moliere and the writers of the English Restoration. Students acquire the techniques necessary to speak verse and to physically embody a classical character.
Offered: Every Third Year, Fall
UC: Fine Arts

DR 291. Theater Practice II.  3 Credits.
All basic theater components through the active production of a full-length play are studied in this course. Students may participate as actors, designers, stage managers, assistant directors, dramaturges and in other production roles. (Minimum 80 hours of student involvement, rehearsal journal and research project). Requires permission of instructor.
Offered: Every year, All

DR 299. Independent Study.  1-6 Credits.
This intermediate level tutorial course stresses independent investigation of a topic in theater/drama selected in consultation with the instructor. One conference weekly; oral and written reports. Course may be repeated for credit.
Offered: As needed, All

DR 300. Special Topics.  3 Credits.
This advanced level seminar explores a specific area of theater practice, literature or history. Topics vary from semester to semester. May be repeated for credit.
Offered: As needed
UC: Fine Arts

DR 305. Theater for Young Audiences (ED 362).  3 Credits.
This seminar course allows students to explore various aspects of creating theater for young audiences. Performance skills in improvisation and creative dramatics, adaptation of fairy tales, folklore and other children's literature for plays, and the integration of drama into classroom curriculum are emphasized. Students conduct enrichment workshops at participating area schools and/or perform for young audiences in staged readings, workshops and/or fully mounted productions. Community outreach and service learning are emphasized. Requires permission of instructor. This course may be repeated for credit.
Offered: Every year, Spring
UC: Fine Arts

DR 307. Drafting and Rendering for Theater.  3 Credits.
This studio course explores hand drafting and color rendering for the theater. Students learn to generate hand drafting of ground plans and detail drawings and then interpret these plans into sketches and watercolor renderings. Students use pencils, acrylic paints, watercolor paints and an array of hand drafting tools to communicate their theatrical designs.
Offered: Every other year, Spring
UC: Fine Arts

DR 310. Laboratory in Theater and Community.  3 Credits.
Students investigate the potential for theater and performance to be catalysts for social change. The class explores how theater has been an effective site for cultural and political interventions. Moving from theory to practice in the staging of a socially-resonant piece of theater, students explore the ways in which theater may be used to articulate community conflict and to facilitate dialogue, and also examine the practical and ethical issues confronted by those who engage in theater for social change. This course is repeatable for credit.
Offered: As needed
UC: Fine Arts

DR 320. Voice and Movement II.  3 Credits.
This course includes advanced laboratory work in voice, movement and characterization for the actor with emphasis on improvisation, neutral and character mask exploration, work with classical texts including Shakespeare, familiarity with the international phonetic alphabet (IPA), acquisition of dialect skills, and introduction to Viewpoints compositional techniques.
Prerequisites: Take DR 220.
Offered: As needed
UC: Fine Arts
DR 325. Theater Seminar. 3 Credits.
Students explore artistic, dramaturgical and production issues associated with the realization of a regional theater's season. Students read scripts produced during a particular semester by an area professional theater and attend technical/dress rehearsals and performances. Guest artists from the theater visit campus. Students also attend symposiums and other outreach programming offered by the theater. The seminar provides a forum for discussing the multifaceted process of selecting a regional theater season, formulating production concepts, conducting dramaturgical research, assembling artistic teams and realizing dramatic texts on stage.
Prerequisites: Take DR 101.
Offered: As needed
UC: Fine Arts

DR 330. Directing II. 3 Credits.
This is an advanced course in the theory and practice of directing for the stage. Students study the art of directing by examining the writings and work of major theorists and directors of the 20th century. Topics include directing theories and aesthetics, style, varied rehearsal techniques and practices, and other problems in directing. The process of directing also is studied through the experience of directing a one-act or full-length play for public performance. Classroom discussion focuses on works in progress, with special emphasis on the problems of translating a text to the stage; working with actors, designers, playwrights; composition and creating stage business; rhythm.
Prerequisites: Take DR 230.
Offered: As needed
UC: Fine Arts

DR 335. Musical Theater Performance. 3 Credits.
In this studio course, students gain expertise in the special skills and techniques necessary to perform in the musical theater style. Each student performs solo, duet and trio musical theater selections with CD accompaniment. (Music is provided; however, students may choose a different solo piece, provided they have the accompaniment track or access to a pianist.) As a culminating exercise, students select pieces drawn from the semester's performance exercises, and these pieces are performed with appropriate costumes, props and choreography in a public cabaret setting.
Offered: Every other year, Spring
UC: Fine Arts

DR 340. Scenic Design. 3 Credits.
This class provides an introduction to the world of scenic design. Through discussion, reading, lecture and demonstration, participants explore the theory and practice of designing for the stage. Using this as a base, students research, sketch, paint and model designs for two plays. By investigating the design process in both an academic and hands-on manner, students gain knowledge in the area of scenic design as well as generally improving their problem-solving skills. Students are expected to purchase materials for sketching and model making.
Prerequisites: Take DR 140 or DR 257.
Offered: Every other year, Fall
UC: Fine Arts

DR 341. Lighting Design for the Theater. 3 Credits.
This course provides hands-on experience with the technical and design elements of stage lighting. Students use equipment and techniques directly relating to the theatrical productions scheduled in a given semester, using an artistic and collaborative approach and working with lighting systems in a theater.
Prerequisites: Take DR 140 or DR 257.
Offered: Every other year, Spring
UC: Fine Arts

DR 342. Costume Design. 3 Credits.
This course provides an introduction to the theory, techniques, materials and equipment of costuming. Participants focus on costume construction, fabric, fasteners, sewing machine use, dyeing techniques and costume design. Extensive practical work is completed on an individual student basis. Students participate in costume construction for two productions during the semester.
Offered: Every other year, Fall
UC: Fine Arts

DR 345. Dance for the Musical Theater. 3 Credits.
Students learn musical theater dance styles and choreography through studio performance. As a culminating exercise, students select dance pieces to perform with appropriate costumes, props and choreography in a cabaret setting open to the public.
Offered: As needed
UC: Fine Arts

DR 350. Playwriting I. 3 Credits.
This course centers on the 10-minute play. Students develop their own unique styles and strategies for writing plays while exploring the diverse techniques employed by the playwrights, who have already established a foundation for the craft. In addition to writing their own plays, students complete a series of writing exercises designed to develop specific skills. The semester culminates with a public reading of each student's best work.
Prerequisites: Take EN 102.
Offered: Every year, All
UC: Fine Arts

DR 360. Acting II. 3 Credits.
In this studio course, student actors use exercises in acting technique to deepen and refine their ability to create reality on stage. Students explore the skills necessary to create a sense of truth on stage, beginning with scene analysis and enhanced by weekly in-class scene showings. Discussions on reading written by industry leaders focus on how to apply performance techniques to students' individual scenes and daily lives.
Prerequisites: Take DR 160.
Offered: Every year, All
UC: Fine Arts

DR 370. Internship, Conservatory or Professional Experience. 3 Credits.
Senior theater majors are required to complete a minimum of 120 hours at an internship, conservatory or professional experience in theater or a related field. Students must obtain approval from the theater program director before beginning their work. Approval is not automatic. Students are expected to articulate how the proposed experiential learning aligns with their post-graduation goals.
Prerequisites: Senior status required.
Offered: Every year, Fall
DR 375. History and Dramatic Literature of the Contemporary Theater. 3 Credits.
This advanced seminar class encompasses a socio-historical study of dramatic literature and theory from the beginnings of the modern era to the present with an emphasis on relevance to contemporary performance techniques. The course examines such movements as realism, naturalism, futurism, symbolism, expressionism, surrealism, constructivism and absurdism, studying the texts, artists and critics of the modernist and post-modernist movements in an attempt to locate contemporary theater within its social, historical and political contexts.
Offered: As needed
UC: Fine Arts

DR 380. Theater Administration. 3 Credits.
Students explore the economic, legal and managerial aspects of professional theater. The course examines the roles of producers, managers, agents, house managers and box office managers as well as the responsibilities of marketing, programming, touring, public relations, strategic planning and fundraising. A final project requires students to develop a strategic and creative plan for their own performing arts center. This is the first in a three-course series designed to prepare students for dynamic careers in arts administration and the entertainment industry.
Offered: As needed
UC: Fine Arts

DR 386. Modern Drama. 3 Credits.
Students are introduced to principal movements in continental, British and American drama from Ibsen to the present. Emphasis is on the main currents of modern dramatic development through the critical analysis of representative plays.
Offered: As needed
UC: Fine Arts

DR 386H. Honors-Modern Drama. 3 Credits.
Students are introduced to principal movements in continental, British and American drama from Ibsen to the present. Emphasis is on the main currents of modern dramatic development through the critical analysis of representative plays.
Offered: As needed
UC: Fine Arts

DR 391. Theater Practice III. 3 Credits.
All basic theater components through the active production of a full-length play are studied in this course. Students play substantial roles in the production, either acting in a major role or taking on a major production responsibility (e.g., stage manager, assistant director, student designer). (Minimum 120 hours of student involvement, rehearsal journal and substantive dramaturgical/research project). Requires permission of instructor.
Offered: Every year, All

DR 399. Independent Study. 1-6 Credits.
This advanced tutorial course stresses in-depth, independent investigation of a topic in theater selected in consultation with the instructor. A significant amount of research and writing is required.
Offered: As needed, All

DR 410. Senior Seminar. 3 Credits.
This weekly seminar is required for all senior theater majors. Students engage in a culminating project. During their junior year, students work with an adviser to prepare and submit a detailed proposal outlining their project. Approval is not automatic. Projects are reviewed by a faculty committee and students may be asked to submit revisions or alternative proposals.
Offered: Every year, Spring

Economics (EC)

EC 111. Principles of Microeconomics. 3 Credits.
This course examines scarcity and choice, demand and supply, government price setting and taxes, elasticity, production and cost, and the theory of the firm. A writing component is required.
Offered: Every year, All
UC: Social Sciences

EC 111H. Honors Principles of Microeconomics. 3 Credits.
This examination and application of basic economic theory considers scarcity and choice, demand and supply, elasticity, consumer theory, firm theory and market structure. A writing component is required. Calculus is used in this course.
Offered: As needed
UC: Social Sciences

EC 112. Principles of Macroeconomics. 3 Credits.
This course examines the determinants of national income, unemployment and inflation. In addition, students learn how fiscal policy and monetary policy influence the economy. A writing component is required.
Prerequisites: Take EC 111.
Offered: Every year, All
UC: Social Sciences

EC 112H. Honors Principles of Macroeconomics. 3 Credits.
This examination and application of basic macroeconomic theory covers scarcity and choice, unemployment and inflation, national income accounts, Keynesian and alternative models of income determination, fiscal policy and monetary theory and policy. A writing component is required. Calculus is used in this course.
Prerequisites: Take EC 111.
Offered: As needed
UC: Social Sciences

EC 200. Special Topics in Economics. 3 Credits.
This course introduces students to basic economic concepts and their applications in the modern world, including the government’s role in health care, the distribution of income and wealth, public spending and taxation, and the banking system. Written compositions are required.
Offered: As needed

EC 205. Current Economic Issues. 3 Credits.
This course includes discussion and analysis of current economic issues as determined by the news, students’ interest and instructor discretion.
Prerequisites: Take EC 111 EC 112.
Offered: Every other year, Spring

EC 206. Urban Economics. 3 Credits.
This course provides an economic analysis of urban problems and potential policy solutions to those problems. Topics include land use patterns and zoning, poverty, housing, crime, education, transportation and environmental issues. As part of the course, students build their own city and address all of these issues through the Sim City simulation.
Prerequisites: Take EC 111.
Offered: Every other year

EC 211. Intermediate Microeconomics. 3 Credits.
This advanced analysis of microeconomic theory includes study of consumer theory with use of indifference curves and budget constraints, firm theory with use of isoquants and isocosts, market structures and market failures. Calculus is used in this course.
Prerequisites: Take EC 111.
Offered: Every year
EC 212. Intermediate Macroeconomics. 3 Credits.
This course helps students to understand two phenomena: long-run growth and business cycles. The section of the course devoted to long-run growth emphasizes the importance of technological change for increasing the standard of living. The section devoted to business cycles emphasizes the causes of these cycles and the roles of fiscal and monetary policy in preventing business cycles. Computer assignments using spreadsheet or statistical software are an essential part of this course. Calculus is used in this course.
Prerequisites: Take EC 112.
Offered: Every year

EC 272. Advanced Applied Statistics. 3 Credits.
This course teaches statistical methods and concepts used in business decision making and social science research. Topics include sampling distributions, estimation, hypothesis testing, correlation, linear regression and forecasting.
Prerequisites: Take MA 170 MA 176 MA 206 or MA 275.
Offered: Every year; All

EC 304. Environmental Economics. 3 Credits.
This course examines environmental issues and their economic impact. Topics include economic efficiency both in market and nonmarket activities; dynamic efficiency for nonrenewable and renewable resources; how environmental problems are modeled from an economic perspective; and principles of environmental policy design at the state and federal level.
Prerequisites: Take EC 111.
Offered: Every other year

EC 312. Economic Growth. 3 Credits.
This course discusses the determinants of long-run economic growth. In particular, it discusses how government policy promotes and inhibits economic growth. The course is a combination of analytical models, empirical facts and policy discussion.
Prerequisites: Take EC 112.
Offered: Every other year

EC 320. Law and Economics. 3 Credits.
This course covers the application of microeconomic theory to the law. Topics covered include the efficiency and welfare aspects of property rights, contract law, torts and criminal law, and the impact of changes in the law on economic agents.
Prerequisites: Take EC 111.
Offered: Every other year

EC 325. Sports Economics (SPS 325). 3 Credits.
The primary focus of this course is professional sports. Topics include microeconomic foundations of sports economics, industrial organization of the sport industry, antitrust and regulation, financing sports stadiums, labor issues and the economics of college sports.
Prerequisites: Take EC 111.
Offered: Every other year

EC 330. Public Finance. 3 Credits.
This course examines the role of government in the economy. Tools of economic analysis are applied to government taxation and expenditure policies. The efficiency and welfare implications of government intervention in the economy are analyzed.
Prerequisites: Take EC 111.
Offered: Every other year

EC 341. Money and Banking. 3 Credits.
This examination of the institutions and theory of monetary systems considers the domestic and international macroeconomic impacts of changes in monetary policy.
Prerequisites: Take EC 112.
Offered: Every other year

EC 350. International Economics. 3 Credits.
This course examines international trade theories, trade policies, exchange rate determination models and macroeconomic policies in open economies.
Prerequisites: Take EC 112.
Offered: Every other year

EC 352. Industrial Organization. 3 Credits.
Market structures are examined with an emphasis on the imperfectly competitive markets. Market failures and regulation and antitrust also are considered.
Prerequisites: Take EC 111.
Offered: Every other year

EC 355. Game Theory. 3 Credits.
Applied game theory analysis of real-world strategic environments in economics and business. Topics include: Normal form games, Nash equilibrium, mixed strategies, repeated games, sequential games with perfect and imperfect information, sub-game perfect equilibrium, and principal-agent problems.
Prerequisites: Take EC 111.
Offered: Every other year

EC 361. Labor Economics. 3 Credits.
This course examines the application of microeconomic theory to labor markets and also considers, unions, labor market, immigration, discrimination and other topics.
Prerequisites: Take EC 111.
Offered: Every other year

EC 363. American Economic History. 3 Credits.
This study of the major economic factors that have influenced the growth of American society considers the interaction of economic and non-economic considerations. Factors include European background, colonial period, agricultural economy and developing frontier, rise of factory system. Industrial society is evaluated. Methods of production, organization of the labor force, immigration and urbanization, the development of science-based technology, and present problems and prospects also are explored.
Prerequisites: Take EC 112.
Offered: As needed

EC 364. Managerial Economics. 3 Credits.
This course considers the application of microeconomic theory to firm management, firm theory, market structures. It includes basic applied regression analysis.
Prerequisites: Take EC 111.
Offered: As needed

EC 365. Econometrics. 3 Credits.
This course provides an introduction to the statistical methods and tools used in applied economic research. Topics include model specification estimation, and inference in the simple and multivariate regression model. The use of statistical software is required.
Prerequisites: Take EC 112; and EC 271 EC 272 MA 206 MA 275 MA 285 or PS 206.
Offered: Every year, Fall and Spring
EC 366. Advanced Econometrics. 3 Credits.
This course surveys econometric methods and tools that are particularly useful for applied microeconomic research. The course is structured around a series of projects that require students to build and estimate econometric models. Lectures complement the projects by providing the link between econometric theory and actual empirical practice.
Prerequisites: Take EC 365.
Offered: As needed

EC 375. Development Economics. 3 Credits.
This course analyses the economic issues facing developing countries around the world. Topics include international aid, inequality, the determinants of economic growth, corruption, education and human capital, micro-financing, and the role of multinational firms in these impoverished regions.
Prerequisites: Take EC 112.
Offered: Every other year, Fall

EC 396. Economics Internship. 3 Credits.
Internships in economics must be approved by the department chair and the dean in accordance with college regulations.
Offered: As needed

EC 399. Independent Study. 1-6 Credits.

EC 450. Senior Seminar. 3 Credits.
This capstone seminar is designed for senior economics majors. Students draw on the tools developed in the economics program to produce a research paper or project on an original topic. Students may be required to present their results and conclusions to the class and other faculty members. Topics are chosen by the student in consultation with the instructor.
Prerequisites: Take EC 211 or EC 212 and Senior Standing.
Offered: Every year, Fall

EC 498. Special Topics in Economics. 1-6 Credits.
Independent study of special topics. Permission of sponsoring faculty, department chair and dean required.
Offered: As needed

Education (ED)

ED 140. Introduction to Public Education and the Teaching Profession. 1 Credit.
This course is open to all freshmen and sophomores who are interested in public education in the United States. The course is required for students who plan to enroll in the five-year dual-degree MAT program, as it provides basic knowledge of public education and the teaching profession including current functions, trends and future expectations. The course also addresses issues related to the teaching profession including licensure, interstate certification, dual and cross-endorsements and teacher and pupil demographics across the U.S. Finally, the course provides opportunities for applicants to practice and refine writing skills essential for success in the dual-degree MAT program. Course is graded pass/fail.
Offered: Every year, Fall and Spring

ED 220. Introduction to Education Studies. 3 Credits.
This course is required for students pursuing an Interdisciplinary Studies major in the College of Arts and Sciences with a concentration in Education Studies. The course explores a multidisciplinary understanding of global and American Education. Students consider the role of education in creating a more equitable society by analyzing the policies and philosophies that have shaped and are shaping schooling in the U.S. and throughout the world. Historical changes in education, critical analyses of policy debates in current education, the effects of legal policies in the classroom, the influences of cultural shifts and contemporary issues are all considered. Students also are introduced to basic concepts and terminology in the educational discipline, and develop a critical lens for evaluating educational resources, texts and data. Only IDS majors may register for this course. Students are not allowed to receive credit for more than one of the following courses: ED 220 and ED 260.
Prerequisites: Take ED 140.
Offered: Every year, Spring

ED 250. Diversity, Dispositions and Multiculturalism. 3 Credits.
This course examines the social, economic and political organization of public education in the United States, with a particular emphasis on the implications for historically marginalized populations. This course is required for all dual-degree MAT students. The course explores diversity and multiculturalism on the individual as well as institutional level, with a focus on concepts such as privilege, discrimination, racism and social transformation.
Prerequisites: Take EN 101 or EN 103H.
Offered: Every year, Fall and Spring
UC: Social Sciences, Intercultural Understand

ED 251. Global Engagement in Education. 3 Credits.
This course provides a faculty-led opportunity for students to spend their spring break studying education in Guatemala. The course meets throughout the spring semester in preparation for the trip and post-spring break to reflect and learn from the experience. Topics include the history and culture of the country to be visited, intercultural complexity and cultural humility, frameworks of global engagement, peer-to-peer learning with local educators and the exploration of global educational models. All students must apply for this course in the fall semester through the Office of Global Engagement prior to registration. Enrollment is limited.
Prerequisites: Take ED 140.
Offered: Every year, Spring

ED 260. Social and Philosophical Foundations of Education. 3 Credits.
This course introduces students to the social and philosophical principles that underlie the education system in the United States. This course is required for all Dual-Degree MAT students. Education is defined in the broad sense to refer to not only what happens in schools and universities, but also in the family, when people interact with media, with their social groups and so forth. The course examines a wide range of philosophical questions related to education and schooling in the U.S., including: What is the purpose of schooling? What does it mean to be educated? And what role should educational institutions play in our lives? Students are not allowed to receive credit for more than one of the following courses: ED 220 and ED 260.
Prerequisites: Take EN 101 or EN 103H.
Offered: Every year, Fall and Spring
UC: Humanities
ED 341. Learning and Teaching the Developing Child. 3 Credits.
This course provides an introduction to the basic concepts of cognitive, social and emotional development of school-age children (ages 4-18) and how the pedagogy of learning and teaching is designed to enhance and support this development. Major topics of inquiry include brain-based learning research, motivation, engagement of learners, lesson planning and curriculum development. Enrollment in the dual-degree MAT program is required.
Prerequisites: Take ED 140 ED 250 and ED 260 or ED 220.
Offered: Every year, Fall

ED 341L. Learning and Teaching: Pedagogy Field Lab I. 1 Credit.
The Pedagogy Field Lab is taken in conjunction with ED 341. Teacher candidates complete a minimum of 20 hours of classroom observation and fieldwork that coincides with topics studied in ED 341. Weekly field hours, case study analyses, observation analyses and reflective journals provide opportunities to enhance the translation of theory to practice.
Prerequisites: Take ED 341.
Offered: Every year, Fall

ED 342. Advanced Learning and Teaching. 3 Credits.
This course focuses on advanced concepts and skills related to teaching and learning. Topics include elementary-level learners, assessment strategies and assessment-driven instructional practices, error analyses and data-driven decision making, work sampling, testing and measurement, differentiation of instructional practices, standards-based practices and research-based instruction.
Prerequisites: Take ED 341 ED 341L.
Offered: Every year, Spring

ED 342L. Advanced Learning and Teaching: Assessment Field Lab II. 1 Credit.
The Assessment Field Lab is taken in conjunction with ED 342. It provides practical applications of advanced concepts. Teacher candidates complete a minimum of 20 hours of classroom fieldwork that coincides with topics studied in ED 342. Weekly field hours, data team discussions, analyses of research-based practices, observation and case studies highlighting differentiated instructional practices, as well as reviews of standards-based curriculum are considered.
Prerequisites: Take ED 341 ED 341L.
Offered: Every year, Spring

ED 343. Advanced Learning and Teaching in Secondary Classrooms. 3 Credits.
This course focuses on advanced concepts and skills related to teaching and learning. Topics include adolescent learners, assessment strategies and assessment-driven instructional practices, error analyses and data-driven decision making, work sampling, testing and measurement, differentiation of instructional practices, standards-based practices and research-based instruction.
Prerequisites: Take ED 341 ED 341L.
Corequisites: Take ED 343L.
Offered: Every year, Spring

ED 343L. Advanced Learning and Teaching: Secondary Assessment Field Lab II. 1 Credit.
The assessment field lab is taken in conjunction with ED 343. It provides practical applications of advanced concepts for secondary educators. Teacher candidates complete a minimum of 20 hours of classroom fieldwork that coincides with topics studied in ED 343. Weekly field hours, data team discussions, analyses of research-based practices, observation and case studies highlighting differentiated instructional practices, as well as reviews of standards-based curriculum are considered.
Prerequisites: Take ED 341.
Corequisites: Take ED 343.
Offered: Every year, Spring

ED 380. Research Methods in Education Studies. 3 Credits.
This course is required for students pursuing an Interdisciplinary Studies major in the College of Arts and Sciences with a concentration in Education Studies. The course is an upper-level UG education research course, intended to equip students with an understanding of the primary genres of educational research including action research, theoretical/conceptual research, case studies and ethnography. While quantitative inquiry also is addressed in the course, the focus is on qualitative research methods, given their important role and purpose in education. This course serves as an important preparatory course for ED 550, a graduate-level research course required of candidates who choose to pursue an MAT in Elementary or Secondary Education at Quinnipiac.
Prerequisites: Take IDS 200 and; ED 220 or ED 260.
Offered: Every year, Fall

ED 409. Reading and Writing Across the Curriculum. 3 Credits.
This course develops the secondary teacher’s understanding of reading and writing as essential skills across the disciplines. Students explore literacy strategies that enhance the comprehension and interpretation of the various disciplines. The focus is on how to integrate literacy skills into content-based curricular instruction.
Prerequisites: Take ED 343.
Corequisites: Take ED 409L.
Offered: Every year, Spring

ED 409L. English Language Arts Field Lab III. 1 Credit.
This language arts lab is taken in conjunction with ED 409. It provides opportunities to observe and apply literacy skills to various disciplinary areas. Teacher candidates are required to complete a minimum of 20 hours of fieldwork that coincides with topics discussed in ED 409, such as comprehension development, academic vocabulary instruction, nonfiction reading and writing development and research skills.
Prerequisites: Take ED 343.
Corequisites: Take ED 409.
Offered: Every year, Spring

ED 436. Teaching Literacy in the Primary Grades. 3 Credits.
This course provides knowledge of diagnosis, assessment and instructional strategies for the development of early literacy in Grades K-3 and knowledge of the Common Core State Standards for early language arts instruction. Emphasis is on the development of teaching strategies necessary for the success of early readers and writers.
Prerequisites: Take ED 342.
Offered: Every year, Spring
ED 452L. Inclusive Classroom Secondary Field Lab IV. 1 Credit.
This inclusive classroom field lab is taken in conjunction with SPED 552. It provides opportunities to observe and apply the pedagogy of an inclusive classroom through the secondary candidates’ fieldwork. Candidates are required to complete a minimum of 20 hours of fieldwork that coincides with the topics and understandings presented in SPED 552. For dual-degree secondary candidates only.
Corequisites: Take SPED 552.
Offered: Every year, Spring

ED 458. Teaching Science in the Primary Grades. 3 Credits.
This course focuses on the methods and materials of teaching elementary-level science. The course covers scientific concepts, scientific inquiry, active investigation methods and a deep understanding of the influence of the Next Generation Science Standards on contemporary science education.
Prerequisites: Take ED 342.
Corequisites: Take ED 468L.
Offered: Every year, Fall

ED 462. Facilitating the Arts in the Elementary Classroom. 3 Credits.
This course focuses on incorporating the arts into the elementary classroom, and the integration of the arts into other content areas. Teacher candidates explore a variety of media, materials and activities to promote an understanding of the relationship of the arts to teaching and learning.
Prerequisites: Take ED 341.
Offered: Every year, Spring

ED 466. Teaching Social Studies in the Primary Grades. 2 Credits.
This course provides elementary teacher candidates with the information, strategies and knowledge of the pedagogy of teaching social studies. The course focuses on the integration of the social studies curriculum with other disciplines to create a multidisciplinary understanding of history, economics, civics and society.
Prerequisites: Take ED 342.
Corequisites: Take ED 466L.
Offered: Every year, Spring

ED 466L. English Language Arts Integration Field Lab IV. 1 Credit.
This language arts field lab is taken in conjunction with ED 466 and ED 436. It provides opportunities to observe and apply literacy skills while teaching social studies content. Participants are required to complete a minimum of 20 hours of fieldwork that coincides with topics discussed in ED 466 and ED 436, such as comprehension development, academic vocabulary instruction, nonfiction reading and writing development and research skills.
Prerequisites: Take ED 342.
Offered: Every year, Spring

ED 468. Teaching Mathematics in the Primary Grades. 3 Credits.
This course introduces teacher candidates to the instructional methods and curricular materials used to enhance the instruction of mathematics in the primary grades and knowledge of the Common Core State Standards for primary-level mathematics instruction. Pre-service teachers learn to develop lesson plans and assessment methods that positively affect the learning of mathematics in grades K-3. Candidates are required to apply this knowledge within their field placement to better understand the relationship of theory and practice in the instruction of mathematics in the lower elementary grades.
Prerequisites: Take ED 342.
Corequisites: Take ED 468L.
Offered: Every year, Spring

ED 468L. Primary Math and Science STEM Field Lab III. 1 Credit.
This STEM field lab is taken in conjunction with ED 468 and ED 458. It provides opportunities to observe and apply the integrated teaching of STEM (science, technology, engineering and math) into the elementary-level curriculum. Teacher candidates are required to complete a minimum of 20 hours of fieldwork that coincides with topics discussed in ED 468/ED 458.
Prerequisites: Take ED 342.
Corequisites: Take ED 468 ED 458.
Offered: Every year, Fall

ED 477. Teaching English Language Learners in the Mainstream Classroom. 3 Credits.
This course is designed to introduce the pre-service teacher candidate to knowledge and skills needed to provide effective instruction to English language learners in the mainstream 1-12 classroom. Topics of study include instructional methods across content areas, the influence of language and culture on learning, teaching and assessment, history and legislation related to English as a Second Language and bilingual education in the U.S., and second language acquisition.
Prerequisites: Take ED 343.
Offered: Every year, Fall

ED 499. Independent Study. 1-6 Credits.
Offered: As needed

Engineering (ENR)

ENR 110. The World of an Engineer. 3 Credits.
This course introduces students to the study and practice of engineering, including overviews of specific disciplines. Participatory focus involves group design projects, hands-on learning, computer work, team building, and engineering ethics discussions. In an inquiry-based learning framework, students are introduced to the Grand Challenges for Engineering, as defined by the National Academy of Engineering, to consider global issues from a multidisciplinary perspective.
Offered: Every year, Fall
UC: Breadth Elective

ENR 210. Engineering Economics and Project Management. 3 Credits.
This course provides an introduction to the concepts of economics/finance/costing and explains how these affect the engineering functioning and contribute to decision making in engineering operations. A portion of the course covers the concepts of project management, team building and leading teams that are used throughout the program and in professional practice.
Prerequisites: Take MA 141 or MA 151.
Offered: Every year, Spring

ENR 395. Professional Development Seminar. 1 Credit.
Through discussions, case studies and guest speakers, students are introduced to topics on engineering professionalism, ethics and licensure as well as relevant innovations in engineering to prepare them to enter the workplace as engineering professionals.
Prerequisites: Junior status in the major or permission of adviser.
Offered: Every year, Fall
ENR 410. School of Engineering Integrative Capstone. 3 Credits.
This course provides students with a culminating and integrative learning experience grounded in their University Curriculum, their major classes, and co-curricular activities. Students explore and evaluate potential solutions to an aspect of one of the 14 Grand Challenges for Engineering, with a focus on the global dimension of the solution. The course may include a service learning or study abroad component. Senior status in the major required.
Prerequisites: Take FYS 101 or FYS 150; EN 102; CSC 110; MA 107 or higher; and CHE 110 or BIO 101 or BIO 105 or BIO 150 or PHY 101 or PHY 121. - Must be completed prior to taking this course.
Offered: Every year, Spring

ENR 490. Engineering Professional Experience. 1 Credit.
Students gain experience by employing engineering skills in a professional setting under the guidance of practicing engineers. Students must obtain departmental approval and register prior to starting the experience.
Prerequisites: Take ENR 395 or permission of the advisor.
Offered: As needed

English (EN)

EN 101. Introduction to Academic Reading and Writing. 3 Credits.
This course introduces students to the ways that writing is grounded in reading and that inquiry is essential to learning. Through attentive reading of academic texts, students are given authority as learners to undertake serious intellectual projects that emphasize critical and creative thinking. Instructors guide students through sequenced reading and writing assignments, and highlight the revision process of multiple-draft writing that leads to increasingly complex thinking and rhetorical presentation. As a community of learners, students begin to recognize academic writing as a site where knowledge is produced, understood and communicated. Portfolio assessment; grade of C- or better required to pass EN 101. Full-time students are expected to have completed EN 101 and EN 102 by the end of three semesters. Refer to the undergraduate Academic Good Standing Policy for details.
Offered: Every year, All

EN 101I. Introduction to Academic Reading and Writing Intensive. 3 Credits.
EN 101I is essentially the same course as EN 101; however it meets five hours per week. This class is intended for students who feel that they may need more support in complex reading and/or essay writing. The additional class time allows for more contact with the professor and more feedback and discussion with peers. Portfolio assessment; grade of C- or better required to pass. Full-time students are expected to have completed EN 101 and EN 102 by the end of three semesters. Refer to undergraduate Academic Good Standing Policy for details.
Offered: Every year, All

EN 102. Academic Writing and Research. 3 Credits.
Building on the practices of EN 101, this course introduces students to the kind of critical and creative thinking necessary to understand the relationship between academic research and argumentation. Working with a broad range of academic texts, students undertake projects that focus on a field of inquiry and that lead to increasingly proficient rhetorical presentation. Students develop a practical understanding of the ways in which critical thinking, writing and research all depend upon a shared process of inquiry that can be applied across disciplines and within their chosen majors. Portfolio assessment. Full-time students are expected to have completed EN 101 and EN 102 by the end of three semesters. Refer to the undergraduate Academic Good Standing Policy for details.
Prerequisites: Take EN 101 or EN 101I.
Offered: Every year, Spring

EN 102H. Honors Academic Writing and Research. 3 Credits.
This EN 102 class is reserved for Honors Program students and exceptional students from Fall EN 101 classes. Portfolio assessment.
Prerequisites: Take EN 101.
Offered: Every year, Spring

EN 103H. Advanced Academic Writing and Research. 3 Credits.
This course satisfies all first-year writing requirements. Through readings of a broad range of academic texts, students learn to write for academic success. EN 103H integrates the practices of academic reading and writing so that students learn to think critically and creatively as they conduct inquiry in diverse and increasingly rigorous scholarly contexts. With instructor guidance, students undertake self-directed projects and develop rich collaborations among peers, including shared commentary, research and revision, enabling students to identify and transfer best practices to their future performance as readers, writers and thinkers across disciplines, and within their chosen majors. Portfolio assessment. Placement score of 6 required.
Offered: Every year, Fall

EN 150. Writing Lab I: Advanced Argument. 1 Credit.
What makes a good argument? This five-week course exercises and develops students’ abilities to create an effective argument for any discipline in any field, and beyond the classroom in the public sphere. Students go through the process of revising one paper, including initial drafting, intensive revision based on the use of rhetorical devices, and editing with attention to informational flow, topic strings, and other conventions of writing.
Prerequisites: Take EN 102 or EN 103H.
Offered: Every year, All

EN 151. Writing Lab II: Grammar. 1 Credit.
Much maligned and seldom defined, "grammar" is often the bugbear of writers. This need not be the case. The good news is that all you need to know to improve your writing is an understanding of the fashions and conventions of standard academic written English, and fashions and conventions can, with a little effort, be imparted and learned. By the end of our five weeks, you ought to feel more comfortable making good decisions, both mechanic and rhetorical, about the "grammar" of your prose.
Prerequisites: Take EN 102 or EN 103H.
Offered: Every year, All

EN 200. Special Topics in Literature. 3 Credits.
Students are introduced to readings in literature dealing with a single theme or specific problem, e.g., mystery/detective fiction, masterpieces of Jewish literature, comedy, etc. The course may be repeated for credit when topic changes. Specific titles are announced from time to time.
Offered: As needed
EN 201. Creative Writing. 3 Credits.
This course blends seminar and workshop approaches to the reading and writing of imaginative literature. Students compose and revise original works in multiple genres, maintain a writer's journal, and assemble a comprehensive final portfolio.
Offered: Every year, All

EN 202. Introduction to Creative Nonfiction. 3 Credits.
Students read a variety of short works with an eye toward understanding the stylistic techniques employed by contemporary writers of creative nonfiction. Students are then asked to employ a number of stylistic techniques in their own short works of creative nonfiction. The class emphasizes reading like a writer, writing as a process, the writing workshop, and careful revision and editing.
Offered: Every year, All

EN 203. Practicing Stylistics. 3 Credits.
Students review and practice the fundamental rules governing language, focusing specifically on grammar and syntax. They analyze and practice their own emerging style through imitation and revision exercises across a variety of poetic, fictional and nonfictional models. Required reading includes "The Art of Styling Sentences," "Exercises in Style" and "Stylish Academic Writing." The class culminates with a deeply revised portfolio of original efforts and a final referenced essay on what style means—and how to achieve it.
Offered: Every year, All

EN 204. Critical Theory and Practice. 3 Credits.
This course introduces students to how literature is studied in the discipline of English. Elementary concepts of literary and critical theory are discussed with reference to both literature and scholarly criticism. Attention is paid to writing and researching in the discipline in an effort to prepare students for upper-division courses and the Senior Seminar. Course should be taken in sophomore or junior year.
Prerequisites: Take EN 101 EN 102 EN 102H or EN 103H.
Offered: As needed

EN 205. Introduction to Fiction Writing. 3 Credits.
This course introduces students to the process of fiction writing. Writing prompts derive mainly from our reading and discussion of published short stories. Participants also read and discuss a handful of pieces "on writing" by established writers to help guide the process. The course is designed to help students hone their craft by writing habitually, composing numerous beginnings, and then working through a selective process to find and complete those pieces with the greatest potential to succeed. Throughout the semester, students draft, revise, edit and polish a total of four short stories. This a foundational course in fiction writing, which means that we focus mainly on the basics of character development and prose style.
Offered: Every year, Fall

EN 206. Introduction to Writing Poetry. 3 Credits.
This course gives students a strong foundation in the formal traditions of poetry in English from blank verse to free verse. Students work closely with Robert Pinsky's "The Sounds of Poetry" to get a grasp of the basic, formal principles of the art, the better to hear poems and understand the ways in which they work. Students explore a variety of poetic forms, reading and discussing poems that exemplify these forms and practicing their own poems based on these models. For the final project of the semester, students assemble a portfolio of all their work, introduced by a reflective essay.
Offered: Every year, Fall

EN 207. Academic Writing. 3 Credits.
This comprehensive survey of American writing pays special attention to the development and prose style.
Offered: Every year, All

EN 208. Greek Tragedy. 3 Credits.
This comprehensive survey of Greek tragedy pays special attention to tragic theory and to the evolution of classical drama from its birth in the cult of Dionysus to its culmination in fifth-century B.C. Athens. The extant plays of Aeschylus and Sophocles and selected plays by Euripides are examined with special emphasis on form.
Offered: As needed
UC: Humanities

EN 208H. Honors Greek Tragedy. 3 Credits.
This comprehensive survey of Greek tragedy pays special attention to tragic theory and to the evolution of classical drama from its birth in the cult of Dionysus to its culmination in fifth-century B.C. Athens. The extant plays of Aeschylus and Sophocles and selected plays by Euripides are examined with special emphasis on form.
Offered: As needed
UC: Humanities

EN 210. The Art of Poetry. 3 Credits.
Students undertake close reading and discussion of the genre of poetry not limited by historical period. Attention is paid to technique, formal and stylistic qualities, and repeated themes in an attempt to experience and understand poetry.
Offered: Every other year, Spring
UC: Humanities

EN 211. The History Essay. 3 Credits.
This course features a historical analysis of the genre's origins across 30 centuries of writing—from the earliest records of writing, to contemporary American writers of the form. Theoretical analysis of the genre draws on Greek conceptions of "persona" to modern psychological ideas of "personhood" and "impersonation," to linguistic considerations of the first-person singular and plural pronouns. The five-paragraph format also is drawn into theoretical discussion and practical critique. Students write several "personal" and "academic" essays.
Offered: Every other year, Fall
UC: Humanities

EN 212. The Personal Essay. 3 Credits.
This advanced writing course focuses on the history and evolution of the personal essay and its place in the development of modern literature. It emphasizes persuasion and argumentation.
Offered: Every other year, Fall
UC: Humanities

EN 213. The Nature Essay. 3 Credits.
This course introduces students to the process of nonfiction writing. Writing prompts derive mainly from our reading and discussion of published nonfiction. Students are then asked to employ a number of stylistic techniques in their own nonfiction writing. The class emphasizes reading like a writer, writing as a process, the writing workshop, and careful revision and editing.
Offered: Every year, All

EN 214. The History Essay. 3 Credits.
This genre-based course in writing the historical essay is not a history course. It is a writing course that concentrates on the technique of the essay and introduces the principles of writing historical literature. Students explore history as a problem-solving tool, wherein the lessons from studying the past can be useful in understanding the present. The course examines newer (and more controversial) areas of cultural and social history.
Offered: As needed
EN 214H. Honors The History Essay. 3 Credits.
This genre-based course in writing the historical essay is not a history course. It is a writing course that concentrates on the technique of the essay and introduces the principles of writing historical literature. Students explore history as a problem-solving tool, wherein the lessons from studying the past can be useful in understanding the present. The course examines newer (and more controversial) areas of cultural and social history.
Offered: As needed

EN 215. The Travel Essay. 3 Credits.
This genre-based advanced writing course provides a historical overview of nonfiction, travel writing and its emergence as an area of scholarly interest. It explores the ways in which travel writers create narrative personae, construct essays to persuade readers to their perspective, and help to compose the identities of the peoples and cultures about whom they write. Emphasis is on the sustained examination and practice of student writing.
Offered: Every other year, Spring
UC: Humanities

EN 220. The Short Story as a Genre. 3 Credits.
This course covers the development of the short story from the 19th century to the present with intensive study of masterpieces of internationally recognized masters: Hawthorne, Poe, Melville, Wharton, James, Tolstoy, Joyce, Lawrence, Hemingway, Faulkner, Erdrich and others.
Offered: Every year, Spring
UC: Humanities

EN 220H. Honors Short Story as a Genre. 3 Credits.
This course covers the development of the short story from the 19th century to the present with intensive study of masterpieces of internationally recognized masters: Hawthorne, Poe, Melville, Wharton, James, Tolstoy, Joyce, Lawrence, Hemingway, Faulkner, Erdrich and others.
Offered: As needed

EN 222. Comics and Graphic Novels. 3 Credits.
This course explores comics and graphic novels emphasizing contemporary works. Students consider the (often unnoticed) complexity of the comics form, as well as its historical development and representative genres. Readings are drawn from many different genres; and survey a wide variety of national origins, the better to represent the inevitable human diversity embodied in comics creation and reading. Students have the chance to develop an original portfolio that focuses on any creator, genre or theme of their choosing.
Offered: Every other year, Spring

EN 223. Hippies, Punks and Rude Boys. 3 Credits.
In the years after World War II, youth culture became a significant part of British life. Year by year, decade by decade, new cultural types emerged: angry young men, mods, hippies, rude boys, punks, skinheads. In this class, students consider how these social types are represented by the literature of the period. Doing so provides us with a vantage point for considering the intersection of social identities (race, class, gender, sexuality) and the relationship between literary culture and wider cultural and historical trends.
Offered: Every other year, Spring
UC: Humanities, Intercultural Understand

EN 235. Literature by Women (WS 235). 3 Credits.
With the question of what it means to extract a canon of literature defined by gender as its center, this course enables students to consider the ways in which women have contributed a language and form to the literary tradition. In particular, the course explores the process by which this literature, often written from the margins of experience, has shaped how we read today. Varied female authors are discussed, including Woolf, the Brontës, Emily Dickinson, Zora Neale Hurston, Sylvia Plath, Toni Morrison, Sandra Cisneros, Jamaica Kincaid, Leila Abouzeid, and Maxine Hong Kingston, among others.
Offered: Every year, Fall
UC: Humanities, Intercultural Understand

EN 240. Survey of English Literature I. 3 Credits.
Students gain an understanding and appreciation of literature through the study of the cultural background, the literary work itself, and the life of the author. This course explores the literary history of English literature from Anglo-Saxon times through the 18th century.
Offered: Every year, Fall
UC: Humanities

EN 241. Medieval Romances. 3 Credits.
This course focuses on the most popular medieval literary genre, the romance. This genre encompasses a hero's quest, including knights, battles, magic and damsels in distress or otherwise. Participants read both French Breton lais and Middle English verse romances (in translation) that flourished in 13th- and 14th-century England, with particular attention to the Arthurian legend as well as social, cultural and historical factors that gave rise to this literature. Some attention is given to the attraction of contemporary audiences to elements that had their genesis in medieval romance.
Offered: Every other year, Fall
UC: Humanities

EN 250. Survey of English Literature II. 3 Credits.
This course explores the literary history of English literature from Romanticism to Modernism. Students gain an understanding and appreciation of this literature through the study of the cultural milieu, the literary work itself, and the life of the author.
Offered: Every year, Spring
UC: Humanities

EN 250H. Honors Survey of English Literature II. 3 Credits.
This course explores the development of English literature as reflected in the works of major authors from the Romantic to the modern age. Students gain an understanding and appreciation of this literature through the study of the cultural milieu, the literary work itself, and the life of the author.
Offered: As needed
UC: Humanities

EN 260. Survey of American Literature I. 3 Credits.
This course explores the development of American literature as reflected in the works of major authors and works from the Colonial era through the Civil War. Students gain an understanding and appreciation of this literature through study of the cultural background, the literary work itself, and the life of the author. Major authors may include Bradstreet, Emerson, Thoreau, Whitman, Hawthorne, Melville and Davis.
Offered: Every year, Fall
UC: Humanities
EN 265. Survey of African-American Literature. 3 Credits.
This survey course explores African-American literature from Colonial times to the present, concentrating on 20th-century literature. Emphasis is placed upon close reading of selected texts in light of the changing sociocultural conditions faced by African Americans.
Offered: Every year, Spring
UC: Humanities, Intercultural Understand

EN 270. Survey of American Literature II. 3 Credits.
This course explores the development of American literature as reflected in the works of major authors from the Civil War to the present. Students gain an understanding and appreciation of literature through study of the cultural background, the literary work itself, and the life of the author. Major authors include Emily Dickinson, Fitzgerald, Hemingway, Faulkner, T.S. Eliot, Philip Roth and Marilyn Robinson.
Offered: Every year, Spring
UC: Humanities

EN 276. African Literature. 3 Credits.
In their centuries of rule, the British substantially reshaped cultures and economies. Indeed, they may be said to have redirected the histories of a large part of the world. After World War II though, the British withdrew. In their wake, they left new nation-states, new classes and new literatures. In this class, students read these new English-language literatures from the former British colonies of Africa and South Asia.
Offered: Every year, Fall
UC: Humanities, Intercultural Understand

EN 277. Literature of the Americas. 3 Credits.
Focusing on the 20th to 21st centuries, this course examines writers from Canada, Latin America, the Caribbean and the United States, who typically emerge from historically underrepresented groups. These literary works engage the lived experiences of indigeneity, enslavement, imperialism, migration and globalization, to explore the ties that bind the many peoples of the Western hemisphere.
Offered: Every year, Spring
UC: Humanities, Intercultural Understand

EN 280. The European Tradition in Literature I. 3 Credits.
This survey course presents selected European masterpieces, both written in English and in translation, including representative selections from Homer to 1700. Emphasis is on literary and philosophic values with attention to methods of literary analysis as applicable to works by Virgil, Dante, Cervantes and others. The course presents historical backgrounds and study in the generic traditions of literature.
Offered: Every year, Fall
UC: Humanities

EN 281. The European Tradition in Literature II. 3 Credits.
This survey course presents selected European masterpieces, both written in English and in translation, including representative works from 1700 to the present. Emphasis is on literary and philosophic values with attention to methods of literary analysis as applicable to the works of Moliere, Voltaire, Rousseau, Goethe, Pushkin, Flaubert, Dostoyevsky, Chekhov, Mann and Kafka. The course combines historical backgrounds and study in the generic traditions of literature.
Offered: Every year, Spring
UC: Humanities

EN 283. The American Dream: Paradise or Failure. 3 Credits.
The American Dream is examined through literary works. Differing views of the American character are analyzed through significant writers, from the Puritans to the present, with the purpose of gaining a better understanding of the American experience. Major authors include Emerson, Hawthorne, Fitzgerald, Faulkner and others.
Offered: As needed

EN 299. Independent Study. 1-3 Credits.
In-depth focus on a specific author, topic or area. Topic must be specified in advance.
Offered: As needed

EN 300. Special Topics in Literature. 3 Credits.
This course explores readings in literature dealing with a single author, theme, or specific problem. The course may be repeated for credit when topic changes. Specific titles are announced from time to time.
Prerequisites: Take one 200-level English course.
Offered: As needed

EN 301. Advanced Fiction-Writing Workshop. 3 Credits.
This advanced fiction-writing course uses a workshop approach to help students understand and experience the process of drafting, revising and editing short stories, as well as the importance of reading and critiquing the work of their peers. Students read contemporary short fiction and give formal presentations on print and web-based literary journals and magazines. Each student chooses a public venue (e.g., public reading, website, blog, etc.) and presents selections from his/her work. The final portfolio represents the breadth of the students' work, including multiple drafts of stories, workshop comments, reading responses and a writer's journal.
Prerequisites: Take EN 201 EN 202 or EN 205.
Offered: Every year, Fall

EN 302. Advanced Creative Nonfiction. 3 Credits.
This advanced writing course focuses on the reading, analyzing and writing of creative nonfiction. Students read essay and book-length works of creative nonfiction with an emphasis on understanding authorial presence, issues of audience, questions of truth and memory and artistic techniques. Students are asked to employ what they learn from studying masterworks of creative nonfiction to their own longer works of creative nonfiction.
Prerequisites: Take EN 201 EN 202 or EN 205.
Offered: Every year, Spring
EN 303. The Art of Audio Narrative (FVI 380 GDD 303). 3 Credits.
This course is about storytelling. Students learn the basics of multitrack audio recording and mixing. They write and produce fiction and nonfiction audio narratives. Each project is shared in a stimulating and mutually supportive workshop environment. Students read and listen widely to gain a sense of the history and theory of radio art. Participants also spend time identifying target audiences and looking at ways to distribute student work to the larger world of public and independent radio.
Prerequisites: Take EN 201 EN 202 or EN 205.
Offered: Every other year, Fall

EN 304. Junior Seminar in Critical Theory. 3 Credits.
Junior Seminar introduces students to principles and textual questions that permeate and animate contemporary literary studies. Students gain knowledge of current theoretical terminology, and some of its implications for the ways we read and analyze texts in the discipline of English. A major focus of the class is on how these principles and terms are put into practice in scholarship on literature. The Junior Seminar is a preparation course for advanced work in the English major, particularly the Senior Seminar. This course must be taken in the junior year.
Prerequisites: Take one 200-level English course.
Offered: Every year, Fall

EN 306. Advanced Poetry Writing Workshop. 3 Credits.
This course assumes a prior foundation in the reading of poetry and the practice of writing in traditional forms and seeks to push students to write original poems in a contemporary idiom. Students write a poem on assignment each week, drawing from readings of contemporary poetry collections as well as additional model poems. Students perform their own work publicly and attend literary events to observe and respond to how other writers perform their work. This practice culminates in a public reading given by the whole class. The final project is to assemble a chapbook of poems.
Prerequisites: Take EN 201 or EN 206.
Offered: Every year, Spring

EN 308. Composing America. 3 Credits.
This research-based, advanced composition and period course is a hybrid that crosses the divide between the study of literature and the study of rhetoric. Students investigate the intersection between literature and literacy/composition practices in the U.S. from World War II through the Vietnam War (1939-72). Participants consider how the U.S. has been composed through the acts of reading and writing by studying a variety of texts (poetry, drama, novels, travel, anthropology, folktales, music, theory, film and art).
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 320. Studies in the Novel. 3 Credits.
Students explore the development of the novel from its beginning to the present through discussion of the theories of prose narration. Special attention is given to characteristics of the genre. The course may be repeated for credit when topic changes (e.g., American novel, English novel, Continental novel).
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 321. The Russian Novel. 3 Credits.
The Russian Novel is framed as a survey course, from the publication of Alexander Pushkin's "Eugene Onegin" in 1823 as a serial novel, to material drawn from the Soviet period, especially from the work of Alexander Solzhenitsyn, Mikhail Sholokov, Abram Tertz (Andrey Sinyavsky), Anna Akhmatova and Maria Tsvetaeva. Major works by Lermontov, Turgenev, Dostoyskvy, Tolstoy and Chekhov also are included in the course material.
Prerequisites: Take one 200-level English course.
Offered: As needed

EN 322. Modern British Literature (1900-1945). 3 Credits.
This course focuses on readings in British literature of the early 20th century. Students study writers such as Conrad, Lawrence, Joyce, Yeats and Eliot against a background of social and political crises from 1900 to 1950.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 323. Contemporary British Literature (1945-Present). 3 Credits.
Devastated by Hitler's Blitz, Britain watched its empire crumble and its global power recede. In a nation of social troubles, British writers began again to write for the public. From the Beatles to the Rushdie affair, British culture has thrived in the face of rapid change by producing a literature of social engagement and aesthetic vibrancy. This course includes texts that speak to these wider historical currents and the aesthetic and intellectual life of Britain since 1945.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 324. The Gothic Novel. 3 Credits.
This course offers a historical survey of the Gothic genre, from Horace Walpole's 1764 "The Castle of Otranto" leading to its many variations in subsequent centuries: terror narratives, the political gothic, the female gothic, science and crime and the postmodern gothic. The course considers the Gothic genre's deployment in historical, social and cultural contexts, as well as the structural and epistemological changes that have emerged since the late 18th century.
Prerequisites: Take one 200-level English course.
Offered: Every Third Year, Fall

EN 325. History of the English Language. 3 Credits.
This course introduces students to the origins and development of the English language and to its social, cultural and historical contexts. It is required of all English majors in the MAT program.
Prerequisites: Take one 200-level English course.
Offered: Every year, Spring

EN 326. Modern Irish Drama. 3 Credits.
This course surveys the development of modern Irish dramas, from W.B. Yeats and the writers of the Gaelic Revival (1884-1916) to more current dramatists such as Tom Murphy and Brian Friel. The material not only covers the powerful body of work produced by Yeats, Synge and Lady Gregory (along with its influence on European and American drama) but also ranges over the work of G.B. Shaw, Brendan Behan, Sean O'Casey and Martin McDonagh. Students also consider modern works of the Irish stage, especially by women (e.g., Elizabeth Kuti) and other voices.
Prerequisites: Take one 200-level English course.
Offered: As needed

EN 330. World Literature. 3 Credits.
This course addresses literary topics by reading texts drawn from various national, regional or transnational literatures.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall
EN 338. American Literature by Women of Color (WS 338). 3 Credits.
This course explores the diverse literary traditions, themes and narrative strategies employed by American women of color, including black, Latina, Asian and Native American female writers. Students examine how race, ethnicity and gender affect form, content, language and style in literature. Writers include: Silko, Erdrich, Morrison, Walker, Angelou, Giovanni, Tan, Kingston, Yamamoto, Cisneros and Viramontes.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 340. Immigrant Fictions. 3 Credits.
This course explores fiction by/about immigrants, examining U.S. history and culture through their stories. Participants focus primarily on 20th- and 21st-century texts by Jewish, Latin American, Caribbean, Asian and African migrants to understand how they represent the race, class and gender barriers (and opportunities) that underlie the American Dream. We also use critical scholarship on racial formation, immigration, citizenship, human rights and diaspora to produce presentations and essays. Students use these concepts to help theorize how the most marginalized "aliens" have made America the complex and contradictory nation it is today.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 341. Chaucer and the Medieval Period. 3 Credits.
This course presents a critical interpretation, in its historical setting, of the chief imaginative work in England of the period, "The Canterbury Tales." Additional works of Chaucer and other representative dramatic and lyric poetry also are included. Attention is given to the cultural and artistic setting.
Offered: Every year, Fall

EN 343. Shakespeare: Histories and Comedies. 3 Credits.
Extensive structural and thematic analysis of Shakespeare's histories and comedies is the basis of this course, which concentrates on selected problems of scholarship, criticism and performance.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall

EN 344. Shakespeare: Tragedies and Romances. 3 Credits.
Extensive structural and thematic analysis of Shakespeare's tragedies and romances is the basis of this course, which concentrates on selected problems of scholarship, criticism and performance.
Prerequisites: Take two 200 or 300-level English courses.
Offered: Every other year, Fall

EN 345. English Literature of the Renaissance. 3 Credits.
This intensive study of the principal genres of 16th-century English literature, including lyric poetry (Sidney) and Romance such as "The Faerie Queen" (Spenser), places special emphasis on the major works of the Elizabethan period. Some attention is given to the medieval background, Renaissance art and music, and Continental literature.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 348. Milton and the 17th Century. 3 Credits.
This intensive study of literature within this revolutionary period emphasizes the cultural context for poetry, prose and drama in England from 1603 to about 1665. The course focuses on Milton's "Paradise Lost" and on works of other major writers, such as the metaphysical poets (Donne, Marvell, Herbert), and Ben Jonson, Francis Bacon and Thomas Middleton (drama).
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 350. 18th-Century British Literature (1660-1800). 3 Credits.
The idea that literature is changing in form and content as well as in its social function is central to the study of literature in the long 18th century: what's at stake in the change? This course explores this question by reading a variety of texts including Defoe's "Robinson Crusoe," Swift's "Gulliver's Travels," Pope's "Essay on Man," and Eliza Haywood's "Fantomina;" among others, works that seem to be rather strange literature by modern standards. Participants also read about the "rise" of print culture, the many historical changes of the period, such as the rise of the colonial empire, and the change from a poetics of the elite to the aesthetics of feeling.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall

EN 351. Studies in Rhetoric and Writing. 3 Credits.
This is an advanced course in the theory and practice of argumentation. Students learn the foundations of Aristotelian rhetoric and then apply an understanding of Logos, Pathos, Ethos and Telos to various topics of historical and contemporary concern-most prominently on the cognitive, social and political changes effected by the 500-year-old Gutenberg Revolution (The Age of the Book) and their rapid disruption and undoing via the Digital Revolution (The Age of the Screen). Weekly papers and some heavy reading requirements.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 352. British Romanticism (1785-1832). 3 Credits.
This period of time is revolutionary: the Industrial Revolution, the agricultural revolution, the political revolutions in France and America, a literary revolution that constructs a broader reading public, and a print revolution that expands the publishing industry. In this course, students question what these revolutions have to do with novels, poetry and essays of the period, and explore how literature of this period help "revolutionize" the individual, nature and society at the same time that it seems to "romanticize" them.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 355. Victorian Literature (1832-1901). 3 Credits.
During the Victorian period, the industrial age in England reached its height as the nation expanded its cultural and economic boarders to become the world power that was the British Empire. It was a time when immense wealth was coupled with immense poverty, and "propriety, duty and family" was the slogan of Victorian morality but hidden in the open was the growth of brothels and the drug trade. It was the first age where literacy was widespread, and reading was the primary entertainment for the elite and the masses. Students explore the variety of literature in which the Victorians imagined themselves and the world they lived in.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 360. Literature and Popular Culture (WS 360). 3 Credits.
This examination of the major works in a specific genre focuses on a period in, but not restricted to, American culture. Analysis of primary texts reveals themes and patterns that emphasize the relationship between literature and culture. Sample courses include Western Fiction and Film, Detective Fiction, Literature and the Environment, etc. Topics change (as do instructors), so course may be repeated for credit.
Prerequisites: Take one 200-level English course.
Offered: Every Third Year, Spring
EN 361. Origins of U.S. Literature (1492-1865). 3 Credits.
At the heart of our national literature lies a complex early narrative. It contains darker issues with an unresolved past, conflicting histories, encounters with the "other" our Calvinist relationship with Nature and nature, a mixed psychology as colonials and revolutionaries, and the tension between our aspiration to be the city on the hill and the realities of life on the edge of wilderness. It also contains the exuberance of the "new Adam" (and Eve), where we can start the story over again and again. This course invites students to test and interrogate these ideas by reading authors in the founding traditions of U.S. literature, such as Charles Brockden Brown, Phillis Wheatley, Susanna Rowson, Benjamin Franklin, Ralph Waldo Emerson, Nathaniel Hawthorne and Mary Rowlandson.
Prerequisites: Take one 200-level English course.
Offered: Every year, Fall

EN 365. The American Renaissance (1830-1865). 3 Credits.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall

EN 366. Modern U.S. Literature (1900-1945). 3 Credits.
The early 20th-century movement known as Modernism was an exhilarating time when the Western world's artists and thinkers were exploring how to represent human experience authentically. In the context of U.S. contributions to this era, students investigate questions of aesthetic innovation (especially in poetry), literary subgenres, popular vs. high culture, and national and ethnic identity (including the Harlem Renaissance). Representative authors might include Cather, Frost, Hammett, Hemingway, Hurston, Larsen, Stein, Stevens, Toomer and Yeidierska.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall

EN 367. Contemporary U.S. Literature (1945-Present). 3 Credits.
After World II, the U.S. experienced profound change, including the Atomic Age and the Cold War (and later wars on drugs and terrorism), unprecedented global travel and migration, Civil and Human Rights movements, and astonishing technological revolution. Engaging these seismic shifts, cultural expressions have changed as well. This course focuses on the late 20th- to 21st-century writers who reimagined our world, among them Postmodernists such as Nabokov, political writers such as Kerouac, writers of color such as Morrison, and poets and innovators of form such as Plath or Anzaldua.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring

EN 373. Modernist American Poetry. 3 Credits.
Introduces "Modernism" and "Modernist" poetry to enable close readings of modernist forerunners Walt Whitman and Emily Dickinson and onward through the 1960s. Major poets include Pound, Eliot, Crane, Williams, Hughes, Stevens, Moore, Bishop, Ginsberg, Knight, Sexton and Kinnell. Emphasis is on applying a deepened historical sense of what Modernism was and what it now means through individual poems and across poets and poetic schools. Students write final long essays analyzing American modernist themes, poetic forms and cultural frames.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall

EN 377. Faulkner and Literature Between the Wars. 3 Credits.
Readings by Langston Hughes, T.S. Eliot, Anderson and Hemingway are followed by extensive structural and thematic analysis of Faulkner's major writings. The course includes close reading of the texts and consideration of problems raised by various critical approaches. "The Unvanquished," "As I Lay Dying," "Light in August," and "Go Down, Moses" are some of the novels that are read and discussed.
Prerequisites: Take one 200-level English course.
Offered: As needed

EN 380. Realism and Naturalism in U.S. Literature (1865-1930). 3 Credits.
U.S. Realism and Naturalism were late 19th-/early 20th-century aesthetic movements that emerged after Romanticism. The nation's post-Civil War mood produced a literature that reflected forces from industrialism and social migration to Darwinism and the "New Woman." In this course, students examine literature written in relation to those forces and specifically study how the novel matures in the U.S. tradition. Authors may include Rebecca Harding Davis, Mark Twain, Henry James, Kate Chopin, Emily Dickinson, Charles Chesnutt, Frank Norris, Stephen Crane, William Dean Howells, Edith Wharton, Sarah Orne Jewett and Richard Wright.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall

EN 399. Independent Study. 1-6 Credits.
In-depth focus on a specific author, topic, or area. Topic must be specified in advance.
Prerequisites: Take EN 101.
Offered: As needed

EN 460. Senior Seminar Capstone. 3 Credits.
Senior Seminar focuses on sustained intellectual inquiry about literature, highlighting your own literary interests. It offers you the opportunity to develop expertise on a text/field/question of your choice, while providing you with a process and a community to rely on for support and feedback. In this course, students conduct independent research on a literary text. Building and contributing to an intellectual community, students write, revise and present a major argumentative essay. Open to senior English majors only.
Prerequisites: Take EN 204 or EN 304.
Offered: Every year, All

EN 470. Senior Thesis. 3 Credits.
Senior thesis is open to English majors who are candidates for honors in English. Candidates must be recommended by a member of the English faculty, who consents to serve as adviser for the thesis. This adviser and the student select two additional faculty to serve as a reading committee for the student's final thesis presentation.
Prerequisites: Take EN 204 or EN 304 and one 300-level English course.
Offered: Every year, All

EN 499. Independent Study. 3 Credits.
Entrepreneurship (ENT)

ENT 210. Introduction to Entrepreneurial Thinking and Practice. 3 Credits. 
Entrepreneurship is much more than the process of starting a company. Entrepreneurship is a habit of mind and an attitude. It is a skill set applicable to pursuing innovation in organizations, personal and career contexts and an approach to life built around innovative thinking, calculated daring, and proactive behavior. This course introduces students to the entrepreneurial mindset, the context of entrepreneurship, and skills necessary to use the entrepreneurial mindset in the workplace, in starting a new venture, in one's personal life. 
Offered: Every year, All 
UC: Breadth Elective

ENT 250. Entrepreneurial Skills. 3 Credits.
This course builds on the skills introduced in ENT 210. Students learn advanced ways to validate their ideas and get extensive hands-on practice using them. They also see how ideas evolve in light of new information, how to identify when they are pursuing a solid idea, and how to help support their fellow entrepreneurs. 
Prerequisites: Take ENT 210. 
Offered: Every year, Spring

ENT 290. Creating New Enterprises. 3 Credits.
Students form their own teams to develop a digital business idea into a viable business and compete to win money to launch their businesses. Students learn about content creation, business concepts and presentation skills in preparation for a successful launch. 
Prerequisites: Take ENT 210. 
Offered: Every year, Fall

ENT 299. Special Topics in Entrepreneurship. 3 Credits. 
Topics vary. Permission of department chair required. 
Prerequisites: ENT 210. 
Offered: As needed

ENT 310. Creativity and Innovation. 3 Credits. 
This course helps students gain an understanding of entrepreneurial creativity as related to the entrepreneur and the venture. Topics of exploration include the creative process, development of a viable product/service, and how to sell creative ideas. From the enterprise level, students learn to proactively manage and promote creativity throughout the venture, develop the creative potential of others, and protect their intellectual capital. 
Prerequisites: Take ENT 210. 
Offered: Every year, Fall

ENT 320. Small Business Marketing. 3 Credits. 
This course applies the principles of marketing to the process of developing a marketing plan and strategy for the small business. Students explore how the marketing plan integrates into the overall business plan and how it applies to small business operations and strategy implementation. By reviewing case studies of successful contemporary entrepreneurs, participants develop a further understanding of what personal characteristics and insights the entrepreneur and small business owner must cultivate to be successful in marketing. 
Prerequisites: Take ENT 210. 
Offered: Every year, Fall

ENT 330. Entrepreneurial Finance. 3 Credits. 
This course addresses the myriad finance problems faced by the entrepreneur and by new and emerging businesses. The sources of capital-bootstrap, debt and equity—each have their merits and caveats for ownership and management of the new company. Other topics include: crowdfunding, financial forecasting and developing key performance metrics. 
Prerequisites: Take ENT 210. 
Offered: Every year, Spring

ENT 331. Family or Small Business Financing. 3 Credits. 
This course addresses the financial aspects of small business and family business companies. The core financial aspects of business problems encountered by those running a small or family business are covered through the discussion of financial topics including working capital management, forecasting, budgeting, financial statements, small business administration programs, succession planning, and alternative solutions to commonly encountered financial problems. 
Prerequisites: Take ENT 210. 
Offered: As needed

ENT 340. Opportunity Recognition and Negotiation. 3 Credits. 
This course helps students identify which resources they need for their business, how to find and assess the quality of entities that can fulfill those needs, and negotiate for the best deal. 
Prerequisites: Take ENT 210. 
Offered: Every year, Spring

ENT 350. Social Entrepreneurship. 3 Credits. 
Social entrepreneurship examines the practice of identifying, starting and growing successful mission-driven for-profit and nonprofit ventures, that is, organizations that strive to advance social change through innovative solutions. This course provides a socially relevant academic experience that enables students to gain in-depth insights into economic and social value creation across a number of sectors/areas including but not limited to: poverty alleviation, energy, health, food security, environmental issues and education. 
Offered: Every year, Spring 
UC: Breadth Elective, Intercultural Understand

ENT 360. Small and Family Business. 3 Credits. 
This course helps students understand how to successfully operate an existing family or small business. The course further covers the unique characteristics that distinguish a family or small business from other businesses including estate planning and succession planning. 
Prerequisites: Take ENT 210. 
Offered: Every year, Spring

ENT 361. Managing the Family or Small Business. 3 Credits. 
This class is focused on leadership, hiring, growing/improving, motivating, and firing employees, and working with higher ups in an organization. It specifically addresses the challenges when those individuals have long tenure with the business or are family members. 
Prerequisites: Take ENT 210. 
Offered: As needed

ENT 371. Business Plan Competition. 1 Credit. 
This course helps students understand how to successfully operate an existing family or small business. The course further covers the unique characteristics that distinguish a family or small business from other businesses including estate planning and succession planning. 
Offered: Every year, Fall and Spring
ENT 410. New Venture Creation. 3 Credits.
Students develop a comprehensive business plan through application of prior course skills.
Prerequisites: Take ENT 210.
Offered: Every year, Fall

ENT 420. Entrepreneurial Implementation I. 3 Credits.
In this intensive course, students learn and apply the fundamentals of implementing a successful business. Students implement the business idea that they formulated in ENT 410. Any type of business may be implemented and may include technology firms, service businesses, manufacturing businesses, etc. This course is taken concurrently with ENT 430. Enrollment is by permission only.
Prerequisites: Take ENT 210 ENT 410.
Offered: Every year, Spring

ENT 430. Entrepreneurial Implementation II. 3 Credits.
This intensive course is an extension of ENT 420. Students apply the fundamentals of implementing a successful business. This course is taken concurrently with ENT 420. Enrollment is by permission only.
Prerequisites: Take ENT 210 ENT 410.
Offered: Every year, Spring

ENT 488. Entrepreneurship Internship. 3 Credits.
Students gain work experience under the joint supervision of a faculty member and practicing manager or business owner. Students must meet School of Business internship requirements. This course is graded on a pass/fail basis.
Prerequisites: Take ENT 210.
Offered: Every year, All

ENT 490. Field Projects. 3 Credits.
Students work independently or as part of a team on a project or topic of their choice under the supervision of a faculty member. The project may involve researching a special entrepreneurship topic, working on an aspect of a new business startup or working with a business or organization.
Offered: As needed

ENT 499. Independent Research in Entrepreneurship. 1-6 Credits.
Approval of a sponsoring faculty, the department chair and the dean is required.
Offered: As needed

Film, Television and Media Arts (FTM)

FTM 110. Single Camera Production. 3 Credits.
This course gives students a thorough grounding in the basic techniques of audio and video storytelling. Students learn basic audio production, visual composition, field camera practice, lighting fundamentals and digital video editing. This is a hands-on course that requires students to produce a number of media projects throughout the semester.
Offered: Every year, All

FTM 230. Animation and Mobile Media. 3 Credits.
This course introduces the concepts and production techniques that prepare students for creative work in mobile media. Students completing this course learn how to produce animated and interactive content for the web and mobile devices or kiosks. Projects may include simple animations, interactive stories, photo and video viewers, web interfaces, green screen, animations for video, and video projects optimized for the web.
Offered: As needed

FTM 240. Analysis of the Moving Image. 3 Credits.
How do we read images? This course explores the techniques used to create moving image media-including film, television and interactive media-from a formal and aesthetic perspective. Students learn to think and write critically about how the techniques of production work to communicate ideas and convey meaning and emotion to viewers. Sophomore status required.
Offered: Every year, All

FTM 245. Intermediate Production. 3 Credits.
Media messages are created to meet a variety of goals, which are tailored to appeal to defined audiences. Media can be designed to entertain, to inform, to educate, to persuade or to sell. In this course, students are challenged to discern what makes a good story or project idea for each of several different content objectives. Students work through all phases of preproduction and production including scripting, scheduling and budgeting as they complete a series of projects during the semester, with special emphasis on creative conceptualization, message and writing.
Prerequisites: Take FTM 110.
Offered: Every year, All

FTM 280. Visual Effects (VFX) Techniques. 3 Credits.
This is a foundational course in the field of visual effects, involving intensive hands-on production and post-production training. Topics include compositing, keying, rotoscoping, tracking, retouching, color manipulation, matching, mattes and cinematography and lighting for VFX. Preproduction concepts and techniques specific to VFX creation also are covered.
Prerequisites: Take FTM 110 and FTM 112.
Offered: Every year, All

FTM 300. Special Topics. 3 Credits.
New or experimental courses on a variety of topics in film, television and media arts that in the past have ranged from the impact of social media to visual effects.
Offered: As needed
FTM 310. Projects in Animation and Mobile Media. 3 Credits.
This course focuses on the creation of advanced mobile media projects. Students are challenged to create projects that incorporate multiple forms of media delivered for the web, mobile devices or kiosks. Projects may include advanced animations, webisode stories with video and audio production, product promotions, maps, web interfaces, games, educational materials, mobile apps and other content.
Offered: As needed

FTM 320. History of Film I (to 1975). 3 Credits.
This course, the first in a two-semester sequence, provides a foundation in the history and aesthetics of moving image arts. Through individual films, clips, lectures and discussion, students analyze the major international film movements, their genres, directors and themes that have contributed to the development of narrative cinema. Organized thematically, films are chosen to showcase aesthetic, historical, technological and ideological concepts and their impact on the evolution of film from its inception to 1975. Sophomore status required.
Offered: Every year, Fall
UC: Fine Arts

FTM 322. History of Film (and Television) II. 3 Credits.
This course explores the history and aesthetics of moving image arts in film and also television from 1975 to the present. Through individual films, excerpts from films and television clips, lectures and discussion, students analyze the evolution of global television and major international film movements, their genres, directors and themes to understand how they have contributed to the development of television entertainment and narrative cinema. Organized thematically, works of film and television are chosen to showcase aesthetic, historical, technological and ideological concepts and their impact on the evolution of film and television. Sophomore status required.
Offered: Every year, Spring
UC: Fine Arts

FTM 330. Emerging Cinematography Techniques. 3 Credits.
This course is designed to engage students in the cutting edge of cinematography and lighting. Students undertake in-depth exploration of developing concepts and become familiar with emerging technologies, equipment and narrative techniques through lectures, demonstrations and hands-on exercises.
Prerequisites: Take FTM 110 and FTM 112.
Offered: As needed, All

FTM 342. Directing Film and Television. 3 Credits.
Students are introduced to the history, theory and basic concepts of narrative single camera field and multicamera studio direction for current and developing distribution platforms. This course emphasizes principles of dramatic structure, script breakdown and analysis, visualization and story boarding, preproduction scheduling and casting, working with actors to effectively shape performances and working with crew.
Students prepare and direct a series of short scenes.
Prerequisites: Take FTM 110 FTM 112.
Offered: Every year, Spring

FTM 355. Documentary Production. 3 Credits.
This course challenges students to master the conceptual and technical skills of visual storytelling to produce more advanced, single-camera field projects on selected, specialized topics that may change from semester to semester. Past course content has included documentary production in South Africa and in Ireland, as well as in the United States. The course emphasizes professional production roles, including writing and directing, scheduling and production management, production, post-production, distribution and marketing. Sophomore status required.
Offered: Every year, Spring

FTM 372. Screenwriting. 3 Credits.
Students learn to shape stories for the screen. Emphasis is on dramatic structuring, character development, pacing and dialogue. Professional screenplays are analyzed and discussed, and final projects give students the opportunity to develop an original short screenplay.
Prerequisites: Take FTM 245 or permission of the department chair.
Offered: Every year, All

FTM 375. Projects in Multicamera Production. 3 Credits.
Participants read and listen widely to gain a sense of the history and theory of audio production to activate not only the human voice in narratives, but also the ambient sounds of the environment, the music in imagination and the more subtle inner-symphonies of moods, attitudes and emotions. Participants read and listen widely to gain a sense of the history and theory of audio art. The class asks questions and listens to answers. Students represent what they see and hear, and invent that which they do not see or hear. They sit and write in isolation, wrestle with not-so-familiar technologies, learn to become ruthless and artful editors, and share the results of their labors in a stimulating and mutually supportive workshop environment to gain a sense of the history and theory of audio art. Finally, they spend time identifying target audiences and looking at ways to distribute their work to the larger world of professional sound production.
Prerequisites: Take EN 201 or FTM 110.
Offered: As needed

FTM 376. Directing Multicamera Production. 3 Credits.
Attracting and keeping the audience’s attention is the first responsibility of the director. This course gives students the opportunity to explore the art and craft of directing in a multicamera, high-definition studio environment. Participants examine the roles and responsibilities of the director, including shot composition, crew motivation, calling a live production and ethics. Students are asked to visually design a television program from concept to completion in a number of genres, including news, sports, sitcoms, dramas and commercials.
Prerequisites: Take FTM 110 FTM 112.
Offered: Every year, Fall

FTM 378. Single Camera and Lighting. 3 Credits.
In this course, students explore such topics as the expressive capability of the editing process; how editing functions to “create” time, tempo and visual rhythm; the “building” of scenes in editing to achieve various dramatic goals; and telling the story through careful control of sound and image over time. Students gain experience in using the tools and techniques of modern digital post-production technology. Topics may include: post-production planning; continuity editing; digital video effects; compositing; “green screen” techniques; graphics design; 2D and 3D animation; audio mixing and sound design; interactivity; preparing video for broadband distribution and mobile devices; DVD design and authoring.
Prerequisites: Take FTM 110 FTM 112.
Offered: Every year, All
FTM 393. Animation Techniques. 3 Credits.
Students learn to create sophisticated 2D and 3D still and animated electronic graphics for video that are aesthetically pleasing, expressive and meaningful. Principles of good design, composition and color are stressed, as well as the ability to produce visual interest in support of communication goals.
Prerequisites: Take FTM 110 FTM 112.
Offered: Every year, All

FTM 397. Summer Production Project. 4 Credits.
This advanced production course is for juniors majoring in film, television and media arts. It takes place on campus or on the Nice, France, campus of a major French film and video institute (ESRA, Paris), and involves the writing, shooting and editing of a polished video project that is then presented to a professional jury.
Prerequisites: Take FTM 110 FTM 112.
Offered: As needed, Summer

FTM 399. Independent Study. 1-6 Credits.
Prerequisites: Take FTM 110 FTM 112.
Offered: As needed

FTM 450. Senior Seminar in Film and Television. 3 Credits.
This seminar entails an in-depth examination of issues and research perspectives in film and television. Seminar titles vary each term and may cover subject areas such as film history, reality television, political documentaries, docudrama and contemporary trends in the media industry. Students should consult the School of Communications course bulletin for information about each semester’s offerings. Senior status is usually required.
Offered: Every year, All

FTM 493. Senior Project Colloquy: Preproduction. 3 Credits.
This required 3-credit discussion, development, preproduction and production course must be taken in the semester prior to the student’s undertaking of the Senior Project. Meeting collectively and individually, all fourth-year FTM students must be enrolled in this course in order to conceptualize and prepare preproduction materials essential for the successful completion of the Senior Project, and to undertake a new short production project, retrospective of their previous work. Individual class sessions are devoted to each aspect of preproduction and assignments that relate to each aspect are completed during the term. Senior status in FTM is required.
Offered: Every year, Fall

FTM 495. Senior Project Colloquy: Production. 3 Credits.
In this capstone course, students are asked to create an individual thesis project that reflects the highest level of their abilities. From pitching their individual project ideas through writing, production and post-production, students are pushed to work at the peak of their skills. The creativity, quality and professionalism of the finished projects are judged by outside professionals and faculty and staff from the School of Communications FTM program, and give graduating seniors important portfolio material. Senior status in FTM is required.
Prerequisites: Take FTM 493.
Offered: Every year, Spring

FTM 499. Independent Study. 3 Credits.

---

Finance (FIN)

FIN 201. Fundamentals of Financial Management. 3 Credits.
This course introduces students to the theory and practice of financial management. Topics include the uses and valuation of securities, the structure and purpose of capital markets, financial risk, interest rates and yield curves, and corporate financial analysis and decision making.
Prerequisites: Take EC 111.
Offered: Every year, All

FIN 300. Special Topics. 3 Credits.
Prerequisites: Take FIN 310 FIN 320.
Offered: As needed

FIN 301. Investment Analysis. 3 Credits.
This course introduces students to the theory and practice of investment analysis. Emphasis is on the uses, characteristics and valuation of fixed income securities, equities and derivatives in the global financial marketplace. Students are exposed to both classical and modern theories of evaluating and quantifying financial risks and returns.
Prerequisites: Take FIN 201.
Offered: Every year, Fall

FIN 315. Financial Planning: A Service Learning Course. 3 Credits.
Students are introduced to financial planning, which includes budgeting, credit, insurance and risk management, investments, income tax planning and retirement planning as they apply to consumer decision-making. Students also explore the importance of financial education in reducing poverty and create financial awareness in the community through a service learning project. As part of the service learning project, students design and organize basic financial education workshops for local high school students.
Prerequisites: Take FIN 201.
Offered: As needed

FIN 320. Financial Modeling. 3 Credits.
This course examines standard financial models and data analysis in the areas of capital budgeting, financial statement analysis, asset pricing, portfolio management and performance, hedging and option pricing. Students learn to extract, model and analyze data using computer spreadsheets.
Prerequisites: Take FIN 201.
Offered: Every year, Fall and Summer

FIN 325. Financial Analytics. 3 Credits.
This course focuses on the further development of analytical skills used by investors, analysts and managers. Students learn methods of data acquisition and storage. Subsequently, they apply and analyze relevant statistical tools and methods, analyze and interpret the results to aid appropriate decision making.
Prerequisites: Take FIN 320.
Offered: Every year, Fall

FIN 345. Risk Management & Insurance. 3 Credits.
This course covers risk management principles and the nature of insurance as a risk-transferring device to reduce various loss exposures. Topics include insurance programs, financial aspects of insurance companies and markets, insurance industry structure, managerial aspects of underwriting and pricing, and public policy issues.
Prerequisites: Take FIN 201.
Offered: Every year, Fall
FIN 350. Financial Markets and Institutions.  3 Credits.
This course presents a study of financial markets and intermediaries in a global setting with emphasis on how funds flow from investors in financial assets to investors in real assets. The types and functions of markets and institutions that exist today are discussed along with the differences between them. Topics include the role of monetary policy and the operations of central banks; the regulatory environment in which financial markets and institutions operate; and the financial instruments traded in the markets today.
Prerequisites: Take FIN 201.
Offered: Every year, Spring and Summer

FIN 355. Retirement Planning and Employee Benefits.  3 Credits.
This course provides students with an understanding of the retirement planning process. The main objectives are to learn the usefulness of retirement plans and employment-based benefits, and to develop recommendations on important retirement and employee benefit decisions. Topics include: Social Security, qualified retirement plans, nonqualified retirement plans, self-employed plans, IRAs, group life insurance, group disability insurance and group health insurance.
Prerequisites: Take FIN 201.
Offered: Every other year, Spring

FIN 356. Real Estate Finance.  3 Credits.
This course examines the structure of real estate markets. Topics include principles of mortgage lending; property appraisal, the secondary mortgage market; mortgage securitization and valuation; residential and commercial real estate investment; leverage and capital structure for real estate project analysis; and real estate investment in the portfolio context.
Prerequisites: Take FIN 201.
Offered: Every year, Spring

FIN 360. Financial Statement Analysis.  3 Credits.
This course focuses on the development of analytical skills used by investors and analysts in their evaluation of various financial statements. Topics include the review and analysis of balance sheets, income statements and statements of cash flow; ratio analysis and developing pro forma financial statements to support equity analysis and credit analysis.
Prerequisites: Take FIN 201.
Offered: Every year, Fall and Summer

FIN 370. Commodities.  3 Credits.
This course introduces students to the fundamental and technical analysis of commodity markets with application to real market problems. Strategy development and risk management are studied with alternative market concepts and unconventional views.
Prerequisites: Take FIN 310.
Offered: Every year, Spring

FIN 380. Intermediate Corporate Finance.  3 Credits.
Students gain an advanced understanding of corporate finance. The main objectives are to learn to apply financial concepts, construct and implement financial decision models, and relate various financial theories to one another. Topics include capital budgeting, the valuation of firms, capital structure, cost of capital, dividend policy and risk management.
Prerequisites: Take FIN 201.
Offered: Every year, Spring and Summer

FIN 399. Finance - Independent Study.  1-6 Credits.
Offered: As needed

FIN 420. Bank Management and Loan Underwriting.  3 Credits.
This course focuses on the theory and techniques used to underwrite bank loans and manage a bank loan portfolio. Other fundamental bank processes such as management of liquidity, investment portfolios, funding costs and capital adequacy also are examined. Emphasis is placed on the application of real-world best practices.
Prerequisites: Take FIN 350.
Offered: Every year, Spring

FIN 430. Portfolio Theory and Practice.  3 Credits.
This course offers a rigorous examination of the theory and practice of portfolio management. Topics include portfolio construction, valuation and performance measurement. Equity and fixed-income portfolio strategies are considered as well as the use of futures and options in portfolio management.
Prerequisites: Take FIN 310 and FIN 320.
Offered: Every year, Fall and Spring

FIN 440. Introduction to Fixed Income Analytics.  3 Credits.
This course introduces students to the analytical processes associated with fixed income investing. The course bridges the gap between valuing bonds based on a yield to maturity and valuing bonds as a package of zero-coupon instruments. The concepts of theoretical spot rates, par rates of the on-the-run treasury securities, duration and convexity are discussed. A binomial model is explained and used to value bonds that have built-in options.
Prerequisites: Take FIN 310 and FIN 320.
Offered: Every year, Fall

FIN 450. Applied Portfolio Management.  3 Credits.
Students apply investment and portfolio management techniques and strategies in a real-life environment by managing a portion of the Quinnipiac University Endowment fund—the Student-Managed Portfolio. Students are responsible for developing investment strategies, constructing, monitoring and rebalancing the portfolio, and reporting on actual portfolio performance. Permission of instructor required.
Prerequisites: Take FIN 310 and FIN 320.
Offered: Every year, All

FIN 451. Applied Portfolio Management II.  3 Credits.
This course is a continuation of FIN 450 for students who have excelled in Applied Portfolio Management I and wish to take a leadership role in the management of the fund. Permission of instructor required.
Prerequisites: Take FIN 450.
Offered: Every year, All

FIN 455. Financial Markets and Monetary Policy.  3 Credits.
This course focuses on analysis of the immediate level of economic activity and how the tools of monetary policy can be used to affect future economic activity. Data are obtained from original sources to determine the history of key economic variables and their present status. The economic variables are then utilized to develop a class consensus on the current state of the economy. Based on this class consensus, alternative monetary policy action is considered with a consensus again being developed. A team of students from the class presents the consensus reports to the Federal Reserve Bank of Boston as part of the National College Fed Challenge. Permission of department chair required.
Prerequisites: Take FIN 350 or EC 341.
Offered: Every year, Fall
FIN 460. Mergers and Acquisitions. 3 Credits.
This course presents the theory and evidence of corporate acquisitions and restructuring activities. Topics include the foundations of mergers and restructurings, the valuation of assets, various means of financing acquisitions, defensive strategies, as well as post-merger, acquisition, and take-over performance.
Prerequisites: Take FIN 380.
Offered: Every year, Spring

FIN 465. Working Capital Management. 3 Credits.
This course examines the theory and practice of cash and liquidity management. Topics include cash management, credit and accounts receivable management, collections and cash concentrations, short-term investments and borrowing, forecasting cash flows, and international cash management.
Prerequisites: Take FIN 201.
Offered: Every other year, Summer

FIN 470. Trading Strategies and Practices. 3 Credits.
This course introduces financial market microstructure and trading strategies to students. The lectures focus on how trading on exchanges is organized and regulated as well as price formation, informational efficiency and liquidity. Various trading strategies are explored using the Financial Trading Systems (FTS) simulation.
Prerequisites: Take FIN 370.
Offered: Every year, Fall

FIN 480. Valuation of Privately Held Businesses. 3 Credits.
This course involves the analysis of company and financial information as well as understanding the impact the economy and industry can have on the value of a private company. Fundamental analysis is examined in detail and applied to private and public corporations. Topics include valuation, forecasting growth and value generation in a firm, assessing the quality of and normalizing earnings, analyzing risk and determining pricing multiples and the cost of capital.
Prerequisites: Take FIN 380.
Offered: Every year, Fall

FIN 485. Derivative Securities. 3 Credits.
This course introduces students to derivatives and the markets in which they are traded. Emphasis is on the techniques for the valuation of options, futures and related contracts as well as the use of derivative contracts in investments, corporate finance and risk management and engineering of structured products.
Prerequisites: Take FIN 310.
Offered: Every year, Spring

FIN 488. Finance Internship. 3 Credits.
This internship in finance must be approved by the department chair and the dean in accordance with school and departmental regulations. Junior/senior status is required. This course is graded on a pass/fail basis.
Prerequisites: Take FIN 201.
Offered: Every year, All

FIN 498. Independent Study. 3 Credits.
Students may make an individual in-depth study of a topic of current interest in the field of banking or investment management. Objectives and methods must be submitted in writing to supervising instructor prior to time of enrollment.
Offered: As needed

FIN 499. Independent Study in Managerial Finance. 3 Credits.
This course provides an opportunity for individual in-depth study of a topic of current interest in the field of managerial finance. Objectives and methods submitted in writing to supervising instructor prior to time of enrollment.
Offered: As needed

First-Year Seminar (FYS)

FYS 101. First-Year Seminar. 3 Credits.
A Quinnipiac University education formally begins in the very first semester. Each student enrolls in a faculty-designed seminar constructed to help examine a fundamental issue or question from multiple perspectives. This seminar is designed to accomplish three essential goals. First, it introduces students to the concept of inquiry as a process that utilizes multiple approaches and perspectives to systematically investigate questions or problems. Students learn that the process of inquiry includes the collection, analysis and evaluation of various types of evidence. Second, the seminar enables students to understand how the process of inquiry works in practice through an investigation of a particular content area that the instructor selects from their area of expertise. Finally, students begin to develop a guiding question that they wish to explore throughout their undergraduate experience in light of the skills and knowledge that they acquired throughout this course.
Offered: Every year, Fall and Spring

FYS 150. First-Year Seminar Modules. 1 Credit.
Offered: Every year, Fall and Spring

Fitness, Leisure and Wellness (FLW)

FLW 102. Yoga Yashtanga/Vinyasa. 1 Credit.
Through yoga, students learn to honor their bodies, quiet their minds and relieve stress and anxiety. Practicing yoga helps participants to bring peace and order into their busy lives.
Offered: Every year, Fall and Spring

FLW 103. Introduction to Meditation. 1 Credit.
Modern neuroscience shows that what we do and think can change the physical structure of the brain—yet often this change occurs unconsciously, when we habitually react to stress in unhealthy ways. This course incorporates Neurosculpting®, a complete approach for consciously reshaping our brains for greater happiness, health, creativity and compassion. Students have a unique experience of meditation, mindfulness, diet and daily practices to help create positive, lasting changes in the brain—and in daily life.
Offered: Every year, Fall

FLW 106. Fundamentals of Boxing. 1 Credit.
Basic offensive and defensive boxing skills are taught and practiced. Balance, movement and conditioning are stressed. Timed workouts include rope jumping, punching bags, shadow boxing and sparring. Final class may be held in actual boxing facility.
Offered: Every year, Fall

FLW 109. Indoor Rock Climbing. 1 Credit.
This is a basic course in rock climbing, utilizing indoor climbing walls at an off-campus facility. Students are taught proper technique, safety and knots. They also learn how to purchase, use and maintain equipment. Course is offered off campus at Prime Club in Wallingford. Students must provide their own transportation.
Offered: Every year, Fall and Spring
FLW 113. Beginning Golf. 1 Credit.
Students are introduced to the fundamentals of golf, including the use of irons, woods and putter, as well as rules of golf and course etiquette. A full set of clubs is provided. Course is taught off campus at Sleeping Giant Golf Course in Hamden. Students must provide their own transportation.
Offered: Every year, Fall and Spring

FLW 115. Beginners Tennis. 1 Credit.
Students are introduced to the basic skills of tennis with special emphasis on forehand, backhand, serve and playing strategies. Scoring, rules of tennis, and court etiquette also are presented. Small classes learn in a fun-filled environment. Racquets and balls are provided.
Offered: Every year, Fall and Spring

FLW 117. Beginning Golf for Women. 1 Credit.
This course is gender-specific for women. It informs a female beginning golfer's understanding and appreciation of the game of golf. Students are introduced to all of the elements of golf as they relate to the rules of the game, the techniques of the various golf swings, and the art of self-management before, during and after a game. Any permanently or temporarily physically challenged individual is welcome to attend this class; special arrangements are made to maximize their golf experience. Full sets of golf clubs are provided.
Offered: Every year, Fall and Spring

FLW 118. Jujitsu. 1 Credit.
This course focuses on learning and applying the fundamental techniques of Brazilian Jujitsu. Students learn the basic knowledge and skills needed (such as movements, positions and concepts) in a progressive skill building approach. Instruction emphasizes proper technique, mobility, pressure and leverage awareness. The aim is to improve fitness, health and overall wellness. Course is intended for those interested in establishing a foundational knowledge of Brazilian Jujitsu, or for those who would like to learn self-defense.
Offered: Every year, Fall and Spring

FLW 119. Advanced Golf Weekend Workshop. 1 Credit.
This course is presented as a weekend golf school, with lessons and playing time for intermediate and advanced golfers only. Every aspect of the game is covered in seminars, on the driving range and on the golf course. Students must be available Friday, from 4-7 p.m., and Saturday and Sunday, from 10 a.m.-4 p.m. Course is taught off campus at Laurel View Country Club in Hamden. Students must provide their own transportation.
Offered: Every year, Fall and Spring

FLW 123. Yoga Pilates Fusion. 1 Credit.
Yoga Pilates Fusion is a challenging dynamic class that combines the fundamentals of yoga with mat exercises designed by Joseph Pilates. It is a music-driven class that includes warm-up, sun salutations, warrior poses, balance challenges and intensive core work to strengthen both the front and back body. Deep stretches, hip opening sequences and relaxation complete the workout.
Offered: Every year, Fall and Spring

FLW 124. PiYo. 1 Credit.
PiYo® is a fun, musically driven, high energy, athletic workout inspired by the mind/body practices of Pilates and yoga. It includes dynamic movement, strength training, balance challenges and flexibility training. PiYo® is equipment free and can be done with or without shoes. It offers modifications as well as exercise progressions to meet every student's needs. Benefits of PiYo® include improved strength, flexibility, balance and stress reduction as well as overall fitness.
Offered: Every year, Fall and Spring

FLW 125. Pilates. 1 Credit.
Pilates is one of the most challenging and effective means of building core stability, improving body mechanics, balance, coordination, strength and flexibility. Starting with the foundation of mat Pilates, this course presents an in-depth approach to breathing instruction, body alignment and a unique set of challenging exercise sequences. Students learn basic anatomy and physiology as it relates to Pilates.
Offered: Every year, Fall and Spring

FLW 126. Fundamentals of Kickboxing. 1 Credit.
Patterned after the training routines of international competitive kickboxers, this course teaches basic and intermediate boxing and kicking techniques, footwork, combinations, and if desired, light sparring. It provides an excellent cardiovascular workout and flexibility training, while enhancing muscular endurance.
Offered: Every year, Fall and Spring

FLW 127. Beginning Fencing. 1 Credit.
This course presents the fundamentals of fencing using the three classes of weapons: foil, sabre and epee. Offensive and defensive movements are studied, as well as the techniques of engage, disengage, parry and lunge. It is the perfect sport for students of all ages, sizes and abilities. All equipment is provided.
Offered: Every year, Fall and Spring

FLW 128. Step and Sculpt. 1 Credit.
This fundamental course offers a unique blend of simple and easy-to-learn step choreography with intervals of strength training using free weights, resistance bands, medicine balls and more. Students improve their overall fitness, including endurance, strength and agility while learning the proper form to execute all exercises.
Offered: Every year, Fall and Spring

FLW 130. Stress Management. 3 Credits.
The course provides an opportunity to examine stress and its relationship to one's health. Topics include common sources of stress, lifestyle, coping strategies and relaxation techniques. This is a comprehensive course designed to expose students to a holistic approach to stress management, with regards to both cognitive (coping) skills, and a host of relaxation techniques with the intention to reduce the physical symptoms of stress. This course is composed of both theoretical and experiential learning through a series of class exercises and techniques.
Offered: Every year, Fall and Spring

FLW 131. Introduction to Orienteering. 1 Credit.
Orienteering is a unique mix of fun, fitness, mental challenge and immersion in nature's beauty. In this course, students learn how to read orienteering maps, use a compass for navigation and incorporate physical fitness in an exciting outdoor sport. Using surrounding state/national parks, students traverse terrain, sometimes difficult, to race from point to point while navigating only with a map and compass. Time is split between classroom and outdoor experiences.
Offered: Every year, Fall and Spring

FLW 133. Food As Medicine. 1 Credit.
Plants have many constituents beyond macronutrients, vitamins and minerals that play a role more like a medicine than a nutrient. Students learn to view food as an effective preventive strategy, making us less susceptible to bacteria and viruses. The course covers the impact of a healthy microbiome on human physical and mental health, as well as soil and plants. Students explore local food and learn delicious ways to get more in our daily diet.
Offered: Every year, Fall and Spring
FLW 135. Rocks and Ropes Camp-Out Weekend. 1 Credit.
This two-day, two-night class includes group challenges, high and low rope course activities, a night hike, and canoe instruction on the lake. Food and lodging are provided. Students must provide their own sleeping bag. Course is offered off campus at Deer Lake in Killingworth. Students must provide their own transportation.
Offered: Every year, Fall

FLW 139. Fitness Training and Nutritional Strategy. 1 Credit.
This fitness program is designed to decrease body fat and increase lean body mass through cardiovascular exercise, circuit training, resistance training, and proper nutrition.
Offered: Every year, Fall and Spring

FLW 143. Recreational Games Weekend. 1 Credit.
Leisure time games are the agenda for this class. Activities may include volleyball, duckpin bowling, dodgeball, kickball, pickleball and more. Students must be available Friday, from 4-7 p.m., and Saturday and Sunday, from 10 a.m.-4 p.m.
Offered: Every year, Fall and Spring

FLW 144. Fresh Water Fishing Weekend. 1 Credit.
Fishing is one of the most popular recreational activities in America. This course provides information about rods and reels; fishing line, hooks, bobbers and lures; fishing knots; types of fish; releasing fish; cleaning and cooking fish. Instruction includes classroom as well as actual fishing time. Students must be available Friday, from 4-7 p.m., and Saturday and Sunday, from 9 a.m.-2 p.m. Course is offered off campus at Hamden ponds. Students must provide their own transportation.
Offered: Every year, Fall and Spring

FLW 145. willPower & Grace®. 1 Credit.
This course is based on willPower & grace®—a dynamic, functional fusion group exercise program. The workout is the ideal cardiovascular solution for mind-body practitioners. It is practiced barefoot, equipment-free and infused with positive and motivating philosophy. The willPower & grace® workout is an easy-to-follow, linear, strong and focused program structured for students of all levels. Goal setting is used to help ensure progression. This workout is a manifestation of strength and elegance. Students learn to link the strength, power and desires of the mind with the demands and potential of the body.
Offered: Every year, Fall and Spring

FLW 148. Spinning. 1 Credit.
Spinning is an indoor cycling program. Participants set their own level of intensity by adjusting the bike’s resistance. In this course, students learn proper bike setup and safety, heart rate training guidelines and aerobic base building principles. The riding time begins at 30 minutes and progresses each week with a final ride of 1 hour, 15 minutes. Everyone succeeds. Spinning is taught at the York Hill Campus.
Offered: Every year, Fall and Spring

FLW 151. Cardio Conditioning. 1 Credit.
This class delivers a total body workout, combining non-impact aerobic and progressive training with hand-held weights and resistance rubber bands (no weight room). Class activities provide the most efficient and effective methods to improve cardiovascular performance while strengthening and sculpting muscle groups.
Offered: Every year, Fall and Spring

FLW 152. Cardio Sculpt and Pump. 1 Credit.
This class features a total body workout and an insightful approach to highly practical, safe, adaptable techniques specifically designed to develop strength, balance and flexibility. The instructor utilizes a specific contingent of conditioning exercises with emphasis on precision (no weight room). Aesthetics aside, this is a great way to develop good posture and a strong, flexible, graceful body.
Offered: Every year, Fall and Spring

FLW 153. Flow Yoga. 1 Credit.
An innovative series of yoga postures that build and flow with sequential linking challenging your muscular strength, cardiovascular endurance, flexibility, balance, and mental stamina.
Offered: Every year, Fall and Spring

FLW 154. Cardio Kickboxing. 1 Credit.
This is a high-energy aerobic workout consisting of real kickboxing and self-defense techniques choreographed to the latest techno and trance music. Participants sweat and tone the upper and lower body with jabs, punches, kicks and more.
Offered: Every year, Fall and Spring

FLW 159. Fitness Leisure Wellness Elective. 1-3 Credits.

FLW 161. Ballroom Dancing. 1 Credit.
Learn to tango, salsa, swing and more. This course covers basic patterns and some variations in three to four dances with an emphasis on basic technique and learning to move comfortably on the dance floor.
Offered: Every year, Fall and Spring

FLW 162. Canoeing Weekend. 1 Credit.
In this course, participants learn to canoe. Instruction allows students to explore several parts of the Connecticut coastline including lakes, the Farm River and New Haven harbor. No experience is necessary; all equipment is provided. Students must be available Saturday and Sunday, from 9 a.m.-5 p.m. Course is offered off campus at Hanover Pond in Meriden. Students must provide their own transportation.
Offered: Every year, Fall

FLW 164. Basic Kayaking Skills. 1 Credit.
Students are taught the basics of kayaking, paddling techniques, using good judgment, safety and rescue. This two-day workshop consists of classroom studies and hands-on training. The second day consists of a kayak trip to practice and perfect the newly learned skills, learn about kayak safety and rescue. Students must be able to swim.
Offered: Every year, Fall and Spring

FLW 165. Introduction to Power Lifting. 1 Credit.
This class covers proper form and technique as it relates to weight lifting for beginner and intermediate students. Topics include: the basics of repetition schemes, the effect of changing reps and weights for maximum muscle hypertrophy and/or growth, and proper nutrition for optimal recovery and results, including nutrient timing and basic supplementation for weight lifting. The class includes lectures as well as workout time in the Fitness Center.
Offered: Every year, Fall and Spring

FLW 166. Intermediate Ballroom Dancing. 1 Credit.
Experienced dancers learn dance steps with an emphasis on technique, style and lead and follow. Dances and techniques taught in this class can be used throughout your lifetime. Skills and dance etiquette learned in this class give you confidence on any dance floor.
Offered: As needed
FLW 167. Walking. 1 Credit.
This course introduces students to the performance of fitness walking as a lifelong activity that maintains and enhances physical health and overall well-being. The course provides the information to prepare students to organize, plan and implement a safe walking program.
Offered: Every year, Fall and Spring

FLW 170. Fitness Frenzy. 1 Credit.
In this dynamic course, students learn about the cardiovascular and muscular endurance components of physical fitness through a variety of physical activities to promote health and well-being. Students learn basic anatomy and physiology as it relates to the movements and exercise formats in each class setting. Class design focuses on a specific modality, incorporates core conditioning and ends with flexible strength for a complete training session.
Offered: Every year, Fall and Spring

FLW 171. All Levels Golf Weekend. 1 Credit.
This class is aimed at improving the playing skills and course management techniques of all participants. This weekend course includes lessons and practice time in a variety of settings. A round of golf is played each day. Golf clubs are provided when necessary. Students must attend ALL sessions: Friday, from 4-7 p.m. and Saturday and Sunday, from 10 a.m.-4 p.m. Instruction takes place off campus at Laurel View Country Club in Hamden. Students must provide their own transportation.
Offered: Every year, Fall and Spring

FLW 172. Introduction to Jazz Technique. 1 Credit.
This course combines jazz/modern warm-up with an emphasis on stretching. This technique study enhances body placement (alignment) and conditioning. Students learn general health guidelines and nutrition, while mastering choreography pieces.
Offered: Every year, Fall and Spring

FLW 174. Ballet to Broadway - Classical Technique Applied to Contemporary Choreography. 1 Credit.
Students study ballet technique, including classical training in barre, center floor and across the floor. Students learn the influences of Russian, French and Italian, including styles of arm carriage (port de bras) and arabesque lines. They learn ballet technique in strength and body placement, and choreography with contemporary styles using American Musical Theatre arrangements.
Offered: Every year, Fall and Spring

FLW 175. Yoga Foundation and Fundamentals. 1 Credit.
Yoga is more than movement. This class explores the theory, rationale and basic components of yoga that go beyond the poses themselves. Students focus on movement, meditation and "yogic sleep" and how they fit into our everyday life. This course provides a strong foundation to what yoga is really about. Taught at York Hill.
Offered: Every year, Fall and Spring

FLW 176. Physical Activity and Community Service. 1 Credit.
This class involves various activities coupled with community service. Activities may include general park maintenance, invasive tree and plant management, and home and neighborhood restoration projects. Course takes place on two consecutive Saturdays; students must be available for both dates. Instruction takes place off campus.
Offered: Every year, Fall and Spring

FLW 177. Yoga Foundation and Fundamentals. 1 Credit.
This course introduces students to the performance of fitness walking as a lifelong activity that maintains and enhances physical health and overall well-being. The course provides the information to prepare students to organize, plan and implement a safe walking program.
Offered: Every year, Fall and Spring

FLW 178. Bowling. 1 Credit.
Students learn the proper techniques of bowling, including bowling etiquette. Instruction is targeted to various skill levels, from beginner to advanced bowlers. Topics include proper grip, stance, how to keep score, positioning and different methods of throwing the ball. Instruction takes place off campus; students must provide their own transportation.
Offered: Every year, Spring

FLW 180. Self Defense - Krav Maga. 1 Credit.
This course introduces students to the basic physical and mental skill sets needed to increase the probability of surviving an attack. Students focus on nonweapon close combat methods, including proper fighting stance, movement, striking, choke defense, headlock defense and defense against displacement attacks. Students work closely with the instructor in a structured environment where safety is considered the top priority, followed closely by fun and fitness!
Offered: Every year, Fall and Spring

FLW 181. Cardio Stomp. 1 Credit.
This class offers a cardio workout with dance influence. The class moves at a high-pace rhythm. Claps, taps and runs get the heart beating to the sound of music. This is a high-speed dance style movement class. Dancers and nondancers, runners and walkers will enjoy this class.
Offered: Every year, Fall and Spring

FLW 182. Taekwondo I. 1 Credit.
Taekwondo is a form of self-defense, an art form, and a competitive sport. Classes consist of extensive stretching, the teaching of basic forms of self-defense and sparring techniques including traditional punching, kicking and blocking techniques. Students gain an understanding of the ancient martial arts discipline for self-defense, the principles of self-control, focus, balance, oneness and self-discipline. Taekwondo emphasizes the use of the whole body, enhances flexibility and coordination and increases aerobic capability. Promotional tests are held at the end of each semester.
Offered: Every year, Fall and Spring

FLW 190. Essentials of Fitness and Wellness. 3 Credits.
The course covers health-related illnesses, leading causes of death and disease prevention through healthy lifestyle choices. Students explore the connections between the dimensions of wellness and the impact on personal health. Topics include the benefits of the five components of physical fitness including cardiovascular, muscle strength, muscle endurance, body composition and flexibility. Students assess their own fitness and wellness through class activities and assignments.
Offered: Every year, Spring

FLW 195. Eco-Fashion. 2 Credits.
This unconventional sewing course does not require the operation of a sewing machine or use of textiles to design garments. Students learn sewing basics, including reading patterns, layout and cutting, taking body measurements, conducting fittings and hand-stitching seams. Each student designs and constructs one item of clothing and one accessory item using 100 percent sustainable materials. Finished projects are showcased at the Sustainable Fashion Show on Earth Day, which is fully organized and managed by students.
Offered: Every year, Spring

FLW 199. Independent Study. 1 Credit.
FLW 215. Wellness Through Community Action: Best Buddies. 2 Credits.
Students actively participate in planning, organizing, implementing and evaluating a community event with a service learning approach. Students have meaningful involvement in planning the Best Buddies Connecticut Friendship Walk hosted by the School of Health Sciences. Essential topics to be covered include dimensions of wellness, event planning, sponsorship, marketing, programming, volunteer management and intellectual and developmental disability awareness. Students must be available for the Best Buddies weekend, Saturday, from 9 a.m.-noon, and Sunday, from 10 a.m.-3 p.m.
Offered: Every year, Fall

FLW 282. Taekwondo II. 1 Credit.
This class is designed for the student who wishes to continue studying the art and sport of Taekwondo including punching, kicking and blocking techniques, as well as the disciplines of self-control, focus, balance and oneness. Taekwondo teaches students techniques to defend themselves, provides a great workout and promotes a healthy lifestyle.
Prerequisites: Take FLW 180 or FLW 182.
Offered: As needed

FLW 283. Fundamentals of Mixed Martial Arts. 1 Credit.
This fundamentals course uses mixed martial arts techniques from all over the world to teach students the proper skills of kickboxing, wrestling and Brazilian Jujitsu. Students achieve a high level of strength, speed and coordination while learning about flexibility, muscular strength and endurance during this cardiovascular workout.
Prerequisites: Take one course from FLW 106 FLW 126 FLW 180 FLW 182 or consent from the instructor.
Offered: As needed

French (FR)

FR 101. Elementary French I. 3 Credits.
This introduction to the French language focuses on oral practice, basic grammar study, and practice in reading and writing. Students who have three or more years of high school French with grades of B or above may not take this course for credit.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

FR 102. Elementary French II. 3 Credits.
This course is a continuation of FR 101.
Prerequisites: Take FR 101 or placement into FR 102.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

FR 189. French Elective. 3 Credits.
FR 200. Special Topics. 3 Credits.
Offered: As needed

FR 201. Intermediate French I. 3 Credits.
This course is for students who wish to develop further their ability to read, write and speak French. Reading is drawn from a wide variety of fictional works and forms (short story, plays, poems) on topics of general interest.
Prerequisites: Take FR 102 or placement into FR 201.
Offered: Every year, Fall
UC: Breadth Elective, University Curriculum Ele

FR 202. Intermediate French II. 3 Credits.
This course is a continuation of FR 201.
Prerequisites: Take FR 201.
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Ele

FR 299. Independent Study. 3 Credits.
By special arrangement with instructor and with approval of department chair.
Offered: As needed, All

FR 300. Special Topics. 3 Credits.
Prerequisites: Take FR 202.
Offered: As needed

FR 301. Advanced French I. 3 Credits.
Students examine selections from modern French literature, based on shorter prose works. Basic language skills are reinforced and critical skills are introduced.
Prerequisites: Take FR 202 or placement into FR 301.
Offered: As needed, Fall
UC: Breadth Elective

FR 302. Advanced French II. 3 Credits.
This course is a continuation of FR 301.
Prerequisites: Take FR 301.
Offered: As needed, Spring
UC: Breadth Elective, University Curriculum Ele

FR 399. Independent Study. 3 Credits.
By special arrangement with instructor and with approval of department chair.
Offered: As needed

FR 499. Independent Study. 3 Credits.
By special arrangement with instructor and with approval of department chair.
Offered: As needed, All

Game Design & Development (GDD)

GDD 101. Introduction to Game Design. 3 Credits.
This course introduces students to the practice of game design (board, card, dice, physical games), theories of game design and play, the study of the social effects of games, the role of serious games for teaching and learning and production practices in the games industry.
Offered: Every year, All

GDD 102. Drawing for Animé, Games and Animation. 3 Credits.
In this course, students learn through observational drawing basics of proportion, anatomy, weight and balance to develop characters for video games, 2D and 3D animation. Topics include approaches to stylization such as anime and graphic novels. Students use both traditional pencil and paper as well as Adobe Photoshop and other software.
Offered: Every year, Spring

GDD 110. Introduction to Visual Design for Games. 3 Credits.
This foundation course prepares students for upper-level coursework by introducing critical, analytical and problem-solving strategies for researching and developing graphics for games. Practical hands-on methods include visual research, design journals, thumbnail sketches, concept art, pixel art, storyboarding, 2D and 3D development tools.
Offered: Every year, Fall
GDD 140. Creativity and Computation. 3 Credits.
This course teaches software literacy within the visual arts and visual literacy within technology. Students develop basic coding expertise and the confidence necessary to create interactive artwork and games. The course teaches essential 21st-century skills including computational and systems thinking, along with quantitative reasoning coupled to creative problem solving and generative visual aesthetics. No previous experience with programming necessary.
Offered: Every year, Fall

GDD 175. Special Topics in Game Design. 3 Credits.
Courses of particular interest to game design students offered on an occasional basis. These courses have no prerequisite. See the Special Topics Bulletin on the Registrar’s website for specific course descriptions.
Offered: As needed

GDD 200. Introduction to Game Development. 3 Credits.
This course provides an overview of game development through project work. Students examine different game genres, game mechanics and playability, sound, level and interface design. Through project work, students gain an understanding of the game development life cycle and the roles of design teams.
Prerequisites: Take GDD 140 or CSC 110 or equivalent college level programming course.
Offered: Every year, Spring

GDD 201. Game Design I. 3 Credits.
In this course, students delve deeper into game design principles and how they apply to games. Students critically assess game concepts, objectives, narrative structure and storyline, character, game mechanics, playability and the potential of meaningful or serious “play” for teaching and learning. Students apply the results to a variety of game design projects while learning HTML, CSS and Javascript and building a portfolio website.
Prerequisites: Take GDD 101 or GDD 201.
Offered: Every year, Fall

GDD 202. Game Art I. 3 Credits.
This course introduces students to the software tools required to design and build 3D assets for games and animation, gain knowledge of the 3D design pipeline and begin building a portfolio website to display their best artwork.
Prerequisites: Take GDD 102 or GDD 110 or permission of the program director.
Offered: Every year, Fall

GDD 210. Game Lab I: Team Projects. 3 Credits.
This is the first of a two-course sequence focusing on game production, coding, prototyping and playtesting. In Game Lab I, students work individually and in teams to define and develop game concepts, research content, develop game mechanics, create game assets and build working prototypes.
Prerequisites: Take GDD 200.
Offered: Every year, Fall

GDD 211. Game Lab II: Team Projects. 3 Credits.
This course is a continuation of GDD 210. Students continue to work in teams to build working prototypes while learning about the game development process, project management, play testing and usability testing. Prerequisite may be waived with permission of the program director.
Prerequisites: Take GDD 210.
Offered: Every year, Spring

GDD 250. Interactive Storytelling and Narrative. 3 Credits.
Students critically analyze narrative structure and character development based on readings and game play. Students use creative writing, create interactive multimedia projects and create games that explore new emerging forms such as digital storytelling, interactive theater, and virtual worlds.
Offered: As needed

GDD 290. Internship. 1-3 Credits.
Under the supervision of a faculty member and a participating private company, corporation, institution or community organization, students gain real-world experience working in the field of game design or related fields. For majors or minors in game design and development. Requires permission of the program director.
Offered: Every year, All

GDD 299. Independent Study. 3 Credits.
Under the supervision of a faculty member, students pursue self-directed research and in-depth study in a subject that is not covered by the existing curriculum.
Offered: As needed

GDD 300. Special Topics in Game Design. 3 Credits.
Offered: As needed

GDD 301. Game Design II. 3 Credits.
Students continue the critical assessment of games from a number of perspectives including: narrative structures and storylines, game mechanics and gameplay and the potential of meaningful or serious “play” for teaching and learning. Students apply this knowledge by designing games for different platforms which may include browsers, phones, virtual reality and evolving technologies.
Prerequisites: Take GDD 210 or GDD 201.
Offered: Every year, Spring

GDD 302. Game Art II. 3 Credits.
Students continue working with software tools required for designing and building 3D assets such as characters, costumes, props, levels, environments and worlds. Students continue adding their best artwork to their portfolio website.
Prerequisites: Take GDD 202.
Offered: Every year, Spring

GDD 303. The Art of Audio Narrative (FTM 380 EN 303). 3 Credits.
This course is about storytelling. Students learn the basics of multi-track audio recording and mixing. They write and produce fiction and nonfiction audio narratives. Each project is shared in a stimulating and mutually supportive workshop environment. Students read and listen widely to gain a sense of the history and theory of radio art. Participants also spend time identifying target audiences and looking at ways to distribute student work to the larger world of public and independent radio. Prerequisite may be waived with permission of program director.
Prerequisites: Take GDD 101.
Offered: Every other year, Fall

GDD 310. Game Lab III: Team. 3 Credits.
Game Labs III and IV form a two-course sequence that builds upon the experience of game design and prototyping gained in Game Labs I and II. Students work in teams to develop and playtest working prototypes. Prerequisite may be waived with permission of the program director.
Prerequisites: Take GDD 211.
Offered: Every year, Fall
GDD 311. Game Lab IV: Team Projects. 3 Credits. 
This course is a continuation of Game Lab III. Students work in teams to build working prototypes and manage the life cycle of the game development process including troubleshooting, playtesting, usability testing and revisions. Prerequisite may be waived with permission of the program director.
Prerequisites: Take GDD 211 or GDD 310.
Offered: Every year, Spring

GDD 350. Board Game Design. 3 Credits. 
This course provides an introduction to the design of table-top and board games. Board games share many ideas with digital games but utilize different game mechanics. Designing for board games explores the practice of alternate approaches to game design, and the skills learned in this class can be applied to both. Topics include design, history, manufacturing and different genres such as classic board games, deck-building games and card-based strategy games.
Offered: As needed

GDD 370. Acting and Directing for Game Design. 3 Credits. 
This course provides an introduction to the craft of directing and acting for game production. Topics include story analysis and interpretation, director’s concept, and the history and theories of directing. Students learn the basic principles of acting, including scene analysis, motivation, intention and character work. They perform exercises, monologues and scenes. Additional topics include methods of actor coaching, rehearsal techniques and working with the creative game design team.
Offered: As needed

GDD 380. The Business of Games. 3 Credits. 
This course helps students gain an understanding of how to develop and run a successful video game business. Students look at existing businesses and new businesses as models and cautionary tales. Topics include developing financials, how to market a business, building a strong company culture, how to crowdfund and how to incorporate.
Offered: As needed

GDD 390. Internship. 1-3 Credits. 
Under the supervision of a faculty member and a participating private company, corporation, institution or community organization, students gain real-world experience working in the field of game design or related fields. For majors or minors in game design and development. Requires permission of the program director.
Offered: Every year, All

GDD 394. History of Video Games. 3 Credits. 
Video games are an interactive medium grounded in step-by-step innovation in console and computer systems combined with parallel development in software capabilities. This course examines the cultural, social and educational aspects of games and considers how they changed over time in response to market pressures, societal concerns about content and technological development. Students play and analyze historical games, learn how to write game reviews and research new phenomenon in game development.
Prerequisites: Take GDD 101 or permission of the program director.
Offered: Every other year, Spring

GDD 395. Critical Game Studies Seminar (PL 395). 3 Credits. 
In this course, students address topics in game studies, ludology or play theory to develop critical, conceptual and cultural understandings of narrative, meaning and identity in games. The course also addresses the design and development of serious and meaningful games and the aesthetic, social and technological implications of new emerging forms. Prerequisite may be waived with permission of the program director.
Prerequisites: Take GDD 101 or PL 101.
Offered: Every year, Fall

GDD 396. Games, Learning & Society. 3 Credits. 
This course addresses the design and use of serious and meaningful games in the areas of education, health care and medicine. The use of videogames for a variety of pro-social uses is rapidly expanding. In this course, we examine how games can affect learning related to health issues, be used as a tool to collect data, and to motivate desirable behavior changes.
Offered: As needed

GDD 399. Independent Study. 1-6 Credits. 
Under the supervision of a faculty member, students pursue self-directed research and in-depth study in a subject that is not covered by the existing curriculum.
Offered: As needed

GDD 402. Game Art III. 3 Credits. 
Students continue with more advanced work using software tools required for designing and building 3D assets. Topics include techniques of advanced 3D modeling, texturing, lighting, motion capture and animation, scene planning, virtual camera angles, rendering, editing and compositing. Students continue adding their best artwork to their portfolio website.
Prerequisites: Take GDD 302.
Offered: Every year, Fall

GDD 405. Game Audio Design. 3 Credits. 
This course covers sound design for games while exploring techniques of digital sound synthesis, recording, sampling and editing. Prerequisite may be waived with permission of program director.
Prerequisites: Take GDD 200.
Offered: As needed

GDD 410. Game Lab V: Team Projects. 3 Credits. 
Game Lab V and VI forms a two-course sequence that builds upon the knowledge and skills of prior courses. With a focus on the process of iteration this course extends the experience of game production, coding, prototyping and playtesting gained in previous Game Labs. Students learn the basics of agile development and how to put it into practice. For game design and development majors.
Prerequisites: Take GDD 211 and senior status or permission of the program director.
Offered: Every year, Fall

GDD 411. Game Lab VI: Team Projects. 3 Credits. 
This course is a continuation of Game Lab V. At the end of the semester, teams present a working game and provide documentation of their design and development process. Prerequisite: For game design and development majors.
Prerequisites: Take GDD 410 and senior status or permission of the program director.
Offered: Every year, Spring
GDD 490. Internship. 1-3 Credits.
Under the supervision of a faculty member and a participating private company, corporation, institution or community organization, students gain real-world experience working in the field of game design or related fields. For majors or minors in game design and development. Requires permission of the program director.
Offered: Every year, All

GDD 495. Senior Project and Seminar I. 3 Credits.
This course is the senior capstone in the major. Students reflect on how their academic experience and extracurricular activity during their undergraduate years have shaped their personal goals and aspirations. Based on their chosen track in game design or game art, students apply this knowledge, use their skills to develop a portfolio, website, resume and other professional materials and prepare for their careers after graduation.
Prerequisites: Requires senior status and a major or minor in game design and development.
Offered: Every year, Fall

GDD 499. Independent Study. 1-6 Credits.
Under the supervision of a faculty member, students pursue self-directed research and in-depth study in a subject that is not covered by the existing curriculum. Prerequisite: Junior or senior standing.
Prerequisites: GDD tutorial courses required for graduation are offered as needed.
Offered: As needed

Geography (GP)

GP 101. Introduction to Geography. 3 Credits.
This course examines the general structure and methodology of geographical study. The physical, biotic and cultural environment and people's activities are covered, as are the world's land masses, their surface features and climates, and their relationships to human, social, economic and political organization.
Offered: Every other year, All

GP 299. Independent Study in Geography. 1-3 Credits.
Readings and projects by arrangement with the instructor for students with special interests and prior study in geography.
Offered: As needed, All

GP 323. Human and Economic Geography. 4 Credits.
The course provides an introduction to human and economic geography through conceptual models and theories, practical application of geographic principles, and the study of the current state of the world. With regard to human geography, the course introduces students to the basic concepts involved in geographic study, including the study of human populations, the connections between human society and the natural world, and the idea of culture as a geographic construct. The course then turns to a consideration of economic aspects of geography, particularly the study of resource industries, manufacturing, and the service sector of the economy.
Offered: As needed

GP 399. Independent Study in Geography. 1-3 Credits.
Readings and projects by arrangement with the instructor for students with special interests and prior study in geography.
Offered: As needed, All

German (GR)

GR 101. Elementary German I. 3 Credits.
This introduction to the German language includes oral practice, the study of basic grammar, and practice in reading and writing. Students who have three or more years of high school German with grades of B or above may not take this course for credit.
Offered: Every year, Fall
UC: Breadth Elective, University Curriculum Ele

GR 102. Elementary German II. 3 Credits.
This course is a continuation of GR 101.
Prerequisites: Take GR 101 or placement into GR 102.
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Ele

GR 200. German Business Culture. 3 Credits.
Students are introduced to vocabulary and etiquette in a German-language business context, and learn about differences between American and German business practices. Students develop practical skills, such as writing business letters, resumes, application letters and business emails, as well as communicating effectively in job interviews, common business situations and on the telephone. Students review and expand their knowledge of German grammar. Language and cultural proficiency are enhanced through a variety of homework and in-class assignments such as role-playing and individual and group projects. Particular emphasis is placed on listening and reading comprehension, as well as oral expression in complete, idiomatic sentences.
Prerequisites: Take GR 102.
Offered: As needed

GR 201. Intermediate German I. 3 Credits.
This course is for students who wish to reinforce their ability to read, write and speak German at an intermediate level.
Prerequisites: Take GR 102 or placement into GR 201.
Offered: As needed, Fall
UC: Breadth Elective, University Curriculum Ele

GR 202. Intermediate German II. 3 Credits.
This course is a continuation of GR 201.
Offered: As needed, Spring
UC: Breadth Elective, University Curriculum Ele

GR 299. Independent Study. 3 Credits.
Offered: As needed

GR 300. German Business Culture. 3 Credits.
Students are introduced to vocabulary and etiquette in a German-language business context, and learn about differences between American and German business practices. Students develop practical skills, such as writing business letters, resumes, application letters and business emails, as well as communicating effectively in job interviews, common business situations and on the telephone. Students review and expand their knowledge of German grammar. Language and cultural proficiency are enhanced through a variety of homework and in-class assignments such as role-playing and individual and group projects. Particular emphasis is placed on listening and reading comprehension, as well as oral expression in complete, idiomatic sentences.
Prerequisites: Take GR 202.
Offered: As needed

GR 399. Independent Study - German. 3 Credits.
GT 200. Biology of Aging (BMS 200). 3 Credits.
The aim of the course is to study the specific and primary changes in physiological mechanisms that result in the process of aging. See description for BMS 200.
Prerequisites: Take BIO 101 BIO 102 or BIO 150 BIO 151 or BMS 117 BMS 162.
Offered: Every year, All

GT 205. From College to Career (SO/CJ 205). 1 Credit.
This course introduces sociology, gerontology and criminal justice majors to the preprofessional skills and knowledge they need to practice prior to obtaining their internship. Students also are introduced to practical skills that will benefit them throughout their professional careers ranging from self-reflection to resume writing and email etiquette. Students meet regularly to discuss the breadth of potential careers in sociology, criminal justice and gerontology through interaction with departmental faculty and practitioners in the field. For gerontology majors only. This course is graded on a pass/fail basis.
Offered: Every year, Spring

GT 234. Adult Developmental Psychology (PS 234). 3 Credits.
This course considers facts, theory and speculation about adult development and aging. Focus is on physical, cognitive and social development as well as family and career patterns for periods of young, middle and late adulthood.
Prerequisites: Take PS 101.
Offered: Every other year
UC: Social Sciences

GT 263. Sociology of Aging (SO 263). 3 Credits.
This introduction to gerontology focuses on the myths and realities of aging explored through historic, demographic and sociological analyses of the conditions of elderly people in our society. Students critically examine the diversity of aging experiences in the U.S. The ways in which social and cultural factors enter into the aging process are also considered.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall and Spring
UC: Social Sciences, Intercultural Understand

GT 270. Program Planning and Administration (SO 270). 3 Credits.
Program planning and administration of services to the elderly are considered, as well as models of needs identification, the process of problem analysis, styles of leadership and administrative dilemmas, and elements of grant proposal writing.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every other year, Fall

GT 290. Research Methods (SO 290). 3 Credits.
This course introduces students to social science research methods. Students examine how qualitative and quantitative research methods apply to social science research. The course places particular emphasis on the importance of scientific methods in reaching informed conclusions. Students examine a number of methods commonly used in social science disciplines and learn how to interpret the results of research conducted using these methods. Understanding how social scientists investigate social phenomena allows students to accurately interpret and apply findings from social science research. Students should complete the course by the end of their sophomore year or second year in the major.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, All

GT 300. Special Topics in Gerontology. 3 Credits.
Offered: As needed

GT 305. Death, Grief and Bereavement (SO 305). 3 Credits.
Death is studied from the perspective of social interaction between the dying person, professional caregivers and family members and loved ones. Attitudes and values about death, cultural components of grief, and the function of bereavement are examined. Particular attention is paid to the social organization of “death work” and dying in bureaucratic settings, such as hospitals and nursing homes, as opposed to the non-bureaucratic structure of hospice care.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall and Spring

GT 311. Introduction to Social Work (SO 311). 3 Credits.
This course provides an introduction to the field of social work, including its historical roots, its fundamental principles and its fields of practice. The course emphasizes an integrated overview of social work methods, skills, values, ethics and the social service delivery system. Key social work concepts and service delivery systems are illuminated from micro, mezzo and macro perspectives that reflect past and present relevant issues. Students develop an introductory understanding of how psychological and social theories influence social work practice with individuals, groups and communities.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall

GT 315. Case Management (SO 315). 3 Credits.
Case management is a process used widely throughout health and social services as a means of assessing, planning, coordinating, monitoring and evaluating the services needed to respond to an individual’s health and/or service needs to attain the dual goals of quality and cost effective care. Students in gerontology, sociology, psychology, and criminal justice are likely to encounter the various roles or models of case management practice as they pursue careers in human services. This course provides a foundation for case management practice in various social service settings.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Spring

GT 325. Counseling Older Clients (SO 325). 3 Credits.
Students are introduced to theories and models of effective communication with select members of an elderly population. Topics include practical aspects of communication of social service workers with older clients, older parents, older patients and the terminally ill; interview and counseling techniques; and the role of social service workers, past and present.
Prerequisites: Take SO 101;
Offered: As needed

This course considers the social problems associated with aging, particularly in the areas of health, housing, financing and family life and the governmental policies, past, present and future, that deal with these problems.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Summer
UC: Breadth Elective, Intercultural Understand
GT 382. Studying Social Issues with Statistics (SO 382). 3 Credits.
In this course, students learn basic introductory-level statistics and quantitative reasoning skills necessary for careers in gerontology. Through hands-on project work, students learn research design, basic statistical data collection and data analysis. For gerontology majors only, junior or above.
Prerequisites: Take GT 290.
Offered: Every year, Spring

GT 385. Senior Seminar (SO 385). 3 Credits.
This senior seminar is designed as the capstone course for students majoring in sociology and gerontology. Students research a sociological or aging-related topic of their choosing and write a thesis based on their work. All senior theses represent a culmination of majors' academic experiences in the department. For gerontology majors only in the senior year.
Prerequisites: Take GT 290.
Offered: Every year, Fall and Spring

GT 392. Internship in the Community (SO 392). 3 Credits.
For gerontology majors in their junior or senior year only. Students complete 120 hours of supervised fieldwork in an agency that serves the elderly, along with one hour per week in a seminar. Coursework and seminar content include written and oral reflection focusing on the student's experience. Professional issues, along with academic concepts and theory, are explored in relation to the agency and the community it serves. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator one semester prior to beginning the placement process.
Prerequisites: Take GT 205 GT 263.
Offered: Every year, Fall and Spring

GT 394. Advanced Internship in the Community. 3 Credits.
This is a required second internship for gerontology majors in their junior or senior year only. Students complete 135 hours of supervised fieldwork in a community agency that serves the elderly along with one hour per week in the advanced internship class. Students build upon the knowledge gained from their first internship experience to deepen their understanding of concepts and theory through extended written and oral reflection. Students also assess their interpersonal strengths and weaknesses in preparation for graduate school and/or future employment. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator one semester prior to begin the placement process.
Prerequisites: Take GT 392.
Offered: Every year, Spring

Global Public Health (GPH)

GPH 201. Introduction to Global Public Health. 3 Credits.
Health is an essential human right, but much of the world still does not have access to basic public health services. The course explores how health is measured and the conditions that particularly affect the poor. Principles of public health, major global communicable diseases (e.g., HIV/AIDS, malaria and tuberculosis), maternal-child health, and noncommunicable conditions are reviewed. Strategies in control of disease and achieving global health are explored. Essential elements of study design, epidemiology and biostatistics also are taught. Course instruction includes textbooks, medical literature, popular writings, film and group work. This course is the required introductory course for GPH minor students. Non-GPH minor students need prior approval.
Offered: Every year, Spring

GPH 301. Capstone in Global Public Health. 3 Credits.
This capstone course in global public health consists of a senior seminar during which students synthesize and reflect upon their academic, service and international experiences throughout the GPH minor. Through a series of readings, discussions, writings and presentations, students review key aspects of GPH and formulate their own responses and conclusions. During the capstone seminar, students also integrate the work they have done throughout the minor. This could include narrative writings, photographs and research results. The final course requirement is a poster presentation that reports on and displays the student's GPH theme or focus and demonstrates successful completion of the minor's learning objectives. Available only to students who are minoring in global public health.
Prerequisites: Take GPH 201.
Offered: Every year, Spring

Graphic & Interactive Design (GID)

GID 110. Design Research and Methods. 3 Credits.
This foundation course in research methods for art and design introduces informed strategies for problem solving and prepares students for upper-level coursework in interactive digital design. Emphasis is placed on the role of critical thinking in the design process. Theoretical models of design analysis are introduced. Practical hands-on methods include visual research, design journals, thumbnail sketches, mind maps, storyboards, comprehensives, diagramming, prototyping, case studies, topic and content development and other forms of conceptualization.
Offered: Every year, Fall

GID 161. Web Design I. 3 Credits.
This course extends the knowledge and practice of visual design using professional-level software for the creation of web design in preparation for advanced coursework. Students produce course projects that demonstrate creativity, design concepts, critical thinking, aesthetic principles and basic technical competence.
Prerequisites: Take IDD 110 or GID 110; and COM 130.
Offered: Every year, Fall and Spring

GID 200. Special Topics in Graphics and Interactive Design. 3 Credits.
Offered: As needed

<td>GID 205</td>
<td>Visual Thinking: Practice and Process</td>
<td>4</td>
<td>Students develop the conceptual, technical and critical skills needed to build a foundation in visual thinking practices and cultivates a better understanding of the creative process. Students examine the ways in which images communicate meaning and how visual thinking can be used as an alternative to and enhancement of verbal and quantitative thinking. Insights and applications to different fields including psychology, art, medicine, literature and business are explored throughout. The study and practice of a variety of visual thinking techniques build the foundation for generating innovative concepts and developing personal creative and visual thinking practices. No previous art, design or drawing experience necessary.</td>
<td></td>

<td>GID 210</td>
<td>Graphic Design History</td>
<td>3</td>
<td>This course surveys the historical and cultural events, movements and achievements that laid the groundwork for the contemporary practices and products of graphic design. Through lecture, video, discussion, research and studio projects, students are introduced to the visual history, the innovators and the technologies that influenced and transformed the practices of visual communication.</td>
<td></td>
</tr>
<tr>
<td>GID 250</td>
<td>Web Design II</td>
<td>3</td>
<td>This intermediate web design course provides further study in current industry standards for UX/UI design. User experience and user interface methods are explored and practiced in addition to a grounding in information architecture processes and techniques. Websites are developed using responsive design requirements.</td>
<td></td>
</tr>
<tr>
<td>GID 270</td>
<td>Typography I</td>
<td>3</td>
<td>This course enables the student to both understand type and to use it as a design element. Using current computer graphics technology, topics explored include the use of type, page layout, color and the importing of graphics. Using professional page layout software, students create projects that demonstrate both design aesthetics and technical skills. Finished pieces are printed and become part of the student's portfolio.</td>

Note: The information provided is an overview of the courses offered within Graphic & Interactive Design (GID) and includes prerequisites, credits, and a brief description of each course. For a comprehensive understanding, please refer to the full course catalog or contact the academic department.
GID 490. Internship. 3 Credits.
Under the supervision of a faculty member and a participating private company, corporation, institution or community organization, students gain real-world experience working in the field of digital design. For majors in interactive digital design.
Offered: Every year, All

GID 499. Advanced Independent Studio Work in Graphic and Interactive Design. 3 Credits.
Advanced independent studio work in graphic and interactive design.
Offered: As needed, All

Health Management (HM)

HM 404. Legal Aspects of Health Care Delivery. 3 Credits.
Students explore fundamental aspects of the law and the American legal system and their effects on our health care system. The course also examines the legal responsibilities and liabilities of an institution’s governing board, administrators and clinical staff; and the legal and ethical rights of patients, including the patient’s right to informed consent, confidentiality and commitment.
Offered: Every year, All

HM 498. Independent Study. 3 Credits.
Independent study offers the opportunity for application of academic learning and study in health service institutions through extended involvement in selected work settings. Advanced students are to make individualized arrangements to spend one, two or three credit hours in supervised investigation of an aspect of health administration typical of the institutions with which they conduct their studies.
Offered: As needed, All

Health Science (HSC)

HSC 159. Health Science Elective. 3-15 Credits.
Offered: As needed

HSC 202. Medical Terminology. 2 Credits.
This course is a study of the principles of word analysis, word construction and word meanings as applied to medical and surgical terms. It includes a review of anatomy to indicate the relevancy of the terms being studied. The course is designed for freshman and sophomore health science students.
Offered: Every year, All

HSC 205. Interprofessional Community-Based Service Learning Seminar: Age-Related (HSC 505). 1 Credit.
Opportunity to engage in active learning, implementing a program with a local community partner working with children/youth, adults or older adults. Students are required to contribute 10-15 hours of community engagement to observe and apply the concepts of interprofessional health care in a community-based setting. Community experience is supervised by faculty with expertise in analysis of community-based practice. Classroom/community engagement schedules will be determined. Course may be taken more than once.
Offered: Every year, All

HSC 206. Interprofessional Community-Based Service Learning Seminar: International (HSC 506). 1-3 Credits.
Observe and apply various health/wellness concepts in an international community-based setting. Fifteen hours minimum community engagement at an international site is required for students to engage in active learning by implementing a program with an international community partner. Course taught by faculty with expertise in the analysis of community-based practice. Classroom/community engagement schedules will be determined. This course may be taken more than once. Application process for international experiences required.
Offered: Every year, All

HSC 207. Interprofessional Community-Based Service Learning Seminar: Special Populations (GT 207) (HSC 507). 1-2 Credits.
This course involves active learning implementing a program with a local community partner working with at-risk population. Students are required to participate in 10-15 hours of community engagement. They observe and apply the concepts of interprofessional health care in a community-based setting. Faculty with expertise in the analysis of community-based practice lead discussions and community engagement related to population health in the local community. This course may be taken more than once. Offerings include MTW section during Thanksgiving week.
Offered: Every year, All

HSC 210. Introduction to Evidence-Based Health Care. 3 Credits.
Evidence-based practice in health care is the integration of the best available research with clinical expertise in the context of patient characteristics, culture and preferences. This is an introductory course outlining the processes associated with collecting and utilizing evidence to make clinical decisions.
Prerequisites: Take MA 275 or MA 206.
Offered: Every year, Fall

HSC 214. Care and Prevention of Athletic Injuries. 3 Credits.
This course is designed to provide an overview of the athletic training profession with an emphasis on the basic fundamentals utilized by the athletic trainer in prevention, recognition, care, treatment and rehabilitation of athletic injuries. Students may not also receive credit for AT 214.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Offered: Every year, Fall and Summer

HSC 214L. CPR, AED and First Aid. 1 Credit.
Students learn principles of first aid and complete health provider certification in cardiopulmonary resuscitation and automated external defibrillator. (2 lab hrs.)
Prerequisites: Take BIO 102 BIO 102L.
Offered: Every year, Fall and Spring

HSC 215. Complementary and Alternative Medicine - a Health Science Perspective. 3 Credits.
This course is beneficial for any student who is planning on working in health care. It explores the history of Complementary and Alternative Medicine (CAM), which the National Institutes of Health Center reports is currently being used by 40 percent of Americans. This course familiarizes the student with the more common forms of CAM and the rising trend of integrative medicine departments in hospitals in the U.S. Comparisons are made between conventional medicine and CAM.
Prerequisites: Take BIO 102 BIO 102L or BIO 151.
Offered: Every year, Fall and Spring

Quinnipiac University 579
HSC 220. Health Care Essentials: Structure, Policy and Professionalism. 3 Credits.
This course provides pre-health care professional students with an overview of the structure, systems and policies of health care delivery in the United States and includes discussions of the underlying values and political influences on quality, access and finance. Considerations are made to other nation’s health care systems and how these systems address societal need. The goal of this course is to increase students’ knowledge and abilities to analyze and address health care issues from the perspective of all stakeholders.
Prerequisites: Take BMS 117 or BIO 102 BIO 102L or BIO 151 or BMS 162.
Offered: Every year, Fall and Spring

HSC 221. Introduction to Health Care. 2 Credits.
Designed for health science studies majors only in their first or second year of study, this course broadens the student’s understanding of the many careers in health science. It introduces key concepts necessary to work in various health care professions, develops valuable skills to improve their employability and lays a foundation for further advanced studies in the major. For HSC freshmen and sophomores only.
Offered: Every year, Fall and Spring

HSC 225. Writing in the Health Professions. 3 Credits.
This course reviews effective writing strategies that are employed in various types of published health care-related articles and media. Emphasis is placed on the students’ written communication skills such as editing and clarifying of messages, and checking of accuracy of research sources. Students improve their proficiency in written communication to patients and to colleagues.
Prerequisites: Take BIO 101 BIO 101L or BIO 151; and EN 101 EN 102.
Offered: As needed

HSC 230. Counseling and Teaching for Health Care Professionals. 3 Credits.
This course provides a theoretical framework in counseling, education and overall communication for health professionals, including motivational interviewing. Students describe the importance of counseling and teaching for the health professional. The educational component includes teaching and communicating at the individual level and developing skills necessary for individual and group education and counseling.
Prerequisites: Take BIO 102 BIO 102L or BIO 150.
Offered: Every year, Fall and Spring

HSC 240. Foundations of Pharmacy. 2 Credits.
This hybrid course, beneficial for students interested in the health care professions, reviews the top 200 drugs, pharmacy math, pharmacy law, and hospital and retail pharmacy settings. Material required for the national PTCB exam (Pharmacy Technician Certification Board) is reviewed. Passing that exam confers the title of CPhT (Certified Pharmacy Technician), which enables students the opportunity to enter the pharmacy field if they choose to pursue that path.
Prerequisites: Take BIO 101 BIO 101L or BIO 150; Take MA 107 MA 140 MA 141 or MA 275.
Offered: Every year, Fall and Spring

HSC 250. Communication Disorders. 3 Credits.
This course provides information regarding a variety of communication and swallowing disorders. Information regarding potential causes of disorders as well as intervention methods is presented. The various health care professions that work together on cases of speech, language, hearing and swallowing disorders are discussed.
Prerequisites: Take BIO 102 BIO 102L or BIO 151.
Offered: Every year, Fall and Spring

HSC 259. Health Sciences Elective. 3 Credits.

HSC 261. Scientific Study of Mummies. 3 Credits.
This distance learning course explores the field of mummy science, placing the study of mummies within a cultural and global context. Students discover what can be learned, how it can be learned and how data should be used to create new knowledge regarding mummified human remains. Course content challenges students to apply experimental design to mummy science questions. Students create hypotheses, design experiments, analyze collected data and determine the significance of the findings. The significance of mummy studies to current populations also is discussed.
Offered: Every year, Summer Online

HSC 262. Nutrition in Health and Illness. 3 Credits.
This elective course focuses on the fundamentals of human nutrition in relation to disease prevention and treatment. This course applies practical nutrition concepts as vital tools for members of a health care team to achieve optimum patient care. Emphasis is placed on the science of nutrition, nutrition throughout the life cycle and clinical nutrition.
Prerequisites: Take BIO 102 BIO 102L or BIO 151.
Offered: Every year, All

HSC 270. Pillars of Public Health: Saving the World on a Population Level. 3 Credits.
This course defines the concept of public health, with a focus on introducing what public health is, its foundations and a brief discussion of the historical context. Course content includes basic material related to all six public health foundational areas: Biostatistics, Epidemiology, Environmental Health, Sociomedical Science, Health Policy and Management, and Population and Family Health, along with select specialized topics and current events.
Prerequisites: Take BIO 102 BIO 102L or BIO 151.
Offered: Every year, Fall and Spring

HSC 299. Independent Study. 1-6 Credits.

HSC 300. Special Topics in Health Science. 2 Credits.
This Special Topics course covers emerging issues or specialized content in the area of health science or health care. Students examine multiple perspectives of the current or emerging topic through readings, discussions and projects. The course guides student discovery on how the issue has evolved, and examines current advancements, problems and breakthroughs.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 and HSC 202.
Offered: As needed

HSC 301. Health Care Challenges and Team-Based Solutions. 1 Credit.
This interactive seminar focuses on common challenges in health care and how those challenges may be more effectively met utilizing a team approach to health care. The common health challenges are different each week, exploring the challenges that students may experience in their own personal, family or college life. The central outcomes of this course are to: 1) Recognize how a health care team can work together; 2) Develop strategies to react responsibly and ethically to health care issues (social intelligence); 3) Develop ideas for community action as a citizen, and 4) Identify the influence of all aspects of diversity on health care delivery.
Prerequisites: Take BIO 102 BIO 102L or BIO 151.
Offered: Every year, Fall and Spring
HSC 305. Emotional/Social Intelligence for the Health Sciences. 2 Credits.
This course provides the student with an appreciation and understanding of the role of emotional/social intelligence in everyday living and especially in the health sciences. Topics include how emotional intelligence differs from IQ, anatomy of emotions and the mind-body connection, education for and development of emotional literacy, assessing one's own social intelligence level, applying social intelligence skills to one's personal and professional lives. Personal assessments, small group experiential activities, case studies, journaling and project development are the essential methodology for this course. Prerequisite may be waived with permission of instructor.
Prerequisites: Take BIO 102 or BIO 151.
Offered: Every year, Fall and Spring

HSC 315. Bioethical Issues in the 21st Century. 3 Credits.
Students gain a solid understanding of bioethical principles and examine ethical dilemmas in medicine and the moral arguments that accompany them. Controversial bioethics issues such as assisted-suicide, stem-cell research, medical marijuana, organ donation and designer babies are explored though research, contemporary media and the students' own moral compasses. They study the role of public policy on bioethics and investigate cases that shaped the way modern medicine is practiced today. The course stimulates discussion leading to final group debate projects.
Prerequisites: Take EN 102 and BIO 102 or BIO 151.
Offered: Every year, All

HSC 318. Community Nutrition. 3 Credits.
This course provides an introduction to the development of community nutrition programs including planning, needs assessment, implementation and evaluation. Students learn to describe nutrition programs and policies for varying population groups, including cultural, economic and social health practices. The implication of public policy legislation on food and nutrition services is introduced.
Prerequisites: Take HSC 262;
Offered: Every year, Spring

HSC 320. The Environment and Human Health. 3 Credits.
This course examines the connection between our environment and human health and disease. Topics include an overview of toxicology, carcinogenesis, risk assessments, precautionary principle and bioaccumulation. Environmental connections to infectious diseases, emerging viruses, food production practices, loss of biodiversity, and endocrine disruptors also are discussed along with bioethical concerns of these topics. The course touches on health policies and regulations addressing environmental health issues. Students apply critical thinking skills to current environmental situations affecting our health as well as exploring the role individuals and professional health organizations have in accountability.
Prerequisites: Take BIO 102 or BIO 151.
Offered: As needed

HSC 322. Health Care Law (LE 322). 3 Credits.
This course provides an overview of the legal issues faced by health care providers and patients. Students explore various topics arising from the organization and financing of health care, provider liability, bioethics and public health. The course focuses on the way in which law impacts the delivery of health care in the United States.
Prerequisites: Take LE 101 HSC 220.
Offered: Every other year, Spring

HSC 326. Therapeutic Exercise. 3 Credits.
This course provides a systemic approach to therapeutic exercise program development. Students review exercise techniques, indications, contraindications, progression as related to injury, prevention, reconditioning, and return to work/participation guidelines. The course provides the student with a strong foundation in physical rehabilitative medicine and examines various goals concerning the return to functional activity.
Prerequisites: Take BIO 211 BIO 211L.
Offered: Every year, All

HSC 330. Leadership: Creating Adaptive Cultures. 3 Credits.
In this course, students explore leadership theory and practice. This is a problem-based learning course that requires students to develop new insights around leadership and leading from the literature and from each other. Students spend the first week defining the term, and the subsequent weeks applying and refining their ideas through case-method vignettes and biographies. The culminating project of the course is to create a simple leadership development workshop, one that might be used by health care professionals.
Prerequisites: Take BIO 102 BIO 102L.
Offered: Every year, Spring and Summer Online

HSC 334. Clinical Skills Patient Communication. 1 Credit.
This 1-credit course is dedicated to teaching fundamental clinical skills for patient interviewing. Students learn how to foster patient relationships and gather information during a medical interview using verbal and nonverbal communication skills in a professional and respectful manner. This course is designed for junior or senior students with a premedical designation and prehealth students majoring in health science studies or biomedical sciences.
Prerequisites: Take BIO 102 BIO 102L or BIO 151 BIO 151L.
Offered: Every year, Fall and Spring

HSC 350. Language Development. 3 Credits.
This course explores all areas of typical language development from birth through adulthood. Students examine literacy development and how it is impacted by language development. Students learn how to obtain and analyze language samples.
Prerequisites: Take BIO 211 BIO 211L.
Offered: Every year, Fall and Spring

HSC 351. Pharmacological Interventions for Common Medical Conditions. 3 Credits.
This course enables the student to recognize, evaluate and differentiate common systemic diseases, understand appropriate pharmacological interventions, understand the principles of pharmacology and common issues that arise when specific pharmacological agents are employed. Students may not receive credit for AT 351 also.
Prerequisites: Take BIO 212 BIO 212L.
Offered: Every year, Fall and Spring
HSC 375. Immunology.  3 Credits.
This immunology course examines topics related to the immune system, particularly the human immune system. The immune system is designed to differentiate self and non-self in order to prevent infection, disease and/or death. Students examine and discuss the current understanding of the immune response and discover why we are not sick all the time and how the body's immune system remembers "enemies" that it has seen in the past. This course covers the innate immune system, plus the two arms of the adaptive immune system—humoral immunity and cellular immunity. Immunodeficiencies, immunopathologies and immunotherapies also are discussed. Students may receive credit for BMS 375 or HSC 375, but not both.
Prerequisites: Take BIO 102 BIO 102L or BIO 151.
Offered: Every year, Spring and Summer Online

HSC 378. Vaccines and Vaccine-Preventable Diseases.  3 Credits.
This immunology course involves the investigation of vaccines and vaccine-preventable diseases (VPDs). The purpose of the course is to examine and discuss the current understanding of vaccinations and how they work, as well as the historical and current implication of VPDs. Students gain knowledge about VPDs, the childhood vaccination schedule, why they are still necessary and, most importantly, how to explain why they are safe, and to be able to debunk the current myths and misconceptions regarding vaccines. Students may only take one of the following for credit: BMS 378 or HSC 378.
Prerequisites: Take BIO 102 or BIO 151.
Offered: Every year, Summer Online

HSC 380. International Health Care - Field Research.  3 Credits.
This course provides health science students with an overview of the health care structure, systems and delivery in another country. Field research is conducted during a semester break trip, during which time students interact with the local community members and health professionals. Prior to the trip, students research the factors that influence the quality, access and finance of health care. Common health issues and their social determinants are explored as they relate to the subpopulation of interest. The goal of this course is to increase students' knowledge and abilities to analyze and address health care issues specific to a population while in the field.
Prerequisites: Take BIO 101 BIO 102 or BIO 150 BIO 151 and MA 275 or MA 206.
Offered: Every year, Fall and Spring

HSC 388. EMT I Training.  2 Credits.
This course includes both lecture and clinical experience, and provides students with an opportunity to develop the knowledge and skills required for Emergency Medical Technician National Certification. Successful completion of HSC 388-389 (two-semester sequence) and fulfillment of the state-mandated hours of instruction are required to be eligible for certification. This course must be taken in conjunction with HSC 388L.
Prerequisites: Take BIO 102 BIO 102L or BIO 151.
Corequisites: Take HSC 388L.
Offered: Every year, Fall

HSC 388L. EMT I Training Lab.  1 Credit.
This is the laboratory component of HSC 388. It includes learning the techniques necessary to develop the knowledge and skills required for Emergency Medical Technician National Certification. This course must be taken in conjunction with HSC 388.
Prerequisites: Take BIO 102 BIO 102L or BIO 151.
Corequisites: Take HSC 388.
Offered: Every year, Fall

HSC 389. EMT Training II.  2 Credits.
This course includes both lecture and clinical experience, and provides students with an opportunity to develop the knowledge and skills required for Emergency Medical Technician National Certification. Successful completion of the HSC 388-389 (two-semester sequence) and fulfillment of the state-mandated hours of instruction are required to be eligible for certification. This course must be taken in conjunction with HSC 389L.
Prerequisites: Take HSC 388-HSC 389L.
Corequisites: Take HSC 389L.
Offered: Every year, Spring

HSC 397. Pre-Health Professions Clinical Affiliation.  3 Credits.
This course provides an opportunity to observe a health professional in a student's field of interest for a minimum of 36 hours. Students observe social, ethical and medical issues in a clinical setting. Professional dress is required, and some sites may require a background check. Students are responsible to arrange their site and are provided with guidance and contacts to do so. For HSC or BMS majors only. Junior or Senior Status, with minimum 2.5 GPA
Prerequisites: Take BIO 102 BIO 102L or BIO 151.
Offered: Every year, Fall and Spring

HSC 399. Health & Science Studies Independent Study.  1-6 Credits.

HSC 401. Introduction to Medical Problem-Solving.  3 Credits.
This course offers pre-medical and pre-physician assistant students the tools necessary for developing a systematic approach to a patient and his or her medical condition. Students learn to access and evaluate the medical literature for identification of the signs and symptoms of disease presentation, the components of a history and physical, and the understanding of a differential diagnosis. In addition, students are taught the basis for developing a patient treatment plan. Students may not receive credit for both PY 401 and HSC 401.
Prerequisites: Take BIO 212. Shadowing in a health care setting is highly recommended prior to taking this course.
Offered: Every year, Fall and Spring

HSC 460. Advanced Nutrition (AT 460).  3 Credits.
This advanced-level food and nutrition course examines the composition and physiological role of nutrients and their relationships to health and the body. Macronutrient metabolism as well as a detailed examination of the role of vitamin and mineral metabolism are explored. Current nutrition issues of supplement use, weight management, sports nutrition, nutritional ecology and the application of nutrition directly to food and its preparation also are addressed.
Prerequisites: Take AT 330 or HSC 262.
Offered: Every year, Spring
HSC 498. Independent Study in Health Sciences. 1-4 Credits.
This course consists of health sciences content not offered by another QU catalog course. It must involve contact hours and scholarly activities equivalent to any regularly offered course. This course often includes a review of the scientific literature in the field of the research project and creating a "product," such as a term essay, a series of short papers, laboratory or project reports, a portfolio or presentation at a scientific meeting. Students cannot register online; registration is via a paper form only. BMS students may take up to 8 credits of BMS 482, BMS 483, BMS 498, BMS 499, HSC 498, HSC 499.
Offered: As needed

HSC 499. Independent Study in Health Sciences II. 1-4 Credits.
This course consists of health sciences content not offered by another QU catalog course. It must involve contact hours and scholarly activities equivalent to any regularly offered course. This course often includes a review of the scientific literature in the field of the research project and creating a "product," such as a term essay, a series of short papers, laboratory or project reports, a portfolio or presentation at a scientific meeting. Students cannot register online; registration is via a paper form only. BMS students may take up to 8 credits of BMS 482, BMS 483, BMS 498, BMS 499, HSC 498, HSC 499.
Offered: As needed

Hebrew (HBR)

HBR 101. Introduction to Modern Hebrew. 3 Credits.
This is an introductory course in modern Hebrew. Students begin to achieve basic proficiency in reading, writing, speaking and comprehending modern Hebrew. Students are introduced to the Hebrew alphabet and use Hebrew script. They learn elementary conversational skills and basic Hebrew grammar.
Offered: Every year, Fall
UC: Breadth Elective, University Curriculum Ele

HBR 102. Introduction to Elementary Modern Hebrew II. 3 Credits.
This course is a continuation of Hebrew 101. Students review and expand their grammatical study leading to deeper comprehension of style and usage. Students learn the fundamentals of grammar and syntax as well as idioms and special expressions. Emphasis is given to all four communicative skills (speaking, reading, listening and writing). The semester covers the study of the present tense, basics of the past tense, and some of the future tense in most of the conjugation models as well as numbers, colors, daily life situations, etc.
Prerequisites: Take HBR 101.
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Ele

History (HS)

HS 111. The Rise of the West. 3 Credits.
Beginning with the origins of Western civilizations in the ancient Near East, students examine the development of Western culture and society from its beginnings through the 16th century, with emphasis on the nature and values of three successive polities: the classical world of Greece and Rome, the Middle Ages, and the origins of the modern world in the Renaissance/Reformation. Consideration is given to the idea of "the West" and its interaction with and contact with non-Western cultures and peoples.
Offered: Every year, All
UC: Humanities

HS 111H. Honors The Rise of the West. 3 Credits.
Beginning with the origins of Western civilizations in the ancient Near East, students examine the development of Western culture and society from its beginnings through the 16th century, with emphasis on the nature and values of three successive polities: the classical world of Greece and Rome, the Middle Ages, and the origins of the modern world in the Renaissance/Reformation. Consideration is given to the idea of "the West" and its interaction with and contact with non-Western cultures and peoples.
Offered: As needed
UC: Humanities

HS 112. The West in the World. 3 Credits.
Beginning with the emergence of the modern state in the 16th century, students examine the social, political, economic and cultural developments of Western civilization and its interaction with the rest of the world. Emphasis is on the growth of science and technology in the 17th century, the emergence of the Enlightenment in the 18th century, the age of industrialization, nationalism and imperialism, social upheaval in the 19th century, the domination of the West over the worlds and challenges to that domination during the 20th century.
Offered: Every year, All
UC: Humanities

HS 112H. Honors The West and The World. 3 Credits.
Beginning with the emergence of the modern state in the 16th century, students examine the social, political, economic and cultural developments of Western civilization and its interaction with the rest of the world. Emphasis is on the growth of science and technology in the 17th century, the emergence of the Enlightenment in the 18th century, the age of industrialization, nationalism and imperialism, social upheaval in the 19th century, the domination of the West over the worlds and challenges to that domination during the 20th century.
Offered: As needed
UC: Humanities

HS 122. Modern World History. 3 Credits.
This course examines key developments in world history beginning in roughly 1300 with the rise of the Turco-Mongol Empires and ending with the nationalist and independence movements of the 20th century. Students examine and analyze major events that occurred in the non-Western world. Special attention is paid to South Asia, East Asia, Africa and the Middle East. Students gain a better understanding of the history and culture of these regions, as well as how the non-Western world has impacted the global community, both past and present.
Offered: Every year, All
UC: Humanities, Intercultural Understand

HS 131. U.S. History to 1877. 3 Credits.
This course traces the formation and expansion of the American nation from Colonial settlement through Reconstruction using selected episodes. Themes explored include the development of a national identity, models of citizenship, the role of government, and divisions based upon gender, ethnicity, race and class.
Offered: Every year, All
UC: Humanities

HS 132. U.S. History Since Reconstruction. 3 Credits.
This course explores the evolution of the American people and their nation through the major political, social and economic changes of the late 19th century to the present. Key themes include changing expectations of governance, the quest to achieve the full promise of the Declaration of Independence and the U.S. ascent to global hegemony.
Offered: Every year, All
UC: Humanities
HS 200. Special Topics in History. 3 Credits.
This course includes readings and discussion of historical topics of special interest to students enrolled in the course.
Offered: As needed, All

HS 200H. Honors Special Topics in History. 3 Credits.
This course includes readings and discussion of historical topics of special interest to students enrolled in the course.
Offered: As needed, All

HS 201. Historical Writing. 3 Credits.
The practice of history is founded on the ability to write clearly. In this intensive writing seminar, students are introduced to the fundamentals of historical writing, including the basics of grammar and sentence structure, the construction of good paragraphs and the crafting of a historical narrative. Since writing and thinking are intimately linked, students also practice the art of historical thinking, including the development of historical arguments, the critical use of historical sources and the appropriate use of historical documentation using the Chicago Manual of Style. Majors only.
Offered: Every year, All

HS 202. Introduction to Public History. 3 Credits.
This course provides an introduction to the field of public history. There are a variety of opinions on what constitutes public history, but generally it is considered to be the presentation of history to broad audiences outside the traditional classroom setting. The practice and presentation of history along these lines usually takes the form of museum exhibition, historic preservation, cultural/historic resource management, public programming, documentary film and oral history, but it is hardly limited to these areas. This course aims to introduce students to these exciting possibilities, and to appreciate the ever-widening scope of the public historian in the new media age.
Offered: Every year, Fall

HS 208. Twentieth-Century World History. 3 Credits.
This course covers the history of the world since the 19th century focusing on the experiences and perspectives of the non-Western world. Students study the rise of nationalism, the disintegration of empires, and the growth of communal and ethnic strife across the globe in the 20th century.
Offered: Every year, All
UC: Humanities, Intercultural Understanding

HS 209. Twentieth-Century Europe. 3 Credits.
Events in Europe during the 20th century radically transformed the world. The century began, and perhaps ended, in periods of vibrant intellectual, social and cultural development and optimism. In between these eras, however, Europe was at the center of the two bloodiest wars humanity has ever known and the rise of brutal totalitarian states. Students examine the complex cross currents in European society during the period roughly from the 1890s to the present, focusing on the political, social, intellectual and economic developments in European society that helped shape this turbulent century. Students also learn about the impact of non-European peoples, particularly those of Africa and Asia, on internal European developments.
Offered: Every year, All
UC: Humanities

HS 210. Contemporary America. 3 Credits.
This survey of American history from 1945 to the present focuses on both social and political matters. Students study topics including the McCarthy era and the nuclear age, the civil and women's rights movements, Nixon and the Watergate crisis, gay liberation, the Reagan revolution and end of the Cold War, and the era of American global dominance and its challenges. Particular attention is given to the impact of the diverse cultures and peoples that have emerged in contemporary American society.
Offered: Every year, All
UC: Humanities

HS 210H. Honors Contemporary America. 3 Credits.
This survey of American history from 1945 to the present focuses on both domestic and foreign policy matters including the Cold War, the McCarthy era, the civil rights movement, the "great society", Vietnam, Nixon and the Watergate crisis.
Offered: As needed
UC: Humanities

HS 211. Popular Culture in American History. 3 Credits.
This course focuses on an interpretation of American history through popular culture. Samples of popular culture materials in various historical periods are examined with special attention to music, film, television, and sports.
Offered: As needed
UC: Humanities

HS 213. The Roman World. 3 Credits.
This course examines the historical evolution of Rome which, through its laws, language, literature and institutions, has strongly influenced the modern world. How did the Romans win their Empire? What was the character of these people? And what was the essence of the Roman achievement?
Prerequisites: Take one 100-level history course.
Offered: Every Third Year, Fall
UC: Humanities

HS 214. Ancient Greece: Heroes, Soldiers and Philosophers. 3 Credits.
The historical and archaeological construct known as "ancient Greece" dates back to at least the third millennium BCE and stretches geographically from modern day Turkey (what the Greeks called Ionia) to Sicily and the Italian peninsula (what the Romans called Magna Graecia). In this course, students focus primarily on that part of Greek history that runs from the 8th century renaissance (circa 750 BCE) to the death of the Macedonian conqueror Alexander (in 323 BCE). The course emphasizes primary literary sources (such as Homer, Herodotus, Thucydides and Euripides) and challenges students to use primary sources as the basis for historical interpretations of the political, social and cultural institutions of ancient Greece.
Offered: Every Third Year, Fall
UC: Humanities

HS 215. American Business History. 3 Credits.
Students examine American business history from the mercantile era to the decline of laissez faire, with particular attention to New England. Topics include America as a developing economy: trade, commerce and the transportation revolution; the Industrial Revolution and the American system of manufacture; the managerial revolution and the growth of labor unrest; Progressivism, the cult of efficiency, and the decline of laissez faire.
Offered: As needed, All
HS 220. American Environmental History. 3 Credits.
This course examines American society's interaction with nature since the arrival of Europeans in the 15th century. Students consider the intentions and values that guided the use of America's natural resources and the transformation of its landscape. While this historical legacy is most apparent in America's agricultural, industrial, and conservation activities, it has been equally profound in the rise of America's environmental movement, tourism, recreation, ecological research and global environmental awareness. Since we are located in the New England/Mid-Atlantic region, this course occasionally departs from the broad survey of American environmental history and treats issues that are particularly germane to the region.
Offered: Every other year, Spring
UC: Humanities

HS 227. Russian Cultural and Intellectual History. 3 Credits.
Students are introduced to changing concepts of authority and the role of reason in the ordering of social and cultural values, the cultural mission of Russian Orthodoxy, the growth of a secular cultural elite, and the modern struggle to define individual and community and values in literature. This course includes readings in Russian thought and literature.
Offered: As needed
UC: Humanities

HS 228. Twentieth-Century Russia. 3 Credits.
This course considers Russian politics, society and culture in the 20th century, the Soviets in world affairs, and changing American views of the former Soviet Union.
Offered: As needed
UC: Humanities

HS 229. Irish History. 3 Credits.
This examination of Irish history from the pre-Christian Celtic era to modern times focuses on the changing character of Irish culture reflected in literary, political and religious documents. Special consideration is given to the origins of modern political and sectarian conflicts through a consideration of the history of Anglo-Irish relations, particularly the ramifications of the Tudor conquest, the Great Hunger and the rise of Irish nationalism.
Offered: Every year, Spring
UC: Humanities

HS 230. The Rise of Modern Science. 3 Credits.
In this course students explore the development of modern science since Copernicus and the impact that science has had on our world in the past four centuries. Students examine the major historical developments in astronomy, physics, chemistry, biology and medicine over the past 400 years. They also explore the complex interaction of science with society especially its contact with issues in religion, politics and gender. No specific background in science is required.
Offered: As needed
UC: Humanities

HS 231. The World of Tudor/Stuart Britain. 3 Credits.
This course explores early modern Britain from the establishment of the Tudor monarchy in 1485 until the end of the Stuart kings with the Glorious Revolution of 1688. Areas of focus include: Henry VIII, the Reformation, Elizabeth I, Shakespeare's London, Scotland's witch trials, and the English Civil War. Through exposure to and examination of primary source documents and historical interpretations, students come to see how the history of early modern Britain holds foundations for the modern world.
Offered: Every other year, Spring
UC: Humanities

HS 232. The Rise and Fall of the British Empire. 3 Credits.
This course analyzes the expansion, consolidation, workings and eventual disintegration of the British Empire from the 17th century until its collapse in the 20th century. It touches on the colonial experiences of North America, the West Indies, India, China, the Middle East, Australia, Ireland and Africa. Students examine the emergence of nationalism in the colonized regions. Special emphasis is placed on how the major colonies were affected by the international imperial context, as well as the contributions that subject peoples and cultures made to colonial history and the trajectory of the empire.
Offered: Every other year, Fall
UC: Humanities

HS 235. History of Modern China/Asian Studies. 3 Credits.
Students are introduced to the political and social institutions of China, schools of thought, legal and moral concepts and literary, artistic and intellectual developments, elements of stability and change and international contacts to recent times.
Offered: Every year, All
UC: Humanities

HS 236. History of Modern Japan/Asian Studies. 3 Credits.
This course considers the historical background of modern Japan; period of seclusion; restoration of a centralized monarchy; economic and political developments, establishment of an empire and World War II and postwar period.
Offered: Every year, All
UC: Humanities

HS 241. African-American Experiences to Reconstruction. 3 Credits.
This course examines the history of the United States by looking at African-American experiences up to the end of the 19th century. Using a wide array of primary materials from songs to autobiographies to speeches, in print and audiovisual forms, students explore how people of African descent conceptualized and constructed their identities and navigated their struggles against inequalities. A central theme is that people of African descent living in America created themselves under circumstances of inhumanity, exploitation and oppression.
Offered: Every Third Year, Fall
UC: Humanities

HS 242. African-American Experience Since Reconstruction. 3 Credits.
Although emancipation and reconstruction amendments ended a particular set of oppression and exploitation, the legal conferment of citizenship for African Americans neither ended institutional racism nor secured the redistribution of resources that had hitherto entrenched inequalities, prejudices and the denial of opportunities to black people. In this course, students examine how African Americans cultivated, expressed and debated the possibilities of, and alternatives to, equal inclusion and participation in American democracy and society in the last three decades of the 19th century and throughout the 20th century.
Offered: Every Third Year, Spring
UC: Humanities

HS 254. Colonial Latin America. 3 Credits.
This course offers an introduction and examination of the history of Latin America and its people from Pre-Columbian times through independence. The course focuses on both the indigenous and European peoples and the many consequences of their interactions. Some areas of examination include European expansion and conquest, the impact on and reactions of indigenous populations, the formation of a colonial society, issues of race, ethnicity, class and gender, and the establishment of economic and political structures.
Offered: Every other year, All
UC: Humanities, Intercultural Understand
HS 271. History of Southeast Asia 1. 3 Credits.
Students are introduced to the cultures and history of the countries and people of Southeast Asia. The course covers pre-European, Colonial, and post-Colonial periods, with emphasis on the developments and problems since World War II. First semester: the islands.
Offered: As needed, All
UC: Humanities

HS 272. History of Southeast Asia 2. 3 Credits.
Students are introduced to the cultures and history of the countries and people of Southeast Asia. The course covers pre-European, Colonial, and post-Colonial periods, with emphasis on the developments and problems since World War II. Second semester: mainland countries.
Offered: As needed, All
UC: Humanities

HS 273. African History and Culture. 3 Credits.
This course presents an introduction to traditional African culture and the different patterns of historical development south of the Sahara. Topics include the role of trade in the rise of Sudanic and East Coast civilizations, diversity of political European presence before and after the partition of Africa, and contemporary trends since independence.
Offered: As needed, All
UC: Humanities

HS 274. History of India. 3 Credits.
This course examines the history of the South Asian subcontinent from the ancient to the modern period. Students examine broad outlines of historical developments in the ancient and medieval periods, and conduct a more in-depth study of the modern period, beginning with the establishment of the Mughal Empire in approximately 1526. The course presents key historiographical debates on the history of the subcontinent, such as early Islamic invasions, reasons for the decline of the Mughal Empire, the foundations of British rule, Hindu-Muslim relations, and the impact of the Raj on social and familial relations.
Offered: Every other year, Spring
UC: Humanities

HS 275. History of the Middle East. 3 Credits.
This course analyzes the economic, cultural and political developments in the Middle East between 600 CE and 1919 CE by exploring the rise of Islam, the Umayyad and Abbasid Empires, the Ottoman Empire, and the gradual shift from Ottoman to European influence in the 19th century. It examines the rise of nationalism and the effect of World War I on the political map of the region. Emphasis is placed on "critical issues" such as the status of women, terrorism and the place of Islam. Both contemporary viewpoints and historiographical debates surrounding these issues are discussed.
Offered: Every other year, Fall
UC: Humanities

HS 286. Introduction to Medieval Europe. 3 Credits.
This course provides a general overview of the Middle Ages from late Antiquity to the crises of the 14th century. It explores the period of European history that holds the foundations of much of western society. Topics of particular significance include: the Medieval Church, the rise of the university, relations with the East, the Crusades and the growth of towns and trade.
Offered: Every other year, All
UC: Humanities

HS 294. American Civilization: Prosperity and Depression in the 1920s and 1930s. 3 Credits.
This course combines literary and historical interpretations of the period between the two world wars. American values and attitudes during the 1920s and 1930s are examined within six major themes: disillusionment, middle class values, conflict of race and class, the depression, rise of fascism at home and abroad, and the prewar dilemma.
Offered: As needed, All
UC: Humanities

HS 299. Independent Study in History. 3 Credits.
Individual study of special area including internships. By agreement of the student and with prior permission of the department chairperson, the student may undertake directed readings with discussion, examination and reports as arranged by the instructor in an area of the student's interest not normally offered through scheduled courses. Available to history majors or other equally qualified students.
Offered: As needed, All

HS 300. Special Topics in American History. 3 Credits.
This course focuses on readings and discussion of historical topics of special interest to students enrolled in the course.
Prerequisites: Take one 200-level history course.
Offered: As needed, All

HS 301. Special Topics II - European History. 3 Credits.
This course focuses on readings and discussion of historical topics of special interest to students enrolled in the course.
Prerequisites: Take one 200-level history course.

HS 302. Special Topics III: World History. 3 Credits.
This course focuses on readings and discussion of historical topics of special interest to students enrolled in the course.
Prerequisites: Take one 200 level history course.

HS 303. Historiography. 3 Credits.
This advanced seminar is intended for majors and other students interested in deepening their knowledge of the techniques of reading, writing, researching and interpreting history. Students get a broad introduction to the concept of historiography and consider the ways in which thinking about the past has changed over time.
Prerequisites: Take one 200-level history course.
Offered: Every year, All

HS 305. Vietnam (COM 305). 3 Credits.
This course presents a study of the Vietnam Era and draws conclusions about policy for the future. Media coverage of the war and its effect on both national policy and political change are emphasized.
Prerequisites: Take one 200-level history course or MSS 101.
Offered: Every year, All

HS 306. Frederick Douglass and Ireland. 3 Credits.
In August 1845, Frederick Douglass, then a 27-year-old fugitive slave, arrived in Dublin, the capital of Ireland. He intended to visit for only four days, to oversee the re-publication of his autobiographical, Narrative, but he stayed in the country for four months. When he left, he described his time there as being “transformative.” Throughout the remainder of his long life, Douglass would refer to how Ireland - its colonial status, its religious struggles, its endemic poverty - had helped to shape his political philosophies. This course explores why Ireland played such an important part in his political and intellectual development.
Prerequisites: Take IRST 101 or one 200-level history course.
Offered: As needed
HS 307. The Holocaust (MSS 307). 3 Credits.
Through an examination of historical texts, literature and film, this course examines the systematic destruction of 10 million human beings at the hands of the Third Reich.
Prerequisites: Take one 200-level history course or MSS 101.
Offered: Every year, All
HS 308. U.S. Women's History (WS 308). 3 Credits.
This course covers the experience of women in America before 1900. Women's work in the family and community is stressed. Individual research is required on varied topics, such as women and rural life, women and medicine, women in the professions, women and the charter of institutions, women and human rights, and women and the sea.
Prerequisites: Take one 200-level history course.
Offered: As needed
HS 309. Women in America 1920-Present (WS 309). 3 Credits.
This course covers the experience of women in the 20th-century United States. Women's economic and political roles are stressed, and individual research on a specific topic is required. In past years, topics have included American women and their role in the world and women and rural life.
Prerequisites: Take one 200-level history course.
Offered: As needed
HS 310. The Ancient Near East. 3 Credits.
Through lectures and readings students are introduced to civilizations of the Near East: Egyptians, Sumerians, Hittites, Kassites, Mitannians, Babylonians, Hebrews and Assyrians. Primary emphasis is on development of chronology, rise and fall of the great empires, and origin of Western religious tradition.
Prerequisites: Take one 200-level history course.
Offered: As needed
HS 311. The Ancient Hebrews. 3 Credits.
This course covers the political, social, economic and cultural treatment of the ancient Hebrews from the time of Abraham to the Roman destruction of Jerusalem in 70 A.D.
Prerequisites: Take one 200-level history course.
Offered: As needed, All
HS 312. The Age of Pericles. 3 Credits.
This course examines the history and culture of Athens within the context of the large world of Greece and its neighbors across the Mediterranean world during the tumultuous 5th century.
Prerequisites: Take one 200-level history course or PL 101.
Offered: Every other year, Fall
HS 313. Roman Civilization: Ideas and Realities. 3 Credits.
The glory and failings of Rome are examined through the lens of its thinkers, politicians, and military leaders.
Prerequisites: Take one 200-level history course or PL 101.
Offered: As needed, All
HS 314. Europe in the Early Medieval Period, 325-842. 3 Credits.
This course presents a study of the Dark Ages, the first five centuries of Europe's medieval period, which have intrigued historians as a period of decline. Factors that brought about the collapse and transformation of the civilization built by the ancients, problems that afflicted men in the barbarian West, and the birth of modern Europe are explored.
Prerequisites: Take one 200-level history course.
Offered: As needed, All
HS 315. Introduction to Medieval Europe: Europe in the High Middle Ages. 3 Credits.
The Europe known to the 20th century, with all of its diversity of cultures has its origins in the Middle Ages-the thousand-year period that separates Christopher Columbus from Attila the Hun. This course examines those four centuries from the point of view that modern Europe's institutions, modes of behavior, character and problems passed their formative adolescent years in the medieval period.
Prerequisites: Take one 200-level history course.
Offered: As needed, All
HS 316. The European Renaissance. 3 Credits.
This course provides a topical exploration of the period commonly referred to as the Renaissance. It explores the period known for innovations in art and literature, but also addresses the political and social backdrop of Northern Italy and beyond. Topics of particular importance include changes in literature and education, innovations in art, modes of behavior and the emergence of modern political ideas.
Prerequisites: Take one 200-level history course.
Offered: Every other year, All
HS 317. The European Reformation. 3 Credits.
This course explores Western Christendom from the late Middle Ages through the 17th century during the Age of Reformation. The central focus of the course is religion, but since the Reformation did not occur in isolation, it addresses a variety of themes in the study of early modern Europe. The aim of this course is to understand the major figures, movements and ideas that contributed to the division of Western Christendom into numerous confessional communities.
Prerequisites: Take one 200-level history course.
Offered: Every other year, All
HS 318. European History, 1555-1715. 3 Credits.
Students review European civilization from the Peace of Augsburg to the death of Louis XIV, including the growth of the state, the development of the bureaucracy and diplomacy, the increase in warfare and the political struggle over taxation, the scientific revolution, and the shift toward secular values.
Prerequisites: Take one 200-level history course.
Offered: Every Third Year, All
HS 319. European History, 1715-1815. 3 Credits.
This course presents a survey of "old regime" Enlightenment, French Revolution and Napoleonic eras in European history; movements of thought and culture and their social background; the feudal reaction and middle class protest in France, and national reactions to the French developments elsewhere in Europe.
Prerequisites: Take one 200-level history course.
Offered: Every Third Year, All
HS 320. European History, 1815-1914. 3 Credits.
Political, social and economic developments in Europe from the Congress of Vienna to the outbreak of World War I are examined. Legitimacy and the Concert of Europe; industrialization, liberalism, revolution, nationalism and imperialism also are considered.
Prerequisites: Take one 200-level history course.
Offered: Every Third Year, All
HS 321. European History, 1914-1945. 3 Credits.
This course presents a study of World War I and its economic, social, political and ideological consequences. The collapse of the Versailles settlement and interwar period is considered. World War II is covered, as are diplomatic and military consequences for the Cold War era.
Prerequisites: Take one 200-level history course.
Offered: Every Third Year, All
HS 322. History of World War I. 3 Credits.
The origins of World War I and the problems of mass mobilization, war aims, weaponry and political attitudes are analyzed. The major military encounters, the war as it affected non-Europeans and the diplomacy of neutrality are discussed. Emphasis is on the peace treaties and the repercussions.
Prerequisites: Take one 200-level history course.
Offered: As needed, All

HS 323. World War II. 3 Credits.
This in-depth study of the diplomatic, political and military aspects of World War II, 1939-1945, presents the background of the war in Europe and East Asia and the course of events in all major theaters of operations. Wartime conferences and long-term outcomes are discussed.
Prerequisites: Take one 200-level history course.
Offered: As needed, All

HS 324. History of England to 1688. 3 Credits.
This course examines some of the major political, constitutional, religious and social aspects of English history from the period of the Roman occupation to the "glorious revolution." Themes include: the evolution of kingship and government, the common law and the courts, the history of the church and the break with Rome, the development of agriculture and commerce, English overseas expansion, and the emergence of democracy.
Prerequisites: Take one 200-level history course.
Offered: As needed, All

HS 325. History of England: 1688 to the Present. 3 Credits.
The history of the English people from the "glorious revolution" to the present is explored. Primary focus is on the major political, constitutional, religious, economic and social developments that have contributed to the making of modern Britain. Themes include: the rise of the middle class, the expanding powers of Parliament, the Industrial Revolution and the acquisition and loss of empire.
Prerequisites: Take one 200-level history course.
Offered: As needed, All

HS 326. Witches and Werewolves in the Early Modern World (WS 326). 3 Credits.
This course explores the general belief in witchcraft and other supernatural creatures in the larger context of religion and culture in the early modern world. Participants examine how belief in the supernatural led to a widespread fear and persecution of individuals deemed witches or other consorts of the devil. Using the groundbreaking work of historians, and the primary documents of the period, this course examines the origins and processes of the witch trials. Since approximately 75 percent of those in Europe accused of witchcraft were women, the course examines how gender, misogyny and scapegoating shaped the persecution and prosecution of the more vulnerable members of premodern society. More broadly, the class examines how Christianity both affirmed and condemned these beliefs and practices and how people used "superstition" to make sense of the world around them.
Prerequisites: Take one 200-level history course.
Offered: Every other year, Fall

HS 327. Islamic Societies and Cultures to 1300. 3 Credits.
Students are introduced to the history of the Islamic peoples. The course attempts to impart an understanding of the identity, character and accomplishments of Arabic-speaking world. Particular emphasis is on the life of Muhammad, and on the political, economic, social and cultural achievements of the medieval Islamic empire.
Prerequisites: Take one 200-level history course.
Offered: As needed, All

HS 330. History of Western Medicine. 3 Credits.
This course examines the development of the Western medical tradition from its origins in the ancient Near East to modern times. The course emphasizes an understanding of medical theory and practice in relation to larger social, intellectual and scientific developments in the West. Topics include Hippocratic and Galenic medicine, medieval medical theory and practice, the emergence of new medical ideas in the Renaissance, and the development of modern scientific medicine.
Prerequisites: Take one 200-level history course.
Offered: As needed, All

HS 331. The British Empire and Commonwealth. 3 Credits.
Students study the expansion, consolidation, workings and eventual disintegration of the modern British Empire. The course begins in 1600, with the creation of the English East India Company. Students learn about the growth of the Empire in detail, touching on the colonial experiences of India, the West Indies, China, the Middle East and the African continent. Finally, students examine the emergence of nationalism in the colonized regions and the subsequent collapse of empire in the 20th century. Special emphasis is placed on how the major colonies were affected by British rule, as well as the contributions that subject peoples and cultures made to the unfolding of colonial history and the trajectory of Empire. Students should expect to attend lecture regularly, participate in weekly class discussions, as well as demonstrate mastery over the material in written assignments.
Prerequisites: Take one 200-level history course.
Offered: Every other year, All

HS 332. History of India. 3 Credits.
Students examine the history of the South Asian subcontinent between 1500 and 1950, roughly. Beginning with the establishment of the Mughal Empire in approximately 1526, students critically discuss the shift from "native" empire to British rule in the 1800s, as well as look at the various challenges to British rule and the Indian independence movement of the 20th century. Along the way, students analyze key historiographical debates on the history of the subcontinent, such as the reasons for the decline of the Mughal Empire, the foundations of British rule, Hindu-Muslim relations, and the impact of the Raj on social and familial relations. Students should expect to attend lecture regularly, participate in weekly class discussions, as well as demonstrate mastery over the material in written assignments.
Prerequisites: Take one 200-level history course.
Offered: Every other year, All

HS 333. The Middle East, 1300-1919; Critical Issues. 3 Credits.
Students analyze the economic, cultural and political developments in the Middle East between 1300 and 1919, beginning with the rise of the Ottoman Empire in roughly 1300 through the gradual shift from Ottoman to European influence in the 19th century. Students also discuss the rise of nationalism and the effect of World War I on the political map of the Middle East, paying close attention to events in Saudi Arabia and modern-day Israel. Emphasis is placed on certain "critical issues" in the study of the Middle East, such as the status of women, terrorism and the place of Islam in Middle Eastern history. Participants take a close look at both contemporary viewpoints and historiographical debates surrounding these issues. Students should expect to attend lecture regularly, participate in weekly class discussions, as well as demonstrate mastery over the material in written assignments.
Prerequisites: Take one 200-level history course.
Offered: Every other year, All
HS 340. The Colonial Period to 1763. 3 Credits.
Through lectures and discussion of source and secondary readings, the American Colonial period to the pre-Revolutionary era is considered in all its aspects: social, political, religious and literary. Emphasis is on the increasing similarity and the approach toward unity of the several colonies.
Prerequisites: Take one 200-level history course.
Offered: Every Third Year, All

HS 341. The American Revolution. 3 Credits.
Through lectures and discussions based on source and secondary readings, this course considers American history from 1763 to 1787, the pre-Revolutionary period, military, political and theoretical aspects of the Revolution, the Confederation, and the writing of the Constitution. Emphasis is on the political thought that culminated in the creation of the Constitution.
Prerequisites: Take one 200-level history course.
Offered: Every other year, All

HS 342. The Early American Republic. 3 Credits.
This course considers American history from 1787 to 1848. Emphasis is on the ratification of the Constitution, the administrations of Washington, Adams, Jefferson and Madison; the growth of political parties; and political action stemming from differing theoretical positions. The course also examines culture and society in "the era of good feeling" and the Jacksonian period, and considers the changing position of the average American citizen.
Prerequisites: Take one 200-level history course.
Offered: Every Third Year, All

HS 344. Civil War and Reconstruction. 3 Credits.
The economic, social and political history of the United States in the mid-19th century is examined with emphasis upon the Civil War. Also explored are long-range and immediate causes for Southern secession, the military, naval and diplomatic conflict; domestic developments North and South, 1861-65; postwar problems and the history of Reconstruction, 1865-77.
Prerequisites: Take one 200-level history course.
Offered: Every other year, All

HS 345. The Gilded Age and the Progressive Era. 3 Credits.
This in-depth study of the major developments that influenced the emergence of modern America includes industrial and naval expansion; social, political and religious movements; and the creation of an American empire. The course also considers the impetus to reform that characterized the first two decades of the 20th century.
Prerequisites: Take one 200-level history course.
Offered: Every other year, All

HS 346. The United States from WW I to WW II. 3 Credits.
American politics, culture and society during the Great War are examined, as are the prosperous '20s, the Great Depression and the Second World War. Increasing American involvement in world affairs is considered. Differing historical interpretations of the period are studied.
Prerequisites: Take one 200-level history course.
Offered: Every Third Year

HS 348. The American West to 1900. 3 Credits.
This course examines the history of European-American occupation and settlement of the Trans-Mississippi West from the first European contact with Native Americans to the establishment of American statehood. The interaction of diverse cultures including Native Americans, Hispanics and Asians is explored.
Prerequisites: Take one 200-level history course.
Offered: As needed, All

HS 349. American Maritime History. 3 Credits.
This course examines America's historic activities on the world's oceans, and on the bays, rivers and Great Lakes that are within its national boundaries. Students consider the economic, cultural, political and naval uses of these bodies of water from the 16th century to the present. Within this broad framework, this course considers how Americans used marine and freshwater environments to conduct trade, build communities, engage in war and diplomacy, use nature's bounty and participate in recreational activities. These themes illuminate the value Americans placed on maritime affairs, and provide insight into the American mariner's world, the American maritime community alongshore and the rippling effects of maritime activity throughout wider American society.
Prerequisites: Take one 200-level history course.
Offered: Every other year, All

HS 351. The New South. 3 Credits.
This course considers the social, economic and political history of the American South from 1865 to the present. The emergence of a region displaying unique characteristics while simultaneously mirroring attitudes and actions of the nation as a whole is examined. The role and impact of literature, music, religion and sports on Dixie are considered; the civil rights movement and the development of the "Sun Belt" are covered. The course includes readings, discussion and a course project utilizing academic technology for historical research and presentation.
Prerequisites: Take one 200-level history course.
Offered: As needed, All

HS 354. History of Africa since 1850. 3 Credits.
This course provides an overview of the history of sub-Saharan Africa during the precolonial period, and entails a close inquiry into the major theoretical issues and conceptual questions involved in the study of African history. Classroom study is organized chronologically but focuses on several major themes: the relationship between Africa's linkages to the world and local historical dynamics on the continent; changing political structures and popular agency within them; slavery and economic transformations; gender and social change; shifting constructions of race, ethnicity, and identity; and the stakes of conceptualizing African history in the present. Particular attention is paid to a number of case studies from across the sub-Saharan African continent. Students draw upon a range of materials including secondary historical literature, primary sources and visual arts.
Prerequisites: Take one 200-level history course.
Offered: Every other year, Fall

HS 362. African History Since 1850. 3 Credits.
Students explore the onset of colonialism in the mid-19th century; the process of colonization and the dynamics of colonialism; the roots of national liberation movements throughout the continent, and the complex and contingent process of decolonization. In considering the early postcolonial period, students investigate the economic, social and cultural landscapes of a variety of newly independent countries. They then trace the trajectories of postcolonial states through the later years of the 20th century. Finally, students conclude by reflecting upon the contemporary relevance of this history.
Prerequisites: Take one 200-level history course.
Offered: Every other year, Spring
**HS 371. Women in the Caribbean from the Indigenous Era to Emancipation.** 3 Credits.
In this course, students learn that the past and history are different when viewed from women's perspectives and experiences. This course explores the experiences of women in the Caribbean from the indigenous populations to the end of slavery. Women's lives are explored in the context of larger Caribbean historical events and themes, including: the organization of indigenous societies, European conquest and settlement, the Atlantic slave trade, the slave and sugar plantation, black resistance, abolition and emancipation. Participants also explore experiences and perspectives peculiar to women, distinguishing their histories from men's histories. The class traces larger patterns and identifies shared experiences, but also pays close attention to factors that divided and diversified women's lives.
Prerequisites: Take one 200-level history course.
Offered: Every other year, Fall

**HS 372. Women in the Caribbean since Emancipation.** 3 Credits.
Using discussion and reading, this course explores women "making" Caribbean history as they transitioned from slave to free societies and from colonial to independent states throughout the 18th, 19th and 20th centuries. Through critical analysis of women's memoirs, diaries, oral histories and visual materials, students investigate, speculate, debate and narrate women's experiences, contributions, ideas about and observations of the often tumultuous political, social, economic and cultural transformations across the Caribbean since the ending of slavery.
Prerequisites: Take one 200-level history course.
Offered: Every other year, Spring

**HS 376. Pirates of the Caribbean.** 3 Credits.
Critically examining films, historical texts and works of fiction, this class explores the political, social and cultural history of piracy in the Atlantic world. Beginning with the rise of Iberian Empires in Africa and the Americas in the 16th and 17th centuries, students examine the role and importance of privateers in empire building and the struggle for global economic power among European nations. Shifting toward the Golden Age of Piracy in the 18th century, when privateers no longer enjoyed legal status as mercenaries, but were seen as outlaws, we explore merchants and their colonial allies' violent campaigns to eradicate piracy. We also investigate the inner, private worlds of piracy and probe the enduring fascination with piracy in popular culture, and the myths generated about pirates and their worlds.
Prerequisites: Take one 200-level history course.
Offered: Every other year, Fall

**HS 377. Kinship, Culture and Slavery: Creating an African Diaspora in the Americas.** 3 Credits.
Students investigate the transatlantic slave trade as the primary mode by which Africans arrived in the Americas from the 15th to the 19th centuries. This class explores ideas and cultural traditions Africans brought with them to the New World, which provided a framework through which they interpreted, understood and re-created their lives in a new environment. The goal is to uncover how the African past shaped and defined Africans as they were transported across the Atlantic. Using an interdisciplinary approach, participants examine continuities and transformations of African structures and cosmology in the Diaspora.
Prerequisites: Take one 200-level history course.
Offered: Every other year, Spring

**HS 380. Historic Preservation.** 3 Credits.
This introductory course in the interdisciplinary field of historic preservation aims to equip students with fundamental insight on how to handle and curate architecture, cultural landscapes and other forms of material culture in light of the principal methods, theories and philosophies (historic, social, cultural, technological and economic) that inform historic preservation practice. In sum, the course instructs students in the primary language, issues and research skills of historic preservation.
Prerequisites: Take one 200-level history course.
Offered: Every other year, Spring

**HS 389. History Elective.** 3 Credits.

**HS 391. Colonizing the Body.** 4 Credits.
This course takes an in-depth look at the ways in which empire and imperial policies reshaped and reformulated the body of the colonized subject, setting up social categories of difference that corresponded neatly to European imperial notions of biological difference. Using India as a case study, it examines how Indian bodies were "scientifically" classified, categorized and redefined to underscore and perpetuate European political dominance. The course highlights imperial policies that buttressed certain privileged notions of racial, gendered, economic/ occupational and anatomical difference.
Offered: Every year, Fall

**HS 394. Doctors, Disease, and Death in the Western World.** 4 Credits.
In this course, students learn about the complex and varied history of health, healing, death and death in the Western world from the time of the ancient Egyptians to modern day. This course is thematic in its focus. Students study various aspects of the history of medicine and through that study come to a better understanding of the biological, social, intellectual, cultural and institutional contexts in which the process of living and dying has been constructed in the Western experience.
Offered: Every year, Spring

**HS 399. Independent Study in History.** 3 Credits.
Individual study of special area including internships. By agreement of the student and with prior permission of the department chairperson, the student may undertake directed readings with discussion, examination and reports as arranged by the instructor in an area of the student's interest not normally offered through scheduled courses. Available to history majors or other equally qualified students.
Offered: As needed, All

**HS 400. Special Topics in History.** 3 Credits.
This course includes readings and discussion of historical topics of special interest to students enrolled in the course.
Prerequisites: Take one 300-level history course.
Offered: As needed, All

**HS 408. Seminars in History.** 3 Credits.
Seminars are taught by members of the department in areas of special competence. Topics are selected in consultation with juniors in the major. Emphasis is on organization and presentation of research. Open to second-semester juniors and seniors in the major and to other qualified upperclassmen by permission of department and instructor.
Prerequisites: Take HS 303.
Offered: Every year, All

**HS 409. Honors Essay in History.** 3 Credits.
Honors projects are available to second-semester seniors who have taken HS 408 and have been admitted to candidacy for honors in history by the department.
Prerequisites: Take HS 408.
Offered: As needed, All
IER 220. Production Systems. 3 Credits.
This course provides an introduction to production systems, classification, general terminology, technical aspects, economics and analysis of manufacturing systems. Students learn the fundamentals of automation and control technologies as well as manufacturing support systems. Sophomore status required.
Offered: Every year, Fall

IER 230. Lean Systems Engineering. 3 Credits.
This course provides a comprehensive and hands-on introduction to Lean Systems and its wide applications, with special emphasis on the Toyota Production System.
Prerequisites: Take IER 320 or IER 220.
Offered: Every year, Fall

IER 235. Systems Engineering and Management. 3 Credits.
This course discusses the theory and methods used to design, analyze and manage engineered systems. Students review the principles of system life-cycle management including requirements analysis, system design, functional decomposition, configuration management and systems evaluation. Topics of engineering management emphasizing human relationships, motivational theory and human-systems integration also are addressed.
Prerequisites: Take IER 230 IER 310.
Offered: Every year, Fall

IER 240. Physical Human Factors and the Workplace. 1 Credit.
This course analyzes the impacts of the physical factors of the human decision makers on workflow and efficiency. Basic concepts of anthropometry, biomechanics, work physiology, stress and workload as well as work measurement are introduced. Special emphasis is placed on the capabilities and limitations of humans, in human-centered design of systems and products. Sophomore standing required.
Offered: Every year, Fall

IER 265. Cognitive Human Factors and the Workplace. 2 Credits.
This course analyzes the impacts of the cognitive factors of the human decision makers on workflow and efficiency. Basic concepts of cognition, as well as sensory systems, such as visual and auditory, are introduced, leading to the analysis of design topics, including displays, controls, shiftwork and work-rest schedules. Special emphasis is placed on the capabilities and limitations of humans, in human-centered design of systems and products. Sophomore status required.
Offered: Every year, Fall

IER 280. Data Analytics I. 3 Credits.
The course presents basic techniques of decision making concentrating on both theoretical and modeling aspects. This course integrates the art and science of decision making for single and multiple objective environments to support the decision-making phase of the Systems Decision Process (SDP). The focus of the course is modeling problem structure, uncertainty, risk and preference in the context of decision making.
Prerequisites: Take CSC 110 CSC 110L.
Corequisites: Take MA 285.
Offered: Every year, Spring

IER 310. Operations Research I. 3 Credits.
This course provides a rigorous introduction to the principles of operations research with a focus on linear programming models and simplex method, duality and sensitivity analysis; transportation and assignment problems; network models; integer and nonlinear programming; an introduction to queuing theory and Markov Chains.
Prerequisites: Take one of the following: Take MA 153; or MA 151 and MA 229; or MA 141 and MA 229; or MA 142; or MA 152.
Offered: Every year, Fall

IER 311. Operations Research II. 3 Credits.
This course introduces students to stochastic processes for analysis of industrial engineering problems, emphasizing examples, applications and cases.
Prerequisites: Take IER 310.
Offered: As needed

IER 360. Operations Planning and Control. 3 Credits.
This course focuses on analytical techniques for work scheduling and materials planning in the manufacturing, service and health care industries. The main objective is to develop the ability to use engineering tools for industrial engineering practice in operations and materials management. Topics include forecasting, production and material planning, inventory analysis and scheduling techniques.
Prerequisites: Take MA 285.
Offered: Every year, Fall

IER 370. Industrial Robotics. 3 Credits.
Students are introduced to robotics and their use in industrial applications. The topics covered in this course include robotics basic programming, types of robots, drive systems for robots, sensors' use in robotics, robot and computer interaction, improvement and analysis of systems' design using robotics, analysis of systems' design using robotics, and robotics applications in manufacturing, healthcare and service areas.
Prerequisites: Take CSC 110 CSC 110L or CSC 106.
Offered: As needed

IER 375. Statistical Process Control. 3 Credits.
The main focus in this course is to understand and implement the Define-Measure-Analyze-Improve-Control (DMAIC) approach in Six Sigma. Therefore, defining a problem for improvement of a process and using data-driven measuring, analysis, improvement and controlling techniques to solve the defined problem are the essentials of this course. Topics include quality improvement philosophies, modeling process quality, statistical process control, control charts for variables and attributes, single- and multivariable regression analysis of data sets, sampling strategies, economic design of charts, use of statistical distributions for data analysis and process capability.
Prerequisites: Take MA 285.
Offered: Every year, Fall
IER 380. Data Analytics II. 2 Credits.
This course focuses on analytical skill development for extracting meaningful information from data sets by using technology. Analytical skills include linear and non-linear regressions, ANOVA, hypothesis testing, and predictive data analysis. The technological skillset development includes reading, analyzing and interpreting data sets by learning how to use a software package.
Prerequisites: Take IER 280.
Corequisites: Take IER 381.
Offered: As needed

IER 381. Data Analytics and Advanced Programming. 1 Credit.
This course focuses on analytical skill development for extracting meaningful information from data sets by using technology. Analytical skills include linear and non-linear regressions, ANOVA, hypothesis testing, and predictive data analysis. The technological skillset development includes reading, analyzing and interpreting data sets by learning how to use a software package.
Prerequisites: Take CSC 110 -CSC 110L.
Corequisites: Take IER 380.
Offered: As needed

IER 385. Decision Analysis. 3 Credits.
The course presents basic techniques of decision making concentrating on both theoretical and modeling aspects. This course integrates the art and science of decision making for single and multiple objective environments to support the decision-making phase of the Systems Decision Process (SDP). The focus of the course is modeling problem structure, uncertainty, risk and preference in the context of decision making.
Prerequisites: Take CSC 110 CSC 110L.
Corequisites: Take MA 285.
Offered: Every year, Spring

IER 400. Special Topics in Industrial Engineering. 1-4 Credits.
Offered: As needed

IER 410. Designing and Managing the Supply Chain. 3 Credits.
This course provides an introduction to the techniques of supply chain management, focusing on logistics, purchasing and product development processes. The main objective is to develop competence in quantitative methods for analyzing and solving supply chain problems in a variety of industries that include manufacturing, services and health care. Topics include supply chain performance, network design, product availability and sustainable supply chain management.
Prerequisites: Take IER 360.
Offered: As needed

IER 415. Design of Experiments. 3 Credits.
This course deals with the design of experiments, the application of variance, regression analysis, and related statistical methods. Students learn how to plan, design and conduct experiments efficiently and effectively and learn how to analyze the resulting data to obtain objective conclusions. Experimental design and analysis are investigated.
Prerequisites: Take MA 285.
Offered: As needed

IER 420. Industrial Control Systems. 3 Credits.
Students explore classical control systems through modern control methods based on state variable models, feedback models, controllers and full-state observers. Students gain experience in computer-aided design and analysis using Matlab.
Prerequisites: Take IER 220.
Offered: As needed

IER 425. Quality Engineering and Inspection Systems. 3 Credits.
The focus of this course is to select and implement quality control solutions for industrial processes. Practical quality control systems are examined for applicability and relevance. Topics include the costs of quality, automated and manual measurement, quality control integration, sampling requirements, ANSI and ISO blueprint reading and geometric dimensioning along with the tolerance calculations. The course demonstrates various systems used in quality control plans and key factors required in developing a quality conscious atmosphere.
Prerequisites: Take IER 230.
Offered: As needed

IER 440. Simulation. 3 Credits.
This course includes a simulation of complex systems with applications in industrial engineering. Topics include modeling and developing custom solutions in one or more high-level computer packages; input distribution modeling; emphasizing examples, applications and cases.
Prerequisites: Take MA 285.
Offered: Every year, Spring

IER 450. Health Care Systems Engineering. 3 Credits.
This course introduces students to health care organizations, including hospitals, clinics, multihospital systems and other facilities as an integrated delivery system. By emphasizing practical application of diverse operations involved in such a system, various quantitative modeling and optimization techniques are discussed and applied to solve problems.
Prerequisites: Take IER 230 IER 310.
Offered: Every year, Spring

IER 460. Facilities Layout and Material Handling. 3 Credits.
The focus of this course is the design of industrial facilities with consideration of work organization and layout. Students study product and process designs as a part of facilities planning, material handling systems, flow systems, departmental planning and layout algorithms, space requirements for facilities, and receiving and shipping principles. The course also covers the engineering techniques used for determining the best location of a brand new facility.
Prerequisites: Take IER 320 or IER 220.
Corequisites: Take IER 310.
Offered: Every year, Fall

IER 470. Industrial Robotics and Advanced Programming. 3 Credits.
Students continue to develop and advance their robotics knowledge introduced in IER 370 - Industrial Robotics - by adding more to their basic robotics programming knowledge. Participants of this course continue to learn about advanced robotics applications in manufacturing, health care, service and systems design.
Prerequisites: Take IER 370.
Offered: As needed

IER 475. Human Reliability. 1 Credit.
This course focuses on the principles, methods and tools for the analysis, design and evaluation of human decision making within human-centered systems. The impacts of human perceptual and cognitive factors are analyzed, leading to design principles for error-prevention. This course is complementary to IER 265, Cognitive Human Factors and the Workplace. Sophomore status required.
Offered: Every year, Fall
IER 485. System Reliability. 3 Credits.
This course provides an introduction to failure rates, failure risk analysis and system configurations, such as series, parallel and redundant systems. It also discusses design for reliability and optimal maintenance and replacement policies.
Prerequisites: Take MA 285 MA 142 or MA 152.
Offered: Every year, Fall

IER 489. Advanced Independent Study in IE. 1-6 Credits.
This is a tutorial course or an individual project in which the student pursues advanced study in systems engineering or engineering management. The scope of the course is tailored to the desires of the student in consultation with a faculty adviser. Communication skills are developed with both written reports and oral presentations. Requires approval of faculty member.
Offered: Every year, Fall and Spring

IER 490. Engineering Professional Experience. 1 Credit.
Students gain at least 240 hours of experience by employing industrial engineering skills in a professional setting. Students must obtain departmental approval and register prior to starting the experience. Prerequisite may be waived with permission of adviser.
Prerequisites: Take ENR 395.
Offered: Every year, All

IER 491. Capstone Project I. 3 Credits.
This is the first part of a two-semester capstone design experience for senior industrial engineering students. Students apply knowledge gained throughout the curriculum to a significant project. Furthermore, this course aims to strengthen the students’ oral and written communication skills as well as teamwork and conflict resolution. Students work in teams to formulate issues and collect data at an external organization before beginning to perform analysis and propose solutions in the subsequent course–IER 498.
Corequisites: Take IER 330 or IER 230; IER 280 or IER 385; IER 340 or IER 240; IER 430 or IER 375; IER 465 or IER 265;
Offered: Every year, Fall

IER 498. Capstone Project II. 3 Credits.
This is the second part of a two-semester capstone design experience for industrial engineering students. The purpose of a capstone project is to give senior students the opportunity to apply knowledge gained throughout the curriculum to a significant project. After formulating the problem and commencing data collection in IER 491, the student teams continue their project in IER 498 by completing data collection, performing analysis and modeling, and finally recommending solutions to help address the client issue(s).
Prerequisites: Take IER 310 IER 491.
Offered: Every year, Spring

IDS 300. Special Topics in Interdisciplinary Studies. 3 Credits.
Students explore a given topic from multiple disciplinary perspectives, with the goal of integrating or synthesizing those disciplinary perspectives to form a deeper understanding of the topic. Emphasis is on active reading, research, discussion and analysis, and practice. This practice may take the form of a community project, a position paper or another major project that demonstrates synthesis or integration resulting in innovative/unconventional thinking or a plausible course of action. Prerequisite: at least sophomore standing; specific prerequisites vary depending on the focus of the course.
Offered: As needed

IDS 399. Interdisciplinary Independent Study. 1-6 Credits.
Offered: As needed

IDS 400. Transdisciplinary Project. 3 Credits.
This seminar is the capstone course of the Interdisciplinary Studies major. Students design an individual integrative project using a transdisciplinary lens. (Students should have completed research methods coursework in an established discipline.) The project can be creative, empirical, theoretical and/or professionally focused. Prerequisite: senior standing, completion of research methods component in concentration.
Offered: Every year, Spring

International Business (IB)

IB 105. International Business Environment. 3 Credits.
This course provides an introduction to the worldwide business environment in which we live and work. The course reviews the cultural, social, political, geographical and economic factors that shape economic institutions and activities in the U.S. and other countries. Global business interactions also are studied. This course is geared primarily toward non-business majors.
Offered: Every year, Fall and Spring
UC: Social Sciences, Intercultural Understand

IB 201. Globalization and International Business. 3 Credits.
This course introduces students to issues concerning globalization and international business. Students examine the critical role of international trade and investment as well as the impact of multinational corporations on the globalization process. The challenges and opportunities of international business are covered in detail. Global issues such as poverty, economic development and education, and the formulation of sustainable, environmentally-friendly development strategies are addressed. Insights are drawn from social sciences disciplines such as economics, political science, sociology and cultural geography
Prerequisites: Take FYS 101 or FYS 150.
Offered: Every year, All
UC: Social Sciences, Intercultural Understand

IB 201H. Honors International Business. 3 Credits.
This course advances students’ understanding of international business interactions and the global marketplace. Topics include: theories of international trade; theories of foreign direct investment and multinational corporations; globalization and the nature of international business; international organizations, international monetary systems and global financial market; foreign business environments; and management of international business opportunities and operations. The insights are drawn from economics, political science, psychology and other sources.
Prerequisites: Take FYS 101 or FYS 150.
Offered: As needed

Interdisciplinary Studies (IDS)

IDS 200. Rise of Disciplinarity. 3 Credits.
In this course, students draw on what they have learned in and about academic disciplines up to this point in their studies to explore the foundations and perspectives of traditional academic disciplines. Students evaluate the insights and methods of individual disciplines as they relate to a topic or issue of interest. This course prepares students to apply disciplinary insights, methods, and other characteristics from multiple fields to form a more complex understanding of a current topic or issue. Prerequisite: At least sophomore standing is required.
Offered: Every year, Fall

IDS 300. Special Topics in Interdisciplinary Studies. 3 Credits.
Students explore a given topic from multiple disciplinary perspectives, with the goal of integrating or synthesizing those disciplinary perspectives to form a deeper understanding of the topic. Emphasis is on active reading, research, discussion and analysis, and practice. This practice may take the form of a community project, a position paper or another major project that demonstrates synthesis or integration resulting in innovative/unconventional thinking or a plausible course of action. Prerequisite: at least sophomore standing; specific prerequisites vary depending on the focus of the course.
Offered: As needed

IDS 399. Interdisciplinary Independent Study. 1-6 Credits.
Offered: As needed

IDS 400. Transdisciplinary Project. 3 Credits.
This seminar is the capstone course of the Interdisciplinary Studies major. Students design an individual integrative project using a transdisciplinary lens. (Students should have completed research methods coursework in an established discipline.) The project can be creative, empirical, theoretical and/or professionally focused. Prerequisite: senior standing, completion of research methods component in concentration.
Offered: Every year, Spring

International Business (IB)

IB 105. International Business Environment. 3 Credits.
This course provides an introduction to the worldwide business environment in which we live and work. The course reviews the cultural, social, political, geographical and economic factors that shape economic institutions and activities in the U.S. and other countries. Global business interactions also are studied. This course is geared primarily toward non-business majors.
Offered: Every year, Fall and Spring
UC: Social Sciences, Intercultural Understand

IB 201. Globalization and International Business. 3 Credits.
This course introduces students to issues concerning globalization and international business. Students examine the critical role of international trade and investment as well as the impact of multinational corporations on the globalization process. The challenges and opportunities of international business are covered in detail. Global issues such as poverty, economic development and education, and the formulation of sustainable, environmentally-friendly development strategies are addressed. Insights are drawn from social sciences disciplines such as economics, political science, sociology and cultural geography
Prerequisites: Take FYS 101 or FYS 150.
Offered: Every year, All
UC: Social Sciences, Intercultural Understand

IB 201H. Honors International Business. 3 Credits.
This course advances students’ understanding of international business interactions and the global marketplace. Topics include: theories of international trade; theories of foreign direct investment and multinational corporations; globalization and the nature of international business; international organizations, international monetary systems and global financial market; foreign business environments; and management of international business opportunities and operations. The insights are drawn from economics, political science, psychology and other sources.
Prerequisites: Take FYS 101 or FYS 150.
Offered: As needed
IB 300. Special Topics in International Business. 3 Credits.  
Prerequisites: Take IB 201.  
Offered: As needed

IB 311. International Marketing. 3 Credits.  
The course discusses various environmental components of international marketing that affect business. Students also learn about the four P's of marketing (product, price, place and promotion) in a global context. Additional topics include regional integration and emerging markets. The course is intended to provide students with an understanding of global marketing strategies and research methods that are crucial for success in today's globalized world.  
Prerequisites: Take IB 201.  
Offered: Every year, Spring

IB 313. International Marketing Research. 3 Credits.  
Students learn to understand and satisfy marketing managers' information needs: demand potential, competition, regulations and accepted procedures in relevant business/geographic areas. Research design, quantitative and qualitative data collection, questionnaire design, data analysis, implications of results and written/oral reports are included. This methodological course assumes basic understanding of marketing in a global/multi-cultural environment. MA 170 prerequisite waived with Math Placement score of 4.0 or higher.  
Prerequisites: Take IB 201; and MA 170 or MA 206 or equivalent.  
Offered: Every year, Fall

IB 320. Introduction to Global Entrepreneurship. 3 Credits.  
This course introduces students to the major topics in global entrepreneurship, including: 1) the critical roles of national governments, multilateral institutions and international agreements in shaping the rules and conditions that shaped global opportunities and challenges; 2) the role of international entrepreneurship in this complex global environment; and 3) issues concerning how to identify opportunities, build a start-up, manage its growth and resources in a global environment. The course introduces some important skills, such as country risk analysis, business model building and valuation of an international business opportunity. The course is taught by lecture, case analysis and experiential projects.  
Prerequisites: Take IB 201.  
Offered: Every year, Spring

IB 324. Negotiating Internationally. 3 Credits.  
The course focuses on analyzing the international context of different dimensions of negotiations and related topics, such as communication, conflict, conflict resolution, group, power, influence, persuasion and mediation. Special emphasis is placed on understanding how culture influences the processes as well as styles of negotiation behavior of different nationalities.  
Prerequisites: Take IB 201 or LE 225 or LE 370.  
Offered: Every year, Fall

IB 335. International Finance. 3 Credits.  
This course focuses on the financial management of multinational corporations. It includes topics of the global financial market, foreign exchange risk management, financing decisions, investment decisions and funds remittance/transfer decisions when firms operate in a competitive global economy and face currency risks, political and regulatory risks.  
Prerequisites: Take IB 201 FIN 201.  
Offered: Every year, Fall and Spring

IB 345. Global Supply Chain. 3 Credits.  
This course covers issues related to the global procurement decision-making process from multiple perspectives, including strategy, tactical and operational. Topics may include, but are not limited to: order processing, quality control, value analysis, warehousing, inventory control, reverse logistics, green supply chain, offshoring and outsourcing, and international transportation, financing, risk, customs and incoterms.  
Prerequisites: Take IB 201.  
Offered: Every year, Spring

IB 352. International Management. 3 Credits.  
This course addresses the theory and practice of strategic management and organizational behavior in a global environment with a specific emphasis on international human resource management. The understanding of cultural differences is a major emphasis of this course. The course also addresses cross-cultural communication, selection and management of expatriates, and global leadership skills. In addition, this course introduces the students to the reading and interpreting of international management research articles and highlights some of the special challenges related to conducting and interpreting cross-cultural research.  
Prerequisites: Take IB 105 or IB 201.  
Offered: Every year, Fall

IB 355. Advanced Topics in International Financial Management. 3 Credits.  
This course focuses on country risk analysis and management, multinational capital budgeting, multinational capital restructuring (such as acquisition and disinvestment), multinational cost of capital, capital structure, long-term financing, short-term asset/liability/cash management, tax planning and the impacts of foreign direct investment on the host country's economic development. The course is taught using cases and experiential projects.  
Prerequisites: Take IB 335.  
Offered: As needed

IB 362. Cross-Cultural Business Research Part 1. 3 Credits.  
This is the first of a two-part sequence (the second being IB 363). The objective of the IB 362-IB 363 series is to produce a hypotheses driven academic research poster which empirically addresses a cross-cultural/international business issue. Due to the high intensity of interaction with the instructor, these courses allow limited enrollment and require an instructor interview and permission to register. IB 352 is recommended as a prerequisite.  
Prerequisites: Take IB 201.  
Offered: As needed

IB 363. Cross-Cultural Business Research Part 2. 3 Credits.  
This course is the second of a two-part sequence. Building directly on IB 362, this course aims to complete an academic research paper that could be submitted to an international academic research conference. Working closely with the instructor, the student completes appropriate statistical analyses of the data collected and develop and write a literature review leading to research hypotheses, and methodology, a description of results, as well as a discussion section interpreting these results and including research limitations and suggestions for future research.  
Prerequisites: Take IB 362.  
Offered: As needed

IB 399. International Business Independent Study. 1-6 Credits.  
Offered: As needed
IB 401. International Strategy and Business Plan. 3 Credits.
This course allows students to integrate the knowledge they acquired in the IB and SB business core courses into a comprehensive business model for a country market-entry project. This business model addresses macro-environmental/country assessment including current events, industry analysis, marketing strategy, management strategy including corporate social responsibility decisions, global supply chain strategy, as well as financial considerations and impacts, and critical success factors for implementation. This course compels students to think beyond the confines of the home country and to consider how to best offer their product/service in a specific host country.
Prerequisites: Take IB 313 IB 335 IB 352. IB 345 is preferred prerequisite
Offered: Every year, Spring

IB 488. International Business Internship. 3 Credits.
This internship in international business must be approved by the department chair and the dean in accordance with school regulations. This course is graded on a pass/fail basis.
Prerequisites: Take IB 201.
Offered: Every year, All

Irish Studies (IRST)

IRST 101. Introduction to Irish Studies. 3 Credits.
This course provides an introduction to Irish history and culture from the pre-Celt period to the present day. While the core approach is historical, students are introduced to Irish language, literature, filmography, landscape, music, politics, sports, poetry, theater, law and more. Students also look at the various methodological approaches for understanding Ireland, past and present. The course is led by Professor Christine Kinealy, but includes sessions with other lecturers involved in teaching Irish Studies at Quinnipiac University and partner institutions. Requires sophomore standing.
Prerequisites: Take FYS 101.
Offered: Every year, Fall
UC: Humanities, Intercultural Understand

IRST 300. Special Topics in Irish History. 3 Credits.
Offered: As needed

IRST 301. Irish Studies Capstone. 3 Credits.
This research capstone is undertaken in the final year of study. It is intended to bring reflection and focus to the Irish Studies minor by allowing the student to undertake a major piece of independent research based on the skills, experiences and knowledge acquired during their course of study. The student identifies a research topic and creates a research question that is appropriate to the area being studied. With the guidance of her/his supervisor and the appropriate librarian, the student creates a reading list and a timetable for completion. Students are encouraged to utilize the rich body of Irish resources available at Quinnipiac University. The semester-long project culminates in a 5,000- to 7,000-word essay (or with prior agreement, presentation, performance or other appropriate product) that demonstrates evidence of original research and critical thinking.
Prerequisites: Take IRST 101.
Offered: As needed

IRST 306. Frederick Douglass and Ireland. 3 Credits.
In August 1845, Frederick Douglass, then a 27-year-old fugitive slave, arrived in Dublin, the capital of Ireland. He intended to visit for only four days, to oversee the re-publication of his memoir, “Narrative of the Life of Frederick Douglass, an American Slave,” yet he stayed in the country for four months. When he left, he described his time there as being “transformative.” Throughout the remainder of his long life, Douglass referred to how Ireland—its colonial status, its religious struggles, its endemic poverty—helped to shape his political philosophies. This course explores why Ireland played such an important part in his political and intellectual development.
Prerequisites: Take IRST 101 or one 200-level history course.
Offered: As needed

Italian (IT)

IT 101. Elementary Italian I. 3 Credits.
This course is designed for students who have no previous knowledge of Italian. The course includes instruction and practice in all four language skills: speaking, reading, writing and listening comprehension, with emphasis on communication and oral proficiency. In addition, students explore aspects of Italian life and culture. Students who have three or more years of high school Italian with grades of B or above may not take this course for credit.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

IT 102. Elementary Italian II. 3 Credits.
This course is a continuation of IT 101.
Prerequisites: Take IT 101 or placement into IT 102.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

IT 200. Italian: Special Topics. 3 Credits.
Taught in English.
Prerequisites: Take EN 101.
Offered: As needed

IT 201. Intermediate Italian I. 3 Credits.
This third-semester course includes instruction and practice in all four language skills: speaking, reading, writing and listening comprehension, with emphasis on communication and oral proficiency. In addition, students explore aspects of Italian life and culture through analysis of selected authentic readings and films.
Prerequisites: Take IT 102 or placement into IT 201.
Offered: Every year, Fall
UC: Breadth Elective, University Curriculum Ele

IT 202. Intermediate Italian II. 3 Credits.
This course is a continuation of Italian 201.
Prerequisites: Take IT 201 or placement into IT 202.
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Ele
IT 210. Italy: A Journey Through Its Food, History and Culture (in Eng.).  3 Credits.
The study of Italian food—examined from a literary, historical, socioeconomic, political and environmental perspective—guides students' exploration of Italian culture. Starting with ancient Rome, students study how the production, preparation and consumption of food have given shape to Italian identity, drawing from representative literary, artistic and historical works, as well as scholarly sources. Finally, Italian food culture is considered in relation to contemporary issues such as globalization and sustainability. Taught in English.
Prerequisites: Take EN 101.
Offered: Every other year, Spring
UC: Humanities, Intercultural Understand

IT 211. Italian Cinema (in Eng.).  3 Credits.
The study of Italian cinema and its main movements and periods guides students' exploration of Italian culture. From the postwar era to the hyper-contemporary, students study the most representative films of Italian cinema in order to analyze the ways in which cultural and national identity have been portrayed and typified by filmmakers representing a variety of cinematic and historical periods and genres. Taught in English.
Prerequisites: Take EN 101.
Offered: Every other year, Spring
UC: Fine Arts, Intercultural Understand

IT 212. Florence and the Making of the Renaissance (in Eng.).  3 Credits.
This course explores a time—the Renaissance—and a place—Florence—in which many defining features of modernity first took shape and became object of critical thinking. Students examine major authors and genres, from short fiction and poetry to political and scientific treaties, and contextualize them within the artistic, political and social framework of their time. Topics include critical perspectives on notions of the individual and community, as well as their interplay with questions of social status, gender and sexuality; Florence as proto-capitalist society and the emergence of modern banking; education and artistic expression as forms of empowerment and vehicles for social change. Taught in English.
Prerequisites: Take EN 101.
Offered: Every other year, Fall
UC: Humanities, Intercultural Understand

IT 299. Independent Study.  3 Credits.
Offered: As needed

IT 301. Advanced Italian I.  3 Credits.
This course develops oral and written language skills to a high degree of proficiency, while exploring major social and cultural trends in 20th-century Italy. Topics such as politics, popular culture, history and gastronomy are examined through authentic texts and a variety of media.
Prerequisites: Take IT 202 or permission of the instructor.
Offered: As needed
UC: Breadth Elective, University Curriculum Ele

IT 302. Advanced Italian II.  3 Credits.
This course develops oral and written language skills to a high degree of proficiency, while exploring major social and cultural trends in contemporary Italy. Topics such as politics, popular culture, history and gastronomy are examined through authentic texts and a variety of media.
Prerequisites: Take IT 202 or permission of instructor.
Offered: Every other year, Spring
UC: Breadth Elective, University Curriculum Ele

IT 316. Introduction to Italian Literature and Culture.  3 Credits.
This course explores the evolution of Italian literature from its origins to modern day, placing representative texts within an interdisciplinary perspective. Through response papers and presentations in the target language, students further perfect written and oral skills, and develop the necessary foundation for more advanced study in the target language.
Prerequisites: Take IT 202 or permission of the instructor.
Offered: Every other year, Fall

IT 320. Italy's Cities.  3 Credits.
This course explores the history, literature and visual art of Italy's cities and their unique contribution to Western civilization, while continuing to refine oral and written skills in the target language.
Prerequisites: Take IT 202 or permission of instructor.
Offered: As needed

IT 399. Independent Study.  3 Credits.
Offered: As needed

Japanese (JP)

JP 101. Elementary Japanese I.  3 Credits.
This introduction to Japanese as a spoken and written language includes intensive drills in the basic structures of the language. Elementary reading materials are used for vocabulary building, analytical exercises and discussion. Students learn about Japanese culture, customs and business practices. Basic Japanese scripts are introduced concurrently with other skills.
Offered: Every year, Fall
UC: Breadth Elective, University Curriculum Ele

JP 102. Elementary Japanese II.  3 Credits.
This course is a continuation of JP 101.
Prerequisites: Take JP 101.
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Ele

JP 199. Independent Study.  3 Credits.
Offered: As needed, All

JP 210. Introduction to Japanese Culture.  3 Credits.
This course provides students with an overview of the Japanese culture, including the history, arts, tradition, beliefs, customs, behaviors, society, food and other topics. Upon successful completion of the course, students possess a better understanding of Japan's culture and its people. Students expand their horizons with their new knowledge to understand a different culture and viewpoints. The course is conducted in English and does not require prior knowledge of Japanese.
Prerequisites: Take EN 101.
Offered: As needed
UC: Humanities, Intercultural Understand

JP 299. Independent Study.  3 Credits.
Offered: As needed, All

JP 399. Independent Study.  3 Credits.
Offered: As needed, All

JP 499. Independent Study.  3 Credits.
Offered: As needed, All
Journalism (JRN)

JRN 106. Multimedia Production Techniques (SPS 106). 3 Credits.
Students learn the fundamentals of multimedia production, including the use of digital cameras and related equipment, to tell simple stories and the use of editing software to prepare them for distribution. Students learn the rudiments of video-camera use, composition and lighting, capturing audio, continuity, interviewing, voiceovers, music beds, graphics, and shooting and editing action. Students produce b-roll, features, interviews, location pieces and story packages pertaining to their concentrations or areas of interest.
Offered: Every year, All

JRN 199. Journalism Independent Study. 1-6 Credits.

JRN 260. News Writing. 3 Credits.
This course teaches the principles and practices of news writing for digital platforms and print. Journalists must acquire skills to identify a news story and its essential elements, gather information efficiently, place it in a meaningful context, and write concise and compelling accounts. The readings, discussions, exercises and assignments for this course are designed to help students acquire such skills and understand how to utilize them wisely.
Prerequisites: Take JRN 160 or COM 140.
Offered: Every year, All

JRN 263. Broadcast News Writing. 3 Credits.
Students are introduced to the fundamentals of writing for the broadcast media in a professional environment. Topics include writing for radio and television, as well as integrating sound and video into news stories. The course also provides a basic understanding of primary journalistic values such as accuracy and fairness as they apply to broadcast news.
Prerequisites: Take JRN 160 or COM 140.
Offered: Every year, All

JRN 275. News Reporting. 3 Credits.
This course is focused on news reporting. Students learn how to gather, analyze and use information for journalistic stories. They learn to identify and use digital databases and resources, conduct thought-provoking interviews, and search and locate public documents in ethical and legal manners.
Prerequisites: Take JRN 160 or COM 140; and JRN 260 or JRN 263.
Offered: Every year, All

JRN 280. The Art of the Podcast (SPS 280). 3 Credits.
This hands-on course explores creative audio storytelling via the podcast. Students learn how to research, write, record, edit and self-publish creative nonfiction and fictional stories that are both original, and emulate some of the most popular podcasts on the market. Special emphasis is placed on audio gathering techniques, storytelling techniques and interviewing for live and recorded shows.
Offered: As needed, Spring

JRN 285. Mobile Journalism: The Future of News. 3 Credits.
News consumption on smartphones and tablets has surpassed that of desktops and newspapers, making mobile devices key to the future of news. Students examine the impact of this trend on the future of journalism, learn about the technologies necessary to produce news on these devices, critique the user experience provided by various apps and mobile websites, and produce a news app of their own. They also learn how to cover news events using mobile technology, how to produce mobile news stories and how to work in a mobile newsroom.
Prerequisites: Take JRN 160 or COM 140.
Offered: As needed, Spring

JRN 291. Reporting for Television I. 3 Credits.
Students learn the principles of producing television news packages, which they shoot and edit using HD non-linear equipment. All students cover news and sports primarily off campus. The focus is on writing, news judgment, content, interviewing, use of voice and doing stand-ups. Stories can air on the TV newscast that is broadcast live weekly.
Prerequisites: Take JRN 105 or JRN 106 or SPS 105 or SPS 106; and JRN 260.
Offered: Every year, All

JRN 299. Independent Study Journalism. 1-6 Credits.

JRN 300. Special Topics in Journalism. 3 Credits.
Students engage in a detailed examination of current issues in journalism in a format that may incorporate academic research, journalistic writing and multimedia presentations. Students should consult the School of Communications course bulletin for information about each semester’s offerings.
Prerequisites: Take JRN 260 or JRN 263.
Offered: As needed, All

JRN 301. Special Topics. 4 Credits.
Offered: As needed

JRN 311. Reporting for Television II. 3 Credits.
In this course, students produce in-depth television stories. Pieces are longer to allow the student to explore issues in greater detail. Stories can air on the TV newscast that is broadcast live weekly.
Prerequisites: Take JRN 291.
Offered: As needed

JRN 315. The Art of Journalistic Interviewing. 3 Credits.
Compelling stories don't just happen. They come from strong interviewing skills that tell stories people care about. Students learn how to ask questions that elicit pithy responses, emotion and expertise, using in-class and out-of-class exercises. Students also analyze and critique the interviewing styles used by professional journalists, as well as the work of their classmates.
Prerequisites: Take JRN 105 or JRN 106 or SPS 105 or SPS 106; and JRN 160 or COM 140.
Offered: As needed

JRN 325. Telling Global Stories. 3 Credits.
Using multimedia to gather and present facts lets journalists expand the scope of their storytelling. Students in this course examine current international journalism trends and socioeconomic and political issues specific to a developing country, learn fact-gathering techniques, and travel to that country during spring break to put into practice what they have learned. After spring break, students work on an interdisciplinary multimedia project.
Offered: As needed, Spring

JRN 341. Sporting Culture Through Nonfiction. 3 Credits.
It has often been said that sport is a microcosm of society, but many rhetoric scholars have begun to suggest that sport plays a role in constituting society and is "defined by a range of political practices, including allocations of resources, representations of identity, projections of nationalism and globalization, activism and change." This directed readings course examines American culture, as well as comparative values, through nonfiction accounts of sport.
Offered: As needed, Summer Online
JRN 343. Literary Journalism in the '60s. 3 Credits.
The 1960s stand out as an era of change and turbulence in 20th-century America. Throughout the 1960s and 1970s, these nonfiction writers and journalists wrote in a personal style that became known as "Literary Journalism," or "The New Journalism." This directed reading course requires students to analyze the historical and contemporary views of major literary journalists.
Offered: As needed, Summer Online
UC: University Curriculum Ele

JRN 359. Journalism Elective. 3 Credits.

JRN 360. Watchdog Reporting. 3 Credits.
In this course, students learn and practice watchdog journalism, helping to inform our communities and keeping public figures and institutions in check. Students cover in-depth news off campus, on topics such as crime, public health, politics, education and the environment. In conversations with working journalists, students learn both innovative and proven strategies for reporting. Students also work individually and in teams to publish stories and multimedia projects based on public data, documents and interviews.
Prerequisites: Take JRN 260 or JRN 263 or JRN 275.
Offered: As needed, Spring

JRN 361. Sports Reporting (SPS 361). 3 Credits.
This course introduces students to coverage of sports for the news media and includes writing game stories and sports profiles.
Prerequisites: Take JRN 260 or JRN 263.
Offered: Every year, All

JRN 362. The Story of Football (SPS 362). 3 Credits.
This course traces the historical trajectory of American football and the coaches, players and media portrayals that transformed the game from a 19th-century collegiate test of manliness to what it is today: a spectator sport of immense appeal whose popularity endures despite more than a century of concerns over the game's debilitating and sometimes lethal violence.
Offered: Every year, Fall

JRN 365. Effective Editing. 3 Credits.
Students learn the basics of editing online text, magazines and newspapers, with an emphasis on copyediting, headline writing, composition and story packaging.
Prerequisites: Take JRN 260 JRN 275.
Offered: As needed

JRN 372. Entrepreneurial Media (The MIC Project). 3 Credits.
This course addresses the fiscal and distribution challenges faced by journalists and media professionals and empowers student teams to construct sustainable business models. Students experiment with the latest technology, exchange ideas with some of the industry's most prominent thinkers and developers, and create content or products for viable media business ventures. Open to all School of Communications students.
Prerequisites: Take COM 140 or JRN 160.
Offered: Every year, Fall

JRN 375. Cultural and Entertainment Journalism. 3 Credits.
Students learn how to write about arts and culture by reporting on local events and developing a theoretical framework for cultural reviewing. Topics include television, music, theater and film. In addition to hands-on reporting assignments, coursework includes readings, screenings and fieldwork.
Prerequisites: Take COM 140 or permission of instructor.
Offered: Every other year, Fall

JRN 380. Fundamentals of Digital Journalism. 3 Credits.
This course covers the principles and practices associated with researching and producing stories for digital media. Students are required to produce stories that include textual, audio, video and interactive elements.
Prerequisites: Take JRN 105 or JRN 106 or SPS 105 or SPS 106; and JRN 260 or JRN 263 or JRN 275.
Offered: Every year, All

JRN 395. Broadcast Performance. 3 Credits.
This course explores the variety of skills required to communicate effectively through broadcasting. Students learn and practice on-air presentation techniques for effective delivery and interpretation. The course focuses on voice, voice control and the phrasing interpretation of copy and body language. Study focuses on performance techniques, creativity, writing and analytical skills needed to communicate effectively. Open to broadcast and print students.
Prerequisites: Take JRN 105 or JRN 106 or SPS 105 or SPS 106; and JRN 263.
Offered: As needed

JRN 399. Journalism Independent Study. 3 Credits.

JRN 400. Special Topics in Journalism. 3 Credits.
Students should consult the School of Communications course bulletin for information regarding each semester's offerings.
Offered: As needed

JRN 450. Senior Seminar. 3 Credits.
This seminar entails an in-depth examination of issues and research perspectives in journalism. Seminar titles vary each term and may include topics such as ethics in journalism, diversity in the newsroom, and international journalism practices. Students should consult the School of Communications course bulletin for information about each semester's offerings.
Offered: Every year, All

JRN 470. Narrative Journalism. 3 Credits.
Students in this class learn to report and write long-form articles suitable for publication in online and print magazines. Over a series of major writing assignments, students apply their research and interviewing skills to produce exhaustively reported and elegantly written articles. Topics in the course include: lead writing, article structure, interviewing, the use of statistics and the application of narrative techniques to journalistic writing.
Prerequisites: Take JRN 260 and JRN 275; or JRN 160 and JRN 263; or JRN 275.
Offered: As needed

JRN 480. Advanced Digital Journalism. 3 Credits.
Many newsrooms now combine multiple types of media to immerse readers and make complex stories more digestible. This course covers the reporting and production skills needed to build many of these new forms, including interactive graphics and maps, and advanced audio and video projects. Students also study past and present interactive journalism projects and meet with some of the professionals who designed them.
Prerequisites: JRN 305 or JRN 380.
Offered: As needed
LE 101. Introduction to the American Legal System. 3 Credits.
This course introduces students to the American system of law and legal structure, and gain an overview of several areas of law. Topics include basic legal concepts, the structure of the American court system, as well as legal theory and procedure.
Offered: Every year, All

LE 200. Special Topics. 3 Credits.
Prerequisites: Take LE 101.
Offered: As needed

LE 211. Legal Reasoning, Research and Writing I. 3 Credits.
This course introduces students to legal research, both in print and online sources, and provides a foundation in legal reasoning, writing and citation in the context of objective, predictive legal documents. Students learn how to move from a fact pattern, through researching and analyzing the controlling law, to presenting the student’s legal analysis in the form of formal legal memoranda.
Prerequisites: Take LE 101 EN 102.
Offered: Every year, Fall and Spring

LE 212. Legal Reasoning, Research and Writing II. 3 Credits.
Building on the skills learned in LE 211, students in this course refine and further develop their analytical, research and writing skills and learn to present their findings in a wider variety of legal documents. Students also are introduced to persuasive legal writing and advocacy.
Prerequisites: Take LE 211.
Offered: Every year, Fall and Spring

Legal Studies (LE)

LE 100. Special Topics. 1 Credit.
Offered: As needed

LE 199. Independent Study. 1-3 Credits.
Offered: Fall, Spring

LE 150. Introduction to Mock Trial. 1 Credit.
This experiential learning course introduces students to the legal skills associated with bringing a case to trial. Students develop skills in trial advocacy through a progressive development of techniques related to the trial of a case using an established fact pattern throughout the semester. Skills in trial procedure, legal analysis, evidentiary argument, and oral advocacy are developed throughout the course, which culminates in the presentation of a trial based upon the established fact pattern.
Offered: Every year, Fall and Spring

LE 159. Legal Studies Elective. 3 Credits.
Offered: As needed

LE 160. Competitive Mock Trial. 1 Credit.
This course is designed for students who intend to compete in mock trial competitions throughout the fall semester. Students develop and enhance skills related to trial procedure, legal analysis and oral advocacy through preparation for competition at mock trial tournaments during the fall semester through the preparation of direct and cross examinations, opening and closing arguments and the portrayal of witness roles. They attend one or more mock trial tournaments during the fall semester in preparation for the American Mock Trial Association Regional Tournament in February. Students are permitted to repeat this course, for 3 credits total.
Offered: Every year, Fall

LE 175. Special Topics. 3 Credits.
Offered: As needed
LE 224. Sports Law (SPS 224). 3 Credits.
Students explore the legal concepts surrounding sports, including contracts, torts, crimes and Title IX. Legal issues involve all sports and level of athletics, include professional, amateur, student and fans.
Prerequisites: Take LE 101.
Offered: Every year, Spring

LE 225. Alternative Dispute Resolution. 3 Credits.
Students explore the various methods of dispute resolution that are available in the private sector, as alternatives to traditional litigation. Students learn to distinguish the various forms of dispute resolution, determine who participates in each form, how they participate and the advantages and disadvantages of each. Students role play in the various methods to more fully understand the mechanisms of alternative dispute resolution.
Prerequisites: Take LE 101.
Offered: Every other year, Fall

LE 250. Gender and the Law (WS 250). 3 Credits.
This course focuses on legal issues regarding gender, including the differential treatment of women, men and transgender in the legal system, and contemporary responses to gender issues in society. (Alternative perspective)
Prerequisites: Take LE 101 or WS 101.
Offered: Every Third Year, Fall

LE 259. Legal Studies Elective. 3 Credits.
Offered: As needed

LE 260. Trial Techniques. 3 Credits.
This course provides an overview of all aspects of a criminal and civil trial, and prepares students for advanced oral advocacy.
Prerequisites: Take LE 101 EN 102.
Offered: As needed

LE 300. Special Topics. 3 Credits.
Prerequisites: Take 6 credits from legal studies courses.
Offered: As needed

LE 305. Civil Procedures. 3 Credits.
This course provides students with a basic understanding of the procedure of civil litigation from the beginning of a conflict to its final resolution, from both a theoretical and practical approach. The course covers the beginning of the litigation process, from when a client first contacts an attorney, through motions and pleadings, by following a torts case. Jurisdiction, torts, client interviewing, fact investigation, pleadings, motion practice, discovery and settlement are covered. The role of the attorneys, paralegals and other non-lawyer professionals, is discussed.
Prerequisites: Take LE 212 and junior status.
Offered: Every year, Fall and Spring

LE 309. Advanced Legal Writing and Advocacy. 3 Credits.
This course reviews and develops the writing, research and analytical skills introduced in LE 211 and 212. Students continue to analyze legal problems and prepare both objective and persuasive documents written in a form that adheres to the conventions of the legal profession. Students improve their ability to write clear prose, edit their own and others' work, and are introduced to persuasive legal writing and appellate advocacy. (Practice)
Prerequisites: Take LE 212.
Offered: Every Third Year, Spring

LE 311. Administrative Agencies. 3 Credits.
The workings of, and procedures involved in dealing with, government agencies are introduced. Skills involved in being an advocate are covered. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every Third Year, Fall

LE 312. Family Law. 3 Credits.
This course presents a study of how law relates to the family as a functioning entity, examination of family law practice, current issues in family law and equal protection, and preparation of documents for dissolution of marriage.
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Spring

LE 315. Wills, Probate and Estate Administration. 3 Credits.
Legal concepts and statutes pertaining to wills and probate are examined, with special emphasis on preparation of forms necessary in administration of an estate. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Spring

LE 317. International Law (PO 317). 3 Credits.
Students are introduced to the nature and development of international law as part of the global political system. They explore sources of international law from treaties, custom, general principles, judicial decision and scholarly writing. Other topics include the connection between international and national law, dispute resolution using arbitration and national and international court cases, use of law to manage international conflict, negotiation, and legal issues concerning shared resources. (Alternative Perspective)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Fall

LE 318. Human Rights Law and Global Justice. 3 Credits.
What is a human right? How do particular political and historical contexts influence our understanding of rights and the construction of legal rules? This course focuses on the legal statutes and cases that constitute human rights jurisprudence, and also on the human interest stories that inform and shape those rights from a cross-cultural context. Students work with a local organization to gain a better understanding of what an abstract notion of "human rights" means to individuals. (Alternative Perspective)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Fall

LE 319. International Law and the Individual. 3 Credits.
This course considers the complex legal issues surrounding private interactions between individuals from different nations. Students explore the sources of law that may apply when a citizen of one country lives and works in another country or simply has dealings on a business or personal level with persons from other countries. Topics include immigration, customs, taxation, banking, family law, traveling, health care, voting and criminal justice. (Alternative Perspective)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Fall
LE 320. Land Transfer and Closing Procedures. 3 Credits.
This course presents background for the sources of real estate law; land and its elements, the nature of property, the concept of ownership, and land titles and interest in land; procedures for conveying interest in land recording statutes; and searching titles. Emphasis is given to the preparation, coordination and completion of real estate closings. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Fall

LE 322. Health Care Law (HSC 322). 3 Credits.
This course provides an overview of the legal issues faced by health care providers and patients. Students explore various topics arising from the organization and financing of health care, provider liability, bioethics and public health. The course focuses on the way in which law impacts the delivery of health care in the United States.
Prerequisites: Take 6 credits from legal studies; or Take LE 101 and HSC 220.
Offered: Every other year, Spring

LE 328. Employment Law. 3 Credits.
This course provides an overview of the legal relationship between employer and employee and a basic understanding of employment-related law and its impact on the employer/employee relationship. Students study both federal and state laws applicable to the employer/employee relationship. Areas covered include the basis for the employer/employee relationship, pre-employment concerns, diversity and discrimination issues, discrimination actions, termination of the employer-employee relationship, ethical issues in employment law, and current issues. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Fall

LE 329. European Union Law (PO 329 IB 329). 3 Credits.
This course focuses on the European Union and its relationship with the United States. It covers the origin and development of the European Union, the institutions of the EU and the law-making process in the EU. Certain specific legal regimes in the EU, including "the four freedoms," EU business and anti-trust law, and the EU's common security and foreign policy are discussed. The course includes a travel abroad option, spending spring break in Brussels, the primary seat of the EU regional "government." Day trips to the medieval city of Bruges, Belgium and to Aachen, Germany round out the experience. (Alternative Perspective)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every Third Year, Spring

LE 330. Law of Business Entities. 3 Credits.
In this study of the different types of business entities, including corporations, partnerships and limited liability companies/partnerships, emphasis is given to researching and drafting documents involved in the formation, maintenance and dissolution of business entities. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Fall

LE 340. American Constitutional Law (PO353). 3 Credits.
The United States Constitution and how it has been interpreted by the Supreme Court are studied in this course. The class examines Supreme Court decisions with a focus on analysis and legal reasoning.
Prerequisites: Take PO 131 or 6 credits from subject LE.
Offered: Every other year, Spring

LE 342. Comparative Constitutional Law (PO 342). 3 Credits.
Students compare the legal structures and fundamental principles typically found in constitutions by studying the constitutions of several different countries. The course explores the structure of government; the distinction between legislative, executive and judicial authority; the incorporation of fundamental human rights; the relationship between church and state; free speech and the press, and social welfare rights. Participants analyze the distinction between constitutional law and domestic law and assess the role of various constitutional frameworks in a global society. (Alternative Perspective)
Prerequisites: Take 6 credits from legal studies courses or take PO 131 or PO 101.
Offered: Every other year, Spring

LE 345. Intellectual Property. 3 Credits.
This course introduces students to the different areas of intellectual property law, including patents, trademarks, trade secrets and copyright law. Intellectual property protects products created by writers, artists and inventors. Preparation of necessary documents is covered. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Spring

LE 350. Federal Indian Law and Policy. 3 Credits.
The relationship between the federal government and Native Americans and tribes is considered from a historical and practical perspective, along with current topics in Indian law. Practice applications before the two Connecticut tribal courts are covered as well. (Alternative Perspective)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every Third Year, Spring

LE 360. Mediation. 3 Credits.
This course approaches mediation from the mediator's perspective. Students develop a sophisticated understanding of the legal and ethical aspects of mediation and learn to mediate disputes between parties in the context of civil, criminal and family disputes. Students also learn how to use mediation techniques to resolve disputes in non-legal settings. The course employs mediation exercises, role plays, simulations, self-critique and group discussions to demonstrate and evaluate effective communication skills, bargaining strategies, mediation styles and intervention techniques. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every year, Spring

LE 370. Negotiation. 3 Credits.
This course provides students with a thorough understanding of the theory, strategy and practice of negotiation, both transactional and as a dispute resolution method. Students learn to negotiate to resolve problems and communicate effectively, within an ethical framework. The course uses negotiation strategy, exercises, role plays, group discussions and reflective writing to demonstrate and evaluate negotiation techniques and styles. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every year, Fall

LE 399. Independent Study. 1-15 Credits.
LE 485. Legal Internship Seminar.  3 Credits.
Students are placed in a supervised legal internship in a law office,
government office, nonprofit organization or other legal setting for 10
hours per week. During the weekly seminar, students discuss legal ethics,
professional responsibility, and career development. They also complete
a legal memo on a complex topic incorporating principles from the core
legal studies courses, as well as participate in a mock appellate oral
argument. Students also produce a journal focused on their guiding
question in completion of the Capstone requirement. For majors and
students completing the Minor/Certificate in Legal Studies only.
Prerequisites: Take LE 305 and senior status required.
Offered: Every year, Fall and Spring

LE 490. Senior Seminar in Law in Society.  3 Credits.
In this seminar, students must research a legal issue of their choosing;
critically examine how our legal system addresses, or fails to address, the
issue; and recommend a change in our approach, suggest an alternative
interpretation, or highlight a particularly effective response to the issue.
Students ultimately produce legal scholarship with a focused thesis
developed through substantial research and analysis. The course culminates in each student completing a publishable quality thesis and
presenting that work to the class orally. For majors only.
Prerequisites: Take LE 305 and senior status required.
Offered: Every year, Fall and Spring

LE 499. Independent Study in Legal Studies.  1-4 Credits.

Management (MG)

MG 105. Organizational Management.  3 Credits.
This course provides an introduction to the principles of management,
covering concepts such as organizations, leadership, and supply chain
management. This course prepares students to better understand
the management and operations of organizations by integrating
management concepts with the student's professional and academic
interests. Students may not receive credit for both MG 210 and MG 105.
For non-business majors/minors only.
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Ele

MG 210. Essentials of Management and Organizational
Behavior.  3 Credits.
This course provides an introduction to the functions and processes
of management. It provides a foundation for managerial thinking,
analysis and application. Emphasis is on the foundations of managing
organizations.
Offered: Every year, All

MG 211. Operations Management.  3 Credits.
The nature of competition is not between companies but rather between
supply chains. This course focuses on the operations in a supply chain framework. Students develop a sophisticated understanding of
supply chain perspectives and learn to analyze operational decisions
using quantitative models. Topics may include, but are not limited to:
purchasing, forecasting, inventory, capacity-planning and information
technology.
Prerequisites: Take EC 271 EC 272 MA 206 MA 275 MA 285 or PS 206.
Offered: Every year, All

MG 211H. Honors Operations Management.  3 Credits.
This course provides an introduction to the concepts and processes
underlying operations management. The course emphasizes how
quantitative models and methods can be used to enhance the decision-
making process. Operations managers transform human, physical and
technical resources into goods and services. Topics include operations
systems design, capacity planning, job scheduling, inventory control,
project planning, facilities location and layout, total quality management,
and forecasting.
Prerequisites: Take EC 271 or EC 272.
Offered: As needed

MG 240. Software Applications for Business.  3 Credits.
The course instructs students on the importance of using data to
empower informed business decisions. Using Excel, Access and SQL,
the course focuses on both the conceptual and technical aspects of
designing systems to help managers turn raw data into information.
Prerequisites: Take MG 210.
Offered: Every year, Fall and Spring

MG 260. Power and Politics of Leadership.  3 Credits.
The central theories and strategies of leadership within an organizational
context are reviewed. Individual expectations and values are considered
in terms of their impact upon leading other organizational members.
Recent leadership research, practice and experience are examined as a
challenge for leaders of the 21st-century business organization.
Prerequisites: Take MG 210.
Offered: As needed

MG 300. Special Topics.  3 Credits.
Prerequisites: Take MG 210.
Offered: As needed

MG 301. Group and Virtual Team Processes.  3 Credits.
Students gain advanced knowledge of best practices related to effective
group processes. This course provides a hands-on, experiential approach
to the development of personal and interpersonal competencies that
prepare students to excel at working in cross-functional as well as
multicultural teams. Contemporary issues related to groups such as
virtual teaming also are explored.
Prerequisites: Take MG 210.
Offered: Every year, Fall and Spring

MG 302. Human Resource Management.  3 Credits.
This course introduces students to the principles, policies and practices
related to human resource management. Students examine various
HRM topics such as employee development, engagement, employment
relations and law, compensation, recruitment and staffing, which they will
likely deal with as future HRM managers and leaders.
Prerequisites: Take MG 210.
Offered: Every year, Fall and Spring

MG 306. Staffing: Recruitment, Selection and Placement.  3 Credits.
In this course, students learn how to design and carry out various staffing
activities effectively within labor market and legal constraints. Staffing
activities include recruitment (whom to recruit, where and when to recruit,
and how to recruit); selection (whom to hire and why); and placement (in
which jobs, at what time, and in what career progressions).
Prerequisites: Take MG 302.
Offered: Every year, Fall

<tbody>
<tr>
<td>MG 311</td>
<td>Advancing Employment Relations</td>
<td>3</td>
<td>The objective of this course is to enable students to evaluate HR policies against principles of employment law and labor relations. Students learn about laws and policies designed to protect equal employment opportunities (e.g., civil rights, disabilities and family leave) and compensate employees for occupational injuries and illnesses. The impact of management on labor relations and the development of managerial approaches to achieve labor-management cooperation are discussed using an ethics and social responsibility lens.</td>
<td>Take MG 302.</td>
<td>Every year, Fall and Spring</td>
</tr>
<tr>
<td>MG 312</td>
<td>Sports Management (SPS 312)</td>
<td>3</td>
<td>This course offers an opportunity for students to gain information and understanding of the various practices and procedures associated with sport administration and management. Organizational structure, management decisions and challenges, as well as career opportunities at the professional, intercollegiate, interscholastic, youth and community sport levels are explored. The areas of sports tourism, sport management agencies and sport facility and event management are analyzed in terms of their impact on the management and business of sports.</td>
<td>Take MG 210.</td>
<td>Every year, Fall and Spring</td>
</tr>
<tr>
<td>MG 315</td>
<td>Self Management</td>
<td>3</td>
<td>This course presents an intensive assessment of an individual's personal, psychological makeup so as to increase the ability to manage personal and interpersonal experiences. The premise for the course rests on the assumption that effective management of others begins with management of oneself.</td>
<td>Take MG 210.</td>
<td>As needed</td>
</tr>
<tr>
<td>MG 320</td>
<td>Emotional Intelligence in the Workplace</td>
<td>3</td>
<td>This course provides the student with an understanding and appreciation of the role of emotional intelligence in everyday living and in particular, in the development of the leadership phenomenon. Topics include: 1) Why study emotional intelligence; 2) anatomy of emotions; 3) emotional intelligence and self-management; 4) the role of emotional intelligence in business and in leadership development; 5) education for emotional literacy; and 6) assessing one's own levels of emotional intelligence. Lectures, case studies, personal assessments and small group activities are the essential methodology for this course.</td>
<td>Take MG 210.</td>
<td>As needed</td>
</tr>
<tr>
<td>MG 321</td>
<td>Decision Making for Managers</td>
<td>3</td>
<td>This course focuses on improving managerial decision making and problem-solving skills through the development and use of qualitative and quantitative methods. Extensive use of Excel is emphasized.</td>
<td>Take MG 210 MG 211.</td>
<td>Every year, Fall and Spring</td>
</tr>
<tr>
<td>MG 335</td>
<td>Project Management</td>
<td>3</td>
<td>This course introduces students to the profession of project management. All project management knowledge areas as well as experiential learning activities using project management best practices are covered. Special emphasis is on increasing awareness of leadership, deliverable execution and the latest advancements in technical relevance in project management technology. This includes an overview of the triple constraint, work breakdown structures, scope management and Earned Value Management.</td>
<td>Take MG 210 MG 211.</td>
<td>Every year, Fall and Spring</td>
</tr>
<tr>
<td>MG 340</td>
<td>Supply Chain Logistics and Technology</td>
<td>3</td>
<td>Delivering goods and services in the most efficient and effective way is through supply chain management. This course provides a detailed view of supply chain management with a focus on logistics. Students develop a deeper skills set needed for decision making in supply chain management. Topics may include: supplier management, logistics, supply chain inventory, risk management, sustainability, supply chain technology (ERP) systems and customer relationships.</td>
<td>Take MG 211 or IER 360.</td>
<td>Every year, Spring</td>
</tr>
<tr>
<td>MG 341</td>
<td>Service Operations Management</td>
<td>3</td>
<td>This course examines the management of services, focusing on both the strategic and operational aspects of designing new services, assessing and improving service quality, improving the efficiency and effectiveness of service processes, and how new technologies can be integrated into service operations to help achieve these objectives.</td>
<td>Take MG 211 or IER 360.</td>
<td>Every year, Fall</td>
</tr>
<tr>
<td>MG 342</td>
<td>Supply Chain Analytics</td>
<td>3</td>
<td>This course focuses on several key supply chain functions and provides hands-on learning to help students understand and analyze data that may be available for the supply chain. The design aspect of supply chain is emphasized. Modeling and deriving insights are facilitated through the extensive use of an Excel-based approach.</td>
<td>Take MG 211 or IER 360.</td>
<td>Every year, Fall</td>
</tr>
<tr>
<td>MG 345</td>
<td>Training and Development</td>
<td>3</td>
<td>Today's ever-changing global marketplace is marked by continual advancements in technologies and associated management processes. In response, HR professionals must create learning environments to expand the knowledge-based capacities of organizations. In this course, students learn how to conduct needs assessments, how to design effective training and development programs to meet those needs and how to evaluate the returns to investments in training and development against organizational goals.</td>
<td>Take MG 302.</td>
<td>Every year, Fall</td>
</tr>
<tr>
<td>MG 355</td>
<td>Compensation and Benefits</td>
<td>3</td>
<td>This course provides students with an understanding of compensation and salary administration in both private and public settings. Additional topics include performance management, pay for performance, employee benefits and overall employee satisfaction. This course provides students with the introduction to compensation analysis skills along with an understanding of best practices in implementing an effective total compensation program in an organization.</td>
<td>Take MG 302.</td>
<td>Every year, Fall</td>
</tr>
<tr>
<td>MG 399</td>
<td>Independent Study In Management</td>
<td>3</td>
<td>Study designed jointly by student and sponsoring faculty. Permission of adviser and chair required.</td>
<td>As needed, All</td>
<td>As needed</td>
</tr>
</tbody>
</table>
MG 402. Management Senior Seminar. 3 Credits.
This course is the culminating course in the management major, which develops students as whole managers and leaders capable of applying and excelling at technical, human and conceptual skills. Students exhibit the skills needed to analyze, integrate and communicate information both in written and oral formats. Students apply concepts and theory relevant to organizational and individual management. Students think critically when solving organizational issues while being mindful of technology, relevant research and practical application.
Prerequisites: Take MG 301 MG 302 MG 321 MG 335.
Offered: Every year, Spring

MG 488. Management Internship. 3 Credits.
This student-in-residence program includes work experience under the joint supervision of a sponsoring faculty and practicing manager or business owner. Approval of a sponsoring faculty member, the department chair and the assistant dean is required. This course is graded on a pass/fail basis.
Prerequisites: Take MG 210 or MG 211.
Offered: Every year, All

MG 490. Field Projects. 3 Credits.
Students work individually or in teams under the supervision of a faculty member on a field-based problem or project for a for-profit or nonprofit business. For juniors and seniors; faculty adviser and permission of chair required.
Prerequisites: MG 210 MG 211.
Offered: As needed

MG 499. Independent Research (formerly GM 490). 1-6 Credits.
Second semester juniors and seniors who wish to pursue a subject in greater depth than is possible in a regular class or to study a subject not covered in the management program may pursue up to six hours of independent study. Approval of a sponsoring faculty, the department chair and the dean is required.
Offered: As needed

Marketing (MK)

MK 201. Marketing Principles. 3 Credits.
This course surveys marketing from the decision-making point of view, with emphasis on the conceptual and analytical components of the subject, and a synthesis of new marketing concepts with economics, behavioral sciences and mathematics.
Prerequisites: Take EC 111.
Offered: Every year, All

MK 201H. Honors Marketing Principles. 3 Credits.
This course surveys marketing from the decision-making point of view, with emphasis on the conceptual and analytical components of the subject, and a synthesis of new marketing concepts with economics, behavioral sciences and mathematics.
Prerequisites: Take EC 111.
Offered: As needed

MK 210. Consumer Behavior. 3 Credits.
The central role of the consumer in initiating or determining the fate of the firm's marketing effort is emphasized. The course draws on theories from psychology, sociology, anthropology and economics to help understand and anticipate consumer behavior as individuals or groups. Current models of consumer behavior are surveyed.
Prerequisites: Take MK 201.
Offered: Every year, All

MK 301. Internet Marketing. 3 Credits.
This course explores the rapidly evolving world of Internet marketing and examines the strategies and tactics that firms can use to utilize the Internet as an effective marketing tool. Students discuss search engine marketing, social media tools, web site design and Internet advertising. The course also examines the role of the Internet as a channel of distribution.
Prerequisites: Take MK 201.
Offered: Every year, Spring

MK 312. Advertising. 3 Credits.
Current practices in advertising including strategy and planning, copy and layout, media selection and scheduling. and budgeting are examined. Advertising is considered from the inception of researched ideas and concepts through the completed presentation. Students gain experience in creating advertisements for the major media.
Prerequisites: Take MK 201.
Offered: Every year, All

MK 315. Media Planning. 3 Credits.
This course considers strategic media planning and its role in advertising and marketing. Emphasis is on the strategic and creative selection, scheduling and evaluation of traditional and non-traditional media vehicles to effectively and efficiently deliver advertising messages to target audiences. Students examine the relative strengths of various media and scheduling options for advertising both goods and services, and learn tools and techniques used to analyze media opportunities (e.g., computerized allocation software and/or other modeling techniques). Students gain hands-on experience through development of a media plan.
Prerequisites: Take MK 201.
Offered: As needed

MK 320. Marketing Research. 3 Credits.
Students learn to understand and satisfy marketing managers' information needs: demand potential, competition, regulations and accepted procedures in relevant business/geographic areas. The course covers research design, quantitative and qualitative data collection, data analysis and implications of results. Written/oral reports are expected. This methodological course assumes a basic understanding of marketing in a global environment.
Prerequisites: Take MK 201 and One course from: EC 271, EC 272, MA 275 or MA 206.
Offered: Every year, Fall and Spring

MK 321. Marketing Analytics. 3 Credits.
Topics covered in this course include market segmentation, marketing mix analysis, product bundle optimization and social network analysis. Students are introduced to the basics of effective visual presentation of quantitative information. Weekly assignments with real business data allow students to explore a variety of analytic techniques and answer actual problems. Students leave with a knowledge of a variety of advanced techniques, in-demand analytic reasoning skills and an understanding of methodological debates, trade-offs and resource allocation for data projects.
Prerequisites: Take MK 320.
Offered: As needed
MK 324. Business-To-Business Marketing. 3 Credits.
The course examines the development of marketing strategies of firms that market to other firms or organizations. Integrating characteristics that distinguish business markets from consumer markets throughout the semester, topics include unique aspects of selecting target markets and elements of the marketing mix. Cases, projects, articles and exercises stress the problems facing actual business marketing firms today.
Prerequisites: Take MK 201.
Offered: As needed

MK 332. Integrated Marketing Communications. 3 Credits.
This course focuses on theory, application and practice associated with the management of marketing communications activities. Students consider strategic implications of integrated communication, and examine promotional tools, such as advertising, special promotions, Internet/mobile, direct marketing, personal selling, public relations, publicity and display.
Prerequisites: Take MK 201.
Offered: Every year, All

MK 333. Marketing Channels and Distribution. 3 Credits.
Students are introduced to design, evaluation and management of distribution channels. Topics include channel member roles and behavior; channel performance evaluation; and logistics (e.g., transportation, inventory, materials handling and information management).
Prerequisites: Take MK 201.
Offered: Every year, Fall

MK 334. Product and Pricing Strategy. 3 Credits.
Strategic product planning and new product development within the context of marketing management for marketing new and mature products are examined. Students learn to integrate economic, financial, legal and marketing principles to analyze pricing decisions, and consider the behavioral implications of pricing, and review relationships among the components for the marketing mix.
Prerequisites: Take MK 201.
Offered: Every year, All

MK 352. Retail Management. 3 Credits.
The major elements of retail management and merchandising are introduced. Topics covered are inventory planning, acquisition and control; pricing, sales volume and profit; promotional activities; and store management, including operations, as well as retail mathematics: markup, markdown, turnover, etc.
Prerequisites: Take MK 201.
Offered: As needed

MK 355. Services Marketing. 3 Credits.
This course examines how marketing principles are applied to the management of service business, including health organizations. Topics include: definition of services, services as products, managing the service encounter, buyer behavior and customer relations, service quality, marketing and human resources management, service accessibility, pricing of services, promotion of services, and international marketing of services.
Prerequisites: Take MK 201.
Offered: As needed

MK 383. Professional Selling and Sales Management. 3 Credits.
The study and application of skills required to sell products, services or ideas. Emphasis is on the development of an effective sales presentation focusing on the needs of the consumer or organization. The course stresses the importance of knowing the company and its products as well as the selling environment and customer. In addition, the issues involved in managing a sales force are addressed. These include sales planning and forecasting, selection, recruitment, training and compensation of salespeople and integration with other elements of the marketing mix.
Prerequisites: Take MK 201.
Offered: As needed

MK 399. Marketing Independent Study. 1-6 Credits.

MK 401. Seminar in Marketing Strategy. 3 Credits.
This capstone course for seniors is given from the point of view of top marketing executives, who are responsible for integrating marketing activities. Instructional methods such as case analyses, “live cases,” group projects and simulations may be used. Senior status required.
Prerequisites: Take MK 201.
Offered: Every year, Fall and Spring

MK 405. Seminar in Biomedical Marketing Strategy. 3 Credits.
This course explores the unique aspects of marketing strategy in the biomedical industry from the perspective of biomedical firms, hospitals and government agencies. Topics include the purchase decision process, marketing research, product development and pricing strategy. Students gain current biomedical industry knowledge through articles, cases and completion of a marketing plan project in partnership with a biomedical firm.
Corequisites: Take MK 334.
Offered: Every other year, Spring

MK 450. Marketing History. 3 Credits.
This seminar examines the development of modern marketing in America from the mid-19th century through the 20th century. The course focuses on how pioneering entrepreneurs such as Kellogg, Sears, Heinz, Hershey and others created brands that became household names and in the process revolutionized marketing practice. Students discuss assigned readings, films and field trips. Research assignments and a term paper also need to be completed.
Prerequisites: Take MK 201.
Offered: As needed

MK 488. Marketing Internship. 3 Credits.
This internship in marketing must be approved by the department chair and the dean in accordance with school regulations. Junior/senior status is required. This course is graded on a pass/fail basis.
Prerequisites: Take MK 201.
Offered: Every year, All

MK 495. Biomedical Marketing Internship. 3 Credits.
This internship is required of biomedical marketing majors and must be done with a company or institution that is related to biomedical products or services.
Prerequisites: Take MK 201.
Offered: Every year, All

MK 498. Tutorial Topics in Marketing. 3 Credits.
Special topics courses involve advanced study of one or more areas within marketing. Subject matter varies from year to year depending upon the interest of students and faculty.
Offered: As needed
MK 499. Independent Study in Marketing. 3-15 Credits.
Special topics courses involve advanced study of one or more areas within marketing. Subject matter will vary from year to year depending upon the interest of students and faculty. Fall, Spring, Summer
Offered: As needed

Mathematics (MA)

MA 100. Basic Algebra. 3 Credits.
This course reviews basic arithmetic and algebraic skills and introduces mathematical methods to the entering student with little or no mathematics background, with the goal of providing sufficient skill to take coursework requiring two years of college preparatory mathematics. Students are expected to participate in four hours of coursework per week. MA 100 is for institutional credit and does not apply to graduation requirements. Note: Students may not withdraw from MA 100. Students who fail MA 100 the first time receive a grade of Unsatisfactory. If the student does not pass the second time, then a failure is recorded on the student's record.
Offered: Every year, Fall and Spring

MA 107. College Algebra. 3 Credits.
This course reviews the fundamentals of algebra. Students learn about the following topics: the real number system, factoring and expanding polynomials, properties of logarithms and exponentials, linear equations and inequalities, quadratic equations and inequalities, absolute value equations and inequalities, systems of equations and inequalities, functions and their graphs, and algebra of functions, including composition, and inverse functions. This course is designed for students who need to improve their algebraic skills to prepare for future mathematics courses such as Applied Calculus, Pre-Calculus, or Statistics. MA 107 does not fulfill the Quantitative Literacy requirement. Prerequisite: A math placement level of 2 or above, or successful completion of MA 100.
Offered: Every year, All

MA 110. Contemporary Mathematics. 3 Credits.
This course introduces students to the study of mathematics as a discipline and also presents topics that are applicable to students' everyday lives. Topics include logic, probability and statistics and financial mathematics. The course also covers two topics from the following list: geometry, set theory, number theory, measurement, problem solving, mathematical systems, scientific applications, history of mathematics. Topics are chosen by the instructor. Students should check the mathematics requirements for their major before selecting their first course in mathematics. MA 110 is not designed to be a prerequisite for any calculus course. Prerequisite: A math placement level of 2 or above, or successful completion of MA 100.
Offered: Every year, All

MA 110H. Honors Contemporary Mathematics. 3 Credits.
This course introduces students to the study of mathematics as a discipline and also presents topics that are applicable to students' everyday lives. Topics include logic, probability and statistics and financial mathematics. The course also covers two topics from the following list: geometry, set theory, number theory, measurement, problem solving, mathematical systems, scientific applications, history of mathematics. Topics are chosen by the instructor. Students should check the mathematics requirements for their major before selecting their first course in mathematics. MA 110 is not designed to be a prerequisite for any calculus course. Prerequisite: As needed

MA 140. Pre-Calculus. 3 Credits.
This course concentrates on topics that students need to understand profoundly to succeed in calculus. Students learn about the following topics: functions and their graphs, exponents and logarithms and trigonometry. There is a focus on basic concepts and visualization of problems. The material has many real-life applications. Use of a TI-83 or TI-84 calculator is required. Primary emphasis is on developing the following New Synthesis proficiencies: quantitative reasoning and critical thinking and reasoning.
Prerequisites: Take MA 107; Minimum grade C- or placement level of 3.
Offered: Every year, All
UC: Breadth Elective, University Curriculum Ele

MA 141. Calculus of a Single Variable. 3 Credits.
This course covers functions, graphs, limits, continuity, derivatives, applications of derivatives, antiderivatives and definite integrals, as well as the Fundamental Theorem of Calculus. This course significantly advances the following Essential Learning Outcomes: quantitative reasoning, critical thinking and reasoning. Many sections require a TI-83/84 calculator (or the equivalent); check with the instructor. Students cannot receive credit for both MA 141 and MA 151.
Prerequisites: Take MA 140; Minimum grade C; or placement level of 5.
Offered: Every year, All
UC: Breadth Elective, University Curriculum Ele

MA 141H. Honors Calculus of a Single Variable. 3 Credits.
This course covers functions, graphs, limits, continuity, derivatives, applications of derivatives, antiderivatives and definite integrals, as well as the Fundamental Theorem of Calculus. This course significantly advances the following Essential Learning Outcomes: quantitative reasoning, critical thinking and reasoning. Many sections require a TI-83/84 calculator (or the equivalent); check with the instructor. Students cannot receive credit for both MA 141 and MA 151.
Prerequisites: Take MA 140; Minimum grade C; or placement level of 5.
Offered: As needed
UC: University Curriculum Ele

MA 140. Pre-Calculus. 3 Credits.
This course concentrates on topics that students need to understand profoundly to succeed in calculus. Students learn about the following topics: functions and their graphs, exponents and logarithms and trigonometry. There is a focus on basic concepts and visualization of problems. The material has many real-life applications. Use of a TI-83 or TI-84 calculator is required. Primary emphasis is on developing the following New Synthesis proficiencies: quantitative reasoning and critical thinking and reasoning.
Prerequisites: Take MA 107; Minimum grade C- or placement level of 3.
Offered: Every year, All
UC: Breadth Elective, University Curriculum Ele

MA 150. Integral Calculus With Applications. 1 Credit.
This course provides a bridge from MA 141 to MA 152. Students review basic integration rules, integration by substitution, Fundamental Theorem of Calculus, numerical integration and applications of integration, including area between curves, volumes, arc length and applications from physics. A graphing calculator is required; the TI-83 or TI-84 is recommended.
Prerequisites: Take MA 141 or MA 141H; Minimum grade C-.
Offered: Every year, Fall and Spring

MA 151. Calculus I. 4 Credits.
This course covers functions and graphs, limits and continuity, derivatives, applications of derivatives, antiderivatives and definite integrals, the Fundamental Theorem of Calculus, numerical integration and applications of definite integrals. A graphing calculator is required; the TI-83 or TI-84 is recommended. Students cannot receive credit for both MA 151 and MA 141.
Prerequisites: Take MA 140; Minimum grade C; or placement level of 5.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele
MA 152. Calculus II. 4 Credits.
This course covers techniques of integration, improper integrals, differential equations, infinite series, parametric equations, polar coordinates, vectors, operations on vectors, and three-dimensional coordinate systems.
Prerequisites: Take MA 151 or MA 141; Minimum grade C-.
Corequisites: Take MA 150.
Offered: As needed

MA 153. Calculus II: Part A. 2 Credits.
Students in this course study techniques of integration and infinite sequences and series. Techniques studied include u-substitution, integrals involving logarithms and inverse trigonometric functions, trigonometric integrals, trigonometric substitution, integration by parts, and partial fractions. For infinite series, the course includes a study of convergence, tests of convergence, power series, and Taylor and Maclaurin series. Additional topics include indeterminate forms, L'Hôpital's Rule, and improper integrals. Offered the first half of each semester.
Prerequisites: Take MA 141 or MA 151. Minimum Grade C-.
Offered: Every year, Fall and Spring

MA 154. Calculus II: Part B. 2 Credits.
In this course students study differential equations, conic sections, parametric equations, polar coordinates, vectors, operations on vectors, lines and planes in space, three-dimensional coordinate systems (cylindrical and spherical coordinates) and quadric surfaces. Offered the second half of each semester.
Prerequisites: MA 151; or MA 141 and MA 150; Minimum grade C-.
Corequisites: Take MA 153.
Offered: Every year, Fall and Spring

MA 170. Probability and Data Analysis. 3 Credits.
This course teaches students the fundamentals of probability and solves real-life probability problems. Students learn to use graphical techniques and descriptive statistics to analyze data. Topics include: ratios, proportions, percentages, empirical and theoretical probability calculations, conditional probability and independence, Bayes' Theorem, expected value, discrete probability distributions, continuous probability distributions, descriptive statistics for central tendency and variability, graphical techniques including histograms and scatter diagrams, and analyzing data sets. The course also includes an introduction to Excel and prepares students for future courses in statistics and analytics.
Prerequisites: Take MA 100; Minimum grade C-; or placement level of 2.
Offered: Every year, Fall and Spring
UC: Breadth Elective

MA 176. Baseball and Statistics (SPS 226). 3 Credits.
This course covers Sabermetrics: the use of standard statistical topics to analyze data derived from baseball records. The book, "Moneyball," is read to understand how Billy Beane used statistics to bring success to the Oakland Athletics. The standard statistical topics covered include exploratory data analysis, elementary probability, discrete probability distributions, normal probability distributions, sampling distributions, regression and correlation. Learning to use Excel to do statistical analysis is an integral part of the course. Students must possess a basic knowledge of baseball.
Prerequisites: Take MA 100; or placement level of 2.
Offered: Every year, Fall and Spring

MA 190. Mathematics Freshman Seminar. 1 Credit.
This course presents excursions into a variety of areas in advanced mathematics, as well as its applications, history and philosophy. Students also explore career options related to the study of mathematics.
Prerequisites: Take MA 140 MA 141 MA 141H or MA 151; Grade of C- or better.
Offered: Every year, Spring

MA 205. Introduction to Discrete Mathematics (CSC 205). 3 Credits.
This course introduces students to basic concepts and structures of discrete mathematics. Topics can include propositional and predicate logic, sets and set operations, functions, proof techniques, counting problems, probability and basic number theory. Applications include computer science, biology, social sciences, law and the physical sciences.
Prerequisites: Take CSC 110 or MA 110 or higher; Grade of C- or better.
Offered: Every year, Spring

MA 229. Linear Algebra. 3 Credits.
This course covers the basic concepts of linear algebra, along with an introduction to the language and techniques of formal mathematics. Topics include systems of linear equations, vector spaces, linear transformations, matrices, determinants and eigenvalues.
Offered: Every year, All

MA 251. Calculus III. 4 Credits.
This course covers vector functions, derivatives and integrals of vector functions, arc length and curvature, motion in space, functions of several variables, limits and continuity, partial derivatives, tangent planes and linear approximations, directional derivatives and the gradient vector, maximum and minimum values, Lagrange multipliers, multiple integration in Cartesian, cylindrical and spherical coordinates, surface area, vector fields, line integrals, Green's theorem, curl and divergence, surface integrals, Stokes' theorem and divergence theorem.
Prerequisites: Take MA 152 or MA 154; Minimum grade C-.
Offered: Every year, Fall

MA 265. Linear Algebra and Differential Equations. 4 Credits.
This course covers the basic concepts of both linear algebra and ordinary differential equations with an emphasis on applications in science and engineering. Linear algebra topics include systems of linear equations, vector spaces and subspaces, linear transformations, matrix algebra, determinants and eigenvalues. Differential equation topics include solutions to first, second and higher order homogeneous and nonhomogeneous differential equations. Solution methods include use of eigenvalues and eigenvectors, Laplace transforms, infinite series and numerical approximations. Special differential equations including Legendre, Bessel, Hermite and Chebyshev equations also are discussed as well as transformations for autonomous equations. A graphing calculator is recommended (TI-83 or TI-84) as well as knowledge of Excel.
Prerequisites: Take MA 152 or MA 154 or MA 241; Minimum grade C-.
Offered: Every year, Spring
MA 275. Biostatistics. 3 Credits.
Students are introduced to the application of statistical techniques to the biological and health sciences with emphasis on probability laws, sampling and parameter estimation, central limit theorem, test of hypothesis, correlation, regression and analysis of variance. Students are not allowed to receive credit for more than one of the following courses: MA 206, MA 275 and MA 285.
Prerequisites: Take MA 107 MA 170 MA 176 or MA 140; Minimum grade C- or placement level of 4.
Offered: Every year, All

MA 275H. Honors Biostatistics. 3 Credits.
Students are introduced to the application of statistical techniques to the biological and health sciences with emphasis on probability laws, sampling and parameter estimation, central limit theorem, test of hypothesis, correlation, regression and analysis of variance.
Prerequisites: Take MA 107; Minimum grade C- or placement level of 4.
Offered: As needed

MA 285. Applied Statistics. 3 Credits.
This introductory statistics course is intended primarily for students majoring in engineering, mathematics or the sciences. Emphasis is on using statistics to answer questions in the physical and social sciences. Topics include descriptive statistics, probability, point and interval estimation, hypothesis testing, correlation and regression, analysis of variance, chi-square tests and nonparametric methods. Students are required to analyze real data sets using Excel, SAS, SPSS or similar computer programs. Students are not allowed to receive credit for more than one of the following courses: MA 206, MA 275 and MA 285.
Prerequisites: Take MA 141 MA 141H or MA 151; Minimum grade C-.
Offered: Every year, Spring

MA 299. Independent Study in Mathematics. 1-6 Credits.
This individual study in a specialized area is open to juniors and seniors by special arrangement with the department chairman. This is a structured program of reading, problem solving and experiments established through conferences with a member of the mathematics faculty. Graded by examination or term project.
Offered: Every year, All

MA 300. Special Topics. 3 Credits.
Offered: As needed, All

MA 301. Foundations of Advanced Mathematics. 3 Credits.
This course is an exploration of the language and nature of mathematics. Emphasis is placed on developing the students’ ability to construct and write mathematical proofs and helping students read and understand mathematical reasoning. Various techniques of proof are discussed, including direct, contrapositive, induction, contradiction and counterexample. Mathematical content includes elementary logic, quantifiers, set theory, relations, functions and number systems. Other topics are at the instructor’s discretion, and may include number theory, graph theory, point-set topology or counting problems.
Prerequisites: Take MA 229; Minimum grade C-.
Offered: Every year, Fall

MA 305. Discrete Mathematics. 3 Credits.
Students study various topics in discrete mathematics, such as proof by induction, recurrence relations, cardinality of a set, the pigeonhole principle, counting techniques, probability and graph theory.
Prerequisites: Take MA 301 or CSC 205; Minimum grade C-.
Offered: Every other year, Spring

MA 315. Theory of Computation (CSC 315). 3 Credits.
This course provides an introduction to the classical theory of computer science with the aim of developing a mathematical understanding of the nature of computing by trying to answer one overarching question: “What are the fundamental capabilities and limitations of computers?” Specific topics include finite automata and formal languages (How do we define a model of computation?), computability (What can be computed? and How do we prove something cannot be computed?) and complexity (What makes some problems so much harder than others to solve? and What is the P versus NP question and why is it important?).
Prerequisites: Take MA 301 or CSC 215; Minimum grade C-.
Offered: Every other year, Fall

MA 318. Cryptography (CSC 318). 3 Credits.
Students study methods of transmitting information securely in the face of a malicious adversary deliberately trying to read or alter it. Participants also discuss various possible attacks on these communications. Students learn about classical private-key systems, the Data Encryption Standard (DES), the RSA public-key algorithm, discrete logarithms, hash functions and digital signatures. Additional topics may include the Advanced Encryption Standard (AES), digital cash, games, zero-knowledge techniques and information theory, as well as topics chosen by the students together with the instructor for presentations.
Prerequisites: Take MA 229 or CSC 215. Minimum grade C-.
Offered: Every other year, Spring

MA 321. Abstract Algebra. 3 Credits.
This course presents a study of topics selected from groups, normal groups, rings, ideals, integral domains, fields, polynomial rings and isomorphism theorems.
Prerequisites: Take MA 229 MA 301; Minimum grade C-.
Offered: Every year, Spring

MA 341. Advanced Calculus. 3 Credits.
The concepts of limit, continuity, differentiation and Riemann integration are studied in depth. Also considered are sequences and series, improper integrals, and Riemann-Stieltjes Integral.
Prerequisites: Take MA 152 or MA 153; and MA 301 Minimum grade C-.
Offered: Every year, Fall

MA 351. Real Analysis. 3 Credits.
This course examines the theoretical foundations of continuity, differentiation and integration at a more abstract level than MA 341. The class reinforces and further expands on proof techniques covered in MA 301. Topics include: convergence of sequences and series, construction of the real number system, metric spaces, dense sets, continuity, compactness, connectedness, differentiation, Riemann-Stieltjes Integral and sequences of functions. Students who wish to pursue graduate studies in mathematics are strongly encouraged to take this class. It is recommended that students take MA 341 before attempting this class.
Prerequisites: Take MA 142 or MA 152 and MA 301; Minimum grade C-.
Offered: Every year, Spring

MA 361. Numerical Analysis (CSC 361). 3 Credits.
This course covers selected techniques for obtaining numerical values of functions, solving linear and nonlinear equations, interpolation, numerical differentiation and integration, error analysis and numerical stability.
Prerequisites: Take MA 142 or MA 152 and MA 229; Minimum grade C-.
Offered: As needed
MA 365. Ordinary Differential Equations. 3 Credits. Students are introduced to standard methods for solving ordinary differential equations, including Laplace transforms as well as singular solutions, series solutions and the system of linear differential equations. Existence and uniqueness theorems also are introduced, as are geometrical interpretation and applications. 
Prerequisites: Take MA 152 or MA 153; Minimum grade C-. 
Offered: Every other year, Fall

MA 370. Number Theory. 3 Credits. Topics include representation of integers, primes, the Fundamental Theorem of Arithmetic, divisibility, modular arithmetic, Fermat’s Little Theorem and Euler’s Theorem, perfect numbers, and Diophantine equations. Additional topics may include quadratic residues, sums of squares, and Fermat’s Last Theorem. 
Prerequisites: take 1 course from subject MA; from level 300; Minimum grade C-. 
Offered: Every other year, Fall

MA 371. Mathematical Statistics and Probability I. 3 Credits. This course covers foundations of probability, random variables and select probability distributions with applications. Topics include sample spaces and events; conditional probability; independence; expected value, variance and other moments; joint densities; and probability distributions including the normal, Poisson, Binomial and other distributions. 
Prerequisites: Take MA 242 or MA 251 and MA 301; Minimum grade C-. 
Offered: Every other year, Fall

MA 372. Mathematical Statistics and Probability II. 3 Credits. Students are introduced to general principles of estimation and testing hypotheses; small sample distributions; regression and correlation; design of experiments and analysis of variance; nonparametric techniques; and other methods. 
Prerequisites: Take MA 371; Minimum grade C-. 
Offered: Every other year, Spring

MA 378. Mathematical Modeling. 3 Credits. Students develop mathematical models for problems in biology, environment, health sciences and politics. 
Prerequisites: Take MA 141 MA 141H or MA 151 and MA 229; Minimum grade C-. 
Offered: Every other year, Fall

MA 380. Data Mining. 3 Credits. This course introduces students to data mining concepts and techniques, and data mining software. Topics include data preprocessing and cleaning, concept hierarchy generation, attribute relevance analysis, association rule mining and decision tree induction. 
Corequisites: Take EC 365. 
Offered: Every year, Fall

MA 385. Machine Learning. 3 Credits. This course introduces students to the theory of machine learning and practical applications. Topics include supervised learning, unsupervised learning, learning theory, regularization models, validation and models. 
Prerequisites: Take MA 380. 
Offered: Every year, Spring

MA 399. Independent Study in Mathematics. 1-6 Credits. This individual study in a specialized area is open to juniors and seniors by special arrangement with the department chairman. This is a structured program of reading, problem solving and experiments established through conferences with a member of the mathematics faculty. Graded by examination or term project. 
Offered: As needed, Spring

MA 400. Special Topics in Math. 3 Credits. Special topics are selected from the areas of differential equations, complex variables, and topology and application of the theory to scientific and business problems is explored. 
Offered: As needed, Spring

MA 421. Advanced Algebra. 3 Credits. Advanced topics in algebra include Sylow theorems (groups), field extensions, and Galois theory. If time permits, Jordan form of matrices, modules, and introduction to category theory are included. 
Prerequisites: Take MA 321; Minimum grade C-. 
Offered: As needed, Spring

MA 441. Complex Variables. 3 Credits. This course extends the concepts of calculus to deal with functions whose variables and values are complex numbers. Topics include the geometry of complex numbers, differentiation and integration, representation of functions by integrals and power series, and the calculus of residues. 
Prerequisites: Take MA 242 or MA 251 and MA 301; Minimum grade C-. 
Offered: As needed

MA 451. Elements of Point-Set Topology. 3 Credits. Open sets, closed sets and topological spaces are considered. Also covered are connectedness and compactness, functions, limit points and continuity. Metric spaces are introduced as well as completeness and the Heine-Borel property. Construction of real numbers is introduced. 
Prerequisites: Take MA 341; Minimum grade C-. 
Offered: As needed

MA 480. ASDS Capstone. 3 Credits. This course serves as a culminating experience for the Applied Statistics and Data Science minor. Students work on an independent project that enables them to integrate knowledge from their previous courses in the minor. Students learn best practices of data visualization and use appropriate visualization software to help craft a narrative about their project. 
Prerequisites: Take MA 385. 
Offered: Every year, Fall

MA 490. Mathematics Senior Seminar. 3 Credits. Students work on a senior-level project, culminating in a written and oral report. For senior mathematics majors. 
Offered: Every year, Spring

MA 499. Independent Study in Mathematics. 3 Credits. This individual study in a specialized area is open to juniors and seniors by special arrangement with the department chairman. This is a structured program of reading, problem solving and experiments established through conferences with a member of the mathematics faculty. Graded by examination or term project. 
Offered: As needed, Spring

Mechanical Engineering (MER)

MER 210. Fundamentals of Engineering Mechanics and Design. 3 Credits. This course provides a foundation in the principles of statics and mechanics of materials while introducing the engineering design process to prepare students for further engineering studies. Equilibrium principles are used to analyze forces on statically determinate rigid bodies and structures. Concepts of stress and strain are introduced under axial loading. 
Corequisites: Take MA 154 PHY 121. 
Offered: Every year, Spring
Students learn and practice hands-on techniques relevant to statics, such as equilibrium, friction, truss analysis and tension/compression. All experimental results obtained in the lab are analyzed in the context of the theoretical framework presented in the course.
Offered: Every year, Fall

MER 220. Mechanics of Materials. 3 Credits.
Students study the behavior of materials under normal, shear, torsional, bending and combined loads. Stress, strain, creep, corrosion, fatigue and material properties are explored. Relationships between the microscopic structure and macroscopic properties of engineering materials are examined. Loading, geometry, functional environment and material properties of machine or structural parts are used to relate the forces applied to a body to resulting internal forces and deformations in order to evaluate performance. Practical applications involving the design of mechanical and structural elements under various loading and environmental conditions are emphasized.
Prerequisites: Take MER 210.
Offered: Every year, Fall

MER 220L. Mechanics of Materials Lab. 1 Credit.
Students learn and practice hands-on techniques relevant to mechanics of materials, such as tension, torsion, and bending. All experimental results obtained in the lab are analyzed in the context of the theoretical framework presented in the course.
Corequisites: Take MER 220.
Offered: Every year, Fall

MER 221. Dynamics. 3 Credits.
Dynamics examines the motion of particles, systems of particles and rigid bodies under the influence of forces. It focuses on the use of Newton's Second Law, the Work-Energy Principle and the Impulse-Momentum Principle. The course progresses from rectilinear and curvilinear motion of single particles, through vector motion of systems of particles, to general motion of rigid bodies.
Prerequisites: Take MER 210.
Offered: Every year, Fall

MER 230. Engineering Materials. 3 Credits.
This course explores the relationship between the microscopic structure and macroscopic properties of materials used in engineering applications. The origin of mechanical and physical properties is studied. Emphasis is placed on an understanding of the fundamental aspects of atomic and microstructural concepts for proper materials selection and enhancement of engineering properties. Materials studied are metals, ceramics, polymers and composites.
Prerequisites: Take MER 220 CHE 110.
Offered: Every year, Fall

MER 230L. Engineering Materials Lab. 1 Credit.
Students learn and practice hands-on techniques relevant to engineering materials, such as measuring mechanical and physical properties and strengthening mechanisms. All experimental results obtained in the lab are analyzed in the context of the theoretical framework presented in the course.
Corequisites: Take MER 230.
Offered: Every year, Fall

MER 250. Computer Aided Design. 3 Credits.
Students explore the use of computer methods as an aid to solving engineering problems. Topics include 3D solid modeling, graphical presentation of information, engineering analysis and engineering computer programming. Students learn to apply a variety of engineering-related programs or routines. Students write, document, and use programs of their own in design scenarios. Considerable emphasis is placed on use of the computer as a tool in the engineering design process.
Prerequisites: Take MA 153 and MA 154.
Corequisites: Take MA 229 or CSC 110 or CSC 106 or CSC 109.
Offered: Every year, Fall

MER 310. Fluid Mechanics. 3 Credits.
This course focuses on fluid mechanics while introducing and integrating corresponding topics of thermodynamics. Properties of fluids and hydrostatics as well as conservation principles for mass, energy and linear momentum are covered. Principles are applied to incompressible flow in pipes, external flows, Bernoulli's equation, dimensional analysis, Navier-Stokes, boundary layer development, lift and drag. Laboratory exercises are incorporated into classroom work.
Prerequisites: Take MA 251 PHY 121 MER 210.
Corequisites: Take MA 365 or MA 265.
Offered: Every year, Fall

MER 320. Thermodynamics. 3 Credits.
This course focuses on thermodynamics, while incorporating and building upon fluid mechanics topics covered in MER 310. It applies conservation principles for mass, energy and linear momentum as well as the second law of thermodynamics. Principles are applied to power generation systems, refrigeration cycles and total air conditioning. Thermodynamic principles also are applied to the automotive system to examine engine performance (Otto and Diesel cycles) and to high performance aircraft to examine the Brayton cycle. Laboratory exercises are incorporated into classroom work. This class includes completion of a comprehensive, out-of-class design and analysis project.
Prerequisites: Take CHE 110 MER 310.
Offered: Every year, Spring

MER 330. Introduction to Circuits. 3 Credits.
Students are introduced to DC circuit analysis, DC circuit design and AC circuit analysis. The course also includes electrical engineering topics required to prepare students for the Fundamentals of Engineering examination as a part of professional licensure. Students learn the language, tools and problem-solving techniques used in basic electrical circuit analysis.
Prerequisites: Take MA 241 or MA 251.
Corequisites: Take PHY 122.
Offered: Every year, Spring

MER 330L. Introduction to Circuits Lab. 1 Credit.
Students learn and practice hands-on techniques relevant to circuit analysis, such as bread board prototyping, voltage and current measurements, soldering, and basic data acquisition. All experimental results obtained in the lab are analyzed in the context of the theoretical framework presented in the course.
Corequisites: Take MER 330.
Offered: Every year, Spring
MER 340. Manufacturing/Machine Component Design. 3 Credits.
This course introduces machine component design and manufacturing, relating fundamental engineering science to machine components. It covers load, stress and strain analyses, and fatigue. The course progresses to the study of machine component design, including mechanical components such as linkages, fasteners, springs, bearings, gears and shafts.
Prerequisites: Take MER 220 MER 221.
Offered: Every year, Spring

MER 340L. Manufacturing/Machine Component Design Lab. 1 Credit.
Working primarily in the machine shop, this laboratory provides experiential learning in the context of manufacturing. Students learn techniques, use tools and operate machines used in a manufacturing environment under appropriate supervision. A series of measurement and fabrication exercises culminate in the team-oriented design and manufacture of a mechanical engineering product.
Corequisites: Take MER 340.
Offered: Every year, Spring

MER 350. Mechanical Engineering Design. 3 Credits.
This course introduces mechanical engineering design as an interactive decision-making process. An engineering design problem reinforces the design process instruction and culminates in a student competition. Students begin their major design experience project, applying the mechanical engineering design process to a real-world engineering problem addressing social, political, economic and technical issues. Students continue their project with MER 498.
Prerequisites: Take MER 250 MER 340 MER 340L MER 330 MER 330L.
Offered: Every year, Fall

MER 360. Heat Transfer. 3 Credits.
The three modes of heat transfer—conduction, convection and radiation—are studied in detail, and these concepts are applied to analyze various engineering systems. The principles of conduction and convection are applied to the analysis and design of heat exchangers, and all three modes of heat transfer are applied together to study scenarios of multimode heat transfer.
Prerequisites: Take MER 320.
Offered: Every year, Fall

MER 387. Introduction to Applied Aerodynamics. 3 Credits.
The fundamental laws of fluid mechanics are used to develop the characteristic forces and moments generated by the flow about aerodynamic bodies. Lift, drag and aerodynamic moments are studied for airfoils (2D) and finite wings (3D) in the subsonic flow regime. Aircraft performance and design parameters are developed in both the classroom and laboratory sessions. The laboratory sessions include low-speed wind tunnel testing.
Prerequisites: Take MER 221 MER 310.
Corequisites: Take MER 320.
Offered: Every year, Spring

MER 388. Helicopter Aeronautics. 3 Credits.
This course examines the aerodynamics of helicopter flight in relation to hover, translating and partial power flight. Theory and experimental results are used to predict aircraft performance. The course analyzes the dynamic response of the rotor system and the performance aspects of the vehicle as a whole. This is followed by a design workshop, during which students complete the initial sizing of a helicopter to meet specific mission requirements. The course includes a laboratory examining rotor power and thrust utilizing a whirl stand apparatus, and one field trip to a commercial helicopter company.
Prerequisites: Take MER 210 MER 250 MER 310.
Offered: Every year, Spring

MER 450. Environmentally Conscious Design and Manufacturing. 3 Credits.
Students learn to identify, quantify and reduce environmental impacts caused by products. Impact reduction methods form the course’s core subject matter. Such methods include: design for recycling, design for remanufacture, life cycle assessment, biomimetics and others. The course also provides an overview of motivational legislation from North America and Europe. Through lecture, discussion, assignments, case studies, and a semester project, students achieve a critical understanding of the role environmental issues play in mechanical engineering.
Prerequisites: Take MER 340.
Offered: Every year, Fall

MER 460. Mechanical Measurement and Data Acquisition. 3 Credits.
In this course, students learn how to perform computer-based measurements of various mechanical phenomena such as displacement, temperature, force, strain, torque, pressure, flow, vibration and acceleration. This is a hands-on course that starts with the basics of sensors and transducers, and walks the students through signal conditioning electronics, instrumentation, data acquisition and signal analysis. A significant portion of this course focuses on LabVIEW, an industry-standard graphical programming language that is widely used for data acquisition and analysis.
Prerequisites: Take MER 250.
Offered: Every year, Fall

MER 470. Dynamic Modeling and Control. 3 Credits.
This course covers dynamic modeling and control of linear systems. It includes an overview of classical control theory as the foundation for control applications in mechanical, electrical and aeronautical systems. Mathematical models are developed for various physical systems, and represented in time-domain, Laplace domain, and State-Space. Control system analysis and design techniques are studied within the context of transient and steady-state response.
Prerequisites: Take MER 250 MER 330 MER 330L MER 330L.
Offered: Every year, Fall

MER 470L. Dynamic Modeling and Controls Lab. 1 Credit.
Laboratory exercises include electronic instrumentation of sensors and actuators and microcontroller-based control-system implementations (open-loop and closed-loop). In addition, students learn to simulate dynamic models and controllers using MATLAB and Simulink and perform experimental validation of simulated models.
Prerequisites: Take MER 330L.
Offered: Every year, Spring

MER 472. Energy Conversion Systems. 3 Credits.
This course provides an overview and examines the historical evolution of both classical and state-of-the-art energy conversion technology. It includes advanced analysis of energy conversion hardware, air conditioning and refrigeration as well as fossil fuel combustion processes using concepts of energy. Major methods of direct energy conversion are covered, including thermoelectricity, photovoltaics, thermionics, magnetohydrodynamics, and fuel cells. The current state of national and world energy is presented, and alternatives including renewable energy and a hydrogen economy are explored with reference to economic, political, environmental and technological factors.
Prerequisites: Take MER 330.
Offered: Every year, Spring
MER 475. Mechatronics. 3 Credits.
This course presents an introduction to the field of mechatronics. Mechatronics combines elements of mechanics, electric circuits, programming and engineering design in order to create useful electromechanical and robotic devices. This is a hands-on, project-based course where students learn basic electronic and programming techniques to integrate various sensors, motors and actuators into moving mechanical platforms.
Prerequisites: Take CSC 110 or CSC 106; and MER 330 MER 330L MER 340 MER 340L.
Offered: As needed

MER 481. Aircraft Performance/Static Stability. 3 Credits.
The course applies the principles developed in applied aerodynamics to develop the equations of motion for a rigid aircraft in steady state level flight, maneuvering flight, and during takeoff and landing. These equations are analyzed to determine such performance characteristics as maximum range, endurance, turning rate, climb rate, etc. Piston-prop, turbo-prop and jet aircraft are considered. The equations of motion are then analyzed to develop static stability criteria and investigate steady state control characteristics.
Prerequisites: Take MER 330 MER 387.
Offered: Every year, Fall

MER 486. Vibration Engineering. 3 Credits.
In this course, students develop a foundation in the analysis and design of free and forced single and multidegree-of-freedom systems. Applications include modeling, damping, resonance, force transmissibility, vibration absorbers, matrix formulation and modal analysis. Emphasis is placed on vibrations examples from several engineering fields. Out-of-class design problems provide students with the opportunity to apply principles taught in the classroom to realistic problems encountered by practicing engineers. In-class demonstrations supplement the theory development.
Prerequisites: Take MER 221.
Offered: Every year, Spring

MER 489. Advanced Study in Mechanical Engineering. 3 Credits.
The student pursues advanced study of a topic in mechanical engineering on an individual or small-group basis, independent of a formal classroom setting. Similar to graduate level research, the scope of the selected project is tailored to the interests of the student, based on resources and in consultation with a faculty adviser. To develop research skills, the student is integral in all phases of project completion by defining objectives, studying fundamentals and background material, outlining the approach, conducting analysis and communicating results. Requires permission of the instructor.
Offered: Every year, Fall and Spring

MER 490. Engineering Professional Experience. 1 Credit.
Students gain experience by employing engineering skills in a professional setting under the guidance of practicing engineers. Students must obtain departmental approval and register prior to starting the experience.
Prerequisites: Take ENR 395 or permission of instructor.
Offered: Every year, All

MER 491. Biomedical Engineering. 3 Credits.
In this introductory course to biomedical engineering, students analyze biomedical implantable and prosthetic devices and explore topics such as biocompatibility, biomechanical properties of biological tissue, device design, as well as factors that go into medical device development and testing. Hands on labs are incorporated into the course to provide a more in-depth immersion into specific course topics. This course focuses on developing lifelong learning skills and service learning. As part of this focus area, students develop a STEM activity to teach a biomedical engineering topic to elementary students.
Prerequisites: Take MER 220.
Offered: Every year, Spring

MER 492. Power Trains and Vehicle Dynamics. 3 Credits.
This course provides an introduction in ground vehicle theory with emphasis on analysis, testing and evaluation of automotive power trains and dynamic systems to understand the underlying principles affecting vehicle design. Clutches, transmissions (manual and automatic), differentials, wheels and tires, as well as braking, steering and suspension systems are studied in detail to include their effect on vehicular or other system performance. High-speed, tracked vehicle application of the above systems also is covered. Theory is verified with hands-on experience in the laboratory. Component design problems are interspersed throughout the course.
Prerequisites: Take MER 221 MER 320.
Offered: Every year, Fall

MER 498. ME Major Design Experience. 3 Credits.
This course integrates math, science and engineering principles using a comprehensive engineering design project. Open-ended, client-based design problems emphasize a multidisciplinary approach to total system design. Design teams develop product specifications, generate alternatives, make practical engineering approximations, perform appropriate analysis to support technical feasibility, and make decisions leading to designs that meet stated requirements. System integration, computer-aided design, maintainability and fabrication techniques are addressed.
Prerequisites: Take MER 350.
Offered: Every year, Spring

MER 499. Senior Design Project II. 3 Credits.
A two-semester, six credit capstone design experience for mechanical engineering students involving analysis and synthesis of unstructured problems in practical settings. Students work in teams to formulate issues, propose solutions, and communicate results in formal written and oral presentations.
Prerequisites: Take MER 340.
Offered: Every year, Spring

Media Studies (MSS)

MSS 119. Sign Language Workshop. 1 Credit.
The course presents an introduction to basic sign language, its basic vocabulary, sentence structure and grammar. Students gain practice in reading and execution of signs.
Offered: Every year, Spring

MSS 200. Special Topics. 3 Credits.
The subject considered varies each semester depending on faculty and student interests.
Offered: As needed
MSS 220. Media, History and Memory. 3 Credits.
This course examines the relationship between media, history and memory, focusing on the role various media play in shaping both individual and collective memories of historical figures, events and eras. Students are introduced to historical research methods and evaluate a variety of archival media texts, including photographs, newspaper and magazine articles, newsreels, movies, TV shows and audio recordings. These media texts are viewed as historical artifacts that reflect the particular historical, cultural and political context in which they were developed while also possessing the ability to influence both contemporary and future audiences.
Prerequisites: Take EN 102.
Offered: Every year, Fall and Spring
UC: Humanities

MSS 231. Media and Society. 3 Credits.
The objectives for this course are twofold: to foster an understanding of the social context within which media professionals work and to provide an environment in which students develop analytical skills required for effective and ethical participation in our media-saturated culture as citizens and potential media professionals. Students create a mock proposal for a media project in which they address how different cultural, political, economic and technological structures create constraints and leave open the possibilities for media practitioners, users and audiences. They also work in teams to critique contemporary social media issues.
Prerequisites: Take COM 120.
Offered: Every year, Spring

MSS 299. Independent Study. 1-6 Credits.
Students may arrange to do an-depth study of a topic arranged with an instructor.
Offered: As needed, All

MSS 300. Special Topics. 3 Credits.
Topics vary each semester depending on faculty and student interests.
Offered: As needed

MSS 311. Diversity in the Media (WS 311). 3 Credits.
This course examines the role of media in the construction of social categories such as gender, race, class and sexual orientation. Students learn about the media as one of a number of social institutions—including religion, education and family—that influence our understanding of cultural difference. The course presents a variety of perspectives that address diversity in relation to both print and electronic media, emphasizing popular culture. Media diversity issues are analyzed in relation to ownership, representation, audience reception and the media workforce. Junior status required.
Prerequisites: Take WS 101 or COM 120.
Offered: Every other year

MSS 320. Communication Technologies: Evolution and Impact. 3 Credits.
Stories about the development and diffusion of old communication technologies, such as the telegraph, provide lessons for understanding the wide-ranging impacts of relatively new technologies, such as the Internet and smart phone. This course helps students to develop a sophisticated understanding of the roles, functions and impacts of communication technologies—past and present—in everyday life, and prepares them to evaluate the potential and implications of emerging technologies.
Prerequisites: Take COM 120.
Offered: As needed

MSS 322. Media Research Methods. 3 Credits.
The course introduces students to a variety of media research methods through readings and hands-on exercises. Goals include helping students become knowledgeable and critical readers of media-related research produced in both industry and academic settings, and teaching students fundamental aspects of conducting media research and leading-edge strategies for effectively communicating research findings. Students perform original research using techniques including interviews, focus groups, content analysis and surveys. They also learn about statistics, social media tracking and research ethics. Junior status required.
Prerequisites: Take COM 120 MSS 231.
Offered: Every year, Fall

MSS 340. Communications Law and Policy. 3 Credits.
This course helps students to develop an awareness and understanding of laws, regulations and professional standards of practice that apply to the work of communications practitioners. Attention is given to First Amendment guarantees, libel, privacy, journalist’s privilege, copyright, media and advertising regulation. Selected cases are highlighted as examples of opinions handed down by state and federal courts. Junior status is required.
Prerequisites: Take COM 120.
Offered: Every year, Fall and Spring

MSS 345. Media Users and Audiences (WS 345). 3 Credits.
This course considers popular, institutional and academic perspectives on media users and audiences in the U.S. and abroad. Students develop an understanding of how people choose and interpret media content, how marketers and media producers perceive audiences, how social media use blurs boundaries between audiences and producers and popular assumptions about media effects on audiences. Students develop and apply critical thinking and written and oral communication skills in assignments that address contemporary debates surrounding audiences and media users, including an in-depth analysis of fan cultures. Junior status required.
Prerequisites: Take EN 102 or EN 103H; and COM 120 or WS 101.
Offered: Every year

MSS 346. Global Communication. 3 Credits.
The course analyzes the roles information media and popular culture play in modern debates about political power, global economy and cultural identity. The relative influences of different communication technologies in relationships among global, transnational and local cultures are also examined.
Prerequisites: Take COM 120.
Offered: Every other year

MSS 349. Political Communication (PO 348). 3 Credits.
This course explores the relationship between media and politics in the U.S. Students learn about the history of political communication, the role of image-making and image-management in political communication, the impact of the media on public policy, and the current state of our mediated political culture.
Prerequisites: Take COM 120 or PO 101.
Offered: Every other year

MSS 399. Independent Study. 1-6 Credits.
Students may arrange to do an in-depth study of a topic under faculty supervision.
Offered: As needed

MSS 400. Special Topics. 3 Credits.
Topics vary each semester depending on faculty and student interests.
Offered: As needed, Fall and Spring
MSS 420. Sports, Media and Society (SPS 420). 3 Credits.
This course examines the social, political, economic and historical significance of the intersection of sports, media and society. Participants examine such questions as: What role have sports played in shaping cultures throughout history? What is the relationship between sports and media? How do sports, through the media, influence U.S. culture today? What is the role of sports media professionals in U.S. culture? Junior status required.
Prerequisites: Take COM 120 or SPS 101.
Offered: Every other year, Spring

MSS 441. Celebrity Culture. 3 Credits.
This seminar explores modern communication networks through the lens of celebrity. Through a variety of readings and videos, including pieces using media effects and cultural studies approaches, the course addresses the following questions: How, and by whom, is the idea of celebrity shaped? What cultural meanings are conveyed by celebrity? How does celebrity change the way we think about important social issues? What is the impact of celebrity on the industry? How is the concept of celebrity shifting? And just why are we so fascinated by celebrity?
Prerequisites: Take MSS 231.
Offered: Every other year

MSS 442. Media Critics and Influencers. 3 Credits.
In this course, students learn what it takes to be a professional media critic and/or a social media influencer. Students analyze and produce criticism of TV, movies, music, apps, games, etc. and study what makes today's top social media influencers so successful. Students examine some of the best practices in popular media criticism/influence while developing their own voices. They also learn to produce content aimed at engaging their target audience. In their final project, students create their own blog, vlog, or podcast.
Prerequisites: Take MSS 231.
Offered: Every other year

MSS 443. Crime, Media and Culture. 3 Credits.
This course examines the role of industrialized media in the social construction of crime, criminals, victims, social order, and deviance. We also consider why crime is represented so frequently in a variety of mainstream media genres, including news, documentaries, video games, popular music, and fictional dramas in both television and film. The course also discusses ways in which social media and digital surveillance technologies have been harnessed in relation to crime. Central themes of the course include theoretical debates related to media effects and critical media consumers, as well as how crime narratives can either demonize or glamorize segments of society.
Prerequisites: Take MSS 231.
Offered: Every other year

MSS 444. Popular Music. 3 Credits.
Despite its salience as a mass medium, popular music remains under-studied in the discipline of media studies. Therefore, in order to provide students with a better understanding of popular music, this seminar involves the following: critically listening to and writing about popular music; considering music's role in identity (class, gender and sexuality, racial and ethnic, etc.) formation; examining the influence of media and technology on popular music; and understanding the music industry.
Prerequisites: Take MSS 231.
Offered: Every other year

MSS 450. Senior Seminar. 3 Credits.
This seminar includes an in-depth examination of issues and research perspectives in media studies. Topics vary each term, focusing on the different media and current literature in the field. Senior status required.
Offered: Every year, Fall and Spring

MSS 491. Research Project. 3 Credits.
Students conduct an in-depth research project under faculty supervision.
Prerequisites: Take MSS 332.
Offered: As needed

MSS 495. Media Trend Forecasting and Strategy. 3 Credits.
In this media studies capstone course, students analyze the various forces impacting media industries, professionals, and users, tracking current trends and forecasting future influences. Students study the issues facing media producers/users and strategize creative responses to the challenges of operating in an ever-changing media environment, applying critical thinking, research and creative problem-solving skills to real-world situations. Students also are expected to demonstrate professional oral and written communication skills. Senior status required.
Prerequisites: Take MSS 231 MSS 332.
Offered: Every year, Spring

MSS 499. Independent Study. 1-6 Credits.
Students may arrange to do an in-depth study of a topic under faculty supervision.
Offered: As needed

Music (MU)

MU 110. Private Music Lessons. 1 Credit.
Music lessons give Quinipiac students the opportunity to study the piano, guitar, voice, harp or woodwind instruments with a highly skilled professional artist. In private music lessons, students develop an understanding of the fundamental elements of playing a musical instrument. These include: musical notation, proper technique, music theory and performance. No prior musical training is required as lessons are tailored by the instructor to be appropriate for any level of study. Students may choose to perform in program recitals that are held each semester, if they choose to do so.
Offered: Every year, All
UC: Fine Arts

MU 130. Understanding Music. 3 Credits.
Students study elements of musical form and style in an effort to discover how music works. This course investigates the most important figures from the history of Western music as well as some world music and contemporary composers.
Offered: Every year, All
UC: Fine Arts

MU 130H. Honors Understanding Music. 3 Credits.
In this music appreciation course, students study elements of musical forms and styles together with necessary historical background. Frequent direct listening is involved.
Offered: Every year, All
UC: Fine Arts
MU 150. American Popular Music: From the Blues to Hip Hop. 3 Credits.
This course includes a survey of the musical and cultural history of the
diverse styles and artists associated with American popular music.
Exploration ranges from rock to blues to hip-hop to heavy metal to
country. The course includes a study of the music alongside the social,
cultural, political and historical contexts in which they emerged.
Offered: Every year, Fall and Spring
UC: Fine Arts

MU 175. Special Topics in Music. 3 Credits.
Offered: As needed
UC: Fine Arts

MU 190. Quinnipiac University Singers. 1 Credit.
This workshop in music is devoted to the study, singing and presentation
of choral music from a variety of periods. The course focuses on specific
vocal and ensemble techniques. Students of every experience and ability
level are encouraged to attend.
Offered: Every year, All
UC: Fine Arts

MU 191. Hamden Symphony Orchestra at Quinnipiac. 1 Credit.
Students perform chamber music and orchestral compositions. A
wide variety of styles including classical, film and popular music are
performed. All instruments are used and students of every experience
and ability level are encouraged to attend.
Offered: Every year, All
UC: Fine Arts

MU 194. Jazz Ensemble. 1 Credit.
Students explore and perform literature written for the big and small
ensemble. A wide variety of styles, composers and arrangers are covered.
Students of every experience and ability level are encouraged to attend.
Offered: Every year, All
UC: Fine Arts

MU 199. Independent Study. 1-3 Credits.
Offered: As needed, All
UC: Fine Arts

MU 200. Special Topics. 3 Credits.
Offered: As needed, All
UC: Fine Arts

MU 210. History of Musical Drama: from Opera to Broadway. 3 Credits.
This course is a survey of the history of music in theatrical productions
from the beginning of opera in late 16th-century Italy to light opera to
modern opera and musicals. Students examine selected works against
the background of a changing cultural, aesthetic and political world.
Offered: As needed, Fall
UC: Fine Arts

MU 211. History of Jazz. 3 Credits.
This course covers the origins and history of the jazz idiom from its early
beginning through present avant-garde forms. Basic jazz literature is
surveyed with style analysis of important soloists, small jazz groups and
large ensembles.
Offered: Every year, All
UC: Fine Arts

MU 211H. Honors History of Jazz. 3 Credits.
This course covers the origins and history of the jazz idiom from its early
beginning through present avant-garde forms. Basic jazz literature is
surveyed with style analysis of important soloists, small jazz groups and
large ensembles.
Offered: Every year, All
UC: Fine Arts

MU 212. History of Song. 3 Credits.
Offered: As needed, All

MU 213. Music of the 20th Century. 3 Credits.
This course examines the many transformations that have taken place
in art music from the late post-romantic era up to the present time. The
course presents a diverse spectrum of musical styles, and explores
how popular forms, world music, and changes in society have impacted
musical culture here and abroad.
Prerequisites: Take 3 credits from subject MU.
Offered: Every year, Spring
UC: Fine Arts

MU 230. Music Theory I. 3 Credits.
This course is specifically designed to give the student a solid and
practical basis for appreciation or participation in musical experience.
Emphasis is placed on development in three areas: 1) music theory
(rhythm, melody, harmony, modes, scales, key signatures, intervals,
etc.); 2) its direct application through exercises in dictation; and 3) sight
reading.
Prerequisites: Take MU 130.
Offered: Every year, Fall
UC: Fine Arts

MU 250. Music and Disabilities. 3 Credits.
This course explores how specific disabilities contributed to the
formation of a composer or performer's musical identity. This course
places special emphasis on how disabilities influence creative and
performance standards within a culture. Students discuss musicians
from many different genres, including classical, jazz and pop music.
Offered: Every year, Fall and Spring
UC: Fine Arts

MU 280. Music and Our Life's Work. 4 Credits.
The objective of this course is to empower students with information
to help them understand and appreciate various genres of music
and their connection to our life's work. Utilizing a group cooperative
learning approach, students engage in directed listening activities
and investigation of select Western Art Music examples. They explore
the societal and historical influences that have contributed to the
development of music, as well as the effect of music on our daily lives.
For their culminating project, "Music and Your Major," students articulate
the relationship of music to the work that they do.
Offered: As needed
UC: Fine Arts

MU 299. Independent Study. 1-3 Credits.
By special arrangement with instructor and with approval of department
chair.
Offered: Every year, All

MU 330. Music Theory II. 3 Credits.
This course studies the range, timbre, transposition and uses of various
instruments in consort. Fundamental techniques of arranging, vocal and
instrumental are considered.
Prerequisites: Take MU 230.
Offered: Every year, Spring
UC: Fine Arts

MU 399. Independent Study. 3 Credits.
By special arrangement with instructor and with approval of department
chair.
Offered: Every year, All

MU 499. Independent Study - Music. 1-3 Credits.
Offered: As needed
Nursing (NUR)

NUR 300. Core Concepts in Nursing. 3 Credits.
This course introduces students to core concepts in nursing, and focuses on assessment and nursing interventions to support and protect health. The delivery of safe, evidence-based, holistic, patient-centered care is emphasized. Knowledge, attitude and skill acquisition opportunities are provided in campus lab and applied in clinical practicum.
Prerequisites: Traditional BSN Program: all preprofessional courses, NUR 304.
Offered: Every year, Fall

NUR 302. Nursing Science and Information Literacy. 3 Credits.
This course examines historical and contemporary nursing science. Students are introduced to patterns of knowing, clinical reasoning and select disciplinary and interdisciplinary concepts and theories useful in nursing practice. This course also focuses on information literacy and information management in the delivery of quality patient care. Knowledge, attitude and skill acquisition opportunities are provided in campus lab and applied in clinical practicum.
Prerequisites: Traditional BSN Program: all preprofessional courses, NUR 304.
Offered: Every year, Fall

NUR 304. Health Promotion and Wellness. 3 Credits.
This course focuses on health promotion, wellness and disease and injury prevention across the lifespan. Individual prevention strategies and health interventions are explored.
Offered: Every year, Fall and Spring

NUR 306. Health Assessment. 3 Credits.
This course focuses on health assessment of individuals across the lifespan. Students are introduced to a holistic approach to assessment taking into consideration bio-psycho-social-spiritual, environmental and cultural aspects. Knowledge, attitude, and skill acquisition opportunities are provided in campus lab and applied in clinical practicum.
Prerequisites: Traditional BSN Program: all preprofessional courses, NUR 304.
Offered: Every year, Fall

NUR 307. Core Nursing Practicum. 2 Credits.
This clinical practicum is taken concurrently with NUR 300, 302, 306 and 330L. Students participate in 84 hours of supervised clinical practice in a variety of health care settings.
Prerequisites: Traditional BSN Program: all preprofessional courses, NUR 304.
Corequisites: Traditional BSN program: Take NUR 300 NUR 302 NUR 306 NUR 330L.
Offered: Every year, Fall

NUR 318. Care of Women, Newborns and Families. 2 Credits.
This course examines topics related to nursing management for women, newborns and families, and emphasizes health promotion, wellness and the illness states of childbearing families. The delivery of safe, evidence-based, holistic, patient-centered care is emphasized. Knowledge, attitude and skill acquisition opportunities are provided in campus lab and applied in clinical practicum.
Prerequisites: Traditional BSN Program: Take NUR 300 NUR 302 NUR 304 NUR 306 NUR 307 NUR 330L.
Corequisites: Traditional BSN Program: Take NUR 320 NUR 323 NUR 324 NUR 325 NUR 326 NUR 340L.
Offered: Every year, Spring

NUR 320. Care of Children and Families. 2 Credits.
This course examines topics related to nursing management of infants, children and families, and emphasizes health promotion, wellness and the illness states of these populations. The delivery of safe, evidence-based, holistic, patient-centered care is emphasized. Knowledge, attitude and skill acquisition opportunities are provided in campus lab and applied in clinical practicum.
Prerequisites: Traditional BSN Program: Take NUR 300 NUR 302 NUR 304 NUR 306 NUR 307 NUR 330L.
Corequisites: Traditional BSN Program: Take NUR 318 NUR 320 NUR 323 NUR 324 NUR 325 NUR 326 NUR 340L.
Offered: Every year, Spring

NUR 323. Women, Children and Families Practicum. 2 Credits.
This clinical practicum is taken concurrently with NUR 318 and NUR 320. Students participate in 84 hours of supervised clinical practice in a variety of health care settings.
Prerequisites: Traditional BSN Program: Take NUR 300 NUR 302 NUR 304 NUR 306 NUR 307 NUR 330L.
Corequisites: Traditional BSN Program: Take NUR 318 NUR 320 NUR 323 NUR 324 NUR 325 NUR 326 NUR 340L.
Offered: Every year, Spring

NUR 324. Care of Adults with Complex Health Needs I. 3 Credits.
This course examines concepts of nursing management for adults with complex health care needs. The delivery of safe, evidence-based, holistic, patient-centered care is emphasized. Knowledge, attitude and skill acquisition opportunities are provided in campus lab and applied in clinical practicum.
Prerequisites: Traditional BSN Program: Take NUR 300 NUR 302 NUR 304 NUR 306 NUR 307 NUR 330L.
Corequisites: Traditional BSN Program: Take NUR 318 NUR 320 NUR 323 NUR 324 NUR 325 NUR 326 NUR 340L.
Offered: Every year, Spring and Summer

NUR 325. Adult Care Practicum I. 2 Credits.
This clinical practicum is taken concurrently with NUR 324. Students participate in 84 hours of supervised clinical practice in a variety of health care settings.
Prerequisites: Traditional BSN Program: Take NUR 300 NUR 302 NUR 304 NUR 306 NUR 307 NUR 330L.
Corequisites: Traditional BSN Program: Take NUR 318 NUR 320 NUR 323 NUR 324 NUR 325 NUR 326 NUR 340L.
Offered: Every year, Spring
NUR 326. Pathophysiology and Pharmacotherapy I. 3 Credits.
This course integrates pathophysiology and pharmacotherapy relevant to concurrent junior fall semester nursing courses. Students are introduced to medications used for health maintenance and the treatment of illness. Legal, ethical and regulatory issues also are examined.
Prerequisites: Traditional BSN Program: Take NUR 300 NUR 302 NUR 304 NUR 306 NUR 307 NUR 330L.
Corequisites: Traditional BSN Program: Take NUR 318 NUR 320 NUR 323 NUR 324 NUR 325 NUR 340L.
Offered: Every year, Spring

NUR 330L. Holistic Nursing Integration Lab I. 2 Credits.
This integrated campus laboratory experience provides the opportunity to develop nursing knowledge and attitudes, and to practice skills relevant to concurrent junior fall semester nursing courses. Students participate in learning modalities such as guided practice, clinical simulation and problem-based learning activities to develop clinical reasoning. (5 hrs./week, 70 hrs./semester)
Prerequisites: Traditional BSN Program: all preprofessional courses, NUR 304.
Corequisites: Traditional BSN Program: Take NUR 300 NUR 302 NUR 306 NUR 307.
Offered: Every year, Fall

NUR 340L. Holistic Nursing Integration Lab II. 2 Credits.
This integrated campus laboratory experience provides the opportunity to develop nursing knowledge and attitudes, and to practice skills relevant to concurrent junior spring semester nursing courses. Students participate in learning modalities such as guided practice, clinical simulation, and problem-based learning activities to develop clinical reasoning. (5 hrs./week, 70 hrs./semester)
Prerequisites: Traditional BSN Program: Take NUR 300 NUR 302 NUR 304 NUR 306 NUR 307 NUR 330L.
Corequisites: Traditional BSN Program: Take NUR 318 NUR 320 NUR 323 NUR 324 NUR 325 NUR 326.
Offered: Every year, Spring

NUR 360. History of Health Care and Modern Nursing. 3 Credits.
This elective course explores the history of health care and modern nursing from ancient times to current practices in the U.S. Students critically examine the social, political and economic forces that have influenced the development of health care and modern nursing.
Offered: As needed

NUR 366. Communication Skills in Clinical Practice. 3 Credits.
This elective course focuses on communication skills to interact more effectively with clients across the lifespan. Emphasis is placed on understanding and practicing various therapeutic methods of communication. Topics include family dynamics, life stages of development and establishing healthy provider-client relationships and boundaries. Open to health science, non-nursing majors.
Offered: As needed

NUR 367. Summer Clinical Internship. 1 Credit.
This elective course is designed for nursing students who have completed junior year nursing courses. Students must apply for this competitive 10-week summer internship during the mid-spring semester of their junior year. Accepted interns receive a modest salary and a 2-credit tuition scholarship.
Offered: As needed

NUR 380. Health Promotion and Wellness. 3 Credits.
This course focuses on health promotion, wellness and disease and injury prevention across the lifespan. Individual prevention strategies and health interventions are explored. Open to RN-BSN students only.
Offered: Every year, Fall Online

NUR 382. Nursing Science and Information Literacy. 3 Credits.
This online-only course examines historical and contemporary nursing science. Students are introduced to patterns of knowing, clinical reasoning and select disciplinary and interdisciplinary concepts and theories useful in nursing practice. This course also focuses on information literacy and information management in the delivery of quality patient care. Open to RN-BSN students only.
Offered: Every year, Spring Online

NUR 390. Special Topics in Nursing. 3 Credits.
Because this is a unique course offered on a term basis, course descriptions are not available until scheduled.

NUR 400. Psychiatric-Mental Health Nursing. 3 Credits.
This course examines concepts of nursing management for individuals with psychiatric-mental health needs across the lifespan. The delivery of safe, evidence-based, holistic, patient-centered care is emphasized. Knowledge, attitude and skill acquisition opportunities are provided in campus lab and applied in clinical practicum.
Prerequisites: Traditional BSN Program: all 300 level nursing courses.
Corequisites: Traditional BSN Program: Take NUR 401 NUR 408 NUR 424 NUR 425 NUR 426 NUR 430L.
Offered: Every year, Fall and Summer

NUR 401. Psychiatric-Mental Health Practicum. 2 Credits.
This clinical practicum is taken concurrently with NUR 400. Students participate in 84 hours of supervised clinical practice in a variety of health care settings.
Prerequisites: Traditional BSN Program: all 300 level nursing courses.
Corequisites: Traditional BSN Program: Take NUR 400 NUR 408 NUR 424 NUR 425 NUR 426 NUR 430L.
Offered: Every year, Fall and Summer

NUR 408. Research and Evidence-Based Nursing Practice. 2 Credits.
This course focuses on research-related knowledge, attitudes and skills necessary for evidence-based decision-making in clinical practice. Students learn the basic elements of research, further develop scientific literacy, and enhance information fluency.
Prerequisites: Traditional BSN Program: all 300 level nursing courses.
Corequisites: Traditional BSN Program: Take NUR 400 NUR 408 NUR 424 NUR 425 NUR 426 NUR 430L.
Offered: Every year, Fall and Summer

NUR 410. Integrative Health and Healing. 3 Credits.
This course explores the core holistic concepts of nutrition, fresh air, light, quiet, and cleanliness as they relate to contemporary integrative health practices and interventions ranging from nutrition to meditation and their application to whole person health.
Offered: Every year, Fall Online
NUR 424. Care of Adults with Complex Health Needs II. 3 Credits.
This course examines concepts of nursing management for adults with complex, high-acuity health care needs requiring sophisticated patient care technologies. The delivery of safe, evidence-based, holistic, patient-centered care is emphasized. Knowledge, attitude and skill acquisition opportunities are provided in campus lab and applied in clinical practicum.
Prerequisites: Traditional BSN Program: all 300 level nursing courses.
Corequisites: Traditional BSN Program: Take NUR 400 NUR 401 NUR 408 NUR 424 NUR 426 NUR 430L.
Offered: Every year, Fall and Summer

NUR 425. Adult Care Practicum II. 2 Credits.
This clinical practicum is taken concurrently with NUR 424. Students participate in 84 hours of supervised clinical practice in a variety of health care settings.
Prerequisites: Traditional BSN Program: all 300 level nursing courses.
Corequisites: Traditional BSN Program: Take NUR 400 NUR 401 NUR 408 NUR 424 NUR 426 NUR 430L.
Offered: Every year, Fall and Summer

NUR 426. Pathophysiology and Pharmacotherapy II. 2 Credits.
This course integrates pathophysiology and pharmacotherapy relevant to concurrent senior fall semester nursing courses. Students are introduced to medications used for health maintenance and the treatment of illness. Legal, ethical and regulatory issues also are examined.
Prerequisites: Traditional BSN Program: all 300 level nursing courses.
Corequisites: Traditional BSN Program: Take NUR 400 NUR 401 NUR 408 NUR 424 NUR 426 NUR 430L.
Offered: Every year, Fall and Summer

NUR 428. Community and Public Health Nursing. 3 Credits.
This course focuses on concepts of community and public health nursing. Emphasis is on primary, secondary and tertiary prevention and nursing management for individuals, groups and populations with health problems in community settings. The delivery of safe, evidence-based, holistic, patient-centered care is emphasized. Knowledge, attitude and skill acquisition opportunities are provided in campus lab and applied in clinical practicum.
Prerequisites: Traditional BSN Program: Take NUR 400 NUR 401 NUR 408 NUR 424 NUR 426 NUR 430L.
Corequisites: Traditional BSN Program: Take NUR 429 NUR 432 NUR 433 NUR 450L NUR 454.
Offered: Every year, Spring

NUR 429. Community and Public Health Nursing Practicum. 2 Credits.
This clinical practicum is taken concurrently with NUR 428. Students participate in 84 hours of supervised clinical practice in a variety of health care settings.
Prerequisites: Traditional BSN Program: Take NUR 400 NUR 401 NUR 408 NUR 424 NUR 426 NUR 430L.
Corequisites: Traditional BSN Program: Take NUR 428 NUR 432 NUR 433 NUR 450L NUR 454.
Offered: Every year, Spring

NUR 430L. Holistic Nursing Integration Lab III. 2 Credits.
This integrated campus laboratory experience provides the opportunity to develop nursing knowledge and attitudes, as well as to practice skills relevant to concurrent senior fall or summer semester nursing courses. Students participate in learning modalities such as guided practice, clinical simulation and problem-based learning to develop clinical reasoning. (5 hrs./week, 70 hrs./semester)
Prerequisites: Traditional BSN Program: all 300 level nursing courses.
Corequisites: Traditional BSN Program: Take NUR 400 NUR 401 NUR 408 NUR 424 NUR 425 NUR 426.
Offered: Every year, Fall and Summer

NUR 432. Contemporary Issues and Roles in Nursing. 3 Credits.
This course analyzes trends and issues in contemporary health care and their effect on the consumer, the nursing profession and society. It incorporates social intelligence, diversity awareness, creativity and sensitivity required for leadership roles and management functions in dynamic health care environments. Knowledge, attitude and skill opportunities are provided in campus lab and applied in a variety of health care settings.
Prerequisites: Traditional BSN Program: Take NUR 400 NUR 401 NUR 408 NUR 424 NUR 425 NUR 426 NUR 430L.
Corequisites: Traditional BSN Program: Take NUR 428 NUR 429 NUR 433 NUR 450L NUR 454.
Offered: Every year, January and Spring

NUR 433. Capstone Practicum. 2 Credits.
This capstone practicum facilitates the transition from nursing student to professional nurse. Synthesis of knowledge from all course work is integrated into the delivery of safe, evidence-based, holistic, patient-centered care. Students participate in 84 hours of supervised clinical practice in a variety of health care settings.
Prerequisites: Traditional BSN Program: Take NUR 400 NUR 401 NUR 408 NUR 424 NUR 425 NUR 426 NUR 430L.
Corequisites: Traditional BSN Program: Take NUR 428 NUR 429 NUR 432 NUR 450L NUR 454.
Offered: Every year, Spring and Summer

NUR 434L. Capstone Seminar Lab. 1 Credit.
This capstone seminar provides the opportunity for students working in small faculty-mentored groups to complete a capstone project that demonstrates synthesis of program learning outcomes, and American Association of Colleges of Nursing Essentials of Baccalaureate Education for Professional Nursing Practice. Students participate in 35 hours of a seminar lab in which they create and disseminate evidence-based capstone projects. For accelerated nursing students only.
Offered: Every year, Summer

NUR 440L. Holistic Nursing Integration Lab IV. 2 Credits.
This integrated campus laboratory experience provides the opportunity to develop nursing knowledge and attitudes, and to practice skills relevant to concurrent senior summer semester nursing courses. Students participate in learning modalities such as guided practice, clinical simulation and problem-based learning activities to develop clinical reasoning. Students also prepare for the nursing licensure examination (NCLEX-RN ©) with emphasis on content review, transition into professional nursing practice and computer-simulated test taking using web-based technology. For accelerated nursing students only. (5 hrs./week, 70 hrs./semester)
Offered: Every year, Summer
NUR 450L. Holistic Nursing Integration and Transition Into Practice Lab. 3 Credits.
This integrated campus laboratory experience provides the opportunity to
develop nursing knowledge and attitudes, and to practice skills
relevant to concurrent senior spring semester nursing courses.
Students participate in learning modalities such as guided practice,
clinical simulation and problem-based learning activities to develop
clinical reasoning. Students also prepare for the nursing licensure
examination (NCLEX-RN ©) with emphasis on content review, transition
into professional nursing practice, and computer-simulated test taking
using web-based technology. For traditional BSN students only. (7.5 hrs./
week, 105 hrs./semester)
Prerequisites: Traditional BSN Program: Take NUR 400 NUR 401 NUR 408
NUR 424 NUR 425 NUR 426 NUR 430L.
Corequisites: Traditional BSN Program: Take NUR 428 NUR 429 NUR 432
NUR 433 NUR 445.
Offered: Every year, Spring

NUR 454. Nursing Capstone. 3 Credits.
This nursing capstone course provides a framework within which the
student intentionally reflects upon and integrates the experiences that
represent the meaning of their collegiate learning. Each student designs
a final signature work, which demonstrates a scholarly representation of
those experiences. For traditional BSN students only.
Prerequisites: Traditional BSN Program: Take NUR 400 NUR 401 NUR 408
NUR 424 NUR 425 NUR 426 NUR 430L.
Corequisites: Traditional BSN Program: Take NUR 428 NUR 429 NUR 432
NUR 433 NUR 450L.
Offered: Every year, Spring

NUR 461. Community Health Internship. 3 Credits.
This elective course provides nursing students a preceptor experience
in a public or private community health agency. Participation requires a
high level of self-direction, and independent decision making. Students
are responsible for seeking out a community placement in collaboration
with nursing faculty. The experience is designed to meet the interests and
preparation of the student and the needs of the agency. Students devote
a minimum of 45 hours fieldwork and attend campus seminars.
Offered: As needed

NUR 475. Research and Evidence-Based Practice Fieldwork Experience. 1 Credit.
This course facilitates the student’s ability to synthesize knowledge
learned in concurrent semester coursework. Students demonstrate
competency by developing, implementing and evaluating an outcomes-
based project in a clinical setting. Open to RN-BSN students only.
Prerequisites: Take NUR 478.
Offered: Every year, Spring Online

NUR 477. Community and Public Health Nursing Fieldwork Experience. 1 Credit.
This course facilitates the student’s ability to synthesize the knowledge
learned in concurrent semester course work. Students demonstrate
competency by developing, implementing and evaluating an outcomes-
based project in a clinical setting. Open to RN-BSN students only.
Corequisites: Take NUR 484.
Offered: Every year, Fall Online

NUR 478. Research and Evidence-Based Nursing Practice. 2 Credits.
This course focuses on research-related knowledge, attitudes and skills
necessary for evidence-based decision making in clinical practice.
Students learn the basic elements of research, further develop scientific
literacy and enhance information fluency. Open to RN-BSN students only.
Offered: Every year, Spring Online

NUR 479. Contemporary Issues and Roles in Nursing Fieldwork Experience. 1 Credit.
This course facilitates the student’s ability to synthesize the knowledge
learned in concurrent semester course work. Students demonstrate
competency by developing, implementing and evaluating an outcomes-
based project in a clinical setting. Open to RN-BSN students only.
Prerequisites: Take NUR 486.
Offered: Every year, Spring Online

NUR 480. Interprofessional Practice and Quality Improvement. 3 Credits.
This course describes and applies quality improvement methods
to address problems identified in practice and actions needed to
effect a positive change for care. The process and significance of
interprofessional practice and collaboration in the delivery of patient care
and in engagement with performance improvement are described. Open
to RN-BSN students only.
Offered: Every year, Summer Online

NUR 482. Health Disparities in Vulnerable Populations. 2 Credits.
Students analyze the impact of social determinants of health and
health disparities on selected vulnerable populations. Health policy and
advocacy for vulnerable populations also are examined. Open to RN-BSN
students only.
Offered: Every year, Summer Online

NUR 484. Community and Public Health Nursing. 3 Credits.
This course focuses on concepts of community and public health nursing.
Emphasis is on secondary and tertiary prevention and nursing
management for individuals, groups and communities with health
problems in community settings. The delivery of safe, evidence-based,
holistic, patient-centered care is emphasized. Open to RN-BSN students
only.
Corequisites: Take NUR 477.
Offered: Every year, Fall Online

NUR 486. Contemporary Issues and Roles in Nursing Practice. 3 Credits.
This course analyzes trends and issues in contemporary health care
and their effect on the consumer, the nursing profession and society.
It incorporates social intelligence, diversity awareness, creativity and
sensitivity required for leadership roles and management functions in
dynamic health care environments. Open to RN-BSN students only.
Offered: Every year, Spring Online

NUR 490. Special Topics in Nursing. 3 Credits.
NUR 492. Special Topics in Health Care. 2 Credits.
The latest developments and concepts in the field of health care
are presented. Students examine current or emerging topics from
multiple perspectives through readings, discussions and multimedia
presentations. Students engage in a holistic examination of current
issues in health care. The content of this course varies from semester to
semester based on relevant contemporary issues in health care.
Offered: Every year, Summer Online

Occupational Therapy (OT)

OT 101. Foundations of Occupational Therapy. 2 Credits.
This course provides students with the foundations of occupational
therapy practice including its philosophical and historical origins, as well
as its core beliefs and principles. The course also presents the various
occupational therapy practice settings—both traditional and emerging—and
highlights how the foundations of OT practice are threaded across
settings.
Offered: Every year, Fall
OT 201. Occupation, Health, Participation.  
This course introduces the concept of occupation as central to the practice of occupational therapy. Emphasis is on the relationship between occupation and health. Using methods of inquiry, students gain a deeper understanding of occupational performance and its determinants from a person-centered to a population- and institution-centered perspective. Theoretical models focused on occupations are explored and applied to assessing and enhancing occupational performance.  
Offered: Every year, Fall

OT 214. Professionalism in Occupational Therapy Practice.  
This course serves as a bridge from students’ general education to the professional phase of the OT curriculum. Students explore features of contemporary occupational therapy practice, such as client-centeredness and evidence-based practice, as foundations to professionalism. Students integrate Quinnipiac essential learning proficiencies into the context of occupational therapy practice. Finally, the course helps students to internalize the values of professionalism as keys to being an effective change agent.

OT 250. Occupational Therapy Framework and Activity Analysis.  
This course provides a comprehensive overview of the domain and processes of occupational therapy. Emphasis is on the following processes: occupational profile and analysis of occupational performance; activity analysis; intervention planning; collaboration between practitioner and client; and collaboration within an interprofessional team. Students learn terminology associated with the occupational therapy domain and process and apply that knowledge to case analysis, self-analysis, video analysis and standardized patients/clients.  
Offered: Every year, Spring and Summer

OT 314. Therapeutic Relationships and Use of Self.  
This course builds upon students’ understanding of intentional relationships, therapeutic use of self, and the OT process to develop leadership skills in the context of a therapeutic encounter. Concurrently, this course provides students with the foundation for the application of the group process as a means of intervention. The course involves didactic lectures and practical training on professional leadership skills for both dyadic as well as group relationships.  
Offered: Every year, Spring

OT 322. Functional Anatomy and Kinesiology I.  
This course is a comprehensive, two-part series designed to provide students with foundational expertise in human biomechanics. Students examine the musculoskeletal system in conjunction with principles of kinetics and kinematics as the basis of practice in physical rehabilitation. The course includes a corequisite laboratory to develop competency in basic biomechanical safety and assessment (goniometry and manual muscle testing). The series culminates by merging all aspects of human movement as the basis for engaging in everyday occupational activities.  
Prerequisites: Take BIO 211 BIO 212 PHY 101.  
Offered: Every year, Fall

OT 322L. Functional Anatomy and Kinesiology Lab I.  
This lab, which accompanies OT 322, provides the opportunity to learn in the Human Anatomy Lab, Clinical Skills Lab, Rehabilitation Science Lab and the Model Apartment as students develop proficiency with basic biomechanical safety and assessment (goniometry and manual muscle testing). This variety of laboratory settings serves to enhance content delivered in the classroom; students are guided to first visualize human anatomy via donor dissection and then apply that learning in the simulated clinical settings. Students are alternately scheduled among spaces weekly and in accordance with progression of region in the human body. (2 lab hrs.)  
Prerequisites: Take BIO 211 BIO 212 PHY 101.  
Offered: Every year, Fall

OT 323. Functional Anatomy and Kinesiology II.  
This course is part two of a comprehensive series designed to provide students with foundational expertise in human biomechanics. Students continue their examination of the musculoskeletal system in conjunction with principles of kinetics and kinematics as the basis of practice in physical rehabilitation. The series culminates by merging all aspects of human movement as the basis for engaging in everyday occupational activities.  
Prerequisites: Take OT 322.  
Offered: Every year, Spring

OT 323L. Functional Anatomy and Kinesiology Lab II.  
This lab, which accompanies OT 323, provides an opportunity to learn in the Human Anatomy Lab, Clinical Skills Lab, Rehabilitation Science Lab and the Model Apartment as students develop proficiency with basic biomechanical safety and assessment (goniometry and manual muscle testing). This variety of laboratory settings enhances content delivered in the classroom. Students are guided to first visualize human anatomy via donor dissection and then apply that learning in the simulated clinical settings. Students are alternately scheduled among spaces weekly and in accordance with progression of region in the human body. (2 lab hrs.)  
Prerequisites: Take OT 322L.  
Offered: Every year, Spring

OT 325. Principles of Human Development and Occupation.  
This course explores normal development and its impact on age appropriate occupations. The age span is from conception through early adulthood. The course provides a foundation for evaluation and intervention in human occupation.  
Offered: Every year, Fall

OT 326. Principles of Human Development/Older Adults.  
This course builds on the developmental concepts from OT 325 to explore normal development and its impact on age appropriate occupations. The age span is from early to late adulthood. The course provides a foundation for evaluation and intervention in human occupation as well as a foundation in performance patterns, skills and context.  
Prerequisites: Take OT 325.  
Offered: Every year, Spring

OT 333. Functional Neuroscience I.  
This course provides a comprehensive study of neuroanatomy including the structures, functions and physiology of neural systems that are key to normal human health and function. The course provides a strong foundation for future study on neural substrates of health conditions and occupational performance. The course also introduces basic screening procedures to identify neurobehavioral dysfunctions.  
Offered: Every year, Spring
OT 333L. Functional Neuroscience I Lab. 1 Credit.
This course supplements OT 333 Functional Neuroscience I lecture and provides a comprehensive study of neuroanatomy including the structures, functions and physiology of neural systems that are key to normal human health and function. The course also introduces basic screening procedures to identify neurobehavioral dysfunctions.
Offered: Every year, Fall

OT 334. Functional Neuroscience II. 2 Credits.
This course builds on functional neuroanatomy as it examines the interrelationships of neuroanatomical structures, subsystems and neurophysiologic processes involved in human behaviors, which are the foundation for occupational performance. Specifically, students learn the neural substrates and mechanisms of motor behaviors, sensory-perception, language, attention, memory and learning. The course continues to introduce basic screening procedures to identify neurobehavioral dysfunctions.
Offered: Every year, Fall

OT 335. Functional Neuroanatomy. 3 Credits.
This course provides a comprehensive study of neuroanatomy including the structures, functions and physiology of neural systems key to normal human health and function. The course provides a strong foundation for future study on neural substrates of health conditions and occupational performance.
Offered: Every year, Fall

OT 336. Functional Neurobehavior. 3 Credits.
This course builds on functional neuroanatomy as it examines the interrelationships of neuroanatomical structures, subsystems and neurophysiologic processes involved in human behaviors, which are the foundation for occupational performance. Specifically, students learn the neural substrates and mechanisms of motor behaviors, sensory-perception, emotions, language, attention, memory and learning. The course also introduces basic screening procedures to identify neurobehavioral dysfunctions.
Offered: Every year, Fall

OT 345. Theory, Occupation and Wellness. 3 Credits.
This course highlights topics about health promotion and illness prevention for the theoretical application to occupational therapy practice. Foundational concepts from public health, behavioral and social science literature, and practice-based models help students to appreciate the role of occupational therapy in health and well-being.
Offered: Every year, Fall

OT 345S. Theory, Occupation and Wellness Seminar. 1 Credit.
This integrative course highlights content from the OT 345 (lecture) and Service Learning lab experience (OT 355L). Using the Socratic teaching method, students actively discuss the role of occupational therapy in community practice, integrating learned content and professional experiences.
Offered: Every year, Fall

OT 350. Theoretical Models and Service Learning. 2 Credits.
This course highlights occupational therapy models and theory development as the foundation for occupational participation and the promotion of health and well-being among clients and populations. Students directly participate in a community-based service-learning context to enhance experiential learning and the application of theoretical concepts to practice.
Offered: Every year, Fall

OT 356F. Documenting OT Practice Fieldwork. 1 Credit.
This course provides structured fieldwork observation in various settings and allows the student to observe and explore the documentation process utilized in occupational therapy. Students also have the opportunity to read documentation, compare documentation to observations, and record data and anecdotal information, utilized within the various models such as health care, education, community and social systems. The settings utilized are equipped to provide clinical application of principles learned in the OT curriculum. Students have the opportunity to reflect on this experience within the lecture course and seminar component of this course. Fieldwork is two hours every other week with a seminar on alternate weeks.
Offered: Every year, Spring

OT 361. Group Dynamics. 2 Credits.
This course builds upon students’ understanding of intentional relationships and therapeutic use of self, and the OT process to develop group leadership skills in the context of a therapeutic encounter. Concurrently, this course provides students with the foundation for the application of the group process as a means of intervention. The course involves didactic lectures and practical training on group leadership skills.
Offered: Every year, Spring

OT 362. Documenting Occupational Therapy Practice. 1 Credit.
This course provides an introduction to the philosophy, concepts and clinical reasoning that supports the documentation of occupational therapy practice. The course integrates ethical, legal and pragmatic considerations of documentation throughout the occupational therapy process in major practice settings. There is a simultaneous Level I Fieldwork/Seminar course that introduces students to requisite psychomotor and cognitive skills in documentation including reviewing client records, developing subjective and objective impressions from observations, and recording of data and anecdotal information.
Offered: Every year, Spring

OT 399. Independent Study. 1-6 Credits.
Offered: As needed

OT 411. Mental Health and Psychosocial Occupational Therapy I. 3 Credits.
This course provides a comprehensive overview of OT’s role for children and youth with mental health and psychosocial needs. Emphasis is on the role of occupation in promoting mental health, preventing disease and managing life disruptions. Psychological and OT theories guide the student’s learning of the OT process within community-based and institutional settings across the continuum of service delivery. The inclusion of documentation, therapeutic use of self and evidence-based practice are emphasized.
Offered: Every year, Fall

OT 411L. Mental Health and Psychosocial Occupational Therapy I Lab. 1 Credit.
This lab course complements OT 411 Mental Health and Psychosocial Occupational Therapy for Children and Youth. Students are provided with the opportunity to practice the application of evaluation and intervention process for various mental health conditions across the continuum of service delivery settings. Group theory and group interventions are highlighted. Related skills such as documentation, therapeutic use of self and therapeutic relationships are emphasized throughout this course.
Offered: Every year, Fall
OT 412. Mental Health and Psychosocial Occupational Therapy II.  3 Credits.
This integrative course provides a comprehensive overview of OT’s role for adults with mental health and psychosocial needs. Emphasis is on the role of occupation in promoting mental health, preventing disease and managing life disruptions. Psychological and OT theories as well as group theory and group interventions are highlighted. Related skills such as documentation, therapeutic use of self and evidence-based practice are emphasized. A culminating group protocol demonstrates the student’s clinical reasoning, application of theory and integration of best practice.
Offered: Every year, Spring

OT 412L. Mental Health and Psychosocial Occupational Therapy Lab II.  1 Credit.
This lab course complements OT 412 Mental Health and Psychosocial Occupational Therapy for Adults and Older Adults. Students are given the opportunity to practice the application of evaluation and intervention process for various mental health conditions across the continuum of service delivery settings. Group theory and group interventions are highlighted. Related skills such as documentation, therapeutic use of self and therapeutic relationships are emphasized throughout this course.
Offered: Every year, Spring

OT 431. Barriers to Health, Occupation and Participation in Children and Youth Populations.  4 Credits.
This course provides a comprehensive study of pediatric health conditions as they alter body structures and functions and impact activity and participation. Environmental factors and related facilitators and barriers to occupational performance are incorporated. This course also provides a clinical/professional reasoning model for structured case review and clinical decision-making and problem-solving.
Offered: Every year, Fall and Spring

OT 432. Barriers to Health, Occupation and Participation in Adults/Older Adults.  4 Credits.
This course provides a comprehensive study of various conditions that impact health and occupational performance among adults and older adult populations. Emphasis is given to understanding common diagnoses encountered by occupational therapists. This course also provides a clinical/professional reasoning model for structured case review with clinical decision-making and problem-solving.
Offered: Every year, Fall and Spring

OT 451. Occupational Therapy Process in Children and Youth.  6 Credits.
This course provides a comprehensive overview of the evaluation and intervention planning processes used in OT for children and youth. It covers specific procedures and tools for assessment, and strategies for intervention, which consider a variety of cultural and environmental factors. The emphasis is placed on theoretical underpinnings; the family and structural systems where children live, learn and play; clinical/professional reasoning; and documentation of the OT process in a variety of pediatric practice contexts.
Offered: Every year, Fall and Spring

OT 451L. Occupational Therapy Process in Children and Youth Lab.  1 Credit.
This course accompanies OT 451 and OT 451F. It provides a comprehensive overview of the evaluation process and intervention planning utilized in pediatric occupational therapy. This includes specific assessment tools and intervention strategies, which consider a variety of cultural and environmental factors.
Offered: Every year, Fall and Spring

OT 452. Occupational Therapy Process in Adults and Older Adults.  6 Credits.
This course provides a comprehensive overview of the evaluation process and intervention techniques used in occupational therapy for adults and older adults. While opportunities are provided to learn specific assessment tools and intervention techniques, emphasis is placed on the professional and clinical reasoning process and reflected on proper documentation of the processes. Application of theory, frames of reference, evidence and appreciation for diversity and systems are highlighted.
Offered: Every year, Fall and Spring

OT 452F. Occupational Therapy Process in Adult and Older Adult Fieldwork.  1 Credit.
This course provides structured fieldwork observation in various settings working with the adult population; it allows students to observe and explore the evaluation and treatment process utilized in occupational therapy with adults and older adults. Students develop an appreciation for the frame of reference used in the models of practice as a guide to evaluation and treatment.
Offered: Every year, Fall and Spring

OT 452L. Occupational Therapy Process in Adults and Older Adults Lab.  1 Credit.
This course complements OT 452 and OT 452F and provides an opportunity for experiential learning of the evaluation process and intervention techniques used in occupational therapy for adults and older adults. The safe, efficient and culturally sensitive delivery of specific assessment and intervention techniques are highlighted.
Offered: Every year, Fall and Spring

OT 499. Independent Study.  1-6 Credits.
Offered: As needed

Philosophy (PL)

PL 101. Introduction to Philosophy.  3 Credits.
This course introduces students to a number of central questions in philosophy through critical exploration of ideas from selected great philosophers. It engages students in the close study of several fundamental issues that have arisen in the course of the development of the philosophical tradition—such as free will, our knowledge of the "external" world, and the meaning and value of truth and justice—giving students the basic tools for further work in philosophy.
Offered: Every year, Fall and Spring
UC: Humanities

PL 101H. Honors Introduction to Philosophy.  3 Credits.
This course offers students the opportunity to examine their own values and beliefs through critical exploration of ideas from selected great philosophers, western and non-western, on such themes as the nature of reality, the self, knowledge, the good, spirituality and the ultimate. Attention is given to the historical context of the persons and ideas studied and to their impact on human thought and development.
Offered: Every year, All
UC: Humanities
PL 202. Logical Reasoning. 3 Credits.
This course teaches students to recognize and evaluate logical patterns that recur in all language intended to persuade by reason. Students learn proof techniques for logical pattern evaluation, techniques to recognize and evaluate fallacies, and ways of understanding logical patterns in longer, extended passages. The goal of the course is to improve students' natural ability to think clearly and critically by learning to apply logic to arguments in public, academic and private life.
Offered: Every year, Fall
UC: Humanities

PL 217. Contemporary Social and Political Philosophy (PO 217). 3 Credits.
This course introduces students to major contemporary debates about the nature of membership in a national community and in a global community. Potential topics include the relationship between an individual and a state, the nature of political authority, the problem of distributive justice, the nature of universal human rights, the ethics of global development, immigration, the problem of environmental justice, postcolonialism, the politics of identity, philosophy of race, and the morality of warfare.
Prerequisites: Take FYS 101 or PL 101.
Offered: Every other year, Spring

PL 220. Ethics and Human Values. 3 Credits.
This course explores the meanings of such normative distinctions as good/bad, right/wrong and good/evil. Students critically examine theories of morality such as egoism, utilitarianism, deontological ethics, divine command theory, natural law theory, sentimentalism and virtue ethics, as well as a challenge to all ethical theorizing: the case for moral relativism. Students focus on the practical implications of theory: understandings are brought to bear on various real-life ethical issues such as war, poverty, racism, abortion and substance abuse.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every year, Spring and Summer
UC: Humanities

PL 220H. Honors Ethics and Human Values. 3 Credits.
Designed for students in the university honors program, this course explores the meanings of such normative distinctions as good/bad, right/wrong and good/evil. Students critically examine theories of morality such as egoism, utilitarianism, deontological ethics, divine command theory, natural law theory, sentimentalism and virtue ethics, as well as a challenge to all ethical theorizing: the case for moral relativism. Students focus on the practical implications of theory: understandings are brought to bear on various real-life ethical issues such as war, poverty, racism, abortion and substance abuse.
Prerequisites: Take PL 101 or FYS 101.
Offered: As needed
UC: Humanities

PL 222. Bioethics. 3 Credits.
Students analyze complex ethical issues in contemporary bioethics using relevant technical vocabulary and methods from philosophy, in partnership with information from the contemporary biosciences and the health care professions. Ethical theories covered include deontology, utilitarianism, virtue-based approaches to ethics, Virginia Held's ethics of care and Theddeus Metz's reconstruction of an African moral theory. Ethical issues addressed may include: stem cell research, human subjects research, human enhancement, reproductive medicine, euthanasia, advance directives and end-of-life care, resource allocation, organ transplantation, the right to health care and global health.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every year, Fall
UC: Breadth Elective, Intercultural Understand

PL 234. Philosophies of Health, Healing and Medicine. 3 Credits.
Students examine the concept of "health" and the assumptions, values and consequences involved in some of the more important ways of defining, preserving and restoring it. This leads to explorations of some of the significant understandings of "medicine" in relation to healing and to health. Among the understandings considered are: the Western "scientific" model; ancient models that are seen as offering provocative alternatives--Ayurvedic, Chinese, aboriginal; more recent alternatives developed within the West--Naturopathy, Homeopathy, Reiki, etc.; and faith-based approaches--Christian science, "miracle cures," etc. Although focused on health, healing and medicine, this course ultimately deals with the nature of the good society and welcomes all who are concerned with this perennial question.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every other year, Spring

PL 235. Philosophy of Science. 3 Credits.
Students consider the history and nature of, and assumptions and values involved in, the scientific method; the logic of scientific explanation and theory construction; philosophical and ethical problems in selected natural, social and human sciences.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every other year, Spring

PL 236. Philosophy of Language. 3 Credits.
This course focuses on the attempt to understand the nature of language and its relationship with speakers, their thoughts and the world. Students explore such questions as: What is language? How do we understand one another? Can we think without language? What is the connection between words and the objects to which they refer? What is meaning? What determines the truth and falsehood of our statements? Do we have innate linguistic abilities or do we learn to speak by observing the behavior of other speakers? Various philosophical theories about language are attempts to answer such questions. These are discussed, along with their far-reaching consequences for other areas of philosophy.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every other year, Spring
UC: Humanities
PL 237. Philosophy of Mind. 3 Credits.
Are minds physical or non-physical? Is free will real or an illusion? Is consciousness computational? Can we build artificial minds? How can we explain phenomena such as emotions, delusions and pain? What are we, and where is the boundary between ourselves and our environment? In this course, students explore these and other issues in the contemporary philosophy of mind, focusing on questions that emerge at the intersection of philosophy, psychology, psychiatry, neuroscience and artificial intelligence.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every other year, Spring
UC: Humanities

PL 238. Philosophy of Technology and Social Transformation. 3 Credits.
What is technology? How do science and technology relate to human values? What role should technology play in our everyday lives? Do technological developments result in greater freedom? How should technology shape our cities and the natural environment, now and in the future? Students in this course critically examine these and other related issues, using a range of philosophical texts, science fiction and film.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every other year, Fall
UC: Humanities

PL 240. Philosophy of Sport (SPS 240). 3 Credits.
This course examines the notion that humans are "homo ludens" or beings who play from two perspectives. In the first part of the course, students look at such questions as: what is the nature or essence of sports? And how do we distinguish or define sports as distinct from other kinds of activities? In the second part of the course, students examine the relationship between sports and ethics, with a focus on topics such as what is fair play, whether athletic enhancement is cheating, what is gender equity within sports in society, and how do collegiate sports compare with professional sports.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every other year, Fall
UC: Humanities

PL 250. Philosophy of Art. 3 Credits.
What is beauty? What does it mean to experience something—perhaps art or nature—aesthetically? What is art? What is the nature of artistic inspiration? What is—or what should be—the purpose of art? How does one determine the value of art? Is some art worthless? What is the relationship between art and truth? Should artistic expression ever be censored? How have racism, sexism and consumerism impacted the art world? These are some of the questions to be discussed as we consider aesthetic experience and artistic expression—in the visual arts, but also in music, dance, film, drama and other forms.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every other year, Spring
UC: Humanities

PL 265. Living Religions of the World. 3 Credits.
Students explore the phenomenon of religion, the idea of a god, the holy or the divine, and the main religions and related questions of today. The course focuses on aboriginal religion (Native American), Hinduism, Judaism, Buddhism, Christianity and Islam. With prior instructor approval, students also may consider other past or contemporary religions, including atheism. Visits to two traditions other than your own and presentations by practicing members of the religions considered are included.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every year, Fall
UC: Humanities

PL 266. Diverse Global Philosophies. 3 Credits.
In this course, students explore global traditions in philosophy developed by people from diverse cultures, beyond Europe and the United States. Participants devote particular attention to insights and questions raised with regard to possible relationships or contrasts between diverse global philosophies and our existing assumptions, beliefs and values. Potential topics and course materials may include both classical and contemporary sources from Australia, Africa, the Caribbean, China, India, Japan, the Muslim world, the Pacific Islands and Latin America. Owing to the breadth of the field, the focus of the course shifts, reflecting the interests and work of the instructor in any particular semester.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every other year, Fall
UC: Humanities, Intercultural Understanding

PL 267. Philosophy of Religion. 3 Credits.
Religious language, religious experience and religious institutions make up a significant part of life in both traditional and modern cultures. This course analyzes the concepts and terms that are used in religious discourse, including God, holiness, redemption, idolatry, creation, eternal life and sacrifice, among others. Such analysis leads to questions regarding religious statements such as "God exists," "The cow is holy," and "If you fast, you will be redeemed" and their relationship with ordinary, everyday experience, as well as with science and with morality. Most important is the fundamental philosophical question "what is religion?"; answering it means moving beyond philosophy to anthropology, sociology, and of course psychology.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every other year, Spring
UC: Humanities

PL 278. Philosophy and Social Justice (PO 278). 1-3 Credits.
This course examines the relationship between philosophy and social justice, focusing on issues of social and political justice, including distributive justice, justice in the political sphere, and the moral responsibilities of citizens. The course will explore philosophical theories of justice and their application to contemporary social and political problems.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every other year, Spring
UC: Humanities

PL 288. Ethics of Business (PO 288). 3 Credits.
This course explores ethical issues that arise in the business world. Students will examine ethical theories and their application to various business situations, including corporate ethics, business ethics, and ethical decision-making. The course will also cover the role of business ethics in society and the responsibilities of business leaders.
Prerequisites: Take PL 101 or FYS 101.
Offered: Every other year, Spring
UC: Humanities

PL 289. Independent Study in Philosophy. 1-3 Credits.
Tutorial study or independent projects in selected areas of philosophy are completed under the direction of a faculty member. This course may not be used as a substitute for required courses in the major or minor. 1, 2 or 3 credits (must be agreed on in advance by the student and faculty member, and approved by the department chairperson).
Offered: Every year, Fall and Spring

PL 312. Philosophy of War and Peace (PO 312). 3 Credits.
This course draws on what philosophers, legal scholars and political scientists have written about the nature, limits and morality of warfare. Students study the general frameworks for evaluating warfare in the theories of realism, pacifism and just war, and then turn to the evaluation of historical case studies concerning when it is just to initiate war, how war is to be conducted justly once it is initiated, and the obligations of combatants following war. Readings include both historical authors, such as Thucydides and Thomas Aquinas, and contemporary theorists, such as Michael Walzer and Jeff McMahan.
Prerequisites: Take PL 101 or one course from subject PL from level 200 or 300; or PO 211 or PO 215.
Offered: Every other year, Spring
PL 320. Thought and Work of Albert Schweitzer (SL: Service Learning). 3 Credits.
Albert Schweitzer (1875-1965) made significant, often controversial contributions in several areas: music, philosophy, religion, medical care, service to human need, animal rights and ecological awareness. In 1952 Schweitzer was awarded the Nobel Peace Prize for his many decades of humanitarian work at his "jungle hospital" in West Africa. In his 80s, he became one of the most active voices in the struggle against the testing of nuclear weapons. Because Schweitzer considered his philosophy to be primarily one of action and service ("My life is my argument") Service Learning is an important component of the course. Quinnipiac's Albert Schweitzer Institute offers students many kinds of projects and activities reflecting Schweitzer's many areas of involvement. In this course, students critically explore Schweitzer's life, thought and work and their application to some of the moral problems and cultural and political issues we face today.
Prerequisites: Take PL 101; or take 1 course from subject PL from level 200 or 300; or PO 211; or PO 215.
Offered: Every other year, Spring

PL 330. Philosophy and Gender (WS 330). 3 Credits.
Students investigate the notions of sex and gender and the debate over social versus biological underpinnings of expressions of masculinity and femininity. The relevance of historical views on sex, gender and relations between the sexes to current patterns and developments are considered. Issues facing men and women, as well as policies and reforms designed to address them are examined. Participants also consider the intersection between sex/gender and race, ethnicity, class and sexual orientation. Finally, the impact of gendered perspectives on contemporary philosophy, especially epistemology, ethics and social and political philosophy, is considered.
Prerequisites: Take PL 101; or take one course from subject PL from level 200 or 300; or one course from subject WS.
Offered: Every other year, Spring

PL 331. Philosophy of Humor. 3 Credits.
Historically, many thinkers have viewed humor with scorn while others have not considered it a topic worthy of philosophical investigation. This course explores the nature and value of humor in our daily lives and examines humor critically as a virtue that can help us take ourselves less seriously and live better lives. Students analyze the major accounts of humor such as the superiority, incongruity and relief theories highlighting the strengths and weaknesses of each theory. Adopting a critical philosophical lens, students also explore some important connections between humor and aesthetics, ethics and education.
Prerequisites: Take PL 101; or take 1 course from subject PL from level 200 or 300.
Offered: Every other year, Fall

PL 332. Ancient Philosophy. 3 Credits.
This course explores Greek and Roman philosophy through a focus on the concepts of éros and philia or love and friendship. Students examine how Epic poetry, Greek tragedy, Plato, Aristotle, Epicurus, Stoicism and Lucretius reflected on the place of love and friendship in a life well-lived.
Prerequisites: Take PL 101; or take 1 course from subject PL from level 200.
Offered: Every year, Fall
UC: Humanities

PL 333. Modern Philosophy. 3 Credits.
From the mid-16th through the 18th century, movements such as the Renaissance, the Reformation, the development of the modern sciences and increasing international trade and colonization introduced a new era of philosophy. Students explore human understanding, critically analyzing issues that potentially include the mind-body relationship, freedom and determinism, the nature of reality, the existence of God, perception, personhood and personal identity, the scope and limits of knowledge, and the value and limitations of our intellectual heritage from this period. Authors may include Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume and Kant.
Prerequisites: Take PL 101; or take 1 course from subject PL from level 200 or 300.
Offered: Every year, Spring
UC: Humanities

PL 334. Medieval Philosophy. 3 Credits.
This course focuses on the history of medieval philosophy. Students discuss figures from the Christian, Islamic and Jewish traditions, including Augustine, Boethius, Ibn Sina, Al-Ghazali, Ibn Rushd, Maimonides, Aquinas, Scotus and Ockham. Particular attention is given to examine the manner in which these philosophers confronted and assimilated Aristotelian philosophy and how they anticipate certain dimensions of modern philosophy.
Prerequisites: Take PL 101; or take one course from subject PL from level 200 or 300.
Offered: Every Third Year, Spring
UC: Humanities

PL 335. Contemporary Philosophy. 3 Credits.
Students explore dynamic philosophical movements in 19th- and 20th-century philosophy, and consider their contributions to humanism and diversity today. Potential topics may include Marxism, pragmatism, existentialism, phenomenology, logical positivism, feminism, poststructuralism, postcolonialism and philosophy of race. Potential material includes work by Hegel, Marx, Nietzsche, James, Dewey, Russell, Wittgenstein, Ayer, Du Bois, Sartre, de Beauvoir, Merleau-Ponty, Arendt, Foucault, Fanon, Biko, Derrida and Butler. Owing to the breadth of the field, the course focus each year reflects the interests and expertise of the instructor.
Prerequisites: Take PL 101; or take 1 course from subject PL from level 200 or 300.
Offered: Every year, Fall
UC: Humanities

PL 337. Human Rights: Theory and Practice (PO 337). 3 Credits.
This course provides a rigorous and critical introduction to the foundation, structure and operation of the international human rights movement. It begins with leading conceptual and theoretical discussions, moving on to the institutions and functioning of the international human rights mechanisms, including nongovernmental and intergovernmental organizations. It covers cutting-edge human rights issues—gender and race discrimination, religion and state, national security and terrorism—placing them in the context of current political conflict and human rights discourse.
Prerequisites: Take PL 101; or take 1 course from subject PL from level 200 or 300; or PO 211; or PO 215.
Offered: Every other year, Fall
PL 338. Paradoxes.  3 Credits.
Paradoxes have been with us since a Cretan said "all Cretans are liars," and Zeno showed us how the tortoise could beat Achilles. Originally considered a problem of logical--and mathematical--thought, paradoxes run the gamut from logic to mathematics, to language, to science, to art and to ethics. This course presents the definition(s) of paradox, reviews some of the principal paradoxes known to us and asks about their essence: what is paradoxical about paradoxes? It then moves on to examine paradoxes in ethics, thereby asking about the real, paradoxical world of human--psychological and social--behavior.
Prerequisites: Take PL 101; or take 1 course from subject PL from level 200 or 300.
Offered: Every Third Year, Fall
UC: Humanities

PL 340. Philosophy of Sex and Love.  3 Credits.
This course presents a study of philosophical ideas on sex and love, the views of both Western and Eastern religions, and a critique of the moral issues concerning different types of sexual and love relationships. The significance of these viewpoints for living well is considered.
Prerequisites: Take PL 101; or take 1 course from subject PL from level 200 or 300.
Offered: Every other year, Fall

PL 368. Philosophy of Death and Dying.  3 Credits.
What does it mean to live and what does it mean to die? How do we distinguish life and death, living and dying? Is there a way to "die well" in the same way that we assume there is a way to "live well"? How do we justify our beliefs about issues of life and death? Is suicide ethically defensible? Do we have a duty to prevent death? Should we consider death an evil, and could it ever be a good? Should we care about our posthumous reputations? Students in this course explore these and related questions, drawing important insights from a range of relevant philosophical literature and personal narratives on death and dying.
Prerequisites: Take PL 101; or take 1 course from subject PL from level 200 or 300.
Offered: Every other year, Fall

PL 395. Critical Game Studies (GDD 395).  3 Credits.
In this course, students address current research in game studies, ludology or play theory, to develop critical, conceptual and cultural understandings of narrative, meaning and identity in digital games. The course also addresses the design and development of serious and meaningful games and the aesthetic, social and technological implications of new emerging forms such as digital storytelling, interactive theater, virtual worlds and locative media.
Prerequisites: Take GDD 101 GDD 110 or PL 101.
Offered: Every year, Spring

PL 396. Philosophy Internship.  1-3 Credits.
This internship aims to promote student growth and exploration in professional fields connected with the philosophy major. Students complete placements and associated activities either off campus with partner organizations, or on campus, working under the direction of a partner organization supervisor and/or a faculty member. Course can be taken for 1, 2 or 3 credits (credits, placements and associated activities must be agreed on in advance of the relevant semester by the student and faculty member). This course is graded on a pass/fail basis.
Offered: Every year, Fall and Spring

PL 399. Directed Research in Philosophy.  3 Credits.
This is a more intensive directed research opportunity than that offered in PL 299. The course involves students in substantial independent research and writing projects in selected areas of philosophy, completed under the direction of a faculty member. This course may not be used as a substitute for required courses in the major or minor.
Offered: Every year, Fall and Spring

PL 400. Special Topics in Philosophy.  3 Credits.
Prerequisites: Take PL 101 or FYS 101.
Offered: As needed

PL 401. Senior Seminar.  3 Credits.
This is a writing and research seminar for senior philosophy majors. Students engage with philosophical primary and secondary readings in group discussion. They prepare and present a senior thesis on a topic of their choice, with guidance by faculty from the department.
Prerequisites: Must be a PL Major with Senior Status.
Offered: Every year, Spring

PL 499. Independent Study Philosophy.  3 Credits.
Individual study of a special area. By agreement with the instructor, the student may undertake directed reading with discussion, examination and reports as arranged by the instructor in an area of the student’s interest not normally offered through scheduled courses.
Offered: As needed, All

Physician Assistant (PY)

PY 104. Physician Assistant Seminar I - Orientation to the Profession.  1 Credit.
This course is for ELMPA majors only. Students gain a basic knowledge of the fundamentals of the physician assistant profession and are introduced to the competencies of the PA profession. PA education, role expectations and practice settings are examined. Information on the profession is presented. Students must have active AAPA student membership.
Offered: Every year, Spring

PY 204. Physician Assistant Seminar II - The Interdisciplinary Team.  1 Credit.
In this seminar course, students explore the roles of those professionals who are part of the health care team and learn how team practice affects patient care. Experts from a variety of health care fields explore the relationship of the practicing PA in each professional domain.
Prerequisites: Take PY 104 PY 397.
Offered: Every year, Spring

PY 388. Clinical Training I.  3 Credits.
This course is for ELMPA majors only. It includes classroom and clinical experiences and provides students with an opportunity to develop the knowledge and skills required for Emergency Medical Technician National Certification. Emphasis is placed on patient assessment, clinical signs and symptoms, pathophysiology and the practical skills necessary to manage the pre-hospital care of patients. Clinical rotations on an ambulance service are required. At the discretion of the course instructor, students may be required to meet for additional practical sessions outside of class time. Successful completion of the PY 388-389 sequence and fulfillment of state-mandated hours of instruction are required to be eligible for certification.
Prerequisites: Take PY 104.
Offered: Every year, Fall
PY 388L. Clinical Training I Lab. 0 Credits.
Lab to accompany PY 388. (3 lab hrs.)
Offered: Every year, Fall

PY 389. Clinical Training II. 3 Credits.
This course is a continuation of PY 388.
Prerequisites: Take PY 388.
Offered: Every year, Spring

PY 389L. Clinical Training II Lab. 0 Credits.
Lab to accompany PY 389. (3 lab hrs.)
Offered: Every year, Spring

PY 397. Pre-Health Professions Clinical Affiliation. 3 Credits.
The pre-clinical experience pairs an undergraduate student who displays maturity, dedication and sensitivity with a physician assistant for a 12-week period. The affiliation is designed to provide the student with the opportunity to observe PA practice and the competencies of the PA profession in a clinical setting. Students may register for the course according to the following criteria: permission of faculty; completion of a minimum of three semesters at Quinnipiac; satisfactory GPA; compliance with pre-clinical health and uniform requirements.
Prerequisites: Take PY 104.
Offered: Every year, Spring

PY 400. Pre-Physician Assistant Clerkship. 3 Credits.
Pre-physician assistant students participate in a mentoring program that provides the opportunity to gain knowledge through direct observation. Each student spends time with three physician assistants who specialize in different areas of medicine.
Prerequisites: Take PY 104 PY 397.
Offered: Every year, Fall

PY 401. Introduction to Clinical Problem Solving. 3 Credits.
This course offers the pre-physician assistant student the tools necessary for developing a systematic approach to the patient and his or her medical condition. Students learn to access and evaluate the medical literature for identification of the signs and symptoms of disease presentation, the components of a history and physical, and the understanding of a differential diagnosis. In addition, students are taught the basis for developing a patient assessment plan. Students may not receive credit for both PY 401 and HSC 401.
Prerequisites: Take PY 104 PY 397.
Offered: Every year, Fall

Physics (PHY)

PHY 101. Elements of Physics. 3 Credits.
Students study the basic principles of physics and some important applications. Newton's laws of motion, gravity, thermodynamics, electricity and magnetism and wave phenomena are studied. Topics in modern physics including quantum theory, atomic structure, radioactivity and relativity are discussed. Must be taken in conjunction with PHY 101L.
This course is suitable for both science and non-science majors. Students who have credit for PHY 110 or PHY 121 may not register for PHY 101.
Prerequisites: Take MA 107 minimum grade C- or Math placement score of 3.
Corequisites: Take PHY 101L.
Offered: Every year, Fall and Spring
UC: Natural Sciences

PHY 101L. Elements of Physics Lab. 1 Credit.
Lab must be taken with PHY 101. (2 lab hrs.)
Corequisites: Take PHY 101.
Offered: Every year, Fall and Spring
UC: Natural Sciences

PHY 110. General Physics I. 3 Credits.
Students consider phenomena that examine the fundamental nature of the physical universe as well as the theories of the nature of the universe. Topics include kinematics and dynamics of motion, momentum, energy and equilibrium of rigid bodies and fluids, and thermal properties of matter. This course uses algebra and trigonometry. Must be taken in conjunction with PHY 110L. This course is designed primarily for science majors.
Prerequisites: Take MA 107; minimum grade C-; or Math placement score of 3.
Corequisites: Take PHY 110L.
Offered: Every year, Fall and Summer
UC: Natural Sciences

PHY 110L. General Physics I Lab. 1 Credit.
Lab must be taken with PHY 110. (2 lab hrs.)
Corequisites: Take PHY 110.
Offered: Every year, Fall and Summer
UC: Natural Sciences

PHY 111. General Physics II. 3 Credits.
Students continue the examination of physical phenomena including vibrations and waves, sound, light, optics, electricity and magnetism including D.C. and A.C. circuits, and some elements of modern physics. This course uses algebra and trigonometry. Must be taken in conjunction with PHY 111L. This course is designed primarily for science majors.
Prerequisites: Take PHY 110 PHY 110L; Minimum grade C-.
Corequisites: Take PHY 111L.
Offered: Every year, Spring and Summer
UC: Natural Sciences

PHY 111L. General Physics II Lab. 1 Credit.
Lab must be taken with PHY 111. (2 lab hrs.)
Corequisites: Take PHY 111.
Offered: Every year, Spring and Summer
UC: Natural Sciences

PHY 121. University Physics. 4 Credits.
This is a calculus-based physics course. Students examine classical Newtonian physics from kinematics, the study of motion, to dynamics, the study of why motion occurs. Topics include Newton's laws, conservation of energy and momentum, torque, equilibrium of static bodies and fluids, and thermal properties of matter. Through experimentation, computer modeling and group problem-solving, students apply these principles to predict the outcome of a number of reality-based and open-ended problems. (6 studio-lab hrs.)
Prerequisites: Take MA 141 or MA 151; Minimum grade C-.
Offered: Every year, Fall and Spring
UC: Natural Sciences
PHY 122. University Physics II. 4 Credits.
This is a calculus-based physics course. Students examine physical phenomena including vibrations and waves, sound, light, optics, electricity and magnetism including the study of D.C. and A.C. circuits and some elements of modern physics. Through experimentation, computer modeling and group problem-solving, students apply these principles to predict the outcome of a number of reality-based and open-ended problems. (6 studio-lab hrs.)
Prerequisites: Take PHY 121; Minimum grade C-.
Offered: Every year, Fall and Spring
UC: Natural Sciences

PHY 122L. University Physics II Lab. 0 Credits.
Lab to accompany PHY 122. (3 lab hrs.)
Prerequisites: Take PHY 121.
Corequisites: Take PHY 122.
Offered: As needed

PHY 202. Physics of Life and Technology. 4 Credits.
Students study the basic principles of physics including everyday applications and their use in applied technology. Topics include Newton’s Laws of Motion and Gravity, torque, sound, light and optics, electricity and magnetism. These principles are examined through the study of roller coasters, space travel, musical instruments, the mechanics of muscle movements, sports and sport technology, the circuitry of the human brain, medical imaging using light and sound, optics of the human eye, lasers and elementary circuits. Enrollment in this course is restricted to students in the Online Bachelor of Science in Health Science Studies degree completion program. Students may not receive credit for PHY 202 if they already have credit for PHY 101 or PHY 110.
Prerequisites: Basic algebraic skills; MA 107 or MA 110 or higher; or a Math placement score of 3 or higher.
Offered: Every year, Summer

PO 101. Issues in Politics. 3 Credits.
Students explore issues of current relevance in local, domestic and international politics. Each individually themed seminar provides an introduction to the systematic analysis of power relations in relevant local, national or global spheres of life. Students approach the seminar’s theme in a way that develops an understanding of the major political ideologies, the behavior of relevant social actors and governmental institutions, and the capacity to engage as responsible citizens.
Offered: Every year, All
UC: Social Sciences

PO 131. Introduction to American Government and Politics. 3 Credits.
This course covers the development of the constitution, the nature of Federalism, the state and the national government. Students explore the duties and powers of the President, Congress, the Supreme Court and administrative agencies. Political parties, the nominating process, elections and electoral behavior as well as political interest groups and public opinion are considered.
Offered: Every year, Fall and Spring
UC: Social Sciences

PO 200. Special Topics. 3 Credits.
Prerequisites: Take PO 131 or FYS 101.
Offered: As needed

PO 205. Public Policy and Administration. 3 Credits.
Students in this introductory course develop not only an ability to understand, evaluate and design public policy, but also a capacity for ethical and effective leadership, particularly in the public sector. Students explore questions such as: What is the role of government in our lives? How is public policy made, and what are the forces that shape public policy? What public policies should government implement? How can public policies be implemented and evaluated?
Prerequisites: Take PO 101 or PO 131 or FYS 101.
Offered: Every year, Fall
UC: Social Sciences

PO 206. Ethics and Public Policy. 3 Credits.
In this seminar, students grapple with ethical dilemmas and tradeoffs in public policy and politics. The seminar focuses primarily on leadership issues in the public policy realm, as distinct from those found in public administration or business management. Topics include lying and secrecy by public officials, health care, the use of violence, treatment of minorities, poverty, gender equity, whistleblowers, conflict of interest and governmental codes of ethical conduct. Students with background interests in political science, journalism, business and the sciences are welcome. Course readings emphasize classic works on ethics and political theory, as well as detailed ethically challenging cases from past and present. Students explore these cases through role playing, papers and classroom discussion.
Prerequisites: Take PO 131 or FYS 101.
Offered: Every year, Spring
UC: Social Sciences

PO 209. Environmental Politics and Policy. 3 Credits.
Perhaps no other issue area is as potentially disruptive to stability as that which is defined by the crises in our environment. From the local, to the national and global levels, the exhaustion of natural resources, population growth and threats presented by climate change and the accumulation of toxins and trash in the atmosphere, on land and in the world’s oceans, demand the attention of government at every level. In this course, students engage with policy debate around these and other issues, such as the ways environmental issues overlap with issues of local and global justice. They explore the political factors that have influenced environmental policy debates historically and currently, in the U.S. and on comparative and international bases.
Prerequisites: Take PO 101 or FYS 101.
Offered: Every other year, Fall
UC: Social Sciences

PO 211. Introduction to International Relations. 3 Credits.
Students are introduced to the study of politics on the global level. The course focuses on the nature of the international system of nation-states, including the importance of state sovereignty, the political interactions between states, and the causes of war and peace. Additional topics include understanding the domestic bases for foreign policy decisions, the different tools available for state action in the international realm (diplomacy, espionage, military intervention), the increasing importance of international economic relations, and the function and evolution of international law and organizations.
Prerequisites: Take PO 101 or PO 131 or FYS 101.
Offered: Every year, Fall and Spring
UC: Social Sciences
PO 215. Political Theory. 3 Credits.
In this course, students survey political philosophy, from Aristotle and Plato through Mill and Marx. Students use these thinkers as a way to explore issues such as the nature of society, the nature of government, and the nature of freedom, justice and the law.
Prerequisites: Take PO 101 or PO 131.
Offered: Every year, Fall and Spring
UC: Social Sciences

PO 216. American Political Thought. 3 Credits.
Students are introduced to major ideas of social justice and political power in America from colonial New England to the modern American state. Special emphasis is on major debates on social issues in American history, including slavery and race, church and state, industrialism and technology, civil rights and citizenship, and democracy and reform. Major authors and readings include Winthrop, Jefferson, Paine, the Federalist Papers, Lincoln, Dewey, Roosevelt and M.L. King.
Prerequisites: Take PO 131 or FYS 101.
Offered: Every other year, Spring
UC: Social Sciences

PO 217. Contemporary Social and Political Philosophy (PL 217). 3 Credits.
This course introduces students to major contemporary debates about the nature of membership in a national community and in a global community. The first half of the course focuses on the relationship between an individual and a state, for instance the nature of political authority, the relationship between liberty and the state, cultural pluralism and the problem of distributive justice. The second half of the course focuses on the nature of global citizenship, for instance the nature of universal human rights, the ethics of global development, immigration, the problem of environmental justice and the morality of warfare. Readings include contemporary philosophers such as John Rawls, Michael Sandel, Carole Pateman, Will Kymlicka and Thomas Pogge.
Prerequisites: Take FYS 101 PL 101 or PO 215.
Offered: Every other year, Spring

PO 219. Women and Political Thought (WS 219). 3 Credits.
Students explore different approaches to explain the status of women. Theoretical perspectives that students consider may include: liberal feminism, radical feminism, Marxist/socialist feminism, feminism of care, conservative feminism and global feminism, among others. Students critically evaluate political concepts such as freedom, equality, rights and oppression, as well as learn about how different thinkers have conceptualized gender, politics, power and the role of the state. The course requires careful reading, intensive class discussion and multiple writing assignments.
Prerequisites: Take PO 101 PO 131 PL 101 PS 101 SO 101 or WS 101.
Offered: Every other year, Spring
UC: Social Sciences

PO 221. Introduction to Latin America. 3 Credits.
This is the transdisciplinary introductory course for the minor in Latin American studies. Various disciplines, including history, anthropology, economics and languages, are interwoven in an exploration of concepts, behaviors and traditions associated with Latin America. A survey of Latin American regions spanning the Revolutionary period to the present, with a focus on the past 50 years, is utilized to focus the content.
Prerequisites: Take PO 101 or FYS 101.
Offered: Every other year, Fall
UC: Social Sciences

PO 225. American Political Movements. 3 Credits.
In this class, students explore key movements in American political society over the past 150 years, and analyze how social groups have organized to demand political change in the U.S. Students study political movements organized around race, gender, social class and sexual identity/preference.
Prerequisites: Take PO 101 PO 131 or FYS 101.
Offered: Every year, Fall

PO 227. The Politics of Intimacy. 3 Credits.
How do our thoughts about inclusion and citizenship shape our ideas about sexual and political freedom? In what ways has the democratic process sought to affirm American values by limiting individual choices? In this course, students explore the ways that intimacy has been regulated, through a thematic investigation of legal and political challenges in areas such as trans/interracial adoption, same-sex marriage, interracial marriage, sex and race in the American South, statutory rape, sexual violence, sex education and reproductive rights.
Prerequisites: Take PO 131 or FYS 101.
Offered: Every other year, Fall
UC: Social Sciences

PO 231. Elections and Political Parties (SL: Service Learning). 3 Credits.
This introduction to the analysis and understanding of the international economy from a political perspective centers on the increasing internationalization, or globalization, of the capitalist market economy. This is analyzed from three perspectives, each of which raises different political issues and strategies: neoliberalism, economic nationalism (neomercantilism) and Marxism. Current issues dealing with international trade and finance, the environment, Third World development and marginalization, and gender/race issues in the international economy are discussed.
Prerequisites: Take PO 211 or EC 111.
Offered: Every Third Year, Spring
UC: Social Sciences

PO 245. International Political Economy. 3 Credits.
This introduction to the analysis and understanding of the international economy from a political perspective centers on the increasing internationalization, or globalization, of the capitalist market economy. This is analyzed from three perspectives, each of which raises different political issues and strategies: neoliberalism, economic nationalism (neomercantilism) and Marxism. Current issues dealing with international trade and finance, the environment, Third World development and marginalization, and gender/race issues in the international economy are discussed.
Prerequisites: Take PO 211 or EC 111.
Offered: Every Third Year, Spring
UC: Social Sciences

PO 247. Actors and Processes in U.S. Foreign Policy. 3 Credits.
This introduction to U.S. foreign policy and how it is made combines a study of world politics, American political processes and current events. The course focuses on actors and policy processes, including the role of Congress, the President, interest groups, the mass media and public opinion (among others), and the influence of ideology on U.S. foreign policy. The course examines several 20th-century international crises, asking: what lessons were learned by these experiences, and how do these episodes illuminate the formation of foreign policy in the United States? The post-Cold War world is examined as a context of current challenges to American foreign policy.
Prerequisites: Take PO 211 or PO 131.
Offered: Every other year, Spring
UC: Social Sciences
PO 270. State and Local Government. 3 Credits.
The role of states in the federal system is analyzed. Structure and problems of state and local governments are examined.
Prerequisites: Take PO 131.
Offered: Every other year, Spring

PO 280. Congress and the President. 3 Credits.
This course surveys the historical development of the executive and legislative branches of the U.S. government. The course surveys the Constitutional foundations, evolutionary growth and contemporary research on the U.S. presidency and Congress. The goal of the course is to highlight how many of the current conflicts between the President and Congress have deep historical roots.
Prerequisites: Take PO 131.
Offered: Every other year, Fall

UC: Social Sciences

PO 295. Internship in Political Science. 1-3 Credits.
This internship requires students to complete a minimum of between 50 and 100 hours of on-site work, keep a field journal and complete a 5-8 page final report that summarizes activities and documents what the internship contributed to student learning in political science.
Prerequisites: Take PO 131.
Offered: As needed

PO 297. Simulating International Organizations. 1 Credit.
Students prepare to participate in various external simulations of the activities of the United Nations, African Union, North Atlantic Treaty Organization, European Union and other international organizations. Students are trained in the preparation of mock resolutions and they learn the essentials of international diplomacy and proper protocol at international meetings to enable them to successfully compete in model meetings across the U.S. and elsewhere.
Offered: Every year, Fall

PO 299. Independent Study in Political Science. 1-3 Credits.
This course is directed by a faculty member with background in the student's area of research. Participants are required to write a series of papers (minimum of three to five pages) during the semester or a single research paper (8 to 15 pages long).
Offered: Every year, All

PO 300. Special Topics. 3 Credits.
Prerequisites: Take PO 101 or FYS 101.
Offered: As needed, All

PO 301. Critical Thinking About Politics. 4 Credits.
This course introduces students to the fundamentals of critical and analytic thinking through the study of current issues. Students develop the tools necessary to think critically about political and other issues in their daily lives in an effort to better explain and understand the world around them. Upon successful completion of the course, students are able to understand and evaluate the structure, content and quality of arguments; locate stated and unstated assumptions in persuasive writing; analyze, evaluate and account for discrepancies among various readings on a topic and explain why two sources might interpret the same facts differently; clearly communicate their positions about issues and support those positions with solid evidence; and understand how critical thinking can be applied to decision making in daily life.
Prerequisites: Admission into Online Degree Completion program.
Offered: Every year, Fall Online

PO 302. The Global Civic Dilemma. 4 Credits.
In this course, students explore what constitutes an ethical civic life by working from philosophical principles through an understanding of the basis of government on the local, national and international levels, to civic participation. The course is structured around several tensions, as well as the many key concepts in the age-old quest for understanding what makes for the ideal social order: self and other, individual and community, public and private, human agency and social structure; governance, state, society; the political and economic; liberalism and conservatism (and their variants); three main approaches to ethics; and how to arbitrate between ethical standards when they come into disagreement.
Prerequisites: Admission into Online Degree Completion program.
Offered: Every year, Spring Online

PO 303. Political Inquiry. 3 Credits.
This course, designed for political science majors in their sophomore year, examines the culture of inquiry in political science as a problem-solving discipline and contributes toward political understanding through multiple reading, thinking and writing exercises. Course material focuses on current issues in politics and government and asks how political scientists might respond. The course emphasizes theory development and hypothesis formation; various methodological approaches; and several sub-disciplinary perspectives within political science. For political science majors only. Sophomore status is required.
Prerequisites: Take PO 215 or PO 211.
Offered: Every year, Fall

PO 311. Topics in International Relations. 3 Credits.
This advanced seminar focuses on in-depth critical analysis of current issues and themes in international relations. It may deal with topics from issues of war, peace and security, to the politics of the international economy, emerging international cultural norms, and international law. The course requires careful reading, intensive class discussion and multiple writing assignments.
Prerequisites: Take PO 211 or Department approval.
Offered: As needed

PO 312. Philosophy of War and Peace (PL 312). 3 Credits.
This course draws on what philosophers, legal scholars and political scientists have written about the nature, limits and morality of warfare. Students study the general frameworks for evaluating warfare in the theories of realism, pacifism and just war, and then turn to the evaluation of historical case studies concerning when it is just to initiate war, how war is to be conducted justly once it is initiated, and the obligations of combatants following war. Readings include both historical authors, such as Thucydides and Thomas Aquinas, and contemporary theorists, such as Michael Walzer and Jeff McMahan.
Prerequisites: Take PL 101; or take 1 course from subject PL from Level 200 or 300; or PO 211; or PO 215.
Offered: Every other year, Spring

PO 315. Democratic Theory and Practice. 3 Credits.
The relationship between democratic ideas and practices in the foundation of democratic regimes and the formulation of public policy. Topics include the nature of obligations between the citizen and the community, equal rights and powers, the role of groups in policy making, the tensions between citizen identity and gender, racial and ethnic identity. Major policy issues include election reforms, racial and gender-based inequalities, the environment, and welfare and human rights in foreign policy. Students are expected to participate in group projects and discussions and do extensive analytical writing.
Prerequisites: Take PO 215 PO 216 PO 217 or PL 217.
Offered: Every Third Year, Fall
PO 317. International Law (LE 317). 3 Credits.
Students are introduced to the nature and development of international law as part of the global political system. Students explore sources of international law from treaties, custom, general principles, judicial decisions and scholarly writing. Other topics include the connection between international law and national law; the role of states and individuals; dispute resolution using arbitration and national and international court cases; use of law to manage international conflict; negotiation; and legal issues concerning shared resources.
Prerequisites: Take PO 211 or LE 101.
Offered: Every other year, Spring

PO 319. International Interventions. 3 Credits.
Why does the international community intervene in some countries and not in others during periods of civil crisis? What do these variations in the patterns of interventions tell us about the foreign policies of countries and the relations between states in the international system? Students explore answers to these and related questions by investigating the politics, history and dynamics of international interventions to address civil crises since World War II. Students examine select case studies of intervention and nonintervention to understand more fully why and when the world community responds in the context of international law, national interest and the emerging consensus around the protection and promotion of human rights.
Prerequisites: Take PO 211.
Offered: Every other year, Spring

PO 321. Comparative Government. 3 Credits.
This course presents a comparative study of political institutions, forms of governments, leaders, socioeconomic processes, development strategies, cultures and traditions in diverse political systems across time and space. Students learn about governing and political processes that explain important differences or similarities in political outcomes among countries, such as: why some countries are democracies and others are not, why some countries provide universal health care for their citizens while others do not, and why some countries experience war or economic depressions while others do not. Students examine the major theoretical, conceptual and methodological approaches that scholars have employed within the subfield of comparative politics and are trained to employ some of those skills in their own analysis and research.
Prerequisites: Take PO 211 or PO 215.
Offered: Every other year, Spring

PO 325. Political Psychology and Public Opinion. 3 Credits.
Students are introduced to the basics of polling, the social and psychological foundations of political thoughts and attitudes, and elementary techniques in data analysis. Students explore beyond descriptions of what people believe and what ideas they act upon to the psychological processes that explain why they think as they do: How susceptible are people to marketing and political persuasion? Why do people obey or disobey authorities? What are the sources of prejudice, and the triggers that explain political behavior? Students learn to be wise consumers of survey information, gaining skills in distinguishing legitimate public opinion research from pseudopolls, fundraising and soliciting under the guise of survey research.
Prerequisites: Take PO 131 or PS 101.
Offered: Every other year, Spring

PO 331. Topics in Comparative Government. 3 Credits.
This course provides an in-depth examination of government institutions and practices, social and political forces and movements, and cultural traditions in particular regions of the world, such as Asia, Africa, Middle East, Latin America and Europe.
Prerequisites: Take PO 211.
Offered: As needed, All

PO 333. Middle Eastern History and Politics. 3 Credits.
This course is designed to explore both historical and contemporary political and socioeconomic developments in the Middle Eastern region. The course begins with a historical review of the demise of the Ottoman Empire, the anti-colonialist revolt, the emergence of Israel, secular nationalism, the rise of Islamism, and the post-Islamist era. The focus of the course then shifts to an examination of such issues as geopolitics, oil, the Palestinian-Israeli conflict, peace process, Persian Gulf wars, the great-powers' involvement and their interests in this area, terrorism, and globalization and its impact in the region.
Prerequisites: Take PO 211.
Offered: Every Third Year, Spring

PO 334. Topics in African Politics. 3 Credits.
Students study the broad scope of politics taking place on the African continent, while investigating the unique cultural and historical heritage of African societies including colonialism and the challenges of creating independent states, and the more recent history of conflict that has inhibited development in so many countries. Students also study post-conflict reconciliation and development in the African context, including economic growth and the bright future that is possible if African countries can solve their most serious problems and remain free of conflict.
Prerequisites: Take PO 211.
Offered: Every Other Year, Fall

PO 335. Politics of Race and Ethnicity. 3 Credits.
What lessons can be drawn from recent political events such as the election of the first Indian-American governor, the first African-American president and the appointment of the first Latina to the Supreme Court? The story of American political development has been one of constant invention and reinvention. Central to the story has been the role of individual and collective identities in shaping what it means to be an American citizen. With political history as a context, students examine the political presence of major ethnic and racial communities in the U.S.—Irish, Italian, Asian, Jewish, Native, African-American and Latino. Key policy issues such as immigration, education and affirmative action provide the focal point for exploring the processes of group formation, identity and political mobilization as expressed through protest, pop culture, economic development, political participation and the building of community institutions and networks.
Prerequisites: Take PO 101 or PO 131.
Offered: Every other year, Spring

PO 337. Human Rights: Theory and Practice (PL 337). 3 Credits.
Students address the philosophical fundamentals of human rights while emphasizing the practical aspects of human rights work, the purpose being to understand the ways in which human rights scholars, activists and international and governmental officials argue about human rights and their implementation.
Prerequisites: Take PL 101; or Take one course from subject PL from level 200 or 300; or PO 211; or PO 215.
Offered: Every other year, Fall
PO 342. Comparative Constitutional Law (LE 342). 3 Credits.
Students compare the legal structures and fundamental principles typically found in constitutions by studying the constitutions of several different countries. The course explores the structure of government; the distinction between legislative, executive and judicial authority; the incorporation of fundamental human rights; the relationship between church and state, free speech and the press, and social welfare rights. Participants analyze the distinction between constitutional law and domestic law and assess the role of various constitutional frameworks in a global society.
Prerequisites: Take PO 131 or PO 211 or LE 101.
Offered: Every other year, Spring

PO 348. Political Communication. 3 Credits.
Students investigate the politics of communication in America and the uses of communication in politics. Topics include the technological nature of the mass media in the global and U.S. political economy, implications for democracy of the new communication technologies, the agenda setting function of mass media, political rhetoric and persuasion in the information age, and the role of propaganda in peace and war. Students learn critical analysis of media messages, how to deal with communication from different cultures, and skills in the use of information technology. Students write analytical papers and complete a substantial research project.
Prerequisites: Take PO 131.
Offered: Every other year, Fall

PO 353. American Constitutional Law (LE340). 3 Credits.
This course presents an intensive study of the development of constitutional law through the analysis of significant Supreme Court decisions. Topics include: the judicial process and the Supreme Court; Federalism, the states and the division of powers; the basis of national power, taxation, commerce and sovereignty; the separation of powers; the Judiciary, Congress and the Presidency; interstate relations and national supremacy; the electorate; citizenship and the right to vote.
Prerequisites: Take PO 131 or 6 credits from subject LE.
Offered: Every other year, Fall

PO 354. Civil Rights and Civil Liberties. 3 Credits.
This course considers the Bill of Rights and its ratification, the Fourteenth Amendment, and competing theories for interpreting these texts. Topics to be discussed as a class include: freedom of expression, freedom of speech, the press, religion, and assembly; the establishment clause and the separation of church and state; fundamental rights, substantive due process and the right to privacy; the Fifth, Ninth and Fourteenth Amendments; the equal protection clause and three standards of Supreme Court review; the incorporation doctrine; suspect classifications, race discrimination and discrimination against women, sexual minorities, and the poor; the power to protect individuals and affirmative action.
Prerequisites: Take PO 131 or LE 101.
Offered: Every other year, Spring

PO 360. Topics in American Politics. 3 Credits.
This advanced course on a specially selected topic in American politics or public policy examines the relationships between public issues and political institutions. Topics may focus on policy analysis, political parties, interest groups, public opinion, Congress, the Presidency and the courts. Course requires class participation and numerous research or writing assignments.
Prerequisites: Take PO 131.
Offered: Every other year, Spring

PO 360H. Honors Topics in American Politics. 3 Credits.
A seminar designed for students in the university honors program and political science honors students. This advanced course on a specially selected topic in American politics or public policy examines the relationships between public issues and political institutions. Topics may focus on policy analysis, political parties, interest groups, public opinion, Congress, the Presidency and the courts. Course requires class participation and numerous research or writing assignments.
Prerequisites: Take PO 131 and one 200-level political science course or department approval.
Offered: As needed, All

PO 362. Presidential Election Campaigns (SL: Service Learning). 4 Credits.
This advanced seminar combines intensive campaigning fieldwork and academic study of presidential campaigns and electoral processes. Students evaluate the emerging efforts to reform the electoral process and the campaign financing system, analyze new techniques of communication and persuasion, explore the history of the current presidential nomination and election process, voter behavior and psychology, research new campaign management techniques, and the practical essentials of grassroots activism. As part of the course requirements, students participate in an intensive internship for approximately 15 days in residence at the New Hampshire primary. Students must pay a course fee to cover the cost of the class residency in New Hampshire. Two field trips occur during the semester from Friday to Sunday, and some of the residency occurs during the January term.
Prerequisites: Take PO 131 or PO 231.
Offered: Every Third Year, Fall

PO 365. Inside Washington, D.C. 3 Credits.
In this intensive, two-week seminar in Washington, D.C., students interact with well-known speakers from government, the media and academia to discuss the current major issues confronting Congress and the President. In the second week, students confront dilemmas regarding how the media covers national politics and policy. Students participate in daily site visits, tours and special events. They engage with topics such as the impact of national elections, the nature of conflict and bargaining in political institutions, foreign policy dilemmas, the gatekeeper function of the media, “spin” and media control, media bias and the rise of new media. Eight-hour days are the minimum expectation during the two-week program. Students must apply for the course through the QU in DC program and meet university academic achievement standards to be admitted to the seminar.
Prerequisites: Departmental approval of application through QU in DC program.
Offered: Every year, Spring

PO 370. State and Local Government. 3 Credits.
The role of states in the federal system is analyzed. Structure and problems of state and local governments are examined. Topics include state and local public policymaking, state and municipal finance, elections, education, economic development and sociopolitical implications of urban change.
Prerequisites: Take PO 131.
Offered: Every year, Spring
PO 387. Women and Public Policy (WS 387). 3 Credits.
Students examine the major public policy issues affecting gender relations in the United States today, including: reproductive rights and abortion, labor policy, welfare policy, sexual and domestic violence. Students discover the process by which issues of importance to gender equality have historically emerged on the public agenda, the ways in which policy debate is shaped once an issue becomes a public problem and the competing policy paradigms surrounding these controversial policy issues. Given the possible trauma associated with the topics of this class, students need to use their discretion in signing up to take this class.
Prerequisites: Take PO 131 or WS 101.
Offered: Every other year, Spring

PO 395. Advanced Internship. 3-9 Credits.
This advanced internship requires students to complete more than 100 hours of on-site work; keep a field journal; complete a final report that summarizes activities and documents what the internship contributed to student learning in political science; and complete a research paper at least 10 pages in length, based on research relevant to the internship duties and done during the semester of the internship.
Prerequisites: Take PO 131.
Offered: Every year, All

PO 395H. Honors Advanced Internship. 3-6 Credits.
This advanced internship requires students to complete more than 100 hours of on-site work; keep a field journal; complete a final report that summarizes activities and documents what the internship contributed to student learning in political science; and complete a research paper at least 10 pages in length, based on research relevant to the internship duties and done during the semester of the internship.
Prerequisites: Take PO 101 or PO 211 or PO 131.
Offered: As needed

PO 399. Independent Study in Political Science. 1-10 Credits.
This independent study is directed by a faculty member with background in the student's area of research. Students are required to complete a series of papers (minimum of three to five pages) during the course of a semester, or a single research paper (15 to 20 pages).
Offered: Every year, All

PO 408. Senior Seminar. 3 Credits.
This is a capstone course for senior political science majors. Students integrate prior learning with a seminar topic announced each year, and prepare and present original research to their peers in the form of a senior thesis, related to a common seminar theme announced each year. The seminar allows students to apply the knowledge and methodology they have learned in previous courses to a particular project.
Prerequisites: Take PO 303; Political Science majors with senior status.
Offered: Every year, Spring

PO 497. TWC QU in DC Semester. 6-16 Credits.
Students are registered by arrangement for credits during their QU in DC semester program at Quinnipiac's institutional partner, The Washington Center (TWC). Fall and Spring QU in DC students earn 16 credits; Summer students earn 6 to 9 credits. Upon successful completion of the program in Washington, D.C., credit for specific courses and internships is recorded in the student's academic transcript.
Prerequisites: Approval for participation by Director of QU in DC.
Offered: Every year, All

PO 498. WMI QU in DC Semester. 6-16 Credits.
Students are registered by arrangement for credits during their QU in DC semester program at Quinnipiac's institutional partner, The Washington Media Institute (WMI). Fall and Spring QU in DC students earn 16 credits; Summer students earn 6 to 9 credits. Upon successful completion of the program in Washington, D.C., credit for specific courses and internships is recorded in the student’s academic transcript.
Prerequisites: Approval for participation by Director of QU in DC.
Offered: Every year, All

PO 499. AU QU in DC Semester. 3-16 Credits.
Students are registered by arrangement for credits during their QU in DC semester program at Quinnipiac's institutional partner, American University (AU). Fall and Spring QU in DC students earn 16 credits; Summer students earn 6 to 9 credits. Upon successful completion of the program in Washington, D.C., credit for specific courses and internships is recorded in the student's academic transcript.
Prerequisites: Approval for participation by Director of QU in DC.
Offered: Every year, All

Psychology (PS)

PS 101. Introduction to Psychology. 3 Credits.
Students are introduced to the background and breadth of contemporary psychological science. Five perspectives on the study of psychology form the basis for topics within the course, these include the biological, cognitive, social, developmental and scientist-practitioner perspectives. The course emphasizes psychology's philosophical origins, its research methods, and the relationship of the discipline of psychology with other areas of inquiry. A minimum grade of C- is required in this course to advance to any 200-level PS course.
Offered: Every year, All
UC: Social Sciences

PS 101H. Honors Introduction to Psychology. 3 Credits.
Students are introduced to the background and breadth of contemporary psychological science. Natural science, social science and applied science form the basis for topics within the course such as psychology's philosophical origins, its research methods, the study of learning, neuroscience, issues in mental illness, child development and the application of psychology to contemporary social issues. A minimum grade of C- is required in this course to advance to any 200-level PS course.
Offered: As needed

PS 199. Independent Study. 1 Credit.

PS 200. Special Topics in Psychology. 3 Credits.
Offered in response to special demands and conditions. See current announcements at time of registration (available on request at psychology department office).
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed

PS 206. Introduction to Statistics in Psychology. 3 Credits.
This course covers statistical concepts and procedures as they apply to psychology. Students learn to perform statistical tests using both calculators and SPSS. Topics include: descriptive statistics, Z scores, t-tests, chi-square, correlation and analysis of variance. For Psychology and Behavioral Neuroscience majors only. Minimum grade of C- is required to pass.
Prerequisites: Take PS 101; Minimum grade C-; and MA 110 MA 140 MA 141 MA 151 or MA 170.
Offered: Every year, Fall and Spring
PS 210. Human Sexuality (WS 210). 3 Credits.
This course focuses on human sexuality, including the physiological, psychological and social aspects of sexuality. Students are encouraged to consider diverse perspectives, e.g., in sexual orientation, experiences, beliefs and behaviors. Additional course topics include: domestic violence, abuse, sexual assault and harassment.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: Every year, Fall and Spring
UC: Social Sciences, Intercultural Understand

PS 232. The Concept of Personality and Its Development. 3 Credits.
Personality is viewed from a variety of perspectives, including theories of its formation, social functioning and human evolution. Certain theories are examined, as are philosophical implications underlying diverse models of the nature of personality.
Prerequisites: Take PS 101; Minimum grade C-.
Offered: Every year, All
UC: Social Sciences

PS 233. Cognitive Psychology. 3 Credits.
Cognition is studied from a multi-method perspective with an emphasis on information-processing. Topics include models of memory, memory distortion, perception, expertise, cognitive neuroscience, imagery, problem solving, language and cognitive development. The interrelationship between applied and basic research is emphasized.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: Every year, Fall and Spring

PS 233H. Honors Cognitive Psychology. 3 Credits.
Cognition is studied from an information-processing perspective. Topics include: models of memory, memory distortion, perception, expertise, cognitive neuroscience, imagery, problem solving, language and cognitive development.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed

PS 234. Adult Development & Aging (GT 234). 3 Credits.
Facts, theory and current issues in adult development and aging are covered in this course, which focuses on physical, cognitive and psychosocial development as well as family and career patterns.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: Every year, Fall and Spring
UC: Social Sciences

PS 236. Child and Adolescent Development. 3 Credits.
Prenatal period, infancy, early childhood, middle childhood and adolescence are surveyed in terms of an individual's physical, cognitive and social/emotional development. Students learn about the major theories and research methods used by developmental psychologists. Results of research studies are used to think about real-world applications.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: Every year, Fall and Spring
UC: Social Sciences

PS 236H. Honors Child and Adolescent Developmental Psychology. 3 Credits.
This course provides an overview of development from conception through adolescence focusing on an individual's physical, cognitive and social/emotional development. Students learn not only about the milestones of development but about the major theories and research methods used by developmental psychologists. Results of research studies are used to think about real-world applications.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed

PS 242. School Psychology. 3 Credits.
Theoretical and pragmatic concerns of the school psychologist are considered. Topics include child development, psychoeducational assessment, applied behavior analysis, special education legislation, and the role of the public schools as a social institution. Identification and treatments of various school-related exceptionalities such as learning disabilities, speech and language disorders, autism, ADHD and giftedness are investigated.
Prerequisites: Take PS 101; Minimum grade C-.
Offered: As needed

PS 244. Psychology of Prejudice. 3 Credits.
This course presents an analysis of intergroup discrimination and prejudice. The focus is on group and individual determinants of factors that produce this social phenomenon. Insights from disciplines of history, economics and sociology are included, as well as an overview of the successes and failures of the theories and programs to reduce prejudice.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed

PS 250. Parenting Science. 3 Credits.
This course surveys research topics that pertain to effective parenting, such as parental discipline practices, and the effects of media on development. Research is drawn from fields such as developmental psychology, cognitive psychology, abnormal psychology and anthropology.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed

PS 251. Introduction to Conditioning and Learning. 3 Credits.
This course introduces students to the history, philosophical bases and contemporary issues in respondent and operant conditioning in particular and in learning in general. It surveys current applications of basic theory and research including behavior modification, and examines the social controversy generated by applications.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed

PS 252. Physiological Psychology. 3 Credits.
This course is an introduction to the interactions between biological and psychological processing that are the basis for emotion, cognition and behavior. Topics include research methods, brain structure and function, neural plasticity, sleep, learning, memory, reproduction, drug action, sensation, perception and psychological disorders.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: Every year, All

PS 254. Psychology of Close Relationships. 3 Credits.
Both familial and non-familial close relationships are examined. Topics such as love, friendship, living together, marriage, relationship maintenance and relationship dissolution are covered. Theories and research in each of these areas are read and discussed. The course aims to increase students' awareness of the issues and conflicts that affect close relationships.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed
PS 261. Social Psychology. 3 Credits.
This course examines the effect of social forces on the individual, and the role of the situational context in human behavior. Topics include attitudes and behavior, issues in social cognition, attributions, helping behavior, interpersonal relationships, group dynamics, aggression, stereotypes, cross-cultural psychology, and aspects of social psychology and law.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: Every year, Fall and Spring
UC: Social Sciences

PS 261H. Honors Social Psychology. 3 Credits.
This course examines the effect of social forces on the individual, and the role of the situational context in human behavior. Topics include attitudes and behavior, issues in social cognition, attributions, helping behavior, interpersonal relationships, group dynamics, aggression, stereotypes, cross-cultural psychology, and aspects of social psychology and law.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed

PS 262. Psychology of Women (WS 262). 3 Credits.
In this course, students examine the complexity of gendered experiences from a psychological science perspective and explore the research regarding gender differences and gender relations. Many approaches are taken to understand gender, including biological, social, evolutionary, cognitive and cultural points of view. The goal is for students to appreciate the complexities of gender and to challenge one’s assumptions and judgments about gender.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: Every year, Fall
UC: Social Sciences, Intercultural Understand

PS 265. Industrial-Organizational Psychology. 3 Credits.
This course takes a scientist-practitioner perspective in psychology to examine the application of psychological principles and practices to business, industrial and organizational settings. The course explores the ways Industrial-Organizational (I-O) psychologists study and develop evidence-based interventions for such issues as job analysis, personnel selection, training, performance appraisal, employee attitudes, worker motivation, occupational stress and health, leadership, teams and organizational development.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: Every year, All
UC: Social Sciences

PS 272. Abnormal Psychology. 3 Credits.
Causes, description and classifications of abnormal behavior and "mental illness" are explored, along with theories of psychopathology. Both historical and contemporary approaches to understanding mental health problems and their treatment are examined, with an emphasis on evidence-based approaches to mental health care.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit
Offered: Every year, All
UC: Social Sciences

PS 272H. Honors Abnormal Psychology. 3 Credits.
Causes, description and classifications of abnormal behavior and "mental illness" are explored, along with theories of psychopathology. Both historical and contemporary approaches to understanding mental health problems and their treatment are examined, with an emphasis on evidence-based approaches to mental health care.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed

PS 283. Introduction to Forensic Psychology. 3 Credits.
Students learn about both the theoretical and applied components to the field of forensic psychology. The theoretical aspect of the course addresses criminality from a psychological perspective by examining theories of aggression, for example. Applied sections of the course explore the intersection of psychology and the legal system as well as crime scene behavioral analysis and offender profiling.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed

PS 284. Gay and Lesbian Identities and Communities (SO/WS 284). 3 Credits.
This course explores the social, socioeconomic, historical, psychological, and political factors that have contributed to our understanding of what it means to be gay or lesbian today. Psychological research on gay and lesbian identity development, the social construction of identity, and the psychological, social, and political benefits associated with "identifying" as gay or lesbian, are discussed. The course explores historical events that led to the development of gay and lesbian communities and the benefits of being involved in these communities. The course also explores how the gay and lesbian community has become more mainstream, in both positive and negative ways.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed
UC: Social Sciences, Intercultural Understand

PS 290. The Psychology of Self-Improvement: Popular and Scientific Perspectives. 3 Credits.
This course provides an introduction to the popular and scientific psychological literature related to self-improvement. Students learn about important concepts such as mindset, grit, goal-setting, procrastination, as well aspects of health psychology (e.g., sleep, nutrition, and exercise) and the importance of social relationships. Students also gain a greater facility with reading and critically evaluating different types of literature and navigating conflicting claims of self-improvement.
Prerequisites: Take PS 101.
Offered: As needed

PS 299. Independent Study in Psychology. 1-6 Credits.
Prerequisites: Take PS 101; Minimum grade C- or transfer credit.
Offered: As needed

PS 300. Special Topics in Psychology. 3 Credits.
Offered in response to special demands and conditions. See current announcements at time of registration (available on request at psychology department office).
Prerequisites: Take two courses from psychology.
Offered: As needed

PS 307. Introduction to Research Methods in Psychology with Lab. 4 Credits.
This course provides an introduction to the tools, methods and findings of classic and contemporary experimental and non-experimental psychology. Topics include logical reasoning, statistical inference, research ethics, research design and APA style report writing. Course includes both lecture and lab components. For Psychology and Behavioral Neuroscience majors. Minimum grade of C- is required to pass.
Prerequisites: Take PS 101 PS 206.
Offered: Every year, Fall and Spring
PS 308. Advanced Research Methods in Psychology with Lab.  4 Credits.
This course builds on the statistical analyses, experimental methods and nonexperimental methods learned in PS 206 and PS 307. Each section focuses on a different area of study in psychology or neuroscience. Students design, conduct, and formally present a major piece of psychological research, including statistical analysis, on a topic in that research area. Course includes both lecture and lab components. For Psychology and Behavioral Neuroscience majors only. Minimum grade of C- is required to pass.
Prerequisites: Take PS 307.
Offered: Every year, Fall and Spring

PS 309. History of Psychology.  3 Credits.
This is a course for advanced psychology majors. It covers philosophies dating back to ancient Greece. Participants review the history of scientific thought and of brain science. They trace the emergence of the science of psychology and the development of different systems of thought or theoretical perspectives within psychology. Students compare and contrast psychological perspectives in terms of how they have both deepened and limited our understanding. This course is taken in the senior year.
Prerequisites: Take PS 307.
Offered: As needed

PS 311. Tests and Measurements in Psychology.  3 Credits.
This course covers principles of test construction, standardization and validation; survey of commonly used measures of personality, psychopathology, aptitudes, interests and achievement, particular emphasis on the relationship between the testing movement and the social, political and economic context in which it is embedded.
Prerequisites: Take PS 206.
Offered: As needed

PS 325. Health Psychology.  3 Credits.
The application and contribution of psychological research and practice to the promotion and maintenance of health and the prevention and treatment of illness are explored. Topics covered include stress and illness, psychological aspects of pain, management of chronic and terminal illness, obesity, smoking and other addictive behaviors, sleep disturbances, personality factors in illness and patient-practitioner interaction.
Prerequisites: Take one 200-level psychology course.
Offered: Every year, Fall

PS 333. Advanced Cognition.  3 Credits.
Students learn how cognitive psychology has been applied both inside and outside of psychology to problems as varied as absentmindedness, learning disabilities and face recognition. Cognitive psychology has been applied to various contexts such as occupational therapy, education, athletics and law enforcement. Course goals are to deepen understanding of cognitive theories, broaden knowledge of cognitive methods and research, and sharpen awareness of the increasing impact of the field on everyday life.
Prerequisites: Take PS 233.
Offered: As needed

PS 336. Cognitive Development.  3 Credits.
This class provides an in-depth examination of cognitive development from infancy through adolescence. Topics may include the development of knowledge about physical objects, memory, language, numerical understanding and an understanding of the mind. For each topic, students discuss the results of various research studies with an emphasis on the methodologies used, various interpretations of the findings and practical applications of the work.
Prerequisites: Take PS 236.
Offered: As needed

PS 353. Research Methods in Behavioral Neuroscience.  3 Credits.
This course provides a comprehensive view of biological and physiological psychology and the methods utilized in behavioral neuroscience research. Topics may include measurement and techniques of animal behavior, ethics and guidelines associated with neuroscience research, logic of experimental design, immunohistochemistry, ELISA, neurophysiology, gross anatomy and scientific presentation skills. This is a recommended course for behavioral neuroscience majors and gives students a background to succeed in research endeavors. A minimum grade of C- is required to pass this course.
Prerequisites: Take PS 252; and PS 307 or BIO 298.
Offered: As needed

PS 354. Sensation and Perception.  3 Credits.
This course considers the sensory systems as gateways to the mind. Psychological mechanisms of vision, audition, taste, smell, pain and other senses are explored, as well as the psychophysics, anatomy and physiology of these sensory systems.
Prerequisites: Take PS 233 or PS 252.
Offered: Every year, Fall

PS 355. Advanced Psychology of Learning.  4 Credits.
This course presents an advanced study of the history, philosophical bases and contemporary issues in respondent and operant conditioning in particular, and in learning in general; a survey of current applications of basic theory and research including behavior modification; and examination of the social controversy generated by such applications. Lab accompanies the course.
Prerequisites: Take one 200-level psychology course.
Offered: As needed

PS 355L. Psychology of Learning Lab.  0 Credits.
Lab to accompany PS 355.
Offered: As needed

PS 356. Psychology of Language.  3 Credits.
This course introduces students to the scientific study of language. Topics include speech physiology, psychological processes underlying the production and comprehension of both spoken and written language, the psychological and biological milestones of language acquisition (both normal and special), theories of language evolution, cognitive neuroscience of language, and the relationship of language to other cognitive processes.
Prerequisites: Take PS 233 or PS 252.
Offered: As needed
PS 357. Drugs, Brain and Behavior. 3 Credits. This course introduces students to the effects and mechanisms of action of psychoactive drugs. Drugs used in the treatment of psychological disorders as well as drugs of abuse are covered. In addition to describing basic principles of neuropharmacology, the course covers theories of tolerance, dependence and abuse in depth. Pharmacotherapy for substance abuse and major mental disorders is described from both a biological and clinical perspective. A minimum grade of C- in PS 252 is required to take this course.  
Prerequisites: Take PS 252; Minimum grade C-.  
Offered: Every year, Spring

PS 359. Psychology Elective. 3 Credits.

PS 366. Advanced Personnel Psychology. 3 Credits. This course presents an in-depth exploration of the traditional ideas and innovations of industrial psychology. Topics include, but are not limited to: recruitment and selection of employees, development and implementation of performance appraisal systems, issues involved in training employees, employment law and labor-management relations.  
Prerequisites: Take PS 265.  
Offered: As needed

PS 367. Advanced Organizational Psychology. 3 Credits. The history and new developments within organizational psychology are examined closely. Topics include, but are not limited to: organizational theory, research and theories of leadership, leadership development, motivating employees, job attitudes, teamwork, work-family balance and workplace stress.  
Prerequisites: Take PS 265.  
Offered: As needed

PS 368. Occupational Health Psychology. 3 Credits. This course explores the history and development of research and practice in the field of occupational health psychology. Topics include, but are not limited to: stress theories and models, specific stressors and strains, safety, employee health and well-being, work schedules, the work/non-work interface and occupational health interventions.  
Prerequisites: Take PS 265.  
Offered: As needed

PS 370. Intimate Partner Violence Seminar (WS 370). 3 Credits. This seminar addresses the prevalence, causes and consequences of partner abuse. Etiological models of partner violence are examined from social perspectives (feminist, socioeconomic, anthropological and evolutionary theory), and psychological perspectives (personality disorders, perceived causes and justification of violence). The impact of violence on victims (physical and psychological consequences) is addressed. This course is cross-listed as WS 370.  
Prerequisites: Take two courses; From Subjects PS SO CJ or WS.  
Offered: As needed

PS 371. Clinical Psychology. 3 Credits. The principles and practices of clinical psychology are introduced. The course includes a review of legal-ethical issues and the training of clinical psychologists. The course focuses on methods of clinical assessment and the practice of psychotherapy, including extensive use of case studies.  
Prerequisites: Take PS 272.  
Offered: Every year, Spring

PS 372. Child Psychopathology. 3 Credits. This course provides students with an understanding of child and adolescent problems within the framework of developmental and child clinical psychology. Theoretical and methodological issues are addressed early in the course. Thereafter, the nature, etiology and treatment of a wide range of psychological disorders affecting children from infancy through adolescence is examined.  
Prerequisites: Take PS 272.  
Offered: As needed

PS 373. Positive Psychology. 3 Credits. This course reviews and evaluates recent developments in positive psychology. Historical foundations are discussed, including the work of William James and Abraham Maslow. Research on resilience, positive coping and post-traumatic growth are covered, as well as topics such as gratitude, forgiveness, compassion, happiness and mindful meditation.  
Prerequisites: Take PS 272.  
Offered: As needed

PS 382. Advanced Social Psychology. 3 Credits. Contemporary issues and topics in social psychology are examined. Content varies as the area develops and changes but has characteristically emphasized theories of attitude change, psychological effects of mass media, attribution theory, interpersonal attraction, helping behavior and psychological factors in contemporary social issues.  
Prerequisites: Take PS 261 or PS 307.  
Offered: As needed

PS 383. Psychology and the Law. 3 Credits. Psychological science offers much in understanding and reforming our legal system with empirical research regarding criminal investigations, trials, and the punishment and rehabilitation of adults and adolescents. The course explores police interrogations; the myth of deception detection; false confessions; eyewitness identifications and testimony; pseudoscientific and scientific forensic testing; judicial and jury decision making; and adolescent experiences in facilities.  
Prerequisites: Take two psychology courses.  
Offered: As needed

PS 391. Applied Clinical Science Seminar (SL: Service Learning). 3 Credits. For psychology majors in the applied clinical science concentration only. Professional, theoretical, clinical and ethical issues related to each student’s senior fieldwork experience represent the content of the course. Students are simultaneously registered in PS 393.  
Prerequisites: Take PS 371.  
Offered: Every year, Fall

PS 393. Fieldwork in Applied Clinical Science (SL: Service Learning). 3 Credits. For Psychology majors in the applied clinical science concentration only. Students are placed in a community service agency to gain supervised experience in applied clinical programs. Placements total a minimum of 120 hours during the semester, and may include youth counseling agencies, rehabilitation services, mental health clinics, research sites, centers for people with mental retardation, psychiatric hospitals, schools for special populations and others. Due to a commitment of services to clients or patients, particularly strict standards of attendance and responsibility are maintained. PS 393 is taken in conjunction with PS 391. All students in PS 393 must plan to take PS 394 in the spring semester. This course is graded pass/fail.  
Prerequisites: Take PS 371.  
Offered: Every year, Fall
PS 394. Fieldwork in Applied Clinical Science (SL: Service Learning). 3 Credits.
For psychology majors in the applied clinical science concentration only. Students are placed in a community service agency to gain supervised experience in applied clinical programs. Placements total a minimum of 120 hours during the semester, may include youth counseling agencies, rehabilitation services, mental health clinics, research sites, centers for people with mental retardation, psychiatric hospitals, schools for special populations and others. Due to a service commitment to clients or patients, particularly strict standards of attendance and responsibility are maintained. This course is graded pass/fail.
Prerequisites: Take PS 391 PS 393.
Offered: Every year, Spring

PS 397. Fieldwork in Industrial/Organizational Psychology. 3 Credits.
For psychology majors in the industrial-organizational concentration only. Students are placed in a corporation or consulting firm under the supervision of an industrial-organizational psychologist or HR manager. A minimum of 120 hours of work is required. Due to a commitment to professionalism, particularly strict standards of attendance and responsibility are maintained. This course is graded on a pass/fail basis.
Offered: As needed

PS 399. Independent Study in Psychology. 1-6 Credits.
Pursuit in depth of a specific topic or area. Topics and expected outcome must be specified in advance, groups interested in the same topic may meet together.
Offered: As needed

PS 401. Integrative Capstone for Psychology and Behavioral Neuroscience Majors. 3 Credits.
This seminar is the capstone course for Psychology and Behavioral Neuroscience seniors only. It consists of extensive readings of original research, theory and history on a topic selected by the student under the guidance of the professor. A senior thesis, written according to departmental standards, is a central part of the requirement. As a capstone course, this course must be taken as a seminar during the academic year and cannot be taken as a tutorial. Most sections are offered in the spring. Senior standing required. This course counts as the university's Integrative Capstone requirement for PS and BNS majors.
Prerequisites: Take PS 308 or PS 353.
Offered: Every year, Fall and Spring

PS 409. Senior Seminar in Psychology. 3 Credits.
This seminar is the capstone course for psychology seniors only. It consists of extensive readings of original research, theory and history on a topic selected by the student under the guidance of the professor. A senior thesis, written according to departmental standards, is a central part of the requirement. As a capstone course, this course must be taken as a seminar during the academic year and cannot be taken as a tutorial. Most sections are offered in the spring. Senior standing required.
Prerequisites: Take PS 308 or PS 353.
Offered: As needed

PS 499. Independent Study in Psychology. 1-6 Credits.
Same as PS 399 but on the senior level. Topic and objective must be specified in advance. Students limited to a maximum of six hours of independent study per year, unless warranted by exceptional circumstances.
Prerequisites: Take PS 307 PS 308.
Offered: As needed, All

QU Seminars (QU)

QU 101H. Honors Individual in the Community. 3 Credits.
This interdisciplinary seminar for first-semester freshmen focuses on the broad theme of community by welcoming students to the university learning community and challenging them to locate themselves as individuals who can reflect critically and act diligently in fulfillment of their civic and intellectual responsibilities as engaged members of the university community. This course explores questions of identity, ethics and citizenship through consideration of an individual's place, rights and responsibilities within a diverse and pluralistic community. Students consider perennial questions of human nature, the formation of individual identity and common inheritances, of how communities are formed and sustained. QU 101 also lays the groundwork for considering how students can extend their roles and responsibilities as members of the Quinnipiac University community to the national and global perspectives they will consider in QU 201 and QU 301.
Offered: Every year, Fall

QU 201H. Honors National Community. 3 Credits.
This interdisciplinary seminar for sophomores/juniors builds on experiences and learning from QU 101 and focuses on the major themes and concepts that structure life in the cultures of the pluralistic American community. The course challenges students to critically examine what it means to assume a role of informed citizenship and leadership in the United States. The topics can range from social media to spirituality, from bioethics to refugee narratives, depending on the specialty of the instructor. All sections address the common course questions: 1) What is the meaning of community in a national context? 2) What is the effect of individualism on our concept of national community and citizenship? and 3) What is the effect of our pluralistic and multicultural heritage on our concept of national community and citizenship?
Offered: As needed, Fall and Spring

QU 301H. Honors Global Community. 3 Credits.
This interdisciplinary seminar for juniors/seniors builds on experiences and learning from QU 101 and QU 201 and focuses on the political, social, cultural, ecological and economic systems that define the global community. The course challenges students to critically examine what it means to assume a role of informed citizenship and leadership in a global community. The topics can range from the Middle East to Oceanic America, from health care to understanding and combating poverty, depending on the specialty of the instructor. All sections address the common course questions: 1) What is the global community? 2) What is your investment in the global community? and 3) How do you/we balance personal allegiance or affiliation with membership in the global community?
Offered: Every year, Fall and Spring

QU 400. Integrative Capstone Experience. 3 Credits.

QU 410. Integrative Capstone. 3 Credits.
Offered: Every year, Fall and Spring

QU 420. Integrative Capstone. 3 Credits.
Offered: Every year, Fall and Spring

QU 430. Integrative Capstone. 3 Credits.
Offered: Every year, Fall and Spring

QU 440. Integrative Capstone. 3 Credits.
Offered: Every year, Fall and Spring
Radiologic Sciences (RS)

RS 100. Fundamentals of Diagnostic Imaging. 1 Credit.
This course provides the student with a basic knowledge of the fundamentals of diagnostic imaging practice. Topics include defining diagnostic imaging as it relates to all imaging modalities, historical development of the profession, introduction to current and emerging practice arenas, and application of professional terminology. Students complete a self-study in medical terminology.
Offered: Every year, Fall

RS 101. Introduction to Diagnostic Imaging. 3 Credits.
Designed to provide an orientation to radiologic sciences, this course includes history, ethics and basic principles of radiation protections, medical and medicolegal terminology, as well as preclinical observation.
Prerequisites: Take RS 100.
Offered: Every year, Spring

RS 201. Human Anatomy Imaging I. 1 Credit.
This course presents in-depth consideration of human anatomy within systems located in the chest, abdomen and upper extremity of the body. Students discuss the structure and function of each anatomic component within each region. Conventional anatomic illustrations are correlated with their radiographic counterpart. The radiographic appearance of specific structures as demonstrated on conventional radiographic images is correlated to images obtained using other advanced imaging modalities such as computed tomography, magnetic resonance and sonography.
Prerequisites: Take BIO 212 BIO 212L RS 222.
Corequisites: Take RS 232.
Offered: Every year, Fall

RS 202. Human Anatomy Imaging II. 1 Credit.
This course presents in-depth consideration of human anatomy within systems located in the head, neck, pelvis and lower extremity. For each region, students discuss the structure and function of each anatomic component. Conventional anatomic illustrations are correlated with their radiographic counterpart. The radiographic appearance of specific structures as demonstrated on conventional radiographic images is correlated to images obtained using other advanced imaging modalities such as computed tomography, magnetic resonance and sonography.
Prerequisites: Take RS 201.
Offered: Every year, Spring

RS 212. Radiographic Procedures I. 2 Credits.
This course introduces the student to the basic concepts, principles and applications of radiographic and radiologic procedures. Additional applications related to orthopaedic terminology, pathologies and procedures, trauma and patient-related modifications also are presented.
Prerequisites: Take RS 101 MA 275 and BIO 102.
Corequisites: Take RS 212L.
Offered: Every year, Fall

RS 212L. Laboratory Practicum I. 2 Credits.
This practicum develops preclinical competency in radiographic procedures studied in RS 212, as well as routine hospital procedures and radiographic tasks, basic radiographic analysis, patient management, communications and manipulation of imaging equipment.
Corequisites: Take RS 212.
Offered: Every year, Fall

RS 215. Radiation Safety and Protection. 3 Credits.
Students are introduced to the effects of ionizing radiation on biological systems at the molecular, cellular, organism, and community levels, with emphasis on medical implications and radiation protection.
Prerequisites: Take RS 260.
Offered: Every year, Spring

RS 222. Radiographic Procedures II. 3 Credits.
This course builds on the foundations developed in RS 212. This course provides continued integration and expansion on the concepts, principles and applications of radiographic and radiologic procedures.
Prerequisites: Take RS 212.
Corequisites: Take RS 222L.
Offered: Every year, Spring

RS 222L. Laboratory Practicum II. 2 Credits.
Designed to develop preclinical competency in radiographic procedures studied in RS 222, this practicum focuses on radiographic tasks, basic radiographic analysis, patient management, communications and manipulation of imaging equipment.
Prerequisites: Take RS 212.
Corequisites: Take RS 222.
Offered: Every year, Fall

RS 232. Radiographic Procedures III. 3 Credits.
This course provides continued integration and expansion on the concepts, principles and applications developed in RS 212 and RS 222.
Prerequisites: Take RS 222.
Corequisites: Take RS 232L.
Offered: Every year, Fall

RS 232L. Laboratory Practicum III. 2 Credits.
This practicum is designed to develop preclinical competency in routine hospital procedures and radiographic tasks, basic radiographic analysis, patient management, communications and manipulation of imaging equipment.
Prerequisites: Take RS 222.
Corequisites: Take RS 232.
Offered: Every year, Fall

RS 241. Radiographic Image Production and Evaluation. 3 Credits.
This course presents the basic principles, concepts and practical applications of radiographic image production and diagnostic quality. Topics include radiation production, description and proper selection of exposure factors, radiation protection, imaging media, imaging equipment and basic imaging formulas.
Prerequisites: Take RS 101 MA 275 and BIO 102.
Corequisites: Take RS 241L.
Offered: Every year, Fall

RS 241L. Radiographic Image Production and Evaluation Lab I. 1 Credit.
The laboratory, which accompanies RS 241, is designed to demonstrate and reinforce the concepts and principles presented in class. (2 lab hrs.)
Corequisites: Take RS 241.
Offered: Every year, Fall

RS 242. Radiographic Image Production and Evaluation II. 3 Credits.
This course expands on the foundations developed in RS 241. Integration and application of these foundations includes the development of exposure charts, methods of image processing, and the causation and identification of image artifacts. The course also incorporates quality control concepts and testing, and introduces basic terminology and principles of quality control and digital imaging systems.
Prerequisites: Take RS 241.
Corequisites: Take RS 242L.
Offered: Every year, Spring
RS 242L. Radiological Processing and Exposure Lab.  1 Credit.  
This laboratory, which accompanies RS 242, is designed to demonstrate and reinforce the concepts and principles presented in class. (2 lab hrs.)  
Corequisites: Take RS 242.  
Offered: Every year, Spring

RS 250. Radiologic Clinical Education I.  2 Credits.  
Students are provided with their initial clinical experience under the supervision of certified clinical instructors and clinical staff. Focus is on developing clinical competency and proficiency related to radiologic procedures and concepts taught in RS 212 and RS 241.  
Prerequisites: Take RS 212 RS 241.  
Corequisites: Take RS 222 RS 242.  
Offered: Every year, Spring

RS 253. Radiologic Clinical Education II.  4 Credits.  
This course, a continuation of RS 250, is a 12-week, 35 hour-per-week summer clinical experience under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of radiographic procedures and concepts are continually developed and assessed.  
Prerequisites: Take RS 250.  
Offered: Every year, Summer

RS 254. Radiologic Clinical Education IV.  3 Credits.  
This course, a continuation of RS 253, is a clinical experience under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of radiographic procedures and concepts are continually developed and assessed.  
Prerequisites: Take RS 253.  
Corequisites: Take RS 232.  
Offered: Every year, Fall

RS 255. Radiologic Clinical Education.  3 Credits.  
This clinical experience is under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of radiographic procedures and concepts are continually developed and assessed.  
Prerequisites: Take RS 254.  
Corequisites: Take RS 290.  
Offered: Every year, Spring

RS 260. Radiographic Physics and Instrumentation.  3 Credits.  
This course presents an analysis of the production of X-rays and the interaction of radiation with matter, units of radiation measurements and radiation protection.  
Prerequisites: Take RS 242.  
Offered: Every year, Fall

RS 290. Advanced Radiographic Procedures IV.  3 Credits.  
This course provides continued integration and expansion on the concepts, principles and applications developed in RS 232. Students are introduced to the basic principles of CT, DEXA, MRI and mammography.  
Prerequisites: Take RS 232.  
Corequisites: Take RS 290L.  
Offered: Every year, Spring

RS 290L. Laboratory Practicum.  1 Credit.  
This practicum is designed to develop preclinical competency in routine hospital procedures and radiographic tasks, basic radiographic analysis, patient management, communications and manipulation of imaging equipment.  
Prerequisites: Take RS 232.  
Corequisites: Take RS 290.  
Offered: Every year, Spring

RS 297. Methods of Patient Care.  2 Credits.  
This course focuses on a study of skills in providing humanistic care for the well, acute or chronically ill individual, including preparing patients for invasive as well as non-invasive imaging studies; basic clinical skills in infection control, including aseptic technique, venipuncture, vital signs and O2 administration; effective communication with emphasis on problem-solving skills.  
Prerequisites: Take RS 101.  
Corequisites: Take RS 297L.  
Offered: Every year, Spring

RS 297L. Methods of Patient Care Lab.  1 Credit.  
This lab develops preclinical competency for the procedures described and demonstrated in RS 297. (2 lab hrs.)  
Prerequisites: Take RS 297.  
Offered: Every year, Spring

RS 299. Independent Study.  1-4 Credits.  
This course presents the student with an opportunity to expand his or her professional expertise in areas that enhance managerial or research capabilities.  
Offered: As needed

RS 318. Pathology for Imaging Sciences.  3 Credits.  
This course provides an introduction to the basic study of disease, including etiology, pathophysiology and current diagnostic procedures. Normal structure and function are reviewed prior to the discussion of each anatomic system.  
Prerequisites: Take RS 222 BIO 212.  
Offered: Every year, Fall

RS 336. Pharmacology for the Radiographer.  2 Credits.  
The major classifications/categories, clinical applications and implications of pharmaceuticals used in diagnostic imaging and interventional procedures are presented.  
Prerequisites: Take RS 297.  
Offered: Every year, January Term

RS 352. Radiologic Clinical Education.  2 Credits.  
This clinical experience is under the supervision of certified clinical instructors and clinical staff. Clinical competency and proficiency related to the performance of radiographic procedures and concepts are continually developed and assessed.  
Prerequisites: Take RS 255.  
Offered: As needed

RS 399. Independent Study.  1-3 Credits.  
This independent study is designed to provide the student with an opportunity to expand his or her professional expertise in areas that enhance teaching, managerial or research capabilities. The study may consist of either advanced clinical experience or literature research or both.  
Offered: As needed, All

RS 414. Research: Analysis and Critique (DMS 414).  3 Credits.  
This course explores the basic elements of health care research including different types of research models and research strategies. Students explore the differences between a variety of publication types, including editorials, case studies and peer-reviewed research articles. Students also learn techniques for database queries.  
Prerequisites: Take RS 101.  
Offered: Every year, Fall

RS 489. Independent Study.  1-6 Credits.  
Offered: As needed, All
RS 491. Open Topic.  
The course presents a current topic in diagnostic imaging.  
Offered: As needed

RS 493. Open Topic.  
The course presents a current topic in diagnostic imaging.  
Offered: As needed

RS 499. Capstone (DMS 499).  
This capstone course is intended for radiologic sciences majors and diagnostic medical sonography majors in their final semester. Students are required to develop a research project as it relates to the field of diagnostic imaging. The project may relate to the student's chosen focus and must include either a formal thesis paper or poster presentation.  
Prerequisites: Take RS 414.  
Offered: Every year, Spring

Science (SCI)

SCI 102. Earth Sciences.  
This course provides an introduction to the methods of science. Students study the physical, chemical, and biological processes that combine to produce geological processes with attention focused on plate tectonics, Earth surface processes, climate change, and planetary geology. This course is designed for nonscience majors.  
Corequisites: Take SCI 102L.  
Offered: Every year, All
UC: Natural Sciences

SCI 102L. Earth Sciences Lab.  
Lab must be taken with SCI 102. (2 lab hrs.)  
Corequisites: Take SCI 102.  
Offered: Every year, All
UC: Natural Sciences

SCI 105. Chemistry and Nutrition.  
Students study the fundamental chemistry and nutritional role of food components including carbohydrates, fats and proteins, as well as the importance of vitamins and minerals in the diet. Students learn about recent developments in nutrition and how nutrition research is conducted. Students apply these concepts to analyze and improve their own diets. Students may not receive credit for both SCI105 and SCI161.  
Corequisites: Take SCI 105L.  
Offered: Every year, Fall and Spring
UC: Natural Sciences

SCI 105L. Chemistry and Nutrition Lab.  
Lab must be taken with SCI 105. (2 lab hrs.)  
Corequisites: Take SCI 105.  
Offered: Every year, Fall and Spring
UC: Natural Sciences

Students study the fundamental chemistry and nutritional role of food components including carbohydrates, fats and proteins, as well as the importance of vitamins and minerals in the diet. Students learn about recent developments in nutrition and how nutrition research is conducted. Students apply these concepts to analyze and improve their own diets. Students may not receive credit for both SCI161 and SCI105.  
Offered: Every year, All
UC: Natural Sciences

Students investigate the Earth's environmental systems and the impact of human activity (ecological footprint) on the planet through the study of renewable and nonrenewable resources, toxic substances in the soil, water and the atmosphere, the impact of pollution on the hydrological cycle, ozone depletion, ground water contamination, and the causes of global climate change. Students examine efforts being made to protect the Earth's environment and to promote sustainable strategies to solve the problems of economic, political and social policies, which impact all of Earth's resources. Enrollment in this course is restricted to students in online BS degree completion programs. This course is offered online only.  
Offered: Every year, Fall and Spring

Sociology (SO)

SO 101. Introduction to Sociology.  
Our society and culture influence who we are, how we feel about ourselves, and how we interact with others. This course investigates the ways in which our social institutions such as the family, the government, politics, religion, health care and others shape our experience. Students also look at the ways in which gender, sexuality, race/ethnicity and social class affect their life. The differences that characterize a stratified society in opportunity, reward, achievement and social class are discussed.  
Offered: Every year, All
UC: Social Sciences

SO 101H. Honors Introduction to Sociology.  
Our society and culture influence who we are, how we feel about ourselves, and how we interact with others. This course investigates the ways in which our social institutions such as the family, the government, politics, religion, health care and others shape our experience. Students also look at the ways in which gender, sexuality, race/ethnicity and social class affect their life. The differences that characterize a stratified society in opportunity, reward, achievement and social class are discussed.  
Offered: All
UC: Social Sciences

SO 201. Sociological Theory.  
This course helps students develop a working knowledge of theory and understand its relevance in other sociological courses they will take. In part, it examines Freud's depiction of the human condition as an epic battle between our individual selfish drives and society's overbearing shame, Marx's claim that revolution is inevitable, Weber's belief that we have sacrificed the human spirit at the altar of efficiency, Mills' claim that we have become cheerful robots in a machine-like society, and Baudrillard's thesis that truth has been murdered in the perfect crime.  
Prerequisites: Take SO 101 or SO 101H.  
Offered: Every year, Fall
UC: Social Sciences

SO 205. From College to Career (CJ/GT 205).  
This course introduces sociology, gerontology and criminal justice majors to the preprofessional skills and knowledge they need to practice prior to obtaining their internship. Students also are introduced to practical skills that will benefit them throughout their professional careers ranging from self-reflection to resume writing and email etiquette. Students meet regularly to discuss the breadth of potential careers in sociology, criminal justice and gerontology through interaction with departmental faculty and practitioners in the field. For sociology majors only. This course is graded on a pass/fail basis.  
Offered: Every year, Spring
SO 225. Social Problems. 3 Credits.
What is a social problem? How does something become defined and recognized as a social problem? In this course, students debate what is meant by the terms "social" and "society" and the relationships, benefits and duties that shape our lives, both locally and globally. What are the major problems facing society today? Why do we think these things are problematic? What are their consequences? How can we effectively address social problems? Students explore these questions through reading and researching topics such as race, class, family, violence, immigration and the environment. In discussing these and other issues, students develop their sociological imaginations, learning how to see their individual lives as connected to patterns in the larger social world.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall and Spring
UC: Social Sciences

SO 232. Women in the Criminal Justice System (CJ/WS 232). 3 Credits.
This course examines the changing patterns of women's criminality, the experiences of women who are processed as crime victims, and the evolution of women's role in law, law enforcement and corrections.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Spring
UC: Social Sciences

SO 235. American Culture and Society: The 1950s-1980s. 3 Credits.
The course examines what it means to be an American. Students explore the structure of American culture and discuss more specific American cultural manifestations in areas such as love, consumerism, childhood and sport. These topics are covered via an assessment of the health versus pathology of American culture. Course material is rooted in sociological literature within the field of culture and personality.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Summer

SO 238. Sociology Through Film. 3 Credits.
This course is an examination of American society through film viewing, academic reading and discussion. Historically, film has been used to depict American culture as distinct from other cultures, socialize American children, represent the individual in American family life, religion and education, and to create cultural representations of gender and race. Each of these themes is examined, and the course concludes with an analysis of the concepts of social class and corporate power and as conveyed through film.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall

SO 241. Sociology of Race and Ethnicity. 3 Credits.
The impact of ethnic and racial identity in the United States is examined with particular consideration of the processes of prejudice and discrimination, social class identity and mobility, and the distribution and exercise of social, economic and political power.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall and Spring
UC: Social Sciences

SO 244. Social Stratification. 3 Credits.
This course examines systems of inequality and how they grow out of, and are reinforced by, both structural and cultural factors. Topics include: social class, race, ethnicity, gender, sexuality, the interrelationships of all of these as forces of stratification, and how they are manifested in societal institutions such as the economy, the educational system and the criminal justice system.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall and Spring
UC: Social Sciences, Intercultural Understand

SO 250. Youth Crime (CJ 250). 3 Credits.
This course deals with youth crime as distinct from adult offending. Students examine the development of the juvenile delinquency concept and justification for classifying juvenile offenders as separate from adults. Factors contributing to the onset of juvenile delinquency and relevant research also are examined. The course considers development and current functions of the juvenile justice system, paying particular attention to the challenges justice officials face daily. A range of widely used treatment strategies for dealing with juvenile offenders is examined.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall
UC: Social Sciences, Intercultural Understand

SO 255. Sociology of Families (WS 255). 3 Credits.
In this introductory course, students critically examine families in the U.S., both historically and in the current day. Topics include the ways in which families have evolved over time and the effect of economic and social factors (such as race, class and gender) on family life. Students learn about the diversity of families in other cultures and current issues facing families.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every other year
UC: Social Sciences

SO 260. Social Control and Deviance. 3 Credits.
This course covers classical and contemporary sociological theories of deviance as well as a discussion on the ways in which sociologists define the concepts of deviance and stigma. Course material covers a variety of social issues, which are situated within the intersection of deviance and race, social class, sexuality and religion. Topics include: privileged/underprivileged deviance, substance abuse and physical violence. Participants also look at the ways in which social behavior is formally and informally controlled through various sanctions and the implementation of public policies.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every other year
UC: Social Sciences, Intercultural Understand

SO 263. Sociology of Aging (GT 263). 3 Credits.
This introduction to gerontology focuses on the myths and realities of aging explored through historic, demographic and sociological analyses of the conditions of elderly people in our society. Students critically examine the diversity of aging experiences in the U.S. The ways in which social and cultural factors enter into the aging process are also considered.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall and Spring
UC: Social Sciences, Intercultural Understand

SO 264. Social Welfare Institutions. 3 Credits.
The interplay between economics, politics and the American value system is explored as well as the conflict between market determinism and social protection and regulation. Students evaluate the historical and contemporary tensions between conservative and progressive/liberal positions, values and beliefs in regard to what contributes to the well-being of American citizens as well as the role of the state. Sources of power determining our policies in regard to topics such as health, mutual safety, inequality, environment, the elderly and corporate welfare are considered.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Spring
UC: Social Sciences
SO 266. Population and Society. 3 Credits.
The components of population change—births, deaths, migration—and the importance of demographic trends for individual life changes are explored. Students also discuss the lasting effects of the Baby Boom generation, the migration to the Southwest, and changes in marriage patterns.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Spring
UC: Social Sciences, Intercultural Understand

SO 270. Program Planning and Administration (GT 270). 3 Credits.
Program planning and administration of services to the elderly are considered; as well as models of needs identification, the process of problem analysis, styles of leadership and administrative dilemmas, and elements of grant proposal writing.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every other year, Fall

SO 271. Public Order Crimes (CJ 271). 3 Credits.
Approximately two-thirds of the inmates in U.S. correctional institutions have been found guilty of public order crimes, "moral crimes," or crimes not likely to have a self-identified victim. This course concentrates on crimes associated with such activities as illegitimate gambling, consensual sex, and the criminal use and sale of both legal and illegal substances.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall

SO 272. Education and Society. 3 Credits.
Schools from kindergarten to the university as they relate to the community and the economic and political systems are considered. Also explored are the historical development of education; values imparted through education; the social process in the classroom; contemporary conflicts centering in the schools.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall
UC: Social Sciences, Intercultural Understand

SO 280. Illness and Disability. 3 Credits.
This course examines the ways in which society shapes our understanding, experience and definitions of health, illness and disease. Topics include the social factors related to disease such as age, gender and social class; the social roles of medical practitioners and patients; labeling and treatment/mistreatment of the ill and disabled; changing definitions of illness; and the politics of disability.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every other year, Fall
UC: Social Sciences, Intercultural Understand

SO 284. Gay and Lesbian Identities and Communities (PS/WS 284). 3 Credits.
This course explores the social, socioeconomic, historical, psychological and political factors that have contributed to our understanding of what it means to be gay or lesbian today. Psychological research on gay and lesbian identity development, the social construction of identity and the psychological, social and political benefits associated with "identifying" as gay or lesbian, are discussed. The course explores historical events that led to the development of gay and lesbian communities and the benefits of being involved in these communities. The course also explores how the gay and lesbian community has become more mainstream, in both positive and negative ways.
Prerequisites: Take SO 101 or SO 101H.
Offered: As needed
SO 307. Sociology of Sport (SPS 307).  3 Credits.
This course includes the analysis of sport as a social and cultural institution and the interrelations between sport and societal subsystems. Students explore selected sociocultural aspects of sport and exercise, and analyze contemporary problems associated with sport, including race relations, the tradition and emergent role of females, leisure behaviors, aggression and violence, as well as political and economic concerns.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, All

SO 308. The Immigrant Experience.  3 Credits.
For much of its history, people have come to the U.S. from other countries seeking religious freedom, political asylum or better economic opportunities. Some Americans want to restrict migration, worry that immigrants might create economic and cultural problems for the U.S. In this course, students explore questions such as: Why do people migrate? How has immigration shaped the U.S. throughout its history? How does immigration impact the American economy and culture? How has immigration policy changed over time? Using a sociological perspective, students learn what shapes the decisions and experiences of immigrants and about the impact of immigration on society.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall
UC: Breadth Elective, University Curriculum Ele

SO 310. Children: Social Issues and Policies.  3 Credits.
This course presents an overview of the social, economic and political factors that have influenced the historical and contemporary experiences of children and the child rearing process. Students examine concepts such as the effects of the changing character of the American family, educational institutions, the growing power of peer groups and of the media. The diversity of the childhood experience is considered as well as the impact of poverty, divorce, community violence, bullying, the juvenile justice system and teenage pregnancy on the welfare of American children.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall

SO 311. Introduction to Social Work (GT 311).  3 Credits.
This course provides students with an introduction to the field of social work, including its historical roots, its fundamental principles and its fields of practice. The course emphasizes an integrated overview of social work methods, skills, values, ethics and the social service delivery system. Key social work concepts and service delivery systems are illuminated from micro, mezzo and macro perspectives that reflect past and present relevant issues. Students develop an introductory understanding of how psychological and social theories influence social work practice with individuals, groups and communities.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall

SO 315. Case Management (GT 315).  3 Credits.
Case management is a process used widely throughout health and social services as a means of assessing, planning, coordinating, monitoring and evaluating the services needed to respond to an individual's health and/or service needs to attain the dual goals of quality and cost effective care. Students in gerontology, sociology, psychology, and criminal justice are likely to encounter the various roles or models of case management practice as they pursue careers in human services. This course provides a foundation for case management practice in various social service settings.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Spring

SO 317. Religion and Society.  3 Credits.
This course examines religion from a sociological perspective. The class begins with an introduction to Buddhism, Christianity, Hinduism, Islam and Judaism. The remainder of the course examines the relationship between religion and society. Students ask question such as: Are Americans becoming less religious? Do some religions cause more violence than others, and/or face more discrimination than others? How does religion shape attitudes about gender and sexuality? Can religion be a source for protest and social change? Using a sociological perspective, students learn about why religion continues to have a strong influence on social life in the modern world.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every other year
UC: Breadth Elective, University Curriculum Ele

SO 320. Sociology of Hip-Hop Culture.  3 Credits.
This course examines the formation, growth and current state of hip-hop culture through a sociological lens. Through a rigorous analysis of hip-hop, students are challenged to think critically and sociologically about the culture and its place in society and develop a clearer understanding of the history and social significance of the culture. Participants cover topics such as race, capitalism, misogyny, cultural appropriation, urban policy and feminism. This course serves as a space for students to analyze the societal structures and forces that influence the culture, as well as how hip-hop influences the world.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year
UC: Breadth Elective, University Curriculum Ele, Intercultural Understand

SO 330. Perspectives on Violence (CJ 330).  3 Credits.
This course explores the many ways that violence is viewed in our society. Topics include types of violence, empirical evidence of incidence, characteristics of violent crimes, offender motivation, victim profiles, and sociological and theoretical explanations.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Summer
UC: Breadth Elective, Intercultural Understand

SO 333. Drugs, Alcohol and Society (CJ 333).  3 Credits.
This analytical discussion-based course explores the use of drugs and alcohol in U.S. society. The emphasis is on drug and alcohol use and abuse as a social phenomenon. Students explore issues such as the relationship of drug use to particular groups in society (age, sex, race/ethnicity); patterns of drug use and abuse; the promotion of drugs by the media; and drug and alcohol abuse in historical perspective. Students also learn about drug categories, drug education, prevention and treatment and about drug laws.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Summer
UC: Breadth Elective, Intercultural Understand

SO 355. Crime and Media (CJ 355).  3 Credits.
Despite little direct contact with offenders or the criminal justice system, people typically hold strong opinions about crime-related issues. The goal of this course is to understand how media sources shape our attitudes and beliefs about crime and how we "should" respond to it. To this end, participants examine media involvement in constructing the reality of crime and justice and its implications for the justice process.
Prerequisites: Take SO 101 SO 101H or CJ 101.
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Ele, Intercultural Understand
SO 360. Sociology of Mental Illness. 3 Credits.
This course examines the ways in which society shapes our understanding of mental illness and mental health. It provides students with an overview of issues affecting the definition, causes, recognition and treatment of mental illness. The course is organized into five sections: 1) the major theoretical perspectives on mental illness; 2) symptoms of selected mental disorders; 3) the epidemiology of mental illness; 4) stigma; and 5) available treatment and lack of treatment for people with mental disorders.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Spring

This course considers social problems associated with aging, particularly in the areas of health, housing, financing and family life and the governmental policies past, present and future that deal with these problems.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Summer
UC: Breadth Elective, University Curriculum Ele, Intercultural Understand

SO 370. Adoption in the Community. 3 Credits.
This course provides an overview of adoption, past and present, including the major changes in adoption practice and public perception of adoption over the years. Course material includes issues pertaining to the adoption of children born in the U.S. and those born overseas, children adopted as newborn infants and those adopted past infancy from the foster care system. Discussion and readings address unplanned pregnancy considerations, trans-racial and transcultural adoption, children with special medical and emotional needs, open adoption and birth-family contact search and reunion, and adoption-related issues across the lifecycle.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Spring

SO 375. Sociology of the Everyday. 3 Credits.
The course examines how everyday interactions both create and shape social reality. Through an examination of humor, embarrassment, street behavior, family behavior and work behavior, as well as interaction between acquaintances, friends and intimate partners, the course examines how we make up everyday reality as we go. Emphasis is placed on micro-level theoretical perspectives drawing from social psychology and symbolic interactionism.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Ele

SO 382. Studying Social Issues with Statistics (GT 382). 3 Credits.
In this course, students learn basic introductory-level statistics and quantitative reasoning skills necessary for careers in sociology, including social services and health-related fields. Through hands-on application, students learn research design, basic statistical data collection and data analysis. For sociology majors only, junior or above.
Prerequisites: Take SO 290.
Offered: Every year, Spring

SO 385. Senior Seminar (GT 385). 3 Credits.
This senior seminar is designed as the capstone course for students majoring in sociology and gerontology. Students research a sociological or aging-related topic of their choosing and write a thesis based on their work. All senior theses represent a culmination of majors’ academic experiences in the department. For sociology or social services majors only in the senior year.
Prerequisites: Take SO 290.
Offered: Every year, Fall and Spring

SO 392. Internship in the Community (CJ 392/GT 392). 3 Credits.
For sociology or social services majors in their junior or senior year only. Students each complete 120 hours of supervised fieldwork in a community agency along with one hour per week in a seminar. Coursework and seminar content include written and oral reflection focusing on the student’s experience. Professional issues, along with academic concepts and theory, are explored in relation to the agency and the community it serves. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator one semester prior to begin the placement process.
Prerequisites: Take SO 101 or SO 101H; and SO 205.
Offered: Every year, Fall and Spring

SO 394. Advanced Internship in the Community (CJ/GT 394). 3 Credits.
A second internship for sociology or social service majors in their junior or senior year only. Students complete 135 hours of supervised fieldwork in a community agency along with one hour per week in the advanced internship seminar. Students build upon the knowledge gained from their first internship experience to deepen their understanding of concepts and theory through extended written and oral reflection. Students also assess their interpersonal strengths and weaknesses in preparation for graduate school and/or future employment. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator one semester prior to begin the placement process.
Prerequisites: Take SO 392.
Offered: Every year, Spring

Software Engineering (SER)

SER 120. Object-Oriented Design and Programming. 3 Credits.
This course serves as an introduction to the principles of design and development using object-oriented techniques such as inheritance, polymorphism and encapsulation. Students apply OO techniques to develop event-driven programs. Code craftsmanship is emphasized. Students also learn to apply and recognize design patterns for OO software and to use standard application development frameworks.
Prerequisites: Take CSC 110 CSC 110L; Minimum grade C-
Corequisites: Take SER 120L.
Offered: Every year, Spring

SER 120L. Object-Oriented Design and Programming Lab. 1 Credit.
Students gain experience in object-oriented programming and design by completing a series of activities, covering a range of topics from the Object-Oriented Design and Programming course (SER 120). This course is taken in conjunction with SER 120.
Prerequisites: Take CSC 110 CSC 110L; Minimum grade C-
Corequisites: Take SER 120.
Offered: Every year, Spring

SER 210. Software Engineering Design and Development. 3 Credits.
This course serves as an introduction to software engineering using object-oriented analysis and design. The course emphasizes the development of robust and high-quality software systems based on object-oriented principles. Implementations are performed using state-of-the-art programming languages and application development frameworks.
Prerequisites: Take SER 120 SER 120L SER 225; Minimum grade C-
Offered: Every year, Spring
SER 225. Introduction to Software Development (CSC 225). 3 Credits.
This course presents introductory software development concepts including group development, large-scale project work and theoretical aspects of object-oriented programming. The course expands on material from previous courses. Professional behavior and ethics represent an important component of this course.
Prerequisites: Take CSC 111 CSC 111L; Minimum grade C-.
Offered: Every year, Fall

SER 300. Advanced Topics in Computer Science (CSC 375). 3 Credits.
This course explores advanced computer science topics not available in other courses, as well as new topics as they emerge in this rapidly evolving discipline. Topics may be interdisciplinary.
Prerequisites: Take CSC 215 CSC 225; Minimum grade C-.
Offered: Every year, Spring

SER 305. Advanced Computational Problem Solving. 3 Credits.
This course presents computational problem solving and advanced algorithmic thinking techniques. It expands on material from previous courses. Students also learn about advanced APIs and software development frameworks, including APIs for advanced collections and concurrent programming, and gain additional experience with frameworks for testing and building software systems.
Prerequisites: Take CSC 215 SER 120 SER 120L; Minimum grade C-.
Offered: Every year, Fall

SER 310. Human-Computer Interaction. 3 Credits.
This course addresses concepts in human-computer interaction (HCI). Students learn about interaction design, information visualization, and usability. The course covers cognitive aspects of HCI and methods for evaluating user interfaces.
Prerequisites: Take CSC 215 CSC 225; Minimum grade C-.
Offered: As needed

SER 320. Software Design and Architecture. 3 Credits.
Students explore software design methodologies, architectural styles, design principles and design techniques. The course examines the principles and methods of architectural design and detailed design of complex, large-scale software systems and covers a number of architectural styles including classical and emerging styles.
Prerequisites: Take SER 340; Minimum grade C-.
Offered: Every year, Spring

SER 325. Databases (CSC 325). 3 Credits.
Students are introduced to the theory and application of database systems. Topics include data modeling and the relational model, query languages, relational database design, transaction processing, databases and physical database design.
Prerequisites: Take CSC 215 and CSC 225 or SER 225 Minimum grade C-.
Offered: Every other year, Spring

SER 330. Software Quality Assurance. 3 Credits.
This course acquaints students with various aspects of software quality assurance. Students learn about dynamic analysis approaches, such as testing and runtime assertions, static analysis approaches, such as reviews and finite-state verification, and processes for promoting software quality. Emphasis is placed on testing, including testing processes, such as unit, integration, system, acceptance and regression testing, and test case selection techniques, such as black-box and white-box testing. The relationship between ethics and software quality assurance is explored.
Prerequisites: Take SER 210; Minimum grade C-.
Offered: Every year, Spring

SER 340. Software Requirements Analysis. 3 Credits.
This course covers basic concepts and principles of software requirements engineering including techniques, processes and tools for specifying software requirements. Topics include requirements elicitation, requirements management, functional and nonfunctional requirements, semiformal and formal approaches, Agile requirement analysis and requirements tracking.
Prerequisites: Take SER 210; Minimum grade C-.
Offered: Every year, Fall

SER 350. Software Project Management. 3 Credits.
This course acquaints students with various aspects of software project management. Students learn about project initiation and scope definition; project planning, enactment and closure; measuring and controlling software artifacts and processes; risk management; and human aspects of software project management. Students use various tools for software project management and obtain hands-on experience by acting as managers of an ongoing software project.
Prerequisites: Take SER 330; Minimum grade C-.
Offered: Every year, Fall

SER 360. Software Engineering in Health Care. 3 Credits.
Biomedical informatics is one of the fastest growing economic sectors in the world. Software, and thus software engineering, has an important role in biomedical informatics. Students in this course explore the applicability of software engineering techniques to health care. Topics include electronic health records; modeling and analysis of medical processes with the goal of improving safety and efficiency; software solutions for providing clinical decision support; and bioinformatics.
Prerequisites: Take CSC 215 CSC 225; Minimum grade C-.
Offered: Every other year, Fall

SER 375. Advanced Topics in Software Engineering. 3 Credits.
Software engineering is a rapidly evolving discipline. This course explores advanced software engineering topics that are not covered in any current software engineering course, or expands on topics currently offered in the catalog. A specific course's focus may be interdisciplinary.
Prerequisites: Take SER 210; Minimum grade C-.
Offered: As needed

SER 399. Independent Study. 1-3 Credits.
Independent study courses are individual examinations of topics within the discipline not covered by conventional courses. Students who wish to engage in independent study must work with a departmental faculty. Students and faculty must agree on a topic, structure and meeting schedule.
Offered: As needed

SER 489. Advanced Independent Study in Software Engineering. 3 Credits.
This is a tutorial course or an individual project in which the student pursues advanced study in software engineering. The scope of the course is tailored to the desires of the student in consultation with a faculty adviser. Communication skills are developed through written reports and oral presentations. Requires approval of faculty member.
Offered: As needed
SER 490. Engineering Professional Experience. 1 Credit.
Students gain practical experience in applying theory obtained in previous course experiences by employing engineering skills in a professional setting under the guidance of faculty and mentors. Students must obtain departmental approval and register prior to starting the experience. If approved, an internship could satisfy this requirement. Prerequisite may be waived with permission of adviser.
Prerequisites: Take SER 340; Minimum grade C-.
Offered: Every year, All

SER 491. Senior Capstone I. 3 Credits.
This is the first part of a two-semester, capstone design experience for software engineering students. It involves analysis and synthesis of unstructured problems in practical settings. Students work in teams to formulate issues, propose solutions and communicate results in formal written and oral presentations.
Prerequisites: Take SER 491; Minimum grade C-.
Offered: Every year, Fall

SER 492. Senior Capstone II. 3 Credits.
This is the second part of a two-semester, capstone design experience for software engineering students. Students work in teams to refine software artifacts developed in SER 491 and produce a prototype of a software system. Results are communicated in formal written and oral presentations.
Prerequisites: Take SER 492; Minimum grade C-.
Offered: Every year, Spring

Spanish (SP)

SP 100. Spanish for Health Professions. 3 Credits.
This course is designed to introduce the non-native Spanish speaking student to basic vocabulary, phrases and cultural considerations necessary to communicate effectively with Spanish speakers in a clinical setting. The course prepares students to perform daily activities and tasks such as collecting and assessing a medical history, assessing health risks and making appointments with Spanish-speaking patients. There is no language prerequisite for the course, but students may find prior language learning experience useful. Students wishing to acquire general conversational skills or fluency in Spanish should enroll in traditional Spanish language classes.
Offered: As needed

SP 101. Elementary Spanish I. 3 Credits.
Spanish as a spoken and written language is introduced in this course, which includes intensive drills in the basic structures of the language. Elementary reading material is used for vocabulary building, analytical exercises and discussion. Students who have three or more years of high school Spanish with grades of B or above may not take this course for credit.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

SP 101L. Elementary Spanish Lab. 1 Credit.
This lab is a supplement to SP 101 and SP 102. It provides practice in the areas of conversation, listening comprehension, reading and writing. The lab is open to any student currently taking SP 101, SP 102 or those who have previously taken Spanish courses at the elementary level. The lab does not count toward fulfilling a language requirement, minor or major. It can be taken twice for credit during different semesters and is graded on a pass/fail basis.
Offered: Every year, Fall and Spring

SP 102. Elementary Spanish II. 3 Credits.
This course is a continuation of SP 101.
Prerequisites: Take SP 101 or placement into SP 102.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

SP 199. Independent Study in Spanish. 3 Credits.
Offered: As needed

SP 201. Intermediate Spanish I. 3 Credits.
This course includes conversational practice and a review of grammar. Students develop the four language skills: listening, speaking, reading and writing.
Prerequisites: Take SP 102 or placement into SP 201.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

SP 201L. Intermediate Spanish Lab. 1 Credit.
This lab is a supplement to SP 201 and SP 202. It provides practice in the areas of conversation, listening comprehension, reading and writing. The lab is open to students currently taking SP 201, SP 202 or those who have previously taken Spanish courses at the intermediate level. The lab does not count toward fulfilling a language requirement, minor or major. It can be taken twice for credit during different semesters and is graded on a pass/fail basis.
Offered: Every year, Fall and Spring

SP 202. Intermediate Spanish II. 3 Credits.
This course is a continuation of SP 201.
Prerequisites: Take SP 201.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

SP 210. The Culture and Civilization of Spain. 3 Credits.
This course is taught in English and introduces students to the rich and dynamic culture of Spain. Students develop a deeper understanding of artistic, economic, historical, literary, philosophical, political, religious and social trends. Students also gain deeper insights and perspectives with regard to Spain’s unique ethnic and linguistic diversity.
Offered: As needed
UC: Humanities, Intercultural Understand

SP 259. Spanish Elective. 3 Credits.
Offered: As needed

SP 289. Spanish Elective. 3 Credits.

SP 299. Independent Study. 3 Credits.
Directed study in topics in Spanish language, culture or literature of special interest to the student.
Offered: As needed, All

SP 300. Special Topics in Spanish. 3 Credits.
The subject varies based on faculty and student interests. Topics may be in Spanish literature, culture or history.
Prerequisites: Take SP 302.
Offered: As needed

SP 301. Advanced Spanish I. 3 Credits.
This course is designed to help the student develop oral and written language skills to a high degree of proficiency.
Prerequisites: Take SP 202 or placement into SP 301.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele
SP 301L. Advanced Spanish Lab.  1 Credit.
This lab is a supplement to SP 301 and SP 302. It provides practice in the
areas of conversation, listening comprehension, reading and writing. The
lab is open to students currently taking SP 301, SP 302 or those who have
previously taken Spanish courses at the advanced level. The lab does not
count toward fulfilling a language requirement, minor or major. It can be
taken twice for credit during different semesters and is graded on a pass/
fail basis.
Offered: Every year, Fall and Spring

SP 302. Advanced Spanish II.  3 Credits.
This course is a continuation of SP 301.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

SP 312. Advanced Conversation.  3 Credits.
This course is designed to improve oral skills for non-native speakers.
Prerequisites: Take SP 302.
Offered: Every Third Year, Fall
UC: Breadth Elective, University Curriculum Ele

SP 317. Approaches to Literary Genres.  3 Credits.
This course, taught in Spanish, is designed to familiarize students with
general approaches to literature: how to read/talk about a poem as
opposed to a play, etc. Students read and discuss, in Spanish, works from
various genres.
Prerequisites: Take SP 302.
Offered: Every Third Year, Fall

SP 320. Survey of Spanish-American Literature.  3 Credits.
This course explores Spanish-American literature from the time of the
Conquest to the present.
Prerequisites: Take SP 302.
Offered: Every Third Year, Fall

SP 321. Masterpieces of Spanish Literature.  3 Credits.
Major literary productions of Spain are studied, including works by or
selections from Lazarillo de Tormes, Garcilaso, Cervantes, Galdos and
Lorca.
Prerequisites: Take SP 302.
Offered: Every Third Year, Spring

SP 328. Spanish American Literature from the Conquest to
1880.  3 Credits.
Representative selections of Spanish American writings from the diary
of Columbus through romanticism are studied. Works of poetry, fiction
and drama are analyzed in terms of their sociopolitical contexts as well in
terms of the dominant literary movements of the period.
Prerequisites: Take SP 302.
Offered: As needed

SP 329. Spanish American Literature from 1880 to Present.  3 Credits.
Representative selections of Spanish American writings since
"Modernismo" are studied. Works of poetry, fiction and drama are
analyzed in terms of their sociopolitical contexts as well as in terms of
the dominant literary movements of the period.
Prerequisites: Take SP 302.
Offered: Every Third Year, Fall

SP 335. Nineteenth Century Literature of Spain.  3 Credits.
The romantic, realist and naturalist movements are studied.
Prerequisites: Take SP 302.
Offered: Every Third Year, Spring

SP 343. Culture of Spain.  3 Credits.
This course focuses on the broad themes of politics, history, literature,
philosophy, regional languages, religion, education, the media, art, music,
arquitecture, ethnic diversity and traditions of Spain. By examining
the past and present, students gain deeper insights into the Spanish
character and world view. Instruction of this course is in Spanish.
Prerequisites: Take SP 302.
Offered: Every other year, Spring

SP 348. Spanish Drama and Poetry of the Golden Age.  3 Credits.
This course focuses on readings and discussion of the works of Calderon
de la Barca, Lope de Vega, and contemporaries.
Prerequisites: Take SP 302.
Offered: Every Third Year, Spring

SP 351. Short Story in Spanish.  3 Credits.
This course presents a study of the short story genre and its development
in Spain and Spanish America, especially in modern times, including
Chicano literature. A variety of short stories (moral lesson, anecdote,
character story and magic realism) are analyzed.
Prerequisites: Take SP 302.
Offered: As needed

SP 370. History of the Romance Languages.  3 Credits.
Students study the historical linguistic development of Spanish in
comparison with the other Romance languages: Catalan, French, Italian,
Portuguese, Rhetian, Sardinian and Romanian. Students also compare
the modern dialects of Spanish.
Prerequisites: Take SP 302.
Offered: Every other year, Fall

SP 371. Contemporary Literature in Spanish.  3 Credits.
The novel, theater or poetry of contemporary Spain and Spanish America
are studied.
Prerequisites: Take SP 302.
Offered: Every Third Year, Fall

SP 373. Latin American Cultures I.  3 Credits.
Selected topics of Latin American cultures from their Spanish and pre-
Columbian roots to the end of Independence are studied. Readings are
drawn from history as well as literature.
Prerequisites: Take SP 302.
Offered: Every year, Fall

SP 374. Latin American Cultures II.  3 Credits.
Selected topics of Latin American cultures from the end of Independence
to the present are studied. Readings are drawn from history as well as
literature.
Prerequisites: Take SP 302.
Offered: Every year, Spring

SP 376. The Spanish Caribbean.  3 Credits.
This course studies people, history and society as well as artistic and
literary expression of Puerto Rico, Cuba and the Dominican Republic.
Also, features of the Spanish language as spoken in the Caribbean are
considered.
Prerequisites: Take SP 302.
Offered: Every other year, Spring

SP 399. Independent Study.  3 Credits.
Directed study in topics in Spanish language, culture or literature of
special interest to the student.
Offered: As needed, All

SP 400. Special Topics.  3 Credits.
Offered: As needed
SP 401. Advanced Spanish Grammar. 3 Credits.
This culminating course, designed to increase and perfect the knowledge of students who possess a strong command of Spanish grammar, includes instruction in verb tense usage, sentence syntax, lexical choices and idiomatic usage. Exercises to solidify knowledge are used extensively.
Prerequisites: Take SP 302.
Offered: As needed

SP 450. Senior Seminar. 3 Credits.
This seminar is devoted to an in-depth study of Don Quijote de la Mancha. The novel is read, discussed and analyzed in terms of the sociopolitical context and in terms of the dominant literature of the period.
Prerequisites: Take SP 302.
Offered: Every year, Spring

SP 499. Independent Study. 3 Credits.
Directed study in topics in Spanish language, culture or literature of special interest to the student.
Offered: As needed, All

Special Education (SPED)

SPED 545. Introduction to the Exceptional Child. 4 Credits.
This course provides students with a broad overview of exceptional learners. It is a basic overview/survey of all areas and categories of special education. The purpose is to provide an introduction to students with exceptionalities for education as well as noneducation majors. Target subject areas include: knowledge of categorical labels, educational law, program planning and terminology used in the field. (Master’s programs: take Fall or Spring) (Certificate program: take January or Summer)
Offered: Every year

SPED 552. Teaching in the Inclusive Classroom. 3 Credits.
 Treatment of exceptional individuals throughout history and the importance of societal values regarding their differences form the basis for students' understanding of special education from its inception to current practices. Topics of discussion include: history and philosophy, laws, guidelines and procedures related to providing special education; the needs of students with exceptionalities, including giftedness; the particular needs of students for whom English is a second language; and instructional considerations for students with exceptionalities in inclusive settings. From a philosophic perspective, students learn skills to include children with exceptionalities in their elementary classrooms.
Corequisites: Take ED 452L.
Offered: Every year, Fall and Spring

SPED 555. Specific Learning Disabilities: Identification, Instruction and Assessment (LD). 4 Credits.
In this course, students have the opportunity to increase their knowledge of specific learning disabilities. Students discuss the supports and strategies that are successful in school so that there is a continuum of strategies that are practiced not just learned. The class expands the student's understanding of the importance of responding to the learning needs of these students in a positive way to help them access the curriculum successfully. The class incorporates tools such as simulations and case studies to understand the challenges and overlaps these SLDs present. Students examine the role of SRBI in identification, as well as questions such as: what makes these disabilities so misdiagnosed/overlooked; which if any are inherited/preventable; are there hidden gifts/talents being overshadowed by LDs; how can including the family in our collaborative efforts benefit the student; how can we identify key strategies to support these students emotionally as well as academically? (Master’s programs, take Fall or Spring) (Certificate program, take Summer)
Offered: Every year

SPED 566. Autism Spectrum Disorders. 4 Credits.
Educational practitioners develop a knowledge base of methods for working with students diagnosed with Autism Spectrum Disorders (ASD) and associated communication disorders. Focus is on the identification of students, as well as the program planning based on instructional strategies in the areas of academic, behavioral, social-emotional and communication. (Master’s programs, multiple semesters) (Certificate program ONLY, take in January term)
Offered: Every year

SPED 567. Independent Research in Special Education. 1 Credit.
This course focuses on research in the field of special education as it relates to students in the educational setting. The research project should include the application of evidence-based practice, the role of families in the educational process and the effects of the disability on lifelong learning. Specific topics/projects must meet with faculty approval. This course is only required for the 12-credit Certificate of Completion in Special Education.
Prerequisites: Take SPED 565 or SPED 566.
Offered: Every year, Spring

SPED 568. Assessment/Program Planning and Evaluation of Children with Special Needs. 3 Credits.
In this course, candidates prepare to administer, score and interpret a wide range of criterion referenced, norm referenced and curriculum-based measurements. Candidates utilize information to identify students with specific learning disabilities, make valid recommendations for programming, design appropriate IEP goals and objectives based on the results, and share information with parents and other professionals.
Offered: Every year, Fall and Spring

SPED 570. Special Education Law. 3 Credits.
This course focuses on current and relevant federal and state legislation in the field of special education. Special attention is paid to the interplay of services and protections provided by IDEA, Section 504 of the Rehabilitation Act, and the Americans with Disabilities Act (ADA). In addition, candidates examine the materials to understand the Every Student Success Act (ESSA) that was recently signed into law. Candidates learn how the law affects the planning and delivery of services to children, adolescents and adults with special needs from birth through adulthood. Candidates learn to interpret case law as well as statutes and other legal memoranda that apply to the rights and protections afforded to people with special needs.
Offered: Every year, Fall and Spring
SPED 571. Emotional and Behavioral Disorder Identification, Management, and Assessment. 3 Credits.
This course examines social-emotional-behavioral functioning in the educational setting. Methods of identification, assessment and instructional planning for students with social-emotional-behavioral disorders are addressed in depth. Comprehensive coverage of behavior management, discipline models and building systems of support are examined and discussed. In this way, behavior and/or different learning needs are understood, modifications and supports are put in place and the student is actively engaged in practicing them. This student-centered method results in positive outcomes across the span of the student’s life because the student learns and internalizes successful strategies that work consistently.
Offered: Every year

SPED 572. Educating Young Children with Special Needs. 3 Credits.
The needs of the young child with disabilities are explored through an examination of social, adaptive, environmental and family characteristics. Candidates learn how to assess children and provide a developmentally appropriate curriculum. The differences between IEPs and IFSP are a focal point, as well as the importance of working with families and professionals in birth to three programs, preschool programs, and kindergarten through grade 2 classrooms. Community services for the young special needs child also are discussed.
Offered: Every year

SPED 573. Reading Disorders: Assessment, Planning and Instruction. 3 Credits.
This course provides candidates with the knowledge and skills needed to provide appropriate evaluation, program planning and educational experiences for students with reading disorders, including Dyslexia. Specifically, reading assessments, diagnosis of reading disorders, IEP goals/objectives and program recommendations are explored and discussed. Reading instruction at the intervention and special education identification levels are discussed to ensure students’ ability to plan educational programming for students including those with Dyslexia. Further, instructional strategies to support students with reading disabilities who are included in the regular education setting are emphasized. Various methodologies to support students with Dyslexia as they access the regular education curriculum and instruction are included.
Offered: Every year, Fall and Summer

SPED 574. Understanding and Teaching Students with Intellectual Disabilities. 3 Credits.
This course provides candidates with the information necessary to provide appropriate educational experiences for students with low incidence disabilities, including intellectual impairments, physical impairments and those with multiple areas of impairment. The focus is on promoting participation in the school, home and community through developing appropriate transition goals. Emphasis is placed on the use and effectiveness of assistive technologies in working with these students.
Offered: Every year

SPED 575. Working with Gifted and Talented Students. 3 Credits.
This course focuses on characteristics of students identified as "gifted" and "talented." Attention also is paid to those who are "twice exceptional." Candidates explore the early development of these children as well as the ways in which their gifts may affect their relationships with their siblings and families. Areas of study include identification, curriculum design and understanding how to provide for their unique social and emotional development, as well as their academic achievement. (Elective)
Offered: Every year, Fall and Spring

SPED 576. Designing and Utilizing Assistive Learning Technologies. 3 Credits.
This course explores the use of technology to support achievement for individuals with different learning needs. Topics include an overview of the continuum of assistive technologies, from simple to complex; a discussion of theoretical bases, support and guidelines for the use of these technologies; an examination of the principles of Universal Design for Learning; and the exploration of specific tools and devices. Course projects emphasize hands-on experience in using these approaches. (Elective)
Offered: Every year, Fall and Spring

SPED 579. Practicum in Special Education I. 3 Credits.
This course is the first of two separate 3-credit practicums designed to provide each candidate professional practice and authentic experiences working with students who qualify under IDEA as needing special education and related services. In addition to coursework, participants spend 36 contact hours observing, planning, instructing and assessing the students. Hours and reflections are recorded in a journal daily. Candidates must design and teach a 10-minute mini-lesson that is filmed. All data collected throughout each practicum is compiled in an e-portfolio, which catalogs the activities undertaken by the candidates including an analysis and description as well as artifacts collected. The candidate, the onsite cooperating teacher and the university professor meet during the practicum to outline the expectations, standards and activities necessary to successfully meet the requirements. Additional meetings are arranged as needed.
Offered: Every year

SPED 580. Practicum in Special Education II. 3 Credits.
This course is the second of two separate 3-credit practicums designed to provide each candidate professional practice and authentic experiences working with students who qualify under IDEA as needing special education and related services. For this Practicum, candidates must choose a completely different disability than they did in SPED 579. In addition to coursework, participants spend 36 contact hours observing, planning, instructing and assessing the students. Hours and reflections are recorded in a journal daily. Candidates must design and teach a 10-minute mini-lesson that is filmed. All data collected throughout each practicum is compiled in an e-portfolio, which catalogs the activities undertaken by the candidates including an analysis and description as well as artifacts collected. The candidate, the onsite cooperating teacher and the university professor meet during the practicum to outline the expectations, standards and activities necessary to successfully meet the requirements.
Prerequisites: Successful completion of SPED 579 Practicum I.
Offered: Every year

SPED 581. Research in Special Education. 3 Credits.
Candidates submit a proposal for research based on an area of interest in special education. Upon approval of their proposal, they conduct research, collect data and present their findings in a thesis as a culminating requirement for their MS in Special Education. This course is required only for candidates enrolled in the MS in SPED who are not seeking cross-endorsement in Comprehensive Special Education.
Prerequisites: Completion of 27 credits in SPED coursework.
Offered: Every year
Sports Studies (SPS)

SPS 101. Introduction to Sports Studies.  3 Credits.
This course introduces students to the social, historical, cultural, economic and political importance of sport. Students become familiar with the growing role and influence of sport in business, health sciences, and communications on the local, national, and global stage. This course also introduces students to the study of sport and the interdisciplinary research being done by scholars from various fields. This is a required course for the Sports Studies minor.
Offered: Every year, Fall

Students are trained in the fundamentals of shooting news footage using digital cameras and editing news stories using a computer-based nonlinear editing system. Assignments for SPS students are focused on sports.
Offered: Every year, All

SPS 176. Baseball and Statistics (MA 176).  3 Credits.
This course covers Sabermetrics: the use of standard statistical topics to analyze data derived from baseball records. The book, Moneyball, is read to understand how statistics was used by Billy Beane to bring success to the Oakland Athletics. The standard statistical topics covered include exploratory data analysis, elementary probability, discrete probability distributions, normal probability distributions, sampling distributions, regression, and correlation. Learning to use Excel to do statistical analysis is an integral part of the course. Students must possess a basic knowledge of baseball.
Offered: Every year, All

SPS 200. Special Topics in Sports Studies.  3 Credits.
Offered: As needed

SPS 201. Medical Aspects of Sport and Activity (AT 201).  3 Credits.
This course is geared toward students who want to work in a sports-related field (i.e., coaches, journalists and managers). It provides an overview of a variety of sports medicine-related topics, including common sports injuries, an introduction to sports psychology and current events in sports medicine. Students cannot receive credit for both AT 201 and AT 214.
Prerequisites: Take 1 group; BIO 101 BIO 101L or BIO 105 BIO 105L or BIO 106 BIO 106L or CHE 101 CHE 101L or PHY 101 PHY 101L or BMS 110 BMS 110L or BMS 117 BMS 117L or BMS 118 BMS 118L or SCI 101 SCI 101L or SCI 102 SCI 102L or SCI 105 SCI 105L.
Offered: Every year, Fall

SPS 202. Sports Leadership.  3 Credits.
This course offers an opportunity for students to explore leadership as a crucial component of success in a number of contexts, including sports and business. Some of the questions this course examines include: How are good leaders developed? What makes a leader successful? How do cultural factors influence leadership? Students explore various leadership theories and topics including (but not limited to) leadership development, effective coaching techniques, motivation, media effects and gender.
Prerequisites: Take SPS 101.
Offered: Every year, Spring

SPS 224. Sports Law (LE 224).  3 Credits.
Sports law is a growing and evolving area of law, affecting all those who play, officiate or watch sports. Legal issues involve athletes, athletic competition, athletic teams and leagues, fans and sports in general, on the student, amateur and professional levels. Students study the legal concepts surrounding sports, and learn to apply them to the issues that arise.
Prerequisites: Take LE 101 and SPS 101.
Offered: Every year, Spring

SPS 226. Baseball and Statistics (MA 226).  3 Credits.
This course covers SABRmetrics: the study of standard statistical topics using data derived from baseball records, which, for many students, is more easily understood and more interesting than data from the business or science world. The course looks at both descriptive and inferential statistics along with probability. Descriptive statistics covers measures of central tendency, tables and graphs, the normal and binomial distributions. Inferential statistics explores sampling, confidence intervals, hypothesis testing, chi-square testing, and regression and correlation analysis. Students must have a satisfactory score on the placement test and possess a basic knowledge of baseball.
Offered: Every year, All

SPS 240. Philosophy of Sport (PL 240).  3 Credits.
This course looks at the philosophical study of sport. It considers the purpose, meaning and value of different sports, of various involvements in sport, and of different levels in sport. It is concerned with what philosophers have to say about sport, and with what the study of sport can contribute to philosophy and to the human quest for the loving, the true, the good and the beautiful.
Prerequisites: Take SPS 101.
Offered: Every other year, Spring

SPS 280. The Art of the Podcast (JRN 280).  3 Credits.
This hands-on course explores creative audio storytelling via the podcast. Students learn how to research, write, record, edit and self-publish creative nonfiction and fictional stories that are both original, and emulate some of the most popular podcasts on the market. Special emphasis is placed on audio gathering techniques, storytelling techniques and interviewing for live and recorded shows.
Offered: As needed, Spring

SPS 300. Special Topics in Sports Studies.  3 Credits.
Prerequisites: Take SPS 101.
Offered: As needed

SPS 307. Sociology of Sport (SO 307).  3 Credits.
This course includes analysis of sport as a social and cultural institution and interrelations between sport and societal subsystems. Students explore selected issues of sociocultural aspects of sport and exercise, and analyze contemporary problems associated with sport, including race relations, the tradition and emergent role of females, leisure behaviors, aggression and violence, as well as political and economic concerns.
Prerequisites: Take SO 101 SPS 101.
Offered: Every year, Spring

SPS 311. Sports Public Relations (STC 311).  3 Credits.
This class is a comprehensive review of sports event planning and management. Students examine such topics as strategic planning, budgeting and time management.
Offered: Every year, Spring
SPS 312. Sports Management (MG 312). 3 Credits.
This course offers an opportunity for students to gain information and understanding of the various practices and procedures associated with sport administration and management. Organizational structure, management decisions and challenges, as well as career opportunities at the professional, intercollegiate, interscholastic, youth and community sport levels are explored. The areas of sports tourism, sport management agencies and sport facility and event management are analyzed in terms of their impact on the management and business of sports.
Prerequisites: Take SPS 101.
Offered: Every year, Spring

SPS 325. Sports Economics (EC 325). 3 Credits.
The primary focus of this course is professional sports; microeconomic foundations of sports economics, industrial organization of the sport industry, antitrust and regulation, financing sports stadiums, labor issues and the economics of college sports.
Prerequisites: Take EC 112.
Offered: As needed

SPS 352. History and Social Impact of Baseball. 3 Credits.
This course covers the role of baseball both as an agent and as a reflector of social change in America from the mid-19th century to the present. While developments and activities on the field are not ignored, greater emphasis is placed on events surrounding the game. Topics include the racism of the 1880s; the transition from a pastoral pastime to a billion-dollar industry; the role of baseball in the assimilation of immigrants; the development of the Negro Leagues and the All-American Girls Professional Baseball League; the Jackie Robinson "experiment"; the growth of unionization in the sport and the most recent "Latino" wave of players. Students explore how each of these developments is embedded in and reflective of the larger culture.
Prerequisites: Take HS 131 or HS 132 or SPS 101.
Offered: Every year, Spring

SPS 361. Sports Reporting (JRN 361). 3 Credits.
This course introduces students to coverage of sports for the news media and includes writing game stories and sports profiles.
Prerequisites: Take JRN 260 or JRN 263.
Offered: Every year, Fall and Spring

SPS 362. The Story of Football (JRN 362). 3 Credits.
This course traces the historical trajectory of American football and the coaches, players and media portrayals that transformed the game from a 19th-century collegiate test of manliness to what it is today: a spectator sport of immense appeal whose popularity endures despite more than a century of concerns over the game's sometimes lethal and debilitating violence.
Prerequisites: Take SPS 101.
Offered: Every year, Fall

SPS 399. Independent Study. 3 Credits.
Independent Study. Requires approval of the sports studies director.
Offered: As needed

SPS 400. Special Topics in Sports Studies. 3 Credits.
This course, offered as part of the Sports Studies minor, is offered as needed to explore current topics and trends in sports studies. In most cases, senior status is required.
Prerequisites: Take SPS 101.
Offered: As needed

SPS 420. Sports, Media and Society (MSS 420). 3 Credits.
This class examines the social, political, economic and historical significance of the intersection of sports, media and society. Some of the questions this course examines include: What role have sports played in shaping cultures throughout history? What is the relationship between sports and media? How do sports, through the media, influence U.S. culture today? What is the role of sports media professionals in U.S. culture? This course is specifically designed for students interested in sports journalism, production and/or promotion.
Prerequisites: Take SPS 101.
Offered: Every year, Spring

SPS 488. Internship. 3 Credits.
Students have the option to participate in an internship with a sports-related organization. The fieldwork is jointly supervised by the cooperating organization or corporation and the director of the sports studies minor. The internship adheres to standard Quinnipiac University regulations and procedures regarding internships. Requires approval of the sports studies director.
Prerequisites: Take SPS 101.
Offered: Every year, All

SPS 490. Newsroom Clinical (JRN 590). 3 Credits.
This graduate-level journalism course, open to select SPS seniors, focuses on advanced reporting for multimedia reports, broadcast news, news documentaries and magazine stories. Students produce daily, weekly and long-term stories in their area of expertise for the journalism department's tablet application, among other platforms. While graduate students meet twice a week, undergraduate students would only be required to meet one night a week. Requires senior status and approval of sports studies director.
Prerequisites: Take SPS 101.
Offered: Every year, All

SPS 498. Student Media Independent Study. 3 Credits.
This course is designed for SPS minors working for student media groups. Every two weeks, students submit their best work (article, package, game broadcast, etc.) and receive feedback. This independent study is an experiential learning opportunity that includes elements of both an internship, with hands-on experience and supervision, plus a skills class in which students receive feedback on their work. At the end of the semester, students submit their final portfolio as well as a cover letter and resume. Requires approval of the sports studies director.
Prerequisites: Take SPS 101.
Offered: Every year, All

SPS 499. Independent Study. 3 Credits.
This course is designed for SPS minors who wish to complete an individual research or professional project supervised by a faculty member affiliated with the sports studies minor. The project demonstrates a sophisticated understanding and critical analysis of a sports-related topic. Students present the findings of their research in a 15-18 page essay due at the end of the semester. Requires approval of the sports studies director.
Prerequisites: Take SPS 101.
Offered: Every year, All
Strategic Communication (STC)

STC 101. Principles of Public Relations. 3 Credits.
This course traces the development of the public relations discipline and examines the role of public relations in organizations and society. Students are introduced to the role that public relations plays in communicating to individuals, groups, and society at large. Basic public relations principles and theories are examined. Students are introduced to critical thinking and reasoning concepts as well as the various professional roles in the field.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele

STC 102. Principles of Advertising and Integrated Communications. 3 Credits.
Principles of Advertising and Integrated Communication is an introductory course that provides a comprehensive overview of the practices of advertising and integrated communication (ADIC) as they are used by organizations to maximize the impact of unified messages and promotions on consumers and other stakeholders. The course is designed to introduce students to contemporary issues and practices as well as to analyze ethical considerations involved in the basic principles within the communications campaign planning process.
Offered: Every year, All
UC: Breadth Elective, University Curriculum Ele

STC 201. Writing for Strategic Communications. 3 Credits.
Written communication is central to most public relations careers. Clear and persuasive writing is one of the tools used in public relations to convey clients’ messages to target publics. This writing-intensive course introduces students to the world of professional public relations writing. Topics include press releases and other print tactics, online content and social media. Students are involved in both in-class and out-of-class assignments.
Prerequisites: Take STC 101 or STC 102; and COM 140.
Offered: Every year, Fall and Spring

STC 215. Web, Mobile, and Interactive Design. 3 Credits.
Students learn how to create desktop and mobile multimedia elements using web development software, HTML5, CSS3 and simple scripting. Students design projects that include functional websites, animated content and interactive experiences.
Prerequisites: Take COM 130 and JRN 106 or FTM 110.
Offered: Every year, Spring

STC 311. Sports Public Relations (SPS 311). 3 Credits.
This class is a comprehensive review of sports management and sports event planning. Students examine such topics as strategic planning, budgeting and time management.
Offered: Every year, Spring

STC 320. Strategies for Social Media. 3 Credits.
This course addresses the impact of social and mobile media in an integrated profession. It focuses on strategically using social media to conduct research and monitor issues, to develop, implement and evaluate the success of public relations, advertising and integrated communication efforts. The course emphasizes strategic usage of such social media tools as social networks, social bookmarking sites, blogs, podcasts/vodcasts, discussion boards and conferences, wikis, mobile media and geolocation apps.
Prerequisites: Take STC 201.
Offered: Every year, Fall and Spring

STC 322. Communication Research and Analysis. 3 Credits.
Quantitative reasoning is expected of today’s public relations professional, and this course presents an exploration of both quantitative and qualitative research methods. Students learn how to use principles of scientific research to establish, monitor and evaluate public relations programs and maintain positive relationships with various publics.
Prerequisites: Take STC 101 or STC 102.
Offered: Every year, Fall and Spring

STC 335. Media Systems and Planning. 3 Credits.
In this course, students learn about traditional as well as new and emerging technologies, with particular emphasis on their strengths and weaknesses as message carriers. Discussions include an overview of commonly used metrics and sources of data in the advertising and communications industries. Students then use this knowledge to plan and budget for integrated communication plans that capitalize on paid, earned and owned outlets.
Prerequisites: Take STC 332.
Offered: Every year, Spring

STC 341. Corporate Public Relations. 3 Credits.
This course provides students with the knowledge and skills required for positions in the corporate sector. Topics include media relations, employee communication, community relations, investor relations and crisis communication. Students hone their written communication and critical thinking skills in this class.
Prerequisites: Take STC 201.
Offered: As needed

STC 343. Nonprofit Public Relations. 3 Credits.
This course is designed for students who are interested in nonprofit public relations practice. Nonprofit practitioners help organizations manage their relationships by using many types of communication. This class helps students hone the skills that enable them to prosper as nonprofit public relations professionals. Written communication skills, along with other skills, are stressed.
Prerequisites: Take STC 201.
Offered: As needed

STC 344. Global Strategic Communications Management. 3 Credits.
This course is designed to explore the global reach of strategic communication, its challenges, opportunities, and worldwide development. It examines how various communication disciplines such as advertising, integrated marketing communication and public relations work together in various cultures, geopolitical and socio-economic systems. Students explore strategic communication practices from a cosmopolitan perspective while focusing on understanding global, national, and local audiences in order to create an integrated strategic communication plan that strengthens brand images.
Prerequisites: Take STC 101 or STC 102.
Offered: As needed

STC 345. Investor Relations. 3 Credits.
This course is designed for students who may wish to enter the field of investor relations. Students are introduced to the main activities carried out by investor relations professionals and to concepts such as finance and accounting.
Prerequisites: Take STC 201.
Offered: As needed
STC 346. Strategic Health Communication. 3 Credits.
The course presents a social scientific exploration of the field of strategic health communications, with particular attention to analysis and practice of health communication relationships and messages. Participants examine theories of health behavior change and media effects. Health is discussed from an ecological perspective, considering how various social structures impact community and individual health and cultural differences regarding health. Students consider examples of mediated health campaigns and research evaluating their effectiveness. They examine the interplay among theory, research and practice, with a special emphasis on how theory informs practice.
Prerequisites: Take STC 201.
Offered: As needed

STC 347. Fundraising. 3 Credits.
This course is designed for public relations students who may wish to enter the field of fundraising (or development). Students are introduced to a variety of fundraising topics from a relational perspective. Topics include relationship management and fundraising, developing fundraising constituencies, developing a case for support, annual funds, major gifts, prospect research, capital campaigns, corporate giving, foundations, stewardship, fundraising ethics and fundraising trends. Students develop their written communication skills in the development of a case for support.
Prerequisites: Take STC 201.
Offered: As needed

STC 348. Public Relations Event Planning. 3 Credits.
This course emphasizes the fundamentals of event planning, from developing the event, choosing a site and activities, promoting the event, accommodating the audience, coordinating volunteers, overseeing a safe event environment, and assessing the event after completion. At the end of the course, based upon the readings and real-life application, the student should be able to appreciate and understand how to plan a first-rate event, regardless of the client, theme or environment.
Prerequisites: Take STC 201.
Offered: As needed

STC 349. Media Relations. 3 Credits.
This course gives students an understanding of the priorities and expectations of various types of contemporary media, and how to successfully engage them through research-based strategies and tactics designed to reach key audiences. At the conclusion of the course, students should be well-practiced in various forms of working with journalists and the public via multiple media.
Offered: Every other year, Fall

STC 399. Independent Study. 1-6 Credits.

STC 400. Special Topics. 3 Credits.
The content of this course is specialized and varies from semester to semester. Students may inquire at the School of Communications front desk to learn more about the topic being offered.
Prerequisites: Take STC 201.
Offered: As needed

STC 401. Bateman Competition Research. 1-3 Credits.
This course is designed to prepare students for advanced public relations problem-solving, the development of strategic public relations plans and the execution of a comprehensive public relations program. Students develop and implement a public relations program based on the four-step public relations process by competing in the national Public Relations Student Society of America (PRSSA) Bateman Competition Case Study Competition.
Prerequisites: Take STC 201 and permission of instructor.
Offered: Every year, Fall

STC 402. Bateman Competition Campaigns. 2 Credits.
Prerequisites: Take STC 332 STC 401.
Offered: As needed

STC 405. The Agency. 3 Credits.
The Agency is a student-run, interdisciplinary firm in which students produce professional work under the direction of faculty. Specializing in Public Relations, Graphic and Interactive Design, and Advertising and Integrated Communications, students collaborate on teams to manage and produce visual, written and digital work for a variety of clients in the communications field. Students apply different research methodologies, tools and techniques, and tactics to achieve desired strategic outcomes and present their projects to clients.
Offered: Every year, Fall and Spring

STC 410. Branding Strategies. 3 Credits.
In this course, students consider how brands work and examine them as the guiding forces for integrated communication campaigns. Students identify the common characteristics of successful brands and explore the tools and techniques that are used to build brand equity.
Prerequisites: Take STC 332.
Offered: Every year, Fall

STC 450. Crisis Communication Management. 3 Credits.
This senior seminar for public relations majors is focused on crisis management. The course examines institutional crisis communication from a management perspective with an emphasis on crisis prevention, planning and response. Senior-level students in STC 450 apply skills they have learned throughout the program to crisis case studies. Students are called on to demonstrate oral and written communication skills along with proficiencies in such areas as critical thinking, reasoning and creative thinking.
Prerequisites: Take STC 332.
Offered: Every year, Fall and Spring

STC 485. Advertising and Integrated Communications Campaigns. 3 Credits.
This course is the capstone course in the advertising sequence. It utilizes a team-based, project-driven approach to advertising with real-life clients. Each team engages in the conception, research, planning and execution of a unique advertising campaign for an entire semester. Students learn to work within client guidelines, strategic creative and media planning, budgetary considerations and post-campaign analysis. In this capstone experience, students develop a full-scale integrated communications campaign, including conducting secondary and primary research, strategic planning and the production of associated creative deliverables. Students also gain experience in pitching to clients and evaluating the success and impact of the campaign.
Prerequisites: Take STC 201 STC 332.
Offered: Every year, Spring

STC 495. Public Relations Campaigns. 3 Credits.
STC495 is the capstone course for students preparing for a career in public relations. Students develop the mindset of a strategic communicator through case analyses, problem-solving exercises, and completion of a signature work. Attention is focused on the public relations planning process and student teams develop strategic public relations plans for actual clients. Writing, research and presentation skills are expected.
Prerequisites: Take STC 101 STC 201 STC 332.
Offered: Every year, Fall and Spring

STC 499. Public Relations Ind Study. 1-6 Credits.
Offered: As needed
Women’s and Gender Studies (WS)

WS 100. Special Topics. 1 Credit.
Offered: As needed

WS 101. Introduction to Women’s and Gender Studies. 3 Credits.
This team-taught interdisciplinary course uses lively discussion and compelling readings to consider women’s studies in its broad outlines. The participants discuss sexuality, economic and political power, the female body, images of beauty, psychology of gender and the development of feminism through course materials that include novels, social science research, poetry, historical writings and political manifestos. Please be advised that this course may cover topics that students find difficult, such as eating disorders, sexual assault and harassment.
Offered: Every year
UC: Breadth Elective, University Curriculum Ele, Intercultural Understand

WS 200. Special Topics in Women’s Studies. 3 Credits.
Offered: As needed

WS 210. Human Sexuality (PS 210). 3 Credits.
This course focuses on human sexuality, including the physiological, psychological and social aspects of sexuality. Students are encouraged to consider diverse perspectives, e.g., in sexual orientation, experiences, beliefs and behaviors. Additional course topics include: domestic violence, abuse, sexual assault and harassment.
Prerequisites: Take PS 101 or WS 101.
Offered: Every year, Fall and Spring
UC: Social Sciences, University Curriculum Ele, Intercultural Understand

WS 211. Cross Cultural Perspectives on Gender, Sex and Sexuality (AN 210). 3 Credits.
This course introduces students to the social and cultural constructions of gender, sex and sexuality around the world. Students discover the way anthropologists approach these topics. They explore the constructions as they relate to notions of biology, family, households, work, migration, inequality/inequity, economics and class status, violence, and race and ethnicity. Discussions focus on what gender, sex and sexuality are, what they mean and how they theoretically and practically matter as categories.
Prerequisites: Take 6 credits; From Subjects AN SO or WS.
Offered: Every year, Fall

WS 219. Women in Political Thought (PO 219). 3 Credits.
Students explore different approaches to explain the status of women. Theoretical perspectives that students consider may include: liberal feminism, radical feminism, Marxist/socialist feminism, feminism of care, conservative feminism and global feminism, among others. Students critically evaluate political concepts such as freedom, equality, rights and oppression, as well as learn about how different thinkers have conceptualized gender, politics, power and the role of the state. The course requires careful reading, intensive class discussion and multiple writing assignments.
Prerequisites: Take PO 101 or PO 131 or PL 101 or PS 101 or SO 101 or WS 101.
Offered: Every year, Spring
UC: Social Sciences

WS 232. Women in the Criminal Justice System (CJ/SO 232). 3 Credits.
This course examines the changing patterns of women’s criminality, the experiences of women who are processed as crime victims, and the evolution of women’s role in law, law enforcement and corrections.
Prerequisites: Take WS 101.
Offered: Every year, Fall
UC: Social Sciences

WS 235. Literature by Women (EN 235). 3 Credits.
Virginia Woolf wrote that, for most of history, "Anonymous" was a woman. The last two centuries have energetically recovered the writings of women and shifted them into equal stature with literature written by men. With the question of what it means to extract a canon of literature defined by gender as its center, this course allows students to consider the ways in which women have contributed a language and form to the literary tradition. In particular, the course explores the process by which this literature, often written from the margins of experience, has shaped how we read today. Varied female authors are discussed, including Woolf, the Brontës, Emily Dickinson, Zora Neale Hurston, Sylvia Plath, Toni Morrison, Sandra Cisneros, Jamaica Kincaid, Leila Abouzeid, and Maxine Hong Kingston, among others.
Prerequisites: Take WS 101.
Offered: Every year, Fall
UC: Social Sciences, Intercultural Understand

WS 250. Gender and the Law (LE 250). 3 Credits.
This course focuses on legal issues regarding gender, including the differential treatment of women and men in the legal system, and contemporary responses to gender issues in society.
Prerequisites: Take WS 101.
Offered: Every other year, Spring

WS 255. Sociology of Families (SO 255). 3 Credits.
In this introductory course, students study families in the U.S. Topics include the ways in which families have evolved over time and the effect of economic and social factors (such as race, class, and gender) on family life. Students learn about families in other cultures and current issues facing families.
Prerequisites: Take SO 101 or WS 101.
Offered: Every year, All
UC: Social Sciences, Intercultural Understand

WS 262. Psychology of Women (PS 262). 3 Credits.
In this course, students examine the complexity of gendered experiences from a psychological science perspective and explore the research regarding gender differences and gender relations. Many approaches are taken to understand gender, including biological, social, evolutionary, cognitive and cultural points of view. The goal is for students to appreciate the complexities of gender and to challenge one’s assumptions and judgments about gender.
Prerequisites: Take PS 101 or WS 101.
Offered: Every year, Fall
UC: Social Sciences, Intercultural Understand
WS 284. Gay and Lesbian Identities and Communities (SO/PS 284). 3 Credits.
This course explores the social, socioeconomic, historical, psychological and political factors that have contributed to our understanding of what it means to be gay or lesbian today. Psychological research on gay and lesbian identity development, the social construction of identity, and the psychological, social and political benefits associated with "identifying" as gay or lesbian, are discussed. The course explores historical events that led to the development of gay and lesbian communities and the benefits of being involved in these communities. The course also explores how the gay and lesbian community has become more mainstream, in both positive and negative ways.
Prerequisites: Take WS 101 or PS 101.
Offered: As needed

This course presents a systematic exploration of the causes and conditions of major social changes. Social movements such as the Civil Rights and Women's movements are studied in terms of their capacity to respond to and generate additional change.
Prerequisites: Take SO 101 or WS 101.
Offered: Every other year
UC: Social Sciences, Intercultural Understanding

WS 300. Special Topics. 3 Credits.
Prerequisite is determined by the offering department.
Offered: As needed

WS 301. Seminar in Women's and Gender Studies. 3 Credits.
This seminar provides an opportunity for students to explore a subject (for example: 20th-century women poets, feminist issues from a global perspective) on an advanced level through interdisciplinary readings. Feminist theory is used to analyze materials that cover literature, psychology, history, political science, sociology and communications. Students are encouraged to take responsibility for making decisions about how the material is taught, and for working together to "own" the experience of scholarship. This course is required of Women's Studies minors. Junior or senior status is required.
Prerequisites: Take WS 101.
Offered: Every other year, Spring

WS 304. Sociology of Gender (SO 304). 3 Credits.
This course focuses on how society constructs notions/images of femininity and masculinity and how this influences our lives. Students look at cultural views of language, body and the media, as well as theoretical approaches to understanding the complexities of gender distinctions in our society.
Prerequisites: Take two courses from Women's Studies.
Offered: Every year

WS 308. U.S. Women's History (HS 308). 3 Credits.
This course covers the experience of women in America before 1900. Women's work in the family and community is stressed. Individual research is required.
Prerequisites: Take WS 101.
Offered: Every year, All

WS 309. Women in America: 1920-Present (HS309). 3 Credits.
This course covers the experience of women from the beginnings of the "jazz age" to the end of the century.
Prerequisites: Take WS 101.
Offered: Every year, All

WS 311. Diversity in the Media (MSS 311). 3 Credits.
This course examines the role of media in the construction of social categories such as gender, race, class and sexual orientation, focusing primarily on the first two. Students learn about the media as one of a number of social institutions including religion, education and family, which influence our understanding of cultural difference. The course presents a variety of perspectives that address diversity in relation to both print and electronic media, emphasizing popular culture. Media diversity issues are analyzed in relation to ownership, representation, audience reception, and the media workforce. Junior standing required.
Prerequisites: Take WS 101; or COM 120 and COM 140.
Offered: Every year, Spring

WS 315. Women Artists (AR 325). 3 Credits.
This art history course focuses on the lives and artwork of women such as Hildegard von Bingen, Mary Cassatt, Frida Kahlo and Georgia O'Keefe.
Prerequisites: Take AR 102 AR 103 AR 104 AR 105 or WS 101.
Offered: As needed

WS 325. Witches and Werewolves in the Early Modern World (HS 326). 3 Credits.
This course explores the general belief in witchcraft and other supernatural creatures in the larger context of religion and culture in the early modern world. Participants examine how belief in the supernatural led to a widespread fear and persecution of individuals deemed witches or other consorts of the devil. Using the groundbreaking work of historians, and the primary documents of the period, this course examines the origins and processes of the witch trials. Since approximately 75 percent of those in Europe accused of witchcraft were women, the course examines how gender, misogyny and scapegoating shaped the persecution and prosecution of the more vulnerable members of premodern society. More broadly, the class examines how Christianity both affirmed and condemned these beliefs and practices and how people used "superstition" to make sense of the world around them.
Prerequisites: Take WS 101.
Offered: Every other year, Spring

WS 330. Philosophy and Gender (PL 330). 3 Credits.
Students investigate the notions of sex and gender, along with the debate over social versus biological underpinnings of expressions of masculinity and femininity. The relevance of historical views on sex, gender and relations between the sexes to current patterns and developments are considered. Issues facing men and women, as well as policies and reforms designed to address them are examined. Participants also consider the intersection between sex/gender and race, ethnicity, class and sexual orientation. Finally, students consider the impact of gendered perspectives on contemporary philosophy, especially epistemology, ethics and social and political philosophy. Junior standing (or department approval) required.
Prerequisites: Take WS 101.
Offered: Every other year, Spring

WS 335. Images of Women in Psychology and Literature (EN 335). 3 Credits.
This seminar considers the ways in which psychology and literature depict the female experience. Using readings in both traditional and feminist psychological and literary theory, the course analyzes literary texts by and about women. Topics include: gender and genre, female identity formation and the minority experience.
Prerequisites: Take PS 101 or WS 101 and one 200-level English course.
Offered: Every other year, Fall
WS 338. American Literature by Women of Color (EN 338). 3 Credits.
This course presents a study of the diverse literary traditions, themes and narrative strategies employed by non-traditional American women. The ways race, ethnicity and gender affect form, content, language and style of the literature are examined. Writers include: Silko, Erdrich, Morrison, Walker, Angelou, Giovanni, Tan, Kingston, Yamamoto, Cisneros and Viramontes.
Prerequisites: Take one 200-level WS course.
Offered: Every other year, Spring

WS 345. Media Audiences (MSS 345). 3 Credits.
This course examines popular, institutional and academic perspectives on media audiences in the U.S. and abroad. Central topics include how people choose and interpret media content, how marketers and media producers perceive audiences and how media researchers attempt to understand audiences. The course also considers popular assumptions about media effects on audiences and includes an in-depth analysis of fan cultures. Junior standing required.
Prerequisites: Take EN 102 or EN 103H; and COM 120 or WS 101.
Offered: Every other year, Fall

WS 355. Latin American Women Film Directors (LAS 355). 3 Credits.
The course explores the contributions of women filmmakers to cinema in Latin America and the Caribbean and traces the history of the medium in the region. From the golden age of Mexican cinema to the politically and socially engaged efforts of filmmakers in Argentina, Brazil and Cuba, films in Latin America historically have been a reflection of the socioeconomic forces at work in the region. The work of women filmmakers is also a reflection of those forces. In the course, students screen important works by women filmmakers and study how they fit (or don't fit) into the framework created by critics, filmmakers and the public.
Prerequisites: Take WS 101.
Offered: As needed

WS 359. Women Studies Elective. 3 Credits.

WS 370. Intimate Partner Violence Seminar (PS 370). 3 Credits.
This seminar addresses the prevalence, causes and consequences of partner abuse. Etiological models of partner violence are examined from social perspectives (feminist, socioeconomic, anthropological and evolutionary theory), and psychological perspectives (personality disorders, perceived causes and justification of violence). The impact of violence on victims (physical and psychological consequences) is addressed.
Prerequisites: Take two 200-level courses from subjects SO WS PS or CJ.
Offered: As needed, Fall

WS 387. Women and Public Policy (PO 387). 3 Credits.
Students examine the major public policy issues affecting gender relations in the United States today, including: reproductive rights and abortion, labor policy, welfare policy, sexual and domestic violence. Students discover the process by which issues of importance to gender equality have historically emerged on the public agenda, the ways in which policy debate is shaped once an issue becomes a public problem and the competing policy paradigms surrounding these controversial policy issues. Given the possible trauma associated with the topics of the class, students need to use their discretion in signing up to take this class.
Prerequisites: Take PO 131 or WS 101.
Offered: Every other year, Spring

WS 395. Feminist Theory and the Body. 4 Credits.
This course introduces students to various feminist critiques of the body. Students examine how feminism has re-conceptualized the body, and become familiar with the body's linkages to race, class, sexuality and dis/ability. By studying feminist theory, students investigate how the body has been used as a site of cultural, political, social and biomedical meaning as well as a site of performance, commodification and systemic violence. Students gain an understanding of how bodies are influenced and expressed socially; and therefore, are able to conduct and apply scholarly feminist research that is inclusive of theories of the body. This course is for degree completion students only.
Offered: As needed

WS 398. Internship in Women's Studies. 1-3 Credits.
Offered: As needed

WS 399. Independent Study. 3-6 Credits.
Offered: As needed

WS 499. Independent Study. 3-6 Credits.
Offered: As needed
GRADUATE COURSES

Accounting (AC)

AC 613. Financial Statement Analysis. 3 Credits.
In this course, students gain an additional understanding of the accounting numbers that appear in financial statements for accounts such as receivables, deferred revenue and leases. Topics include revenue recognition, income-statement geography, short-term liquidity, working-capital efficiencies, solvency, cash-flow analysis and quarterly reporting. Also considered are the many reporting choices given to firms and how their use of different accounting methods for similar economic events creates challenges for analysts. Instances of questionable financial reporting and strategies that can aid in their discovery are addressed. Firms’ filings of financial statements and note disclosures with the SEC on Form 10-K are examined throughout the course. In addition, the usefulness of governance disclosures contained within firms’ proxy statements is considered. Students cannot receive credit for both AC 613 and AC 640.
Offered: Every year, Fall

AC 620. Financial and Managerial Accounting for Decision Making (MBA 620). 3 Credits.
This course provides an introduction to the use of accounting information for decision making in organizations. Topics include reporting and analysis of financial statement information and the use of managerial decision-making tools to support planning and control. Students can receive credit for either AC 620 or MBA 620 but not both.
Offered: Every year, All

AC 635. Advanced Financial Accounting. 3 Credits.
This course provides an in-depth study of accounting principles and analysis of problems for multi-corporate entities, focusing on business combinations, consolidation concepts and procedures, and intercompany transfers. Includes the accounting for multinational entities, and segmental, interim and SEC reporting. Students learn standard-related research skills and complete several research cases using the FASB codification database.
Prerequisites: Take one undergraduate intermediate accounting course.
Offered: Every year, Fall

AC 640. Financial Statement Analysis. 3 Credits.
In this course, students gain additional understanding of how firms communicate through financial statements. They learn how to use financial statement analysis in strategic decision making. Students learn to interpret financial statements, analyze cash flows and make judgments about the quality of earnings, assets and liabilities. Students cannot receive credit for both AC 613 and AC 640.
Prerequisites: Take one undergraduate intermediate accounting course.
Offered: Every year, Fall

AC 645. Information Assurance. 3 Credits.
This course is designed to broaden and deepen students’ conceptual and technical understanding of the CPA’s attest function, provide students with a framework for analyzing contemporary auditing and assurance issues, and help students understand the complete audit of a client. This course utilizes case studies to study current issues and practices associated with information assurance services.
Prerequisites: Take one undergraduate accounting auditing course.
Offered: Every year, Fall

AC 650. Advanced Accounting Information Systems. 3 Credits.
This course provides students with in-depth knowledge of the role accounting information systems play in a business environment. Using a combination of course delivery methods, this course emphasizes information, communication and networking technology—in the context of business processes, transaction cycles and internal control structures—that enhances the production of accurate and reliable accounting information.
Prerequisites: Take one undergraduate accounting information systems course.
Offered: Every year, Fall

AC 660. Strategic Management Control Systems. 3 Credits.
This course provides students with broad exposure to the ways in which management control systems and management accounting information are used to support various organizations’ strategies. The course involves both textbook/problem-based and case-based learning methods to cover issues related to strategy selection, performance evaluation, organizational profitability, customer profitability, organizational structure, and employee compensation. Special emphasis is placed on ethical considerations, not-for-profit organizations and sustainability issues.
Offered: Every year, Spring

AC 665. Forensic Accounting and Fraud Examination. 3 Credits.
This course provides a survey of forensic accounting and fraud examination. Students gain an understanding of different types of fraud, sources of evidence and analysis of fraud schemes highlighting the skills needed to identify and investigate fraudulent accounting allegations. This course employs case studies to study current issues, practices and techniques related to fraud examination and forensic accounting services.
Offered: Every year, Spring

AC 670. Advanced Business Law, Regulation, Ethics and Reporting Environments. 3 Credits.
In this course, students learn to identify and resolve complex legal and ethical issues typically encountered by businesses. Emphasis is placed on business law topics relevant to the accounting profession. Topics may include agency law and worker classification, formation and performance of contracts, debtors, creditors, guarantors, secured transactions, bankruptcy, federal securities regulation, formation, operation, termination of business entities, and liability of accountants.
Prerequisites: Take one undergraduate business law course.
Offered: Every year, Spring

AC 675. Governmental and Not-For-Profit Accounting. 3 Credits.
This course provides an in-depth study of the financial reporting concepts and standards applicable to state and local governments, and not-for-profit entities such as colleges and universities, health care entities, and voluntary health and welfare organizations. It emphasizes the differences between governmental and private sector (for-profit) accounting. Particular attention is placed on the preparation and analysis of governmental financial reports.
Prerequisites: Take one undergraduate intermediate accounting course.
Offered: Every year, Spring
AC 680. Advanced Federal Income Taxation and Tax Research. 3 Credits.
In this course, students gain the knowledge and understanding of concepts and laws relating to federal income taxation of individuals and entities. In addition, students learn how to apply the knowledge and skills gained from this course in professional tax preparation and tax advisory positions. Some of the topics covered include federal tax process, procedures, accounting and planning, as well as federal taxation of individuals, entities (C corporations, S corporations, partnerships, trusts and estates and exempt organizations) and taxation of property transactions.
Offered: Every year, Spring

AC 688. Seminar in Accounting. 3 Credits.
Permission of the MBA director and School of Business dean is required.
Offered: As needed

AC 689. Independent Study - Accounting. 3 Credits.
Independent research under the guidance of a faculty member. Requires approval by the faculty member, chair of the department, and dean of the School of Business.
Offered: As needed

Advanced Medical Imaging (AMI)

AMI 515. Introduction to Magnetic Resonance Imaging. 3 Credits.
Magnetic resonance imaging is studied as it pertains to diagnostic imaging. Topics include mathematics, physical principles, imaging concepts, equipment, image quality, clinical applications and biologic effects of MRI. Prerequisite: ARRT certification or permission of the department.
Offered: Every year, Spring

AMI 515L. Magnetic Resonance Imaging Principles I - Lab Practicum. 1 Credit.
This course demonstrates the principles presented in the didactic component of the course, AMI 515, Introduction to Magnetic Resonance Imaging. This lab complements the student to develop hands-on skills with the Toshiba Vantage 1.5 Tesla Magnetic Resonance Imaging scanner. Training includes the operation of the hardware and software components of the equipment with the objective to optimize image quality. This course also influences the student's development of patient care skills dealing with claustrophobia and safety concerns regarding MRI. Prerequisite: ARRT certification or permission of the department.
Offered: Every year, Summer

AMI 516. Advanced MRI Principles and Imaging. 3 Credits.
This course is designed for the student who has successfully passed AMI 515 (Introduction to Magnetic Resonance Imaging) and/or for the technologist actively working in the MRI field. The main objective for this course is to expand on the basic MRI physics and advanced MRI imaging applications.
Offered: Every year, Fall

AMI 516L. Magnetic Resonance Imaging Principles II - Lab Practicum. 1 Credit.
This course demonstrates the principles presented in the didactic component of the course, AMI 516 (Advanced MRI Principles and Imaging). This lab complement enables the student to further develop hands-on skills with the Toshiba Vantage 1.5 Tesla Magnetic Resonance Imaging scanner and expand upon the basic MRI physics and advanced imaging applications. Training includes the operation of the hardware and software components of the equipment with the objective to optimize image quality. This course also influences the student's continued development of patient care skills dealing with claustrophobia and safety concerns regarding MRI.
Offered: Every year, Fall

AMI 517. Magnetic Resonance Imaging Clinical I. 2 Credits.
This practicum involves providing clinical experience in the field of magnetic resonance imaging (MRI) at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations in MRI under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework.
Offered: Every year, Fall

AMI 518. Magnetic Resonance Imaging Clinical II. 2 Credits.
This practicum is a continuation of AMI 517 and involves providing clinical experience in the field of magnetic resonance imaging (MRI) at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations in MRI under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework.
Offered: Every year, Spring

AMI 523. Advanced Sectional Anatomy. 3 Credits.
This sectional anatomy course includes head, thorax, abdomen, pelvis and extremities. In addition to coronal, sagittal and axial imaging examined, oblique sections and three-dimensional reconstruction are included. Only for students enrolled in the AMI program.
Offered: Every year, Summer

AMI 530. Mammography and Bone Densitometry Clinical I. 2 Credits.
This practicum involves providing clinical experience in the field of mammography and bone densitometry at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework.
Offered: Every year, Fall
AMI 531. Mammography and Bone Densitometry Clinical II.  2 Credits.

This practicum is a continuation of AMI 530 and involves providing clinical experience in the field of mammography and bone densitometry at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework. Offered: Every year, Spring

AMI 534. Bone Densitometry.  1 Credit.

This distance learning course provides students with an overview of the history of bone densitometry as well as knowledge in the areas of osteoporosis and bone health, equipment, quality control, patient preparation and safety, and scanning. The course encompasses didactic components to cover all relevant material currently consistent with the ARRT certification examination. Prerequisite: ARRT Registered Radiologic Technologist. Offered: Every year, Summer Online

AMI 537. Computed Tomography Clinical I.  2 Credits.

This practicum involves providing clinical experience in the field of computed tomography (CT) at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations in CT under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework. Offered: Every year, Fall

AMI 538. Introduction to CT Scanning.  3 Credits.

Computed tomography (CT) scanning as it pertains to diagnostic imaging is studied. Topics include principles, physics, image reconstruction, equipment, image quality, radiation dose, specialized techniques, diagnostic applications and some cross-sectional anatomy. Prerequisite: ARRT certification or permission of the department. Offered: Every year, Summer

AMI 538L. Computed Tomography Lab I.  1 Credit.

The course demonstrates the principles presented in the didactic component of the course, AMI 538, and enables the student to develop hands-on skills with the Toshiba Aquilion 64 slice computed tomography unit. Training includes the operation of the hardware and software components of the equipment with the objective to optimize image quality and minimize patient radiation dose. Prerequisite: ARRT certification or permission of the department. Corequisites: Take AMI 538. Offered: Every year, Summer

AMI 539. Computed Tomography Clinical II.  2 Credits.

This practicum is a continuation of AMI 537 and involves clinical experience in the field of computed tomography at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations in CT under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework. Offered: Every year, Spring

AMI 540. Principles of Mammography.  3 Credits.

This course provides an overview of the history of mammography as well as fundamental knowledge in the areas of anatomy, physiology and pathology of the breast, mammographic equipment and instrumentation, positioning and technique for mammography. Also covered are methods of patient education and quality control. The course prepares students for the ARRT Mammography Certification Examination and meets all ACR/FDA training requirements. Prerequisite: ARRT certification or permission of the department. Offered: Every year, Summer

AMI 541L. Mammography and Bone Densitometry Lab.  2 Credits.

The course demonstrates the principles presented in the didactic component of the courses, AMI 534 and AMI 540, and enables the student to develop hands-on skills with the on-site Hologic Mammography and Bone Densitometry units. Training includes the operation of the hardware and software components of the equipment with the objective to optimize image quality and minimize patient radiation dose. Only for students enrolled in the AMI program. Offered: Every year, Summer

AMI 545. Women's Health and Imaging.  3 Credits.

This course provides a thorough look at women's health and disease with a focus on diagnostic imaging. Students examine common health factors for females including pathophysiology, family history, socioeconomic status and diagnostic procedures. This course investigates common health topics for the betterment of overall care of self, community and the health care consumer enabling the health professional to answer questions and have a general understanding of the diseases that may be encountered in health care practice. Program content is dynamic and is modified each year to represent the most current data and statistics. Prerequisite: Successful completion of all previously sequenced programmatic coursework. Offered: Every year, Fall

AMI 560. Pathology for CT and MRI Technologists.  3 Credits.

This course covers identification, pathophysiology and pattern recognition of common pathologies observed in computed tomography and magnetic resonance imaging. Normal and abnormal comparisons are presented. Prerequisite: Successful completion of all previously sequenced programmatic coursework. Offered: Every year, Spring

AMI 570. Capstone I.  1 Credit.

This capstone course is the first in the advanced medical imaging curriculum, which integrates advanced imaging and business course material. Students begin developing a consulting/case project that is relevant to current and emerging practice areas in imaging. Students apply knowledge of project management, critical analysis and professional presentations. Prerequisite: Successful completion of all previously sequenced programmatic coursework. Offered: Every year, Fall

AMI 575. Capstone II.  3 Credits.

This final capstone course integrates the knowledge and skills gained throughout the program. The course focuses on the design and implementation of a consulting case/project, including a comprehensive analysis of organizational issues and proposal of appropriate recommendations and implementation plans. The result is a professionally written consulting paper and/or presentation. Prerequisite: Successful completion of all previously sequenced programmatic coursework. Offered: Every year, Spring
Anesthesiology (ANE)

ANE 500. Medical Terminology. 1 Credit.
In this self-paced, self-study course, students complete a programmed learning text and take a final exam at the completion of the text. Course includes word formulation, association to body systems, standard abbreviations and various surgical procedures.
Offered: Every year, Summer

ANE 501. Ethics and Professionalism in Health Care. 1 Credit.
This course covers the fundamentals of professionalism, HIPAA compliance, ethics and the student and ethics of practice. Topics include treating diverse populations, religious considerations, provider-patient challenges, end of life, and case discussions.
Offered: Every year, Summer

ANE 503. Introduction to Clinical Anesthesia. 2 Credits.
This course includes a brief history of anesthesia. Topics include hazards, universal precautions and infection control, personal protection, approaching the patient, the perioperative period, vascular access, obtaining arterial blood samples, types of anesthesia, the anesthesia care team, application of ASA basic monitoring requirements, preparing the operating room for the first case of the day, introduction to patient positioning, introduction to induction, maintenance and emergence from anesthesia, and identifying and managing anesthetic emergencies. This course has both a final practical exam and a written final exam at the end of the semester.
Offered: Every year, Summer

ANE 503L. Intro to Clinical Anesthesia Lab. 0 Credits.
Lab to accompany introduction to clinical anesthesia course.
Offered: Every year, Summer

ANE 510. Anesthesia Laboratory I. 1 Credit.
This course is the first of a three-semester sequence exploring the physical principles of measurements, operation of breathing circuits and mechanical ventilation. Students spend time in the lab setting up and running experiments, collecting data and building PowerPoint presentations that are delivered in class. Labs begin with the study of pressure measurements, flow and resistance, laminar and turbulent flow, Venturi principles, setting gas flows and concentrations, investigating carbon dioxide absorption, solubility and diffusivity of gases, time constants, compliance and resistance of breathing circuits, the circle breathing system, mechanical ventilation, and Mapleson breathing systems. Labs are built to complement material covered in courses ANE 520 Physical and Chemical Principles of Anesthesia and ANE 550 Anesthesia Delivery Systems.
Offered: Every year, Summer

ANE 512. Anesthesia Laboratory II. 1 Credit.
The second of a three-semester course, this sequence focuses on the principles of patient monitoring systems. Students spend time in the lab setting up and running experiments, collecting data and building PowerPoint presentations to deliver in class. They explore the system response and how it affects the displayed waveforms and waveform parameters. They study basic measurements; ECG, noninvasive and invasive blood pressure measurements, pulse oximetry, capnography, airway pressures and flows, thermal dilution cardiac output, Doppler velocity measurement, gas emboli from entraining air into the cardiovascular system. Labs are constructed to complement material covered in the course ANE 554 Patient Monitoring.
Offered: Every year, Fall

ANE 514. Anesthesia Laboratory III. 1 Credit.
This is the third of a three-semester sequence, focusing on the principles of patient monitoring systems and anesthesia machine operation. Students explore Starling forces, carbon monoxide production in dry soda lime, catastrophic failure modes of different anesthesia machines, how various anesthesia machines respond to loss of oxygen and air supply, and the loss of power, and the effectiveness of various scavenging systems. The last lab of the semester is a student design lab in which the students identify a clinical problem of interest, design an experiment to answer the question, run the experiment, collect the data, analyze the data, and develop a PowerPoint presentation that is presented to all students. Labs are built to complement material covered in courses ANE 550 Anesthesia Delivery Systems, ANE 554 Patient Monitoring, and ANE 532 and ANE 534 Cardiovascular Physiology I and II.
Offered: Every year, Spring

ANE 517L. Anatomy for Anesthetists Lab. 0 Credits.
Lab to accompany ANE 517.
Offered: Every year, Summer

ANE 517. Anatomy for Anesthetists. 4 Credits.
This course is composed of 4 credit hours of lecture and dissection. The focus of the course is on the nervous system as the basis of regional anesthesia and control of the heart, the vascular system in terms organ perfusion as well as vascular access. Emphasis is placed on the chest, heart, lungs, brain, spinal cord, kidneys, abdomen and limbs.
Offered: Every year, Summer

ANE 520. Physical and Chemical Principles of Anesthesia. 2 Credits.
This course presents an introduction to units of measure and dimensional analysis; mathematical functions; pressure, flow and resistance; partial pressures; gas laws; solubility and diffusion; osmosis; work energy and power; temperature and thermodynamics; analogous electric circuits; electrical safety; stoichiometry fires and explosions; isotopes and radiation.
Offered: Every year, Summer

ANE 530. Introduction to Cardiovascular Physiology. 2 Credits.
This course is composed of 2 hours of lecture each week. Students are provided with introduction to cardiovascular physiology.
Offered: Every year, Summer

ANE 532. Cardiovascular Physiology I. 3 Credits.
This course includes a review of hemodynamics and cardiovascular system; cardiac cycle; the cardiac myocyte; nervous control of the heart; electrocardiogram; control stroke volume and cardiac output; endothelial cell; microcirculation and solute exchange; vascular smooth muscle and control of blood vessels; IV fluid therapy; administration of blood products and plasma volume expanders.
Offered: Every year, Fall

ANE 532L. Cardiovascular Physiology Lab. 0 Credits.
Lab to accompany ANE 532.
Offered: Every year, Fall

ANE 533. Introduction to Pulmonary Physiology. 2 Credits.
This course is composed of 2 hours of lecture each week.
Offered: Every year, Summer
ANE 534. Cardiovascular Physiology II. 2 Credits.
This course covers specialization in individual circulations; cardiovascular receptors and reflexes; coordinated cardiovascular responses; atherosclerosis; ischemic heart disease; acute coronary syndromes; valvular heart disease; heart failure; cardiomyopathies; dysrhythmias; hypertension; congenital heart disease; effects of inhalation anesthesia.
Offered: Every year, Spring

ANE 534L. Cardiovascular Physiology II Lab. 0 Credits.
Lab to accompany ANE 534
Offered: Every year, Spring

ANE 535. Pulmonary Physiology. 2 Credits.
This course explores pulmonary physiology. Topics include the atmosphere; functional anatomy of the respiratory tract; elastic forces and lung volumes; respiratory resistance; control of breathing; pulmonary ventilation; pulmonary circulation and non-respiratory functions; ventilation and perfusion; diffusion of respiratory gases; mechanical ventilation; carbon dioxide; oxygen and hemoglobin.
Offered: Every year, Fall

ANE 537. Pulmonary Physiology II. 2 Credits.
This course explores respiratory function in pregnancy; neonates and children; respiration during exercise and natural sleep; hypoxia and anemia; hyperoxia and oxygen toxicity; high altitude flying; effects of smoking; acute lung injury; lung transplantation; chronic hypoxia and anemia; ventilatory failure, airway disease; pulmonary vascular disease; parenchymal lung disease; acute lung injury; and artificial ventilation.
Offered: Every year, Fall

ANE 538. Autonomic Nervous System Physiology and Pharmacology. 2 Credits.
Topics include classical and new chemical neurotransmitters; presynaptic modulation and release of neurotransmitter theory; re-uptake and termination of neurotransmitters; action potentials and junction potentials; central autonomic control; peripheral autonomic nervous system; autonomic neuroeffector junction; autonomic neuromuscular transmission; dopaminergic neurotransmission and receptors; noradrenergic transmission and receptors; purinergic neurotransmission; acetylcholine and muscarinic receptors; acetylcholine and nicotinic receptors; acetylcholine esterase; amino acid, peptidergic and nitrergic neurotransmission; Cardiac and visceral afferents; autonomic control of airways; autonomic control of cardiac function; neurogenic control of blood vessels; autonomic control of cerebral circulation and the renal circulation.
Offered: Every year, Fall

ANE 539. Renal Physiology. 1 Credit.
This course covers basic renal processes, excretion of organic molecules, control of sodium and water excretion, regulation of extracellular volume and osmolality, renal hemodynamics, and regulation of sodium, potassium and acid-base balance. Renal pathology includes diabetic nephropathy; interstitial nephritis; acute tubular necrosis; renal allograft rejection; and dialysis.
Offered: Every year, Spring

ANE 540. General Pharmacology. 3 Credits.
This course covers pharmacokinetics and pharmacodynamics, drug absorption, distribution, action and elimination, membrane transporters, pharmacogenetics, drug therapy, drug addiction and drug abuse, therapy of hypertension, pharmacotherapies of epilepsies, therapy of hypercholesterolemia and dyslipidemia, drug therapy of inflammation, chemotherapy of microbial diseases, drugs affecting gastrointestinal function, hormones and hormone antagonists including control of diabetes.
Offered: Every year, Spring

ANE 544. Pharmacology for Anesthesia I. 2 Credits.
In this course, emphasis is placed on drugs specifically related to the practice of anesthesia: inhaled anesthetics, local anesthetics, opioids, hypnotics and sedatives, anxiolytics, muscarinic agonists and antagonists, anticholinesterase, neuromuscular junction blockers, autonomic ganglia, adrenergic agonists and antagonists, serotonin agonists and antagonists.
Offered: Every year, Spring

ANE 546. Pharmacology for Anesthesia II. 2 Credits.
In this course, emphasis is placed on histamine antagonists, dopaminergic agonists, pharmacology of asthma, analgesic antipyretic agents, diuretics, vasopressin, renin and angiotensin, treatment of myocardial ischemia, pharmacotherapy of congestive heart failure, antidyssrhythmics, calcium channel blockers, pharmacotherapy of diabetes, procoagulants and anticoagulants, thrombolitics and antiplatelet drugs, and antimicrobials.
Offered: Every year, Summer

ANE 550. Anesthesia Delivery Systems. 2 Credits.
This course presents an introduction to the anesthesia delivery system including gas distribution systems, anesthesia machines, breathing circuits, anesthesia ventilators, scavenging waste gases and monitoring pollution, and risk management, along with critical incidents in anesthesia and resuscitation equipment.
Offered: Every year, Summer

ANE 554. Patient Monitoring. 3 Credits.
This course covers the fundamental principles of measurement; measuring adequacy of perfusion, the principles, application and interpretation of various monitoring modalities including: ECG, invasive and noninvasive blood pressure, oximetry, temperature, cardiac output, respiratory gas analysis, monitoring the breathing circuit and the lungs. Additional topics include intraoperative neurophysiologic monitoring, renal function, coagulation/hemostasis and neuromuscular junction.
Offered: Every year, Fall

ANE 556. Advanced Patient Monitoring and Anesthesia Delivery Systems. 3 Credits.
This course covers advanced concepts of arterial pressure monitoring, ICP monitoring, transesophageal echocardiography, electric and radiation safety, and the hazards and complications of monitoring patients during anesthesia. Additional topics include examination of the newest generation of anesthesia delivery systems and evaluation of catastrophic failure modes, troubleshooting and resolving problems during anesthesia delivery, and discussion of advanced concepts of mechanical ventilation.
Offered: Every year, Summer
ANE 560. Principles of Airway Management. 2 Credits.
Students learn to recognize the difficult airway and have an opportunity to practice basic airway management techniques including pre-oxygenation, bag/mask ventilation, simple oral and nasal intubation techniques, oral and nasal airways, and application of laryngeal mask. The course involves scheduled time in the mock operating room to practice and become proficient at basic airway management skills. There is a mannequin-based practical exam in addition to an in-class final exam.
Offered: Every year, Summer

ANE 563. Principles of Airway Management II. 2 Credits.
The study of airway management continues with advanced techniques of airway management including fiber optic oral and nasal intubation, use of the retrograde wire, Combitube, light wands, placement of double lumen tubes and complications of endotracheal intubation. Students are required to spend time in the mock operating room to become proficient at each technique. There is a mannequin-based practical exam in addition to an in-class final exam.
Offered: Every year, Fall

ANE 563L. Principles of Airway Management II Lab. 0 Credits.
Lab to accompany ANE 563.
Offered: Every year, Fall

ANE 565. Advanced Airway Management. 1 Credit.
Students learn management of the difficult airway, including identification of appropriate airway management techniques for the difficult pediatric and adult airway, review of the ASA Difficult Airway Algorithm, physiologic response to intubation and the surgical airway. Students are required to spend time in the mock operating room to develop the ability to assess the airway and apply the most appropriate technique to use for normal and difficult airways, including two additional back-up approaches. There is a mannequin-based simulation practical exam in addition to an in-class final exam.
Offered: Every year, Summer

ANE 570. Anesthesia Principles and Practice I. 3 Credits.
This is the first of a three-semester sequence of courses in which students are introduced to the clinical management of patients within the entire range of age and illness undergoing a wide spectrum of surgical procedures. Students learn to develop efficacious and safe anesthetic plans for medically diverse patients. Students are presented with unique issues from each type of patient, and learn how to modify a plan to accommodate these complexities. Students learn to identify specific concerns unique to each surgical subspecialty. The course consists of both didactic lectures and small group discussions, which focus on the specific needs of certain patient populations and the unique requirements they impose on the anesthesia team. The first segment includes anesthesia and co-morbidities for gastrointestinal surgery, gynecologic surgery, common orthopedic surgery, genitourinary surgery, ophthalmic surgery and otolaryngology surgery.
Offered: Every year, Fall

ANE 570L. Anesthesia Principles and Practice I Lab. 0 Credits.
Lab to accompany ANE 570.
Offered: Every year, Fall

ANE 572. Anesthesia Principles and Practices II. 3 Credits.
This course is a continuation of ANE 570 with cases of increasing complexity and additional comorbidities. Topics include anesthesia and co-morbidities for plastic/reconstructive surgery, common pulmonary thoracic surgery, general surgery for endocrine diseases, major GI surgical procedures, complex orthopedic surgeries, renal disease and complex genitourinary surgery, vascular surgery, obstetric procedures, common pediatric surgeries and neonatal surgery.
Offered: Every year, Spring

ANE 572L. Anesthesia Principles and Practices II Lab. 0 Credits.
Lab to accompany ANE 572.
Offered: Every year, Spring

ANE 574. Anesthesia Principles and Practices III. 3 Credits.
This course is a continuation of ANE 572 with cases of increasing complexity and additional co-morbidities. Topics include anesthesia and co-morbidities for neurosurgery, cardiac surgery, complex neonatal and pediatric surgery, transplant surgery, pediatric cardiac surgery, trauma and complex orthopedic surgery, anesthesia outside of the operating room suite, managing burns and shock, anesthetic complications and practice-related issues.
Offered: Every year, Summer

ANE 576. Regional Anesthesia I. 2 Credits.
Through classroom lectures, students learn about the overall practice of regional anesthesia and how to determine when regional anesthesia is preferred over general anesthesia. Students gain an understanding of the anatomy specific for each type of regional block as well as techniques for establishing the block and the local anesthetics. Students learn and practice sterile techniques and placement of spinal and epidural blocks using the patient simulator. Management of the complications associated with these blocks is discussed. The course includes a skills lab, in which students are practice the techniques of neuraxial blockade to reinforce concepts taught in the lecture portion of the course. There is a practical final exam in addition to the in-class final exam.
Offered: Every year, Spring

ANE 576L. Regional Anesthesia I Lab. 0 Credits.
Lab to accompany ANE 576.
Offered: Every year, Spring

ANE 577. Regional Anesthesia II. 2 Credits.
Students gain an understanding of the use of ultrasound guidance and peripheral nerve stimulation for peripheral nerve blocks. They learn anatomy and surface landmarks and proper placement of local anesthetics for femoral, popliteal, ankle, sciatic, cervical plexus, recurrent laryngeal nerve and retrobulbar blocks. Effective management of complications arising from these blocks is presented. The course also includes a skills lab in which students practice the techniques of neural blockade to reinforce concepts taught in the lecture portion of the course. There is a practical final exam in addition to the in-class final exam.
Offered: Every year, Spring

ANE 579. Pre-Anesthetic Evaluation. 2 Credits.
This course covers techniques for examining patients in the process of the preoperative patient evaluation, gathering data by patient interviews and chart reviews, including basic ECG interpretation. It includes recording of relevant laboratory data as well as the summarization of preoperative consultations and special studies.
Offered: Every year, Summer
ANE 585. Simulation for Assessment of Clinical Acumen. 1 Credit.
Students are faced with various clinical scenarios, which are delivered through a mannequin, and work individually to appropriately assess and manage each situation.
Offered: Every year, Summer

ANE 587. Intensive Clinical Practicum. 1-5 Credits.
Students who are having difficulty with clinical skills or translating knowledge into clinical practice may be required to spend additional time outside of the normal coursework in the operating room with a preceptor to develop skills and knowledge that are equivalent to other students in the program. This may include weekend, evening or vacation time.
Offered: Every year, All

ANE 588. Individual Directed Study. 1-5 Credits.
This course permits first-year students to study a particular problem or area of emphasis in anesthesiology that is not covered in-depth in the program curriculum, under the direction of a faculty member. This may be used for student research.
Offered: Every year, All

ANE 589. Remedial Studies. 1-5 Credits.
This course permits first-year students, under the direction of a faculty member, to enroll for review in an area of emphasis in anesthesiology in which the student is having difficulty.
Offered: Every year, All

ANE 590. Clinical Anesthesia I. 2 Credits.
During seminars two through four of the program, students develop knowledge and skills in delivering anesthesia and managing patients receiving anesthesia; in patient interviewing and physical examination; vascular access; and basic airway management. Clinical activity occurs at the end of each semester in the first year of the program.
The knowledge and skills defined in the task progression must be mastered for each clinical rotation before the student may advance to the next clinical rotation. Each successive semester provides increasing responsibility and increased complexity for the student. Students are assigned to a single clinical site for the entire first year of the program.
(45 hours/week for 4.5 weeks)
Offered: Every year, Fall

ANE 592. Clinical Anesthesia II. 2 Credits.
This is a continuation of ANE 590, the three-semester sequence of hospital-based clinical education and training. (45 hours/week for 5.5 weeks)
Offered: Every year, Spring

ANE 594. Clinical Anesthesia III. 3 Credits.
This is a continuation of ANE 592, and is the last semester of the three-semester clinical sequence. By the end of the semester IV, students should be able to deliver a safe anesthetic for an ASA physical status I patient with an uncomplicated airway. The student must be able to effectively participate as a member of the anesthesia care team in more difficult cases up to ASA physical Status III. (45 hours/week for 7.5 weeks)
Offered: Every year, Summer

ANE 650. Second-Year Seminar I. 2 Credits.
The course is based on a four-week clinical rotation cycle and is delivered in real-time by teleconference throughout the U.S. During the first week, students deliver a PowerPoint presentation on particular patient and procedure in whose care they participated. In week two, students present an article from the current anesthesia literature. In week three, students are given a patient scenario and asked to analyze the untoward outcome hazard or complication, and describe how the patient may be better managed from careful attention to monitoring, rapid detection of the abnormality, and treatment of the problem. In the final week, students deliver a presentation from the surgeon’s perspective, including the patient’s symptomology, the surgical procedure, the intraoperative issues and potential postoperative complications from the surgeon’s and the anesthetic perspectives.
Offered: Every year, Spring

ANE 652. Second-Year Seminar II. 2 Credits.
The course is based on a four-week clinical rotation cycle and is delivered in real-time by teleconference throughout the U.S. During the first week, students deliver a PowerPoint presentation on particular patient and procedure in whose care they participated. In week two, students present an article from the current anesthesia literature. In week three, students are given a patient scenario and asked to analyze the untoward outcome hazard or complication, and describe how the patient may be better managed from careful attention to monitoring, rapid detection of the abnormality, and treatment of the problem. In the final week, students deliver a presentation from the surgeon’s perspective, including the patient’s symptomology, the surgical procedure, the intraoperative issues and potential postoperative complications from the surgeon’s and the anesthetic perspectives.
Offered: Every year, Fall

ANE 654. Second-Year Seminar III. 2 Credits.
The course is based on a four-week clinical rotation cycle and is delivered in real-time by teleconference throughout the U.S. During the first week, students deliver a PowerPoint presentation on particular patient and procedure in whose care they participated. In week two, students present an article from the current anesthesia literature. In week three, students are given a patient scenario and asked to analyze the untoward outcome hazard or complication, and describe how the patient may be better managed from careful attention to monitoring, rapid detection of the abnormality, and treatment of the problem. In the final week, students deliver a presentation from the surgeon’s perspective, including the patient’s symptomology, the surgical procedure, the intraoperative issues and potential postoperative complications from the surgeon’s and the anesthetic perspectives.
Offered: Every year, Summer

ANE 670. Anesthesia Review I. 1 Credit.
Students are required to read specific chapters in a nationally recognized authoritative textbook during their second-year clinical rotations, and are tested on the contents of those chapters at the end of each four-week rotation. Required reading is linked to specialty rotations and general rotations.
Offered: Every year, Fall

ANE 672. Anesthesia Review II. 1 Credit.
Students are required to read specific chapters in a nationally recognized authoritative textbook during their second-year clinical rotations and be tested on the contents of those chapters at the end of each four-week rotation. Required reading is linked to specialty rotations and general rotations.
Offered: Every year, Spring
ANE 674. Anesthesia Review III. 1 Credit.
Students are required to read specific chapters in a nationally recognized authoritative textbook during their second-year clinical rotations, and are tested on the contents of those chapters at the end of each four-week rotation. Required reading is linked to specialty rotations and general rotations.
Offered: Every year, Summer

ANE 687. Individual Clinical Practicum. 1-5 Credits.
This course permits students to enroll for review and participation in clinical areas where the student requires or requests additional clinical work. This may include general rotations or subspecialty rotations of clinical anesthesia.
Offered: Every year, All

ANE 688. Individual Directed Studies. 1-5 Credits.
This course permits students in their final year to study a particular problem or area of emphasis in anesthesiology that is not covered in-depth in the program curriculum, under the direction of a faculty member. This may be used for student research.
Offered: Every year, All

ANE 690. Clinical Anesthesia IV. 6 Credits.
During the second year (final 12 months) of the program, students are in the operating room full time. Clinical rotations are assigned in three- or four-week blocks. Rotations include open and laparoscopic surgery for: general surgery; orthopedic surgery; ophthalmology; genitourinary surgery; gynecology; ear, nose and throat; vascular surgery; thoracic surgery, trauma surgery and transplantation as well as anesthetizing sites outside of the operating room in radiology, the gastrointestinal lab and the electrophysiology lab. Students also have mandatory four-week rotations in recognized subspecialty areas of anesthesia: pediatrics; obstetrics; neurosurgery; and cardiac surgery. Clinical rotations are scheduled in both academic and private practice hospitals in many states across the country.
Offered: Every year, Fall

ANE 692. Clinical Anesthesia V. 6 Credits.
This course is a continuation of ANE 690. (45 hours/week for 15 weeks)
Offered: Every year, Spring

ANE 694. Clinical Anesthesia VI. 6 Credits.
This course is a continuation of ANE 692. (45 hours/week for 15 weeks)
Offered: Every year, Summer

Biology (BIO)

BIO 502. Special Topics. 2 Credits.
Offered: As needed

BIO 505. Writing and Science. 3 Credits.
This course reviews how scientific results and ideas are communicated and reviewed. Course content includes the storage and retrieval of scientific information, data presentation (table, figures, graphics), the writing of reports and papers as well as the preparation of publications for peer review. Copyright, patent law and the ethical issues involved in scientific communication also are considered. Assignments include oral and written presentations and attendance at assigned seminars and meetings.
Offered: Every year, Fall

BIO 510. Special Topics. 3-4 Credits.
Offered: As needed

BIO 515. Advanced Biochemistry. 4 Credits.
This course offers advanced insights into major areas of biochemistry, including the structure and function of biological molecules, cell and membrane structure and function, bioenergetics and enzyme function, and cellular metabolism. This is a suitable prerequisite for many graduate courses.
Offered: Every year, Spring

BIO 521. Stem Cell Biology. 3 Credits.
This course provides a comprehensive overview of stem cell biology. Participants explore the topics of embryonic and adult stem cells, stem cell characteristics, reprogramming, stem cell therapies and tissue regeneration. Primary research literature associated with each topic is discussed and students gain an understanding of the role of stem cells in health and disease.
Offered: Every year, Spring

BIO 523. Classical Genetics. 1 Credit.
This 1-credit course is aimed at graduate students who are preparing to teach in the biological sciences and are preparing for the PRAXIS exam-specifically the Biology Content Test. In this interactive course, students review foundational information pertaining to classical genetics and further develop a knowledge base by participating in in-depth examination of primary research papers.
Offered: As needed

BIO 524. Evolution. 1 Credit.
This 1-credit course is aimed at graduate students who are preparing to teach in the biological sciences and are preparing for the PRAXIS exam-specifically the Biology Content Test. In this interactive course, students review foundational information pertaining to evolution and further develop a knowledge base by participating in in-depth examination of primary research papers.
Offered: As needed

BIO 525. Diversity of Life and Organismal Biology. 2 Credits.
This 2-credit course targets graduate students who are preparing to teach in the biological sciences and are preparing for the PRAXIS exam-specifically the Biology Content Test. In this interactive course, students review foundational information pertaining to organismal biology and further develop a knowledge base by participating in in-depth examination of primary research papers.
Offered: As needed

BIO 526. Ecology. 2 Credits.
This 2-credit course targets graduate students who are preparing to teach in the biological sciences and are preparing for the PRAXIS exam-specifically the Biology Content Test. In this interactive course, students review foundational information pertaining to ecology and further develop a knowledge base by participating in in-depth examination of primary research papers.
Offered: As needed

BIO 548. Vertebrate Natural History. 4 Credits.
This course involves the observation, collection and identification of terrestrial and aquatic vertebrate animals. Emphasis is placed on life histories of local species. There are frequent field trips. This course primarily serves the graduate science requirements of MAT students. Students enrolling in this course are expected to complete course goals beyond those students enrolled in BIO 218. (2 class hrs., 4 lab hrs.)
Offered: As needed
BIO 562. Bioinformatics. 3 Credits.
This hands-on course is for students seeking to understand methods of sequence and structural analysis using nucleic acid and protein databases. An understanding of the database format provides the basis for sequence analysis and alignment to determine common evolutionary origins, RNA secondary structure, gene prediction and regulation, protein structure prediction and classification, genome analysis and analysis of microarrays.
Offered: As needed

BIO 568. Molecular and Cell Biology. 4 Credits.
This course examines the molecular biology of the cell, including the structure and composition of the cell's macromolecules, cell organelle structure, biosynthesis and regulation, and the mechanisms by which the cell communicates with its external environment and other cells.
Offered: Every year, Fall

BIO 571. Molecular Genetics. 4 Credits.
This study of the prokaryotic and eukaryotic genetic material includes transcription, translation, DNA replication and repair, gene cloning techniques, the regulation of the synthesis of gene products and genomics. Emphasis is placed on new genetic techniques that are used in industry and medicine.
Offered: Every year, Fall

BIO 605. DNA Methods Laboratory. 4 Credits.
These laboratories enable students to develop hands-on experience with the basic techniques in cell biology and molecular biology pertaining to DNA purification, modification and analysis.
Prerequisites: Take BIO 571.
Offered: Every year, Fall

BIO 606. Protein Methods Laboratory. 4 Credits.
These laboratories enable students to develop hands-on experience with the basic techniques in cell biology and molecular biology pertaining to protein purification and analysis.
Prerequisites: Take BIO 515.
Offered: Every year, Fall

BIO 649. Independent Research. 2 Credits.
Students work independently to define and conduct original research. This course is required for students anticipating thesis work in Molecular and Cell Biology, and is conducted under the guidance and with the approval of a thesis adviser and thesis committee.
Offered: As needed

BIO 650. Thesis I in Molecular and Cell Biology. 4 Credits.
This course is a requirement for the thesis option within the MS in Molecular and Cell Biology. Students must demonstrate both breadth and depth of knowledge in their field of specialization. They also must demonstrate scientific research skills and present their findings to a thesis committee and the greater molecular and cell biology community.
Prerequisites: Take BIO 649.
Offered: Every year, All

BIO 651. Thesis II in Molecular and Cell Biology. 4 Credits.
Thesis II is a requirement for the thesis option MS in Molecular and Cell Biology. Students complete their independent research project, write an original thesis describing their research results, defend their thesis in front of a thesis committee, and give a presentation to the greater molecular and cell biology community.
Prerequisites: Take BIO 650 BIO 688.
Offered: Every year, All

BIO 675. Comp Exam in Molecular and Cell Biology. 2 Credits.
The written comprehensive exam is a requirement of the non-thesis option for the MS in Molecular and Cell Biology. Students must demonstrate both breadth and depth of knowledge by illustrating a command of the subject matter obtained from individual courses into unified concepts which link the student's own specialization to other fields of study. Students are encouraged to meet with the program director before registering for the comprehensive exam. Minimum grade of a B- is required to pass the comprehensive examination.
Prerequisites: Take a minimum of four of the following courses: BIO 515 BIO 568 BIO 571 BIO 605 BIO 606.
Offered: Every year, Fall and Spring

BIO 688. Independent Study. 1-4 Credits.
Offered: As needed

BIO 689. Independent Study. 1-4 Credits.
Offered: As needed

Biomedical Sciences (BMS)

BMS 502. Research Methods. 4 Credits.
This course involves topics related to developing scientific, analytical and laboratory skills, including written and oral communication, critical thinking and reasoning, scientific inference and information literacy. The purpose of the course is to examine, discuss and perform current methods used by research scientists and health care workers. Topics include recombinant DNA and protein techniques, Enzyme Linked Immunosorbent Assays, as well as experimental design and data analysis.
Offered: Every year, Fall and Spring

BMS 508. Advanced Biology of Aging. 3 Credits.
Why we age has been the eternal question and the most unsolved mystery in the history of mankind. However, we are gradually able to elucidate some of the secrets that regulate aging processes. This course focuses on the fundamental physiological deviations that occur during the aging process in individual tissue and organ systems and the various theories that attempt to define the reasons for these deviations. The course also emphasizes pathologies related to aging that are time regulated alterations in cellular, physiological and biochemical functions.
Offered: As needed

BMS 510. Biostatistics. 3 Credits.
This course covers the application of statistical techniques to the biological and health sciences. Emphasis is on mathematical models, collection and reduction of data, probabilistic models estimation and hypothesis testing, regression and correlation, experimental designs and non-parametric methods.
Offered: As needed

BMS 511. Writing for Scientists. 3 Credits.
Students develop skills in expository writing in the context of scientific forms. This course covers how to construct a hypothesis and develop an argument through analysis and critical thinking, how to write and present research papers, and other related topics. Intensive written exercises draw on student experience to clarify professional expression in practical situations. Readings include journalistic and scientific articles.
Offered: As needed
BMS 515. Advanced Pathophysiology I. 3 Credits.
Essential concepts of pathophysiology are emphasized. Normal function and selected disorders are studied especially as they relate to homeostatic and defense/repair mechanisms. Where appropriate the course includes clinical correlations of disease states with symptoms and physical findings.
Offered: Every year, Fall

BMS 516. Advanced Pathophysiology II (NUR 522). 3 Credits.
Concepts of pathophysiology are continued in this course, with an emphasis on selected disorders of the human system. Relationships between normal physiologic function, pathogenesis and pathology are discussed. The course includes clinical correlations of disease states with physical and laboratory findings.
Prerequisites: Take BMS 515.
Offered: Every year, Spring

BMS 517. Human Embryology. 3 Credits.
This course considers the fundamental processes and mechanisms that characterize the embryological development of the human organism. Knowledge of the developing human serves as a basis for understanding normal relationships of body structures and causes of congenital malformation. Emphasis is on clinical as well as classical embryology.
Offered: Every year, Fall

BMS 518. Pathophysiology. 3 Credits.
Disease processes are studied as they relate to normal physiological and homeostatic mechanisms, basic pathology, pathogenesis, and defense/repair mechanisms. Where appropriate, the course includes some clinical correlations of disease states with signs, symptoms and lab findings.
This course also is offered online in the spring.
Offered: Every year, Fall and Summer

BMS 520. Neuropharmacology. 3 Credits.
This course explores the effect of drugs on cells, synapses and circuits within the nervous system. Students examine neurotransmitter and neuromodulatory systems in depth as pharmacotherapeutic targets for the treatment of psychiatric and neurological disorders. Students also comprehensively evaluate the effect of drugs on cognition and behavior.
Offered: As needed

BMS 521. Advances in Hematology. 3 Credits.
This course covers fundamental concepts and advances in human hematology including an in-depth study of the function, physiology and diseases associated with blood cells, hematopoiesis, bone marrow examination, evaluation of red cell morphology, disease processes that lead to abnormal red cell morphology, anemias and thalassemias, white blood cell differentiation, and white blood cell disorders both benign and malignant, in-depth discussion of the morphologic and immunologic classification of leukemias, a review of myelodysplastic syndromes, myeloproliferative disorders, lymphomas and lipid storage disease and platelets. Emphasis on identifying normal and abnormal WBC and RBC and indices as leads to diagnosis using the hemogram, blood smears and case studies. Course includes an overview of general hematological methods and molecular hematologic techniques used in the diagnosis of blood cells disorders.
Offered: Every year, Fall

BMS 522. Immunology. 3 Credits.
This course examines theories, techniques and recent advances in immunology and the latest knowledge on immunoglobulins, complement, the role of T and B cells in immune response study of allergy, tumor and transplantation immunology, and autoimmune diseases. The principles of immunology and how they apply to the diagnostic laboratory are discussed. Techniques studied include immuno- and gel-elektrophoresis and fluorescent antibodies.
Offered: Every year, Fall

BMS 522L. Immunology Lab. 1 Credit.
This is an interactive, hands-on, project-based laboratory course examining various aspects of the human immune system, including both the innate and adaptive immune response. Students will gain experience with standard laboratory techniques such as ELISAs, gel electrophoresis, Western Blotting, with an emphasis on quantitative reasoning and critical thinking. This course must be taken in conjunction with BMS 522 lecture.
Corequisites: Take BMS 522.
Offered: Every year, Fall

BMS 525. Vaccines and Vaccine Preventable Diseases. 3 Credits.
This immunology course involves the investigation of vaccines and vaccine preventable diseases. The purpose of the course is to examine and discuss the current understanding of vaccinations, as well as the historical and current implication of vaccine preventable diseases. By the end of the semester, students should gain knowledge about vaccine preventable diseases, understand how vaccines work, how they are made, who recommends vaccines, the childhood vaccination schedule, when they should be given and why they are still necessary. Most importantly, students should be able to explain why vaccines are safe, and to be able to debunk the current myths and misconceptions regarding vaccines. Upper-level undergraduates may take course with permission.
Offered: Every year, Spring

BMS 526. Epidemiology. 3 Credits.
This graduate-level course in epidemiology directs itself toward application of epidemiological principles. The course involves analysis of prospective and retrospective studies, cross-sectional studies and experimental epidemiology. Both communicable and chronic disease case studies are used, as well as case studies of occupationally induced diseases. The use of biostatistics in epidemiological studies is stressed. This course covers basic epidemiology principles, concepts and procedures useful in the surveillance and investigation of health-related states or events.
Offered: Every other year, Fall

BMS 527. Pharmacology. 3 Credits.
This course provides students with knowledge of the foundations and advances in pharmacology. The first third of the class covers the basic principles of the FDA drug process, pharmacodynamics, pharmacokinetics, therapeutics and toxicology. The rest of the course is devoted to clinical review of the basic classes of drugs.
Offered: Every year, Spring

BMS 528. Advanced Clinical Parasitology. 4 Credits.
This course presents an advanced study of protozoan and helminth parasites of humans. Lecture focuses on the epidemiology and treatment of selected diseases. Laboratory focuses on clinical diagnosis, diagnostic techniques including immunodiagnostics and techniques and advanced experimental life cycle studies using both living and preserved materials.
Offered: Every year, Spring

| BMS 530     | Human Clinical Protozoology                        | 4       |
|             | In this advanced study of protozoan parasites of humans, lectures focus on the epidemiology, pathology and treatment of selected diseases. Labs focus on clinical diagnosis and diagnostic techniques including immunodiagnostic techniques using both living and preserved materials. |
| Offered:    | As needed                                         |         |

| BMS 531     | Human Clinical Helminthology                       | 4       |
|             | This course provides students with a fundamental understanding of the etiology, pathology, symptomology, treatment and epidemiology of diseases caused by helminth parasites. The course has both a lecture and lab component with the laboratory component emphasizing diagnosis. |
| Offered:    | As needed                                         |         |

| BMS 532     | Histology and Lab                                  | 4       |
|             | This course is intended for pathologists' assistant students with a background in basic descriptive microscopic anatomy. The lecture material includes the microscopic and ultramicroscopic structure of cells, tissues and organs with emphasis on biochemical composition and distribution as related to functional mechanisms. The laboratory work involves the preparation of microscope slides of normal vertebrate tissues, including those of humans, for histological and histochemical studies as the student may expect to encounter in the clinical laboratory. |
| Offered:    | Every year, Summer                                |         |

| BMS 532L    | Histology Lab                                      | 0       |
|             | Lab to accompany BMS 532. (3 lab hrs.)             |         |
| Offered:    | Every year, Fall and Summer                        |         |

| BMS 533     | Air, Water and Soil Microbiology                   | 4       |
|             | This in-depth graduate course examines the ecology of microorganisms in the water and air, as well as the medical and public health considerations of these organisms. Students explore the role of bacteria, algae, virus, protozoa and fungi in the air, soil and both natural and treated water. A lab is included that surveys standard techniques, as well as investigates innovative and experimental techniques in this exciting field of study. |
| Offered:    | As needed                                         |         |

| BMS 535     | Histochemistry and Lab                             | 3       |
|             | This course is intended for pathologists’ assistant students with a background in basic descriptive microscopic anatomy. The lecture material includes the microscopic and ultramicroscopic structure of cells, tissues and organs with emphasis on biochemical composition and distribution as related to functional mechanisms. The laboratory work involves the preparation of microscope slides of normal vertebrate tissues, including those of humans for histological and histochemical studies as the student may expect to encounter in the clinical laboratory. |
| Offered:    | Every year, Spring                                 |         |

| BMS 535L    | Histochemistry Lab                                 | 0       |
|             | This lab accompanies BMS 535.                      |         |
| Offered:    | Every year, Spring                                 |         |

| BMS 536     | Endocrinology                                      | 3       |
|             | This course introduces students to 1) an intensive understanding of the mechanism of hormone action; 2) the importance of the interrelationship among all hormones; 3) a detailed clinical situation dealing with hormonal aberrations; and 4) a theoretical and practical method for hormone assays. |
| Offered:    | As needed                                         |         |

| BMS 542     | Advanced Microbiology                              | 3       |
|             | This intensive classroom and lab study demonstrates the relevance and importance of microbiology in our society. Detailed studies illustrate the interactions between microorganisms and other organisms, especially man. The role of microbes in the food industry, pathology, protection from disease, environmental issues, recombinant DNA research and biotechnology also are discussed. |
| Offered:    | As needed                                         |         |

| BMS 542L    | Advanced Microbiology Lab.                         | 0       |
|             | Lab to accompany BMS 542.                          |         |
| Offered:    | As needed                                         |         |

| BMS 552     | Toxicology                                         | 3       |
|             | Biochemical toxicology is the branch of science that deals with events at the molecular level in which toxic compounds interact with living organisms. It is fundamental to the understanding of toxic reactions and therapeutic agents, and for the assessment of toxic hazards by chemicals and related substances in the environment. This course deals with compounds exogenous to normal metabolism, as well as metabolic intermediates, hormones, trace elements and other materials found in the environment. It examines the absorption, distribution, kinetics and elimination of such substances. Particular emphasis is placed upon the effects of toxic materials on neurotoxicity, hepatotoxicity, genetic toxicology and chemical carcinogenesis. |
| Offered:    | As needed                                         |         |

| BMS 556     | Seminar in Health Care Disparities                 | 1       |
|             | The Centers for Disease Control and Prevention (CDC) defines health disparities as differences in health outcomes between various segments of the population which are mostly associated with socioeconomic status, race/ethnicity and level of education. This course investigates the cause and effect of health care disparities using an interdisciplinary approach. Students will also become familiar with the research literature on the topic from different points of view by being part of a literature review/journal club. |
| Offered:    | As needed                                         |         |

| BMS 561     | Immunohematology                                   | 3       |
|             | This course examines the current concepts of hematopoiesis, including red blood cell and white blood cell morphogenesis, blood banking, blood typing, donor selection, adverse transfusion reactions, ABO antigens/antibodies, crossmatching, the structure and function of the components of normal blood and bone marrow, pathological processes that occur in the blood and bone marrow, and the normal and abnormal events during hemostasis. |
| Offered:    | Every other year, Fall                            |         |

| BMS 562     | Blood Coagulation and Hemostasis                   | 3       |
|             | This study of the basic principles of hemostasis includes the vascular component, platelet physiology and function, coagulation factors/fibrin clot formation and fibrinolysis. Hereditary and acquired forms of hemorrhagic disorders and thromboembolic disease are examined in detail along with the test procedures for their diagnoses and the initiation of proper therapy. |
| Offered:    | Every year, Spring                                 |         |
BMS 563. Anemias. 3 Credits.
This study of those classes of disorders related to abnormal red cell pathophysiology includes both intracorpuscular and extracorpuscular defects. Erythropoiesis and basic red cell metabolism are briefly reviewed. Etiologies, differential diagnoses, and treatment of anemias are discussed in-depth.
Offered: Every year, Fall

BMS 564. Fundamentals of Oncology. 4 Credits.
This course presents a study of the chemical and biological basis of carcinogenesis, natural history of human cancer, biochemistry of cancer, various aspects of experimental oncology including tumor immunology, and factors affecting survival and multiplication of cancer cells in the body. Delivery methods include weekly discussions on original research papers that correlate clinical studies with the molecular mechanisms presented in lecture.
Offered: Every year, Spring

BMS 565. Leukemia. 3 Credits.
This course includes in-depth discussions with emphasis on the major forms of leukemia (ALL, CLL, AGL, CGL), current methods of blood component therapy and chemotherapy, the role of infections, immunological diagnostic advances, psychiatric and social aspects in patient management and recent advances in leukemia research. The purpose of the course is to enhance knowledge and understanding of those students who have had an introductory course in hematology and those who are actively involved in clinical or research hematological laboratories.
Offered: Every year, Spring

BMS 566. Antimicrobial Therapy. 3 Credits.
This graduate-level course explores the antimicrobial agents used to treat infectious diseases by inhibiting microbial growth and survival. This interactive, discussion-based class investigates the history, current status and future directions of antimicrobial drugs with an emphasis on antibacterial and antiviral chemotherapeutic agents. Topics include the mode of action and efficacy of drugs, as well as the development, spread and mechanisms of drug resistance. Upper-level undergraduates may take this course with permission.
Offered: Every year, Spring

BMS 567. Virology. 4 Credits.
This course presents a study of human and animal viruses, viral diseases, biochemical properties, and classification methods of isolation and identification of viral agents; preparation and inoculation of tissue culture, animals and embryonated eggs, immunological techniques, and antiviral chemotherapy.
Offered: Every year, Spring

BMS 568. Pathogenic Microbiology. 4 Credits.
This graduate microbiology course involves the study of medically important microbes, with a particular emphasis on the pathology associated with human infection. Students examine the underlying principles of microbial pathogenesis, including elements of structural biology, epidemiology, immunology and pathology. They also survey microbial organisms that plague mankind today.
Offered: Every year, All

BMS 569. Mycology. 3 Credits.
The morphology, taxonomy and classification of fungi and yeasts of medical importance are studied in this class. Laboratory exercises include isolation and identification techniques of selected human pathogens.
Offered: Every other year, Fall

BMS 570. Microbial Physiology. 4 Credits.
Students are introduced to the growth of microbial cells, including growth genetics and measurements and energy. Emphasis is placed on understanding new techniques and practical information for use in medicine, industry and research.
Offered: As needed, All

BMS 571. Food Microbiology. 4 Credits.
This applied course in microbiology is concerned with the microorganisms involved in the manufacture and spoilage of foods. Major pathogens that may be transmitted via foods are discussed. Laboratory stresses both identification of food-associated organisms and standard microbiological procedures used to determine the quality and safety of foods. Upper-level undergraduates may take course with permission.
Offered: Every year, Summer

BMS 572. Drug Discovery and Development. 3 Credits.
The material presented in this course encompasses the process of drug discovery and development. Topics covered include many aspects of drug development such as target identification, evaluation and screening, all phases of clinical development and post-marketing activities. The material presented is across drug classes, with a particular focus on psychoactive and neurology compounds.
Offered: Every year, Fall

BMS 573. Cellular Basis of Neurobiological Disorders. 3 Credits.
A detailed overview of neurobiological disorders at the molecular level is presented. Recent advances in gene cloning to identify causes for some of these disorders are discussed in detail.
Offered: As needed

BMS 574. Microbial Physiology. 4 Credits.
This course presents a study of human and animal viruses, viral diseases, biochemical properties, and classification methods of isolation and identification of viral agents; preparation and inoculation of tissue culture, animals and embryonated eggs, immunological techniques, and antiviral chemotherapy.
Offered: Every year, Spring

BMS 575. Receptors and Regulatory Mechanisms. 3 Credits.
The actions of cellular receptors, their coupling proteins and their associated effectors are discussed. Classification of receptors, modulation of receptors, detection of receptors by ligand binding assays and regulations of cell function by receptor action are presented to illustrate the importance of receptors in human physiology.
Offered: As needed

BMS 576. Forensic Pathology. 3 Credits.
This course is designed for students interested in the practical applications of science, specifically forensic medicine. Graphic examples of injuries and patterns of trauma serve as the backdrop for introduction to the understanding of the techniques involved in death investigation from the medical perspective.
Offered: Every year, Spring

BMS 577. Molecular Pathology. 3 Credits.
Molecular pathology is a new and rapidly growing discipline of laboratory medicine and includes applications of molecular techniques to all facets of diagnostic medicine. This course reviews the structure and function of nucleic acid sequences and provides an in-depth introduction to the molecular techniques exploited in the diagnosis of human diseases. The course focuses on currently employed applications to areas such as genetic disease, infectious disease, cancer and identity testing.
Offered: Every year, Spring

BMS 578. Forensic Pathology. 3 Credits.
This course is designed for students interested in the practical applications of science, specifically forensic medicine. Graphic examples of injuries and patterns of trauma serve as the backdrop for introduction to the understanding of the techniques involved in death investigation from the medical perspective.
Offered: Every year, Spring
BMS 584. Emerging and Re-emerging Infectious Diseases.  3 Credits.
This graduate-level course discusses current topics related to the plethora of infectious agents that besiege us. Emerging bacterial, protozoal and viral diseases, whether strictly animal or human or zoonotic pathogens, represent an increasing threat to animal and human health. The course examines, defines and discriminates between emerging, re-emerging and other infectious diseases; defines host and agent characteristics and risk factors; and analyzes social, economic and international trade changes, improper use of antibiotics, and multidrug resistant infectious agents as factors of emerging diseases. Upper-level undergraduates may take this course with permission.
Offered: Every other year, Fall

BMS 585. Outbreak Control.  3 Credits.
An outbreak or epidemic is the occurrence of more cases of disease than expected in a given area or among a specific group of people over a particular period of time. Usually, the cases are presumed to have a common cause or to be related to one another in some way. Public health agencies must decide whether to handle outbreaks without leaving the office, or spend the time, energy and resources to conduct field investigations. The most important reason to investigate is to learn enough about the situation to implement appropriate control and prevention measures. Investigations also enable researchers to advance knowledge about the disease, agent, risk factors and interventions; provide a way to respond to public, political or legal concerns; evaluate a health program's effectiveness and weaknesses; and provide training. When multiple agencies are involved in the investigation, coordination and communication become even more essential. Upper-level undergraduates may take this course with permission.
Offered: Every other year, Fall

BMS 588. Independent Study.  1-6 Credits.
Offered: As needed

BMS 589. Independent Study.  1-6 Credits.
Offered: As needed

BMS 591. The New Genetics and Human Future.  3 Credits.
We are the first creatures on Earth learning a 3.5-billion-year-old DNA language. The completion of the Human Genome Project and the emerging science of genomics will have dramatic ethical, legal and social implications. New genetics have the potential to affect all spheres of human life, including the ability to construct our destiny as a species. The goal of the course is not to give the answers to the numerous questions and dilemmas of our exciting and controversial future but to inspire interest and desire to pursue more study.
Offered: Every year, Spring

BMS 595. Transplantation Immunology.  3 Credits.
This course examines the current understanding of the major histocompatibility complex; the molecular basis of alloreactivity; and immunological mechanisms of allograft rejection, tolerance, and graft versus host disease. The objectives are: to understand the basics of the histocompatibility complex in relation to normal, disease and transplantation states, to understand the fundamental differences between immune responses to self antigens, foreign antigens, allo-antigens, and other non-self antigens, and to become familiar with the mechanisms underlying successful allogeneic transplantation and appreciate the concepts of immunosuppression and tolerance. Graduate level students are expected to complete a paper reviewing a current topic in transplantation. A basic understanding of immunology is desirable. Upper-level undergraduates may take course with permission.
Offered: Every other year, Fall

BMS 596. Immunology of Infectious Diseases.  3 Credits.
This graduate-level course examines the principal aspects of immune response to all types of infectious agents, with an emphasis on the immune system primarily as a host defense system. Students explore how the dialogue between different types of pathogen and the host immune system works, as well as the cross talk between the different members of the immune response. Infection is an encounter between a microbe and the host. In contrast to topics such as pathogenic microbiology, this course is aimed at the host side of the interaction, both from the innate immune response and the acquired immune response. Autoimmunity, sometimes a "side effect" of infectious disease, also is discussed. Upper-level undergraduates may take course with permission.
Offered: Every other year, Fall

BMS 597. Biomedical Sciences Internship.  4 Credits.
Students partake in a full-time professional work experience with a sponsoring organization. The experience brings together theory, application and current practice in the translational sciences. Journaling and discussion boards provide students with a reflective and intentional assessment of the field, their work and career development. Students submit a paper describing their experimental aims, design and outcomes as well as present their findings as a seminar open to the general university public.
Offered: Every year, Summer

BMS 598. Synaptic Organization of the Brain.  3 Credits.
Students study a variety of brain regions from both an anatomic and physiologic viewpoint to learn how these structures are organized at the synaptic level. The course includes a discussion of how these regions are associated with neurological disease. At the end of the class, students should: 1) understand the basic principles of neuronal functioning at the cellular and circuit level; 2) understand how the wide diversity of neural circuits seen in the brain generate specific functions in different regions; and 3) gain experience reading and interpreting scientific papers.
Offered: Every other year, Fall

BMS 599. Biomarkers.  3 Credits.
Technological advances in molecular biology have provided an opportunity to evaluate drug-disease relationships at the molecular and cellular level. The goal of this course is to introduce the concept of biomarkers and how they are used clinically. This course covers both theoretical concepts and practical applications of biomarkers. Topics include the rationale for biomarkers, study design, logistics of sample collection/storage, options and techniques for analysis, as well as current applications in health care, including drug safety, regulatory issues, ethical considerations and the future direction of biomarker applications.
Offered: Every year, Spring

BMS 622. MED Cross-Listed Selective.  3 Credits.
BMS course to be cross-listed with a MED Course.
Offered: Every year, All

BMS 650. Thesis I.  4 Credits.
Approval of one of the two thesis options-experimental laboratory research or nonlaboratory-based project-is required. The thesis topic may be handled as an original investigation or as an applied problem (e.g., clinical) so long as it is about a health-related problem. Typed copies of final draft, prepared in compliance with thesis-writing manual, must be submitted prior to issuance of diploma. Thesis projects must be completed within three years after registration for the thesis course.
Offered: As needed
BMS 651. Thesis II. 4 Credits.
Approval of one of the two thesis options-experimental laboratory research or nonlaboratory-based project—is required. The thesis topic may be handled as an original investigation or as an applied problem (e.g., clinical) so long as it is about a health-related problem. Typed copies of final draft, prepared in compliance with thesis-writing manual, must be submitted prior to issuance of diploma. Thesis projects must be completed within three years after registration for the thesis course. Offered: As needed

BMS 670. Comp Exam/Biomedical Sciences. 2 Credits.
The comprehensive examination is a requirement of the non-thesis option of the Biomedical Sciences program. The purpose of the exam is twofold. First, it ascertains if the student possesses both the broad and specific knowledge expected of someone holding a master's degree. Second, it inquires if the student has been able to integrate knowledge obtained from individual courses into unified concepts that link the student’s own specialization to other fields of study. A written essay exam is administered and graded by the exam course committee or individual faculty. Students should schedule an appointment with the program director before registering for the comprehensive exam course. Offered: As needed

BMS 688. Independent Study. 1-6 Credits.
Offered: As needed

BMS 689. Independent Study. 1-4 Credits.
Offered: As needed

Business Analytics (BAN)

BAN 610. Introduction to Business Analytics. 3 Credits.
This course develops ideas for helping to make decisions based upon the examination of data. Topics include variability, data display and summary statistics, regression, and correlation. Probability, probability distributions, sampling, the central limit theorem, confidence intervals and hypothesis testing. Attention is also given to the design of experiments and analysis of variance, frequency distributions, statistical inference and sampling theory. Offered: Every year, Fall and Spring

BAN 615. Predictive Modeling. 3 Credits.
The course introduces the techniques of predictive modeling and analytics in a data-rich business environment. It covers the process of formulating business objectives, data selection, preparation and partition to successfully design, build, evaluate and implement predictive models for a variety of practical business applications (such as marketing, customer retention, delinquency and collection analytics, fraud detection and insurance). Predictive models such as classification and decision trees, neural networks, regressions, pattern discovery analysis and other techniques are studied. Prerequisites: Take BAN 610. Offered: Every year, Fall and Spring

BAN 620. Text Mining. 3 Credits.
This course builds upon previously introduced data mining methods, focusing specifically on techniques for text extraction and mining. Topics include efficient text indexing; document clustering and classification; information retrieval models; enhancement of structured data; scenario detection techniques; and using textual data in predictive models. Offered: Every year, Fall and Spring

BAN 621. Data Management. 3 Credits.
The concepts, principles, issues and techniques for managing corporate data resources are covered, including techniques for managing the design and development of large database systems. Data warehousing, data mining and database administration are emphasized. Students engage in hands-on-learning and work individually or in teams to complete a real-world project using contemporary data management tools and techniques. Offered: Every year, Fall and Spring

BAN 622. Data Warehousing. 3 Credits.
This course focuses on the design and implementation of data warehouses, identifying key architecture differences between data warehouses and transactional databases. It also focuses on the interface to data warehouses to better understand how large amounts of information are used to enable organizations to make better decisions. Prerequisites: Take BAN 621. Offered: Every year, Fall and Spring

BAN 628. Data Mining. 3 Credits.
This course focuses on the application of common data mining techniques. Students focus on developing business solutions by applying techniques such as market basket analysis, association rules, clustering analysis and time series. Offered: Every year, Fall and Spring

BAN 629. Text Mining. 3 Credits.
This course builds upon previously introduced data mining methods, focusing specifically on techniques for text extraction and mining. Topics include efficient text indexing; document clustering and classification; information retrieval models; enhancement of structured data; scenario detection techniques; and using textual data in predictive models. Prerequisites: Take BAN 628. Offered: Every year, Fall and Spring

BAN 650. Data Visualization. 3 Credits.
This course provides an introduction as well as hands-on experience to the field of data visualization. Students learn basic visualization design and evaluation principles to create meaningful displays of quantitative and qualitative data. They learn techniques for visualizing multivariate, temporal, text-based, geospatial, hierarchical and network/graph-based data. Offered: Every year, Spring and Summer

BAN 660. Optimization. 3 Credits.
This course focuses on developing computational methods to solve various optimization problems. Advanced regression analysis, time series analysis and other techniques are used to support improved forecasting and decision making. Prerequisites: Take BAN 610 BAN 615. Offered: Every other year

BAN 661. Web Analytics and Web Intelligence. 3 Credits.
This course focuses on the analysis of a variety of web metrics including tracking, traffic and visitor behavior, tactics and strategies to successfully market on the Web to make data-driven decisions. Business analytics tools and techniques are utilized to extract and analyze web-scale data to guide strategic decision making. Topics address solutions for measurably higher leads, sales, brand recognition, customer satisfaction or lower service costs. Prerequisites: Take BAN 610. Offered: Every year, Spring
BAN 662. Insurance Analytics. 3 Credits.
This course leverages predictive modeling and analytics, optimization, and business intelligence to support data-driven decisions in the property-casually insurance industry. Key topics include measuring underwriting performance, risk analysis and attributes of high performing insurance systems.
Prerequisites: Take BAN 615.
Offered: Every year, Summer

BAN 663. Programming for Data Analysis. 3 Credits.
Students learn to program and use R for effective data analysis. Reading data, accessing R packages, writing functions, debugging, profiling code and organizing and commenting code also are covered. Working examples of topics in statistical data analysis are provided. The course also addresses installation and configuration of software as necessary for a statistical programming environment.
Offered: Every other year

BAN 664. Health Care Analytics. 3 Credits.
This course provides a foundation on data analytics in health care and an understanding of the main concepts and issues. Contemporary tools and technologies are applied to develop an analytics solution to selected health care problems.
Prerequisites: Take CIS 620.
Offered: Every year, Fall

BAN 665. Big Data and Hadoop. 3 Credits.
The concept, principles, issues and techniques for managing Big Data information management resources are covered. The course explores how Big Data fits into an organization’s information management strategy. Focus is on the Hadoop platform, emphasizing how it is used to design and maintain Big Data to support analytics.
Offered: Every year, Summer

BAN 666. Business Design and Object-oriented Analysis. 3 Credits.
This course considers systems-development methods, analysis and design techniques with a focus on object-oriented analysis and design. The application of systems analysis and design concepts using current tools, techniques and approaches is covered. Students engage in hands-on learning and work in teams to complete a real-world project using contemporary analysis and design methodologies and tools.
Offered: Every year, Summer

BAN 669. Project Management. 3 Credits.
This course develops a foundation of concepts and solutions required for successful completion of a project. Topics include planning, scheduling, controlling, resource allocation and performance measurement.
Offered: Every other year

BAN 688. Business Analytics Independent Study. 3 Credits.
Offered: Every year, All

BAN 690. Business Analytics Capstone. 3 Credits.
The capstone course in the MSBA program is designed to enable students to directly utilize what has been learned in the tools and applications courses to analyze and offer solutions for a major business challenge. A definition of the problem, analysis of options and a comprehensive presentation of findings and solutions are required components of the course.
Prerequisites: Take BAN 610 BAN 615 BAN 620 BAN 650 CIS 620 CIS 627 CIS 628.
Offered: Every year, Fall and Summer

CIS 600. Information Systems Strategy. 3 Credits.
Students develop the ability to analyze and identify opportunities to improve the effectiveness of organizations through the use of appropriate information technologies. Technologies that influence organizational strategies, structure, risks and processes are emphasized. Ethical, global and security issues also are covered.
Offered: Every year, All

CIS 620. Data Management. 3 Credits.
The concepts, principles, issues and techniques for managing corporate data resources are covered, including techniques for managing the design and development of large database systems. Data warehousing, data mining and database administration are emphasized. Students engage in hands-on-learning and work individually or in teams to complete a real-world project using contemporary data management tools and techniques.
Offered: Every year, Fall and Spring

CIS 627. Data Warehousing. 3 Credits.
This course focuses on the design and implementation of data warehouses, identifying key architecture differences between data warehouses and transactional databases. It also focuses on the interface to data warehouses to better understand how large amounts of information are used to enable organizations to make better decisions.
Prerequisites: Take CIS 620.
Offered: Every year, Fall and Spring

CIS 628. Data Mining. 3 Credits.
This course focuses on the application of common data mining techniques. Students focus on developing business solutions by applying techniques such as market basket analysis, association rules, cluster analysis and time series.
Prerequisites: Take BAN 615.
Offered: Every year, Fall and Spring

CIS 630. Business Design and Object-oriented Analysis. 3 Credits.
This course considers systems-development methods, analysis and design techniques with a focus on object-oriented analysis and design. The application of systems analysis and design concepts using current tools, techniques and approaches is covered. Students engage in hands-on learning and work in teams to complete a real-world project using contemporary analysis and design methodologies and tools.
Offered: Every year, Summer

CIS 688. Computer Information Systems Independent Study. 3 Credits.
Offered: Every year, All

CIS 689. Computer Information Systems Independent Study. 1-6 Credits.
Offered: Every year, All

CIS 690. Project Management. 3 Credits.
This course develops a foundation of concepts and solutions required for successful completion of a project. Topics include planning, scheduling, controlling, resource allocation and performance measurement.
Offered: Every other year

Cybersecurity (CYB)

CYB 501. Foundations of Cyber Security. 1 Credit.
This course introduces students to fundamental security principles and security defense. Students learn the concepts of information security risks, vulnerabilities, assets and threats.
Offered: Every year, Fall and Spring
CYB 502. Introduction to Cyber Threats. 1 Credit.
This course introduces students to the analysis of cyber threats. Students learn to identify bad actors in cyberspace and assess their resources, capabilities, techniques and motivations. Students learn to describe different types of cyber attacks and their characteristics.
Corequisites: Take CYB 501.
Offered: Every year, Fall and Spring

CYB 503. Introduction to Cyber Defense. 1 Credit.
Students learn about cyber defense tools and techniques. This course covers how to apply cyber defense tools and techniques to prepare a system to repel attacks.
Corequisites: Take CYB 502.
Offered: Every year, Fall and Spring

CYB 506. Introduction to Programming for Security Professionals. 1 Credit.
This course introduces students to basic scripting and programming concepts needed for security defense. Course topics include writing scripts for Windows and Linux; understanding basic programming security concepts; basic programming constructs, such as variables, types, loops, functions and data structures.
Prerequisites: Take CYB 517.
Offered: Every year, Summer

CYB 509. Operating Systems Security. 1 Credit.
This course introduces students to operating systems and the software to support these systems. Topics include operating system security configuration, control objectives, control maintenance and forensics. The course includes hands-on implementation of security controls, including access management, file and process security configuration, and security monitoring.
Prerequisites: Take CYB 540.
Offered: Every year, Spring and Summer

CYB 517. Introduction to Cryptography. 1 Credit.
This course introduces students to cryptography algorithms, protocols and applications. Topics include history, applications, such as SSL and SSH; and protocols, such as hash functions, symmetric and asymmetric cryptography, and attack-vectors for systems.
Prerequisites: Take CYB 509.
Offered: Every year, Spring and Summer

CYB 524. Relational Database Security. 1 Credit.
This course introduces students to different relational database management systems (DMS) and DMS security concerns and methods. Topics covered include hashing and encryption, database access controls, unauthorized access, data corruption and injection.
Prerequisites: Take CYB 517.
Offered: Every year, Spring and Summer

CYB 526. Non-Relational Database Security. 1 Credit.
This course introduces students to the theory, application and security of nonrelational database systems. It focuses on data management, query and security aspects of nonrelational databases. Topics include a comparison between relational and nonrelational database models, NoSQL storage types for different databases such as MongoDB, Hadoop, Amazon DynamoDB, document-based databases and graph databases.
Prerequisites: Take CYB 524.

CYB 540. Introduction to Secure Networking. 1 Credit.
This course introduces students to the theoretical and practical aspects of designing, developing and defending computer networks. Topics include network models, media, architectures, devices, protocols, services, applications and use of network security tools.
Offered: Every year, Spring and Summer

CYB 550. Cyber Policy. 3 Credits.
There are three parts to this course. The first part covers the applicable federal and state laws and policies related to cyber defense, pertaining to the storage and transmission of data. In the second part, students analyze and develop enterprise security policies. Finally, students learn how to implement machine security policies.
Corequisites: Take CYB 503.
Offered: Every year, Fall and Summer

CYB 660. Programming for Security Analytics. 1 Credit.
This course introduces students to basic command-line methods used in machine data analytics. Students learn how to collect machine logs, search log data, and identify anomalies in logs.
Corequisites: Take CYB 506.
Offered: Every year, Summer

CYB 661. Programming for Security Automation. 1 Credit.
This course focuses on programming methods that are applicable to security automation. Students gain experience in automation using Python and Cloud native CLI to facilitate such tasks as automated code scanning; automated application scanning in testing and staging; automated network, server, container configuration checks; and continuous monitoring of development pipeline components and job scheduling.
Prerequisites: Take CYB 506.
Offered: Every year, Summer

CYB 662. Secure Web Applications Design. 1 Credit.
This course covers the design and architecture of secure web applications, such as: traditional three-tier architectures, SOA, microservices, FaaS; application protocols; authentication and session management; client and server-side controls; input-based vulnerabilities and web application attack trends.
Prerequisites: Take CYB 661.
Offered: Every year, Fall and Summer

CYB 663. Secure Web Applications Engineering. 1 Credit.
In this course, students learn processes and practices needed to secure applications within the Software Development Life Cycle (SDLC). The course covers traditional SDLC processes and methods to secure modern Cloud native development processes and using concepts of DevSecOps.
Corequisites: Take CYB 662.
Offered: Every year, Fall and Summer

CYB 664. Web Applications Security Testing. 1 Credit.
This course introduces students to web application security testing. Topics include application security metrics, selecting the right testing tool and integrating the results into the development life cycle. Students gain hands-on experience using these tools in practical settings.
Corequisites: Take CYB 663.
Offered: Every year, Fall and Summer

CYB 665. Workforce Access Security. 1 Credit.
This course focuses on authentication and user access technologies and practices within the enterprise. Topics include Active Directory services and architecture, and enterprise network access protocols.
Prerequisites: Take CYB 517.
Offered: Every year, Fall

This course focuses on authentication and user access technologies and practices within B2C access. Topics include standards-based B2C authentication and access management protocols.
Prerequisites: Take CYB 665.
Offered: Every year, Fall
This course covers access concepts based on B2B communication APIs, such as standard-based protocols and B2B on-boarding, for mobile, social and IoT applications.
Prerequisites: Take CYB 667.
Offered: Every year, Fall

CYB 670. IoT Security. 1 Credit.
This course covers security as it pertains to embedded devices, embodied by the growth of the Internet of Things (IoT). Students learn about the specific security issues related to embedded devices, including Linux malware, DDoS attacks, botnets, cryptography and personal privacy.
Prerequisites: Take CYB 526.
Offered: Every year, Spring and Summer

CYB 680. Introduction to Cloud Security. 1 Credit.
In this course, students learn fundamentals of Cloud computing and Cloud security. This course covers topics such as shared responsibility models for IaaS, PaaS, SaaS and FaaS, and Cloud Security Alliance CCM. Students get hands-on experience creating secure systems within a commercial Cloud vendor environment.
Prerequisites: Take CYB 669.
Offered: Every year, Fall

CYB 681. Securing Workloads in AWS. 1 Credit.
This course covers concepts and practices for securing AWS workloads. Students are introduced to security controls, such as access controls using IAM, logging and auditing, and other AWS security services.
Prerequisites: Take CYB 680.
Offered: Every year, Fall

CYB 682. Securing Workloads in Azure. 1 Credit.
This course covers concepts and practices for securing Azure workloads. Students are introduced to security controls, such as access controls using IAM, logging and auditing, and other AWS security services.
Prerequisites: Take CYB 681.
Offered: Every year, Fall

CYB 683. Resilient System Design and Development. 1 Credit.
This course introduces students to the concepts of secure system design and cyber resilience. The content of this course includes best security processes recommended in NIST 800-160 and techniques and technologies needed for secure system design and development.
Prerequisites: Take CYB 682.
Offered: Every year, Spring

CYB 684. Resilient System Testing. 1 Credit.
This course introduces students to state-of-the-art concepts and methods to evaluate cyber resiliency. Topics include breach and attack simulation, configuration assessment and compliance. Hands-on experience with systems testing tools is part of this course.
Prerequisites: Take CYB 683.
Offered: Every year, Spring

CYB 685. Operating Resilient Systems. 1 Credit.
This course includes hands-on experience with tools for security activities such as intrusion detection and cloud security monitoring. Other topics this course covers include Site Reliability Engineering (SRE), maintaining situational awareness and dynamic threat.
Prerequisites: Take CYB 684.
Offered: Every year, Spring

CYB 691. Capstone I. 1 Credit.
This course enables students to explore the computer security profession by working independently or in teams, under the guidance of a mentor, on a significant security-related project. In the first part of this two-course sequence, students review professional literature and explore security ethics, as they work to develop and present a capstone project proposal in written and oral form.
Corequisites: By permission of director only.
Offered: Every year, Fall

CYB 692. Capstone II. 2 Credits.
This course enables students to explore the computer security profession by working independently or in teams, under the guidance of a mentor, on a significant security-related project. In the second part of this two-course sequence, students complete work on their project and create an appropriate formal presentation of their results.
Prerequisites: Take CYB 691.
Offered: Every year, Fall

Economics (EC)

EC 600. Managerial Economics. 3 Credits.
This course considers the practical application of the tools of economic analysis to the solution of important business problems. An examination of analysis of demand, cost and output, market structure and pricing policies is included.
Offered: Every year, All

EC 641. Money and Banking. 3 Credits.
The course addresses the roles that money and banks play in the economy and the regulatory framework that delineates these roles. The course also discusses financial instruments and the behavior of interest rates. The structure and function of the Federal Reserve and the role of monetary policy in stabilizing the economy are examined. The course develops the varying monetary theories that fuel an ongoing debate over the effectiveness of monetary policy. In addition, international financial markets and their role in an increasingly more open and volatile world economy are explored.
Prerequisites: Take EC 600.
Offered: Every other year

EC 662. Economics Analysis and Law. 3 Credits.
This course introduces economic analysis of law. Emphasis is placed on business applications. The common law areas of tort, contract, and property are examined in addition to legal procedural and criminal law. This course evaluates the outcomes of theoretical models, however, empirical results are also analyzed.
Offered: As needed

EC 670. International Trade. 3 Credits.
This course provides a general overview of the economics of international trade. Throughout the course, students study trade models, such as the Heckscher-Ohlin model, and discuss new issues in international trade and international business, including foreign direct investment and offshoring. Topics include gains and losses from trade, factor endowment, tariffs and quotas, and the effect of trade on wages.
Prerequisites: Take EC 660.
Offered: As needed
EC 671. International Macroeconomics. 3 Credits.
This course provides a rigorous analysis of theory and practice in international macroeconomics. Topics include in-depth study of open economy macroeconomic analysis, monetary theory, balance of payments, exchange rate systems, and international monetary systems. 
Prerequisites: Take EC 600.
Offered: As needed
EC 688. Independent Study - Economics. 3 Credits.
Permission of the MBA director and School of Business dean is required.
Offered: As needed, All
EC 689. Internship - Economics. 3-6 Credits.
Permission of the MBA director and School of Business dean is required.
Offered: As needed, All

Educational Leadership (EDL)

EDL 501. Teacher Leadership to Transform School Culture. 3 Credits.
This course investigates leadership concepts and principles and related research findings and practices with an emphasis on how leaders can transform school culture and develop the school as a community of learners. The course helps teacher-leaders understand leadership theory and behavior and how to promote positive school culture by building a sense of community, increasing the quality of collegial relationships and discourse, and establishing open and effective communications. Theoretical concepts of leadership are integrated along with practical applications for teacher-leaders.
EDL 503. Leading the Instructional Program to Improve Student Learning. 6 Credits.
This course examines current curriculum designs and teaching/learning models and the leadership processes of assessing, developing, implementing and revising instructional programs to improve student learning. Case studies focus on how to improve achievement through analysis of curriculum development processes in schools, analysis of achievement data, professional development programming, student assessment systems and coaching teachers to improve instructional practices.
Prerequisites: Take EDL 501.
EDL 505. Research-Based Literacy Practices. 3 Credits.
This course provides an overview of research-based instructional and assessment strategies in reading and writing, stressing the link between research and practice to improve student learning. Primary genres of educational research in the field of literacy are examined including action-based, qualitative, theoretical and quantitative. The course helps teacher-leaders develop the tools and mindset of a teacher-researcher so that they may reflect on their own classroom practice.
EDL 509. Leading School Improvement. 6 Credits.
This course analyzes the characteristics of effective schools and the leadership theories and concepts related to the change process. Participants examine the application of these theories and concepts to the practice of improving the work of the school and the achievement of students. Case studies focus on the analysis of schools in need of improvement, the specific issues facing the schools, data analysis techniques, effective leadership practices, strategic planning, financing improvement plans, and evaluation processes. The role of teacher-leaders within the school improvement process is emphasized.
EDL 510. Cycles of Inquiry within the Literacy Classroom. 3 Credits.
This course helps teacher-leaders understand the cycles of inquiry--a systematic approach to teaching and learning that includes: knowing content standards, diagnosing student needs, setting and working toward long- and short-term learning goals, backward planning from standards and assessments, investing students in their goals, teaching effectively and continuously analyzing data to ensure learning goals are being met. This course provides teacher-leaders with training and experience through complete cycles of inquiry within the literacy classroom to further develop their skills as master teachers. Course assignments support each candidate as a reflective practitioner and build capacity for teacher-leaders to make a difference for every learner.
Prerequisites: Take EDL 501.
EDL 511. Cycles of Inquiry within the Literacy Classroom. 3 Credits.
This course helps teacher-leaders understand the cycles of inquiry--a systematic approach to teaching and learning that includes: knowing content standards, diagnosing student needs, setting and working toward long- and short-term learning goals, backward planning from standards and assessments, investing students in their goals, teaching effectively and continuously analyzing data to ensure learning goals are being met. This course provides teacher-leaders with training and experience through complete cycles of inquiry within the literacy classroom to further develop their skills as master teachers. Course assignments support each candidate as a reflective practitioner and build capacity for teacher-leaders to make a difference for every learner.
Prerequisites: Take EDL 501.
EDL 513. Coaching Teachers of Literacy. 3 Credits.
This course provides students with training and experience in mentoring colleagues--novice or experienced teachers--through a complete coaching cycle. Students actively participate in a coaching cycle that is designed to provide teachers with support over a period of consecutive days as they develop their teaching practice. Students develop skills necessary to support teachers through modeling lessons, co-planning and co-teaching lessons, conducting classroom observations and providing feedback to those literacy teachers to foster reflection. Ultimately, students explore the best practices in mentoring teachers to improve the teaching of literacy and to develop a peer-to-peer coaching network for inquiry, conversation, collaboration and support.
Prerequisites: Take EDL 501.
EDL 515. Action Research in Literacy Leadership. 3 Credits.
This course provides an overview of the concepts and principles of conducting action research in an educational setting. Action research conducted in the field of literacy is reviewed and analyzed for purpose, methodology and outcomes. As a capstone experience, candidates design and implement action research in their school that involves working closely with peers on a project that is intended to improve the literacy skills of students.
Prerequisites: Take EDL 505 EDL 513.
EDL 517. Cycles of Inquiry within the Mathematics Classroom. 3 Credits.
This course helps teacher-leaders understand the cycles of inquiry--a systematic approach to teaching and learning that includes: knowing content standards, diagnosing student needs, setting and working toward long- and short-term learning goals, backward planning from standards and assessments, investing students in their goals, teaching effectively and continuously analyzing data to ensure learning goals are being met. This course provides teacher-leaders with training and experience through complete cycles of inquiry within the mathematics classroom to further develop their skills as master teachers. Course assignments support each candidate as a reflective practitioner and build capacity for teacher-leaders to make a difference for every learner.
Prerequisites: Take EDL 501.
EDL 519. Coaching Teachers of Mathematics.  3 Credits.
This course provides students with training and experience in mentoring colleagues—novice or experienced teachers—through a complete coaching cycle. Students actively participate in a coaching cycle that is designed to provide teachers with support over a period of consecutive days as they develop specific aspects of their teaching practice. Students develop the skills necessary to support those teachers through modeling lessons, co-planning and co-teaching lessons, conducting classroom observations and providing feedback to those mathematics teachers to foster reflective practitioners. Ultimately, students explore the best practices in mentoring teachers to improve the teaching of mathematics and to develop a peer-to-peer coaching network for inquiry, conversation, collaboration and support.
Prerequisites: Take EDL 501.

EDL 521. Action Research in Mathematics Leadership.  3 Credits.
This course provides an overview of the concepts and principles of conducting action research in an educational setting. Action research conducted in the field of mathematics is reviewed and analyzed for purpose, methodology and outcomes. As a capstone experience, candidates design and implement action research in their school that involves working closely with peers on a project that is intended to improve the mathematics skills of students.
Prerequisites: Take EDL 505 EDL 519.

EDL 523. Leading Organizational Learning.  3 Credits.
This course examines the nature of effective professional learning in schools and how such learning contributes to sound classroom pedagogy, organizational renewal, reform efforts and gains in student achievement. The unique role of teacher-leaders in professional development is examined. Course topics include principles of successful professional development programming, organizational and social contexts that influence teacher learning, and the evaluation of professional development programs.
Prerequisites: Take EDL 501.

EDL 525. Diversity in the Classroom and School Community.  3 Credits.
This course develops an understanding and commitment to the position that teaching is a social enterprise laden with moral responsibility, and that teacher leaders must be willing to act as agents for social justice in their classrooms and in their schools. This course helps teacher-leaders develop the dispositions, cultural knowledge and competencies to adapt curriculum and instructional skills for culturally responsive classroom practices and to advocate for social justice at the school level.

EDL 527. Financing Program Improvement Initiatives.  3 Credits.
This course is an introduction to preparing and writing grant proposals for funding program improvement projects in schools based on identified needs. It includes specific terminology related to the grant-writing process and how to identify eligibility requirements. The course focuses on how to develop the grant narrative, budget and other components necessary for a successful proposal.
Prerequisites: Take EDL 529.

EDL 529. Educational Program Evaluation.  3 Credits.
This course presents an overview of the concepts and approaches in educational program planning and evaluation, with an emphasis on the responsibilities of school leaders to use program evaluation as a means to improve teaching and learning. The interpretation of data collected through the program evaluation process is emphasized so that decisions may be made to continue, restructure or terminate educational programs. Case studies focus on critiquing program evaluations and students are required to plan and conduct an assessment of an educational program in their school or district.
Offered: Every year, Fall and Spring

The National Research Council’s Next Generation Science Standards provide a vision of what it means to be science literate; it rests on a view of science as both a body of knowledge and an evidence-based model and theory building enterprise that continually extends, refines and revises knowledge. The standards present science learning as three-dimensional: Disciplinary Core Ideas, Science and Engineering Practices, and Crosscutting Concepts. These three dimensions are the foundation of each NGSS Performance Expectation. Life Science has four overarching topics: 1) From molecules to organisms: structure and process; 2) Ecosystems: Interactions, Energy, and Dynamics; 3) Heredity: Inheritance and Variation of Traits; and 4) Biological Evolution: Unity and Diversity. This course focuses on developing the pre-services teacher’s understanding of each of the life science topics through the Science and Engineering Practices and Crosscutting Concepts.
Prerequisites: Take EDL 501; Course may be waived at the director’s discretion.
Offered: Every year, Summer

EDL 531. Cycles of Inquiry within the Science Classroom.  3 Credits.
This course helps teacher-leaders understand the cycles of inquiry in the data decision-making process. The cycle of inquiry is a systematic approach to teaching and learning that includes the following components: knowing content standards, diagnosing student needs, setting and working toward long- and short-term learning goals, backward planning from standards and assessments, investing students in their goals, teaching effectively, and continuously analyzing data to ensure learning goals are being met. This course provides training and experience through complete cycles of inquiry within the science classroom. As engaged members of the inquiry process, teacher-leaders participate in interconnected conversations to understand student progress and promote student-centered accountability. Course assignments and activities support each candidate as a reflective practitioner and build the capacity for teacher-leaders to make a difference for every learner.
Prerequisites: Take EDL 501.
Offered: Every year, Fall

EDL 532. Coaching Teachers of Science.  3 Credits.
One of the most important roles of a teacher-leader is that of peer coach and mentor. This course provides students with training and experience in mentoring colleagues, novice or experienced teachers, through a complete coaching cycle. Students actively participate in a coaching cycle that is designed to provide teachers with support over a period of consecutive days as they develop specific aspects of their teaching practice. They develop the skills necessary to support those teachers through modeling lessons, co-planning and co-teaching lessons, conducting classroom observations, and providing feedback to those science teachers to foster teachers as reflective practitioners. Ultimately, students explore the best practices in mentoring teachers to improve the teaching of science and to develop a peer-to-peer coaching network for inquiry, conversation, collaboration and support.
Prerequisites: Take EDL 501.
Offered: Every year, Fall
EDL 533. Action Research in Science Leadership. 3 Credits.
This course provides an overview of the concepts and principles of conducting action research in educational settings. Action research conducted in the field of science is reviewed and analyzed for the purpose, methodology and outcomes. Candidates design and implement action research in their school that involves working closely with peers on a project that is intended to improve the science skills of students. Together with their colleagues, students begin a cycle of posing questions, gathering data and deciding on a course of action. As reflective practitioners, candidates continue to examine student achievement outcomes, instructional strategies and reciprocal teacher leadership. Ultimately, this form of collaborative action research allows for the empowerment of all participants, collaboration through participation, acquisition of knowledge, and educational change.
Prerequisites: Take EDL 505 EDL 532.
Offered: Every year, Spring

EDL 601. Leading and Managing the Contemporary School. 6 Credits.
This course is an introduction to leadership and management theories and concepts and how school leaders apply them to address current problems and issues. Case studies focus on the development and analysis of school policies, practices and resources related to contemporary educational issues and the leadership and management styles required to implement them. The course includes a field-based experience involving the analysis of school and district policies, practices and resources related to a contemporary educational issue impacting teaching and learning.
Offered: Every year

EDL 603. Leading and Managing the Instructional Program. 6 Credits.
This course examines current curriculum designs and teaching/learning models and the leadership processes of developing, implementing and supervising instructional programs to improve student learning. Case studies focus on how to improve achievement through analysis of curriculum development processes in schools, professional development programming, student assessment systems and analysis of achievement data, and instructional practices of teachers. Course includes a field-based experience involving classroom supervision of a specific instructional program across multiple grade levels.
Offered: Every year

EDL 605. Leading and Managing School Improvement. 6 Credits.
This course analyzes the characteristics of effective schools and the leadership theories and concepts related to the change process. Emphasis is on application of these theories and concepts to the practice of improving school operations and student achievement. Case studies focus on analysis of schools in need of improvement, the specific issues facing the schools, data analysis techniques, effective leadership practices, strategic planning, financing improvement plans and evaluation processes. Course includes a field-based experience involving the analysis of the school as a professional learning community and the development of a school improvement plan to address identified needs.
Offered: Every year

EDL 607. Internship in Educational Leadership. 3 Credits.
This field-based experience requires students to assume a leadership role and demonstrate application of the standards established by the Educational Leadership Constituent Council. The internship is planned, guided and evaluated cooperatively by the student, the University professor and the field site mentor, who is a licensed, practicing administrator. The course culminates in the development of an electronic portfolio, which represents the work during the internship. This course is graded pass/fail.
Prerequisites: Take EDL 601 EDL 603 EDL 605.
Offered: Every year

EDL 609. Educational Program Evaluation. 3 Credits.
This course is an overview of the concepts and approaches in educational program planning and evaluation, with an emphasis on the responsibilities of school leaders to use program evaluation as a means to improve teaching and learning. The interpretation of data collected through the program evaluation process is emphasized so that decisions may be made to continue, restructure or terminate educational programs. Case studies focus on critiquing program evaluations and students are required to plan and conduct an assessment of an educational program in their school or district.
Offered: Every year

EDL 611. Educational Law. 3 Credits.
This course is a survey of federal and state statutes, regulations, case law, executive agency options and published research with respect to the rights of students and personnel and the corollary responsibilities of school and state agency officials. Case studies focus on actual legal issues brought to the courts by students, parents, teachers, administrators and the public.
Offered: Every year

EDL 613. Public School Finance. 3 Credits.
This course provides a comprehensive, detailed overview of the resource allocation process from the development of planning guidelines to the reporting of the results of school financial operations. Theoretical and practical treatments of the budget process are examined, with a focus on the budget as a tool to accomplish school goals. Case studies focus on how schools can utilize the budgeting process and both competitive and entitlement grants to reallocate and manage resources to improve educational programs and student learning.
Offered: Every year

EDL 700. Connecticut Administrators Test. 0 Credits.

Education (ED)

ED 500. Internship and Seminar I. 1 Credit.
This course provides the first-semester intern with supervision of the internship placement, as well as a weekly seminar that focuses on developing skills of reflective practice, mindfulness and intentional teaching. Taken in conjunction with ED 576, Teacher Discourse in the Secondary Classroom, this course allows students to begin to acquire strategies for maintaining classroom environments that are conducive to learning. Admission to the MAT program is required.
Offered: Every year, Fall

ED 501. Internship and Seminar II. 1 Credit.
This course provides the second-semester intern with supervision of the internship placement, as well as a weekly seminar that focuses on developing skills of reflective practice, mindfulness and intentional teaching.
Prerequisites: Take ED 500.
Offered: Every year, Spring
ED 502. Teaching Methods in Secondary Biology. 3 Credits.
This course is designed for pre-service teachers who are planning to teach high school biology. It touches on numerous aspects of biology classrooms including: assessing students' prior conceptions, designing a curriculum, planning lessons, determining and adapting appropriate teaching methods, promoting the Next Generation Science Standards three-dimensional science teaching, scientific literacy, using technology in science teaching, and assessing students' learning.
Prerequisites: Take ED 573 or ED 409.
Offered: Every year, Fall

ED 502L. Science Laboratory Safety Course. 1 Credit.
Science activities, laboratory investigations and demonstrations are essential for high-quality science instruction. These activities provide experiences for students to engage in science as a sense-making endeavor. Inherent in conducting science activities, however, is the potential for injury. This course is designed to improve the safety awareness and increase the knowledge of relevant safety regulations, practices and procedures that directly impact biology teachers. The emphasis throughout the course is on best practices.
Prerequisites: Take ED 573 or ED 409.
Offered: Every year, Fall

ED 503. Advanced Teaching Methods in Secondary Science. 3 Credits.
This course is designed for future science teachers prior to the onset of student teaching. The goal is to prepare students for success as a secondary science teacher. The focus is on junior high and high school science classrooms and identifying attributes of teaching and learning science that are critical to effective instruction. This course continually builds on knowledge of effective teaching strategies to plan for standards-based units of instruction. Students engage in authentic scientific investigations, design science learning experiences for students, write and implement unit plans, read and reflect. They also assemble a collection of science education resources supportive of science teaching. The course concludes with the creation of a research-based rationale for teaching science.
Prerequisites: Take ED 573 or ED 409.
Offered: Every year, Fall

ED 504. Methods II: Teaching English. 3 Credits.
This course explores pedagogical theories and their practical application to the teaching of English language arts on the secondary level. The course prepares the teacher candidate to use a variety of strategies in the classroom instruction of reading, writing and the critical examination of literature. The course emphasizes the Connecticut Common Core of Teaching, as well as national and state standards for the teaching of English.
Prerequisites: Take ED 573 or ED 409.
Offered: Every year, Fall

ED 505. Methods II: Teaching History/Social Studies. 3 Credits.
This course provides the teacher candidate with a theoretical and practical foundation for the teaching of history/social studies. It examines the issues, practices and materials involved with the study of the discipline. The course emphasizes the Connecticut Common Core of Teaching, as well as national and state standards for the teaching of history/social studies, technology and the assessment of students.
Prerequisites: Take ED 573 or ED 409.
Offered: Every year, Fall

ED 506. Methods II: Teaching Mathematics. 3 Credits.
This course prepares teacher candidates to teach mathematics on the secondary level. Central concepts, tools of inquiry, and the structure of the discipline are addressed through the development of instructional units and lesson plans. The course emphasizes the Connecticut Common Core of Teaching, as well as national and state standards for the teaching of mathematics, technology and the assessment of students.
Prerequisites: Take ED 573 or ED 409.
Offered: Every year, Fall

ED 507. Methods II: Teaching a World Language. 3 Credits.
This course examines the current philosophies, objectives and methods of teaching a world language. Teacher candidates examine theories of second language acquisition and develop instructional units and lesson plans across the broad range of world language curriculum. The course emphasizes the Connecticut Common Core of Teaching, as well as national and state standards for the teaching of a world language, technology and the assessment of students.
Prerequisites: Take ED 573 or ED 409.
Offered: Every year, Fall

ED 509. Reading and Writing Across the Curriculum. 3 Credits.
This course presents an overview of language arts development in the secondary grades with an emphasis on reading and writing across the curriculum. Teacher candidates explore literacy strategies to help all students learn and apply current theories of integrated learning, i.e., the reading-writing-thinking connection. Attention is given to the particular needs of students for whom English is a second language.
Prerequisites: Take ED 573.
Offered: Every year, Fall

ED 510. Adolescent Development. 3 Credits.
The major theories of human development are studied in order to provide an understanding of the normative and exceptional development patterns of adolescents and pre-adolescents. The social, emotional, cognitive and physical changes of adolescence are addressed from the perspective of their implications for education.
Prerequisites: Take ED 500.
Offered: Every year, Fall

ED 512. Disciplinary Core Ideas, Scientific and Engineering Practices, and Crosscutting Concepts. 2 Credits.
In this course, students explore teaching and learning of science, especially as they connect to the implementation of the Next Generation Science Standards (NGSS) and the new vision for K-12 Science Education. This vision is described in the underlying policy document from the National Academy of Sciences: A Framework for K-12 Science Education Practices, Crosscutting Concepts, and Core Ideas. Participants inquire into the relationship among equity and diversity in science education, key concepts of the NGSS, and how each contribute to the reimagining of science teaching.
Prerequisites: Master of Science in Teacher Leadership: take EDL 501; Course may be waived at the director’s discretion. Master of Arts in Teaching: take ED 573 or ED 409.
Offered: Every year, Summer

ED 514. Internship I. 1 Credit.
This course aims to support teacher candidates who are working as interns in secondary schools through discussion of the issues and challenges they experience. Students examine issues of leadership, ethics and social justice. The goal is to help teachers understand what it means to be a leader or change agent in schools in the current climate of educational reform.
Prerequisites: Take ED 409.
Offered: Every year, Fall
ED 515. Internship and Career Development Seminar. 1 Credit.
This course provides clinical support for teacher candidates who are completing their final residency/internship semester. In addition, the course provides a series of seminars to support candidates in their transition to a career as a teacher. Finding and securing a teaching position is the primary focus of the seminars. Seminars prepare teacher candidates in areas such as resume and cover letter writing, team interviews, mock interviews, interview preparation, certification and licensure procedures.
Corequisites: Take ED 601.
Offered: Every year, Spring

ED 521. Social and Philosophical Foundations of Education. 3 Credits.
This course is an inquiry into the institutional structures, social values and philosophical foundations of education. Teacher and student reflections focus on issues pertaining to the teaching-learning process, including freedom/authority/discipline; cultural diversity; multiplicity of learning modes; mind-body integration; community; alienation/violence; sexism/racism/elitism; and teacher/student roles. Admission to the MAT program is required.
Offered: Every year, Fall

ED 525. Diversity in the Classroom. 3 Credits.
This course helps teacher candidates understand that teaching is a social enterprise laden with moral responsibility and that, as teachers, they must be willing to act as agents for social justice in their classrooms and in their schools. This course helps students acquire the dispositions, cultural knowledge and competencies to adapt their curriculum and instructional skills for culturally responsive classroom practice. Admission to the MAT program or permission of program director is required.
Offered: Every year, Spring

ED 535. Elementary Internship and Seminar I. 1 Credit.
This course provides the first-semester intern with supervision of the internship placement, as well as a weekly seminar that focuses on developing skills of reflective practice, mindfulness and intentional teaching. Taken in conjunction with ED 525 Diversity in the Classroom, this course allows students to study first-hand the issues surrounding diversity and multiculturalism in actual practice through their observations, reflections and participation in school settings. Admission to the MAT program is required.
Offered: Every year, Fall

ED 544. Developing Literacy in the Primary Grades. 3 Credits.
This course is designed to provide pre-service teachers with the knowledge of the Common Core State Standards in the language arts, and diagnostic assessment and instructional strategies for the development of early literacy. Emphasis is on the development of teaching strategies necessary for the success of early readers and writers.
Prerequisites: Take ED 571.
Offered: Every year, Spring

ED 545. Elementary Internship and Seminar II. 1 Credit.
This course provides the second-semester intern with supervision of the internship placement, as well as a weekly seminar that focuses on developing skills of reflective practice, mindfulness and intentional teaching.
Prerequisites: Take ED 535.
Offered: Every year, Spring

ED 550. Issues and Research in Education. 2 Credits.
This course introduces students to some of the primary genres of educational research, including quantitative research, qualitative research and action-based teacher research. Special emphasis is placed on helping students become familiar with the notion of "problems of practice," and on how teachers can research these problems, analyze the evidence and design interventions to improve their teaching.
Prerequisites: Take ED 468L ED 409L ED 501 or ED 545.
Offered: Every year, Summer

ED 554. Internship and Seminar I. 2 Credits.
This course aims to support teacher candidates who are working as interns in elementary schools through discussion of the issues and challenges they experience. Students examine issues of leadership, ethics and social justice. The goal is to help teachers understand what it means to be a leader or change agent in schools in the current climate of educational reform.
Prerequisites: Take ED 575.
Offered: Every year, Fall

ED 555. Internship and Career Development Seminar. 1 Credit.
This course provides clinical support for teacher candidates who are completing their final residency/internship semester. In addition, the course provides a series of seminars to support candidates in their transition to a career as a teacher. Finding and securing a teaching position is the primary focus of the seminars. Seminars prepare teacher candidates in areas such as resume and cover letter writing, team interviews, mock interviews, interview preparation, certification and licensure procedures.
Corequisites: Take ED 601.
Offered: Every year, Fall

ED 556. Teaching Literacy in Grades 4-6. 3 Credits.
This course provides teacher candidates with the knowledge of the Common Core State Standards in the language arts, and diagnostic assessment and instructional strategies for the development of literacy in grades 4-6. Emphasis is on the development of teaching strategies necessary for the success of readers and writers in grades 4-6.
Prerequisites: Take ED 436 or ED 544.
Offered: Every year, Fall

ED 558. Elementary School Science: Content and Pedagogy. 3 Credits.
This course leads students to an understanding of science concepts and scientific inquiry at the elementary school level through active investigations with common phenomena and everyday materials. Topics include: inquiry-based science focused on national standards and integration with the Common Core State Standards; increased knowledge of resources for science learning; and management considerations in such areas as material preparation, groupings and safety.
Prerequisites: Take ED 571.
Offered: Every year, Summer

ED 562. Facilitating the Arts in the Elementary Classroom. 2 Credits.
This course focuses on the development of the teacher-as-facilitator in incorporating the arts into the elementary classroom. An emphasis is placed on the relationship of the arts to teaching, learning and the integration of the arts into other content areas. Students explore a variety of media, movement, music and theatrical skills for selecting materials and activities appropriate to a child’s age/stage of development. Attention also is given to the music and art of many peoples, with particular emphasis on developing a repertoire representative of different cultures and languages.
Prerequisites: Take ED 571.
Offered: Every year, Summer
ED 566. Elementary School Social Studies: Content and Pedagogy. 2 Credits.
This course provides elementary teacher candidates with information, strategies and knowledge of the pedagogy of teaching social studies. The course incorporates other disciplines with Common Core State Standards and expands views of civic education. Students work collaboratively and independently to build understandings of the field of social studies and learn how to teach it creatively and effectively in a diverse community.
Prerequisites: Take ED 535 or ED 571.
Offered: Every year, Summer

ED 568. Teaching Mathematics in the Primary Grades. 3 Credits.
This course introduces teacher candidates to the Common Core State Standards in mathematics and the instructional methods and curricular materials used to enhance the instruction of mathematics in the primary grades. Candidates learn to develop lesson plans and assessment methods that positively affect the learning of mathematics in grades K-3. Students are required to apply this knowledge within their field placement to better understand the relationship of theory and practice in the instruction of mathematics in the lower elementary grades.
Prerequisites: Take ED 468 or ED 568.
Offered: Every year, Spring

ED 569. Teaching Mathematics in Grades 4-6. 3 Credits.
This course introduces pre-service teachers to the Common Core State Standards in mathematics and the instructional methods and curricular materials used to enhance the instruction of mathematics in grades 4-6. Teacher candidates learn to develop lesson plans and assessment methods that positively affect the learning of mathematics in grades 4-6. Candidates are required to apply this knowledge within their field placement to better understand the relationship of theory and practice in the instruction of mathematics in the upper elementary grades.
Prerequisites: Take ED 468 or ED 568.
Offered: Every year, Fall

ED 571. Learning and Teaching the Developing Child. 3 Credits.
This course provides an introduction to the basic concepts of cognitive, social and emotional development of school age children (Ages 4-18) and how the pedagogy of learning and teaching is designed to enhance and support this development. Major topics of inquiry include brain-based learning research, motivation, engagement of learners, lesson planning and curriculum development. This course is taken during the first internship semester and includes field-based assignments and analyses. Admission to the MAT program is required.
Offered: Every year, Fall

ED 572. Advanced Learning and Teaching. 3 Credits.
This course focuses on advanced concepts and skills related to teaching and learning elementary-level learners, assessment strategies and assessment-driven instructional practices, error analyses and data-driven decision making, work sampling, testing and measurement, differentiation of instructional practices, standards-based practices and research-based instruction.
Prerequisites: Take ED 571.
Offered: Every year, Spring

ED 573. Advanced Teaching and Learning - Secondary. 3 Credits.
This course focuses on advanced concepts and skills related to teaching and learning. Topics include adolescent learners, assessment strategies and assessment-driven instructional practices, error analyses and data-driven decision making, work sampling, testing and measurement, differentiation of instructional practices, standards-based practices and research-based instruction.
Prerequisites: Take ED 571.
Offered: Every year, Spring

ED 575. Teacher Discourse: Language and Communication Issues in the Elementary Classroom. 3 Credits.
The course provides the teacher candidate with the knowledge and skills necessary to design classroom environments that enhance and support the social and emotional development of elementary-level learners. This course analyzes the communication systems of educational settings— in particular the communication systems of the classroom, the school/ family dynamic and the individual developing child. The course analyzes and considers instructional language and its impact on the classroom community, student learning and student behavior. Candidates also focus on teacher communication with parent/guardian populations and its impact on student learning. Enrollment in the MAT program is required.
Offered: Every year, Fall and Summer

ED 576. Teacher Discourse in the Secondary Classroom. 3 Credits.
The course provides the teacher candidate with the knowledge and skills necessary to design classroom environments that enhance and support the social and emotional development of adolescent learners. The course analyzes instructional language, the language of discipline and how teacher language influences the climate of contemporary classrooms. The impact of teacher discourse on the classroom community, student learning and student behavior are all considered. The major focus is on managing classroom behaviors and supporting and respecting adolescent learners to enhance academic achievement. Enrollment in the MAT program is required.
Offered: Every year, Fall and Summer

ED 577. Teaching English Language Learners in the Mainstream Classroom. 3 Credits.
This course introduces the pre-service teacher candidate to the knowledge and skills that are needed to provide effective instruction to ELs in the mainstream 1-12 classroom. Topics of study include instructional methods across content areas, the influence of language and culture on learning, teaching, and assessment history and legislation related to ESL and bilingual education in the United States, and second language acquisition.
Prerequisites: Take ED 572 ED 573 or ED 436.
Offered: Every year, Fall

ED 578. Family and Community: Family Dynamics. 3 Credits.
This course offers an introduction to the concept of family dynamics and family systems. Participants will learn the key components of family dynamics that influence children, develop family communication systems, and learn how to enhance family dynamics. Participants will develop strategies to enhance family dynamics and teacher communication with parent/guardian populations and its impact on student learning. Enrollment in the MAT program is required.
Offered: Every year, Fall

ED 579. Independent Study. 1-6 Credits.
Offered: As needed

ED 601. Student Teaching. 6 Credits.
This 10-week student teaching placement at the elementary, middle or secondary level allows students to demonstrate the skills, understandings and dispositions needed to assume full responsibility as a classroom teacher.
Prerequisites: Take ED 501 ED 514 ED 545 or ED 554.
Offered: Every year, Spring

ED 603. Student Teaching under a DSAP. 6 Credits.
This course is designed for students who are teaching under a Durational Shortage Area Permit (DSAP) issued by the Connecticut State Department of Education. Students receive supervision and support from a university supervisor on a regular basis during the first semester of the academic year and as needed throughout the second semester.
Prerequisite: Permission of the program director.
Offered: Every year, All
ED 614. Elementary Education Internship III.  1 Credit.
This online course is designed for interns in the graduate, five-semester elementary education program. It aims to help teacher candidates develop the leadership skills needed to serve as agents of change in elementary schools. The course focuses on issues of leadership, ethics and social justice in the current climate of educational reform and increased levels of teacher accountability.
Prerequisites: Take ED 545.
Offered: Every year, Fall

ED 615. Internship and Career Development Seminar.  1 Credit.
This course provides clinical support for teacher candidates who are completing their final residency/internship semester. In addition, the course provides a series of seminars to support candidates in their transition to a career as a teacher. Finding and securing a teaching position is the primary focus of the seminars. Seminars prepare teacher candidates in areas such as resume and cover letter writing, team interviews, mock interviews, interview preparation, certification and licensure procedures.
Corequisites: Take ED 601.
Offered: Every year, Spring

ED 616. Secondary Education Internship III.  1 Credit.
This online course is designed for interns in the graduate, five-semester secondary education program. It aims to help teacher candidates develop the leadership skills needed to serve as agents of change in secondary schools. The course focuses on issues of leadership, ethics and social justice in the current climate of educational reform and increased levels of teacher accountability.
Prerequisites: Take ED 501.
Offered: Every year, Fall

ED 617. Internship and Career Development Seminar.  1 Credit.
This course provides clinical support for teacher candidates who are completing their final residency/internship semester. In addition, the course provides a series of seminars to support candidates in their transition to a career as a teacher. Finding and securing a teaching position is the primary focus of the seminars. Seminars prepare teacher candidates in areas such as resume and cover letter writing, team interviews, mock interviews, interview preparation, certification and licensure procedures.
Corequisites: Take ED 601.
Offered: Every year, Spring

ED 693. Research I.  2 Credits.
In this course, teacher candidates collaborate with an intern adviser about a problem of practice. They identify, define and begin to investigate the problem.
Prerequisites: Take ED 550.
Offered: Every year, Fall

ED 694. Research II.  2 Credits.
In this course, teacher candidates create an intervention plan based on research that was done in ED 693 and conversations with an intern adviser. They then implement the intervention plan, reflect on the results of the plan and share their results in the school setting.
Prerequisites: Take ED 550 ED 693.
Offered: Every year, Spring

English (EN)

EN 541. Poetry for Prospective High School Teachers.  4 Credits.
This course is an examination of the way poetry operates as a social practice, one that uses many forms and one that has served different purposes at different times. To that end, students examine a range of British and American poetry throughout literary history, in both form and technique, and attempt to situate it culturally. Although this is considered a genre course, it focuses on why students might want to read poetry and what they do with it, rather than defining it as a stable and universal category.
Offered: Every year, Fall

EN 551. Advanced Studies in Writing.  4 Credits.
This course aims to make students metacognitive practitioners of writing. It is a course in applied linguistics designed to immerse students in English language practice by reading and writing, making them conscious of the grammatical components, structures and semantics involved in producing writing.
Offered: Every year, Summer

EN 554. Young Adult Literature.  4 Credits.
This is a multi-genre course that asks students to consider the evolving category of young adult literature with an emphasis on literary and cultural analysis. By pairing primary texts with both seminal and recent criticism, students consider historical and contemporary examples of young adult literature, focusing on questions of coming-of-age, ethnicity, sexuality, canonicity, trauma and identity.
Prerequisites: Take EN 460.
Offered: Every year, Spring

EN 699. Independent Study.  3 Credits.

Entrepreneurship (ENT)

ENT 610. Entrepreneurship and Franchising.  3 Credits.
Franchising is a $1 trillion direct sales business. To some financial analysts, franchising is the purest form of capitalism and entrepreneurship. This course looks at how entrepreneurs can expand their business model by adapting the franchise model. Students examine the benefits of franchising, and the hurdles and pitfalls to avoid. Participants use actual cases of entrepreneurs, develop a franchise model and make a final presentation to a panel of entrepreneurs and successful franchisors.
Offered: As needed

ENT 620. Corporate Entrepreneurship.  3 Credits.
This course is designed for intrapreneurs who want to apply their entrepreneurial spirit to innovate within established organizations, as well as for managers whose goal is to build and manage innovation processes in the organization. Students learn techniques and best practices that combine innovation strategies, start-up thinking and entrepreneurial methods to accomplish organizational innovation in its many forms, from product/service innovation and business model innovation, to innovation for social and environmental purposes. The course uses case studies, readings and projects.
Offered: As needed
ENT 625. Entrepreneurship. 3 Credits.
The course deals with the creation and management of new businesses and the institutionalization of innovation in existing businesses. Students are introduced to a body of knowledge on the successful planning, implementation, and management of entrepreneurial ventures. The objective of the course is to provide the knowledge and the ability to identify and assess business opportunity and estimate the resource requirements necessary to success. Production of a business plan is required.
Offered: As needed

ENT 626. Business Plan Competition. 3 Credits.
The course assumes the competencies acquired in ENT 625 and requires that class members, working individually or in teams, write a business plan for a new venture or the growth of an existing business to be entered in statewide or national competition with plans from other entrepreneurs or graduate programs.
Offered: As needed

ENT 688. Entrepreneurship Independent Study. 3 Credits.
ENT 689. Entrepreneurship Independent Study. 3 Credits.
Offered: As needed

Finance (FIN)

FIN 604. Risk Management. 3 Credits.
This course provides a broad perspective of risk management including traditional risk management and insurance practices as well as financial risk management and hedging with derivative contracts. Emphasis is on making risk-management decisions that maximize shareholder value.
Prerequisites: Take MBA 640.
Offered: As needed

FIN 610. Global Investments Analysis. 3 Credits.
This course focuses on the theory and practice of investment analysis in a global environment. Topics include relative, intrinsic and no-arbitrage valuation models, classical and modern theories of risk and return, introductory asset allocation and portfolio optimization techniques, market structure, and the role of institutions. The emphasis is on equity products, but fixed income and derivative securities also are covered.
Prerequisites: Take MBA 640.
Offered: Every year, Fall

FIN 612. Fixed Income Investments. 3 Credits.
This course rigorously evaluates fixed-income securities, including default-free bonds, floating-rate notes and corporate bonds. Closely related financial instruments, such as forwards and futures on fixed-income securities, bond options and interest rate swaps are strongly emphasized. In addition to analyzing specific types of fixed-income securities, students examine the tools used in bond portfolio management.
Prerequisites: Take MBA 640.
Offered: Every year, Fall

FIN 613. Management of Financial Institutions. 3 Credits.
This course examines the issues and problems facing bank management with an emphasis on evaluating and measuring bank performance. Extensive case studies are used to illustrate the techniques in the management of assets, liabilities and investments, as well as current studies pertaining to bank regulation, mergers, acquisitions and valuation. Discussions of bank services and competition with other industries also are included.
Prerequisites: Take MBA 640.
Offered: As needed

FIN 615. Emerging Financial Markets. 3 Credits.
This course is an introduction to emerging financial markets. Market instruments, regulations and players in these markets are thoroughly covered. The risk and return framework of investing in emerging markets also is explored.
Prerequisites: Take MBA 640.
Offered: Every year, Summer

FIN 616. Derivatives. 3 Credits.
This course provides an in-depth analysis of derivative securities (futures, options, swaps, and other contingent claims). Topics include valuation, hedging, market structure, trading strategies and the application of option pricing theory to agency problems, financial contracting and capital budgeting.
Prerequisites: Take MBA 640.
Offered: Every year, Spring

FIN 630. Portfolio Theory and Practice. 3 Credits.
This course provides a rigorous examination of modern portfolio theory and practice. Emphasis is on the design of portfolio objectives, advanced asset allocation and portfolio optimization techniques, and the use of futures and options in portfolio management. Legal and ethical obligations also are discussed.
Prerequisites: Take FIN 610.
Offered: Every year, Spring

FIN 660. Cases in Corporate Finance. 3 Credits.
This applications-oriented course deals with cases involving working capital, mergers, corporate valuation and capital budgeting analysis and planning. The course reinforces and applies concepts and techniques from accounting and financial economics in a practical setting.
Prerequisites: Take MBA 640.
Offered: Every other year, Spring

FIN 665. Issues in Equity Compensation. 3 Credits.
This course is a seminar in the theory and practice of equity compensation. Students are introduced to the economic and managerial incentives for utilizing equity compensation as well as the agency, corporate governance, valuation and accounting issues that arise when firms utilize equity compensation.
Prerequisites: Take MBA 640.
Offered: As needed

FIN 670. Trading and Exchanges. 3 Credits.
This course introduces students to the market microstructure of equity markets. The impact of the design, organization and regulation of equity markets on trading is explored. Students utilize real-world trading simulations to learn and reinforce concepts.
Prerequisites: Take FIN 610.
Offered: As needed

FIN 688. Independent Study - Finance. 3 Credits.
Permission of the MBA director and School of Business dean is required.
Offered: As needed

FIN 689. Independent Study - Finance. 1-6 Credits.
Permission of the MBA director and School of Business dean is required.
Offered: As needed

FIN 697. Special Topics in Finance. 3 Credits.
Offered: As needed
Health Management (HM)

HM 600. Foundations of Health Care Management. 3 Credits.
This course expands the student’s understanding of: 1) the organization and functions of various health services organizations/systems and their interrelationships; 2) basic concepts of management planning, organizing, leading, staffing and controlling as they relate to issues critical to the mission and strategic positioning of the organization/system; and 3) the utilization of scarce resources to deliver optimum health care at reasonable cost.
Offered: Every year, Fall

HM 621. Quality Management in Health Care Facilities. 3 Credits.
This course provides a broad perspective on improving quality in health care facilities. Students gain a working knowledge of accreditation organizations and health care regulatory requirements including the JCAHCO and patient-safety legislation. The course explores patient safety and quality methods as well as the role of consumers in evaluating the quality of the health care services they receive. At course completion, students are able to competently participate in health care quality/patient safety endeavors at all levels of provider, payer, regulatory and accreditation organizations. Students may participate in an onsite project.
Offered: Every year, Fall

HM 626. Epidemiology and Population Health. 3 Credits.
This course familiarizes students with the principles and methods of epidemiology and their application to the study of the health of populations—skills becoming increasingly important for health care managers given the advent of Accountable Care Organizations. Students focus on the determinants and distribution of diseases among groups of people, examining infectious and chronic diseases, including diseases and conditions caused by accidents and violence. Emphasis is placed on using epidemiologic data for planning and managing health care services, including preventive services, developing health policy and measuring the outcomes of health care programs.
Offered: Every other year, Fall

HM 630. Corporate Compliance in the Health Care Industry. 3 Credits.
This course addresses both the managerial and legal aspects of health care corporate compliance. Essential elements of a compliance program are presented with a focus on various pieces of federal legislation and enforcement initiatives conducted by the U.S. Department of Justice and the Office of Inspector General in the Department of Health and Human Services.
Offered: Every year, Spring

HM 635. Advanced Health Care Compliance: The Legal Issues. 3 Credits.
This course provides an in-depth review of the laws and legal issues facing the health care compliance officer and the health care organization. This course is designed primarily for the non-lawyer who needs a comprehensive understanding of the compliance legal issues facing the health care industry. Lawyers wishing to practice in the health care compliance field would also benefit from this course’s analysis of the laws in this area and the application of the laws to specific issues pursued by the U.S. Department of Justice and by the Office of Inspector General in the area of health care compliance.
Offered: Every other year

HM 640. Special Topics. 3 Credits.
Offered: As needed

HM 643. Managed Health Care. 3 Credits.
This course is graded on a pass/fail basis.
Offered: As needed

HM 644. Health Care Industry Regulation. 3 Credits.
This course analyzes and discusses the statutory, regulatory and private contract provisions that govern the delivery of health care by licensed providers. The course is graded on a pass/fail basis.
Offered: As needed

HM 646. Law and Medicine. 3 Credits.
A basic, introductory course for students interested in law and medicine, this course covers the legal regulation of the medical profession in such areas as medical education, physician licensure and disciplinary proceedings, hospital organization, alternative structures for providing health care, efforts to control health care costs, the control of drugs and medical devices by the Federal Food and Drug Administration, and the Statutory Regulation of Medical Malpractice Actions. This course is graded on a pass/fail basis.
Offered: As needed

HM 647. Health Care Business Transactions. 3 Credits.
This elective course is for students wishing to study health care private law. The course is structured around a trio of (fairly standard) health care business transactions, pursuant to which: 1) the physicians currently affiliated with a local hospital form a physical practice group; 2) the group and the local hospital create a Physician-Hospital Organization (PHO) that provides various services to the MD group; and 3) the PHO enters into a contract with an HMO to provide medical services to a number of patients. This course is graded on a pass/fail basis.
Offered: As needed

HM 648. Advanced Law and Medicine. 3 Credits.
This course provides for in-depth study of issues related to reproductive issues. Both classic and new cases are discussed, as well as some pending cases and legislation. Possible topics include the right to marry; contraception; abortion; forced sterilization in lieu of incarceration; surrogate motherhood; frozen embryos; cloning; homosexuality; etc. Other topics related to reproduction and of interest to the students also may be considered. This course is graded on a pass/fail basis.
Offered: As needed

HM 657. Health Care Compliance Law. 3 Credits.
This course illuminates the legal aspects of health care compliance. At both the federal and state levels, the course addresses the statutory, regulatory and case law that comprises the complex legal backdrop in which the health care industry operates. The course introduces the history, purpose and substance of health care regulatory compliance programs and addresses legal doctrines concerning reimbursement law and related fraud and abuse, legal restrictions on physician referral and related anti-kickback laws, antitrust law, compliance issues in health care business transactions, compliance mandates in the Affordable Care Act, and the law governing health care research.
Prerequisites: Take HM 668.

HM 660. Human Resource Management in Health Care Administration. 3 Credits.
The policies, organization, procedures and techniques required to develop a positive personnel program and a favorable working climate specific to health care organizations are studied. Labor law for health care facilities is identified as it relates to collective bargaining, unfair labor practices, disputes, union security, reporting and disclosure requirements, contract negotiations and conciliation and mediation procedures. The importance of positive human resource programs in the labor-intensive health care industry is emphasized.
Offered: Every year, Summer
HM 663. Integrated Health Systems and Managed Care. 3 Credits.
This course focuses on the integration of provider networks to create more efficient and better coordinated health care systems. The impact of activity on traditional health care provider roles is analyzed. Capitation and other managed care reimbursement techniques and the successes and failures of integrated health systems are examined critically.
Prerequisites: Take HM 600 HM 621.
Corequisites: Take HM 664 - Must be taken either prior to or at the same time as this course.
Offered: Every year, Spring

HM 664. Financial Management in Health Care Organizations. 3 Credits.
This course equips the student with a basic understanding of financial management techniques as well as the application of financial theory to the practice of health care administration. Unique problems of financing health care organizations are covered, with special attention paid to using allocation decisions to develop structured financial management systems.
Offered: Every year, Spring

HM 668. Legal Aspects of Health Care Delivery. 3 Credits.
This course provides a fundamental knowledge of law and the legal system, examining how they affect health care administration. Three areas of law of special importance to the health care setting are emphasized: tort law, contract law and administrative law. The course also examines the legal responsibilities and liabilities of an institution's governing board, its administrators, and its clinical staff. Finally, the course analyzes the legal and ethical rights of the patient and considers the patient's right to informed consent, confidentiality and commitment.
Offered: Every year, Spring

HM 669. Organization and Management of Long-Term Care Facilities. 3 Credits.
This course covers the organization and administration of long-term care facilities. The sociology and psychology of aging as they affect long-term health care also are explored. Concepts of safety and security, labor market trends, city and state codes, and major legislation regulating these facilities are reviewed. The course fulfills the educational requirement for licensure in Connecticut.
Offered: As needed

HM 671. Health Policy and Politics. 3 Credits.
This course outlines the role of government in U.S. health policy. Government agencies and other institutions affecting health policy making are covered. The course discusses how the media, advocacy organizations and campaign contributions affect health policy making. It focuses on key interest groups in the U.S. health policy-making process.
Offered: As needed

HM 780. Internship I (degree students only). 3 Credits.
This residency offers field experience under the direction of a qualified preceptor in a health services institution. It is designed primarily for those without significant health services administration experience. It is the responsibility of the candidate to locate a residency opportunity appropriate to his or her interests, although faculty will offer suggestions and provide assistance. Minimum of 250 clock hours per semester.
Offered: As needed

HM 781. Internship II (degree students only). 3 Credits.
This residency offers field experience under the direction of a qualified preceptor in a health services institution. It is designed primarily for those without significant health services administration experience. It is the responsibility of the candidate to locate a residency opportunity appropriate to his or her interests, although faculty will offer suggestions and provide assistance. Minimum of 250 clock hours per semester.
Offered: As needed

HM 790. Residency I (non-degree students only). 4 Credits.
This 450 clock-hour residency (one semester of a two-semester licensure requirement) is required for students who want to take the state nursing home administrator licensure examination through the LTC certificate program.
Offered: As needed

HM 791. Residency II. 4 Credits.
This 450 clock-hour residency (one semester of a two-semester licensure requirement) is required for students who want to take the state nursing home administrator licensure examination through the LTC certificate program.
Offered: As needed

Health Science (HSC)

HSC 505. Interprofessional Community-Based Service Learning Seminar: Age-Related (HSC 205). 1 Credit.
This course provides an opportunity to engage in active learning, implementing a program with a local community partner working with children/youth, adults or older adults. Students are required to participate in 10-15 hours of community engagement to observe and apply the concepts of interprofessional health care in a community-based setting. Community experience is supervised by faculty with expertise in analysis of community-based practice. Classroom/community engagement schedules will be determined. Course may be taken more than once.
Offered: Every year, All

Students observe and apply various health/wellness concepts in an international community-based setting. Students are required to spend a minimum of 15 hours at an international site to engage in active learning by implementing a program with an international community partner. Course is taught by faculty with expertise in the analysis of community-based practice. Classroom/community engagement schedules will be determined. This course may be taken more than once. Application process for international experiences required.
Offered: Every year, All

HSC 507. Interprofessional Community-Based Service Learning Seminar: Special Populations (HSC 207). 1-2 Credits.
This course involves active learning implementing a program with a local community partner working with at-risk population. Students are required to participate in 10-15 hours of community engagement to observe and apply the concepts of interprofessional health care in a community-based setting. Faculty with expertise in the analysis of community-based practice lead discussions and community engagement related to population health in the local community. This course may be taken more than once. Offerings include MTW section during Thanksgiving week.
Offered: Every year, All

HSC 599. Health Science Independent Study. 1-5 Credits.
Offered: As needed
History (HS)

HS 501. Special Topics. 4 Credits.
Offered: As needed

HS 524. Approaches to World History. 4 Credits.
This course examines various approaches to, and interpretations of, world history. The course has a topical format, with the specific focus shifting depending on contemporary global issues, recent interpretive innovations in the field and the interests of the instructor and the students. A specific goal of the class is to offer future teachers approaches to modern world history that will aid them in lesson planning and development. More generally, the goals of this class include the improvement of written and oral communication skills and the development of critical thinking skills through the examination of primary and secondary sources and the construction of interpretative arguments.
Offered: Every year, All

HS 525. History of the Atlantic World From the 15th to 19th Century. 4 Credits.
This course explores the world made by contact, exchanges and clashes between European, Africans and Americans between the early 1400s to the late 1800s. The key assertion underpinning this course is that, despite social and cultural distinctiveness, Europe, Africa and America were interconnected, and are best understood as a "regional system" where each part is most intelligible by investigating its relationship to the whole. Using a thematic and chronological approach, this course explores critical themes that not only link these sub-regions but also give them distinctive historical character. Global trade networks, migration and settlement, colonization and imperialism, cultural and epidemiological transmission, race and gender relations and demographic reconfigurations are among the topics investigated in this course.
Offered: Every other year, All

HS 526. Approaches to U.S. History. 4 Credits.
This course focuses on a specific topic in American history and varies according to contemporary global issues, recent historiographical shifts, methodological innovations and/or the interests of the instructor and the students. One goal of this class is to offer future and present primary, middle and secondary schoolteachers approaches to U.S. history that may aid them in content and lesson planning. This course also uses typical historical methods, including the examination of primary and secondary sources and the construction of interpretative arguments, to develop written and oral communication skills as well as critical thinking.
Offered: Every year, Spring

HS 527. Approaches to Modern European History. 4 Credits.
This course examines modern European history from a variety of standpoints. The course has a topical format—the specific focus shifts depending on contemporary issues and events, recent interpretive innovations in European history and the interests of the instructor and the students. In addition to deepening their knowledge of recent European history, the course also aids future teachers in developing rigorous and historically rich lessons for their students.
Offered: Every year, Fall

HS 564. Topics in East Asian History. 3 Credits.
Students are introduced to Chinese and Japanese civilizations from the dawn of history to the end of the 20th century. The course stresses the artistic, cultural and intellectual traditions that evolved in East Asia.
Offered: As needed

HS 565. Topics in Geography for the 21st Century (GP 565). 3 Credits.
Students are introduced to the general structure and methodology of geographic study in a cultural setting. The interaction among environments, populations, ways of life and locations are studied in a coherent, organized way. The distribution of people, food, energy and resources are analyzed, and there is an assessment of how to evaluate environmental potential, to deal with other peoples, to maximize available opportunities, and to determine which course of action to follow for progress and growth.
Offered: As needed

HS 566. Chinese Civilization. 3 Credits.
In this introduction to Chinese civilization from the dawn of Chinese history until the end of the dynastic cycle in 1911, students are first introduced to the geography of China. Next, they learn about the evolution of the Chinese written language. Following this, the class considers the three ways of thought—Confucianism, Taoism and Buddhism—which provided the ideological “glue” that held traditional Chinese society together. Last, students explore the worlds of Chinese literature, art and architecture.
Offered: As needed, All

HS 567. Popular Culture in American History. 3 Credits.
Offered: As needed, All

HS 599. Independent Study. 3 Credits.
Offered: As needed, All

Instructional Design (IDN)

IDN 525. Instructional Design for Digital Environments. 3 Credits.
This course introduces some of the more widely used models of instructional design, including ADDIE, First Principles of Design, and the Systems Approach. Students investigate each phase of the instructional design process, along with appropriate elaboration on the concepts involved. To help you connect in-class learning and real-world applications, this course requires you to identify a local organization (e.g., school, community center, corporation), conduct a needs assessment to identify an instructional need, and design an instructional solution.
Offered: Every year, Fall and Spring

IDN 526. Cognitive Science and Educational Design. 3 Credits.
This course examines theoretical perspectives and empirical evidence on learning, instruction and the use of digital resources for education. Focus is on the application of theory to guide design decisions. Readings include empirical studies as well as theoretical material to help students become comfortable with reading, interpreting and applying theory and research to design. The final project for the course is a design proposal and prototype for an instructional media resource.
Offered: Every year, Fall

IDN 527. Society, Culture and Learning. 3 Credits.
This course examines theories, approaches, and environments that address social and cultural contexts for learning. Students investigate a range of resources that reflect the importance of society and culture in their design, analyzing the influences that shape them. Readings include both theoretical material and research studies, with an emphasis on practical applications of theory. The final project for the course is a design proposal and prototype for an instructional media resource that specifically addresses social and cultural considerations.
Offered: Every year, Spring
IDN 528. Collaborative Design of Digital Environments. 3 Credits. 
This course focuses on the design of learning environments as a collaborative effort. Concurrent with ongoing discussion and analysis of existing digital learning resources of many types (e.g., learning management systems, games, simulations, microworlds, social media networks), students work in small teams to create a needs analysis, design specifications for and prototype of their own learning resource. 
Offered: Every year, Fall

IDN 529. Educational Media Design Lab. 3 Credits. 
This course examines the principles, techniques and current practices used to produce and/or deliver interactive multimedia applications for education. Through a series of project-based assignments, students gain experience with a range of software tools used to create media artifacts such as text, graphics, animation, audio, video, games or wireframes. Course makes use of a variety of applications based on each student's specific interests, needs and level of proficiency. 
Offered: Every year, Spring

IDN 530. Web Design for Instruction. 3 Credits. 
What factors contribute to a compelling web design that can engage users and support their learning? In this course, students investigate web-based instructional resources. They examine relevant theoretical frameworks and use these principles to analyze the design of existing web resources, including graphics and functionality. Students develop a design document and a working prototype of a web-based instructional resource using various web design tools. Topics include principles of HTML, CSS, UX, and approaches to mobile design. 
Offered: Every year, Spring and Summer

IDN 531. Design of Interactive Educational Environments. 3 Credits. 
This course examines the design of interactive environments, including games, simulations and microworlds, from both theoretical and practical perspectives. Topics include information representation, types of interactivity, user control and pedagogical implications of interactivity, as well as the effective design of these resources for education. Students develop proficiency in the use of an interactive authoring environment or game design platform, depending on the individual's technical background, creating a functioning prototype of their design. 
Offered: Every year, Fall and Summer

IDN 532. Design and Development of Online Learning. 3 Credits. 
What does it take to design a compelling online learning experience, one that engages students and fosters their construction of new understandings? This class examines current approaches to planning, development and implementation of online courses. Students apply research-based principles and methods to develop an online "mini-course" designed to support a successful learning experience for the user. This course provides excellent foundational training in Learning Management Systems. 
Offered: Every year, Fall and Spring

IDN 533. Producing Educational Video and Digital Training. 3 Credits. 
This course examines the use of video in education, including theoretical approaches to visual learning as well as practical considerations about planning, writing, producing and integrating video resources. Students investigate artistic and technical practices used in combining audio, still images and moving pictures into coherent messages. Additional topics include directing, cinematography, audio, lighting, editing and effective distribution. Depending on levels of technical preparation, students use a range of applications to plan and produce short video segments. 
Offered: Every year, Fall and Summer

IDN 534. Implementing Digital Media for Learning. 3 Credits. 
This course examines the challenges of implementing digital environments for learning in real-world contexts. Through research articles and case studies, students explore issues such as selecting, budgeting and evaluating technology resources. Within the structure of the class, students may choose to focus on implementing media in K-12 environments (in and out of school), higher education, industry or public spaces. 
Offered: Every year, Summer

IDN 535. New Directions in Digital Environments for Learning. 3 Credits. 
As new digital resources are developed, instructional designers need to be able to understand and evaluate their practicality and value for educational use. This course allows students to explore new and changing technologies, applications and approaches. By definition, topics in this course change each time it is offered, but may include such areas as virtual and augmented reality, handheld devices and interactive media. 
Offered: Every year, Fall and Spring

IDN 536. Independent Study. 3 Credits. 
This course includes supervised study of special topics in instructional design. This option is designed to allow a student to further customize his or her course of study if needed. Each student must submit a proposed course of study including assessment plan for approval prior to enrolling. 
Offered: Every year, Fall and Spring

IDN 537. Designing and Utilizing Assistive Learning Technologies. 3 Credits. 
This course explores the use of technology to support achievement for individuals with different learning needs. Topics include an overview of the continuum of assistive technologies, from simple to complex; a discussion of theoretical bases, support and guidelines for the use of these technologies; an examination of the principles of Universal Design for Learning; and the exploration of specific tools and devices. Course projects emphasize hands-on experience in using these approaches. 
Offered: Every year, Spring

IDN 540. Capstone Experience: Thesis and ePortfolio. 3 Credits. 
In this course—the first of two courses comprising the capstone experience—students explore potential career paths; learn the essentials of project management to develop a project management plan for their capstone project; and develop and present the thesis for that project. The project, which is developed in IDN 541, serves to demonstrate the student’s fluency with the elements of an instructional design analysis, technical competence, and ability to apply theory to inform design. 
Offered: As needed

IDN 541. Capstone Experience: Project and Presentation. 3 Credits. 
This course—the second of two courses comprising the capstone experience—requires students to curate an ePortfolio demonstrating the quality and scope of their work, refine their resumes, and refine and develop the final capstone project. The project serves to demonstrate fluency with the elements of an instructional design analysis, technical competency, and the ability to use theory to inform design. 
Offered: As needed

Interactive Media (ICM)

ICM 500. Special Topics in Interactive Media. 3 Credits. 
The subject matter for this course varies depending on industry and professional trends. 
Offered: As needed
ICM 501. Foundations in Graduate Studies. 3 Credits.
A sequence of readings, practices and exercises introduces the students to the "deep work" required of master's-level study. Through structured discussions, presentations, projects and readings, students build the knowledge base and critical skills required to formulate methodological research and practice across media. Each student sets up a portfolio site for the collection of research and practice artifacts created throughout the master's coursework.
Offered: Every year, Fall and Spring

ICM 502. Visual Design. 3 Credits.
This course covers the principles and practices associated with graphic design as a way to make complex information easier to understand and use. With a primary focus on typography as the fundamental means of conveying content, the course emphasizes the creative process of organizing and visualizing type and images through hierarchy, spatial organization of grid structures, positive and negative space, depth perception, transparency, and color theory. Readings locate design and typography within the larger history of visual art and graphic design and in relation to technology developments.
Offered: Every year, Spring and Summer

ICM 503. Principles of User Experience Design. 3 Credits.
This course explores the ever-changing processes and methods of user experience design. The Human-Centered Design and Design Thinking process are studied through readings and hands-on projects that cover empathy, the psychology of the user, problem definition, and ideation methods.
Offered: Every year, Fall and Spring

ICM 504. Motion Across Media. 3 Credits.
This course covers the concepts of motion design across multiple platforms. Students are challenged to analyze and create effective animations using the entire design process, including research, preproduction, storytelling, and production techniques. Analysis of navigation, storytelling, visual design, and message delivery inform the application of methods. The focus is on communicating ideas to the audience effectively through motion in its many forms, whether on desktops, smart phones, tablets, or kiosks.
Offered: Every year, Fall and Summer

ICM 505. Web Technologies. 3 Credits.
This course introduces the foundational techniques of creating web-based content. Through a series of exercises, participants learn how interactive networks are organized, where to find the information necessary to create standards-based systems, and gain elementary experience designing and building sites.
Offered: Every year, Spring and Summer

ICM 506. Writing for Interactive Media. 3 Credits.
Good writing skills are a necessity for professional communication in spite of the changing media landscape. In this course students create, develop and hone a distinct written voice within varied media environments. Much of professional media work involves creating a consistent voice or presence for a person, organization or company. Participants focus on how to accomplish (or enhance) this process using effective compositional techniques.
Offered: Every year, All

ICM 507. Audio and Video Design. 3 Credits.
This course covers the aesthetic and technical principles and practices used to create video and audio content for cross platform and device delivery. Effective storytelling and message delivery concepts are emphasized while exploring various production techniques including storyboarding, script, an introduction to audio production, cinematography, lighting, interviewing, editing, and effective media distribution.
Offered: Every year, All

ICM 508. Social Media Practice and Techniques. 3 Credits.
The widespread use of social media in society has created a communications environment built on platforms that encourage contribution and collaboration through user-created media and interaction. This course explores the underlying concepts, development and management of social media platforms as well as the creation of effective approaches to facilitate a viable social media presence.
Offered: Every year, Fall and Spring

ICM 509. Social Media Analytics. 3 Credits.
This course gives students a working knowledge of the social media analytics process and analytics tools, along with their application to communications objectives within real-world situations.
Offered: Every year, Fall and Summer
ICM 528. Content Creation. 3 Credits.
In this course, we explore the creation of engaging content. Students are guided through the process of planning and creating a suite of related projects in the medium(s) of their choice (writing, video, audio, image making.) The focus is on the conceptual processes and practices used in developing a unique and persuasive body of work to be distributed across mediums. Areas of interest are researched and then developed into a series of related pieces.
Offered: Every year, Spring and Summer

ICM 529. Data Visualization. 3 Credits.
This is a course in finding and telling visual stories from data. Students explore fundamental principles of data analysis and visual techniques, examine chart types and when to use them, and learn how to acquire, process and filter data. Through an understanding of data visualization best practices and audience analysis, students are able to identify and articulate what makes a successful information design. Industry-standard software tools are used to create static and interactive graphics—including charts, maps and diagrams—that make information more accessible to the intended audiences.
Offered: As needed, Fall and Summer Online

ICM 530. Independent Study. 3 Credits.
This is an elective course offered to accommodate students who seek advanced study in an area of the discipline. The topic and scope of the course are developed by the student in consultation with a faculty adviser, subject to approval by the program director and department chair.
Offered: As needed, All

ICM 531. Graduate Internship. 3 Credits.
This elective course provides interactive media students with the opportunity to work in a professional setting to acquire additional skills and insights into their chosen area of study. Students completing this course are required to work in a supervised environment. All internships must be approved by the graduate program director.
Offered: As needed, All

ICM 601. Master’s Capstone. 3 Credits.
Students create a professional quality web portfolio selected from the best work from their courses and experiences in the master’s program. Each student is facilitated through the process of identifying and packaging works, creating a consistent message and image using the products of their research and practice.
Offered: Every year, Spring and Summer

International Business (IB)

IB 611. International Corporate Finance. 3 Credits.
Students gain an understanding and appreciation of the additional risks and opportunities that occur once a firm goes international. They develop a working knowledge of tools used by international firms to deal with those risks and opportunities. The topics include international financial markets, foreign exchange risk measurement and management, political risk, financial engineering, investment project evaluation, managing short-term funds, etc.
Prerequisites: Take MBA 640 MBA 660.
Offered: As needed

IB 623. International Business Negotiation. 3 Credits.
This course analyzes different forms of negotiations and related themes in an international context. Topics include the negotiation process, communication, conflict resolution, value creation, value claiming, influence strategies, closing and renegotiation. Special emphasis is placed on examining how culture affects negotiation. Negotiation behavior and styles of a few selected nationalities also are discussed.
Prerequisites: Take MBA 660 or permission of instructor.
Offered: Every year, Spring and Summer

IB 652. Multinational Management. 3 Credits.
This course specifically addresses global management and how management decision-making across a range of areas impacts global, as well as local, business strategies and tactics. Within the framework of multiple regional, national and organizational cultures, this course addresses five major areas including: foundations of multinational management such as institutional contexts and ethical challenges in a multinational environment; strategy content and formulation for multinational companies (small and large); management processes in strategy implementation design choices for multinational companies; strategy implementation for multinational companies with an emphasis on human resource management; and strategy implementation for multinational companies with an emphasis on interaction and communication processes.
Prerequisites: Take MBA 615.
Offered: As needed

JRN 521. Audio Storytelling. 3 Credits.
Writing for the ear requires skills in preparing scripts, natural sound and audio recording and editing. This course prepares students to compose stories for radio news and podcasts, with a focus on developing the style of conversational broadcast writing common to National Public Radio.
Offered: Every year, Fall
JRN 524. TV Reporting. 3 Credits.
Visual news stories as broadcast by networks, affiliates and cable news channels and in evolving digital formats require skills in both storytelling and technology for shooting and editing video. This course covers the essentials of shooting video, editing and field reporting and producing.
Offered: Every year, Fall

JRN 525. Media Management (ICM 525). 3 Credits.
This course covers the challenges and prospects of serving as a manager in a media enterprise, with a particular focus on the demands of running a news or online operation. Students review and analyze case studies and hypothetical situations that focus on managerial decisions and the decision-making process.
Offered: As needed

JRN 528. Data Journalism. 3 Credits.
Information graphics are now an integral component of news, conveying big data into readily understood formats such as diagrams and charts. This course teaches students how to visually organize information and apply it to news stories for broadcast or online presentation.
Offered: Every year, Spring

JRN 530. Independent Study (ICM530). 3 Credits.
This is a special course offered to accommodate students who seek advanced practical training or advanced research in an area not directly included in the curriculum. The topic and scope of the course is developed by the student in consultation with a faculty adviser, subject to approval by the dean.
Offered: Every year, All

JRN 531. Graduate Internship. 3 Credits.
Experience in association with working professionals is essential to securing career opportunities. Students completing an elective internship to secure such experience are required to work in a supervised environment, approved by the graduate program director.
Offered: Every year, All

JRN 540. Broadcast Performance. 3 Credits.
This course explores the variety of skills required to communicate effectively through radio and television. Study focuses on the performance techniques, creativity, writing and analytical skills needed to communicate effectively within the context of broadcast interviews, editorials, commercials and newscasts.
Offered: As needed

JRN 541. Sporting Culture Through Nonfiction. 3 Credits.
It has often been said that sport is a microcosm of society, but many rhetoric scholars have begun to suggest that sport plays a role in constituting society and is "defined by a range of political practices, including allocations of resources, representations of identity, projections of nationalism and globalization, activism and change." This directed readings course examines American culture, as well as comparative values, through nonfictional accounts of sport.
Offered: Every year, Summer Online

JRN 542. Graduate Seminar. 3 Credits.
From time to time, the university invites media professionals and scholars or creates a team-teaching environment to present emerging topics at the intersection of media, culture and technology, among other things. Students are encouraged to pursue original research in connection with the topic.
Offered: As needed

JRN 543. Literary Journalism in the '60s. 3 Credits.
The 1960s stand out as an era of change and turbulence in 20th-century America. Throughout the 1960s and 1970s, these nonfiction writers and journalists wrote in a personal style that became known as "Literary Journalism," or "the New Journalism." This directed reading course requires students to analyze the historical and contemporary views of major literary journalists.
Offered: Every year, Summer Online

JRN 545. TV Production. 3 Credits.
This course introduces students to the technical production skills that go into a daily news telecast. Newsroom organization, story development (from idea to the air) and the principles and practices of professional producers are studied.
Offered: Every year, Fall

JRN 546. Digital News Production. 3 Credits.
This course explores topics related to social media, such as the viral video clip from a Tweet or the verified source through social media. Students learn the skills, tools and best practices of digital and video content production, as well as social coordination in the news arena. They also explore logistical and ethical concerns in the social medium.
Offered: Every year, Spring

JRN 552. Media Law and Ethics. 3 Credits.
A thorough knowledge of laws and ethical behavior is essential to the professional practice of journalism. As such, this course covers the legal and ethical dimensions of media communications across platforms, with an emphasis on First Amendment, privacy and copyright issues.
Offered: Every year, Summer

JRN 562. Sports Law and Ethics. 3 Credits.
Federal antitrust law and regulations show that college and professional sports are treated as special components of American culture. This course examines the legal structure that grants special privileges to sports and to the ethical challenges sports journalists confront in going beyond the games to find the story.
Offered: Every year, Summer

JRN 563. Sports Analytics. 3 Credits.
Deciphering the volumes of data produced by high school, college and professional sports teams is an essential part of sports reporting. This course introduces students to the ever-growing volumes of statistics across major sports and shows how to transform such data into useful information.
Offered: Every year, Spring

JRN 564. Presenting and Producing Radio Sports. 3 Credits.
Radio remains an essential and effective medium for listening to games and for engaging the audience with live talk shows that discuss teams, players, sports and the action of the competition. This course presents students with the principles and practices of radio sports.
Offered: Every year, Fall

JRN 565. Presenting and Producing Television Sports: Remote. 3 Credits.
Students in this course write, produce and distribute a 30-minute sports program for broadcast featuring stories that illustrate intriguing and inspiring stories of a Division I college athletic department. Every student engages in shooting, editing, writing, interviewing, presenting and distributing the final product. Additionally, students originate and perform local and national style sports highlight segments along with live in-depth interviews.
Offered: Every year, Spring
JRN 566. Presenting and Producing Television Sports: Studio. 3 Credits.
Pre-game, post-game and intermission reports are among the most important aspects of televised sports, as each reveals and promotes the storylines through which games are covered. This course introduces students to the concepts and content behind the production of studio shows.
Offered: Every year, Fall

JRN 572. Researching and Writing the News Documentary. 3 Credits.
The complexities of producing the news documentary range from finding the right story to pursuing uncovering the proper visuals to help tell it. This course provides students with the skills to research, write, and produce visual nonfiction, long-form projects rooted in history or current events.
Offered: As needed

JRN 573. Sports Literature. 3 Credits.
Sports serve as a critical metaphor for American life in nonfiction works such as "Friday Night Lights," in novels such as "End Zone," in plays such as "Death of a Salesman" and in films such as "Raging Bull." This course examines why sports are prominent in cultural works that attempt to reveal the meaning of America.
Offered: Every year, Fall

JRN 574. Crafting the Sports Feature. 3 Credits.
Feature writers capture athletes when they are most noble, frail or otherwise vulnerable or heroic. They also capture the moment when a game means more than that. This course teaches students to apply creative vitality to their ideas and writing on sports outside of game stories.
Offered: As needed

JRN 575. Critical Issues in Journalism. 3 Credits.
Reporters confront a widening tableau of subjects that are baffling to the reader unless presented in a clear and concise form. By studying issues in coverage techniques extracted from the daily torrent of news, students sharpen their news judgment, using reason, analysis and writing to critique coverage and become better journalists in the process.
Offered: Every year, Spring

JRN 580. Investigative Reporting. 3 Credits.
The purpose of this class is to prepare students to recognize investigative opportunities in all stories and to equip them with the practical skills necessary to succeed in investigative and project reporting, including knowledge of state and federal laws regarding access to governmental information.
Offered: Every year, Spring

JRN 589. Critical Issues in Sports. 3 Credits.
From health concerns to labor conflicts, the workday world often intrudes on the bubble that protects the mythology of sport. Through reason, analysis and writing, students interact with vital issues that emerge from the seemingly routine day-to-day coverage of games.
Offered: Every year, Spring

JRN 590. Newsroom Clinical (SPS 490). 3 Credits.
This course focuses on advanced reporting for multimedia reports, broadcast news, news documentaries and magazine stories. Students produce daily, weekly and long-term stories in their area of expertise for the journalism department's tablet application, among other platforms.
Offered: Every year, Spring

JRN 595. Sports Clinical. 3 Credits.
Students completing the sports journalism program must participate in the Sports Clinical. This course focuses on advanced broadcast, multimedia, documentary and long-form reporting and to deepen the experience and training in a given area of specialization in terms of platform and subject matter.
Offered: Every year, Spring

JRN 600. Capstone Proposal. 3 Credits.
Students completing the journalism program conduct research and do preliminary reporting to write a capstone project proposal based on their area of inquiry. The faculty adviser and graduate program director must approve the topic. This course is graded on a pass/fail basis.
Offered: Every year, All

JRN 601. Capstone Project. 3 Credits.
Students completing the journalism program must complete a capstone project. Under the guidance of the their faculty adviser, students create an original, in-depth, professional-quality journalism project. This course is graded on a pass/fail basis.
Offered: Every year, All

Laws (LAWS)

LAWS 100. Independent Research Project. 1 Credit.
The independent research project permits a student to conduct a major research and writing project under the supervision of a full-time member of the law school faculty. The student should prepare a written assignment that is 20 or more pages in length, exclusive of footnotes, per credit assigned. A student who wishes to write an independent research paper must submit to the supervising faculty member a written proposal that demonstrates that he or she has a viable topic for research. The student must register for the course, with the approval of the faculty member, by the beginning of the student’s next-to-last semester of law school.
Offered: Every year, All

LAWS 101. Civil Procedure I. 2-3 Credits.
This year-long, first-year course includes an examination of the Adversary System and an introduction to claims and remedies; selection of the proper court; jurisdiction and venue; Res Judicata; collateral estoppel; joinder of claims and parties; pleading; disposition without full trial; discovery; jury and non-jury trials; post-trial motions; and review of the disposition. Both state and federal procedural systems are studied.
Offered: Every year, Fall

LAWS 102. Civil Procedure II. 2-3 Credits.
This year-long, first-year course includes an examination of the Adversary System and an introduction to claims and remedies; selection of the proper court; jurisdiction and venue; Res Judicata; collateral estoppel; joinder of claims and parties; pleading; disposition without full trial; discovery; jury and non- jury trials; post-trial motions; and review of the disposition. Both state and federal procedural systems are studied.
Offered: Every year, All

LAWS 103. Contracts I. 2-3 Credits.
This year-long course provides an introduction to the law relating to agreements. It addresses such topics as formation of contracts, liability in the absence of an agreed exchange between parties, the meaning and the content of contracts, bases for avoiding enforcement of contracts, the performance of contracts, the consequences of non-performance of contracts, and the remedies available for breach of contract.
Offered: Every year, All
LAWS 104. Contracts II. 3-4 Credits.
This year-long course provides an introduction to the law relating to agreements. It addresses such topics as formation of contracts, liability in the absence of an agreed exchange between parties, the meaning and the content of contracts, bases for avoiding enforcement of contracts, the performance of contracts, the consequences of non-performance of contracts, and the remedies available for breach of contract.
Offered: Every year, All

LAWS 105. Property. 4 Credits.
This course provides an introduction to the law of property, primarily real property, with some coverage of personal property law. Topics covered include gifts, historical development and basic common law principles of property law, estates in land, easements, restrictive covenants, future interests in real property, contracts for the sale of land, conveying, mortgages, possessory rights, the real property recording system, and governmental land-use regulation.
Offered: Every year, All

LAWS 107. Torts. 4 Credits.
This course provides an introduction to tort liability. The course includes a study of topics such as intentional torts, negligence, strict liability and no-fault theories, and concepts of damages.
Offered: Every year, All

LAWS 110. Constitutional Law. 4 Credits.
The course is a study of basic principles of constitutional law as interpreted by the U.S. Supreme Court. The primary focus is on judicial review, relationships in the federal system, powers of congress, powers of the president, residual powers of the state, and an introduction to civil rights and their protection.
Offered: Every year, All

LAWS 111. Legal Skills I. 2 Credits.
This year-long course trains students in the fundamentals of legal research and analysis, and legal writing and argument. Students are taught how to locate cases and statutes and to apply legal principles in a factual setting. The program focuses on preparing students to think and communicate effectively in written and spoken communications in the legal context. Students prepare such documents as intra-office memoranda, client opinion letters, complaints and appellate briefs, and present oral arguments in a courtroom setting. Clear and effective writing and speaking are indispensable in the successful practice of law and are emphasized throughout the law school curriculum.
Offered: Every year, All

LAWS 112. Legal Skills II. 2 Credits.
This year-long course trains students in the fundamentals of legal research and analysis, and legal writing and argument. Students are taught how to locate cases and statutes and to apply legal principles in a factual setting. The program focuses on preparing students to think and communicate effectively in written and spoken communications in the legal context. Students prepare such documents as intra-office memoranda, client opinion letters, complaints and appellate briefs, and present oral arguments in a courtroom setting. Clear and effective writing and speaking are indispensable in the successful practice of law and are emphasized throughout the curriculum.
Offered: Every year, All

LAWS 113. Criminal Law. 3 Credits.
The purpose of this course is to give students a working knowledge of the substantive law of crimes. It covers general definitions, construction of criminal statutes, elements of crimes, causation, parties to crime, criminal responsibility and capacity, justification and excuse, and defenses. The course also covers the inchoate offenses of solicitation, attempt, and conspiracy, and offenses against persons and property.
Offered: Every year, All

LAWS 114. Administrative Law. 3 Credits.
This course comprises a consideration of the origin and growth of administrative process. Among other topics, it deals with: the constitutional position of agencies; administrative discretion in formulating policy; the choice between regulation and adjudication; the binding effect of rules; declaratory orders; administrative jurisdiction and the right to invoke it; primary and discretionary jurisdiction; the investigative function; problems growing out of notice and right; time and extent of a hearing; the process of the institutional decision; the right to judicial review of agency decisions; and the scope of judicial review.
Offered: Every year, All

This course is intended to help prepare students to take the bar examination. The course utilizes materials from the Multistate Bar Exam (MBE), the Connecticut Bar Exam, a commercial bar-prep company, and professor-created materials. The curriculum includes multiple-choice questions, essay questions and performance test questions; students respond to questions in all formats, and the class reviews and explains answers. The course also includes discussion of study techniques and effective exam-taking strategies.

LAWS 116. Unfair and Deceptive Trade Practices. 3 Credits.
The course involves an in-depth study of the principal state and federal statutes prohibiting unfair and deceptive conduct in business, including the Connecticut Unfair Trade Practices Act ("CUTPA") and similar statutes in other states, the Federal Trade Commission Act, and the federal Lanham Act. Because of the extensive private remedies provided by many state statutes, claims under those statutes, including those of Connecticut, Massachusetts, Illinois, New Jersey, California, Washington and Florida, have become staples of private business and consumer litigation. The goal of this course is to help students develop an understanding of the policies underlying those state and federal statutes and how they relate to each other and to prepare them to advise clients and litigate cases concerning them.

LAWS 117. Trademarks and Copyright in the Digital Age. 2 Credits.
This course provides a practical understanding of trademarks and copyrights and their importance in the business world, from the vantage point of a practitioner in this field. The course includes creation of rights, statutory protection, and enforcement of rights, with emphasis on the ever-changing digital world and the overall evolution of copyright and trademark laws in the context of protecting clients' brands and works of authorship. Grading is based on a paper submitted at the end of the semester, together with class participation and some practical writing exercises throughout the semester.

LAWS 200. Field Placement II. 1-10 Credits.
LAWS 205. Business Organizations. 4 Credits.
This course examines the main forms of business organization (corporation, partnership, limited partnership, and unincorporated association) and the concepts, risks and consequences of doing business through representatives. Consideration is given to the promotion, organization and management of the private business enterprise. The course examines the legal relationships existing between the corporation and its directors, officers, stockholders, and creditors; devices to reduce risks; formation, dissolution and termination of partnerships; partnership property and distribution of assets; and agency relationships, concepts, and responsibilities. Attention is given to selected provisions of the Federal Securities Laws and their judicial interpretation.
Offered: Every year, All

LAWS 250. Symposium: Marijuana Law. 1 Credit.
The possession and sale of marijuana is a federal crime. Yet, the Justice Department has decided not to prosecute this offense (so far) in states that have moved to legalize some or all uses of cannabis. This situation has created all kinds of unique and fascinating issues around federalism: preemption, state versus federal regulation, business planning in the shadow of the law, legal ethics, regulation of illegal/legal drug purity, financing for a federally illegal activity, federalism and adherence to international treaty obligations, etc. Students explore some of these issues in a Symposium format, with a combination of readings, lectures, discussions, and guest speakers with expertise. The Symposium is open to auditors or drop-ins as well as those who would like to take it for credit.
Topics to be discussed are publicized weekly. Papers are required of those taking the Symposium for credit.
Prerequisites: Take LAWS 104 LAWS 102.

LAWS 253. Animal Law. 2 Credits.
This course canvasses much of the existing legal regulation of animals, including: at the federal level, the Endangered Species Act, EPA’s CAFO regulations of feed lots, the Humane Slaughter Act, the Animal Welfare Act, regulation of food by the FDA and USDA, and regulatory conflicts with constitutional rights, such as First Amendment restrictions on the regulation of depictions of animal cruelty and on regulation of ritual or religious practices of animal slaughter. At the state level, the course discusses cruelty statutes, pet trusts, laws regulating veterinary medicine, hunting regulations, property rights in animals, tort damages for loss of animals, food libel laws, and local regulation of farm animals and food production. It also touches on the pervasive influence in this area of private regulation through industry or university-based standards as well as the influence of international markets and international standards. (2 or 3 credits)

LAWS 255. Judicial Clerkship Seminar - W. 3 Credits.
This course prepares students for judicial clerkships at either the state or the federal trial or appellate levels. It supplements the substantive courses that future clerks should take by providing intensive writing experience and by exposing students to a variety of issues important to law clerks. The writing component of the course requires each student to write a bench memorandum, a ruling on a procedural motion, a majority opinion and a dissenting opinion. Each of the writing exercises deals with a different area of substantive law, which may include federal habeas corpus actions, state constitutional law questions, or any of a wide variety of administrative agency matters. Students gain experience in research of the types of work done by law clerks, and explore matters of court structure, court procedures, clerks’ ethical issues and conflicts of interest. Faculty members with clerkship experience teach the course, with federal and state judges as guest lecturers. Limited enrollment. Full-time students must have completed three semesters, and part-time students must have completed five semesters. Enrollment preference is given to students whose academic performance indicates that they may be competitive in applying for federal and state appellate clerkships.

LAWS 256. Sympos: Police Accountability. 2 Credits.
This discussion-based seminar evaluates the methods law uses to oversee police conduct, such as the exclusionary rule, warrant requirements, and civil liability. In addition to studying relevant legal doctrines, students read sociology, social psychology and political science literature about the relationship between policing and democracy. From this perspective, the course asks whether the legal methods for holding police accountable are sufficiently effective. Students also evaluate various proposals for enhancing police accountability. While this course touches on the rules of criminal procedure governing police investigations, the focus is different from a criminal procedure course: The emphasis is less on specifics of the rules governing police investigations and more on critically analyzing those rules. The course also addresses areas outside criminal procedure, such as civil liability, qualified immunity and executive branch oversight of police. Grades are based on in-class discussion, weekly reading responses, and two practice-oriented writing assignments.

LAWS 291. Advanced Writing and Research S,W. 2 Credits.
This course offers upper-level students intensive practice in writing and research. It builds on and reinforces skills introduced and developed in Legal Skills classes while focusing on writing and advanced research. Satisfactory completion of the major writing assignment of the class satisfies the substantial paper component of the advanced writing requirement.

LAWS 292. Independent Research Project W. 2 Credits.
The independent research project permits a student to conduct a major research and writing project under the supervision of a full-time member of the law school faculty. Each student prepares a written assignment that is 20 or more pages in length, exclusive of footnotes, per credit assigned. A student who wishes to write an independent research paper must submit to the supervising faculty member a written proposal that demonstrates that he or she has a viable topic for research. The student must register for the course, with the approval of the faculty member, by the beginning of the student’s next-to-last semester of law school. An independent research project may satisfy the substantial paper component of the advanced writing requirement if the project is for either 2 or 3 credits.
Offered: Every year, All
LAWS 293. Independent Research Project W. 3 Credits.
The independent research project permits students to conduct a major research and writing project under the supervision of a full-time member of the law school faculty. Each student prepares a written assignment that is 20 or more pages in length, exclusive of footnotes, per credit assigned. A student who wishes to write an independent research paper must submit to the supervising faculty member a written proposal that demonstrates that he or she has a viable topic for research. The student must register for the course, with the approval of the faculty member, by the beginning of the student's next-to-last semester of law school. An independent research project may satisfy the substantial paper component of the advanced writing requirement if the project is for either 2 or 3 credits.
Offered: Every year, All

LAWS 294. Civil Justice Clinic. 2-6 Credits.
Students represent low-income clients in a variety of civil matters in superior and probate courts and before administrative bodies and school officials. Typically, students in the Civil Clinic can expect to represent clients in employment, housing, family, education and health matters, and also engage in legislative and administrative advocacy. One or two class meetings per week. Evening Civil Clinic: Students represent low-income clients in a variety of civil matters in superior and probate courts and before administrative bodies and school officials. Typically, students in the Evening Civil Clinic can expect to represent clients in employment, housing, family, education, and health matters, and also engage in legislative and administrative advocacy. Students are required to reserve at least one two-hour block of time per week for class and supervision sessions. Students also are required to reserve at least one four-hour block of time per semester for daytime client representation; adequate notice is provided to students.

LAWS 295. Tax Clinic. 2-6 Credits.
Prerequisites: Take LAWS 305.

LAWS 296. Judicial Externship. 2-5 Credits.
Students enrolled in this course are placed with state or federal judges and magistrates. Students may be asked to write and present seminar papers as well as to research and write for their judges. Each student enrolled is supervised by a faculty member. Grading on a pass/fail basis is the responsibility of the supervising faculty members after consultation with the judge and seminar leader.
Offered: Every year, All

LAWS 297. Law Review I. 1-2 Credits.
The Quinnipiac Law Review Association is a student-operated association. It publishes the Quinnipiac Law Review (QLR), a law journal that includes articles and book reviews written by legal scholars, as well as case comments and notes written by student members. A board of student editors solicits, organizes, edits and publishes material for QLR. Membership is based on academic achievement and/or participation in an annual write-on competition. Successful completion of all requirements entitles a student to 4 academic credits and credit for the substantial paper component of the Advanced Writing Requirement.
Offered: Every year, All

LAWS 299. Appellate Clinic I - Defense. 1 Credit.
Students represent criminal defendants in appeals of their convictions under the supervision of a visiting professor from the Public Defender's Appellate Unit. Students write one or two briefs and usually argue an appeal before the Connecticut Appellate or Supreme Court. Prerequisites or corequisites: Criminal Procedure and Evidence. 6-credit, year-long program beginning each fall: 4 credits in first semester; 2 credits in second semester.
Corequisites: Take LAWS 311.

LAWS 300. Appellate Clinic II - Defense. 1 Credit.
Students represent criminal defendants in appeals of their convictions under the supervision of a visiting professor from the Public Defender's Appellate Unit. Students write one or two briefs and usually argue an appeal before the Connecticut Appellate or Supreme Court. Prerequisites or corequisites: Criminal Procedure and Evidence. 6-credit, year-long program beginning each fall: 4 credits in first semester; 2 credits in second semester.
Prerequisites: Take LAWS 299;

LAWS 301. Clinic Seminar. 2 Credits.

LAWS 305. Federal Income Tax. 4 Credits.
This course deals with the Federal Income Tax System and its impact on individuals and business activity. Emphasis is placed on the following: an intense analysis of the key Internal Revenue Code provisions, treasury regulations, and judicial decisions; fundamental principles and common threads of federal tax policy, economics, and public finance; the relationship of federal income taxation to other areas of the law; and how federal tax laws are actually made (including a continual evaluation of tax preferences available to certain groups). Some specific areas of code included are: items included in gross income, permissible deductions, tax accounting problems, and capital gains and losses.
Offered: Every year, All

LAWS 307. Trusts and Estates. 3 Credits.
This course looks at the law of gratuitous transfers, including consideration of interstate succession, wills, gifts, trusts, and marital property. The choices adopted by Uniform Probate Code are compared with choices made by other statutes.
Prerequisites: Take LAWS 105
Offered: Every year, All

LAWS 308. Estate and Financial Planning. 2 Credits.
This course considers techniques of creating, transforming and disposing of wealth, with emphasis on the impact of federal estate, gift, and income tax laws.
Prerequisites: Take LAWS 305 LAWS 307 LAWS 309;
Offered: Every year, All

LAWS 309. Estate and Gift Taxation. 2 Credits.
This course examines the Federal Unified Transfer taxes on gratuitous transfers during life and at death and the generation skipping transfer tax.
Prerequisites: Take LAWS 305 LAWS 307;
Offered: Every year, All

LAWS 310. Accounting Concepts for Lawyers. 2 Credits.
The course is designed to impart an understanding of the basic principles of accounting with which lawyers should be familiar.

LAWS 311. Evidence. 3-4 Credits.
This course considers the rules regulating the introduction and exclusion of evidence in civil and criminal trials. Specific subjects dealt with are: relevancy of evidence; the burden of producing evidence and the burden of persuasion; presumptions; competency of witnesses; examination of witnesses; privileges; the hearsay rule and its exceptions; demonstrative evidence; writings and judicial notice and functions of judge and jury.
Offered: Every year, All

LAWS 312. Partnership Tax. 2-3 Credits.
A study of the tax problems associated with organizing and operating a partnership include those problems arising from the death or withdrawal of a partner, transfer of interests and dissolutions.
Prerequisites: Take LAWS 305;
Offered: Every year, All
Offered: The interventions are designed and delivered. which established public health law principles, legislation, regulation and public health authorities must function. Students examine the way in which policy? The historical legal constructs on which public health law is exercised its police power for the protection of the broader community? The protected rights of individuals yield to the state's inherent obligation to health and safety. When and to what extent must the constitutionally individual citizens and individual choice for the promotion of collective challenges raises the core issue of the extent to which governments may restrain individual citizens and individual choice for the promotion of collective health and safety. When and to what extent must the constitutionally protected rights of individuals yield to the state's inherent obligation to exercise its police power for the protection of the broader community? How does the law function as an instrument of social and public health policy? The historical legal constructs on which public health law is grounded are fundamental to understanding the constraints within which public health authorities must function. Students examine the way in which established public health law principles, legislation, regulation and ethics intersect as public health programs and community health care interventions are designed and delivered.

Offered: Every year, All

LAWS 313. Advanced Individual Income Tax. 3 Credits. This course covers topics that may be of interest to students who plan to practice in the areas of federal income taxation, employees law, or family law. Topics include advanced issues of tax accounting, issues concerning special forms of income, and issues resulting from financial transactions. Prerequisites: Take LAWS 305;

LAWS 314. Employee Benefits. 2 Credits. This course provides students with an overview of pension and welfare benefit plans covered under the federal income tax and ERISA (labor) laws. The course covers traditional employee benefits, such as medical, accident, disability, vacation, and unemployment benefits, and defined contribution retirement plans, such as individual retirement plans, ESOP's, profit-sharing plans, 401(k) plans, and IRAs, together with a brief introduction to executive compensation. Prerequisites: Take LAWS 305;

LAWS 315. Trial Practice. 2-3 Credits. This course provides an opportunity for students to coordinate their knowledge of procedure and evidence with their knowledge of substantive law in a realistic and dramatic setting, with the aim of developing some facility in the techniques of trial practice. The course focuses on the trial and pretrial process, including: interviewing of clients; investigation of facts; preparation of witnesses; examination and cross-examination of witnesses; choosing a jury; use of experts; discovery and other pretrial preparations; motion practice; and trial tactics. Students draft motions and memoranda and appear in simulated proceedings. Audiovisual equipment may be used.

Offered: Every year, All

LAWS 316. Advanced Trial Practice. 2 Credits. This course teaches more advanced practice techniques than the basic Trial Practice course, including the skills of taking depositions, jury selection, direct and cross examination, opening and closing arguments, and evidence. (Prerequisites: Trial Practice and Evidence or Civil Clinic, or Criminal Justice Clinic)

Offered: Every year, All

LAWS 317. Advanced Mock Trial. 2 Credits.

LAWS 318. Mock Trial. 1-2 Credits.

LAWS 320. Public Health Law. 3 Credits. Students examine the legal, ethical and public health challenges posed by contemporary issues such as drug-resistant infectious disease, renewed resistance to childhood vaccination, firearms regulation, controversial testing and screening programs, programs targeting tobacco use and obesity, and potential threats of bioterrorism. Each of these challenges raises the core issue of the extent to which governments may restrain individual citizens and individual choice for the promotion of collective health and safety. When and to what extent must the constitutionally protected rights of individuals yield to the state's inherent obligation to exercise its police power for the protection of the broader community? How does the law function as an instrument of social and public health policy? The historical legal constructs on which public health law is grounded are fundamental to understanding the constraints within which public health authorities must function. Students examine the way in which established public health law principles, legislation, regulation and ethics intersect as public health programs and community health care interventions are designed and delivered.

Offered: Every year, All

LAWS 321. Lawyers’ Professional Responsibility. 2-3 Credits. This course examines the ethical obligations of all attorneys in the practice of law. Our focus is on the ABA Model Rules of Professional Conduct and understanding the basic requirements and conundrums that confront attorneys throughout the client representation, counseling and advocacy process. Among other topics, students explore the duties of competence, communication, confidentiality, candor to the court, and the identification and treatment of conflicts of interest. How should an attorney choose between the interests of a client, one’s self, and the public in general? Active class discussion based on factual examples.

Offered: Every year, All

LAWS 322. Commercial Law. 4 Credits. This course is an introduction to the Articles on Sales, Commercial Paper, and Bank Deposits and Collection of the Uniform Commercial Code.

Offered: Every year, All

LAWS 325. Securities Regulation. 3 Credits. This course involves a study of the Securities Act of 1933 and the Securities Exchange Act of 1934. Particular emphasis is placed on the registration, distribution, and sale of securities; distribution of corporate information; and liability under the 1933 Act and the 1934 Act.

Offered: Every year, All

LAWS 327. Labor Law. 3 Credits. The course covers relations in the private sector between employers and employees regulated by the National Labor Relations Act and associated legislation. The organization of employees, the selection of bargaining representatives and employer responses to these and related activities are considered. Where time permits, the course also considers the legal framework in which collective bargaining occurs. (Strongly recommended: Administrative Law)

Offered: Every year, All

LAWS 329. Communications Laws. 3 Credits. This course involves a study of selected issues related to the role of the press in a free society. It may include a brief survey of First Amendment theory as it relates to the press and communications media; defamation; privacy; free press and fair trial; reporter privilege; access to and use of governmental information; right of access to the press; and regulation of radio and television broadcasting, encompassing such questions as regulation of debate, the fairness doctrine, and various forms of antitrust regulation in the communications industry. Future regulatory and First Amendment issues spawned by fast-developing communications technology are considered.

Offered: Every year, All

LAWS 331. Intellectual Property. 3-4 Credits. This course is concerned with law relating to expression, creativity, invention, and identity. The course covers topics such as copyright, trademark, and trade secret law and materials dealing with the social and economic context of this law.

Offered: Every year, All

LAWS 332. Patent Law. 2 Credits. The course covers the fundamentals of patent law and the relationship of patent law to other means of protecting ideas.

Offered: Every year, All

LAWS 333. Advanced Patents. 2-3 Credits. A continuation of the study of the fundamentals of patent law.

LAWS 335. Patents Litigation. 2 Credits. This course involves the study of litigation in U.S. state and federal courts in cases involving patent law.
LAWS 336. Intellectual Property Licensing.  2 Credits.
This course covers intellectual property assignments and licenses, including express and implied licenses, negotiation, valuation, standard contract terms, antitrust concerns, enforcement, and contract issues of particular importance in licensing.

LAWS 337. Jurisprudence.  3 Credits.
A survey of the problems and perspectives of legal philosophy and an analysis of selected issues.

LAWS 338. Visual Persuasion in the Law.  3 Credits.
Students learn to make legal arguments using images as well as words. Students read and discuss interdisciplinary materials including rhetoric, visual perception, social psychology, narrative theory, art history, media studies, and advertising; perform hands-on visual exercises to gain practice in making and responding to images; and listen to guest lectures and see examples of work done by legal visual displays for use as demonstrative evidence and in closing argument in highly realistic hypothetical cases. No prior visual arts experience is required or expected.

LAWS 340. Corporate Compliance in Health Care Industry.  3 Credits.
This course addresses both the managerial and legal aspects of health care corporate compliance. Essential elements of a compliance program are presented. Special focus is placed on various pieces of federal legislation and enforcement initiatives conducted by the U.S. Department of Justice and the Office of Inspector General in the Department of Health and Human Services.

LAWS 341. Insurance.  2 Credits.
This course is a study of the legal principles applicable to the control of insurance and to the state regulation of insurance. These principles are examined in the light of their institutional setting. Legal and non-legal material is utilized in this course. Topics studied are: formation of a contract; insurable interest; premiums; construction of life, property, accident liability and group contracts; concealments; warranties; conditions; exceptions; waiver; and estoppel.

Offered: Every year, All

LAWS 343. Land Use Planning.  3 Credits.
This course involves a critical examination of governmental and private attempts to control land use. Investigations are made of common law principles and of constitutional restrictions upon 1) private controls such as the Law of Nuisance and Restrictive Covenants; and 2) statutory regulation such as zoning, subdivision controls, growth controls, and land trusts.

Offered: Every year, All

LAWS 344. Law, Science and Technology.  3 Credits.
This course explores several areas in which scientific and technological advances have had an impact on the legal system, either by calling for changes in the system itself, of by provoking attempts to impose legal controls on the conduct of scientific research or the uses of scientific knowledge. The different approaches of law and science to problems of causation and proof are discussed. Specific topics that may be discussed as illustrative of the problems arising at the interface of law and science include (time permitting): behavioral research and the application of social science data to the legal system, the use of scientific and statistical evidence in court, problems created by the computer, legal regulation of scientific research that poses apparent ethical or health problems, and legal control of technology that poses real or apparent hazards to public health (e.g., nuclear reactors).

Offered: Every year, All

LAWS 345. Health Law.  2 Credits.
This introductory course is recommended for students who are interested in the major state and federal legal and policy issues governing health care, particularly the Affordable Care Act. The course focuses on how the law impacts health care access, quality and costs together with topics such as the patient-provider relationship, and private and public insurance regulation. Students study how to counsel health care clients on dealing with the impact of legislation, regulation, administrative agencies, and case law. This course is cross-listed for the Health Care Compliance Certificate (offered in conjunction with the School of Business) and the Scholarly Reflection and Concentration/Capstone Course at the Frank H. Netter MD School of Medicine. (2 or 3 credits)

Offered: Every year, All

LAWS 346. Food and Drug Law.  3 Credits.
This course explores both the historical background and current state of U.S. Food and Drug law, including the foundation and evolution of the Food and Drug Administration ("FDA") the pre-market approval processes for branded and generic drugs, biologics, and medical devices, as well as regulation of post-marketing promotion, manufacturing, distribution, and safety surveillance of prescription-only products; regulation of cosmetics, food, dietary supplements, and food additives; FDA inspection and enforcement procedures; federal preemption and tort liability.

LAWS 347. Remedies.  3-4 Credits.
This course commences with an examination of remedial goals in torts, contracts, and unjust enrichment cases, with an emphasis on aspects of the modern law of damages. This analysis is continued in specific contexts throughout the course. There is some coverage of equity and on particular aspects of equitable remedies. The course considers remedies for injuries to real and personal property, tangible and intangible interests, persons and status. There also is a consideration of remedies for nominally unenforceable transactions. (3 credits)

Offered: Every year, All

LAWS 349. Antitrust.  3 Credits.
This course examines the application of the Sherman Act, Clayton Act, Federal Trade Commission Act, and Robinson-Patman Act as controls on economic activity. The course examines the legal responses to problems of monopolization; collaboration among competitors; vertical controls on dealing; horizontal, vertical, and conglomerate mergers; and price discrimination.

Offered: Every year, All

LAWS 350. Health Care Antitrust.  3-4 Credits.
This course deals with the application of antitrust laws in the health care setting. It examines antitrust economics, the basic antitrust offenses and defenses, and applies these to the health care market, including branded and generic prescription drugs. Students discuss antitrust restrictions on hospital mergers, on the formation of physician groups, joint ventures, drug marketing, professional organizations’ activities, and managed care. It is not necessary to have taken basic antitrust in advance of taking this course. The beginning of the course includes a review of the major U.S. antitrust statutes and concepts; after that the emphasis shifts to new health care cases, and health care-specific issues affecting the health care industry, particularly its regulation by the U.S. Department of Justice and the Federal Trade Commission, as well as joint U.S. and EU enforcement activities.
LAWS 352. Health Care Business Transactions. 3 Credits.
This course gives students the opportunity to study health law as it relates to transactions in the health care industry. The course is structured around a set of standard health care business transactions. For instance: 1) A health system desires to provide professional medical services; students evaluate options for corporate organization, physician compensation, and related employment or service contracts; 2) A tax-exempt health system desires to create a joint venture with physicians to provide ambulatory surgery services; students evaluate corporate organization, tax-exemption and fraud and abuse issues, and review key terms of an Operating Agreement; 3) A health system is considering corporate governance issues; students evaluate different options and good governance practices and review key terms in relevant corporate documents; 4) A health system is considering contracting for medical equipment; students evaluate fraud and abuse issues and various key contract issues and provisions. (The professor may elect to use other types of transactions as new developments arise in the health care field.)

Prerequisites: Take LAWS 205
Offered: Every year, All

LAWS 355. Corporate Finance. 3 Credits.
This is a study of the elements legally required for securities valuation in reorganization, recapitalizations, and dissenters' appraisals; rights and priorities accorded different types of securities; and obligations of corporations toward shareholders, together with dividend requirements and policies. Legal accounting and tax aspects of mergers, acquisitions, and tender offers are considered, including an overview of related disclosure and behavioral requirements under securities laws.
Prerequisites: Take LAWS 205
Offered: Every year, All

LAWS 356. Arbitration. 2-3 Credits.
This course surveys the expanding field of arbitration, which is now a primary institution in American and international commerce for resolution of civil disputes. Students review laws and concepts central to arbitration, formation and enforcement of arbitration agreements, the process itself, and judicial enforcement of awards. They also survey the uses of arbitration in a variety of fields such as employment, commercial, labor, and health care law.

LAWS 357. Federal Courts. 3 Credits.
This course considers jurisdictions of the federal courts and jurisdictions of the federal courts and conflicts between the federal and state judicial systems. Topics may include the nature of the judicial power; federal question, diversity, and removal jurisdiction; amount in controversy; application of federal or state law; abstention; injunctions of state proceedings; jurisdiction of the Supreme Court; jurisdiction of cases involving joinder of parties and claims and related devices, and procedural questions. Problems may be assigned and discussed.
Prerequisites: Take LAWS 110;
Offered: Every year, All

LAWS 359. Admiralty. 3 Credits.
This course involves a study of the jurisdiction of admiralty courts and the laws affecting maritime rights and obligations. Areas included are the history of maritime law, choice of law in admiralty cases, maritime property interests, rights of seamen, carriage of goods, salvage, and collision.

LAWS 360. International Criminal Law. 3 Credits.
This course focuses on the jurisdiction, investigation and adjudication of international crimes within two procedural settings: 1) international organizations, and 2) national courts.
Prerequisites: LAWS 113

LAWS 361. International Law. 3 Credits.
This broad survey course examines public international law and the principles that determine to what extent this law is incorporated within the U.S. domestic legal system. Students study a wide range of treaties and customary international law, as well as several of the major international institutions such as the United Nations that play a role in the international legal framework. They also consider to what extent international law operates as a rule of decision for our courts and as authority for or constraint on actions of the President, Congress, and U.S. states.
Offered: Every year, All

LAWS 362. National Security Law. 2-3 Credits.
This course surveys United States law as it relates to national security. Topics include some or all of the following: separation of powers in national security matters, presidential war powers, congressional and presidential emergency powers, the role of the judiciary, the domestic effect of international law, the use of military force abroad, intelligence operations, investigating terrorism and other national security threats, prosecuting terrorists, the Freedom of Information and Privacy Acts, access to national security information, and restraints on leaking and publishing national security information. Prerequisite: Constitutional Law

Offered: Every year, All

LAWS 363. International Comparative Health Law. 2 Credits.
This course surveys and compares the world's major health laws. It begins with a comp analysis of health care systems, including an inquiry in comparative costs, the comparative populations served by various systems and a comparison of the health outcomes produced systems. The course then turns to comparative analysis of relevant legal concepts, including addressing liability of health care providers, reimbursement of health care providers, health bioethics, including right to refuse treatment and the right to die, and international conventions of right to health care.

LAWS 364. Federal Regulation of Health Care Fraud. 2 Credits.

LAWS 365. Comp. National Security Law. 2 Credits.

LAWS 366. Energy Law. 3 Credits.
This course examines common law cases dealing with land, water, oil, and gas, mining and alternative energy sources. The course considers the place and effect of federal and state regulation, and problems arising from this regard to allocation and conservation. Conflict resolution in this area is discussed, with emphasis on the influence of litigation and litigation strategy.
Offered: Every year, All

LAWS 367. Counterterrorism Law. 2 Credits.
This course is a survey of legal, constitutional and international issues relating to homeland security and the struggle against international and domestic terrorism. Topics may include intelligence gathering at home and abroad, criminal investigations of terrorist activity, detention and interrogation of terrorist suspects, civil detention, military commissions, planning responses to terrorist attacks (and natural disasters), the domestic role of military forces, and the protection of sensitive government information. This course complements the 2-credit course in National Security Law, which deals primarily with separation of powers and checks and balances in the federal government, in the context of national security, foreign affairs, and the war powers. Without the permission of the instructor, this course is not open to those who have taken a 3- or 4-credit course in National Security Law.
LAWS 369. Real Estate Transactions. 3 Credits.
The course provides an introduction to the law of real estate transactions, with an emphasis on mortgage financing.
Prerequisites: Take LAWS 105;
Offered: Every year, All

LAWS 370. Family Law. 2-3 Credits.
This course involves study of the family as a legal institution. Particular attention is given to rights and obligations during marriage and upon dissolution of the marriage. Federal Income Tax is a prerequisite or corequisite.
Corequisites: Take LAWS 305
Offered: Every year, All

LAWS 371. Divorce and the Divorcing Family. 2 Credits.
This course examines divorce, custody, and visitation, analyzing the emotional impact of these legal processes on children and parents in divorcing and post-divorce families. Students critique the current family law system with the aid of recent legal and social science research materials. The course requires students to analyze the role that lawyers play in exacerbating and ameliorating the effects of the divorce process on adult and child parties. Students examine ethical and practical constraints of integrating an interdisciplinary perspective to a family law practice and explore the benefits and limitations of divorce-related communication between family lawyers and mental health clinicians.
Prerequisites: Take LAWS 370;

LAWS 372. Representation in Mediation. 2 Credits.
The principal focus of this course is to explore mediation advocacy issues for the practitioner representing a client in a mediation. Mediation concepts and implications for developing skills for client representation are examined. Mediation-oriented styles, skills and techniques are contrasted with the techniques required in litigation and arbitration. The exclusive emphasis is on the practitioner's role as an advocate rather than as a neutral/mediator. (1 credit)
Corequisites: Take LAWS 428

LAWS 373. Products Liability. 3 Credits.
This course examines the emerging field of products liability law with emphasis on negligence, warranty, fraud, and strict liability in tort. Consideration is given to problems of proof and evidence, especially in the areas of drugs, automobiles and industrial machinery.
Offered: Every year, All

LAWS 374. Introduction to Mediation. 2 Credits.
This course introduces students to basic mediation skills, practice and theory, including the benefits and limitations of mediation as a dispute resolution method. Class time is divided nearly equally between developing mediation skills as an impartial third party and discussing conceptual issues and challenges facing third-party neutrals.

LAWS 375. Legislation. 2 Credits.
This course considers the legislature in perspective, examining it in its working relationships with other institutions of the American Legal System. The course is designed to develop an understanding of the potentialities and limitations of the legislative process. Students select an enumerated problem and propose a legislative solution.
Offered: Every year, All

LAWS 376. Advanced Land Use Writing Seminar. 2 Credits.
The objective of the course is to research and write a publishable article of about 6,000 words on a narrowly focused issue of land use law. Students also have an opportunity to present in class several times, receive reviews of their work by classmates, and critique the work of others.

LAWS 377. Energy Regulation and Public Policy. 2 Credits.
Energy regulation touches core environmental, economic and social issues. The interplay of traditional utility regulation and recent restructuring initiatives that rely on markets to deliver reliable and reasonably priced power creates many political, economic and regulatory tensions. Focusing on the regulation and design of U.S. electric power systems (i.e., the generation, transmission and distribution of electricity) and related markets, with some limited exposure to natural gas developments and their impacts on electric markets, this course provides an introduction to the explicit and implicit policy tradeoffs inherent in the current and evolving system of energy regulation at the state, regional and federal levels. Topics covered include the classic cost of service regulation, competitive generation, wholesale market structures, regional transmission organizations, microgrids, "behind the meter" generation, net metering, submetering, renewable portfolio standards, the emerging role of demand response and efficiency as supply resources, retail competition and retail rate design. Guest speakers from industry and government provide diverse perspectives based on their experience in the regulatory and policy arena. The course introduces students to the roles, jurisdiction and tension of the Federal Energy Regulatory Commission and the Connecticut Public Utilities Regulatory Authority.

LAWS 379. Environmental Law. 3 Credits.
This course examines the legislative, administrative and judicial responses to environmental problems. Students primarily focus on the major federal environmental statutes, including the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the National Environmental Policy Act, and protections for endangered species and wilderness. Students also evaluate common law remedies, state environmental protections, and major international environmental issues, including climate change.
Offered: Every year, All

LAWS 380. Secured Transactions. 2-3 Credits.
Security interests in personal property under Article 9 of the Uniform Commercial Code are considered. (Depending on the professor, Commercial Law may be a prerequisite or corequisite.)
Offered: Every year, All

LAWS 381. Law and Economics. 2 Credits.
This course explores the use of economic analysis in the study of specific legal problems, of the existing legal system, and of proposed modifications to existing legal structures. It begins by examining the nature of economic reasoning and limitation of applying economic theory, the course explores the economic foundations of property law, including entitlement theory, pollution problems, monopoly problems, government allocation of resources, and public property rights. It then examines the economic theory as applied to criminal sanctions and criminal law, tort negligence theory, strict liability, economic foundations of contract law, and contract impossibility. The direction of the course from that point is partially determined by the interest of the class but may include problems of population control, allocation of scarce medical resources, justification of inheritance, economic analysis of rent control and housing code enforcement, consumer problems, and military service. In general, the course avoids delving into areas that are covered in depth in other courses such as tax policy, antitrust law, and regulated industries.
Offered: Every year, All
LAWS 384. Juvenile Law.  3 Credits.
The course examines the legal rights and responsibilities of minors. Topics to be studied include delinquency, abuse and neglect, representation of children in custody disputes, and educational rights of handicapped children. The course devotes attention to the role of the attorney, juvenile court and social and diagnostic services available to children and youths.
Offered: Every year, All

LAWS 385. Advanced Juvenile Law - Child Protection Practices.  2 Credits.

LAWS 386. Domestic Violence: Law, Practice and Pol.  2 Credits.
This course examines domestic violence from a legal perspective. It includes a historical analysis of intimate partner violence and the various legal and societal changes that have evolved to form the current legal responses. Students explore a wide range of topics, including police and prosecutorial responses, expert witness testimony, battered women as criminal defendants, cultural differences, domestic violence in divorce and child custody disputes, legal remedies for battered immigrants, and domestic violence as a human rights and public health concern. The course is interactive and affords students the opportunity to utilize written and oral advocacy skills in applying the rules of evidence and ethics to civil and criminal issues around domestic violence.

LAWS 387. Advanced Juvenile Law: Delinquency Proceedings.  2 Credits.
This course covers selected topics in juvenile law of current or continuing interest. Issues may include child custody, adoption, technological advances in childbearing, and the costs and benefits of indeterminacy in standards for child custody. There is no prerequisite but students should have taken either Juvenile Law or Family Law.

LAWS 388. Elder Law.  2-3 Credits.
This course integrates such topics as estate planning, retirement planning, planning for Medicare, Medicaid, and other governmental entitlements, contracts for long-term nursing care, etc.
Offered: Every year, All

LAWS 389. Consumer Law.  3 Credits.
This course addresses problems of formation of consumer transactions, the substance of consumer transactions, and the remedies available to the parties. The focus is on whether any intervention to protect the consumers is warranted, what forms intervention might take, and evaluating the cost and benefit of intervention. (Prerequisite: Commercial Law)

LAWS 390. Civil and Political Rights Equal Protection.  2 Credits.
This course is a study of the law of individual liberties and civil rights, with emphasis upon the Fourteenth Amendment’s equal protection clause and civil rights legislation.
Prerequisites: Take LAWS 110;
Offered: Every year, All

LAWS 391. Business Planning.  4 Credits.
This course represents an opportunity for students to integrate their work in previous substantive courses by examining a series of common business transactions. Students work in groups to consider and make recommendations to their “clients” on the choice of entity, capitalization, control, valuation, compensation, and management. They consider the opportunities for expansion if the business is successful, including “going public,” merger or acquisition, or sale of the business. They also consider the consequences of failure: liquidation or dissolution of the business.
Prerequisites: Federal Income Taxation.
Corequisites: LAWS 305
Offered: Every year, All

LAWS 394. Bankruptcy and Creditors’ Rights.  3 Credits.
As events of the Great Recession have demonstrated, insolvency and the potential for insolvency affect many transactions and complicate efforts to enforce judgments and to resolve disputes. Practitioners in many fields including lending, commercial transactions, general litigation and family law will confront a bankruptcy issue at some point in their careers. This class begins with an overview of the various state law creditor remedies and debtor protections. The course focuses primarily on relief available for consumer and business debtors and the treatment of claims of secured and unsecured creditors under the Bankruptcy Code. Students explore issues in Chapter 7 (liquidation), Chapter 13 (individual reorganization) and Chapter 11 (business reorganization) bankruptcies. They survey out-of-court procedures such as workouts, sales under the UCC, compositions, receiverships and assignments for the benefit of creditors. Class discussion focuses more on problems than cases. The class applies legal principles in discussing solutions to practical problems. To the extent feasible, the class invites guests who practice in the field, examines pleadings in actual cases and provides practice pointers to assist students in the transition to becoming a lawyer.
Offered: Every year, All

LAWS 396. Consumer Law.  3 Credits.
This course assists students in making the transition from law school to practice in a business setting. Using their knowledge of bankruptcy law, students write memos; participate in mock client-counseling, negotiation and advocacy exercises; and comment on each other’s work. In addition to bankruptcy law, course material and presentations emphasize business concepts, including financial literacy and rehabilitation of small to mid-sized troubled businesses. Although the course focuses specifically on insolvency, the practice skills emphasized, such as understanding the business contexts in which legal problems can arise, are also required for success in other business settings. Prerequisite: Concurrent or prior enrollment in Bankruptcy 396 01.
Corequisites: Take LAWS 396
LAWS 409. Drug and Device Law. 2-3 Credits.
This course explores both the historical background and current state of the regulation of prescription brand-name and generic drugs, over-the-counter drugs, medical devices, biological products, and cosmetics, including the process for premarket approval of these products. The course covers the relevant provisions of the Federal Food, Drug and Cosmetic Act, as well as the Food and Drug Administration's authority to enforce the statute through administrative regulations and court enforcement. The relationships between FDA, Congress, and industry are explored and analyzed. Students consider the development and marketing of "biosimilar" products pursuant to the Biologics Price Competition and Innovation Act of 2009. Other topics include the regulation of advertising and promotional activities including off-label promotion, federal preemption in cases involving injury to patients from branded or generic drugs, FDA's inspection and enforcement procedures, and criminal liability for individuals and corporations. (May be offered for 2 or 3 credits dependent on instructor)

LAWS 410. Theories of Punishment S,W. 2 Credits.

LAWS 412. Habeas Corpus. 2 Credits.
This course examines the legal and pragmatic place of habeas corpus and other post-conviction remedies in our criminal justice system, including cases of wrongful conviction and innocence. Topics include the function of habeas in relationship to the other stages of a criminal case, with emphasis on actual innocence and the death penalty, and the role of DNA and other forensic science tools. This course also explores the duties of the prosecution, involuntary confessions, racial discrimination and ineffective assistance of counsel. Students receive an introduction to the contrasting procedural rules governing habeas corpus in state and federal court, and a comparison of habeas corpus versus other remedies (including non-adversarial remedies) for addressing wrongful convictions and claims of innocence. Prerequisite: Criminal Procedure Adjudicative or Investigative (2 or 3 credits)
Prerequisites: Take LAWS 431 or LAWS 432

LAWS 413. Community Needs Assessment Lab. 1-3 Credits.
Increasingly, law school students and graduates are expected to create their own practices or generate a new book of business, rather than being able to rely upon a book of existing business being handed down from senior and retiring attorneys. In order to build a new practice, attorneys must identify existing unmet legal needs in the community and then both leverage existing resources and develop new capacities to meet these needs. This course is designed to provide law students an opportunity to explore and apply community needs assessment tools developed by public health professionals to better define unmet needs in a community, understand barriers to meeting those needs, assess existing internal and external resources, and build effective practices or programs. Anticipated to take place in the spring semester, this course is specifically framed to allow the week of spring break to be spent collecting data in communities where travel is necessary. Prerequisites (needs at least 1): Current or prior enrollment in Public Health Law, Poverty Law, Environmental Law, Immigration Law, Family Law, Juvenile Law, Alternative Dispute Resolution, Negotiation, Education Law, Federal Criminal Law, Federal Income Taxation of Individuals, or International Law

LAWS 414. Food Law. 2-3 Credits.
This course examines the legal and policy issues associated with the Food and Drug Administration's regulation of foods and dietary supplements and tobacco products. The class reviews the statutory provisions of the Federal Food, Drug, and Cosmetic Act, as well as the governing case law, implementing regulations, and administrative actions that govern the development/formulation, product positioning and approval/clearance, and labeling/marketing of these products. The course also covers food safety issues, focusing on the Food Safety Modernization Act of 2011 and FDA's rules on restaurant menu and vending machine labeling. The course also includes some coverage of the U.S. Department of Agriculture, its authority over meat and poultry products, and its regulation of organic programs under the Organic Foods Production Act. Students receive a comprehensive overview of the historical background and current state of FDA, and explore FDA's expanding authority over novel technologies, enforcement and inspection powers, and post-marketing surveillance to address safety concerns. (2 or 3 credits dependent on instructor)

LAWS 415. Business Law Externship. 2-5 Credits.

LAWS 416. Health Law Externship. 2-5 Credits.

LAWS 417. Intellectual Property Externship. 2-5 Credits.

LAWS 418. Advanced Constitutional Law - Civil Rights. 2 Credits.
Prerequisites: Take LAWS 110;

LAWS 419. Adv.Con.Law-1st Amendment Religion Claus. 3 Credits.

LAWS 420. Employment Discrimination Law. 2-3 Credits.

LAWS 421. Negotiation. 2-3 Credits.
In this course students study negotiation from theoretical and practical perspectives. The course uses lectures, discussions, film, and simulations to introduce students to the key features of negotiation. Each student engages in a series of role play exercises, with an opportunity for critique and debriefing with faculty and fellow students. Spring 2019: Mondays January 7, 14, 28, February 4, 11, 25 and March 4, 18, 25

LAWS 422. International Human Rights. 2 Credits.
This course considers human rights under the Universal Declaration of Human Rights, and other U.N. documents and resolutions, as well as U.N. investigation of human rights violations. The course also examines regional arrangements to protect human rights, exemplified by the European Human Rights Convention and its inter-American counterpart. It is desirable but not essential for students to have completed a course in international law.
Offered: Every year, All
LAWS 430. International Trade. 3 Credits.
The course covers domestic and international laws and institutions governing foreign trade, including the legal consequences of U.S. participation in the GATT, UNCTAD, and other international forums, law regulating customs and tariffs, government procurement, subsidies, dumping, unfair foreign trade practices, disruptive imports under the escape clause, the generalized system of preferences, most-favored nation treatment, exports under the Export Administration Act, and foreign assets control; the impact of Friendship, Commerce, and Navigation treaties. Specialized problems include foreign corrupt practices, and restrictive business practices, NAFTA, Custom Unions and Free Trade Areas.

LAWS 431. Criminal Procedure - Adj. 3 Credits.
This course deals with the adjudicative stage of the criminal justice process. It includes the initial appearance following arrest, the decision to prosecute, the preliminary hearing, bail, indictment, pleas and plea bargaining, the trial, and double jeopardy. The major emphasis is on the constitutional limitations on the adjudication of criminal matters.
Offered: Every year, All

LAWS 432. Criminal Procedure Inv. 3 Credits.
This course deals with the investigative stage of the criminal justice process. It focuses on the police function, emphasizing the constitutional limitations on that function and the means of enforcing those limitations. The course includes a consideration of such matters as arrest, stop and frisk, search and seizure, eavesdropping, wiretapping, identification procedures, and questioning of suspects.
Offered: Every year, All

LAWS 433. Advanced Labor Law. 3 Credits.
This course deals with selected problems in labor law of current or continuing interest.
Offered: Every year, All

LAWS 434. Employment Law. 3 Credits.
This course presents an introduction to the laws that apply to the employer-employee relationship. It reviews issues that confront the employment lawyer practicing within the myriad regulatory laws and regulations governing employer and worker rights under federal, state and common law. The course examines a selection of various issues that arise in employment law such as the development of employment law, and sources of modern employment law in public employment, collective bargaining, non-discrimination, employment-at-will, judicial modification of employment-at-will, establishment of the employment relationship, a brief survey of the laws against discrimination, a review of wage and hour laws, pay equity and comparative worth, fringe benefits, conditions of employment in the work environment, OSHA and workers compensation, regulations and laws governing discharge, termination employment, unemployment and retirement.

LAWS 435. Advanced Family Law I - S. 2 Credits.
This course deals with selected problems in family law of current or continuing interest.
Prerequisites: Take LAWS 370;
Offered: Every year, All

LAWS 437. Computer and Internet Law. 2 Credits.
This course covers computer hardware and software applications of copyright, patent, and unfair trade practices law, contracts for computer services and technology, invasion of privacy, and other related topics.

LAWS 438. Advanced Family Law II. 2 Credits.
Corequisites: LAWS 370

LAWS 442. Sports & Entertainment Externship. 2-5 Credits.

LAWS 443. Tax Law Externship. 2-5 Credits.

LAWS 444. Employment Law Externship. 2-5 Credits.

LAWS 446. Environmental Law Externship. 2-5 Credits.

LAWS 450. Nonprofit Organizations. 2 Credits.
This course explores the historical development and principal theoretical rationals for the nonprofit sector. It examines the formation, classification, peration, and governances of nonprofit organizations under both state and federal law. Particular emphasis is given to state corporation law and federal tax exemption issues, including responsibilities and liabilities of directors, officers, and volunteers; financial management; the public policy issues involving commercial, lobbying, and other political activities; and constitutional issues affecting nonprofit organizations.
Prerequisites: Take LAWS 305;

LAWS 454. Advanced Corp. Tax. 2 Credits.
This course explores the federal income tax consequences that follow when a corporate business is transferred to new owners. Principal topics of study are taxable asset and stock transfers and the statutorily prescribed scheme for nontaxable corporate reorganizations. (2 credits)
Prerequisites: Take LAWS 305 LAWS 580;
Offered: Every year, All

LAWS 457. Health Care Compliance Law. 3 Credits.
This course illuminates the legal aspects of health care compliance. At both the federal and state levels, the course addresses the statutory, regulatory, and case law that comprises the complex legal backdrop in which the health care industry operates. The course introduces the history, purpose, and substance of health care regulatory compliance programs and addresses legal doctrines concerning reimbursement and related fraud and abuse, legal restrictions on physician referral and related anti-kickback laws, antitrust law, compliance issues in health care business transactions, compliance mandates in the Affordable Care Act, and the law governing health care research.

LAWS 464. Legislative Externship. 2-5 Credits.
This internship places students in positions with members of the Connecticut legislature, and in the offices of the governor. Successful completion of a course in legislation may be a prerequisite.
Offered: Every year, All

LAWS 470. Legislative Externship Seminar. 1 Credit.

LAWS 471. Education Law. 2 Credits.
This course covers those aspects of education which are regulated or influenced by law. Areas of study include; the rights of teachers, students, and parents in a school system; state compulsory education laws; school disciplinary processes; teacher tenure and union issues; and regulation of public, parochial and private education.
Offered: Every year, All

LAWS 477. International Tax. 2 Credits.
An analysis of the U.S. tax treatment of nonresident aliens and foreign corporations, the U.S. tax treatment of U.S. individuals and corporations engaged in international transactions, calculations of the foreign tax credit, and U.S. taxation of controlled foreign corporations.
Offered: Every year, All
LAWS 497. Law Review II W. 1-3 Credits.
The Quinnipiac Law Review Association is a student operated association. It publishes the Quinnipiac Law Review (QLR), a law journal that includes articles and book reviews written by legal scholars, as well as case comments and notes written by student members. A board of student editors solicits, organizes, edits, and publishes material for QLR. Membership is based on academic achievement and/or participation in an annual write-on competition. Successful completion of all requirements entitles a student to 4 academic credits and credit for the substantial paper component of the Advanced Writing Requirement.
Offered: Every year, All

LAWS 504. Tax Policy- S, W. 2-2 Credits.
The course will examine the advantages and disadvantages of various methods for raising revenue and the use of the current income tax system to promote certain types of activities and to reward or discourage behavior. The course will also focus on changes to the tax law since 1981 as illustrative of presidential and legislative choices and the interplay of policies and politics. Students will produce an independent research paper on topics of their choice. (Prerequisite: Federal Income Tax) 2 credits.
Prerequisites: Take LAWS 305;
Offered: Every year, Spring

LAWS 505. Mergers & Acquisitions. 2 Credits.
This course will examine the purchase and sale of business entities through a presentation and discussion of the acquisition process. It will introduce the student to acquisition transactions through an examination of the reasons for acquisitions, the types of acquisitions, the structure of acquisition transactions, the documentation and negotiation of the principal agreements and documents to effect an acquisition transaction and certain corporate governance matters related to the approval of acquisitions. The course will focus on private company transactions but will also consider matters regarding public company transactions. This examination will also include a presentation and analysis of the purchaser and the seller issues frequently encountered in the acquisition process. This course is designed to explain to the student the lawyer's role in an acquisition and to promote an understanding of the theory and the practice of law as it applies to the purchase and the sale of business entities.
Prerequisites: Take LAWS 205;
Offered: Every year, All

LAWS 506. Entertainment Law. 2 Credits.
This course examines the legal principles and business practices of several entertainment industries including music, motion picture, television, live theater, and print publishing.
Offered: Every year, All

LAWS 508. Worker's Compensation. 2 Credits.
The course will cover the law of workers' compensation, with attention given, where appropriate, to the Connecticut Act. The course generally will deal with the liability of employers for work-related injuries to employees. In particular, the course will consider employees' remedies prior to and apart from workers' compensation; the Compensation Principle; the necessary employer-employee relationship required to activate coverage; the concept of accident; accidents during the course of the employment; accidents arising out of employment; occupational disease; proof of causation and independent causes after the accident; compensation for non-fatal injury; death benefits; administration of workers' compensation laws; and third party suits.
Offered: Every year, All

LAWS 509. Sports Law. 2 Credits.
This course will examine the legal issues involved in amateur, collegiate, and professional sports, including coach and player contracts, NCAA regulation and litigation, athlete-agents, torts involving players and fans and professional player drafts. The course will be taught using a hybrid approach of traditional case method, current cases and issues in sports law, as well as practical exercises such as mock negotiations. Class participation, oral presentations and weekly writing assignments will be required. Sports Law is designed for students with an interest in a career in sports law, or a deep interest in the legal issues surrounding the business of sports.

LAWS 510. Commercial Transactions Workshop. 2 Credits.
This workshop will serve as an introduction to some of the practical aspects of transactional practice. Through participation in a simulated common transaction, students will review and draft or edit (or both) portions of documents such as a contract for the sale of goods, an asset purchase agreement, a commercial lease, a promissory note, and a security agreement. The work with the documents will be based on both legal principles and business considerations. Other exercises will include drafting memoranda explaining documents to clients and assisting clients in resolving disputes that arise during performance of an ongoing agreement. The course objectives will include inculcating professional skills in interactions with clients and opposing counsel in deal making. The course should prove useful for students who are interested in transactional work as well as those who are interested in commercial litigation or arbitration.

LAWS 512. Historic Preservation. 2 Credits.
This course will explore the extent to which legal protection should be provided for the preservation of historic buildings and the policy reasons for and against such protection. We will study federal statutes governing preservation, religious land use, and archaeological treasures; constitutional issues ranging from the First Amendment to takings law; innovations in building codes that encourage rehabilitation; environmental policy; tax credits; and the utility of nonprofit organizations, stateside and worldwide. We will consider the interaction of those laws with aesthetic and political issues. We will also survey state and local laws across the country with a focus on Connecticut. Satisfies the substantial paper requirement. No prerequisite.

LAWS 513. Land Use Practicum. 3 Credits.
In this practicum, students will participate in some classroom meetings, team meetings, and meetings before local land use agencies, primarily during regularly scheduled class time. Students will meet with the local land use agencies in a Connecticut town and will attend their meetings on a regular basis, analyzing applications and reporting to the rest of the class. Teams will be assigned to review selected regulations, present what they find during public sessions in the town, research and draft improvements to the regulations, and present those drafts at public meetings. The course will enable students to gain a real-world understanding of local land use regulations (many of which are profoundly imperfect), critique administrative proceedings, research and draft regulations, and make at least two public presentations.

3 credits.
LAWS 515. Alternative Dispute Resolution. 2-3 Credits.
This course examines a number of alternative approaches to the traditional resolution of disputes through litigation. These include: adjudicative processes, such as arbitration; consensual processes, such as interest-based negotiation and mediation, including a diverse range of theories and approaches to mediation; and other emerging alternative processes, such as collaborative lawyering. The focus of this course is upon examining and demonstrating how practicing lawyers classically trained for the courtroom must adapt and adjust to a wide spectrum of ADR processes increasingly being used to resolve disputes outside of court. This is an introductory course and is one of the courses required for the Civil Advocacy and Dispute Resolution Concentration. 
Offered: Every year, All

LAWS 516. International Business Trans... 3 Credits.
Within a framework of the political and jurisprudential underpinning of international law, consideration is given to the problems of the lawyer with a commercial clientele. These are relevant both to governments and private participants. Specific topics covered will include aspects of multinational enterprises, the overseas reach of the antitrust laws, the general agreement on tariffs and trade, the European Common Market, economic warfare, (i.e. blacklists, boycotts, etc.) confiscation of foreign-owned property, trans-national aspects of income taxation, and the role of international institutions such as the World Bank, and the International Monetary Fund.  
Offered: Every year, All

LAWS 517. Int'l Humanitarian Law of Armed Conflict. 2 Credits.
International Humanitarian Law of Armed Conflict Course Description: International Humanitarian Law (also known as the law of armed conflict and the laws of war) concerns the rules and principles governing the conduct of armed conflict. This course will consider the origins and development of IHL, the Geneva Conventions, and the interaction between IHL and other law, such as international human rights law, international criminal law, and U.S. constitutional law. Specific topics may include the Israeli-Palestinian conflict, the Iraq and Afghan wars, the treatment of detainees at Guantanamo Bay, the applicability of IHL to international terrorism, and mechanisms for holding violators accountable, including ad hoc international tribunals and the International Criminal Court. Although the focus of the course will be jus in bello, the law regulating the conduct of war, there will be some discussion of jus ad bellum, the law relating to the legality of armed conflict, aggression, and self-defense.  

LAWS 518. Municipal Externship. 3 Credits.
This program allows students the opportunity to intern for a semester with the law department of a municipal corporation. Interns work a minimum of nine hours a week under the direction of the corporate counsel and are exposed to a variety of matters relating to municipal law. Periodically, interns meet with their faculty supervisor to discuss their progress. A grade is awarded on a pass-fail basis after a joint evaluation by the corporate counsel and the faculty supervisor. To be eligible, students must be in good academic standing and have completed at least 31 credits.  
Offered: Every year, All

LAWS 519. State & Local Tax. 2 Credits.
This is a study of the major ways state and local governments tax multi-state businesses. Included will be a discussion of the problems of apportionment and constitutional limitations on state taxation.  
Offered: Every year, All

LAWS 520. Public Interest Externship. 2-5 Credits.
This program encompasses a broad range of placements in legal departments of public agencies and private not-for-profit organizations. Past placements have included Attorney General’s offices, various State’s Attorneys offices, Public defender offices, The Connecticut Fund for the Environment, and the Internal Revenue Service. Students are assigned to work with supervising attorneys and devote at least ten hours a week to the internship. 
Offered: Every year, All

LAWS 521. Family&Juvenile Law Externship. 2-5 Credits.
Students will work in Legal Services offices (New Haven Legal Assistance, Connecticut Legal Services, or Greater Hartford Legal Assistance) or in private law offices, representing low- to middle-income clients in family and child abuse and neglect matters. Family Law and/ or Juvenile Law is strongly recommended in the same or prior semester. Optional short paper credit; one two-hour class every other week. (Pre- or co-requisite: Evidence)

LAWS 523. Mediation Externship. 1-5 Credits.
Prerequisites: LAWS 374  
Corequisites: Take LAWS 374

LAWS 525. Moot Court I. 1 Credit.
Participation on the Moot Court Board allows students to build upon the writing and advocacy skills developed in the first year Legal Skills Program. Students practice advocacy skills by preparing and presenting both written briefs and oral arguments, which are usually made before a panel of judges. Members of the student board, elected through an intramural competition held each Fall, compete in national and regional competitions with teams from other law schools. Successful completion of a student’s first year of membership on the board, including participation in the intramural competition used to select members, entitles the student to one credit. One additional credit may be earned for participation as a competitor or competition editor in an interscholastic Moot Court competition. A maximum of three credits may be gained for all participation in Moot Court Board activities. Moot Court Board credits are granted with the grade of “pass”. Any award or credit is based in part on the student’s own preparation of a written memorandum or brief assigned to by a faculty member and is subject to the faculty member’s evaluation and review of the student’s entire work in the competition. 
Offered: Every year, All

LAWS 526. Moot Court II. 1-2 Credits.
Participation on the Moot Court Board allows students to build upon the writing and advocacy skills developed in the first year Legal Skills Program. Students practice advocacy skills by preparing and presenting both written briefs and oral arguments, which are usually made before a panel of judges. Members of the Student Board, elected through an intramural competition held each Fall, compete in national and regional competitions with teams from other law schools. Successful completion of a student’s first year of membership on the board, including participation in the intramural competition used to select members, entitles a student to one credit. One additional credit may be earned for participation as a competitor or competition editor in an interscholastic Moot Court competition. A maximum of three credits may be gained for all participation in Moot Court Board activities. Moot Court Board credits are granted with the grade of “pass”. Any award of credit is based in part on the student’s own preparation of a written memorandum or brief assigned to by a faculty member, and is subject to the faculty member’s evaluation and review of the student’s entire work in the competition. 
Offered: Every year, All
LAWS 527. Corporate Counsel Externship. 2-5 Credits.
Students work in the legal departments of area corporations and membership organizations. One two-hour class every other week.
Offered: Every year, All

LAWS 528. Moot Court III. 1 Credit.
Participation on the Moot Court Board allows students to build on the writing and advocacy skills developed in the first year Legal Skills Program. Students practice advocacy skills by presenting both written briefs and oral arguments, which are usually made before a panel of judges. Members of the Student Board, elected through an intramural competition held each Fall, compete in national and regional competitions with teams from other law schools. Successful completion of a student’s first academic year of membership on the board, including participation in the competition used to elect members, entitles the student to one credit. One additional credit may be earned for participation as a competitor or competition editor during interscholastic Moot Court competition. A maximum of three credits may be gained for all participation in Moot Court activities. Moot Court Board credits are granted with the grade of “pass”. Any award of credit is based in part on the student’s own preparation of a written memorandum or brief assented to by a faculty member and is subject to the faculty member’s evaluation and review of the student’s entire work in the competition.
Offered: Every year, All

LAWS 530. Probate Law Journal I. 1-3 Credits.
The Quinnipiac Probate Law Journal is a student-edited law journal covering developments in probate law and practice. The Journal includes scholarly articles, as well as noteworthy judicial opinions from probate courts throughout the nation. Membership on the Journal is based on academic achievement and/or participation in an annual write-on competition. Successful completion of all requirements entitles a student to four academic credits and credit for the substantial paper component of the Advanced Writing Requirement.
Offered: Every year, All

LAWS 531. Probate Law Journal II W. 1-2 Credits.
The Quinnipiac Probate Law Journal is a student-edited law journal covering developments in probate law and practice. The Journal includes scholarly articles, as well as noteworthy judicial opinions from probate courts throughout the nation. Membership on the Journal is based on academic achievement and/or participation in an annual write-on competition. Successful completion of all requirements entitles a student to four academic credits and credit for the substantial paper component of the Advanced Writing Requirement.
Offered: Every year, All

LAWS 539. Intro. to Dispute Res. in Healthcare. 2-3 Credits.
This course will introduce students to the potential role of ADR in resolving some of the most compelling disputes in the healthcare field. As this course will emphasize both conflict resolution skill-building and content-based learning, by the end of the course, students will be familiar with a spectrum of dispute resolution processes and context specific strategies for resolving conflicts in different healthcare settings. This is an intermediate course designed for students who have some familiarity with alternative dispute resolution and/or healthcare law.

LAWS 540. Family & Juvenile Law Externship. 2-5 Credits.
Prerequisites: Take LAWS 311;

LAWS 541. Fam&Juv. Law Seminar. 1 Credit.

LAWS 542. Healthcare Industry Regulation & Control. 3 Credits.
This course will analyze and discuss the statutory, regulatory and private contract provisions that govern the delivery of healthcare by licensed providers.

LAWS 544. Advanced Health Law, SW. 2 Credits.
This is a limited enrollment course, open only to students who have taken the introductory Health Law course (LAWS 345) or who have professional training in medicine, nursing, or a related field. Students will be expected to do independent research in an area of health law to be approved by the instructor. In addition to producing a paper of substantial legal scholarship, students will be required to make class presentations on their research. This course is cross listed for the Health Care Compliance Certificate (offered in conjunction with the School of Business) and the Scholarly Reflection and Concentration/Capstone Course at the Frank H. Netter School of Medicine. [Prerequisite: Health Law ([LAWS 345]) (2 credits)
Prerequisites: LAWS 345

LAWS 545. Healthcare and Hospital Administration. 2 Credits.
This introductory course in healthcare and hospital administration will introduce students to the field of hospital administration and healthcare management. It will give an overview of contemporary issues relating to government healthcare regulation, hospital administration, medical staff credentialing, financial reimbursement, personnel management and federal efforts for universal healthcare coverage.
Offered: Every year, All

LAWS 547. Civ.&Pol Rts-1st Amendment. 2 Credits.
This course is a study of the law of the individual liberties and civil rights, with emphasis on the First Amendment speech, press, and religion causes.
Prerequisites: Take LAWS 110;
Offered: Every year, All

LAWS 549. Bioethics. 3 Credits.
This course will cover the legal and ethical issues involved in such areas as human experimentation, novel means of reproduction made possible by advanced technology, medical treatment of patients who are incompetent to consent, genetic screening and counseling, abortion, the treatment of defective newborns, the definition of death, organ transplantation, AIDS, and drug and alcohol addiction.
Offered: Every year, All

LAWS 551. Federal Criminal Law. 2 Credits.
This course examines Federal Substantive Criminal Law. It includes a re-examination of the constitutional authority of the national government; judicial, legislative and administrative approaches to limiting federal authority; and the state-federal relationship in the criminal process. The bulk of class time will be devoted to close examination of several statutory offenses, such as racketeering, mail fraud, and conspiracy. The course also focuses on ethical and policy issues confronting attorneys involved in the Federal Criminal Justice System.
Prerequisites: Take LAWS 110; Take LAWS 113;
Offered: Every year, All

LAWS 553. Law Practice Management. 2 Credits.
Offered: Every year, All

LAWS 554. Poverty Law. 2 Credits.
The course examines the problems of poor persons and selected governmental and private efforts to aid them; consumer protection laws; the requirements and procedures regulating eligibility for Welfare Assistance; alternatives to the present system of Welfare payments; Housing Code enforcement; subsidized housing; the role of the poor persons in determining and managing programs designed to assist them; legal representation and counseling of the indigent persons.
Offered: Every year, All
LAWS 572. Immigrant & Natural Law.  
An introduction to the practice of immigration law, to include the substantive and procedural rights of foreign nationals. Topics will include: the role of US government agencies charged with administering immigration, admission and entry to the United States, and removal from the United States. Ethical issues unique to the practice of immigration law will be highlighted throughout the course.  
**Offered:** Every year, All  

This course deals with selected problems in civil procedure in the state of Connecticut of current or continuing interest.  
**Offered:** Every year, All  

LAWS 579. Advanced Externship Seminar.  
**Prerequisites:** Take LAWS 305;  
**Offered:** Every year, All  

This is a study of basic concepts of federal income taxation of partnerships, traditional corporations, and subchapter S corporations.  
**Prerequisites:** Take LAWS 305;  
**Offered:** Every year, All  

LAWS 581. Tax Research - S,W.  
With approval of a faculty member, tax students may select a topic for extensive research culminating in a paper of publishable quality.  
**Prerequisites:** Take LAWS 305;  
**Offered:** Every year, All  

LAWS 584. Irish Legal System.  
The Irish Legal system shares a common background and history with the American and English systems, but it also has its own. This course will examine some of the history of the Irish legal system, its courts, procedures, and include an introduction to some of the substantive law of Ireland.  
**Offered:** Every year, All  

LAWS 587. Disability Law.  
This course focuses on The Americans with Disabilities Act, including its sections prohibiting disability discrimination in the workplace, in public accommodations and in state and local government services. The course explores the key elements of the law, including the definition of disability, reasonable accommodations, undue hardship and the direct threat defense. The course also examines the Individuals with Disabilities Education Act and Federal Rehabilitation Act.  
**Offered:** Every year, All  

The Quinnipiac Health Law Journal is a student-edited law journal. Each issue contains a collection of scholarly articles involving health law issues written by students of Quinnipiac University School of Law and/or legal scholars in the Health Law profession. Membership on the Journal is based on academic achievement and/or participation in an annual write-on competition. Successful completion of all requirements entitles a student to four academic credits and credit for the substantial paper component of the Advanced Writing Requirement.  
**Offered:** Every year, All  

LAWS 589. Health Law Journal II.  
The Quinnipiac Health Law Journal is a student-edited law journal. Each issue contains a collection of scholarly articles involving health law issues written by students of Quinnipiac University School of Law and/or legal scholars in the Health Law profession. Membership on the Journal is based on academic achievement and/or participation in an annual write-on competition. Successful completion of all requirements entitles a student to four academic credits and credit for the substantial paper component of the Advanced Writing Requirement.  
**Offered:** Every year, All  

This is a Constitutional Law course that focuses on the role of attorneys in the political process. We will spend time studying the power of the executive branch; political cover-ups; lying to Congress; impeachment; political deal making; campaign finance; the role of the press; and voting rights.  
**Offered:** Every year, All  

LAWS 596. Franchise Law.  
The course covers selected topics in franchise law.  
**Offered:** Every year, All  

LAWS 598. Native American Law, S,w.  
Native American Law Course Description Topics covered in this course include tribal sovereignty and self government in Indian country, the special relationship between Indians and the federal government, Federal Indian policy, conflicts involving tribal, federal, and state jurisdiction over Indians and Indian affairs in Indian country, tribal authority over Indians and non-Indians, criminal jurisdiction over Indians and non-Indians for offenses committed on reservations, tribal access to capital markets, tribal economic development, casinos and other types of gaming, land claim litigation, and current issues affecting tribal tribes, their governments, and their members.  
**Offered:** Every year, All  

LAWS 599. Intro to Representing Clients.  
This course is designed to prepare students for individual client representation and work in other practice settings. IRC students explore the lawyer’s role, and develop interviewing, counseling, and negotiation skills by representing each other in mock cases.  
**Offered:** Every year, All  

LAWS 600. Law and Gender.  
**Offered:** All  

LAWS 601. Managed Health Care.  
Managed Health Care This course will examine issues of current interest in the area of managed care. Topics covered may include formation of integrated health care delivery systems and the rights and obligations of third-party payors, providers, and patients. (2 credits)  
**Offered:** Every year, All  

LAWS 602. Law and Forensic Science.  
Forensic scientific evidence is frequently the subject of court challenges and public controversy. Critics question the methods forensic scientists employ and the validity of their conclusions, while forensic experts claim that their work is misrepresented or misunderstood. During this course, experts in DNA, fingerprints, pattern interpretation, and other forensic disciplines will present the basic principles of their fields, accepted interpretation models, and the scientific limits of what experts can reasonably conclude. The course will also explore, through case examples and discussion, various strategies for using forensic evidence to support or challenge the reliability of factual findings.  
**Offered:** Every year, All  

LAWS 604. Medical Malpractice.  
This course will cover the principles of medical negligence and their application in selected cases. Specific topics will include the physician's duty to patients, the standard of care in medical malpractice actions, causation in law and medicine, the standard of proof, the damages obtainable, medical records and other evidence used to prove malpractice, the use of expert testimony, and the physician patient privilege. Other areas to be discussed are hospital liability, the role of insurance, recent statutory reforms, and alternatives to litigation. (2 or 3 credits)  
**Offered:** Every year, All  

LAWS 607. Legal Services Externship.  
**Offered:** Every year, All  

LAWS 608. Legal Services Seminar.  
**Offered:** Every year, All  

LAWS 609. Externship Seminar.  
**Offered:** Every year, All
LAWS 611. Advanced Clinic.  1-6 Credits.
Some students who have completed a clinic semester will be invited to continue working in the clinic on advanced matters. May or may not have formal classroom component, at the professor's discretion. (By arrangement with clinic faculty; 1 to 6 credits)
Offered: Every year, All

LAWS 612. Advanced Tax Clinic.  2-5 Credits.
Some students who have completed a clinic semester will be invited to continue working in the clinic on advanced matters. May or may not have formal classroom component, at the professor's discretion.
Prerequisites: take LAWS 295

LAWS 615. Conn. Adjudicative Criminal Procedure.  2 Credits.
This course will introduce students to the fundamentals necessary to practice criminal law in the State of Connecticut. It examines both the theoretical and practical aspects of Connecticut criminal procedure. The students will be familiarized with the criminal statutes, the criminal provisions of the Connecticut Practice Book and seminal state and federal criminal cases dealing with the Connecticut pretrial process. There will be practical exercises and mock pretrial proceedings which apply the materials covered in class. This course will encompass many of areas of pretrial practice including arraignments; bond arguments; discovery; plea negotiations; pretrial diversionary programs; hearings on motions to suppress physical evidence, identification evidence and/or statements; competency; violations of probation; and sentencing. Prerequisite or Corequisite: Criminal Procedure-Adjudicative or Criminal Procedure-Investigative
Corequisites: Take LAWS 431 or LAWS 432

LAWS 620. Electronic Discovery & Digital Evidence.  2 Credits.
This course examines the procedural and evidentiary issues that arise in an increasingly digital world. Students focus on the Federal Rules of Civil Procedure and the Federal Rules of Evidence as they apply to the retention, storage, production in pretrial discovery, and admissibility at trial of electronically stored information. The course is interactive and affords students the opportunity to utilize written and oral advocacy skills in applying the rules of procedure, evidence and ethics to civil and criminal case scenarios. The course also involves a research paper and no final exam. No special knowledge about computers is needed. Prerequisite or corequisite: Evidence
Corequisites: Take LAWS 311

LAWS 625. Health Information Privacy and Security.  2-3 Credits.
Health information privacy and security are critical components of the current health care culture and health law environment. This course provides an introduction to these privacy and security concerns and surveys key issues including electronic health records, the exchange of health information, privacy breaches, and the globalization of health care and clinical research. The course will discuss the interplay of federal health care privacy law with state privacy law with a focus on the federal Health Information Technology for Economic and Clinical Health Act (HITECH) and the Health Insurance Portability and Accountability Act (HIPAA). The course will also present an overview of international health care privacy considerations in cross-border healthcare-related transactions, including tele-health consultations and global research. In addition to reviewing the legal authority, the course will feature sample case studies for analysis and discussion and will emphasize creative, critical thinking about health care privacy and security law in the context of the "real world.

LAWS 626. Evening Clinic: Legal Ethics Project.  1 Credit.

LAWS 627. Evening Clinic: Veterans Law Project.  1-4 Credits.

LAWS 628. Estate Planning & Drafting.  2 Credits.
Estate Planning & Drafting
Corequisites: LAWS 307

LAWS 629. Government Contracts Law.  2 Credits.
This course will examine the legal issues pertaining to the United States Government's contracting activities. Students will receive an overview of the Federal Acquisition Regulations (FAR) and underlying statutes such as the Competition in Contracting Act (CICA) and Contract Disputes Act of 1978 (CDA). The course will give students the opportunity to explore the unique aspects of Government contract formation, administration, and litigation in both the private and public sectors.

LAWS 631. Financial Planning: Principles & Taxat.  2-3 Credits.
This course considers major topics in the field of financial planning, including the role of various types of financial advisors, asset management and investments, retirement planning, insurance and income tax planning. Through various written projects, students will explore selected aspects of the financial planning process. Consideration will be given to the tax consequences of various planning techniques. (Prerequisite: Federal Income Taxation)

LAWS 633. Intellectual Property in Health Care.  2 Credits.
Intellectual property rights are important for innovation in health care and public health, and are one factor in determining access to medicines and medical procedures. The course will focus on various types of intellectual property in these areas, including patents relating to pharmaceuticals, medicines, medical devices, and surgical procedures. Related topics to be discussed include patentable subject matter and trade secrets as they relate to healthcare IP, as well as ownership, licensing, and other transactions involving such intellectual property. Policy considerations including the importance and effectiveness of intellectual property regimes and other incentive and funding mechanisms that stimulate research and the creation of new medicines and other products that improve health will also be discussed.

International Human Rights Law & Transitional Justice This year-long course will explore the tension between justice and peace; and, in the transitional justice context, the tension between justice and mercy. Topics may include, among others: the concept of human rights, guaranteeing human rights by treaty, human rights & foreign policy, transitional justice, truth & reconciliation processes, and women, peace & security. The course culminates, for students who are able to attend, in making a presentation at the annual Summit of Nobel Peace Laureates, which meets annually to "engage in dialogue, discussion, and debate about current issues and challenges, promote significant international political and social campaigns, issue statements, conceive and create new initiatives, and hopefully send messages of inspiration and wisdom to the entire world." Since its inception in 1999, the Summit has convened in, among other cities, Rome, Hiroshima, Warsaw, Berlin, Paris, Barcelona, and, most recently, in Bogotá. The course will prepare the students for their presentation by providing an education in the legal texts and historical readings relevant to each year’s Summit. (2 or 3 credits: 1 each in the fall and spring, plus 1 credit for attending the Summit, earned in the semester in which the Summit occurs.)

LAWS 635. Negotiable Instruments & Elec. Payments.  2-4 Credits.
Negotiable Instruments and Electronic Payments (LAWS 635) Introduction to Article 3 (Negotiable Instruments), Article 4 (Bank Deposits and Collection), and Article 4A (Fund Transfers) of the Uniform Commercial Code. In addition, the course will address various federal statutes, such as the Check 21 Act and the Electronic Funds Transfer Act. (3 or 4 credits)
LAWS 636. Sentencing, Prisons, and Reentry. 2 Credits.
This seminar will explore policies and procedures relating to the “back end” of the criminal justice system (i.e., what occurs after a determination of guilt). The course will cover topics relating to criminal sentencing, including sentencing guidelines, mandatory minimums, and constitutional challenges to sentences. We will consider laws and policies relating to incarceration, such as prison conditions, solitary confinement, access to health care for prisoners, and the Prison Rape Elimination Act. Finally, we will examine the “collateral consequences” of criminal convictions and the challenges individuals face reentering communities after incarceration. These questions are pressing given the size of our country’s incarcerated population - with more than 2.2 million people incarcerated in America’s prisons and jails, we have more prisoners per capita than any other country in the world. (2 credits)

LAWS 638. Corporate Counsel. 2 Credits.

LAWS 639. Criminal Justice: Inside/Out. 2 Credits.

LAWS 650. Cybersecurity. 2 Credits.
As the Internet continues to expand throughout society and in our daily lives, cybersecurity, privacy, and anonymity legal issues are becoming increasingly important. Students in this course will study both U.S. and European data protection and privacy regimes, with an emphasis on U.S. law. Students will explore the legal frameworks of U.S. privacy laws as they apply to specific industries and types of information holders and users, analyzing relevant statutes, civil litigation, and FTC enforcement actions as well as as actual contract language (i.e., online privacy policies and data protection language). Students will engage with the most current cases and will work on practical legal issues relevant to corporate clients. The objective of this course is for students to develop a broad foundation and skill set in this rapidly evolving area of law.

LAWS 676. Anatomy for Lawyers. 2 Credits.
An understanding of basic human anatomy is a key component of any legal action involving damage or injury to an individual. The purpose of this course is to provide a general overview of basic human anatomy. The intent of the class is to familiarize lawyers with basic human anatomy and some associated physiology. Plaintiff and defense attorneys who pursue personal injury and workers compensation cases focus mostly on joints and limb function, such as the ankle, hip and shoulder and their functional ability, and also on the spine (cervical and lumbar) and the overall functional ability. However, there are other areas of law such as medical malpractice, environmental/toxic tort, pharmaceutical/products, patent, mass tort, Criminal law and other areas of Healthcare law which all deal with basic or different aspects of anatomy and physiology. The areas of law in which a basic knowledge of human anatomy and physiology apply are substantial. The course will give a basic general understanding of human anatomy and physiology, and discuss common injuries and damage which will give attorneys a better understanding when reviewing medical records and evaluating cases and dealing with experts and expert testimony.

LAWS 777. Review. 1 Credit.

Management (MG)

MG 603. Project Management. 3 Credits.
Designed to provide a comprehensive coverage of the activities, tasks and techniques of project management, this course focuses on both the behavioral and the analytical skills required for successful project completion. On the behavioral side, the course examines how organizational issues contribute to project success/failure and how effective teams are fashioned. Analytic topics include: cost and resource estimation, Gantt charts, PERT/CPM, and resource load charts. The goal of the course is to provide students with the skills to plan and control complex projects. Students can receive credit for only one of the following courses: MG 603, OL 640 and BAN 669.
Offered: As needed

MG 611. Designing Mentoring and Coaching Programs. 3 Credits.
This course explores the theories and applications of employee development, mentoring and coaching. Students gain experience in the design, development and operation of formal mentoring and coaching programs in organizations. Return on investment of mentoring and coaching programs and empirically supported best practices are discussed.
Offered: As needed

MG 639. Special Topics. 3 Credits.
Offered: As needed

MG 641. Supply Chain Management. 3 Credits.
This course integrates concepts, strategies and analytical techniques to improve production systems that create and deliver a firm’s products and services. It offers an integrated view of supply chain systems by including suppliers, manufacturers, warehouses, transportation, retailers and services providers. Based on key concepts such as the value of information, coordinated product and supply chain design, and international supply chain opportunities, the following areas are emphasized: product realization, order fulfillment, production/inventory management, distribution channels and information systems.
Prerequisites: Take MBA 635.
Offered: Every year, Fall

MG 642. Logistics Management. 3 Credits.
Logistics ensures the flow of raw materials and finished products in a supply chain. Given the global commerce, the flow of materials has increased the size and complexity of logistical operations. In this course, students develop an understanding of functional areas of logistics: order processing, transportation, inventory, warehousing, materials handling and packaging and facility design. Within these functional areas, students learn to analyze the trade-offs involved with key decisions. The course strongly emphasizes the use of analytical models and methods for the decision-making process. Excel is the platform considered for decision-making purposes.
Offered: Every year, Spring
MG 643. Strategic Sourcing and Supply Management. 3 Credits.  
This course explores strategic sourcing and supply management in the industrial purchasing cycle for operating supplies, raw materials, components and services. The course includes the use of Excel-based analytical models and methods to enhance the decision-making process. Topics include strategic issues relating to the procurement decision process including supplier selection and evaluation, supplier development, make-versus-buy decision, JIT purchasing, e-purchasing and the interrelationships between purchasing and other areas of the organization and the supply chain.  
Prerequisites: Take MBA 635.  
Offered: Every year, Fall

MG 688. Independent Study - Management. 3 Credits.  
Requires permission from a faculty sponsor and from the MBA director and School of Business dean.  
Offered: As needed, All

Marketing (MK)

MK 610. Research for Marketing and Business Decisions. 3 Credits.  
The course provides a managerial approach to market research activities. The goal is to enable students to evaluate market research projects and to interpret and apply research information toward marketing decisions. The research process is discussed and qualitative as well as quantitative methodologies are systematically reviewed. Attention is paid to how to analyze and present research findings.  
Prerequisites: Take MBA 645.  
Offered: As needed

MK 611. Managing Marketing Communications. 3 Credits.  
This course explores the many ways marketers communicate with other businesses and with consumers to inform and influence decision-making. The course introduces students to the philosophy, strategy and practices of integrated marketing communications (IMC). To effectively plan, implement and evaluate IMC programs requires an understanding of the firm’s overall marketing strategy and process, insight into consumers’ needs, grounding in communications theory, and a working knowledge of various IMC tools 150 including advertising, direct marketing, public relations, sales promotion, point-of-purchase displays and personal selling. Strategic and creative issues are covered.  
Prerequisites: Take MBA 645.  
Offered: As needed

MK 612. New Product Marketing. 3 Credits.  
This course introduces students to the specialized areas, within marketing management, of product development, brand management and pricing strategy. The primary topic of the course is new product management. This includes strategic planning, idea generation, business analysis, design, testing and introduction of new products to market. Related topics are issues in brand management and pricing strategy and tactics.  
Prerequisites: Take MBA 645.  
Offered: As needed

MK 613. Marketing Planning. 3 Credits.  
This course provides students with the tools to conduct analyses of markets for products and services and covers how to develop a marketing plan that includes goal definition, product strategy and positioning, description of the mix of marketing activities to achieve the objectives, contingency plans and controls.  
Prerequisites: Take MBA 645.  
Offered: As needed

MK 614. Digital Marketing. 3 Credits.  
This course introduces students to topics and issues employed by marketing managers as they develop and implement their digital marketing strategies. Topics include: marketing analytics, digital business models, digital marketing channels, search engine marketing, social media and mobile marketing. The class incorporates experiential learning opportunities which enable students to bridge the gap between marketing theory and managerial practice.  
Prerequisites: Take MBA 645.  
Offered: As needed

MK 615. Managing Marketing Channels. 3 Credits.  
This is an introduction to the design, evaluation and management of distribution channels. Topics include strategic issues in designing distribution channels, channel member roles, managing channel conflict, evaluation of channel performance, motivation of channel members, managing a hybrid mix of traditional and non-traditional channels, and channel logistics (transportation, inventory, materials handling and information management).  
Prerequisites: Take MBA 645.  
Offered: Every year, Spring

MK 616. Marketing Analytics. 3 Credits.  
Topics covered in this course include market segmentation, marketing mix analysis, product bundle optimization and social network analysis. In addition, students are introduced to the basics of effective visual presentation of quantitative information. Weekly homework with real business data allows students to explore a variety of analytic techniques and answer actual problems. Students leave with a knowledge of a variety of advanced techniques, in-demand analytic reasoning skills, and an understanding of methodological debates, trade-offs, and resource allocation for data projects.  
Prerequisites: Take MBA 645.  
Offered: As needed

MK 617. Marketing Research. 3 Credits.  
This course provides a managerial approach to market research activities. The goal is to enable students to evaluate market research projects and to interpret and apply research information toward marketing decisions. The research process is discussed and qualitative as well as quantitative methodologies are systematically reviewed. Attention is paid to how to analyze and present research findings.  
Prerequisites: Take MBA 645.  
Offered: As needed

MK 618. Marketing Theory and Cases. 3 Credits.  
This course explores the major theories and concepts in marketing and how these can be used as the basis for empirical research on the way consumers process information, form preferences and make buying choices. This is a course in which theories from psychology, sociology and economics are applied to the study of consumer behavior.  
Prerequisites: Take MBA 645.  
Offered: As needed

MK 619. Independent Study - Marketing. 3 Credits.  
Permission of the MBA director and School of Business dean is required.  
Offered: As needed

MK 620. Applied Consumer Behavior Research. 3 Credits.  
This course provides a basic understanding of the major concepts and theories in consumer decision-making and behavior and how these can be used as the basis for empirical research on the way consumers process information, form preferences and make buying choices. This is a course in which theories from psychology, sociology and economics are applied to the study of consumer behavior.  
Prerequisites: Take MBA 645.  
Offered: As needed

MK 621. Digital Marketing. 3 Credits.  
This course introduces students to topics and issues employed by marketing managers as they develop and implement their digital marketing strategies. Topics include: marketing analytics, digital business models, digital marketing channels, search engine marketing, social media and mobile marketing. The class incorporates experiential learning opportunities which enable students to bridge the gap between marketing theory and managerial practice.  
Prerequisites: Take MBA 645.  
Offered: As needed

MK 643. Strategic Sourcing and Supply Management. 3 Credits.  
This course explores strategic sourcing and supply management in the industrial purchasing cycle for operating supplies, raw materials, components and services. The course includes the use of Excel-based analytical models and methods to enhance the decision-making process. Topics include strategic issues relating to the procurement decision process including supplier selection and evaluation, supplier development, make-versus-buy decision, JIT purchasing, e-purchasing and the interrelationships between purchasing and other areas of the organization and the supply chain.  
Prerequisites: Take MBA 635.  
Offered: Every year, Fall

MG 688. Independent Study - Management. 3 Credits.  
Requires permission from a faculty sponsor and from the MBA director and School of Business dean.  
Offered: As needed, All
Master of Business Administration (MBA)

MBA 601. Foundations for Decision Making (MBA Quick Start). 1 Credit.
This course covers basic elements of statistics, technology (including Excel), financial accounting, managerial accounting, finance and economics as well as other fundamental business concepts. The course must be taken during a student's first semester in the MBA program, but can be completed concurrently with MBA 615. The course is graded on a pass/fail basis.
Offered: Every year, All

MBA 602. Communicating Effectively for Managers. 3 Credits.
This course provides instruction and practice in the various formats and styles of writing required of executives and professionals in a business environment. This course focuses on the ability to communicate clearly, which is necessary for success in the business world. Students are encouraged to organize thoughts logically, plan communications in advance, write in appropriate formats and communicate ideas concisely. Students learn communication skills necessary for leaders in today's global marketplace. International degree students only.
Offered: Every year, Fall

MBA 610. Business Decision Analysis. 3 Credits.
This course is an introduction to basic quantitative tools that enable managers to analyze data and make informed decisions. Topics include descriptive analysis of survey data, introductory probability, sampling and sampling distributions, hypothesis testing, simple and multiple regression and decision analysis. Students apply the quantitative decision-making tools to business situations through cases.
Offered: Every year, All

MBA 615. Managing the Decision-Making Process. 3 Credits.
This course introduces a framework for formulating, analyzing and making complex business decisions. Students learn to analyze problems from multiple perspectives and different disciplinary points of view and how to evaluate business decisions through an ethical lens. The course provides an overview of business functions with a focus on the need to integrate activities among them for effective decision making. Students learn to evaluate the extent to which an individual or organizational bias affects the decision-making process and identify alternative approaches to mitigating biases.
Offered: Every year, All

MBA 620. Financial and Managerial Accounting for Decision Making (AC 620). 3 Credits.
This course provides an introduction to the use of accounting information for decision making in organizations. Topics include reporting and analysis of financial statement information and the use of managerial decision-making tools to support planning and control. Students can receive credit for either AC 620 or MBA 620 but not both.
Prerequisites: Take MBA 615.
Offered: Every year, All

MBA 625. Organizational Behavior and Leadership for Decision Makers. 3 Credits.
Students become familiar with both the language and practice of organization theory, including designing organizations, managing the organizational environment and understanding the relationships between tasks, technology, environment and organization structure. Issues related to motivation, leadership, organization culture, decision making and ethical leadership are presented. Interpersonal relationships are explored through an examination of the roles of power, politics and conflict in organizations as well as leader behavior, styles and leadership development. Students also explore how organizational structures and leadership models interrelate with the marketing, operational and financial systems in the enterprise.
Prerequisites: Take MBA 615.
Offered: Every year, All

MBA 635. Decision Making for Business Operations. 3 Credits.
Students learn to design and manage the production processes that create and deliver the firm's primary products and services to improve performance of the business. The course strongly emphasizes the use of analytical models and methods for the decision-making process. Excel is the platform considered for decision-making purposes. Both tactical day-to-day operating decisions and longer range strategic decisions are examined through topics that include process analysis, product design, workforce management, capacity management (including forecasting), facilities planning, inventory control and quality management. Students also explore the relationship between the production system of the organization and the marketing, financial and human resources systems during the creation of goods and services.
Prerequisites: Take MBA 615.
Offered: Every year, All

MBA 640. Financial Decision Making. 3 Credits.
This course introduces students to the theory and techniques of financial analysis with application to real world problems and situations. Topics include risk and return, asset pricing, capital budgeting and corporate investment decisions, capital structure decisions, dividend policy, corporate merger, divestiture and takeover decisions.
Prerequisites: Take MBA 615.
Offered: Every year, All

MBA 645. Marketing Decision Making. 3 Credits.
Students learn to formulate, manage and evaluate the marketing strategies that create the firm's products and services and deliver those products and services to the market. Both tactical day-to-day operating decisions and longer range strategic decisions are examined through topics that include buyer behavior, market segmentation, demand estimation, product positioning, product development, branding, pricing, distribution channels, and integrated marketing communications. Students also explore the relationship between the marketing and the overall corporate strategy.
Prerequisites: Take MBA 615.
Offered: Every year, All
MBA 650. Strategic Public Relations and Reputation Management. 3 Credits.
The focus of this course is reputation management and its importance to business success. Students analyze the function of corporate communications and examine a range of topics including organizational identity, image and reputation; issues and crisis management; institutional ethics and corporate social responsibility; strategic public relations planning; integrated marketing communication; public relations theories and best practices; and global public engagement. The class also explores specialty public relations practice areas such as media relations, investor relations, employee relations and government relations. Class discussions, case studies, in-class exercises, team projects and essay exams help students improve their critical thinking and reasoning skills, develop research and strategic planning skills and increase diversity awareness and sensitivities that are important to professional and business success.
Offered: As needed

MBA 660. Decision Making in a Global Economy. 3 Credits.
Students come to understand the global trends and issues that create business opportunities in foreign markets as well as the impact of the global environment on domestic business practices and opportunities. Students examine the economic, social and political issues that affect a firm's strategy for entering international markets and how cross-cultural issues affect internal business processes. Some sections of the course include an international travel experience while others include a virtual study abroad experience. BS/MBA students are required to take a section that includes an international travel experience. Part-time and online students are encouraged to take a section with an international travel component; however, part-time and online students who are unable to complete an international travel experience may take a section of the course with a virtual international experience. Additional course fee (travel) applies to all sections except virtual study abroad.
Offered: Every year, All

MBA 675. Special Topics - MBA. 3 Credits.
Offered: As needed

MBA 688. Graduate Internship I. 3 Credits.
Internships provide students with opportunities to obtain important experience in fields related to their programs of study under the supervision of a sponsoring faculty member and a practicing manager. Prior academic approval is required before registering for any internship course. Details may be obtained from the graduate business programs office. These courses are normally only open to full-time MBA students.
Offered: As needed

MBA 689. Graduate Internship II Administration. 3 Credits.
Internships provide students with opportunities to obtain important experience in fields related to their programs of study under the supervision of a sponsoring faculty member and a practicing manager. Prior academic approval is required before registering for any internship course. Details may be obtained from the graduate business programs office. These courses are normally only open to full-time MBA students.
Offered: As needed

MBA 690. Strategic Management Capstone. 3 Credits.
This is a capstone course in strategic decision making for MBA students. Students learn concepts and theory relevant to the field of strategic management, as well as review and integrate the accumulated functional business knowledge from the other MBA core courses. The course covers such topics as internal and external firm analysis, industry analysis, value chain, competitive strategy, corporate and functional strategy, top management leadership and firm performance evaluation. Emphasis is placed on developing decision-making skills through company and case analyses.
Prerequisites: Take MBA 601 MBA 615 MBA 620 MBA 625 MBA 640 MBA 645.
Offered: Every year, All

MBA 699. Independent Study. 3 Credits.
Offered: As needed

Mathematics (MA)

MA 521. Algebraic Reasoning. 2 Credits.
Students apply proof-based reasoning in the context of different algebraic systems, including groups, rings and fields. Specific examples include finite fields and matrix rings, as well as the real and complex numbers. Emphasis is placed on the interplay between axiomatic algebra and the existence and solution of algebraic equations.
Offered: Every year, Summer

MA 522. Analytic Reasoning. 2 Credits.
Students explore properties of the real numbers and functions of real numbers based on the completeness axiom, including continuity in the context of powers and roots, exponentials and logarithms, and the trigonometric functions. Definitions and properties of these functions are developed and proved, with an emphasis on their reliance on continuity.
Offered: Every year, Fall

MA 541. Complex Variables. 2 Credits.
This course extends the concepts of calculus to deal with functions whose variables and values are complex numbers. Topics include the geometry of complex numbers, differentiation and integration, representation of functions by integrals and power series, and the calculus of residues.
Prerequisites: Take MA 242 or MA 251 and MA 301; Minimum grade C- or better.
Offered: Every year, Fall

MA 565. Famous Mathematical Constants. 3 Credits.
This course is a tour of mathematics from the viewpoint of the well known constants e, pi and i. Topics are chosen from geometry, number theory, calculus and algebra.
Offered: Every Third Year

MA 580. Euclidean and Non-Euclidean Geometry. 4 Credits.
This course covers concepts in Absolute, Euclidean and non-Euclidean geometries, including planar geometry, hyperbolic geometry, and spherical geometry. In particular, students explore topics which may include finite geometries, axiom systems, transformations and symmetries, analytic geometry, circles, triangles, quadrilaterals, the parallel postulate, Pythagorean Theorem, area and similarity.
Offered: Every year, Spring
MA 583. Mathematics: Historical Insights. 2 Credits.
Students explore mathematics from various historical perspectives. In particular, they investigate the contributions of ancient Babylonian, Egyptian and Persian cultures, and consider the historical methods of solving quadratic and cubic equations, as well as development of the calculus.
Offered: Every year, Summer

MA 585. Mathematical Problem Solving. 3 Credits.
This course presents an introduction to the spirit of mathematical inquiry through a problem-based approach; heuristics; problem-solving techniques; Polya's stages of problem solving; specific strategies.
Offered: As needed, All

MA 586. Discrete Structures. 3 Credits.
This course considers induction, set theory, relations, functions, graphs, trees, logic and Boolean algebra, counting techniques, applications to probability, computer science and algorithm development.
Offered: As needed, All

Nursing (NUR)

NUR 500. Biostatistics. 1 Credit.
This biostatistics course is an introduction to probability concepts and statistical tests currently used in the biological and health sciences. The course covers the application of statistics to data analysis. An emphasis is placed on inferential statistics, which includes estimation, confidence intervals, means, variances and proportions.
Offered: Every year

NUR 514. Epidemiology and Population Health. 3 Credits.
This course introduces epidemiologic principles, methods and data used in advanced nursing practice. Population health concepts are coupled with risk analysis statistics to critique evidence for holistic public health approaches. The use of data to assess acute and chronic population health problems, to implement effective interventions addressing these problems, and to examine outcomes is emphasized.
Offered: Every year, Spring and Summer

NUR 515. Communications and Conflict Management. 3 Credits.
This course provides an introduction to communication and conflict management skills and systems necessary for effective health care delivery and managing or advising health care institutions. Students examine communication, negotiation, decision-making, challenging conversations and behavior, effective feedback and conflict system design. Online, spring semester, open to graduate nursing and law students.
Offered: Every year, Spring

NUR 516. Health Policy and Organizational Systems. 2 Credits.
This course provides an introduction to various social and political policy environments impacting advanced nursing practice and health care systems. Students examine issues that inform health care policy, organization and financing. Nursing's advocacy role in shaping policy in organizational, social and political venues is emphasized.
Offered: Every year, Fall

NUR 517. Anatomy for the Nurse Anesthetist. 2 Credits.
This course emphasizes the fundamentals of anatomy for the cardiac, respiratory and nervous system. Anatomy as it pertains to regional administration is stressed, as well as pain management. Throughout this course, students utilize dissections of specific organs and the use of computer and anatomic models. Airway anatomy is covered extensively through multiple modalities. Renal and hepatic anatomy are reviewed.
Offered: Every year, Summer

NUR 517L. Anatomy for the Nurse Anesthetist Lab. 1 Credit.
This course features dissections of specific organs and the use of computer and anatomic models. Course includes an extensive study of airway anatomy through multiple modalities. Anatomy lab is utilized.
Offered: Every year, Summer

NUR 520. Advanced Health Assessment. 3 Credits.
This course presents the principles of performing a comprehensive health assessment and reporting the findings in a professional format. Attention is given to assessment and physical examination across the lifespan within diverse communities. The processes underlying diagnostic decision making are introduced. A laboratory component enables the student to master the techniques of performing a holistic health assessment.
Corequisites: Take NUR 520L.
Offered: Every year, Fall

NUR 520L. Advanced Health Assessment Lab. 2 Credits.
This lab must be taken with NUR 520. (2 lab hrs.)
Corequisites: Take NUR 520.
Offered: Every year, Fall

NUR 522. Advanced Pathophysiology. 3 Credits.
Essential concepts of pathophysiology are emphasized. Selected disorders are studied especially as they relate to homeostatic and defense/repair mechanisms. Where appropriate the course includes clinical correlations of disease states with symptoms and physical findings.
Offered: Every year, Fall

NUR 524. Principles of ECG Interpretation. 1 Credit.
This course provides a directed approach to understanding the principles and basic interpretation of electrocardiography as applied in advanced practice nursing. Intended for students in the adult-gerontology and family nurse practitioner tracks.
Offered: Every year, Summer Online

NUR 528. Principles of Radiography. 2 Credits.
The basic principles of radiologic and imaging techniques, recognition of common abnormal findings, indications and contraindications for various tests including cost analysis and availability factors are considered. Intended for students in the adult-gerontology and family nurse practitioner tracks.
Offered: Every year, Summer Online

NUR 530. Advanced Pharmacology. 3 Credits.
Students are introduced to pharmacological management across the lifespan and provided with advanced knowledge of pharmacokinetics. Selected categories of drugs commonly prescribed for management of health care problems and health promotion within diverse communities are presented. Controlled substances and the potential for abuse are discussed. The responsibilities and legalities of prescriptive authority in advanced practice are defined.
Offered: Every year

NUR 540. Educational Principles for the Health Care Professional. 3 Credits.
This course examines the theoretical perspectives of education as it relates to educational leadership and professional development for adult learners. Teaching/learning theories, models and principles are examined as preparation for the design, development, evaluation and revision of professional development-related curricula. Instructional strategies and teaching techniques adapted for diverse populations are explored.
Offered: Every year, Fall Online
NUR 541. Informatics Fieldwork Experience. 1 Credit.
This 1-credit practicum provides the opportunity for students to apply essential knowledge and skills in health care informatics. (120 practicum hours)
Offered: Every year, Summer Online

NUR 542. Introduction to Health Care Finance. 1 Credit.
This 1-credit online graduate course provides an overview of basic budgeting concepts and processes integral to project planning and project management. Students also are introduced to foundational principles of marketing.
Offered: Every year, Summer Online

NUR 543. Capstone. 3 Credits.
This capstone practicum is a culminating experience integrating knowledge and skill learned in other courses into the practice setting. Students complete a synthesis practicum that is an intensive mentored experience in operational leadership in a selected area of interest. (1-credit seminar, 2 credits/240 hours of practicum)
Offered: Every year, Spring Online

NUR 544. Introduction to Informatics. 3 Credits.
This online graduate course provides essential knowledge and skills in health care informatics to enhance the quality of patient care and outcomes through the assessment, development, implementation, use and evaluation of information technologies. It prepares the nurse to support evidence-based practice and manage patient-care technologies to deliver and enhance interprofessional care and communication for improved coordination of care.
Offered: Every year, Summer Online

NUR 590. Public Health Law. 3 Credits.
Nursing elective

NUR 600. Evaluation and Synthesis of Scientific Evidence for Practice. 2 Credits.
Students review selected processes to identify current best scientific evidence including formulation of asking an answerable question. Students also conduct a review of the literature, critically appraise individual studies, and synthesize the evidence collected. Various methods to evaluate statistical analyses and scientific rigor are emphasized. Discussions focus on strengths and limitations of existing evidence, and application to direct and indirect practice. Iterative writing is a major component of this course.
Offered: Every year, Fall Online

NUR 602. Principles of Ethical Theory in Nursing. 1 Credit.
This course facilitates the student's formulation of a theoretical basis for ethical judgment at an advanced level of practice. Students analyze ethical theory and debate responses to ethical problems in advanced nursing practice.
Offered: Every year, Fall and Summer Online

NUR 610. Clinical Scholarship and Inquiry in Nursing. 2 Credits.
This course focuses on improvement methods used to identify organizational systems' process problems affecting practice (direct and indirect care). Building on prior knowledge of evidence-based practice, students learn how to critically appraise scientific evidence, evaluate additional relevant information, and consider cost implications to create sustainable innovations intended to improve systems.
Offered: Every year, Spring Online

NUR 610PBL. DNP Project I. 2 Credits.
This seminar provides an opportunity for students to identify a health organization or system's opportunity for process improvement based on available aggregate data. Students develop a substantial and meaningful scholarly DNP Project Proposal that is innovative and evidence-based, reflects the application of credible research findings, financially sound, feasible, sustainable and demonstrates value to the organization and population(s) served. There is a minimum of 120 fieldwork hours associated with this course. The course is graded on a pass/fail basis.
Corequisites: Take NUR 610.
Offered: Every year, Summer Online

NUR 612. Leadership and Collaboration for Change in Health Care. 2 Credits.
This course focuses on developing advanced practice nursing leaders who are able to generate pragmatic responses to health care policy, systems and practice inquiry problems through a collaborative approach.
Prerequisites: Take NUR 610.
Offered: Every year, Fall Online

NUR 612PBL. DNP Project II. 1-2 Credits.
Students continue experiential learning to create and sustain change through implementation of the approved, scholarly DNP Project Proposal using appropriate leadership concepts, interdisciplinary team collaboration, and change theory. Post-implementation and evaluation of Project outcomes are disseminated to applicable fieldwork site stakeholders, peers in a professional forum, and in a digital repository. There are 120 fieldwork hours associated with this course the first time it is taken. This course is graded on a pass/fail basis. The course may be repeated for one credit until the DNP Project is completed.
Prerequisites: Take NUR 610 NUR 610PBL.
Offered: Every year, Fall Online

NUR 613. Nursing Leadership Seminar: Applying Data to Practice. 1 Credit.
This online seminar develops students’ skills in identifying, critiquing and applying data in health care. Students investigate evidence-based research and how that data is used to improve health system outcomes. In addition, they examine electronic data transfer methods and displays that illustrate performance. Finally, students debate the ethical aspects of data access, security and use.
Offered: Every year, Fall Online

NUR 615. Nursing Leadership Seminar and Fieldwork Experience: Safety and Legal Contexts of Health Care. 3 Credits.
This two-hour clinical seminar accompanies 120 hours of experiential learning in the field, with an emphasis on safety and legal concepts in health care. Human factors analysis and systemic quality improvement for increased patient and provider safety are discussed.
Prerequisites: Take NUR 613.
Offered: Every year, Spring Online

NUR 617. Nursing Leadership Fellowship: Relationship Management and Strategic Leadership. 3 Credits.
This online course focuses on developing nursing leaders who are able to generate pragmatic responses to health care demands that address the collaborative relationships critical to clinical, educational and organizational success. This course includes 120 hours (1 credit) of experiential learning in the field, with a two-hour online seminar to discuss student experiences and synthesize leadership concepts and skills.
Prerequisites: Take NUR 615.
Offered: Every year, Spring Online
NUR 620. Advanced Principles of Population-Based Health Care. 2 Credits.
This course examines policies impacting health across a broad spectrum of health care conditions and settings. Students discuss the contributions of nursing to population health.
Offered: Every year, Fall Online

NUR 621. Post-Master's Additional Graduate Clinical. 1-4 Credits.
This course is for those students who need more fieldwork hours to reach the 1,000 hours required for the Doctor of Nursing Practice degree. Objectives are developed with faculty specifically for the work to be done. One credit is equivalent to 120 hours of fieldwork.
Prerequisites: Take NUR 617 or NUR 623.
Offered: Every year, Summer

NUR 622. Special Topics in Advanced Practice Nursing. 3 Credits.
This seminar allows each student to examine contemporary issues surrounding advanced nursing practice and population health within the context of the individual student's population health focus. There are 120 fieldwork hours associated with this course.
Prerequisites: Take NUR 620.
Offered: Every year, Spring Online

NUR 623. Population Health Fellowship. 1 Credit.
This clinical experience allows for a wide variety of individual student preferences in working with issues of population health. The 120-hour requirement can be completed in condensed or extended timeframes.
Prerequisites: Take NUR 620 NUR 622.
Offered: Every year, Spring

NUR 630. Advanced Holistic Diagnosis. 3 Credits.
This course expands on assessment across the lifespan with attention to complex systems. The processes underlying diagnostic decision making are explored and a variety of simple office procedures such as suturing and splinting are taught.
Prerequisites: Take NUR 520 NUR 520L.
Corequisites: Take NUR 630L.
Offered: Every year, Spring

NUR 630L. Advanced Holistic Diagnosis Lab. 2 Credits.
This lab must be taken with NUR 630. (2 lab hrs.)
Prerequisites: Take NUR 520 NUR 520L.
Corequisites: Take NUR 630.
Offered: Every year, Spring

NUR 631. Introduction to Clinical Practicum and Seminar. 1 Credit.
This course introduces students to clinical practice and includes an online seminar. Students apply advanced health assessment skills to assess patients across the adult lifespan. Students are expected to perform focused and full histories and physicals, formulate differential diagnoses, order appropriate laboratory testing and begin to develop treatment plans. Presentation of patient cases, appropriate clinical documentation, and the DNP role are emphasized.
Prerequisites: Take NUR 630 NUR 630L.
Offered: Every year, Summer

NUR 632. Health Promotion and Advocacy. 3 Credits.
Health promotion, advocacy and mental health problems encountered in primary care settings are considered. A holistic approach to clients from adolescence to senescence is emphasized. Evidence-based guidelines and research are integrated to develop nursing strategies for health promotion and prevention.
Offered: Every year, Fall

NUR 633. Clinical Simulation. 1 Credit.
This course is designed to enhance nurse practitioner students' clinical examination and documentation skills. Students participate in individual and group simulated case scenarios and document appropriate notes for faculty review. Discussion of cases in a seminar setting is included. Emphasis is placed on the holistic assessment of individuals and/or families according to their needs. Low faculty-to-student ratios allow for individualized instruction to improve clinical assessment skills and documentation. The course is conducted five hours per day for three days prior to the start of the fall semester.
Prerequisites: Take NUR 643 or NUR 653.
Offered: Every year, Summer

NUR 634. Reproductive Health Problems in Primary Care. 3 Credits.
Gender-related problems in primary care across the lifespan are the focus of this course. Selected alternative and complimentary therapies are included.
Corequisites: Take NUR 520 NUR 520L.
Offered: Every year, Fall and Summer

NUR 636. Common Problems in Primary Care. 3 Credits.
This course considers diagnoses of common problems encountered in primary care settings. Evidence-based, multidisciplinary management approaches to selected health problems also are discussed. Assessment and management of the selected problems include attention to cultural traditions, alternative treatments and socioeconomic policies that affect the delivery of care. The course is grounded by a holistic approach to care; case studies are used to promote clinical reasoning.
Prerequisites: Take NUR 631.
Offered: Every year, Fall

NUR 637. Clinical Fellowship. 4 Credits.
This intensive clinical experience allows for deepened clinical practice in a flexible timeframe. The 240-hour requirement can be completed in six weeks as a full-time practice, or in two- or three-day practice allotments throughout the summer. This course comes at the end of the student's sequence of clinical courses. A clinical seminar prepares students for the national certification exam and future clinical practice. This course is graded on a pass/fail basis.
Prerequisites: Take NUR 647 or NUR 657.
Offered: Every year, Spring

NUR 638. Laboratory Diagnosis. 2 Credits.
This course introduces students to selected laboratory tests, including cardiac and pulmonary testing. Students discuss the use and interpretation of diagnostics in a variety of primary care problems. Attention to financial considerations in the selection of diagnostics is emphasized.
Prerequisites: Take NUR 522 NUR 630 NUR 630L.
Offered: Every year, Summer Online

NUR 640. Special Topics in Adult and Geriatric Psychopharmacology. 1 Credit.
The perspective of psychiatric neuroscience addresses the actions and interactions of drugs on the brain, the impact in the central nervous system, and interprets the behavioral consequences of psychiatric medications. Common psychiatric medications seen with adults and geriatric patients in primary care settings are considered. A holistic approach to adult and geriatric patients is emphasized. Evidence-based guidelines and research are integrated to develop nursing strategies for best practices in psychopharmacology.
Prerequisites: Take NUR 647.
Offered: Every year, Spring
NUR 641. Adult Health Practicum and Seminar I. 3 Credits.
This course integrates the principles of primary care nursing and includes a mentored practicum with a clinical seminar. Students apply advanced practice skills to manage acute and chronic health problems across the adult lifespan. Appropriate clinical documentation, case presentation and use of web-based clinical resources are emphasized.
Prerequisites: Take NUR 631.
Offered: Every year, Fall

NUR 642. Complex Problems in Primary Care. 3 Credits.
This course focuses on selected complex, urgent or less frequently encountered problems of primary care across the lifespan from adolescence to senescence. An opportunity to refine differential diagnosis and management of challenging health concerns in diverse populations is provided by the use of case studies.
Prerequisites: Take NUR 636; and NUR 641 or NUR 651.
Offered: Every year, Spring

NUR 643. Adult Health Practicum and Seminar II. 3 Credits.
This course includes a mentored practicum with clinical seminar and provides further opportunity for advanced nursing practice with diverse adult populations. Students refine primary care skills including appropriate documentation, differential diagnosis, case presentation and technology utilization with attention to cost-effective and evidence-based approaches to care.
Prerequisites: Take NUR 641.
Offered: Every year, Spring

NUR 645. Adult Health Practicum and Seminar III. 3 Credits.
This course includes a mentored practicum experience of 240 hours and an online seminar. It provides continued opportunity for advanced holistic practice with adults. Seminar prepares students for certification and licensure as adult-gerontology nurse practitioners.
Prerequisites: Take NUR 643
Offered: Every year, Summer Online

NUR 647. Adult Health Practicum and Seminar IV. 3 Credits.
This course includes a mentored clinical practicum with a clinical seminar, and provides continued opportunity for holistic nursing practice with families at an advanced level. Students are expected to manage the process of patient care with increasing confidence, efficiency and accuracy. Cost-effectiveness, evidence-based practice, ethical dilemmas, cultural sensitivity and preparation for entry to licensed practice are emphasized.
Prerequisites: Take NUR 633.
Offered: Every year, Fall

NUR 650. Special Topics in Family Psychopharmacology. 1 Credit.
The perspective of psychiatric neuroscience addresses the actions and interactions of drugs on the brain, the impact in the central nervous system, and interprets the behavioral consequences of psychiatric medicines. Common psychiatric medications seen with patients across the lifespan in primary care settings are considered. A holistic approach to patients across the lifespan is emphasized. Evidence-based guidelines and research are integrated to develop nursing strategies for best practices in psychopharmacology.
Prerequisites: Take NUR 657.
Offered: Every year, Spring

NUR 651. Family Health Practicum and Seminar I. 3 Credits.
This course includes a mentored practicum experience and a clinical seminar. Health promotion and assessment of health problems within family systems are emphasized. Students learn primary care skills including appropriate documentation, differential diagnosis, case presentation and technology utilization with attention to cost-effective and evidence-based approaches to care.
Prerequisites: Take NUR 631.
Offered: Every year, Fall

NUR 652. Primary Care of the Child and Family I. 3 Credits.
This course focuses on health care of the child within the family system. Comprehensive assessment and management of common pediatric health problems encountered in primary care settings are addressed.
Prerequisites: Take NUR 631.
Offered: Every year, Fall

NUR 653. Family Health Practicum and Seminar II. 3 Credits.
This course includes a mentored practicum experience of 120 hours and a weekly clinical seminar. It provides an opportunity for nursing practice with families at an advanced level. Comprehensive assessment, clinical decision-making and strategies to facilitate health promotion and health restoration of individuals within family systems are emphasized.
Prerequisites: Take NUR 651.
Offered: Every year, Spring

NUR 654. Primary Care of the Child and Family II. 3 Credits.
This course continues the focus on health care of the child within the family system. Primary care management is emphasized.
Prerequisites: Take NUR 651 NUR 652.
Offered: Every year, Spring

NUR 655. Family Health Practicum and Seminar III. 3 Credits.
This course includes a mentored practicum experience of 240 hours and an online seminar. It provides continued opportunity for advanced holistic practice with families. Seminar prepares students for certification and licensure as family nurse practitioners.
Prerequisites: Take NUR 653.
Offered: Every year, Summer Online

NUR 656. Pediatric Assessment. 1 Credit.
This course discusses holistic health assessment of newborns, infants, children and adolescents. Assessment of normal growth and development is presented, as is assessment of common pediatric primary care problems.
Prerequisites: Take NUR 630 NUR 630L.
Offered: Every year, Summer Online

NUR 657. Family Health Practicum and Seminar IV. 3 Credits.
This course includes a mentored practicum experience of 120 hours and a weekly clinical seminar. Students are expected to manage the process of patient care with increasing confidence, efficiency and accuracy. Cost-effectiveness, evidence-based practice, ethical dilemmas, cultural sensitivity and preparation for entry to licensed practice are emphasized.
Prerequisites: Take NUR 633.
Offered: Every year, Fall

NUR 658. Geriatric Assessment. 1 Credit.
This course discusses holistic health assessment of geriatric patients. Assessment of the normal changes of aging is presented, as is functional assessment and common geriatric care problems.
Prerequisites: Take NUR 630 NUR 630L.
Offered: Every year, Summer Online
NUR 670. Basic Principles of Anesthesia II. 3 Credits.
The course continues the basic principles of anesthesia and covers a variety of basic concepts needed to begin to assess patients preoperatively for an anesthetic, care for them intraoperatively, and safely deliver them to the post-operative care unit. This continuation of the basic principles introductory course is offered in conjunction with the beginning of the clinical practicum. Students discuss and cover topics in anesthesia that they will be exposed to in the clinical area during their introduction. Time in the simulation lab is included.
Prerequisites: Take NUR 696.
Offered: Every year, Spring

NUR 670L. Basic Principles of Anesthesia II Lab. 2 Credits.
This course teaches the student hands on administration of regional and pain pain blocks using simulation and cadaver models. The lab complements the lectures given in NUR 670.
Prerequisites: Take NUR 696 NUR 672.
Corequisites: Take NUR 670.
Offered: Every year, Spring

NUR 671. Clinical Practicum I. 2 Credits.
Individual clinical practice arranged with clinical coordinator. All-day clinical practice, 4 days per week. The student follows the hours of CRNA practice at each clinical site.
Prerequisites: Take NUR 696.
Offered: Every year, Spring

NUR 672. Advanced Pharmacology II. 3 Credits.
This course is a continuation of Advanced Pharmacology and Basic Principles of Anesthesia I (NUR 696) and expands on the administration of many of the drugs used in the practice of anesthesia. Students practice the administration of blocks used in anesthesia using patient simulators before administration to patients in clinical practice. Students are introduced to the pharmacology and corresponding physiology pertinent to the delivery of anesthetic care for many adjuvant drugs. Drugs used in the treatment of many comorbid conditions and their effects on and with those used in anesthesia are covered. Additional adjunct drugs used for cardiopulmonary support and pain control also are covered.
Prerequisites: Take NUR 696.
Offered: Every year, Spring

NUR 673. Clinical Practicum II. 2 Credits.
Individual clinical practice is arranged with the clinical coordinator. All-day clinical practice continues four days per week. The student follows the hours of CRNA practice at each clinical site. A clinical conference is held once per week.
Prerequisites: Take NUR 671.
Offered: Every year, Summer

NUR 674. Professional Aspects of Nurse Anesthesia Practice I. 1 Credit.
This course covers practice issues that pertain to the nurse anesthetist. Topics include legal aspects and scope of practice, our national association and the structure and functions of the autonomous councils, quality assurance and the business of anesthesia. Students explore their role in the political arena, and have an opportunity in a seminar format to discuss the issues concerning health care policy and the role of the CRNA. Attendance at the AANA Midyear Assembly is required for the nurse anesthesia student to provide an opportunity to visit with legislators and lobby on Capitol Hill.
Offered: Every year, Spring

NUR 675. Clinical Practicum III. 2 Credits.
Individual clinical practice is arranged with the clinical coordinators. Students participate in full-day clinical practice, and follow the hours of CRNA practice at each clinical site. A clinical conference is held once per week.
Prerequisites: Take NUR 673.
Offered: Every year, Fall

NUR 676. Professional Aspects of Nurse Anesthesia Practice II. 1 Credit.
The class covers the importance of personal wellness and stress management for the nurse anesthesia student and the practicing CRNA. Students become familiar with integrated therapies and behaviors used to create wellness and balance. Multiple factors related to chemical dependence and substance abuse are studied. Participants also discuss the importance of cultural sensitivity and diversity in health care.
Offered: Every year, Fall

NUR 677. Clinical Practicum IV. 2 Credits.
Individual clinical practice is arranged with the clinical coordinator. All-day clinical practice continues four days per week. The student follows the hours of CRNA practice at each clinical site. A call component is included in the semester. A clinical conference is held once a week.
Prerequisites: Take NUR 675.
Offered: Every year, Spring

NUR 678. Professional Aspects of Nurse Anesthesia Practice III. 1 Credit.
This course discusses educational leadership as it pertains to the role of the clinical preceptor and educator. Topics include curriculum development, evaluation and the role of the clinical educator. At the completion of this course, students present their scholarly projects at a final assembly.
Offered: Every year, Spring

NUR 679. Clinical Practicum V. 2 Credits.
Individual clinical practice is arranged with the clinical coordinator. All-day clinical practice continues four days per week. The student follows the hours of CRNA practice at each clinical site. A call component is included in the semester. A clinical conference is held once a week.
Prerequisites: Take NUR 677.
Offered: Every year, Summer

NUR 680. Physics, Chemistry, Equipment and Technology for Nurse Anesthetists. 4 Credits.
This course includes an extensive study of key concepts pertaining to organic, biochemistry and physics as they relate to anesthesia. Topics include medical mathematics and conversion factors, the gas laws, biochemistry of fluids and electrolytes, acid-base and buffers systems, electrical circuits, reviews of organic chemistry including the functional groups and physical principles that are relevant. Equipment and technology used in anesthetic practice also are studied in this course. Students have an opportunity to utilize common anesthetic equipment in the laboratory setting.
Offered: Every year, Summer

NUR 681. Clinical Practicum VI. 2 Credits.
This course is a continuation of the advanced clinical practicum. A clinical conference is held each week.
Prerequisites: Take NUR 679.
Offered: Every year, Fall
NUR 682. Advanced Principles of Anesthesia I. 3 Credits. This course covers the administration and management of anesthesia to patients with special considerations. Anatomy and physiology that relate to the practice of anesthesia are discussed as well as other important areas requiring knowledge in the administration of anesthesia.
Prerequisites: Take NUR 681 or NUR 691.
Offered: Every year, Fall

NUR 683. Clinical Practicum VII. 2 Credits. This course is a continuation of the advanced clinical practicum. A clinical conference is held each week. Students present their scholarly projects at an assembly at the end of the semester.
Prerequisites: Take NUR 681.
Offered: Every year, Spring

NUR 684. Advanced Principles of Anesthesia II. 3 Credits. This course covers the fundamental concepts essential to clinical anesthesia practice in the obstetric and pediatric populations.
Prerequisites: Take NUR 682 or NUR 692.
Offered: Every year, Fall

NUR 685. Clinical Practicum for Post-Master’s I. 1 Credit. This is the first of the clinical components of the nurse anesthesia doctoral program for post-master’s CRNAs. Students select a specific topic in their chosen area of clinical focus. Clinical exploration of the selected topic is done with the guidance of their adviser. The student selects studies and readings to support the selected topic.
Offered: Every year, Fall

NUR 686. Advanced Principles of Anesthesia III. 3 Credits. The administration and management of cardiac anesthesia are covered in this course. Anatomy and physiology that relate to the practice of anesthesia for this specialty are studied as well as emergency events relating to cardiac anesthesia, its considerations and disease processes.
Prerequisites: Take NUR 682 NUR 684 NUR 670.
Offered: Every year, Spring

NUR 687. Clinical Practicum for Post-Master’s II. 1 Credit. This is the second of the clinical components of the nurse anesthesia doctoral program for post-master’s CRNAs. The students continue to work on their area of focus in the clinical arena. Clinical exploration and the formulation of an abstract and bibliography of this selected topic are done with guidance of their adviser.
Offered: Every year, Spring

NUR 688. Human Factors and Patient Safety. 3 Credits. This course examines issues related to human error and patient safety with an emphasis on crisis management. Students explore the theoretical basis of human error, patient safety and quality assurance in health care. This course introduces a systems approach to error investigation and analysis, and integrates concepts of teamwork, crisis management, simulation and monitoring systems in medical practice.
Offered: Every year, Fall

NUR 689. Clinical Practicum/Patient Safety Seminar for Post-Master’s III. 2 Credits. The students continue to work on their area of focus in the clinical arena. The students complete the rough draft of their work during this semester. Each student analyzes an anesthesia-related critical event by presenting a Journal Club and discussion.
Prerequisites: Take NUR 685 NUR 687 NUR 688.
Offered: Every year, Summer

NUR 690. Advanced Principles of Anesthesia IV. 2 Credits. This course covers more advanced practices in anesthesia and expands on previous advanced principles course work.
Prerequisites: Take NUR 686.
Offered: Every year, Summer

NUR 691. Clinical Practicum/Patient Safety Seminar for Post-Master’s IV. 2 Credits. This is the fourth of the clinical components of the nurse anesthesia doctoral program. Students complete their projects and submit for possible publication. The accompanying seminar focuses on areas in patient safety.
Prerequisites: Take NUR 689.
Offered: Fall Online

NUR 692. Clinical Case Study Presentation. 1 Credit. This course gives the students an opportunity to present clinical case study. Peer review and faculty review are used for assessment.
Offered: Every year, Spring

NUR 695. Anesthesia Seminar I. 2 Credits. Anesthesia Seminar I and II prepare the student to take the National Certification Exam (NCE). Students begin an extensive review of Basic Principles, Equipment and Technology, Basic and Advanced Principles, Pharmacology and Physiology in this first seminar. Practice exams are administered periodically and clinical scenarios are used to assess and challenge student knowledge and critical thinking. Students take the SEE (Self Evaluation Examination) exam at the end of this semester.
Prerequisites: Completion of all anesthesia core courses.
Offered: Every year, Fall

NUR 696. Advanced Pharmacology and Basic Principles of Anesthesia I. 4 Credits. The course precedes the anesthesia clinical practicum and covers a variety of basic concepts needed to begin to assess patients preoperatively for an anesthetic, care for them intra-operatively and safely deliver them to the post-operative care unit. An introduction to the principles of advanced pharmacology and the primary classes of agents utilized in anesthetic practice is included.
Offered: Every year, Fall

NUR 697. Anesthesia Seminar II. 2 Credits. This course is the second Anesthesia Seminar, which prepares the student to take the National Certification Exam (NCE). Students continue to take the SEE (Self Evaluation Examination) until a benchmark score is obtained. Students formulate a written plan of study for use during this semester. Each student reviews and implements the individualized plan with input from the adviser. Organized and systematic review of materials in the key anesthesia courses of the program occurs.
Prerequisites: Completion of all anesthesia core courses and NUR 695;
Offered: Every year, Spring

NUR 698. Human Physiology Seminar. 1 Credit. Students select a topic in human physiology for presentation to the group. The topic is selected from one of the systems studied in the Human Physiology course and must be approved by the professor. This provides the students with an opportunity to improve their public speaking skills and also to gather valuable information on physiology from other presenters.
Corequisites: Take PY 501.
Offered: Every year, Summer

NUR 699. Independent Study. 1-6 Credits. Offered: As needed
 Occupational Therapy (OT)  

OT 501F. Immersive Fieldwork Experience in Psychosocial and Mental Health Practice (Fieldwork Ila).  
This six- to seven-week fieldwork experience provides students with in-depth opportunities to integrate theory, research and best practice in psychosocial and/or mental health settings. The experience promotes clinical reasoning, reflective practice and professionalism while enhancing one's therapeutic use of self. Practice settings may include traditional mental health agencies, community-based programs and nontraditional sites that promote psychological and social factors for occupational engagement and well-being.  
Offered: Every year, Summer  

OT 501S. Fieldwork Seminar.  
This course runs concurrently with the mental health/psychosocial summer experience and is delivered in an online format. It is designed to enhance professional and clinical reasoning while promoting the integration of theory to practice. Students are encouraged to critique the system of care as it relates to best practice for an identified population.  
Offered: Every year, Summer  

OT 502. Pharmacology in Occupational Therapy Practice.  
This course addresses the pharmacokinetics, side effects and drug interactions of medications prescribed to clients who are commonly referred for occupational therapy services. The course emphasizes the role of the occupational therapist in medication management as a health maintenance activity and in monitoring the impact of drug therapy on the therapeutic process and occupational performance of clients.  
Offered: Every year, Summer  

OT 511. Administration and Management in Occupational Therapy.  
This class introduces students to the daily management functions of an occupational therapy department including planning, organizing, directing, controlling, and supervision of occupational therapy assistants and other department personnel. The course integrates students' knowledge of interventions with information related to the delivery of occupational therapy services. Topics include managed care, quality assurance, leadership, regulatory agencies, models of practice, ethics, and consultation. Students gain hands-on experience with budgeting, marketing, program evaluation, and ethical problem-solving in administration.  
Offered: Every year, Fall  

OT 522L. Biomechanical Interventions in Occupational Therapy.  
This lab provides students with "hands-on" learning experience and clinical reasoning in the safe and effective application of biomechanically-oriented interventions including physical agents and modalities, orthotic fitting and fabrication, and therapeutic exercise. Students are also introduced to prosthetics and the role of occupational therapy during pre-prosthetic and prosthetic training. Students apply clinical reasoning to identify the most appropriate biomechanical interventions based on the client's evaluation and socio-cultural factors to facilitate occupational performance. Prerequisite: Matriculation as an MOT student.  
Offered: Every year, Fall  

OT 531. Sensory Processing and Integration.  
This course provides an in-depth analysis of sensory processing and integration with a focus on clinical reasoning to understand and appreciate the impact of these processes on individuals, populations and community environments. Opportunities are provided to learn specific intervention strategies for individuals, as well as systems approach emphasizing the importance of educating the team of people who support these individuals in varying contexts, to facilitate functional participation and engagement in purposeful and productive activities. Prerequisite: Matriculation as an MOT student.  
Offered: Every year, Fall and Spring  

OT 531F. Sensory Processing and Integration Fieldwork.  
This structured fieldwork experience enables students to observe and analyze the impact of Ayres' Sensory Integration intervention. The settings utilized are equipped to provide clinical application of principles learned in the OT curriculum and shall be supervised by qualified personnel who specialize in sensory processing and integration. Prerequisite: Compliance with OT fieldwork requirements through MyRecordTracker.  
Offered: Every year, Fall and Spring  

OT 532. Neurorehabilitation in Occupational Therapy.  
This course provides a comprehensive overview of specialized interventions used by occupational therapy practitioners in neurorehabilitation. This course integrates the use of various theoretical models/frames of reference, current evidence and clinical/professional reasoning pertinent to the OT process in neurorehabilitation practice. Key concepts in interprofessional practice and health literacy are incorporated. Prerequisite: Matriculation as an MOT student.  
Offered: Every year, Fall and Spring  

OT 532F. Neurorehabilitation in Occupational Therapy Practice Fieldwork.  
This course provides a structured fieldwork in neuro-rehabilitative settings and enables the student to observe, participate in, and document clinical encounters with clients undergoing OT evaluation and/or intervention. Students also have an opportunity to observe and/or engage in inter- and intra-professional collaboration, patient/client education and application of evidence-based practice. Emphasis is on applying theory into practice and the development of professional identity. Prerequisite: Compliance with OT fieldwork requirements per MyRecord Tracker.  
Offered: Every year, Fall and Spring  

OT 532L. Neurorehabilitation in Occupational Therapy Lab.  
This course complements OT 532 Neurorehabilitation in OT Practice in providing a comprehensive overview of specialized interventions used by occupational therapy practitioners in neurorehabilitation. Students have the opportunity to apply methods and techniques according to various theoretical models/frames of reference and current evidence-based interventions. Prerequisite: Matriculation as an MOT student.  
Offered: Every year, Fall and Spring
OT 540. Special Topics in Occupational Therapy. 1.5-3 Credits. This course provides an opportunity for students to delve deeper into the specialized knowledge of the profession with evidence-based, occupation-centered practice as its core subject. Students further explore the specialized roles of the occupational therapist beyond that of a direct provider of skilled services, such as organizational/community leader, educator, case manager, entrepreneur and consultant at the systems level. In addition, students learn various modes of care delivery and systems of care including but not limited to tele-health, community building/development and train-the-trainer; they also evaluate the outcomes of such modes.
Offered: Every year, Spring

OT 541. Assistive Technology in Occupational Therapy. 2 Credits. This course provides students with exposure to advanced intervention techniques related to assistive technology in occupational therapy. The course focuses on application of assistive technology across the lifespan, and thus emphasizes use of both interventions in a variety of practice contexts and practice settings. Since technology options change rapidly, emphasis is on the clinical reasoning process used to select and evaluate interventions in rehabilitation, home, work, leisure and community technology-related practice areas. Prerequisite: Matriculation as an MOT student.
Offered: Every year, Fall

OT 541L. Assistive Technology in Occupational Therapy Lab. 1 Credit. This lab course provides students with hands-on experience in advanced intervention techniques related to assistive technology in occupational therapy. The course focuses on application of assistive technology across the lifespan, and thus emphasizes use of both interventions in a variety of practice contexts and practice settings. Since technology options change rapidly, emphasis is on the clinical reasoning process used to select and evaluate interventions in rehabilitation, home, work, leisure and community technology-related practice areas. Prerequisite: Matriculation as an MOT student.
Offered: Every year, Fall

OT 542. Work and Ergonomics. 3 Credits. This course focuses on the occupation of work applied across the lifespan and to various practice contexts and worker challenges. The course addresses topics related to the occupation of work, including employment acquisition, job performance, volunteerism, and retirement. Work tasks and work demands are analyzed relative to physical, cognitive, social, organizational, and environmental factors that impact job performance. Modifications that optimize worker functioning are examined as prevention and as rehabilitation. Prerequisite: Matriculation as an MOT student
Offered: Every year, Spring

OT 550. OT Research Methods. 4 Credits. This course addresses the importance of research in the practice of occupational therapy. The course examines the research theories and methods in occupational therapy practice. Students participate in designing and implementing entry-level research studies as well as analyzing and interpreting the professional literature. Students formulate the proposal for their spring capstone project.
Offered: Every year, Fall

OT 556. Professional Development. 3 Credits. This distance learning course focuses on the current issues related to the roles of the student transitioning to professional. The course emphasizes linking theory to practice, self-analysis and reflection upon academic experience, and relating those to different facets of clinical and professional reasoning as a funding mechanism in practice. Continued professional growth through the development of understanding of personal and professional responsibilities as a practicing therapist and a commitment to lifelong learning and professional advocacy also are addressed. Grant writing is included.
Offered: Every year, Spring

OT 555. Integrative Case Studies. 2 Credits. This course explores individual, group and population case studies of clients in occupational therapy. Students analyze each case using clinical reasoning, qualitative research strategies, frames of reference and best practices to develop integrative evaluation and intervention skills.
Offered: Every year, Spring

OT 570. Capstone Graduate Projects. 3 Credits. This capstone course is a culminating experience in the occupational therapy curriculum, which integrates all course-based material and fieldwork experiences with practical application. Students design and execute a research or creative project that is relevant to current and emerging practice areas in occupational therapy. Students gain experience in project management, critical analysis and professional presentations.
Offered: Every year, Spring

OT 580. Fieldwork Level IIA. 6 Credits. These supervised experiences provide the student with the opportunity to apply theory and clinical reasoning skills to the occupational therapy evaluation and intervention process for clients across the life span and in a variety of life environments. Students must abide by all fieldwork policies as listed in the program manual. Fieldwork is 12 weeks long.
Offered: Every year, Summer

OT 581. Fieldwork Level IIB. 6 Credits. These supervised experiences provide the student with the opportunity to apply theory and clinical reasoning skills to the occupational therapy evaluation and intervention process for clients across the life span and in a variety of life environments. Students must abide by all fieldwork policies as listed in the program manual. Fieldwork is 12 weeks long.
Offered: Every year, Fall

OT 615. Critical Writing I. 3 Credits. This course is the first in a sequence of courses focusing on scholarly reading and writing. Students investigate a specific area of interest, describe best practices as supported by evidence and theory and learn how to conduct a peer review of writing.
Offered: Every year, Spring Online

OT 616. Self Directed Study in Clinical Practice. 3 Credits. This self-directed course focuses on each individual student’s goals and objectives within an area of specialty practice. Students create a proposal and learning contract with objectives, methods and timelines to meet individualized learning goals toward certifications or in-depth learning of a particular topic. The purpose of this course is to work toward individualized professional development goals.
Offered: Every year, Spring Online
OT 620. Foundations in Teaching and Learning I. 3 Credits.
This course is the first in a series of courses focusing on advanced topics in teaching and learning. Students explore various theoretical frameworks regarding learning and the relationship between learning theory and occupational therapy. Students work to develop the ability to incorporate learning theory into their educational practice.
Offered: Every year, Spring Online

OT 621. Creating Effective Learning Environments and Experiences. 3 Credits.
This course is the second course in the series of courses focusing on advanced topics in teaching and learning. Building upon theoretical foundations explored in OT 620 Foundations in Teaching and Learning I, students explore various educational models and tools to enhance teaching and utilize design steps to develop professional, educational presentations.
Prerequisites: Take OT 620.
Offered: Every year, Summer Online

OT 625. Special Topics in School-Based Practice I. 3 Credits.
This course is the first in a series of courses focusing on advanced topics in school-based practice. Students critique existing scholarship and professional documents regarding best practices in school-based practice, and identify and critique existing interventions utilized in school-based practice and their efficacy. Topics covered include legislations, assessment, intervention and whole school programming.
Offered: Every year, Spring Online

OT 626. Special Topics in School-Based Practice II. 3 Credits.
This course is the second in a series of courses focusing on advanced topics in school-based practice. Students build upon work completed as part of OT 625 Special Topics in School-Based Practice I to develop a model of practice/intervention addressing "best practice" for practitioners working in school-based practice.
Prerequisites: Take OT 625.
Offered: Every year, Summer Online

OT 630. CAGS Hand Therapy I. 3 Credits.
This course is the first in a series of courses focusing on advanced topics in hand therapy. Students critique existing scholarship and professional documents regarding best practice in hand therapy practice, and identify and critique existing assessments and interventions utilized in hand therapy practice.
Offered: Every year, Spring Online

OT 631. CAGS Hand Therapy II. 3 Credits.
This course is the second in a series of hand therapy courses. Building on the first course, students continue to explore best practices and evidence and have the opportunity to synthesize their knowledge through a critique of clinical protocols and practice guidelines. The course culminates with a plan of action to further advance one's professional development.
Offered: Every year, Summer Online

OT 635. Scholarly Use of Evidence in Writing. 3 Credits.
This course is the second in a sequence of courses focusing on scholarly reading and writing. Emphasis on determining proper use of evidence occurs throughout the course. Synthesis of scholarly evidence and literature culminates in the creation of a manuscript for submission to a professional trade magazine or journal.
Prerequisites: Take OT 615.
Offered: Every year, Summer Online

OT 640. Directed Study in Evidence-Based Practice. 3 Credits.
Students learn the steps of the evidence-based practice continuum. Each student follows the steps using actual practice case studies from his/her individual practice sites and presents the responses to each step in the process to discover evidence to guide the practice case questions. Peer interaction and feedback is critical to the realistic development of evidence to guide practice decisions. A major assignment is to have each student participate in the writing of a systematic review or an evidence-based practice brief for the profession. Students complete a needs assessment of a particular site or practice area as well.
Prerequisites: Take OT 654.
Offered: Every year, Spring

OT 650. Application of Theory and Exploration of Occupation. 3 Credits.
This course explores occupation—the central construct of the profession, and occupational science as a disciplinary knowledge base of the profession. Students examine a variety of theories relevant to occupational therapy and analyze their practice using critical theory.
Offered: Every year, Spring

OT 651. Systems. 3 Credits.
Knowledge of health care delivery in the U.S. is fundamental to providing occupational therapy services. A key element to providing relevant health care services is an understanding of the broader systems that influence and drive delivery models. This course addresses the general systems model as applied to the delivery of health care services. System components are addressed including the resources, the internal processes, external influences, measureable outcomes and stakeholders in service delivery systems. The course examines the range of service delivery models in OT including the traditional medical model, school-based, community, educational, home health, hospice and telehealth, among others. The course prepares students to analyze the key components of delivery system and determine how OT services are optimized in specific models.
Offered: Every year, Fall

OT 652. Doctoral Seminar. 1 Credit.
Students develop learning strategies for doctoral work and explore contemporary leadership theory and create a professional development plan for doctoral work with goals and objectives related to becoming an agent of change.
Offered: Every year, Fall

OT 653. Policy/Ethics. 2 Credits.
The future leaders of the profession need an understanding of the political and legal policies impacting occupational therapy, as well as the ethics involved in decision making. Students explore the role of the occupational therapist in advocacy as well as the concepts of social justice. The impact of these policies and decisions are reviewed in relationship to all settings and the occupational as well as psychosocial well-being of the individual client and populations of clients.
Offered: Every year, Fall

OT 654. Critical Inquiry of Scholarship. 3 Credits.
This course is the first of a series of courses focusing on scholarship in the profession. Emphasis is placed on understanding qualitative and quantitative research methods and building a solid foundation needed to carry out a scholarly project. This course covers the scholarship process, with a focus on developing a question for scholarly exploration, ways of answering questions and approaches to analyzing results.
Offered: Every year, Fall
OT 655. Professional Seminar. 3 Credits.
This course integrates prior learning into the discussion of how to become an "agent of change" within systems. Topics include advocacy, leadership and leadership theories, group dynamics and change management. Student integrate this knowledge through the development of a program proposal and evaluation.
Offered: Every year, Summer

OT 656. Critical Inquiry of Scholarship II. 4 Credits.
This course is the second of a series of courses focusing on scholarship in the profession. Emphasis is placed on developing a proposal for a scholarly project. Drawing on the content of OT 654 students develop the background to the project and problem statement, questions guiding the project informed by theory, and write a design a scholarly proposal in regards to ethical policies and procedures necessary to conduct research.
Prerequisites: Take OT 640 OT 654.
Offered: Every year, Summer

OT 660. Seminar: Innovations and Emerging Issues in Children and Youth Care Continuum. 3 Credits.
The OT seminars OT 660 and OT 662 present core content that is the same for both courses during weeks one and two. The focus of the core weeks is on environmental scanning for evidence of change and locating evidence in the literature for that change. Weeks four through seven focus on the individual theme as selected by each student.
Offered: Every year, Fall

OT 662. Seminar: Innovations and Emerging Issues in the Adult Health Care Continuum. 3 Credits.
The OT seminars OT 660 and OT 662 present core content that is the same for both courses during weeks one and two. The focus of the core weeks is on environmental scanning for evidence of change and locating evidence in the literature for that change. Weeks four through seven focus on the individual theme as selected by each student.
Offered: Every year, Fall

OT 667. Leadership in Higher Education. 3 Credits.
Students analyze leadership styles as they relate to supervision in both public and private sectors. The course includes a review of skills required to be an entrepreneur, own a practice and navigate the policies required of a business.
Offered: Every year, Spring

OT 670. Leadership in Program Development/Business. 3 Credits.
Students analyze leadership styles as they relate to the educational setting for those interested in academia. The course also includes a discussion of transitions from practice to the educational setting.

OT 680. Capstone I. 2 Credits.
This capstone course is a culminating experience in the occupational therapy curriculum, which integrates all core material. Students design and execute a scholarly or creative project that is relevant to current and emerging practice areas in occupational therapy. Students gain experience in project management, critical analysis and professional presentations.
Offered: Every year, Fall

OT 681. Capstone II. 2 Credits.
This capstone course is a culminating experience in the occupational therapy curriculum, which integrates all core material. Students design and execute a scholarly or creative project that is relevant to current and emerging practice areas in occupational therapy. Students gain experience in project management, critical analysis and professional presentations.
Offered: Every year, Spring

OT 699. OT Independent Study. 1-6 Credits.
Offered: As needed

Organizational Leadership (OL)

OL 601. Foundations of Organizational Leadership. 3 Credits.
This course explores foundational concepts of modern leadership and reviews traditional leadership theory. Contemporary issues in leadership provide opportunity for practical application and personal reflection.
Offered: Every year, All

OL 610. The Power and Politics of Communication. 3 Credits.
This course reviews effective communication techniques at the corporate and individual levels. The study of power and politics of communication includes ethical, cultural and contemporary concepts.
Prerequisites: Take OL 601.
Offered: Every year, All

OL 615. Leadership Across Boundaries. 3 Credits.
This course covers the challenges of interacting, managing and leading across cultural differences and national boundaries. The focus is on coordinating and sustaining cooperative activities across various types of boundaries, including cultural, generational, gender, ethnic and regional. Students explore domestic and international differences as well as evaluate the implications of emerging global actors on business practices.
Prerequisites: Take OL 601.
Offered: Every year, Fall and Spring

OL 630. Performance Management. 3 Credits.
This course focuses on the theoretical and practical application of performance management systems. The importance of an effective performance management system is examined. An effective performance management system includes a continuous process of identifying factors and integrated approaches that align individual and team competencies with organizational goals. Students gain a conceptual understanding of key factors involved in assessing performance management systems in small and large organizations.
Prerequisites: Take OL 601.
Offered: Every year, Spring and Summer

OL 640. Project Management. 3 Credits.
This course goes beyond basic project management (PM). Students learn key PM techniques for leading complex projects and programs and assessing performance. Experiential application of these skills allows students to produce business/organizational results that require collaborative relationships and critical thinking. Students can receive credit for only one of the following courses: MG 603, OL 640, BAN 669. Students with PMP certification should discuss with their adviser.
Offered: Every year, Fall and Summer

OL 650. Leading Organizational Change. 3 Credits.
This course examines theoretical concepts and practical techniques of organizational design and change. Students gain a conceptual understanding of leadership skills required for organizational change. The study of leading organizational change includes factors relating to the need for organizational change and the strategy-structure relationship to organizational design with a focus on organizational effectiveness.
Prerequisites: Take OL 601.
Offered: Every year, Fall and Spring
OL 662. Ethics and Governance. 3 Credits.
This course uses contemporary examples and theoretical perspectives to assess the critical dimensions of ethics in leadership, and explores responsible corporate governance linked to organizational leadership.
Prerequisites: Take OL 601.
Offered: Every year, Spring and Summer

OL 681. Leadership in Human Resources. 3 Credits.
In this course, students are introduced to the principles of human resource management. The course balances theoretical and practical approaches with emphasis on the four primary HRM functions of recruiting, selection, performance management and governance. Other areas covered include compensation and benefits as well as challenges of international HRM.
Offered: Every year

OL 682. Employment Law for the Non-Lawyer. 3 Credits.
This course introduces the non-legal professional to laws that govern workplace personnel. Students are provided with an overview of legal issues affecting human resource management. The primary concentration is on the practical application of employment law on individuals in organizations and its impact on HR decisions.
Offered: Every year, Summer

OL 683. Employee Development Strategies for Organizational Leaders. 3 Credits.
This course provides students with strategic approaches to developing human talent. Students gain knowledge in the area of training, performance development and talent management principles. Focus is placed on how to analyze performance problems as well as how to apply the principles of learning to the individual, the team and organization development.
Offered: Every year

OL 686. Leading Public Service Organizations. 3 Credits.
This course examines the challenges and opportunities of public sector leadership. Course participants examine the chief executive's role as a policy maker; dealing with other community leaders and the media; discipline and ethical conduct, and leading in unionized environments. Critical leadership competencies including authenticity, trust building, exercise of power, organizational behavior, and learning to influence the work environment are also examined.
Offered: Every year

OL 687. Strategic Planning for Public Service Organizations. 3 Credits.
This course develops skills in systematic planning within a variety of public sector organizational settings. Strategic goal setting, mission-driven plans, managing constrained resources and monitoring and modifying strategic plans in a dynamic environment are emphasized. Participants explore the processes of advanced planning through the analysis of an organization's strategic plan.
Offered: Every year

OL 690. Leadership Consulting Capstone. 3 Credits.
This course integrates the knowledge and skills gained throughout the program. The course focuses on the design and implementation of a consulting case/project, including a comprehensive analysis of organizational issues and proposal of appropriate recommendations and implementation plans. The result is a professionally written consulting paper and presentation. The course is ideally taken last in the program.
Prerequisites: Take OL 601 OL 610 OL 615 OL 630 OL 640 OL 650 OL 662.
Offered: Every year, All

Pathology (PA)

PA 502. Medical Terminology: Advanced. 2 Credits.
This course is intended for students enrolled in the pathologists' assistant program. Students study the etymology of medical and surgical terms with an emphasis on the principles of word analysis, construction and evolution. The course includes a review of anatomy and abstraction of current published case studies.
Offered: Every year, Summer

PA 511. Human Microscopic Anatomy. 4 Credits.
This course is intended for students enrolled in the pathologists' assistant program. Human anatomy at the light microscopic level is explored through a general and systemic approach using a lecture-lab combination. Students are introduced to primary tissues and their cellular components followed by system (organ) investigation morphologically that uses the light microscope emphasizing pattern recognition as the mechanism employed for tissue identification.
Offered: Every year, Fall

PA 512. Human Anatomy. 4 Credits.
This course is intended for students enrolled in the pathologists’ assistant program. This course covers dissection of the human body with particular attention to the morphological relationships of individual organ systems. Emphasis is placed on internal anatomy as a major facet of this instruction that is designed for eventual autopsy evisceration and subsequent dissection.
Offered: Every year, Summer

PA 512L. Human Anatomy Lab. 0 Credits.
Lab to accompany PA 512.
Offered: Every year, Summer

PA 513. Basic Human Pathology I. 3 Credits.
This course is intended for students enrolled in the pathologists’ assistant program. This series of lectures utilizes slides of gross and microscopic pathology starting with a general introduction to pathology covering inflammation and neoplasia, and then progressing to pathology by the systems such as cardiovascular, endocrine and gastrointestinal systems.
Offered: Every year, Fall

PA 514. Basic Human Pathology II. 3 Credits.
This course is intended for students enrolled in the pathologists’ assistant program. This series of lectures utilizes slides of gross and microscopic pathology of specific areas of disease in a systemic approach including such specialty areas as dermatologic, perinatal, pediatric and forensic pathology as well as the genitourinary, musculoskeletal, respiratory and neuropathology systems.
Offered: Every year, Spring

PA 515. Human Physiology. 4 Credits.
This course is intended for students enrolled in the pathologists’ assistant program. Various aspects of human physiology are examined, with emphasis on the physiologic and biochemical function. The fundamental functional principles for general and systematic organ systems are covered.
Offered: Every year, Summer

PA 516. Clinical Pathology. 4 Credits.
This course is intended for students enrolled in the pathologists’ assistant program. Clinical relationships to disease are examined, highlighting such topics as hematology, chemistry, toxicology, serology, urinalysis, blood banking and cytology. Basic techniques and theoretical applications from a case history medical approach are emphasized.
Offered: Every year, Spring
PA 517. Applied Anatomic Pathology.  4 Credits.  This course is intended for students enrolled in the pathologists’ assistant program. Basic principles of clinical history taking, physical examinations and general medical terms and symbols are studied. Emphasis is on autopsy and surgical techniques of dissection, organ system dissection through lectures, films, slides and practical exposure.

Offered: Every year, Spring

PA 518. Laboratory Management.  3 Credits.  This course is intended for students enrolled in the pathologists’ assistant program. The organization and function of an anatomic pathology laboratory is investigated to include ordering supplies, money management, computerization, laboratory safety, organization compliance (JACHO, CAP, OSHA) and quality assurance.

Offered: Every year, Summer

PA 520. Autopsy Pathology I.  6 Credits.  This course is only for second-year pathologists’ assistant students. This three-semester rotational, practical course on the techniques of autopsy dissection includes summarization of clinical histories and gross autopsy findings. The 12-month rotation involves several different hospitals in both community and university settings.

Offered: Every year, Fall

PA 521. Autopsy Pathology II.  6 Credits.  This course is only for second-year pathologists’ assistant students. This three-semester rotational, practical course on the techniques of autopsy dissection includes summarization of clinical histories and gross autopsy findings. The 12-month rotation involves several different hospitals in both community and university settings.

Offered: Every year, Fall

PA 522. Autopsy Pathology III.  6 Credits.  This course is only for second-year pathologists’ assistant students. This three-semester rotational, practical course on the techniques of autopsy dissection includes summarization of clinical histories and gross autopsy findings. The 12-month rotation involves several different hospitals in both community and university settings.

Offered: Every year, Spring

PA 523. Surgical Pathology I.  6 Credits.  This course is only for second-year pathologists’ assistant students. This is a three-semester inclusive practical course in methods of gross tissue description, dissection and preparation, fixation and storage of surgical specimens for light, immuno-fluorescent, immunochemical, frozen and electron microscopy. The 12-month rotation involves several different hospitals in both community and university settings.

Offered: Every year, Summer

PA 524. Surgical Pathology II.  6 Credits.  This course is only for second-year pathologists’ assistant students. This is a three-semester inclusive practical course in methods of gross tissue description, dissection and preparation, fixation and storage of surgical specimens for light, immuno-fluorescent, immunochemical, frozen and electron microscopy. The 12-month rotation involves several different hospitals in both community and university settings.

Offered: Every year, Fall

PA 525. Surgical Pathology III.  6 Credits.  This course is only for second-year pathologists’ assistant students. This three-semester inclusive practical course covers methods of gross tissue description, dissection and preparation, fixation and storage of surgical specimens for light, immuno-fluorescent, immunochemical, frozen and electron microscopy. The 12-month rotation involves several different hospitals in both community and university settings.

Offered: Every year, Spring

PA 526. Biomedical Photography.  4 Credits.  This course is only for second-year pathologists’ assistant students. This is a team-taught course designed to give the pathologists’ assistant student a basic background leading to practical application of photographic techniques used in the anatomic pathology laboratory. It also includes an introduction to the principles of imaging radiography. The course is divided into three parts over two summer-school semesters: basic photographic principles and technique; the theoretical and practical aspects of photomacrography and photomicrography as they are applied to anatomic specimens and imaging radiology.

Offered: Every year, Summer

PA 535. Disease Mechanisms.  4 Credits.  This course is only for second-year pathologists’ assistant students. This course investigates how the normal physiology of the human body is altered in disease states. The mechanisms by which diseases become established, cause damage and alter organ system function are established. Natural body responses and therapeutic measures are examined for their mode of action, side effects and after affects.

Offered: Every year, Fall

Perfusion (PR)

PR 500. Theoretical Foundations of Cardiovascular Perfusion.  2 Credits.  This course exposes students to role expectations, practice, ethics and professionalism. Students gain an appreciation of the history of key individuals and progress through discoveries that influenced the development of current practice in cardiothoracic surgery and extracorporeal circulation. Students become familiar with the role of organizations that impact their field, including those responsible for overseeing national certification exams and continuing education programs. A minimum grade of B is required to progress.

Offered: Every year, Fall

PR 502. Systems Anatomy and Physiology I.  3 Credits.  This course examines selected organ systems 503 procedures performed by the perfusionist. Students study the structure and function of the cardiovascular, lymphatic, immune and pulmonary systems. Emphasis is placed on group discussion and the application of knowledge to solving problems that arise in clinical situations. A minimum grade of B is required to progress.

Offered: Every year, Fall

PR 503. Systems Anatomy and Physiology II.  3 Credits.  This course examines selected organ systems pertinent to cardiopulmonary bypass and related procedures performed by the perfusionist. Students study the structure and function of the nervous, hepatic, renal and endocrine systems. Emphasis is placed on group discussion and application of knowledge to solving problems that arise in clinical situations. A minimum grade of B is required to progress.

Prerequisites: Take PR 500 PR 502 PA 535 PR 508 PR 516.

Offered: Every year, Spring
PR 506. Pharmacologic Intervention in Cardiovascular Perfusion. 4 Credits.
This course is an intensive study of pharmacokinetics, pharmacodynamics, mechanism of action, indications and contraindications of drugs administered to the patient undergoing cardiopulmonary bypass. Cardiovascular drugs, anticoagulants and anesthetic agents administered by the perfusionist are emphasized. Students also become familiar with many drugs used to treat other disease states that may be taken by patients with significant comorbidities. A minimum grade of B is required to progress.
Prerequisites: Take PR 500 PR 502 PA 535 PR 508 PR 516.
Offered: Every year, Spring

PR 508. Extracorporeal Circuity and Laboratory I. 1 Credit.
Students receive orientation in both the laboratory and the cardiac operating room to equipment operation and techniques applicable to providing extracorporeal circulation during cardiac surgical procedures. Emphasis is placed on developing student skills in researching best practice methods as found in the medical literature. Competent operation of equipment, including the heart-lung machine, ventricular assist devices, intra-aortic balloon counterpump, and autologous blood recovery devices must be demonstrated. A minimum grade of B is required to progress.
Offered: Every year, Fall

PR 509. Extracorporeal Circuity and Lab II. 1 Credit.
This intensive study of the appropriate procedures for providing extracorporeal circulation for a variety of purposes includes operation of specialized medical devices, quality control and troubleshooting techniques. Intra-aortic balloon counterpump, autologous blood recovery and ventricular assist devices are covered. Students are expected to search recent medical publications and generate discussion in an attempt to resolve controversial issues pertaining to best practice. A minimum grade of B is required to progress.
Prerequisites: Take PR 500 PR 502 PA 535 PR 508 PR 516.
Offered: Every year, Fall

PR 510. Surgical Techniques. 2 Credits.
This course examines the cardiothoracic surgical procedures that require extracorporeal circulatory support. Students develop an understanding of the techniques used in numerous open-heart procedures performed on adults and children. Special application of extracorporeal circulation in rare surgical procedures is included. Students are required to view a number of these procedures in the operating rooms of affiliated institutions to increase their understanding of the skills required to perform these operations. A minimum grade of B is required to progress.
Prerequisites: Take PR 500 PR 502 PA 535 PR 508 PR 516.
Offered: Every year, Spring

PR 512. Pediatric Perfusion. 4 Credits.
This course presents a study of the embryological formation of the cardiopulmonary system, a description of congenital cardiopulmonary anomalies and the application of perfusion techniques during corrective surgical procedures. Students work both independently and in groups to evaluate the results of clinical studies that contribute to current thinking and practice in the specialized area of pediatric perfusion. A minimum grade of B is required to progress.
Prerequisites: Take PR 500 PR 502 PA 535 PR 508 PR 516.
Offered: Every year, Spring

PR 514. Special Topics in Cardiovascular Perfusion. 2 Credits.
This course explores less common and newly introduced procedures for perfusionists, including the use of investigational drugs that modify the biochemical impact of adult and infant extracorporeal membrane oxygenation, extracorporeal carbon dioxide removal, total artificial hearts and newly introduced ventricular assist devices. Old standards of practice are reexamined in the light of new evidence. A minimum grade of B is required to progress.
Prerequisites: Take PR 503 PR 506 PR 509 PR 510 PR 512.
Offered: Every year, Spring

PR 516. Physiologic Monitoring. 4 Credits.
This course covers monitoring of the physiological impact of extracorporeal circulation, administration of drugs, blood products and anesthetic agents on the patient undergoing surgery requiring cardiopulmonary bypass. Monitoring of intravascular arterial and venous pressures in the systemic and pulmonary circulations, cardiac output measurement are covered. An emphasis is placed on 12-lead electrocardiogram, blood anticoagulation measurement, analysis and interpretation of arterial and venous blood gases, fluid and electrolyte balance and cerebral oxygen saturation. After masterining the basic concepts of each section, students work through case-study scenarios to apply theory to practice. Electronic simulators are used. A minimum grade of B is required to progress.
Offered: Every year, Fall

PR 520. Research Methods in Cardiovascular Perfusion. 2 Credits.
This course explores ethical issues in medical research, provides an overview of grant proposal writing and includes development of a research project, data collection and analysis using statistical programs for computers. Students develop a presentation and employ various computer presentation techniques to present student project data. Students work individually on the project and require the approval of the instructor to pursue a particular topic. A minimum grade of B is required to progress.
Prerequisites: Take PR 503 PR 506 PR 509 PR 510 PR 512.
Offered: Every year, Summer

PR 522. Research Methods in CV Perfusion II. 2 Credits.
This course is a continuation of PR 520. It provides the perfusion student with an introduction to current areas of research being conducted in the open-heart field, scientific principles of experimental design and analysis and methods of reporting results to the scientific community. This course enables students to complete the collection/analysis of data that was begun in PR 520, prepare the final written report and present the results of the research project to the perfusion community. A minimum grade of B is required to progress.
Prerequisites: Take PR 520.
Offered: Every year, Fall

PR 600. Clinical Practicum I. 5 Credits.
This course provides experience in the areas of heart-lung bypass for adult, pediatric and infants, including long-term supportive extracorporeal circulation, adjunctive techniques and patient monitoring. Students focus on hypothermia, pulsatile devices, and monitor hemodynamics, blood gases, bubble detection, level sensing, temperature, electrophysiology, coagulation potential and fluid electrolytes. Special applications also are covered. Students must successfully complete a sufficient variety and number of perfusions to satisfy recommendations of the American Board of Cardiovascular Perfusion. Students meet as a group every six weeks, and individually present a patient case study at grand rounds. A minimum grade of B is required to pass.
Prerequisites: Take PR 503 PR 506 PR 509 PR 510 PR 512.
Offered: Every year, Summer
PR 602. Clinical Practicum II. 5 Credits.
This course provides experience in the areas of heart-lung bypass for adult, pediatric and infants, including long-term supportive extracorporeal circulation, adjunctive techniques and patient monitoring. Students focus on hypothermia, pulsatile devices and monitor hemodynamics, blood gases, bubble detection, level sensing, temperature, electrophysiology, coagulation potential and fluid electrolytes. Special applications also are covered. Students must successfully complete a sufficient variety and number of perfusions to satisfy recommendations of the American Board of Cardiovascular Perfusion. Students meet as a group every six weeks, and individually present a patient case study at grand rounds. A minimum grade of B is required to progress.
Prerequisites: Take PR 600.
Offered: Every year, Fall

PR 604. Clinical Practicum III. 5 Credits.
This course provides experience in the areas of heart-lung bypass for adult, pediatric and infants, including long-term supportive extracorporeal circulation, adjunctive techniques and patient monitoring. Students focus on hypothermia, pulsatile perfusion devices and monitor hemodynamics, blood gases, bubble detection, level sensing, temperature, electrophysiology, coagulation potential and fluid electrolytes. Special applications also are covered. Students must successfully complete a sufficient variety and number of perfusions to satisfy recommendations of the American Board of Cardiovascular Perfusion. A final comprehensive exam covering all aspects of the program and clinical practice is taken at the end of this course. A successful performance on the examination is required to complete the program. A minimum grade of B is required to progress.
Prerequisites: Take PR 602.
Offered: Every year, Spring

Physical Therapy (PT)

PT 502. Introduction to Clinical Decision Making. 3 Credits.
This course integrates information from previous coursework through reinforcement of the patient/client management model. The ICF model is introduced and is used as an organizing framework. This interactive case-based course guides students through a series of video, standardized and real-life patient scenarios. Principles of evidence-based practice are introduced. This case-based learning experience allows the student to gain a basic understanding of patient management in preparation for clinical coursework.
Offered: Every year, Spring

PT 503L. Physical Therapy Process I Lab. 2 Credits.
This course introduces students to the theory and practice of foundational physical therapy skills, such as body mechanics, functional mobility training, measurement of vital signs, goniometry and muscle testing of the upper extremity. Students learn appropriate use of medical terminology, and are introduced to taking a patient history and documentation.
Offered: Every year, Fall

PT 504L. Physical Therapy Process II Lab. 4 Credits.
This course continues to develop foundational physical therapy skills, such as goniometry and manual muscle testing for the spine and lower extremities. Basic tests and measures for pain, posture, sensation, skin integrity and gait are introduced. Students also learn appropriate application of thermal modalities.
Offered: Every year, Spring

PT 505. Kinesiology I. 2 Credits.
This course introduces the basic principles of human movement. Forces and torques in static clinical free body diagrams are studied. Numerous problem-solving processes and skills are developed throughout the semester. The student learns to identify different muscle interactions and combinations. Students also study movement and movement patterns of the upper extremity, using an EMG recording system. Course includes a lab component.
Prerequisites: Take MA 141.
Offered: Every year, Fall

PT 505L. Kinesiology I Lab. 1 Credit.
Lab to accompany PT 505.
Offered: Every year, Fall

PT 506. Kinesiology II. 2 Credits.
Students study movement and movement patterns of the lower extremity and trunk, including normal gait. Both the kinematics and the kinetics at the hip, knee and ankle are emphasized, especially in relationship to the closed kinetic chain. Dynamic motion is introduced and becomes the central focus for this semester. Course includes a lab component.
Prerequisites: Take PT 505.
Offered: Every year, Spring

PT 507. Kinesiology II. 2 Credits.
Kinesiology II introduces the foundational principles of biomechanics with special emphasis on applications to the lower extremities. The course emphasizes joint structure and function of the lower extremity as well as the spine. Forces and torques in static clinical free body diagrams are expanded and dynamic motion is studied. Students are taught hands-on clinical palpation techniques to enhance understanding of muscle function and joint mechanics.
Corequisites: Take PT 507L.
Offered: Every year, Spring

PT 507L. Kinesiology II Lab. 1 Credit.
Lab to accompany PT 507.
Corequisites: Take PT 507.
Offered: Every year, Spring

PT 509. Clinical Decision Making I. 2 Credits.
This course is designed to integrate information from previous academic and clinical experiences. The APTA model of physical therapist practice, evidence informed practice, and the ICF model provide foundational frameworks to guide clinical decision making. An interactive, case-based approach is used to develop problem solving, and reinforce the principles of documentation.
Offered: Every year, Spring

PT 512. Human Anatomy I. 3 Credits.
This course presents the anatomical structures of the upper extremity, back, head and neck through lecture and human donor dissection experiences. Students analyze the relationship between structures, function and application to human movement. Clinical correlations between anatomy and pathology provide a foundation for clinical decision making. This course emphasizes collaboration in an active learning environment. Course includes a lab component.
Prerequisites: Take BIO 211 BIO 212.
Offered: Every year, Fall

PT 512L. Human Anatomy Lab. 1 Credit.
Lab to accompany PT 512.
Offered: Every year, Fall
PT 513. Human Anatomy II. 2 Credits.
This course presents the anatomical structures of the pelvis, lower extremity and body cavities through lecture and human donor dissection experiences. Students analyze the relationship between structures, function and application to human movement. Clinical correlations between anatomy and pathology provide a foundation for clinical decision making. This course emphasizes collaboration in an active learning environment. Course includes a lab component.
Prerequisites: Take PT 512.
Offered: Every year, Spring

PT 513L. Human Anatomy II Lab. 1 Credit.
Lab to accompany PT 513.
Offered: Every year, Spring

PT 514. Neuroanatomy I. 2 Credits.
This course presents the gross anatomy and development of the central nervous system. Major structures and landmarks within each major brain vesicle and spinal cord are covered.
Prerequisites: Take BIO 211 BIO 212.
Offered: Every year, Fall

PT 515. Neuroanatomy II. 2 Credits.
This course deals with the function of the systems and structures covered in PT 514 including major efferent and afferent pathways. Emphasis is placed on the motor control mechanisms for posture and movement and their involvement in common neuropathologies treated by a physical therapist.
Prerequisites: Take PT 514.
Offered: Every year, Spring

PT 516. Clinical Decision Making II. 1 Credit.
This case-based course provides students with an opportunity to integrate information from previous academic and clinical experiences. Using the ICF model, students reflect on in-class cases, standardized patient experiences and integrated clinical experiences to reinforce integration of multiple systems in a patient/client management model. These experiences and a cumulative practical assist students as they prepare for their first full-time clinical experience.
Offered: Every year, Summer

PT 517. Clinical Education Seminar. 1 Credit.
This course provides the foundation for physical therapist students to enter full-time clinical experiences. The course informs students about expectations for clinical performance, compliance mandates for the clinical setting, communication strategies, and expectations for service at the clinical site. Students are introduced to concepts about cultural sensitivity and humility and strategies for success during clinical experiences.
Offered: Every year, Summer

PT 518. Functional Neuroanatomy. 3 Credits.
This course presents the gross and developmental anatomy of the central nervous system, including major structures, landmarks and pathways. Normal motor control and postural control mechanisms also are explored. Emphasis is placed on the function of these structures with cases planned to illustrate the functional outcomes of pathology in these structures.
Offered: Every year, Fall

PT 519. Professional Issues in Physical Therapy I. 2 Credits.
This course presents the foundations of the physical therapy profession. Students explore the roles of the American Physical Therapy Association, including practice issues, professional skills and behaviors, the profession’s Code of Ethics and Core Values. The roles of the physical therapist in the health care system and the community are discussed. The roles and responsibilities of the professions in the health care team are explored.
Offered: Every year, Fall

PT 520. Pathophysiology I. 3 Credits.
This course integrates material taught in the foundational courses with disease-specific content regarding the cardiovascular, pulmonary, gastrointestinal, hematological, hepatic and endocrine systems. Active learning strategies help students interpret relationships between pathophysiology and clinical presentation to make safe and effective clinical decisions within physical therapy examination and intervention strategies.
Offered: Every year, Spring

PT 521. Clinical Education Seminar. 1 Credit.
This semester students continue to develop skills by applying the ICF model and clinical decision making. Students will examine, evaluate and establish a plan of care for patients with various musculoskeletal conditions. Emphasis is placed on patients with conditions affecting the shoulder, elbow, wrist/hand, hip and knee regions of the body. Course includes a lab component.
Offered: Every year, Summe

PT 522. Clinical Education Seminar II. 1 Credit.
This course begins to integrate information from foundational courses. The student learns to use an evidence-informed approach to examine, evaluate and establish a plan of care for patients with various musculoskeletal conditions. Emphasis is placed on patients with conditions affecting the spine and foot/ankle regions of the body. Course includes a lab component.
Offered: Every year, Summer

PT 523. Applied Pharmacology I. 1 Credit.
This course enables students to identify and discuss the impact of drug therapy on patients receiving physical therapy. Students integrate this information into patient/client management. Specifically, students look at medications utilized for cardiovascular, pulmonary disease processes and pain management.
Offered: Every year, Summer Online

PT 528. Musculoskeletal I. 3 Credits.
This course begins to integrate information from foundational courses. The student learns to use an evidence-informed approach to examine, evaluate and establish a plan of care for patients with various musculoskeletal conditions. Emphasis is placed on patients with conditions affecting the shoulder, elbow, wrist/hand, hip and knee regions of the body. Course includes a lab component.
Offered: Every year, Spring

PT 528L. Musculoskeletal I Lab. 1 Credit.
Lab to accompany PT 528.
Corequisites: Take PT 528.
Offered: Every year, Spring

PT 529. Musculoskeletal II. 3 Credits.
This course begins to integrate information from foundational courses. The student learns to use an evidence-informed approach to examine, evaluate and establish a plan of care for patients with various musculoskeletal conditions. Emphasis is placed on patients with conditions affecting the spine and foot/ankle regions of the body. Course includes a lab component.
Offered: Every year, Summer

PT 529L. Musculoskeletal II Lab. 1 Credit.
Lab to accompany PT 529.
Corequisites: Take PT 529.
Offered: Every year, Fall and Summer

PT 531. Acute Care and Cardiopulmonary Physical Therapy I. 3 Credits.
This course provides the student with a broad background in the management of patients with acute medical problems with an emphasis on pulmonary, cardiac and dermatological pathologies. Integrating information from anatomy, physiology and pathology, students learn to examine, evaluate and establish a plan of care for patient with acute medical problems. This course includes a lab component.
Offered: Every year, Summer
PT 531L. Acute Care Cardiopulmonary Lab I. 1 Credit.
Lab to accompany PT 531.
Corequisites: Take PT 531.
Offered: Every year, Summer

PT 548L. Physical Agents Lab. 1 Credit.
This course provides students with the foundational knowledge and skills to utilize electrotherapeutic and light physical agents to complement other therapeutic interventions to optimize patient outcomes. A case-based approach is utilized to facilitate problem solving, and integration of theory and evidence.
Offered: Every year, Summer

PT 569. Education/Community Health/Wellness. 2 Credits.
This course presents the foundations of wellness, disease prevention and health promotion within a community setting. The social determinants of health are explored, especially as they relate to the unique role of physical therapists in community practice. Students develop an appreciation for diversity and its possible influence on health behaviors.
Offered: Every year, Fall

PT 599. Independent Study. 1-3 Credits.
Offered: As needed

PT 626. Pathophysiology II. 3 Credits.
This course presents a comprehensive investigation of common neurological disorders in the pediatric and adult population. A brief review of neural development and maturation is provided as a foundation for understanding specific cellular and system responses to neuronal injury or cell death. For selected neurological disorders the disease process is presented in terms of known pathology, known or potential etiology and risk factors, clinical manifestations, and medical management.
Offered: Every year, Spring

PT 627. Applied Pharmacology II. 1 Credit.
This course is a continuation of Pharmacology to introduce the physical therapist student to the chemical agents that many patients are taking. This course allows the student to understand how drug therapy can affect patients receiving physical therapy and how physical therapy intervention strategies may need to be modified. Specific medications utilized in the treatment of cancer, neurologic conditions, endocrine dysfunction, antimicrobials and role of CAMs are covered.
Offered: Every year, Spring Online

PT 628. Acute Care and Cardiopulmonary II. 2 Credits.
This course builds on PT 531 for the evaluation, treatment planning and intervention of the patient with cardiopulmonary dysfunction. Students examine cardiopulmonary changes present over the lifespan and interventions. Management of patients in specialized units such as transplant, neonatal and pediatric units are explored, as part of an interprofessional team. Goal setting and discharge planning are examined. Students explore cardiopulmonary issues present in the population with bariatric impediments.
Offered: Every year, Spring

PT 628L. Acute Care and Cardiopulmonary II Lab. 1 Credit.
Lab to accompany PT 628.
Offered: Every year, Spring

PT 652. Professional Issues in Physical Therapy II. 1 Credit.
This course introduces students to the current issues facing the physical therapy profession. Topics include professional trends and professionalism, risk management, workforce trends including minority and cultural impacts to care, education trends, legal and ethical issues. The course addresses physical therapy concerns related to state and federal legislation, governance and advocacy for patients and the profession.
Offered: Every year, Spring

PT 653. Neurorehabilitation I. 3 Credits.
This course presents a framework for integrating the assessment and treatment appropriate for adults with various neurological conditions. Students learn assessment procedures based on evaluation of normal movement, abnormal movement and function. The course includes laboratory instruction where students develop comprehensive evaluation techniques, plan and prioritize appropriate goals and treatments, and hypothesize outcomes through case-based modeling and integrated clinical experiences.
Corequisites: Take PT 653L.
Offered: Every year, Spring

PT 653L. Neurorehabilitation I Lab. 1 Credit.
Lab to accompany PT 653.
Corequisites: Take PT 653.
Offered: Every year, Spring

PT 654. Neurorehabilitation II. 3 Credits.
This course is designed as a continuation of PT 653. Lecture and lab topics include continued framework development of evaluation and innovative treatment approaches for adults with various neurological conditions. Students are required to integrate and synthesize knowledge gained from current and previous coursework. During the lecture and lab, students continue to develop comprehensive evaluation techniques, plan appropriate treatments, and hypothesize outcomes through case-based modeling and integrated clinical experiences.
Corequisites: Take PT 654L.
Offered: Every year, Summer

PT 654L. Neurorehabilitation II Lab. 1 Credit.
Lab to accompany PT 654.
Corequisites: Take PT 654.
Offered: Every year, Summer

PT 657. Diagnostic Imaging for Physical Therapists. 2 Credits.
This course introduces the student to diagnostic imaging principles and techniques as applied to musculoskeletal, neurologic and cardiovascular and pulmonary systems examination, evaluation and management. The course emphasizes radiographic anatomy, common normal variants and pathological and traumatic conditions. In addition to standard radiographic techniques, other imaging and special techniques are discussed. The course is organized by body systems: musculoskeletal, cardiovascular and pulmonary and neurologic as well as a session on technologic advances.
Offered: Every year, Summer

PT 658. Differential Diagnosis. 3 Credits.
This course provides students with methods of identifying signs and symptoms of diseases and differentiating between those that are musculoskeletal and those that are systemic conditions. Throughout the course, the student learns to correlate the findings from the patient’s personal and family history, the physical therapy interview and the objective examination. This course provides the student with reference for determining when patients should be referred to a physician.
Offered: Every year, Summer
PT 661. Administration and Leadership in Physical Therapy.  3 Credits.
Students learn components of PTs as manager or consultant in the current health care delivery system. The organization, administration and management of a department is emphasized through topics such as: principles of management, types of supervision/managerial styles, program planning and decision-making, policy development, quality assurance, utilization review, reimbursement, budget preparation, regulating agencies and managed care, legal issues and risk management, and consumer satisfaction. Professional topics include career-planning strategies such as resume writing and leadership development.
Offered: Every year, Summer

PT 661L. Administrative and Management Lab Physical Therapy Lab.  1 Credit.
Students learn components of PTs as manager or consultant in the current health care delivery system. The organization, administration and management of a department is emphasized through topics such as: principles of management, types of supervision/managerial styles, program planning and decision-making, policy development, quality assurance, utilization review, reimbursement, budget preparation, regulating agencies and managed care, legal issues and risk management, and consumer satisfaction. Professional topics include career-planning strategies such as resume writing and leadership development.
Offered: Every year, Summer

PT 666. Capstone I.  2 Credits.
This is the first of a three-course series culminating in a project that will contribute to the body of knowledge in physical therapy. The goals for the capstone project are: 1) to identify the purpose of the project and write a detailed justification to include a thorough review of the literature (PT 666); 2) to develop a detailed description of the project (PT 666); 3) to implement the project (PT 676 & PT 767); and 4) to report on the project and disseminate the outcome (PT 767).
Offered: Every year, Summer

PT 668. Psychosocial Aspects of Physical Disability.  2 Credits.
The course addresses psychosocial dimensions of physical therapy interventions from therapist and client perspectives. Students practice clinical reasoning. Topics include: humanistic philosophy as part of psychological rehabilitation; physical/psychological variables that influence recovery; the clinical reasoning process of the therapeutic relationship and client-centered practice; psychological influences on rehabilitation and adaptation including stress and trauma; typical mental health conditions; behavioral management of difficult persons and situations including suicidality, abuse and mental illness; and sexuality and disability-intervention strategies.
Offered: Every year, Spring

PT 668L. Psychosocial Aspects of Physical Disability Lab.  1 Credit.
Lab to accompany PT 668.
Offered: Every year, Spring

PT 669. Clinical Integration.  1 Credit.
This case-based course provides students with an opportunity to synthesize and integrate information from courses completed thus far in the DPT curriculum. Students reflect on in-class cases, as well as previous clinical experiences, to examine patient-centered care within the context of different health conditions and varied personal, environmental and participation factors.
Prerequisites: Successful completion of all previously sequenced coursework.
Offered: Every year, Summer

PT 671. Clinical Education I.  4 Credits.
Students are assigned to a full-time, 10-week clinical internship, which provides an understanding of the continuum of care. Students are involved in evaluating, developing and implementing treatment for clients with various musculoskeletal, neuromuscular and cardiopulmonary dysfunctions. They continue to develop their professional and interpersonal skills through interactions with clients, families and other health professionals. Successful completion of this clinical experience is required for continuing in the program. This course is graded on a pass/fail basis.
Offered: Every year, Fall

PT 675. Normal/Abnormal Gait.  1 Credit.
This online course provides an overview of normal gait with an emphasis on kinematic and kinetic analysis of the gait cycle. Gait analysis techniques including motion analysis, dynamic electromyography, force plate recordings, and measurement of stride characteristics are presented. Physical therapy treatment approaches for patients with abnormal gait are introduced.
Offered: Every year, Fall

PT 676. Capstone II.  1 Credit.
This is the second of a three-course series culminating in a project that will contribute to the body of knowledge in physical therapy. The goals for the capstone project are: 1) to identify the purpose of the project and write a detailed justification to include a thorough review of the literature (PT 666); 2) to develop a detailed description of the project (PT 666); 3) to implement the project (PT 676 & PT 767); and 4) to report on the project and disseminate the outcome (PT 767).
Offered: Every year, Summer

PT 685. Evidence in Practice.  2 Credits.
This course provides students with the skills and knowledge needed to read, interpret and appraise the quality of various types of primary (intervention, prognosis and diagnosis studies) and secondary (systematic reviews and clinical practice guidelines) research. Topics include psychometric properties of outcome measures, research design, hypothesis testing and ethics in research. Learning experiences include completion of online tutorials and assignments, and participation in student-led small group discussions of current evidence.
Offered: Every year, Fall

PT 730. Musculoskeletal III.  2 Credits.
This course builds on information taught in Musculoskeletal I and II and is designed to allow student to use an evidence-based approach to appropriately evaluate and establish a treatment plan, including ergonomics, body mechanics, manipulation and kinesiology taping, for patients with various musculoskeletal conditions. The student is taught to generate an evidence-based diagnosis, prognosis and plan of care to treat physical therapy clients with musculoskeletal dysfunction of the spine, hip, knees, ankle, shoulder, elbow and temporomandibular joint.
Offered: Every year, Fall

PT 730L. Musculoskeletal III Lab.  1 Credit.
Lab to accompany PT 730.
Offered: Every year, Fall
PT 736. Pediatric Rehabilitation.  3 Credits.
This course presents information needed for the physical therapy student to complete a thorough examination and evaluation of a child with neurological and/or orthopedic diagnoses. Upon completion of the examination, students are able to generate an accurate diagnosis, prognosis and an appropriate plan of care for these patients. Relevant theory and practical learning experiences are provided for the student to develop the knowledge and skills necessary for applying an evidence-based physical therapy intervention strategy for the physical therapy plan of care.
Offered: Every year, Fall

PT 736L. Pediatric Rehabilitation Lab.  1 Credit.
Lab to accompany PT 736.
Offered: Every year, Fall

PT 740. Prosthetics and Orthotics.  1 Credit.
This course is the study of the examination and treatment of individuals with prosthetic and orthotic devices. The focus is on the lower extremity and gait. The course provides the student with the necessary skills to thoroughly examine and treat patients with lower extremity prosthetic or orthotic devices.
Offered: Every year, Fall

PT 740L. Prosthetics and Orthotics Lab.  1 Credit.
Lab to accompany PT 740 Prosthetics and Orthotics.
Offered: Every year, Fall

PT 744. Physical Therapy Skills Elective.  2 Credits.
This course is a required therapy skills course in which students can choose a section focusing on a specific area of concentration from one of the four main practice areas of physical therapy: neuromuscular, musculoskeletal, cardiopulmonary or integumentary. All sections of the course use the essential elements of PT practice as an organizing framework and incorporate the review and practical application of recent literature.
Offered: Every year, Fall

PT 759. PBL Advanced Clinical Decision-Making.  3 Credits.
This course features problem-based learning activities and education theories to assist students in continuing to refine and employ their cognitive framework for Physical Therapy practice. The class includes integration and synthesis of client information from all areas of PT practice. Students analyze their clinical decision making within the context of case-based problem solving, evidence informed practice, and formulation of client-centered plans of care along the continuum of care.
Offered: Every year, Fall

PT 767. Capstone III.  2 Credits.
This is the third of a three-course series culminating in a project that will contribute to the body of knowledge in physical therapy. The goals for the capstone project are: 1) to identify the purpose of the project and write a detailed justification to include a thorough review of the literature (PT 666); 2) to develop a detailed description of the project (PT 666); 3) to implement the project (PT 676 & PT 767); and 4) to report on the project and disseminate the outcome (PT 767).
Offered: Every year, Fall

PT 781. Clinical Internship II.  6 Credits.
This full-time clinical internship allows students to pursue in-depth practice in areas of interest and gain a variety of clinical experiences. Students practice learned skills in all aspects of care including specialty areas, varied settings including but not limited to acute care, neurological rehabilitation, pediatrics and advanced orthopedic physical therapy. Sequenced objectives ensure progression to entry-level skills and professional behaviors. This course is graded on a pass/fail basis.
Offered: Every year, Spring

PT 782. Clinical Internship III.  6 Credits.
This final full-time clinical experience is the culmination of the physical therapy program, and prepares students for practice as graduate physical therapists. Students are required to achieve entry-level proficiency in all aspects of practice in a wide variety of clinical settings, including but not limited to acute care, advanced orthopedics, neurological rehabilitation, and pediatric physical therapy. This course is graded on a pass/fail basis.
Offered: Every year, Summer

Physician Assistant (PY)

PY 501. Human Physiology.  4 Credits.
This course takes a system approach to the physiologic and biochemical functions of the human body, including relevant anatomical correlations. Laboratory sessions emphasize clinical application to systemic function.
Offered: Every year, Summer

PY 501L. Physiology Lab.  0 Credits.
Lab to accompany PY 501. (3 lab hrs.)
Offered: Every year, Summer

PY 502. Physical Diagnosis.  4 Credits.
Students are introduced to the organization and techniques for performing the physical examination including the use of equipment. Lab sessions provide students with practical experience performing the complete physical examination on the adult patient. The course features specialty workshops in orthopedics, infant and child, as well as the male and female genitalia. Preclinical clerkships help students improve their clinical skills in history taking, physical exam performance, oral and written presentations.
Offered: Every year, Fall

PY 502L. Physical Diagnosis Lab.  0 Credits.
Lab to accompany PY 502. (2 lab hrs.)
Offered: Every year, Fall

PY 503. Principles of Interviewing.  3 Credits.
This course explores the various methods of approaching and interviewing patients focusing on the establishment of a relationship, effects of cultural backgrounds, gender and age on giving and receiving of information in order to obtain an accurate medical history.
Offered: Every year, Summer

PY 504. History, Roles and Responsibilities of the PA.  1 Credit.
This course explores through lecture and discussion the factors affecting the development of the profession and role socialization with emphasis on standards of quality assurance, credentialing of continued competence, policies and regulations governing clinical responsibilities and dynamics of membership on a health care team.
Offered: Every year, Spring
PY 505. Clinical Pharmacology I. 2 Credits.
This distance education course covers the classification, mechanism of action, toxicity and clinical use of therapeutics agents. Side effects, indications, dose response and management of therapeutics are emphasized.
Offered: Every year, Fall

PY 506. Principles of Internal Medicine. 6 Credits.
This course takes an organ system approach to disease emphasizing the pathogenesis, clinical presentation, differential diagnosis, diagnostic and therapeutic approach to disease processes. Laboratory sessions focus on clinical problem solving through the use of real cases.
Offered: Every year, Fall

PY 506L. Clinical Correlation Lab. 0 Credits.
Lab to accompany PY 506. (1 lab hr.)
Offered: Every year, Fall

PY 507. Principles of Electrocardiography. 1 Credit.
This course offers a directed approach to understanding the principles of electrocardiography and its applications to clinical practice. Throughout this course, general principles of the etiologies of abnormal EKG patterns, the differential diagnosis and clinical management are discussed to correlate the EKG with clinical situations.
Offered: Every year, Summer

PY 507L. EKG Lab. 0 Credits.
Lab to accompany PY 507. (1 lab hr.)
Offered: Every year, Summer

PY 508. Diagnostic Methods I. 2 Credits.
Clinical laboratory medicine is examined with emphasis on indications for tests, normal values, interpretation of results and correlation with clinical conditions. Laboratory sessions provide students with practical experience performing basic laboratory tests.
Offered: Every year, Summer

PY 508L. Diagnostic Methods Lab. 0 Credits.
Lab to accompany PY 508. (2 lab hrs.)
Offered: Every year, Summer

PY 509. Principles of Obstetrics and Gynecology. 3 Credits.
Anatomy and physiology of the human reproductive system are examined, including the changes in pregnancy, prenatal care, medical and surgical complications of pregnancy, pre- and postpartum care. Common gynecologic conditions, methods and effectiveness of contraception, cancer detection methods and the diagnosis and treatment of sexually transmitted infections in the female are explored.
Offered: Every year, Spring

PY 510. Principles of Pediatrics. 3 Credits.
This course examines the physical and psychological fundamentals of normal growth and development. Focus is on the major pediatric illnesses and conditions, their signs, symptoms and treatment. Immunization schedules, the various medications used in the pediatric population, their doses and indication are examined; the management of pediatric emergencies such as acute cardiac and respiratory arrest, anaphylaxis, seizures and trauma also are explored.
Offered: Every year, Spring

PY 511. Principles of Surgery and Emergency Medicine. 4 Credits.
The fundamentals of surgical disease are explored with discussions on the etiology, pathophysiology, clinical manifestations and appropriate management of major and minor surgical conditions and care of the acutely injured and critically ill patient. Topics are discussed with emphasis on clinical presentation and pre- and post-operative management. The course introduces the principles of life support technique and the initial management of acute medical and traumatic conditions. Laboratory sessions are used to familiarize the student with aseptic technique and basic surgical procedures such as airway control, various catheter placements, surgical bleeding control and wound management.
Offered: Every year, Spring

PY 511L. Clinical Skill Lab. 0 Credits.
Lab to accompany PY 511. (2 lab hrs.)
Offered: Every year, Spring

PY 512. Psychosocial Issues in Health Care. 2 Credits.
This course explores how cultural belief systems and values in a multicultural society relate to the provision of appropriate health care/ counseling. Students become familiarized with the biological and psychological attributes contributing to sexual expression as well as societal values that shape perception and expression. Factors associated with communicating with and caring for individuals from different cultures, opposite genders or differing sexual preference are explored. Lab sessions help students gain experience and develop confidence in approaching patients through preclinical clerkships. Students improve their clinical skills in the areas of eliciting a history, performing a physical exam, presenting an oral report and medical documentation via the patient chart note.
Offered: Every year, Spring

PY 512L. Psychosocial Issues Lab. 0 Credits.
Lab to accompany PY 512. (2 lab hrs.)
Offered: Every year, Spring

PY 513. Behavioral Medicine. 3 Credits.
This one-semester course gives students an overview of some of the most important areas in behavioral psychiatry. The course includes an overview of basic psychiatric concepts and focuses on assessing patients who manifest psychological symptoms. Topics include diagnosis and treatment of anxiety disorders, mood disorders, common child and adolescent disorders, somatoform and factitious disorders, psychotic disorders, sleep disorders, adjustment and personality disorders, drug and alcohol abuse, and addresses forensic issues in behavioral health.
Offered: Every year, Spring

PY 514. Diagnostic Methods II. 1 Credit.
This course covers the basic principles of radiologic and imaging techniques, indication for various tests and recognition of abnormal findings.
Offered: Every year, Fall

PY 515. Clinical Pathology. 3 Credits.
Basic human pathology is examined from a systemic and cellular level, pathogenesis and various disease states. Topics include histology, inflammation and repair, endocrine, cardiovascular, pulmonary, musculoskeletal, GI and GU pathology.
Offered: Every year, Summer

PY 516. Clinical Pharmacology II. 2 Credits.
This continuation of Clinical Pharmacology I emphasizes commonly prescribed therapeutic agents.
Offered: Every year, Spring
PY 517. Human Anatomy.  4 Credits.
This lecture/laboratory experience is meant to provide an environment for learning gross morphology of the human body including structural relationships, anatomical variations and radiological correlations. Approach to the material is both regional and systemic. Content includes the basic concepts of embryology, the comparison of normal and abnormal structural relationships and demonstration of how these things relate to health and disease. To meet the instructional goals and objectives, students attend lectures, review online reusable learning modules and participate in cadaveric dissections.
Offered: Every year, Summer
PY 517L. Human Anatomy Lab.  0 Credits.
Lab to accompany PY 517. (6 lab hrs.)
Offered: Every year, Summer
PY 519. Human Anatomy.  3 Credits.
This lecture experience is meant to provide an environment for learning gross morphology of the human body including structural relationships, anatomical variations and clinical application. Approach to the material is both regional and systemic. Content includes the basic concepts of embryology, the comparison of normal and abnormal structural relationships and demonstration of how these things relate to health and disease. To meet the instructional goals and objectives, students attend lectures and review online reusable learning modules while making connections to concepts encountered in PY 519L.
Offered: Every year, Summer
PY 519L. Human Anatomy Lab.  1 Credit.
This lab experience is meant to provide an environment for learning gross morphology of the human body including structural relationships, anatomical variations and clinical application. Approach to the material is both regional and systemic. To meet the instructional goals and objectives, students complete full cadaveric dissections and a self-study osteology review.
Corequisites: Take PY 519.
Offered: Every year, Summer
PY 526. Principles of Epidemiology.  3 Credits.
This graduate-level course in epidemiology directs itself toward application of epidemiological principles. The course involves analysis of prospective and retrospective studies, cross-sectional studies and experimental epidemiology. Both communicable and chronic disease case studies are used, as well as case studies of occupationally induced diseases.
Offered: Every year, Summer
PY 536. Biostatistics.  3 Credits.
This course covers the application of statistical techniques to the biological and health sciences. Emphasis is on mathematical models, collection and reduction of data, probabilistic models estimation and hypothesis testing, regression and correlation, experimental designs and non-parametric methods.
Offered: Every year, Summer
PY 546. Ethics in Health Care Delivery.  3 Credits.
This course provides an opportunity for identifying, analyzing and resolving ethical dilemmas that will be encountered in professional practice. Issues are examined using the basic principles of biomedical ethics that include respect for persons, truth telling, justice, beneficence and integrity.
Offered: Every year, Summer
PY 548. Ethics in Health Care Delivery I.  2 Credits.
This course provides an overview of the discipline of Medical Ethics presenting the study and application of relevant principles, insights and understandings of modern medical practice. The course includes a study of ethical theories, which lay the foundation for subsequent investigation into specific ethical problems found in medical science and technology. A framework of ethical decision making is introduced and practiced using realistic medical cases. The purpose of the course is to provide a framework that enables the student to reason clearly and effectively about the ethics involved in medical science and technology. This course better prepares students to identify ethical issues they may encounter during the clinical year and provides a method for ethical decision making when faced with these issues. The course assumes no prior knowledge of philosophical ethics or medical science.
Offered: Every year, Summer
PY 572. Medical Microbiology and Infectious Diseases.  4 Credits.
This detailed study of microorganisms and the diseases they cause in man includes consideration of infectious disease microorganisms including their biochemical, serological and virulence characteristics, and clinical manifestations. An organ system approach is used to examine the fundamentals of pathogenicity, host response, epidemiological aspects of infectious disease, as well as clinical manifestations, diagnosis and treatment of infections.
Offered: Every year, Fall
PY 599. Independent Study.  3 Credits.
Offered: As needed, All
PY 608. Graduate Seminar.  3 Credits.
This seminar prepares students for the specific requirements of entering professional practice. Faculty active in the profession cover such issues as malpractice coverage, licensure regulation, risk management and legal issues, and aspects of the financing of health care. Lab sessions are designed as small group seminars. Through guided discussion in these small seminar settings, students explore the current literature and thinking on the competencies for the physician assistant profession.
Offered: Every year, Summer
PY 608L. Graduate Seminar Lab.  0 Credits.
Lab to accompany PY 608. (1.5 lab hrs.)
Offered: Every year, Summer
PY 611. Clinical Residency I.  3 Credits.
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties.
Offered: Every year, Summer
PY 612. Clinical Residency II. 3 Credits.
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties. Offered: Every year, Summer

PY 613. Clinical Residency III. 3 Credits.
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties. Offered: Every year, Summer

PY 614. Clinical Residency IV. 3 Credits.
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties. Offered: Every year, Fall

PY 615. Clinical Residency V. 3 Credits.
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties. Offered: Every year, Fall

PY 616. Clinical Residency VI. 3 Credits.
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties. Offered: Every year, Fall

PY 617. Clinical Residency VII. 3 Credits.
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties. Offered: Every year, Spring

PY 618. Clinical Residency VIII. 3 Credits.
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties. Offered: Every year, Spring

PY 619. Clinical Residency IX. 3 Credits.
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties. Offered: Every year, Spring

PY 648. Ethics/Health Care Delivery II. 1 Credit.
This 1-credit course occurs in the third summer after the student completes their clinical rotations. The course is a continuation of the PY 548 Ethics in Health Care I. The purpose of the course is to reinforce a framework of ethical decision-making which enables the student to reason clearly and effectively about the ethics involved in medical science and technology and reflect on ethical issues encountered during the clinical year. Student experiences encountered during their clinical year are used to exemplify the theoretical course material. Offered: Every year, Summer

PY 650. Medical Writing Workshop/Journal Club. 1 Credit.
The purpose of the medical writing course is to educate the PA student in the interpretation of medical literature and provide experiences in the various forms of medical writing and presentations. The course begins in summer semester of the second year with lectures, modules and on-campus activities, and then spans the clinical year using distance-education resources. Learning topics progress from a basic overview of writing mechanics and proper referencing to specific types of medical articles. Success in the medical writing course is determined by the quality of the researched written clinical papers and posters. Offered: Every year, Summer
PY 676. Comprehensive Examination. 2 Credits.
This comprehensive examination is a capstone of the physician assistant program. The purpose of the exam is twofold. First, to ascertain if the student has both the broad and specific knowledge expected of someone holding a master's degree. Second, to determine whether the student has been able to integrate knowledge obtained from individual courses into unified concepts that link the students' own specialization to other fields of study. The student is given an oral exam, a written examination and a clinical skills examination in the form of an Objective Score of Clinical Evaluation (OSCE).
Offered: Every year, Summer
PY 699. Independent Study. 3 Credits.
Offered: As needed, All

Radiologist Assistant (RA)

RA 505. Clinical Pharmacology I. 3 Credits.
This education course covers the classification, mechanism of action, toxicity and clinical use of therapeutics agents. Side effects, indications, dose response and management of therapeutics are emphasized.
Offered: Every year, Summer
RA 517. Human Anatomy. 3 Credits.
This course focuses on dissection of the human body with particular attention to the embryologic origin and relationship of organ systems. Emphasis is placed on internal organs with clinical correlation to anatomic condition.
Offered: Every year, Summer
RA 517L. Human Anatomy Lab. 1 Credit.
Lab to accompany RA 517. (6 lab hrs.)
Offered: Every year, Summer
RA 518. Imaging Pathophysiology. 3 Credits.
The content focuses on the characteristics and manifestations of disease caused by alterations or injury to the structure or function of the body. Concepts basic to pathophysiology as well as common disease conditions are studied and serve as prototypes in understanding alterations that occur in the major body systems. Emphasis is placed on the characteristic manifestations and image correlation with these pathologies observed through diagnostic imaging. For radiologist assistant majors only.
Offered: Every year, Fall
RA 520. Radiation Safety and Health Physics. 2 Credits.
This course provides an understanding of the protection of individuals from the harmful effects of ionizing radiation. Content includes an overview of the regulatory bodies and patient radiation safety regulations affecting the diagnostic imaging environment. The interaction of ionizing radiation with matter, units of exposure and dose, radiation detection and measurement devices are considered. Practical techniques and QA/QC procedures for reducing patient and operator risk of exposure to ionizing radiation are discussed.
Offered: Every year, Summer
RA 530. Image Critique and Pathologic Pattern Recognition I. 3 Credits.
Basic imaging interpretation skills are presented to differentiate normal and abnormal structures in the skeletal, respiratory and cardiovascular systems, head and soft tissue neck across the lifespan. Students develop an understanding of the correlation of anatomy, pathology and physiology as it relates to radiologic imaging and interpretation. Protocols for drafting memoranda of initial observations based on image assessment are included. Guest lectures are provided. This course also includes imaging post processing. The content is designed to establish knowledge in the fundamentals of digital image post processing that support guided skill development using clinical based image workstations.
Offered: Every year, Fall
RA 531. Image Critique and Pathologic Pattern Recognition II. 3 Credits.
Basic imaging interpretation skills are presented to differentiate normal and abnormal structures in breast, gastrointestinal and genitourinary systems across the lifespan. Students develop an understanding of the correlation of anatomy, pathology and physiology as it relates to radiologic imaging and interpretation. Protocols for drafting memoranda of initial observations based on image assessment are included. Guest lectures are provided. This course also includes image post processing. The content is designed to establish a knowledge of the fundamentals of digital image post processing that support guided skill development using clinical based image workstations.
Offered: Every year, Spring
RA 532. Interventional Procedures I. 3 Credits.
This course focuses on invasive procedures expected to be performed by the radiologist assistant. Students develop an understanding of the correlation of anatomy, pathology and physiology as it relates to radiologic imaging and interpretation with an assessment of need for interventional procedures across the lifespan. Procedures related to skeletal, respiratory and cardiovascular and head and neck systems are discussed, including but not limited to arthrograms, lumbar punctures, PICC, central venous lines, venogram, fistulograms, organ biopsies and thoracentesis. Quality improvement methods are emphasized.
Offered: Every year, Fall
RA 535. Interventional Procedures II. 3 Credits.
This course focuses on invasive procedures expected to be performed by the radiologist assistant. Students develop an understanding of the correlation of anatomy, pathology and physiology as it relates to radiologic imaging and interpretation with an assessment of need for interventional procedures across the lifespan. Procedures related to the breast, gastrointestinal and genitourinary systems across the lifespan are discussed, including but not limited to breast aspiration, nephrostogram, loopogram, gastric and T-tube check, organ biopsies and paracentesis. Quality improvement methods are emphasized.
Offered: Every year, Fall
RA 542. Patient Assessment, Management and Education. 3 Credits.
The course facilitates the student’s understanding of the theoretical basis of patient assessment, management and education across the lifespan. The content reinforces the critical thinking model to aid in the development of interviewing skills and assessment techniques. Assessment of body systems, not limited to genitourinary, gastrointestinal, cardiovascular, breast and central nervous system are introduced. Techniques to develop hypotheses regarding nature and origin of patient's problems are explored.
Offered: Every year, Fall
Offered:

RA 545. Research Methods and Design. 3 Credits.
Students explore ethical issues in medical research, develop a research project, collect data and perform analysis using statistical programs for computers. A presentation is developed and various computer presentation techniques are employed to present student project data. Students work individually on the project and require the approval of the instructor to pursue a particular topic.
Offered: Every year, Fall

RA 550. Clinical Seminar I. 1 Credit.
This distance education course requires students to present a minimum of two case studies during the academic semester. Based on the case study requirements of the radiologist assistant examination criteria, each student is responsible for patient history, clinical correlation, explanation of imaging procedures, evaluation of imaging studies and identification of pertinent anatomy. Students may choose a minimum of one modality for discussion per case study. Students are required to participate in discussions regarding each weekly case study.
Offered: Every year, Spring

RA 551. Clinical Seminar II. 1 Credit.
This distance education course requires students to present a minimum of two case studies during the academic semester. Based on the case study requirement of the radiologist assistant examination, students are responsible for patient history, clinical correlation, explanation of imaging procedures, evaluation of imaging studies and identification of pertinent anatomy.
Offered: Every year, Summer

RA 552. Clinical Seminar III. 3 Credits.
This distance education course requires students to present a minimum of two case studies during the academic semester. Based on the case study requirement of the radiologist assistant examination, students are responsible for patient history, clinical correlation, explanation of imaging procedures, evaluation of imaging studies and identification of pertinent anatomy.
Offered: Every year, Fall

RA 570. Radiologist Assistant Clinical I. 3 Credits.
This course provides students with a clinical experience over a 15-week period. Students are required to attend clinical three consecutive days per week. The areas of experience include general radiography, fluoroscopic procedures and interventional procedures. The experience also includes advanced imaging modalities such as magnetic resonance imaging, computer tomography, mammography, positron emission tomography and ultrasound. Application of skills related to patient care and management, radiographic pattern recognition and procedural variances are employed. Students must complete American Registry of Radiologic Technologists competency requirements.
Offered: Every year, Spring

RA 571. Radiologist Assistant Clinical II. 5 Credits.
This course provides students with a clinical experience over a 15-week period. Students are required to attend clinical four consecutive days per week. The areas of experience include general radiography, fluoroscopic procedures and interventional procedures. The experience also includes advanced imaging modalities such as magnetic resonance imaging, computer tomography, mammography, positron emission tomography and ultrasound. Application of skills related to patient care and management, radiographic pattern recognition and procedural variances are employed. Students must complete American Registry of Radiologic Technologists competency requirements.
Offered: Every year, Summer

RA 572. Radiologist Assistant Clinical III. 5 Credits.
This course provides students with a clinical experience over a 15-week period. Students are required to attend clinical five consecutive days per week. The areas of experience include general radiography, fluoroscopic procedures and interventional procedures. In addition, experience includes advanced imaging modalities such as magnetic resonance imaging, computer tomography, mammography, positron emission tomography and ultrasound. Application of skills related to patient care and management, radiographic pattern recognition and procedural variances are employed. Students must complete American Registry of Radiologic Technologists competency requirements.
Offered: Every year, Fall

RA 573. Radiologist Assistant Clinical IV. 5 Credits.
This course provides students with a clinical experience over a 15-week period. Students are required to attend clinical five consecutive days per week. The areas of experience include general radiography, fluoroscopic procedures and interventional procedures. In addition, experience includes advanced imaging modalities such as magnetic resonance imaging, computer tomography, mammography, positron emission tomography and ultrasound. Application of skills related to patient care and management, radiographic pattern recognition and procedural variances are employed. Students must complete American Registry of Radiologic Technologists competency requirements.
Offered: Every year, Fall

RA 590. Thesis I. 1 Credit.
The focus of this course is to further develop the paper written in RA 545. Students work on improving the abstract; introduction and literature review; developing the results, discussion, conclusion and recommendation sections of the thesis. At the conclusion of the course the student should have rough draft of a five-chapter thesis.
Offered: Every year, Spring

RA 591. Thesis II. 2 Credits.
This course is a continuation of RA 590 Thesis I. Each student produces a final five-chapter thesis and is required to present the completed thesis.
Offered: Every year, Summer

RA 599. Independent Study. 1-6 Credits.
Offered: As needed

RA 699. Independent Study. 1-6 Credits.
Offered: As needed

Social Work (SW)

SW 500. Generalist Field Education Practicum I. 3 Credits.
This is the first of two field placements. The generalist field placement is offered in the generalist year for 16 hours a week for a minimum of 400 hours. In addition to the hours required in the agency placement, there is a requirement to attend a Field Seminar on campus throughout the months of the placement.
Corequisites: Take SW 501.
Offered: Every year, Fall
SW 501. Social Work Practice I: Social Work Practice with Individuals and Families.  3 Credits.
This is the first semester of the generalist practice sequence. Social Work Practice I provides an introduction to social work practice. The courses present the knowledge and skills necessary for competent generalist social work practice with individuals and families. Skills taught in this course are interviewing, problem identification, problem exploration, formulating the presenting complaint, data gathering, differential assessment, planning, beginning intervention, termination, and evaluation.
Corequisites: Take SW 500. Take SW 511 or SW 506.
Offered: Every year, Fall

SW 502. Generalist Field Education Practicum II.  3 Credits.
This is the second of two field placements. The generalist field placement is offered in the generalist year for 16 hours a week for a minimum of 400 hours. In addition to the hours required in the agency placement, there is a requirement to attend a Field Seminar on campus throughout the months of the placement.
Corequisites: Take SW 501.
Offered: Every year, Spring

SW 503. Social Work Practice II: Social Work Practice with Groups, Organizations and Communities.  3 Credits.
This is the second semester of the generalist practice sequence. Social Work Practice II provides an introduction to social work practice. The courses present the knowledge and skills necessary for competent social work practice with groups, organizations and communities. There is special attention given to vulnerable and disenfranchised populations.
Prerequisites: Take SW 501.
Corequisites: Take SW 502.
Offered: Every year, Fall

SW 504. Social Welfare and Social Policy.  3 Credits.
This course provides students with a foundation understanding and appraisal of social welfare policies and programs in the United States, and the historical and contemporary forces that have shaped their development. It covers the formation of the social work profession and its role in the creation and implementation of social policy and its tradition of advocacy, social action, and reform. Students take steps to engage in policy practice to advance social and economic justice.
Offered: Every year, Fall

SW 505. Social Work Research.  3 Credits.
The purpose of this course is to provide the generalist MSW student with a solid foundation in social work research, with an emphasis on evidence-based practice. As consumers and producers of research, social workers need to understand the core concepts of scientifically sound and rigorous research. Students become prepared to critically evaluate the research and learn to synthesize empirical research into a systematic review. The impact of bias in research is identified.
Offered: Every year, Fall

SW 507. Issues of Diversity and Oppression.  3 Credits.
This course examines the dynamics of racism and other forms of oppression in society and within us, and how those dynamics are intertwined with policy and practice. The course places oppression in the economic, political and social context of the U.S. Students analyze racism, sexism and ethnocentrism as they operate at the individual, community and institutional levels. The course aims to increase self-awareness and cultural humility for social work practice.
Offered: Every year, Spring

SW 508. Psychopathology.  3 Credits.
This course provides students with extensive knowledge of the major forms of emotional illness and their treatment. Students develop competence in diagnosis by mastering the currently accepted diagnostic code (DSM-V). They develop competence in treatment planning through awareness and understanding of the most modern and accepted treatments for each major category of mental illness.
Prerequisites: Take SW 500 SW 501.
Offered: Every year, Spring

SW 511. Human Behavior in the Social Environment I: Theories for Practice for Individuals and Families.  3 Credits.
Using a person-in-environment framework, this course provides an understanding of the relationship between the major theories of individual and family functioning among biological, social, psychological and spiritual dimensions as they affect and are affected by human behavior and family life. Students examine the role that culture and intersectionality play in human development, within the context of biological and social systems, psychodynamic, ecological, social constructionist, humanistic, cognitive and behavioral theories.
Offered: Every year, Fall

SW 512. Human Behavior in the Social Environment II: Theories for Groups, Organizations and Communities.  3 Credits.
Using an ecosystems framework, this course provides an understanding of the major theories that explain the structures, functions, and dynamics of groups, organizations and communities. Students master core ideas of theories that provide the conceptual base for engaging in interventions that occur in the macro social environment. The course focuses on utilizing theories that promote empowerment of key stakeholders within groups, organizations and communities and that address social and economic injustice.
Offered: Every year, Spring

SW 600. Specialized Practice Field Education Practicum in Health/Behavioral Health I.  4 Credits.
This specialized practice field placement is the first of two field placements and offers a social work experience focused on health/behavioral health in a variety of settings. Students complete 24 hours a week for a minimum of 600 hours. In addition to the hours required in the agency placement, there is a requirement to attend a monthly Field Seminar.
Prerequisites: All generalist curriculum courses.
Corequisites: Take SW 601.
Offered: Every year, Fall

SW 601. Social Work Practice III: Specialized Clinical Social Work Practice.  3 Credits.
This course focuses on clinical perspectives associated with social work in various fields of practice, particularly behavioral health consultation in the health care system. Skills to be acquired include how to make comprehensive psychosocial assessments and treatment plans for clients according to particular treatment perspectives. Multicultural applications for practice are incorporated. Attention is given to developing students' ability to apply ethical standards to clinical practice.
Prerequisites: All generalist curriculum courses.
Corequisites: Take SW 600.
Offered: Every year, Fall
SW 602. Specialized Practice Field Education Practicum in Health/Behavioral Health II. 4 Credits.
This specialized practice field placement is the second of two field placements and offers a social work experience focused on health/behavioral health in a variety of settings. Students complete 24 hours a week for a minimum of 600 hours. In addition to the hours required in the agency placement, there is a requirement to attend a monthly Field Seminar.
Prerequisites: All generalist curriculum courses.
Corequisites: Take SW 603.
Offered: Every year, Spring

SW 603. Social Work Practice IV: Specialized Organizational Social Work Practice. 3 Credits.
This course is designed to expand students' knowledge and understanding of human service organizations and to provide approaches for designing and managing programs. Students are exposed to various organizational and management theories and practices. In addition, emphasis is placed on organizational practice within the field of behavioral health in primary care settings.
Prerequisites: All generalist curriculum courses and SW 601.
Corequisites: Take SW 602.
Offered: Every year, Spring

SW 604. Evaluation Research Work Programs and Practice. 2 Credits.
This course focuses on the necessity of program evaluation for agency accountability and for improving services for clients. The course provides an overview of the methods of program evaluation and builds upon learned research knowledge for elaborating on the conceptual, methodological and administrative aspects of evaluation research. Students gain knowledge on how to utilize evaluation studies to inform their own practice at the micro and mezzo levels.
Prerequisites: All generalist curriculum courses.
Offered: Every year, Fall

SW 605. Integrative Seminar/Capstone Project. 2 Credits.
This course requires students to integrate core areas of generalist and specialized practice knowledge to a current issue relevant for social work practice. Students research human behavior theory, innovative evidence-based practice, policy and advocacy, as well as the latest data on health/behavioral health promotion to disseminate strategies for ameliorating the negative impact of a social problem on a specific marginalized population.
Prerequisites: All generalist curriculum courses.
Corequisites: Take SW 602 SW 603.
Offered: Every year, Spring

SW 610. Social Work Issues for Services for the Aging Population: Aging in the Social Environment. 3 Credits.
This specialized MSW course provides students with an opportunity to gain a better understanding of aging in the United States. The course uses multidisciplinary perspectives and examines aging as a process in the sociological, physiological, psychological and societal contexts. A major theme of the course is preparing students to meet the increasing demand of gerontological social work skills and knowledge as they operate at the individual, family, community and institutional levels.
Prerequisites: All generalist curriculum courses.
Offered: Every other year, Spring

SW 611. Social Work in Health-Related Settings. 3 Credits.
This specialized practice MSW course focuses on the roles and functions of social workers serving clients in a rapidly changing health and behavioral health care industry. A strengths-based, family-centered and culturally sensitive approach to practice in a variety of health and behavioral health care settings is presented.
Prerequisites: All generalist curriculum courses.
Corequisites: Take SW 602.
Offered: Every other year, Spring

SW 612. Social Work Practice in Child Welfare and Behavioral Health Settings. 3 Credits.
This specialized practice social work course focuses on the characteristics, strengths and service needs of families and children in the child welfare, behavioral health and juvenile justice systems. It examines issues and builds practice skills related to those facing separation, reunification, effects of traumatic experiences, and mental health concerns.
Prerequisites: All generalist curriculum courses.
Corequisites: Take SW 602.
Offered: Every other year, Spring

SW 613. Social Work Practice in Schools. 3 Credits.
This specialized practice social work course presents knowledge and skills for engaging in social work practice from preschool through high school in educational settings across the continuum from direct practice, to school and district level programming and policy, to partnering with community stakeholders to advance programming and policy.
Prerequisites: All generalist curriculum courses.
Corequisites: Take SW 602 SW 603.
Offered: Every year, Spring

SW 614. Social Work Issues in Health and Illness. 3 Credits.
This course discusses the importance of cultural and socioeconomic factors in the creation of major health disparities in the United States. Physiological, psychological, social and environmental factors are considered in relationship to cultural and socioeconomic factors in explaining both etiology and consequences of disease. The framework is applied to common diseases in the life course.
Prerequisites: All generalist curriculum courses.
Offered: Every other year, Spring

SW 620. International Social Welfare. 3 Credits.
This social work elective course introduces students to international social work in the United States and abroad through an understanding of the major theories of individual and family functioning that encompasses biophysical, cognitive, emotional, social and spiritual dimensions. Students master the central concepts of theories that provide the conceptual base for many tools of intervention utilized in international social work as well as with refugee, immigrant and migrant individuals and families at the local level.
Prerequisites: All generalist curriculum courses.
Offered: As needed, Fall and Spring

SW 621. Health Policy. 3 Credits.
This is an elective course on social welfare policy for specialized MSW students. This course is designed to prepare students to assess and understand the impact of American medical and health service programs and policies on human well-being. The concepts of social policy analysis are used in the evaluation and analysis of current programs and proposals for change.
Prerequisites: All generalist curriculum courses.
Offered: As needed, Fall and Spring
SW 622. Multicultural Practice in Communities and Organizations. 3 Credits.

This specialized elective course provides students with an understanding of multicultural practice in organizational and community settings. Students examine concepts and techniques of multicultural practice; consider and evaluate relevant strategies and tactics that promote multiculturalism, including community capacity building, empowerment processes, intercultural communication, diversity training and cross-cultural supervision, and apply them to both community organizing and community-based agency practice settings.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall and Spring

SW 623. Child and Family Social Services Policy. 3 Credits.

This specialized practice MSW course provides a perspective on public and private sector social policies and service programs for children and families. The course includes topics related to policy objectives; history and values underpinning services; administration, economics, and funding of services; politics, interest group activities, and evaluation of policy and programs. The course builds on the evaluative concepts of social policy analysis included in the generalist policy course.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall and Spring

SW 630. Clinical Social Work with Military Service Members and Families. 3 Credits.

This specialized clinical elective provides conceptual theories of best practice approaches with, and research findings on working with service members and their families, with a primary focus on service members who have served in combat. Topics covered include strengths-based assessment and core evidence-based treatment interventions, and prevention strategies for working with service members and their families. The impact of working with traumatized individuals and families on social workers is reviewed with recommendations for self-care.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Spring and Summer

SW 631. Clinical Social Work with Aging and Families. 3 Credits.

This specialized clinical elective covers practice with older adults and their families. The goals of this course are for students to: understand the aging process from a holistic perspective, including biophysical, psychological, social/economic and spiritual dimensions; develop knowledge and skills to conduct a competent psychosocial assessment and implement effective interventions with older adults and their caregivers; and be capable case managers in specific practice settings, such as adult protective services, retirement communities, hospices, and hospitals.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall

SW 632. Art Therapy for Clinical Social Work Practice. 3 Credits.

This specialized clinical elective course explores the principles of art therapy and considers the use of art in a therapeutic setting. Ethical guidelines are presented on the appropriate therapeutic use of art in a social work setting. The spectrum of art therapy and social work theory as related to the developmental lifespan is reviewed with emphasis on trauma-informed, attachment, strengths-based, humanistic, psychodynamic, CBT, DBT, mindfulness, multi-sensory and neuroscience approaches.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall

SW 633. Clinical Social Work Practice and Stress Management Techniques. 3 Credits.

The psychological, physiological and sociocultural aspects of stress are taught in this specialized clinical practice course. Stress management techniques are explored didactically and experientially. The purpose of this course is to teach students to understand the cognitive, affective and neurobiological impact of stress. Specific interventions to address traumatic stress also are discussed.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall

SW 634. Clinical Social Work with Substance Abuse and Addictive Behaviors Abuse and Addictive Behaviors. 3 Credits.

This course teaches the specialized practice social work student the theories and concepts of addiction. Students learn about the current research and approaches to counseling the chemically dependent client and/or family member, as well as the role of relevant systems, and how the addictive behavior affects these systems. The course emphasizes the application of social work values and ethics in the delivery of addiction services.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall

SW 635. Clinical Social Work Evidence-Based Treatment With Children and Adolescents. 3 Credits.

This specialized elective course provides students with a framework for understanding evidence-based mental health treatment with children and adolescents. Students become familiar with the most commonly used EBTs in the field and gain an understanding of the obstacles inherent in moving clinical practice from research to real-world settings. Models presented cover a range of diagnoses with an emphasis on children who have experienced emotional trauma. Individual, family and group treatment are addressed.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall

SW 636. Clinical Social Work in Relation To Death, Dying, Bereavement and Life-Threatening Illness. 3 Credits.

This specialized elective course provides a framework of knowledge, skills and values for culturally competent and responsive social work practice in helping clients who confront the issues of death and dying and life-threatening illnesses. A comparative, critically reflective approach to content is employed. Students explore experiences of clients dealing with these issues in relation to diversity of ethnicity or culture, age, gender, sexual orientation and social class.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall

SW 637. Clinical Social Work with Couples. 3 Credits.

This specialized clinical practice elective focuses on assessment and intervention in intimate relationships within clinical social work practice. The process and outcomes of working with intimate dyadic adult relationships is viewed from psychosocial, communication, cognitive, systems, object relations and attachment frameworks. Emphasis is on working with couples with a history of trauma.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall
SW 638. Clinical Social Work Treatment of Adults with Chronic Mental Illness. 3 Credits.
This specialized clinical practice elective focuses on social work treatment and care of adults with serious mental illnesses using empirical knowledge of recovery-oriented and evidence-based practices (EBPs) and evidence-based interventions (EBI). This course teaches practice models and methods of intervention for effective social work practice in community mental health services, including the promotion of mental health, the prevention of mental illnesses and the delivery of psychosocial treatments and rehabilitation services across diverse populations.
Prerequisites: All generalist curriculum courses.
Offered: As needed, Spring

SW 639. Inter-Personal Therapy (IPT) for Clinical Social Work Practice. 3 Credits.
This specialized clinical practice course focuses on interpersonal psychotherapy, an empirically supported intervention for depression in adolescents and adults. Adaptations for other mental health disorders are discussed.
Prerequisites: All generalist curriculum courses.
Offered: As needed, Spring

SW 640. Clinical Social Work Practice with Adult Trauma. 3 Credits.
This specialized clinical elective focuses on the conceptual theories of trauma from cognitive/behavioral, psychodynamic and attachment theory perspectives. Emphasis is on the role of gender, race, ethnicity and culture in individuals’ responses to trauma. Students apply diagnoses, assessment, psycho-education, stress management, affect regulation and emotional processing as core treatment components. The course includes application to selected groups, including adult survivors of complex PTSD such as sexual abuse, combat trauma and survivors of acute incident trauma.
Prerequisites: All generalist curriculum courses.
Offered: As needed, Spring

SW 649. Special Topics in Social Work. 3 Credits.
This course is offered to present a topic that is not part of the current course listings. It meets the curriculum standards of the MSW program for elective credit only.
Offered: As needed

Sociology (SO)

SO 500. Social Science Research Methods. 3 Credits.
In this course, students not only learn about what social scientists know, but also focus on how they know what they know. Students learn about the ways social scientists gather information in the study of our social world, how to do sociological research and how to evaluate the research of others. This is an active learning class in which participants learn by doing. In the beginning of the course, students focus on the fundamentals of research including the scientific method, the complexity of social research, ethics in research, value-free research and research design. This course is restricted to medical students only.
Offered: As needed

Spanish (SP)

SP 500. Special Topics. 3 Credits.
Offered: As needed

SP 501. Spanish Grammar. 3 Credits.
This intensive study of the Spanish language at the advanced level builds on students’ prior knowledge of the forms and paradigms of Spanish. Students receive instruction in verb tense usage, sentence syntax, lexical choices, nuances of word order and idiomatic usage. Emphasis is placed on composition skills and clarity of expression. Exercises to solidify knowledge are used extensively.
Offered: Every Third Year, Fall

SP 517. Literary Genres. 3 Credits.
Literary genres and their manifestations in Spanish and Spanish-American literature are studied in depth in this course.
Offered: As needed

SP 528. Spanish-American Literature. 3 Credits.
This study of the major literary productions from Spanish America begins with the Conquest, continues through the Colonial period, Independence, modernism, and early 20th-century realism, and concludes with manifestations of late 20th-century experimentation.
Offered: Every Third Year, Spring

SP 535. Nineteenth-Century Literature of Spain. 3 Credits.
Students in this course study the major works of poetry, drama and novel of 19th-century Spain. Movements include romanticism, realism and naturalism. Major authors considered are Espronceda, Zorrilla, Perez Galdos, and Alarcon.
Offered: Every Third Year, Spring

SP 548. Golden Age Drama and Poetry. 3 Credits.
This study of the major dramatists and poets of the Siglo de Oro (16th and 17th centuries) of Spain covers Renaissance and Baroque styles. Major authors considered include Lope de Vega, Tirso de Molina, Calderon de la Barca, Garcilaso and Gongora.
Offered: Every Third Year, Spring

SP 551L. Spanish Lab. 1 Credit.
Lab to accompany a graduate MAT Spanish course.
Offered: Every year, Spring

SP 552L. Spanish Lab. 1 Credit.
Lab to accompany a graduate MAT Spanish course.
Offered: Every year, Fall

SP 553L. Spanish Lab. 1 Credit.
Lab to accompany a graduate MAT Spanish course.
Offered: Every year, Summer

SP 565. Contemporary Spanish-American Fiction: Cien Anos de Soledad and la Casa de los espiritus. 3 Credits.
This course pairs two of the most highly acclaimed and frequently discussed novels of the second half of 20th-century Spanish America: “Cien anos de soledad” by Nobel Prize winner, Colombian, Gabriel Garcia Marquez (1967) and “La casa de los espiritus” by Chilean, Isabel Allende (1982). Students read and discuss both novels in depth in terms of their portrayals of Spanish-American history and culture and analyze the relationship between the two novels to develop an understanding of Allende’s challenge to Marquez’s cosmovision and sense of telos. Prerequisites: three literature courses taught in Spanish or acceptance into the MAT program in Spanish.
Offered: Every other year, Fall

SP 570. The Modern Spanish Short Story. 3 Credits.
The short story as a genre as well as 19th- and 20th-century masterpieces written in Spain and Latin America are explored with close literary and linguistic analysis of each text and also consideration of its cultural context.
Offered: Every year, Summer
SP 571. The Romance Languages. 3 Credits.
This linguistics course examines the origins and development of Romance languages with particular attention to Spanish.
Offered: Every year, All

SP 572. Hispanic Culture. 3 Credits.
This study of Latin American culture focuses on selected topics that have shaped the Hispanic world from 1492 to the present. Readings are drawn from history as well as literature.
Offered: As needed, All

SP 573. Contemporary Drama. 3 Credits.
Contemporary drama from Spain and Spanish America is studied in depth with close literary analysis of texts in combination with a consideration of their cultural contexts.
Offered: Every Third Year, Fall

SP 576. The Spanish Caribbean. 3 Credits.
This course studies the peoples, history and society of Puerto Rico, Cuba and the Dominican Republic as well as their artistic and literary expression. Also, features of the Spanish language (semantics and grammar) as spoken in the Caribbean are examined.
Offered: Every Third Year, Spring

SP 599. Independent Study. 1-6 Credits.
Directed study in topics in Spanish language, culture or literature of special interest to the student.
Offered: As needed, All

Special Education (SPED)

SPED 545. Introduction to the Exceptional Child. 4 Credits.
This course provides students with a broad overview of exceptional learners. It is a basic overview/survey of all areas and categories of special education. The purpose is to provide an introduction to students with exceptionalities for education as well as noneducation majors. Target subject areas include: knowledge of categorical labels, educational law, program planning and terminology used in the field. (Master’s programs: take Fall or Spring) (Certificate program: take January or Summer)
Offered: Every year

SPED 552. Teaching in the Inclusive Classroom. 3 Credits.
Treatment of exceptional individuals throughout history and the importance of societal values regarding their differences form the basis for students’ understanding of special education from its inception to current practices. Topics of discussion include: history and philosophy, laws, guidelines and procedures related to providing special education; the needs of students with exceptionalities, including giftedness; the particular needs of students for whom English is a second language; and instructional considerations for students with exceptionalities in inclusive settings. From a philosophic perspective, students learn skills to include children with exceptionalities in their elementary classrooms.
Corequisites: Take ED 452L.
Offered: Every year, Fall and Spring

SPED 565. Specific Learning Disabilities: Identification, Instruction and Assessment (LD). 4 Credits.
In this course, students have the opportunity to increase their knowledge of specific learning disabilities. Students discuss the supports and strategies that are successful in school so that there is a continuum of strategies that are practiced not just learned. The class expands the student’s understanding of the importance of responding to the learning needs of these students in a positive way to help them access the curriculum successfully. The class incorporates tools such as simulations and case studies to understand the challenges and overlaps these SLDs present. Students examine the role of SRBI in identification, as well as questions such as: what makes these disabilities so misdiagnosed/overlooked; which if any are inherited/preventable; are there hidden gifts/talents being overshadowed by LDs; how can including the family in our collaborative efforts benefit the student; how can we identify key strategies to support these students emotionally as well as academically? (Master’s programs, take Fall or Spring) (Certificate program, take Summer)
Offered: Every year

SPED 566. Autism Spectrum Disorders. 4 Credits.
Educational practitioners develop a knowledge base of methods for working with students diagnosed with Autism Spectrum Disorders (ASD) and associated communication disorders. Focus is on the identification of students, as well as the program planning based on instructional strategies in the areas of academic, behavioral, social-emotional and communication. (Master’s programs, multiple semesters) (Certificate program ONLY, take in January term)
Offered: Every year

SPED 567. Independent Research in Special Education. 1 Credit.
This course focuses on research in the field of special education as it relates to students in the educational setting. The research project should include the application of evidence-based practice, the role of families in the educational process and the effects of the disability on lifelong learning. Specific topics/projects must meet with faculty approval. This course is only required for the 12-credit Certificate of Completion in Special Education.
Prerequisites: Take SPED 565 or SPED 566.
Offered: Every year, Spring

SPED 568. Assessment/Program Planning and Evaluation of Children with Special Needs. 3 Credits.
In this course, candidates prepare to administer, score and interpret a wide range of criterion referenced, norm referenced and curriculum-based measurements. Candidates utilize information to identify students with specific learning disabilities, make valid recommendations for programming, design appropriate IEP goals and objectives based on the results, and share information with parents and other professionals.
Offered: Every year, Fall and Spring

SPED 570. Special Education Law. 3 Credits.
This course focuses on current and relevant federal and state legislation in the field of special education. Special attention is paid to the interplay of services and protections provided by IDEA, Section 504 of the Rehabilitation Act, and the Americans with Disabilities Act (ADA). In addition, candidates examine the materials to understand the Every Student Success Act (ESSA) that was recently signed into law. Candidates learn how the law affects the planning and delivery of services to children, adolescents and adults with special needs from birth through adulthood. Candidates learn to interpret case law as well as statutes and other legal memoranda that apply to the rights and protections afforded to people with special needs.
Offered: Every year, Fall and Spring
SPED 571. Emotional and Behavioral Disorder Identification, Management, and Assessment. 3 Credits.
This course examines social-emotional-behavioral functioning in the educational setting. Methods of identification, assessment and instructional planning for students with social-emotional-behavioral disorders are addressed in depth. Comprehensive coverage of behavior management, discipline models and building systems of support are examined and discussed. In this way, behavior and/or different learning needs are understood, modifications and supports are put in place and the student is actively engaged in practicing them. This student-centered method results in positive outcomes across the span of the student's life because the student learns and internalizes successful strategies that work consistently.
Offered: Every year

SPED 572. Educating Young Children with Special Needs. 3 Credits.
The needs of the young child with disabilities are explored through an examination of social, adaptive, environmental and family characteristics. Candidates learn how to assess children and provide a developmentally appropriate curriculum. The differences between IEPs and IFSP are a focal point, as well as the importance of working with families and professionals in birth to three programs, preschool programs, and kindergarten through grade 2 classrooms. Community services for the young special needs child also are discussed.
Offered: Every year

SPED 573. Reading Disorders: Assessment, Planning and Instruction. 3 Credits.
This course provides candidates with the knowledge and skills needed to provide appropriate evaluation, program planning and educational experiences for students with reading disorders, including Dyslexia. Specifically, reading assessments, diagnosis of reading disorders, IEP goals/objectives and program recommendations are explored and discussed. Reading instruction at the intervention and special education identification levels are discussed to ensure students' ability to plan educational programming for students including those with Dyslexia. Further, instructional strategies to support students with reading disabilities who are included in the regular education setting are emphasized. Various methodologies to support students with Dyslexia as they access the regular education curriculum and instruction are included.
Offered: Every year, Fall and Summer

SPED 574. Understanding and Teaching Students with Intellectual Disabilities. 3 Credits.
This course provides candidates with the information necessary to provide appropriate educational experiences for students with low incidence disabilities, including intellectual impairments, physical impairments and those with multiple areas of impairment. The focus is on promoting participation in the school, home and community through developing appropriate transition goals. Emphasis is placed on the use and effectiveness of assistive technologies in working with these students.
Offered: Every year

SPED 575. Working with Gifted and Talented Students. 3 Credits.
This course focuses on characteristics of students identified as "gifted" and "talented." Attention also is paid to those who are "twice exceptional." Candidates explore the early development of these children as well as the ways in which their gifts may affect their relationships with their siblings and families. Areas of study include identification, curriculum design and understanding how to provide for their unique social and emotional development, as well as their academic achievement. (Elective)
Offered: Every year, Fall and Spring

SPED 576. Designing and Utilizing Assistive Learning Technologies. 3 Credits.
This course explores the use of technology to support achievement for individuals with different learning needs. Topics include an overview of the continuum of assistive technologies, from simple to complex; a discussion of theoretical bases, support and guidelines for the use of these technologies; an examination of the principles of Universal Design for Learning; and the exploration of specific tools and devices. Course projects emphasize hands-on experience in using these approaches. (Elective)
Offered: Every year, Fall and Spring

SPED 579. Practicum in Special Education I. 3 Credits.
This course is the first of two separate 3-credit practicums designed to provide each candidate professional practice and authentic experiences working with students who qualify under IDEA as needing special education and related services. In addition to coursework, participants spend 36 contact hours observing, planning, instructing and assessing the students. Hours and reflections are recorded in a journal daily. Candidates must design and teach a 10-minute mini-lesson that is filmed. All data collected throughout each practicum is compiled in an e-portfolio, which catalogs the activities undertaken by the candidates including an analysis and description as well as artifacts collected. The candidate, the onsite cooperating teacher and the university professor meet during the practicum to outline the expectations, standards and activities necessary to successfully meet the requirements. Additional meetings are arranged as needed.

SPED 580. Practicum in Special Education II. 3 Credits.
This course is the second of two separate 3-credit practicums designed to provide each candidate professional practice and authentic experiences working with students who qualify under IDEA as needing special education and related services. For this Practicum, candidates must choose a completely different disability than they did in SPED 579. In addition to coursework, participants spend 36 contact hours observing, planning, instructing and assessing the students. Hours and reflections are recorded in a journal daily. Candidates must design and teach a 10-minute mini-lesson that is filmed. All data collected throughout each practicum is compiled in an e-portfolio, which catalogs the activities undertaken by the candidates including an analysis and description as well as artifacts collected. The candidate, the onsite cooperating teacher and the university professor meet during the practicum to outline the expectations, standards and activities necessary to successfully meet the requirements.

Prerequisites: Successful completion of SPED 579 Practicum I.
Offered: Every year

SPED 581. Research in Special Education. 3 Credits.
Candidates submit a proposal for research based on an area of interest in special education. Upon approval of their proposal, they conduct research, collect data and present their findings in a thesis as a culminating requirement for their MS in Special Education. This course is required only for candidates enrolled in the MS in SPED who are not seeking cross-endorsement in Comprehensive Special Education.

Prerequisites: Completion of 27 credits in SPED coursework.
Offered: Every year
Strategic Communication (STC)

STC 501. Principles and Theories of Public Relations. 3 Credits.
Students are introduced to the growing body of knowledge in the discipline and gain expertise that contributes to professional competence in public relations. Students examine the function of public relations in organizations and society, review contemporary and historical roles of public relations professionals and explore the practice of public relations in various public and private settings. Students also learn the latest theoretical approaches to public relations and apply these approaches to contemporary public relations management practices.
Offered: Every year, Fall

STC 502. Public Relations Research Methods. 3 Credits.
This course examines the applied use of research in public relations program development. Students learn methodologies appropriate for conducting secondary analyses and primary research. Both quantitative and qualitative methods are addressed, such as secondary analysis, content analysis, survey research, focus groups, participant observation, case study and experimentation.
Offered: Every year, Fall

STC 503. Public Relations Research Design. 3 Credits.
This course focuses on the practical aspects of designing and implementing a public relations research project. Students develop problem statements, conduct literature reviews, write research questions and prepare research proposals. Ethical and methodological issues involved in research design are discussed. The course also familiarizes students with IRB protocols and helps them hone scholarly and professional writing skills, including the proper use of citations.
Prerequisites: Take STC 501 STC 502.
Offered: Every year, Spring

STC 504. Law and Ethics in Public Relations. 3 Credits.
Students become familiar with legal and industry standards for legally and ethically practicing public relations. The course aims to instill an appreciation for freedom of expression and the First Amendment; to impart a functional understanding of legal rules and principles relevant to public relations practice in the U.S.; to enhance students’ ability to identify the moral and ethical dimensions of issues that arise in public relations practice; and to develop analytical and critical thinking skills that encourage students to make and justify ethical decisions.
Offered: Every year, Fall

STC 505. Public Relations Writing. 3 Credits.
This course helps students develop professional-quality public relations writing skills. Students prepare a variety of public relations materials, such as news releases and other media materials; copy for internal magazines, reports, newsletters, brochures, institutional/advocacy advertising; video/audio scripts; web site copy; and speeches. Upon completion of this course, students have a professional portfolio of public relations writing samples.
Offered: Every year, Fall

STC 506. Public Relations Management. 3 Credits.
This course focuses on the business management aspects of public relations, such as policy formation, project direction, resource management, client relations, budgeting and counseling. Special emphasis is placed on public relations’ contribution to an institution’s mission and effectiveness.
Prerequisites: Take STC 501.
Offered: Every year, Spring

STC 507. Strategic Planning in Public Relations. 3 Credits.
This course familiarizes students with the public relations strategic planning process. Students examine contemporary case studies that demonstrate the public relations planning process and apply what they have learned to the development and presentation of a public relations campaign plan for a client.
Prerequisites: Take STC 501.
Offered: Every year, Spring

STC 510. Crisis Management. 3 Credits.
This course examines institutional crisis communication from a management perspective with an emphasis on crisis prevention, planning and response. Students are required to read and discuss selected articles from the crisis management literature, research and develop case studies of contemporary crises, and participate in simulations designed to develop professional expertise and practical skills in crisis management, including the management of information, management of public communication, strategic planning, problem solving, message production and issues management.
Offered: As needed

STC 511. Global Strategy. 3 Credits.
This course examines concepts, issues and practices in international public relations across the borders and focuses on the challenges, opportunities, and the worldwide development of public relations. The course aims to inform you about the variables that affect public relations practice in the international realm and assist you in understanding of other countries’ domestic public relations given the various cultures, geopolitical and socio-economic systems. Participants look closely at how governments, corporations, multinationals and nongovernmental organizations employ international public relations strategies around the world. Students also examine similarities between international public relations and public diplomacy and the effects of international public relations on images of nations.
Offered: As needed

STC 512. Investor Relations. 3 Credits.
Students study the function of investor relations in corporations and examine the role of investor relations specialists charged with communicating financial information about companies to the financial media, SEC, financial analysts, shareholders and others in the financial community. Students learn how to integrate finance, communication, marketing and securities law compliance in efforts to maximize shareholder wealth.
Offered: As needed

STC 513. Health and Strategic Communications. 3 Credits.
In this course, students are exposed to the field of strategic health communications, with particular attention to analysis and practice of health communication relationships and messages. Issues to be discussed include, but are not limited to: history and current challenges of the health communication field; health campaign creation, implementation and evaluation; cultural issues related to health behavior change campaigns; translational research; traditional and social media training for health care professionals; and perspectives of media influence on health attitudes, norms and behaviors.
Offered: As needed

STC 514. Social and Mobile Media. 3 Credits.
This course addresses the impact of social and mobile media on public relations. It focuses on conducting public relations campaigns online and responding to public relations issues via such tools as social networking and bookmarking sites, blogs, podcasts/vodcasts, discussion boards and conferences, wikis, mobile and location-based applications.
Offered: As needed
STC 515. Special Topics in Public Relations. 3 Credits.
This course examines a specific topic or issue in public relations theory and practice. Topics might focus on specific practice areas such as sports public relations, employee relations, political public relations, public diplomacy, nonprofit public relations, or on industry issues and trends, such as the uses and impact of new technologies, professional ethics and corporate social responsibility or the integration of communication practices.
Offered: As needed

STC 516. Branding Strategies. 3 Credits.
This course explores strategies used by planners, communicators, managers and consultants to create, develop, nurture, maintain and reenergize brands. This course helps students understand the main idea of branding: developing, defending and growing brands for companies, agencies or nonprofits. It explores the essential elements of branding, including target audiences and segmentation, brand benefits, brand personality, differentiation and key brand equities. It also surveys conceptual approaches for the diagnosis of brand growth opportunities and for planning integrated brand communications.
Offered: Every year, Fall and Spring

STC 517. Strategic Communication for Health Professionals. 3 Credits.
In this course, graduate students are exposed to the field of strategic health communication. In particular, students are asked to consider the role of health communication messages in internal, organizational settings, as well as outward-facing messages. Unique to this graduate-level strategic communication course, the students are expected to have minimal to no experience in the field of strategic communication. Instead, the overview of the field provided through this course seeks to encourage understanding of how the theories, practices and evaluations of health communication should be incorporated within their areas of health expertise.
Offered: Every year, Spring

STC 518. Measurement and Evaluation. 3 Credits.
This course focuses on the development of knowledge and skills to ensure that students are able to use data to make business decisions. Students consider key concerns of measurement to determine if measurement tools are effective and appropriate for a project's goals, as well as how to make sense of data to measure success of a project and how to display findings for various audiences. The course is focused on the principles and process of utilizing research to best serve your client's or organization's goals. Main topics for the course include measurement development and refinement, online data analytics, audience segmentation, data interpretation and data visualization.
Offered: Every year, Fall and Spring

STC 519. Strategic Public Relations and Reputation Management. 3 Credits.
The focus of this course is reputation management and its importance to business success. Students analyze the function of corporate communications and examine a range of topics including organizational identity, image and reputation; issues and crisis management; institutional ethics and corporate social responsibility; strategic public relations planning; integrated marketing communication; public relations theories and best practices; and global public engagement. The class also explores specialty public relations practice areas such as media relations, investor relations, employee relations and government relations. Class discussions, case studies, in-class exercises, team projects and essay exams help students improve their critical thinking and reasoning skills, develop research and strategic planning skills and increase diversity awareness and sensitivities that are important to professional and business success.
Offered: As needed

STC 530. Strategic Communications Independent Study. 1-6 Credits.
Offered: As needed

STC 531. Graduate Internship in Public Relations. 3 Credits.
Students complete a minimum of 90 hours of professional fieldwork supervised by the program director and a qualified field supervisor. Approval of the program director is required.
Offered: Every year, All

STC 601. Public Relations Professional Project. 6 Credits.
Students develop a professional research project under the direction of program faculty.
Prerequisites: Take STC 501 STC 502 STC 503.
Offered: Every year, All

STC 602. Public Relations Research Thesis. 6 Credits.
Students develop a research thesis under the direction of program faculty.
Prerequisites: Take STC 501 STC 502 STC 503.
Offered: Every year, All

STC 603. Candidacy Continuation. 0 Credits.
This course is required of all students who are not registered for any graduate courses in the program but who continue working toward the completion of their degree. Requires permission of the program director.
Offered: As needed

STC 605. Public Relations Graduate Capstone. 3 Credits.
Students develop a professional research project under the direction of program faculty. The project work should exhibit KSA's and/or serve as PRSA Readiness Review preparation. Students may enroll in this course once they have completed 30 credits in the program. The capstone project is a personally designed, independently conducted activity, enabling students to further their knowledge/skill in one or more of the course topics that students have found especially interesting or beneficial. Permission of instructor required. This course is graded on a pass/fail basis.
Offered: Every year, Summer

STC 606. Independent Study. 3 Credits.
Students develop and implement individual research projects that advance understanding of particular theoretical or practical aspects of public relations. Approval of the program director is required.
Offered: As needed
**Strategy (STR)**

**STR 610. Business Sustainability.** 3 Credits.
This course provides students with a comprehensive conceptual and applied understanding of the sustainability challenges and opportunities facing corporations on a global scale, with primary emphasis on environmental sustainability. Students are exposed to a variety of pressing sustainability issues and to frameworks, techniques and approaches for successfully dealing with them.

**Offered:** Every year

**STR 620. Technology and Innovation Management.** 3 Credits.
Technology and innovation have become key resources for corporate profitability and competitive advantage in firms. Managed properly, technological innovations are a primary source of competitive advantage for firms. This course explores the strategic role of technology and innovation in the success of firms. Classroom learning is facilitated primarily through case analyses.

**Offered:** Every year

**STR 630. Corporate Governance.** 3 Credits.
Corporate governance deals with the complex set of relationships between the corporation and its stakeholders. This course emphasizes governance issues in publicly traded companies and addresses the roles and responsibilities of managers, the board of directors, shareholders and others. Governance best practices as well as governance legal and ethical violations are discussed. Important government regulations including Sarbannes-Oxley are covered.

**Offered:** As needed
