The course provides an analysis of the characteristics of effective schools and the leadership theories and concepts related to the change process. Emphasis of the course is on the application of these theories and concepts to the practice of improving the work of the school and the achievement of all students. Case studies focus on analysis of schools in need of improvement, the specific issues facing the schools, data analysis techniques, effective leadership practices, strategic planning, financing improvement plans and evaluation processes. The course includes a field-based project where students collect and analyze the data for improvement efforts of a school that has successfully increased achievement over time.

Offered: Every year

EDL 607. Administrative Internship in Educational Leadership. 3 Credits.

This course is a field-based administrative experience requiring the intern to assume a leadership role and authentically apply of the Connecticut Standards for Educational Leaders. The intern applies a systems perspective theory of action to strategic and equity planning. The intern builds a cultural competency with an emphasis on promoting equitable learning experiences in student-centered environments. The internship is planned, guided and evaluated by the student, the university supervisor and the field site mentor, who is a licensed practicing administrator. The course culminates in the development of an electronic portfolio, which represents the work during the internship.

Prerequisites: Take EDL 601, EDL 603, EDL 605.

Offered: Every year

EDL 609. Educational Program Evaluation. 3 Credits.

This course provides an introduction to the concepts and approaches in educational program planning and evaluation with an emphasis on the responsibilities of school leaders to use program evaluation to improve teaching and learning. The interpretation of data collected through the program evaluation process is emphasized so that decisions may be made to continue, restructure or terminate educational programs. Case studies focus on critiquing program evaluations and students are required to plan and conduct an assessment of an educational program in their school or district.

Offered: Every year

EDL 611. Educational Law. 3 Credits.

This course provides a practical analysis of constitutional law, federal and state statutes, regulations, case studies and executive agency opinions related to the rights of students and school employees. Emphasis is on the basic principles of school law and the responsibilities of teachers and administrators. Case studies focus on legal claims brought to before U.S. courts by students, parents, teachers, administrators and the public.

Offered: Every year

EDL 613. Public School Finance. 3 Credits.

This course provides a comprehensive, detailed overview of the budget development resource allocation processes derived from the planning guidelines associated with school financial operations. Theoretical and practical treatments of the budget process are examined, with a focus on the budget as a tool to accomplish school goals. Case studies and practical exercises focus on how schools can utilize the budgeting process and both competitive and entitlement grants to reallocate and manage resources to improve educational programs and student learning.

Offered: Every year

EDL 615. Conflict Resolution and Transformational Leadership. 3 Credits.

This course introduces theories and applied strategies of conflict resolution through the lens of becoming a transformational leader. The course will focus on the multiple constituencies served by the contemporary educational leader: families, colleagues, students, staff, boards of education, and broader communities, and how conflict resolution applies in such varying contexts. Focus on modes of communication, both written and oral, enhancing listening skills and providing opportunities for transformation through building supportive communities will be highlighted.

Prerequisites: Take EDL 601.

Offered: Every year, Summer

EDL 700. Connecticut Administrators Test. 0 Credits.

Instructional Design and Technology (IDN)

IDN 525. Foundations of Instructional Design. 3 Credits.

This course introduces some of the more widely used models of instructional design, including ADDIE, First Principles of Design, and the Systems Approach. Students investigate each phase of the instructional design process, along with appropriate elaboration on the concepts involved. To help you connect in-class learning and real-world applications, this course requires you to identify a local organization (e.g., school, community center, corporation), conduct a needs assessment to identify an instructional need, and design an instructional solution.

Offered: Every year, Fall and Spring

IDN 526. Cognitive Science and Educational Design. 3 Credits.

This course examines theoretical perspectives and empirical evidence on learning, instruction and the use of digital resources for education. Focus is on the application of theory to guide design decisions. Readings include empirical studies as well as theoretical material to help students become comfortable with reading, interpreting and applying theory and research to design. The final project for the course is a design proposal and prototype for an instructional media resource.

Offered: Every year, Fall

IDN 527. Society, Culture and Learning. 3 Credits.

This course examines theories, approaches, and environments that address social and cultural contexts for learning. Students investigate a range of resources that reflect the importance of society and culture in their design, analyzing the influences that shape them. Readings include both theoretical material and research studies, with an emphasis on practical applications of theory. The final project for the course is a design proposal and prototype for an instructional media resource that specifically addresses social and cultural considerations.

Offered: Every year, Spring

IDN 528. Collaborative Design of Digital Environments. 3 Credits.

This course focuses on the design of learning environments as a collaborative effort. Using a design thinking approach, students simultaneously explore the principles of remote collaborative work and apply what they learn to their own engagement in small teams. Throughout the semester, these teams engage in brainstorming, storyboarding and the creation of a web-based learning resource.

Offered: Every year, Fall

IDN 529. Educational Media Design Lab. 3 Credits.

This course examines the principles, techniques and current practices used to produce and/or deliver interactive multimedia applications for education. Through a series of project-based assignments, students gain experience with a range of software tools used to create media artifacts such as text, graphics, animation, audio and video. Course makes use of a variety of applications based on each student's specific interests, needs and level of proficiency.

Offered: Every year, Spring

IDN 530. Web Design for Instruction. 3 Credits.

What factors contribute to an effective web design that can engage users and support their learning? In this course, students investigate web-based instructional resources. They examine relevant theoretical frameworks and use these principles to analyze the design of existing web resources, including graphics and functionality. Students develop a design document and a working prototype of a web-based instructional resource using various web design tools. Topics include principles of HTML, CSS, UX, and approaches to mobile design.

Offered: Every year, Summer

IDN 531. Design of Interactive Educational Environments. 3 Credits.

This course examines the design of interactive environments, including games, simulations and microworlds, from both theoretical and practical perspectives. Topics include information representation, types of interactivity, user control and pedagogical implications of interactivity, as well as the effective design of these resources for education. Students develop proficiency in the use of an interactive authoring environment or game design platform, depending on the individual's technical background, creating a functioning prototype of their design.

Offered: Every year, Summer

IDN 532. Design and Development of Online Learning. 3 Credits.

What does it take to design a compelling online learning experience, one that engages students and fosters their construction of new understandings? This class examines current approaches to planning, development and implementation of online courses. Students apply research-based principles and methods to develop an online "mini-course," designed to support a successful learning experience for the user. This course provides excellent foundational training in Learning Management Systems.

Offered: Every year, Fall and Summer

IDN 533. Producing Educational Video and Digital Training. 3 Credits.

This course examines the use of video in education, including theoretical approaches to visual learning as well as practical considerations about planning, writing, producing and integrating video resources. Students investigate artistic and technical practices used in combining audio, still images and moving pictures into coherent messages. Additional topics include directing, cinematography, audio, lighting, editing and effective distribution. Depending on levels of technical preparation, students use a range of applications to plan and produce short video segments.

Offered: Every year, Fall

IDN 534. Implementing Digital Media for Learning. 3 Credits.

This course examines the challenges of implementing digital environments for learning in real-world contexts. Through research articles and case studies, students explore issues such as selecting, budgeting and evaluating technology resources. Within the structure of the class, students may choose to focus on implementing media in K-12 environments (in and out of school), higher education, industry or public spaces.

Offered: As needed

IDN 535. New Directions in Digital Environments for Learning. 3 Credits.

As new digital resources are developed, instructional designers need to be able to understand and evaluate their practicality and value for educational use. This course allows students to explore new and changing technologies, applications and approaches. By definition, topics in this course change each time it is offered, but may include such areas as virtual and augmented reality, handheld devices and interactive media.

Offered: Every year, Spring

IDN 536. Independent Study. 3 Credits.

This course includes supervised study of special topics in instructional design. This option is designed to allow a student to further customize his or her course of study if needed. Each student must submit a proposed course of study including assessment plan for approval prior to enrolling.

Offered: As needed

IDN 537. Designing and Utilizing Assistive Learning Technologies. 3 Credits.

This course explores the use of technology to support achievement for individuals with different learning needs. Topics include an overview of the continuum of assistive technologies, from simple to complex; a discussion of theoretical bases, support and guidelines for the use of these technologies; an examination of the principles of Universal Design for Learning; and the exploration of specific tools and devices. Course projects emphasize hands-on experience in using these approaches.

Offered: Every year, Fall and Spring

IDN 550. Capstone Experience. 3 Credits.

The capstone is the culmination of students' work in the instructional design program. It prepares students to enter the workforce as instructional designers. In this final course, students design and develop a unique project which reflects the skills and knowledge gained throughout the program. The project serves to demonstrate fluency with the elements of an instructional design analysis, technical competency, and the ability to use theory to inform design.

Offered: As needed

Social and Emotional Learning (SEL)

SEL 600. Introduction to Social and Emotional Learning (SEL) and School Climate: Academy/Orientation. 1 Credit.

This course introduces students to the basic technology used throughout the program. Students receive a preview of the contents of the other courses to gain an understanding of how they connect to the development of the capstone project. Self-paced over 12 weeks.

Offered: Every year, Summer

SEL 601. Research Deep Dive - Social and Emotional Learning and School Climate. 3 Credits.

This course provides an introduction to the foundational research in social and emotional learning and school climate, as well as an introduction to critiquing research. The research reviewed is drawn from multiple fields, including child and cognitive development, trauma-informed instruction, and learning science.

Prerequisites: Take SEL 600.

Offered: Every year, Fall Online

SEL 602. Self-Care and Resiliency for Practitioners. 3 Credits.

This course focuses on the importance of healthy adults in promoting proactive and collaborative SEL climates. Using narrative explorations to promote resiliency, this course builds awareness around multi-voiced concepts of what self-care and resiliency mean, and considers how Intersectional issues of race, class, gender, and sexuality further inform and complicate SEL curricula and school change initiatives.

Prerequisites: Take SEL 601.

Offered: Every year, Fall Online

SEL 603. Transforming Instruction with SEL Insights. 3 Credits.

This course focuses on transforming curriculum and pedagogy with insights from research relating to SEL. Students gain an understanding of culturally relevant pedagogy, whole child needs assessments, and holistic management and instruction tools.

Prerequisites: Take SEL 602.

Offered: Every year, Spring Online

SEL 604. Leadership for SEL School Communities. 3 Credits.

This course develops skills to lead school communities in the promotion of whole child well-being and supportive climates for teachers, students, staff and families. Students work to understand the effects of policy and procedures with an SEL lens, and also learn consensus, collaboration and no-fault problem-solving strategies.

Prerequisites: Take SEL 603.

Offered: Every year, Spring Online

SEL 605. SEL Capstone Planning Project. 1 Credit.

Candidates design a self-defined capstone project, which implements their study and critique of the research to an applied problem of practice in their respective school environments. Each candidate is responsible for planning the development, implementation and assessment design of the project under the guidance of a university mentor and adviser.

Prerequisites: Take SEL 604.

Offered: Every year, Summer Online

SEL 606. Capstone Implementation Project. 1 Credit.

Candidates implement the project designed in the summer SEL 605 planning capstone. Project data is collected and analyzed with the oversight of the university adviser and mentor. Project results are presented in the fall semester for certificate completion.

Prerequisites: Take SEL 605.

Offered: Every year, Fall Online

Special Education (SPED)

SPED 245. Introduction to the Exceptional Child. 3 Credits.

This course provides students with a broad overview of exceptional learners. It is a basic overview/survey of all areas and categories of special education. The purpose is to provide an introduction to students with exceptionalities for education as well as noneducation majors. Target subject areas include: knowledge of categorical labels, educational law, program planning and terminology used in the field.

Offered: Every year, Fall and Spring

SPED 370. Special Education Law. 3 Credits.

This course focuses on current and relevant federal and state legislation in the field of special education. Special attention is paid to the interplay of services and protections provided by IDEA, Section 504 of the Rehabilitation Act, and the Americans with Disabilities Act (ADA). In addition, candidates examine the materials to understand the Every Student Success Act (ESSA) that was recently signed into law. Candidates learn how the law affects the planning and delivery of services to children, adolescents and adults with special needs from birth through adulthood. Candidates learn to interpret case law as well as statutes and other legal memoranda that apply to the rights and protections afforded to people with special needs.

Offered: Every year, Spring

SPED 501. Seminar and Mentoring I. 1 Credit.

This course is the first of three seminars that you will take during your program. It is designed to help beginning special education teachers explore the issues that they will encounter in classrooms during their internship. The focus will be on developing an understanding of the laws that govern special education and how they influence the diverse student makeup of our classrooms. Students will be provided with a broad overview of exceptional learners. Knowledge of categorical labels, program planning, behavior management and terminology used in the field of special education will be targeted.

Offered: Every year, Fall

SPED 502. Seminar and Mentoring II. 1 Credit.

This second seminar course is designed to support beginning special education teachers as they continue to gain experience in working with special needs students. The focus will be on methods of assessments, progress monitoring, data collection, and program planning. Providing appropriate accommodations and/or modifications to curriculum will also be discussed. Learning modules and other resources will be combined with class discussions on crucial topics in the field of special education.

Prerequisites: Take SPED 501

Offered: Every year, Spring

SPED 503. Seminar and Mentoring III. 1 Credit.

This is the final seminar that you will take during your program. It is designed to continue to help beginning special education teachers explore the issues that they will encounter in classrooms during their internship. The focus of this seminar will be on developing an understanding of the specific learning strategies used in the field of special education. Teacher candidates will learn specific strategies and how to provide instructional support to exceptional students so that they can become independent learners. Data based instructional planning will also be included. Transition planning for students planning for post-secondary schooling will also be covered.

Prerequisites: Take SPED 502

Offered: Every year, Fall

SPED 545. Introduction to the Exceptional Child. 3 Credits.

This course provides students with a broad overview of exceptional learners. It is a basic overview/survey of all areas and categories of special education. The purpose is to provide an introduction to students with exceptionalities for education as well as noneducation majors. Target subject areas include: knowledge of categorical labels, educational law, program planning and terminology used in the field.

Offered: Every year, All

SPED 552. Teaching in the Inclusive Classroom. 3 Credits.

Treatment of exceptional individuals throughout history and the importance of societal values regarding their differences form the basis for students' understanding of special education from its inception to current practices. Topics of discussion include: history and philosophy, laws, guidelines and procedures related to providing special education; the needs of students with exceptionalities, including giftedness; the particular needs of students for whom English is a second language; and instructional considerations for students with exceptionalities in inclusive settings. From a philosophic perspective, students learn skills to include children with exceptionalities in their elementary classrooms.

Prerequisites: Take ED 341 or ED 571;

Corequisites: Take ED 452L.

Offered: Every year, Fall and Spring

SPED 564. Teaching Students with Reading and Math Disorders. 3 Credits.

In this course, students will develop a greater understanding of reading and math disorders including dyscalculia and dyslexia. This course addresses the neuro-biological origins of dyslexia and dyscalculia and the effects on language, literacy, and mathematics development. Students will study the characteristic symptoms of each disability/disorder, implications of each disorder, diagnosis, and teaching methodologies to support students with these disorders. Students will learn how design and implement evidence-based literacy and math instruction to reach diverse learners.

Offered: Fall

SPED 565. Specific Learning Disabilities: Identification, Instruction and Assessment (LD). 4 Credits.

In this course, students have the opportunity to increase their knowledge of specific learning disabilities. Students discuss the supports and strategies that are successful in school so that there is a continuum of strategies that are practiced not just learned. The class expands the student's understanding of the importance of responding to the learning needs of these students in a positive way to help them access the curriculum successfully. The class incorporates tools such as simulations and case studies to understand the challenges and overlaps these SLDs present. Students examine the role of SRBI in identification, as well as questions such as: what makes these disabilities so misdiagnosed/overlooked; which if any are inherited/preventable; are there hidden gifts/talents being overshadowed by LDs; how can including the family in our collaborative efforts benefit the student; how can we identify key strategies to support these students emotionally as well as academically?

Offered: Every year, All

SPED 566. Autism Spectrum Disorders. 4 Credits.

Educational practitioners develop a knowledge base of methods for working with students diagnosed with Autism Spectrum Disorders (ASD) and associated communication disorders. Focus is on the identification of students, as well as the program planning based on instructional strategies in the areas of academic, behavioral, social-emotional and communication.

Offered: Every year, All

SPED 568. Assessment/Program Planning and Evaluation of Children with Special Needs. 3 Credits.

In this course, candidates prepare to administer, score and interpret a wide range of criterion referenced, norm referenced and curriculum-based measurements. Candidates utilize information to identify students with specific learning disabilities, make valid recommendations for programming, design appropriate IEP goals and objectives based on the results, and share information with parents and other professionals.

Offered: Every year, Fall and Spring

SPED 570. Special Education Law. 3 Credits.

This course focuses on current and relevant federal and state legislation in the field of special education. Special attention is paid to the interplay of services and protections provided by IDEA, Section 504 of the Rehabilitation Act, and the Americans with Disabilities Act (ADA). In addition, candidates examine the materials to understand the Every Student Success Act (ESSA) that was recently signed into law. Candidates learn how the law affects the planning and delivery of services to children, adolescents and adults with special needs from birth through adulthood. Candidates learn to interpret case law as well as statutes and other legal memoranda that apply to the rights and protections afforded to people with special needs.

Offered: Every year, Fall and Spring

SPED 571. Emotional and Behavioral Disorder Identification, Management, and Assessment. 4 Credits.

This course examines social-emotional-behavioral functioning in the educational setting. Methods of identification, assessment and instructional planning for students with social-emotional-behavioral disorders are addressed in depth. Comprehensive coverage of behavior management, discipline models and building systems of support are examined and discussed. In this way, behavior and/or different learning needs are understood, modifications and supports are put in place and the student is actively engaged in practicing them. This student-centered method results in positive outcomes across the span of the student's life because the student learns and internalizes successful strategies that work consistently.

Offered: Every year

SPED 572. Educating Young Children with Special Needs. 3 Credits.

The needs of the young child with disabilities are explored through an examination of social, adaptive, environmental and family characteristics. Candidates learn how to assess children and provide a developmentally appropriate curriculum. The differences between IEPs and IFSP are a focal point, as well as the importance of working with families and professionals in birth to three programs, preschool programs, and kindergarten through grade 2 classrooms. Community services for the young special needs child also are discussed.

Offered: Every year, Summer

SPED 573. Reading Disorders: Assessment, Planning and Instruction. 3 Credits.

This course provides candidates with the knowledge and skills needed to provide appropriate evaluation, program planning and educational experiences for students with reading disorders, including Dyslexia. Specifically, reading assessments, diagnosis of reading disorders, IEP goals/objectives and program recommendations are explored and discussed. Reading instruction at the intervention and special education identification levels are discussed to ensure students' ability to plan educational programming for students including those with Dyslexia. Further, instructional strategies to support students with reading disabilities who are included in the regular education setting are emphasized. Various methodologies to support students with Dyslexia as they access the regular education curriculum and instruction are included.

Offered: Every year, Fall and Summer

SPED 574. Understanding and Teaching Students with Intellectual Disabilities. 3 Credits.

This course provides candidates with the information necessary to provide appropriate educational experiences for students with low incidence disabilities, including intellectual impairments, physical impairments and those with multiple areas of impairment. The focus is on promoting participation in the school, home and community through developing appropriate transition goals. Emphasis is placed on the use and effectiveness of assistive technologies in working with these students.

Offered: Every year

SPED 575. Working with Gifted and Talented Students. 4 Credits.

This course focuses on characteristics of students identified as "gifted" and "talented." Attention also is paid to those who are "twice exceptional." Candidates explore the early development of these children as well as the ways in which their gifts may affect their relationships with their siblings and families. Areas of study include identification, curriculum design and understanding how to provide for their unique social and emotional development, as well as their academic achievement. (Elective)

Offered: Every year, Fall and Spring

SPED 576. Designing and Utilizing Assistive Learning Technologies. 3 Credits.

This course explores the use of technology to support achievement for individuals with different learning needs. Topics include an overview of the continuum of assistive technologies, from simple to complex; a discussion of theoretical bases, support and guidelines for the use of these technologies; an examination of the principles of Universal Design for Learning; and the exploration of specific tools and devices. Course projects emphasize hands-on experience in using these approaches. (Elective)

Offered: Every year, Fall and Spring

SPED 579. Practicum in Special Education I. 3 Credits.

This course is the first of two separate 3-credit practicums designed to provide each candidate professional practice and authentic experiences working with students who qualify under IDEA as needing special education and related services. In addition to coursework, candidates choose a single primary designation from the student(s) IEP for their Practicum. From that IEP, they select 1 or 2 goals to focus their work on as they spend 36 contact hours observing, planning, instructing and assessing the student(s). Hours and reflections are recorded in a journal daily. Candidates must design a lesson plan and teach a 10-minute mini-lesson that is filmed based on the goals from the IEP. All data collected throughout each practicum is compiled in an e-portfolio, which catalogs the activities undertaken by the candidates including an analysis and description as well as artifacts collected. The candidate is required to collaborate with the onsite special education teacher. The university professor will either visit or meet with the candidate, collaborating special education teacher, and principal during the practicum. Prerequisite: Qualifying employment in a school for the duration of the Practicum.

Offered: Every year, Fall

SPED 580. Practicum in Special Education II. 3 Credits.

This course is the second of two separate 3-credit practicums designed to provide each candidate professional practice and authentic experiences working with one or more students who qualify under IDEA as needing special education and related services. For this Practicum, candidates must choose a completely different primary disability than they chose for SPED 579. In addition to coursework, candidates must select 1 or 2 goals to focus their work on as they spend 36 contact hours observing, planning, instructing and assessing the student(s). Hours and reflections are recorded in a journal daily. Candidates must design a lesson plan and teach a 10-minute mini-lesson that is filmed based on the goals from the IEP. All data collected throughout each practicum is compiled in an e-portfolio, which catalogs the activities undertaken by the candidates including an analysis and description as well as artifacts collected. The candidate is required to collaborate with the onsite special education teacher. The university professor will either visit or meet with the candidate, collaborating special education teacher, and principal during the practicum to outline the expectations, standards and activities necessary to successfully meet the requirements. Prerequisites: Successful completion of SPED 579 Practicum I. Note: Each Practicum requires qualifying employment in a school for the duration of the Practicum

Prerequisites: Successful completion of SPED 579 Practicum I.

Offered: Every year, Spring

SPED 581. Research in Special Education. 3 Credits.

Candidates submit a proposal for research based on an area of interest in special education. Upon approval of their proposal, they conduct research, collect data and present their findings.

Offered: Every year

SPED 582. Research in Special Education. 2 Credits.

In this course candidates will collaborate with a faculty advisor to identify a problem of practice in an area of special education. Upon approval of their proposal, they will conduct research and do a modified literature review of the problem and collect data. They will develop an action plan that will improve access for individuals with special needs. Since educators are also leaders, it is important to collaborate and share resources with colleagues. For this course, candidates will design a professional development plan based upon their research that could be shared with colleagues.

Prerequisites: Take SPED 503

Offered: Every year, Spring

SPED 650. Student Teaching/Special Education. 6 Credits.

This six-credit course consists of a sixteen-week student teaching assignment. This will be accomplished through eight weeks with students of one disability and another eight weeks with students having a different disability. This assignment will be full time in a public school or an approved setting working with a trained cooperating teacher or mentor who supervises the candidate pursuing an initial certificate in special education. Teacher candidates will gain firsthand knowledge in the continuum of services in the field of special education. They will utilize strategies and best practices learned through their coursework and apply those to the students with whom they are working. The university coordinator must approve all placements and will advise the teacher candidate throughout the semester.

Prerequisites: Take SPED 680

Offered: Every year, Spring

SPED 680. Interprofessional Experience: Collaborative Special Educators & Law. 2 Credits.

Throughout this course, candidates will alternately explore landmark cases, legislation, and the continuing struggle for social justice, self-determination, and the role of advocacy in bringing about life altering changes for people who are differently abled. work in interprofessional teams that laid the historical foundations of special education as well as an experiential experience to apply new knowledge and theory into practice by working in interprofessional teams. Candidates will view the continuing struggle for social justice and equity in education for differently abled people through the historical lens of special education. It was only through advocacy, legislation, and lawsuits that differently abled students won the right to FAPE. Over time, with the reauthorization of IDEA, the ability to work in interprofessional teams that made parents equal partners became the norm. addresses key laws such as IDEA, Section 504 of the Rehabilitation Act, and the ADA.

Prerequisites: Take SPED 572

Offered: Every year, Fall

SPED 681. Advanced Interprofessional Experience Across All Levels. 2 Credits.

This course is designed to provide the pre-service special educator with experiential opportunities to learn from and collaborate with a variety of health care and social services professionals who are integral to high quality special education services. The course provides multiple hands-on opportunities, case study analyses and interprofessional participation in mock applications involving the development, recommendation, evaluation, and assessment of providing special education services through interdisciplinary teams. Focus will be on developing co-teaching skills, understanding interprofessional models of healthcare and social services, promoting the respect of and cooperation with diverse roles and responsibilities, promoting share ethics and values, communication, and teamwork skills.

Prerequisites: Take SPED 680

Offered: Every year, Spring

Certificate in Social and Emotional Learning and School Climate

The foundation for student success is the environment in which they learn. Students must feel physically and emotionally safe in the classroom and feel supported by their teacher and classmates. In light of numerous issues with bullying and violence in schools, this online certificate program addresses the pressing need in K-12 institutions to address the social and emotional needs of students and teachers through systematic changes to school climate.

The first program of its kind in the state, this program provides a unique focus on the ways that culturally responsive practices, school equity, and diversity and inclusion can better inform SEL frameworks with the whole child in mind. Our certificate draws on cross-disciplinary research to prepare teachers, administrators and other key school personnel with the knowledge and skills needed to ensure lasting structural changes to positively affect school climate. Coursework builds on itself and culminates in a hands-on capstone project, in which you will address an applied problem of practice within your respective school environment.

This graduate certificate program prepares you to facilitate the academic achievement of students, enhance the collaborative and supportive work environment of teachers, and build strong relationships with the families and communities that you serve. Coursework critically examines the foundations of social and emotional learning and builds into a self-defined capstone project that provides you the opportunity to implement and evaluate an action-research plan within your school.

Certificate in Social and Emotional Learning and School Climate Program of Study

Code	Title	Credits
SEL 600	Introduction to Social and Emotional Learning (SEL) and School Climate: Academy/Orientation	1
SEL 601	Research Deep Dive - Social and Emotional Learning and School Climate	3
SEL 602	Self-Care and Resiliency for Practitioners	3

SEL 603	Transforming Instruction with SEL Insights	3
SEL 604	Leadership for SEL School Communities	3
SEL 605	SEL Capstone Planning Project	1
SEL 606	Capstone Implementation Project	1
Total Credits		15

Admission Requirements

Applications for the Certificate in Social and Emotional Learning and School Climate online graduate program are requested by May 8 for enrollment beginning in late July. To qualify for admission to the certificate program, applicants must have a bachelor's degree in education or a related field from an accredited institution with a minimum GPA of 3.0. Candidates also must be employed in a school-based or educational setting.

Applicants must submit:

- completed application form
- resume
- letter of intent
- official transcripts of all undergraduate and graduate work completed

Dual-Degree BA/MS or BS/MS in Instructional Design and Technology

Program Contact: Ruth Schwartz
(Ruth.Schwartz@quinnipiac.edu) 203-582-8419

The Instructional Design & Technology program prepares you to design, develop and implement powerful learning materials, such as websites, online courses and interactive presentations, for learners of all ages. By exploring learning and design theory, practical strategies and an array of digital tools, you'll learn to analyze and generate creative solutions for the complex learning problems that we encounter today, in classrooms or in business settings. Students in the program have a range of goals, including careers in health professions, private industry, non-profits, universities and K-12 schools – so you may come into the program from any major.

The dual-degree program allows you to start your Instructional Design & Technology coursework during your junior or senior year. Typically, this 30-credit program takes 5 semesters. However, by taking 9 credits (3 courses) as an undergrad, you will leave Quinnipiac with a master's degree just one year after your undergraduate commencement.

Dual-Degree BA/MS or BS/MS in Instructional Design and Technology Curriculum

The 30-credit master of science in Instructional Design & Technology curriculum is made up of 15 credits of required foundations courses that cover theoretical foundations of instructional design, learning theory and design for learning. You may then select four elective courses that allow you to customize your degree based on your particular objectives and professional needs. Electives cover instructional design applications in a variety of settings, including:

- Designing learning experiences for universities
- Technology for the K-12 classroom
- Training in corporate and nonprofit environments

The coursework is rounded out with a comprehensive, three-credit capstone experience that gives you the opportunity to prepare a well-developed design proposal and project, leveraging the technologies and instructional design analyses that you've learned throughout your studies.

Junior year spring start: (9 credits count towards both BS/BA and MS)

Code	Title	Credits
IDN 529	Educational Media Design Lab (Junior Year: Spring)	3
IDN 525	Foundations of Instructional Design (Senior Year: Fall)	3
IDN 527	Society, Culture and Learning (Senior Year: Spring)	3
IDN 530	Web Design for Instruction (Post-Graduation: Summer)	3
IDN 531	Design of Interactive Educational Environments (Post Graduation: Summer)	3
IDN 526	Cognitive Science and Educational Design (Post Graduation: Fall)	3
IDN 528	Collaborative Design of Digital Environments (Post Graduation: Fall)	3
IDN 532	Design and Development of Online Learning (Post Graduation: Fall)	3
or IDN 533	Producing Educational Video and Digital Training	
IDN 535	New Directions in Digital Environments for Learning (Post Graduation: Spring)	3

- one-page statement that explains your decision to pursue graduate education
- current resume
- 2 letters of recommendation (at least 1 from a professor in your major)

Candidates will be interviewed in person, by phone or online as appropriate.

Retention

To remain in the program, a student must maintain a GPA of 3.0. A student who receives a grade of C+ or below in a course may be asked to retake the course to earn a minimum grade of B-. Students who fail to maintain the minimum GPA in any semester may be allowed to remain in the program with probationary status at the discretion of the dean of the School of Education; however, granting of probationary status is subject to the dean's approval and is neither automatic nor guaranteed.

The School of Education is fully accredited by the Council for the Accreditation of Educator Preparation (CAEP). The U.S. Department of Education recognizes CAEP as a specialized accrediting body for schools, colleges and departments of education.

Graduate MAT in Elementary Education

Program Contact: Christina Pavlak
(christina.pavlak@qu.edu) 203-582-3192

The purpose of Quinnipiac's graduate Master of Arts in Teaching program is to prepare teacher candidates with perspectives, knowledge and skills to become master educators. The School of Education recognizes that the concept of educator is three-dimensional, and that successful educators must be teachers, learners and leaders. Therefore, graduates of the Master of Arts in Teaching program are teachers who lead all students to learn, learners who continue to learn as they continue to teach, and leaders who influence the culture of their schools in ways that support best practices in teaching and learning.

The program reflects the spirit and mission of Quinnipiac with close attention to the teaching standards for the state of Connecticut and to the standards of the Council for the Accreditation of Educator Preparation (CAEP). The three values of "excellence in education, a sensitivity to students, and a spirit of community," which are the heart of Quinnipiac's mission statement, are woven throughout the program.

General Information

The Quinnipiac University elementary education curriculum is an intensive five-semester program of study consisting of core certification courses that provide eligibility for teacher certification, advanced coursework in literacy, numeracy and pedagogy to satisfy master's degree requirements, and a unique internship/residency experience which provides pre-service teacher candidates the opportunity to learn about schools, students and teaching.

The graduate MAT program offers Quinnipiac teacher candidates a Master of Arts in Teaching degree leading to certification through the Connecticut State Department of Education. Consistent with the university's mission, arts and sciences studies are integrated with

Student Learning Outcomes

Upon completion of the Instructional Design and Technology program, students will demonstrate the following competencies:

- Communication:** Communicate effectively in visual, oral and written form, taking into account the type of information being delivered and the diverse backgrounds, roles and varied responsibilities of the audience.
- Collaboration:** Collaborate effectively with peers, including the use of consensus-building, negotiation, conflict resolution skills and constructive feedback.
- Research and Theory:** Draw on their understanding of the discipline of instructional design and pertinent research to inform their design decisions, explaining and applying key concepts of instructional design approaches and models, learning theory and multimedia principles.
- Ethical Issues:** Identify and respond to ethical, legal and political implications of design in the workplace.
- Technology:** Analyze and apply existing and emerging technologies for instruction, with regard for the learning need, the learners and the learning context.
- Planning and Analysis:** Utilize the instructional design approach to conduct a needs assessment to recommend appropriate design solutions and strategies; address the needs of the target audience and the learning context; and create a plan for the development, implementation and evaluation of instruction.
- Design:** Design instructional interventions in accordance with the instructional design plan, incorporating appropriate principles of visual design, interaction design and learning strategies, and addressing social, cultural, political and individual differences that may influence learning.
- Development:** Produce instructional materials in a variety of delivery formats that align with the content analyses, proposed technologies, delivery methods and instructional strategies included in the planning and design phases.
- Implementation:** Use technology effectively to implement a design plan; target appropriate strategies to prepare individuals and/or the environment for implementation.
- Assessment:** Design assessments; evaluate instructional interventions; utilize evaluation to guide iterative design of learning resources.

Applicants for the program must submit:

professional studies to prepare graduates who have depth and breadth of content knowledge and strong pedagogical skills.

Internship/Residency

Candidates participate in an internship during the first two semesters of the program. Quinnipiac University has developed collaborative partnerships with school districts throughout central and southern Connecticut to provide graduate candidates with guided, hands-on professional practice and to defray some costs of the program. Candidates in the internship receive a tuition reduction during the internship semesters. (An optional second internship/residency is available during the final two semesters, resulting in significant additional tuition reduction.)

Interns serve in area schools in a variety of capacities and as substitute teachers with guidance from an on-site adviser and from a Quinnipiac faculty member. Each intern has the opportunity to participate in staff meetings and take part in all school operations, becoming a valued member of the school faculty. In the late afternoon and early evening, candidates continue their formal studies on the Quinnipiac campus. During a residency, teacher candidates remain in a single classroom for 10 weeks or more as a co-teacher with a cooperating teacher and a university supervisor providing guidance and support.

Elementary Education MAT Curriculum

To complete all requirements of the MAT program, a candidate must complete all coursework and successfully complete all performance tasks to qualify for teacher certification.

Student Learning Outcomes

Upon completion of the Master of Arts in Teaching program, teacher candidates will be able to demonstrate the following competencies:

- Content Knowledge:** Identify and define the major concepts of their discipline and understand that content is dynamic and ways of knowing are constantly changing.
- Instructional Strategies:** Recognize varied instructional practices and apply appropriate instructional strategies based upon principles of effective teaching.
- Learning Differences, Learner Development:** Recognize the complexity of human diversity and provide an instructional program that is responsive to the needs of diverse students.
- Instructional Strategies:** Apply appropriate technology to enhance the teaching and learning process.
- Professional Learning and Ethical Practice:** Demonstrate the skills and commitment to engage in reflective, mindful practice.
- Assessment:** Use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision-making.
- Professional Learning and Ethical Practice:** Recognize that since content is dynamic and ways of knowing are constantly changing, the profession requires a commitment to continuous learning.
- Leadership and Collaboration:** Recognize that education has the power to be transformative and that their role as educators includes the responsibility to advocate on behalf of their students to promote social justice.
 - Professional Learning and Ethical Practice, Leadership and Collaboration:** Demonstrate a willingness to work collaboratively with peers, practitioners in the field and/or MAT instructors to sustain a professional learning environment to support student learning.
 - Leadership and Collaboration:** Demonstrate an understanding that scholarly research is essential to improving their own practice and to enhancing the knowledge base of the profession.

Admission

Applicants are accepted for admission to the fall semester only and are expected to enroll as full-time graduate students. To ensure admission into the program with a placement in an internship, applicants should complete the application process early. Admission to the graduate MAT program is based on a holistic review by MAT program faculty of the following admission requirements:

- A 3.0 minimum overall undergraduate GPA (from all colleges and universities attended) with a subject area major or appropriate interdisciplinary major.

- b. A transcript review that indicates a “B” or better performance in courses related to mathematics as well as English/language arts. (Students whose transcripts do not meet this criteria will be required to provide proof of basic math/reading competencies as determined by the MAT program director.)
- c. At least two written recommendations from individuals who have recent knowledge (within the last two years) of the applicant’s suitability as a prospective educator.
- d. A written essay completed on-site that meets program standards.
- e. Evidence of strong basic skills in math, reading and writing. Evidence can be provided through SAT or ACT scores. Alternatively, evidence may also be provided through completion of the Praxis Core Academic Skills Test. SAT, ACT or Praxis Core results will be reviewed by the program director. Any MAT candidate whose scores indicate an area of weakness will be required to participate in a non-credit bearing remediation program that addresses any area of underperformance in math, reading or writing. Once completion of the remediation process is done by the candidate, the status of the candidate will be reviewed. All candidates will be considered probationary status until the improvement of basic skills are documented and remediated.
- f. A formal interview during which the applicant is expected to demonstrate: an ability to communicate clearly, a demeanor appropriate to the teaching profession, and a maturity and attitude necessary to meet the demands of the MAT program.
- g. Effective July 1, 2010, Connecticut law requires all teacher candidates to undergo a criminal background check prior to being placed in a public school setting for field study, internship, and student teaching. Because a clinical experience is an integral part of each semester, failure to abide by this law will make an applicant ineligible for admission to the program. The School of Education has procedures in place to assist candidates in obtaining the background check. The cost of the background check is the responsibility of the teacher candidate.

Retention

Teacher candidates in the MAT program at Quinnipiac are expected to demonstrate the professional behaviors and dispositions articulated in both the School of Education’s Professional Attributes and Dispositions document and the CT Code of Professional Responsibility for Teachers. Candidates must maintain a GPA of 3.0 or higher for graduate courses in each semester with at least a B- or better in any education course. A grade of C+ or below in any education course (including the graduate content area courses) requires the candidate to retake the course at his/her expense and earn the minimum B- grade.

If the candidate, once formally accepted into the MAT program, fails to maintain the minimum GPA, that candidate may be allowed to remain in the program for a single semester on probationary status. If a candidate on probation fails to meet the minimum GPA by the end of the single probationary semester, that candidate is dismissed from the program. Granting of probationary status is subject to the director’s approval and is neither automatic nor guaranteed.

Candidates failing to meet professional standards in the program may be subject to suspension or dismissal. In addition, candidates who exhibit a lack of effort or responsibility in the program, or who reveal interpersonal skills unsuited or inappropriate for teaching, will be required to meet with the MAT program director to discuss continuation in the program.

The School of Education is fully accredited by the Council for the Accreditation of Educator Preparation (CAEP). The U.S. Department of Education recognizes CAEP as a specialized accrediting body for schools, colleges and departments of education.

Note: Because the education program is subject to state review on a regular basis, prospective and current students are advised to see the School of Education for up-to-date program information.

Graduate MAT in Secondary Education

Program Contact: Christina Pavlak
(christina.pavlak@qu.edu) 203-582-3192

The purpose of Quinnipiac’s graduate Master of Arts in Teaching program is to prepare teacher candidates with perspectives, knowledge and skills to become master educators. The School of Education recognizes that the concept of educator is three-dimensional, and that successful educators must be teachers, learners and leaders. Therefore, graduates of the Master of Arts in Teaching program are teachers who lead all students to learn, learners who continue to learn as they continue to teach, and leaders who influence the culture of their schools in ways that support best practices in teaching and learning.

- Professional Learning and Ethical Practice, Leadership and Collaboration:** Demonstrate a willingness to work collaboratively with peers, practitioners in the field and/or MAT instructors to sustain a professional learning environment to support student learning.
- Leadership and Collaboration:** Demonstrate an understanding that scholarly research is essential to improving their own practice and to enhancing the knowledge base of the profession.

Admission

To ensure admission into the program with a placement in an internship, applicants should complete the application process as early as possible. Admission to the graduate MAT Special Education (SPED) program is based on a holistic review by program faculty of the following admission requirements:

- A 3.0 minimum overall undergraduate GPA (from all colleges and universities attended) with a subject area major or appropriate interdisciplinary major.
- A transcript review that indicates a B or better performance in courses related to mathematics as well as English/language arts.

(Students whose transcripts do not meet this criteria will be required to provide proof of basic math/reading competencies as determined by the MAT SPED program director.)

- At least two written recommendations from individuals who have recent knowledge (within the last two years) of the applicant's suitability as a prospective educator.
- A written essay completed on site that meets program standards.
- Evidence of strong basic skills in math, reading and writing. Evidence of strong basic skills can be provided through SAT or ACT scores. Alternatively, evidence may also be provided through completion of the Praxis Core Academic Skills Test. SAT, ACT or Praxis Core results will be reviewed by the program director. Any MAT SPED candidate whose scores indicate an area of weakness will be required to participate in a non-credit bearing remediation program that addresses any area of underperformance in math, reading or writing. Once completion of the remediation process is done by the candidate, the status of the candidate will be reviewed. All candidates will be considered probationary status until the improvement of basic skills are documented and remediated.
- A formal interview during which the applicant is expected to demonstrate: an ability to communicate clearly, a demeanor appropriate to the teaching profession, and a maturity and attitude necessary to meet the demands of the MAT SPED program.
- Effective July 1, 2010, Connecticut law requires all teacher candidates to undergo a criminal background check prior to being placed in a public school setting for field study, internship and student teaching. Because a clinical experience is an integral part of each semester, failure to abide by this law will make an applicant ineligible for admission to the program. The School of Education has procedures in place to assist candidates in obtaining the background check. The cost of the background check is the responsibility of the teacher candidate.

Retention

Teacher candidates in the MAT SPED program at Quinnipiac are expected to demonstrate the professional behaviors and dispositions articulated in both the School of Education's Professional Attributes and Dispositions document and the CT Code of Professional Responsibility for Teachers. Candidates must maintain a GPA of 3.0 or higher for graduate courses in each semester with at least a B- or better in any education course. A grade of C+ or below in any education course (including the graduate content area courses) requires the candidate to retake the course at their expense and earn the minimum B- grade.

If the candidate, once formally accepted into the MAT SPED program, fails to maintain the minimum GPA, that candidate may be allowed to remain in the program for a single semester on probationary status. If a candidate on probation fails to meet the minimum GPA by the end of the single probationary semester, that candidate is dismissed from the program. Granting of probationary status is subject to the director's approval and is neither automatic nor guaranteed.

Candidates failing to meet professional standards in the program may be subject to suspension or dismissal. In addition, candidates who exhibit a lack of effort or responsibility in the program, or who reveal interpersonal skills unsuited or inappropriate for teaching, will be required to meet with the MAT SPED program director to discuss continuation in the program.

The School of Education is fully accredited by the Council for the Accreditation of Educator Preparation (CAEP). The U.S. Department of

Education recognizes CAEP as a specialized accrediting body for schools, colleges and departments of education.

Note: Because the education program is subject to state review on a regular basis, prospective and current students are advised to see the School of Education for up-to-date program information.

Master of Science in Instructional Design and Technology

Program Contact: Ruth Schwartz (Ruth.Schwartz@quinnipiac.edu)
203-582-8419

The field of instructional design applies what we know about how people learn to the thoughtful design and implementation of instructional materials, such as websites, videos, podcasts, online courses, social media sites, interactive simulations and educational games. Our fully online program prepares students for professional work or advanced study in instructional design by providing opportunities to develop a solid grounding in core competencies of the field, including instructional design models, theories of learning, principles for the design of instructional media, specific technical skills for media production, and approaches to the selection, integration and evaluation of digital materials for learning. Elective courses allow students to focus on their own particular interests and goals, such as teaching with technology in the K–12 classroom, designing digital media for museums or after-school programs, or producing instructional materials for higher education, corporate or nonprofit environments.

Courses in Theoretical Foundations of Education address learning theories; theoretical approaches to multimedia design; instructional design models; and elements of the instructional design process, including the needs assessment, generation of a design solution, and formative and summative evaluation of an instructional resource.

Courses in Design Fundamentals emphasize the application of theory to short-term design projects, fostering familiarity and essential competencies in a range of media (e.g., podcasts and videocasts, websites, social media, games and simulations, learning management systems, design for handheld devices and public spaces). The process of working in a team to plan and implement an instructional resource is also a focus.

Graduates of this program are prepared for career opportunities in settings such as higher education, schools or school districts, business environments, nonprofit groups, and educational software or media design firms.

MS in Instructional Design and Technology Curriculum

To earn the master's degree, students must complete 30 credits of coursework, with a minimum GPA of 3.0. The sequence of courses is composed of required foundational courses, electives and the Capstone Experience.

Foundations

15 credits (five courses), required for all candidates, focus on theoretical foundations of education and fundamentals of design. These courses include extensive exposure to research literature investigating the efficacy of media for educational applications, since it is the ability to

understand and apply research that allows instructional designers to bridge the gap between theory and practice.

Electives

Individuals select an additional 12 credits (four courses), according to their own areas of interest. Topics include in-depth theoretical and practical aspects of producing educational resources (e.g., web design, design of online courses, video production, interactive digital media) with hands-on use of specific software applications. Other elective options explore the process of selecting, implementing and evaluating digital resources for instruction in a range of environments (K–12, higher education, industry and nonprofit organizations, informal learning and creating accessible materials for individuals with diverse learning needs).

Capstone Experience

The required 3-credit (one course) Capstone Experience includes:

Career Exploration, including preparation of the resume and portfolio.

Throughout their coursework, students select their best work to post on an electronic portfolio for critique; in the Capstone, they further refine the portfolio. Consistent with program objectives, this allows the student to demonstrate competence with a range of software applications and serves to present student work to prospective employers.

Introduction to Project Management. To develop effective instructional design projects, students need to understand the basics of project management. In some cases, instructional designers may even be asked to serve as project managers. This component of the Capstone explores the basics of project management and the terminology used in this field.

The Thesis Project. Each student chooses a topic of personal and/or professional interest, researches existing approaches to and resources for instruction on this topic, and prepares a proposal for the design of a learning resource. The proposal includes a needs analysis, design details and an evaluation plan. The final step is the creation and presentation of a working prototype of the proposed resource. This project serves to demonstrate the candidate's fluency with elements of an instructional design analysis as well as with the use of theory to inform design.

Code	Title	Credits
Required Foundation Courses		
Theoretical Foundations of Education:		
IDN 525	Foundations of Instructional Design	3
IDN 526	Cognitive Science and Educational Design	3
IDN 527	Society, Culture and Learning	3
Design Foundations:		
IDN 528	Collaborative Design of Digital Environments	3
IDN 529	Educational Media Design Lab	3
Elective Courses		
Production, Implementation & Evaluation:		
Select 12 credits of the following:		12
IDN 530	Web Design for Instruction (3 credits)	
IDN 531	Design of Interactive Educational Environments (3 credits)	
IDN 532	Design and Development of Online Learning (3 credits)	

IDN 533	Producing Educational Video and Digital Training (3 credits)	
IDN 534	Implementing Digital Media for Learning (3 credits)	
IDN 535	New Directions in Digital Environments for Learning (3 credits)	
IDN 536	Independent Study (3 credits)	
IDN 537	Designing and Utilizing Assistive Learning Technologies	
Capstone Experience		
IDN 550	Capstone Experience	3
Total Credits		30

Student Learning Outcomes

Upon completion of the Instructional Design and Technology program, students will demonstrate the following competencies:

- Communication:** Communicate effectively in visual, oral and written form, taking into account the type of information being delivered and the diverse backgrounds, roles and varied responsibilities of the audience.
- Collaboration:** Collaborate effectively with peers, including the use of consensus-building, negotiation, conflict resolution skills and constructive feedback.
- Research and Theory:** Draw on their understanding of the discipline of instructional design and pertinent research to inform their design decisions, explaining and applying key concepts of instructional design approaches and models, learning theory and multimedia principles.
- Ethical Issues:** Identify and respond to ethical, legal and political implications of design in the workplace.
- Technology:** Analyze and apply existing and emerging technologies for instruction, with regard for the learning need, the learners and the learning context.
- Planning and Analysis:** Utilize the instructional design approach to conduct a needs assessment to recommend appropriate design solutions and strategies; address the needs of the target audience and the learning context; and create a plan for the development, implementation and evaluation of instruction.
- Design:** Design instructional interventions in accordance with the instructional design plan, incorporating appropriate principles of visual design, interaction design and learning strategies, and addressing social, cultural, political and individual differences that may influence learning.
- Development:** Produce instructional materials in a variety of delivery formats that align with the content analyses, proposed technologies, delivery methods and instructional strategies included in the planning and design phases.
- Implementation:** Use technology effectively to implement a design plan; target appropriate strategies to prepare individuals and/or the environment for implementation.
- Assessment:** Design assessments; evaluate instructional interventions; utilize evaluation to guide iterative design of learning resources.

Admission

Successful applicants to this program come from diverse backgrounds in universities, schools, businesses or the nonprofit world, but all share an interest in using digital media for education. There are no specific technological prerequisites; all students will advance their levels of technical skills as they progress through the program.

Applications for the online Master of Science in Instructional Design and Technology program are considered on a rolling basis. Students may begin the program in fall or spring, and can complete the program in five semesters by taking two courses per semester; courses are offered in fall, spring and summer. We encourage candidates to submit applications as early as possible to ensure consideration for the semester desired.

To qualify for admission to the program, students must have earned a bachelor's degree from an accredited institution with a preferred minimum GPA of 3.0. Candidates must submit:

- completed application form
- resume
- letter of intent
- official transcripts of all undergraduate and graduate work completed
- two letters of recommendation (professional and/or academic)

Candidates will be interviewed in person, by phone or online as appropriate.

Retention

To remain in the program, a student must maintain a GPA of 3.0. A student who receives a grade of C+ or below in a course may be asked to retake the course to earn a minimum grade of B-. Students who fail to maintain the minimum GPA in any semester may be allowed to remain in the program with probationary status at the discretion of the dean of the School of Education; however, granting of probationary status is subject to the dean's approval and is neither automatic nor guaranteed.

The School of Education is fully accredited by the Council for the Accreditation of Educator Preparation (CAEP). The U.S. Department of Education recognizes CAEP as a specialized accrediting body for schools, colleges and departments of education.

Master of Science in Special Education

Program Contact: Judith Falaro (judith.falaro@qu.edu), JD 203-582-8868

The School of Education offers two tracks in the Master of Science in Special Education program. One leads to cross-endorsement in Connecticut #165, Comprehensive K-12 Special Education for those already holding an initial endorsement, and the second track is for anyone in a related field who is interested in earning a Master of Science in Special Education.

Program Description

The field of special education requires an in-depth understanding of the laws that frame it, particularly the Individuals with Disabilities Act (IDEA),

Section 504 of the Rehabilitation Act, and the Americans with Disabilities Act (ADA). The program provides certified teachers with opportunities to better understand the purposes and protections of these laws, as well as their implications for teaching and working with students with special needs and their families. Through these lenses, program candidates will understand how students identified with special needs learn, and how their particular special needs impact their lives inside and outside of school academically, socially and emotionally. The knowledge and understanding developed through the program will enable graduates to design individual programs of learning for students, with supports that allow all identified students to access the curriculum together with their non-disabled peers in inclusive settings.

The program will provide graduate candidates with two options to achieve their professional goals. Teachers who already have a valid teaching certificate will be able to pursue a cross-endorsement in comprehensive special education along with their Master of Science in Special Education (36 credits) in accordance with the requirements and regulations of the Connecticut State Department of Education. Graduate candidates who are in a related field but still desire an MS in Special Education (30 credits) will complete a similar course of study.

MS in Special Education Leading to Cross-Endorsement

Code	Title	Credits
SPED 545	Introduction to the Exceptional Child	4
SPED 564	Teaching Students with Reading and Math Disorders	3
SPED 565	Specific Learning Disabilities: Identification, Instruction and Assessment (LD)	4
SPED 566	Autism Spectrum Disorders	4
SPED 571	Emotional and Behavioral Disorder Identification, Management, and Assessment	4
SPED 574	Understanding and Teaching Students with Intellectual Disabilities	3
SPED 568	Assessment/Program Planning and Evaluation of Children with Special Needs	3
SPED 570	Special Education Law	3
SPED 572	Educating Young Children with Special Needs	3

SPED 581	Research in Special Education	3
SPED 576	Designing and Utilizing Assistive Learning Technologies	3

¹ Both SPED 579 and SPED 580 are required for candidates seeking a cross-endorsement in Connecticut #165 Comprehensive Special Education K-12.

Student Learning Outcomes

Upon completion of the Master of Science in Special Education, graduates will understand and be able to:

- Demonstrate a working knowledge** of federal and state laws and guidelines that govern eligibility, protections and services for students with special needs.
- Administer, score and interpret** a wide range of criterion-referenced, norm-referenced and curriculum-based measurements.
- Utilize Scientifically-Based Research Interventions (SBR)** to identify the presence of specific learning disabilities in school-age children.
- Collaborate with other professionals** in related services to provide the supports necessary for students with special needs to access the curriculum in inclusive settings with their non-disabled peers wherever possible.
- Assume leadership positions** in Planning and Placement Team (PPT) meetings by advocating for the social, emotional and academic needs of students in order to design an appropriate Individual Education Program (or IEP) for each identified student.
- Identify and apply** interventions and strategies to meet the unique educational needs of exceptional learners and their families, including but not limited to preparing young adults to self-advocate and

develop the life skills necessary for independent living as they transition into adulthood and their respective careers.

Admission

Applications for the online Master of Science in Special Education program are considered on a rolling basis. Students may apply to enter during the fall or spring semester. We encourage candidates to submit applications as early as possible to ensure consideration for the semester desired.

To qualify for admission to the program, students must have earned a bachelor's degree from an accredited institution with a preferred minimum GPA of 3.0. Candidates must submit:

- completed application form
- resume
- letter of intent
- official transcripts of all undergraduate and graduate work completed

Foundations

The 18 credits of foundation courses are designed to provide an in-depth study of the characteristics and outcomes of four of the areas identified under IDEA. The remaining 12 credits include coursework in special education law, policy and ethics; assessment, program planning and evaluation; and evaluation and instruction in reading disorders. Those seeking the cross-endorsement are required to take a 3-credit course in educating young children with special needs.

Capstone Experience

Candidates following the cross-endorsement track are required to successfully complete two 3-credit practicums, each in a different area of special education.

Retention

To remain in the program, a student must maintain a GPA of 3.0. A student who receives a grade of C+ or below in a course will have to retake the course to earn a minimum grade of B-. Students who fail to maintain the minimum GPA in any semester may be allowed to remain in the program with probationary status at the discretion of the dean of the School of Education; however, granting of probationary status is subject to the dean's approval and is neither automatic nor guaranteed.

The School of Education is fully accredited by the Council for the Accreditation of Educator Preparation (CAEP). The U.S. Department of Education recognizes CAEP as a specialized accrediting body for schools, colleges and departments of education.

Online Course Design Certificate

Program Contact: Ruth Schwartz (ruth.schwartz@qu.edu) 203-582-8419

The 9-credit graduate certificate in online course design is focused on providing the knowledge and experience needed to develop online courses across a range of disciplines. The sequence of three online graduate-level courses begins with an examination of the instructional design process—using what we know about *how people learn* to help us design effective educational materials. In the following two courses, students explore best practices of online course design, create a model course, and investigate multimedia project development using a number

of tools and resources. Students may substitute other IDN courses with permission of the program director.

As K-12 programs, higher education and corporate training continue to shift online, there is a growing demand for skilled professionals who can create effective digital education resources. This online certificate program equips students with a deeper understanding of instructional design as well as the skills needed to plan, design and develop a powerful online course. Students with particular interests or goals may petition to customize the course sequence or take more than three courses.

Please note: Candidates in the Master of Science in Instructional Design program who are interested in the Certificate in Online Course Design must consult with the program director, Ruth Schwartz, for information on requirements for this credential.

Online Course Design Certificate Curriculum

Code	Title	Credits
Required Courses		
IDN 525	Foundations of Instructional Design	3
IDN 529	Educational Media Design Lab	3
IDN 532	Design and Development of Online Learning	3
Total Credits		9

Students may substitute other IDN courses with permission of the program director.

To qualify for admission, candidates must have earned a bachelor's degree from a regionally accredited institution of higher learning. The ideal candidate will have maintained a 3.0 cumulative GPA and earned no grade lower than a B- in a single class. No prior technical experience is required.

Interested individuals can apply online (<https://www.qu.edu/admissions/graduate/apply/>). Applications are accepted throughout the year; however, the admissions committee will not review an application until all of the supporting documents are received.

A complete application consists of the following:

- Application form (<https://www.qu.edu/admissions/graduate/apply/>)
- \$45 application fee
- Current resume
- Official transcripts of all undergraduate and graduate work completed

Candidates will be interviewed in person, by phone or online as appropriate.

Sixth-Year Diploma in Educational Leadership

Program Contact: Anne Dichele (anne.dichele@qu.edu), Dean 203-582-3463

Quinnipiac University's Sixth-Year Diploma in Educational Leadership prepares graduates with the perspectives, knowledge and skills to become exceptional school leaders. The School of Education recognizes an educational leader as three-dimensional, and that successful educational leaders must be teachers and learners as well as leaders.

Graduates of the Sixth-Year Diploma in Educational Leadership program develop a deeper understanding of the teaching and learning process through a lens of equity, a fuller understanding of diverse learners through a lens of cultural relevance, and a stance of advocacy as leaders, who influence the culture of their schools in ways that support best practices in teaching and learning. Addressing the challenges of contemporary school leadership while supporting school change toward a more inclusive and equitable model is at the forefront of all we do.

General Information

The Sixth-Year Diploma in Educational Leadership program is an online post-master's credential which is provided in an asynchronous delivery model. The program prepares graduates to assume a variety of school leadership roles such as department chair, assistant principal, principal, curriculum coordinator and central office administrator below the rank of superintendent. Candidates who complete the required 21 credits of the 33-credit program and pass the Connecticut Administrator Test (#6412) are able to obtain initial certification by the Connecticut State Department of Education certification for Intermediate Administrator/Supervisor (092). (Completion of the full degree program is required for the professional level license.)

While 27 credits are requirements for the program (see course outline), the remaining 6 credits to complete the degree allow candidates to choose areas of interest or desired expertise. Courses in Program Evaluation and Conflict Resolution are offered. Additionally, candidates are allowed to enroll in courses offered within the Social & Emotional Learning Certificate.

The program is fully accredited by the Connecticut State Department of Education, which participates in the NASDTEC Interstate Contract, and CAEP, the Council for the Accreditation of Educator Preparation.

Note: Because the education program is subject to state review on a regular basis, prospective and current students are advised to see the School of Education for up-to-date program information.

Internship

Candidates must participate in an internship after completing EDL 601, EDL 603 and EDL 605 to gain authentic leadership experience. The Internship in Educational Leadership (EDL 607) consists of a series of coordinated activities related to the national standards for school leaders as established by the National Educational Leadership Preparation (NELP) standards, which arose from the Educational Leadership Constituent Council (ELCC). The specific experiences are cooperatively planned by the candidate, a faculty member and a school district mentor. To demonstrate mastery of the NELP standards, each candidate compiles an internship portfolio, which includes a description and analysis of activities related to the national standards, evidence of evaluating a portion of a school program for the purpose of improving student learning, evaluations from the administrator, mentor and University supervisor, a reflection journal describing leadership strengths and needs, a weekly log of activities and hours (a minimum of 216 hours are required), and artifacts from the internship. The internship is scheduled only during the fall or spring semester to ensure the most authentic experience possible.

Sixth-Year Diploma in Educational Leadership Curriculum

Code	Title	Credits
Required Courses		
EDL 601	Leading and Managing the Contemporary School	6
EDL 603	Leading and Managing the Instructional Program for Equitable Outcomes	6
EDL 605	Leading and Managing School Improvement	6
EDL 607	Administrative Internship in Educational Leadership	3
EDL 700	Connecticut Administrators Test	
EDL 611	Educational Law	3
EDL 613	Public School Finance	3
Choose 6 credits from the following		
EDL 609	Educational Program Evaluation	3
EDL 615	Conflict Resolution and Transformational Leadership	3
SEL 601	Research Deep Dive - Social and Emotional Learning and School Climate	3
SEL 602	Self-Care and Resiliency for Practitioners	3
SEL 603	Transforming Instruction with SEL Insights	3
SEL 604	Leadership for SEL School Communities	3
Total 33 credits		

Student Learning Outcomes

Upon completion of the Sixth-Year Diploma in Educational Leadership, candidates will be able to demonstrate and sustain the following competencies:

- Vision, Mission and Goals:** Guide the development and implementation of a shared vision and mission of high quality and equitable education that is shared and supported by all stakeholders.
- Ethics and Professional Norms:** Model the leadership and ethical behaviors that promote equity and social justice.
- Culture and Relationship Building:** Advocate, nurture and sustain a school culture and climate that supports educators and meets the needs of diverse learners by guiding academic, social, developmental and emotional needs.
- Managing Organizational Systems and Safety:** Ensure school management, operation and resources to promote a safe, efficient and effective learning environment.
- Teaching and Learning:** Monitor and continuously improve teaching and learning by providing instructional programs conducive to student learning and staff professional development.
- Collaborating with Families and Stakeholders:** Promote and sustain collaboration with families and other stakeholders to respond to

diverse communities, interests and needs, and to mobilize community resources.

- g. **Change Agent:** Understand, advocate and respond to the change process to influence the political, social, economic, legal and cultural context affecting education.
- h. **Systems Thinking:** Align the school improvement plan with the district theory of action drivers for coherence, efficacy and building capacity.

Admission

Students are admitted into the Sixth-Year Diploma in Educational Leadership program upon meeting the following requirements:

- a. A master’s degree in education or a related field from an accredited institution with a minimum GPA of 3.0;
- b. Evidence of four years of full-time teaching experience in a PK–12 setting;
- c. Completion of at least 36 hours (equivalent to 3 credits) of a special education course, completed within ten years¹;
- d. A record of excellent teaching as evidenced by recommendations of supervisors;
- e. Satisfactory writing skills as evidenced by a written essay; and
- f. Satisfactory leadership dispositions and a professional maturity to meet the demands of the program as evidenced during a formal interview.

¹Applicants who have not met the special education requirement may be admitted on the condition that they enroll in a state-approved course.

Retention

To remain in the program, students must maintain academic standards and honor and follow Connecticut’s Code of Professional Responsibilities for Teachers in all interactions in the schools. Students must maintain a 3.0 GPA for graduate courses in each semester with at least B- or better in any leadership course. A grade of C+ or below in any program course requires the student to retake the course and earn a minimum of B-. If a student fails to maintain the minimum GPA, that student may be allowed to remain in the program for a single semester with probationary status. If a student on probation fails to meet the minimum GPA by the end of the single probationary semester, that student is dismissed from the program. Granting of probationary status is subject to the dean’s approval and is neither automatic nor guaranteed. Students failing to meet professional standards in the program may be subject to suspension or dismissal.

Completion

To fulfill all requirements of the Sixth-Year Diploma in Educational Leadership program, students must complete all course work, including the internship, and successfully complete all performance tasks including passing the Connecticut Administrator Test (#6412).

The School of Education is fully accredited by the Council for the Accreditation of Educator Preparation (CAEP). The U.S. Department of Education recognizes CAEP as a specialized accrediting body for schools, colleges and departments of education.

The program is fully accredited by the Connecticut State Department of Education, which participates in the NASDTEC Interstate Contract.

Special Education Certificate of Completion

Program Contact: Judith Falaro (judith.falaro@qu.edu) 203-582-8868

The Special Education Certificate of Completion is a 12-credit option for MAT program teacher candidates or for external applicants who hold a current teaching certificate from an approved institution of higher education and/or are practicing teachers. The certificate is not a degree or licensure program. External candidates may earn the certificate by completing 12 credits of online special education courses as listed under Curriculum (p. 467). Current certified teachers interested in the Special Education Certificate of Completion online program should contact Graduate Admissions.

For internal candidates for the certificate, the 12 credits required for the Special Education Certificate of Completion are earned through three 4-credit online courses offered during the fall, J-term, spring and summer.

MAT program candidates interested in the Special Education Certificate of Completion should notify the program contact, Judith Falaro (judith.falaro@qu.edu), by February of their junior year (or the start of the first semester for candidates in the five-semester MAT program).

School of Health Sciences

The state of Connecticut is a growing center of nationally known medical facilities, biotechnology development and pharmaceutical research and manufacture. These institutions have increased demands for individuals with up-to-date training. The Master of Health Science program offers several majors that meet these standards. The Cardiovascular Perfusion program provides comprehensive preparation in clinical sciences and clinical internships to prepare perfusionists who provide life support during cardiopulmonary bypass. The Medical Laboratory Sciences/ Biomedical Sciences program provides laboratory professionals with the opportunity to specialize in fields such as microbiology and biomedical sciences. A full-time program for Pathologists’ Assistants provides training in pathology, anatomy and the medical sciences. The Physician Assistant studies program provides full-time instruction in the basic medical and clinical sciences needed for certification and a graduate degree in a growing profession. The Social Work program prepares students for achievement and leadership in the field of social work. The Radiologist Assistant program provides students with full-time advanced training in the field of radiology, which is needed for certification and to obtain a master’s degree.

Career Development

In the School of Health Sciences, the assistant dean for career development works with students to explore majors and career interests through individual consultations and group sessions, and guides them through a career development process. Assistance is provided with resume and cover letter writing, interview preparation, conducting a job search and graduate school applications. Students can participate in experiential learning through community service as well as internships, part-time and summer employment. A health professions career fair is held every spring at the North Haven Campus.

Additional Requirements

Academic programs with clinical components use multiple clinical education centers. Students are responsible for their transportation to and from these clinical agencies.

Background Checks

Students should be aware that certain clinical sites or internship locations may require a criminal background check before a student is placed in the clinic or intern site. The university has procedures to assist students in obtaining such a background check. The cost of the background check is the responsibility of each individual student.

Academic and Clinical Software Package Cost

Students enrolled in certain undergraduate and graduate programs in the School of Health Sciences are required to pay for access to EXXAT, a clinical and academic software package. The cost for EXXAT is a one-time charge of \$150 (subject to change) that permits access to the software for the duration of the student's enrollment in their current major. Students in undergraduate and graduate programs that require clinical/fieldwork experiences will be required to pay for access to a documentation approval system through EXXAT. Specific information regarding documentation approval will be provided by individual programs.

Technical Standards for Admission

Students admitted to all programs in the School of Health Sciences must be able to meet their program's technical standards and or essential functions. Technical standards are developed by accreditation agencies and organizations to establish the essential qualities and standards considered necessary to achieve the skills, knowledge and competencies for entry-level practice. Information on technical standards and essential functions may be found in the catalog, on the website or by contacting the individual program chairperson.

Academic Good Standing

All undergraduate and graduate students in the School of Health Sciences are expected to maintain the required minimum GPA set forth by their respective program of study (if applicable). Each program may have additional benchmarks that must be met to progress within the program of study. The student should refer to the program's description in the Quinnipiac University Catalog and to the program's student handbook (if applicable) for clarification for what is required to maintain his/her status within the program.

At the end of each semester, the program directors will compile a list of students who are deficient in meeting academic or clinical/professional achievement requirements. Utilizing the review process established by his/her program, the student will be notified via email of his/her status in the program. Deficient students may be: a) placed on probation, b)

suspended or c) dismissed. Students placed on probation remain in their program but in order to progress, must meet the performance standards specified in their probation notification letter. For further clarification please see the Program Level Academic Good Standing Policy (p. 62).

Admission

Students who have a bachelor's degree in the biological, medical or health sciences are eligible for admission to the Master of Health Science program. A detailed autobiography of personal, professional and educational achievements as well as two letters of reference must be submitted with a student's application. Applications may be obtained from the Office of Graduate Admissions. Applicants should refer to the Graduate Admission Requirements (p. 675) in this catalog.

The Quinnipiac University Physician Assistant program participates in the Central Application Service for Physician Assistants (CASPA). Go to caspa.liaisoncas.com (<https://caspa.liaisoncas.com>) for more information regarding the application process and fees. All applications, transcripts, references and other supporting materials are submitted directly to CASPA. The Physician Assistant program admits students on a yearly basis. The deadline for completed applications to CASPA is September 1. Interviews are conducted from the early fall through mid-November. Classes begin in late May/early June.

Master of Health Science

- Advanced Medical Imaging and Leadership (p. 790)
- Cardiovascular Perfusion (p. 796)
- Biomedical Sciences (p. 792) with concentrations in:
 - Medical Sciences
 - Microbiology
- Health Science (p. 809)
- Pathologists' Assistant (p. 815)
- Physician Assistant (p. 820)
- Radiologist Assistant (p. 824)

Master of Social Work

- Master of Social Work (p. 810)

Doctoral Degrees

- Entry-Level Professional Doctor of Occupational Therapy (OTD) (p. 545)
- Online Post-Professional Occupational Therapy Doctorate (OTD) (p. 553)
- Entry-Level Doctor of Physical Therapy (DPT) (p. 799)

Advanced Medical Imaging & Leadership (AMI)

AMI 515. Introduction to Magnetic Resonance Imaging. 3 Credits. Magnetic resonance imaging is studied as it pertains to diagnostic imaging. Topics include mathematics, physical principles, imaging concepts, equipment, image quality, clinical applications and biologic effects of MRI. Prerequisite: ARRT certification or permission of the department.

Offered: Every year, Summer

AMI 515L. Magnetic Resonance Imaging Principles I - Lab Practicum. 1 Credit.

This course demonstrates the principles presented in the didactic component of the course, AMI 515, Introduction to Magnetic Resonance Imaging. This lab complement enables the student to develop hands-on skills with the Toshiba Vantage 1.5 Tesla Magnetic Resonance Imaging scanner. Training includes the operation of the hardware and software components of the equipment with the objective to optimize image quality. This course also influences the student's development of patient-care skills dealing with claustrophobia and safety concerns regarding MRI. Prerequisite: ARRT certification or permission of the department.

Offered: Every year, Summer

AMI 516. Advanced MRI Principles and Imaging. 3 Credits.

This course is designed for the student who has successfully passed AMI 515 (Introduction to Magnetic Resonance Imaging) and/or for the technologist actively working in the MRI field. The main objective for this course is to expand on the basic MRI physics and advanced MRI imaging applications.

Offered: Every year, Fall

AMI 516L. Magnetic Resonance Imaging Principles II - Lab Practicum. 1 Credit.

This course demonstrates the principles presented in the didactic component of the course, AMI 516 (Advanced MRI Principles and Imaging). This lab complement enables the student to further develop hands-on skills with the Toshiba Vantage 1.5 Tesla Magnetic Resonance Imaging scanner and expand upon the basic MRI physics and advanced imaging applications. Training includes the operation of the hardware and software components of the equipment with the objective to optimize image quality. This course also influences the student's continued development of patient care skills dealing with claustrophobia and safety concerns regarding MRI.

Offered: Every year, Fall

AMI 517. Magnetic Resonance Imaging Clinical I. 2 Credits.

This practicum involves providing clinical experience in the field of magnetic resonance imaging (MRI) at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations in MRI under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework.

Offered: Every year, Fall

AMI 518. Magnetic Resonance Imaging Clinical II. 2 Credits.

This practicum is a continuation of AMI 517 and involves providing clinical experience in the field of magnetic resonance imaging (MRI) at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations in MRI under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework.

Offered: Every year, Spring

AMI 523. Advanced Sectional Anatomy. 3 Credits.

This sectional anatomy course includes head, thorax, abdomen, pelvis and extremities. In addition to coronal, sagittal and axial imaging examined, oblique sections and three-dimensional reconstruction are included. Only for students enrolled in the AMI program.

Offered: Every year, Summer

AMI 530. Mammography and Bone Densitometry Clinical I. 2 Credits.

This practicum involves providing clinical experience in the field of mammography and bone densitometry at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework.

Offered: Every year, Fall

AMI 531. Mammography and Bone Densitometry Clinical II. 2 Credits.

This practicum is a continuation of AMI 530 and involves providing clinical experience in the field of mammography and bone densitometry at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework.

Offered: Every year, Spring

AMI 534. Bone Densitometry. 1 Credit.

This distance learning course provides students with an overview of the history of bone densitometry as well as knowledge in the areas of osteoporosis and bone health, equipment, quality control, patient preparation and safety, and scanning. The course encompasses didactic components to cover all relevant material currently consistent with the ARRT certification examination. Prerequisite: ARRT Registered Radiologic Technologist.

Offered: Every year, Summer Online

AMI 537. Computed Tomography Clinical I. 2 Credits.

This practicum involves providing clinical experience in the field of computed tomography (CT) at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations in CT under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework.

Offered: Every year, Fall

AMI 538. Introduction to CT Scanning. 3 Credits.

Computed tomography (CT) scanning as it pertains to diagnostic imaging is studied. Topics include principles, physics, image reconstruction, equipment, image quality, radiation dose, specialized techniques, diagnostic applications and some cross-sectional anatomy. Prerequisite: ARRT certification or permission of the department.

Offered: Every year, Summer

AMI 538L. Computed Tomography Lab I. 1 Credit.

The course demonstrates the principles presented in the didactic component of the course, AMI 538, and enables the student to develop hands-on skills with the Toshiba Aquilion 64 slice computed tomography unit. Training includes the operation of the hardware and software components of the equipment with the objective to optimize image quality and minimize patient radiation dose. Prerequisite: ARRT certification or permission of the department.

Corequisites: Take AMI 538.

Offered: Every year, Summer

AMI 539. Computed Tomography Clinical II. 2 Credits.

This practicum is a continuation of AMI 537 and involves clinical experience in the field of computed tomography at various facilities, including affiliated hospitals and imaging centers. Students attending clinic perform examinations in CT under the direct or indirect supervision of a certified radiologic technologist. The experience gained through these rotations continually supports the need to obtain quality diagnostic images while promoting and maintaining a safe work environment as well as appropriate patient care. Prerequisite: Successful completion of all previously sequenced programmatic coursework.

Offered: Every year, Spring

AMI 540. Principles of Mammography. 3 Credits.

This course provides an overview of the history of mammography as well as fundamental knowledge in the areas of anatomy, physiology and pathology of the breast, mammographic equipment and instrumentation, positioning and technique for mammography. Also covered are methods of patient education and quality control. The course prepares students for the ARRT Mammography Certification Examination and meets all ACR/FDA training requirements. Prerequisite: ARRT certification or permission of the department.

Offered: Every year, Summer

AMI 541L. Mammography and Bone Densitometry Lab. 2 Credits.

The course demonstrates the principles presented in the didactic component of the courses, AMI 534 and AMI 540, and enables the student to develop hands-on skills with the on-site Hologic Mammography and Bone Densitometry units. Training includes the operation of the hardware and software components of the equipment with the objective to optimize image quality and minimize patient radiation dose. Only for students enrolled in the AMI program.

Offered: Every year, Summer

AMI 545. Women's Health and Imaging. 3 Credits.

This course provides a thorough look at women's health and disease with a focus on diagnostic imaging. Students examine common health factors for females including pathophysiology, family history, socioeconomic status and diagnostic procedures. This course investigates common health topics for the betterment of overall care of self, community and the health care consumer enabling the health professional to answer questions and have a general understanding of the diseases that may be encountered in health care practice. Program content is dynamic and is modified each year to represent the most current data and statistics. Prerequisite: Successful completion of all previously sequenced programmatic coursework.

Offered: Every year, Fall

AMI 560. Pathology for CT and MRI Technologists. 3 Credits.

This course covers identification, pathophysiology and pattern recognition of common pathologies observed in computed tomography and magnetic resonance imaging. Normal and abnormal comparisons are presented. Prerequisite: Successful completion of all previously sequenced programmatic coursework.

Offered: Every year, Spring

AMI 570. Capstone I. 1 Credit.

This capstone course is the first in the advanced medical imaging curriculum, which integrates advanced imaging and business course material. Students begin developing a consulting/case project that is relevant to current and emerging practice areas in imaging. Students apply knowledge of project management, critical analysis and professional presentations. Prerequisite: Successful completion of all previously sequenced programmatic coursework.

Offered: Every year, Fall

AMI 575. Capstone II. 3 Credits.

This final capstone course integrates the knowledge and skills gained throughout the program. The course focuses on the design and implementation of a consulting case/project, including a comprehensive analysis of organizational issues and proposal of appropriate recommendations and implementation plans. The result is a professionally written consulting paper and/or presentation. Prerequisite: Successful completion of all previously sequenced programmatic coursework.

Offered: Every year, Spring

Biomedical Sciences (BMS)

BMS 502. Research Methods. 4 Credits.

This course involves topics related to developing scientific, analytical and laboratory skills, including written and oral communication, critical thinking and reasoning, scientific inference and information literacy. The purpose of the course is to examine, discuss and perform current methods used by research scientists and health care workers. Topics include recombinant DNA and protein techniques, Enzyme Linked Immunosorbent Assays, as well as experimental design and data analysis.

Offered: Every year, All

BMS 503. Professional Development in Biomedical Sciences. 1 Credit.

This course aims to assist students in developing their individual career and professional development plans within the field of research and medicine. Topics include: exploring job search strategies, graduate and medical school applications, resume and cover letter preparation, interviewing skills, effective communication and presentation skills, professionalism and ethical behavior. This course is graded on a pass/fail basis.

Offered: Every year, Fall

BMS 504. Quality and Safety in Healthcare Organization. 3 Credits.

This course will introduce students to the science of quality improvement, error reduction, and patient safety from the perspective of healthcare organizations. Medical errors, quality and safety initiatives, intervention strategies, and institutional challenges to improve patient care in the US healthcare systems will be discussed. Case-based studies will be used to cover complex topics in real-world settings. Students will earn a Basic Certificate in Quality and Safety through the Institute for Health Care Improvement.

Offered: Every year, Fall

BMS 508. Advanced Biology of Aging. 3 Credits.

Why we age has been the eternal question and the most unsolved mystery in the history of mankind. However, we are gradually able to elucidate some of the secrets that regulate aging processes. This course focuses on the fundamental physiological deviations that occur during the aging process in individual tissue and organ systems and the various theories that attempt to define the reasons for these deviations. The course also emphasizes pathologies related to aging that are time regulated alterations in cellular, physiological and biochemical functions.

Offered: Every year, Fall

BMS 510. Biostatistics. 3 Credits.

This course covers the application of statistical techniques to the biological and health sciences. Emphasis is on mathematical models, collection and reduction of data, probabilistic models estimation and hypothesis testing, regression and correlation, experimental designs and non-parametric methods.

Offered: As needed

BMS 511. Writing for Scientists.**3 Credits.**

Students develop skills in expository writing in the context of scientific forms. This course covers how to construct a hypothesis and develop an argument through analysis and critical thinking, how to write and present research papers, and other related topics. Intensive written exercises draw on student experience to clarify professional expression in practical situations. Readings include journalistic and scientific articles.

Offered: As needed**BMS 515. Advanced Pathophysiology I.****3 Credits.**

Essential concepts of pathophysiology are emphasized. Normal function and selected disorders are studied especially as they relate to homeostatic and defense/repair mechanisms. Where appropriate the course includes clinical correlations of disease states with symptoms and physical findings.

Offered: As needed**BMS 516. Advanced Pathophysiology II (NUR 522).****3 Credits.**

Concepts of pathophysiology are continued in this course, with an emphasis on selected disorders of the human system. Relationships between normal physiologic function, pathogenesis and pathology are discussed. The course includes clinical correlations of disease states with physical and laboratory findings.

Prerequisites: Take BMS 515.**Offered:** As needed**BMS 517. Human Embryology.****3 Credits.**

This course considers the fundamental processes and mechanisms that characterize the embryological development of the human organism. Knowledge of the developing human serves as a basis for understanding normal relationships of body structures and causes of congenital malformation. Emphasis is on clinical as well as classical embryology.

Offered: Every year, Fall**BMS 518. Pathophysiology.****3 Credits.**

Disease processes are studied as they relate to normal physiological and homeostatic mechanisms, basic pathology, pathogenesis, and defense/repair mechanisms. Where appropriate, the course includes some clinical correlations of disease states with signs, symptoms and lab findings. This course also is offered online in the spring.

Offered: Every year, Spring**BMS 520. Neuropharmacology.****3 Credits.**

This course explores the effect of drugs on cells, synapses and circuits within the nervous system. Students examine neurotransmitter and neuromodulatory systems in depth as pharmacotherapeutic targets for the treatment of psychiatric and neurological disorders. Students also comprehensively evaluate the effect of drugs on cognition and behavior.

Offered: As needed**BMS 521. Advances in Hematology.****3 Credits.**

This course covers fundamental concepts and advances in human hematology including an in-depth study of the function, physiology and diseases associated with blood cells, hematopoiesis, bone marrow examination, evaluation of red cell morphology, disease processes that lead to abnormal red cell morphology, anemias and thalassemias, white blood cell differentiation, and white blood cell disorders both benign and malignant, in-depth discussion of the morphologic and immunologic classification of leukemias, a review of myelodysplastic syndromes, myeloproliferative disorders, lymphomas and lipid storage disease and platelets. Emphasis on identifying normal and abnormal WBC and RBC and indices as leads to diagnosis using the hemogram, blood smears and case studies. Course includes an overview of general hematological methods and molecular hematologic techniques used in the diagnosis of blood cells disorders.

Offered: As needed**BMS 522. Immunology.****3 Credits.**

This course examines theories, techniques and recent advances in immunology and the latest knowledge on immunoglobulins, complement, the role of T and B cells in immune response study of allergy, tumor and transplantation immunology, and autoimmune diseases. The principles of immunology and how they apply to the diagnostic laboratory are discussed. Techniques studied include immuno- and gel-electrophoresis and fluorescent antibodies.

Offered: Every year, Fall**BMS 522L. Immunology Lab.****1 Credit.**

This is an interactive, hands-on, project-based laboratory course examining various aspects of the human immune system, including both the innate and adaptive immune response. Students gain experience with standard laboratory techniques such as ELISAs, gel electrophoresis, Western Blotting, with an emphasis on quantitative reasoning and critical thinking. This course must be taken in conjunction with BMS 522 lecture.

Corequisites: Take BMS 522.**Offered:** Every year, Fall**BMS 525. Vaccines and Vaccine Preventable Diseases.****3 Credits.**

This immunology course involves the investigation of vaccines and vaccine preventable diseases. The purpose of the course is to examine and discuss the current understanding of vaccinations, as well as the historical and current implication of vaccine preventable diseases. By the end of the semester, students should gain knowledge about vaccine preventable diseases, understand how vaccines work, how they are made, who recommends vaccines, the childhood vaccination schedule, when they should be given and why they are still necessary. Most importantly, students should be able to explain why vaccines are safe, and to be able to debunk the current myths and misconceptions regarding vaccines. Upper-level undergraduates may take course with permission.

Offered: Every other year, Spring**BMS 526. Epidemiology.****3 Credits.**

This graduate-level course in epidemiology directs itself toward application of epidemiological principles. The course involves analysis of prospective and retrospective studies, cross-sectional studies and experimental epidemiology. Both communicable and chronic disease case studies are used, as well as case studies of occupationally induced diseases. The use of biostatistics in epidemiological studies is stressed. This course covers basic epidemiology principles, concepts and procedures useful in the surveillance and investigation of health-related states or events.

Offered: Every other year, Fall

- BMS 527. Pharmacology.** **3 Credits.**
This course provides students with knowledge of the foundations and advances in pharmacology. The first third of the class covers the basic principles of the FDA drug process, pharmacodynamics, pharmacokinetics, therapeutics and toxicology. The rest of the course is devoted to clinical review of the basic classes of drugs.
Offered: Every year, Summer
- BMS 528. Advanced Clinical Parasitology.** **4 Credits.**
This course presents an advanced study of protozoan and helminth parasites of humans. Lecture focuses on the epidemiology and treatment of selected diseases. Laboratory focuses on clinical diagnosis, diagnostic techniques including immunodiagnostic techniques and advanced experimental life cycle studies using both living and preserved materials.
Offered: Every year, Spring
- BMS 532. Histology and Lab.** **4 Credits.**
This course is intended for pathologists' assistant students with a background in basic descriptive microscopic anatomy. The lecture material includes the microscopic and ultramicroscopic structure of cells, tissues and organs with emphasis on biochemical composition and distribution as related to functional mechanisms. The laboratory work involves the preparation of microscope slides of normal vertebrate tissues, including those of humans, for histological and histochemical studies as the student may expect to encounter in the clinical laboratory.
Offered: Every year, Fall
- BMS 532L. Histology Lab.** **0 Credits.**
Lab to accompany BMS 532. (3 lab hrs.)
Offered: Every year, Fall and Summer
- BMS 535. Histochemistry and Lab.** **3 Credits.**
This course is intended for pathologists' assistant students with a background in basic descriptive microscopic anatomy. The lecture material includes the microscopic and ultramicroscopic structure of cells, tissues and organs with emphasis on biochemical composition and distribution as related to functional mechanisms. The lab work involves the preparation of microscope slides of normal vertebrate tissues, including those of humans for histological and histochemical studies as the student may expect to encounter in the clinical laboratory.
Offered: Every year, Spring
- BMS 535L. Histochemistry Lab.** **0 Credits.**
This lab accompanies BMS 535.
Offered: Every year, Spring
- BMS 536. Endocrinology.** **3 Credits.**
This course introduces students to 1) an intensive understanding of the mechanism of hormone action; 2) the importance of the interrelationship among all hormones; 3) a detailed clinical situation dealing with hormonal aberrations; and 4) a theoretical and practical method for hormone assays.
Offered: As needed
- BMS 552. Toxicology.** **3 Credits.**
Biochemical toxicology is the branch of science that deals with events at the molecular level in which toxic compounds interact with living organisms. It is fundamental to the understanding of toxic reactions and therapeutic agents, and for the assessment of toxic hazards by chemicals and related substances in the environment. This course deals with compounds exogenous to normal metabolism, as well as metabolic intermediates, hormones, trace elements and other materials found in the environment. It examines the absorption, distribution, kinetics and elimination of such substances. Particular emphasis is placed upon the effects of toxic materials on neurotoxicity, hepatotoxicity, genetic toxicology and chemical carcinogenesis.
Offered: As needed
- BMS 556. Seminar in Health Care Disparities.** **1 Credit.**
The Centers for Disease Control and Prevention (CDC) defines health disparities as differences in health outcomes between various segments of the population, which are mostly associated with socioeconomic status, race/ethnicity and level of education. This course investigates the cause and effect of health care disparities using an interdisciplinary approach. Students become familiar with the research literature on the topic from different points of view by being part of a literature review/journal club.
Offered: As needed
- BMS 561. Immunohematology.** **3 Credits.**
This course examines the current concepts of hematopoiesis, including red blood cell and white blood cell morphogenesis, blood banking, blood typing, donor selection, adverse transfusion reactions, ABO antigens/antibodies, crossmatching, the structure and function of the components of normal blood and bone marrow, pathological processes that occur in the blood and bone marrow, and the normal and abnormal events during hemostasis.
Offered: As needed
- BMS 562. Blood Coagulation and Hemostasis.** **3 Credits.**
This study of the basic principles of hemostasis includes the vascular component, platelet physiology and function, coagulation factors/fibrin clot formation and fibrinolysis. Hereditary and acquired forms of hemorrhagic disorders and thromboembolic disease are examined in detail along with the test procedures for their diagnoses and the initiation of proper therapy.
Offered: As needed
- BMS 563. Anemias.** **3 Credits.**
This study of those classes of disorders related to abnormal red cell pathophysiology includes both intracorporeal and extracorporeal defects. Erythropoiesis and basic red cell metabolism are briefly reviewed. Etiologies, differential diagnoses, and treatment of anemias are discussed in-depth.
Offered: As needed
- BMS 564. Fundamentals of Oncology.** **4 Credits.**
This course presents a study of the chemical and biological basis of carcinogenesis, natural history of human cancer, biochemistry of cancer, various aspects of experimental oncology including tumor immunology, and factors affecting survival and multiplication of cancer cells in the body. Delivery methods include weekly discussions on original research papers that correlate clinical studies with the molecular mechanisms presented in lecture.
Offered: Every year, Spring

BMS 565. Leukemia.**3 Credits.**

This course includes in-depth discussions with emphasis on the major forms of leukemia (ALL, CLL, AGL, CGL), current methods of blood component therapy and chemotherapy, the role of infections, immunological diagnostic advances, psychiatric and social aspects in patient management and recent advances in leukemia research. The purpose of the course is to enhance knowledge and understanding of those students who have had an introductory course in hematology and those who are actively involved in clinical or research hematological laboratories.

Offered: As needed**BMS 569. Antimicrobial Therapy.****3 Credits.**

This graduate-level course explores the antimicrobial agents used to treat infectious diseases by inhibiting microbial growth and survival. This interactive, discussion-based class investigates the history, current status and future directions of antimicrobial drugs with an emphasis on antibacterial and antiviral chemotherapeutic agents. Topics include the mode of action and efficacy of drugs, as well as the development, spread and mechanisms of drug resistance. Upper-level undergraduates may take this course with permission.

Offered: Every year, Summer**BMS 570. Virology.****4 Credits.**

This course presents a study of human and animal viruses, viral diseases, biochemical properties, and classification methods of isolation and identification of viral agents; preparation and inoculation of tissue culture, animals and embryonated eggs, immunological techniques, and antiviral chemotherapy.

Offered: Every year, Spring**BMS 572. Pathogenic Microbiology.****4 Credits.**

This graduate microbiology course involves the study of medically important microbes, with a particular emphasis on the pathology associated with human infection. Students examine the underlying principles of microbial pathogenesis, including elements of structural biology, epidemiology, immunology and pathology. They also survey microbial organisms that plague mankind today.

Offered: Every year, All**BMS 573. Mycology.****3 Credits.**

The morphology, taxonomy and classification of fungi and yeasts of medical importance are studied in this class. Laboratory exercises include isolation and identification techniques of selected human pathogens.

Offered: As needed**BMS 575. Food Microbiology.****4 Credits.**

This applied course in microbiology is concerned with the microorganisms involved in the manufacture and spoilage of foods. Major pathogens that may be transmitted via foods are discussed. Laboratory stresses both identification of food-associated organisms and standard microbiological procedures used to determine the quality and safety of foods. Upper-level undergraduates may take course with permission.

Offered: As needed**BMS 576. Drug Discovery and Development.****3 Credits.**

The material presented in this course encompasses the process of drug discovery and development. Topics covered include many aspects of drug development such as target identification, evaluation and screening, all phases of clinical development and post-marketing activities. The material presented is across drug classes, with a particular focus on psychoactive and neurology compounds.

Offered: Every year, Fall**BMS 577. Critical Analysis and Reasoning In the Biomedical Sciences.****2 Credits.**

This course helps develop skills necessary for critical analysis and reasoning. This course covers inconsistencies, biases, and fallacies in reasoning and analysis vital for research/science/healthcare careers as well as MCAT and other exam preparation. Students will: examine how they think while reading and discussing clinical & research literature, learn to analyze readings and data by examining and practicing logical reasoning, and build evaluations and analyzing readings to ask and answer questions and build testable hypotheses.

Offered: Every year, Spring**BMS 578. Cellular Basis of Neurobiological Disorders.****3 Credits.**

A detailed overview of neurobiological disorders at the molecular level is presented. Recent advances in gene cloning to identify causes for some of these disorders are discussed in detail.

Offered: As needed**BMS 579. Molecular Pathology.****3 Credits.**

Molecular pathology is a new and rapidly growing discipline of laboratory medicine and includes applications of molecular techniques to all facets of diagnostic medicine. This course reviews the structure and function of nucleic acid sequences and provides an in-depth introduction to the molecular techniques exploited in the diagnosis of human diseases. The course focuses on currently employed applications to areas such as genetic disease, infectious disease, cancer and identity testing.

Offered: As needed**BMS 583. Forensic Pathology.****3 Credits.**

This course is designed for students interested in the practical applications of science, specifically forensic medicine. Graphic examples of injuries and patterns of trauma serve as the backdrop for introduction to the understanding of the techniques involved in death investigation from the medical perspective.

Offered: As needed**BMS 584. Emerging and Re-emerging Infectious Diseases.****3 Credits.**

This graduate-level course discusses current topics related to the plethora of infectious agents that besiege us. Emerging bacterial, protozoal and viral diseases, whether strictly animal or human or zoonotic pathogens, represent an increasing threat to animal and human health. The course examines, defines and discriminates between emerging, re-emerging and other infectious diseases; defines host and agent characteristics and risk factors; and analyzes social, economic and international trade changes, improper use of antibiotics, and multidrug resistant infectious agents as factors of emerging diseases. Upper-level undergraduates may take this course with permission.

Offered: Every other year, Fall

- BMS 585. Outbreak Control.** **3 Credits.**
An outbreak or epidemic is the occurrence of more cases of disease than expected in a given area or among a specific group of people over a particular period of time. Usually, the cases are presumed to have a common cause or to be related to one another in some way. Public health agencies must decide whether to handle outbreaks without leaving the office, or spend the time, energy and resources to conduct field investigations. The most important reason to investigate is to learn enough about the situation to implement appropriate control and prevention measures. Investigations also enable researchers to advance knowledge about the disease, agent, risk factors and interventions; provide a way to respond to public, political or legal concerns; evaluate a health program's effectiveness and weaknesses; and provide training. When multiple agencies are involved in the investigation, coordination and communication become even more essential. Upper-level undergraduates may take this course with permission.
Offered: Every other year, Fall
- BMS 589. Independent Study.** **1-6 Credits.**
Offered: As needed
- BMS 591. The New Genetics and Human Future.** **3 Credits.**
We are the first creatures on Earth learning a 3.5-billion-year-old DNA language. The completion of the Human Genome Project and the emerging science of genomics has dramatic ethical, legal and social implications. New genetics have the potential to affect all spheres of human life, including the ability to construct our destiny as a species. The goal of the course is not to give the answers to the numerous questions and dilemmas of our exciting and controversial future but to inspire interest and desire to pursue more study.
Offered: Every year, Spring
- BMS 595. Transplantation Immunology.** **3 Credits.**
This course examines the current understanding of the major histocompatibility complex; the molecular basis of alloreactivity; and immunological mechanisms of allograft rejection, tolerance, and graft versus host disease. The objectives are: to understand the basics of the histocompatibility complex in relation to normal, disease and transplantation states, to understand the fundamental differences between immune responses to self antigens, foreign antigens, allo-antigens, and other non-self antigens, and to become familiar with the mechanisms underlying successful allogeneic transplantation and appreciate the concepts of immunosuppression and tolerance. Graduate level students are expected to complete a paper reviewing a current topic in transplantation. A basic understanding of immunology is desirable. Upper-level undergraduates may take course with permission.
Offered: Every other year, Fall
- BMS 597. Biomedical Sciences Internship.** **4 Credits.**
Students partake in a full-time professional work experience with a sponsoring organization. The experience brings together theory, application and current practice in the translational sciences. Journaling and discussion boards provide students with a reflective and intentional assessment of the field, their work and career development. Students submit a paper describing their experimental aims, design and outcomes as well as present their findings as a seminar open to the general university public.
Offered: Every year, Summer
- BMS 598. Synaptic Organization of the Brain.** **3 Credits.**
Students study a variety of brain regions from both an anatomic and physiologic viewpoint to learn how these structures are organized at the synaptic level. The course includes a discussion of how these regions are associated with neurological disease. At the end of the class, students should: 1) understand the basic principles of neuronal functioning at the cellular and circuit level; 2) understand how the wide diversity of neural circuits seen in the brain generate specific functions in different regions; and 3) gain experience reading and interpreting scientific papers.
Offered: As needed
- BMS 599. Biomarkers.** **3 Credits.**
Technological advances in molecular biology have provided an opportunity to evaluate drug-disease relationships at the molecular and cellular level. The goal of this course is to introduce the concept of biomarkers and how they are used clinically. This course covers both theoretical concepts and practical applications of biomarkers. Topics include the rationale for biomarkers, study design, logistics of sample collection/storage, options and techniques for analysis, as well as current applications in health care, including drug safety, regulatory issues, ethical considerations and the future direction of biomarker applications.
Offered: Every year, Spring
- BMS 622. MED Cross-Listed Selective.** **3 Credits.**
BMS course to be cross-listed with a MED Course.
Offered: Every year, All
- BMS 650. Thesis I.** **4 Credits.**
Approval of one of the two thesis options-experimental laboratory research or nonlaboratory-based project-is required. The thesis topic may be handled as an original investigation or as an applied problem (e.g., clinical) so long as it is about a health-related problem. Typed copies of final draft, prepared in compliance with thesis-writing manual, must be submitted prior to issuance of diploma. Thesis projects must be completed within three years after registration for the thesis course.
Offered: As needed
- BMS 651. Thesis II.** **4 Credits.**
Approval of one of the two thesis options-experimental laboratory research or nonlaboratory-based project-is required. The thesis topic may be handled as an original investigation or as an applied problem (e.g., clinical) so long as it is about a health-related problem. Typed copies of final draft, prepared in compliance with thesis-writing manual, must be submitted prior to issuance of diploma. Thesis projects must be completed within three years after registration for the thesis course.
Offered: As needed
- BMS 670. Comp Exam/Biomedical Sciences.** **2 Credits.**
The comprehensive examination is a requirement of the non-thesis option of the Biomedical Sciences program. The purpose of the exam is twofold. First, it ascertains if the student possesses both the broad and specific knowledge expected of someone holding a master's degree. Second, it inquires if the student has been able to integrate knowledge obtained from individual courses into unified concepts that link the student's own specialization to other fields of study. A written essay exam is administered and graded by the exam course committee or individual faculty. Students should schedule an appointment with the program director before registering for the comprehensive exam course.
Offered: As needed
- BMS 681. Research Methods in Biomedical Sciences I.** **1-4 Credits.**
Students learn the basic principles of research methodology. Register by paper with your mentor.
Offered: Every year, Fall and Spring

BMS 688. Independent Study. 1-6 Credits.
Offered: As needed

BMS 689. Independent Study. 1-4 Credits.
Offered: As needed

Health Science Studies (HSC)

HSC 505. Interprofessional Community-Based Service Learning Seminar: Age-Related (HSC 205). 1 Credit.

This course provides an opportunity to engage in active learning, implementing a program with a local community partner working with children/youth, adults or older adults. Students are required to participate in 10-15 hours of community engagement to observe and apply the concepts of interprofessional health care in a community-based setting. Community experience is supervised by faculty with expertise in analysis of community-based practice. Classroom/community engagement schedules will be determined. Course may be taken more than once.
Offered: Every year, All

HSC 506. Interprofessional Community-Based Service Learning Seminar: International (HSC 206). 1 Credit.

Students observe and apply various health/wellness concepts in an international community-based setting. Students are required to spend a minimum of 15 hours at an international site to engage in active learning by implementing a program with an international community partner. Course is taught by faculty with expertise in the analysis of community-based practice. Classroom/community engagement schedules will be determined. This course may be taken more than once. Application process for international experiences required.
Offered: Every year, All

HSC 507. Interprofessional Community-Based Service Learning Seminar: Special Populations (HSC 207). 1-2 Credits.

This course involves active learning implementing a program with a local community partner working with at-risk population. Students are required to participate in 10-15 hours of community engagement to observe and apply the concepts of interprofessional health care in a community-based setting. Faculty with expertise in the analysis of community-based practice lead discussions and community engagement related to population health in the local community. This course may be taken more than once. Offerings include MTW section during Thanksgiving week.
Offered: Every year, All

HSC 599. Health Science Independent Study. 1-5 Credits.
Offered: As needed

Occupational Therapy (OT)

OT 501F. Immersive Fieldwork Experience in Psychosocial and Mental Health Practice (Fieldwork IIa). 3 Credits.

This six- to seven-week fieldwork experience provides students with in-depth opportunities to integrate theory, research and best practice in psychosocial and/or mental health settings. The experience promotes clinical reasoning, reflective practice and professionalism while enhancing one's therapeutic use of self. Practice settings may include traditional mental health agencies, community-based programs and nontraditional sites that promote psychological and social factors for occupational engagement and well-being.
Offered: Every year, Summer

OT 501S. Fieldwork Seminar. 1 Credit.

This course runs concurrently with the mental health/psychosocial summer experience and is delivered in an online format. It is designed to enhance professional and clinical reasoning while promoting the integration of theory to practice. Students are encouraged to critique the system of care as it relates to best practice for an identified population.
Offered: Every year, Summer

OT 502. Pharmacology in Occupational Therapy Practice. 2 Credits.

This course addresses the pharmacokinetics, side effects and drug interactions of medications prescribed to clients who are commonly referred for occupational therapy services. The course emphasizes the role of the occupational therapist in medication management as a health maintenance activity and in monitoring the impact of drug therapy on the therapeutic process and occupational performance of clients.
Offered: Every year, Summer

OT 511. Administration and Management in Occupational Therapy. 4 Credits.

This class introduces students to the daily management functions of an occupational therapy department including planning, organizing, directing, controlling, and supervision of occupational therapy assistants and other department personnel. The course integrates students' knowledge of interventions with information related to the delivery of occupational therapy services. Topics include managed care, quality assurance, leadership, regulatory agencies, models of practice, ethics, and consultation. Students gain hands-on experience with budgeting, marketing, program evaluation, and ethical problem-solving in administration.
Offered: Every year, Fall

OT 522L. Biomechanical Interventions in Occupational Therapy. 2 Credits.

This lab provides students with "hands-on" learning experience and clinical reasoning in the safe and effective application of biomechanically-oriented interventions including physical agents and modalities, orthotic fitting and fabrication, and therapeutic exercise. Students also are introduced to prosthetics and the role of occupational therapy during pre-prosthetic and prosthetic training. Students apply clinical reasoning to identify the most appropriate biomechanical interventions based on the client's evaluation and socio-cultural factors to facilitate occupational performance. Prerequisite: Matriculation as an MOT student.
Offered: Every year, Fall

OT 531. Sensory Processing and Integration. 3 Credits.

This course provides an in-depth analysis of sensory processing and integration with a focus on clinical reasoning to understand and appreciate the impact of these processes on individuals, populations and community environments. Opportunities are provided to learn specific intervention strategies for individuals, as well a systems approach emphasizing the importance of educating the team of people who support these individuals in varying contexts, to facilitate functional participation and engagement in purposeful and productive activities. Prerequisite: Matriculation as an MOT student.
Offered: Every year, Fall and Spring

OT 531F. Sensory Processing and Integration Fieldwork. 1 Credit.

This course provides structured fieldwork experience to observe and analyze sensory processing the pediatric population. The experience emphasize exposure to the clinical application of the Ayres' sensory integration principles learned in the OT curriculum with fieldwork coordinators with advanced training. Students have the opportunity to reflect on this experience within the lecture course.
Offered: Every year, Fall and Spring

OT 531L. Sensory Processing and Integration Lab. 1 Credit.

This course provides practical experientials designed to assimilate sensory processing and integration concepts. Evaluation, direct intervention and collaboration strategies in traditional environments are emphasized. Additionally, application of sensory integrative concepts into currently relevant community-based contexts and systems are explored to facilitate functional participation and engagement in purposeful, context-specific activities. Prerequisite: Matriculation as an MOT student.
Offered: Every year, Fall and Spring

OT 532. Neurorehabilitation in Occupational Therapy. 3 Credits.

This course provides a comprehensive overview of specialized interventions used by occupational therapy practitioners in neurorehabilitation. This course integrates the use of various theoretical models/frames of reference, current evidence and clinical/professional reasoning pertinent to the OT process in neurorehabilitation practice. Key concepts in interprofessional practice and health literacy are incorporated. Prerequisite: Matriculation as an MOT student.
Offered: Every year, Fall and Spring

OT 532F. Neurorehabilitation in Occupational Therapy Practice Fieldwork. 1 Credit.

This course provides a structured fieldwork experience to observe, participate in, and document the OT process with adult neurological populations in neurorehabilitation settings. Emphasis is on applying evidence and theory into practice and the development of professional identity and may observe inter- and intra-professional collaboration and patient/client education. Students have the opportunity to reflect on this experience within the lecture course.
Offered: Every year, Fall and Spring

OT 532L. Neurorehabilitation in Occupational Therapy Lab. 1 Credit.

This course complements OT 532 Neurorehabilitation in OT Practice in providing a comprehensive overview of specialized interventions used by occupational therapy practitioners in neurorehabilitation. Students have the opportunity to apply methods and techniques according to various theoretical models/frames of reference and current evidence-based interventions. Prerequisite: Matriculation as an MOT student.
Offered: Every year, Fall and Spring

OT 540. Special Topics in Occupational Therapy. 1.5-3 Credits.

This course provides an opportunity for students to delve deeper into the specialized knowledge of the profession with evidence-based, occupation-centered practice as its core subject. Students further explore the specialized roles of the occupational therapist beyond that of a direct provider of skilled services, such as organizational/community leader, educator, case manager, entrepreneur and consultant at the systems level. In addition, students learn various modes of care delivery and systems of care including but not limited to tele-health, community building/development and train-the-trainer; they also evaluate the outcomes of such modes.
Offered: Every year, Spring

OT 541. Assistive Technology in Occupational Therapy. 2 Credits.

This course provides students with exposure to advanced intervention techniques related to assistive technology in occupational therapy. The course focuses on application of assistive technology across the lifespan, and thus emphasizes use of both interventions in a variety of practice contexts and practice settings. Since technology options change rapidly, emphasis is on the clinical reasoning process used to select and evaluate interventions in rehabilitation, home, work, leisure and community technology-related practice areas. Prerequisite: Matriculation as an MOT student.
Offered: Every year, Fall

OT 541L. Assistive Technology in Occupational Therapy Lab. 1 Credit.

This lab course provides students with hands-on experience in advanced intervention techniques related to assistive technology in occupational therapy. The course focuses on application of assistive technology across the lifespan, and thus emphasizes use of both interventions in a variety of practice contexts and practice settings. Since technology options change rapidly, emphasis is on the clinical reasoning process used to select and evaluate interventions in rehabilitation, home, work, leisure and community technology-related practice areas. Prerequisite: Matriculation as an MOT student.
Offered: Every year, Fall

OT 542. Work and Ergonomics. 3 Credits.

This course focuses on the occupation of work applied across the lifespan and to various practice contexts and worker challenges. The course addresses topics related to the occupation of work, including employment acquisition, job performance, volunteerism, and retirement. Work tasks and work demands are analyzed relative to physical, cognitive, social, organizational, and environmental factors that impact job performance. Modifications that optimize worker functioning are examined as prevention and as rehabilitation. Prerequisite: Matriculation as an MOT student
Offered: Every year, Spring

OT 550. OT Research Methods. 4 Credits.

This course addresses the importance of research in the practice of occupational therapy. The course examines the research approaches and methods in occupational therapy practice. Students participate in designing and implementing entry-level research studies as well as analyzing and interpreting the professional literature. Students begin work on their spring capstone project.
Offered: Every year, Fall

OT 556. Professional Development. 3 Credits.

This distance learning course focuses on the current issues related to the roles of the student transitioning to professional. The course emphasizes linking theory to practice, self-analysis and reflection upon academic experience, and relating those to different facets of clinical and professional reasoning as a funding mechanism in practice. Continued professional growth through the development of understanding of personal and professional responsibilities as a practicing therapist and a commitment to lifelong learning and professional advocacy also are addressed. Grant writing is included.
Offered: Every year, Spring

OT 565. Integrative Case Studies. 2 Credits.

This course explores individual, group and population case studies of clients in occupational therapy. Students analyze each case using clinical reasoning, qualitative research strategies, frames of reference and best practices to develop integrative evaluation and intervention skills.
Offered: Every year, Spring

OT 570. Capstone Graduate Projects. 3 Credits.

This capstone course is a culminating experience in the occupational therapy curriculum, which integrates all course-based material and fieldwork experiences with practical application. Students participate in designing and executing a research or creative project that is relevant to current and emerging practice areas in occupational therapy. Students gain experience in project management, critical analysis and professional presentations.
Offered: Every year, Spring

- OT 580. Fieldwork Level IIa. 6 Credits.**
This 12-week supervised experience provides the student with the opportunity to apply theory, evidence, and professional reasoning skills to the occupational therapy evaluation and intervention process for clients across the life span and in a variety of settings. Students have the opportunity to engage in in-depth reflections regarding professionalism and professional identity through concurrent online seminars. Students are expected to abide by program policies outlined in the OT Fieldwork Handbook.
Offered: Every year, Summer
- OT 581. Fieldwork Level IIb. 6 Credits.**
This 12-week supervised experience provides the student with the opportunity to apply theory, evidence, and professional reasoning skills to the occupational therapy evaluation and intervention process for clients across the life span and in a variety of settings. Students have the opportunity to engage in in-depth reflections regarding professionalism and professional identity through concurrent online seminars. Students are expected to abide by program policies outlined in the OT Fieldwork Handbook.
Offered: Every year, Fall
- OT 599. OT Independent Study. 1-3 Credits.**
Offered: As needed
- OT 615. Critical Writing I. 3 Credits.**
This course is the first in a sequence of courses focusing on scholarly reading and writing. Students investigate a specific area of interest, describe best practices as supported by evidence and theory and learn how to conduct a peer review of writing.
Offered: Every year, Spring Online
- OT 616. Self-Directed Study in Clinical Practice. 3 Credits.**
This self-directed course focuses on each individual student's goals and objectives within an area of specialty practice. Students create a proposal and learning contract with objectives, methods and timelines to meet individualized learning goals toward certifications or in-depth learning of a particular topic. The purpose of this course is to work toward individualized professional development goals.
Offered: Every year, Spring Online
- OT 620. Foundations in Teaching and Learning I. 3 Credits.**
This course is the first in a series of courses focusing on advanced topics in teaching and learning. Students explore various theoretical frameworks regarding learning and the relationship between learning theory and occupational therapy. Students work to develop the ability to incorporate learning theory into their educational practice.
Offered: Every year, Spring Online
- OT 621. Creating Effective Learning Environments and Experiences. 3 Credits.**
This course is the second course in the series of courses focusing on advanced topics in teaching and learning. Building upon theoretical foundations explored in OT 620 Foundations in Teaching and Learning I, students explore various educational models and tools to enhance teaching and utilize design steps to develop professional, educational presentations.
Prerequisites: Take OT 620.
Offered: Every year, Summer Online
- OT 625. Special Topics in School-Based Practice I. 3 Credits.**
This course is the first in a series of courses focusing on advanced topics in school-based practice. Students critique existing scholarship and professional documents regarding best practices in school-based practice, and identify and critique existing interventions utilized in school-based practice and their efficacy. Topics covered include legislations, assessment, intervention and whole school programming.
Offered: Every year, Spring Online
- OT 626. Special Topics in School-Based Practice II. 3 Credits.**
This course is the second in a series of courses focusing on advanced topics in school-based practice. Students build upon work completed as part of OT 625 Special Topics in School-Based Practice I to develop a model of practice/intervention addressing "best practice" for practitioners working in school-based practice.
Prerequisites: Take OT 625.
Offered: Every year, Summer Online
- OT 630. CAGS Hand Therapy I. 3 Credits.**
This course is the first in a series of courses focusing on advanced topics in hand therapy. Students critique existing scholarship and professional documents regarding best practice in hand therapy practice, and identify and critique existing assessments and interventions utilized in hand therapy practice.
Offered: Every year, Spring Online
- OT 631. CAGS Hand Therapy II. 3 Credits.**
This course is the second in a series of hand therapy courses. Building on the first course, students continue to explore best practices and evidence and have the opportunity to synthesize their knowledge through a critique of clinical protocols and practice guidelines. The course culminates with a plan of action to further advance one's professional development.
Offered: Every year, Summer Online
- OT 635. Scholarly Use of Evidence in Writing. 3 Credits.**
This course is the second in a sequence of courses focusing on scholarly reading and writing. Emphasis on determining proper use of evidence occurs throughout the course. Synthesis of scholarly evidence and literature culminates in the creation of a manuscript for submission to a professional trade magazine or journal.
Prerequisites: Take OT 615.
Offered: Every year, Summer Online
- OT 640. Directed Study in Evidence-Based Practice. 3 Credits.**
Students learn the steps of the evidence-based practice continuum. Each student follows the steps using actual practice case studies from his/her individual practice sites and presents the responses to each step in the process to discover evidence to guide the practice case questions. Peer interaction and feedback is critical to the realistic development of evidence to guide practice decisions. A major assignment is to have each student participate in the writing of a systematic review or an evidence-based practice brief for the profession. Students complete a needs assessment of a particular site or practice area as well.
Prerequisites: Take OT 654.
Offered: Every year, Spring
- OT 650. Application of Theory and Exploration of Occupation. 3 Credits.**
This course explores occupation—the central construct of the profession, and occupational science as a disciplinary knowledge base of the profession. Students examine a variety of theories relevant to occupational therapy and analyze their practice using critical theory.
Offered: Every year, Spring

- OT 651. Systems. 3 Credits.**
 Knowledge of health care delivery in the U.S. is fundamental to providing occupational therapy services. A key element to providing relevant health care services is an understanding of the broader systems that influence and drive delivery models. This course addresses the general systems model as applied to the delivery of health care services. System components are addressed including the resources, the internal processes, external influences, measurable outcomes and stakeholders in service delivery systems. The course examines the range of service delivery models in OT including the traditional medical model, school-based, community, educational, home health, hospice and telehealth, among others. The course prepares students to analyze the key components of delivery system and determine how OT services are optimized in specific models.
Offered: Every year, Fall
- OT 652. Doctoral Seminar. 1 Credit.**
 Students develop learning strategies for doctoral work and explore contemporary leadership theory and create a professional development plan for doctoral work with goals and objectives related to becoming an agent of change.
Offered: Every year, Fall
- OT 653. Policy/Ethics. 2 Credits.**
 The future leaders of the profession need an understanding of the political and legal policies impacting occupational therapy, as well as the ethics involved in decision making. Students explore the role of the occupational therapist in advocacy as well as the concepts of social justice. The impact of these policies and decisions are reviewed in relationship to all settings and the occupational as well as psychosocial well-being of the individual client and populations of clients.
Offered: Every year, Fall
- OT 654. Critical Inquiry of Scholarship. 3 Credits.**
 This course is the first of a series of courses focusing on scholarship in the profession. Emphasis is placed on understanding qualitative and quantitative research methods and building a solid foundation needed to carry out a scholarly project. This course covers the scholarship process, with a focus on developing a question for scholarly exploration, ways of answering questions and approaches to analyzing results.
Offered: Every year, Fall
- OT 655. Professional Seminar. 3 Credits.**
 This course integrates prior learning into the discussion of how to become an "agent of change" within systems. Topics include advocacy, leadership and leadership theories, group dynamics and change management. Student integrate this knowledge through the development of a program proposal and evaluation.
Offered: Every year, Summer
- OT 656. Critical Inquiry of Scholarship II. 4 Credits.**
 This course is the second of a series of courses focusing on scholarship in the profession. Emphasis is placed on developing a proposal for a scholarly project. Drawing on the content of OT 654 students develop the background to the project and problem statement, questions guiding the project informed by theory, and write a design a scholarly proposal in regards to ethical policies and procedures necessary to conduct research.
Prerequisites: Take OT 640, OT 654.
Offered: Every year, Summer
- OT 660. Seminar: Innovations and Emerging Issues in Children and Youth. 3 Credits.**
 The OT seminars OT 660 and OT 662 present core content that is the same for both courses during weeks one and two. The focus of the core weeks is on environmental scanning for evidence of change and locating evidence in the literature for that change. Weeks four through seven focus on the individual theme as selected by each student.
Offered: Every year, Fall
- OT 662. Seminar: Innovations and Emerging Issues in the Adult Health Care Continuum. 3 Credits.**
 The OT seminars OT 660 and OT 662 present core content that is the same for both courses during weeks one and two. The focus of the core weeks is on environmental scanning for evidence of change and locating evidence in the literature for that change. Weeks four through seven focus on the individual theme as selected by each student.
- OT 663. Seminar: Innovations and Emerging Issues. 3 Credits.**
 This course will initially focus on environmental scanning for evidence of change and locating evidence in the literature for that change within a student-identified area of interest. Then, weeks four through seven focus on the individual theme as selected by each student.
Offered: Every year, Spring
- OT 670. Leadership in Program Development/Business. 3 Credits.**
 Students analyze leadership styles as they relate to supervision in both public and private sectors. The course includes a review of skills required to be an entrepreneur, own a practice and navigate the policies required of a business.
Offered: Every year, Spring
- OT 671. Leadership in Higher Education. 3 Credits.**
 Students analyze trends in higher education and health care. Building on these trends students create one course including a full syllabus, learning objectives, learning outcomes and assessment. This course provides a foundation for teaching in the future, either full or part time.
- OT 680. Capstone I. 2 Credits.**
 This capstone course is a culminating experience in the occupational therapy curriculum, which integrates all core material. Students design and execute a scholarly or creative project that is relevant to current and emerging practice areas in occupational therapy. Students gain experience in project management, critical analysis and professional presentations.
Offered: Every year, Fall
- OT 681. Capstone II. 2 Credits.**
 This capstone course is a culminating experience in the occupational therapy curriculum, which integrates all core material. Students design and execute a scholarly or creative project that is relevant to current and emerging practice areas in occupational therapy. Students gain experience in project management, critical analysis and professional presentations.
Offered: Every year, Spring
- OT 699. OT Independent Study. 1-6 Credits.**
Offered: As needed

- OT 700. Philosophy and Science of Occupational Therapy. 3 Credits.**
This course presents the philosophical, historical and scientific foundations of the occupational therapy profession and their relevance to contemporary practice. From a philosophical perspective, the course unpacks the epistemology (knowledge), ontology (reality/view) and axiology (actions/methods) of the profession. The evolution of practice throughout history and current and emerging trends in practice is analyzed with respect to meeting societal needs.
Offered: Every year, Summer
- OT 701. Occupational Therapy Theory. 3 Credits.**
This course explores how occupations influence health and well-being from a historical, developmental, and evidence-based perspective. Current and emerging occupation-based models are analyzed and applied as theoretical foundations in the promotion of health, prevention of disease, and management of occupational disruptions across the life span. Complementary healthcare models and current global social political issues are highlighted.
Offered: Every year, Fall
- OT 702L. OT Service Learning. 1 Credit.**
This course applies the concepts of observation and therapeutic use of self to a community setting where the students observe and conduct and applied activity analysis of the clients/community and/or the population in order to design service projects that meet the occupational needs of those being served in the setting. Application of context variable analysis and service provision in a meaningful occupation provides a natural experience of learning about human occupations.
Offered: Every year, Fall
- OT 703. OT Practice Framework and Professional Reasoning. 3 Credits.**
This course explores the vocabulary of the profession, The Occupational Therapy Practice Framework, and links the terminology to knowledge and skills in the identification and analysis of occupation in context, personal factors and occupational performance and the application of clinical reasoning to the occupational therapy process.
Offered: Every year, Fall
- OT 705. Research Methods and Evidence-Based Practice. 3 Credits.**
This course addresses research fundamentals in the practice of occupational therapy. The course examines research epistemology, methods, research designs, and data analysis in occupational therapy research. Levels of evidence are addressed and applied to decisions in occupational therapy interventions. Students gain experience developing research procedures, critically analyzing data, and identifying ethical issues involved in developing a research study.
Offered: Every year, Fall
- OT 710. Clinical Anatomy in OT Practice. 4 Credits.**
This course provides a comprehensive study of the musculoskeletal system with emphasis on clinical correlation to occupational therapy practice and the biomechanical basis of occupational performance. The course has a corresponding dissection and palpation lab.
Offered: Every year, Summer
- OT 710L. Clinical Anatomy in OT Practice Lab. 1 Credit.**
This laboratory course involves dissection, visual examination, and surface palpation as part of a comprehensive study of the human anatomy. Emphasis is in the thorough examination of the musculoskeletal system and select components of the nervous system relative to the anatomical and biomechanical bases of occupational performance.
Offered: Every year, Summer
- OT 711. Applied Kinesiology. 2 Credits.**
This course integrates information from Human Anatomy with principles of biomechanics and their application to occupational therapy practice. Emphasis is on the biomechanical analysis of human occupations and performance. Key concepts in clinical kinesiology are presented as essential elements to the OT process.
Offered: Every year, Fall
- OT 711L. Applied Kinesiology Lab. 1 Credit.**
This laboratory course provides a comprehensive review of fundamentals of musculoskeletal assessment relevant to occupational therapy practice. This course applies and integrates the concepts learned in the lecture course, OT 521.
Offered: Every year, Fall
- OT 712. Neuroanatomy in OT Practice. 3 Credits.**
This course provides a comprehensive study of neuroanatomy including the structures, functions and physiology of neural systems and examines the interrelationships of neuroanatomical structures, subsystems and neurophysiologic processes involved in human behaviors, which are the foundation for occupational performance. The course also introduces basic neurobehaviors and dysfunctions.
Offered: Every year, Summer
- OT 713. Applied Neuroscience. 2 Credits.**
This course builds on neuroanatomy as it examines the interrelationships of neuroanatomical structures, subsystems and neurophysiologic processes involved in human behaviors, which are the foundation for occupational performance. Specifically, students learn the neural substrates and mechanisms of motor behaviors, sensory-perception, emotions, language, attention, memory and learning.
Offered: Every year, Fall
- OT 713L. Applied Neuroscience Lab. 1 Credit.**
This course builds on functional neuroanatomy and is an adjunct to Applied Neuroscience as it examines the interrelationships of neuroanatomical structures, subsystems and neurophysiologic processes involved in human behaviors, which are the foundation for occupational performance and applies screening procedures. Specifically, students learn the neural substrates and mechanisms of motor behaviors, sensory-perception, emotions, language, attention, memory and learning. The course also introduces basic screening procedures to identify neurobehavioral dysfunctions.
Offered: Every year, Fall
- OT 720. Occupational Therapy Mental Health and Psychosocial Practice I. 3 Credits.**
This course highlights OT's distinct value in addressing psychosocial and mental health needs among children and youth, groups and organizations. Emphasis is on the distinct nature of occupation in promoting mental health, preventing disease, and managing life disruptions. Scientific evidence and theories guide the student's learning of the OT process across the continuum of service delivery.
Offered: Every year, Spring

OT 720L. Occupational Therapy Mental Health and Psychosocial Practice I Lab. 1 Credit.

This course builds on concepts from OT 720 highlighting OT's distinct value in addressing psychosocial and mental health needs among children and youth, groups and organizations. Students practice assessments and evidence-based intervention modalities for various mental health conditions across the lifespan. Application of theoretical models and frames of reference are highlighted. Additionally, students enhance observation skills needed for documentation and practice verbal interventions related to therapeutic modes.

Offered: Every year, Spring

OT 721. OT Mental Health and Psychosocial Practice II. 3 Credits.

This course highlights OT's distinct value in addressing psychosocial and mental health needs among adult and older adult populations, groups, and organizations. Emphasis is on the role of occupation in promoting mental health, preventing disease and managing life disruptions. OT, psychosocial, & group theories, as well as, group interventions are highlighted. Related skills such as documentation, therapeutic use of self and evidence-based practice are emphasized.

Offered: Every year, Fall

OT 721F. OT Mental Health and Psychosocial Practice II Fieldwork. 1 Credit.

This course provides structured fieldwork observation in various settings working with the mental health and psychosocial populations across the lifespan. It allows the student to observe and explore the evaluation and intervention process utilized in occupational therapy. Students have the opportunity to observe and report on the variety of assessment and intervention tools utilized across a continuum of service delivery. Students develop an appreciation for the frames of reference used in the models of practice, as a guide to the evaluation and intervention process.

Offered: Every year, Fall

OT 721L. OT Mental Health and Psychosocial Practice II Lab Lab. 1 Credit.

This lab builds upon concepts from OT 512 highlighting OT's distinct value in addressing psychosocial and mental health needs among adult and older adult populations, groups, and organizations. Emphasis is on the role of occupation in promoting mental health, preventing disease and managing life disruptions. Group theory and evidence-based group interventions are practiced to promote leadership skills and therapeutic use of self. A culminating group protocol assignment integrates theory, practice, and research.

Offered: Every year, Fall

OT 722. Occupational Therapy for Children and Youth I. 6 Credits.

This course provides a comprehensive overview evaluation and interventions used by occupational therapy practitioners for children and youth. Traditional theoretical models/frames of reference and current evidence is utilized as a basis for the clinical/professional reasoning process applicable to the OT process for children and youth so that facilitators and barriers to occupational performance can be identified. Documentation related to contextual philosophies, procedures and regulations dictating pediatric practice is highlighted throughout the course.

Offered: Every year, Spring and Summer

OT 722F. Occupational Therapy for Children and Youth I Fieldwork. 1 Credit.

This course provides structured fieldwork observation in various settings working with the children/youth population. It allows the student to observe and explore the evaluation and intervention process utilized in occupational therapy. Students also have the opportunity to observe and report on the variety of assessment and intervention tools utilized within the models of health care for the children and youth population.

Offered: Every year, Spring and Summer

OT 722L. Occupational Therapy for Children and Youth I Lab. 1 Credit.

This lab course complements the OT 531 and OT 531F and provides opportunity for experiential learning of the evaluation process and intervention techniques used in occupational therapy for children and youth. The safe, efficient, and culturally sensitive delivery of specific assessment and intervention techniques are highlighted.

Offered: Every year, Spring and Summer

OT 723. Occupational Therapy for Children and Youth II. 6 Credits.

This course focuses on specialized interventions for individuals and populations with sensory integrative and processing difficulties and brain-based behavioral challenges. It integrates the use of the SI frame of reference with previously learned theoretical models and apply best available evidence and clinical/professional reasoning to various systems (e.g., state/federal regulations for early intervention and school-based practice, insurance funding, and community-based health and wellness initiatives). Documentation within these various systems are illustrated, discussed and produced.

Offered: Every year, Fall and Spring

OT 723F. OT for Children and Youth II Fieldwork. 1 Credit.

This course provides structured fieldwork observation in sensory integration settings and allows the student to observe and explore the intervention process utilized in these frames of reference. Students have the opportunity to see, observe and report on the variety of intervention strategies utilized within the various models such as health care, education, community and social systems. The settings utilized are equipped to provide clinical application of principles learned in the OT curriculum and focus on the sensory integration intervention process.

Offered: Every year, Fall and Spring

OT 723L. OT for Children and Youth II Lab. 1 Credit.

This lab integrates the advanced intervention techniques/specialized interventions used by occupational therapy practitioners for individuals and populations with sensory integrative and processing difficulties, developmental disabilities and brain-based behavioral challenges. Opportunities are provided to learn specific interventions required for a variety of occupational therapy practice contexts and with consideration of cultural and environmental factors.

Offered: Every year, Fall and Spring

OT 724. Occupational Therapy for Adults and Older Adults I. 6 Credits.

This course provides a comprehensive overview of assessments and interventions used by occupational therapy practitioners in general medicine/surgery, neurology and orthopedics. The course integrates the use of various theoretical models/frames of reference, current evidence, and clinical/professional reasoning pertinent to the OT process. Documentation is highlighted throughout the course including for traditional systems for individual and population-based approaches. Key concepts in interprofessional practice and health literacy are incorporated.

Offered: Every year, Spring and Summer

OT 724F. Occupational Therapy for Adults and Older Adults I**Fieldwork. 1 Credit.**

This course provides structured fieldwork observation in various settings working with the adult population. It allows the student to observe and explore the evaluation and treatment process utilized in occupational therapy with adults and older adults. Students develop an appreciation for the frame of reference used in the models of practice as a guide to evaluation and treatment.

Offered: Every year, Spring and Summer**OT 724L. Occupational Therapy for Adults and Older Adults I Lab. 1 Credit.**

This lab course complements the OT 532 and OT 532F and provides opportunity for experiential learning of the evaluation process and intervention techniques used in occupational therapy for adults and older adults. The safe, efficient and culturally sensitive delivery of specific assessment and intervention techniques are highlighted.

Offered: Every year, Spring and Summer**OT 725. OT for Adults and Older Adults II. 6 Credits.**

This course provides a comprehensive overview of specialized interventions used by occupational therapy practitioners in neurorehabilitation, oncology and geriatrics/gerontology. The course integrates the use of various theoretical models/frames of reference, current evidence, and clinical/professional reasoning pertinent to the OT process in neurorehabilitation practice. Documentation is highlighted throughout the course for traditional and emerging systems for individual and population-based approaches. Key concepts in interprofessional practice and health literacy are incorporated.

Offered: Every year, Fall and Spring**OT 725F. OT for Adults and Older Adults II Fieldwork. 1 Credit.**

This course provides structured fieldwork observation in neurorehabilitative settings and allows the student to observe and explore the intervention process utilized in these frames of reference. The settings utilized are equipped to provide clinical application of principles learned in the OT curriculum and focus on the neurorehabilitation intervention process.

Offered: Every year, Fall and Spring**OT 725L. OT for Adults and Older Adults II Lab. 1 Credit.**

This lab integrates the advanced intervention techniques discussed and described in the lecture portion of this class. Opportunities are provided to learn specific interventions required for a variety of occupational therapy practice contexts and with consideration of cultural and environmental factors.

Offered: Every year, Fall and Spring**OT 726. Technology in OT Practice. 2 Credits.**

This course provides students with opportunities to demonstrate knowledge and apply practice in the use of technology that includes assistive virtual and telehealth technology. The course focuses on application of technology across the lifespan, emphasizing a variety of practice contexts and practice settings. Since technology options change rapidly, emphasis is on the clinical reasoning processes in the utilization of technologies in education, home, work, leisure and community practice domains.

Offered: Every year, Summer**OT 726L. Technology in OT Practice Lab. 1 Credit.**

This lab provides students with opportunities to practice the design and fabrication and use of technology in practice that includes assistive technology; virtual environments in practice and telehealth technology. This lab must be completed concurrently with OTD 641 the lecture component of Technology in OT Practice.

Offered: Every year, Summer**OT 727. Work and Ergonomics. 3 Credits.**

This course focuses on the occupation of work applied across the lifespan and to various practice contexts and worker challenges. The course addresses topics related to the occupation of work, including employment acquisition, job performance, volunteerism, and retirement. Work tasks and work demands are analyzed relative to physical, cognitive, social, organizational, and environmental factors that impact job performance. Modifications that optimize worker functioning are examined as prevention and as rehabilitation.

Offered: Every year, Spring**OT 728L. Biomechanical Intervention Lab. 2 Credits.**

Students experience hands on learning in biomechanical principles such as splinting, physical agent modalities, and therapeutic exercise programs. Specifically, students evaluate and fabricate splints for specific diagnoses and discuss the role of splinting as part of an overall intervention plan. Students are introduced to various prosthetic devices and the role of occupational therapy during pre-prosthetic and prosthetic training. Students demonstrate the ability to use and apply various physical agent modalities to intervention planning assignments

Offered: Every year, Spring**OT 730. Administration and Management of Systems. 3 Credits.**

This class introduces students to the systems involved in delivering occupational therapy services in health care, educational and community-based environments. Students examine components of service delivery including external influences, internal processes, communication, reimbursement and measurable outcomes to understand how occupational therapy services are optimized. The course addresses core management functions including planning, organizing, directing and controlling. Students gain hands-on experience with strategic planning, budgeting, marketing, program evaluation and conflict management.

Offered: Every year, Spring**OT 731. Leadership and Change. 2 Credits.**

This course addresses the means to become an "agent of change" within the occupational therapy environment using leadership approaches. Leadership theories are addressed and applied to supervision, advocacy, and mentoring. Students self-reflect on leadership and communication styles and strategies to promote effective supervision for groups both internal and external to occupational therapy.

Offered: Every year, Summer**OT 751. Capstone Seminar I - Exploration. 2 Credits.**

This course is the first of a series of capstone seminars designed to assist the students in understanding the elements and process of developing a culminating signature project in the OTD program. Students explore personal interests, opportunities and the social context around topic areas. They develop skills of conducting an environmental scan and needs assessment relative to their project interests. Students identify program evaluation methods and ultimately present a capstone proposal as an initial plan for their capstone project.

Offered: Every year, Fall**OT 752. Knowledge Translation and Synthesis. 3 Credits.**

This course focuses on the assessment, review and utilization of research to inform policy and improve practice. Students actively engage in multiple components of the knowledge translation process including defining the problem, searching for and critically appraising the evidence. Students work in small groups to apply this information to the development of a clinical practice guideline. Competencies acquired in this course are integral to the Capstone process.

Offered: Every year, Spring

- OT 753. Capstone Seminar II - Planning. 2 Credits.**
This course is the second of a series of Capstone seminars leading to the Doctoral Capstone Experience and Project. This course is specifically designed to assist the students in finalizing their Doctoral Capstone Project (DCP) proposal based on a needs assessment. Students are expected to complete a comprehensive literature review that serves as justification for the DCP.
Offered: Every year, Summer
- OT 754. Capstone Seminar III - Preparation. 2 Credits.**
This course is the third of a series of capstone seminars designed to assist the students in planning their Doctoral Experiential Component. Under faculty mentorship, students design a 14-week experience and project plan that outlines goals and objectives, as well as formal evaluation mechanism. Students write the methods section of the formal capstone project paper.
Offered: Every year, Spring
- OT 760. Special Topics Or Independent Study. 3 Credits.**
Students delve deeper into the specialized knowledge of the profession with evidence-based, occupation-centered practice as its core subject. Exploration of specialized roles beyond that of a direct provider of skilled services, such as educator, case manager and consultant at the systems level. Students also learn various modes of care delivery and systems of care and evaluate the outcomes of such modes.
Offered: Every year, Spring
- OT 762. Health Policy, Law, and Advocacy. 2 Credits.**
This course prepares students as future leaders of the profession who need an understanding of the political and legal policies impacting occupational therapy, as well as the ethics involved in decision making. The role of the occupational therapist in advocacy as well as the concepts of social justice is explored as well.
Offered: Every year, Spring
- OT 764. Business Leadership and Entrepreneurship in OT. 3 Credits.**
This course provides an overview of business development and entrepreneurship for occupational therapy practitioners within today's health care environment, including public initiatives for health and wellness and prevention for society. Leadership concepts are threaded in the context of a business enterprise.
Offered: Every year, Spring
- OT 766. Methods of Teaching and Learning in OT. 3 Credits.**
This course introduces students to the principles of the teaching-learning process in order to meet the needs of clients, family, significant others, communities, colleagues, other health providers and the public. Concepts discussed include health literacy, assessment of learning outcomes, factors which may influence the teaching-learning process, instructional methods and best practices in clinical and academic teaching.
Offered: Every year, Spring
- OT 780. Fieldwork Level IIA. 6 Credits.**
This 12-week full-time supervised fieldwork experience provide the student with the opportunity to apply theory and clinical reasoning skills to the occupational therapy evaluation and intervention process for clients across the life span and in a variety of life environments. Students must abide by all fieldwork policies as listed in the Student Fieldwork Manual. This is the first of two required level II experiences.
Offered: Every year, Summer
- OT 781. Fieldwork Level IIB. 6 Credits.**
This 12-week full-time supervised fieldwork experience provide the student with the opportunity to apply theory and clinical reasoning skills to the occupational therapy evaluation and intervention process for clients across the life span and in a variety of life environments. Students must abide by all fieldwork policies as listed in the Student Fieldwork Manual. This is the second of two required level II experiences and is different in setting/population from OTD 580.
Offered: Every year, Fall
- OT 782. Professional Development. 2 Credits.**
This course focuses on the current issues related to transitioning from student to professional roles and responsibilities. Topics include updates in the OT profession with a focus on official documents; emerging roles of OT in practice; credentialing, licensure and continuing competence/professional development. Contemporary issues of practice such as access to services, advocacy and inter-/intra-professional collaboration are explored.
Offered: Every year, Spring
- OT 790. Doctoral Project Seminar. 2 Credits.**
This seminar course is designed to facilitate the completion of the student's Doctoral Capstone Project and promote an in-depth reflection on the program learning outcomes. The seminar runs concurrently with the Doctoral Capstone Experience where specific competencies representing in-depth knowledge of practice are synthesized. The final outcome of the seminar is a scholarly manuscript and public dissemination of the Doctoral Capstone Project.
Offered: Every year, Summer
- OT 791. Doctoral Experience. 2-4 Credits.**
The Occupational Therapy Doctoral Experience is a culminating experience in the OT curriculum to develop occupational therapists with skills beyond a generalist level. The experience provides the student with an in-depth learning opportunity in one or more (but not limited to) of the following areas of practice: education, clinical practice skills, advocacy and professional identity, theory development, research, administration, leadership and program and policy development. The experiential component requires a total of 560-640 hours.
Offered: Every year, Summer
- OT 799. Independent Study in OT. 1-6 Credits.**
Offered: As needed

Pathology (PA)

- PA 502. Medical Terminology: Advanced. 2 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. Students study the etymology of medical and surgical terms with an emphasis on the principles of word analysis, construction and evolution. The course includes a review of anatomy and abstraction of current published case studies.
Offered: Every year, Summer
- PA 505. Forensic Pathology. 2 Credits.**
This course introduces the principles of forensic pathology as it pertains to the scope of practice for a pathologists' assistant. Students will apply the concepts learned throughout the course to satisfy NAACLS accreditation standards in forensic pathology and to prepare the student for the ASCP certification/licensure examination upon graduation. This course will review specific types of circumstances in which a forensic autopsy provides the best opportunity for competent investigation.
Offered: Every year, Summer

- PA 506. Forensic Imaging. 2 Credits.**
The course provides an introduction to the principles of diagnostic imaging and its applications in forensics. The advantages and disadvantages of various imaging modalities for the examination of specimens and cadavers are presented as well as radiation safety, x-ray and image production, types of recording media and radiographic exposure. Students will apply the concepts learned throughout the course to navigate and troubleshoot basic radiographic simulation scenarios.
Offered: Every year, Summer
- PA 511. Human Microscopic Anatomy. 4 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. Human anatomy at the light microscopic level is explored through a general and systemic approach using a lecture-lab combination. Students are introduced to primary tissues and their cellular components followed by system (organ) investigation morphologically that uses the light microscope emphasizing pattern recognition as the mechanism employed for tissue identification.
Offered: Every year, Fall
- PA 512. Human Anatomy. 4 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. This course covers dissection of the human body with particular attention to the morphological relationships of individual organ systems. Emphasis is placed on internal anatomy as a major facet of this instruction that is designed for eventual autopsy evisceration and subsequent dissection.
Offered: Every year, Summer
- PA 512L. Human Anatomy Lab. 0 Credits.**
Lab to accompany PA 512.
Offered: Every year, Summer
- PA 513. Basic Human Pathology I. 3 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. This series of lectures utilizes slides of gross and microscopic pathology starting with a general introduction to pathology covering inflammation and neoplasia, and then progressing to pathology by the systems such as cardiovascular, endocrine and gastrointestinal systems.
Offered: Every year, Fall
- PA 514. Basic Human Pathology II. 3 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. This series of lectures utilizes slides of gross and microscopic pathology of specific areas of disease in a systemic approach including such specialty areas as dermatologic, perinatal, pediatric and forensic pathology as well as the genitourinary, musculoskeletal, respiratory and neuropathology systems.
Offered: Every year, Spring
- PA 515. Human Physiology. 4 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. Various aspects of human physiology are examined, with emphasis on the physiologic and biochemical function. The fundamental functional principles for general and systematic organ systems are covered.
Offered: Every year, Summer
- PA 516. Clinical Pathology. 4 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. Clinical relationships to disease are examined, highlighting such topics as hematology, chemistry, toxicology, serology, urinalysis, blood banking and cytology. Basic techniques and theoretical applications from a case history medical approach are emphasized.
Offered: Every year, Spring
- PA 517. Applied Anatomic Pathology. 4 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. Basic principles of clinical history taking, physical examinations and general medical terms and symbols are studied. Emphasis is on autopsy and surgical techniques of evisceration and organ system dissection through lectures, films, slides and practical exposure.
Offered: Every year, Spring
- PA 518. Laboratory Management. 3 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. The organization and function of an anatomic pathology laboratory is investigated to include ordering supplies, money management, computerization, laboratory safety, organization compliance (JACHO, CAP, OSHA) and quality assurance.
Offered: Every year, Fall
- PA 520. Autopsy Pathology I. 6 Credits.**
This course is only for second-year pathologists' assistant students. This three-semester rotational, practical course on the techniques of autopsy dissection includes summarization of clinical histories and gross autopsy findings. The 12-month rotation involves several different hospitals in both community and university settings.
Offered: Every year, Summer
- PA 521. Autopsy Pathology II. 6 Credits.**
This course is only for second-year pathologists' assistant students. This three-semester rotational, practical course on the techniques of autopsy dissection includes summarization of clinical histories and gross autopsy findings. The 12-month rotation involves several different hospitals in both community and university settings.
Offered: Every year, Fall
- PA 522. Autopsy Pathology III. 6 Credits.**
This course is only for second-year pathologists' assistant students. This three-semester rotational, practical course on the techniques of autopsy dissection includes summarization of clinical histories and gross autopsy findings. The 12-month rotation involves several different hospitals in both community and university settings.
Offered: Every year, Spring
- PA 523. Surgical Pathology I. 6 Credits.**
This course is only for second-year pathologists' assistant students. This is a three-semester inclusive practical course in methods of gross tissue description, dissection and preparation, fixation and storage of surgical specimens for light, immuno-fluorescent, immunochemical, frozen and electron microscopy. The 12-month rotation involves several different hospitals in both community and university settings.
Offered: Every year, Summer
- PA 524. Surgical Pathology II. 6 Credits.**
This course is only for second-year pathologists' assistant students. This is a three-semester inclusive practical course in methods of gross tissue description, dissection and preparation, fixation and storage of surgical specimens for light, immuno-fluorescent, immunochemical, frozen and electron microscopy. The 12-month rotation involves several different hospitals in both community and university settings.
Offered: Every year, Fall

PA 525. Surgical Pathology III.**6 Credits.**

This course is only for second-year pathologists' assistant students. This three-semester inclusive practical course covers methods of gross tissue description, dissection and preparation, fixation and storage of surgical specimens for light, immuno-fluorescent, immunochemical, frozen and electron microscopy. The 12-month rotation involves several different hospitals in both community and university settings.

Offered: Every year, Spring**PA 526. Biomedical Photography.****4 Credits.**

This course is only for second-year pathologists' assistant students. This is a team-taught course designed to give the pathologists' assistant student a basic background leading to practical application of photographic techniques used in the anatomic pathology laboratory. It also includes an introduction to the principles of imaging radiography. The course is divided into three parts over two summer-school semesters: basic photographic principles and technique; the theoretical and practical aspects of photomacrography and photomicrography as they are applied to anatomic specimens and imaging radiology.

Offered: Every year, Summer**PA 535. Disease Mechanisms.****4 Credits.**

This course is only for second-year pathologists' assistant students. This course investigates how the normal physiology of the human body is altered in disease states. The mechanisms by which diseases become established, cause damage and alter organ system function are established. Natural body responses and therapeutic measures are examined for their mode of action, side effects and after affects.

Offered: Every year, Fall

Perfusion (PR)

PR 500. Theoretical Foundations of Cardiovascular Perfusion. 2 Credits.

This course exposes students to role expectations, practice, ethics and professionalism. Students gain an appreciation of the history of key individuals and progress through discoveries that influenced the development of current practice in cardiothoracic surgery and extracorporeal circulation. Students become familiar with the role of organizations that impact their field, including those responsible for overseeing national certification exams and continuing education programs. A minimum grade of B is required to progress.

Offered: Every year, Fall**PR 502. Systems Anatomy and Physiology I.****3 Credits.**

This course examines selected organ systems 503 procedures performed by the perfusionist. Students study the structure and function of the cardiovascular, lymphatic, immune and pulmonary systems. Emphasis is placed on group discussion and the application of knowledge to solving problems that arise in clinical situations. A minimum grade of B is required to progress.

Offered: Every year, Fall**PR 503. Systems Anatomy and Physiology II.****3 Credits.**

This course examines selected organ systems pertinent to cardiopulmonary bypass and related procedures performed by the perfusionist. Students study the structure and function of the nervous, hepatic, renal and endocrine systems. Emphasis is placed on group discussion and application of knowledge to solving problems that arise in clinical situations. A minimum grade of B is required to progress.

Prerequisites: Take PR 500, PR 502, PA 535, PR 508, PR 516.**Offered:** Every year, Spring**PR 506. Pharmacologic Intervention in Cardiovascular Perfusion.****4 Credits.**

This course is an intensive study of pharmacokinetics, pharmacodynamics, mechanism of action, indications and contraindication of drugs administered to the patient undergoing cardiopulmonary bypass. Cardiovascular drugs, anticoagulants and anesthetic agents administered by the perfusionist are emphasized. Students also become familiar with many drugs used to treat other disease states that may be taken by patients with significant comorbidities. A minimum grade of B- is required to progress.

Prerequisites: Take PR 500, PR 502, PA 535, PR 508, PR 516.**Offered:** Every year, Spring**PR 508. Extracorporeal Circuitry and Laboratory I.****1 Credit.**

Students receive orientation in both the laboratory and the cardiac operating room to equipment operation and techniques applicable to providing extracorporeal circulation during cardiac surgical procedures. Emphasis is placed on developing student skills in researching best practice methods as found in the medical literature. Competent operation of equipment, including the heart lung machine, ventricular assist devices, intra-aortic balloon counterpulsation pump, and autologous blood recovery devices must be demonstrated. A minimum grade of B is required to progress.

Offered: Every year, Fall**PR 509. Extracorporeal Circuitry and Lab II.****1 Credit.**

This intensive study of the appropriate procedures for providing extracorporeal circulation for a variety of purposes includes operation of specialized medical devices, quality control and troubleshooting techniques. Intra-aortic balloon counterpulsation, autologous blood recovery and ventricular assist devices are covered. Students are expected to search recent medical publications and generate discussion in an attempt to resolve controversial issues pertaining to best practice. A minimum grade of B is required to progress.

Prerequisites: Take PR 500, PR 502, PA 535, PR 508, PR 516.**Offered:** Every year, Spring**PR 510. Surgical Techniques.****2 Credits.**

This course examines the cardiothoracic surgical procedures that require extracorporeal circulatory support. Students develop an understanding of the techniques used in numerous open-heart procedures performed on adults and children. Special application of extracorporeal circulation in rare surgical procedures is included. Students are required to view a number of these procedures in the operating rooms of affiliated institutions to increase their understanding of the skills required to perform these operations. A minimum grade of B is required to progress.

Prerequisites: Take PR 500, PR 502, PA 535, PR 508, PR 516.**Offered:** Every year, Spring**PR 512. Pediatric Perfusion.****4 Credits.**

This course presents a study of the embryological formation of the cardiopulmonary system, a description of congenital cardiopulmonary anomalies and the application of perfusion techniques during corrective surgical procedures. Students work both independently and in groups to evaluate the results of clinical studies that contribute to current thinking and practice in the specialized area of pediatric perfusion. A minimum grade of B is required to progress.

Prerequisites: Take PR 500, PR 502, PA 535, PR 508, PR 516.**Offered:** Every year, Spring

PR 514. Special Topics in Cardiovascular Perfusion. 2 Credits.

This course explores less common and newly introduced procedures for perfusionists, including the use of investigational drugs that modify the biochemical impact of adult and infant extracorporeal membrane oxygenation, extracorporeal carbon dioxide removal, total artificial hearts and newly introduced ventricular assist devices. Old standards of practice are reexamined in the light of new evidence. A minimum grade of B is required to progress.

Prerequisites: Take PR 503, PR 506, PR 509, PR 510, PR 512.

Offered: Every year, Spring

PR 516. Physiologic Monitoring. 4 Credits.

This course covers monitoring of the physiological impact of extracorporeal circulation, administration of drugs, blood products and anesthetic agents on the patient undergoing surgery requiring cardiopulmonary bypass. Monitoring of intravascular arterial and venous pressures in the systemic and pulmonary circulations, cardiac output measurement are covered. An emphasis is placed on 12-lead electrocardiogram, blood anticoagulation measurement, analysis and interpretation of arterial and venous blood gases, fluid and electrolyte balance and cerebral oxygen saturation. After mastering the basic concepts of each section, students work through case-study scenarios to apply theory to practice. Electronic simulators are used. A minimum grade of B is required to progress.

Offered: Every year, Fall

PR 520. Research Methods in Cardiovascular Perfusion. 2 Credits.

This course explores ethical issues in medical research, provides an overview of grant proposal writing and includes development of a research project, data collection and analysis using statistical programs for computers. Students develop a presentation and employ various computer presentation techniques to present student project data. Students work individually on the project and require the approval of the instructor to pursue a particular topic. A minimum grade of B is required to progress.

Prerequisites: Take PR 503, PR 506, PR 509, PR 510, PR 528.

Offered: Every year, Summer

PR 522. Research Methods in CV Perfusion II. 2 Credits.

This course is a continuation of PR 520. It provides the perfusion student with an introduction to current areas of research being conducted in the open-heart field, scientific principles of experimental design and analysis and methods of reporting results to the scientific community. This course enables students to complete the collection/analysis of data that was begun in PR 520, prepare the final written report and present the results of the research project to the perfusion community. A minimum grade of B is required to progress.

Prerequisites: Take PR 520.

Offered: Every year, Fall

PR 526. Mechanical Circulatory Support. 4 Credits.

This course will expose students in the Cardiovascular Perfusion Program to mechanical circulatory support devices such as ventricular assist devices (short and long term implantation), newborn, pediatric and adult extracorporeal membrane oxygenation (ECMO) including techniques of support using veno-veno, and veno-arterial extracorporeal life support. Students will learn both the theory and application of these life support techniques.

Prerequisites: Take PR 500 PR 508 PR 516.

Offered: Every year, Spring

PR 528. Congenital Defects and Clinical Practice. 2 Credits.

This course is a study of the management of cardiopulmonary bypass in neonates, infants and children. The course includes a description of the embryological development of the human fetus, focusing on the development of the cardiovascular system. The pathophysiology of congenital heart disease and the surgical techniques for repair of those lesions are presented, stressing both physiologic considerations for the perfusion of the neonatal and pediatric patient as well as related specific perfusion techniques.

Prerequisites: Take PR 500 PR 502 PR 516.

Offered: Every year, Spring

PR 600. Clinical Practicum I. 5 Credits.

This course provides experience in the areas of heart-lung bypass for adult, pediatric and infants, including long-term supportive extracorporeal circulation, adjunctive techniques and patient monitoring. Students focus on hypothermia, pulsatile devices, and monitor hemodynamics, blood gases, bubble detection, level sensing, temperature, electrophysiology, coagulation potential and fluid electrolytes. Special applications also are covered. Students must successfully complete a sufficient variety and number of perfusions to satisfy recommendations of the American Board of Cardiovascular Perfusion. Students meet as a group every six weeks, and individually present a patient case study at grand rounds. A minimum grade of B is required to pass.

Prerequisites: Take PR 503, PR 506, PR 509, PR 510 ,PR 528.

Offered: Every year, Summer

PR 602. Clinical Practicum II. 5 Credits.

This course provides experience in the areas of heart-lung bypass for adult, pediatric and infants, including long-term supportive extracorporeal circulation, adjunctive techniques and patient monitoring. Students focus on hypothermia, pulsatile devices and monitor hemodynamics, blood gases, bubble detection, level sensing, temperature, electrophysiology, coagulation potential and fluid electrolytes. Special applications also are covered. Students must successfully complete a sufficient variety and number of perfusions to satisfy recommendations of the American Board of Cardiovascular Perfusion. Students meet as a group every six weeks, and individually present a patient case study at grand rounds. A minimum grade of B is required to progress.

Prerequisites: Take PR 600.

Offered: Every year, Fall

PR 604. Clinical Practicum III. 5 Credits.

This course provides experience in the areas of heart-lung bypass for adult, pediatric and infants, including long-term supportive extracorporeal circulation, adjunctive techniques and patient monitoring. Students focus on hypothermia, pulsatile perfusion devices and monitor hemodynamics, blood gases, bubble detection, level sensing, temperature, electrophysiology, coagulation potential and fluid electrolytes. Special applications also are covered. Students must successfully complete a sufficient variety and number of perfusions to satisfy recommendations of the American Board of Cardiovascular Perfusion. A final comprehensive exam covering all aspects of the program and clinical practice is taken at the end of this course. A successful performance on the examination is required to complete the program. A minimum grade of B is required to progress.

Prerequisites: Take PR 602.

Offered: Every year, Spring

Physician Assistant (PY)

- PY 501. Human Physiology.** **4 Credits.**
This course takes a system approach to the physiologic and biochemical functions of the human body, including relevant anatomical correlations. Laboratory sessions emphasize clinical application to systemic function.
Offered: Every year, Summer
- PY 501L. Physiology Lab.** **0 Credits.**
Lab to accompany PY 501. (3 lab hrs.)
Offered: Every year, Summer
- PY 503. Principles of Interviewing.** **3 Credits.**
This course explores the various methods of approaching and interviewing patients focusing on the establishment of a relationship, effects of cultural backgrounds, gender and age on giving and receiving of information in order to obtain an accurate medical history.
Offered: Every year, Summer
- PY 504. History, Roles and Responsibilities of the PA.** **1 Credit.**
This course explores through lecture and discussion the factors affecting the development of the profession and role socialization with emphasis on standards of quality assurance, credentialing of continued competence, policies and regulations governing clinical responsibilities and dynamics of membership on a health care team.
Offered: Every year, Spring
- PY 505. Clinical Pharmacology I.** **2 Credits.**
This distance education course covers the classification, mechanism of action, toxicity and clinical use of therapeutics agents. Side effects, indications, dose response and management of therapeutics are emphasized.
Offered: Every year, Fall
- PY 506. Principles of Internal Medicine.** **6 Credits.**
This course takes an organ system approach to disease emphasizing the pathogenesis, clinical presentation, differential diagnosis, diagnostic and therapeutic approach to disease processes. Laboratory sessions focus on clinical problem solving through the use of real cases.
Corequisites: Take PY 520L.
Offered: Every year, Fall
- PY 506L. Clinical Correlation Lab.** **0 Credits.**
Lab to accompany PY 506. (1 lab hr.)
Offered: Every year, Fall
- PY 507. Principles of Electrocardiography.** **1 Credit.**
This course offers a directed approach to understanding the principles of electrocardiography and its applications to clinical practice. Throughout this course, general principles of the etiologies of abnormal EKG patterns, the differential diagnosis and clinical management are discussed to correlate the EKG with clinical situations.
Offered: Every year, Summer
- PY 507L. EKG Lab.** **0 Credits.**
Lab to accompany PY 507. (1 lab hr.)
Offered: Every year, Summer
- PY 508. Diagnostic Methods I.** **2 Credits.**
Clinical laboratory medicine is examined with emphasis on indications for tests, normal values, interpretation of results and correlation with clinical conditions. Laboratory sessions provide students with practical experience performing basic laboratory tests.
Offered: Every year, Summer
- PY 508L. Diagnostic Methods Lab.** **0 Credits.**
Lab to accompany PY 508. (2 lab hrs.)
Offered: Every year, Summer
- PY 509. Principles of Obstetrics and Gynecology.** **3 Credits.**
Anatomy and physiology of the human reproductive system are examined, including the changes in pregnancy, prenatal care, medical and surgical complications of pregnancy, pre- and postpartum care. Common gynecologic conditions, methods and effectiveness of contraception, cancer detection methods and the diagnosis and treatment of sexually transmitted infections in the female are explored.
Offered: Every year, Spring
- PY 510. Principles of Pediatrics.** **3 Credits.**
This course examines the physical and psychological fundamentals of normal growth and development. Focus is on the major pediatric illnesses and conditions, their signs, symptoms and treatment. Immunization schedules, the various medications used in the pediatric population, their doses and indication are examined; the management of pediatric emergencies such as acute cardiac and respiratory arrest, anaphylaxis, seizures and trauma also are explored.
Offered: Every year, Spring
- PY 511. Principles of Surgery and Emergency Medicine.** **4 Credits.**
The fundamentals of surgical disease are explored with discussions on the etiology, pathophysiology, clinical manifestations and appropriate management of major and minor surgical conditions and care of the acutely injured and critically ill patient. Topics are discussed with emphasis on clinical presentation and pre- and post-operative management. The course introduces the principles of life support technique and the initial management of acute medical and traumatic conditions. Laboratory sessions are used to familiarize the student with aseptic technique and basic surgical procedures such as airway control, various catheter placements, surgical bleeding control and wound management.
Offered: Every year, Spring
- PY 511L. Clinical Skill Lab.** **0 Credits.**
Lab to accompany PY 511. (2 lab hrs.)
Offered: Every year, Spring
- PY 512. Psychosocial Issues in Health Care.** **2 Credits.**
This course explores how cultural belief systems and values in a multicultural society relate to the provision of appropriate health care/counseling. Students become familiarized with the biological and psychological attributes contributing to sexual expression as well as societal values that shape perception and expression. Factors associated with communicating with and caring for individuals from different cultures, opposite genders or differing sexual preference are explored. Lab sessions help students gain experience and develop confidence in approaching patients through preclinical clerkships. Students improve their clinical skills in the areas of eliciting a history, performing a physical exam, presenting an oral report and medical documentation via the patient chart note.
Offered: Every year, Spring
- PY 512L. Psychosocial Issues Lab.** **0 Credits.**
Lab to accompany PY 512. (2 lab hrs.)
Offered: Every year, Spring

- PY 513. Behavioral Medicine.** **3 Credits.**
 This one-semester course gives students an overview of some of the most important areas in behavioral psychiatry. The course includes an overview of basic psychiatric concepts and focuses on assessing patients who manifest psychological symptoms. Topics include diagnosis and treatment of anxiety disorders, mood disorders, common child and adolescent disorders, somatoform and factitious disorders, psychotic disorders, sleep disorders, adjustment and personality disorders, drug and alcohol abuse, and addresses forensic issues in behavioral health.
Offered: Every year, Spring
- PY 514. Diagnostic Methods II.** **1 Credit.**
 This course covers the basic principles of radiologic and imaging techniques, indication for various tests and recognition of abnormal findings.
Offered: Every year, Fall
- PY 515. Clinical Pathology.** **3 Credits.**
 Basic human pathology is examined from a systemic and cellular level, pathogenesis and various disease states. Topics include histology, inflammation and repair, endocrine, cardiovascular, pulmonary, musculoskeletal, GI and GU pathology.
Offered: Every year, Summer
- PY 516. Clinical Pharmacology II.** **2 Credits.**
 This continuation of Clinical Pharmacology I emphasizes commonly prescribed therapeutic agents.
Offered: Every year, Spring
- PY 518. Physical Diagnosis.** **3 Credits.**
 This lecture course presents the techniques for performing a complete and competent physical examination with an understanding of the pathophysiology presented by the patient. Along with the comprehensive complete physical examination, students learn the problem-oriented physical examination as well as special examination tools and techniques. Synthesis of historical and physical presentations for an accurate evaluation of the patient are emphasized.
Prerequisites: Take PY 503.
Corequisites: Take PY 518L.
Offered: Every year, Fall
- PY 518L. Physical Diagnosis Lab.** **1 Credit.**
 This laboratory/pre-clinical clerkship course presents and explores the techniques for performing a complete and competent physical examination and organizing and reporting the findings in both written and oral format. The pre-clinical clerkships allow the student to gain experience and develop confidence in approaching patients prior to entering the clinical year. Instructional techniques include small group discussion, practical experience with other students and patients, and the observation and critique of physical examination, write-ups and oral presentations.
Prerequisites: Take PY 503.
Corequisites: Take PY 518.
Offered: Every year, Fall
- PY 519. Human Anatomy.** **3 Credits.**
 This lecture experience is meant to provide an environment for learning gross morphology of the human body including structural relationships, anatomical variations and clinical application. Approach to the material is both regional and systemic. Content includes the basic concepts of embryology, the comparison of normal and abnormal structural relationships and demonstration of how these things relate to health and disease. To meet the instructional goals and objectives, students attend lectures and review online reusable learning modules while making connections to concepts encountered in PY 519L.
Offered: Every year, Summer
- PY 519L. Human Anatomy Lab.** **1 Credit.**
 This lab experience is meant to provide an environment for learning gross morphology of the human body including structural relationships, anatomical variations and clinical application. Approach to the material is both regional and systemic. To meet the instructional goals and objectives, students complete full cadaveric dissections and a self-study osteology review.
Corequisites: Take PY 519.
Offered: Every year, Summer
- PY 520L. Clinical Decision Making.** **1 Credit.**
 The purpose of this course is to reinforce materials taught in Principles of Internal Medicine and to provide clinical correlations by working through a case scenario, in either a simulation or seminar setting. Students develop critical thinking skills by working through a history, physical exam, laboratory tests and diagnostic studies, and developing a differential diagnosis for each case, which leads to a diagnosis so that the student can formulate a treatment plan.
Prerequisites: Take PY 501, PY 519, PY 519L.
Corequisites: Take PY 506.
Offered: Every year, Fall
- PY 526. Principles of Epidemiology.** **3 Credits.**
 This graduate-level course in epidemiology directs itself toward application of epidemiological principles. The course involves analysis of prospective and retrospective studies, cross-sectional studies and experimental epidemiology. Both communicable and chronic disease case studies are used, as well as case studies of occupationally induced diseases.
Offered: Every year, Summer
- PY 536. Biostatistics.** **3 Credits.**
 This course covers the application of statistical techniques to the biological and health sciences. Emphasis is on mathematical models, collection and reduction of data, probabilistic models estimation and hypothesis testing, regression and correlation, experimental designs and non-parametric methods.
Offered: Every year, Summer

- PY 548. Ethics in Health Care Delivery I. 2 Credits.**
This course provides an overview of the discipline of Medical Ethics presenting the study and application of relevant principles, insights and understandings of modern medical practice. The course includes a study of ethical theories, which lay the foundation for subsequent investigation into specific ethical problems found in medical science and technology. A framework of ethical decision making is introduced and practiced using realistic medical cases. The purpose of the course is to provide a framework that enables the student to reason clearly and effectively about the ethics involved in medical science and technology. This course better prepares students to identify ethical issues they may encounter during the clinical year and provides a method for ethical decision making when faced with these issues. The course assumes no prior knowledge of philosophical ethics or medical science.
Offered: Every year, Summer
- PY 572. Medical Microbiology and Infectious Diseases. 3 Credits.**
This detailed study of microorganisms and the diseases they cause in man includes consideration of infectious disease microorganisms including their biochemical, serological and virulence characteristics, and clinical manifestations. An organ system approach is used to examine the fundamentals of pathogenicity, host response, epidemiological aspects of infectious disease, as well as clinical manifestations, diagnosis and treatment of infections.
Offered: Every year, Fall
- PY 608. Graduate Seminar. 3 Credits.**
This seminar prepares students for the specific requirements of entering professional practice. Faculty active in the profession cover such issues as malpractice coverage, licensure regulation, risk management and legal issues, and aspects of the financing of health care. Lab sessions are designed as small group seminars. Through guided discussion in these small seminar settings, students explore the current literature and thinking on the competencies for the physician assistant profession.
Offered: Every year, Summer
- PY 608L. Graduate Seminar Lab. 0 Credits.**
Lab to accompany PY 608. (1.5 lab hrs.)
Offered: Every year, Summer
- PY 611. Clinical Residency I. 3 Credits.**
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties.
Offered: Every year, Summer
- PY 612. Clinical Residency II. 3 Credits.**
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties.
Offered: Every year, Summer
- PY 613. Clinical Residency III. 3 Credits.**
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties.
Offered: Every year, Summer
- PY 614. Clinical Residency IV. 3 Credits.**
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties.
Offered: Every year, Fall
- PY 615. Clinical Residency V. 3 Credits.**
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties.
Offered: Every year, Fall
- PY 616. Clinical Residency VI. 3 Credits.**
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties.
Offered: Every year, Fall
- PY 617. Clinical Residency VII. 3 Credits.**
Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties.
Offered: Every year, Spring

PY 618. Clinical Residency VIII.**3 Credits.**

Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties.

Offered: Every year, Spring**PY 619. Clinical Residency IX.****3 Credits.**

Upon successful completion of the didactic phase, the PA student undertakes an intensive course of study requiring the application of skills and concepts acquired during the earlier course work. Each student rotates through seven six-week clinical disciplines and two four-week electives at varying sites throughout Connecticut, Massachusetts and Rhode Island. The core rotations are: family medicine/primary care, internal medicine, general surgery, emergency medicine, obstetrics/gynecology, pediatrics and psychiatry. Supplemental electives include a wide variety of medical, surgical and pediatric subspecialties.

Offered: Every year, Spring**PY 648. Ethics/Health Care Delivery II.****1 Credit.**

This 1-credit course occurs in the third summer after the student completes their clinical rotations. The course is a continuation of the PY 548 Ethics in Health Care I. The purpose of the course is to reinforce a framework of ethical decision-making which enables the student to reason clearly and effectively about the ethics involved in medical science and technology and reflect on ethical issues encountered during the clinical year. Student experiences encountered during their clinical year are used to exemplify the theoretical course material.

Offered: Every year, Summer**PY 650. Medical Writing Workshop/Journal Club.****1 Credit.**

The purpose of the medical writing course is to educate the PA student in the interpretation of medical literature and provide experiences in the various forms of medical writing and presentations. The course begins in summer semester of the second year with lectures, modules and on-campus activities, and then spans the clinical year using distance-education resources. Learning topics progress from a basic overview of writing mechanics and proper referencing to specific types of medical articles. Success in the medical writing course is determined by the quality of the researched written clinical papers and posters.

Offered: Every year, Summer**PY 676. Comprehensive Examination.****2 Credits.**

This comprehensive examination is a capstone of the physician assistant program. The purpose of the exam is twofold. First, to ascertain if the student has both the broad and specific knowledge expected of someone holding a master's degree. Second, to determine whether the student has been able to integrate knowledge obtained from individual courses into unified concepts that link the students' own specialization to other fields of study. The student is given an oral exam, a written examination and a clinical skills examination in the form of an Objective Score of Clinical Evaluation (OSCE).

Offered: Every year, Summer

Radiologist Assistant (RA)

RA 505. Clinical Pharmacology I.**3 Credits.**

This education course covers the classification, mechanism of action, toxicity and clinical use of therapeutics agents. Side effects, indications, dose response and management of therapeutics are emphasized.

Offered: Every year, Summer**RA 518. Imaging Pathophysiology.****3 Credits.**

The content focuses on the characteristics and manifestations of disease caused by alterations or injury to the structure or function of the body. Concepts basic to pathophysiology as well as common disease conditions are studied and serve as prototypes in understanding alterations that occur in the major body systems. Emphasis is placed on the characteristic manifestations and image correlation with these pathologies observed through diagnostic imaging. For radiologist assistant majors only.

Offered: Every year, Fall**RA 520. Radiation Safety and Health Physics.****2 Credits.**

This course provides an understanding of the protection of individuals from the harmful effects of ionizing radiation. Content includes an overview of the regulatory bodies and patient radiation safety regulations affecting the diagnostic imaging environment. The interaction of ionizing radiation with matter, units of exposure and dose, radiation detection and measurement devices are considered. Practical techniques and QA/QC procedures for reducing patient and operator risk of exposure to ionizing radiation are discussed.

Offered: Every year, Summer**RA 530. Image Critique and Pathologic Pattern Recognition I.****3 Credits.**

Basic imaging interpretation skills are presented to differentiate normal and abnormal structures in the skeletal, respiratory and cardiovascular systems, head and soft tissue neck across the lifespan. Students develop an understanding of the correlation of anatomy, pathology and physiology as it relates to radiologic imaging and interpretation. Protocols for drafting memoranda of initial observations based on image assessment are included. Guest lectures are provided. This course also includes imaging post processing. The content is designed to establish knowledge in the fundamentals of digital image post processing that support guided skill development using clinical based imaging workstations.

Offered: Every year, Fall**RA 531. Image Critique and Pathologic Pattern Recognition II.****3 Credits.**

Basic imaging interpretation skills are presented to differentiate normal and abnormal structures in breast, gastrointestinal and genitourinary systems across the lifespan. Students develop an understanding of the correlation of anatomy, pathology and physiology as it relates to radiologic imaging and interpretation. Protocols for drafting memoranda of initial observations based on image assessment are included. Guest lectures are provided. This course also includes image post processing. The content is designed to establish a knowledge of the fundamentals of digital image post processing that support guided skill development using clinical based image workstations.

Offered: Every year, Spring

- RA 532. Interventional Procedures I. 3 Credits.**
This course focuses on invasive procedures expected to be performed by the radiologist assistant. Students develop an understanding of the correlation of anatomy, pathology and physiology as it relates to radiologic imaging and interpretation with an assessment of need for interventional procedures across the lifespan. Procedures related to skeletal, respiratory and cardiovascular and head and neck systems are discussed, including but not limited to arthrograms, lumbar punctures, PICC, central venous lines, venogram, fistulograms, organ biopsies and thoracentesis. Quality improvement methods are emphasized.
Offered: Every year, Fall
- RA 535. Interventional Procedures II. 3 Credits.**
This course focuses on invasive procedures expected to be performed by the radiologist assistant. Students develop an understanding of the correlation of anatomy, pathology and physiology as it relates to radiologic imaging and interpretation with an assessment of need for interventional procedures. Procedures related to the breast, gastrointestinal and genitourinary systems across the lifespan are discussed, including but not limited to breast aspiration, nephrostogram, loopogram, gastric and T-tube check, organ biopsies and paracentesis. Quality improvement methods are emphasized.
Offered: Every year, Spring
- RA 545. Research Methods and Design. 3 Credits.**
Students explore ethical issues in medical research, develop a research project, collect data and perform analysis using statistical programs for computers. A presentation is developed and various computer presentation techniques are employed to present student project data. Students work individually on the project and require the approval of the instructor to pursue a particular topic.
Offered: Every year, Fall
- RA 550. Clinical Seminar I. 1 Credit.**
This distance education course requires students to present a minimum of two case studies during the academic semester. Based on the case study requirements of the radiologist assistant examination criteria, each student is responsible for patient history, clinical correlation, explanation of imaging procedures, evaluation of imaging studies and identification of pertinent anatomy. Students may choose a minimum of one modality for discussion per case study. Students are required to participate in discussions regarding each weekly case study.
Offered: Every year, Spring
- RA 551. Clinical Seminar II. 1 Credit.**
This distance education course requires students to present a minimum of two case studies during the academic semester. Based on the case study requirement of the radiologist assistant examination, students are responsible for patient history, clinical correlation, explanation of imaging procedures, evaluation of imaging studies and identification of pertinent anatomy.
Offered: Every year, Summer
- RA 552. Clinical Seminar III. 3 Credits.**
This distance education course requires students to present a minimum of two case studies during the academic semester. Based on the case study requirement of the radiologist assistant examination, students are responsible for patient history, clinical correlation, explanation of imaging procedures, evaluation of imaging studies and identification of pertinent anatomy.
Offered: Every year, Fall
- RA 570. Radiologist Assistant Clinical I. 3 Credits.**
This course provides students with a clinical experience over a 15-week period. Students are required to attend clinical three consecutive days per week. The areas of experience include general radiography, fluoroscopic procedures and interventional procedures. The experience also includes advanced imaging modalities such as magnetic resonance imaging, computer tomography, mammography, positron emission tomography and ultrasound. Application of skills related to patient care and management, radiographic pattern recognition and procedural variances are employed. Students must complete American Registry of Radiologic Technologists competency requirements.
Offered: Every year, Spring
- RA 571. Radiologist Assistant Clinical II. 5 Credits.**
This course provides students with a clinical experience over a 15-week period. Students are required to attend clinical four consecutive days per week. The areas of experience include general radiography, fluoroscopic procedures and interventional procedures. The experience also includes advanced imaging modalities such as magnetic resonance imaging, computer tomography, mammography, positron emission tomography and ultrasound. Application of skills related to patient care and management, radiographic pattern recognition and procedural variances are employed. Students must complete American Registry of Radiologic Technologists competency requirements.
Offered: Every year, Summer
- RA 572. Radiologist Assistant Clinical III. 5 Credits.**
This course provides students with a clinical experience over a 15-week period. Students are required to attend clinical five consecutive days per week. The areas of experience include general radiography, fluoroscopic procedures and interventional procedures. In addition, experience includes advanced imaging modalities such as magnetic resonance imaging, computer tomography, mammography, positron emission tomography and ultrasound. Application of skills related to patient care and management, radiographic pattern recognition and procedural variances are employed. Students must complete American Registry of Radiologic Technologists competency requirements.
Offered: Every year, Fall
- RA 573. Radiologist Assistant Clinical IV. 5 Credits.**
This course provides students with a clinical experience over a 15-week period. Students are required to attend clinical five consecutive days per week. The areas of experience include general radiography, fluoroscopic procedures and interventional procedures. In addition, experience includes advanced imaging modalities such as magnetic resonance imaging, computer tomography, mammography, positron emission tomography and ultrasound. Application of skills related to patient care and management, radiographic pattern recognition and procedural variances are employed. Students must complete American Registry of Radiologic Technologists competency requirements.
Offered: Every year, Spring
- RA 590. Thesis I. 1 Credit.**
The focus of this course is to further develop the paper written in RA 545. Students work on improving the abstract; introduction and literature review; developing the results, discussion, conclusion and recommendation sections of the thesis. At the conclusion of the course the student should have rough draft of a five-chapter thesis.
Offered: Every year, Spring
- RA 591. Thesis II. 2 Credits.**
This course is a continuation of RA 590 Thesis I. Each student produces a final five-chapter thesis and is required to present the completed thesis.
Offered: Every year, Summer

Social Work (SW)

SW 500. Generalist Field Education Practicum I. 3 Credits.

This is the first of two field placements. The generalist field placement is offered in the generalist year for 16 hours a week for a minimum of 400 hours. In addition to the hours required in the agency placement, there is a requirement to attend a Field Seminar on campus throughout the months of the placement.

Corequisites: Take SW 501.

Offered: Every year, Fall

SW 501. Social Work Practice I: Social Work Practice with Individuals and Families. 3 Credits.

This is the first semester of the generalist practice sequence. Social Work Practice I provides an introduction to social work practice. The courses present the knowledge and skills necessary for competent generalist social work practice with individuals and families. Skills taught in this course are interviewing, problem identification, problem exploration, formulating the presenting complaint, data gathering, differential assessment, planning, beginning intervention, termination, and evaluation.

Corequisites: Take SW 500. Take SW 511

Offered: Every year, Fall

SW 502. Generalist Field Education Practicum II. 3 Credits.

This is the second of two field placements. The generalist field placement is offered in the generalist year for 16 hours a week for a minimum of 400 hours. In addition to the hours required in the agency placement, there is a requirement to attend a Field Seminar on campus throughout the months of the placement.

Corequisites: Take SW 503.

Offered: Every year, Spring

SW 503. Social Work Practice II: Social Work Practice with Groups, Organizations and Communities. 3 Credits.

This is the second semester of the generalist practice sequence. Social Work Practice II provides an introduction to social work practice. The courses present the knowledge and skills necessary for competent social work practice with groups, organizations and communities. There is special attention given to vulnerable and disenfranchised populations.

Prerequisites: Take SW 501.

Corequisites: Take SW 502.

Offered: Every year, Spring

SW 504. Social Welfare and Social Policy. 3 Credits.

This course provides students with a foundation understanding and appraisal of social welfare policies and programs in the United States, and the historical and contemporary forces that have shaped their development. It covers the formation of the social work profession and its role in the creation and implementation of social policy and its tradition of advocacy, social action, and reform. Students take steps to engage in policy practice to advance social and economic justice.

Offered: Every year, Fall

SW 505. Social Work Research. 3 Credits.

The purpose of this course is to provide the generalist MSW student with a solid foundation in social work research, with an emphasis on evidence-based practice. As consumers and producers of research, social workers need to understand the core concepts of scientifically sound and rigorous research. Students become prepared to critically evaluate the research and learn to synthesize empirical research into a systematic review. The impact of bias in research is identified.

Offered: Every year, Fall

SW 507. Issues of Diversity and Oppression. 3 Credits.

This course examines the dynamics of racism and other forms of oppression in society and within us, and how those dynamics are intertwined with policy and practice. The course places oppression in the economic, political and social context of the U.S. Students analyze racism, sexism and ethnocentrism as they operate at the individual, community and institutional levels. The course aims to increase self-awareness and cultural humility for social work practice.

Offered: Every year, Spring

SW 508. Psychopathology. 3 Credits.

This course provides students with extensive knowledge of the major forms of emotional illness and their treatment. Students develop competence in diagnosis by mastering the currently accepted diagnostic code (DSM-V). They develop competence in treatment planning through awareness and understanding of the most modern and accepted treatments for each major category of mental illness.

Prerequisites: Take SW 500, SW 501.

Offered: Every year, Spring

SW 511. Human Behavior in the Social Environment I: Theories for Practice for Individuals and Families. 3 Credits.

Using a person-in-environment framework, this course provides an understanding of the relationship between the major theories of individual and family functioning among biological, social, psychological and spiritual dimensions as they affect and are affected by human behavior and family life. Students examine the role that culture and intersectionality play in human development, within the context of biological and social systems, psychodynamic, ecological, social constructionist, humanistic, cognitive and behavioral theories.

Offered: Every year, Fall

SW 512. Human Behavior in the Social Environment II: Theories for Groups, Organizations and Communities. 3 Credits.

Using an ecosystems framework, this course provides an understanding of the major theories that explain the structures, functions, and dynamics of groups, organizations and communities. Students master core ideas of theories that provide the conceptual base for engaging in interventions that occur in the macro social environment. The course focuses on utilizing theories that promote empowerment of key stakeholders within groups, organizations and communities and that address social and economic injustice.

Offered: Every year, Spring

SW 580. Clinical Assessment and Diagnosis. 3 Credits.

This course is designed to provide students with extensive knowledge of the major forms of emotional illness and their treatment. Students will develop competence in diagnosis by mastering the currently accepted diagnostic code (DSM-V). They will develop competence in treatment planning through awareness and understanding of the most modern and accepted treatments for each major category of mental illness. Strength-based approaches to mental health care is emphasized.

Prerequisites: Take SW 500 SW 501

Offered: As needed

SW 600. Specialized Practice Field Education Practicum in Health/Behavioral Health I. 4 Credits.

This specialized practice field placement is the first of two field placements and offers a social work experience focused on health/behavioral health in a variety of settings. Students complete 24 hours a week for a minimum of 600 hours. In addition to the hours required in the agency placement, there is a requirement to attend a monthly Field Seminar.

Prerequisites: All generalist curriculum courses.

Corequisites: Take SW 601.

Offered: Every year, Fall

SW 601. Social Work Practice III: Specialized Clinical Social Work Practice. 3 Credits.

This course focuses on clinical perspectives associated with social work in various fields of practice, particularly behavioral health consultation in the health care system. Skills to be acquired include how to make comprehensive psychosocial assessments and treatment plans for clients according to particular treatment perspectives. Multicultural applications for practice are incorporated. Attention is given to developing students' ability to apply ethical standards to clinical practice.

Prerequisites: All generalist curriculum courses.

Corequisites: Take SW 600.

Offered: Every year, Fall

SW 602. Specialized Practice Field Education Practicum in Health/Behavioral Health II. 4 Credits.

This specialized practice field placement is the second of two field placements and offers a social work experience focused on health/behavioral health in a variety of settings. Students complete 24 hours a week for a minimum of 600 hours. In addition to the hours required in the agency placement, there is a requirement to attend a monthly Field Seminar.

Prerequisites: All generalist curriculum courses.

Corequisites: Take SW 603.

Offered: Every year, Spring

SW 603. Social Work Practice IV: Specialized Organizational Social Work Practice. 3 Credits.

This course is designed to expand students' knowledge and understanding of human service organizations and to provide approaches for designing and managing programs. Students are exposed to various organizational and management theories and practices. In addition, emphasis is placed on organizational practice within the field of behavioral health in primary care settings.

Prerequisites: All generalist curriculum courses and SW 601.

Corequisites: Take SW 602.

Offered: Every year, Spring

SW 604. Evaluation Research Work Programs and Practice. 2 Credits.

This course focuses on the necessity of program evaluation for agency accountability and for improving services for clients. The course provides an overview of the methods of program evaluation and builds upon learned research knowledge for elaborating on the conceptual, methodological and administrative aspects of evaluation research. Students gain knowledge on how to utilize evaluation studies to inform their own practice at the micro and mezzo levels.

Prerequisites: All generalist curriculum courses.

Offered: Every year, Fall

SW 605. Integrative Seminar/Capstone Project. 2 Credits.

This course requires students to integrate core areas of generalist and specialized practice knowledge to a current issue relevant for social work practice. Students research human behavior theory, innovative evidence-based practice, policy and advocacy, as well as the latest data on health/behavioral health promotion to disseminate strategies for ameliorating the negative impact of a social problem on a specific marginalized population.

Prerequisites: All generalist curriculum courses.

Corequisites: Take SW 602, SW 603.

Offered: Every year, Spring

SW 611. Social Work in Health-Related Settings. 3 Credits.

This specialized practice MSW course focuses on the roles and functions of social workers serving clients in a rapidly changing health and behavioral health care industry. A strengths-based, family-centered and culturally sensitive approach to practice in a variety of health and behavioral health care settings is presented.

Prerequisites: All generalist curriculum courses.

Corequisites: Take SW 602.

Offered: Every other year, Spring

SW 612. Social Work Practice in Child Welfare and Behavioral Health Settings. 3 Credits.

This specialized practice social work course focuses on the characteristics, strengths and service needs of families and children in the child welfare, behavioral health and juvenile justice systems. It examines issues and builds practice skills related to those facing separation, reunification, effects of traumatic experiences, and mental health concerns.

Prerequisites: All generalist curriculum courses.

Offered: Every other year, Spring

SW 613. Social Work Practice in Schools. 3 Credits.

This specialized practice social work course presents knowledge and skills for engaging in social work practice from preschool through high school in educational settings across the continuum from direct practice, to school and district level programming and policy, to partnering with community stakeholders to advance programming and policy.

Prerequisites: All generalist curriculum courses.

Corequisites: Take SW 602, SW 603.

Offered: Every year, Spring

SW 614. Social Work Issues in Health and Illness. 3 Credits.

This course discusses the importance of cultural and socioeconomic factors in the creation of major health disparities in the United States. Physiological, psychological, social and environmental factors are considered in relationship to cultural and socioeconomic factors in explaining both etiology and consequences of disease. The framework is applied to common diseases in the life course.

Prerequisites: All generalist curriculum courses.

Offered: Every other year, Spring

SW 622. Multicultural Practice in Communities and Organizations. 3 Credits.

This specialized elective course provides students with an understanding of multicultural practice in organizational and community settings. Students examine concepts and techniques of multicultural practice; consider and evaluate relevant strategies and tactics that promote multiculturalism, including community capacity building, empowerment processes, intercultural communication, diversity training and cross-cultural supervision, and apply them to both community organizing and community-based agency practice settings.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall and Spring

SW 623. Child and Family Social Services Policy. 3 Credits.

This specialized practice MSW course provides a perspective on public and private sector social policies and service programs for children and families. The course includes topics related to policy objectives; history and values underpinning services; administration, economics, and funding of services; politics, interest group activities, and evaluation of policy and programs. The course builds on the evaluative concepts of social policy analysis included in the generalist policy course.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall and Spring

SW 624. Rape Crisis Victim Advocacy. 3 Credits.

This class prepares students to be certified to be rape crisis victim advocates and peer educators. The class is centered on the victim's perspective on sexual assault, sexual abuse, as well educating others about helping rape survivors. The course will cover basic information about sexual violence and rape myths, the protocol for reporting rape in different venues (e.g., on campus, police, hospital, rape crisis center), and methods for assisting survivors.

Offered: As needed

SW 630. Clinical Social Work with Military Service Members and Families. 3 Credits.

This specialized clinical elective provides conceptual theories of best practice approaches with, and research findings on working with service members and their families, with a primary focus on service members who have served in combat. Topics covered include strengths-based assessment and core evidence-based treatment interventions, and prevention strategies for working with service members and their families. The impact of working with traumatized individuals and families on social workers is reviewed with recommendations for self-care.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Spring and Summer

SW 633. Clinical Social Work Practice and Stress Management Techniques. 3 Credits.

The psychological, physiological and sociocultural aspects of stress are taught in this specialized clinical practice course. Stress management techniques are explored didactically and experientially. The purpose of this course is to teach students to understand the cognitive, affective and neurobiological impact of stress. Specific interventions to address traumatic stress also are discussed.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall

SW 634. Clinical Social Work with Substance Abuse and Addictive Behaviors Abuse and Addictive Behaviors. 3 Credits.

This course teaches the specialized practice social work student the theories and concepts of addiction. Students learn about the current research and approaches to counseling the chemically dependent client and/or family member, as well as the role of relevant systems, and how the addictive behavior affects these systems. The course emphasizes the application of social work values and ethics in the delivery of addiction services.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall

SW 635. Clinical Social Work Evidence-Based Treatment With Children and Adolescents. 3 Credits.

This specialized elective course provides students with a framework for understanding evidence-based mental health treatment with children and adolescents. Students become familiar with the most commonly used EBTs in the field and gain an understanding of the obstacles inherent in moving clinical practice from research to real-world settings. Models presented cover a range of diagnoses with an emphasis on children who have experienced emotional trauma. Individual, family and group treatment are addressed.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall

SW 636. Clinical Social Work in Relation To Death, Dying, Bereavement and Life-Threatening Illness. 3 Credits.

This specialized elective course provides a framework of knowledge, skills and values for culturally competent and responsive social work practice in helping clients who confront the issues of death and dying and life-threatening illnesses. A comparative, critically reflective approach to content is employed. Students explore experiences of clients dealing with these issues in relation to diversity of ethnicity or culture, age, gender, sexual orientation and social class.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Fall

SW 640. Clinical Social Work Practice with Adult Trauma. 3 Credits.

This specialized clinical elective focuses on the conceptual theories of trauma from cognitive/behavioral, psychodynamic and attachment theory perspectives. Emphasis is on the role of gender, race, ethnicity and culture in individuals' responses to trauma. Students apply diagnoses, assessment, psycho-education, stress management, affect regulation and emotional processing as core treatment components. The course includes application to selected groups, including adult survivors of complex PTSD such as sexual abuse, combat trauma and survivors of acute incident trauma.

Prerequisites: All generalist curriculum courses.

Offered: As needed, Spring

SW 698. Community-Based Service Learning Semina. 3 Credits.**SW 699. Special Topics in Social Work. 3 Credits.**

This course is offered to present a topic that is not part of the current course listings. It meets the curriculum standards of the MSW program for elective credit only.

Offered: As needed

Advanced Medical Imaging and Leadership

Program Contact: Paula DeMaio (paula.demaio@qu.edu)203-582-7973

The MHS in Advanced Medical Imaging and Leadership at Quinnipiac University is an interprofessional program. The integrated curriculum features core business discipline courses, guided health management courses and advanced imaging modalities in three distinct pathways: magnetic resonance imaging (MRI), computed tomography (CT) and women's imaging (WI). Graduates of the MHS-AMIL program are prepared to become advanced imaging professionals possessing the foundational education necessary for future entry-level leadership and managerial roles within their respective radiology healthcare organizations.

MHS in Advanced Medical Imaging and Leadership Curriculum

Computed Tomography

Course	Title	Credits
First Year		
Summer Semester		
AMI 523	Advanced Sectional Anatomy (Computed Tomography)	3
AMI 538 & 538L	Introduction to CT Scanning and Computed Tomography Lab I	4
MBA 601	Foundations for Decision Making	1
OL 601	Foundations of Organizational Behavior and Leadership (Students interested in earning MBA should take MBA 625 instead)	3
OL 610 or OL 650	Crucial Conversations as Leaders (Students interested in earning MBA should take MBA 615 instead of OL 610 or OL 650) or Leading Organizational Change	3
Credits		14

Fall Semester		
AMI 537	Computed Tomography Clinical I	2
AMI 570	Capstone I	1
HM 600	Foundations of Health Care Management	3
HM 621	Quality Management in Health Care Facilities	3
Credits		9

Spring Semester		
AMI 539	Computed Tomography Clinical II	2
AMI 560	Pathology for CT and MRI Technologists	3
AMI 575	Capstone II	3
HM 660	Human Resource Management in Health Care Administration	3
HM 664	Financial Management in Health Care Organizations	3
Credits		14
Total Credits		37

Magnetic Resonance Imaging

Course	Title	Credits
First Year		
Summer Semester		
AMI 523	Advanced Sectional Anatomy	3
AMI 515 & 515L	Introduction to Magnetic Resonance Imaging and Magnetic Resonance Imaging Principles I - Lab Practicum	4
MBA 601	Foundations for Decision Making	1
OL 601	Foundations of Organizational Behavior and Leadership (Students interested in earning MBA should take MBA 625 instead)	3
OL 610 or OL 650	Crucial Conversations as Leaders (Students interested in earning MBA should take MBA 615 instead of OL 610 or OL 650) or Leading Organizational Change	3
Credits		14

Fall Semester

AMI 516 & 516L	Advanced MRI Principles and Imaging and Magnetic Resonance Imaging Principles II - Lab Practicum	4
AMI 517	Magnetic Resonance Imaging Clinical I	2
AMI 570	Capstone I	1
HM 600	Foundations of Health Care Management	3
HM 621	Quality Management in Health Care Facilities	3
Credits		13

Spring Semester

AMI 518	Magnetic Resonance Imaging Clinical II	2
AMI 560	Pathology for CT and MRI Technologists	3
AMI 575	Capstone II	3
HM 660	Human Resource Management in Health Care Administration	3
HM 664	Financial Management in Health Care Organizations	3
Credits		14
Total Credits		41

Women's Imaging

Course	Title	Credits
First Year		
Summer Semester		
AMI 534	Bone Densitometry	1
AMI 540	Principles of Mammography	3
AMI 541L	Mammography and Bone Densitometry Lab	2
MBA 601	Foundations for Decision Making (Students interested in earning MBA should take MBA 625 instead)	1
OL 601	Foundations of Organizational Behavior and Leadership	3
OL 610 or OL 650	Crucial Conversations as Leaders (Students interested in earning MBA should take MBA 615 instead of OL 610 or OL 650) or Leading Organizational Change	3
Credits		13

Fall Semester

AMI 530	Mammography and Bone Densitometry Clinical I	2
AMI 545	Women's Health and Imaging	3
AMI 570	Capstone I	1
HM 600	Foundations of Health Care Management	3
HM 621	Quality Management in Health Care Facilities	3
Credits		12

Spring Semester

AMI 531	Mammography and Bone Densitometry Clinical II	2
AMI 575	Capstone II	3
HM 660	Human Resource Management in Health Care Administration	3

HM 664	Financial Management in Health Care Organizations	3
Credits		11
Total Credits		36

- Provide essential and fundamental leadership skills to better position graduates for entry-level supervisory opportunities within radiology healthcare organizations
- Foster a sense of commitment to continuing education and professional development

Student Learning Outcomes

Upon completion of the Advanced Medical Imaging and Leadership program, students will demonstrate the following competencies:

Goal: Students will be clinically competent.

- Clinically Knowledgeable:** Apply skills and knowledge from foundational courses.
- Procedurally Knowledgeable:** Demonstrate growth in procedural knowledge from all AMIL coursework.

Goal: Students will demonstrate effective communication skills.

- Effective Communication:** Execute interpersonal communication with patients.
- Oral Proficiency:** Demonstrate their ability to present clear and creative ideas in a formal manner.

Goal: Students will demonstrate critical thinking.

- Critical Decision-Making:** Demonstrate their ability to navigate typical and atypical clinical scenarios while performing non-routine and routine procedures.
- Image Analysis:** Evaluate images for quality and diagnostic value.

Goal: Students will grow and develop as professionals.

- Professionalism:** Conduct themselves professionally and understand and apply ethical decision-making.
- Professional Research:** Create a culminating capstone project.

Mission Statement

The Advanced Medical Imaging and Leadership program supports the mission statements of both Quinnipiac University and the School of Health Sciences and their commitment to excellence in education. The mission of the Advanced Medical Imaging and Leadership program is to develop students' technical, professional and interpersonal communication skills through a logical and organized sequence of didactic, laboratory and clinical experiences. The program offers multiple clinical assignments to provide maximum exposure to advanced imaging modalities and associated protocols. Graduates of the Advanced Medical Imaging and Leadership program will meet the needs of the community for highly qualified professionals, and the program will prepare students for career entry and advanced study.

Program Objectives

The objectives of the Advanced Medical Imaging and Leadership program are to:

- Provide excellent education in both the didactic and clinical learning environment
- Provide research opportunities that contribute to the clinical and scientific knowledge base in the field of diagnostic radiology
- Provide the skills necessary to prepare graduates for practice as advanced modality imaging professionals

These objectives are consistent with the mission statement of Quinnipiac University, which is to provide a supportive and stimulating environment for intellectual and personal growth.

Admission Requirements

The eligibility requirements for the MHS-AMIL program include:

- Bachelor's degree from an accredited institution
- Radiologic technologist in good standing with the American Registry of Radiologic Technologists
- State of Connecticut Licensure as a radiographer prior to clinical component of the program
- Prerequisite course requirements:
 - 3-4 credits of physics or chemistry
 - 3 credits of college-level mathematics
 - 12-15 credits of biology with labs, including:
 - 6-8 credits of anatomy and physiology

Admission to the program is conducted on a rolling basis. Decisions are made individually as an application becomes complete. Final decision on which applicants are selected into the program will be made by the program director, with input from MHS-AMIL program faculty. An interview is required when appropriate with the program director and at least two members of the MHS-AMIL faculty in attendance. Applications will be ranked based on a strong academic record, experience in a relevant clinical area, perceived ability to complete a challenging didactic and clinical program and the strength of recommendation by reference person.

Biomedical Sciences Program

Program Contact: Dwayne Boucaud (Dwayne.Boucaud@quinnipiac.edu)
203-582-3768

Medical laboratory research and diagnostic testing are among today's most exciting professions. The last decade has brought many exciting breakthroughs in the diagnosis and treatment of disease as well as new challenges such as AIDS, Lyme disease and the resurgence of tuberculosis. These new developments and challenges require laboratory professionals to stay on the cutting edge of their field. New techniques have to be mastered, new theories and concepts understood, and new means of managing the more complex operations of laboratories developed. The Biomedical Sciences program at Quinnipiac is specially designed to meet the educational needs of students to complete their education toward a degree in medicine or PhD programs or employment in the research/development industry and diagnostic companies. The program provides the training that is necessary to stay current with today's rapidly changing technology and to assume positions of greater responsibility. A laptop is required for all students enrolled in the MHS in Biomedical Sciences program.

MHS in Biomedical Sciences Program of Study

Students may choose either a thesis or a non-thesis option in the biomedical sciences program. Both options require students to take four courses or more in their specialization while allowing students to choose a number of electives to meet their individual needs.

Thesis Option Requirements (based on availability of faculty)

The curriculum includes a minimum of 35 credits including 8 credits of thesis (BMS 650, BMS 651). A total of 15–16 credits of core classes in an area of specialization is required along with three classes (9–12 credits) of electives within the specific area of specialization. Open elective courses could be chosen from any area of specialization.

Code	Title	Credits
BMS 650	Thesis I	4
BMS 651	Thesis II	4
Core courses in area of specialization ¹		15-16
Three areas of specialization electives ¹		9-12
Open electives		0-3
Total Credits		35-38

¹ Since most courses are either 3 or 4 credits, the total credits from area of specialization and total number of elective courses are based on the number of credits for individual courses.

Non-Thesis Option Requirements

The curriculum includes a minimum of 38 credits including 2 credits of comprehensive examination (BMS 670). A total of 15–16 credits of core classes in an area of specialization is required along with three elective classes (9–12 credits) within the specific area of specialization. Open elective courses could be chosen from any area of specialization.

Code	Title	Credits
Comprehensive Exam		2
Core courses in area of specialization ¹		15-16
Three areas of specialization electives ¹		9-12
Open electives ¹		9-12
Total Credits		38-41

¹ Since most courses are either 3 or 4 credits, the total credits from area of specialization and total number of elective courses are based on the number of credits for individual courses.

Comprehensive Examination

The comprehensive examination in medical laboratory sciences (2 credits) is a requirement for the non-thesis option in the Biomedical Sciences program. The purpose of the exam is two-fold. First, the student must demonstrate broad and specific knowledge expected of someone holding a master's degree. Second, the student must be able to integrate knowledge obtained from individual courses into unified concepts which link the student's own specialization to other fields of study. The student is given two opportunities to demonstrate competency. A written essay exam is administered by a designated faculty member. Students should

schedule an appointment with the program director before registering for the comprehensive exam.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

- Scientific Knowledge:** Demonstrate an advanced understanding of translational science in biomedical and microbiological topics.
- Translational Science:** Critically analyze scientific literature and develop critical-thinking skills necessary to implement evidence-based translational research.
- Effective Scientist:** Engage in the scientific process including research ethics, experimental design and data collection and analysis.
- Responsible Citizen:** Evaluate the social and ethical impact of scientific discoveries on medical practice.

Mission Statement

The mission of Quinnipiac University's Master of Health Science in Biomedical Sciences program is to provide students with the cutting-edge skills they need to manage the more complex operations carried out today in hospitals and research facilities, as well as allowing students to develop their critical thinking skills and knowledge of the biomedical sciences, sought after by PhD programs and medical schools. The two specialties included in the program (biomedical sciences and microbiology) and the integration of courses from these individual specialties provides the student with a comprehensive knowledge to meet the education and technical needs of the biomedical profession in pharmaceutical, biotechnology, diagnostics and medical research. Students are guided in the principles and methods of scientific research, and they gain knowledge of the latest advances in biomedical,

biotechnological and laboratory sciences—all directly applicable to real-world work environments.

To be considered for admission into the biomedical sciences program, applicants must meet the following requirements:

- Bachelor's degree in the biological, medical or health sciences from a regionally accredited institution in the U.S. or Canada.
- Scores for the tests of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) if the applicant is from a non-English speaking country.
- A minimum undergraduate GPA of 2.75, however the most successful applicants have a GPA of 3.0 or higher.
- All undergraduate transcripts and a detailed autobiography indicating why the student would like admission into the program, as well as personal, professional and educational achievements.
- Two letters of reference detailing the applicant's academic and interpersonal strengths.

Applications may be obtained from the Office of Graduate Admissions. Applicants should refer to the graduate admission requirements (p. 675) found in this catalog. Applications to this program are accepted throughout the year. Incoming students can start the program in either the fall or spring semester.

Biomedical Sciences One Year Option

Program Contact: Dwayne Boucaud
(Dwayne.Boucaud@quinnipiac.edu) 203-582-3768

This academic enhancement program provides a 12-month pathway for students to earn a master's in biomedical sciences. The program is suited for students with a strong science background. Coursework is focused on a comprehensive study of health and disease, which serves as the foundation of modern medical practices and healthcare research. Graduates gain the knowledge, skills and training to lead today's rapidly changing healthcare industry. The Biomedical Sciences program at Quinnipiac is specially designed to meet the educational needs of students to complete their education toward a degree in medicine or PhD programs or employment in the research/development industry and diagnostic companies. The program provides the training that is necessary to stay current with today's rapidly changing technology and to assume positions of greater responsibility. A laptop is required for all students enrolled in the MHS in Biomedical Sciences program.

MHS in Biomedical Sciences: 1-Year Option Program of Study

Students are required to complete both the non-thesis option and Medical Track for this accelerated program.

Non-Thesis Option Requirements

The curriculum includes a minimum of 38 credits including 2 credits of comprehensive examination (BMS 670). Students are required to take the courses listed below in sequence. They have the ability to choose two open elective courses based on personal interest.

Course	Title	Credits
First Year		
Summer Semester		
BMS 527	Pharmacology	3
BMS 564	Fundamentals of Oncology	4
BMS 577	Critical Analysis and Reasoning In the Biomedical Sciences	2

- A minimum undergraduate GPA of 3.0; however the most successful applicants have a GPA of 3.2 or higher.
- All undergraduate transcripts and a detailed autobiography indicating why the student would like admission into the program, as well as personal, professional and educational achievements.
- Two letters of reference detailing the applicant's academic and interpersonal strengths.
- Strong extracurricular portfolio.

Applications may be obtained from the Office of Graduate Admissions. Applicants should refer to the graduate admission requirements (p. 675) found in this catalog. Applications to this program are accepted throughout the year. Incoming students can start the program in either the fall or spring semester.

Cardiovascular Perfusion Program

Program Contact: Michael Smith (Michael.Smith@quinnipiac.edu)
203-582-3427

The perfusionist provides consultation to the physician in the selection of the appropriate equipment and techniques to be used during extracorporeal circulation. During cardiopulmonary bypass, the perfusionist provides life support to the patient while the heart and lungs are stopped to enable the surgeon to operate. Perfusionists administer blood products, anesthetic agents and drugs through the extracorporeal circuit. The perfusionist is responsible for the induction of hypothermia and other duties, when required. Perfusionists have a role in the implementation and operation of ventricular assist devices designed to provide long-term circulatory support for the failing heart.

You will learn to operate the equipment perfusionists use to support or replace a patient's heart and lung functions during cardiac surgery and to monitor vital cardiopulmonary signs to keep the patient stable. You'll also learn to administer the appropriate medications and anesthesia during surgery.

Our program is one of only eight in the nation that offers graduate-level training in this profession. As cardiovascular disease becomes increasingly common, the employment opportunities in this field continue to expand, and we prepare you to enter the workforce with a competitive advantage.

A strong sense of responsibility and the capacity to work effectively with other professionals in a high-pressure environment are essential qualities of successful cardiovascular perfusionists. You'll acquire both during group activities and clinical work. Plus, you'll learn in our technologically sophisticated Center for Medicine, Nursing and Health Sciences.

This program is fully accredited by the Accreditation Committee –Perfusion Education (519 West Ridge Road Littleton, CO 80120) office@ac-pe.org (p. 7) under the Commission on Accreditation of Allied Health Education Programs. caahep.org (<https://www.caahep.org>)

MHS in Cardiovascular Perfusion Curriculum

Course	Title	Credits
First Year		
Fall Semester		
College-based didactic course work:		
PA 535	Disease Mechanisms	4
PR 500	Theoretical Foundations of Cardiovascular Perfusion	2
PR 502	Systems Anatomy and Physiology I	3
PR 508	Extracorporeal Circuitry and Laboratory I	1
PR 516	Physiologic Monitoring	4
Credits		14
Spring Semester		
PR 503	Systems Anatomy and Physiology II	3
PR 506	Pharmacologic Intervention in Cardiovascular Perfusion	4
PR 509	Extracorporeal Circuitry and Lab II	1
PR 510	Surgical Techniques	2
PR 526	Mechanical Circulatory Support	4
PR 528	Congenital Defects and Clinical Practice	2
Credits		16

Second Year

Summer Semester

Hospital-based clinical training session:

PR 600	Clinical Practicum I	5
PR 520	Research Methods in Cardiovascular Perfusion	2
Credits		7

Fall Semester

PR 602	Clinical Practicum II	5
PR 522	Research Methods in CV Perfusion II	2
Credits		7

Spring Semester

PR 604	Clinical Practicum III	5
PR 514	Special Topics in Cardiovascular Perfusion	2
Credits		7
Total Credits		51

During the first two didactic semesters, students are introduced to the operating room environment by weekly orientation sessions in one of several affiliated hospitals. Students are required to join the American Society of Extracorporeal Technology and maintain student membership for the duration of the program.

Failure to maintain a 3.0 minimum GPA in all didactic and clinical semesters will result in automatic dismissal from the program. Students must also successfully complete all clinical practicums to graduate from the program.

Student Learning Outcomes

Upon completion of the cardiovascular perfusion program, students will demonstrate the following competencies:

- Foundational knowledge:** Demonstrate an advanced understanding of the basic sciences as they pertain to the treatment of disease states in cardiopulmonary pathology.
- Critical decision-making:** Acquire the concepts and skills necessary to effectively apply technology, equipment and techniques to achieve extracorporeal life support of critically ill patients.
- Professional skills:** Master the skillful application of mechanical cardiac assist devices in patients with failing heart and lungs of all age groups: neonatal, pediatric and adult.
- Interprofessional education:** Collaborate with colleagues and other healthcare professionals in providing quality patient care.
- Professionalism and effective scientist:** Apply research methods to constantly assess and improve practices, with the goal of enhancing patient safety and outcomes.

Mission Statement

The mission of the Master of Health Science in Cardiovascular Perfusion program is to:

- Provide excellent education in both the didactic and clinical learning environment;
- Provide research opportunities that contribute to the clinical and scientific knowledge base in the field of extracorporeal circulation; and
- Foster a sense of commitment to continuing education and professional development.

This mission is consistent with the mission of Quinnipiac University, which is to provide a supportive and stimulating environment for the intellectual and personal growth of undergraduate, graduate and continuing education students.

Admission

Interested candidates must have earned a bachelor's degree from a regionally accredited institution in the U.S. or Canada. Scores for the tests of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required if the applicant is from a non-English speaking country. Applicants must have the following course prerequisites:

- two semesters of general biology (with labs)
- two semesters of anatomy and physiology (with labs)
- two semesters of general chemistry (with labs)
- one semester of biochemistry or cell physiology
- one semester of physics (with lab)
- one semester of microbiology (with lab)
- one semester (2 or 3 credits) of medical terminology
- one semester of college algebra, calculus or biostatistics
- certification in Basic Life Support from the American Heart Association

Prerequisites should be completed within 10 years of application. Applicants to the program should have a strong background in the health sciences and be able to work for long periods under intense conditions. Individuals already working in the fields of nursing, respiratory care, physician assistant, physical therapy, paramedical and biomedical engineering are ideally suited for admission into the program.

Applicants must have a minimum undergraduate cumulative GPA of 3.0, and at least two years of experience working in a healthcare field involving direct patient care.

Applications can be obtained from the Office of Graduate Admissions. Applicants should refer to the graduate admission requirements found in this catalog.

A detailed autobiography of personal, professional and educational achievements, and three letters of recommendation must accompany the student's application.

All applications, transcripts, reference letters and supporting materials must be submitted to the Office of Graduate Admissions.

Admission to the program is competitive. Personal interviews, required for admission, are offered to the most qualified candidates.

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Background Check and Drug Screen

To ensure their safety and maintain high-quality care of patients, clinical affiliates of the university require students to have a criminal background check and drug screen. All students entering the Quinnipiac University Cardiovascular Perfusion program are required to undergo a criminal background check and drug screen (through the university vendor) prior to beginning classes and prior to beginning the clinical year. This is a mandatory component of the program. In addition, Cardiovascular

Perfusion students may be required to undergo a criminal background re-check and/or a drug screen prior to any of their clinical rotations. The results are made available to the student through their own personal and secure online portal. Whenever a Quinnipiac University Cardiovascular Perfusion student may need proof of criminal background check for clinical rotations and/or to be eligible to sit for their certification exam, the student will release the information directly from their personal portal to the clinical site. The cost of the criminal background check and any re-checks and/or drug screens is the responsibility of each individual student.

Additional Program Costs

As a clinical education program, the Cardiovascular Perfusion program requires some expenses that go beyond standard university tuition and fees:

- a. **Clinical/Fieldwork Education Travel** (gas, parking, public transportation, housing). **Costs - variable**
- b. **Immunizations:** Consistent with the School of Health Sciences policy, all students must have a full battery of immunizations and in some cases, titer affirmation of immunity for common diseases including but not limited to: MMR, HepB, varicella, polio, TDAP, TB and influenza. These must be documented prior to the start of clinical experiences during the sophomore year and must be maintained through the duration of the program. **Costs - variable (please check with your insurance carrier)**
- c. **Background Check:** All students must undergo an initial background check prior to the start of any clinical/fieldwork experience.
 - i. Initial background check cost is \$63 for all domestic addresses for the past 7 years or \$158 for students who have resided in New York state in the last 7 years due to NY state surcharge.
 - ii. Students will be required to do an annual recheck one year after the initial background recheck. **Cost - \$32 per annual recheck**
- d. **Drug Screening:** Students are required to complete an annual 14-panel drug screening test. **Cost - \$42.25**
- e. **Liability Insurance:** All students have liability insurance coverage through the university, free of charge, while performing required clinical activity. Students may choose to purchase additional coverage at their own expense.
- f. **EXXAT and APPROVE:** Students enrolled in professional programs must enroll in EXXAT and APPROVE.
 - i. **EXXAT** is the clinical tracking and assessment program used by the School of Health Sciences. **Cost - one-time payment of \$150 per student for the current major (students are responsible for this cost).**
 - ii. **APPROVE** is the program within EXXAT that tracks all student health and safety records, provides documentation to prospective clinical sites, and provides notification of impending expiration dates. **Cost - \$35 for first year, \$10 per year thereafter.**
- g. **Professional Association Membership:** Students are required to join and maintain membership in both the American Academy of Cardiovascular Perfusion and the American Society of Extracorporeal Technology. **Cost - \$25 annually for AACV; \$15 one-time fee for AmSECT.**

The Cardiovascular Perfusion program is accredited by:

Commission on Accreditation of Allied Health Education Programs

Doctor of Physical Therapy (DPT)

Program Contact: Tracy Wall (tracy.wall@qu.edu) 203-582-8212 or Ken Kosior (Ken.Kosior@quinnipiac.edu) 203-582-3931

The Doctor of Physical Therapy (DPT) program at Quinnipiac prepares students to be outstanding clinicians equipped for contemporary practice through a three-year, 12-month graduate program. Students develop the essential skills of a 21st-century health care professional by having access to expert academic and clinical faculty and the benefit of learning in state-of-the-art facilities. The program is an integrated curriculum of foundational knowledge and clinical training and is located in the Center for Medicine, Nursing and Health Sciences. Students learn the foundation of movement science through full body dissection in the Human Anatomy Lab and application in the Motion Analysis Lab. The learning environment for clinical skills, clinical decision-making and professionalism is supported in classrooms, well-equipped laboratories, and progressive technology. Students can practice and are assessed on skills utilizing simulation, standardized patients and cumulative practical examinations. The program integrates frequent client-based opportunities throughout the curriculum in addition to three full-time clinical experiences completed at various domestic or international clinical sites. Although the goal of the program is to prepare entry-level physical therapists, faculty value establishing close mentoring relationships through in-depth research or innovative projects that allow students to grow intellectually and professionally.

The Doctor of Physical Therapy program cultivates critical and reflective thinking, clinical decision-making and lifelong learning by utilizing an evidenced-based learning model, authentic assessments and a variety of learning experiences that include interactive technology. This learning model features small lab sizes, hands-on activities, visits to area clinics and opportunities to engage in professional development forums and community interdisciplinary collaboration. The program provides both in-class and in-clinic opportunities for students to engage in the essential elements of patient/client management.

Plan of Study

Doctor of Physical Therapy (DPT degree) for Direct-Entry HSS-DPT, AT-DPT and Internal Transfer Students

A total of 112 credits is required for completion of the DPT.

Course	Title	Credits
First Year		
Fall Semester		
PT 503L	Physical Therapy Process I Lab	2
PT 505 & 505L	Kinesiology I and Kinesiology I Lab	3
PT 512 & 512L	Human Anatomy I and Human Anatomy Lab	4
PT 518	Functional Neuroanatomy	3
PT 519	Professional Issues in Physical Therapy I	2
PT 569	Education/Community Health/Wellness	2
Credits		16

Spring Semester

PT 504L	Physical Therapy Process II Lab	4
PT 507 & 507L	Kinesiology II and Kinesiology II Lab	3
PT 509	Clinical Decision Making I	2
PT 513 & 513L	Human Anatomy II and Human Anatomy II Lab	3
PT 528 & 528L	Musculoskeletal I and Musculoskeletal I Lab	4
PT 548L	Physical Agents Lab	1

Credits 17

Summer Semester

PT 516	Clinical Decision Making II	1
PT 517	Clinical Education Seminar	1
PT 520	Pathophysiology I	3
PT 523	Applied Pharmacology I	1
PT 529 & 529L	Musculoskeletal II and Musculoskeletal II Lab	4
PT 531 & 531L	Acute Care and Cardiopulmonary Physical Therapy I and Acute Care Cardiopulmonary Lab I	4
PT 675	Normal/Abnormal Gait	1

Credits 15

Second Year

Fall Semester

PT 657	Imaging for Physical Therapists	2
PT 671	Clinical Education Experience I	4
PT 685	Evidence in Practice	2

Credits 8

Spring Semester

PT 626	Pathophysiology II	3
PT 627	Applied Pharmacology II	1
PT 628 & 628L	Acute Care and Cardiopulmonary II and Acute Care and Cardiopulmonary II Lab	3
PT 653 & 653L	Neurorehabilitation I and Neurorehabilitation I Lab	4
PT 658	Differential Diagnosis	3
PT 666	Capstone I	2

Credits 16

Summer Semester

PT 652	Professional Issues in Physical Therapy II	1
PT 654 & 654L	Neurorehabilitation II and Neurorehabilitation II Lab	4
PT 661	Administration and Leadership in Physical Therapy	3
PT 668	Psychosocial Aspects of Physical Disability	2
PT 676	Capstone II	1
PT 679	Clinical Decision Making III	2

Credits 13

Third Year

Fall Semester

PT 730 & 730L	Musculoskeletal III and Musculoskeletal III Lab	3
---------------	---	---

PT 736 & 736L	Pediatric Rehabilitation and Pediatric Rehabilitation Lab	4
PT 744 & 744	Physical Therapy Skills Elective and Physical Therapy Skills Elective (complete 2 sections)	4
PT 769	Advanced Clinical Decision Making	2
PT 767	Capstone III	2
Credits		15
Spring Semester		
PT 781	Clinical Education Experience II	6
Credits		6
Summer Semester		
PT 782	Clinical Internship III, Clinical Education Experience III	6
Credits		6
Total Credits		112

*The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Student and Graduate Learning Outcomes

Upon completion of the physical therapy program, students will demonstrate the following competencies:

Students/graduates will become lifelong learners through reflective practice.

1. **Self-directed learner:** develop, implement and evaluate one's own approach to learning through various educational experiences.
2. **Social awareness:** cultivate a mindset of awareness to guide actions and advocacy for the benefit of society at large.

Students/graduates will provide proficient patient-centered care.

1. **Professionalism:** be accountable for one's physical therapy judgments, actions and omissions as related to standards of the profession.
2. **Clinical competence:** skillfully manage patients in an efficient, safe and effective manner with an ability to seek help accordingly.
3. **Clinical decision-making:** using a framework of thinking to analyze and interpret healthcare information from multiple sources to justify clinical judgments.
4. **Interprofessional health care:** use a framework of understanding of the roles and shared values of various health professionals to facilitate interprofessional communication and teamwork.

Students/graduates will demonstrate innovative thinking.

1. **Creative thinking:** devise imaginative or original solutions in the context of patient care to address health within the scope of practice.
2. **Evidence-informed decision-making:** critically appraise and integrate evidence to generate sound clinical judgments.

Mission Statement

The department of physical therapy at Quinnipiac University provides an innovative, student-oriented environment to prepare students who can

meet the evolving health needs of society. The program is dedicated to developing lifelong learners who will enhance the profession through a commitment to reflective practice, interprofessional collaboration, leadership and socially aware action. The educational experience embodies the core values of both the university and APTA. Students provide patient-centered care using evidence-informed practice to optimize movement and positively transform society.

Graduate Admissions Policy

Statement on Nondiscrimination and Compliance: The Quinnipiac University physical therapy program supports equality of educational and employment opportunity. No person shall be denied admission to any educational program or activity or be denied employment on the basis of race, color, disability, religion, age, gender, sexual orientation, or ethnic or national origin.

Admissions: The DPT program is an early assurance program. Admission to the DPT program is achieved primarily through an undergraduate program in Health Science Studies or via a combined degree with Athletic Training. Early assurance candidates will be reviewed for admission into the DPT program; please see Entry-Level DPT (p. 557) for information concerning admission to the program and course of undergraduate study.

In the event there are seats available in the DPT program, internal candidates within Quinnipiac University and external candidates are invited to submit applications using the following admissions policies and procedures. The policies were updated to create a clear pathway for both internal and external candidates to apply to the program when there are available seats.

Internal and External Applicants

The Quinnipiac Physical Therapy Department invites undergraduate students to apply to the graduate DPT program on a space-available basis.

Application Eligibility: Applications will be accepted from students who have successfully completed all of the program requirements and/or are within 32 or fewer credits from undergraduate degree completion. All prerequisite courses and requirements are posted on the DPT program website.

Application Deadlines: Both internal and external students can apply through the Quinnipiac University Office of Graduate Admissions. Internal candidates can apply by September 15 and external candidates can apply by October 15.

Admission Requirements

- Successful completion of a Bachelor of Science from Quinnipiac University or an accredited institution and/or are within 32 or fewer credits from completing an undergraduate degree
- Transcripts: Official transcripts from all institutions attended
- GPA: 3.2 overall GPA and 3.2 prerequisite GPA with no prerequisite course grade below a C. Applicants may retake a maximum of two courses one time each for a grade replacement.
- Letters of recommendation: Two letters of recommendation (one from a past employer/personal reference, one from an academic source who can attest to the applicant's academic performance)
- Response to one essay question – "Why do you want to be a physical therapist?"

- Healthcare experiences: Documentation of 60 contact hours of healthcare experiences, either volunteer or paid. At least 20 of these hours *must* be in two different physical therapy practice settings (e.g., hospital, nursing home, rehabilitation agency, outpatient department, private practice, etc.).

Additional Program Costs

Background Check: All students must undergo an initial background check prior to **matriculation to the graduate curriculum (due one week prior to graduate program orientation)**. Prices subject to change based on vendor charges.

- Initial background check **cost is \$63** for all domestic addresses for the past 7 years or \$158 for students who have resided in New York state in the past 7 years due to New York state surcharge.
- Students must review the criminal background check policy in the University Catalog: catalog.qu.edu/university-policies/background-checks
- Students may be required to repeat background checks depending on the requirements of the clinical sites to which they are assigned. If within one year of prior check, the cost of a recheck is \$32; if more than a year has passed, a new background check must be obtained at the cost of an initial check.
- Drug Screening:** Students may be required to obtain one or more drug screen as required by the clinical sites to which they are assigned. **Cost: \$42.25.** Students must review the drug screen policy in the University Catalog: catalog.qu.edu/university-drug-screen-policy
 - EXXAT** is a platform utilized by programs within the School of Health Sciences. Students enrolled in the physical therapy programs must enroll in STEPS and APPROVE.
 - STEPS** is the clinical tracking and assessment program used by the School of Health Sciences. **Cost: one-time out-of-pocket expense of \$150 per student.**
 - APPROVE** is the program within EXXAT that tracks all student health and safety records, provides documentation to prospective clinical sites, and provides notification of impending expiration dates. **Cost: \$35 for first year, \$10 per year thereafter.**

Professional DPT Program Requirements

Students in the professional graduate DPT component of the curriculum are required to achieve a GPA of 3.0 in each semester. In addition, a grade of C+ or better is required in all professional graduate component courses. Students whose averages for each semester fall below 3.0 or receive a grade below C+ may be subject to dismissal from the program. For continuation in the program, all students must successfully complete all didactic and clinical coursework in the sequence identified.

Clinical education is a vital component of physical therapy student education and is a significant part of the physical therapy curriculum at Quinnipiac University. Clinical education experiences occur through both integrated and full-time clinical experiences in a variety of settings throughout the country. Placement in specific settings, locations and clinical facilities is not ever guaranteed and individual student assignment occurs at the discretion of the faculty. Students may be required to travel for clinical assignments. All associated housing and travel costs are the responsibility of the student.

All DPT students must be aware that there are additional requirements necessary to participate in scheduled clinical affiliations. Specific health requirements, including but not limited to: titers for mumps, measles and rubella, varicella and hepatitis B, annual physical exams, two-step PPDs, flu shots, current CPR certification and other mandates must be completed within the timeframe established by the clinical site at which a student has been placed. In addition, criminal background check updates and drug testing also may be required. These mandates are facility-specific and change frequently without notice. Quinnipiac University has no authority over any clinical facilities' protocols. Students must comply with what is required at their specific clinical affiliation.

Technical Standards and Essential Requirements

Introduction

Professional education requires that the accumulation of knowledge be accompanied by the simultaneous acquisition of skills, professional attributes and behaviors. Professional school faculty members have a societal responsibility to matriculate and graduate the best possible health care professionals. Therefore, admission to the School of Health Sciences Department of Physical Therapy (DPT) is offered to those who present the highest qualifications for the study and practice of physical therapy. The technical standards presented below are prerequisite for admission to, progression in, and graduation from the school and department. Successful completion of all courses in the DPT curriculum is required to develop the essential knowledge, skills and professional attributes of a competent physical therapist.

Graduates of the School of Health Sciences Department of Physical Therapy must have the knowledge and skill to function in a broad variety of clinical environments and to render a wide spectrum of patient care. The Department of Physical Therapy acknowledges Section 504 of the Vocational Rehabilitation Act of 1973 and PL 101-336 of the Americans with Disabilities Act (ADA), but asserts that certain minimum technical standards must be present in prospective candidates for admission, progression and graduation.

Commitment to Seeking Reasonable Accommodations

Physical Therapy education requires not only the accumulation of scientific knowledge but the acquisition of skills, professional attributes and behaviors. Technical standards and Essential Requirements presented in this document are prerequisite, nonacademic requirements for admission, progression and graduation from the Quinnipiac University DPT program. Definitions of technical standards are an expectation for the accreditation of this program by the Commission on Accreditation in Physical Therapy Education (CAPTE). All required courses in the curriculum are designed to develop the essential functions necessary to become a competent physical therapist.

The Quinnipiac University DPT program is committed to the principles of equitable and accessible education and to providing reasonable accommodations to students with disabilities. The Department of Physical Therapy strives to provide reasonable accommodations for qualified individuals with disabilities who apply for admission and are enrolled as physical therapy students. Should, despite reasonable accommodation (whether the candidate chooses to use the accommodation or not), a candidate's existing or acquired disability(ies) interfere with patient or peer safety, or otherwise impede his/her ability to complete the Quinnipiac University DPT educational program and advance to graduation, the candidate may be denied admission or progression, or may be separated, or dismissed from the program.

Technical Standards and Essential Requirements

Cognitive/Reasoning Skills: Students must possess a range of cognitive and reasoning skills that allows them to master the broad and complex body of knowledge that comprises a physical therapy curriculum. Students must have the ability to follow course syllabi, assignments/exams, practicals and any other action plans developed by the faculty/program. They must exhibit the ability to develop problem-solving skills, and to make clinical decisions rapidly, under pressure, to set priorities and improvise in a timely manner consistent with professional practice. This includes the ability to analyze, integrate and synthesize objective and subjective data to make timely decisions that reflect consistent and thoughtful deliberation within best practice standards. Students must be able to demonstrate the ability to perform these cognitive skills efficiently, with flexibility, and while using appropriate clinical reasoning that is inherent to the needs in the clinical environment.

Examples of specific **cognitive/reasoning skills** include but are not limited to:

- Measure, calculate, reason, analyze and synthesize data related to patient examination, diagnosis and treatment of patients.
- Demonstrate sound judgement in patient assessment, diagnostic and therapeutic planning.
- Exercise proper awareness and complete responsibilities in a timely and accurate manner.
- Synthesize information, problem-solve and think critically to decide the most appropriate theory or assessment strategy.
- Identify and communicate when help is needed and make proper decisions regarding when a task should or should not be carried out alone.
- Interpret graphs and spatial relationships.

Communication Skills: Students must be able to communicate effectively and sensitively with patients and families as well as with faculty, preceptors, peers and members of the health care team within learning experiences. Effective communication includes verbal and non-verbal interactions, such as the interpretation of facial expressions, affect and body language. The student also must be able to receive, interpret and send written communications in a timely manner consistent with contemporary practice. Fluency in the English language is required at matriculation into the program, although applications from students with hearing and/or speech disabilities will receive full consideration. In such cases, the use of a trained intermediary or other communication aide may be appropriate. These intermediary functions only as an information conduit and does not serve in any interpretive capacity.

Examples of specific required **communication skills** include but are not limited to:

- Competence in writing, understanding, interpreting and speaking the English language.
- Efficient, effective, accurate and timely communication using a range of communication media as appropriate to the purpose and audience.
- Use of communication and sensory skills to convey information.
- Use of communication and sensory skills to accurately elicit information including a patient history and other information necessary to effectively evaluate a client or patient's condition.
- Accurate perception of nonverbal information and cues in interpersonal encounters.

Motor Skills: Students must possess sufficient fine and gross motor skills necessary such that they are able to obtain adequate information from a physical therapy exam and provide effective interventions to patients of all ages, sizes and gender. The student must demonstrate the physical ability to sufficiently move a patient and self around varying work environments, on various surfaces, and to and from different levels. Students must possess adequate motor ability to respond efficiently and effectively in emergency situations.

Examples of specific **motor skills** include but are not limited to:

- Use of a keyboard or equivalent device to record patient information.
- Assist a patient with safe floor <-> stand transfers.
- Enter small areas (e.g., bathroom, car) and assist patients with safe transfers.
- Provide manual resistance sufficient for a maximal manual muscle test of a large muscle group.
- Manage and manipulate limbs of all sizes to accurately assess joint mobility.
- Adapt manual inputs/contacts based on patient effort.
- Use of surgical instruments for activities such as anatomy dissections and wound debridement.
- Assist in performing a multi-person safe transfer of obese patients.
- Access transportation to and from clinical and didactic sites.
- Assume and maintain a variety of body postures (e.g., sitting, standing, walking, bending, squatting, kneeling, stair climbing, reaching forward or overhead, turning, moving the trunk and neck in all directions) to adequately perform patient examination and interventions.
- Balance self and provide support/balance to patients and equipment on a variety of surfaces including level and uneven ground, ramps, curbs and stairs.
- Maintain sufficient endurance to effectively manage patient care, for a minimum of 35 hours per week.

Observation: Observation requires the functional use of vision, hearing and somatic senses. Observation allows students to gather data to efficiently and effectively respond to patients and families as well as with faculty, preceptors and all members of the health care team and other learning experiences. Students must be able to observe lectures, laboratory demonstrations, in-class demonstrations and patients in the classroom and clinic.

Students must maintain sufficient **observation skills** to perform various parts of a physical therapy examination and interventions, including but not limited to:

- Palpation of peripheral pulses, bony landmarks and ligamentous structures.
- Visual and tactile evaluation of areas for inflammation or edema.
- Use of a stethoscope, sphygmomanometer and goniometer.
- Detect muscle activity sufficient to distinguish trace contractions.
- Hear medical alarms or patient vocalizations in case of an emergent situation.
- Monitor physiologic changes in patient status to adjust or discontinue treatment.
- Visually examine patient movement patterns and non-verbal expressions in order to adjust treatment.

- Assess environmental safety.
- Examine skin integrity and wounds.

Professional Ethics and Values: Students must be able to relate to patients, families and colleagues with honesty, integrity and dedication in a non-discriminatory manner. Students must demonstrate a manner consistent with sensitivity and respect for all social or cultural backgrounds. Students must conduct themselves appropriately in all academic and clinical interactions in classroom, clinic and community. They must have the ability to function and exhibit the American Physical Therapy Association Code of Ethics and Guide for Professional Conduct. Students must abide by all applicable Quinnipiac University policies. Background check policy requires students to comply with all applicable state and federal regulations as required by the State of Connecticut, the state in which they reside, and the state in which clinical work or fieldwork placements are located. Criminal histories may also prevent a student from taking the Federation of State Boards of Physical Therapy Exam (FSBPTE).

Students must demonstrate **professional ethics and values** including but not limited to:

- Establishing a rapport with patients, families, faculty and colleagues.
- Nurture mature, sensitive and effective relationships with patients, families, faculty and colleagues.
- Conflict resolution skills, including the ability to negotiate differing attitudes and opinions.
- Maintain a cooperative and professional manner.
- Manage stress effectively through self-care and by relying upon supportive relationships with colleagues, peers, mentors and others.
- Employ sound judgement.
- Arrive and being on time for professional commitments including class and clinical experiences.
- Abide by the appropriate dress code given the setting (academic and clinical).
- Manage and prioritize tasks to meet responsibilities.
- Seek assistance and guidance in a timely manner.
- Accept and respond appropriately to constructive feedback.
- Manage personal affairs in a manner that does not interfere with professional responsibilities.
- Adhere to the American Physical Therapy Association (APTA) Code of Ethics.
- Perform own work, give credit for other's ideas, and properly reference sources.
- Protect the confidentiality of patient information consistent with current applicable law and clinical site guidelines.
- Participate and perform in a manner consistent with real clinical practice guidelines during lab, practical, standardized or simulated experiences in order to learn and demonstrate curricular related knowledge.

Contact the Office of Student Accessibility for further information regarding reasonable accommodations in the didactic, laboratory, practical or clinical settings:

Phone number: 203-582-7600

The Commission on Accreditation in Physical Therapy Education (CAPTE) is an accrediting agency that is nationally recognized by the U.S. Department of Education (USDE) and the Council for Higher Education Accreditation (CHEA). CAPTE grants specialized accreditation status to qualified entry-level education programs for physical therapy. Accreditation is a process used in the U.S. to ensure the quality of the education that students receive. It is a voluntary, nongovernmental, peer-review process that occurs on a regular basis.

The Physical Therapy program at Quinnipiac University is accredited by CAPTE, 3030 Potomac Ave Suite 100, Alexandria, Virginia 22305-3085; telephone: 703-706-3245; email: accreditation@apta.org; website: [capteonline.org](http://www.capteonline.org) (<http://www.capteonline.org/>). If needing to contact the program/institution directly, please call 203-582-8212 or email Tracy.wall@qu.edu. The next accreditation visit will be in 2022.

Any concerns/ complaints about the program that fall outside the realm of due process, whether expressed by students or other stakeholders, are taken very seriously and acted upon in an expedient manner. Any individual who is unhappy with their experience or encounter with any student, faculty or staff member of the Department of Physical Therapy is encouraged to express that concern by filing a written complaint via email to the Department Chair (Ken Kosior (Ken.Kosior@quinnipiac.edu)) and/or Program Director (Tracy Wall (tracy.wall@qu.edu)).

Once a complaint has been made, the Department Chair and/or Program Director will gather information and address the complaint. When possible, the Chair and/or Program Director will discuss the complaint directly with the party or parties involved within 7 business days. The Chair and/or program will recommend a plan of action to reconcile/ remediate the complaint and present it to all parties with the goal of finding a reasonable resolution.

If the plan is accepted, the Chair and/or Program Director will monitor the plan for full resolution. A letter from the Chair and/or Program Director acknowledging the resolution of the complaint will be filed. Any complaint and documentation associated with the resolution of complaints which fall outside the realm of due process will be kept on file in the Chair and/or Program Director's files for a period of 5 years.

If dissatisfied with the action or decision made by the Chair and/or Program Director, or if the complaint is against the Chair and/or Program Director, the involved party may submit a written complaint or appeal to the Dean of the School of Health Sciences. A letter outlining the resolution by the Dean shall be filed with the complaint in the Department Chair's office for a period of 5 years.

If the complainant believes that additional review is necessary, then the last line of complaint is with the provost.

Outside of the institution, a complaint can also be filed against the program with the physical therapy accrediting body: Commission on Accreditation in Physical Therapy Education, American Physical Therapy Association, 1111 N. Fairfax Street, Alexandria, VA. 22314.

- PT 503L. Physical Therapy Process I Lab.** **2 Credits.**
This course introduces students to the theory and practice of foundational physical therapy skills, such as body mechanics, sensation, basic handling skills, measurement of vital signs, goniometry and muscle testing of the upper extremity, and therapeutic exercise. Students learn appropriate use of medical terminology and are introduced to taking a patient history and documentation.
Offered: Every year, Fall
- PT 504L. Physical Therapy Process II Lab.** **4 Credits.**
This course utilizes the Physical Therapist Patient/Client Management Model to build upon and integrate assessment skills developed in Physical Therapy Process I. Assessment techniques including neurologic examination, goniometry and manual muscle testing of the spine and the lower extremities are covered. Physical Therapy interventions including functional mobility training and therapeutic exercise prescription focusing on the lower extremities and complex multi-joint activities are introduced, and principles and methods of stretching are discussed.
Offered: Every year, Spring
- PT 505. Kinesiology I.** **2 Credits.**
This course introduces the basic principles of human movement. Forces and torques in static clinical free body diagrams are studied. Numerous problem-solving processes and skills are developed throughout the semester. The student learns to identify different muscle interactions and combinations. Students also study movement and movement patterns of the upper extremity, using an EMG recording system.
Prerequisites: Take MA 141.
Offered: Every year, Fall
- PT 505L. Kinesiology I Lab.** **1 Credit.**
Lab to accompany PT 505.
Offered: Every year, Fall
- PT 507. Kinesiology II.** **2 Credits.**
Kinesiology II introduces the foundational principles of biomechanics with special emphasis on applications to the lower extremities. The course emphasizes joint structure and function of the lower extremity as well as the spine. Forces and torques in static clinical free body diagrams are expanded and dynamic motion is studied. Students are taught hands-on clinical palpation techniques to enhance understanding of muscle function and joint mechanics.
Corequisites: Take PT 507L.
Offered: Every year, Spring
- PT 507L. Kinesiology II Lab.** **1 Credit.**
Lab to accompany PT 507.
Corequisites: Take PT 507.
Offered: Every year, Spring
- PT 509. Clinical Decision Making I.** **2 Credits.**
This course is designed to integrate information from previous academic and clinical experiences. The APTA model of physical therapist practice, evidence informed practice, and the ICF model provide foundational frameworks to guide clinical decision making. An interactive, case-based approach is used to develop problem solving, and reinforce the principles of documentation.
Offered: Every year, Spring
- PT 512. Human Anatomy I.** **3 Credits.**
This course presents the anatomical structures of the upper extremity, back, head and neck through lecture and human donor dissection experiences. Students analyze the relationship between structures, function and application to human movement. Clinical correlations between anatomy and pathology provide a foundation for clinical decision making. This course emphasizes collaboration in an active learning environment.
Prerequisites: Take BIO 211, BIO 212.
Offered: Every year, Fall
- PT 512L. Human Anatomy Lab.** **1 Credit.**
Lab to accompany PT 512.
Offered: Every year, Fall
- PT 513. Human Anatomy II.** **2 Credits.**
This course presents the anatomical structures of the pelvis, lower extremity and body cavities through lecture and human donor dissection experiences. Students analyze the relationship between structures, function and application to human movement. Clinical correlations between anatomy and pathology provide a foundation for clinical decision making. This course emphasizes collaboration in an active learning environment.
Prerequisites: Take PT 512.
Offered: Every year, Spring
- PT 513L. Human Anatomy II Lab.** **1 Credit.**
Lab to accompany PT 513.
Offered: Every year, Spring
- PT 516. Clinical Decision Making II.** **1 Credit.**
This case-based course provides students with an opportunity to integrate information from previous academic and clinical experiences. Using the ICF model, students reflect on in-class cases, standardized patient experiences and integrated clinical experiences to reinforce integration of multiple systems in a patient/client management model. These experiences and a cumulative practical assist students as they prepare for their first full-time clinical experience.
Offered: Every year, Summer
- PT 516L. Clinical Decision Making II Lab.** **0 Credits.**
Lab to accompany PT 516.
Corequisites: Take PT 516.
Offered: Every year, Summer
- PT 517. Clinical Education Seminar.** **1 Credit.**
This course provides the essential information for physical therapist students to enter full-time clinical experiences. The course informs students about expectations for clinical performance, compliance mandates for the clinical setting, communication strategies, and expectations for service at the clinical site. Students are introduced to concepts about cultural sensitivity and humility and strategies for success during clinical experiences.
Offered: Every year, Summer
- PT 518. Functional Neuroanatomy.** **3 Credits.**
This course presents the gross and developmental anatomy of the central nervous system, including major structures, landmarks and pathways. Normal motor control and postural control mechanisms are also explored. Emphasis is placed on the function of these structures with cases planned to illustrate the functional outcomes of pathology in these structures.
Offered: Every year, Fall

- PT 519. Professional Issues in Physical Therapy I. 2 Credits.**
This course introduces the learner to the evolution of the physical therapy profession. Students discuss the APTA Core Values and Code of Ethics and their plans to respond to them as a student and in practice. The roles of the physical therapist and physical therapist assistant are discussed to introduce students to interprofessional collaboration. Students begin to explore the importance of using frameworks, such as the ICF for patient/client management and the impact on patient care.
Offered: Every year, Fall
- PT 520. Pathophysiology I. 3 Credits.**
This course integrates material taught in the foundational courses with disease-specific content regarding the cardiovascular, pulmonary, gastrointestinal, hematological, hepatic and endocrine systems. Active learning strategies help students interpret relationships between pathophysiology and clinical presentation to make safe and effective clinical decisions within physical therapy examination and intervention strategies.
Offered: Every year, Summer
- PT 523. Applied Pharmacology I. 1 Credit.**
This course enables students to identify and discuss the impact of drug therapy on patients receiving physical therapy. Students integrate this information into patient/client management. Specifically, students look at medications utilized for cardiovascular, pulmonary disease processes and pain management.
Offered: Every year, Summer Online
- PT 528. Musculoskeletal I. 3 Credits.**
This course emphasizes integration of skills learned during foundational courses in the assessment and treatment of musculoskeletal diagnoses. The student will develop and utilize an evidence-informed approach to examine, evaluate and establish a plan of care for patients with various musculoskeletal conditions of the cervical spine and upper quadrant.
Offered: Every year, Spring
- PT 528L. Musculoskeletal I Lab. 1 Credit.**
Lab to accompany PT 528.
Corequisites: Take PT 528.
Offered: Every year, Spring
- PT 529. Musculoskeletal II. 3 Credits.**
This course continues to emphasize integration of skills learned during foundational courses in the assessment and treatment of musculoskeletal diagnoses. The student will develop and utilize an evidence-informed approach to examine, evaluate and establish a plan of care for patients with various musculoskeletal conditions of the lumbar spine and lower quadrant.
Offered: Every year, Summer
- PT 529L. Musculoskeletal II Lab. 1 Credit.**
Lab to accompany PT 529.
Corequisites: Take PT 529.
Offered: Every year, Summer
- PT 531. Acute Care and Cardiopulmonary Physical Therapy I. 3 Credits.**
This course provides the student with the foundational knowledge required for the management of patients with acute medical conditions with an emphasis on pulmonary, cardiac and dermatological pathologies. Integrating information from previous and concurrent coursework, students learn to examine and evaluate patients in the acute care setting, document findings and design a plan of care.
Offered: Every year, Summer
- PT 531L. Acute Care Cardiopulmonary Lab I. 1 Credit.**
Lab to accompany PT 531.
Corequisites: Take PT 531.
Offered: Every year, Summer
- PT 548L. Physical Agents Lab. 1 Credit.**
This course provides students with the foundational knowledge and skills to utilize therapeutic physical modalities of superficial and deep heat, cold, electrotherapy, and light to complement other therapeutic interventions to optimize patient outcomes. A case-based model is utilized to facilitate problem-solving, and integration of theory and evidence.
Offered: Every year, Spring
- PT 569. Education/Community Health/Wellness. 2 Credits.**
This course provides the students with the foundational knowledge of wellness, disease prevention and health promotion within a community setting. The social determinants of health and health literacy are explored, especially as they relate to the unique role of physical therapists in community practice. Students develop an appreciation for cultural diversity and its possible influence on health behaviors and health practice.
Offered: Every year, Fall
- PT 599. Independent Study. 1-3 Credits.**
Offered: As needed
- PT 626. Pathophysiology II. 3 Credits.**
This course builds on information taught in the foundational sciences and is designed to provide the physical therapy student with detailed information regarding the pathologies of the central nervous system and musculoskeletal systems. The course provides the basis for interpreting abnormalities and the impact to physical therapy. The students build a qualitative and quantitative understanding of the diseases and their effects on physical therapist examination and intervention strategies.
Offered: Every year, Spring
- PT 627. Applied Pharmacology II. 0-1 Credits.**
This course is a continuation of Pharmacology I to introduce the physical therapist student to the chemical agents that many patients are taking. This course allows the student to understand how drug therapy can affect patients receiving physical therapy and how physical therapy intervention strategies may need to be modified. Specific medications utilized in the treatment of cancer, neurologic conditions, endocrine dysfunction, antimicrobials and role of CAMs are covered.
Offered: Every year, Spring Online
- PT 628. Acute Care and Cardiopulmonary II. 2 Credits.**
This course integrates and builds upon knowledge acquired in the foundational curriculum to examine, evaluate and treat patients with cardiovascular and pulmonary dysfunction across the lifespan. Students prioritize examinations, select evidence-based interventions, manage lines and equipment and demonstrate competency. Medical history and hemodynamic status are interpreted to make clinical decisions for complex patients. Students explore the impact of systemic disease, endurance, medications, social support, age-appropriate care and interprofessional collaboration on patient outcomes.
Offered: Every year, Spring
- PT 628L. Acute Care and Cardiopulmonary II Lab. 1 Credit.**
Lab to accompany PT 628.
Offered: Every year, Spring

PT 652. Professional Issues in Physical Therapy II. 1 Credit.

Students explore and analyze current areas of growth and vision for the physical therapy profession. Topics include exploration of specialty areas within the physical therapy profession, population health, issues in social justice, and the legislative process within the APTA with emphasis on advocacy for patients and the profession.

Offered: Every year, Summer

PT 653. Neurorehabilitation I. 3 Credits.

This course presents a framework for integrating the assessment and treatment techniques appropriate for adults with various neurological conditions. Students learn assessment procedures based on evaluation of normal movement, abnormal movement and function. The course includes laboratory instruction where students develop comprehensive examination techniques, plan and prioritize appropriate goals and interventions, and hypothesize outcomes through case-based modeling and integrated clinical experiences.

Corequisites: Take PT 653L.

Offered: Every year, Spring

PT 653L. Neurorehabilitation I Lab. 1 Credit.

Lab to accompany PT 653.

Corequisites: Take PT 653.

Offered: Every year, Spring

PT 654. Neurorehabilitation II. 3 Credits.

This course is designed as a continuation of Neurorehabilitation I. Lecture and lab topics include continued framework development of evaluation and innovative treatment approaches for adults with various neurological conditions. Students are required to integrate and synthesize knowledge gained from current and previous coursework. During the lecture and lab, students continue to develop complex comprehensive evaluation techniques, plan appropriate treatments, and hypothesize outcomes through case-based modeling and integrated clinical experiences.

Corequisites: Take PT 654L.

Offered: Every year, Summer

PT 654L. Neurorehabilitation II Lab. 1 Credit.

Lab to accompany PT 654.

Corequisites: Take PT 654.

Offered: Every year, Summer

PT 657. Imaging for Physical Therapists. 2 Credits.

This course introduces the student to imaging principles and techniques as applied to musculoskeletal, neurologic and cardiovascular and pulmonary systems. The integration of imaging in terms of examination, evaluation and patient management is explored within the scope of practice. The course emphasizes radiographic anatomy, common normal variants and some pathological and traumatic conditions. In addition to standard radiographic techniques, other imaging and special techniques are discussed.

Offered: Every year, Fall

PT 658. Differential Diagnosis. 3 Credits.

This course integrates clinical experience with systems-based knowledge (musculoskeletal, cardiopulmonary, and neurologic) to develop a more complex framework for clinical decision making. Students develop methods of identifying signs and symptoms of diseases and differentiating patient presentations to render examination and referral judgments. Throughout the course, the student engages in clinical and didactic self-reflection to monitor and evaluate judgements based on patient interview and objective examination.

Offered: Every year, Spring

PT 661. Administration and Leadership in Physical Therapy. 3 Credits.

This course provides students with the theory, skills, and applications for physical therapy administration in various practice settings across the United States health care delivery system. Students explore leadership roles and responsibilities and the consultative model of physical therapy. A case-based model is utilized to facilitate problem-solving and synthesize knowledge to address contemporary health care issues.

Offered: Every year, Summer

PT 666. Capstone I. 2 Credits.

This is the first in a 3-course series culminating in an original project to be disseminated to peers, faculty, and clinical/community partners. Students work in small groups under the supervision of a capstone project capstone advisor in an area of Clinical Outcomes, Scholarship of Teaching and Learning, or Community, Health, & Social Responsibility. Students apply foundational information about the scientific process to identify the purpose and methods of the project and write a justification including review of the literature.

Offered: Every year, Spring

PT 668. Psychosocial Aspects of Physical Disability. 2 Credits.

This course presents students with the knowledge of psychosocial dimensions that influence recovery from a physical disability. Stages of adaptation, loss and grief, motivation, confidence, and motivational interviewing techniques are explored to provide person-centered interventions for positive patient outcomes. A case-based model is used to facilitate problem solving and synthesis knowledge of psychological disorders and mental health issues in order to modify a plan of care.

Offered: Every year, Summer

PT 671. Clinical Education Experience I. 4 Credits.

This clinical experience is designed to facilitate the development of skill in the examination, evaluation and treatment of inpatients or outpatients with a variety of musculoskeletal and/or general medical/surgical diagnoses. Students are expected to demonstrate appropriate professional behaviors and develop effective communication skills with patients/clients, families/caregivers, and health care professionals. Prerequisites include successful completion of 3 semesters of academic coursework. HIPAA and OSHA training and CPR certification are required.

Offered: Every year, Fall

PT 675. Normal/Abnormal Gait. 1 Credit.

This online course provides an overview of normal gait with an emphasis on kinematic and kinetic analysis of the gait cycle. Gait analysis techniques including motion analysis, dynamic electromyography, force plate recordings, and measurement of stride characteristics are presented. Physical therapy treatment approaches for patients with abnormal gait are introduced.

Offered: Every year, Summer

PT 675L. Gait Lab. 0 Credits.

Lab to accompany PT 675.

Corequisites: Take PT 675.

Offered: Every year, Summer

PT 676. Capstone II. 1 Credit.

This is the second in a 3-course series culminating in an original project to be disseminated to peers, faculty, and clinical/community partners. Students work in small groups under the supervision of a capstone project capstone advisor in an area of Clinical Outcomes, Scholarship of Teaching and Learning, or Community, Health, & Social Responsibility. Students apply the scientific process to implement the project, modify the project as necessary, and plan for dissemination of the outcome.

Offered: Every year, Summer

- PT 679. Clinical Decision Making III. 2 Credits.**
This case-based course provides students an opportunity to synthesize and integrate information from courses completed thus far in the DPT curriculum. Students reflect on in-class cases, as well as previous clinical experiences, to examine patient-centered care within the context of different health conditions and varied personal, environmental and participation factors.
Prerequisites: Successful completion of all previously sequenced coursework.
Offered: Every year, Summer
- PT 685. Evidence in Practice. 2 Credits.**
This course provides students with the foundational skills and knowledge needed to interpret, appraise, and integrate various types of primary and secondary research to inform physical therapy practice. Through completion of online modules, assignments, and discussion, students apply this information to make evidence-informed decisions to impact patient care.
Offered: Every year, Fall
- PT 730. Musculoskeletal III. 2 Credits.**
This course is designed as a continuation of musculoskeletal I and II. Lecture and lab topics include continued framework development of evaluation and contemporary treatment approaches including thrust manipulation for clients with various musculoskeletal conditions. Students are required to integrate and synthesize knowledge gained from current and previous coursework. During the lecture and lab, students continue to develop comprehensive examination techniques, implement appropriate interventions, and hypothesize outcomes through case-based modeling.
Offered: Every year, Fall
- PT 730L. Musculoskeletal III Lab. 1 Credit.**
Lab to accompany PT 730.
Offered: Every year, Fall
- PT 736. Pediatric Rehabilitation. 3 Credits.**
This course presents information needed for the physical therapy student to complete a thorough examination and evaluation of a child with neurological and/or orthopedic diagnoses. Upon completion of the examination, students are able to generate an accurate diagnosis, prognosis and an appropriate plan of care for these patients. Relevant theory and practical learning experiences are provided for the student to develop the knowledge and skills necessary for applying an evidence-based physical therapy intervention strategy for the physical therapy plan of care.
Offered: Every year, Fall
- PT 736L. Pediatric Rehabilitation Lab. 1 Credit.**
Lab to accompany PT 736.
Offered: Every year, Fall
- PT 744. Physical Therapy Skills Elective. 2 Credits.**
This course is a required therapy skills course in which students choose topics focusing on specific areas of concentration or advanced skill. All sections of the course use the essential elements of PT practice as an organizing framework and incorporate the review and practical application of recent literature. Students take two sections of electives.
Offered: Every year, Fall
- PT 759. PBL Advanced Clinical Decision-Making. 2-3 Credits.**
This course features problem-based learning activities and education theories to assist students in continuing to refine and employ their cognitive framework for Physical Therapy practice. The class includes integration and synthesis of client information from all areas of PT practice. Students analyze their clinical decision making within the context of case-based problem solving, evidence informed practice, and formulation of client-centered plans of care along the continuum of care.
Offered: Every year, Fall
- PT 767. Capstone III. 2 Credits.**
This is the third in a 3-course series culminating in an original project to be disseminated to peers, faculty, and clinical/community partners. Students work in small groups under the supervision of a capstone project capstone advisor in an area of Clinical Outcomes, Scholarship of Teaching and Learning, or Community, Health, & Social Responsibility. Students apply the scientific process to complete project and disseminate the outcome through a presentation and a written report.
Offered: Every year, Fall
- PT 769. Advanced Clinical Decision Making. 2 Credits.**
This course features problem-based learning activities and education theories to assist students in continuing to refine and employ their cognitive framework for Physical Therapy practice. The class includes integration and synthesis of client information from all areas of PT practice. Students analyze their clinical decision making within the context of case-based problem solving, evidence informed practice, and formulation of client-centered plans of care along the continuum of care.
Prerequisites: Successful completion of all previously sequenced coursework.
Offered: Every year, Fall
- PT 781. Clinical Education Experience II. 6 Credits.**
This clinical experience is designed to facilitate the development of skill in the evaluation and treatment of inpatients or outpatients with a variety of musculoskeletal, neuromuscular, and/or general medical/surgical diagnoses. Students are expected to demonstrate appropriate professional behaviors and develop effective communication skills with patients and health care professionals. Course Prerequisites include successful completion of all academic coursework and PT 671: Clinical Education Experience I. HIPAA and OSHA training and CPR certification are required.
Offered: Every year, Spring
- PT 782. Clinical Internship III. 6 Credits.**
This clinical experience is designed to facilitate the development of skill in the evaluation and treatment of inpatients or outpatients with a variety of musculoskeletal, neuromuscular, and/or general medical/surgical diagnoses. Students are expected to demonstrate appropriate professional behaviors and develop effective communication skills with patients and health care professionals. Course Prerequisites include successful completion of all academic coursework, PT 671: Clinical Education Experience I, and PT 781: Clinical Education Experience II. HIPAA and OSHA training and CPR certification are required.
Offered: Every year, Summer

Juris Doctor/Master of Social Work

Program Contacts: Carol R. Awasu (carol.awasu@quinnipiac.edu), 203-582-6433; and Carolyn Wilkes Kaas (carolyn.kaas@qu.edu), 203-582-3234

Students interested in earning both a JD and a Master of Social Work may earn both degrees on an accelerated basis by enrolling in the Dual-Degree JD/MSW program.

The two degree programs, if completed separately, require 146 credits – 86 for the JD and 60 for the MSW. Students in the dual-degree program are required to complete only 131 total credits.

Dual-degree students earn:

- The JD with 77 law credits and 9 social work credits (from courses approved in advance by the associate dean for academic affairs in the School of Law); and the
- MSW with 54 social work credits and 6 law credits (from courses approved by the director of the MSW program).

The two programs, which require five years of study if taken separately, can be completed in 4½ years or in 4 calendar years (if 11 law credits are earned during summer semesters).

Students must apply and be accepted separately to each program. Ideally, students would apply to both programs before starting either degree, but a student enrolled in either program could, during the first year (and possibly later), apply for and be accepted to the other program. Upon admission to the dual-degree program, the enrolled student must meet with the director of the MSW program and the law school associate dean for academic affairs.

Students may begin their study in either program but must complete the first year in each program before any advanced courses can be taken in that program. To obtain either degree, students must complete all graduation requirements for both degrees, including the core upper-level law courses, legal writing requirements, lawyer professional responsibility course, experiential law credits, and the social work fieldwork requirements.

Dual-Degree JD/MSW Program of Study

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Scheduling Options: Beginning with the MSW

MSW Generalist Curriculum (30 credits). Note: 3 of these credits also count toward the law degree.

Code	Title	Credits
First Year		
	Required JD First-Year Courses	30
Summer		
Students may earn course credit		

First Year: JD Required First-year Curriculum (30 credits).

Summer: Students may earn law credits during the first summer.

Second Year: MSW Generalist Curriculum (30 credits). Note: 3 of these credits will count toward the law degree.

Summer: Students may earn law credits during the second summer.

Third Year: JD Upper-level Curriculum, including all other graduation requirements (30 credits). Note: 6 of these credits will count toward the MSW.

Summer: Students may earn law credits during the third summer, if needed.

Fourth Year: MSW Specialized Curriculum (30 credits). Note: 6 of these credits will count toward the law.

Note: While it is possible to enroll for two years in one program and then two years in the other, an alternating schedule is recommended.

Admission to Dual-Degree JD/MSW Program

Students interested in earning both a JD and a Master of Social Work may earn both degrees on an accelerated basis by enrolling in the Dual-Degree JD/MSW program. Students must apply and be accepted separately to each program. Ideally, students would apply to both programs before starting either but a student enrolled in either program could, during the first year (and possibly later), apply for and be accepted to the other program.

To qualify for admission to the MSW program, students must have earned a bachelor's degree from a college or university accredited by a recognized regional accrediting association, with a preferred minimum GPA of 3.0 and at least 20 semester credits in liberal arts.

Background Check and Drug Screening

To ensure their safety and maintain high-quality care of patients, clinical affiliates of the university require that students have a criminal background check. All students entering the Quinnipiac JD/MSW program are required to undergo a criminal background check (through the university vendor) prior to beginning classes. This is a mandatory component of the program. In addition, MSW students may be required to undergo a criminal background re-check and/or drug screen prior to any of their field placements. The results are made available to the student through their own personal and secure online portal. Whenever a Quinnipiac JD/MSW student may need proof of his/her criminal background check for field placements, the student will release the

information directly from their personal portal to the clinical site. The cost of the criminal background check and any re-checks and/or drug screens is the responsibility of each individual student.

Additional Program Costs

As a clinical education program, the MSW program requires some expenses that go beyond standard university tuition and fees:

- a. **Clinical/Fieldwork Education Travel** (gas, parking, public transportation) – You are responsible for the costs associated with travel to and from field internships. Costs: variable.
- b. **Background Check:** Quinnipiac University and its clinical affiliates require that all students undergo a criminal background check, through the university vendor, prior to beginning classes (University Criminal Background Check Policy (<https://catalog.qu.edu/university-policies/background-checks/>)). Please note that placement sites may require that students participate in the agency's background check, in addition to the one required by the university.
 - i. University background check cost – \$63 for all domestic addresses for the past 7 years or \$158 for students who have resided in New York state in the last 7 years due to NY state surcharge.
 - ii. Some students may be required to do an annual recheck one year after the initial background recheck. Cost: \$32 per annual recheck.
- c. **Drug Screening:** Some sites require physical and/or substance use drug screens as well as fingerprinting. MSW students are expected to comply with all agency requirements prior to beginning field internships.
- d. **Liability Insurance:** All students have liability insurance coverage through the university, free of charge, while performing required clinical activity. Students may choose to purchase additional coverage at their own expense.
- e. **EXXAT and APPROVE:** Students enrolled in the MSW program must enroll in EXXAT and APPROVE.
 - i. EXXAT is the clinical tracking and assessment program used by the School of Health Sciences. Cost: one-time payment of \$150 per student enrolled in the MSW program (students are responsible for this cost).
 - ii. APPROVE is the program within EXXAT that tracks all student health and safety records, provides documentation to prospective clinical sites, and provides notification of impending expiration dates. Cost: \$35 - first year, after which it is \$10 per year.

Master of Science in Health Science

Program Contact: Thomas Martin (thomas.martin@qu.edu) 203-582-3368

The Master of Science in Health Science degree will acknowledge the accomplishments of graduate students in professional programs in the School of Health Sciences who are unable to complete the full program due to extenuating circumstances. Although this occurs rarely, on occasion, students are unable to pass components of their program, face personal or family health issues or are unable to pass licensing examinations, any of which would preclude them from completing their degree requirements and career path. A Master of Health Science in General Studies option will enable them to apply their earned credits to this degree and pursue alternative career pathways. Students will not be

able to apply directly into the Master of Health Science in General Studies program.

Master of Social Work

Program Contact: Carol R. Awasu (carol.awasu@qu.edu) 203-582-6433

The Master of Social Work program prepares students for achievement and leadership in the field of social work. The curricular approach of the MSW program is unique in that it directly engages students in interprofessional education and the health and mental health care team approach.

Quinnipiac's MSW program embraces the university's commitment to the development of professional expertise through practice experience. The two field placements offer students the opportunity to practice skills learned in the classroom in real-world settings. A seminar that supports the student in integrating academics and fieldwork is held monthly. Upon completion of the MSW degree, students will have at least 1,000 hours of professional preparation in the field.

The 60 credits required for the MSW degree include 30 credits in the generalist curriculum and 30 credits in the specialized practice curriculum. The degree can be completed full-time in four terms of study or through an extended plan over six or eight terms. Students with a BSW from a CSWE-accredited program may apply for Advanced Standing and complete 36 credits over one or two years.

The specialized practice curriculum has a concentration of health and mental health. An integrative seminar/capstone project is completed in the final semester of study and requires an integrative paper or research project. All MSW students are required to participate in interprofessional education activities offered by the Center for Interprofessional Healthcare Education. These requirements are embedded into practice courses in both the generalist and specialized years. The MSW program at Quinnipiac University does not give credit for life or work experience.

For those who have already earned a bachelor of social work, Quinnipiac offers an Advanced Standing Master of Social Work (p. 813) program.

Students entering Quinnipiac as undergraduates who are interested in the social work program have the option of pursuing a dual-degree bachelor's to master's program. There are two options: the Accelerated Dual-Degree BS in Health Science Studies/Master of Social Work (3+2) (p. 487) that begins with an undergraduate degree in Health Science Studies in the School of Health Sciences, or the Accelerated Dual-Degree Bachelor's/Master of Social Work (3+2) (p. 281) that begins with undergraduate study in the College of Arts and Sciences. Students who are interested in earning a JD and a Master of Social Work may earn both degrees on an accelerated basis by enrolling in the joint Dual-Degree JD/MSW program (p. 603). Please see the Admission (p. 812) tab for additional details.

The MSW degree also meets the academic requirements for licensure as a Licensed Clinical Social Worker (LCSW).

Traditional MSW Program of Study

Students can choose among three plans of study for the traditional MSW.

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Two-Year Full-Time MSW

Students in this plan of study enter the MSW program in the fall semester and complete the degree over four terms of study in two academic years. In addition to their classes, students are required to complete generalist and specialized practice field placements.

Student Learning Outcomes

Upon completion of the MSW program, students will demonstrate the following competencies:

- Demonstrate ethical and professional behavior.
- Engage diversity and difference in practice.
- Advance human rights and social, economic and environmental justice.
- Engage in practice-informed research and research-informed practice.
- Engage in policy practice.
- Engage with individuals, families, groups, organizations and communities.
- Assess individuals, families, groups, organizations and communities.
- Intervene with individuals, families, groups, organizations and communities.
- Evaluate practice with individuals, families, groups, organizations and communities.

Mission Statement

The mission of the Quinnipiac University MSW program is to prepare social workers for specialized practice in health and mental health through a curriculum that focuses on clinical and organizational practice, experiential learning, and interprofessional teamwork. Guided by respect for human dignity and a commitment to social justice, the MSW program uses a person-in-environment framework to ready students for professional practice in dynamic contexts.

MSW Program Values

The MSW program's core values reflect the NASW Code of Ethics for Social Workers: service, social justice, the dignity and worth of the person, the importance of human relationships, integrity and competence.

MSW Program Goals

The MSW program has the following five goals:

- Prepare students to be competent ethical social workers in a variety of health and mental health settings.
- Prepare students to engage in anti-racist and anti-oppressive clinical and organizational social work practice.
- Prepare students to advocate for equity and social justice at all levels of social work practice.
- Prepare students to integrate social work perspectives within interprofessional collaborations and across systems.
- Promote lifelong learning and professional development for students, alumni and social work colleagues.

Admission

To qualify for admission to the program, students must have earned a bachelor's degree from a college or university accredited by a recognized regional accrediting association, with a preferred minimum GPA of 3.0 and at least 20 semester credits in liberal arts. Students with a BSW from a CSWE-accredited program are encouraged to apply for Advanced Standing.

Dual-Degree JD/MSW

Students interested in earning both a JD and a Master of Social Work may earn both degrees on an accelerated basis by enrolling in the Dual-Degree JD/MSW program. Students must apply and be accepted separately to each program. Ideally, students would apply to both programs before starting either but a student enrolled in either program could, during the first year (and possibly later), apply for and be accepted to the other program.

For more information, see the Dual-Degree JD/MSW page (p. 603).

Background Check and Drug Screening

To ensure their safety and maintain high-quality care of patients, clinical affiliates of the university require students to have a criminal background check. All students entering the Quinnipiac MSW program are required to undergo a criminal background check (through the university vendor) prior to beginning classes. This is a mandatory component of the program. In addition, MSW students may be required to undergo a criminal background re-check and/or drug screen prior to any of their field placements. The results are made available to the student through their own personal and secure online portal. Whenever a Quinnipiac MSW student may need proof of his/her criminal background check for field placements, the student will release the information directly from their personal portal to the clinical site. The cost of the criminal background check and any re-checks and/or drug screens is the responsibility of each individual student.

Additional Program Costs

As a clinical education program, the MSW program requires some expenses that go beyond standard university tuition and fees:

- Clinical/Fieldwork Education Travel** (gas, parking, public transportation): Students are responsible for the costs associated with travel to and from field internships. **Cost: variable.**
- Background Check:** Quinnipiac University and its clinical affiliates require that all students undergo a criminal background check, through the university vendor, prior to beginning classes (University Criminal Background Check Policy (p. 78)). Please note that placement sites may require that students participate in the agency's background check, in addition to the one required by the university.
 - University background check – **Cost: \$63 for all domestic addresses for the past 7 years or \$158 for students who have resided in New York state in the last 7 years due to NY state surcharge.**
 - Some students may be required to do an annual recheck one year after the initial background recheck. **Cost: \$32 per annual recheck.**
- Drug Screening:** Some sites require physical and/or substance use drug screens as well as fingerprinting. MSW students are expected to comply with all agency requirements prior to beginning field internships.

- d. **Liability Insurance:** All students have liability insurance coverage through the university, free of charge, while performing required clinical activity. Students may choose to purchase additional coverage at their own expense.
- e. **EXXAT and APPROVE:** Students enrolled in the MSW program must enroll in EXXAT and APPROVE.
- EXXAT is the clinical tracking and assessment program used by the School of Health Sciences. **Cost: one-time payment of \$150 per student enrolled in the MSW program (students are responsible for this cost).**
 - APPROVE is the program within EXXAT that tracks all student health and safety records, provides documentation to prospective clinical sites, and provides notification of impending expiration dates. **Cost: \$35 - first year, after which it is \$10 per year.**

The MSW program is accredited by the Council on Social Work Education (CSWE).

The CSWE address is:

Council on Social Work Education

1701 Duke Street, Suite 200
Alexandria, VA 22314
Phone: 703-683-8080
Fax: 703-683-8099
Email: info@cswe.org

Website: CSWE.org (<http://www.cswe.org>)

All Council on Social Work Education programs measure and report student learning outcomes. Students are assessed on their mastery of the competencies that comprise the accreditation standards of the Council on Social Work Education. These competencies are dimensions of social work practice that all social workers are expected to master during their professional training. A measurement benchmark is set by the social work programs for each competency. An assessment score at or above that benchmark is considered by the program to represent mastery of that particular competency.

Please click Assessment of Student Learning Outcomes (https://www.qu.edu/49e624/globalassets/global/media/qu/documents/academics/school-of-health-sciences/programs/msw_epas_form.pdf) (PDF) for more information (last completed May 2021).

Advanced Standing Master of Social Work

Program Contact: Carol R. Awasu (carol.awasu@qu.edu) 203-582-6433

Quinnipiac's MSW Advanced Standing program is designed for those who have already completed a bachelor's degree in social work (BSW). To qualify, students must have a BSW conferred from a CSWE-accredited program prior to beginning the MSW Advanced Standing program in early July.

Students complete their first 6 credits in the intensive summer session. After successful completion of the summer session, students enter the specialized curriculum, where they complete 30 credits of coursework over two semesters, including 700 hours of field education (total of 36 credits). Students may complete this curriculum in one academic year by studying full time, or within 2 years if they choose to study part time. Students in both plans of study also are required to complete

30 hours with the Quinnipiac Center for Interprofessional Healthcare Education by the time they graduate.

Graduates from the MSW Advanced Standing program are eligible to sit for the LMSW license exam and are prepared for employment in a full range of clinical social work positions, including jobs in health and mental health care, substance abuse, aging services, child and family welfare and justice, and school social work.

Advanced Standing MSW Program of Study

Students can choose among two plans of study for the Advanced Standing MSW.

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Full-Time Advanced Standing

Students begin in the summer with two courses, then complete the specialized practice curriculum full time. In addition to their classes, students are required to complete a specialized practice field placement.

Course	Title	Credits
First Year		
Summer Semester		
SW 507	Issues of Diversity and Oppression	3
SW 580	Clinical Assessment and Diagnosis	3
Credits		6
Fall Semester

Total Credits		36

¹ Of the four elective courses, two must be clinical elective courses.

Student Learning Outcomes

Upon completion of the Advanced Standing MSW program, students will demonstrate the following competencies:

- Demonstrate ethical and professional behavior.
- Engage diversity and difference in practice.
- Advance human rights and social, economic and environmental justice.
- Engage in practice-informed research and research-informed practice.
- Engage in policy practice.
- Engage with individuals, families, groups, organizations and communities.
- Assess individuals, families, groups, organizations and communities.
- Intervene with individuals, families, groups, organizations and communities.
- Evaluate practice with individuals, families, groups, organizations and communities.

Mission Statement

The mission of the Quinnipiac University MSW program is to prepare social workers for specialized practice in health and mental health

through a curriculum that focuses on clinical and organizational practice, experiential learning, and interprofessional teamwork. Guided by respect for human dignity and a commitment to social justice, the MSW program uses a person-in-environment framework to ready students for professional practice in dynamic contexts.

MSW Program Values

The MSW program's core values reflect the NASW Code of Ethics for Social Workers: service, social justice, the dignity and worth of the person, the importance of human relationships, integrity and competence.

MSW Program Goals

The MSW program has the following five goals:

- Prepare students to be competent ethical social workers in a variety of health and mental health settings.
- Prepare students to engage in anti-racist and anti-oppressive clinical and organizational social work practice.
- Prepare students to advocate for equity and social justice at all levels of social work practice.
- Prepare students to integrate social work perspectives within interprofessional collaborations and across systems.
- Promote lifelong learning and professional development for students, alumni and social work colleagues.

Admission

To be eligible to apply for admission, applicants must have earned a BSW from a CSWE-accredited program prior to the beginning of the MSW Advanced Standing program in early July. All BSW courses must have grades of B or better.* Admission is selective and not guaranteed.

**Applicants to the advanced standing program may be admitted conditionally if their GPA or BSW course grades do not meet the required admission criteria. Such cases will be considered on an individual basis by the admissions committee. Students who are admitted conditionally must earn at least a 3.0 their first term to continue in the advanced standing program as a fully accepted student.*

Background Check and Drug Screening

To ensure their safety and maintain high-quality care of patients, clinical affiliates of the university require students to have a criminal background check. All students entering the Quinnipiac MSW program are required to undergo a criminal background check (through the university vendor) prior to beginning classes. This is a mandatory component of the program. In addition, MSW students may be required to undergo a criminal background re-check and/or drug screen prior to any of their field placements. The results are made available to the student through their own personal and secure online portal. Whenever a Quinnipiac MSW student may need proof of his/her criminal background check for field placements, the student will release the information directly from their personal portal to the clinical site. The cost of the criminal background check and any re-checks and/or drug screens is the responsibility of each individual student.

Additional Program Costs

As a clinical education program, the MSW program requires some expenses that go beyond standard university tuition and fees:

- a. **Clinical/Fieldwork Education Travel** (gas, parking, public transportation): You are responsible for the costs associated with travel to and from field internships. **Costs – variable.**
- b. **Background Check:** Quinnipiac University and its clinical affiliates require that all students undergo a criminal background check, through the university vendor, prior to beginning classes (University Criminal Background Check Policy (p. 78)). Please note that placement sites may require that students participate in the agency's background check, in addition to the one required by the university.
 - i. **University background check cost – \$63 for all domestic addresses for the past 7 years or \$158 for students who have resided in New York state in the last 7 years due to NY state surcharge.**
 - ii. Some students may be required to do an annual recheck one year after the initial background recheck. **Cost – \$32 per annual recheck.**
- c. **Drug Screening:** Some sites require physical and/or substance use drug screens as well as fingerprinting. MSW students are expected to comply with all agency requirements prior to beginning field internships.
- d. **Liability Insurance:** All students have liability insurance coverage through the university, free of charge, while performing required clinical activity. Students may choose to purchase additional coverage at their own expense.
- e. **EXXAT and APPROVE:** Students enrolled in the MSW program must enroll in EXXAT and APPROVE.
 - i. EXXAT is the clinical tracking and assessment program used by the School of Health Sciences. **Cost – one-time payment of \$150 per student enrolled in the MSW program (students are responsible for this cost).**
 - ii. APPROVE is the program within EXXAT that tracks all student health and safety records, provides documentation to prospective clinical sites, and provides notification of impending expiration dates. **Cost – \$35 - first year, after which it is \$10 per year.**

The MSW program is accredited by the Council on Social Work Education (CSWE).

The CSWE address is:

Pathologists' Assistant Program

Program Director: Robert Cottrell, PA(ASCP) (robert.cottrell@qu.edu) 203-582-8676

Clinical Coordinator: Jesse McCoy, PA(ASCP) (Jesse.McCoy@quinnipiac.edu) 203-582-7685

This program, leading to a Master of Health Science, trains qualified candidates to be pathologists' assistants. Upon successful completion of their training, graduates are employed by pathologists in hospital laboratories, private laboratories and medical research centers. Currently, there is a nationwide demand for pathologists' assistants. This demand results from the tremendous explosion in medical information and technology, the demand for new and more sophisticated pathological determinations and a national decline in the number of medical residents in pathology.

The program is a cooperative educational endeavor involving the following:

- Quinnipiac University, North Haven Campus, North Haven, Connecticut
- UC Davis Health, Sacramento, California
- Clinical Pathology Associates/Ascension Seton Family Health, Austin, Texas
- Health Network Laboratories, Allentown, Pennsylvania
- Northwell Health: North Shore University/Long Island Jewish Medical, Lake Success, New York
- CT Veterans Affairs Medical Center, West Haven, Connecticut
- Yale New Haven Hospital, New Haven, Connecticut
- Yale New Haven Hospital Saint Raphael Campus, New Haven, Connecticut
- Yale New Haven Hospital Bridgeport Campus, Bridgeport, Connecticut
- Yale New Haven Hospital Greenwich Campus, Greenwich, Connecticut
- Yale University School of Medicine, New Haven, Connecticut
- Nuvance Health, Norwalk Hospital, Norwalk, Connecticut
- Nuvance Health, Danbury Hospital, Danbury, Connecticut
- Nuvance - Vassar Brothers Medical Center, Poughkeepsie, New York
- Trinity Health - Saint Francis Hospital, Hartford, Connecticut
- CT State Medical Examiner Office, Farmington, Connecticut
- Hartford HealthCare - Hartford Hospital, Hartford, Connecticut
- Hartford HealthCare - St. Vincent's Hospital, Bridgeport, Connecticut
- Hartford HealthCare - The Hospital of Central Connecticut, New Britain, Connecticut
- Stamford Hospital, Stamford, Connecticut
- UCONN Health Hospital, Farmington, Connecticut
- Baylor College of Medicine, Ben Taub Hospital, Houston, Texas
- St. Luke's Health, Houston, Texas
- Brigham and Women's Hospital, Boston, Massachusetts
- Massachusetts General Hospital, Boston, Massachusetts
- UMass Memorial Health Alliance Clinton, Leominster, Massachusetts
- UMass Memorial Medical Center, Worcester, Massachusetts
- Boston Children's Hospital, Boston, Massachusetts
- Melrose/Wakefield Healthcare, Melrose, Massachusetts

- Saint Vincent Hospital, Worcester, Massachusetts
- Mayo Clinic, Rochester, Minnesota
- Mayo Clinic, Jacksonville, Florida
- UCLA Medical Center, Los Angeles, California
- Los Angeles County Medical Examiner-Coroner, Los Angeles, California
- Crouse Hospital, Syracuse, New York
- Denver Health, Denver, Colorado
- Memorial Sloan Kettering Cancer Center, New York, New York
- NYC Health: Harlem Hospital, New York, New York
- NYC Health: Bellevue Hospital, New York, New York
- AdventHealth Ocala, Florida
- Dartmouth-Hitchcock Medical Center, New Hampshire
- Garnet Health Medical Center, Middletown, New York
- St. George Regional Hospital, St. George, Utah
- NYU Langone Health—Long Island, Mineola, New York

The program consists of both classroom and clinical training. Quinnipiac University is a charter member of the Association of Pathologists' Assistant Training Programs, and its program meets criteria established by the American Association of Pathologists' Assistants (AAPA). This program is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

MHS Pathologists' Assistant Curriculum

Course	Title	Credits
First Year

Second Year

Summer Semester

12-month hospital-based clinical training session

PA 520	Autopsy Pathology I	6
PA 523	Surgical Pathology I	6
Credits		12

Fall Semester

PA 521	Autopsy Pathology II	6
PA 524	Surgical Pathology II	6
Credits		12

Spring Semester

PA 522	Autopsy Pathology III	6
PA 525	Surgical Pathology III	6
Credits		12
Total Credits		89

In addition to the college-based classroom coursework taken during the first year, the student is introduced and oriented to the pathologists' assistant profession by weekly attendance at clinical and gross conferences during their second year. This facilitates integration of the classroom coursework with intensive clinical training during the second year.

To continue in the pathologists' assistant program, students must maintain the minimum academic and clinical requirements for the program. Students must achieve the following requirements:

- Maintain an overall GPA of at least a 3.0 following the first didactic year.
- Maintain an overall GPA of at least a 3.0 during each semester of the clinical year.
- Successfully complete all clinical rotations.

Failure to meet any of these requirements may result in probation or dismissal from the program.

Student Learning Outcomes

Upon completion of the Pathologists' Assistant program, students will demonstrate the following competencies:

- Accountability:** Possess the emotional health and stability to deal with death, dead bodies, and body parts and exercise good judgment in a professional and caring way.
- Organizational Hierarchy:** Understand the operation and services provided by the anatomic pathology laboratories and develop skills for the operation and management of the autopsy suite and surgical cutting room.
- Teamwork:** Possess sufficient interpersonal skills to interact with both professional and hospital staff as well as university personnel in a diplomatic and team atmosphere approach.
- Problem-Solving:** Demonstrate comprehensive knowledge of scientific facts, principles and data that contribute to the practice and operation of a pathology laboratory.
- Clinical Reasoning:** Compare the structure and physiological functions of normal organs, tissues and cells to those of abnormal ones.
- Inclusivity:** Display core values of mutual respect, academic excellence, open inquiry, free expression and respect for diversity.

Mission Statement

The mission of Quinnipiac University's Pathologists' Assistant program is to prepare students with comprehensive knowledge in the practice and operation of an anatomic pathology laboratory. The program aims to maximize the students' technical proficiency and creative thinking by successfully integrating didactic biomedical knowledge with hospital-based training. The culmination of this type of training assures that the graduates of the program are able to carry out a myriad of functions critical in becoming a successful pathologists' assistant.

Program Goals

Through their graduate studies, Pathologists' Assistant students will be able to:

- Demonstrate problem-solving abilities and have the intellectual ability to learn, integrate, analyze and synthesize data.
- Create sufficient interpersonal skills to interact with both professional and hospital staff as well as university personnel in a diplomatic and team atmosphere approach.
- Identify and express good personal grooming habits including personal hygiene and selection of appropriate apparel to be in accordance with the stated university and hospital policies.
- Demonstrate comprehensive knowledge of scientific facts, principles and data that contribute to the practice and operation of a pathology laboratory.
- Practice performance-based education in order to assist the anatomic pathologist in the hospital or in other medical environments.
- Evaluate the structure and physiological functions of normal organs, tissues and cells to those of abnormal ones.
- Identify the characteristics of stains and the staining properties of normal and abnormal cells and their cellular constituents.
- Assist the pathologist who is determining the pathogenesis of disease by:
 - Properly collecting and handling specimens and keeping appropriate records using biomedical/photography techniques.
 - Submitting tissues and selecting the necessary and appropriate techniques for processing and proper staining procedures.
 - Practicing accurate gross descriptions and selective sectioning of surgical specimens following established protocols and procedures.
 - Evaluating histological slides for technical quality and collecting clinical information and laboratory data for final diagnosis by the pathologist.
 - Performing a postmortem examination and relate the clinical history to the results of the dissection.
- Identify and record anatomic and morphologic changes in relation to clinical manifestations and laboratory data for the pathologist's interpretation.
- Understand the operation and services provided by the anatomic pathology laboratories and develop skills for the operation and management of the autopsy suite and surgical cutting room.
- Interact with the pathologist by integrating didactic biomedical knowledge with practical hospital-based training.
- Integrate management training and experience to supervise and coordinate the work of other laboratory professionals.
- Recognize similarities and differences that one may encounter with coworkers, promoting a sense of inclusion in the workplace; embrace diversity practices that build a more improved healthcare team.

Admission

Students are admitted to the Pathologists' Assistant program on a rolling basis. Applications are accepted until September 1. Interviews are conducted during the summer, spring and fall semesters. The six-semester class cycle begins with summer semester I.

The most competitive applicants will ideally possess a minimum undergraduate cumulative GPA of 3.0. Interested candidates must hold a bachelor's degree from a regionally accredited institution in the United States or Canada and must possess, at a minimum, the following courses to be eligible to apply for admission:

- two semesters of basic biology (or equivalent)
- one semester of microbiology
- two semesters of anatomy and physiology
- two semesters of general chemistry
- one semester of organic chemistry or biochemistry (lab preferred)
- one semester of mathematics
- four semester courses in biology or chemistry, particularly courses in microbiology, physiology, anatomy and biochemistry.

All prerequisites must be completed at a regionally accredited institution in the United States or Canada. Due to COVID-19, the program will consider prerequisite courses that have been completed in its entirety online for all course offerings (lecture and lab) if completed at a regionally accredited institution in the United States or Canada. Hybrid courses are acceptable if they include an on-campus lab component.

Scores from the Graduate Record Examination are not required.

Applications may be obtained from the Office of Graduate Admissions. Applicants should refer to the Graduate Admission Requirements found in this Catalog. A detailed resume of personal, professional and educational achievements as well as two letters of reference, official transcripts and other supporting materials including copies of relevant professional licenses and/or certifications must be submitted with a student's application directly to the Office of Graduate Admissions.

Admission to the program is competitive. Personal interviews, required for admission, are offered to the most qualified individuals. A personal laptop computer is required.

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Background Check and Drug Screen

To ensure their safety and maintain high-quality care of patients, clinical affiliates of the university require students to have a criminal background check and drug screen. All students entering the Quinnipiac University Pathologists' Assistant program are required to undergo a criminal background check and drug screen (through the university vendor) prior to beginning the didactic portion of the first year. This is a mandatory component of the program. In addition, pathologists' assistant students may be required to undergo a criminal background re-check and/or a drug screen prior to any of their clinical rotations. The results are made available to the student through their own personal and secure online portal. Whenever a Quinnipiac University Pathologists' Assistant student may need proof of criminal background check for clinical rotations and/or to be eligible to sit for their ASCP certification exam, the student will release the information directly from their personal portal to the clinical

site. The cost of the criminal background check and any re-checks and/or drug screens is the responsibility of each individual student.

Additional Program Costs

As a clinical education program, the Pathologists' Assistant program requires some expenses that go beyond standard university tuition and fees:

- a. **Clinical/Fieldwork Education Travel** (gas, parking, public transportation) – Cost varies, and specific information and estimates are provided by the clinical site during on-boarding procedures. **Costs: variable and subject to change with minimal notice**
- b. **Immunizations** – Consistent with the School of Health Sciences policy, all students must have a full battery of immunizations and in some cases titer affirmation of immunity for common diseases including but not limited to: MMR, HepB, varicella, polio, TDAP, TB and influenza. These must be documented prior to the start of clinical experiences during the didactic first year phase and must be maintained through the entire second year clinical phase of education. **Costs: variable (please check with your insurance carrier)**
- c. **Background Check** – All students must undergo an initial background check prior to the start of first year didactic phase of education. Prior to the start of the second year clinical/fieldwork experience a new background check or re-check may be required.
 - i. Initial background check cost is \$63 for all domestic addresses for the past 7 years or \$158 for students who have resided in New York State in the last 7 years due to NY State surcharge.
 - ii. Some students may be required to do an annual recheck one-year after the initial background recheck. **Cost: \$32 per annual recheck**
- d. **Drug Screening** – Information provided during first year on-boarding prior to orientation and is mandatory for all incoming students. Additional screening may be required by specific clinical affiliates during the on-boarding process throughout the second year clinical phase. **Cost: \$42.25**
- e. **Liability Insurance** – All students have liability insurance coverage through the university, free of charge, while performing required clinical activity. Students may choose to purchase additional coverage at their own expense.
- f. **EXXAT and APPROVE** – FOR THOSE PROGRAMS USING EXXAT ONLY. Students enrolled in professional programs must enroll in EXXAT and APPROVE.
 - i. EXXAT is the clinical tracking and assessment program used by the School of Health Sciences. **Cost: one-time payment of \$150 per student for the current major (students are responsible for this cost)**
 - ii. APPROVE is the program within EXXAT that tracks all student health and safety records, provides documentation to prospective clinical sites, and provides notification of impending expiration dates. **Cost: \$35 for first year, \$10 per year thereafter**
- g. **Professional Association Membership** – Free student membership provided by the *American Society for Clinical Pathology* (ASCP) and the *American Association of Pathologists' Assistants* (AAPA) for all incoming students through the entire length of the program.
- h. **Certification examination costs** – **Costs: variable and subject to change with minimal notice. Information is given out by the ASCP during the second year clinical phase prior to registering for the certification exam.**

Accreditation

The program consists of both didactic classroom and clinical training. Quinnipiac University is in compliance and fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

The Pathologists' Assistant program is a member of the American Society of Clinical Laboratories (ASCP) and is a charter member of the Association of Pathologists' Assistant Training Programs established by the American Association of Pathologists' Assistants (AAPA).

naacls.org (<http://naacls.org>)

PA 502. Medical Terminology: Advanced.

2 Credits.

This course is intended for students enrolled in the pathologists' assistant program. Students study the etymology of medical and surgical terms with an emphasis on the principles of word analysis, construction and evolution. The course includes a review of anatomy and abstraction of current published case studies.

Offered: Every year, Summer

PA 506. Forensic Imaging.

2 Credits.

The course provides an introduction to the principles of diagnostic imaging and its applications in forensics. The advantages and disadvantages of various imaging modalities for the examination of specimens and cadavers are presented as well as radiation safety, x-ray and image production, types of recording media and radiographic exposure. Students will apply the concepts learned throughout the course to navigate and troubleshoot basic radiographic simulation scenarios.

Offered: Every year, Summer

PA 505. Forensic Pathology.

2 Credits.

This course introduces the principles of forensic pathology as it pertains to the scope of practice for a pathologists' assistant. Students will apply the concepts learned throughout the course to satisfy NAACLS accreditation standards in forensic pathology and to prepare the student for the ASCP certification/licensure examination upon graduation. This course will review specific types of circumstances in which a forensic autopsy provides the best opportunity for competent investigation.

Offered: Every year, Summer

PA 511. Human Microscopic Anatomy.

4 Credits.

This course is intended for students enrolled in the pathologists' assistant program. Human anatomy at the light microscopic level is explored through a general and systemic approach using a lecture-lab combination. Students are introduced to primary tissues and their cellular components followed by system (organ) investigation morphologically that uses the light microscope emphasizing pattern recognition as the mechanism employed for tissue identification.

Offered: Every year, Fall

PA 512. Human Anatomy.

4 Credits.

This course is intended for students enrolled in the pathologists' assistant program. This course covers dissection of the human body with particular attention to the morphological relationships of individual organ systems. Emphasis is placed on internal anatomy as a major facet of this instruction that is designed for eventual autopsy evisceration and subsequent dissection.

Offered: Every year, Summer

- PA 512L. Human Anatomy Lab.** **0 Credits.**
Lab to accompany PA 512.
Offered: Every year, Summer
- PA 513. Basic Human Pathology I.** **3 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. This series of lectures utilizes slides of gross and microscopic pathology starting with a general introduction to pathology covering inflammation and neoplasia, and then progressing to pathology by the systems such as cardiovascular, endocrine and gastrointestinal systems.
Offered: Every year, Fall
- PA 514. Basic Human Pathology II.** **3 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. This series of lectures utilizes slides of gross and microscopic pathology of specific areas of disease in a systemic approach including such specialty areas as dermatologic, perinatal, pediatric and forensic pathology as well as the genitourinary, musculoskeletal, respiratory and neuropathology systems.
Offered: Every year, Spring
- PA 515. Human Physiology.** **4 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. Various aspects of human physiology are examined, with emphasis on the physiologic and biochemical function. The fundamental functional principles for general and systematic organ systems are covered.
Offered: Every year, Summer
- PA 516. Clinical Pathology.** **4 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. Clinical relationships to disease are examined, highlighting such topics as hematology, chemistry, toxicology, serology, urinalysis, blood banking and cytology. Basic techniques and theoretical applications from a case history medical approach are emphasized.
Offered: Every year, Spring
- PA 517. Applied Anatomic Pathology.** **4 Credits.**
This course is intended for students enrolled in the pathologists' assistant program. Basic principles of clinical history taking, physical examinations and general medical terms and symbols are studied. Emphasis is on autopsy and surgical techniques of evisceration and organ system dissection through lectures, films, slides and practical exposure.
Offered: Every year, Spring
- PA 520. Autopsy Pathology I.** **6 Credits.**
This course is only for second-year pathologists' assistant students. This three-semester rotational, practical course on the techniques of autopsy dissection includes summarization of clinical histories and gross autopsy findings. The 12-month rotation involves several different hospitals in both community and university settings.
Offered: Every year, Summer
- PA 521. Autopsy Pathology II.** **6 Credits.**
This course is only for second-year pathologists' assistant students. This three-semester rotational, practical course on the techniques of autopsy dissection includes summarization of clinical histories and gross autopsy findings. The 12-month rotation involves several different hospitals in both community and university settings.
Offered: Every year, Fall
- PA 522. Autopsy Pathology III.** **6 Credits.**
This course is only for second-year pathologists' assistant students. This three-semester rotational, practical course on the techniques of autopsy dissection includes summarization of clinical histories and gross autopsy findings. The 12-month rotation involves several different hospitals in both community and university settings.
Offered: Every year, Spring
- PA 523. Surgical Pathology I.** **6 Credits.**
This course is only for second-year pathologists' assistant students. This is a three-semester inclusive practical course in methods of gross tissue description, dissection and preparation, fixation and storage of surgical specimens for light, immuno-fluorescent, immunochemical, frozen and electron microscopy. The 12-month rotation involves several different hospitals in both community and university settings.
Offered: Every year, Summer
- PA 524. Surgical Pathology II.** **6 Credits.**
This course is only for second-year pathologists' assistant students. This is a three-semester inclusive practical course in methods of gross tissue description, dissection and preparation, fixation and storage of surgical specimens for light, immuno-fluorescent, immunochemical, frozen and electron microscopy. The 12-month rotation involves several different hospitals in both community and university settings.
Offered: Every year, Fall
- PA 525. Surgical Pathology III.** **6 Credits.**
This course is only for second-year pathologists' assistant students. This three-semester inclusive practical course covers methods of gross tissue description, dissection and preparation, fixation and storage of surgical specimens for light, immuno-fluorescent, immunochemical, frozen and electron microscopy. The 12-month rotation involves several different hospitals in both community and university settings.
Offered: Every year, Spring
- PA 535. Disease Mechanisms.** **4 Credits.**
This course is only for second-year pathologists' assistant students. This course investigates how the normal physiology of the human body is altered in disease states. The mechanisms by which diseases become established, cause damage and alter organ system function are established. Natural body responses and therapeutic measures are examined for their mode of action, side effects and after affects.
Offered: Every year, Fall
- BMS 504. Quality and Safety in Healthcare Organization.** **3 Credits.**
This course will introduce students to the science of quality improvement, error reduction, and patient safety from the perspective of healthcare organizations. Medical errors, quality and safety initiatives, intervention strategies, and institutional challenges to improve patient care in the US healthcare systems will be discussed. Case-based studies will be used to cover complex topics in real-world settings. Students will earn a Basic Certificate in Quality and Safety through the Institute for Health Care Improvement.
Offered: Every year, Fall
- BMS 517. Human Embryology.** **3 Credits.**
This course considers the fundamental processes and mechanisms that characterize the embryological development of the human organism. Knowledge of the developing human serves as a basis for understanding normal relationships of body structures and causes of congenital malformation. Emphasis is on clinical as well as classical embryology.
Offered: Every year, Fall

BMS 332. Histology and Lab.**4 Credits.**

This course is intended for senior ELMPA students. It entails the microscopic and ultra-microscopic study of the structure of cells, tissues and organs, and emphasizes their functional mechanisms. Students learn how to prepare and stain normal tissue slides for histological and histochemical study, and how to examine these prepared slides.

Prerequisites: Take BIO 211, BIO 212, CHE 210, CHE 211.

Offered: Every year, Spring

BMS 532. Histology and Lab.**4 Credits.**

This course is intended for pathologists' assistant students with a background in basic descriptive microscopic anatomy. The lecture material includes the microscopic and ultramicroscopic structure of cells, tissues and organs with emphasis on biochemical composition and distribution as related to functional mechanisms. The laboratory work involves the preparation of microscope slides of normal vertebrate tissues, including those of humans, for histological and histochemical studies as the student may expect to encounter in the clinical laboratory.

Offered: Every year, Fall

BMS 535. Histochemistry and Lab.**3 Credits.**

This course is intended for pathologists' assistant students with a background in basic descriptive microscopic anatomy. The lecture material includes the microscopic and ultramicroscopic structure of cells, tissues and organs with emphasis on biochemical composition and distribution as related to functional mechanisms. The lab work involves the preparation of microscope slides of normal vertebrate tissues, including those of humans for histological and histochemical studies as the student may expect to encounter in the clinical laboratory.

Offered: Every year, Spring

BMS 572. Pathogenic Microbiology.**4 Credits.**

This graduate microbiology course involves the study of medically important microbes, with a particular emphasis on the pathology associated with human infection. Students examine the underlying principles of microbial pathogenesis, including elements of structural biology, epidemiology, immunology and pathology. They also survey microbial organisms that plague mankind today.

Offered: Every year, All

Physician Assistant Program

Program Contact: Timothy Ferrarotti (Timothy.Ferrarotti@quinnipiac.edu)
203 582-7782

The Physician Assistant program, which leads to a Master of Health Science, educates qualified individuals to be highly skilled licensed health care providers who practice team-based medicine in collaboration with physicians, in a number of health care facilities ranging from private practices to tertiary care hospitals. This program fosters the development of compassionate and professional health care providers who embody the competencies of the PA profession. These competencies include "the effective and appropriate application of medical knowledge, interpersonal and communication skills, patient care, professionalism, practice-based learning and improvement, systems-based learning as well as an unwavering commitment to continual learning, professional growth and the physician-PA team, for the benefit of patients and the larger community being served."¹

The vision of the Physician Assistant program at Quinnipiac University is to create a PA workforce that provides high-quality, affordable health care that is accessible to all people in all settings by fostering teamwork,

critical-thinking skills, high ethical standards and respect for diverse populations.

Quinnipiac is a member of the Physician Assistant Education Association (PAEA) and accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA).

¹ Competencies for the Physician Assistant Profession. National Commission on Certification of Physician Assistants (2012).

*The curriculum for the Physician Assistant program is subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

In addition to the intensive classroom study during the first year, students are introduced to the clinical application of their training by being paired with a licensed healthcare professional one half day a week. This is designed to facilitate application of the skills and knowledge acquired in the classroom setting to the care of the patient.

Requirements for Graduation

Upon successful completion of the 27-month Quinnipiac University Physician Assistant program, students are granted a Master of Health Science and a certificate of completion as a physician assistant. Students must meet **all** of the following requirements **in 27 months**:

- Satisfactory completion of the PA curriculum requirements (including academic, clinical, medical writing, clinical logging, professionalism and community service requirements).
- Satisfactory completion of the PA program core competencies and essential learning outcomes.
- Satisfactory completion of all PA course requirements.
- Satisfactory completion of the capstone comprehensive examination.
- A cumulative GPA of at least 3.0/4.0.

Student Learning Outcomes

Upon completion of the Physician Assistant program, students will demonstrate the following competencies:

- Medical Knowledge:** Demonstrate a knowledge of biomedical and clinical sciences and apply this knowledge to patient care in a variety of clinical setting as an entry-level practitioner.
- Interpersonal and Communication Skills:** Possess the ability to safely and effectively communicate with various populations, including but not limited to other healthcare providers, members of the healthcare team, patients and their families.
- Patient Care:** Be able to provide cost-effective, equitable, high-quality patient care in a variety of settings as an entry-level practitioner.
- Professionalism:** Demonstrate the attributes of a high-quality healthcare provider, and be able to apply an ethical framework in medical decision-making, practice evaluation, and their altruism to their profession, community and society.
- Practice-Based Learning and Improvement:** Be able to evaluate, assess and critically analyze their patient care practices.

- Systems-Based Practice:** Demonstrate an awareness and responsiveness to all aspects of the healthcare system.

Mission Statement

The mission of Quinnipiac University's Physician Assistant program is to increase access to quality health care through the education and development of caring, knowledgeable and competent physician assistants who are dedicated to:

- Clinical Competence—Developing highly qualified health care providers who demonstrate an investigative and analytic approach to clinical situations and provide care that is effective, safe, high quality and equitable.
- Professionalism—Providing care with respect, compassion and integrity with a commitment to excellence and ongoing professional development.
- Interprofessionalism—Preparing students for a team-based care system through interprofessional education.
- Leadership—Working effectively with health care professionals as a member or leader of a health care team or other professional/ community group. Mentoring and developing future leaders within the profession and the community.
- Community Outreach—Demonstrating responsibility and accountability to patients, society and the profession through active community involvement and volunteerism.
- Cultural Humility—A state of openness toward understanding and respecting important aspects of other people's cultural identities. This requires an awareness of one's personal and professional beliefs, biases, attitudes and actions that affect patient care and a commitment to ongoing professional development. (PAEA Core Competencies for New Physician Assistant Graduates, 2019 (<https://paeaonline.org/our-work/current-issues/core-competencies/>)).
- Diversity, Equity and Inclusion—Demonstrating awareness, acceptance and accountability in creating a diverse, inclusive, equitable and just community, built upon awareness, acceptance, respect and compassion toward others.

Vision

To create a PA workforce that provides high-quality, affordable health care that is accessible to all people in all settings by fostering teamwork, critical-thinking skills, high ethical and professional standards and respect for diverse populations.

Core Values

The PA program core values reflect a commitment to the ethical concepts that guide the PA profession. They stand as the program's pledge to the profession as well as the patients, families, and communities with which the PA students engage.

These core values include:

Excellence—A commitment to teaching excellence and championing quality, patient-centered, evidence-based health care in an innovative and supportive learning environment that fosters the student's personal effectiveness.

Accountability—Demonstrating responsibility to students, the University, patients, society and the PA profession utilizing a continuous process improvement system.

Integrity—Honesty and adherence to the highest standards of professional behavior and ethical conduct.

Teamwork and Collaboration—Building respectful partnerships within the University and the community to transform the health care system.

Advocacy and Equity—Seeking to eliminate disparities and barriers to effective, quality health care through patient advocacy and advocacy of the PA profession.

Intellectual Curiosity—Exhibiting self-reflection, intellectual curiosity and initiative, critical thinking and the enthusiastic pursuit of lifelong learning within a supportive environment that encourages research and scholarly work.

Admission

The Quinnipiac University Physician Assistant program believes that excellence is inclusive and built upon equity. We recognize that all members of society deserve the best healthcare possible and this is most effectively provided by a diverse healthcare team. The program is committed to admitting qualified individuals from a variety of backgrounds and experiences. The program selects students who reflect varied social, economic, ethnic, educational and healthcare experience backgrounds. The program seeks students who possess intellectual capacity, personal maturity, communication and interpersonal skills.

Interested students must possess, at a minimum:

- A bachelor's degree from a regionally accredited institution in the United States or a nationally recognized institution
- An overall GPA of at least 3.20 (includes all undergraduate and graduate coursework)
- An overall science GPA of at least 3.20 (includes all undergraduate and graduate science coursework)
- A combined GPA of at least 3.20 on the following required prerequisites:
 - Four semesters of courses in biology (credits must be in mammalian or human biology), including one semester of microbiology and two semesters of human anatomy and physiology. All of these courses must include labs.
 - Three semesters of courses in chemistry with labs, including one semester of organic chemistry (with lab) or biochemistry
 - One semester of pre-calculus, calculus or statistics
 - All prerequisites must be completed at a regionally accredited institution in the United States or nationally recognized institution in Canada within ten years of the date of application
 - Prerequisite labs must be completed through an on-campus course (not online)
 - COVID exception (Prerequisite labs that were changed to an online format and completed between the start of Spring 2020 and the end of Fall 2021 as a result of the COVID-19 pandemic will be accepted. Online labs prior to Spring 2020 or after Fall 2021 will not be accepted.)
- All academic requirements must be completed prior to September 1 of the year of application
- A minimum of 2,000 hours of direct patient care experience in the U.S. healthcare system. The program values the exposure of direct, patient-facing, hands-on healthcare careers rather than those that lack physical contact with patients. Examples of hands-on experiences that we consider toward the minimum 2,000 hours include: EMT/paramedic, certified nurse's aide, medical

assistant, patient care assistant, orthopedic technician, athletic trainer, radiology technologist, respiratory therapist, registered/licensed practical nurse, licensed clinical social worker, surgical technician, pharmacy technician, military medic, physical therapist, and occupational therapist. Examples of experiences that we do not recognize toward this include: lab technician, patient transport technician, massage therapist, personal trainer, medical secretary, life coach, lifeguard, and patient sitter. Scribe or clinical research coordinator positions that offer a majority of hands-on patient activities, like those assigned to a medical assistant, do count; scribe and coordinator positions only permitting observation and record-keeping do not.

- Scores from the Altus Suite Situational Judgement Test (Casper and Snapshot Physician Assistant) <https://takealtus.com/casper/>
- Scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) if the applicant received a bachelor's degree from a non-English speaking country
- Scores from Graduate Record Examination are not required

The Physician Assistant program is a full-time program. There is no part-time status. The program does not accept: transfer credits, advanced placement to the program, applications for challenge examinations and/or credits for experiential learning. The program does not accept graduates of foreign medical school or domestic medical school programs.

Admission to the program is highly competitive. Applicants not meeting the above requirements are not considered. Candidates are evaluated for the following factors: overall GPA, science GPA, prerequisite GPA, academic load, timing of prerequisites, direct patient care experience, PA shadowing, community service involvement, leadership activities, quality of narratives, letters of reference, performance on the Casper and Snapshot Physician Assistant assessments, evidence of professional memberships and history of scholarly (published) activity. In an attempt to matriculate a diverse class of students, we do give additional consideration to applicants who identify as male, first-generation college student, underrepresented minority, LGBTQIA+, as well as military veteran or reservist. Utilizing this combination of factors, we determine the most qualified individuals to offer personal interviews to (required for admission). Following the interviews, the most qualified applicants based on this holistic evaluation are offered admission.

Quinnipiac University has a designated undergraduate feeder program for the Master of Health Science Physician Assistant program, known as the Entry-Level Master's Physician Assistant program (ELMPA) (p. 565). Students who have successfully completed all requirements of the ELMPA program will be granted admission to the Master of Health Science Physician Assistant program. Our program has 54 spots available each year and a percentage of those spots are reserved for ELMPA program graduates.

The Quinnipiac Physician Assistant program participates in the Central Application Service for Physician Assistants (CASPA). Go to caspa.liasoncas.com (<https://caspa.liasoncas.com/>) for more information regarding the application process and fees. All applications, transcripts, references and other supporting materials are submitted directly to CASPA. Go to <https://takealtus.com/casper/> to complete the Altus Suite Situational Judgement Test (Casper and Snapshot Physician Assistant). **Note that these tests are offered only on certain dates and it is the applicant's responsibility to ensure the tests are completed prior**

to the application deadline. Applicants may contact Altus, CASPA or the Office of Graduate Admissions for more information.

PA Program Technical Standards

The Physician Assistant program is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. The PA certificate/master of health science degree signifies that the holder is prepared for entry into the practice of medicine. It follows that the graduate PA student must have the skills and knowledge to function in a broad variety of clinical situations and to render a wide spectrum of patient care. The technical standards set forth by the physician assistant program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills and competencies of the physician assistant profession as well as to meet the expectations of the program's accrediting agency:

Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA)

3325 Paddocks Parkway, Suite 345
Suwanee, Georgia 30024
Phone: 770-476-1224
Fax: 470-253-8271

All students entering the graduate Physician Assistant program at Quinnipiac University must be able to meet the established abilities and expectations of the PA program technical standards. Students must possess ability, aptitude and skills in the following areas: observation, communication, motor, intellectual-conceptual-integrative, behavioral, social and physical. PA students must be able to meet the requirements and worker attributes of a physician assistant as defined by the Bureau of Labor and Statistics, U.S. Department of Labor/Employment and Training Administration's Occupational Information network (O*NET) Handbook. In the event a student is unable to fulfill these technical standards, he/she/they will not be admitted or may be dismissed from the program.

Students matriculating into the PA program are required to verify they understand and meet the technical standards. Verification of understanding includes the student reading, thoroughly reviewing with their medical provider, signing and returning a copy of the Technical Standards Agreement to the program prior to arrival on campus in the summer semester.

A listing of the technical standards for the PA program can be found on the program's website (<https://www.qu.edu/schools/health-sciences/programs/mhs-physician-assistant.html>). Both the student and medical provider must sign the document and return it to the PA program prior to the start of class.

Background Check and Drug Screen

To ensure their safety and maintain high quality care of patients, clinical affiliates of the university require students to have a criminal background check. All students entering the Quinnipiac University PA program are required to undergo a criminal background check (through the university vendor) prior to beginning classes and prior to beginning the clinical year. Students are required to obtain a drug screen prior to entry into the pre-clinical experience and again prior to the clinical phase. These are mandatory components of the program. In addition, PA students may be required to undergo a criminal background re-check and/or a drug screen prior to any of their clinical rotations. The results are made available to the student through their own personal and secure online

portal. Whenever a Quinnipiac PA student may need proof of criminal background check for pre-clinical clerkships or clinical rotations, the student will release the information directly from their personal portal to the clinical site. The cost of the criminal background check and any re-checks and/or drug screens is the responsibility of each individual student.

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Additional Program Costs

The Physician Assistant program requires some expenses that go beyond standard university tuition and fees. Most of these costs can be included in your financial aid requests and awards. Some of these costs include:

- a. **Clinical Education Travel** (gas, parking, public transportation) – Costs for transportation, vehicle maintenance, parking, travel and housing are the responsibility of the student. **Costs: variable**
- b. **Immunizations** – Consistent with the School of Health Sciences policy, all students must have a full battery of immunizations and in some cases titer affirmation of immunity for common diseases including but not limited to: COVID-19, MMR, HepB, varicella, polio, TDAP, and influenza. TB testing is required. These must be documented prior to matriculation into the program. **Costs: variable (please check with your insurance carrier)**
- c. **Background Check** – All students must undergo an initial background check prior to entry into the program and a recheck prior to the start of clinical rotations, and periodically thereafter at the request of clinical sites during the clinical phase of the graduate program.
 - Initial background check cost is \$63 for all domestic addresses for the past seven years or \$158 for students who have resided in New York State in the last seven years due to NY state surcharge.
 - After the initial background check, the cost for each recheck required is \$32.
- d. **Drug Screening** – Students are required to obtain a drug screen prior to entry into the pre-clinical experience, clinical phase, and periodically thereafter at the request of clinical sites, during the graduate program. **Cost: \$42.25**
- e. **Liability Insurance** – All students have liability insurance coverage through the university, free of charge, while performing required clinical activity. Students may choose to purchase additional coverage at their own expense.
- f. **EXXAT and APPROVE** – Students enrolled in the Physician Assistant programs (ELMPA and graduate) must enroll in EXXAT and APPROVE. Please note that EXXAT database is different for each program. Students who matriculate from the ELMPA program into the graduate program will be required to sign up and pay for the graduate EXXAT program upon entry to the graduate program.
 - EXXAT is the clinical tracking and assessment program used by the School of Health Sciences. **Cost: one-time payment of \$150 per student for the current major (students are responsible for this cost)**
 - APPROVE is the program within EXXAT that tracks all student health and safety records, provides documentation to prospective clinical sites, and provides notification of impending expiration dates. **Cost: \$35 for first year, \$10 per year thereafter**
- g. **Professional Association Membership** – All students are required to maintain active memberships in the Connecticut Academy of Physician Assistants (ConnAPA), and The American Academy of

Physician Assistants (AAPA) while enrolled in the program. The cost for membership is the responsibility of the student.

- h. **Certification Examination Costs** – Upon successful the completion of the program (after graduation), students will be eligible to register for the Physician Assistant National Certifying Exam (PANCE), administered through the National Commission on Certification of Physician Assistants (NCCPA). Students may register for this during the final months of the program and are responsible for the registration fees associated with the exam.
- i. **Other Costs** – There are other costs associated with the Graduate PA program. Information regarding additional costs can be found on the program's website (<https://www.qu.edu/schools/health-sciences/programs/masters-degree/physician-assistant/tuition-and-financial-aid/?tab=indirect-costs>).

Accreditation

The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted Accreditation-Continued status to the Physician Assistant program sponsored by Quinnipiac University. Accreditation-Continued is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA standards.

Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the standards. The approximate date for the next validation review of the program by the ARC-PA will be September 2023. The review date is contingent upon continued compliance with the accreditation standards and ARC-PA policy.

Accreditation Review Commission on Education for the Physician Assistant, Inc. ([arc-pa.org](http://www.arc-pa.org) (<http://www.arc-pa.org>))

Radiologist Assistant Program

Program Contact: T (John.Candler@quinnipiac.edu)ania Grgurich (Tania.Grgurich@qu.edu) 203-582-3813

The Radiologist Assistant pathway was developed by the American College of Radiology and the American Society of Radiologic Technologists to meet the increasing demands of imaging technology. Radiologist assistants function as physician extenders whose focus is strictly within the radiology department. They provide expanded patient management, perform complex procedures and conduct research and teaching. One of the radiologist assistant's most important functions is providing direct patient care including preprocedure consultations and procedure preparation. In clinical practice, the radiologist assistant works under the supervision of a board-certified radiologist. The Radiologist Assistant program at Quinnipiac University is formally recognized by the American Registry of Radiologic Technologists.

Clinical Experiences

Clinical experiences enable students to apply the knowledge learned in the first two semesters of the program. In total, the program requires approximately 2,100 hours of clinical experience. Quinnipiac provides all clinical placements and clinical preceptors throughout the program. Clinical placements include sites in Massachusetts and New York.

Students are responsible for travel, housing and all other expenses related to clinical rotations.

Student Learning Outcomes

Upon completion of the Radiologist Assistant program, students will demonstrate the following competencies:

- Integrate** professional, ethical and legal standards and interdisciplinary collaboration into radiologist assistant practice.
- Integrate** effective written, oral and nonverbal communication skills into radiologist assistant practice.

- c. **Utilize Information Technology and Informatics** to communicate, manage knowledge, mitigate error and support clinical decision-making in radiologist assistant practice.
- d. **Synthesize** clinical data and scientific evidence, apply appropriate modalities, evaluate findings and make recommendations within the scope of radiologist assistant practice.
- e. **Provide** patient-centered care.
- f. **Assume a Leadership Role** in applying quality-improvement methods.

grants initial recognition for up to three years and continuing recognition for up to five years per reapplication.

Mission Statement

The Quinnipiac University Master of Health Science in Radiologist Assistant program is designed to prepare advanced practitioners in the field of radiology. The mission of the program is to develop students' technical professional and interpersonal communication skills through a logical and organized sequence of didactic, laboratory and clinical experiences. The program offers multiple clinical assignments to provide maximum exposure to diversified radiographic and interventional procedures and imaging protocols. In addition, the program prepares skilled graduates who are competent in the art and science of radiography, fluoroscopy and interventional procedures. Graduates of the radiologist assistant program are prepared for career entry and are capable of meeting the needs of the community for highly qualified professionals.

Admission to the Program

Candidates applying for admission to the Master of Health Science in Radiologist Assistant program are required to be a radiologic technologist in good standing with the American Registry of Radiologic Technologists. They must have a bachelor's degree, documented evidence of at least 2,000 hours of direct patient care contact post-radiography certification, certification in CPR for Healthcare Professionals and have completed the following prerequisite course requirements:

Code	Title	Credits
	Chemistry	4
	College-level mathematics	3
	Biology with labs, including anatomy and physiology	16
	Pathophysiology	3
Total Credits		26

The curriculum for the professional courses in the program are subject to modification as deemed necessary to maintain a high-quality educational experience and keep current with best practices in the profession.

Accreditation

The Radiologist Assistant program is formally recognized by the American Registry of Radiologic Technologists (ARRT). The ARRT recently extended the recognition period for the Radiologist Assistant educational program at Quinnipiac University for a period of five years, extending through July 31, 2022. The program has submitted documentation to AART for continued recognition and is anticipating a response by August 2022. Students who graduate from the program will meet ARRT's educational eligibility requirement for certification and registration as Registered Radiologist Assistants. To obtain or maintain ARRT recognition, educational programs must meet criteria including accreditation, clinical education and preceptorship requirements. ARRT

SCHOOL OF LAW

The School of Law combines rigorous academics, personalized attention, and a practice-focused curriculum to enable every student to develop the core legal skills that are fundamental to a successful and rewarding legal career. The law school has several legal clinics and numerous externship opportunities through which students acquire client-based legal experience and do pro bono work in the community, supervised by practicing attorneys. Students can further refine their critical problem-solving skills in more than a dozen classroom-based simulation courses.

The School of Law offers full-time, part-time, and flex-time programs leading to the JD degree, as well as joint JD/MBA, JD/MSW, and JD/MELP (Master of Environmental Law and Policy) degrees. Students may also choose to concentrate in one or more of several subject matter areas: Civil Advocacy and Dispute Resolution, Criminal Law and Advocacy, Family Law, Health Law, Intellectual Property, International Law and Policy, Tax Law, Workplace Law, and Privacy, Cybersecurity, and Information Technology Law.

The student experience at the School of Law is enhanced through many other activities, including three student-edited scholarly journals – the Law Review, the Health Law Journal, and the Probate Law Journal; intramural and interschool competitions sponsored by the Moot Court Society, the Mock Trial Society, and the Society for Dispute Resolution; and a range of student organizations, including affinity bar organizations such as the Black Law Students Association, the Women’s Law Society, the Latin American Law Association, and Outlaws, our LGBTQA organization. The law school’s International Human Rights Law Society travels each year and a course in International Human Rights and Transitional Justice gives students the opportunity to make presentations at the annual Summit of Nobel Peace Laureates.

Quinnipiac’s Accelerated Dual-Degree Bachelor’s/JD (3+3) program offers qualified freshmen and sophomores the opportunity to complete both their BA or BS degree and the JD degree in six years instead of seven. Visit the Pre-Law (p. 46) section of this Catalog for program details.

Nondiscrimination

Quinnipiac University School of Law admits students of any race, color, religion, national origin, sex, gender (including identity and expression), sexual orientation, age or disability to all the rights, privileges, programs and activities generally accorded or made available to students at the school. It does not discriminate on the basis of race, color, religion, national origin, sex, gender (including identity and expression), sexual orientation, age or disability in administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other school-administered programs. Quinnipiac University School of Law is committed to equal educational opportunity and full participation for persons with qualified disabilities. No qualified person will be excluded from participation in any university program or be subject to any form of discrimination.

Mission Statement

At Quinnipiac University School of Law, we seek to imbue our students with the knowledge, skills and attitudes necessary for competent and ethical service in the legal profession. Accordingly, we strive – through rigorous classroom instruction and practical training in lawyering skills – to educate attorneys who prepare carefully, think independently and creatively, reason critically, act with compassion and respect for others, and express themselves cogently, both orally and in writing. We also

strive to inspire our students to embrace the professional ethic of service and to appreciate the value of “practical wisdom.” To this end, we work with our students to help them develop sound judgment and personal approaches that will help them to succeed in a changing world and to serve effectively as advocates, problem-solvers and counselors. We also demonstrate our own commitment to professionalism and to the advancement of knowledge and justice, by engaging in scholarship that facilitates the understanding and just solution of complex problems and by providing service to governmental and public interest agencies and to the community at large. In addition, recognizing the important pedagogical benefits realized when an educational community is meaningfully diverse – and conscious of the role that law schools must play in helping diversify the legal profession – we strive to maintain meaningful diversity in our student body and in our faculty and staff.

Right to Modify

This Catalog is intended to serve as a convenient reference source for students. It is not guaranteed to be free from errors. Moreover, the programs, policies and courses described here are subject to continual review and reevaluation and may be changed at any time without prior notice. The School of Law reserves the right to modify the academic requirements, admission requirements and program of study; to change the arrangement and content of courses, the instructional material and the tuition and fees; to alter any regulation affecting students; to refuse readmission at any time; or to dismiss any student at any time, should it appear to be in the best interest of the school or student to do so. The School of Law also reserves the right to change the semester schedule and examination times and locations. Nothing in this Catalog should be regarded as setting terms of a contract between a student or prospective student and Quinnipiac University or its School of Law.

Admission to the Bar

Bar Examination

Some states require registration with their State Board of Law Examiners at the start of law studies for students who expect to take the bar examination upon graduation. Applicants are urged to consult the regulations of the Board of Law Examiners in the states where they expect to practice. The State of Connecticut does not require such registration. Students are also urged to check each state bar’s school credit and residency requirements, including possible limits on non-classroom credits, for bar certification in each state where they expect to take the bar examination. For students planning to sit for the New York Bar, we call attention to that state’s extensive experiential education requirement, which is more demanding than the requirement established by the ABA and Quinnipiac Law School. This New York requirement is set forth in Appendix A to this Catalog.

Character and Fitness for Admission to the Bar

It is extremely important for students to determine the applicable character, fitness, and other qualifications of the bar admission authorities in the state(s) in which he or she intends to practice. In particular, any student who has been subjected to disciplinary action by an educational institution, who has incurred a judgment of civil liability, or who has been charged with or convicted of a criminal offense is strongly encouraged to check with the bar admission authority in the jurisdiction(s) in which he or she intends to practice to determine the effect of such action on the person’s admissibility to the bar.

School of Law Academic Calendar

2022–23 Academic Calendar

Summer 2022

May 9	Monday	First day of classes
June 20	Monday	Juneteenth observed; no classes
June 24	Friday	Classes meet on a Monday schedule; last day of classes; last day to withdraw from courses.
June 28–30	Tues–Thurs	Examination period

Fall 2022

August 19–20	Fri–Sat	First-Year Orientation
August 22	Monday	1L classes begin
August 22	Monday	Business Literacy Bootcamp (for 2Ls)
August 24	Wednesday	Upper-level classes begin
August 30	Tuesday	Last day to add/drop classes
September 5	Monday	Labor Day—university holiday; no classes
October 5	Wednesday	Yom Kippur—university holiday; no classes
November 22	Tuesday	Classes meet on a Wednesday schedule
November 23–27	Wed–Sun	Thanksgiving Recess
December 2	Friday	Last day of 1L classes; last day for 1Ls to withdraw from courses
December 6	Tuesday	Last day of upper-level classes; last day for upper-level students to withdraw from courses

December 7	Wednesday	Class makeup day
December 8–20	Thursday–Tuesday	Examination period
December 21	Wednesday	Exam makeup day for weather-related postponements; last day for graduating students to complete coursework
December 22–January 8	Thursday–Sunday	Holiday Recess

Spring 2023

January 9	Monday	Upper-level classes begin
January 9–10	Mon–Tues	Gateway to Practice Program (for 1Ls)
January 11	Wednesday	1L classes begin
January 13	Friday	Last day to add/drop classes
January 16	Monday	Martin Luther King Jr. Day—university holiday; no classes
March 13–17	Mon–Fri	Spring Recess
April 7	Friday	Good Friday—no classes
April 15	Saturday	Transition to Practice for law students and recent graduates (optional)
April 25	Tuesday	Classes meet on a Friday schedule; last day of upper-level classes; last day for upper-level students to withdraw from courses
April 26	Wednesday	1L classes meet on a Monday schedule
April 27	Thursday	1L classes meet on a Tuesday schedule; last day of 1L classes; last day for 1Ls to withdraw from courses
April 28	Friday	Class makeup day
May 1–11	Mon–Thursday	Examination period - Last day for graduating students to complete coursework
May 12	Friday	School of Law Commencement 1:00 PM

* All references to "1Ls" and "2Ls" include both day and evening sections.

Summer 2023

May 15	Monday	First day of classes
May 29	Monday	Memorial Day—university holiday; no classes
June 19	Monday	Juneteenth observed; no classes
June 23	Friday	Classes meet on a Monday schedule
June 30	Friday	Last day of classes
July 5–7	Wednesday–Friday	Examination period

Juris Doctor

Full-Time JD Program

This program is designed for those students who are able to devote substantially all of their time to the study of law. Classes generally are taken during the day, but students may choose to enroll in evening elective courses during their second and third years, if space is available. The first year curriculum is entirely prescribed. The second year curriculum consists of core electives and general electives. Students must take at least four of the core electives as described below (see Academic Regulations (p. 617), section I.B. and I.C,

Requirements for Graduation). In addition, prior to graduation, a student must take the course in Lawyers' Professional Responsibility, satisfy the Professional Skills Requirement (for students matriculating before Fall 2016) or the Experiential Learning Requirement (for students matriculating Fall 2016 or later), and satisfy the Advanced Writing Requirement (p. 617).

Summer Session

One seven-week session is offered each summer. Summer courses are taught in the late afternoon or evening and are open to all students. Under some circumstances, a full-time or part-time student may accelerate graduation by attending summer sessions.

Bridge to Practice Program

The Bridge to Practice program at Quinnipiac Law is a three-part, three-year series of not-for-credit courses – two of them mandatory for full-time students – intended to contextualize the rest of the students' legal education, highlighting particularly the ways in which lawyers work with clients to clarify and achieve client goals. The goal is to help students begin the transition to law practice while in school.

1L Gateway to Practice

All full-time, first-year students are required to participate in this mandatory two-day workshop in law and lawyering, which is offered during the first two days of the second semester in January. For part-time students, the program is optional but recommended. Students are assigned to "law firms" as junior associates and work with practitioners who serve as partners, conducting a variety of tasks in simulated cases for mock clients. Over 60 lawyers from the state and the region volunteer to work with students.

The program is intended to provide several benefits:

- **Foundation:** First-year students learn the basics of law and legal analysis. This program shows students how lawyers use doctrine and basic legal skills in helping clients in the everyday practice of law.
- **Balance:** Students supplement their classroom experience with activities ordinarily not part of the first-year curriculum, including deriving facts from a client interview, brainstorming strategies with law firm colleagues, explaining options to clients and engaging clients in decision-making.
- **Context:** The program integrates transactional lawyering and litigation, and helps students to better understand the relationship between legal theory and practice.
- **Group work and collaboration:** Students work in teams to strategize and solve problems.
- **Immediate preparation:** The program helps students prepare for summer employment and gives them a start in developing networking skills.

2L Business Concepts Bootcamp

All full-time, second-year students are required to participate in a day-and-a-half program to kick off the fall semester in August. Part-time, second-year students are encouraged but not required to attend the program. They will be required to watch related video material and attend a Saturday Business Concepts Bootcamp in September.

The goal of the program is to expose students to basic financial and business concepts, many of which will arise in upper-level courses, both within the core curriculum and in other elective courses. The program

should be helpful not only to students who intend to practice business law, but also to those who will practice in a host of other specialties, such as litigation or family law. The program includes both panel presentations and interactive, hands-on workshops. Students select two practice area workshops in which a lawyer specializing in the field will discuss the types of clients served in the practice, the types of problems presented, and the skills and substantive legal expertise needed to work in the area. The practitioner leads the students in solving a typical client problem using the business and financial concepts the students learned in earlier sessions of the Bootcamp.

The program is intended to provide several benefits:

- Provide business context for doctrinal principles in upper-level courses.
- Address employers' concerns that the lack of business and financial literacy represents a major gap in new lawyers' knowledge.
- Demonstrate that an understanding of business concepts is critical in all areas of practice: private, government, public interest and nonprofit.
- Help students to better understand public policy debates.

Transition to Practice Workshop

The Transition to Practice workshop is an optional, one-day program offered on a Saturday in the spring semester to all students. While the 1L and 2L segments of the Bridge to Practice trilogy have focused on the business of clients as the context for lawyers' work, this workshop emphasizes the business aspects of the lawyer's own work. Although students have learned the law, they also need to understand the *business and organizational aspects of legal practice* to be ready for work. Legal employers of all types – private firms, in-house counsel, government and public interest – have to deal with the economics of serving clients. Panels of practitioners and recent graduates explain the business aspects of the practice of law whether in private practice, government or public interest. Topics include: the economics of practice, timekeeping, billing, marketing, project management, innovation and work-life balance. Students also choose workshops with practitioners related to the practice environment they hope to join upon graduation: small firm and solo, large firm and government/public interest.

General Electives	9
Credits	14
Total Credits	86

¹ Full-time students **must** take 3 core electives in the second year. Core electives are:
 LAWS*114 - Administrative Law - 3 credits. Offered fall and spring
 LAWS*205 - Business Organizations - 4 credits. Offered spring only.
 LAWS*305 - Federal Income Tax - 4 credits. Offered fall only.
 LAWS*307 - Trusts & Estates - 3 credits. Offered fall and spring.
 LAWS*311 - Evidence - 3 credits. Offered fall only.
 LAWS*323 - Commercial Law - 4 credits. Offered spring only.
Students must take a total of four core electives. One of the four must be Federal Income Tax or Commercial Law.

² **Experiential Learning Requirement** (applicable to students matriculating Fall 2016 or later): Each student must also satisfactorily complete "one or more experiential course(s) totaling at least 6 credits," as provided by current ABA Standard 303(a)(3) and related provisions. Certain courses are always designated as "experiential courses" that will satisfy the requirement. They are: all law clinics except Advanced Clinic; all externships including Field Placement II; Introduction to Representing Clients; Negotiation; Trial Practice and Advanced Trial Practice. Other courses that may satisfy this requirement, depending on the design choices that the particular professor makes, include: Advanced Family Law II: Courtroom Advocacy, Advanced Juvenile Law: Delinquency Proceedings, Alternative Dispute Resolution, Bankruptcy Lab, Commercial Transactions Workshop, Estate Planning and Drafting, Financial Planning: Principles and Taxation, Judicial Clerkship Seminar, Land Use Practicum, Representation in Mediation, and Visual Persuasion in the Law. (This list is subject to revision; each semester the registrar will designate which courses taught the following semester will satisfy the requirement.) Any paper(s) written in connection with a course or courses used to satisfy the Experiential

Learning Requirement may be used to satisfy no more than three of the four papers required to satisfy the Advanced Writing Requirement.

I. Introduction

The School of Law has organized its institutional learning outcomes into two general categories: "first tier" learning outcomes and "second tier" learning outcomes.

- **First Tier Learning Outcomes** are outcomes that *all* students should achieve by graduation, regardless of the practice area(s) in which they expect to focus in post-law school employment.
- **Second Tier Learning Outcomes** are tailored to particular areas of the law in which students plan to focus in post-law school employment. For that reason, the law school does not expect that *all* students will achieve *all* of these second tier outcomes.

Students who have not yet settled upon a particular focus for post-law school employment should achieve *at least* the first tier learning outcomes, and they should also aspire to achieve those second tier learning outcomes that relate to their likely future practice focuses.

II. First Tier Learning Outcomes

Outcome 1: Graduates are expected to demonstrate competency in legal analysis and reasoning and legal problem solving.

Specific Criteria

Graduates are expected to demonstrate competency in the following:

- Reading cases, statutes and regulations effectively to glean rules and –if in play–the developmental history and policies underlying the rules.
- Recognizing issues and possible rules implicated in new and unfamiliar factual situations.
- Applying applicable rules effectively to understand potential arguments and counter-arguments in new and unfamiliar factual situations.
- Assessing what additional facts may need to be gathered for appropriate analysis of a legal issue.
- Assessing the relative strength of arguments and predicting likely outcomes effectively for legal issues.
- Analyzing applicable rules and facts to formulate and evaluate potential solutions to legal problems.

Outcome 2: Graduates are expected to demonstrate knowledge and understanding of legal theory, systems and doctrine, including core areas of substantive and procedural law and alternative methods for resolving disputes.

Specific Criteria

Graduates are expected to demonstrate knowledge and understanding of the following:

- The American federal and state legal systems, including their structures of rule-making and governance and their historical background.
- Core doctrine and theory in "foundation" areas, including those that will be tested on the bar examination.
- The range of dispute resolution processes and the ability to advise clients and others on choices of process/forum.

- d. Appellate review standards and practices.
- e. The impact of law and legal rules on society and its various sub-groups.

Outcome 3: Graduates are expected to demonstrate competency in oral and written communication in the legal context.

Specific Criteria

Graduates are expected to demonstrate the following:

- a. Competency in cogently communicating analysis and advice orally in a range of settings and contexts.
- b. Competency in listening effectively to clients and others.
- c. Competency in cogently communicating analysis and advice in writing across a range of types of writings (e.g., memos, briefs and client letters).
- d. At least a basic understanding of principles of logic and rhetoric.
- e. At least novice-level understanding of and competency in a spectrum of advocacy skills.

Outcome 4: Graduates are expected to demonstrate competency in legal research and understanding of the factual research needed to solve legal problems.

Specific Criteria

Graduates are expected to demonstrate the following:

- a. Competency in legal research, including effective use of technology for that research.
- b. Understanding of factual investigation, including an understanding of effective strategies and practices for gathering the facts needed to evaluate legal issues or problems.

Outcome 5: Graduates are expected to demonstrate knowledge and understanding of the attorney's professional and ethical responsibilities to clients and the legal system.

Specific Criteria

Graduates are expected to demonstrate the following:

- a. Knowledge and understanding of the professional rules and the ability to recognize and resolve ethical dilemmas in a range of practice settings.
- b. Knowledge and understanding of the attorney's ethical obligation to represent clients diligently and competently.
- c. Knowledge and understanding of the attorney's ethical obligation to behave professionally and civilly.
- d. Knowledge and understanding of the attorney's ethical obligation to behave in accordance with the rules governing confidentiality and conflicts of interest.
- e. Knowledge and understanding of the attorney's ethical obligation to strive to promote justice (including access to justice) and fairness and to assist the profession in providing legal services to those who cannot afford to pay for them.

Outcome 6: Graduates are expected to demonstrate at least novice-level competency in other professional skills needed for competent, effective and ethical participation as a member of the legal profession.

Specific Criteria

Graduates are expected to demonstrate the following:

- a. At least novice-level understanding of and competency in approaches for managing conflict for effective problem solving.
- b. At least novice-level competency in collaborative work approaches.
- c. At least novice-level understanding of and competency in effective approaches for client interviewing and counseling.
- d. At least novice-level understanding of and competency in effective negotiation practices.
- e. At least novice-level understanding of and competency in "learning how to learn" (techniques for finding guidance for unfamiliar tasks).
- f. Competency in interviewing for employment and planning for long-term career development.

III. Second Tier Learning Outcomes

(Approved December 5, 2018)

FOR ALL GRADUATES EARNING CIVIL ADVOCACY AND DISPUTE RESOLUTION CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term "understanding" to refer to knowledge and the term "competency" to refer to skills. We expect graduates to attain at least a "novice-level" understanding and competence. By "novice-level," we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/CADR Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
- b. Competency in managing conflict for effective problem-solving.
- c. Competency in listening and in communication modes and skills in different settings.
- d. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.
- e. Competency in giving and receiving feedback.

Second Tier/CADR Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of negotiation theory and terminology.
- b. Understanding of, and competency in, the use of both cooperative and competitive negotiation strategies.
- c. Understanding of the psychology of decision-making.
- d. Understanding of the ethical issues in negotiation.

- e. Competency in planning for and conducting effective negotiation, both with and without an ongoing relationship between the parties.
- f. Competency in conducting negotiation in presence of mediator, by interacting with the mediator effectively.

Second Tier/CADR Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, mediation.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of mediation theory and terminology, including the fundamental principles of mediation and the range of possible mediator approaches.
- b. Understanding of the Standards of Conduct for Mediators.
- c. Understanding of the current controversies and issues in the use of mediation as a dispute resolution process.
- d. Understanding of effectiveness as a consumer of mediation.
- e. Competency as an advocate in the mediation context.
- f. Competency in participating in a mediation in accordance with the fundamental principles of mediation, including the appropriate use of joint and caucus sessions, and the ability to encourage the creative generation of potential solutions.

Second Tier/CADR Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of the nature of arbitration.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the rules and regulation of arbitration.
- b. Understanding of the contractual issues and framework of arbitration.
- c. Understanding of the current controversies and issues in the use of arbitration as a dispute resolution process.
- d. Understanding of, and competence in, advocating for clients in arbitration.

Second Tier/CADR Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the litigation process, and the current issues and controversies in the use of trial as a dispute resolution process.
- b. Understanding of the elements of effective advocacy in litigation, including pretrial and trial phases.
- c. Understanding of, and competency in, the application of the rules of evidence, including presenting evidence through witness testimony, introduction of documentary evidence, and the making of and defending objections.
- d. Understanding of, and competency in, direct and cross examination techniques.
- e. Understanding of, and competency in, delivering persuasive argument, including opening and closing arguments.

FOR ALL GRADUATES EARNING CRIMINAL LAW AND ADVOCACY CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/CLA Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of criminal law and criminal procedure.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the substantive law of crimes including the construction of criminal statutes, elements of crimes, and defenses to crimes, as well as the concepts of causation, criminal responsibility and capacity, justification and excuse.
- b. Understanding of the investigative stage of the criminal justice process including the constitutional limitations on law enforcement—and the means of enforcing those limitations—with respect to arrest, stop and frisk, search and seizure, eavesdropping, wiretapping, identification procedures, and questioning of suspects.
- c. Understanding of the adjudicative stage of the criminal justice process including the initial appearance following arrest, the decision to prosecute, the preliminary hearing, bail, indictment, pleas and plea bargaining, the trial, double jeopardy, and the constitutional limitations on the adjudication of criminal matters.
- d. Understanding of the role and impact of the criminal justice system in the United States including current debates and controversies relating to criminal justice policies and practices.

Second Tier/CLA Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, pretrial, trial, and sentencing advocacy.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the pretrial, trial, and sentencing phases of criminal cases.
- b. Understanding of the elements of effective advocacy in criminal cases including the pretrial, trial, and sentencing phases.
- c. Understanding of, and competency in, the application of the rules of evidence, including presenting evidence through witness testimony, introduction of documentary evidence, and the making of and defending objections.
- d. Understanding of, and competency in, direct and cross examination techniques.
- e. Understanding of, and competency in, delivering persuasive argument, including opening and closing arguments.

- f. Understanding of, and competency in, developing and using mitigating evidence in sentencing advocacy.

Second Tier/CLA Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict and relationship management.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
- b. Competency in managing conflict for effective problem-solving.
- c. Competency in listening and in communication modes and skills in different settings.
- d. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.
- e. Competency in giving and receiving feedback.

Second Tier/CLA Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of negotiation theory and terminology.
- b. Understanding of the psychology of decision-making.
- c. Understanding of the ethical issues in negotiation and plea bargaining in criminal cases.
- d. Competency in planning for and conducting effective negotiations in criminal cases.

FOR ALL GRADUATES EARNING FAMILY LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/FAMILY Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of doctrine and related topics in family law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of topics in family law such as marriage, divorce, jurisdiction, spousal and child support, property division, and custody and parenting issues.
- b. Understanding of the emotional and psychological impact of divorce on family members.

- c. Understanding of child development principles and how parental separation and conflict affects child development.
- d. Understanding of the dynamics of domestic violence, including child abuse, and the array of criminal and civil responses to it.
- e. Understanding of the financial and property aspects of divorce, including the tax implications.

Second Tier/FAMILY Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, working with professionals from other disciplines and navigating the ethical aspects of the practice of family law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of, and competency in, working with mental health professionals, as treating professionals, consultants, witnesses, and expert witnesses.
- b. Understanding of, and competency in, working with financial professionals, such as divorce financial planners, business evaluators, and tax advisors.
- c. Understanding of, and competency in, the special ethical challenges of serving as an advocate and an advisor for clients in family law, particularly when there are children in the family.
- d. Understanding of, and competency in, providing for the physical and emotional safety in the lives of clients.
- e. Understanding of, and competency in, educating clients about the need for reducing conflict and enhancing the ability of parents to co-parent children.

Second Tier/FAMILY Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management, managing relationships, and on-going self-improvement of dispute resolution skills.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in managing relationships with clients, other parties, and with counterparts.
- b. Understanding of, and competency in, interviewing and counseling family law clients.
- c. Competency in managing conflict for effective problem-solving.
- d. Competency in listening, and in using effective communication skills.
- e. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.

Second Tier/FAMILY Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation and mediation in the family law context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of negotiation and mediation theory and terminology.
- b. Competency in planning for and conducting effective negotiation, especially cooperative strategies for clients with an ongoing relationship.
- c. Understanding of the ethical and negotiation principles in Collaborative Practice.

- d. Understanding of the psychology of decision-making.
- e. Understanding of the ethical issues in negotiation and mediation.
- f. Understanding of how to conduct negotiation in the presence of mediator, by preparing clients for mediation and interacting with the mediator effectively.

Second Tier/FAMILY Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy in the family law context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the litigation process, and current issues and controversies in the use of trial as a dispute resolution process in family law.
- b. Understanding of the elements of effective advocacy in litigation, including pretrial and trial phases.
- c. Understanding of, and competency in, the application of the rules of evidence, including presenting evidence through witness testimony and expert witnesses, introduction of documentary evidence, and the making of and defending objections.
- d. Understanding of, and competency in, direct and cross examination techniques.
- e. Understanding of, and competency in, delivering persuasive argument, including opening and closing arguments.
- f. Understanding of, and competency in, working with child advocates in court.

FOR ALL GRADUATES EARNING HEALTH LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/HEALTH Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, business and financial activities and transactions relating to health care organizations.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in negotiating, drafting, and interpreting contracts related to commercial enterprises in the healthcare industry.
- b. Competency in reading and interpreting financial reports, profit and loss statements, and budget documents.
- c. Understanding of how insurance reimbursement policies affect the health care delivery system.
- d. Understanding of the federal and state tax implications associated with for-profit and not-for-profit corporations.

- e. Competency in demonstrating the necessary personal integrity, sound judgment, and commitment to accountability in negotiating health care-related transactions.

Second Tier/HEALTH Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level of understanding of, and competency in, health care regulation including federal, state, and local laws impacting the delivery of health care.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the major health law statutes including, but not limited to:
Medicare
Medicaid
Patient Protection and Affordable Care Act
Health Information and Technology for Economic and Clinical Health Act (HITECH)
Emergency Medical Treatment and Active Labor Act (EMTALA)
Health Insurance Portability and Accountability Act (HIPAA)
The Antitrust Statutes (Sherman Act, Clayton Act, Federal Trade Commission Act, Robinson Patman Act)
Fraud and Abuse Statute
Ethics in Patient Referrals Act (Stark Act)
- b. Understanding of the connection between the legislative process and regulatory agency rule-making.
- c. Competency in conducting research and drafting correspondence that interprets statutory and regulatory requirements related to a client’s particular circumstances.
- d. Understanding of federal and state regulations affecting labor relations, institutional and professional licensing, not-for-profit and for-profit organizations, and patients’ rights.

Second Tier/HEALTH Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level of understanding of the evolving nature of health care policy and competency in health law practices.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in analyzing the financial, antitrust and patient care-related issues associated with hospital acquisition of physicians’ practices.
- b. Understanding of the shift in the focus of patient care from inpatient-centric, sick care to outpatient, technology-centric, preventive well care.
- c. Understanding of the key policy questions relating to public health insurance.
- d. Understanding of the negative impact on patient care caused by lack of coordination within the United States health care system.
- e. Understanding of the statutory and historical basis for the peer review process for disciplining physicians.
- f. Understanding of the policy and political forces driving a shift away from a fee-for-service payment system to a value-based care payment system.

Second Tier/HEALTH Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level of understanding of, and

competency in examining, the connection between health, health care, health care inequities and social determinants of health.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in describing and analyzing the connection between the practice of medicine, the practice of health law, and the impact of law on medicine.
- b. Understanding of, and competency in, examining and discussing the question of whether or not there is a “right” to health care for both citizens and immigrants.
- c. Competency in analyzing and discussing the connection between the formation of the doctor-patient relationship and medical malpractice.
- d. Understanding of the tension between the ethical expectations and the legal obligations of physicians.
- e. Competency in analyzing the police powers of the states to restrict private autonomy in the name of public health promotion and protection.
- f. Understanding that shifting legislative priorities in response to political changes have resulted in creation of new health-related rights.

FOR ALL GRADUATES EARNING INTERNATIONAL LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/IL Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, using the foundational international law sources.

Specific Criteria

Concentration graduates are expected to demonstrate competency in the following:

- a. Competency in reading and understanding treaties, other dual nation and multilateral accords, international customs, generally recognized principles of international law, and international judicial decisions and juristic writings.
- b. Competency in recognizing issues and possible rules implicated in new and unfamiliar factual situations in the international context.
- c. Competency in applying applicable rules effectively to understand potential arguments and counter arguments in new and unfamiliar factual situations in the international context.
- d. Competency in analyzing applicable rules and facts to formulate and evaluate potential solutions to legal problems in the international context.

Second Tier/IL Learning Outcome 2: Concentration graduates are expected to demonstrate at least novice-level understating of, and

competency in, oral and written communication and advocacy in the international legal context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in cogently communicating analysis and advice orally in a range of settings in the international context.
- b. Competency in cogently communicating analysis and advice in written form in a range of settings in the international context.
- c. Competency in listening effectively to clients and others in the international context.
- d. Understanding of, and competency in, use of the principles of logic and rhetoric as they apply in the international context.
- e. Understanding of, and competency in, use of a spectrum of advocacy skills as they apply in the international context.

Second Tier/IL Learning Outcome 3: Concentration graduates are expected to demonstrate at least novice-level competency in legal research and understanding of the factual research needed to solve legal problems in the international context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in legal research, including effective use of technology for that research, in the international context.
- b. Understanding of, and competency in, factual investigation, including an understanding of effective strategies and practices for gathering the facts needed to evaluate legal issues or problems in the international context.

Second Tier/IL Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of the attorney’s professional and ethical responsibilities to clients and the legal system in the international context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the ethical implications of differing political systems.
- b. Understanding of the ethical implications of differing legal systems.
- c. Understanding of the ethical implications of differing levels of economic development.

FOR ALL GRADUATES EARNING INTELLECTUAL PROPERTY CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/IP Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, the substantive and procedural law of intellectual property, and legal analysis, reasoning and legal problem solving in the context of intellectual property.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the law of patents, trademarks, copyrights, and trade secrets.
- b. Competency in reading cases, statutes, and regulations effectively to glean rules, and understand the developmental history and policies underlying the rules in the context of IP matters.
- c. Competency in analyzing applicable rules and facts to formulate and evaluate potential solutions to clients' IP problems.
- d. Understanding of the structures of rule-making and governance and their historical background with respect to patents, trademarks, copyrights and trade secrets.

Second Tier/IP Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level competency in oral and written communication in the legal context as relates to intellectual property matters.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in listening effectively to clients and others in order to understand and address clients' IP matters.
- b. Understanding of, and competency in, a spectrum of oral and written advocacy skills on behalf of IP clients.
- c. Competency in listening and in oral and written communication modes.

Second Tier/IP Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, factual and legal research in intellectual property matters.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in IP legal research, including effective use of specialized resources for IP matters.
- b. Understanding of, and competency in, effective strategies and practices for gathering the facts needed to evaluate legal issues relating to IP matters.

Second Tier/IP Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict and relationship management and dispute resolution skills in the context of intellectual property matters.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
- b. Competency in managing conflict for effective problem-solving.

c. Competency in advising clients on choices of process/forum in the context of the specific IP problem.

d. Understanding of, and competency in, the use of both cooperative and competitive negotiation strategies as a means to resolve IP disputes.

Second Tier/IP Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy in the intellectual property context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of, and competency in, the litigation process in validity and enforcement proceedings in one or more of trademark, copyright, or patent matters.
- b. Understanding of the current issues and controversies in the use of trial as a dispute resolution process in the context of patent, trademark, and copyright validity and enforceability matters.

FOR ALL GRADUATES EARNING TAX CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term "understanding" to refer to knowledge and the term "competency" to refer to skills. We expect graduates to attain at least a "novice-level" understanding and competence. By "novice-level," we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/TAX Learning Outcome 1: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, reading and engaging with the sources of tax law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in reading and comprehending case law related to tax law.
- b. Competency in reading and comprehending the Internal Revenue Code and Regulations.
- c. Competency in reading and comprehending various other sources of tax law, such as Private Letter Rulings and other administrative pronouncements, legislative histories, tax treaties, and major secondary sources/compilations of tax law.
- d. Understanding of the relative importance, and legal weight of authority, of these various sources of tax law.
- e. Understanding of major administrative procedures related to the enactment and enforcement of tax law.

Second Tier/TAX Learning Outcome 2: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, applying tax law to specific problems faced by tax clients.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in identifying relevant facts presented by a client and identifying the tax principles implicated by those facts.
- b. Competency in determining which provisions of the Internal Revenue Code are relevant to a given factual situation.
- c. Competency in assessing the likely tax implications of actions of a client.
- d. Competency in communicating analysis and advice regarding tax matters, both orally and in writing.

Second Tier/TAX Learning Outcome 3: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, engaging in in-depth study of specific issues in tax law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of tax law, policy, and procedure.
- b. Competency in tax research.
- c. Competency in written analysis of issues in tax law.

FOR ALL GRADUATES EARNING WORKPLACE LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/WP Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of the legal theory, systems, and doctrine in the law involving the workplace.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the substantive law of public and private labor law in union and non-union-settings, employment law, employment discrimination, disability, worker compensation, and benefits.
- b. Understanding of administrative law and procedures, and the role of administrative agencies in the investigative stage of employment discrimination matters.
- c. Understanding of the federal and state laws and regulations governing labor law.
- d. Understanding of the role and impact of employment and labor law in the United States including current debates and controversies relating to workplace policies and practices.

Second Tier/WP Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management, and managing relationships in the workplace law context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
- b. Competency in interviewing and counseling clients in workplace cases.
- c. Competency in managing conflict for effective problem-solving.
- d. Competency in listening and in communication modes and skills in different settings in the workplace law context.

Second Tier/WP Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation, arbitration, and litigation in the workplace context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of negotiation theory and terminology.
- b. Understanding of the role and practice of arbitration in the labor and employment context.
- c. Understanding of the ethical issues in employment negotiation, labor bargaining, arbitration, and trial practice.
- d. Competency in planning for and conducting effective negotiations in labor and employment cases, both with and without a mediator.
- e. Understanding of how to plan for and conduct effective arbitrations in labor and employment cases.
- f. Understanding of how to plan for and conduct effective litigation in labor and employment cases.

Concentrations

There are eight optional concentrations offered within the juris doctor degree program.

- Civil Advocacy and Dispute Resolution (p. 604)
- Criminal Law and Advocacy (p. 605)
- Family Law (p. 607)
- Health Law (p. 608)
- Intellectual Property (p. 610)
- International Law and Policy (new Fall 2017) (p. 611)
- Tax Law (p. 612)
- Workplace Law (p. 613)

Part-Time Juris Doctor Part-Time Evening JD Program

This program is designed for those students who are employed or otherwise occupied for most of their time, and who are able to devote only a portion of their time to the study of law. The completion of this program requires four academic years and one or two summer sessions of residence. Part-time students are admitted for evening courses. They may be allowed to enroll in day classes if space is available. All part-time students are required to take the prescribed program of required courses listed below and at least four of the core electives as described below (see Academic Regulations (p. 617), section I.B. and I.C, Requirements

for Graduation). In addition, prior to graduation, students must take the course in Lawyers' Professional Responsibility, satisfy the Professional Skills Requirement (for students matriculating before Fall 2016) or the Experiential Learning Requirement (for students matriculating Fall 2016 or later), and satisfy the Advanced Writing Requirement (p. 617).

Flex-Time Day JD Program

This program is designed for a limited number of students who, because of work or family commitments, cannot attend either the full-time day or part-time evening program. Students admitted to this program must meet with the associate dean for academic affairs to arrange an appropriate schedule.

Summer Session

One seven-week session is offered each summer. Summer courses are taught in the late afternoon or evening and are open to all students. Under some circumstances, a full-time or part-time student may accelerate graduation by attending summer sessions.

Part-Time Juris Doctor Program of Study

Total Credits	
86	

¹ Part-time students must take two core electives by the end of the second year. Fewer core elective credits in the second year can be taken if one or more core electives in the summer between the first and second years have been completed.

Core electives are:

- LAWS 114 - Administrative Law - 3 credits.
- LAWS 205 - Business Organizations - 4 credits.
- LAWS 305 - Federal Income Tax - 4 credits.
- LAWS 307 - Trusts & Estates - 3 credits.
- LAWS 311 - Evidence - 3 credits.
- LAWS 323 - Commercial Law - 4 credits.

Students must take a total of four core electives. One of the four must be Federal Income Tax or Commercial Law.

² **Experiential Learning Requirement** (applicable to students matriculating Fall 2016 or later): Each student also must satisfactorily complete "one or more experiential course(s) totaling at least 6 credits," as provided by current ABA Standard 303(a)(3) and related provisions. Certain courses are always designated as "experiential courses" that will satisfy the requirement. They are: all law clinics except Advanced Clinic; all externships including Field Placement II; Introduction to Representing Clients; Negotiation; Trial Practice and Advanced Trial Practice. Other courses that may satisfy this requirement, depending on the design choices that the particular professor makes, include: Advanced Family Law II: Courtroom Advocacy, Advanced Juvenile Law: Delinquency Proceedings, Alternative Dispute Resolution, Bankruptcy Lab, Commercial Transactions Workshop, Estate Planning and Drafting, Financial Planning: Principles and Taxation, Judicial Clerkship Seminar, Land Use Practicum, Representation in Mediation, and Visual Persuasion in the Law. (This list is subject to revision; each semester the registrar will designate which courses taught the following semester will satisfy the requirement.) Any paper(s) written in connection with a course or courses used to satisfy the Experiential Learning Requirement may be used to satisfy no more than three of the four papers required to satisfy the Advanced Writing Requirement.

³ Taking at least one summer course over the course of study will be necessary to reach the required 86 credits needed for graduation by the end of your fourth year.

I. Introduction

The School of Law has organized its institutional learning outcomes into two general categories: “first tier” learning outcomes and “second tier” learning outcomes.

- **First Tier Learning Outcomes** are outcomes that *all* students should achieve by graduation, regardless of the practice area(s) in which they expect to focus in post-law school employment.
- **Second Tier Learning Outcomes** are tailored to particular areas of the law in which students plan to focus in post-law school employment. For that reason, the law school does not expect that *all* students will achieve *all* of these second tier outcomes.

Students who have not yet settled upon a particular focus for post-law school employment should achieve *at least* the first tier learning outcomes, and they should also aspire to achieve those second tier learning outcomes that relate to their likely future practice focuses.

II. First Tier Learning Outcomes

Outcome 1: Graduates are expected to demonstrate competency in legal analysis and reasoning and legal problem solving.

Specific Criteria

Graduates are expected to demonstrate competency in the following:

- a. Reading cases, statutes and regulations effectively to glean rules and –if in play–the developmental history and policies underlying the rules.
- b. Recognizing issues and possible rules implicated in new and unfamiliar factual situations.
- c. Applying applicable rules effectively to understand potential arguments and counter-arguments in new and unfamiliar factual situations.
- d. Assessing what additional facts may need to be gathered for appropriate analysis of a legal issue.
- e. Assessing the relative strength of arguments and predicting likely outcomes effectively for legal issues.
- f. Analyzing applicable rules and facts to formulate and evaluate potential solutions to legal problems.

Outcome 2: Graduates are expected to demonstrate knowledge and understanding of legal theory, systems and doctrine, including core areas of substantive and procedural law and alternative methods for resolving disputes.

Specific Criteria

Graduates are expected to demonstrate knowledge and understanding of the following:

- a. The American federal and state legal systems, including their structures of rule-making and governance and their historical background.
- b. Core doctrine and theory in “foundation” areas, including those that will be tested on the bar examination.
- c. The range of dispute resolution processes and the ability to advise clients and others on choices of process/forum.
- d. Appellate review standards and practices.

- e. The impact of law and legal rules on society and its various sub-groups.

Outcome 3: Graduates are expected to demonstrate competency in oral and written communication in the legal context.

Specific Criteria

Graduates are expected to demonstrate the following:

- a. Competency in cogently communicating analysis and advice orally in a range of settings and contexts.
- b. Competency in listening effectively to clients and others.
- c. Competency in cogently communicating analysis and advice in writing across a range of types of writings (e.g., memos, briefs and client letters).
- d. At least a basic understanding of principles of logic and rhetoric.
- e. At least novice-level understanding of and competency in a spectrum of advocacy skills.

Outcome 4: Graduates are expected to demonstrate competency in legal research and understanding of the factual research needed to solve legal problems.

Specific Criteria

Graduates are expected to demonstrate the following:

- a. Competency in legal research, including effective use of technology for that research.
- b. Understanding of factual investigation, including an understanding of effective strategies and practices for gathering the facts needed to evaluate legal issues or problems.

Outcome 5: Graduates are expected to demonstrate knowledge and understanding of the attorney’s professional and ethical responsibilities to clients and the legal system.

Specific Criteria

Graduates are expected to demonstrate the following:

- a. Knowledge and understanding of the professional rules and the ability to recognize and resolve ethical dilemmas in a range of practice settings.
- b. Knowledge and understanding of the attorney’s ethical obligation to represent clients diligently and competently.
- c. Knowledge and understanding of the attorney’s ethical obligation to behave professionally and civilly.
- d. Knowledge and understanding of the attorney’s ethical obligation to behave in accordance with the rules governing confidentiality and conflicts of interest.
- e. Knowledge and understanding of the attorney’s ethical obligation to strive to promote justice (including access to justice) and fairness and to assist the profession in providing legal services to those who cannot afford to pay for them.

Outcome 6: Graduates are expected to demonstrate at least novice-level competency in other professional skills needed for competent, effective and ethical participation as a member of the legal profession.

Specific Criteria

Graduates are expected to demonstrate the following:

- a. At least novice-level understanding of and competency in approaches for managing conflict for effective problem solving.
- b. At least novice-level competency in collaborative work approaches.
- c. At least novice-level understanding of and competency in effective approaches for client interviewing and counseling.
- d. At least novice-level understanding of and competency in effective negotiation practices.
- e. At least novice-level understanding of and competency in "learning how to learn" (techniques for finding guidance for unfamiliar tasks).
- f. Competency in interviewing for employment and planning for long-term career development.

III. Second Tier Learning Outcomes

(Approved December 5, 2018)

FOR ALL GRADUATES EARNING CIVIL ADVOCACY AND DISPUTE RESOLUTION CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term "understanding" to refer to knowledge and the term "competency" to refer to skills. We expect graduates to attain at least a "novice-level" understanding and competence. By "novice-level," we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/CADR Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
- b. Competency in managing conflict for effective problem-solving.
- c. Competency in listening and in communication modes and skills in different settings.
- d. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.
- e. Competency in giving and receiving feedback.

Second Tier/CADR Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of negotiation theory and terminology.
- b. Understanding of, and competency in, the use of both cooperative and competitive negotiation strategies.
- c. Understanding of the psychology of decision-making.
- d. Understanding of the ethical issues in negotiation.

- e. Competency in planning for and conducting effective negotiation, both with and without an ongoing relationship between the parties.
- f. Competency in conducting negotiation in presence of mediator, by interacting with the mediator effectively.

Second Tier/CADR Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, mediation.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of mediation theory and terminology, including the fundamental principles of mediation and the range of possible mediator approaches.
- b. Understanding of the Standards of Conduct for Mediators.
- c. Understanding of the current controversies and issues in the use of mediation as a dispute resolution process.
- d. Understanding of effectiveness as a consumer of mediation.
- e. Competency as an advocate in the mediation context.
- f. Competency in participating in a mediation in accordance with the fundamental principles of mediation, including the appropriate use of joint and caucus sessions, and the ability to encourage the creative generation of potential solutions.

Second Tier/CADR Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of the nature of arbitration.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the rules and regulation of arbitration.
- b. Understanding of the contractual issues and framework of arbitration.
- c. Understanding of the current controversies and issues in the use of arbitration as a dispute resolution process.
- d. Understanding of, and competence in, advocating for clients in arbitration.

Second Tier/CADR Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the litigation process, and the current issues and controversies in the use of trial as a dispute resolution process.
- b. Understanding of the elements of effective advocacy in litigation, including pretrial and trial phases.
- c. Understanding of, and competency in, the application of the rules of evidence, including presenting evidence through witness testimony, introduction of documentary evidence, and the making of and defending objections.
- d. Understanding of, and competency in, direct and cross examination techniques.
- e. Understanding of, and competency in, delivering persuasive argument, including opening and closing arguments.

FOR ALL GRADUATES EARNING CRIMINAL LAW AND ADVOCACY CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/CLA Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of criminal law and criminal procedure.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the substantive law of crimes including the construction of criminal statutes, elements of crimes, and defenses to crimes, as well as the concepts of causation, criminal responsibility and capacity, justification and excuse.
- b. Understanding of the investigative stage of the criminal justice process including the constitutional limitations on law enforcement—and the means of enforcing those limitations—with respect to arrest, stop and frisk, search and seizure, eavesdropping, wiretapping, identification procedures, and questioning of suspects.
- c. Understanding of the adjudicative stage of the criminal justice process including the initial appearance following arrest, the decision to prosecute, the preliminary hearing, bail, indictment, pleas and plea bargaining, the trial, double jeopardy, and the constitutional limitations on the adjudication of criminal matters.
- d. Understanding of the role and impact of the criminal justice system in the United States including current debates and controversies relating to criminal justice policies and practices.

Second Tier/CLA Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, pretrial, trial, and sentencing advocacy.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the pretrial, trial, and sentencing phases of criminal cases.
- b. Understanding of the elements of effective advocacy in criminal cases including the pretrial, trial, and sentencing phases.
- c. Understanding of, and competency in, the application of the rules of evidence, including presenting evidence through witness testimony, introduction of documentary evidence, and the making of and defending objections.
- d. Understanding of, and competency in, direct and cross examination techniques.
- e. Understanding of, and competency in, delivering persuasive argument, including opening and closing arguments.

- f. Understanding of, and competency in, developing and using mitigating evidence in sentencing advocacy.

Second Tier/CLA Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict and relationship management.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
- b. Competency in managing conflict for effective problem-solving.
- c. Competency in listening and in communication modes and skills in different settings.
- d. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.
- e. Competency in giving and receiving feedback.

Second Tier/CLA Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of negotiation theory and terminology.
- b. Understanding of the psychology of decision-making.
- c. Understanding of the ethical issues in negotiation and plea bargaining in criminal cases.
- d. Competency in planning for and conducting effective negotiations in criminal cases.

FOR ALL GRADUATES EARNING FAMILY LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/FAMILY Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of doctrine and related topics in family law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of topics in family law such as marriage, divorce, jurisdiction, spousal and child support, property division, and custody and parenting issues.
- b. Understanding of the emotional and psychological impact of divorce on family members.

- c. Understanding of child development principles and how parental separation and conflict affects child development.
- d. Understanding of the dynamics of domestic violence, including child abuse, and the array of criminal and civil responses to it.
- e. Understanding of the financial and property aspects of divorce, including the tax implications.

Second Tier/FAMILY Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, working with professionals from other disciplines and navigating the ethical aspects of the practice of family law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of, and competency in, working with mental health professionals, as treating professionals, consultants, witnesses, and expert witnesses.
- b. Understanding of, and competency in, working with financial professionals, such as divorce financial planners, business evaluators, and tax advisors.
- c. Understanding of, and competency in, the special ethical challenges of serving as an advocate and an advisor for clients in family law, particularly when there are children in the family.
- d. Understanding of, and competency in, providing for the physical and emotional safety in the lives of clients.
- e. Understanding of, and competency in, educating clients about the need for reducing conflict and enhancing the ability of parents to co-parent children.

Second Tier/FAMILY Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management, managing relationships, and on-going self-improvement of dispute resolution skills.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in managing relationships with clients, other parties, and with counterparts.
- b. Understanding of, and competency in, interviewing and counseling family law clients.
- c. Competency in managing conflict for effective problem-solving.
- d. Competency in listening, and in using effective communication skills.
- e. Competency in the ability to self-evaluate, by reflecting on and learning from past performances in order to improve effectiveness.

Second Tier/FAMILY Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation and mediation in the family law context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of negotiation and mediation theory and terminology.
- b. Competency in planning for and conducting effective negotiation, especially cooperative strategies for clients with an ongoing relationship.
- c. Understanding of the ethical and negotiation principles in Collaborative Practice.

- d. Understanding of the psychology of decision-making.
- e. Understanding of the ethical issues in negotiation and mediation.
- f. Understanding of how to conduct negotiation in the presence of mediator, by preparing clients for mediation and interacting with the mediator effectively.

Second Tier/FAMILY Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy in the family law context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the litigation process, and current issues and controversies in the use of trial as a dispute resolution process in family law.
- b. Understanding of the elements of effective advocacy in litigation, including pretrial and trial phases.
- c. Understanding of, and competency in, the application of the rules of evidence, including presenting evidence through witness testimony and expert witnesses, introduction of documentary evidence, and the making of and defending objections.
- d. Understanding of, and competency in, direct and cross examination techniques.
- e. Understanding of, and competency in, delivering persuasive argument, including opening and closing arguments.
- f. Understanding of, and competency in, working with child advocates in court.

FOR ALL GRADUATES EARNING HEALTH LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/HEALTH Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, business and financial activities and transactions relating to health care organizations.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in negotiating, drafting, and interpreting contracts related to commercial enterprises in the healthcare industry.
- b. Competency in reading and interpreting financial reports, profit and loss statements, and budget documents.
- c. Understanding of how insurance reimbursement policies affect the health care delivery system.
- d. Understanding of the federal and state tax implications associated with for-profit and not-for-profit corporations.

- e. Competency in demonstrating the necessary personal integrity, sound judgment, and commitment to accountability in negotiating health care-related transactions.

Second Tier/HEALTH Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level of understanding of, and competency in, health care regulation including federal, state, and local laws impacting the delivery of health care.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the major health law statutes including, but not limited to:
 - Medicare
 - Medicaid
 - Patient Protection and Affordable Care Act
 - Health Information and Technology for Economic and Clinical Health Act (HITECH)
 - Emergency Medical Treatment and Active Labor Act (EMTALA)
 - Health Insurance Portability and Accountability Act (HIPAA)
 - The Antitrust Statutes (Sherman Act, Clayton Act, Federal Trade Commission Act, Robinson Patman Act)
 - Fraud and Abuse Statute
 - Ethics in Patient Referrals Act (Stark Act)
- b. Understanding of the connection between the legislative process and regulatory agency rule-making.
- c. Competency in conducting research and drafting correspondence that interprets statutory and regulatory requirements related to a client's particular circumstances.
- d. Understanding of federal and state regulations affecting labor relations, institutional and professional licensing, not-for-profit and for-profit organizations, and patients' rights.

Second Tier/HEALTH Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level of understanding of the evolving nature of health care policy and competency in health law practices.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in analyzing the financial, antitrust and patient care-related issues associated with hospital acquisition of physicians' practices.
- b. Understanding of the shift in the focus of patient care from inpatient-centric, sick care to outpatient, technology-centric, preventive well care.
- c. Understanding of the key policy questions relating to public health insurance.
- d. Understanding of the negative impact on patient care caused by lack of coordination within the United States health care system.
- e. Understanding of the statutory and historical basis for the peer review process for disciplining physicians.
- f. Understanding of the policy and political forces driving a shift away from a fee-for-service payment system to a value-based care payment system.

Second Tier/HEALTH Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level of understanding of, and

competency in examining, the connection between health, health care, health care inequities and social determinants of health.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in describing and analyzing the connection between the practice of medicine, the practice of health law, and the impact of law on medicine.
- b. Understanding of, and competency in, examining and discussing the question of whether or not there is a "right" to health care for both citizens and immigrants.
- c. Competency in analyzing and discussing the connection between the formation of the doctor-patient relationship and medical malpractice.
- d. Understanding of the tension between the ethical expectations and the legal obligations of physicians.
- e. Competency in analyzing the police powers of the states to restrict private autonomy in the name of public health promotion and protection.
- f. Understanding that shifting legislative priorities in response to political changes have resulted in creation of new health-related rights.

FOR ALL GRADUATES EARNING INTERNATIONAL LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term "understanding" to refer to knowledge and the term "competency" to refer to skills. We expect graduates to attain at least a "novice-level" understanding and competence. By "novice-level" we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/IL Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, using the foundational international law sources.

Specific Criteria

Concentration graduates are expected to demonstrate competency in the following:

- a. Competency in reading and understanding treaties, other dual nation and multilateral accords, international customs, generally recognized principles of international law, and international judicial decisions and juristic writings.
- b. Competency in recognizing issues and possible rules implicated in new and unfamiliar factual situations in the international context.
- c. Competency in applying applicable rules effectively to understand potential arguments and counter arguments in new and unfamiliar factual situations in the international context.
- d. Competency in analyzing applicable rules and facts to formulate and evaluate potential solutions to legal problems in the international context.

Second Tier/IL Learning Outcome 2: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, oral and written communication and advocacy in the international legal context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- Competency in cogently communicating analysis and advice orally in a range of settings in the international context.
- Competency in cogently communicating analysis and advice in written form in a range of settings in the international context.
- Competency in listening effectively to clients and others in the international context.
- Understanding of, and competency in, use of the principles of logic and rhetoric as they apply in the international context.
- Understanding of, and competency in, use of a spectrum of advocacy skills as they apply in the international context.

Second Tier/IL Learning Outcome 3: Concentration graduates are expected to demonstrate at least novice-level competency in legal research and understanding of the factual research needed to solve legal problems in the international context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- Competency in legal research, including effective use of technology for that research, in the international context.
- Understanding of, and competency in, factual investigation, including an understanding of effective strategies and practices for gathering the facts needed to evaluate legal issues or problems in the international context.

Second Tier/IL Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of the attorney's professional and ethical responsibilities to clients and the legal system in the international context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- Understanding of the ethical implications of differing political systems.
- Understanding of the ethical implications of differing legal systems.
- Understanding of the ethical implications of differing levels of economic development.

FOR ALL GRADUATES EARNING INTELLECTUAL PROPERTY CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term "understanding" to refer to knowledge and the term "competency" to refer to skills. We expect graduates to attain at least a "novice-level" understanding and competence. By "novice-level," we mean a level of

knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/IP Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, the substantive and procedural law of intellectual property, and legal analysis, reasoning and legal problem solving in the context of intellectual property.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- Understanding of the law of patents, trademarks, copyrights, and trade secrets.
- Competency in reading cases, statutes, and regulations effectively to glean rules, and understand the developmental history and policies underlying the rules in the context of IP matters.
- Competency in analyzing applicable rules and facts to formulate and evaluate potential solutions to clients' IP problems.
- Understanding of the structures of rule-making and governance and their historical background with respect to patents, trademarks, copyrights and trade secrets.

Second Tier/IP Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level competency in oral and written communication in the legal context as relates to intellectual property matters.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- Competency in listening effectively to clients and others in order to understand and address clients' IP matters.
- Understanding of, and competency in, a spectrum of oral and written advocacy skills on behalf of IP clients.
- Competency in listening and in oral and written communication modes.

Second Tier/IP Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, factual and legal research in intellectual property matters.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- Competency in IP legal research, including effective use of specialized resources for IP matters.
- Understanding of, and competency in, effective strategies and practices for gathering the facts needed to evaluate legal issues relating to IP matters.

Second Tier/IP Learning Outcome 4: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict and relationship management and dispute resolution skills in the context of intellectual property matters.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.

- b. Competency in managing conflict for effective problem-solving.
- c. Competency in advising clients on choices of process/forum in the context of the specific IP problem.
- d. Understanding of, and competency in, the use of both cooperative and competitive negotiation strategies as a means to resolve IP disputes.

Second Tier/IP Learning Outcome 5: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, trial advocacy in the intellectual property context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of, and competency in, the litigation process in validity and enforcement proceedings in one or more of trademark, copyright, or patent matters.
- b. Understanding of the current issues and controversies in the use of trial as a dispute resolution process in the context of patent, trademark, and copyright validity and enforceability matters.

FOR ALL GRADUATES EARNING TAX CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/TAX Learning Outcome 1: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, reading and engaging with the sources of tax law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in reading and comprehending case law related to tax law.
- b. Competency in reading and comprehending the Internal Revenue Code and Regulations.
- c. Competency in reading and comprehending various other sources of tax law, such as Private Letter Rulings and other administrative pronouncements, legislative histories, tax treaties, and major secondary sources/compilations of tax law.
- d. Understanding of the relative importance, and legal weight of authority, of these various sources of tax law.
- e. Understanding of major administrative procedures related to the enactment and enforcement of tax law.

Second Tier/TAX Learning Outcome 2: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, applying tax law to specific problems faced by tax clients.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Competency in identifying relevant facts presented by a client and identifying the tax principles implicated by those facts.
- b. Competency in determining which provisions of the Internal Revenue Code are relevant to a given factual situation.
- c. Competency in assessing the likely tax implications of actions of a client.
- d. Competency in communicating analysis and advice regarding tax matters, both orally and in writing.

Second Tier/TAX Learning Outcome 3: Concentration graduates are expected to demonstrate at least novice-level understanding of, and competency in, engaging in in-depth study of specific issues in tax law.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of tax law, policy, and procedure.
- b. Competency in tax research.
- c. Competency in written analysis of issues in tax law.

FOR ALL GRADUATES EARNING WORKPLACE LAW CONCENTRATION

All graduates are expected to achieve all of the First Tier Learning Outcomes. In addition, all students who earn a concentration are expected to achieve additional learning outcomes specific to the particular concentration.

For the outcomes and specific criteria we describe below, we use the term “understanding” to refer to knowledge and the term “competency” to refer to skills. We expect graduates to attain at least a “novice-level” understanding and competence. By “novice-level,” we mean a level of knowledge or skill expected of a very junior lawyer (e.g., a lawyer in the first or second year of practice) in that area of practice.

Second Tier/WP Learning Outcome 1: Concentration graduates are expected to demonstrate at least a novice-level understanding of the legal theory, systems, and doctrine in the law involving the workplace.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- a. Understanding of the substantive law of public and private labor law in union and non-union-settings, employment law, employment discrimination, disability, worker compensation, and benefits.
- b. Understanding of administrative law and procedures, and the role of administrative agencies in the investigative stage of employment discrimination matters.
- c. Understanding of the federal and state laws and regulations governing labor law.
- d. Understanding of the role and impact of employment and labor law in the United States including current debates and controversies relating to workplace policies and practices.

Second Tier/WP Learning Outcome 2: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, conflict management, and managing relationships in the workplace law context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- Understanding of, and competency in, managing relationships with clients, other parties, and with counterparts.
- Competency in interviewing and counseling clients in workplace cases.
- Competency in managing conflict for effective problem-solving.
- Competency in listening and in communication modes and skills in different settings in the workplace law context.

Second Tier/WP Learning Outcome 3: Concentration graduates are expected to demonstrate at least a novice-level understanding of, and competency in, negotiation, arbitration, and litigation in the workplace context.

Specific Criteria

Concentration graduates are expected to demonstrate the following:

- Understanding of negotiation theory and terminology.
- Understanding of the role and practice of arbitration in the labor and employment context.
- Understanding of the ethical issues in employment negotiation, labor bargaining, arbitration, and trial practice.
- Competency in planning for and conducting effective negotiations in labor and employment cases, both with and without a mediator.
- Understanding of how to plan for and conduct effective arbitrations in labor and employment cases.
- Understanding of how to plan for and conduct effective litigation in labor and employment cases.

Pre-Law

Students or graduates who have an interest in law school should contact the Quinnipiac University pre-law adviser, via email at prelawadvising@qu.edu, for further information and should join the Pre-Law Society to learn more about the LSAT, law school admissions and financial aid.

Law School Qualifications

Students interested in attending law school must have and should work toward success in each of the following during undergraduate study:

- Undergraduate degree:** Student must have earned a bachelor (BA or BS) degree.
- Standardized test:** Completion of the Law School Admission Test (LSAT) is required by most American Bar Association–approved law schools; some others will accept the Graduate Record Examination (GRE) in addition to or in lieu of the LSAT.
- Curriculum:** No single pre-law course of study is required or recommended. Several broad objectives of pre-legal education, however, have been set forth by the Association of American Law Schools:
 - Developing fundamental reading skills;
 - The ability to think and write clearly and succinctly;
 - Logical reasoning and analytical skills; and
 - An appreciation of the social, political and economic foundations and complexities of our society.

Toward this end, every pre-law student should carefully choose, with the assistance of their academic adviser and/or the pre-law adviser, courses that will help build these skills and areas of knowledge.

Law School at Quinnipiac

Undergraduate students who wish to attend the School of Law at Quinnipiac may take one of two paths:

- Accelerated:** Participate in the Accelerated Dual-Degree Bachelor's/JD (3+3) program (p. 600) which allows students to complete their undergraduate and their law degree in six years, one year less than the traditional path.
- Traditional:** Obtain a BA or BS degree in four years followed by three years of law school. (NOTE: Attending Quinnipiac University as an undergraduate student does not guarantee admission to the Quinnipiac School of Law.)

Dual-Degree JD/MBA

In today's changing and competitive marketplace, there is an increasing need for lawyers who are fully trained in all aspects of business, management and administration. Students who are seeking a comprehensive and sophisticated business education for their legal or business careers will find the Dual-Degree JD/MBA program extremely attractive.

Taken separately, the MBA normally requires 45 credits, and the JD normally requires 86 credits. However, the dual-degree program requires only 33 business credits and 77 law credits, a savings of 20 credits.

Students may apply for acceptance to both the Law School and the MBA program and, upon completion of both programs, receive a business and a law degree. A student in the dual-degree program may not obtain either degree until the requirements for both have been met.

To enroll in the dual-degree program, a student must apply to and be accepted by both of the schools. Students may begin at either school. Each school assists in adapting the program to the needs and interests of the enrolled student by approving schedules and joint credits for courses. Students may apply to both schools before they actually begin classes. Students must file separate applications and take the Law School Admission Test (LSAT). Students who begin a single degree program either in the School of Law or the School of Business may apply to the other school at a later time (prior to the completion of degree requirements) to be considered for the dual-degree program.

Upon admission to the dual-degree program, the enrolled student must meet with the director of the MBA program and the associate dean for academic affairs of the Law School for academic counseling. Students may attend either full-time or part-time.

View the MBA curriculum (p. 705).

View the JD curriculum (p. 583).

Dual-Degree JD/MELP

Quinnipiac School of Law has partnered with Vermont Law School to offer students the exciting opportunity to earn a Dual-Degree Juris Doctor/Master of Environmental Law and Policy (JD/MELP). Students in the program earn their JD from Quinnipiac and their MELP from Vermont Law. The program can be completed in three academic years, the same amount of time typically needed to earn the JD degree alone.

This flexible program allows students to pursue their MELP coursework online or on campus during the summer. Students also complete a required MELP externship during the summer, which can be scheduled anywhere in the United States or abroad. A number of Quinnipiac law courses have been approved to satisfy the requirements of both programs. In addition, students will be allowed to transfer 6 credits of their Vermont Law MELP coursework toward their Quinnipiac JD graduation requirements.

The joint degree requires a 30-credit program (including required courses), comprising: Vermont Law MELP courses (14 credits); Vermont Law MELP externship (7 credits); and Quinnipiac Law courses (from approved course list) (up to 9 credits). Students will participate in the externship during the summer of their second year.

Dual-Degree JD/MERL

Quinnipiac School of Law has partnered with Vermont Law School to offer students the exciting opportunity to earn a Dual-Degree Juris Doctor/Master of Energy Regulation and Law (JD/MERL). Students in the program earn their JD from Quinnipiac and their MERL from Vermont Law. The program can be completed in three academic years, the same amount of time typically needed to earn the JD degree alone.

This flexible program allows students to pursue their MERL coursework online or on campus during the summer. A number of Quinnipiac law courses have been approved to satisfy the requirements of both programs. In addition, students will be allowed to transfer 6 credits of their Vermont Law MERL coursework toward their Quinnipiac JD graduation requirements.

The joint degree requires a 30-credit program (including required courses), comprising: Vermont Law MERL courses (12 credits); Vermont Law MERL Project/Writing Requirement courses; Energy Electives (6 credits) and Quinnipiac Law courses (from approved course list) (up to 9 credits).

Dual-Degree JD/MFALP

Quinnipiac School of Law has partnered with Vermont Law School to offer students the exciting opportunity to earn a Dual-Degree Juris Doctor/Master of Food and Agriculture Law and Policy (JD/MFALP). Students in the program earn their JD from Quinnipiac and their MFALP from Vermont Law. The program can be completed in three academic years, the same amount of time typically needed to earn the JD degree alone.

This flexible program allows students to pursue their MFALP coursework online or on campus during the summer. A number of Quinnipiac law courses have been approved to satisfy the requirements of both programs. In addition, students will be allowed to transfer 6 credits of their Vermont Law MFALP coursework toward their Quinnipiac JD graduation requirements.

The joint degree requires a 30-credit program (including required courses), comprising: Vermont Law MFALP courses (9 credits); Vermont Law MFALP Food and Agriculture elective courses (9 credits); general elective courses (3 credits); project/writing requirement courses (2 credit minimum); and Quinnipiac law courses (from approved course list) (up to 9 credits).

Dual-Degree JD/MSW

Program Contact: Carol R. Awasu (carol.awasu@qu.edu) 203-582-6433; Carolyn Kaas (carolyn.kaas@qu.edu) 203-582-3234

Students interested in earning both a JD degree and a Master of Social Work degree may earn both degrees on an accelerated basis by enrolling in the Dual-Degree JD/MSW program.

The two degree programs, if completed separately, require 146 credits – 86 for the JD and 60 for the MSW. Students in the dual-degree program are required to complete only 131 total credits. Dual-degree students earn 1) their JD with 77 law credits and 9 social work credits (from courses approved in advance by the law school associate dean for academic affairs); and 2) their MSW with 54 social work credits and 6 law credits (from courses approved by the MSW program director). The two programs, which require five years of study if taken separately, can be completed in 4½ years in the ordinary course, or in 4 calendar years if 11 law credits are earned during summer semesters.

Students must apply and be accepted separately to each program. Ideally, students would apply to both programs before starting either but a student enrolled in either program could, during the first year (and possibly later), apply for and be accepted to the other program. Upon admission to the dual-degree program, the enrolled student must meet with the MSW program director and the law school associate dean for academic affairs.

Students may begin their study in either program but must complete the first year in each program before any advanced courses can be taken in that program. To obtain either degree, students must complete all graduation requirements for both degrees, including the core upper-level law courses, legal writing requirements, lawyer professional responsibility course, experiential law credits and the social work field work requirements.

For more information on this program, see the Social Work page. (p. 807)

Civil Advocacy and Dispute Resolution

Students who earn the certificate for this concentration develop an understanding of a variety of advocacy methods, dispute resolution tools, and remedies, in an array of civil law contexts. Skill development focuses on litigation, negotiation, mediation and arbitration.

The civil advocacy and dispute resolution concentration lets you explore all the varied ways that lawyers help clients solve problems and resolve conflicts. You will hone your skills as a creative negotiator, as a wise adviser and as an effective courtroom litigator. You'll learn the theory and the practice of the different alternative methods to resolve disputes, make deals and reach settlements outside of court, such as mediation and arbitration. Most important, you can help us achieve our vision: to reimagine the law as a healing profession.

Our dispute resolution program was ranked 14th in the nation by U.S. News & World Report. Our Center on Dispute Resolution – with its Quinnipiac/Yale Workshop Speaker Series, training sessions and student-run Society for Dispute Resolution – are all valuable resources that are at your disposal. The center's programs offer you the opportunity to learn and train with practicing professionals in the field. The highly decorated student competition teams provide you the stage to hone your advocacy

skills through regional and national mock trial, moot court, negotiation, mediation and client counseling competitions.

After two semesters, you'll have the opportunity to practice what you are learning in the classroom in one of our legal clinics and in our diverse externship program. As a certified legal intern, you can counsel actual clients, negotiate, mediate cases and argue in courts.

For specific information on the program offerings, please contact:

Civil Advocacy and Dispute Resolution Concentration

Prerequisites

To be eligible for the Civil Advocacy and Dispute Resolution concentration, you must take LAWS 311 as one of your core electives. Credits for this course do not count toward the 21-credit concentration requirement, but the grade in this prerequisite does count toward the concentration GPA requirement.

Requirements

1. Coursework

To receive the certificate for this concentration, you must earn 21 civil advocacy and dispute resolution specialty credits, divided as follows (not all courses are offered every year):

Required Coursework

In addition to LAWS 311 (credits for which do not count toward the 21-credit requirement), you must take the following courses. Credits for these courses will count toward your 21-credit concentration requirement.

Code	Title	Credits
LAWS 315	Trial Practice Exp	2-3
LAWS 428	Negotiation	2-3
LAWS 515	Alternative Dispute Resolution Exp. 1	2-3

¹ In lieu of ADR, students may substitute LAWS 374 Introduction to Mediation and either LAWS 356 Arbitration or LAWS 683 Advocacy in Arbitration.

Remaining Credits

The balance of the credits are to be earned from the following advocacy and dispute resolution-related courses. Courses marked with an asterisk (*) are particularly recommended for this concentration. (Not all of these courses are offered every year.)

Code	Title	Credits
LAWS 114	Administrative Law (*)	3
LAWS 316	Advanced Trial Practice (*)	2
LAWS 338	Visual Persuasion in the Law Exp (*)	3

LAWS 347	Remedies (*)	3-4
LAWS 356	Arbitration (*)	3
LAWS 357	Federal Courts (*)	3
LAWS 372	Representation in Mediation Exp (*)	2
LAWS 374	Introduction to Mediation (*)	2
LAWS 438	Advanced Family Law II (*)	2-3
LAWS 539	Intro. to Dispute Res. in Healthcare (*)	2-3
LAWS 574	Pretrial Litigation in State Courts (*)	2-3
LAWS 599	Intro to Representing Clients (*)	2
LAWS 683	Advocacy in Arbitration Exp (*)	2-3
LAWS 686	Negotiation in Criminal Practice (*)	2

Other related courses:

LAWS 305	Federal Income Tax	4
LAWS 327	Labor Law	3
LAWS 370	Family Law	2-3
LAWS 371	Divorce and the Divorcing Family	2
LAWS 373	Products Liability	3
LAWS 384	Juvenile Law	3
LAWS 393	Business Planning	4
LAWS 431	Criminal Procedure - Adj.	3
LAWS 434	Employment Law	3
LAWS 435	Advanced Family Law I - S	2
LAWS 525	Moot Court I	1
LAWS 526	Moot Court II	1-2
LAWS 528	Moot Court III	1
LAWS 564	Poverty Law	2
LAWS 604	Medical Malpractice	2

Substantial-paper courses or independent study where the paper is devoted to an advocacy and/or dispute resolution topic approved by the concentration director.

Additional clinic or externship courses in addition to those required above, as approved by the concentration director.

Other courses or journal work as approved by the concentration director in consultation with the course instructor.

Competitions: The concentration director may deem participation in a noncredit competition in mock trial, negotiation or representing clients in mediation to satisfy the requirement of 1 or 2 credits of coursework in this category.

2. Clinical Requirement

At least 3 credits must be earned in a clinic and/or externship placement approved by the concentration director in consultation with the director of the relevant clinic or externship. Credits for IRC (LAWS 599) do not count toward this clinical requirement.

3. Writing Requirement

A substantial paper or a series of shorter writings that together comprise a substantial amount of written work on a topic or topics related to advocacy and/or dispute resolution. (If you write a substantial paper, you may use that paper to satisfy the law school advanced writing requirement, provided that you meet the guidelines for the advanced writing requirement as set forth in the Academic Regulations (p. 617),

section I.E.) The concentration director must approve the topic or topics for the written work used to satisfy this requirement. A paper written for a journal may qualify, if the concentration director approves the topic.

4. Honors

Students who achieve a GPA of 3.2 or better in the coursework used for the concentration will receive the certificate for the concentration with honors. A student may designate the grade in any course or paper as not counting toward the concentration GPA, so long as the course is not required for the concentration and the student meets the concentration requirements with another course or paper.

5. Waivers

Students who are interested in this concentration but fall short of specific credits or coursework may apply for a waiver of requirements, to be granted at the discretion of the concentration director and the associate dean of academic affairs.

Criminal Law and Advocacy

Students who earn the certificate for this concentration encounter a variety of experiences to help develop an understanding of criminal law and procedure in both a theoretical and practical context. They explore both the substantive criminal law as well as the constitutional overlay of criminal procedure. In addition, they experience aspects of criminal trial and motion work. Development focuses on advocacy skills: litigation, negotiation and other alternate dispute resolution methods that apply in a criminal context.

You'll develop cutting-edge trial skills, such as the innovative use of visual persuasion techniques in the courtroom, and you'll examine ethical issues unique to criminal practice settings. You'll experience the criminal justice system in action in our clinics and externships, which will refine your ability to engage in both prosecution and defense work. You can advocate for real clients at the trial or appellate levels, represent the government, or help judges in criminal cases. You also can work on national criminal justice reform projects, such as advocating for more humane treatment of children charged with crimes, or challenging the death penalty.

Your negotiation and litigation skills will be honed through participation in mock trials and courtroom simulations, and every year we host the Northeast Regional Criminal Justice Trial Advocacy Competition. Our active Criminal Law Society sponsors several networking events and activities focused on helping you connect with legal professionals.

 (Sarah.Russell@quinnipiac.edu)

Criminal Law and Advocacy Concentration Prerequisite

To be eligible for the Criminal Law and Advocacy Concentration, you must take Evidence (LAWS 311) as one of your core electives. Credits for this course do not count toward the 21-credit concentration requirement, but the grade in this prerequisite does count toward the concentration GPA requirement in determining whether or not the certificate is awarded with

honors. All students must also successfully complete the required course of Criminal Law (LAWS 113).

Requirements

1. Coursework

To receive the certificate for this concentration, you must earn 21 Criminal Law and Advocacy specialty credits, divided as follows (not all courses are offered every year):

Clinical Requirement:

You must earn at least 3 credits through participation in the following programs. No more than 6 clinical credits count toward the 21-credit requirement for the concentration, except with the permission of the concentration director. The credit allotted to coursework in conjunction with a clinic counts as a course credit, not as a clinic credit.

Code	Title	Credits
	Defense Appellate Clinic (LAWS 299 & LAWS 300)	6
	Prosecution Appellate Clinic (LAWS 301, LAWS 302, & LAWS 303)	6
	An externship placement at a site dedicated to criminal defense or prosecution	3-6
	A judicial externship placement in a court at which the director can certify has a significant criminal docket	3-6

Required Coursework:

In addition to LAWS 311 (credits for which do not count toward the 21-credit requirement), you must take the following courses. Credits for these courses will count toward your 21-credit concentration requirement.

Code	Title	Credits
LAWS 315	Trial Practice Exp	2-3
LAWS 431	Criminal Procedure - Adj.	3
LAWS 432	Criminal Procedure Inv.	3
	Select one of the following courses:	2-3
LAWS 428	Negotiation	
LAWS 515	Alternative Dispute Resolution Exp.	

The remaining credits needed to satisfy the requirements for this concentration should come from the following designated courses:

Code	Title	Credits
LAWS 292	Independent Research Project W	2
LAWS 293	Independent Research Project W	3
LAWS 315	Trial Practice Exp	2-3
LAWS 316	Advanced Trial Practice	2
LAWS 318	Mock Trial ²	1-2
LAWS 338	Visual Persuasion in the Law Exp	3
LAWS 360	International Criminal Law	3
LAWS 367	Counterterrorism Law	2
LAWS 384	Juvenile Law	3
LAWS 386	Domestic Violence: Law, Practice and Pol	2
LAWS 387	Advanced Juvenile Law: Delinquency Proceedings	2
LAWS 410	Theories of Punishment S,W	2
LAWS 412	Habeas Corpus	2

LAWS 423	State Constitutional Law	2-3
LAWS 429	International Human Rights	2
LAWS 515	Alternative Dispute Resolution Exp. 1	2-3
LAWS 525	Moot Court I ³	1
LAWS 551	Federal Criminal Law	2
LAWS 599	Intro to Representing Clients	2
LAWS 602	Law and Forensic Science	2
LAWS 615	Conn. Adjudicative Criminal Procedure	2
LAWS 636	Sentencing, Prisons, and Reentry	2

¹ Alternate Dispute Resolution interscholastic competitions (but not intramural) may count if the concentration director finds there is a substantial criminal law and/or criminal procedure component. The participation must be connected to the legal questions in roles such as advocate, problem drafter, etc. The efforts of organizers, coaches, schedulers, while extremely important, are not eligible for credit. (1, 2, or 3 credits)

² Mock trial interscholastic competitions (but not intramural) may count if the concentration director finds there is a substantial criminal law and/or criminal procedure component. The participation must be connected to the legal questions in roles such as litigator, problem drafter, etc. The efforts of organizers, coaches, and schedulers, while extremely important, are not eligible for credit. Participation in the legal aspects – i.e., litigator, problem drafter – of the Quinnipiac University School of Law Criminal Trial Advocacy Competition will count. (1, 2, or 3 credits)

³ Moot Court interscholastic competitions (but not intramural) may count if the concentration director finds there is a substantial criminal law and/or criminal procedure component. The participation must be connected to the legal questions in roles such as litigator, problem drafter, etc. The efforts of organizers, coaches, schedulers, while extremely important, are not eligible for credit. (1, 2, or 3 credits)

2. Writing Requirement

You must write a substantial paper (or a series of shorter writings that, taken together, comprise a substantial amount of written work) on a topic or topics related to Criminal Law or Procedure. (If you write a substantial paper, you may use that paper to satisfy the law school's Advanced Writing Requirement, as set forth in the Academic Regulations (p. 617), section I.E., as well as the Criminal Law and Advocacy certification program.) A paper written for a journal may qualify if the concentration director approves the topic. A brief written for a moot court competition or within an externship position may qualify if the student can attest that the work was his or her own. The concentration director must approve the topic and the format for the written work used to satisfy this requirement. Note: It is possible for completed work to count for more than one concentration if there is sufficient coverage of both subject matters.

3. Honors

Students who achieve a GPA of 3.2 or better in the coursework used for the concentration will receive certificate for the concentration with honors.

4. Options

If you have excess credits, you may designate any course or paper as not counting toward the concentration, so long as it is not required for the concentration, and you meet the concentration requirements with another course. If you have more than 21 credits, the concentration director will

count the courses with the highest grades in determining whether or not to bestow the honors designation. Note that the GPA calculation includes all courses required for the concentration, including LAWS 311 – Evidence.

5. Waiver

The concentration director and the associate dean for academic affairs may waive any requirement for the concentration (other than the GPA requirement), if both agree to do so. Any waiver requests must be submitted in writing with the application for the concentration.

Family Law

The Family Law concentration uses an innovative, interprofessional approach that gives you an opportunity to collaborate with other professionals – such as social workers – to develop creative solutions to potentially volatile cases. Because litigation is rarely the most appropriate course of action for families, you'll learn alternative methods of dispute resolution, including mediation and other negotiation and collaborative approaches that promote the abilities of families to thrive and communicate peacefully, well after the legal case has ended.

Quinnipiac's extensive clinic and externship courses let you go out in the field and serve family law clients while honing your skills. Our Family and Juvenile Law Society is a valuable resource for career development events and networking opportunities with lawyers in the field. And our nationally recognized Center on Dispute Resolution hosts a variety of symposia, professional workshops and special training sessions aimed at building sophisticated problem-solving skills that are particularly key in the practice of family law.

For specific information on the program offerings, please contact:

Professor Carolyn Wilkes Kaas
 Director of Experiential Education
 Director, Family Law Concentration
 Quinnipiac University School of Law
 275 Mount Carmel Avenue, Hamden, CT 06518
 Phone: 203-582-3234
 Fax: 203-582-3237
 Email: carolyn.kaas@qu.edu (carolyn.kaas@quinnipiac.edu)

Family Law Concentration

Prerequisites

To be eligible for the Family Law concentration, a student must take both LAWS 311 and LAWS 305 as two of the core electives. Credits for these courses do not count toward the 18-credit concentration requirement, but grades in these prerequisites do count toward the concentration GPA requirement.

Requirements

To receive the certificate for this concentration, a student must earn 18 family law credits, divided as follows (not all courses are offered every year):

1. Coursework

Required Coursework

In addition to LAWS 311 and LAWS 305 (credits for which do not count toward the 18-credit concentration requirement) a student must take the following courses. Credits for these courses will count toward the 18-credit concentration requirement:

Code	Title	Credits
LAWS 370	Family Law	2-3
LAWS 435	Advanced Family Law I - S	2-3
LAWS 438	Advanced Family Law II	2-3
LAWS 371	Divorce and the Divorcing Family	1-3
Select one of the following courses:		2-3
LAWS 372	Representation in Mediation Exp	
LAWS 374	Introduction to Mediation	
LAWS 428	Negotiation	
LAWS 515	Alternative Dispute Resolution Exp.	

Recommended Core Courses

(Not all of these are offered every year.)

Code	Title	Credits
LAWS 307	Trusts and Estates	3
LAWS 384	Juvenile Law	3
LAWS 385	Advanced Juvenile Law - Child Protection Practices	2
LAWS 386	Domestic Violence: Law, Practice and Pol	2
LAWS 387	Advanced Juvenile Law: Delinquency Proceedings	2
LAWS 388	Elder Law	2-3
LAWS 600	Law and Gender	2
LAWS 644	Elder Law Lab Exp	1-2
LAWS 646	Children, Social Science, and the Law	3
LAWS 684	Race, Child Welfare, and Juven	3
Other courses as approved by the concentration director in consultation with the course instructor.		

Remaining Credits

The balance of the credits, if any, are to be earned from the following family law–related courses, or from other core courses listed above. (Not all of these are offered every year.)

Code	Title	Credits
LAWS 114	Administrative Law	3
LAWS 205	Business Organizations	4
LAWS 292	Independent Research Project W	2
LAWS 293	Independent Research Project W	3
LAWS 313	Advanced Individual Income Tax	3
LAWS 314	Employee Benefits	2
LAWS 315	Trial Practice Exp	2-3
LAWS 369	Real Estate Transactions	3
LAWS 396	Bankruptcy and Creditors' Rights	3
LAWS 471	Education Law	2
LAWS 549	Bioethics	3
LAWS 564	Poverty Law	2
LAWS 572	Immigrat'n & Natural'n Law	3
LAWS 599	Intro to Representing Clients	2
Substantial paper courses where the paper is devoted to a family or juvenile law topic approved by the concentration director.		
LAWS 525	Moot Court I ¹	1

LAWS 526	Moot Court II ¹	1-2
LAWS 528	Moot Court III ¹	1

Other courses or journal work as approved by the concentration director in consultation with the course instructor.

¹ Moot Court credits, if the student participates in the Family Law Moot Court Competition (1, 2, or 3)

2. Clinical Requirement

At least 3, but no more than 3, of the 18 family law credits must be earned in the Civil Justice Clinic and/or in a family and/or juvenile law–related externship placement. Credits for IRC (LAWS 599) do not count toward the clinical requirement. (A student may exceed 3 credits for the clinical course but may only count 3 credits toward the clinical requirement of this concentration.)

- The concentration director will determine the family-law status of any given clinic or externship.
- The clinical requirement may be waived if the student has substantial family or juvenile law work experience. The concentration director will make this determination.
- If the clinical requirement is waived, the student must still earn 18 credits elsewhere within the concentration to receive the concentration.

3. Writing Requirement

A student must write a substantial paper – or a series of shorter writings that together comprise a substantial amount of written work – on a topic or topics related to family or juvenile law. (If a student writes a substantial paper, it may be used to satisfy the Advanced Writing Requirement, provided that the guidelines are met as set forth in the Academic Regulations (p. 617), section I.E.) The concentration director must approve the topic or topics for the written work used to satisfy this requirement. A paper written for a journal may qualify, if the concentration director approves the topic.

4. Honors

Students who achieve a GPA of 3.2 or better in the coursework used for the concentration will receive the certificate for the concentration with honors.

5. Options

A student may designate any course or paper as not counting toward the concentration, so long as it is not required for the concentration and the student meets the concentration requirements with another course or paper.

6. Waiver

The concentration director and the associate dean for academic affairs may waive any requirements for the concentration (other than the GPA requirement), if they both agree to do so.

Health Law

This concentration offers a comprehensive foundation in the areas in which health law intersects with business, public policy and a variety of federal regulations concerning the pharmaceutical and biomedical industries.

You'll examine key topics such as bioethics, public health law, health care fraud and disability law, and you'll explore methods of dispute resolution used specifically in health care. We also give you the flexibility to chart your own path through the program and select courses that most interest you and that provide the skills to assist the type of clientele you plan to represent.

Because the School of Law shares a campus with our medical, nursing and health sciences schools, you'll also have opportunities for interprofessional collaboration and access to a wide range of research materials related to the health care industry. Starting in your second year, you can participate in our diverse clinic and externship courses, and be part of our medical-legal partnership, or our Health Law Externship, where you may be placed with the Department of Public Health, a hospital or pharmaceutical legal department, or a law firm practicing health law. And you may apply to write for Quinnipiac's Health Law Journal, join the Health Law Society and attend our speaker series that invites prominent figures from the health law field to campus.

For specific information on the concentration offerings, please contact:

Professor Leonard Dwarica
 Quinnipiac University School of Law
 275 Mount Carmel Avenue
 Hamden, CT 06518
 Telephone: 203-582-3879
 Fax: 203-582-3244
 Email: leonard.dwarica@qu.edu (leonard.dwarica@quinnipiac.edu)

Health Law Concentration Requirements

(effective for students entering their second year in Fall 2018 or later):

To be eligible for the Health Law Concentration Certificate, a student must complete 21 credits as described below.

- Students must take Administrative Law (LAWS 114) (3 credits) and either Business Planning (LAWS 393) (4 credits) or Business Organizations (LAWS 205) (4 credits). Credits for these courses will not count toward the 21-credit concentration requirement, but grades will count toward the GPA honors requirement. If a student elects to take both Business Organizations and Business Planning, the higher grade will count towards the GPA honors requirement, but the credits will not.
- In addition, students must take Health Law LAWS 345) (3 credits). Credits for Health Law will count toward the 21-credit concentration requirement and grades will count toward the GPA honors requirement.
- These three courses do not have to be taken prior to taking other courses in the concentration, but it is strongly recommended that Administrative Law and Health Law be taken in a full-time student's second year, if possible. Part-time students should try to take them in the second semester of their second year or the first semester of their third year.

1. Coursework

In addition to the above requirements, in order to receive the Certificate for this Concentration, a student must earn an additional eighteen (18) health law specialty credits, divided as follows:

Core Health Law Courses:

At least 12 credits must be earned from the Core Health Law courses. (Not all of these courses are offered every year.)

Code	Title	Credits
LAWS 320	Public Health Law	3
LAWS 350	Health Care Antitrust	3-4
LAWS 352	Health Care Business Transactions	3
LAWS 409	Drug and Device Law	2-3
LAWS 539	Intro. to Dispute Res. in Healthcare	2-3
LAWS 545	Healthcare and Hospital Administration	2
LAWS 549	Bioethics	3
LAWS 601	Managed Health Care	2
LAWS 625	Health Information Privacy and Security	2-3
LAWS 633	Intellectual Property in Health Care	2
LAWS 685	Health Policy	3

Non-Core Health Law Courses:

The balance of the credits (to 18), if any, may be earned from the Core Health Law courses above or from the following Non-Core Health Law courses. (Not all of these courses are offered every year.)

Code	Title	Credits
LAWS 292	Independent Research Project W	2
LAWS 293	Independent Research Project W	3
LAWS 340	Corporate Compliance in Health Care Industry ¹	3
LAWS 344	Law, Science and Technology	3
LAWS 349	Antitrust	3
LAWS 370	Family Law	3
LAWS 373	Products Liability	3
LAWS 379	Environmental Law	3
LAWS 384	Juvenile Law	3
LAWS 388	Elder Law	2-3
LAWS 414	Food Law	2-3
LAWS 450	Nonprofit Organizations	2
LAWS 457	Health Care Compliance Law ¹	3
LAWS 587	Disability Law	2
LAWS 588 & LAWS 589	Health Law Journal I and Health Law Journal II	3
LAWS 564	Poverty Law	2
LAWS 604	Medical Malpractice	2
LAWS 676	Anatomy for Lawyers	2

¹ Online course.

2. Recommended Client-Based Courses

Students should consider what group(s) of clients they plan to represent in their practice of health law. The following recommendations are intended to assist the students in determining which courses are best suited toward different types of clients. These are only recommendations. Students are free to choose any courses they wish, as long as they take the required concentration courses and achieve the required 21 credits, as described above.

Code	Title	Credits
Providers (e.g., hospitals, physician groups, nursing homes)		
LAWS 549	Bioethics	3
LAWS 350	Health Care Antitrust	3-4
LAWS 625	Health Information Privacy and Security	2-3
LAWS 539	Intro. to Dispute Res. in Healthcare	2-3
LAWS 320	Public Health Law	3
LAWS 545	Healthcare and Hospital Administration	2
LAWS 676	Anatomy for Lawyers	2
LAWS 604	Medical Malpractice	2
LAWS 601	Managed Health Care	2
LAWS 352	Health Care Business Transactions	3
LAWS 450	Nonprofit Organizations	2
LAWS 457	Health Care Compliance Law	3
LAWS 340	Corporate Compliance in Health Care Industry	3

Code	Title	Credits
Business & Governmental Entities (e.g., insurance carriers, pharmaceutical and device manufacturers, biotechnology research/manufacturing entities, regulatory agencies)		
LAWS 340	Corporate Compliance in Health Care Industry	3
LAWS 344	Law, Science and Technology	3
LAWS 350	Health Care Antitrust	3-4
LAWS 352	Health Care Business Transactions	3
LAWS 373	Products Liability	3
LAWS 409	Drug and Device Law	2-3
LAWS 414	Food Law	2-3
LAWS 457	Health Care Compliance Law	3
LAWS 539	Intro. to Dispute Res. in Healthcare	2-3
LAWS 601	Managed Health Care	2
LAWS 625	Health Information Privacy and Security	2-3
LAWS 633	Intellectual Property in Health Care	2

Code	Title	Credits
Private Parties (e.g., patients, LLCs, individual practitioners)		
LAWS 350	Health Care Antitrust	3-4
LAWS 370	Family Law	3
LAWS 373	Products Liability	3
LAWS 384	Juvenile Law	3
LAWS 388	Elder Law	2-3
LAWS 549	Bioethics	3
LAWS 587	Disability Law	2
LAWS 604	Medical Malpractice	2
LAWS 676	Anatomy for Lawyers	2

3. Clinical Requirement

Students must earn at least 3 credits (not including IRC) in a Clinic (i.e., Civil Justice Clinic, Tax Clinic, Prosecution Appellate Clinic, Defense Appellate Clinic) and/or in a health law externship. These credits are in addition to the basic 21-credit concentration requirement.

- Determination of the "health law" status of any given externship will be made by the concentration director and the director of field placement programs.
- The clinic/externship requirement will be waived only in rare circumstances, and only if the student has substantial health law-related work experience or substantial experience in the health care field. This determination will be made by the concentration director. *A full-time student seeking a waiver from the clinic/externship requirement must apply for the waiver no later than the beginning of the first semester of their third year.*
- If the clinical requirement is waived, the student must earn the 3 credits by taking an additional course(s) in the concentration.

4. Writing Requirement

The substantial paper written to fulfill the Advanced Writing Requirement (p. 617) must be on an approved health law topic. The topic must be approved, in advance, by the concentration director unless the paper is written in connection with one of the listed "core" courses or for the Quinnipiac Health Law Journal. A paper written for another journal may qualify, if the topic is approved, in advance, by the concentration director.

5. Honors

Students who achieve a GPA of 3.2 or better in the coursework used for the concentration will receive the certificate for the concentration with honors.

6. Waiver of Requirements

The concentration director and the associate dean for academic affairs may waive any requirements for the concentration (other than the GPA requirement), if they both agree to do so.

Intellectual Property

Students in our intellectual property concentration investigate key issues related to patents, trademarks, copyrighting and trade secrets.

These students develop a firm grounding in a variety of fields that intellectual property law affects by exploring topics such as computer and internet law, patent litigation, sports law and cybersecurity law. They also can participate in an externship within a law firm or corporate legal department to gain practical experience regarding the types of intellectual property work that lawyers do, and to gain insight in regard to protecting the creativity of artists, musicians and inventors.

Students in the IP concentration also can utilize externships to gain exposure to Connecticut's extensive base of biomedical, aerospace and entertainment industries, which are fertile sectors for lawyers who specialize in IP law. Through such an externship opportunity, the student can learn IP law in a hands-on manner, while contributing to social needs at the intersection of law, the arts and technology.

For specific information on the program offerings, please contact:

Professor Dale Carlson
Director, Intellectual Property Concentration
Quinnipiac University School of Law

275 Mount Carmel Avenue
Hamden, CT 06518

Intellectual Property Concentration

Prerequisite

To be eligible for the intellectual property concentration, a student must take Administrative Law (LAWS 114) as one of the core electives. Credit for that course does not count toward the 18-credit concentration requirement.

Requirements:

1. Coursework

To receive the certificate for this concentration, a student must earn 18 intellectual property specialty credits, divided as follows (not all courses are offered every year):

Required Coursework

At least 15 of the 18 credits must be earned from the following list of basic intellectual property courses:

Code	Title	Credits
Required Course		
LAWS 331	Intellectual Property	3-4
Choose from the following basic intellectual property courses:		
LAWS 116	Unfair and Deceptive Trade Practices	3
LAWS 117	Trademarks and Copyright in the Digital Age	2
LAWS 292	Independent Research Project W	2
LAWS 293	Independent Research Project W	3
LAWS 329	Communications Laws	3
LAWS 332	Patent Law	2
LAWS 333	Advanced Patents	2-3
LAWS 335	Patent Litigation	2
LAWS 417	Intellectual Property Externship ¹	2-5
LAWS 437	Computer and Internet Law	2
LAWS 506	Entertainment Law	2
LAWS 509	Sports Law	2
LAWS 596	Franchise Law	3

¹ Externship with intellectual property emphasis – up to 6 credits with written approval by the concentration director. Independent research credit with an intellectual property emphasis is also available with written approval by the concentration director and the supervising professor.

Remaining Credits

Code	Title	Credits
Choose from the following courses related to intellectual property:		
LAWS 344	Law, Science and Technology	3
LAWS 349	Antitrust	3
LAWS 350	Health Care Antitrust	3-4

LAWS 409	Drug and Device Law	2-3
LAWS 430	International Trade	3
LAWS 516	International Business Trans.	3
LAWS 633	Intellectual Property in Health Care	2
LAWS 650	Information Privacy Law	2-3

Other coursework or journal work as approved by the concentration director

IP-related courses taken at other law schools or in summer programs (with approval of the concentration director) up to 5

2. Writing Requirement

Students must write a substantial paper—or a series of shorter writings that together comprise the equivalent of a substantial paper—on a topic or topics related to intellectual property. (If a student writes a substantial paper, a student may use that paper to satisfy the Advanced Writing Requirement, provided that the paper meets the guidelines set forth in the Academic Regulations (p. 617), section I.E.) The concentration director must approve the topic or topics for the written work used to satisfy this requirement. A paper written for a journal may qualify if the concentration director approves the topic and the paper as written.

3. Honors

Students who achieve a GPA of 3.2 or better in the coursework used for the concentration will receive the certificate for the concentration with honors.

4. Opt-Out Option

A student may designate any course or paper as not counting toward the concentration, so long as it is not required for the concentration and the student meets the concentration requirements with another course or paper.

5. Waiver

The concentration director and the associate dean for academic affairs may waive any requirements for the concentration (other than the GPA requirement for honors), if they both agree to do so.

International Law and Policy

Students who earn the certificate for this concentration not only develop an understanding of one or more of the major areas of International Law and Policy, such as International Human Rights, Dispute Resolution, Environmental, Health, Tax and Criminal Law, but also get the opportunity to develop a literacy in the language of international relations, which can prepare them to advocate, negotiate, mediate and litigate globally as well as locally. Skill development focuses on cross-cultural understanding, negotiation and a general proficiency in law on an international stage. As outlined below, the requisites for the International Law and Policy concentration include coursework, an international experience and a writing component.

International Law and Policy Concentration

Requirements

1. Coursework

Certificate recipients must earn 18 international law credits from the following categories of courses (not all courses are offered every year), including at least 11 credits from the following required and core courses.

Code	Title	Credits
Required courses		
LAWS 361	International Law	3
LAWS 516	International Business Trans.	3
Core courses		
LAWS 360	International Criminal Law	3
LAWS 363	International Comparative Health Law	2
LAWS 429	International Human Rights	2
LAWS 430	International Trade	3
LAWS 477	International Tax	2
LAWS 517	Int'l Humanitarian Law of Armed Conflict	2
LAWS 634	Int'l Human Rights Law & Trans. Justice	1-2

Elective courses

Certificate recipients must earn the balance of their 18 credits from the following courses (not all of these courses are offered every year). In addition, a concentration co-director may approve, on an ad hoc basis, courses that, in a particular semester, have a significant international content.

LAWS 362	National Security Law	2-3
LAWS 367	Counterterrorism Law	2
LAWS 374	Introduction to Mediation	2
LAWS 379	Environmental Law	3
LAWS 428	Negotiation	2-3
LAWS 437	Computer and Internet Law	2
LAWS 515	Alternative Dispute Resolution Exp.	2-3
LAWS 572	Immigrat'n & Natural'n Law	3

Other university courses

You may apply toward the 18 credits you need to earn for the International Law and Policy concentration up to 6 credits earned in other Quinnipiac University departments. You must obtain the permission of the professor teaching the course, a concentration co-director, and the law school's associate dean for academic affairs before enrolling in these courses.

EC 350	International Economics	3
IB 201	Globalization and International Business	3
IB 311	International Marketing	3
IB 324	Negotiating Internationally	3

PL 337	Human Rights: Theory and Practice (PO 337)	3
PO 211	Introduction to International Relations	3
PO 311	Topics in International Relations	3
PO 331	Topics in Comparative Government	3
PO 321	Comparative Government	3

Modern Languages

You may apply up to 6 credits of modern language study toward your concentration requirements.

2. International Experience Requirement

Concentration earners must also complete one of these international experiences:

- Participation in the World Summit of Nobel Peace Laureates, in conjunction with the International Human Rights Law and Transitional Justice course
- Participation in the Law School's delegation to the Oxford University Human Rights and Humanitarian Action Seminar
- Participation in the Law School's delegation to the annual Human Rights and Humanitarian Action Seminar at Yale, Quinnipiac, and the United Nations
- Participation in the Law School/International Human Rights Law Society Nicaragua experience
- Participation in the Law School's summer program at Trinity College in Dublin, Ireland (the 6 credits from this program apply toward the concentration requirements)
- Domestic or international externship or other experiences approved by both a concentration co-director and the associate dean for academic affairs; if an externship, the placement must also be approved by the externship professor

3. Writing Requirement

Students must complete a paper of a quality that would satisfy the Advanced Writing Requirement (p. 617) and that addresses an international law topic approved by a concentration co-director. A concentration co-director must approve the topic in advance, unless the paper is written in connection with one of the listed required or core courses. A paper written for a journal may qualify if a concentration co-director approves the topic in advance.

4. Honors

Students who achieve a GPA of 3.2 or better in the coursework used for the concentration will receive the certificate for the concentration with honors.

5. Options

A student may designate any course or paper as not counting toward the concentration, so long as it is not required for the concentration and the student meets the concentration requirements with another course or paper.

6. Waiver

A concentration co-director and the associate dean for academic affairs may waive any requirements for the concentration (other than the GPA requirement), if they both agree to do so.

Tax Law

Tax attorneys work to ensure that clients understand the tax implications of business and personal transactions, maximizing tax savings in a

manner that is ethical and complies with the tax laws. The knowledge you'll gain and skill sets you'll develop in our program will make you an invaluable resource, not only to law firms but to government agencies, accounting firms and businesses of all types. You'll study the structure of the current income tax system and become familiar with statutes, regulations, case law and legislative history, and apply them to tax planning and tax controversies. You'll also consider the importance of tax policy and ethics.

While studying the nuances of tax law, you can put your skills into practice in our Tax Clinic – the oldest continuously operating clinic of its kind in the country – or through an externship with a judge, tax attorney or the Internal Revenue Service, or by assisting community residents with income tax preparation through our Tax Law Society's Volunteer Income Tax Assistance program.

For specific information on the program offerings, please contact:

Professor Jeffrey A. Cooper
Associate Dean for Faculty Research and Development
Director, Tax Concentration
Quinnipiac University School of Law
275 Mount Carmel Avenue, Hamden, CT 06518

Email: jeffrey.cooper@qu.edu

Tax Law Concentration

(Updated effective September 1, 2020)

Requirements

To receive the certificate for this concentration, you must earn 20 tax credits (consisting of 17 credits in tax and related coursework and 3 credits of clinical/externship work) and meet all of the other concentration requirements. In addition, you must take Federal Income Tax (LAWS 305) as one of your core electives. Credits for LAWS 305 do not count toward the 20-credit concentration requirement, but the grade in this prerequisite does count toward the GPA requirement for honors.

1. Required Coursework

In addition to Federal Income Tax (LAWS 305) (credits for which do not count toward the 20-credit requirement), you must take at least 17 credits from the following lists of courses, all of which count toward the 20-credit requirement for the concentration.

Tax Courses

At least 11 of the credits used for the concentration must come from the following list of tax courses. (Note: Not all of these courses are offered every year.)

Code	Title	Credits
LAWS 292	Independent Research Project W ¹	2
LAWS 293	Independent Research Project W ¹	3
LAWS 309	Estate and Gift Taxation	2
LAWS 312	Partnership Tax	2-3
LAWS 313	Advanced Individual Income Tax	3
LAWS 314	Employee Benefits	2
LAWS 393	Business Planning	4
LAWS 395	Corporate Tax	2
LAWS 450	Nonprofit Organizations	2
LAWS 454	Advanced Corp. Tax	2

LAWS 475	Tax Procedure - Civil	2
LAWS 477	International Tax	2
LAWS 504	Tax Policy- S, W	2
LAWS 519	State & Local Tax	2
LAWS 580	Taxation of Bus. Enterprises	4
LAWS 581	Tax Research - S,W ¹	2
LAWS 631	Financial Planning: Principles and Taxat	2-3
LAWS 670	Tax Deals Workshop	2

¹ Independent research with tax emphasis (with written approval of concentration director and supervising professor).

Related Courses

Up to 6 credits used for the concentration may come from the following list of "Related Courses." (Note: Not all of these courses are offered every year.)

Code	Title	Credits
LAWS 205	Business Organizations	4
LAWS 307	Trusts and Estates	3
LAWS 355	Corporate Finance	3
LAWS 369	Real Estate Transactions	3
LAWS 370	Family Law	2-3
LAWS 435	Advanced Family Law I - S	2
LAWS 505	Mergers & Acquisitions	2
LAWS 516	International Business Trans.	3
LAWS 628	Estate Planning & Drafting	2

2. Clinical Requirement

At least 3 credits must be earned through participation in the Tax Clinic and/or externship placement approved by the concentration director. No more than 3 credits count toward the 20-credit requirement for the concentration, except with permission of the concentration director in consultation with the director of the clinic or externship. The director of the clinic may waive IRC as a requirement for the Tax Clinic. If a student does enroll in IRC, credits for it will not count toward the clinical requirement.

If a student meets this requirement through an externship placement, the seminar portion of the externship DOES NOT count toward the 3 required clinical credits. If a student meets this requirement through the Tax Clinic, ONE CREDIT of the seminar portion of the externship counts toward the 3 required clinical credits.

The concentration director may waive the clinical requirement if the student has substantial tax law work experience. If the concentration director waives the clinical requirement, the student must earn additional credits in tax courses (or any related courses specifically allowed by the concentration director) to qualify for the concentration.

3. Writing Requirement

A student must write a substantial paper – or a series of shorter writings that together comprise a substantial amount of written work – on a topic or topics related to tax. (If a student writes a substantial paper, the student may use that paper to satisfy the School of Law's advanced writing requirement, provided that the work meets the guidelines for the advanced writing requirement as set forth in the academic catalog Academic Regulations (p. 617), section I.D.) The topic or topics for the written work used to satisfy this requirement must be approved by

the concentration director. A paper written for a journal may qualify, if the topic is approved by the concentration director.

4. Honors

Students who achieve a GPA of 3.2 or better in the coursework used for the concentration will receive the certificate for the concentration with honors. A student may designate any course or paper as not counting toward the concentration, so long as it is not specifically required for the concentration, and the student meets the concentration requirements with another course or paper.

5. Waiver

The concentration director and the associate dean for academic affairs may waive any requirements for the concentration (other than the GPA requirement), if they both agree to do so.

Workplace Law

Students who earn the certificate for this concentration develop an understanding of a variety of workplace law principles and remedies, in an array of civil law contexts involving employment law, employment discrimination law, labor law, arbitration, mediation, negotiation and administrative law.

Workplace law is a dynamic and challenging field that affects about 140 million civilian workers and their employers. Specializing in this field opens the door to working with large government agencies such as the U.S. Department of Labor, the Commission on Human Rights and the National Labor Relations Board. You'll also build the legal foundation you need to represent unions or corporations, or to start a private practice.

A substantial component of workplace law involves settling disputes, and Quinnipiac is uniquely positioned to ensure that you have a competitive advantage in that area. Our Center on Dispute Resolution's training and its Quinnipiac/Yale Workshop on Dispute Resolution are both valuable assets for our law students. The center holds workshops, sponsors prominent speaking events on campus and offers opportunities to train with lawyers in the field. You can also gain practical experience participating in national and regional mock trial and dispute resolution competitions.

In our Civil Justice Clinic, you'll have opportunities to represent real clients with cases relating to unemployment and unpaid wages. And in our employment and labor externship program, you'll perform the work that workplace lawyers do, whether you choose a law firm, a government agency, or work in-house at a corporation. Because this concentration offers a wide variety of courses, you can individualize your experience and focus on a specific area in workplace law that interests you, such as mediation and arbitration, discrimination law or workers' compensation.

For specific information on the program offerings, please contact:

Professor Brad Saxton
 Director, Workplace Law Concentration
 Quinnipiac University School of Law
 275 Mount Carmel Avenue
 Hamden, CT 06518
 Phone: 203-582-3642
 Email: brad.saxton@qu.edu

Workplace Law Concentration Requirements

1. Coursework

To receive the certificate for this concentration, you must take Evidence (LAWS 311) and Administrative Law (LAWS 114) as two of your four required core electives, plus 21 credits of workplace law courses as specified below. Credits for Evidence and Administrative Law do not count toward the 21-credit concentration requirement, but the grades in these courses do count toward the concentration GPA requirement. (Note: Not all courses are offered every year).

Required Courses

In addition to Evidence (LAWS 311) and Administrative Law (LAWS 114), you must take the following courses, which will count toward the 21 required credits:

Code	Title	Credits
LAWS 434	Employment Law	3
LAWS 426	Employment Discrimination Law	3
LAWS 327	Labor Law	3
LAWS 515	Alternative Dispute Resolution Exp. or LAWS 42 Negotiation	2-3

Core Courses

In addition to the required courses, you must also take at least two of the following core workplace law courses:

Code	Title	Credits
LAWS 314	Employee Benefits	2
LAWS 356	Arbitration	2-3
LAWS 372	Representation in Mediation Exp	2
LAWS 428	Negotiation	2-3
LAWS 508	Worker's Compensation	2
LAWS 587	Disability Law	2

Remaining Credits

The balance of the credits is to be earned from the following courses, if you have not already fulfilled the 21-credit requirement from the courses listed above:

Code	Title	Credits
LAWS 205	Business Organizations	4
LAWS 315	Trial Practice Exp	2-3
LAWS 338	Visual Persuasion in the Law Exp	3
LAWS 347	Remedies	3-4
LAWS 357	Federal Courts	3
LAWS 572	Immigrat'n & Natural'n Law	3
LAWS 574	Pretrial Litigation in State Courts	2-3

Independent Research Project, where the paper is devoted to a workplace law topic approved by the concentration director.

Clinical or externship courses in addition to those required below, as approved by the concentration director.

Other courses or journal work as approved by the concentration director in consultation with the course instructor.

2. Clinical Requirement

At least 3 credits counting toward the 21-credit requirement must be earned in one or more clinic and/or externship placements approved by the concentration director in consultation with the director of the relevant clinic or externship.

3. Writing Requirement

You must complete a substantial paper or a series of shorter writings that together comprise a substantial amount of written work on a topic or topics related to Workplace Law. If you write a substantial paper, you may also use that paper toward your Advanced Writing Requirement. The concentration director must approve the topic or topics for any written work used to satisfy this requirement. A paper written for a journal may qualify if the concentration director approves the topic and the paper meets the guidelines for satisfying the substantial paper portion of the Advanced Writing Requirement (see Academic Regulations (p. 617)).

4. Honors

Students who achieve a GPA of 3.2 or better in the coursework used to satisfy the concentration requirements will receive the concentration with honors. A student may designate the grade in any course or paper as not counting toward the concentration GPA if the course is not required for the concentration and the student meets the concentration requirements with another course or paper.

5. Waiver

Students who fall short of specific credits or coursework needed to satisfy the concentration requirements (other than the GPA requirement) may apply for a waiver of requirements, to be granted at the discretion of the concentration director and the associate dean for academic affairs.

Clinics and Externship Courses

Beginning in the second year, students may further their individual learning and career goals by enrolling in one or more of the many clinics and externship (field placement) courses that are part of the Law School's upper-level curriculum. These courses help students to develop as lawyers by providing them with opportunities to gain practical lawyering experience in real-life settings and encouraging them to reflect on the role of lawyers, as they learn from their work as lawyers-in-training. The ability to enroll in a clinic or externship is guaranteed for every student, although not necessarily in the student's first choice of course or semester. Students must apply and be accepted before registering for a clinic or externship.

To be eligible for these courses, students must have completed 30 credits (including LAWS 111 and LAWS 112, Legal Skills I & II). They also must take any pre- or corequisite courses. Each course has a seminar component (with the exception of some of the advanced clinical courses). Some seminars meet twice weekly, some once weekly, and others once every two weeks. Students earn both in-class (seminar) and out-of-class (casework/fieldwork) credits. Some courses also satisfy part of the Advanced Writing Requirement.

LAWS 599, Introduction to Representing Clients (IRC), a 2-credit simulation course, is a pre- or corequisite for some clinic and externship courses (except for the Appellate Clinic and the Judicial, Legislative and Mediation Externships). IRC is suggested but not required for Civil Justice Clinic and Tax Clinic. IRC is designed to prepare students for individual client representation and work in other practice settings. Students explore the lawyer's role and develop interviewing, counseling and negotiation skills by representing each other in mock cases.

Law Clinics

The Legal Clinic is an in-house law firm run by the School of Law, offering free legal services in a variety of practice areas to low-income people living in the neighboring communities. The law clinic courses that comprise the Legal Clinic (Civil Justice Clinic and Tax Clinic) are one-semester courses that students may take for 4 to 6 credits and are taught by full-time faculty members. Faculty members may invite a small number of Civil Justice Clinic and Tax Clinic students to take a second-semester course called Advanced Clinic. Other law clinics that are not part of the Legal Clinic offer students alternative scheduling and are taught by experienced practitioners serving as clinical faculty. The Defense Appellate Clinic is a year-long course, for a total of 6 credits, in which students brief and argue appeals in criminal cases. Evening Clinic Projects are one-semester courses for 3 or 4 credits and are designed to permit part-time students to perform casework in the evening, although full-time students may enroll as well. In all in-house clinics, students perform most of their work at the law school, under the direct supervision of a member of the clinical faculty, who is the attorney of record for the client(s).

Defense Appellate Clinic

(LAWS 299 & LAWS 300)

Civil Justice Clinic

(LAWS 294)

Evening Clinic: Legal Ethics Project

(LAWS 626)

Evening Clinic: Veterans Law Project

(LAWS 627)

Tax Clinic

(LAWS 295 & LAWS 301)

Advanced Clinic

(LAWS 611)

Externship Courses

In the externship (or field placement) courses, students work off campus under the supervision of experienced lawyers, judges, legislators, policymakers and mediators at established placements in law offices, legal services organizations, public interest advocacy organizations, state agencies, corporate legal departments and courthouses throughout the state. Faculty members select or approve the sites, place the individual students, oversee the on-site supervision process and teach the seminar components of the programs, but do not serve as attorneys for placement-site clients. Externships are usually taken for one semester. Some students spend an additional semester in a similar or different placement, in a 1- to 6-credit externship course (Field Placement II).

All first-time externs come together in a joint, mandatory 1-credit graded seminar, which meets approximately every other week for two hours. Legislative Externship is the only course with a separate class.

In addition to the prerequisites listed, students may be required or encouraged to complete additional courses prior to placement. Placement options may depend upon the number of credits the student elects. Judicial externs earn automatic short paper credit; other externs may earn short paper credit with faculty approval.

All fieldwork programs require hours at the placement according to the following schedule:

3 credits (2 out-of-class field credits): 10 hours/week; 150 hours/semester

4 credits (3 out-of-class field credits): 14 hours/week; 200 hours/semester

5 credits (4 out-of-class field credits): 18 hours/week; 250 hours/semester

6 credits (5 out-of-class field credits): 22 hours/week; 300 hours/semester

Note: Students may not drop an externship after the placement process has begun without written permission of the instructor (see Academic Regulations (p. 617), section V.B., Withdrawal from a Course). Once placement has been arranged, students may drop an externship only for good cause.

Externship courses are divided into two categories: those courses organized by type of placement setting and those categorized by type of law practices at the setting.

Externship Courses Based on Type of Placement Setting

Corporate Counsel Externship

(LAWS 527)

Judicial Externship

(LAWS 296)

Legal Services Externship

(LAWS 607)

Legislative Externship

(LAWS 464)

Mediation Externship

(LAWS 523)

Public Interest Externship

(LAWS 520)

Semester in Practice Externship

Externship placements are also available in remote locations, approved by the externship professor and associate dean for academic affairs, as a "Semester in Practice." Students may earn up to 10 fieldwork credits for the time spent at the placement and must be enrolled in either Externship Seminar or Advanced Externship Seminar, in which the student will participate online (either synchronously or asynchronously) for an additional credit. Students may enroll in the university's "QU in LA Law" program or may arrange for their own placement in any national or international location (for instance, recent placements have been approved in Cape Town, South Africa), in any subject area or type of placement, with the approval of the externship professor. Semester in Practice externships are most feasible in the third year. Note: Participation in this externship does not change or waive any other graduation requirements, nor does it extend the cap of 10 fieldwork

credits that may count toward graduation. Interested students should plan ahead and contact the externship professor far in advance to apply.

Externship Courses Based on Subject Matter

Business Law Externship

(LAWS 415)

Criminal Justice Externship

(LAWS 404)

Employment Law Externship

(LAWS 444)

Environmental Law Externship

(LAWS 446)

Family and Juvenile Law Externship

(LAWS 521)

Health Law Externship

(LAWS 416)

Intellectual Property Externship

(LAWS 417)

Sports and Entertainment Law Externship

(LAWS 442)

Tax Law Externship

(LAWS 443)

Field Placement II

(LAWS 200)

Advanced Externship Seminar

(LAWS 579)

LLM in Health Law

Admission is limited to graduates of ABA-accredited law schools who possess a strong record of academic achievement and/or of achievement in practice.

LLM candidates are required to complete 24 credits, at least 18 of which are earned in designated health law courses. Of those 18 credits, 3 are in a required advanced research/thesis course that culminates in the writing of a master's thesis of length and quality suitable for law review publication.

Six of the 24 credits may be earned in non-health law courses, subject to the approval of the program director. Students in the LLM program may not take courses that substantially duplicate those completed in their JD program studies. LLM candidates must maintain a 2.80 GPA.

Summer Program Abroad

Trinity College

Dublin, Ireland

Quinnipiac University School of Law offers an ABA-approved summer program at Trinity College Dublin, one of Ireland's premier institutions of higher education. This program provides an introduction to the Irish legal system and Irish constitutional law as well as a variety of classes in Irish, comparative and international law.

Located in the heart of Dublin, Trinity is the constituent college of the University of Dublin, one of Europe's oldest universities, steeped in history and tradition. Trinity College Law Library, which has holdings in Irish, British and European law, has recently expanded its holding to include North American law. The college's historic Old Library contains not only the Book of Kells, a world-famous volume of ninth-century illuminated manuscripts of the gospels, but an unparalleled collection of books, art and artifacts relating to Irish history.

Enrollment in the program is limited and is open to students who have satisfactorily completed one year of full-time or part-time study at an ABA-approved or state-accredited law school and are in good academic standing. Students are responsible for securing approval, in advance, from their own law school to transfer credit and are encouraged to check with the registrar at their home institution to determine whether residency requirements are satisfied. Early application is strongly encouraged.

It is the applicants' responsibility to check with their financial aid office regarding filing requirements and processing deadlines if they are participating in the Ireland program. Generally, students must take at least 6 credits (three courses) in the summer to qualify for federal financial aid; no student is permitted to register for more than 6 credits.

Students are encouraged to live on campus during the program. Those who choose to stay off campus will be responsible for their own accommodations. Housing information is mailed to applicants upon acceptance into the program. All travel arrangements are the responsibility of the student.

Specific questions regarding the program can be directed to:

Professor William Dunlap
 Director of the Trinity Summer Program
 Quinnipiac University School of Law
 Phone: 203-582-3265
 Email: william.dunlap@qu.edu

Academic Regulations

Academic rules and regulations are subject to change by decision of the faculty at any time. Please also refer to the Student Conduct Code (p. 631) and the Honor Code (p. 625).

Academic Regulations

I. Requirements for Graduation

A. In General

To receive the JD degree, a student must meet all of the following requirements:

- Successfully complete all required courses, the core elective requirement, the Professional Skills Requirement (for students matriculating before Fall 2016 or the Experiential Learning Requirement (for students matriculating Fall 2016 or later).
- Receive credit for 86 credits.
- Achieve a cumulative grade point average of 2.0.

- Complete all requirements no sooner than 24 months and, except in extraordinary circumstances, no later than 84 months after a student has commenced law study at this law school or a law school from which this school accepted transfer credit.
- Satisfactorily complete the Advanced Writing Requirement (p. 619).
- Complete all work for the above requirements no later than the last day of examinations of the student's final semester.

B. Required Courses

1. Policy

Because it is important for all lawyers to share a core of common knowledge and skills, the faculty has prescribed a set of required courses (listed elsewhere in this catalog).

2. Course Sequences, Variances

Required courses must be successfully completed. They must be taken in the prescribed sequence (set forth elsewhere in this catalog) unless the student has petitioned for and been granted a variance prior to registration or prior to a change in registration. A student may, however, take a required course earlier than the prescribed semester without petitioning to do so. Authority to grant or deny such variances rests in the associate dean. Variances are granted in only the most extraordinary of circumstances. A student who has been given permission to postpone an exam in a required course must take the exam the next time the course is offered (excluding the summer term).

3. Successful Completion

A student who has received a failing grade in a required course must retake the course. Upon successful completion of this course, the student will receive a grade of "Pass," but will retain the previous grade of F as well. The "Pass" will have no numerical value and will not affect the CQPA (Cumulative Quality Point Average). The F will be included in the CQPA. The purpose of the rule is to insure at least minimal competency in all required courses but not to provide opportunities to improve a grade. The writing of a paper for a course in which the student failed an examination is prohibited.

C. Core Electives

In addition to Lawyers' Professional Responsibility, which remains required for all students, the upper-class curriculum consists of core electives and general electives. The core electives are: LAWS 114 Administrative Law, LAWS 205 Business Organizations, LAWS 323 Commercial Law, LAWS 311 Evidence, LAWS 305 Federal Income Tax, and LAWS 307 Trusts and Estates. General electives are all electives other than core electives.

1. Core Elective Requirement

Every student must take at least four of the core electives. One of the four must be either LAWS 323 Commercial Law or LAWS 305 Federal Income Tax. Students who take both Commercial Law and Federal Income Tax will be able to use both in satisfying the requirement of four.

2. Sequencing and Registration Priorities

Full-Time-Students

Full-time students must complete at least three of the core electives by the end of their second year. Moreover, students who are registering for their second year have priority with respect to all of the core electives. Thus, a student who takes fewer than six of the core electives in their second year will be able to register to take the remaining core elective(s) as a third-year student only after the

completion of registration by students who are registering to take core electives in their second year.

Part-time Students

Part-time students must complete at least two of the core electives by the end of their second year, and the rest of their core electives in the third and/or fourth years.

After registration in the fall, the associate dean for academic affairs will determine if there are any students who have not registered for enough core electives to complete at least three (for full-time students) or two (for part-time students) by the end of their second academic year. The associate dean will send a warning letter to such students, stating they have one week to register for sufficient core electives in the spring to total the required number for the year. If they have not done so by the deadline, the associate dean will register them for the number of core electives needed to fulfill the core elective requirement. Courses will be assigned solely in the discretion of the associate dean.

The associate dean's office is available to answer questions about the requirements and registration priorities.

3. Advice on Course Selection

Although only four of the core electives are required, the faculty recommends that students seriously consider taking all six, for the following reasons.

First, the faculty believes that these six courses are among the most important in the upper-class curriculum. Taking all six gives students exposure to a wide variety of legal areas and disciplines. In the past, students who have had summer jobs after their second years have often found that they were better prepared for their assignments than students from law schools with less extensive requirements.

Second, with the exception of LAWS 305 Federal Income Tax, the six courses cover some, though by no means all, of the most difficult material tested on most bar examinations. Taking all five of the other courses does not, of course, guarantee success on any bar examination, nor does taking all six guarantee success in practice. Moreover, different instructors may stress different aspects of the material and even different material in different sections of the courses. Yet students who take all six will thereby enhance their chances of passing a bar examination and will become sensitized to potential tax consequences of transactions and other activities in a wide variety of legal practice areas.

Third, all of the six courses provide foundations for other courses in the curriculum. In combination with the required first-year curriculum, they develop students' skills in statutory, administrative, and common-law reasoning. They also introduce students to many of the concepts that clients expect lawyers to understand.

Fourth, students' notions of where their interests lie often change with exposure to new material. In the past, many students who have entered the law school without definite career plans have discovered interests in areas covered in one or more of the six courses. Even students whose plans were definite at the outset have sometimes changed their minds and pursued careers in areas they discovered only when they took one of the six.

D. Experiential Learning Requirement

Each student must also satisfactorily complete "one or more experiential course(s) totaling at least 6 credits," as provided by current ABA Standard 303(a)(3) and related provisions. Certain courses are always designated as "experiential courses" that will satisfy the requirement. They are: all law clinics except Advanced Clinic; all externships including Field Placement II; Introduction to Representing Clients; Negotiation; Trial Practice and Advanced Trial Practice. Other courses that may satisfy this requirement, depending on the design choices that the particular professor makes, include: Advanced Family Law II: Courtroom Advocacy, Advanced Juvenile Law: Delinquency Proceedings, Alternative Dispute Resolution, Bankruptcy Lab, Commercial Transactions Workshop, Estate Planning and Drafting, Financial Planning: Principles and Taxation, Judicial Clerkship Seminar, Land Use Practicum, Representation in Mediation, and Visual Persuasion in the Law. (This list is subject to revision; each semester the registrar will designate which courses taught the following semester will satisfy the requirement.) Any paper(s) written in connection with a course or courses used to satisfy the Experiential Learning Requirement may be used to satisfy no more than three of the four papers required to satisfy the Advanced Writing Requirement.

E. Advanced Writing Requirement

1. The Requirement

To ensure continued development of those research and writing skills stressed in the first-year Legal Skills Program, each student must write at least four papers after the first year, preferably one each semester. At least one, the "substantial paper," must be at least 10-15 pages in length with a non-trivial research component. The three others constitute the "short paper" requirement. A student may not begin the advanced writing requirement before completing LAWS 111 Legal Skills I and LAWS 112 Legal Skills II.

2. Modes of Satisfaction

A student will ordinarily submit a paper as part of the work for a substantive or clinical course. The class schedule published each semester will indicate which courses automatically satisfy either a short paper or substantial paper requirement. Most elective courses that do not automatically satisfy a paper requirement will have a limited number of places for students who wish to write a paper for that course. Procedures for signing up for a paper are published each semester after the close of the add/drop period. The paper must count for at least 25 percent of the final grade for the course.

Ordinarily a student may not satisfy two paper requirements in the same semester. An exception will be made if a student takes more than one course that automatically satisfies a paper requirement. The associate dean may waive the one-paper limitation for good cause.

A member of the Law Review, the Probate Law Journal, or the Health Law Journal may satisfy the substantial paper requirement by preparing a long note or comment that the editorial board determines is of publishable quality. A student may satisfy the substantial paper requirement by submitting an appellate brief prepared for the intramural competition used to select members for the Moot Court Society. To satisfy the paper requirement, the brief must be critiqued and approved by a faculty member, who may require additional work on the paper. The faculty member must transmit the approval to the registrar. The student does not need

to be selected to the Moot Court Society in order for their brief to satisfy the requirement.

3. Full-Time Faculty

The courses designated as satisfying the advanced writing requirement shall ordinarily be limited to those taught by full-time faculty. In exceptional circumstances, the associate dean may approve the designation of a course taught by a part-time member of the faculty.

4. Duplicative Use

The principal part of any work prepared in satisfaction of any part of the writing requirement will be completed after the date that the topic is approved by the faculty supervisor. Any prior work on the topic, either research or writing, must be fully disclosed to the faculty supervisor prior to the approval of the topic.

Any paper written in connection with a course or courses used to satisfy the 6-credit Experiential Education Requirement may be used to satisfy a short paper requirement but not the substantial paper requirement.

F. Limit on Out-of-Class Credits

A law student may elect a maximum of 20 out-of-class credits toward the satisfaction of the 86 semester hours required to receive the JD, consisting of up to 10 fieldwork credits and up to 10 non-classroom credits, as follows:

1. Fieldwork Credits

A law student shall be permitted to elect a maximum of 10 fieldwork credits during the student's residency at the school. Fieldwork hours, as currently in the curriculum, include the following:

- a. all but 4 of the credits elected by a student taking for the first time an in-house clinic taught by a full-time faculty member (Civil Justice Clinic and Tax Clinic),
- b. all but 2 of the credits elected by a student taking Civil Justice Clinic (LAWS 294) after taking Tax Clinic (LAWS 295) or vice versa, and
- c. all but 2 of the credits elected by a student taking Appellate Clinic I - Defense (LAWS 299) or other clinic that is not taught by a full-time faculty member, and
- d. all but 1 of the credits for Advanced Clinic (LAWS 611), and
- e. all but 1 of the credits for an externship.

The rules of the various state bar examiners vary in respect to the number of fieldwork credits an applicant may present. Each student is responsible for making certain that their curriculum conforms to the requirements of the state or states to which the student may apply.

2. Non-Classroom Credits

In addition to any fieldwork credits under the preceding section, a law student shall be permitted to elect a maximum of 10 non-classroom credits during the student's residency at the school. Non-classroom credits, as currently in the curriculum, include the following: a. all credits elected for Moot Court, and b. all credits elected for Health Law Journal, Law Review or Probate Law Journal, and c. all credits elected for an Independent Research Project. The rules of the various state bar examiners vary in respect to the number of non-classroom credits an applicant may present. Each

student is responsible for making certain that their curriculum conforms to the requirements of the state or states to which the student may apply.

3. The following summarizes the limits on out-of-class credits:

Fieldwork Credits: 10 credits maximum

Externship (non-seminar work)

Advanced Clinic (non-seminar work)

All but 4 Civil Justice/Tax Clinic credits (if a student takes Civil Justice Clinic and then Tax Clinic (or vice versa), then all but 2 credits of the second clinic would be fieldwork credits)

Other clinics (non-seminar work)

Non-Classroom Credits: 10 credits maximum

Moot Court (3-credit limit)

Independent Research Project (6-credit limit)

Journal (4-credit limit)

Credits from other parts of university

G. Independent Research Project

The Independent Research Project permits a student to conduct a major research and writing project under the supervision of a full-time member of the Law School faculty. The paper must be at least 20 pages in length, exclusive of footnotes, per credit assigned.

A student who wishes to write an independent research paper must submit to the supervising faculty member a written proposal that demonstrates that he or she has a viable topic for research. The student must register for the course, with the approval of the faculty member, no later than the beginning of the student's next to last semester of school. Prior to registration, the student must present to the registrar a contract signed by the supervising faculty member. Contracts are available in the associate dean's office.

An Independent Research Project may satisfy the substantial paper component of the Advanced Writing Requirement (p. 619) if the project is for either 2 or 3 credits.

The Advanced Writing Requirement provision on Duplicative Use applies to the Independent Research Project.

No student shall register for more than one Independent Research Project in any semester or session, nor more than two Independent Research Projects for all semesters or sessions at the School. No student may complete more than one Independent Research Project with any individual faculty member. A student may enroll in an Independent Research Project during the same semester or session in which the student is enrolled in a clinical program, subject to the rules regarding Limit on Non-Classroom Credits, and provided that the student is enrolled in at least one other school course with regular class meetings. Only full-time law school faculty members may supervise an Independent Research Project. The associate dean may waive any of these requirements under exceptional circumstances.

H. Visitor and Credit-Transfer Policy

1. Visitor Policy

Students may by permission of the associate dean visit at another law school at any time after completing their second semester, provided that they complete at least two-thirds of their credits toward their degree at the Quinnipiac University School of Law. Such visiting status may be granted when it is determined that an exceptional change in the student's personal circumstances requires the student to relocate for the period of visiting status, or when some exceptional educational opportunity arises. Credits will be accepted for transfer only if the visiting student earns at least a C or its equivalent.

2. Transfer of Credits

This school will grant no more transfer credits for a course taken at another school than the number of credits granted for the course by that school. For students who transfer to this school, no credits are transferred in courses in which the student has earned a grade below C (2.0). The maximum number of credits a student can transfer from another law school is 30. For Quinnipiac students who visit at another law school, see paragraph 1 above. Credits accepted from other schools are transferred with the grade of "Pass."

3. Required Courses and Core Electives

Except with express written permission of the associate dean for reasons of hardship, students may not receive credit for required courses or core electives taken at other law schools. Written permission must be obtained before taking the course elsewhere.

4. Summer Sessions

Except with express written permission of the associate dean for reasons of hardship or sound academic reasons, students may count toward graduation no more than six credits earned in summer programs of other law schools. Written permission must be obtained before taking the course elsewhere.

I. Courses Taken at Another University School or College

For good cause shown, the associate dean may allow a student to register and earn credit toward the JD for courses taken in another school or college of the university. Law school credit will be pass/fail only, and given only for courses in which the student earns a grade of C (2.0) or better.

II. Grades, Grading and Examinations

A. Grades

The School records letter grades and attributes to those grades a quality point equivalent based upon a four-point system, as follows:

A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
F	0.0 and no credit

The school awards honors to graduates according to the following standards:

3.00 to 3.29 - cum laude

3.30 to 3.59 - magna cum laude

3.60 to 4.00 - summa cum laude

Several courses—including Civil Justice Clinic, Tax Clinic, Appellate Clinic and Externships—may be graded (at least in part) as Honors, High Pass, Pass, Low Pass, and Fail. Except for Fail, none of these grades has a numerical equivalent; hence they do not affect the student's Cumulative Quality Point Average. A Fail, however, counts as a 0.0 in calculating the CQPA. Grades for courses taken at other institutions for which credit is given shall be recorded as Pass, subject to the Transfer of Credits policy described in section I.G.2 above.

B. Grading

1. Anonymous Examinations

Except as specified hereunder, grades are based solely on written examinations that are graded anonymously. Approximately one week before examinations each semester, students must obtain from the registrar their examination number. That number must be used on all examinations in lieu of the student's name.

2. Extensive Written Work

Some courses involve extensive written work. Such work and such courses need not be graded anonymously. However, written final examinations in such courses are graded anonymously.

3. Clinical Courses

Clinical Courses and other courses involving extensive non-written performance need not be graded on the basis of anonymous examinations.

4. Classroom Performance

The faculty believes that student performance in the classroom is an essential part of the educational process. Faculty members have the authority to evaluate such performance and to raise or lower a student's final grade by one-third of a letter grade, based on such performance. A faculty member who implements this policy must announce it to their class beforehand. Failure to adopt such a policy at the beginning of a semester shall not stop the faculty member from doing so thereafter, provided the required notice is given.

5. Attendance and Class Preparation

Excessive student absences in a required course will lead to an administrative withdrawal from the course with a grade of F. (See section VI.A, Attendance Policy (p. 623), below.)

6. Grade Changes

After submitting grades in a course to the Registrar's Office, a faculty member has no authority to change a grade except upon satisfying the associate dean that the change is due to mathematical or other clerical error or egregious substantive error. No change requested by a student shall be approved unless the student has sought review from the instructor within three weeks after the posting of the grade, or within three weeks of the beginning of the semester immediately following, whichever is later. In no event shall a grade change be made after the last day of the semester next following the semester or session in which the examination was administered.

7. Grades of Incomplete

A student who is given a grade of Incomplete in a course, and has not completed all course requirements by the end of the

semester following that in which the Incomplete was given, shall automatically have the Incomplete converted to an F. Exceptions to this rule will be made only in cases of extreme hardship (such as extended illness), on proof of same satisfactory to the associate dean.

8. Grading Guidelines

The recommended median grade in required courses (Contracts, Torts, Civil Procedure, Criminal Law, Constitutional Law, Property, and Legal Skills I & II) is C+ or B-. The recommended median grade in core electives (Tax, Business Organizations, Evidence, Administrative Law, Commercial Law, and Trusts and Estates) and in Lawyers' Professional Responsibility is B- or B. Faculty may deviate from these recommended medians after consulting with the associate dean. There are no recommended medians for other courses.

C. Examinations

1. Honor Code

The following honor code pledge will be attached to every examination, take-home and in-class. Students must sign the pledge prior to taking the examination.

HONOR CODE PLEDGE

"On my honor, I pledge that I will follow the Honor Code regarding this examination. Specifically, I pledge that I have not given or received, and will not give or receive, prohibited assistance on this examination, and that I will neither work on nor retain this examination after the time allotted has elapsed. I understand that it is my duty to report any conduct that I know constitutes a violation of the Honor Code."

Signature (please use examination number, not your name):

Date:

Course:

Professor:

2. When Taken; Excuses

(a) Examinations must be taken at the time and place specified unless the student is excused by the associate dean on account of illness or for other sufficient reason. Where possible, the student shall secure the associate dean's written permission prior to the date of the examination. **To preserve anonymity, the student must not notify the instructor.** In the event of an emergency that makes prior written approval impractical, the student shall notify the associate dean as soon as possible of their inability to take the examination at the scheduled time.

(b) A student who becomes ill during an examination and is unable to complete the examination may, in the discretion of the associate dean, be permitted to take the examination in the same course the next time it is offered, provided the student has notified the associate dean or delegate before the end of the examination.

(c) A student who has three or more examinations within a 24-hour period may, with the permission of the associate dean, postpone one of the exams until later in the examination period.

3. Rescheduling of Examinations

If the associate dean has excused a student from taking an examination at the scheduled time, the associate dean may, with the concurrence of the instructor, allow the student to take the

same examination at a later time. In no event may a student take an examination prior to the scheduled time.

4. Deferred Examinations

If the associate dean has excused a student from taking an examination, but the student has not been permitted to take the same examination at a later time under the preceding section, the student will be permitted to take a different examination at a time and place to be determined by the instructor, but in no event later than the end of the examination period in the semester in which the course is next offered.

5. Reexaminations

The school does not permit reexaminations.

D. Class Ranking Policy

1. In general

- 1L Students: Students who attempted the full-time course load of 30 credits during the academic year are ranked together as full-time students. Students who attempted fewer than 30 credits are ranked together as part-time students.
- 2L Students: Full-time and part-time are ranked together in one 2L ranking.
- 3L and 4L Students: Full-time and part-time are ranked together in one 3L/4L ranking.

2. For determining eligibility for law journals

- Selection of candidates for the Law Review, Probate, and Health Law Journals will take place twice a year, after the fall and the spring semesters. The eligible pool of students shall include those students who at the selection point have attained at least 23 credits as of the conclusion of the immediately preceding semester.
- At each selection point:
- Students in the top 7% of the eligible pool of students will be invited to walk on to the journal of their choice.
- Students in the next 8% of the eligible pool of students will be invited to walk on to their choice of either the Health Law Journal or the Probate Law Journal.
- Students in the top 50% of the eligible pool of students will be eligible to be selected to join the Law Review through the write-on competition.
- Any student in the eligible pool of students who has attained a cumulative GPA of 2.0 or higher at the selection point will be eligible to be selected to join the Health Law Journal or the Probate Law Journal through the write-on competition. However, to be selected to join either of these journals, a student who is not in the top 50% of the eligible pool of students shall be required to meet a heightened standard in the write-on competition.

III. Course Loads

A. Full-Time Distinguished from Part-Time

1. Fall and Spring Semesters

A full-time student for American Bar Association purposes is one who enrolls in at least 13 credits per semester. The normal course load for full-time students, however, is 13-15 credits. A part-time student is one who enrolls in 8-12 credits per semester. Written permission of the associate dean is required to deviate from these norms.

2. Summer Session

No student may register for more than eight credits in a Quinnipiac summer session. A part-time student (one who is employed for

more than 20 hours per week) may not register for more than 6 credits in a summer session. (See sections I.G.3 and I.G.4 above regarding summer credits taken at other institutions.)

B. Transfer Between Day and Evening Programs

Evening students may take day courses, and full-time day students may take evening courses only on a space-available basis.

C. Outside Employment

Full-time students must devote substantially all of their working hours to the study of law. For purposes of this rule, a full-time student is one who is enrolled for 13 or more credits. A student may not work in excess of 20 hours per week while attending school on a full-time basis. This restriction applies during the summer in the same manner as during the normal year if the student is enrolled for a summer session.

D. Maximum Number of Credits per Semester

Pursuant to ABA requirements, a student may enroll for no more than 17 credits in a semester and no more than 8 credits in a summer session. The law school has no authority to waive this rule.

IV. Continuance in Residence; Review for Academic Deficiency

A. Academic Deficiency; Minimum CQPA

1. Generally

Each student will be reviewed for academic deficiency at the end of every academic year. A student must maintain a minimum overall Cumulative Quality Point Average (CQPA) of 1.80 at the end of a year in which the student has attempted 17 or more credits, 1.90 at the end of a year in which the student has attempted 36 or more credits, and 2.00 at the end of a year and every year thereafter in which the student has attempted 54 or more credits.

2. Transfer Students

A student who transfers here from another law school must maintain a 1.9 CQPA in all courses taken here by the end of their second semester here (excluding summer school), and a 2.0 by the end of the second year and every year thereafter.

3. Discounting of Course with Most Detrimental Grade

If a student has not maintained the appropriate minimum CQPA, a second calculation will be performed. Removing from consideration the student's most detrimental grade, the student must have attained a 2.2 average in all remaining courses. The most detrimental grade is the one that most adversely affects the student's CQPA. This procedure of discounting the most detrimental grade will be repeated each semester, if necessary, so long as the student maintains a 2.2 CQPA in all other courses from the time he or she entered law school.

B. Dismissal

Any student falling below the required minimum CQPA will be dismissed automatically.

1. If the student has completed only two part-time or full-time semesters, the dismissal is final and there is no right of petition or appeal.
2. If the student has completed three or more semesters, the dismissal is final, with no right of petition or appeal, unless the student is within .05 of the minimum CQPA required to remain in residence. A student who is within .05 of the minimum CQPA may appeal the dismissal to the Academic Status Committee. The

appeal should be addressed to the chair of the Academic Status Committee, in care of the associate dean, and must be postmarked no later than 14 days after receipt of a letter from the associate dean notifying the student of their dismissal. If the student files an appeal, the dismissal will not become final until the committee has reviewed the case and denied the appeal. A student may apply for a leave of absence during the semester in which an appeal is pending before the committee. (See IV.C.) A student is allowed only one such appeal during the student's entire time at the school. If the committee grants the appeal and allows the student to remain in residence, the student will be reviewed at the end of the academic year and must have brought the CQPA up to the minimum required to remain in residence as of the later semester.

3. A student who has been academically dismissed after the second year or later may petition the Academic Status Committee for reinstatement. The committee may reinstate a student upon an affirmative showing that the student possesses the requisite ability, that there is a high probability that the student will successfully complete the course of study, and that the prior disqualification does not indicate a lack of capacity to complete the course of study. A student reinstated under this rule will lose all credit for the academic year in which the CQPA fell below the required level. The committee may impose such conditions as it deems appropriate. The decisions of the committee are final and not subject to appeal to the faculty as a whole.

4. No course, including summer courses, taken after a semester in which a student was dismissed automatically may count toward the student's CQPA. Even if the later course were to bring the CQPA above the average required to remain in residence, the student will be dismissed from the school and withdrawn from the later course(s) with a 100% tuition refund.

C. Leaves of Absence

Leaves of absence will be granted liberally by the associate dean to students who believe that they have problems that might interfere with academic performance.

V. Withdrawal from a Course

A. Written Permission of Associate Dean; When Required

A student may withdraw from a course only with the prior written permission of the associate dean in the following circumstances:

1. Withdrawal is from a required course, or
2. Withdrawal from the course would reduce the student's course load below the minimum required (see section III, Course Loads, above), or
3. Withdrawal is from a course in which the student missed more than 20% of the class hours scheduled in the course.

B. Instructor's Permission; When Required

A student may withdraw from a course only with the permission of the instructor in the following circumstances:

1. In a course in which students are assigned substantial presentations, a student may withdraw within two weeks of their assigned presentation only with the written permission of both the instructor and the associate dean.

2. In a clinical course, after the third week of the course a student may withdraw only with the permission of the instructor.

3. Externships

C. Withdrawal as of Right

In all other circumstances a student is entitled to withdraw from a course at any time during the first week of classes by using Student Planning. After the first week, a student must email the registrar. A student who has not followed this procedure has not withdrawn from a course.

VI. Attendance, Preparation, and Participation Policy

A. Statement of Law School Policy

The faculty believes that class attendance, preparation, and participation are critical elements of the educational process.

B. General Attendance Requirement

An instructor may withdraw a student who misses 20% of the class hours in any course. A student so withdrawn from a required course will also receive a grade of F in that course. For purposes of this rule, the term "required course" does not include the courses listed as core electives in Rule I.C. In making the decision to withdraw a student, the instructor may consider such factors as the number of absences and the legitimacy of the reasons for them. In calculating the number of absences, an instructor may not take into account absences from classes held at times other than in the published course schedule. The instructor may deem the failure to sign an attendance sheet as conclusive evidence of a student's absence if the instructor has notified students of this policy in writing no later than the first class.

C. Additional Rules for Clinical Courses

Students who are enrolled in clinics must appear personally on the first day of the semester or as may be required by the clinic faculty. Absences from clinic courses will be permitted only for illness and pressing personal matters (bereavement, illness in the family, placement interviews, legal matters, inter-law school competitions), and such absences must be made up. The faculty member supervising the clinic shall have the discretion to decide whether the circumstances justify an absence and when the absence shall be made up.

D. Notice

An instructor who withdraws a student shall notify the associate dean of the withdrawal no later than one week after the last class. The associate dean shall notify the student.

E. Constructive Absences

An instructor may mark absent a student who is inadequately prepared for class or refuses to participate when required to do so, whether or not the instructor requires the student to leave the classroom. The instructor must immediately advise the student that he or she has been marked absent.

F. Petitions

1. A student withdrawn from a course may petition the Academic Status Committee for reinstatement. If a student files such a petition, the withdrawal will not become final until the committee has reviewed the case and denied the petition. Attendance, preparation and participation requirements will remain in effect during the pendency of the petition. The committee may reinstate a student in the course if, after giving appropriate deference to the instructor's determination, the committee finds that the instructor's decision was not reasonable. In making its determination, the committee may consider any additional failures by the student in complying with the attendance, preparation, and participation

requirements that occur after the initial withdrawal and while the appeal is pending. In the event that the committee decides to grant the petition, it may impose such conditions upon reinstatement as it deems appropriate.

Upon request by the losing party, the committee shall issue a written statement explaining the basis for its ruling.

2. The committee's decision is final. Neither party may appeal the decision to the faculty. The committee may refer any matter to the faculty for review.

G. General Preparation Requirement

For each course, a student is expected to spend an amount of time on out-of-class work that satisfies the Law School's ABA Standard 310 Policy, attached as Appendix B to these regulations.

VII. Good Standing

To be in good standing, a student must have the minimum CQPA required under section IV.A.1 above and be current in their financial obligations to the law school.

Refund Policy

Refund Policy

A student may withdraw from one or more courses during the add/drop period by doing so on Student Planning. After the add/drop period, a student must contact the associate dean or registrar. A student who wishes to withdraw completely from the School of Law must submit a statement to that effect to the associate dean.

Refunds are based on Quinnipiac University Policy and the return of unearned Title IV funds as required by the U.S. Department of Education.

For purposes of clarification and for reference, the policies described below have been categorized into two groups:

- a. Quinnipiac University Policy
- b. Return of Unearned Title IV Funds – Federal Policy

Federal guidelines require that any unearned Title IV funds be returned to the program(s) that provided the aid. The required order of returning refunds is as follows: Title IV, HEA programs, other federal and state programs, university grants, private or institutional financial assistance and finally to the student. Examples of refund calculations are available upon request.

Quinnipiac University School of Law Refund Policy

The policy described below gives consideration to two groups:

- a. prior to the start of classes and
- b. after the start of classes

Refund Policies, Prior to the Start of Classes

A new incoming student who has rendered either of the \$400 or \$600 tuition deposits and then withdraws from the university will forfeit the deposits. In all instances noted above, any balance on the account, less financial aid, will be refunded.

Refund Policies, After the Start of Classes

Law students who withdraw from any of their classes after the published "Last Day for Late Registration/Schedule Changes" will not be entitled to any adjustment of their charges for tuition and fees.

Students who affect a complete withdrawal or leave of absence from the university, regardless of the reason, including medical, will be granted a pro-rata refund of tuition and fees, less an administrative fee of \$100. Late fees are non-refundable either in total or pro-rata. The prorata refunds will be computed on the following basis:

Fall and Spring Terms:

Withdrawal first week 80%
 Withdrawal second week 60%
 Withdrawal third week 40%
 Withdrawal fourth week 20%
 Withdrawal after fourth week 0%

Summer Term:

Withdrawal first week 80%
 Withdrawal second week 50%
 Withdrawal third week 30%
 Withdrawal fourth week 0%

The date of withdrawal for purposes of calculating the refund is the date on which the student makes written notice to the associate dean's office for withdrawal. No retroactive withdrawals are permitted for refund purposes. The refund schedule listed above is applied regardless of the reason for withdrawal, including medical reasons.

Dismissals and Suspensions

A student who is either dismissed or suspended by the university for any reason during either academic semester will receive a refund based on the applicable refund percentage in effect at the time of the student's dismissal or suspension (first four weeks). After the fourth academic week, the refund policy as stated above will be applied. In addition, a student who is dismissed or suspended will be charged all administrative fees and board fees as prescribed.

Payment Plan

Students using the university's payment plan who withdraw during the refund period (first four weeks) should note that their forfeiture will be computed on the full amount charged regarding tuition and fees, and not on the amount remitted via the payment plan. In addition, the \$75 service charge for using the payment plan will also be included in the list of charges. After the fourth week, the balance due under the payment plan will be due and payable on the date of withdrawal.

Return of Title IV Funds

In addition to the university's refund policy that prorates tuition charges during the first four weeks of the semester, the university is obliged to return to the federal government that portion of federal aid that is unearned. An award of Title IV funds is based on a payment period or term.

Please note: It is important to understand that if your withdrawal date is on or before the completion of 60 percent of the semester, "unearned aid" will result. If you have received a refund as a result of aid applied to your account prior to your withdrawal date, you will have a balance due the university on your student account.

A withdrawal requires the university to calculate the unearned portion of aid awarded as of the student's official withdrawal date.

The university must determine the following:

- The official date of withdrawal. A student must formally withdraw or request a leave of absence, in writing, to the associate dean of the law school. The date of withdrawal must be documented.
- The payment period, term identified.
- The aid that has been disbursed or could have been disbursed.
- The percentage of federal aid earned by the student as of the withdrawal date.
- The percentage of Title IV aid that has not been earned by the student.

The percentage of a payment period completed is determined by dividing the number of calendar days in the payment period into the number of calendar days completed as of the withdrawal date.

The university will notify the student if the student is eligible for a post withdrawal disbursement.

- The offer, (if eligible) of post withdrawal disbursement, will be made in writing within 30 days of the withdrawal date.
- The student must respond within 14 days of the notification.
- The university will disburse funds within 90 days of the date of withdrawal.
- If the student does not respond, no portion of the late disbursement that is not credited to the student's account will be disbursed.
- The student will be notified electronically or in writing of the outcome of the late disbursement.

The total amount of unearned assistance to be returned is the lesser of (a) the total amount disbursed minus the total amount earned or (b) the institutional charges time the percentage of aid unearned. The student is responsible for returning the remainder of unearned aid that is calculated by taking the total of unearned aid and subtracting the amount the university is required to return.

The student retains Title IV eligibility for 45 days during which the student must:

- Repay in full.
- Make satisfactory arrangements to repay the university.
- Make satisfactory arrangements to repay the U.S. Department of Education.

The university is required to report all overpayments to NSLDS and must report within 30 days after:

- The student takes timely action on the options offered.
- The student fails to repay the overpayment or sign an agreement with the university within a 45-day period.
- The student fails to meet the terms of the agreement signed with the school.

Title IV funds must be returned in the following order:

- Unsubsidized Federal Direct Loans
- Subsidized Federal Direct Loans
- Federal Direct Plus Loans
- Other Title IV assistance

Quinnipiac School of Law Honor Code

I. Statement of Purpose

Quinnipiac University School of Law operates under an Honor Code.¹ The legal profession is responsible for enforcing its own standards of conduct, and the School of Law operates accordingly. Law students are preparing for entry into a profession that requires ethical conduct and integrity of its members. In order for graduates to enter the profession, the school must certify that they are of good moral character. Accordingly, students at the School of Law are expected to abide by the standards of conduct contained in this Honor Code in their dealings with members of the School of Law community and in their personal affairs.

Each law student shall be responsible for the Honor Code's implementation. Students are therefore obligated not only to follow these standards of conduct, but also to take an active role in encouraging other students to respect them. As with the American Bar Association's *Model Rules of Professional Conduct*, the keystone of our Honor Code is self-regulation.

The Honor Code Committee will be responsible for administration of the Code. If in doubt as to whether past conduct triggers a duty to report under this code, students are encouraged to make appropriate inquiries of either the committee or a faculty member designated as a "confidential adviser" for purposes of this code and obligated to keep all information pertaining to an alleged violation confidential, except as otherwise provided in subsection IV.E(3). If in doubt as to whether future conduct would constitute a violation of this code, students are encouraged to make appropriate inquiries of their professors or, if necessary, the committee. This responsibility to inquire is analogous to the one that students will have in the future, as members of the bar, to make inquiries of the appropriate bar officials if in doubt as to whether particular conduct violates applicable rules of professional conduct.

The Honor Code is based on a common law approach rather than a statutory one. That is, behavior that is impermissible is not defined in exhaustive detail. Instead, broad categories are stated, followed by examples. The broad categories of acceptable behavior refer to standards of the academic world as well as to rules and regulations of the profession and of everyday life.

II. Jurisdiction

A. Persons Subject to this Code

This Honor Code applies to every student enrolled or matriculated in the School of Law, except as provided in subsection IV.AA of this Code ("Administration of Code After Graduation or Other Separation").

B. Matters Subject to this Code

(1) This Honor Code applies to *all academic matters*, including, but not limited to:

- (a) Any work performed for a course, writing program, or seminar, such as an examination, research, or other assignment;
- (b) Any work performed in connection with participation in an activity for which credit may be given, such as law review, moot court, or clinics and externships;
- (c) Any work performed in connection with participation in law-related competitions; and

(d) Any written or oral representation made with respect to academic achievement, such as a transcript, resume, educational record, or statement about grade point average or academic honors.

(2) This Honor Code applies to *non-academic matters* to the extent that they fall within the scope of Rule 8.4 of the ABA Model Rules of Professional Conduct.

C. Broad Construction; Overlapping Jurisdiction

This Honor Code shall be construed broadly in accordance with its Statement of Purpose. Any acts, whether undertaken within the School of Law, on university property, or elsewhere, are subject to all other applicable policies, procedures, rules, sanctions, and conditions of the School of Law and university. Thus, the institution of proceedings and results reached under this Honor Code shall not limit the authority of the School of Law or university, or its faculty or administrators, from enforcing all other applicable policies, procedures, rules, sanctions, and conditions. For example, nothing in this Honor Code shall limit the authority of: (a) the School of Law or university from acting administratively to protect public safety and the educational mission of the School of Law or university; (b) the School of Law from enforcing the Student Conduct Code; (c) the School of Law Admissions Committee from acting on any misrepresentation made in a student's application for admission; (d) School of Law faculty from lowering a student's grade or requiring the student to retake an examination; or (e) School of Law and University administrators from enforcing the law school's Sexual Harassment Policy. Likewise, enforcement of applicable policies, procedures, rules, sanctions, and conditions by the School of Law or university, or its faculty or administrators, shall not preclude the institution of proceedings or limit the results reached under this Honor Code.

D. Relationship to Rules of Bar Examining Committees and Similar Organizations.

The disclosures and reporting obligations required by this Code (for example, the "Duty to Disclose" and the "Duty to Report" under subsections III.C and IV.E(1) of this Code, respectively) are independent of the disclosures required of students, staff, and faculty by any bar examining committee or similar organization. Nothing in this Code shall expand, limit, or otherwise control the disclosures and reporting obligations required by any bar examining committee or similar organization. For example, a student's disclosure of a criminal conviction to the dean of the School of Law ("dean") pursuant to this code does not obviate the need for the student to disclose that conviction to a bar examining committee requesting such information. Similarly, nothing in this code shall prevent the dean from making any disclosures that may be required by a bar examining committee or similar organization.

III. Standards of Conduct

A. Honesty in Use of Ideas and Information

(1) *Inappropriate use of others' work.* In contexts in which citation is expected, a student may not use the words, thoughts, or ideas of another without attribution consistent with standard legal citation manuals (e.g., *ALWD Citation Manual* or *Bluebook*), so that they seem as if they are the student's own. This type of misconduct can take many forms. The most flagrant forms include a student's copying someone else's work word-for-word or turning in a paper written by another with the student's name as the author. Other examples include, but are not limited to, rewriting someone else's work with only minor changes, summarizing another's

work, or taking another person's ideas without acknowledging the source through proper attribution and citation.

Evidence that a student has inappropriately used the work of others includes, but is not limited to:

- (a) when significant sections of the paper match other sources and no attribution is given to those sources;
- (b) when any portion of the paper borrows heavily from a particular source, including the Internet — whether verbatim or paraphrased — and the source is not acknowledged; and
- (c) when a student fails to follow conventions for indicating direct quotations (e.g., when a paraphrase is too close to the original or when an actual direct quotation is not indicated). Failure to identify direct quotations is evidence of inappropriate usage regardless of whether the source is actually cited.

Students sometimes make minor mistakes in completing academic assignments. While one missing citation in a paper will, in most instances, be considered a careless mistake rather than inappropriate use of another's work, multiple instances of failing to provide proper attribution through quotation marks or citations are evidence that a student has inappropriately used the work of others. If in doubt as to whether citation is expected or what constitutes inappropriate use of others' work, a student should consult with the professor.

(2) *Cheating.* A student may not use or attempt to use prohibited materials or sources in connection with any academic matter. If in doubt as to what materials or sources are prohibited, a student should consult with the professor.

(3) *Prohibited assistance or collaboration.* A student may not give or receive prohibited aid on any academic matter. If in doubt as to what aid is prohibited, a student should consult with the professor.

(4) *Multiple submissions.* Except as provided below, a student may not submit work that the student has done in connection with any previous academic matter as if it were new and original work, nor may a student submit the same work in contemporaneous academic matters. Although professors occasionally may be willing to let students use previous work as the basis for new work, professors expect students to do new work for each class. A student seeking to submit a piece of work for more than one class must have the express prior approval of both professors. If in doubt as to what may constitute a multiple submission, a student should consult with both professors.

B. Honesty with Respect to Academic Achievement

A student may not lie about or misrepresent the student's work, academic records, credentials, or other academic matters or information. Examples of deception and misrepresentation include, but are not limited to, forging signatures, forging letters of recommendation, forging a transcript, falsifying internship or clinic documentation, falsifying pro bono records, and falsifying information in an application or on a resume.

C. Duty to Disclose

(1) *Failing to make timely disclosure of factual irregularities, discrepancies, and material omissions in admissions application.* A student has a continuing responsibility to ensure the completeness and correctness of the student's admissions application to the School of Law by disclosing to the associate dean for academic affairs any factual irregularities, discrepancies, or material omissions in the student's application from the time the student submits the application to the School of Law until the

time the student graduates. Disclosure must be made within thirty (30) business days of when the student actually or constructively knows of the irregularity, discrepancy, or omission.

(2) *Failure to make timely disclosure of charges, arrests, convictions, and formal accusations.* A student has an obligation to disclose any conviction on the student's admissions application to the School of Law. Furthermore, from the time the student submits an admissions application to the School of Law until the time the student graduates, a student has a continuing obligation to disclose to the associate dean for academic affairs any charge, arrest, or conviction, and any formal accusation that the student engaged in conduct involving dishonesty, fraud, deceit, harassment, or misrepresentation. When events requiring disclosure occur after submission of an admissions application, disclosure must be made within thirty (30) business days of such charge, arrest, conviction, or formal accusation.

D. Respect for Standards of Conduct

(1) *Failure to cooperate with administration of code.* Failure to cooperate with the administration of this code as set forth in Section IV ("Administration of Honor Code") is, itself, a violation of this code. Failure to cooperate with the administration of this code includes, but is not limited to, failing to report conduct that a student knows is a violation of this code or making an accusation with no reasonable grounds for believing that the accused student has violated this code.

(2) *Attempting to violate or facilitating a violation of code.* A student may not attempt to violate, or knowingly help someone else violate or attempt to violate, this Honor Code. Facilitating a violation includes, but is not limited to, giving someone work product to submit as his or her own or allowing someone to cheat from one's examination, research, or assignment.

E. Fair and Equal Access to the Education Process

(1) *Misappropriation of and damage to academic materials.* A student may not damage, misappropriate, or disable academic resources so that others cannot use them. This includes, but is not limited to, removing pages from books, stealing books or articles, and deleting or damaging computer files intended for others' use.

(2) *Inappropriate use of technology.* A student may not use network or computer access inappropriately. Examples include, but are not limited to: tampering with another student's account so that the student cannot complete or submit an assignment; stealing a student's work through electronic means; knowingly spreading a computer virus; or misusing a Westlaw or Lexis account.

(3) *Compromising examination security.* A student may not invade the security maintained for the preparation or storage of examinations, tamper with exam-making or exam-taking software, identify oneself on an exam without the express prior approval of the professor, or discuss any part of an examination with a student who has not yet taken that examination but is scheduled to do so.

(4) *Unfair Advantage.* A student may not commit any act that the student knows may give the student or another student an unfair advantage or may interfere with the education process. Examples of violations of this subsection include, but are not limited to: (a) falsification of hours on a project where the number of hours is a requisite for credit; (b) use of materials in a research project which are prohibited by the written assignment instructions; (c) use of unauthorized materials in the course of preparing for or taking an exam; (d) intentional dishonesty in oral arguments for Moot Court, Trial Practice courses, or other

scholastic competitions; (e) obtaining an unauthorized copy of or unauthorized information about an examination or other assignment prior to its distribution or facilitating another's attempt to do so; (f) continuing to write, edit, or otherwise work on an examination or other assignment when the time allotted has elapsed; and (g) misappropriating examinations or other assignments for any purpose after they are completed. If in doubt as to what may constitute an unfair advantage, a student should consult with the professor.

F. Compliance with Model Rules of Professional Conduct

As a prospective lawyer, a student must comply with Rule 8.4 of the ABA Model Rules of Professional Conduct. Any conduct that would bring sanctions under Rule 8.4 of the Model Rules violates the Honor Code. This includes, but is not limited to, engaging in conduct involving dishonesty, fraud, deceit, harassment, or misrepresentation; or committing a criminal act that reflects adversely on the lawyer's honesty, trustworthiness, or fitness as a lawyer in other respects. Relationship to fitness shall be construed in accordance with the Model Rules and relevant case law. Generally speaking, offenses involving violence, dishonesty, breach of trust, or serious interference with the administration of justice reflect adversely on one's fitness as a lawyer. A pattern of repeated offenses, even ones of minor significance when considered separately, can also reflect adversely on one's fitness as a lawyer.

IV. Administration of Honor Code

A. Notice of Honor Code; Honor Code Affirmation

Notice of this Honor Code shall be provided to each student upon his or her acceptance to the School of Law. Each student who enrolls at the School of Law must affirm as follows, both verbally and in a signed writing, and before beginning classes:

"I [state name], as a student entering Quinnipiac University School of Law, understand that I am joining an academic community and am embarking on a professional career. The School of Law and the legal profession share important values that are reflected in the School of Law's Honor Code. I have read this Code and will conduct my academic, professional, and personal life to honor the values reflected therein."

B. The Honor Code Pledge

Although the Honor Code applies generally to all students' actions, the submission of examinations presents a unique opportunity to reinforce its importance. Therefore, all students shall sign the following Honor Code Pledge, using their examination number.

"On my honor, I pledge that I will follow the Honor Code regarding this examination. Specifically, I pledge that I have not given or received, and will not give or receive, prohibited assistance on this examination, and that I will neither work on nor retain this examination after the time allotted has elapsed. I understand that it is my duty to report any conduct that I know constitutes a violation of the Honor Code."

C. Honor Code Committee

The Honor Code Committee shall consist of four (4) faculty members appointed by the dean at the beginning of each academic year, and eight (8) students chosen by the Student Bar Association ("SBA"), in any manner the SBA deems suitable, at the beginning of each academic year. The dean shall designate one faculty member as committee chair.

At the beginning of the semester, the dean shall designate one (1) additional faculty member as an alternate faculty member. The alternate

faculty member will serve on the committee if a faculty member on the committee becomes unable to serve for any reason. The SBA shall likewise designate one (1) alternate student to serve on the committee if a student on the committee becomes unable to serve for any reason.

D. Questions Regarding Future Conduct

If in doubt as to whether future conduct would constitute a violation of this code (e.g., whether a proposed act would constitute an unfair advantage), a student is encouraged to make appropriate inquiries of their professors or, if necessary, the committee.

E. Reporting Violations

(1) *Duty to Report.* A person who knows that a student has violated the Honor Code must report the alleged violation within a reasonable time to the associate dean for academic affairs or to any member of the Honor Code Committee. Any person who does not know – but has reasonable grounds for believing – that a student has violated the Honor Code may report the possible violation within a reasonable time to the associate dean for academic affairs or to any member of the Honor Code Committee. The associate dean or committee member (other than the Honor Code committee chair) shall not conduct an inquiry into the alleged violation but shall instead notify the Honor Code committee chair.

(2) *Inquiries of Suspected Violator Encouraged.* A student who observes or learns of an apparent violation is encouraged to make inquiries of the suspected violator. If an explanation is given that clears up the matter, i.e., the witnessing student believes there was no violation, this should end the matter.

(3) *Inquiries of "Confidential Adviser" or Honor Code Committee Members Encouraged.* A student who is uncertain whether past conduct triggers a duty to report under this code is encouraged to make appropriate inquiries of a faculty member who is designated as a "confidential adviser" for purposes of this code. A confidential adviser is obligated to keep all information pertaining to an alleged violation confidential, except that confidentiality is waived if: (a) an accused student invokes the confidential adviser's advice as a defense to an alleged violation; or (b) the alleged violation constitutes criminal conduct or a threat to public safety. At the beginning of each academic year, the dean shall designate two (2) faculty members who are not Honor Code committee members as "confidential advisers."

A student who is uncertain whether past conduct triggers a duty to report under this code may also make appropriate inquiries of the committee. Members of the committee are not confidential advisers; they have a duty under this code to report conduct they know constitutes a violation of the code.

F. Preliminary Inquiry/Reasonable Grounds Determination

Upon receipt pursuant to Section IV.E(1) of a report of an alleged Honor Code violation, the Honor Code committee chair shall conduct a preliminary inquiry to determine whether reasonable grounds exist to support the conclusion that the alleged or possible violation occurred. If the committee chair so concludes, the committee chair shall refer the matter as soon as possible to an Advocate Team, pursuant to Section IV.G. If the committee chair concludes that there are not reasonable grounds for concluding that the alleged violation occurred, the committee chair shall deem the matter concluded.

In conducting the preliminary inquiry required by this subsection IV.F, the Honor Code committee chair shall consult with the associate dean of academic affairs.

On a periodic basis, the Honor Code committee chair shall report to the Honor Code Committee on any recent matters that the chair deemed concluded after the chair's preliminary inquiry revealed no reasonable grounds for concluding that an alleged Honor Code violation had occurred.

G. Advocate Team and Faculty Adviser

The Advocate Team shall consist of two (2) students from the Honor Code Committee, both appointed by the committee chair in rotation. The Team shall be responsible for investigating alleged violations of the Honor Code; deciding whether to bring charges against the accused student; preparing and presenting the case against the accused student before a Hearing Panel; and structuring and conducting negotiations with the accused student, or with the student, private attorney, or other person assisting the accused student, after charges have been brought.

The committee chair shall also appoint a faculty member on the committee to serve as a faculty adviser to the Advocate Team. Under no circumstances shall the faculty adviser present the case against the accused student – that responsibility belongs to the Advocate Team alone.

H. Investigation and Charging Decision

The Advocate Team may investigate in any reasonable manner, including meeting with the accused student.

(1) *Request for Meeting and Advisement of Rights.* Before meeting with the accused student, the Advocate Team shall give him or her the following Request for Meeting and Advisement of Rights, in writing:

QUINNIPIAC UNIVERSITY SCHOOL OF LAW

HONOR CODE ADVOCATE TEAM

REQUEST FOR MEETING AND ADVISEMENT OF RIGHTS

As members of the Quinnipiac School of Law Honor Code Advocate Team, we are conducting an investigation into allegations that you violated the Honor Code. This is an investigation only, and no charges have been brought against you. As part of our investigation, we would like to speak with you about the alleged violations of the Honor Code.

You have the right to choose not to meet with us. If you choose not to meet with us, or if you choose to meet with us but refuse to answer questions, a Hearing Panel may treat your failure to cooperate as a basis for drawing adverse inferences.

You also have the right to have someone present at the meeting to assist you. In accordance with the Honor Code, you may secure assistance from any student, private attorney, or other individual you choose, provided that the person has familiarized himself or herself with the Honor Code. A law school faculty member, however, may not represent a student in an Honor Code matter.

If we decide to bring charges against you, anything you say at such a meeting may be used against you at an Honor Code Hearing. For the sake of convenience, we will record our meeting (if you agree to such a meeting), on a laptop.

Please complete the following and return to us no later than *[date]*. The failure to respond to this Request for Meeting in the time allotted

constitutes a failure to cooperate with administration of the Honor Code and is therefore, itself, a violation of the Code. If you have any questions about this Request, please contact us immediately.

I, *[name]*, have read and understand the QUSL Honor Code Advocate Team Request for Meeting and Advisement of Rights.

Check the appropriate box(es):

I do not wish to meet with the Honor Code Advocate Team.

I wish to meet with the Honor Code Advocate Team, and

I do not wish to be represented at the meeting; or

I wish to have the following person represent me at the meeting: *[name and contact information]*.

[sign name][date]

(2) *Consultation with faculty adviser.* Before bringing or declining to bring charges against the accused student, the Advocate Team shall consult with the faculty adviser. In the event that the faculty adviser and Advocate Team cannot agree on a course of conduct, the Advocate Team shall consult with the Honor Code committee chair, whose decision shall govern. If the chair determines that charges should be brought, the chair shall not serve on the Hearing Panel.

(3) *Decision to Bring Charges.* When the investigation discloses insufficient evidence of a violation, the Advocate Team shall promptly inform the Honor Code committee chair, in which case no charges shall be brought.

The Advocate Team may, in some circumstances and for good cause consistent with the interest of the School of Law community, decline to bring charges notwithstanding sufficient evidence of a violation. In such circumstances, the student's record shall reflect that disposition, including the Advocate Team's reasons for exercising its discretion to decline to bring charges. Factors that the Advocate Team may consider in exercising its discretion include, but are not limited to:

(a) the severity of the violation and extent of the harm caused by the violation;

(b) possible improper motives of the person who reported the alleged violation;

(c) reluctance of the person who reported the alleged violation to testify;

(d) self-reporting by the accused student;

(e) remedial action taken by or negotiated with the accused student;

(f) availability and likelihood of: (1) the institution of criminal proceedings against the accused student under state or federal law; or (2) the enforcement of other applicable policies, procedures, rules, sanctions, and conditions against the accused student by the School of Law or University, or its faculty or administrators; and

(g) the likelihood that the Hearing Panel will not find that the accused student violated the Honor Code.

(4) *Advocate Team's Disclosure Materials.* As soon as possible after deciding to bring charges, the Advocate Team shall prepare and give to the chair of the Honor Code Committee its disclosure materials. These materials shall consist of: a list of the witnesses who will be called

to testify against the accused student; brief (one- or two-sentence) summaries of the substance of their expected testimony; and copies of any documents to be offered in evidence against the accused student. The Advocate Team's disclosure materials shall also include a memo listing and offering to make available for examination by the accused student at a time and location to be agreed on by the parties any tangible objects to be offered in evidence, as well as any evidence known to the Advocate Team that tends to exonerate the accused student or mitigate the degree of culpability.

I. Honor Code Hearing Panel

If the Advocate Team decides to bring charges, the team shall promptly inform the Honor Code committee chair, who shall appoint an Honor Code Hearing Panel to hear and determine the matter. A Hearing Panel shall consist of one (1) faculty member from the committee and four (4) students from the committee, each appointed by the committee chair in rotation.

J. Assistance with Defense

Any student, private attorney, or other individual may – at the request of the accused student – assist the student in defense of the charges, provided that the person has familiarized himself or herself with the Honor Code. A law school faculty member, however, may not represent a student in an Honor Code matter. Moreover, any student who is not yet licensed to practice law cannot serve as the accused student's "attorney" in connection with an Honor Code matter. Any assisting student provides such assistance as part of the educational mission of the law school and not as the practice of law. All conversations between the accused student and the person assisting the accused are confidential.

K. Information Furnished to Accused Student

As soon as possible after receiving the Advocate Team's disclosure materials and notice that the Advocate Team has chosen to charge the accused student, the Honor Code committee chair shall give the accused student:

- (1) a Written Notice of Charges, setting forth the name of the accused student, the name of the accuser or accusers, the Honor Code provision(s) allegedly violated, and the nature of the charges with sufficient particularity to enable the accused student to answer them;
- (2) the Advocate Team's disclosure materials; and
- (3) a copy of the Honor Code.

The committee chair shall give these materials to the accused student in the manner most likely to provide the student with prompt notice.

L. Information Furnished to Advocate Team

The Written Notice of Charges shall require the accused student to file with the committee chair:

- (1) A written Answer admitting, denying, or admitting in part and denying in part the charges. An Answer should contain specific admissions or denials for each allegation of fact in the charge, and shall not contain only general denials;
- (2) Disclosure materials similar to that given to the accused student – i.e., a list of the witnesses who will be called to testify on behalf of the accused student; brief (one- or two-sentence) summaries of the substance of their expected testimony; copies of any documents to be offered in evidence in support of the accused student; and a memo listing and offering to make available for examination by the Advocate Team at

a time and location to be agreed on by the parties any tangible objects to be offered in evidence; and

- (3) A Written Statement of Accused responding to every allegation of fact in the charge that the accused student has denied in the Answer, and about which he or she has any information.

The Advocate Team may enter the answer, the accused student's disclosure materials, and, if applicable, the Written Statement of Accused into evidence at an Honor Code Hearing. The chair shall specify in the Written Notice of Charges a date on which these documents shall be due, but in no event shall the due date be less than ten (10) business days from the issuance of the Written Notice of Charges. The chair, upon request of the accused student and for good cause shown, may extend the time for filing these documents.

M. Continuing Duty to Disclose

If either the Advocate Team or the accused student intends to call a witness not already disclosed or offer into evidence documents or tangible objects not already disclosed, the Advocate Team or accused student will promptly make such disclosure to the other party consistent with subsections IV.H(4) ("Advocate Team's Disclosure Materials") and IV.L(2) ("Information Furnished to Advocate Team") of this Code. Likewise, the accused student and the Advocate Team shall correct or supplement any disclosure that either side learns to be false or incomplete.

There shall be no process prior to the hearing for ruling on disputes relating to this disclosure process. The Hearing Panel may, however, treat a failure to disclose or cooperate as a basis for excluding testimony or evidence, or for drawing adverse inferences.

N. Hearing

As soon as possible following the issuance of the Written Notice of Charges, but no earlier than ten (10) business days thereafter, the Honor Code Committee Chair shall schedule a hearing date. The chair shall provide the accused with notice of the date, place, and time of the Hearing. A record of the Hearing shall be made by audio or videotape recording, or stenographic means, as determined by the chair. The Hearing shall be completed no later than the end of the semester after the one in which the violation was reported, unless the chair, upon request of the accused student or Advocate Team and for good cause shown, grants a continuance. The hearing shall be open or closed at the election of the accused student, subject to the School of Law's need to maintain order. An accused student wishing a continuance, an open hearing, or both shall notify the committee in writing at least two (2) business days prior to the hearing date.

O. Rights of Accused Student

At the hearing, the accused student shall have the following rights:

- (1) To be assisted by a student, a private attorney retained by the accused, or other individual; provided, however, that a law school faculty member may not represent an accused student in an Honor Code matter.
- (2) In person or through his or her representative, to summon and present witnesses and other evidence on his or her behalf;
- (3) In person or through his or her representative, to confront and cross-examine the accuser and all other witnesses;

(4) To refuse to testify on his or her own behalf. If an accused student refuses to testify, or chooses to testify but refuses to answer questions, the Hearing Panel may draw a negative inference from the refusal.

(5) To bring to the attention of the Hearing Panel any facts or circumstances that would or would appear to compromise the impartiality of a member of the Panel. Any member of the panel who knows of such circumstances, whether or not presented by the student, shall recuse himself or herself. If a panel member declines to recuse himself or herself upon request by the accused or another panel member, the dean shall make the final decision. Any recused member shall be replaced in the same manner as the member was originally appointed.

P. Evidence

Formal rules of evidence shall not apply to the Honor Code Hearing. Any oral or documentary evidence may be received, but irrelevant, immaterial, or unduly repetitious evidence may be excluded. The Hearing Panel will designate one member of the panel to rule on evidentiary matters at the Hearing. When a hearing will be expedited and the interests of the School of Law or the student will not be prejudiced substantially, evidence may be received in the form of copies and excerpts if the original is not readily available. The Hearing Panel may take notice of the records and written policies of the School of Law and of the university. The parties shall be informed of the materials the panel notices, and shall have an opportunity to contest those materials.

Q. Negotiated Settlement

After bringing charges, the Advocate Team may enter into a settlement with the accused student. Any negotiated settlement between the Advocate Team and the accused shall be subject to approval by the Hearing Panel. In the absence of an admission of an Honor Code violation by the accused, the panel may impose *conditions* pursuant to a negotiated settlement, but not *sanctions*.

R. Burden of Proof; Panel Decision

After a contested hearing, the Hearing Panel shall reach a decision regarding the existence of an Honor Code violation and the appropriate sanction or condition for any violation. The decision shall be upon a majority vote of the panel, based upon clear and convincing evidence, and communicated in writing to the student within ten (10) business days after the decision is made.

S. Summary of Adverse Decision

If the decision is adverse to the student, the panel shall, within twenty (20) business days of mailing the decision, prepare a written summary of the evidence and its findings. A copy of the summary and a record of the hearing shall be mailed to the student and given to the dean. If no appeal is taken by the student within the time limit prescribed below, the dean shall implement the sanction or condition imposed by the Hearing Panel.

T. Appeal

(1) *Timing and Content of Appeal.* The student may, within ten (10) business days after receipt of the written Summary of Adverse Decision, appeal to the dean who may affirm, reverse or remand the decision, or reduce the sanction or condition. The student must specify in writing the basis of the appeal. The dean may request a response in writing from the Hearing Panel. No new evidence shall be presented by either the student or the Hearing Panel.

(2) *Standard of Review on Appeal.* Appeals alleging factual errors shall be governed by a clearly-erroneous standard. Appeals alleging procedural

errors or erroneous interpretation of the code shall be reviewed for prejudicial error.

(3) *Final Disposition.* The dean shall specify in writing the reason for any reversal, remand, or reduction. The dean's disposition of the appeal shall be final and no further appeal of the Hearing Panel's decision may be taken. This subsection represents the extent of appeal rights under this Code – there are no additional School of Law or university appeal rights under this code.

U. Petition for Rehearing

A student who has received a sanction or condition may petition the Honor Code Committee for a rehearing on the grounds of newly discovered evidence. Upon receipt of the petition, the Honor Code committee chair shall appoint an Advocate Team to consider whether the petition has merit and whether justice requires a rehearing. If the petition has merit and justice so requires, the Advocate Team shall promptly inform the Honor Code committee chair, who shall appoint an Honor Code Hearing Panel. The panel shall convene a hearing to consider the new evidence and reconsider the findings in light of the new evidence. Following such a hearing, the Hearing Panel shall enter an order affirming, modifying, or reversing its original decision and shall notify the petitioner and dean of its decision.

V. Student Witnesses

A student's refusal to give a statement or attend and testify truthfully at any Hearing upon summons by either the Advocate Team or the accused student shall constitute a violation of this code.

W. Confidentiality

(1) *General Rule.* Except as provided below, all Honor Code proceedings and accompanying information, including Advocate Team investigations, shall remain confidential to the maximum extent possible.

(2) *Exceptions to General Rule.*

(a) Confidentiality is waived if the accused student elects a public hearing or breaches this code's confidentiality provision.

(b) The Honor Code Committee shall issue Public Reports as described in subsection IV.X of this Code ("Public Reports"). Under no circumstances shall the names of any students appear in the Public Reports mandated by this code, except that the accused student may elect to have his or her own name appear in such reports.

(3) *Breach of Confidentiality.* Any breach of this confidentiality provision by any student shall be a violation of this code.

X. Public Reports

The Honor Code Committee shall issue periodic Public Reports, to be posted in the School of Law, summarizing the matters resolved by the committee in the reported period. Such Public Reports shall omit the names of all students except as provided in subsection IV.W(2)(b) ("Exceptions to General Rule" of Confidentiality). The Public Reports shall also – to the greatest extent possible – omit details about the reported matters that would risk revealing the identity of the student(s) involved.

Copies of all Public Reports shall be kept on file with the associate dean for academic affairs.

Y. Sanctions and Conditions

Sanctions and conditions that may be imposed by the Hearing Panel or dean include, but are not limited to, one or more of the following:

- (1) Expulsion from the School of Law or revocation of School of Law diploma, as the case may be;
- (2) Suspension from the School of Law, or any course or other School of Law-related activity, for one or more semesters, or for the balance of any semester;
- (3) Withdrawal of credit in a course;
- (4) Academic probation;
- (5) A written reprimand;
- (6) An oral admonition;
- (7) Restitution;
- (8) Conditions, such as mediation, referral of the accused student to the University Counseling Center, or a letter of apology or explanation of conduct.

Z. Record-Keeping

The following dispositions shall be noted in an accused student's permanent file:

- (1) The Advocate Team's decision not to bring charges despite the presence of sufficient evidence of a violation and the reason for that decision, as set forth in subsection IV.H(3) ("Decision to Bring Charges");
- (2) An approval of settlement by the Hearing Panel as set forth in subsection IV.Q ("Negotiated Settlement"), including any admission of an Honor Code violation by the accused student and any sanction or condition imposed;
- (3) The Hearing Panel's dismissal of charges against an accused student;
- (4) After the expiration of the appeal period, the Hearing Panel's determination of an Honor Code violation, and the sanction or condition imposed; and
- (5) The Dean's affirmance, reversal, or remand of the Hearing Panel's determination of an Honor Code violation on appeal, and any sanction or condition imposed.

AA. Administration of Code After Graduation or Other Separation

Proceedings may be initiated or continued after the student has graduated or otherwise separated from the School of Law, provided that the alleged violation occurred while the student was enrolled or matriculated in the School of Law. If an Honor Code matter is pending when a student is scheduled to graduate from the School of Law, the student's degree may be withheld at least until the matter is resolved.

V. Periodic Review; Effective Date; No Retroactivity

The Honor Code Committee shall review this code periodically and recommend any amendments it deems necessary to ensure that this code remains consistent with the Statement of Purpose set forth in Section I of this code.

This code shall become effective on the date specified by the faculty at the time of adoption. This code, and any amendment to this code from time to time, shall be deemed to apply only to conduct occurring on or after the effective date of this code or such amendment, as the case may be.

- ¹ Initial version adopted by the faculty on May 2, 2012, with an effective date of September 1, 2012. Revised version adopted by the faculty with an effective date of February 14, 2018.

Policies and Procedures COVID-19 Assumption of Risk

Students:

The university has taken steps to implement substantial precautions to prevent the spread of COVID-19. By entering onto the Quinnipiac University campus, the student agrees to abide by all university policies and procedures related to COVID-19. The student voluntarily and knowingly assumes the risk of exposure to or infection of COVID-19 by using the services or premises, and that such exposure or infection may result in personal injury or illness. The student also acknowledges that it is impossible to fully mitigate the risk of becoming exposed to or infected by COVID-19 and that such exposure or infection may result from the actions, omissions, or negligence of the student, university faculty and staff and other students or visitors to campus. The university will follow all state guidelines and provide guidance on proper protection to alleviate and/or decrease the spread of viruses.

Vendors:

The university has taken steps to implement substantial precautions to prevent the spread of COVID-19. By entering onto the Quinnipiac University campus, the vendor agrees to abide by all university policies and procedures related to COVID-19. The vendor voluntarily and knowingly assumes the risk of exposure to or infection of COVID-19 by using the services or premises, and that such exposure or infection may result in personal injury or illness. The vendor also acknowledges that it is impossible to fully mitigate the risk of becoming exposed to or infected by COVID-19 and that such exposure or infection may result from the actions, omissions, or negligence of the vendor, university faculty and staff and other students or visitors to campus. The university will follow all state guidelines and provide guidance on proper protection to alleviate and/or decrease the spread of viruses.

Faculty and Staff:

The university has taken steps to implement substantial precautions to prevent the spread of COVID-19. By entering onto the Quinnipiac University campus, the employee agrees to abide by all university policies and procedures related to COVID-19. The employee also acknowledges that it is impossible to fully mitigate the risk of becoming exposed to or infected by COVID-19 and that such exposure or infection may result from the actions, omissions, or negligence of the employee, university faculty and staff, students or visitors to campus. The university will follow all state guidelines and provide guidance on proper protection to alleviate and/or decrease the spread of viruses.

Alcoholic Beverages Policy

The following Alcoholic Beverages Policy is in effect with respect to all Quinnipiac School of Law student-sponsored functions:

On-Campus Events

Except where permission has been granted by the associate dean of students, alcohol may **not** be served at student organization-sponsored events at the School of Law. Student organizations seeking to serve beer and/or wine must request permission from the associate dean of students at least two weeks in advance of the event, outlining the specifics of the event. If the associate dean of students grants permission for beer and wine to be served, special conditions may be imposed that the student organization must follow (such as a two-drink ticket system). The event is also subject to the Quinnipiac University Alcohol and Drug Policy (<http://catalog.qu.edu/handbooks/graduate/university-policies/policy-statement-prevention-alcohol-abuse-drug-use-abuse/>) and the Student Code of Conduct. (<http://catalog.qu.edu/handbooks/graduate/student-code-conduct-process/>)

Set forth below are the procedures that must be followed if/when the associate dean of students grants permission for alcohol to be served at student organization-sponsored events:

When alcohol is served at an *on-campus* School of Law event:

- a. The associate dean of students must approve the amount of alcohol purchased for each event.
- b. Alcohol may never be consumed or served in classrooms, the library, the student meeting room, student organization offices, or the Courtroom. Non-alcoholic beverages must also be available.
- c. Substantial food must be available, such as sandwiches, wraps, etc. Pretzels, potato chips and similar snack foods do not constitute a substantial food for this purpose. When the food is gone, the serving of alcohol must cease.
- d. Beer and wine are the only alcoholic beverages that may be served. Mixed drinks are not permitted. If approved for use, kegs must be closed or capped at the end of the event and removed from campus as soon as possible.
- e. **Two non-drinking representatives of the sponsoring student organization must be present where alcohol is being served.** The president of the sponsoring organization must notify the associate dean of students *prior to the event* who these two representatives will be. These students are responsible for reporting violations of the alcohol policy to the associate dean of students.
- f. The sponsoring organization **must** hire a bartender from the university's catering department (Chartwells). The bartender must be on duty for the entire length of time alcohol is dispensed.
- g. Attendance at alcohol-related events is limited to **law school students, faculty, staff and their escorted guests**. NO undergraduates are permitted at any time.
- h. The faculty adviser for the sponsoring organization or a member of the administration (dean, associate dean) must attend the event.
- i. Immediately after the event has concluded, all open bottles of alcohol must be disposed of. Unopened bottles must be placed in a locked and secure location within the law school, such as the associate dean of students office.

When alcohol is served at an *off-campus* School of Law event:

- a. Events held at off-campus establishments require the purchase of any alcohol to be made directly from the off-campus establishment. The associate dean of students may still require a two-drink ticket system be used to ensure that such purchases be limited to no more than two drinks per student.

- b. Attendance at alcohol-related events is limited to law school students, faculty, staff and their escorted guests. NO undergraduates are permitted at any time.
- c. It is the student organization's responsibility to ensure that off-campus establishments hold the appropriate municipal and state liquor licenses, as well as the required insurance. All distribution of alcohol must comply with the restrictions indicated in Connecticut law.

The sale of alcoholic beverages: No alcohol shall be sold at on-campus School of Law events.

Legal drinking age: Beer and wine may be dispensed only to individuals who are 21 and older. In accordance with Connecticut state law, alcoholic beverages shall not be dispensed to any intoxicated person.

Damages: Any damage to property incurred at events at which alcohol is served is the responsibility of the sponsoring organization.

Transportation of alcohol: The event-sponsoring organization is responsible for preventing attendees from bringing personal alcoholic beverages into the event and for preventing attendees from taking alcohol out of the event. The only exception is where alcohol is being transported by a representative of the sponsoring organization from a retail outlet to the event.

Policy violations: Violation of any of the aforementioned alcoholic beverage policies may result in the loss of privileges to the sponsoring group or organization and the disciplinary sanctions set forth in the University Alcohol and Drug Policy and Student Code of Conduct.

COMPLAINT PROCEDURE

- a. **In general.** There are two types of complaints: those that implicate the ABA Standards for Approval of Law Schools (https://www.americanbar.org/groups/legal_education/resources/standards/) and those that do not. To determine if the substance of a complaint implicates the Standards, a student should read the Standards.
- b. **Submitting a formal complaint that implicates the Standards.** Any student at the law school who wishes to bring a formal complaint to the administration of the law school concerning a significant problem that directly implicates the school's program of legal education and its compliance with the ABA Standards should do the following:
 - A. If the complaint concerns an academic matter, submit it in writing, via Quinnipiac University email, to the associate dean for academic affairs. If the complaint concerns a nonacademic matter, submit it in writing, via Quinnipiac University email to the associate dean of students.
 - B. The writing should describe in detail the behavior, program, process or other matter that is the subject of the complaint. It should explain how the matter implicates the law school's program of legal education and its compliance with one or more specific, identified ABA Standard(s).
 - C. The writing must provide the name, official law school email address, and a street address of the complaining student, for further communication about the complaint.
 - D. The administrator to whom the complaint is submitted will acknowledge the complaint within three business days of receipt of it. Acknowledgment will be made by email.
 - E. Within 10 business days of acknowledgment of the complaint, the administrator, or the administrator's designee, shall either meet with the complaining student, or respond to the substance

of the complaint in writing. In this meeting or in this writing, the student will either receive a substantive response to the complaint or information about what steps are being taken by the law school to address the complaint or to further investigate the complaint. If further investigation is needed, when the investigation is completed, the student shall be provided either a substantive response to the complaint or information about what steps are being taken by the law school to address the complaint. The response shall be provided to the student via email within 10 business days after completion of the investigation.

F. Appeals regarding decisions on complaints may be taken to the dean of the law school. The student may further appeal to the university's senior vice president for academic affairs. Any decision on appeal to the academic vice president shall be final.

G. A copy of the complaint and a summary of the process and resolution of the complaint shall be kept in the office of the dean where it was originally filed.

c. **Submitting a complaint that does not implicate the Standards.**

A. If the complaint concerns an academic matter, the student should make an appointment to meet with the associate dean for academic affairs or submit the complaint via QU email.

B. If the complaint concerns a nonacademic matter, the student should make an appointment to meet with the associate dean of students or submit the complaint via QU email.

C. If the complaint is submitted at a meeting, the student may present the complaint either orally or in writing.

D. The dean to whom the complaint has been submitted shall respond to the complaint in writing to the student's QU email address within 10 business days.

E. Appeals regarding decisions on complaints may be taken to the dean of the law school. The student may further appeal to the university's senior vice president for academic affairs. Any decision on appeal to the academic vice president shall be final.

Bias, Harassment and Discrimination Policy

Quinnipiac University values diversity, multiculturalism and respect for others in an environment free from bias. The university is committed to providing a safe and respectful educational and work environment that prohibits discrimination and harassment on the basis of race, color, religion, national origin, sex, gender, (including identity and expression), sexual orientation, age or disability. Such behaviors or attitudes undermine the environment of equity and mutual respect that is essential to fulfill the university's mission.

Discriminatory or bias-related acts by students, faculty or staff will be addressed through the appropriate disciplinary processes. Any act of reprisal, interference, restraint, penalty discrimination, coercion or harassment against the university community for using these policies responsibly interferes with free expression and openness and violates this policy. Accordingly, members of the university community are prohibited from acts of reprisal against those who report incidents to the university, are involved as witnesses or otherwise try to responsibly use this policy. This policy will help to create an atmosphere in which allegations of discrimination or harassment are dealt with in a timely, private, fair and effective manner.

Title IX Policy Against Gender-Based Discrimination and Sexual Misconduct

Title IX of the Education Amendments of 1972 prohibits discrimination on the basis of sex in educational programs and activities that receive federal financial assistance. Quinnipiac University is committed to complying with Title IX and providing an educational, working and living environment free from gender or sex discrimination and sexual misconduct. Quinnipiac seeks to ensure that no student, faculty or staff member is excluded from participation in or denied the benefits of any university program or activity on the basis of sex.

Quinnipiac University School of Law affirms its commitment to an environment that is fair, humane and respectful for all members of the law school community. Behaviors at the School of Law that inappropriately assert sexuality are unacceptable and will not be condoned. Behaviors that constitute sexual harassment include unsolicited verbal, nonverbal and/or physical conduct of a sexual nature that creates an intimidating, hostile or offensive environment.

The School of Law has identified associate dean for academic affairs, Robert Farrell, and associate dean of students, Kathy Kuhar, as administrators to whom law students who believe themselves to have been subjected to harassment or discrimination as defined above may report their complaints. Where appropriate, the School of Law will first try to resolve problems without formal hearings. When such efforts are not successful, individuals have available to them a formal process, outlined further in the University's Student Handbook (<http://catalog.qu.edu/handbooks/graduate/student-code-conduct-process/>) and in the University's Title IX Policy (p. 121). In all cases, the School of Law will protect the confidentiality of both the complainant and respondent so far as the described process permits.

Policies and Procedures for Students with Disabilities

Quinnipiac University is committed to providing equal educational opportunities and full participation for students with disabilities. Consistent with its responsibilities to comply with the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973, Quinnipiac University provides reasonable accommodations to promote equal educational opportunity. Documentation from a licensed evaluator is required to substantiate the presence of a disability, defined by the ADA as "a physical or mental impairment that substantially limits one or more major life activities," and to establish the need for reasonable accommodations at Quinnipiac University.

Responsibilities of the student:

- Contact the associate dean of students at the time of enrollment so that appropriate accommodations can be made in a timely manner. The student is also responsible for reviewing the need for accommodation on a semester-by-semester basis with the associate dean of students.
- Provide to the associate dean of students appropriate medical, psychological, psychoeducational or neuropsychological documentation indicating the student's disability and suggested reasonable accommodations.
- Provide signed consent authorizing the associate dean of students or designee to discuss the student's need for reasonable accommodations, academic adjustments, and/or auxiliary aids with the professional(s) providing the documentation.

- d. Meet the timelines and procedural requirements established by the School of Law for scheduling exams and requesting assistance. If the student with a disability fails to provide adequate notice of the need for space and/or assistance, the associate dean of students will attempt to provide the accommodation to the extent possible under the circumstances.

Student Conduct Code

(Revised to June 2001)

Quinnipiac University's Basic Policy and Student Code of Conduct are hereinafter incorporated by reference.

a. Student Discipline Committee

A standing committee shall be appointed by the dean at the beginning of each academic year. The membership of this committee shall be at least six faculty members and four students, the latter to be chosen by the Student Bar Association in any manner it deems suitable.

The committee chairperson shall appoint one or more members of the faculty, from the committee if possible, to serve as law school advocates and one or more faculty members to serve as defense counsel. For each complaint of a possible violation of this Student Conduct Code, the committee chairperson shall assign one faculty law school advocate and one student to serve as an advocate team. All student committee members are eligible to serve as members of an advocate team. The advocate team shall be responsible for investigating alleged offenses, for preparing and presenting the case against the accused at disciplinary hearings, and for conducting negotiations with the accused or accused's counsel, and shall have sole discretion to decide whether or not to bring charges and whether or not to enter into negotiations. In the event that the faculty and student members of the advocate team cannot agree on a course of conduct, the faculty member's decision shall govern.

Hearing panels consisting of one student and two faculty members selected by the chairperson shall hear and determine all cases. The committee chairperson shall select faculty members to serve on the hearing panel from the faculty in rotation, and shall select student members from the committee.

Any faculty member may serve as defense counsel, at the request of the accused student. Alternatively, the accused student may elect to be represented by a faculty member who serves as appointed defense counsel. Any faculty member representing an accused student, whether appointed or selected by the accused student, shall represent the accused student without fee and shall cooperate with retained outside defense counsel if the latter so requests.

b. Student Conduct Code: General Statement of Purpose

This code shall be construed liberally in accordance with its purpose, which is to promote the highest ethical standards.

Acts of a non-academic nature, whether undertaken within the law school, on university property or elsewhere may be subject to all applicable law school and university rules and sanctions. Thus, the institution of proceedings under this code shall not preclude the institution of proceedings by the university, and the institution of proceedings by the university shall not preclude the institution of proceedings under this code. When proceedings are instituted by both the law school and the university, neither shall be ousted from jurisdiction by either the institution of proceedings or by the result reached by the other.

Nothing in these rules or procedures shall limit the authority of the School of Law or Quinnipiac University to act administratively to

protect public safety and the educational mission of the School of Law or Quinnipiac University.

c. Violations

The following acts are prohibited. Any student found guilty of one or more such acts shall be subject to the sanctions authorized by this code.

A. Cheating on any examination or other law school assignment, as illustrated by, but not limited to:

1. The unauthorized giving or receiving of aid or assistance;
2. The unauthorized use of information;
3. The unauthorized submission of work which has already been submitted in satisfaction of other coursework;
4. The giving or obtaining of any unfair advantage.

B. Plagiarism on papers or other law school assignments, as illustrated by, but not limited to:

1. The knowing or reckless copying or paraphrasing without proper attribution of any material written by another;
2. The knowing or reckless submission as one's own of research assignment or papers, class work, or other projects which have been prepared in any part by another;
3. The knowing or reckless use of the exact language of another without identification as a direct quotation, by quotation marks or otherwise, even though the source is cited in the student's work;
4. Knowledge or recklessness may be inferred from the circumstances.

C. Any act which reflects adversely upon fitness to practice law. Relationship to fitness shall be construed in accordance with the American Bar Association Rules of Professional Conduct, and relevant case law.

D. Any attempt to commit any act prohibited by this code.

d. Procedures

A. When an alleged offense is brought to the attention of the committee, or any member thereof, neither the committee nor any of its members shall conduct any inquiry, but shall instead refer the matter to the advocate team for investigation, as soon as is feasible. The team members may investigate in any reasonable manner. When the investigation discloses insufficient evidence of a violation, the case shall be dismissed at this stage with no notation in the student's record.

B. As soon as is practical after receiving notice that the advocate team has chosen to charge the accused student, the chairperson of the committee shall advise the student in writing of the name of the accuser or accusers, and of the nature of the charges with sufficient particularity to enable the student to answer them. The chairperson shall give notice in the manner most likely to provide the student with prompt notice.

The notice shall require the student to file a written answer to the charges with the committee chairperson, admitting, denying, or admitting in part and denying in part the

charges. An answer should contain specific admissions or denials for each allegation of fact in the charge, and shall not contain only general denials. The chairperson shall specify in the notice a date on which the answer shall be due. An accused student shall have at least seven days from the issuance of the notice of charge in which to file an answer. The chairperson, upon request, may extend the time for filing an answer.

C. After the filing of the answer, the accused must prepare a written statement responding to every allegation which he or she has denied in the answer, and about which the accused has any information. The advocate team may enter this statement into evidence at a hearing. As soon as is practical after the filing of the statement, the advocate team and the accused shall each prepare and provide to each other a summary of the testimony of each witness, and copies or descriptions of any physical evidence. The accused and the advocate team shall correct or supplement any disclosure that either side learns to be false or incomplete. There shall be no process prior to the hearing for ruling on disputes relating to this disclosure process. The Hearing Panel may, however, treat a failure to disclose or to cooperate as a basis for excluding testimony or evidence, or for drawing adverse inferences.

D. As soon as is practical following the giving of notice of a pending charge, but no earlier than ten days thereafter, the committee chairperson shall schedule a hearing date. The chairperson shall provide the accused with notice of the date, place and time of the hearing. The hearing shall be completed no later than the end of the semester after the one in which the committee chairperson first receives the complaint, unless the accused student, or his or her representative, requests a continuance. The hearing shall be open or closed at the election of the accused student, subject to the need to maintain order. A student wishing a continuance, an open hearing, or both shall notify the committee in writing at least two days prior to the hearing date.

E. At the hearing the student shall have the following rights:

1. To be advised and represented by the appointed defense counsel, any other faculty member, or by any attorney or representative retained by the accused, including another student;
2. To confront and cross-examine, in person or through their representative, the accuser and all other witnesses;
3. To testify;
4. To summon and present witnesses and other evidence in their behalf;
5. The student whose case is to be heard by the hearing panel may bring to its attention any facts or circumstances that would or would appear to compromise the impartiality of a member of the panel. Any member of the panel who knows of such

circumstances, whether or not presented by the student, shall recuse himself. If a panel member declines to recuse himself upon request by the accused or another panel member, the dean of the law school shall make the final decision. Any recused member shall be replaced in the same manner as the member was originally appointed.

6. The accused student has no right to refuse to testify or give a statement pursuant to Section 4.C. unless the testimony or statement would incriminate him or her under state or federal law. If the accused refuses to testify or give a statement under this provision, the Hearing Panel may draw a negative inference from the refusal.

F. Any oral or documentary evidence may be received, but irrelevant, immaterial or unduly repetitious evidence may be excluded. The Hearing Panel will rule on evidentiary matters at the hearing. The panel shall give effect to privileges recognized by Connecticut law that do not conflict with the express provisions of this code. When a hearing will be expedited and the interests of the law school or of the student will not be prejudiced substantially, evidence may be received in written form of copies and excerpts if the original is not readily available. The panel may take notice of the records and written policies of the law school and of the university. The parties shall be informed of the matter the panel notices, and shall have an opportunity to contest the material so noticed.

G. Any negotiated settlement between the advocate team and the accused or accused's counsel shall be subject to approval by the Hearing Panel. The panel may not impose sanctions pursuant to an agreement of the parties in the absence of an admission of guilt by the accused.

H. After a contested hearing, the panel shall reach a decision regarding guilt or innocence, and sanction. The decision shall be upon a majority vote, based upon clear and convincing evidence, and communicated in writing to the student within 10 days after the decision is made.

I. If the decision is adverse to the student, the panel shall, within 20 days of mailing the decision, prepare a written summary of the evidence and its findings. A copy of the summary shall be mailed to the student.

J. The student may, within 10 days after receipt of the written summary, appeal to the dean who may affirm, reverse or remand the decision, or reduce the sanctions. The student must specify the basis of the appeal. No new evidence shall be presented on appeal. The dean shall specify in writing the reason for any reversal or reduction.

K. Any student who refuses to attend and testify at any hearing upon summons by either the panel or the student accused, shall be guilty of a violation of this code. No witness has a right to refuse to testify or give a statement unless the testimony or statement would incriminate him or her under state or federal law.

L. Prior to a finding or admission of guilt by a panel, all proceedings and accompanying information shall be confidential, except insofar as the student may elect a public hearing. Any breach of confidentiality shall be a violation of the code, and if by the accused, shall also operate as a waiver of any obligation of confidentiality on the part of others. After a finding or admission of guilt and the expiration of the appeal period, or of the affirmance of the decision by the dean, the disciplinary matter may become public information. In the event the panel finds that the student is not guilty, the panel and/or the committee chairperson may inform the complainant and any witnesses who testified at the hearing of the outcome of the matter.

M. If the case is dismissed at any stage prior to the imposition of a sanction, or the accused is found innocent, no record of the matter shall be placed in the student's file.

N. The committee may post a public notice of its disposition of any matter, so long as the information does not violate the confidentiality provision of Section 4.L.

e. Sanctions and Their Imposition

Sanctions which may be imposed by the Hearing Panel include, but are not limited to, one or more of the following which are set forth in descending order of severity:

A. Expulsion from the law school;

B. Suspension from the law school, or any course or courses, for one or more semesters, or for the balance of any semester.

C. A grade of "F" in any course to which the offense pertains;

D. Withdrawal of credit in a course;

E. Lowering of grade in any course to which the offense pertains;

F. A retake of an examination in a course, or the doing or repetition of any work less than the entire course in such a manner and subject to such conditions as the panel shall recommend;

G. Academic probation;

H. A written reprimand;

I. An oral admonition.

J. The committee may direct restitution in addition to or as an alternative to any of the foregoing.

K. In any matter when there is a conviction or an admission of guilt and the panel has imposed a sanction, such action shall be noted in the student's permanent file. After the imposition of a sanction, the notation thereof shall not be erased from the file as a result of the student's later successful completion of certain conditions.

L. In any matter where the dean reverses a conviction, the dean shall state whether or not the reversal has the effect

of a dismissal and results in the erasure of the matter from the student's permanent file.

f. Exclusions

Nothing in this code shall preclude:

A. The establishment and enforcement by the Law faculty, administration, librarian or individual instructor, of rules pertaining to the administration of exams, papers, or assignments, or the maintenance of classroom or library decorum;

B. The use of authority on the part of the instructor to do those things believed necessary to fulfill responsibilities in the classroom, including devices to promote effective class participation, to prevent disturbance of the classroom situation, and ensure punctual and regular class attendance.

STUDENT DISCIPLINE COMMITTEE

Under the Student Conduct Code, alleged violations are investigated by a team consisting of one faculty member and one student. If the team decides to bring charges, the matter is heard by a panel of two faculty members and one student, who are appointed in a rotation.

Each year, the dean appoints a committee of several faculty members, and the SBA designates at least four students to serve on the committee. Anyone having reason to believe that a student has violated the Student Conduct Code may bring the matter to the attention of the committee chair, who will assign the team to investigate the matter.

Appendix A

Complying with the New York State Bar's Heightened Experiential Requirement

The School of Law will certify that students taking the New York Bar Exam have satisfied Pathway 1 of 22 NYCRR Part 520.18(a), if they meet the following requirements:

- Completed and passed all required courses, including the four upper-level core courses; *and*
- Completed and received at least a C in LPR; *and*
- Received at least a C in each course in *one* of the following arrays of experiential courses:
 - Option A: [Total of 6 or 7 credits]
 - Introduction to Representing Clients; and
 - Either Negotiation or ADR; and
 - One of the following litigation-based simulation courses:
 - Trial Practice
 - Visual Persuasion and the Law; or
 - One of the following transactional simulation courses:
 - Commercial Transactions Workshop
 - Estate Planning and Drafting.
 - Option B: [Total 6 credits]
 - Civil Justice Clinic, for at least 4 credits; and
 - Either Negotiation or ADR.
 - Option C: [Total 7 or 8 credits]

- Any law clinic other than Civil Justice Clinic, or any externship for at least 3 credits; and
- Introduction to Representing Clients; and
- Either Negotiation or ADR.

- d. 120–180 minutes (2-3 hours) per credit
- e. More than 180 minutes (>3 hours) per credit

Appendix B

Compliance with ABA Standard 310

A. Classroom Courses

1. Notification in Syllabus

Every faculty member shall include in the syllabus, or other document distributed at the beginning of the course, for each classroom course taught the following language:

Standard 310 of the American Bar Association's Accreditation Standards requires that for each credit hour earned, a student must do an amount of work that reasonably approximates at least 50 minutes of classroom instruction per week and at least an average of 120 minutes of out-of-class work per week for 15 weeks. Out-of-class work includes class preparation, post-class review, outlining, time spent on written and other class assignments, meeting with study groups, meeting or otherwise communicating with the professor to discuss course-related topics, and exam preparation. The 15-week period includes one week for examinations.

In my judgment, based on the average length and difficulty of the reading assignments and the number and average difficulty of other course exercises and assignments, at least [credit hours x 2] or more hours of out-of-class work will be required on average per week to prepare adequately for class, complete all assignments, master the course material, and perform satisfactorily on all course assessments.

At the end of the course, students will be asked to indicate approximately how much out-of-class time they have spent per week per credit hour in this course, so please be mindful of this requirement as the course progresses.

2. Course Evaluation Form

The course evaluation form for every class will include the following question:

On average, how much out-of-class time did you spend per credit hour working on this course each week? Out of-class work includes class preparation, post-class review, outlining, time spent on written and other class assignments, meeting with study groups, meeting or otherwise communicating with the professor to discuss course-related topics, and exam preparation.

The question asks how much time you spent outside of class on this course each week, on average, **per credit hour**. So, for a **3-credit** course (e.g.), you should answer "1" if you spent **less than 3 hours per week**, on average, working on the course outside of class; "2" if you spent **3-6 hours per week**; "3" if you spent **about 6 hours per week**; "4" if you spent **6-9 hours per week**; or "5" if you spent **more than 9 hours per week**.

- a. Less than 60 minutes (<1 hour) per credit
- b. 60–120 minutes (1-2 hours) per credit
- c. About 120 minutes (2 hours) per credit

B. Clinical and Externship Courses

Credit for clinics and externships includes classroom and out-of-class work, with the exception of some advanced clinical courses. Hours will be computed for all classroom and out-of-class credits together, and will require an aggregate of not fewer than 45 hours per credit per semester. Classroom time for clinical courses will be determined as follows: For clinical courses with a one-credit seminar, not fewer than 12.5 hours will be scheduled as classroom seminar time for the semester, held on a periodic schedule; for clinical courses with a two-credit seminar, not less than 25 hours will be scheduled as classroom seminar time per semester, held on a weekly schedule. For any advanced clinical course without a seminar credit, students may be required to meet together with the faculty member periodically in a classroom setting, but there is no minimum classroom time.

The balance of the required hours will include the aggregate of all other obligations: case work, field work, supervision, preparation for class including reading assignments, written assignments, skill-building exercises, and administrative obligations. For all clinical courses, students will be required to perform case work and field work pursuant to a weekly schedule and to keep contemporaneous records of time spent on all tasks.

C. Journal Credits

Members of each law journal typically earn four credits for the substantive work they perform as members on the journal. The credits are earned over two years but are ordinarily awarded in the member's second year on the journal. The editors of the law journals and the law faculty have determined that the amount of time devoted to substantive journal work that is required to earn the journal credits is not less than 45 hours per credit, for a total of not less than 180 hours. Students can elect whether or not they wish to take some or all of the credits they have earned, but shall complete journal work of not less than 180 hours in order to satisfy their membership requirements.

The tasks performed by journal members include some or all of the following:

- a. **Cite-checking;**
- b. **Writing a student note**, intended to produce a final paper of publishable quality. In the process of writing a note, each student must identify an original topic, conduct research, write multiple drafts, and coordinate with the Journals Committee and student note editors;
- c. **Issue editing:** confirming student cite-check work, performing more substantial above-the-line edits, and working with authors to finalize papers; and
- d. **Student note editing.** These duties in the aggregate require not less than 180 hours of substantive work over the course of four semesters.

With the permission of the associate dean, who shall consult with the relevant editor-in-chief, students who have completed at least 45 hours of work in their first year of membership may elect to earn one of their journal credits in the spring semester of their first year of journal membership. Students are eligible to earn the balance of the journal credits in the second year of membership. Certification of hours of work:

Each academic year, the Editorial Board of each journal shall prepare a detailed estimate of the number of hours they reasonably believe that members and editors will have to perform in order to complete assignments, for the purpose of assuring that all students will be required to perform at least 45 hours of substantive work per credit. The Editorial Board of each journal may require members to track their time spent in whatever way deemed appropriate, such as by time sheets or other means.

For any semester in which a journal member wishes to elect to earn journal credits, the editor-in-chief shall certify to the registrar and to the Journals Committee that the student has performed journal work equal to at least 45 hours per credit. For the editor-in-chief of each journal, the Journals Committee shall certify to the registrar that the editor-in-chief has performed journal work equal to at least 45 hours per credit.

D. Moot Court Credits

Students typically earn three credits for their work with the Moot Court Society. The credits may be earned over two years but are ordinarily awarded in the second year in the Society. The officers of the Moot Court Society and the law faculty have determined that the amount of time devoted to substantive work that is required to earn the Moot Court credits is not less than 45 hours per credit.

Credit 1: Intramural Credit

Students earn one credit by participating in the Quinnipiac School of Law Terrence H. Benbow Moot Court intramural competition. This requires the student to submit a 12-18 page brief and to prepare and argue both sides of the case in front of a panel of judges. At least 45 hours of work are required to earn the first Moot Court credit.

Credit 2: External Competition Credit

Students earn one credit by participating in external competitions. Each participant must submit a 25- to 40 page brief and prepare and argue both sides of the case in front of a panel of judges. At least 45 hours of work are required to earn the second Moot Court credit.

Credit 3: Coaching Credit

Students earn one credit by coaching an extramural team. This work includes the following:

- a. learning the fact pattern and legal issues and precedents;
- b. preparing participants for oral argument;
- c. supervising competition preparation with outside judges; and
- d. attending at least two oral arguments at the competition. At least 45 hours of work are required to earn the third Moot Court credit.

Certification of hours of work:

Each academic year, the Moot Court Board shall prepare a detailed estimate of the number of hours they reasonably believe that society members will have to perform in order to complete assignments, for the purpose of assuring that all students will be required to perform at least 45 hours of substantive work per credit earned. The board may require members to track their time spent in whatever way deemed appropriate, such as by time sheets or other means.

For any semester in which a society member wishes to elect to earn Moot Court credits, the president shall certify to the registrar and to the faculty adviser of the society that the student has performed substantive moot court work equal to at least 45 hours per credit. For the Moot Court Society president, the faculty adviser shall certify to the registrar that the

president has performed substantive society work equal to at least 45 hours per credit.

E. Independent Research

To earn credit for Independent Research, a student must write a paper that is 20 or more pages in length, exclusive of footnotes, per credit earned. In order to produce a final work product that satisfies this requirement, a student must consult with a faculty member on the choice of topic, research the appropriateness of the topic, prepare an initial outline, complete research for the paper, write drafts of the paper, and edit the writing in consultation with the faculty supervisor. It is the judgment of the faculty that this process will require at least 45 hours per credit earned.

FRANK H. NETTER MD SCHOOL OF MEDICINE

The Frank H. Netter MD School of Medicine has been designed to be a model for educating diverse, patient-centered physicians who are partners and leaders in an interprofessional workforce responsive to healthcare needs in the communities they serve. Students from diverse backgrounds attain their highest personal and professional potential in a collaborative student-centered environment that fosters the university's commitment to academic excellence, scholarship, lifelong learning, respect and inclusivity. Accordingly, the school values:

- excellence in education that places the student at the center of the learning experience, and nurtures the student's independence as a lifelong learner
- diversity and inclusiveness in all students, faculty and staff
- a learning environment that promotes the provision of holistic, patient-centered care
- interprofessional education and service-learning experiences to promote teamwork in the care of patients
- clinical partners who support and promote the school's vision, mission and values
- social justice and the education of physicians to address healthcare inequalities
- partnerships within our community that provide students with learning and service opportunities to improve the health of the community
- advancement and support of primary care education and health services research through the school's Institute for Primary Care
- advancement of global health through the school's Institute for Global Public Health by promoting community medicine, public health and international partnerships
- advancement of rehabilitation medicine, through the school's Institute for Rehabilitation Medicine by promoting interprofessional care, services and research programs especially for wounded military personnel

Right to Modify

This Catalog is intended to serve as a convenient reference source for students. It is not guaranteed to be free from errors. Moreover, the programs, policies and courses described here are subject to continual review and reevaluation and may be changed at any time without prior notice. The School of Medicine reserves the right to modify the academic requirements, admission requirements and program of study; to change the arrangement and content of courses, the instructional material and the tuition and fees; to alter any regulation affecting students; to refuse readmission at any time; or to dismiss any student at any time, should it appear to be in the best interest of the school or student to do so. The School of Medicine also reserves the right to change the semester schedule and examination times and locations. Nothing in this Catalog should be regarded as setting terms of a contract between a student or prospective student and Quinnipiac University or its School of Medicine.

Educational Program Objectives

Care of Individual Patients (CIP)

CIP 1. Gather accurate comprehensive and focused medical histories from patients and families using patient-centered interviewing skills.

CIP 2. Correctly perform comprehensive and focused physical examinations relevant to common chief concerns.

CIP 3. Interpret common laboratory data, imaging studies and other tests in the course of routine practice.

CIP 4. Make informed decisions about diagnostic and therapeutic interventions based on patient information and preferences, using up-to-date scientific information, evidence-based reasoning, and clinical judgment.

CIP 5. Develop a differential diagnosis, a problem list, and carry out a patient management plan using problem-solving and critical-thinking skills.

CIP 6. Review, interpret and create electronic health records for optimal patient care.

CIP 7. Demonstrate proficiency with common medical, diagnostic and surgical procedures.

CIP 8. Educate patients and their families on health promotion, disease prevention and management strategies to empower them to participate in their care and enable shared decision-making.

CIP 9. Provide appropriate referral of patients including ensuring continuity of care throughout transitions between providers or settings, and following up on patient progress and outcomes.

CIP 10. Adapt patient care approaches to remote forms of care provision through telemedicine and telehealth.

Knowledge for Practice (KP)

KP 1. Apply established and emerging anatomical, biological, pathological and pathophysiological scientific concepts fundamental to health care for patients and populations.

KP 2. Discuss the fundamentals of human development and behavior throughout the lifespan, including embryology and end-of-life.

KP 3. Recognize the biological, cultural, societal and economic aspects of human nutrition in health and disease.

KP 4. Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial and cultural influences on health, disease, care-seeking, care compliance, and barriers to and attitudes toward care at the global, national, community, family and individual levels.

KP 5. Apply established and emerging principles of diagnostic imaging and laboratory testing to clinical problem-solving and evidence-based patient care.

KP 6. Develop a clinical question so as to effectively and efficiently gather, appraise and interpret medical evidence to apply new knowledge at the point of care.

KP 7. Apply biostatistical and critical analytical skills to interpret relevant literature.

KP 8. Explain the principles and comparative benefits of pharmacological and non-pharmacological therapeutics.

KP 9. Apply principles of epidemiological sciences and public health to the identification of health problems, risk factors, treatment strategies, resources and disease prevention/health promotion efforts for patients and populations.

KP 10. Explain and apply the principles of infection control, including but not limited to: transmission-based precautions, screening and appropriate use of personal protective equipment (PPE).

Interpersonal and Communication Skills (ICS)

ICS 1. Communicate effectively and respectfully with patients, families and the public across a broad range of socioeconomic and cultural backgrounds.

ICS 2. Communicate effectively and respectfully with colleagues within one's profession or specialty, other health professionals and health related agencies.

ICS 3. Accurately communicate patient data with other health professionals through complete, timely and organized medical records and presentations.

ICS 4. Demonstrate sensitivity, honesty and compassion in communicating medical information to patients including diagnosis, prognosis, diagnostic and therapeutic plans, ambiguity and uncertainty, and cost of care, adapting delivery to individual patients needs and literacy level.

ICS 5. Demonstrate sensitivity, honesty and compassion in difficult conversations, including those about adverse events, bad news, end of life, death, disclosure of errors and other sensitive topics, adapting delivery to individual patients needs and literacy level.

Professionalism (PROF)

PROF 1. Demonstrate compassion, honesty, integrity and respect in all interactions with patients.

PROF 2. Apply ethical principles with reference to end-of-life care, confidentiality, informed consent, conflicts of interest, disclosure of errors – in compliance with relevant laws, policies and regulations.

PROF 3. Identify patient-specific contexts and preferences including but not limited to diversity in gender, race, culture, language, age, sexual orientation, religious beliefs or ability – to implement equitable care for all patients.

PROF 4. Represent the ideals of altruism, justice and patient advocacy.

PROF 5. Demonstrate accountability to society and the profession.

Interprofessional Collaboration (IPC)

IPC 1. Identify the roles, responsibilities, training and skills of other health professionals relative to the health care needs of patients and populations.

IPC 2. Work with other health professionals, establishing and maintaining a climate of mutual respect, dignity, diversity, ethical integrity and trust to learn and take care of patients.

IPC 3. Communicate and collaborate with other health professionals in a responsive and responsible manner within a team-based care model.

Adaptive Learning and Scholarship (ALS)

ALS 1. Identify strengths, deficiencies and limits in one's knowledge, skills and/or attitudes.

ALS 2. Set specific, measurable, attainable, realistic and timely goals to plan for learning.

ALS 3. Select, engage in, and complete learning activities that address one's limits in knowledge, skills and/or attitudes.

ALS 4. Reflect upon learning progress using informed self-assessment and external feedback, and appropriately adjust learning strategies.

ALS 5. Design, implement and complete a scholarly project that is framed by and fulfills Glassick's six criteria for scholarship: clear goals, adequate preparation, appropriate methods, meaningful results, effective presentation and reflective critique.

Personal and Professional Development (PPD)

PPD 1. Use and cultivate self-awareness of knowledge, skills and emotional limitations to engage in appropriate and timely development-seeking behaviors.

PPD 2. Engage and build rapport with fellow learners, teachers and patients in physical and online learning contexts and settings.

PPD 3. Identify and maintain balance between personal and professional responsibilities.

PPD 4. Develop and demonstrate healthy coping mechanisms to respond to short-term and long-term forms of stress.

PPD 5. Practice flexibility and maturity in adjusting to change, ambiguity and uncertainty with the capacity to alter one's behavior.

PPD 6. Recognize, acknowledge and reach out if experiencing symptoms of burnout in one's self or colleagues, and demonstrate healthy coping mechanisms related to personal and patient care responsibilities.

PPD 7. Demonstrate self-confidence and ownership, in the context of ongoing responsibility, that puts patients, families and members of the healthcare team at ease.

Practice-Based Learning and Improvement (PBLI)

PBLI 1. Set learning and improvement goals.

PBLI 2. Implement continuous quality improvement practices at the individual and system level.

PBLI 3. Locate, appraise and assimilate current best evidence from scientific studies related to patients' health problems.

PBLI 4. Employ practice guidelines, clinical pathways information and value-based care principles to improve the care of individual patients and populations.

Systems-Based Practice (SBP)

SBP 1. Apply health system science to practice decisions, including political, economic, technological, value-based perspectives.

SBP 2. Incorporate cost awareness and risk-benefit analysis in decision-making about patient and/or population-based care.

SBP 3. Incorporate transferable skills and work effectively in various health care delivery settings and systems.

SBP 4. Perform administrative and practice management responsibilities to ensure ongoing quality control of practice.

SBP 5. Advocate for quality patient care, health equality and optimal patient care systems, and engage in efforts to reduce health disparities and address social determinants of health.

SBP 6. Participate in identifying system errors and consider potential systems solutions.

Community Partnership and Civic Responsibility (CPCR)

CPCR 1. Identify the resources and barriers to health of the local and regional community, and advocate for all vulnerable and marginalized populations within those communities.

CPCR 2. Apply principles of strategic partnership development from a stance of intellectual and cultural humility to understand the local and regional community.

CPCR 3. Actively engage the local and regional community by meeting (and ideally exceeding) formal graduation requirements for community service.

Candidates must have a bachelor's degree from a regionally accredited college or university, or an international equivalent degree. Permanent residents or Green Card applicants may apply. Deferred Action for Childhood Arrivals (DACA) students should contact the Admissions Office directly. We do not accept transfer students for entrance into any year.

Upper-level courses and AP credit may be used to satisfy basic requirements when applicable. Online courses of prerequisites will be considered on a case-by-case basis.

Applicants must complete a minimum equivalent of 32 semester/trimester/quarter hours of the prerequisites in biology, chemistry and physics from an accredited college or university in the United States or Canada. Coursework recommended, but not required, includes natural sciences, human physiology, genetics and cell biology, psychology, sociology, ethics, health policy, foreign language, humanities, communications or computer literacy.

- General Biology - 2 semesters/trimesters/quarters (with labs)
- General Chemistry - 2 semesters/trimesters/quarters (with labs)
- Organic Chemistry - 1 semester/trimester/quarter (with lab)
- Biochemistry - 1 semester/trimester/quarter
- General Physics - 2 semesters/trimesters/quarters
- College English/Writing Intensive - 2 semesters/trimesters/quarters
- College Math or Statistics - 2 semesters/trimesters/quarters (college algebra or above)

View detailed information about the Frank H. Netter MD School of Medicine Admission Policy (p. 652).

Vision

The Frank H. Netter MD School of Medicine will be a vibrant healthcare community that educates and nurtures diverse, compassionate physicians who promote wellness and patient-centered care for all members of society.

Mission

The Frank H. Netter MD School of Medicine is dedicated to educating current and future physicians to serve our community, as well as our profession. We accomplish this goal in a student-centered, collaborative environment that values compassionate care, integrity and inclusivity, academic excellence and scholarship, adaptability and social responsibility.

Values

- a. **Primary Care Education:** providing education focused on partnering with patients to promote health as well as first-line care and chronic disease management.
- b. **Personal and Professional Integrity:** achieving our highest potential as humans and healers by consistently acting with honesty and in accordance with strong moral values.
- c. **Academic Excellence:** creating a stimulating, student-centered environment that supports both learners and faculty to excel in their scholastic activities.
- d. **Inclusiveness and Diversity:** reflected in our students, faculty and staff and their respect of all people.
- e. **Compassion and Patient-Centeredness:** putting the patient at the center of the healthcare experience.
- f. **Social Justice:** seeking to address healthcare inequalities both locally and globally and provide all patients with equal access to care.
- g. **Scholarship:** advancing the field of medicine by promoting discovery, application, integration and dissemination of knowledge throughout one's career.
- h. **Interprofessional Collaboration:** promoting teamwork between disciplines and across institutions to deliver high-quality care.
 - i. **Community Partnership:** developing learning and service opportunities that improve the health of our community.
 - j. **Social Responsibility:** advocating to improve the broader determinants of health in the setting of finite resources.

Commitment to Diversity

The Frank H. Netter MD School of Medicine at Quinnipiac University is committed to providing an academic and work environment that respects the contributions, talent, and diverse experiences of all of our students, faculty, and staff. Our mission and core values include a commitment to diversity, collaboration, inclusivity, and mutual respect. We understand that excellence in medical education, scholarship, and the provision of clinical care is best achieved through promoting diversity in its broadest definition and maintaining an academic and work environment free of discrimination. We pledge to build and sustain a learning community where diversity is celebrated, and to foster access to medical education for learners from all segments of society. We consider inclusivity to be a responsibility of everyone in our learning environment.

Academic Calendar

Frank H. Netter MD School of Medicine Class of 2026 Y1 Calendar Academic Year 2022–23*

August 1–5	Monday– Friday	Orientation
August 8	Monday	Classes Begin
September 5	Monday	Labor Day – University closed
October 5	Wednesday	Yom Kippur – University closed

November 21–25	Saturday– Sunday	Thanksgiving Break
November 28	Monday	Classes Resume
December 17–January 2	Saturday– Monday	Winter Break
January 3	Tuesday	Classes Resume
January 16	Monday	Martin Luther King Jr. Day – University closed
March 13–17	Monday– Friday	Spring Break
April 7	Friday	Good Friday – University closed
May 27	Saturday	Break Begins

Class of 2025 Y2 Calendar Academic Year 2022–23*

August 8	Monday	Classes Begin
September 5	Monday	Labor Day – University closed
October 5	Wednesday	Yom Kippur – University closed
November 21–25	Saturday– Sunday	Thanksgiving Break
November 28	Monday	Classes Resume
December 17–January 2	Saturday– Monday	Winter Break
January 3	Tuesday	Classes Resume
January 16	Monday	Martin Luther King Jr. Day – University closed
March 31	Friday	Final Block Exam

Class of 2024 Year 3 Academic Year 2022–23*

April 25–June 3	Monday– Friday	Step 1
June 6–June 10	Monday– Friday	Orientation
June 13–July 17	Monday– Sunday	Block 1
July 18– August 21	Monday– Sunday	Block 2
August 22– September 25	Monday– Sunday	Block 3
September 26–October 28	Monday– Friday	Block 4
October 31– November 11	Monday– Friday	Exam Block LMC I
November 14– December 23	Monday– Friday	Block 5 (Thanksgiving, November 21–27)
December 24–January 2	Saturday– Monday	Break
January 3– February 5	Tuesday– Sunday	Block 6
February 6– March 12	Monday– Sunday	Block 7
March 13– April 14	Monday– Friday	Block 8

April 17–April 28	Monday– Friday	LMC II Exam Period
-------------------	-------------------	--------------------

Class of 2023 Y4 Academic Year 2022–23*

May 9–May 13	Monday– Friday	M4 Orientation
May 15– June 10	Monday– Sunday	Block 1
June 13–July 8	Monday– Sunday	Block 2
July 11– August 5	Monday– Sunday	Block 3
August 8– September 2	Monday– Sunday	Block 4
September 5– September 30	Monday– Sunday	Block 5 (Block begins on September 6 due to Labor Day)
October 3– October 28	Monday– Sunday	Block 6
October 31– November 25	Monday– Sunday	Block 7
November 28– December 23	Monday– Sunday	Block 8
December 26– January 20	Monday– Sunday	Block 9
January 23– February 17	Monday– Sunday	Block 10
February 20– March 17	Tuesday– Sunday	Block 11
March 20– April 14	Monday– Sunday	Block 12
April 17–May 12	Monday– Sunday	Block 13
May 12	Friday	Commencement

*Calendars are subject to change

Master of Medical Sciences

The Master of Medical Sciences degree acknowledges the accomplishments of students who have successfully completed the first two years of the MD program, but are unable to complete the full program. Students are eligible to apply after withdrawing from the MD program and may do so within 3 years of successful completion of the first two years of the MD program. Students are not eligible to apply directly into the Master of Medical Sciences program.

Medical Doctor

The curriculum at the Frank H. Netter MD School of Medicine prepares students to become highly qualified, compassionate and culturally sensitive doctors. No matter which medical specialty is chosen, our students learn to view your patients through the lens of a holistic physician—always with an emphasis on patient-centered care.

Throughout their four years of medical school, students work closely with faculty mentors, career advisers and clinical faculty physicians in

various medical settings. They offer assistance when choosing courses, help plan the required and elective fourth-year clerkships, and identify residency programs that align to your interests and career goals. You will learn evidence-based medicine through the integration of basic science concepts in Foundations of Medicine (FOM) and rigorous clinical training through Clinical Arts and Sciences (CAS). To reinforce critical thinking skills and self-directed learning, you will also complete a project under the guidance of a mentor in the Scholarly Reflection and Concentration/Capstone course (SRCC).

For your clinical experiences during the third and fourth year, the school has affiliations with several community hospitals in urban, suburban and rural settings. Our principal hospital affiliates are St. Vincent's Medical Center in Bridgeport, Connecticut, and St. Francis Hospital in Hartford, Connecticut. You will experience a variety of clinical work placements that help you decide on your future specialty and practice setting.

The medical school is located on the interprofessional North Haven Campus with the schools of health sciences, nursing and law. This creates a collaborative learning environment for students pursuing degrees in a multitude of healthcare professions, including physical therapy, occupational therapy and physician assistant. Our state-of-the-art facilities include an operating suite with high-fidelity simulation rooms that function as patient simulators and labs with the latest imaging equipment. Our facility includes 16 patient rooms where students practice examining simulated patients.

Medical Doctor Program of Study

The four years of the medical curriculum comprise two years of pre-clerkship foundational instruction and two years of clinical clerkships. Our curriculum is linked to our Netter Educational Program Objectives, which fit into nine categories: Care of Individual Patients, Knowledge and Scholarship, Inter-professional Collaboration, Interpersonal and Communication Skills, Professionalism, Practice-Based Learning and Improvement, Systems-Based Practice, Citizenship and Service, and Concentrated and Independent Learning.

During the first two years, the curriculum consists of three integrated courses: Foundations of Medicine (FOM), Clinical Arts and Sciences (CAS) and the Scholarly Reflection and Concentration/Capstone course (SRCC). During the clerkship years, students clinical learning is organized around the six ACGME Competencies: Medical Knowledge, Patient Care, Interpersonal and Communication Skills, Professionalism, Practice Based Learning and Improvement and Systems Based Practice.

For a visual depiction of the curriculum, see this Curriculum Map (<https://www.qu.edu/4a0fb2/globalassets/global/media/qu/documents/academics/school-of-medicine/netter-curriculum-map.pdf>).

Pre-Clerkship Years

Year 1

MED 811 - Foundations of Medicine I

Course Goal: The goal of Foundations of Medicine (FOM) I is for medical students to achieve foundational knowledge in the basic medical sciences, with an emphasis on gaining a detailed understanding of common and representative illnesses. By the end of year one, students are knowledgeable in human biology and the impact that psychological, social, cultural and economic forces have on human health. They are able to discuss the epidemiology and prevention of major medical conditions. Knowledge gained in FOM I will be revisited and expanded the following year in FOM II.

The course is divided into foundational and organ system blocks with horizontal and vertical integration across the blocks and with the other courses. The School of Medicine's longitudinal themes of pharmacology, nutrition, behavioral and social sciences, biomedical ethics and epidemiology also are integrated throughout the curriculum as they relate to specific organs and diseases throughout each block.

The course is taught through a variety of teaching methods including lectures and small group events that employ case-based learning activities. Dissection-based anatomy is integrated across all of the organ system blocks in the first year.

MED 812 - Clinical Arts and Science I

Clinical Arts and Sciences (CAS) I is an innovative introduction to clinical medicine course that aims to teach foundational clinical skills in a safe, collaborative environment incorporating experiential learning in both simulated and real clinical settings. CAS has two sections providing up to 6-8 hours of curricular activity each week.

Foundations of Clinical Care (FCC): This section is dedicated to teaching clinical skills, predominantly in a small group setting of eight students and two experienced physicians. Students learn patient-centered interviewing, history taking, communication and physical examination. Medical documentation and oral presentations are emphasized throughout the academic year. Clinical reasoning and advanced communication skills are introduced in semester two. Basic procedural skills training, telemedicine training, and interprofessional activities centered around ultrasound training also provide significant experiential learning opportunities.

Simulated practice with standardized patients (SPs) is one of the predominant features of this section of the course. Student knowledge of clinical skills is assessed via formative objective structured clinical examinations (OSCEs) on a monthly basis and with a summative OSCE at the end of the academic year. Faculty complete a summative evaluation of student performance each semester. The course also encourages learners' understanding of professionalism and professional identity formation with self-assessments such as video review and goal setting opportunities, in addition to peer feedback and feedback from the SPs and faculty.

Medical Student Home (MeSH): This section pairs a medical student with a practicing community physician with the purpose of providing each medical student with a supervised environment to practice the foundational clinical skills learned in FCC. Students spend one afternoon a week, 4 hours at a time, in the physician's office-based practice. Physicians directly observe students interview and examine patients. Physicians provide formative feedback through a workplace-based assessment program. A summative faculty evaluation of students is also completed.

MED 813 - Scholarly Reflection & Concentration Capstone I

Course Goal: Scholarly Reflection and Concentration/Capstone (SRCC) is a four-year course focused on seven core domains: Evaluating Information Sources, Critical Appraisal of Literature, Interacting with and Interpreting Data, Self-Reflection, Personalized Curriculum, Responsible Research Practice, and Scholarship.

SRCC allows learners to personalize their curriculum and prepare for scholarly endeavors during residency and future practice. They self-design and execute a capstone project in an area they are passionate about. Learners use narrative medicine and mentoring to develop

personally and professionally. They gain both conceptual understanding and practical skills in research methods, epidemiology, medical informatics, biostatistics, evaluating information sources, and critical appraisal of medical literature. The information presented in this course is integrated whenever possible with material in the Foundations of Medicine and the Clinical Arts and Sciences courses, to enable learners to apply biostatistics, epidemiology, and medical informatics to community and public health, medical literature interpretation, and clinical decision-making.

Year 2

MED 821 - Foundations of Medicine II

Course Goal: Building on the foundation provided by the FOM I curriculum, the goal of FOM II is for medical students to attain essential knowledge and skills related to the pathophysiology and epidemiology of diseases. In addition, students develop a broad understanding of treatment paradigms for common medical disorders. The longitudinal themes of behavioral and social sciences, biomedical ethics, epidemiology, pharmacology and nutrition are interwoven into curricular content in FOM II.

Problem Based Learning (PBL) is a major instructional component in FOM II and integrates active and self-directed learning with the development of clinical reasoning skills in the assessment of patient symptoms, signs and laboratory findings. Collaborative and professional participation in this activity are essential components of PBL.

MED 822 - Clinical Arts and Science II

Clinical Arts and Sciences (CAS) II is an innovative introduction to clinical medicine course that aims to teach foundational clinical skills in a safe, collaborative environment incorporating experiential learning in both simulated and real clinical settings. CAS has two sections providing up to 6-8 hours of curricular activity each week.

Foundations of Clinical Care (FCC): This section is dedicated to teaching clinical skills, predominantly in a small group setting of eight students and two experienced physicians. Students build upon the skills they learned in CAS I. Clinical reasoning becomes a central component of the course in year two, with monthly instructional sessions that are well integrated with the foundational topics being covered in the FOM course. Sessions are also dedicated to advanced physical examination techniques as well as advanced communication skills such as delivering unwelcome news and sharing medical information. Medical documentation and oral presentations continue to be emphasized throughout the academic year with a focus on assessment and plan in CAS II. Basic procedural skills training, telemedicine and interprofessional activities centered around ultrasound training also provide significant experiential learning opportunities.

Simulated practice with standardized patients (SPs) is one of the predominant features of this section of the course. Student knowledge of clinical skills is assessed via formative objective structured clinical examinations (OSCEs) on a monthly basis and with a summative OSCE at the end of the academic year. Faculty complete a summative evaluation of student performance each semester. The course also encourages learners' understanding of professionalism and professional identity formation with self-assessments such as video review and goal setting opportunities, in addition to peer feedback and feedback from the SPs and faculty.

Medical Student Home (MeSH): This section pairs a medical student with a practicing community physician with the purpose of providing each medical student with a supervised environment to practice the foundational clinical skills learned in FCC. Students spend one afternoon a week, 4 hours at a time, in the physician's office-based practice. Physicians directly observe students interview and examine patients. Physicians provide formative feedback through a workplace-based assessment program. A summative faculty evaluation of students is also completed.

MED 823 - Scholarly Reflection & Concentration Capstone II

Course Goal: Scholarly Reflection and Concentration/Capstone (SRCC) is a four-year course focused on seven core domains: Evaluating Information Sources, Critical Appraisal of Literature, Interacting with and Interpreting Data, Self-Reflection, Personalized Curriculum, Responsible Research Practice, and Scholarship.

SRCC allows learners to personalize their curriculum and prepare for scholarly endeavors during residency and future practice. They self-design and execute a capstone project in an area they are passionate about. Learners use narrative medicine and mentoring to develop personally and professionally. They gain both conceptual understanding and practical skills in research methods, epidemiology, medical informatics, biostatistics, evaluating information sources, and critical appraisal of medical literature. The information presented in this course is integrated whenever possible with material in the Foundations of Medicine and the Clinical Arts and Sciences courses, to enable learners to apply biostatistics, epidemiology, and medical informatics to community and public health, medical literature interpretation, and clinical decision-making

Clerkship Years

Year 3

In July 2020, the Netter School changed its clerkship model for third-year students to a LMC. Most of the student will participate in this model; a select group of students will have the option to participate in a longitudinal integrated clerkship in Maine (see MED 837).

MED 839 - Longitudinal Multi-specialty Clerkship (LMC)

The LMC is designed to ensure a robust, flexible learning experience by combining core specialties into "clinical clusters" with shared academic half days. There is also an integrated block, where students get additional clinical experiences in each core specialty as well as exposure to areas such as radiology, anesthesiology, neurology, outpatient medicine and other subspecialty electives. Students also have dedicated time for their Capstone scholarly project in this block. The LMC model includes a longitudinal curriculum of didactics that covers the core content for each specialty along with cross-cutting curricula in narrative medicine, clinical reasoning and health systems science, including health equity.

The third year comprises in-depth clinical experiences in six core specialties: primary care, internal medicine, pediatrics, psychiatry, obstetrics and gynecology, and general surgery. Students receive training in both ambulatory and inpatient settings where they learn through direct patient care as well as teaching attending rounds, lectures and case discussions. Our principal hospital affiliates are St. Vincent's Medical Center in Bridgeport, Connecticut, Waterbury Hospital and Connecticut Children's and St. Francis Hospital in Hartford, Connecticut. We also have affiliations with several community hospitals and numerous outpatient practices in urban, suburban and rural settings. The variety of clinical settings enables students to see a broad range of patient presentations

and determine where they envision practicing in their residency and beyond.

Assessment of students includes clinical evaluations, direct observation with feedback, teaching attending evaluations, national board exams, self-assessments, Objective Structured Clinical Exams, and additional specialty-specific assessments. Students receive regular feedback throughout each clinical cluster and take practice board exams. Students receive two weeks of dedicated study time at the end of each cluster to prepare for the specialty specific national exams. All students will take USMLE® Step 1 before starting their fourth year clinical rotations.

Cluster A

Internal Medicine/Primary Care/Surgery/Integrated Block

5 weeks each

Cluster B

Ob-Gyn/Pediatrics/Psychiatry/Integrated Block

5 weeks each

MED 837 - Longitudinal Integrated Clerkship

The Maine Longitudinal Integrated Clerkship is designed for students who are committed to the care of rural communities. A select group of third-year medical students complete an innovative curriculum of integrated clinical experiences that are designed to treat the whole patient and family across a continuum of care. They work at Northern Maine Medical Center, a modern, fully accredited, 49-bed hospital offering complete obstetric, surgical, pediatric and general medical services. It also provides a state-of-the-art, six-bed intensive care unit for critically ill patients and offers the only child, adolescent and adult inpatient psychiatric units in northern Maine. The center belongs to the 15,000 people in the hospital's service area, the Upper St. John Valley and neighboring communities.

The flexibility and personalized nature of the Maine rural program enables students to tailor their learning. Building on a strong, mentoring foundation of faculty-to-student relationships makes it possible to create a customized patient care experience. Each week, the students have four days of structured and comprehensive educational content in various clinical formats that will address each of the six core clerkships: primary care, inpatient medicine, pediatrics, psychiatry, obstetrics and gynecology, and general surgery. They will also have a half day of didactics and a half day of open space for scholarship or personal needs, and regular clinical exposure in the emergency room setting.

Year 4

Students will complete a four-week required selective in emergency medicine or critical care, a sub-internship and electives. Students will also complete and present their Capstone project and take the USMLE® Step 2 Clinical Knowledge examination. There is ample time to meet with career advisers and work on residency applications and interviews during this year. At the end of the year, there is an optional residency prep course to ensure readiness for intern year.

MED 841 - Emergency Medicine

By the end of the four-week Emergency Medicine clerkship, students should be able to gather information, formulate differential diagnoses, and propose evidence-based management for patients with common presentations in an Emergency Room setting. They will learn to recognize emergent medical conditions and initiate stabilization plan as

well as demonstrate proficiency with basic procedural skills. Students will demonstrate knowledge in managing the following conditions: chest pain, shortness of breath/respiratory distress, abdominal/GI emergencies, fever/infections/sepsis, endocrine/electrolyte emergencies, altered mental status, trauma, intoxication, psychosis/agitation, stroke/TIA, critical patients requiring ACLS, and pediatric acute concerns.

MED 842 - Critical Care

By the end of the four-week Critical Care clerkship, student should be able to gather information, formulate differential diagnoses, and propose evidence-based management for patients with common presentations in an intensive care setting. Students will learn to provide direct care to patients with critical illness and injury, including life threatening multi-system organ failure. By the end of this rotation, students should demonstrate knowledge in managing the following conditions: shock, acute respiratory failure, acute renal failure, acute GI hemorrhage, diabetic ketoacidosis/hyperosmolar hyperglycemic state, strokes/seizures, sepsis, healthcare associated infections, and end of life care/delirium. They will also learn the skills of resuscitation, laryngoscopy and intubation techniques, ventilator management and basic bedside procedures.

MED 844 - Internal Medicine Sub I

In the four-week Internal Medicine Sub-Internship, students will provide autonomous patient care to hospitalized patients to develop competence and readiness for clinical practice as an intern. Students will be an integral part of the team and will actively participate in care transitions for patients including admission, transfer between services, sign-outs between various teams, and discharge from the hospital, as well as cross-coverage roles. At the end of the Internal Medicine Sub-Internship clerkship, each student should be able to gather information, formulate differential diagnoses, and propose evidence-based management for patients with common conditions in an inpatient care setting, including but not limited to the following: atrial fibrillation, COPD/asthma exacerbation, acute/chronic/end stage renal disease, electrolyte disorders, community acquired pneumonia, GI bleed, stroke, and alcohol withdrawal.

MED 845 - Pediatric Sub I

The Pediatric Sub-Internship is a four-week inpatient experience that serves as a bridge between the Pediatric Clerkship and Pediatric Residency. During this rotation, students will learn to take a history in a more targeted manner than in third year, organize their work, formulate a differential diagnosis and a therapeutic plan and implement it while engaging in self-directed learning. By the end of the sub-internship, students should be able to describe the epidemiology, pathophysiology, clinical findings, diagnostic evaluation and management of common pediatric conditions that require hospitalization including but not limited to: surgery-requiring conditions, respiratory distress, gastrointestinal illnesses, dermatological disease, endocrinological emergencies, electrolyte imbalance, sepsis/fever, and central nervous system disorders.

MED 846 - Surgery Sub I

The Surgery Sub-Internship is a four-week inpatient based experience to develop the skills required to diagnose and begin to manage surgical conditions as a surgical intern. The primary focus of the Surgery Sub-I is to foster student development through direct patient care, on the fly learning, exposure to increased complexity of patient conditions, and independent study. Students will formulate comprehensive assessments,

diagnostic and therapeutic plans for common acute and chronic surgical conditions, demonstrate the ability to perform common and necessary surgical skills and work collaboratively to coordinate surgical patient care in a variety of health care delivery settings. The final grade for the rotation will be assigned by the clerkship director using the clinical assessment summary provided by the site director and in consultation with the supervising attending physicians.

MED 847 - Family Medicine Sub I

The Family Medicine Sub-Internship is a four-week long primarily in-patient experience, blended with a few half days of out-patient experience, to develop competence and readiness for clinical practice as a family medicine resident. Students actively participate in care transitions for hospitalized patients including admission, transfer between services, sign-outs between various teams, and discharge from the hospital, as well as cross-coverage roles. Students are expected to provide high-value, evidence-based care for patients with common family medicine conditions including but not limited to: abdominal pain, acute kidney injury, chest pain, congestive heart failure, diabetes mellitus, electrolyte imbalance, hypertension, sepsis, shortness of breath and urinary tract infections.

MED 861 - OB-GYN Sub I

The Obstetrics & Gynecology Sub-Internship is a four-week experience either on the Maternal Fetal Medicine (MFM) or the Gynecology Oncology service. Students will work in both inpatient and outpatient settings and participate as an integral member of the team. Students on the MFM service will learn about the care of high-risk ob-gyn patient conditions including but not limited to: gestational diabetes mellitus, fetal macrosomia, premature rupture of membranes, critical care in pregnancy, multifetal gestation, fetal aneuploidy and prenatal diagnosis of genetic disorders as well as learn ultrasound in pregnancy. Students on the Gynecology Oncology rotation will learn about the care of patients with gynecology malignancies including symptoms, presentation, and diagnosis; treatment and outcomes, including pelvic surgery, radiation and chemotherapy; and post-operative, inpatient, and outpatient management. Students will improve their basic procedural and surgical skills during this rotation to prepare them for internship.

MED 862 - Psychiatry Sub I

The Psychiatry Sub-Internship is a four-week experience designed to give medical students an opportunity to integrate their academic knowledge and clinical experience into practice on both the adult and child/adolescent inpatient units. The goal is to provide future physicians the opportunity to treat a variety of patients with a diverse range of mental illness to develop competence in diagnosing and treating mental illness across the spectrum. By the end of this sub-internship, students will be able to develop an empathic doctor-patient relationship, conduct a clinical interview and perform a complete mental status exam, apply basic science knowledge of neurobiology and psychosocial experiences in the pathogenesis and treatment of psychiatric illnesses, formulate a diagnosis based on DSM-V, understand the different treatment approaches of major psychiatric syndromes, and practice as an effective team member in a multi-disciplinary team.

Electives

Students take a minimum of 28 weeks of electives of their choice. Electives can be taken at the Netter School of Medicine or students can participate in away rotations—internationally or domestically as available and meeting criteria. Electives encompass diverse patient care experiences as well as skills development in areas such as teaching or

leadership. Custom electives are also an option, subject to approval. Elective choices vary depending on site availability.

Accreditation

The medical school is accredited by the Liaison Committee on Medical Education. The LCME is jointly sponsored by the Association of American Medical Colleges (AAMC) and the American Medical Association (AMA).

Technical Standards

Quinnipiac University is committed to admitting qualified applicants without regard to race, ethnicity, age, national or ethnic origin, disability, gender identity, sexual orientation, marital status or religion. Qualified applicants to the Frank H. Netter MD School of Medicine are individuals who demonstrate the cognitive and physical abilities, and behavioral and communication skills required to complete a rigorous curriculum and meet certain technical standards for medical students and physicians. The MD degree signifies the acquisition of general knowledge in the fields necessary for the practice of medicine. A graduate of the Frank H. Netter MD School of Medicine of Quinnipiac University must have the knowledge and skills to function in various clinical settings and to provide a wide spectrum of care.

In order to acquire the requisite knowledge and skills, students must possess both sensory and motor abilities that permit them to accomplish the activities described in these standards, with or without reasonable accommodations. A student must be able to effectively process information through their sensory functions, with or without a reasonable accommodation, and do so consistently, rapidly and accurately. Students must be able to learn, integrate, analyze and synthesize data.

Providing care for patients' needs is essential to the role of a physician and comprises a significant component of training. A student must be able to tolerate physically challenging workloads and function under stress. The responsibilities of medical students may require their presence and attention during daytime and nighttime hours.

A student in the School of Medicine must be able to meet the following standards, with or without a reasonable accommodation:

1. Observation

Students must have sufficient visual ability to be able to observe patients accurately from a distance and close at hand. They must be able to observe and participate in laboratory exercises and demonstrations. They must be capable of viewing and developing the skills needed to interpret diagnostic modalities. Students must be able to obtain a medical history and perform a complete physical exam, including detecting and interpreting non-verbal communication such as change in posture, body language, mood and facial expressions demonstrated by patients.

2. Communication

Students must be able to communicate effectively, in both written and oral English, and must be able to speak with and comprehend patients, their families, and other members of the healthcare team. Students must be capable of establishing rapport with patients and families. Students must be able to compose and record information accurately and clearly.

3. Motor and Sensory Function

Students must have sufficient motor and sensory function necessary to conduct a routine history and physical examination, differentiate normal from abnormal findings, and document their findings. Students must have sufficient motor function in order to conduct movements required

to provide general care and emergency treatment to patients according to acceptable medical practices. Students must have sufficient motor ability to access and perform at clinical sites required for mandatory experiences.

4. Intellectual, Conceptual, Integrative and Quantitative Ability

Students must have sufficient cognitive abilities to master the body of knowledge comprising the curriculum of the School of Medicine. They must be able to recall large amounts of information, perform scientific measurements and calculations, and understand and learn through a variety of instructional modalities including but not limited to: classroom instruction, small group discussion, individual and self-directed study of materials, preparation and presentation of written and oral reports, peer review and assessment, as well as use of computer-based technologies. Students must demonstrate reasoning abilities necessary to gather, analyze, synthesize and integrate information from varying sources efficiently and effectively. They must be able to measure and calculate accurately and be able to perceive 3D relationships and understand the spatial relationships of systems.

5. Attitudinal, Behavioral, Interpersonal and Emotional Characteristics

Students must have the capacity to learn and understand ethical principles, professional standards for physicians, and state and federal laws governing the practice of medicine. Students must demonstrate the maturity, emotional stability and sensitivity required to form effective relationships with patients, faculty, staff, colleagues and all members of the healthcare team. They must exhibit honesty, integrity, self-sacrifice and dedication.

Students must have the capacity to effectively communicate with and provide care, in a non-judgmental manner, for individuals whose culture, spiritual beliefs, physical or mental abilities, sexual orientation or gender expression differ from their own. They must be able to examine the entire patient, male and female, regardless of their social, cultural or religious beliefs. Students must have the capacity to develop the requisite skills needed to identify personal biases, reactions and responses as well as recognize differing points of view, and not allow personal attitudes, perceptions or stereotypes to compromise patient care.

Students must be of sufficient emotional and mental health to utilize fully their abilities, exercise sound judgment and complete educational and patient care responsibilities safely, effectively, and with courtesy, compassion, and respect. They must be capable of modifying their behavior in response to feedback and evaluation. Students must exhibit adaptability and be able to work effectively under stress and tolerate an often physically taxing workload. Individuals whose performance is impaired by abuse of substances, including alcohol, are not suitable candidates for admission, promotion or graduation.

6. Ethical and Legal Considerations

Candidates for admission must meet the legal standards to practice medicine in the State of Connecticut. Candidates must therefore provide written explanation of any felony offenses or disciplinary actions taken against them prior to matriculation, and commit to notifying the associate dean for student affairs immediately in the event of conviction of any felony offense while a student of the School of Medicine. Serious instances of unethical conduct or conviction of a felony offense, or the failure to disclose such conduct or felony offense, may lead to disciplinary action by the School of Medicine, including dismissal.

The Frank H. Netter MD School of Medicine will consider any candidate who demonstrates the ability to perform the skills specified in these technical standards, with or without reasonable accommodation. Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 address the provision of services and accommodations for qualified individuals with disabilities. Services for students with disabilities are provided to qualified students to ensure equal access to educational opportunities, programs and activities in the most integrated setting possible. In the consideration of students for admission and in the training of students for the MD degree, it is essential that the integrity of the curriculum be maintained, that elements of the curriculum considered necessary for the education of a physician be preserved and that the health and safety of patients be considered vital. The use of a trained intermediary is not acceptable in clinical situations as judgment is mediated by someone else's power of selection, observation and interpretation. As such, students must be able to perform in an independent manner with or without such accommodations.

Students who are interested in requesting accommodations are instructed to take the following steps:

- Submit a completed Accommodation Request Form for Students with Disabilities (found on the university website) to the university Office of Student Accessibility
- Provide current, supporting documentation from a licensed physician, psychologist, or other appropriately credentialed evaluator.
- Candidates for the MD degree will be assessed on a regular basis by the Office of Accessibility according to the academic and Technical Standards of the School of Medicine on their abilities to meet the curricular requirements.
- The Office of Accessibility will work with the School of Medicine associate dean for student affairs who, in concert with course and clerkship directors, will ensure that reasonable accommodations are in place.

Students must complete the following requirements to be eligible for graduation from the School of Medicine:

- Obtain a satisfactory grade in each course
- Successfully complete Scholarly Reflection & Concentration Capstone course including the concentration/capstone project
- Successfully complete the Year 3 and Year 4 clerkships and electives
- Pass USMLE® Steps 1 and 2 CK
- Complete the Frank H. Netter MD School of Medicine's interprofessional education, community service and service learning requirements
- Demonstrate the personal, professional and ethical attitudes and behaviors expected of a physician graduate of the Frank H. Netter MD School of Medicine

Students must complete the requirements of each academic year within a two-year period, but must complete the curriculum and meet all graduation requirements within a six-year period. Additional time to complete the curricular requirements may be stipulated as part of an accommodation made under the provisions of the Americans with Disabilities Act. Approved leaves of absence (refer to section XIX. Leaves of Absence) do not count toward time needed to complete curricular requirements. The Promotions and Performance Standards Committee

has the discretion to determine whether portions, or all, of an academic year are counted toward this requirement.

Netter School Code of Conduct On Professionalism

In order to uphold the mission and aims of the Frank H. Netter MD School of Medicine at Quinnipiac University, students, faculty and staff are given the responsibility of conducting themselves in a manner that positively reflects the School of Medicine and the interests of patients. As such, the standard of professionalism is defined by our interactions with colleagues, commitment to excellence in theory and in practice, courteous behavior between colleagues, faculty, administration, patients, and community partners, and maintenance of accountability, effective communication, presentation to others, consistency in work, and commitment to adhering to the standards and guidelines enumerated in the Netter School of Medicine Code of Conduct.

The Code of Conduct for the Frank H. Netter MD School of Medicine is based on the following principles.

- Compassion
- Duty
- Honesty
- Integrity
- Respect
- Professionalism

All members of the School of Medicine, including faculty, students and staff are expected to abide by the standards articulated in this Code of Conduct as well as current university policies and procedures. Faculty, administration, students and staff are expected to recognize and address violations of the Code of Conduct. Violations of the Code of Conduct may result in submission of Reports of Concern and/or lead to review by the Professionalism Board and/or other disciplinary actions.

I. GENERAL STANDARDS

Conduct of Faculty, Administrators and Staff

- Members of the School of Medicine shall perform their duties in a fair and ethical manner in accordance with established policies, procedures and regulations.
- Members of the School of Medicine shall carry out their duties with professionalism, and in accordance with the guiding principles of this Code of Conduct.
- Supervisors and administrators shall provide equal opportunity and access to the school's programs, benefits and services.
- Supervisors and administrators shall demonstrate compliance with the Code of Conduct within their unit.
- Inappropriate personal relationships between supervisors and those they supervise are prohibited.

Civility

- Members of the School of Medicine shall promote a spirit of civility and collegiality that allows open and constructive intellectual debate.
- Members of the School of Medicine have a responsibility to treat each other with consideration and respect. Administrators and supervisors have an elevated responsibility to demonstrate these behaviors and to promote their expression in the workplace.
- Engaging in behaviors that harass, intimidate, bully, threaten or harm another member of the School of Medicine, or other members of

the community with whom we learn and/or provide patient care, undermine a respectful and civil work environment, and are expressly forbidden.

Non-Discrimination

- Members of the School of Medicine are dedicated to fostering a safe working and learning environment for all; all forms of discrimination and acts of intolerance including, but not limited to, sexual harassment, intimidation and retaliation, are condemned.

Harassment

- Members of the School of Medicine are dedicated to fostering a safe working and learning environment for all, and condemns all forms of discrimination and acts of intolerance including, but not limited to, sexual harassment, intimidation and retaliation.

Confidentiality

- Members of the School Medicine respect and maintain the confidentiality of faculty, staff, patient, student and research records in accordance with university and clinical site policies and procedures, state regulations and federal laws.

Attire

- All students shall familiarize themselves with the Dress Code policy set forth in Section XVII of the Academic Policies ("the Dress Code Policy"). Students should remain cognizant that the Dress Code Policy is in place to ensure (i) patient and student safety; (ii) patient comfort; and (iii) general standards of professionalism. The Dress Code Policy applies to clinical sites, CAS events where standardized patients are present or any other event where faculty explicitly advises students that students shall dress in accordance with the Dress Code Policy. If a student violates the Dress Code Policy, such student shall be informed of such violation by a faculty member. Additionally, students may inform their fellow students of their concerns regarding violations of the Dress Code Policy by either speaking directly with the student or by submitting a Report of Concern.

Timeliness/Punctuality

- Students should be prepared and ready to participate at the start time of all events. Accordingly, students should strive to arrive at least five minutes prior to the stated session start time to ensure that they have had time to unpack and are ready to actively participate when the event begins. This punctuality will add to the respectful, professional and cooperative learning environment one's peers and faculty deserve. Arriving late to a required event is both disruptive and disrespectful to fellow learners. As such, arriving after the start time of a required event would be considered a violation of the student Code of Conduct.
- Similarly, faculty should begin educational events on time. Unless otherwise noted, educational events in the pre-clerkship curriculum conclude 10 minutes prior to the hour.
- Students will complete educational tasks/assignments by the prescribed deadline.

Computer/Telecommunications Use

- Employees, students and volunteers are provided with access to the university's computer and telecommunication networks to allow them to carry out the functions of the institution, and are responsible for the appropriate use of these resources.
- The members of the School of Medicine understand, support and abide by the policies concerning the ethical and responsible use of computers and electronic information at Quinnipiac University.

- Students at clinical sites abide by the site policies concerning the ethical and responsible use of computers and electronic information.

Regulatory Compliance

- Members of the School of Medicine strive to ensure that they meet the highest possible standards wherever relevant federal, state and local regulations, laws and guidelines apply.

Health and Safety

- Members of the School of Medicine are responsible for complying with all workplace safety and health regulations and will report unsafe conditions, equipment or practices to appropriate School of Medicine, university or clinical site officials.
- Members of the School of Medicine should not participate in academic activities, including patient care (simulated or real), under the adverse influence of psychotropic substances (including alcohol), whether prescribed or non-prescribed; or if they are otherwise impaired such that it would affect the safety of patients or others.

Conflict of Interest

- Medical professionals on occasion engage in activities where there may be a real or perceived conflict of interest. A conflict of interest is defined as a situation when a reasonable observer may perceive that a member of the School of Medicine, or a family member, is acting based on personal interests or gain rather than their obligations to the School of Medicine and/or university. Members of the School of Medicine, and their immediate family, should avoid or minimize real and perceived conflicts of interest whenever possible. If faced with a potential conflict of interest, members of the School of Medicine will disclose the nature of the conflict to the appropriate administrator or supervisor, and a plan for managing the conflict of interest must be developed.
- Members of the School of Medicine will not accept gifts from any person or entity that is seeking to do business with the School of Medicine, the university, or clinical site when such gifts are intended or may be perceived to secure or influence a business relationship.
- Members of the School of Medicine should not accept gifts from any person or entity that may be viewed as seeking preferential treatment; that may cross professional boundaries; or that is of excessive value. Likewise, they should not proffer gifts in order to seek preferential treatment or cross professional boundaries.
- Members of the School of Medicine will not engage in secondary employment or activity that impairs their independence or judgment in their official duties or that will require them to disclose confidential School of Medicine or university information, unless authorized by the School of Medicine.
- Members of the School of Medicine will not use their positions for personal financial gain beyond official compensation, or for the financial benefit of their family members or domestic partners, unless authorized by the School of Medicine.
- Members of the School of Medicine will not use School of Medicine or university resources for purposes unrelated to their School of Medicine responsibilities.

II. EDUCATIONAL STANDARDS

The most important mission of the School of Medicine is the education of medical students and other learners. To ensure the highest standards of conduct in all interactions between faculty and learners, members of the School of Medicine shall abide by the following compact.

Compact Between Faculty and Learners

Preparation for a career in medicine demands the acquisition of a large fund of knowledge and a host of special skills. It also demands the strengthening of those virtues that embody the doctor/patient relationship and that sustain the profession of medicine as a moral enterprise. This Compact serves both as a pledge and as a reminder to teachers and learners that their conduct in fulfilling their mutual obligations is the medium through which the profession inculcates its ethical values.

The teacher-learner relationship between faculty and medical learners—students, residents and fellows—should demonstrate the highest standards of ethical conduct in all educational settings and be conducted without abuse, humiliation, harassment and exploitation of relationships for personal gain or advantage.

Guiding Principles

Duty: Medical educators have a duty not only to convey the knowledge and skills required for delivering the profession's contemporary standard of care, but also to instill the values and attitudes required for preserving the medical profession's social contract across generations.

Integrity: The learning environments conducive to conveying professional values must be suffused with integrity. Medical learners gain enduring lessons of professionalism by observing and emulating role models who epitomize authentic professional values and attitudes.

Respect: Fundamental to the ethic of medicine is respect for every individual. Mutual respect between learners, as novice members of the medical profession, and their teachers, as experienced and esteemed professionals, is essential for nurturing that ethic. Given the inherently hierarchical nature of the teacher/learner relationship, teachers have a special obligation to ensure that students are always treated respectfully.

Communication among Faculty, Staff and Students: The School of Medicine values an environment of civility that promotes open and constructive intellectual debate. The School of Medicine expects that faculty, staff and students will:

- Treat all students, administrators, staff, peers and patients (real or simulated) with respect and dignity both in their presence and in discussions with others.
- Engage in professional and respectful discourse, manifest by the language used and the timeliness of responses, whether verbal, in writing or via digital platforms.
- Promptly report experiences of mistreatment or instances of witnessed unprofessional behavior to appropriate faculty or staff. All such reports are treated as confidential and reprisals or retaliations of any kind will not be tolerated. Any documented unprofessional behavior will be referred to the appropriate department chair/or Dean's office staff for further action.

Commitments of Faculty: Members of the faculty agree to do our utmost to ensure that all components of the educational program for medical learners are of high quality. As mentors for learner colleagues, faculty will:

- Maintain high professional standards in all interactions with patients, colleagues and staff.
- Recognize the importance of personal wellness and, as such, support learners' needs to have sufficient time to fulfill personal and family obligations, enjoy recreational activities, and obtain adequate rest.

- Nurture both the intellectual and the personal development of learners. Abuse or exploitation of medical learners will not be tolerated.

Commitments of Students, Residents and Fellows: Learners agree to do their best to acquire the knowledge, skills, attitudes and behaviors required to fulfill all educational objectives established by the faculty. Trainees will:

- Cherish the professional virtues of honesty, compassion, integrity, fidelity and dependability.
- Treat all faculty members, administrators, staff, peers and patients (real or simulated) with respect and dignity both in their presence and in discussions with others, and without regard to gender, race, national origin, religion or sexual orientation.
- Embrace the highest standards of the medical profession and conduct themselves accordingly in all of interactions with patients, colleagues, faculty and staff.
- Work collaboratively in interprofessional teams to enhance patient safety and quality of care.
- Assist fellow students and residents in meeting their professional obligations while fulfilling their own obligations as professionals.

III. SCHOLARSHIP STANDARDS

The School of Medicine is committed to the highest standards of professional conduct and integrity in scholarship. These standards include honesty, trustworthiness, objectivity, accountability, openness, respect and fairness when dealing with other people, and a sense of responsibility toward others.

We understand that academic freedom is essential to creating an atmosphere in which scholarship flourishes. Promotion of intellectual freedom is consistent with assuring a climate of integrity and the School of Medicine has the right and the obligation to inquire into all instances of alleged or apparent misconduct in scholarly activities. All scholarly activity at the School of Medicine will be conducted according to the following standards:

Scholarly Integrity

All members of the School of Medicine will:

- Properly collect, record and maintain data related to scholarly activity.
- Take responsibility for all publications and presentations of which we are author or co-author.
- Appropriately acknowledge, in publications and presentations, those who have contributed to our scholarly activity.
- Grant access to data related to scholarly activity to co-investigators involved in generating the data.
- Grant reasonable access to our resources to other university members involved in scholarly activity.
- Not interfere with the scholarly activity conducted by students or faculty.
- Neither commit nor tolerate plagiarism, falsification or fabrication of data, or other misconduct related to scholarly activity.

Human Research

All members of the School of Medicine will:

- Abide by all federal and state laws and regulations, in addition to the university's policies and procedures, when performing studies involving human subjects.
- Respect human research participants and be committed to their safety.
- Protect subjects by securing institutional review and approval for any human research.
- Adhere to approved protocols and obtain prospective institutional approval of any changes in those protocols.
- Engage all human subjects, or their appropriate representatives in a meaningful informed consent process, including explanations of possible risks and benefits before initiating a research protocol.
- Allow potential or current participants to withdraw from a study at any time without prejudice.
- Notify human subjects in a timely fashion of any serious adverse events associated with a human-subjects study.
- Conduct appropriate education and training before initiating a human subjects study.

Animal Research

All members of the School of Medicine will:

- Abide by all federal and state laws and regulations, in addition to the university's policies and procedures, regarding the care, transport, maintenance and use of research animals.
- Be committed to the humane treatment of animals in research in accordance with state and federal laws and guidelines.
- Protect research animals by securing appropriate institutional review and approval prior to initiation of any research involving vertebrate animals.
- Adhere to approved protocols and obtain prospective institutional approval of any changes in those protocols.
- Conduct appropriate education and training of all involved individuals before initiating animal research.

Laboratory Safety

All members of the School of Medicine will:

- Abide by all federal and state laws and regulations, in addition to the university's policies and procedures, concerning laboratory safety.
- Seek prior approval of appropriate university committees when research involves hazardous chemical substances, biohazardous materials or radioactive materials.
- Properly document, store, handle, transport and dispose of radioactive, biohazardous, and hazardous chemical materials, pharmaceuticals and investigative drugs.
- Participate in appropriate education and training before initiating studies involving such materials.

- Comply with all workplace safety and health regulations and report unsafe conditions, equipment or practices to supervisors or other appropriate university officials.
- Complete required instructional and training sessions when dictated by funding or oversight agencies.

Research Support

All members of the School of Medicine will:

- Use research funds only for their designated purposes.
- Accurately account for time and effort related to research funding.
- Disclose financial conflicts of interest to university administrators and, as appropriate, manage such conflicts in accordance with existing policies and procedures.
- Properly acknowledge sponsorship of research in our publications and presentations.
- Disclose inventions produced from our research to the university, in accordance with the university's policy, so that consideration is given to the protection of intellectual property.

IV. SERVICE STANDARDS

Members of the School of Medicine are expected to engage in service, and in so doing be good citizens within the School of Medicine, and across the university. Importantly, members of the School of Medicine should engage in service and learning activities within the communities in which we work and learn. Because service within the community reflects on the School of Medicine and the university, its members abide by the following public engagement standards and:

- Believe the reputation of the School of Medicine and university is tied to its responsiveness to the needs of the citizens and communities in which we work and learn.
- Reach out to and engage with communities in reciprocal partnerships.
- Respect community members, demonstrate cultural competence in their interactions with them, and comply with School of Medicine and university policies, as well as the policies of the community entity.
- Strive for responsible, engaged scholarship and community-based programs to the benefit of communities by involving our partners in the planning, execution and dissemination of the knowledge gained by such programs.
- Recognize and respect the knowledge and behaviors of partners and the value of fostering a collaborative environment.
- Encourage students to engage in community-based service learning experiences.

V. PATIENT CARE STANDARDS

As a school dedicated to training health professionals, we are committed to modeling and providing care that is of the highest quality, compassionate and patient-centered. To meet this commitment, we abide by the following standards related to patient care and interactions. All members of the School of Medicine involved in patient care activities will:

- Understand and support the applicable Patient's Bill of Rights and Responsibilities.
- Strive to deliver health care that is based on contemporary scientific knowledge and technology.
- Provide educational resources and opportunity for consultations with other healthcare programs and professionals to assist our patients in the planning of their treatment.
- Strive to consider the physical, emotional and spiritual needs of our patients in making our treatment recommendations.
- Not extend or receive payments or benefits in exchange for referrals, and base our health care and referrals solely on the well-being of and best treatment for our patients.
- Recognize that patients have a right to ask members of their healthcare team about the role of students and residents in their care, and explain to our patients the importance of our educational mission as relates to their treatment.
- Provide our patients with information necessary to make informed healthcare decisions.
- Prepare clear, honest and accurate patient medical documentation in a timely manner.
- Maintain the confidentiality of patient information in accordance with existing policies and procedures, federal laws and state regulations, including but not limited to the Health Information Portability and Accountability Act (HIPAA).
- Not engage in romantic, sexual or other non-professional relationships with a patient (simulated or real) currently under the care of the trainee.
- Not misrepresent themselves as a licensed or certified health care provider.

VI. BUSINESS AND OTHER STANDARDS

All members of the School of Medicine will:

- Utilize such School of Medicine and university resources properly and protect them against loss, theft, misuse and waste.
- Use any form of intellectual property covered by copyright and license agreements in compliance with copyright law and the terms of the license agreement under which it was obtained.
- Accurately account for time and provide proper documentation when seeking reimbursement for work-related expenses.
- Not make representations on behalf of the School of Medicine or university without official authorization.

VII. VIOLATIONS OF THE CODE OF CONDUCT

All members of the School of Medicine have a duty and responsibility to report violations of the Code of Conduct to an appropriate administrator or supervisor. Faculty members particularly have a crucial responsibility to report student unprofessionalism to maintain a professional and positive educational learning environment. Recurrent or egregious tardiness may result in submission of Reports of Concern and/or lead to review by the Professionalism Board.

VIII. PRACTICAL CONSIDERATIONS

The following examples are intended to illustrate application of the Code of Conduct, and is not intended to encompass all circumstances.

Members of the Netter community will:

- Respond within an appropriate timeframe to official communications from the school. This ideally means within 24-hours, not to exceed 48 hours unless extenuating circumstances such as travel and/or limited means of communication prevents a response within 48 hours.
- Attend all required sessions unless an excused absence is granted by the appropriate school representative.
- Avoid tardiness as outlined in section VIIA above.
- Meet all deadlines for course and clerkship assignments and evaluations unless officially excused by the appropriate school representative.
- Maintain the integrity of examinations if granted the privilege of an 'early take' or 'late take' of an examination by not revealing or discussing examination content with peers. Students granted a 'no take' may not be present during the examination. Students may only take an examination in the location(s) designated by the school. Cheating will not be tolerated.
- Offer original work for each assignment or learning task, and properly cite the work of others. Violations and plagiarism will not be tolerated.
- Admit errors and not knowingly mislead others in the classroom and clinical setting (real or simulated).
- Recognize the limitations of their knowledge, skills, or physical or emotional state, and seek supervision, advice or appropriate help before acting.
- Learn to recognize when their ability to function effectively is compromised, ask for relief or help, and notify the responsible person if something interferes with the ability to perform course work, clinical or research tasks, safely and effectively.
- Accept constructive feedback from faculty, peers and other health professional team members and student colleagues, asking clarifying questions when needed, and implement steps to improve performance based on feedback provided. Maintain a respectful and professional environment throughout feedback sessions.
- Strive to apply principles of team dynamics and strategies to prevent and resolve conflict.
- Not alter or falsify academic, patient or simulated patient documents (both paper and electronic).
- Not gain or provide unauthorized access to academic or administrative files, patient medical records, or research documents, via computer or other means or method. Protect patient and standardized patient privacy to full ability.

School of Medicine Admission Policy

Frank H. Netter MD School of Medicine Admission Policies 2021-2022

Admissions Committee Summary

The Admissions Committee is responsible for performing the essential function of evaluating candidates for admission to the Frank H. Netter MD School of Medicine at Quinnipiac University. The role of the Admissions Committee is to ensure that the quality and diversity of the class match the mission of the school to train highly qualified, culturally sensitive, patient-centered physicians. The committee strives to select students who represent a range of values and beliefs, interests and experiences, as well as intellectual and cultural viewpoints.

Each applicant will be evaluated on their capability to become a competent physician, as well as, on their potential to contribute to the educational experience of their fellow students at Quinnipiac University. It is the responsibility of the Admissions Committee to ensure that the Netter School selects students with academic promise and personal attributes that will allow for success in their medical studies, and also develop into skilled and empathetic physicians with a high degree of professionalism and strong communication skills.

As a model for selecting students, the admission process looks at each candidate's application holistically – taking into account their *Experiences, Attributes and Metrics*.

Admissions Committee Membership

The Admissions Committee will consist of the associate dean for admissions (*ex-officio member*), a chair (non-voting; note also that the associate dean for admissions can be appointed as the Admissions Committee chair), one other non-voting *ex-officio member*, and 22 voting members. The voting members of the Admissions Committee include medical sciences faculty, clinical faculty, and medical students.

The voting committee members determine admissions policy. For decisions on individual medical school candidates, the committee is divided into two equivalent subcommittees; each subcommittee reviews

University Policies

The following general university policies are followed by the School of Medicine:

applications and makes decisions on individual candidates by their voting (“Accept,” “Wait List,” or “Deny”). The roles of each voting member are to review the applications of candidates they will be interviewing and voting on during committee meetings, conduct interviews, and attend Admissions Committee meetings on a regular basis during the interview cycle.

The voting members for each subcommittee can include up to:

Seven Department of Medical Sciences faculty members appointed by the chair of the medical sciences department. They are appointed to three-year renewable terms.

Two Clinical faculty members appointed by the chairs of clinical departments. They are appointed to three-year renewable terms.

Four (two active per meeting; two alternate) Second-year medical students are appointed by the associate dean for students in consultation with the associate dean for admissions. They are appointed for a one-year term.

The associate dean for admissions and the chair of the admissions committee do not vote. The assistant dean for health career pathways serves as an *ex-officio*, non-voting member of the Admissions Committee.

At the beginning of each admissions cycle, committee members are required to sign a Conflict of Interest form.

Interviewer Pool Membership

Members of the interviewer pool make an important contribution to selecting our medical students by performing interviews. The pool is composed of medical students, faculty and staff.

Admissions Training

Each year, the Office of Admissions will provide interview training, a copy of the Netter SOM Admissions Policies document, the Netter SOM Interview Handbook, and other AAMC literature pertaining to medical school admissions and holistic review of medical school applicants. All new interviewers will also review an asynchronous Implicit Bias training module.

Application Screening and Interview Procedures

Overview

Applicants to the Netter School of Medicine are required to apply through the American Medical Colleges Admissions Service (AMCAS). Verified AMCAS applications are screened by the Office of Admissions staff to determine eligibility for receiving an invitation to submit a secondary application. Candidates who submit a secondary application are screened by trained admissions staff and select faculty. The screened applications are then reviewed by the associate dean for admissions and the chair of admissions, who decide on who is invited for an interview. Candidates who choose to be interviewed are evaluated by the Admissions Committee.

Preliminary Selection Process

The Office of Admissions will invite qualified applicants the opportunity to submit a secondary application. Applicants invited to submit a secondary application must attest to reading our Technical Standards before they are able to submit the secondary application. Applicants who do not meet the criteria established by the Admissions Committee are notified via email of the decision not to move forward with their application.

Selection to Interview

Members of the Office of Admissions and select faculty review all completed AMCAS and secondary applications. Applicants are reviewed holistically (i.e., their experiences, attributes and metrics) using the applicant’s portfolio (AMCAS Application and Secondary Application). These reviews are guided by the *Guidelines and Rules for Offering an Interview*, written and approved by the Admissions Committee.

Guidelines and Rules for Offering an Interview

The Admissions Committee is charged with selecting students who fit the mission and vision of the Netter School of Medicine. The ultimate goal of our institution is to train highly qualified, culturally competent physicians. In addition to being academically strong, we place great emphasis on selecting candidates for attributes and experience that align with our mission and also enhance the inclusive and diverse culture that we hope to establish and maintain. In selecting applicants for an interview, and ultimately for matriculation, we consider the following attributes to be important:

Diversity: race, ethnicity, gender, gender identity, sexual orientation, upbringing (e.g., urban, rural), socioeconomic status, and whether they are the first generation of their family to attend college.

Maturity and Character: empathy, integrity, resilience (i.e., “grit”), adaptability, persistence, and cross-cultural awareness.

Skills and Abilities: motivation, aptitude, interpersonal communication, curiosity and critical thinking.

In addition to being mindful of the attributes listed above, we request that application screeners, appointed by the associate dean for admissions, consider the following characteristics when deciding to recommend an applicant for an interview:

Necessary

- Evidence of exposure to medical practice (e.g., physician shadowing, clinical volunteering, etc.).
- Evidence of community engagement/citizenship.
- Evidence of the capacity to handle the academic rigor of medical school.
- Strong letters of recommendation from referees with in-depth knowledge of the applicant.

Desirable

- Evidence of exposure to medical practice (e.g., physician shadowing, clinical volunteering, etc.).
- Work, volunteer and/or shadowing experience in clinical setting(s) that are substantively related to primary care, rehabilitative medicine, and/or global health.
- Explicit statement of interest in primary care, rehabilitative medicine, and/or global health made in AMCAS and/or secondary application essays.
- Substantive evidence of distance traveled.
- Substantive evidence of tenacity/overcoming personal obstacles.
- Work, scholastic or volunteer experience that has positively impacted medically underserved or vulnerable populations.
- Work experience that demonstrates personal growth and maturity.

- Research experience that has culminated in a favorable letter of recommendation from mentor(s) with or without related publications in the peer-reviewed literature.
- Evidence of a well-rounded education, including classes in the humanities.

The following cohorts shall be prioritized to receive early interview scheduling, if possible:

- Individuals from SES disadvantaged backgrounds.
- Underrepresented in medicine applicants.
- Military veterans.
- Fluent or advanced Spanish language speakers.
- Those with truly exceptional academic credentials (GPA and MCAT).

In addition to these guidelines, screeners are also instructed to consider the following criteria:

- Netter-Identified Diversity Categories: socioeconomically disadvantaged, African American and Hispanic/Latino, Spanish language proficient, and Armed Service Veterans.
- Educational Diversity: applicants from challenging socioeconomic backgrounds; applicants graduating from a Historically Black College or University, a Hispanic Serving Institution, Tribal College/University, or from a Minority Serving Institution; age; language; geography; gender; military service; self-disclosed disability; LGBTQ+ (gender identity/orientation).
- Experiences (medical/clinical): EMT; hospital; hospice; nursing home; clinic; doctor's office; shadowing; or medical service trips.
- Community Service: social service; educational; public health; environmental; mental health; or faith-based.
- Extracurricular Activities: student clubs/organizations; art; music; theatre; athletics; Greek life; or part-time employment.
- Leadership (appointed/elected): student government; club/organization; athletics (e.g., captain); or activity officer.
- Intellectual Curiosity: academic research; clinical research; membership in academic associations; entrepreneurship; innovation of any kind; participation in college level academic enrichment programs; fellowships; publications/professional meetings.
- Full-Time Work Experience
 - Secondary Application Personal Statement: motivation for career in medicine; interest in a primary care specialty, evidence of compassion, empathy and self-awareness; evidence of collaboration/teamwork, adaptability and growth.

The screeners complete an evaluation form that includes a summary recommendation on how well the applicant might "fit" the Netter SOM (e.g., "Poor Fit," "Questionable Fit," "Acceptable Fit," "Strong Fit," "Ideal Fit"). The associate dean for admissions and the chair of admissions review their evaluations and decide whether or not to invite the applicant for an interview.

The Interview

The interview day and interviews are conducted virtually with the Zoom platform. Interview days are on Mondays, Fridays and some Wednesdays. Invitations to interview are sent via email by the Office of Admissions. Applicants are asked to choose from several available interview dates. Once the applicant selects an interview date, the Office of Admissions sends a confirmation email with the interview day itinerary.

Admissions Committee Decision

Overview

After each interview, the two assigned interviewers complete an electronic rating form; interviewers can view the evaluation of the other interviewer. Prior to each Admissions subcommittee meeting, the chair of the Admissions Committee sets the agenda. After discussion of a candidate's application and their interview performance, the committee votes on whether to Accept, Deny, or Wait List an applicant. Votes are confidential and cast electronically. The outcome of votes can only be seen by the associate dean for admissions, the chair and the admissions staff members who are assisting with the voting process. As voted by the Admissions Committee, members may take notes during candidate deliberations, but those notes are to be destroyed at the conclusion of the meeting.

Because applicants are admitted on a rolling basis, the Admissions Office and the Admissions Committee will do everything within their power to ensure that desired candidates who interview late in the admissions cycle have the opportunity to attend the Netter SOM.

Decision Procedures

- No vote can be held unless a quorum is present. A quorum is defined as a 2/3 majority of the *active* voting membership of a subcommittee. The associate dean for admissions, the chair of the Admissions Committee, and the assistant dean for health careers pathways do not vote and do not count toward a quorum. Student votes can never represent the majority of the vote.
- A simple majority of the total subcommittee voting membership is required for any final action on a candidate ("Accept," "Deny," "Wait List"). If consensus is not reached, the candidate's application is brought back before the committee at a future meeting.
- If the Admissions Committee votes to wait list an applicant, the committee then ranks the applicant by assigning a score of 1-10, with 1 being a low score. The dean or his/her designated staff member, throws out the low and high score, computes the average score and standard deviation. If Wait List applicants have the same average score, the lower standard deviation acts to break the tie. Wait List applicants are offered admission based on their ranking.

Offer of Admission

Within a week of the Admissions Committee's decision, applicants are sent an email with the committee's decision on their candidacy. Accepted applicants intending to enroll must submit a deposit of \$100 (refundable until April 30). Candidates are strongly encouraged to follow all current AAMC Traffic Rules related to medical school admissions. Accepted applicants are also sent information about financial aid, an invitation to Second Look Weekend, information about immunizations, housing information, and the Technical Standards document.

Matriculation will become official after the student has satisfied all admissions requirements, met the technical standards, and successfully passed the criminal background check.

Final Authority of Admissions Committee

The final authority for admissions decisions rests solely with the voting membership of the Admissions Committee. No individual or other constituted body can exert influence over an Admissions Committee decision or reverse an Admissions Committee decision.

School of Medicine Satisfactory Academic Progress Policy

Standards for Satisfactory Academic Progress for Financial Aid Recipients and Applicants

Medical students who wish to receive assistance through any federal, state or institutionally supported scholarships, grants or loans must comply with the following Satisfactory Academic Progress standards. Satisfactory Academic Progress measures the quality of the academic work, and the rate of progress toward the Doctor of Medicine (MD) degree. Students who fail to comply are not eligible for financial aid.

I. Qualitative Measurement – The quality of a student’s academic work and professionalism.

All medical students must maintain professionalism as defined (by the promotions committee) as well as passing grade(s) at the end of each academic year.

II. Quantitative Measurement – The rate of a student’s progress toward a degree. Students must complete a minimum of two-thirds (.067) of the blocks for which they are enrolled and be making progress to complete their degree within the 6-year rule.

Satisfactory Academic Progress is measured once per year at the end of the second semester. To be considered satisfactory, students must successfully complete or remediate all of the academic work toward their medical degree during a period of consecutive and required blocks and semesters.

Students may not receive financial aid for more than 150% of the published program length (maximum time to complete program is 6 years).

Please note that both the qualitative and quantitative measurements indicate the passing grade(s) as well as the number of completed blocks needed to meet satisfactory academic progress requirements for financial aid and do not reflect the medical school’s recommended requirements.

Implementation of the Satisfactory Academic Progress Policy

Satisfactory Academic Progress is reviewed once per year, at the conclusion of the second semester after final grades have been posted.

Students whose performance or progress does not meet the required standards will be notified by the director of financial aid and will be considered ineligible for aid, including federal, state, institutional and most private loans. Students with financial aid applications on file for the upcoming year will receive a communication indicating the loss of aid after final grades are posted. Students who are not making satisfactory progress and have not filed an application for financial aid will not receive this correspondence until the financial aid application has been filed.

Students may appeal their loss of aid based on extenuating circumstances. Appeals must be submitted in writing to the director of financial aid and will be reviewed for decision by the Financial Aid Appeals Committee. Students who do not appeal, or whose appeal is denied, will not regain financial aid eligibility until all academic standards are met. Remediation courses may be considered in repairing deficiencies.

If an appeal is granted, the student will be placed on financial aid probation for one semester or year and an academic plan will be prescribed for the student to follow. The student’s academic progress will be reviewed at the end of the probationary term and they must have met the conditions of the academic plan to receive financial aid. A student who fails to meet these conditions will lose eligibility for financial aid. Additional appeals will not be considered.

Nursing is a profession based on science, a culture of compassion, commitment to best practices, and connection to individuals. The practice of nursing is research-based, goal-directed, creative and concerned with the health and dignity of the whole person. The art of

delivering quality nursing care depends upon the successful mastery and application of intellectually rigorous nursing knowledge.

Mission Statement

To provide leadership in nursing and healthcare through innovative undergraduate and graduate education that embraces holism, interprofessionalism and inclusivity.

Vision

To prepare transformational leaders in healthcare.

Values

School of Nursing values include:

- diversity of ideas, persons and cultures
- supportive learning environments
- scholarly undertakings to advance education and practice
- ethical conduct in personal and professional arenas
- holistic nursing across the spectrum of healthcare
- interprofessional education and collaboration
- innovative learning methodologies
- systematic assessment and evaluation
- lifelong learning

Transforming healthcare . . . one student at a time.

- Master of Science in Nursing (p. 911)
 - Post-bachelor's study
 - Adult-Gerontology Acute Care Nurse Practitioner (p. 912)
 - Adult-Gerontology Primary Care Nurse Practitioner (p. 916)
 - Family Nurse Practitioner (p. 918)
 - Operational Leadership (p. 921)
 - RN to MSN Program (p. 924)
- Post-Master's Certificate (p. 927)
 - Adult-Gerontology Acute Care Nurse Practitioner (p. 927)
- Doctor of Nursing Practice (p. 898)
 - Post-bachelor's study
 - Nurse Anesthesia (p. 899)

Doctor of Nursing Practice (DNP)

Program Contact: Laima Karosas (Laima.Karosas@quinnipiac.edu)
203-582-5366

The DNP program aims to prepare graduates for advanced nursing practice who are capable of providing holistic health care for diverse individuals, families or populations in a variety of settings.

Post-Bachelor's Program

****Please note: We are no longer admitting new students to the Nurse Anesthesia program.****

Students who are registered nurses and have a bachelor's degree may pursue doctoral training in nurse anesthesia. All students in the Post-Bachelor's Nurse Anesthesia program are full time and complete the

degree in three years. Clinical experience is graduated throughout the program, beginning with part-time hours and ending with full-time hours plus a call rotation.

- a. Nurse Anesthesia (p. 901)

Post-Master's Program

For students with a master's degree in nursing or a related field, the post-master's doctoral option offers an opportunity to advance career goals in one of three online programs:

- a. Doctor of Nursing Practice Care of Populations (p. 906)
- b. Doctor of Nursing Practice Nursing Leadership (p. 909)
- c. Nurse Practitioner (p. 904) (for QU MSN NP graduates)

Students in the Doctor of Nursing Practice program are able to choose from two concentrations: Care of Populations and Nursing Leadership. The Care of Populations concentration focuses on public health and healthcare system analysis, which is useful for systematic chronic disease management and healthcare services design. Students in the Nursing Leadership concentration may come with or without past experiences in management. The courses prepare students for leadership responsibilities and roles across the healthcare field. The nurse practitioner program is open only to graduates of the MSN within two years of graduation. This program enhances a novice nurse practitioner's knowledge and leadership skills.

Student Learning Outcomes

The objectives of the DNP program are designed to prepare graduates for advanced nursing practice who are capable of providing holistic health care for diverse individuals, families or populations in a variety of settings. Specifically, the program seeks to produce graduates who:

- a. **Demonstrate** clinical reasoning through an understanding of science and evidence-based practice.
- b. **Design, implement and evaluate** quality improvement initiatives across the systems in which health care is delivered.
- c. **Analyze and critique** the available evidence for best practices in healthcare.
- d. **Apply** technology and information fluency to conduct practice inquiry.
- e. **Advocate** for rational health policies to improve patient care and enhance effective use of resources.
- f. **Demonstrate** leadership through inter-professional collaboration to improve patient and population health outcomes.
- g. **Direct** health promotion and disease prevention efforts to improve patient and population health outcomes.
- h. **Provide** competent, culturally sensitive, and ethically based care to individuals and/or populations in a defined specialty of advanced nursing practice.

Doctor of Nursing Practice programs

Post-bachelor's study

****Please note: We are no longer admitting new students to the Nurse Anesthesia program.****

- Nurse Anesthesia (p. 899)

Post-master's study

- Doctor of Nursing Practice Care of Populations (p. 906)
- Doctor of Nursing Practice Nursing Leadership (p. 909)
- Nurse Practitioner (p. 904) (for QU MSN NP graduates)

Admission Requirements

Note: For QU MSN NP graduates, no new admission application is required within a two-year period from MSN graduation. Contact the graduate program chair to continue into the Post-Master's DNP.

Applicants to the Nurse Anesthesia program must be registered nurses with two years of recent (within the past five years) critical care experience. An undergraduate cumulative GPA of 3.2 or better is required. Additionally applicants to the post-master's programs must have a master's degree in nursing or a related field. Post-master's applicants are required to provide a letter from their prior master's program detailing the total number of supervised clinical hours they completed as part of that program. Applicants should submit the following to the Office of Graduate Admissions:

- A completed admissions application including a resume and a personal statement addressing the following:
 - professional goals and motivations;
 - a nursing experience that has influenced or shaped your practice;
 - a health care problem that interests you for potential doctoral study.
- Official transcripts from all schools previously attended.
- Official recent results of the Test of English as a Foreign Language (TOEFL) or (IELTS) International English Language Testing System for international applicants.
- Two letters of recommendation from persons with authority to evaluate your professional ability.
- Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.
- Letter from applicant's prior master's program detailing the number of supervised clinical hours completed as part of that program (for post-master's DNP applicants only).

Candidates applying for full-time admission for the fall term must submit a completed application by July 1 for the Post-MSN programs or September 1 for the Post-Bachelor's Nurse Anesthesia program. Candidates may be on a wait list for the fall in the event a space becomes available. However, acceptances are not deferred to the following fall and wait listed candidates need to reapply for the following fall. Exceptions may be made in rare circumstances by the chair of the graduate nursing program.

All accepted students are required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptances are conditional until satisfactory completion of both.

Transfer Credits

Graduate course credit completed with a grade of B or better at another regionally accreditation institution may be considered for transfer credit in place of a similar course. Courses must be at the same level (i.e., an undergraduate course may not be transferred in place of a master's level course) and taken within the past five years. Transfer credit is granted upon admission to the program only. The course description and/or syllabus and a copy of the transcript with a request for transfer credit must be sent/mailed to the chair of the graduate nursing programs.

The Nurse Anesthetist program may accept transfer credit only for these graduate nursing core courses: NUR 514, NUR 516 and NUR 602.

When all application materials are received, an interview with the graduate nursing program director and/or member of the faculty will be arranged for eligible candidates.

DNP Project

Upon admission, students are assigned an adviser, who meets with them for academic and scholarly advising over the course of the program. All students in the DNP program engage in scholarly inquiry through a variety of projects in core and specialty courses and in the DNP Project. The DNP Project is conducted in NUR 610/NUR 610PBL, NUR 612/NUR 612PBL and NUR 614PBL, and based on the AACN's "Doctor of Nursing Practice: Current Issues and Clarifying Recommendations," it:

- focuses on a change that impacts health care outcomes either through direct or indirect care
- has a systems or population/aggregate focus
- demonstrates implementation in the appropriate arena or area of practice
- includes a plan for sustainability
- includes an evaluation of processes and/or outcomes
- provides a foundation for future practice scholarship

The DNP project is evaluated by the DNP project team, which consists of the faculty members who are teaching in the two courses as well as the student's liaison at the practice site and a subject matter expert. For example, all nurse anesthesia students have a nurse anesthesia faculty member on their DNP project team. In addition, students maintain an electronic portfolio where they place their final papers from NUR 610PBL and NUR 612PBL/NUR 614PBL and a crosswalk table. The crosswalk table summarizes key assignments that demonstrate how each student achieved the program outcomes. The electronic portfolio is discussed at advisement meetings and the crosswalk table is graded pass/fail by the student's adviser.

Post-Bachelor's DNP: Nurse Anesthesia

Please note: Quinnipiac University is no longer accepting applications for its DNP Nurse Anesthesia program.

Program Contact: Karita Kack (Karita.Kack@qu.edu) 203-582-7969

The curriculum of the Nurse Anesthesia program offers entry-level post-bachelor's to a Doctor of Nursing Practice (DNP). The curricula and policies were developed in accordance with The Essentials of Doctoral Education for Advanced Nursing Practice (AACN) and the Standards for Accreditation of Nurse Anesthesia Educational Programs (COA). Core DNP courses taught by experienced nursing faculty and members of the Department of Biomedical Sciences and Health Sciences will be shared collaboratively with the other advanced practice DNP candidates. Nurse anesthesia students receive a strong science foundation as well as course content including patient safety and human factors as outlined in the standards.

The program's goal—to develop knowledgeable, caring and compassionate nurse anesthetists who are committed to excellence in healthcare, preserving the dignity and rights of patients and advancing

the profession—is congruent with the Quinnipiac University mission statement. The nurse anesthesia specialty is organized within the context of the DNP program in the School of Nursing. The DNP program builds on the generalist preparation of the bachelor's-prepared nurse in the entrance-level DNP. The DNP prepares leaders in advanced practice roles who can synthesize knowledge from nursing and relevant fields of study as a basis for practice. The graduate curriculum provides both didactic and clinical experiences that facilitate critical thinking skills so that graduates are able to provide quality, cost-effective health services to individual clients, families and communities.

Post-Bachelor's to DNP: Nurse Anesthesia Program

Please note: Quinnipiac University is no longer accepting applications for its DNP Nurse Anesthesia program.

Total Credits		80

Prerequisites for entrance: undergraduate anatomy and physiology with labs (8 credits); chemistry: inorganic and organic (8 credits); microbiology (3–4 credits); pharmacology (3–4 credits); and statistics (3 credits).

Clinical practicum—6 semesters—approximate hours: 2,500.

Curriculum Note:

NUR 614PBL (DNP Project II) is repeated for 1 credit each semester until the DNP project is complete.

The semester-by-semester Learning Pathway for this program is available in the School of Nursing.

The curriculum for this program is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

Student Learning Outcomes

The objectives of the DNP program are designed to prepare graduates for advanced nursing practice who are capable of providing holistic health care for diverse individuals, families or populations in a variety of settings. Specifically, the program seeks to produce graduates who:

- Demonstrate** clinical reasoning through an understanding of science and evidence-based practice.
- Design, implement and evaluate** quality improvement initiatives across the systems in which health care is delivered.
- Analyze and critique** the available evidence for best practices in healthcare.
- Apply** technology and information fluency to conduct practice inquiry.
- Advocate** for rational health policies to improve patient care and enhance effective use of resources.
- Demonstrate** leadership through interprofessional collaboration to improve patient and population health outcomes.
- Direct** health promotion and disease prevention efforts to improve patient and population health outcomes.
- Provide** competent, culturally sensitive, and ethically based care to individuals and/or populations in a defined specialty of advanced nursing practice.

Please note: Quinnipiac University is no longer accepting applications for its DNP Nurse Anesthesia program.

Admission Requirements

An applicant to the DNP program must be a registered nurse or NCLEX eligible nurse and have a bachelor's degree in nursing or another field. Applicants to the Nurse Anesthesia program must be registered nurses with two years of recent (within the past five years) critical care experience.

An undergraduate cumulative GPA of 3.2 or better is required. Applicants should submit the following to the Office of Graduate Admissions:

- a. A completed admissions application including a resume and a personal statement addressing the following:
 - i. professional goals and motivations
 - ii. a nursing experience that has influenced or shaped your practice
 - iii. a healthcare problem that interests you for potential doctoral study
- b. Official transcripts from all schools previously attended.
- c. Official recent results of the Test of English as a Foreign Language (TOEFL) or (IELTS) International English Language Testing System for international applicants.
- d. Two letters of recommendation from persons with authority to evaluate your professional ability. Nurse Anesthesia candidates can see the requirements on the website (<http://www.quinnipiac.edu/CRNA/>).
- e. Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.
- f. Core sciences courses required: Anatomy, Physiology, Chemistry (two semesters total, of which one should be a general/inorganic chemistry), Statistics, Microbiology and Pharmacology. Core science courses must have been completed within the past 10 years. Refresher courses in Anatomy and Physiology (one semester) and Chemistry (one semester) must be taken for coursework greater than 10 years old in these subjects.

Candidates applying for full-time admission must submit a completed application by September 1 for the Post-Bachelor's Nurse Anesthesia program. Candidates may be placed on a wait list in the event a space becomes available. However, acceptances are not deferred and wait-listed candidates need to reapply for the following year. Exceptions may be made in rare circumstances by the chair of the graduate nursing program.

All accepted students are required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptances are conditional until satisfactory completion of both.

Nurse Anesthesia Progression Requirements

Please note: Quinnipiac University is no longer accepting applications for its DNP Nurse Anesthesia program.

In all of the **nurse anesthesia courses** (NUR 518, PY 501, NUR 517/NUR 517L, NUR 670, NUR 672, NUR 674, NUR 676, NUR 678, NUR 680, NUR 682, NUR 684, NUR 686, NUR 688, NUR 690, NUR 696, NUR 698) a minimum grade of B (83) in *each nurse anesthesia course independent of cumulative GPA* is required to progress in the program. If a student earns a grade below a B (83) in *one nurse anesthesia course*,

but has a semester GPA of at least 3.0, the student will be placed on academic probation and will be required to retake the course when it is offered again at Quinnipiac University. Any grade below a C (73-76) in a nurse anesthesia course will result in dismissal from the nurse anesthesia program without probation and without the opportunity to repeat the deficient course.

Since nurse anesthesia courses are in sequence and no course may be taken ahead of any of its prerequisites, a student with a grade below a B (83) in an anesthesia course will not be allowed to 1) take any nurse anesthesia courses for which the deficient course is a prerequisite and 2) participate in the clinical practicum until the deficient course is successfully completed with a minimum grade of B (83). Any clinical practicum course not fully completed due to dismissal from any other course will need to be repeated when the student again reenters the program. Thus the student will be placed in another student cohort and the student's program completion date will be delayed.

Only one period of probation is permitted. The student must achieve a minimum grade of B (83) in all subsequent courses, health assessments, and practicums. Failure to meet this requirement will result in dismissal from the program without option to repeat or continue.

A student who earns unsatisfactory grades (grade of less than B) in two or more nursing courses in any semester is not eligible for probation and will be dismissed from the program. Any student who does not earn the required minimum 3.0 semester GPA will be dismissed from the program.

If a student believes her/his final grade was determined in an arbitrary, capricious or prejudicial manner, the student may appeal the sanction of probation or dismissal by following the procedure to appeal a final grade that is stated in the Quinnipiac University Catalog. Only final grades can be appealed. If the grade appeal process results in a recalculated grade of B (83) or higher and the student does not have any other academic deficiencies, then the sanction of probation or dismissal is removed and the student may continue to progress in the program in the semester following the conclusion of the grade appeal process.

If a dismissed student believes there are errors in the facts considered by the nurse anesthesia program or extenuating circumstances, the student may appeal the progression decision according to policies in the School of Nursing Graduate Student Manual.

Appeal Process

- a. A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of their inability to progress.
- b. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
- c. A student wishing to appeal a course grade should follow the grade appeal process (p. 110).

Please note: Quinnipiac University is no longer accepting applications for its DNP Nurse Anesthesia program.

NUR 514. Epidemiology and Population Health. 2 Credits.

This course introduces epidemiologic principles, methods and data used in advanced nursing practice. Data and evidence from research are used to: assess acute and chronic population health problems/topics, provide effective possible interventions; and address and examine outcomes.

Offered: Every year, Spring and Summer Online

- NUR 516. Health Policy and Organizational Systems. 2 Credits.**
This course provides an introduction to various social and political policy environments impacting advanced nursing practice and health care systems. Students examine issues that inform health care policy, organization and financing. Nursing's advocacy role in shaping policy in organizational, social and political venues is emphasized.
Offered: Every year, Fall and Summer Online
- NUR 517. Anatomy for the Nurse Anesthetist. 2 Credits.**
This course emphasizes the fundamentals of anatomy for the cardiac, respiratory and nervous system. Anatomy as it pertains to regional and neuraxial administration is emphasized. Throughout this course, students utilize dissections of specific organs and the use of computer and anatomic models. Airway anatomy is covered extensively through multiple modalities. Renal and hepatic anatomy are reviewed. This course must be taken together with NUR 517L.
Prerequisites: Take NUR 517L.
Offered: Every year, Summer
- NUR 517L. Anatomy for the Nurse Anesthetist Lab. 1 Credit.**
Lab to accompany NUR 517.
Offered: Every year, Summer
- NUR 518. Pathophysiology for the Nurse Anesthetist. 3 Credits.**
Essential concepts of pathophysiology are emphasized. Normal function of major systems and selected disorders are studied especially as they relate to care of the patient undergoing anesthesia. The course focuses on disease processes related to major organ systems; neurologic, cardiac, respiratory, renal, hepatic and endocrine. Where appropriate the course includes clinical correlations of disease states with symptoms and physical findings.
Prerequisites: Take PY 501, NUR 517, NUR 517L, NUR 698.
Offered: Every year, Fall
- NUR 520. Advanced Health Assessment. 3 Credits.**
This course presents the principles of performing a comprehensive health assessment and reporting the findings in a professional format. Attention is given to assessment and physical examination across the lifespan within diverse communities. The processes underlying diagnostic decision making are introduced. A laboratory component enables the student to master the techniques of performing a holistic health assessment.
Corequisites: Take NUR 520L.
Offered: Every year, Fall
- NUR 520L. Advanced Health Assessment Lab. 2 Credits.**
This lab must be taken with NUR 520. (2 lab hrs.)
Corequisites: Take NUR 520.
Offered: Every year, Fall
- NUR 600. Evaluation and Synthesis of Scientific Evidence for Practice. 2 Credits.**
Students review selected processes to identify current best scientific evidence including formulation of asking an answerable question. Students also conduct a review of the literature, critically appraise individual studies, and synthesize the evidence collected. Various methods to evaluate statistical analyses and scientific rigor are emphasized. Discussions focus on strengths and limitations of existing evidence, and application to direct and indirect practice. Iterative writing is a major component of this course.
Offered: Every year, Fall Online
- NUR 602. Principles of Ethical Theory in Nursing. 1 Credit.**
This course facilitates the student's formulation of a theoretical basis for ethical judgment at an advanced level of practice. Students analyze ethical theory and debate responses to ethical problems in advanced nursing practice.
Offered: Every year, Fall and Summer Online
- NUR 610. Clinical Scholarship and Inquiry in Nursing. 2 Credits.**
This course focuses on improvement methods used to identify organizational systems' process problems affecting practice (direct and indirect care). Building on prior knowledge of evidence-based practice, students learn how to critically appraise scientific evidence, evaluate additional relevant information, and consider cost implications to create sustainable innovations intended to improve systems.
Prerequisites: Take NUR 600.
Offered: Every year, Spring Online
- NUR 610PBL. DNP Project I. 2 Credits.**
This seminar provides an opportunity for students to identify a health organization or system's opportunity for process improvement based on available aggregate data. Students develop a substantial and meaningful scholarly DNP Project Proposal that is innovative and evidence-based, reflects the application of credible research findings, financially sound, feasible, sustainable and demonstrates value to the organization and population(s) served. There is a minimum of 120 fieldwork hours associated with this course. The course is graded on a pass/fail basis.
Corequisites: Take NUR 610.
Offered: Every year, Summer Online
- NUR 612. Leadership and Collaboration for Change in Health Care. 2 Credits.**
This course focuses on developing advanced practice nursing leaders who are able to generate pragmatic responses to health care policy, systems and practice inquiry problems through a collaborative approach.
Prerequisites: Take NUR 610.
Offered: Every year, Fall Online
- NUR 612PBL. DNP Project II. 2 Credits.**
Students continue experiential learning to create and sustain change through implementation of the approved, scholarly DNP Project Proposal using appropriate leadership concepts, interdisciplinary team collaboration, and change theory. Post-implementation and evaluation of Project outcomes are disseminated to applicable fieldwork site stakeholders, peers in a professional forum, and in a digital repository. There are 120 fieldwork hours associated with this course. This course is graded on a pass/fail basis.
Prerequisites: Take NUR 610, NUR 610PBL.
Offered: Every year, Fall Online
- NUR 670. Basic Principles of Anesthesia II. 3 Credits.**
This course continues the basic principles of anesthesia and covers a variety of basic concepts including pre-operative assessment, basic airway management, the function and operation of the anesthesia ventilator and introduction to intra-operative anesthetic care. Concepts related to pain management including opioid sparing techniques are introduced. Simulation lab practices are included.
Prerequisites: Take NUR 696.
Offered: Every year, Spring

- NUR 670L. Basic Principles of Anesthesia II Lab. 2 Credits.**
This course introduces the student to the administration of neuraxial regional anesthesia and peripheral nerve blocks using ultrasound, simulation and cadaver models. Simulation lab practice related to anesthesia set up and simple inductions of anesthesia are included.
Prerequisites: Take NUR 696.
Corequisites: Take NUR 670.
Offered: Every year, Spring
- NUR 671. Clinical Practicum I. 2 Credits.**
Individual clinical practice arranged with approved clinical sites. All-day clinical practice, 3 days per week. The student follows the hours of CRNA practice at each clinical site. A clinical conference is held once per week.
Prerequisites: Take NUR 696, NUR 670, NUR 670L, NUR 672.
Offered: Every year, Summer
- NUR 672. Advanced Pharmacology II. 3 Credits.**
This course is a continuation of Advanced Pharmacology and Basic Principles of Anesthesia I (NUR 696) and expands on the administration of drugs used in the practice of anesthesia. Drugs used in the treatment of comorbid conditions and their effects on anesthesia are covered.
Prerequisites: Take NUR 696.
Corequisites: Take NUR 670, NUR 670L.
Offered: Every year, Spring
- NUR 673. Clinical Practicum II. 2 Credits.**
Individual clinical practice is arranged with approved clinical sites. All-day clinical practice continues four days per week. The student follows the hours of CRNA practice at each clinical site. A clinical conference is held once per week.
Prerequisites: Take NUR 671.
Offered: Every year, Fall
- NUR 674. Professional Aspects of Nurse Anesthesia Practice I. 1 Credit.**
This course discusses the history of the profession and practice issues that pertain to the nurse anesthesia practice. Topics include legal aspects, scope of practice, the national association and the structure, quality assurance and the business of anesthesia. Students explore their role in the political arena through attendance at the AANA Midyear Assembly in Washington, D.C.
Offered: Every year, Spring
- NUR 675. Clinical Practicum III. 2 Credits.**
Individual clinical practice is arranged with approved clinical sites four days per week. Students participate in full-day clinical practice, and follow the hours of CRNA practice at each clinical site. A call component may be included in the semester. A clinical conference is held once per week.
Prerequisites: Take NUR 673.
Offered: Every year, Fall
- NUR 676. Professional Aspects of Nurse Anesthesia Practice II. 1 Credit.**
The class covers the importance of personal wellness and stress management for the nurse anesthesia student and the practicing CRNA. Students become familiar with integrated therapies and behaviors used to create wellness and balance. Multiple factors related to chemical dependence and substance abuse are studied. Participants also discuss the importance of cultural sensitivity and diversity in health care.
Offered: Every year, Fall
- NUR 677. Clinical Practicum IV. 2 Credits.**
Individual clinical practice is arranged with the approved clinical sites. All-day clinical practice continues four days per week. The student follows the hours of CRNA practice at each clinical site. A call component may be included in the semester. A clinical conference is held once a week.
Prerequisites: Take NUR 675.
Offered: Every year, Spring
- NUR 678. Professional Aspects of Nurse Anesthesia Practice III. 1 Credit.**
This course discusses educational leadership as it pertains to clinical preceptors and educators. Topics include the writing of objectives, evaluations and rubrics and the role of the clinical educator. Additionally, students teach assigned topics to underclass students.
Prerequisites: Take NUR 674, NUR 676.
Offered: Every year, Spring
- NUR 679. Clinical Practicum V. 2 Credits.**
Individual clinical practice is arranged with approved clinical sites. All-day clinical practice continues four days per week. The student follows the hours of CRNA practice at each clinical site. A call component may be included in the semester. A clinical conference is held once a week.
Prerequisites: Take NUR 677.
Offered: Every year, Fall
- NUR 680. Physics, Chemistry, Equipment and Technology for Nurse Anesthetists. 4 Credits.**
This course includes an extensive study of key concepts pertaining to organic, biochemistry and physics as they relate to anesthesia. Topics include medical mathematics and conversion factors, the gas laws, biochemistry of fluids and electrolytes, acid-base and buffers systems, electrical circuits, reviews of organic chemistry including the functional groups and physical principles that are relevant. Equipment and technology used in anesthetic practice also are studied in this course.
Prerequisites: Take NUR 696, NUR 670, NUR 672.
Offered: Every year, Summer
- NUR 681. Clinical Practicum VI. 2 Credits.**
Individual clinical practice is arranged with approved clinical sites. All-day clinical practice continues four days per week. The student follows the hours of CRNA practice at each clinical site. A call component may be included in the semester. A clinical conference is held once a week.
Prerequisites: Take NUR 679.
Offered: Every year, Fall
- NUR 682. Advanced Principles of Anesthesia I. 3 Credits.**
This course covers the administration and management of anesthesia to patients undergoing procedures in a variety of specialties such as ENT, orthopedics, neurosurgery and trauma. Advanced anesthetic management of common/uncommon conditions are included.
Prerequisites: Take NUR 696, NUR 670, NUR 670L, NUR 672.
Offered: Every year, Summer
- NUR 684. Advanced Principles of Anesthesia II. 3 Credits.**
This course covers the fundamental concepts essential to clinical anesthesia practice pertaining to obstetrics and pediatrics.
Prerequisites: Take NUR 682.
Offered: Every year, Fall

NUR 686. Advanced Principles of Anesthesia III. 3 Credits.

The anesthetic assessment and management of patients with vascular and cardiac disease are covered in this course. Open and closed thoracic and cardiac surgery is studied along with the anesthetic implications and considerations. Students explore the perfusionist role during cardiac procedures. Cardiac implants and internal defibrillators are discussed.

Prerequisites: Take NUR 682, NUR 684.

Offered: Every year, Spring

NUR 688. Human Factors and Patient Safety. 3 Credits.

This course examines issues related to human error and patient safety with an emphasis on crisis management. Students explore the theoretical basis of human error, patient safety and quality assurance in health care. This course introduces a systems approach to error investigation and analysis, and integrates concepts of teamwork, crisis management, simulation and monitoring systems in medical practice.

Offered: Every year

NUR 690. Advanced Principles of Anesthesia IV. 2 Credits.

This course contains an extensive study of the anesthetic management for patients with respiratory, renal, hepatic and endocrine disease.

Prerequisites: Take NUR 686.

Offered: Every year, Summer

NUR 695. Anesthesia Seminar I. 2 Credits.

This course prepares the student to take the Self-Evaluation Exam (SEE) in preparation for the National Certification Exam (NCE). The Seminar course contain an extensive review of Basic Principles, Equipment and Technology, Basic and Advanced Principles, Pharmacology and Physiology. Practice exams are administered periodically and clinical scenarios are used to assess and challenge student knowledge and critical thinking. Students take the SEE (Self Evaluation Examination) exam at the end of this semester.

Prerequisites: Completion of all anesthesia core courses.

Offered: Every year, Fall

NUR 696. Advanced Pharmacology and Basic Principles of Anesthesia I. 4 Credits.

This course contains essential pharmacology for the anesthesia provider along with a variety of basic concepts such as surgical positioning, monitoring of patients undergoing anesthesia, the anesthesia machine and basic airway management. Lectures are held in the classroom and in the Skills and Simulation lab.

Prerequisites: Completion of NUR 517 PY 501.

Offered: Every year, Fall

NUR 697. Anesthesia Seminar II. 2 Credits.

This course is the second Anesthesia Seminar which prepares the student to take the National Certification Exam (NCE). Students continue to take the SEE (Self Evaluation Examination) until a benchmark score is obtained. Organized and systematic review of materials from key anesthesia courses is continued. Students formulate a written plan of study for use during this semester. Each student reviews and implements the individualized plan with input from the adviser.

Prerequisites: Completion of all anesthesia core courses and NUR 695.

Offered: Every year, Spring

NUR 698. Human Physiology Seminar. 1 Credit.

Students are provided with a topic in human physiology for presentation to the group. The topic is selected from one of the systems studied in the Human Physiology course. This provides the student with an opportunity to work in a small group, improve their public speaking skills and gather valuable material from other presenters.

Corequisites: Take PY 501.

Offered: Every year, Summer

PY 501. Human Physiology. 4 Credits.

This course takes a system approach to the physiologic and biochemical functions of the human body, including relevant anatomical correlations. Laboratory sessions emphasize clinical application to systemic function.

Offered: Every year, Summer

Post-Master's DNP: Nurse Practitioner

Program Contact: Laima Karosas (laima.karosas@qu.edu) 203-582-5366

The Post-Master's Nurse Practitioner DNP program is open only to graduates of the Quinnipiac University School of Nursing Adult-Gerontology (AGNP) or Family Nurse Practitioner (FNP) Master of Science in Nursing (MSN) programs. Students who have completed the AGNP or FNP MSN program may continue seamlessly into the DNP within two years of MSN graduation. Newly graduated nurse practitioners may begin to practice and continue on for their DNP without having to reapply. The curriculum is online and follows the standards set by the American Nurses Association and the American Association of Colleges of Nursing. It provides 480 hours of fieldwork, which includes the DNP project and either a leadership or care of populations focus. This program is geared toward enhancing the practice of novice nurse practitioners and, therefore, students work closely with their advisers to choose courses supportive of their practice needs.

Post-Master's DNP: Nurse Practitioner

Code	Title	Credits
Course Listing		
NUR 514	Epidemiology and Population Health	2
NUR 516	Health Policy and Organizational Systems	2
NUR 600	Evaluation and Synthesis of Scientific Evidence for Practice	2
NUR 602	Principles of Ethical Theory in Nursing	1
NUR 610	Clinical Scholarship and Inquiry in Nursing	2
NUR 610PBL	DNP Project I	2
NUR 612	Leadership and Collaboration for Change in Health Care	2
NUR 612PBL	DNP Project II	2
NUR 613	Nursing Leadership Seminar: Applying Data to Practice	2
NUR 614PBL	DNP Project Continuation Course	1
NUR 615	Nursing Leadership Seminar and Fieldwork Experience: Safety and Legal Contexts of Health Care	3
NUR 617	Nursing Leadership Fellowship: Relationship Management and Strategic Leadership	3

Total Credits 24

Curriculum Note:

Sample curriculum, 30 credits required.

Students take electives to complete 30 credits required for the degree.

Choose between a population focus (NUR 620, NUR 622 and NUR 623 required) or leadership (NUR 613, NUR 615 and NUR 617 required).

The semester-by-semester Learning Pathway for this program is available in the School of Nursing.

The curriculum for this program is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

Student Learning Outcomes

The objectives of the DNP program are designed to prepare graduates for advanced nursing practice who are capable of providing holistic health care for diverse individuals, families or populations in a variety of settings. Specifically, the program seeks to produce graduates who:

- a. **Demonstrate** clinical reasoning through an understanding of science and evidence-based practice.
- b. **Design, implement and evaluate** quality improvement initiatives across the systems in which health care is delivered.
- c. **Analyze and critique** the available evidence for best practices in healthcare.
- d. **Apply** technology and information fluency to conduct practice inquiry.
- e. **Advocate** for rational health policies to improve patient care and enhance effective use of resources.
- f. **Demonstrate** leadership through interprofessional collaboration to improve patient and population health outcomes.
- g. **Direct** health promotion and disease prevention efforts to improve patient and population health outcomes.
- h. **Provide** competent, culturally sensitive, and ethically based care to individuals and/or populations in a defined specialty of advanced nursing practice.

Admission Requirements

An applicant to the post-master's programs must have a master's degree in nursing or a related field. Post-master's applicants are required to provide a letter from their prior master's program detailing the total number of supervised clinical hours they completed as part of that program. Download the form (https://quonline.quinnipiac.edu/documents/DNP_Practice_Verification.pdf) (PDF)

Applicants should submit the following to the Office of Graduate Admissions:

- a. A completed admissions application including a resume and a personal statement addressing the following:
 - i. professional goals and motivations
 - ii. a nursing experience that has influenced or shaped your practice
 - iii. a healthcare problem that interests you for potential doctoral study
- b. Official transcripts from all schools previously attended
- c. Official recent results of the Test of English as a Foreign Language (TOEFL) or (IELTS) International English Language Testing System for international applicants
- d. Two letters of recommendation from persons with authority to evaluate your professional ability

- e. Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut
- f. Letter from applicant's prior master's program detailing the number of supervised clinical hours completed as part of that program

Candidates applying for full-time admission for the fall term must submit a completed application by July 1.

All accepted students will be required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptance will be conditional until satisfactory completion of both.

Progression Requirements

Students are expected to take courses in the order they are presented on the curriculum pathways. Any student wishing to take a course out of sequence must seek permission from the graduate program chair.

According to Quinnipiac University policy, all graduate students are expected to maintain a grade point average (GPA) of at least 3.0 on a 4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA each semester. Part-time graduate students must have an overall GPA of 3.0 upon completion of 9 credits and must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B- grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and the subsequent curriculum sequence are offered and must achieve a B- or better. The student must achieve a minimum grade of a B- in all subsequent nursing courses. Failure to meet this requirement will result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B-) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

A student who receives a grade of Incomplete (I) in any nursing course must meet all course requirements for conversion to a grade before the start of the subsequent semester.

For post-master's students, transfer students or students returning from an elective leave of absence during their course of study, selected courses must have been completed within five years.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student, in writing, of the student's failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation; b) suspended; or c) dismissed. Students placed on academic probation remain in their program but must take specified corrective action to meet program performance standards. Students should meet with their advisers to identify learning strategies to help them accomplish these goals and the student should draft a list or narrative of these strategies, which will serve as a learning contract. A copy of this contract will be placed in the student's folder and should be reviewed periodically with their adviser. Students must demonstrate a significantly increased GPA at the end of that semester in order to continue in the program. Students placed on suspension may also need to take specified actions as directed by the academic dean, graduate nursing program chair or academic adviser.

Appeal Process

- A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of their inability to progress.
- Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
- A student wishing to appeal a course grade should follow the grade appeal process (p. 110).

NUR 514. Epidemiology and Population Health. 2 Credits.

This course introduces epidemiologic principles, methods and data used in advanced nursing practice. Data and evidence from research are used to: assess acute and chronic population health problems/topics, provide effective possible interventions; and address and examine outcomes.

Offered: Every year, Spring and Summer Online

NUR 516. Health Policy and Organizational Systems. 2 Credits.

This course provides an introduction to various social and political policy environments impacting advanced nursing practice and health care systems. Students examine issues that inform health care policy, organization and financing. Nursing's advocacy role in shaping policy in organizational, social and political venues is emphasized.

Offered: Every year, Fall and Summer Online

NUR 600. Evaluation and Synthesis of Scientific Evidence for Practice. 2 Credits.

Students review selected processes to identify current best scientific evidence including formulation of asking an answerable question. Students also conduct a review of the literature, critically appraise individual studies, and synthesize the evidence collected. Various methods to evaluate statistical analyses and scientific rigor are emphasized. Discussions focus on strengths and limitations of existing evidence, and application to direct and indirect practice. Iterative writing is a major component of this course.

Offered: Every year, Fall Online

NUR 602. Principles of Ethical Theory in Nursing. 1 Credit.

This course facilitates the student's formulation of a theoretical basis for ethical judgment at an advanced level of practice. Students analyze ethical theory and debate responses to ethical problems in advanced nursing practice.

Offered: Every year, Fall and Summer Online

NUR 610. Clinical Scholarship and Inquiry in Nursing. 2 Credits.

This course focuses on improvement methods used to identify organizational systems' process problems affecting practice (direct and indirect care). Building on prior knowledge of evidence-based practice, students learn how to critically appraise scientific evidence, evaluate additional relevant information, and consider cost implications to create sustainable innovations intended to improve systems.

Prerequisites: Take NUR 600.

Offered: Every year, Spring Online

NUR 610PBL. DNP Project I. 2 Credits.

This seminar provides an opportunity for students to identify a health organization or system's opportunity for process improvement based on available aggregate data. Students develop a substantial and meaningful scholarly DNP Project Proposal that is innovative and evidence-based, reflects the application of credible research findings, financially sound, feasible, sustainable and demonstrates value to the organization and population(s) served. There is a minimum of 120 fieldwork hours associated with this course. The course is graded on a pass/fail basis.

Corequisites: Take NUR 610.

Offered: Every year, Summer Online

NUR 612. Leadership and Collaboration for Change in Health Care. 2 Credits.

This course focuses on developing advanced practice nursing leaders who are able to generate pragmatic responses to health care policy, systems and practice inquiry problems through a collaborative approach.

Prerequisites: Take NUR 610.

Offered: Every year, Fall Online

NUR 612PBL. DNP Project II. 2 Credits.

Students continue experiential learning to create and sustain change through implementation of the approved, scholarly DNP Project Proposal using appropriate leadership concepts, interdisciplinary team collaboration, and change theory. Post-implementation and evaluation of Project outcomes are disseminated to applicable fieldwork site stakeholders, peers in a professional forum, and in a digital repository. There are 120 fieldwork hours associated with this course. This course is graded on a pass/fail basis.

Prerequisites: Take NUR 610, NUR 610PBL.

Offered: Every year, Fall Online

NUR 613. Nursing Leadership Seminar: Applying Data to Practice. 2 Credits.

This online seminar develops students' skills in identifying, critiquing and applying data in health care. Students investigate evidence-based research and how that data is used to improve health system outcomes.

In addition, they examine electronic data transfer methods and displays that illustrate performance. Finally, students debate the ethical aspects of data access, security and use.

Offered: Every year, Spring Online

NUR 614PBL. DNP Project Continuation Course. 1 Credit.

This course is for those students who continue to work on their DNP Project in the semester(s) after the conclusion of NUR 612 PBL. Students register for this one credit course every semester until their DNP Projects are completed.

Prerequisites: Take NUR 612PBL.

Offered: Every year, All Online

NUR 615. Nursing Leadership Seminar and Fieldwork Experience: Safety and Legal Contexts of Health Care. 3 Credits.

This two-hour clinical seminar accompanies 120 hours of experiential learning in the field, with an emphasis on safety and legal concepts in health care. Human factors analysis and systemic quality improvement for increased patient and provider safety are discussed.

Prerequisites: Take NUR 613.

Offered: Every year, Fall Online

NUR 617. Nursing Leadership Fellowship: Relationship Management and Strategic Leadership. 3 Credits.

This online course focuses on developing nursing leaders who are able to generate pragmatic responses to health care demands that address the collaborative relationships critical to clinical, educational and organizational success. This course includes 120 hours (1 credit) of experiential learning in the field, with a two-hour online seminar to discuss student experiences and synthesize leadership concepts and skills.

Prerequisites: Take NUR 615.

Offered: Every year, Spring Online

Post-Master's Doctor of Nursing Practice Care of Populations

Program Contact: Laima Karosas (laima.karosas@qu.edu) 203-582-5366

The Post-Master's Doctor of Nursing Practice (DNP) program is for master's prepared nurses who want to further their skills in using evidence to change practice. In addition to the DNP core classes, students take select classes in a population health specialty as well as electives supporting their career goals. To enhance learning, students participate in 480 hours of field experience related to their interest in population health.

The Post-Master's Doctor of Nursing Practice program is for master's prepared nurses who want to further their skills in using evidence to change practice. In addition to the DNP core classes students select classes in a leadership or population health specialty as well as electives supporting their career goals. 480 hours of field experience related to the student's interest enhance learning.

Students take electives to complete 30 credits required for the degree.

The semester-by-semester Learning Pathway for this program is available in the School of Nursing.

The curriculum for this program is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

Student Learning Outcomes

The objectives of the DNP program are designed to prepare graduates for advanced nursing practice who are capable of providing holistic

health care for diverse individuals, families or populations in a variety of settings. Specifically, the program seeks to produce graduates who:

- Demonstrate** clinical reasoning through an understanding of science and evidence-based practice.
- Design, implement and evaluate** quality improvement initiatives across the systems in which health care is delivered.
- Analyze and critique** the available evidence for best practices in healthcare.
- Apply** technology and information fluency to conduct practice inquiry.
- Advocate** for rational health policies to improve patient care and enhance effective use of resources.
- Demonstrate** leadership through interprofessional collaboration to improve patient and population health outcomes.
- Direct** health promotion and disease prevention efforts to improve patient and population health outcomes.
- Provide** competent, culturally sensitive, and ethically based care to individuals and/or populations in a defined specialty of advanced nursing practice.

Admission Requirements

An applicant to the post-master's programs must have a master's degree in nursing or a related field. Post-master's applicants are required to provide a letter from their prior master's program detailing the total number of supervised clinical hours they completed as part of that program. Download the form (https://quonline.quinnipiac.edu/documents/DNP_Practice_Verification.pdf) (PDF) Applicants should submit the following to the Office of Graduate Admissions:

- A completed admissions application including a resume and a personal statement addressing the following:
 - professional goals and motivations
 - a nursing experience that has influenced or shaped your practice
 - a healthcare problem that interests you for potential doctoral study
- Official transcripts from all schools previously attended.
- Official recent results of the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) for international applicants.
- Two letters of recommendation from persons with authority to evaluate your professional ability.
- Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.
- Letter from applicant's prior master's program detailing the number of supervised clinical hours completed as part of that program.

Candidates applying for full-time admission for the fall term must submit a completed application by July 1.

All accepted students will be required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptance will be conditional until satisfactory completion of both.

Progression Requirements

Students are expected to take courses in the order they are presented on the curriculum pathways. Any student wishing to take a course out of sequence must seek permission from the graduate program chair.

According to Quinnipiac University policy, all graduate students are expected to maintain a grade point average (GPA) of at least 3.0 on a 4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA each semester. Part-time graduate students must have an overall GPA of 3.0 upon completion of 9 credits and must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B minus grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and the subsequent curriculum sequence are offered and must achieve a B minus or better. The student must achieve a minimum grade of a B minus in all subsequent nursing courses. Failure to meet this requirement will result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B minus) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

A student who receives a grade of Incomplete (I) in any nursing course must meet all course requirements for conversion to a grade before the start of the subsequent semester.

For post-master's students, transfer students, or students returning from an elective leave of absence during their course of study, selected courses must have been completed within five years.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student in writing, of the student's failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation; b) suspended; or c) dismissed. Students placed on academic probation remain in their program but must take specified corrective action to meet program performance standards. Students should meet with their advisers to identify learning strategies to help them accomplish these goals and the student should draft a list or narrative of these strategies, which will serve as a learning contract. A copy of this contract will be placed in the student's folder and should be reviewed periodically with their adviser. Students must demonstrate a significantly increased GPA at the end of that semester in order to continue in the program. Students placed on suspension may also need to take specified actions as directed by the academic dean, graduate nursing program chair or academic adviser.

Appeal Process

- A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of their inability to progress.
- Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
- A student wishing to appeal a course grade should follow the grade appeal process (p. 110).

NUR 514. Epidemiology and Population Health. 2 Credits.
This course introduces epidemiologic principles, methods and data used in advanced nursing practice. Data and evidence from research are used to: assess acute and chronic population health problems/topics, provide effective possible interventions; and address and examine outcomes.
Offered: Every year, Spring and Summer Online

NUR 516. Health Policy and Organizational Systems. 2 Credits.
This course provides an introduction to various social and political policy environments impacting advanced nursing practice and health care systems. Students examine issues that inform health care policy, organization and financing. Nursing's advocacy role in shaping policy in organizational, social and political venues is emphasized.
Offered: Every year, Fall and Summer Online

NUR 600. Evaluation and Synthesis of Scientific Evidence for Practice. 2 Credits.
Students review selected processes to identify current best scientific evidence including formulation of asking an answerable question. Students also conduct a review of the literature, critically appraise individual studies, and synthesize the evidence collected. Various methods to evaluate statistical analyses and scientific rigor are emphasized. Discussions focus on strengths and limitations of existing evidence, and application to direct and indirect practice. Iterative writing is a major component of this course.
Offered: Every year, Fall Online

NUR 602. Principles of Ethical Theory in Nursing. 1 Credit.
This course facilitates the student's formulation of a theoretical basis for ethical judgment at an advanced level of practice. Students analyze ethical theory and debate responses to ethical problems in advanced nursing practice.
Offered: Every year, Fall and Summer Online

NUR 610. Clinical Scholarship and Inquiry in Nursing. 2 Credits.
This course focuses on improvement methods used to identify organizational systems' process problems affecting practice (direct and indirect care). Building on prior knowledge of evidence-based practice, students learn how to critically appraise scientific evidence, evaluate additional relevant information, and consider cost implications to create sustainable innovations intended to improve systems.
Prerequisites: Take NUR 600.
Offered: Every year, Spring Online

NUR 610PBL. DNP Project I. 2 Credits.
This seminar provides an opportunity for students to identify a health organization or system's opportunity for process improvement based on available aggregate data. Students develop a substantial and meaningful scholarly DNP Project Proposal that is innovative and evidence-based, reflects the application of credible research findings, financially sound, feasible, sustainable and demonstrates value to the organization and population(s) served. There is a minimum of 120 fieldwork hours associated with this course. The course is graded on a pass/fail basis.
Corequisites: Take NUR 610.
Offered: Every year, Summer Online

NUR 614PBL. DNP Project Continuation Course. 1 Credit.
This course is for those students who continue to work on their DNP Project in the semester(s) after the conclusion of NUR 612 PBL. Students register for this one credit course every semester until their DNP Projects are completed.
Prerequisites: Take NUR 612PBL.
Offered: Every year, All Online

NUR 612. Leadership and Collaboration for Change in Health Care. 2 Credits.
This course focuses on developing advanced practice nursing leaders who are able to generate pragmatic responses to health care policy, systems and practice inquiry problems through a collaborative approach.
Prerequisites: Take NUR 610.
Offered: Every year, Fall Online

NUR 612PBL. DNP Project II. 2 Credits.

Students continue experiential learning to create and sustain change through implementation of the approved, scholarly DNP Project Proposal using appropriate leadership concepts, interdisciplinary team collaboration, and change theory. Post-implementation and evaluation of Project outcomes are disseminated to applicable fieldwork site stakeholders, peers in a professional forum, and in a digital repository. There are 120 fieldwork hours associated with this course. This course is graded on a pass/fail basis.

Prerequisites: Take NUR 610, NUR 610PBL.

Offered: Every year, Fall Online

NUR 620. Principles of Population-Based Health Care. 2 Credits.

This course examines policies impacting health across a broad spectrum of health care conditions and settings. Students discuss the contributions of nursing to population health.

Offered: Every year, Spring Online

NUR 622. Population Health: Factors Affecting Specific Populations. 3 Credits.

This seminar allows each student to examine contemporary issues surrounding advanced nursing practice and population health within the context of the individual student's population health focus. There are 120 fieldwork hours associated with this course.

Prerequisites: Take NUR 620.

Offered: Every year, Fall Online

NUR 623. Global Population Health. 3 Credits.

This seminar allows each student to examine population health in the context of a global community. The role of the World Health Organization and the Social Determinants of Health are analyzed. The individual student's population health focus is considered in the context of broader global population issues. There are 120 fieldwork hours associated with this course.

Prerequisites: Take NUR 620, NUR 622.

Offered: Every year, Spring Online

Post-Master's Doctor of Nursing Practice Nursing Leadership

Program Contact: Laima Karosas (laima.karosas@qu.edu) 203-582-5366

The Post-Master's Doctor of Nursing Practice (DNP) program is for master's prepared nurses who want to further their skills in using evidence to change practice. In addition to the DNP core classes, students take select classes in a leadership specialty as well as electives supporting their career goals. To enhance learning, students participate in 480 hours of field experience related to their interest in nursing leadership.

The Post-Master's Doctor of Nursing Practice program is for master's prepared nurses who want to further their skills in using evidence to change practice. In addition to the DNP core classes students select classes in a leadership or population health specialty as well as electives supporting their career goals. 480 hours of field experience related to the student's interest enhance learning.

Total Credits		24

Curriculum Note:

Sample curriculum, 30 credits required.

Students take electives to complete 30 credits required for the degree.

The semester-by-semester Learning Pathway for this program is available in the School of Nursing.

The curriculum for this program is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

Student Learning Outcomes

The objectives of the DNP program are designed to prepare graduates for advanced nursing practice who are capable of providing holistic health care for diverse individuals, families or populations in a variety of settings. Specifically, the program seeks to produce graduates who:

- Demonstrate** clinical reasoning through an understanding of science and evidence-based practice.
- Design, implement and evaluate** quality improvement initiatives across the systems in which health care is delivered.
- Analyze and critique** the available evidence for best practices in healthcare.
- Apply** technology and information fluency to conduct practice inquiry.

- e. **Advocate** for rational health policies to improve patient care and enhance effective use of resources.
- f. **Demonstrate** leadership through interprofessional collaboration to improve patient and population health outcomes.
- g. **Direct** health promotion and disease prevention efforts to improve patient and population health outcomes.
- h. **Provide** competent, culturally sensitive, and ethically based care to individuals and/or populations in a defined specialty of advanced nursing practice.

Admission Requirements

An applicant to the post-master's programs must have a master's degree in nursing or a related field. Post-master's applicants are required to provide a letter from their prior master's program detailing the total number of supervised clinical hours they completed as part of that program. Download the form (https://quonline.quinnipiac.edu/documents/DNP_Practice_Verification.pdf) (PDF) Applicants should submit the following to the Office of Graduate Admissions:

- a. A completed admissions application including a resume and a personal statement addressing the following:
 - i. professional goals and motivations
 - ii. a nursing experience that has influenced or shaped your practice
 - iii. a healthcare problem that interests you for potential doctoral study
- b. Official transcripts from all schools previously attended.
- c. Official recent results of the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) for international applicants.
- d. Two letters of recommendation from persons with authority to evaluate your professional ability.
- e. Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.
- f. Letter from applicant's prior master's program detailing the number of supervised clinical hours completed as part of that program.

Candidates applying for full-time admission for the fall term must submit a completed application by July 1.

All accepted students will be required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptance will be conditional until satisfactory completion of both.

Progression Requirements

Students are expected to take courses in the order they are presented on the curriculum pathways. Any student wishing to take a course out of sequence must seek permission from the graduate program chair.

According to Quinnipiac University policy, all graduate students are expected to maintain a grade point average (GPA) of at least 3.0 on a 4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA each semester. Part-time graduate students must have an overall GPA of 3.0 upon completion of 9 credits and must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B minus grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and

the subsequent curriculum sequence are offered and must achieve a B minus or better. The student must achieve a minimum grade of a B minus in all subsequent nursing courses. Failure to meet this requirement will result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B minus) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

A student who receives a grade of Incomplete (I) in any nursing course must meet all course requirements for conversion to a grade before the start of the subsequent semester.

For post-master's students, transfer students, or students returning from an elective leave of absence during their course of study, selected courses must have been completed within five years.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student in writing, of the student's failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation; b) suspended; or c) dismissed. Students placed on academic probation remain in their program but must take specified corrective action to meet program performance standards. A copy of this contract will be placed in the student's folder and should be reviewed periodically with their adviser. Students must demonstrate a significantly increased GPA at the end of that semester in order to continue in the program. Students placed on suspension may also need to take specified actions as directed by the academic dean, graduate nursing program chair or academic adviser.

Appeal Process

- a. A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of their inability to progress.
- b. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
- c. A student wishing to appeal a course grade should follow the grade appeal process (p. 110).

NUR 514. Epidemiology and Population Health. 2 Credits.

This course introduces epidemiologic principles, methods and data used in advanced nursing practice. Data and evidence from research are used to: assess acute and chronic population health problems/topics, provide effective possible interventions; and address and examine outcomes.

Offered: Every year, Spring and Summer Online

NUR 516. Health Policy and Organizational Systems. 2 Credits.

This course provides an introduction to various social and political policy environments impacting advanced nursing practice and health care systems. Students examine issues that inform health care policy, organization and financing. Nursing's advocacy role in shaping policy in organizational, social and political venues is emphasized.

Offered: Every year, Fall and Summer Online

NUR 600. Evaluation and Synthesis of Scientific Evidence for Practice. 2 Credits.

Students review selected processes to identify current best scientific evidence including formulation of asking an answerable question. Students also conduct a review of the literature, critically appraise individual studies, and synthesize the evidence collected. Various methods to evaluate statistical analyses and scientific rigor are emphasized. Discussions focus on strengths and limitations of existing evidence, and application to direct and indirect practice. Iterative writing is a major component of this course.

Offered: Every year, Fall Online

NUR 602. Principles of Ethical Theory in Nursing. 1 Credit.

This course facilitates the student's formulation of a theoretical basis for ethical judgment at an advanced level of practice. Students analyze ethical theory and debate responses to ethical problems in advanced nursing practice.

Offered: Every year, Fall and Summer Online

NUR 610. Clinical Scholarship and Inquiry in Nursing. 2 Credits.

This course focuses on improvement methods used to identify organizational systems' process problems affecting practice (direct and indirect care). Building on prior knowledge of evidence-based practice, students learn how to critically appraise scientific evidence, evaluate additional relevant information, and consider cost implications to create sustainable innovations intended to improve systems.

Prerequisites: Take NUR 600.

Offered: Every year, Spring Online

NUR 610PBL. DNP Project I. 2 Credits.

This seminar provides an opportunity for students to identify a health organization or system's opportunity for process improvement based on available aggregate data. Students develop a substantial and meaningful scholarly DNP Project Proposal that is innovative and evidence-based, reflects the application of credible research findings, financially sound, feasible, sustainable and demonstrates value to the organization and population(s) served. There is a minimum of 120 fieldwork hours associated with this course. The course is graded on a pass/fail basis.

Corequisites: Take NUR 610.

Offered: Every year, Summer Online

NUR 612. Leadership and Collaboration for Change in Health Care. 2 Credits.

This course focuses on developing advanced practice nursing leaders who are able to generate pragmatic responses to health care policy, systems and practice inquiry problems through a collaborative approach.

Prerequisites: Take NUR 610.

Offered: Every year, Fall Online

NUR 612PBL. DNP Project II. 2 Credits.

Students continue experiential learning to create and sustain change through implementation of the approved, scholarly DNP Project Proposal using appropriate leadership concepts, interdisciplinary team collaboration, and change theory. Post-implementation and evaluation of Project outcomes are disseminated to applicable fieldwork site stakeholders, peers in a professional forum, and in a digital repository. There are 120 fieldwork hours associated with this course. This course is graded on a pass/fail basis.

Prerequisites: Take NUR 610, NUR 610PBL.

Offered: Every year, Fall Online

NUR 613. Nursing Leadership Seminar: Applying Data to Practice. 2 Credits.

This online seminar develops students' skills in identifying, critiquing and applying data in health care. Students investigate evidence-based research and how that data is used to improve health system outcomes. In addition, they examine electronic data transfer methods and displays that illustrate performance. Finally, students debate the ethical aspects of data access, security and use.

Offered: Every year, Spring Online

NUR 614PBL. DNP Project Continuation Course. 1 Credit.

This course is for those students who continue to work on their DNP Project in the semester(s) after the conclusion of NUR 612 PBL. Students register for this one credit course every semester until their DNP Projects are completed.

Prerequisites: Take NUR 612PBL.

Offered: Every year, All Online

NUR 615. Nursing Leadership Seminar and Fieldwork Experience: Safety and Legal Contexts of Health Care. 3 Credits.

This two-hour clinical seminar accompanies 120 hours of experiential learning in the field, with an emphasis on safety and legal concepts in health care. Human factors analysis and systemic quality improvement for increased patient and provider safety are discussed.

Prerequisites: Take NUR 613.

Offered: Every year, Fall Online

NUR 617. Nursing Leadership Fellowship: Relationship Management and Strategic Leadership. 3 Credits.

This online course focuses on developing nursing leaders who are able to generate pragmatic responses to health care demands that address the collaborative relationships critical to clinical, educational and organizational success. This course includes 120 hours (1 credit) of experiential learning in the field, with a two-hour online seminar to discuss student experiences and synthesize leadership concepts and skills.

Prerequisites: Take NUR 615.

Offered: Every year, Spring Online

Master of Science in Nursing

Program Contact: Laima Karosas (laima.karosas@qu.edu) 203-582-5366

Students who are registered nurses and have a bachelor's degree may pursue master's degree training. Five programs are available: Adult-Gerontology Acute Care Nurse Practitioner (p. 912), Adult-Gerontology Primary Care Nurse Practitioner (p. 916), Family Nurse Practitioner (p. 918), Operational Leadership (p. 921) and RN to MSN (p. 924).

For nurses who would like to become nurse practitioners, the Master of Science in Nursing (MSN) degree program is designed for working nurses who want to further their education and expand their credentials without sacrificing hands-on experience through clinical practice. This innovative program accommodates your schedule as well as your specific academic and career goals. Depending on your area of interest, you can choose between adult-gerontology acute care nurse practitioner, adult-gerontology primary care nurse practitioner or family nurse practitioner. Within two years of completing your MSN, you have the option of seamlessly transitioning into the online Doctor of Nursing Practice (DNP) program, without losing any credits or duplicating any coursework.

The Operational Leadership program prepares nurses for operational leadership roles in health care institutions and settings. The program offers courses in health policy, organizational leadership, adult learning

strategies, epidemiology, biostatistics, health care finance, informatics, health care management, the uses of data in evaluating practice, human factor analysis, and informational technology project management. The program also makes use of three courses from the Doctor of Nursing Practice (DNP) program, and provides 360 hours of practicum experience. Graduates who wish to continue their education are placed to pursue a clinical doctorate in nursing. The program was designed to provide some of the content required to sit for board certification in Nursing Professional Development or informatics, both offered by the American Nurses Credentialing Center (ANCC). Graduates of this program are prepared to assume positions of middle management, informatics and leadership in a variety of health care settings. Graduates also are qualified to teach undergraduate nursing students in clinical or laboratory courses.

Student Learning Outcomes

Graduates of the MSN program are prepared for higher level professional practice and leadership roles in a variety of healthcare settings, as well as advanced study at the doctoral level.

Specifically, graduates will be able to:

- Incorporate** knowledge from the sciences and humanities for improvement of healthcare across diverse settings.
- Demonstrate** leadership abilities encompassing ethical and critical decision-making that embraces a systems perspective.
- Apply** appropriate measurement and analysis methods related to organizational quality and safety.
- Apply** evidence-based findings to resolve practice problems, and serve as a catalyst for change.
- Use** informatics and healthcare technology to integrate and coordinate care.
- Participate** in policy development and advocacy strategies at the system level to influence health and healthcare.
- Collaborate** effectively on interprofessional teams to improve health outcomes.
- Integrate** principles of clinical and population health into care delivery and management.
- Deliver** direct and/or indirect nursing practice interventions at the master's level of practice.

Master of Science in Nursing Programs

- Adult-Gerontology Acute Care Nurse Practitioner (p. 912)
- Adult-Gerontology Primary Care Nurse Practitioner (p. 916)
- Family Nurse Practitioner (p. 918)
- Operational Leadership (p. 921)
- RN to MSN (p. 924)

Admission Requirements

An applicant to the Master of Science in Nursing program must be a registered nurse or NCLEX-eligible nurse and have a bachelor's degree in nursing or another field. An undergraduate cumulative GPA of 3.0 or better is required.

Applicants should submit the following to the Office of Graduate Admissions:

- A completed admissions application including a resume and a personal statement addressing the following:
 - professional goals and motivations
 - a nursing experience that has influenced or shaped your practice
 - a healthcare problem that interests you

- Official transcripts from all schools previously attended.
- Official recent results of the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) for international applicants.
- Two letters of recommendation from persons with authority to evaluate your professional ability.
- Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.

The preferred application deadline is May 1. Applications will be considered after May 1 on a space-available basis. Candidates may be placed on a wait list for Fall admission should space become available. However, acceptances are not deferred to the following Fall and wait-listed candidates need to reapply for the following Fall. Exceptions may be made in rare circumstances by the chair of the graduate nursing program. When all application materials are received, an interview with the graduate nursing program director and/or member of the faculty will be arranged for eligible candidates.

All accepted students also are required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptances are conditional until satisfactory completion of both.

Transfer Credits

Graduate course credit completed with a grade of B or better at another regionally accreditation institution may be considered for transfer credit in place of a similar course. Courses must be at the same level (i.e., an undergraduate course may not be transferred in place of a master's level course) and taken within the past five years. Transfer credit is granted upon admission to the program only. The course description and/or syllabus and a copy of the transcript with a request for transfer credit must be sent/emailed to the chair of the graduate nursing programs.

Master of Science in Nursing: Adult-Gerontology Acute Care Nurse Practitioner

Contact: Philip Martinez (Philip.Martinez@qu.edu) 203-582-7687

The Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) MSN prepares nurses to further their careers in acute care settings as providers. You will gain the theory and skills to effectively provide care and prescribe for patients with acute health issues. In addition to learning to assess acute care problems, you will learn the pharmacological, non-pharmacological and interventional skills required in acute care settings. This program is online with three distinct, focused immersions on campus. Completion of this program makes you eligible to take a national certification exam for adult-gerontology acute care nurse practitioners.

- Integrate** principles of clinical and population health into care delivery and management.
 - Deliver** direct and/or indirect nursing practice interventions at the master's level of practice.

Admission Requirements

An applicant to the MSN program must be a registered nurse or NCLEX-eligible nurse and have a bachelor's degree in nursing or another field. An undergraduate cumulative GPA of 3.0 or better is required. Applicants should submit the following to the Office of Graduate Admissions:

- A completed admissions application including a resume and a personal statement addressing the following:
 - professional goals and motivations
 - a nursing experience that has influenced or shaped your practice
 - a healthcare problem that interests you for potential doctoral study.
- Official transcripts from all schools previously attended.
- Official recent results of the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) for international applicants.
- Two letters of recommendation from persons with authority to evaluate your professional ability.
- Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.

Candidates applying for full-time admission for the fall term must submit a completed application by May 1. Candidates may be on a waitlist for the fall in the event a space becomes available. However, acceptances are not deferred and wait-listed candidates need to reapply for the following fall. Exceptions may be made in rare circumstances by the chair of the graduate nursing program.

All accepted students are required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptances are conditional until satisfactory completion of both.

Progression Requirements

Students are expected to take courses in the order they are presented on the curriculum pathways. Any student wishing to take a course out of sequence must seek permission from the graduate program chair. To preserve quality in our clinical placements, we are not able to accommodate a change in program specialty except on a space-available basis. If a change is desired, students should speak with the graduate program director early in the curriculum to check on any opportunities for change and be placed on a waiting list, if necessary.

According to Quinnipiac University policy, all graduate students are expected to maintain a grade point average (GPA) of at least 3.0 on a 4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA each semester. Part-time graduate students must have an overall GPA of 3.0 upon completion of 9 credits and must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B minus grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and the subsequent curriculum sequence are offered and must achieve a B minus or better. The student must achieve a minimum grade of B minus in all subsequent nursing courses. Failure to meet this requirement will

result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B minus) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

In clinical practica, students must receive a grade of B minus or better on the final faculty and preceptor clinical evaluations in order to pass the course and progress into the next semester. If a student is not performing satisfactorily in clinical according to the preceptor and/or faculty site visitor, a final faculty visit and evaluation of clinical performance will be made by a full-time faculty member, and this final grade must be B minus or better to pass the course.

A student who receives a grade of Incomplete (I) in any nursing courses or practica must meet all course requirements for conversion to a grade before the start of the subsequent semester.

For post-master's students, transfer students, or students returning from an elective leave of absence during their course of study, selected courses must have been completed within a specified period of time. For Pathophysiology, credit will be recognized if the course was taken during the previous five years. For Advanced Health Assessment, Pharmacology and any program specialty course, credit will be recognized if the course was taken during the previous three years. For any of these courses which do not meet the specified period of time, the course must be re-taken for credit. Students may be asked to audit courses if the interruption to the continuity of their curriculum plan has been significant.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student, in writing, of the student's failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation; b) suspended; or c) dismissed. Students placed on academic probation remain in their program but must take specified corrective action to meet program performance standards. Students should meet with their advisers to identify learning strategies to help them accomplish these goals and the student should draft a list or narrative of these strategies, which will serve as a learning contract. A copy of this contract will be placed in the student's folder and should be reviewed periodically with their adviser. Students must demonstrate a significantly increased GPA at the end of that semester to continue in the program. Students placed on suspension may also need to take specified actions as directed by the academic dean, graduate nursing program chair or academic adviser.

Appeal Process

- A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of their inability to progress.
- Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
- A student wishing to appeal a course grade should follow the grade appeal process (p. 110).

NUR 500. Biostatistics. 1 Credit.

This biostatistics course is an introduction to probability concepts and statistical tests currently used in the biological and health sciences. The course covers the application of statistics to data analysis. An emphasis is placed on inferential statistics, which includes estimation, confidence intervals, means, variances and proportions.

Offered: Every year, All Online

NUR 514. Epidemiology and Population Health. 2 Credits.

This course introduces epidemiologic principles, methods and data used in advanced nursing practice. Data and evidence from research are used to: assess acute and chronic population health problems/topics, provide effective possible interventions; and address and examine outcomes.

Offered: Every year, Spring and Summer Online

NUR 516. Health Policy and Organizational Systems. 2 Credits.

This course provides an introduction to various social and political policy environments impacting advanced nursing practice and health care systems. Students examine issues that inform health care policy, organization and financing. Nursing's advocacy role in shaping policy in organizational, social and political venues is emphasized.

Offered: Every year, Fall and Summer Online

NUR 520. Advanced Health Assessment. 3 Credits.

This course presents the principles of performing a comprehensive health assessment and reporting the findings in a professional format. Attention is given to assessment and physical examination across the lifespan within diverse communities. The processes underlying diagnostic decision making are introduced. A laboratory component enables the student to master the techniques of performing a holistic health assessment.

Corequisites: Take NUR 520L.

Offered: Every year, Fall

NUR 520L. Advanced Health Assessment Lab. 2 Credits.

This lab must be taken with NUR 520. (2 lab hrs.)

Corequisites: Take NUR 520.

Offered: Every year, Fall

NUR 522. Advanced Pathophysiology. 3 Credits.

Essential concepts of pathophysiology are emphasized. Selected disorders are studied especially as they relate to homeostatic and defense/repair mechanisms. Where appropriate the course includes clinical correlations of disease states with symptoms and physical findings.

Offered: Every year, Fall and Summer Online

NUR 530. Advanced Pharmacology. 3 Credits.

Students are introduced to pharmacological management across the lifespan and provided with advanced knowledge of pharmacokinetics. Selected categories of drugs commonly prescribed for management of health care problems and health promotion within diverse communities are presented. Controlled substances and the potential for abuse are discussed. The responsibilities and legalities of prescriptive authority in advanced practice are defined.

Offered: Every year, Spring Online

NUR 602. Principles of Ethical Theory in Nursing. 1 Credit.

This course facilitates the student's formulation of a theoretical basis for ethical judgment at an advanced level of practice. Students analyze ethical theory and debate responses to ethical problems in advanced nursing practice.

Offered: Every year, Fall and Summer Online

- NUR 632. Health Promotion and Advocacy. 3 Credits.**
Health promotion, advocacy and mental health problems encountered in primary care settings are considered. A holistic approach to clients from adolescence to senescence is emphasized. Evidence-based guidelines and research are integrated to develop nursing strategies for health promotion and prevention.
Offered: Every year, Fall and Summer Online
- NUR 660. Advanced Specialty Diagnostics & Assessment I. 2 Credits.**
This course provides an overview of diagnostic tools, procedures, and exams in the assessment, diagnosing, and treating of individuals with acute/critical illness. This course will be delivered in a hybrid format, with students completing online content including topics such as ECG interpretation, diagnostic exam evaluation and interpretation as well as an on-ground clinical residency where the emphasis will be on competence in a variety of procedures specific to the acute care nurse practitioner. The emphasis is not only on learning skills, but also on the appropriate use of these skills in a healing context.
Prerequisites: Take NUR 520, NUR 520L, NUR 530 and NUR 522
Offered: As needed
- NUR 661. Introduction to Acute Care Clinical Practicum and Seminar. 2 Credits.**
This course provides a theoretical and practical framework for the practice of an acute care nurse practitioner caring for the adult and geriatric populations with acute and chronic complex problems. Students learn to apply diagnostic reasoning skills and critical thinking. Students complete 120 clinical hours in acute care settings where they demonstrate the ability to provide evidence-based care. An accompanying online clinical conference allows students to discuss the scope of an acute care nurse practitioner as well as management of acute care illnesses.
Prerequisites: Take NUR 520, NUR 520L, NUR 530 and NUR 522
Offered: As needed
- NUR 662. Advanced AGACNP Pharmacology. 2 Credits.**
This course builds upon the previous advanced pharmacology course and specifically discusses medications used in the inpatient setting. Students learn the use of medications, their interactions and polypharmacy issues that are specific to the acute care setting.
Offered: As needed
- NUR 663. Acute Care Practicum & Seminar I. 3 Credits.**
Emphasis in this first of three clinical courses is to use diagnostic reasoning, critical thinking, and patient analysis to focus on assessment, identifying differential diagnoses, and managing acutely or critically ill individuals using clinical practice guidelines. Students complete 240 direct care clinical hours in the inpatient acute or critical care setting. In addition to clinical hours, students engage in a one hour weekly clinical conference to present patient problems including a holistic approach to patient needs, differential diagnoses and specific clinical issues.
Prerequisites: Take NUR 660 NUR 661 NUR 661 and NUR 662
Corequisites: Take NUR 664
Offered: As needed
- NUR 664. Common Problems in Acute Care. 3 Credits.**
The first of three courses regarding common problems in acute care will focus on the pathophysiology and management of common acute and critical illnesses in individuals. Evidence-based, multidisciplinary management approaches to selected health problems are discussed. The course is grounded by a holistic approach to care; case studies are used to promote clinical reasoning. Topics include acid/base balance and fluid/electrolyte issues, cardiovascular, respiratory, and renal disease.
Prerequisites: Take NUR 660 NUR 661 and NUR 662
Offered: As needed
- NUR 665. Acute Care Practicum & Seminar II. 3 Credits.**
In the second of three clinical courses, students will continue to progress using the knowledge learned in previous courses to begin building safe and effective evidence-based plans of care. They 240 direct care clinical hours in the inpatient acute or critical care setting. Emphasis in this course is not only on refining assessment, differential diagnoses and management, but also building case load. Weekly one hour clinical conferences focus on presenting cases, discussing holistic approaches to critical care and refining differential diagnoses and treatment plans.
Prerequisites: Take NUR 663
Corequisites: Take NUR 666
Offered: As needed
- NUR 666. Common Problems in Acute Care II. 3 Credits.**
The second of three courses regarding common problems in acute care will focus on the pathophysiology and management of common acute and critical illnesses in individuals. An opportunity to refine differential diagnosis and management of challenging health concerns in diverse populations is provided by the use of case studies. Topics include trauma, shock, endocrine, GI, Infectious disease, and musculoskeletal issues. The course is grounded by a holistic approach to care.
Prerequisites: Take NUR 664
Offered: As needed
- NUR 667. Acute Care Practicum & Seminar III. 3 Credits.**
The final of three clinical courses requires students to use all of the foundational skills learned in previous courses to provide evidence-based care to promote healing in an increasing and varied case load of acute or critically ill patients. Students will build complete plans of care using the theoretical and clinical knowledge from other courses. Weekly clinical conferences serve to provide students opportunities to discuss challenging acute and critical care issues as well as provide opportunities to present data in a team like setting.
Prerequisites: Take NUR 665 and NUR 668
Corequisites: Take NUR 668
Offered: As needed
- NUR 668. Common Problems in Acute Care III. 3 Credits.**
The third and final of three courses regarding common problems in acute care will focus on more complex illnesses, their pathophysiology and management. Topics include neurology, oncology, integumentary, hepatic, hematology, psychological and cognitive health disorders, and multi-system disorders. Learning is enhanced using case studies. The course is grounded by a holistic approach to care.
Prerequisites: Take NUR 666
Offered: As needed
- NUR 669. Advanced Specialty Diagnostics & Assessment II. 2 Credits.**
This course provides an overview of advanced diagnostic tools, procedures, and exams in the assessment, diagnosing, and treating of individuals with acute/critical illness. This course will be delivered in a hybrid format, with students completing online content as well as an on-ground clinical residency where the emphasis will be on competence in more advanced procedures specific to the acute care nurse practitioner. . The emphasis is not only on learning skills, but also on the appropriate use of these skills in a healing context.
Prerequisites: Take NUR 663 NUR 664
Offered: As needed

Master of Science in Nursing: Adult-Gerontology Primary Care Nurse Practitioner

Program Contact: Susan D'Agostino
(Susan.DAgostino@qu.edu) 203-582-8882

In the Adult-Gerontology Primary Care Nurse Practitioner program, you'll develop the necessary skills to provide high-quality, cost-effective primary care across the lifespan from adolescence to geriatrics. This program can be completed either as a full-time or part-time program, requiring a two or three year commitment, respectively. Completion of this program makes you eligible to take a national certification exam for adult-gerontology primary care nurse practitioners.

MSN: Adult-Gerontology Primary Care Nurse Practitioner

Curriculum Note:

The semester-by-semester Learning Pathway for this program is available in the School of Nursing.

The curriculum for this program is subject to modification as deemed necessary by the nursing faculty to provide students with the most

meaningful educational experience and to remain current with professional standards and guidelines.

Student Learning Outcomes

Graduates of the MSN program are prepared for higher level professional practice and leadership roles in a variety of healthcare settings, as well as advanced study at the doctoral level.

Specifically, graduates will be able to:

- Incorporate** knowledge from the sciences and humanities for improvement of health care across diverse settings.
- Demonstrate** leadership abilities encompassing ethical and critical decision-making that embraces a systems perspective.
- Apply** appropriate measurement and analysis methods related to organizational quality and safety.
- Apply** evidence-based findings to resolve practice problems, and serve as a catalyst for change.
- Use** informatics and healthcare technology to integrate and coordinate care.
- Participate** in policy development and advocacy strategies at the system level to influence health and healthcare.
- Collaborate** effectively on interprofessional teams to improve health outcomes.
- Integrate** principles of clinical and population health into care delivery and management.
- Deliver** direct and/or indirect nursing practice interventions at the master's level of practice.

Admission Requirements

An applicant to the MSN program must be a registered nurse or NCLEX-eligible nurse and have a bachelor's degree in nursing or another field. An undergraduate cumulative GPA of 3.0 or better is required. Applicants should submit the following to the Office of Graduate Admissions:

- A completed admissions application including a resume and a personal statement addressing the following:
 - professional goals and motivations
 - a nursing experience that has influenced or shaped your practice
 - a healthcare problem that interests you for potential doctoral study
- Official transcripts from all schools previously attended.
- Official recent results of the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) for international applicants.
- Two letters of recommendation from persons with authority to evaluate your professional ability.
- Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.

Candidates applying for full-time admission for the fall term must submit a completed application by May 1. Candidates may be on a wait list for the fall in the event a space becomes available. However, acceptances are not deferred and wait listed candidates need to reapply for the following fall. Exceptions may be made in rare circumstances by the chair of the graduate nursing program.

All accepted students are required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptances are conditional until satisfactory completion of both.

Progression Requirements

Students are expected to take courses in the order they are presented on the curriculum pathways. Any student wishing to take a course out of sequence must seek permission from the graduate program chair. To preserve quality in our clinical placements, we are not able to accommodate a change in program specialty except on a space-available basis. If a change is desired, students should speak with the graduate program director early in the curriculum to check on any opportunities for change and be placed on a waiting list, if necessary.

According to Quinnipiac University policy, all graduate students are expected to maintain a grade point average (GPA) of at least 3.0 on a 4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA each semester. Part-time graduate students must have an overall GPA of 3.0 upon completion of 9 credits and must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B minus grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and the subsequent curriculum sequence are offered and must achieve a B minus or better. The student must achieve a minimum grade of a B minus in all subsequent nursing courses. Failure to meet this requirement will result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B minus) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

In clinical practica, students must receive a grade of B minus or better on the final faculty and preceptor clinical evaluations in order to pass the course and progress into the next semester. If a student is not performing satisfactorily in clinical according to the preceptor and/or faculty site visitor, a final faculty visit and evaluation of clinical performance will be made by a full-time faculty member, and this final grade must be B minus or better to pass the course.

A student who receives a grade of Incomplete (I) in any nursing courses or practica must meet all course requirements for conversion to a grade before the start of the subsequent semester.

For post-master's students, transfer students, or students returning from an elective leave of absence during their course of study, selected courses must have been completed within a specified period of time. For Pathophysiology, credit will be recognized if the course was taken during the previous five years. For Advanced Health Assessment, Pharmacology and any program specialty course, credit will be recognized if the course was taken during the previous three years. For any of these courses which do not meet the specified period of time, the course must be re-taken for credit. Students may be asked to audit courses if the interruption to the continuity of their curriculum plan has been significant.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student in writing, of the student's failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation; b) suspended; or

c) dismissed. Students placed on academic probation remain in their program but must take specified corrective action to meet program performance standards. Students should meet with their advisers to identify learning strategies to help them accomplish these goals and the student should draft a list or narrative of these strategies, which will serve as a learning contract. A copy of this contract will be placed in the student's folder and should be reviewed periodically with their adviser. Students must demonstrate a significantly increased GPA at the end of that semester to continue in the program. Students placed on suspension may also need to take specified actions as directed by the academic dean, graduate nursing program chair or academic adviser.

Appeal Process

- A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of their inability to progress.
- Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
- A student wishing to appeal a course grade should follow the grade appeal process (p. 110).

NUR 500. Biostatistics. 1 Credit.

This biostatistics course is an introduction to probability concepts and statistical tests currently used in the biological and health sciences. The course covers the application of statistics to data analysis. An emphasis is placed on inferential statistics, which includes estimation, confidence intervals, means, variances and proportions.

Offered: Every year, All Online

NUR 514. Epidemiology and Population Health. 2 Credits.

This course introduces epidemiologic principles, methods and data used in advanced nursing practice. Data and evidence from research are used to: assess acute and chronic population health problems/topics, provide effective possible interventions; and address and examine outcomes.

Offered: Every year, Spring and Summer Online

NUR 516. Health Policy and Organizational Systems. 2 Credits.

This course provides an introduction to various social and political policy environments impacting advanced nursing practice and health care systems. Students examine issues that inform health care policy, organization and financing. Nursing's advocacy role in shaping policy in organizational, social and political venues is emphasized.

Offered: Every year, Fall and Summer Online

NUR 520. Advanced Health Assessment. 3 Credits.

This course presents the principles of performing a comprehensive health assessment and reporting the findings in a professional format. Attention is given to assessment and physical examination across the lifespan within diverse communities. The processes underlying diagnostic decision making are introduced. A laboratory component enables the student to master the techniques of performing a holistic health assessment.

Corequisites: Take NUR 520L.

Offered: Every year, Fall

NUR 520L. Advanced Health Assessment Lab. 2 Credits.

This lab must be taken with NUR 520. (2 lab hrs.)

Corequisites: Take NUR 520.

Offered: Every year, Fall

NUR 522. Advanced Pathophysiology. 3 Credits.

Essential concepts of pathophysiology are emphasized. Selected disorders are studied especially as they relate to homeostatic and defense/repair mechanisms. Where appropriate the course includes clinical correlations of disease states with symptoms and physical findings.

Offered: Every year, Fall and Summer Online

NUR 530. Advanced Pharmacology. 3 Credits.

Students are introduced to pharmacological management across the lifespan and provided with advanced knowledge of pharmacokinetics. Selected categories of drugs commonly prescribed for management of health care problems and health promotion within diverse communities are presented. Controlled substances and the potential for abuse are discussed. The responsibilities and legalities of prescriptive authority in advanced practice are defined.

Offered: Every year, Spring Online

NUR 630. Advanced Holistic Assessment. 3 Credits.

This course expands on assessment across the lifespan with attention to complex systems. The processes underlying diagnostic decision making are explored and a variety of simple office procedures such as suturing and splinting are taught.

Prerequisites: Take NUR 520, NUR 520L.

Corequisites: Take NUR 630L.

Offered: Every year, Spring

NUR 630L. Advanced Holistic Assessment Lab. 2 Credits.

This lab must be taken with NUR 630. (2 lab hrs.)

Prerequisites: Take NUR 520, NUR 520L.

Corequisites: Take NUR 630.

Offered: Every year, Spring

NUR 631. Introduction to Clinical Practicum and Seminar I. 2 Credits.

This course introduces students to clinical practice and includes an online seminar. Students apply advanced health assessment skills to assess patients across the adult lifespan. Students are expected to perform focused and full histories and physicals, formulate differential diagnoses, suggest appropriate laboratory testing, and begin to develop treatment plans. Expectations also include demonstration of presenting patient cases, and appropriate clinical documentation. Students complete 120 hours of clinical time with their preceptor.

Prerequisites: Take NUR 630, NUR 630L.

Offered: Every year, Summer Online

NUR 602. Principles of Ethical Theory in Nursing. 1 Credit.

This course facilitates the student's formulation of a theoretical basis for ethical judgment at an advanced level of practice. Students analyze ethical theory and debate responses to ethical problems in advanced nursing practice.

Offered: Every year, Fall and Summer Online

NUR 632. Health Promotion and Advocacy. 3 Credits.

Health promotion, advocacy and mental health problems encountered in primary care settings are considered. A holistic approach to clients from adolescence to senescence is emphasized. Evidence-based guidelines and research are integrated to develop nursing strategies for health promotion and prevention.

Offered: Every year, Fall and Summer Online

NUR 634. Reproductive Health Problems in Primary Care. 3 Credits.

Gender-related problems in primary care across the lifespan are the focus of this course. Selected alternative and complimentary therapies are included.

Offered: Every year, Summer Online

NUR 636. Common Problems in Primary Care. 3 Credits.

This course considers diagnoses of common problems encountered in primary care settings. Evidence-based, multidisciplinary management approaches to selected health problems also are discussed. Assessment and management of the selected problems include attention to cultural traditions, alternative treatments and socioeconomic policies that affect the delivery of care. The course is grounded by a holistic approach to care; case studies are used to promote clinical reasoning.

Prerequisites: Take NUR 631.

Offered: Every year, Fall

NUR 641. Adult Health Practicum and Seminar I. 3 Credits.

This course integrates the principles of primary care nursing and includes a mentored practicum with a clinical seminar. Students apply advanced practice skills to manage acute and chronic health problems across the adult lifespan. Appropriate clinical documentation, case presentation and use of web-based clinical resources are emphasized.

Prerequisites: Take NUR 631.

Offered: Every year, Fall

NUR 642. Complex Problems in Primary Care. 3 Credits.

This course focuses on selected complex, urgent or less frequently encountered problems of primary care across the lifespan from adolescence to senescence. An opportunity to refine differential diagnosis and management of challenging health concerns in diverse populations is provided by the use of case studies.

Prerequisites: Take NUR 636; and NUR 641 or NUR 651.

Offered: Every year, Spring

NUR 643. Adult Health Practicum and Seminar II. 3 Credits.

This course includes a mentored practicum with clinical seminar and provides further opportunity for advanced nursing practice with diverse adult populations. Students refine primary care skills including appropriate documentation, differential diagnosis, case presentation and technology utilization with attention to cost-effective and evidence-based approaches to care.

Prerequisites: Take NUR 641.

Offered: Every year, Spring

NUR 645. Adult Health Practicum and Seminar III. 3 Credits.

This course includes a mentored practicum experience of 240 hours and an online seminar. It provides continued opportunity for advanced holistic practice with adults. Seminar prepares students for certification and licensure as adult-gerontology nurse practitioners.

Prerequisites: Take NUR 643

Offered: Every year, Summer

Master of Science in Nursing: Family Nurse Practitioner

Program Contact: Susan D'Agostino
(Susan.DAgostino@qu.edu) 203-582-8882

The Family Nurse Practitioner program prepares you to diagnose and manage most common illnesses for patients of all ages and to assume the responsibility inherent in prescribing medications. After graduation, you'll be eligible to sit for the national family nurse practitioner certification exam. This program can be completed either part-time or full-time, and enables graduates to significantly expand their current roles as advanced practice nurse in a multitude of health care settings.

Offered: Every year, All Online

NUR 514. Epidemiology and Population Health. 2 Credits.

This course introduces epidemiologic principles, methods and data used in advanced nursing practice. Data and evidence from research are used to: assess acute and chronic population health problems/topics, provide effective possible interventions; and address and examine outcomes.

Offered: Every year, Spring and Summer Online

NUR 516. Health Policy and Organizational Systems. 2 Credits.

This course provides an introduction to various social and political policy environments impacting advanced nursing practice and health care systems. Students examine issues that inform health care policy, organization and financing. Nursing's advocacy role in shaping policy in organizational, social and political venues is emphasized.

Offered: Every year, Fall and Summer Online

NUR 520. Advanced Health Assessment. 3 Credits.

This course presents the principles of performing a comprehensive health assessment and reporting the findings in a professional format. Attention is given to assessment and physical examination across the lifespan within diverse communities. The processes underlying diagnostic decision making are introduced. A laboratory component enables the student to master the techniques of performing a holistic health assessment.

Corequisites: Take NUR 520L.

Offered: Every year, Fall

NUR 520L. Advanced Health Assessment Lab. 2 Credits.

This lab must be taken with NUR 520. (2 lab hrs.)

Corequisites: Take NUR 520.

Offered: Every year, Fall

NUR 522. Advanced Pathophysiology. 3 Credits.

Essential concepts of pathophysiology are emphasized. Selected disorders are studied especially as they relate to homeostatic and defense/repair mechanisms. Where appropriate the course includes clinical correlations of disease states with symptoms and physical findings.

Offered: Every year, Fall and Summer Online

NUR 530. Advanced Pharmacology. 3 Credits.

Students are introduced to pharmacological management across the lifespan and provided with advanced knowledge of pharmacokinetics. Selected categories of drugs commonly prescribed for management of health care problems and health promotion within diverse communities are presented. Controlled substances and the potential for abuse are discussed. The responsibilities and legalities of prescriptive authority in advanced practice are defined.

Offered: Every year, Spring Online

- NUR 602. Principles of Ethical Theory in Nursing.** 1 Credit.
This course facilitates the student's formulation of a theoretical basis for ethical judgment at an advanced level of practice. Students analyze ethical theory and debate responses to ethical problems in advanced nursing practice.
Offered: Every year, Fall and Summer Online
- NUR 630. Advanced Holistic Assessment.** 3 Credits.
This course expands on assessment across the lifespan with attention to complex systems. The processes underlying diagnostic decision making are explored and a variety of simple office procedures such as suturing and splinting are taught.
Prerequisites: Take NUR 520, NUR 520L.
Corequisites: Take NUR 630L.
Offered: Every year, Spring
- NUR 630L. Advanced Holistic Assessment Lab.** 2 Credits.
This lab must be taken with NUR 630. (2 lab hrs.)
Prerequisites: Take NUR 520, NUR 520L.
Corequisites: Take NUR 630.
Offered: Every year, Spring
- NUR 631. Introduction to Clinical Practicum and Seminar I.** 2 Credits.
This course introduces students to clinical practice and includes an online seminar. Students apply advanced health assessment skills to assess patients across the adult lifespan. Students are expected to perform focused and full histories and physicals, formulate differential diagnoses, suggest appropriate laboratory testing, and begin to develop treatment plans. Expectations also include demonstration of presenting patient cases, and appropriate clinical documentation. Students complete 120 hours of clinical time with their preceptor.
Prerequisites: Take NUR 630, NUR 630L.
Offered: Every year, Summer Online
- NUR 632. Health Promotion and Advocacy.** 3 Credits.
Health promotion, advocacy and mental health problems encountered in primary care settings are considered. A holistic approach to clients from adolescence to senescence is emphasized. Evidence-based guidelines and research are integrated to develop nursing strategies for health promotion and prevention.
Offered: Every year, Fall and Summer Online
- NUR 634. Reproductive Health Problems in Primary Care.** 3 Credits.
Gender-related problems in primary care across the lifespan are the focus of this course. Selected alternative and complimentary therapies are included.
Offered: Every year, Summer Online
- NUR 636. Common Problems in Primary Care.** 3 Credits.
This course considers diagnoses of common problems encountered in primary care settings. Evidence-based, multidisciplinary management approaches to selected health problems also are discussed. Assessment and management of the selected problems include attention to cultural traditions, alternative treatments and socioeconomic policies that affect the delivery of care. The course is grounded by a holistic approach to care; case studies are used to promote clinical reasoning.
Prerequisites: Take NUR 631.
Offered: Every year, Fall
- NUR 642. Complex Problems in Primary Care.** 3 Credits.
This course focuses on selected complex, urgent or less frequently encountered problems of primary care across the lifespan from adolescence to senescence. An opportunity to refine differential diagnosis and management of challenging health concerns in diverse populations is provided by the use of case studies.
Prerequisites: Take NUR 636; and NUR 641 or NUR 651.
Offered: Every year, Spring
- NUR 651. Family Health Practicum and Seminar I.** 3 Credits.
This course includes a mentored practicum experience and a clinical seminar. Health promotion and assessment of health problems within family systems are emphasized. Students learn primary care skills including appropriate documentation, differential diagnosis, case presentation and technology utilization with attention to cost-effective and evidence-based approaches to care.
Prerequisites: Take NUR 631.
Offered: Every year, Fall
- NUR 652. Primary Care of the Child and Family I.** 3 Credits.
This course focuses on health care of the child within the family system. Comprehensive assessment and management of common pediatric health problems encountered in primary care settings are addressed.
Prerequisites: Take NUR 631.
Offered: Every year, Fall
- NUR 653. Family Health Practicum and Seminar II.** 3 Credits.
This course includes a mentored practicum experience of 120 hours and a weekly clinical seminar. It provides an opportunity for nursing practice with families at an advanced level. Comprehensive assessment, clinical decision-making and strategies to facilitate health promotion and health restoration of individuals within family systems are emphasized.
Prerequisites: Take NUR 651.
Offered: Every year, Spring
- NUR 654. Primary Care of the Child and Family II.** 3 Credits.
This course continues the focus on health care of the child within the family system. Primary care management is emphasized.
Prerequisites: Take NUR 651, NUR 652.
Offered: Every year, Spring
- NUR 655. Family Health Practicum and Seminar III.** 3 Credits.
This course includes a mentored practicum experience of 240 hours and an online seminar. It provides continued opportunity for advanced holistic practice with families. Seminar prepares students for certification and licensure as family nurse practitioners.
Prerequisites: Take NUR 653.
Offered: Every year, Summer
- NUR 656. Pediatric Assessment.** 1 Credit.
This course discusses holistic health assessment of newborns, infants, children and adolescents. Assessment of normal growth and development is presented, as is assessment of common pediatric primary care problems.
Prerequisites: Take NUR 630, NUR 630L.
Offered: Every year, Summer Online

MSN Operational Leadership (online)

Program Contact: Peter Longley (Peter.Longley@qu.edu) 203-582-7676

Graduates of the MSN program are prepared for higher level professional practice and leadership roles in a variety of health care settings, as well as advanced study at the doctoral level.

The Operational Leadership program prepares nurses for operational leadership roles in health care institutions and settings. The program offers courses in health policy, organizational leadership, adult learning strategies, epidemiology, biostatistics, health care finance, informatics, health care management, the uses of data in evaluating practice and human factor analysis. The program also makes use of three courses from the Doctor of Nursing Practice (DNP) program, and provides 360 hours of practicum experience. Graduates who wish to continue their education are well positioned to pursue a clinical doctorate in nursing. The program provides a portion of the content required for eligibility to sit for board certification in Nursing Professional Development or Informatics, both offered by the American Nurses Credentialing Center (ANCC). Graduates of this program are prepared to assume positions of management, informatics and leadership in a variety of health care settings. Graduates also are qualified to teach undergraduate nursing students in clinical or laboratory courses.

Curriculum Note:

The semester-by-semester Learning Pathway for this program is available in the School of Nursing.

The curriculum for this program is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

Student Learning Outcomes

Graduates of the MSN program are prepared for higher level professional practice and leadership roles in a variety of healthcare settings, as well as advanced study at the doctoral level.

Specifically, graduates will be able to:

- Incorporate** knowledge from the sciences and humanities for improvement of healthcare across diverse settings.

- Demonstrate** leadership abilities encompassing ethical and critical decision-making that embraces a systems perspective.
- Apply** appropriate measurement and analysis methods related to organizational quality and safety.
- Apply** evidence-based findings to resolve practice problems, and serve as a catalyst for change.
- Use** informatics and healthcare technology to integrate and coordinate care.
- Participate** in policy development and advocacy strategies at the system level to influence health and healthcare.
- Collaborate** effectively on interprofessional teams to improve health outcomes.
- Integrate** principles of clinical and population health into care delivery and management.
- Deliver** direct and/or indirect nursing practice interventions at the master's level of practice.

Admission Requirements

An applicant to the Master of Science in Nursing program must be a registered nurse or NCLEX-eligible nurse and have a bachelor's degree in nursing or another field. An undergraduate cumulative GPA of 3.0 or better is required.

Applicants should submit the following to the Office of Graduate Admissions:

- A completed admissions application including a resume and a personal statement addressing the following:
 - professional goals and motivations,
 - a nursing experience that has influenced or shaped your practice,
 - a healthcare problem that interests you.
- Official transcripts from all schools previously attended.
- Official recent results of the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) for international applicants.
- Two letters of recommendation from persons with authority to evaluate your professional ability.
- Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.

The preferred application deadline is May 1. Applications will be considered after May 1 on a space-available basis. Candidates may be placed on a wait list for Fall admission should space become available. However, acceptances are not deferred to the following Fall and wait-listed candidates need to reapply for the following Fall. Exceptions may be made in rare circumstances by the chair of the graduate nursing program. When all application materials are received, an interview with the graduate program director and/or member of the faculty will be arranged for eligible candidates.

All accepted students also will be required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptances will be conditional until satisfactory completion of both.

Transfer Credits

Graduate course credit completed with a grade of B or better at another regionally accreditation institution may be considered for transfer credit in place of a similar course. Courses must be at the same level (i.e., an

undergraduate course may not be transferred in place of a master's level course) and taken within the past five years. Transfer credit is granted upon admission to the program only. The course description and/or syllabus and a copy of the transcript with a request for transfer credit must be sent/mailed to the chair of the graduate nursing programs.

Progression Requirements

According to Quinnipiac University policy, all graduate students are expected to maintain a grade point average (GPA) of at least 3.0 on a 4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA each semester. Part-time graduate students must have an overall GPA of 3.0 upon completion of 9 credits and must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B minus grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and the subsequent curriculum sequence are offered and must achieve a B minus or better. The student must achieve a minimum grade of a B minus in all subsequent nursing courses. Failure to meet this requirement will result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B minus) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

A student who receives a grade of Incomplete (I) in any nursing courses or practica must meet all course requirements for conversion to a grade before the start of the subsequent semester.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student in writing, of the student's failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation, b) suspended or c) dismissed. Students placed on academic probation remain in their program but must take specified corrective action to meet program performance standards. Students should meet with their advisers to identify learning strategies to help them accomplish these goals and the student should draft a list or narrative of these strategies, which will serve as a learning contract. A copy of this contract will be placed in the student's folder and should be reviewed periodically with their advisor. Students must demonstrate a significantly increased GPA at the end of that semester to continue in the program. Students placed on suspension may also need to take specified actions as directed by the academic dean, graduate nursing program chair or academic adviser.

Appeal Process

- A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving the inability to progress notice.
- Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
- A student wishing to appeal a course grade should follow the grade appeal process (p. 110) detailed in the University Catalog.

HM 600. Foundations of Health Care Management. 3 Credits.

This course expands the student's understanding of: 1) the organization and functions of various health services organizations/systems and their interrelationships; 2) basic concepts of management planning, organizing, leading, staffing and controlling as they relate to issues critical to the mission and strategic positioning of the organization/system; and 3) the utilization of scarce resources to deliver optimum health care at reasonable cost.

Offered: Every year, Fall

NUR 500. Biostatistics. 1 Credit.

This biostatistics course is an introduction to probability concepts and statistical tests currently used in the biological and health sciences. The course covers the application of statistics to data analysis. An emphasis is placed on inferential statistics, which includes estimation, confidence intervals, means, variances and proportions.

Offered: Every year, All Online

NUR 514. Epidemiology and Population Health. 2 Credits.

This course introduces epidemiologic principles, methods and data used in advanced nursing practice. Data and evidence from research are used to: assess acute and chronic population health problems/topics, provide effective possible interventions; and address and examine outcomes.

Offered: Every year, Spring and Summer Online

NUR 516. Health Policy and Organizational Systems. 2 Credits.

This course provides an introduction to various social and political policy environments impacting advanced nursing practice and health care systems. Students examine issues that inform health care policy, organization and financing. Nursing's advocacy role in shaping policy in organizational, social and political venues is emphasized.

Offered: Every year, Fall and Summer Online

NUR 538. Applying Data to Practice. 1 Credit.

This online seminar introduces students to the uses of data in the health care setting. Students learn to interpret data and how to use it to improve patient care outcomes. In addition, they examine electronic data transfer methods and displays that illustrate performance. Finally, students debate the ethical aspects of data access, security and use.

Offered: Every year, Fall Online

NUR 540. Educational Principles for the Health Care Professional. 3 Credits.

This course examines the theoretical perspectives of education as it relates to educational leadership and professional development for adult learners. Teaching/learning theories, models and principles are examined as preparation for the design, development, evaluation and revision of professional development-related curricula. Instructional strategies and teaching techniques adapted for diverse populations are explored.

Offered: Every year, Fall Online

NUR 542. Introduction to Health Care Finance. 2 Credits.

This 2-credit online graduate course provides an overview of basic budgeting concepts and processes integral to project planning and project management. Students also are introduced to foundational principles of marketing.

Offered: Every year, Summer Online

NUR 543. Capstone. 3 Credits.

This capstone practicum is a culminating experience integrating knowledge and skill learned in other courses into the practice setting. Students complete a synthesis practicum that is an intensive mentored experience in operational leadership in a selected area of interest. (1-credit seminar, 2 credits/240 hours of practicum)

Offered: Every year, Spring Online

NUR 544. Introduction to Informatics.**3 Credits.**

This online course provides essential knowledge and skills in health care informatics to enhance the quality of patient care and outcomes through the assessment, development, implementation, use and evaluation of information technologies. It prepares the nurse to support evidence-based practice and manage patient-care technologies to deliver and enhance interprofessional care and communication for improved coordination of care. The 1-credit practicum provides the opportunity for students to apply essential knowledge and skills in health care informatics. (120 practicum hours)

Offered: Every year, Summer Online

NUR 688. Human Factors and Patient Safety.**3 Credits.**

This course examines issues related to human error and patient safety with an emphasis on crisis management. Students explore the theoretical basis of human error, patient safety and quality assurance in health care. This course introduces a systems approach to error investigation and analysis, and integrates concepts of teamwork, crisis management, simulation and monitoring systems in medical practice.

Offered: Every year

OL 601. Foundations of Organizational Behavior and Leadership.**3 Credits.**

This course explores foundational concepts of leadership through the exploration of traditional leadership theory cultural, emotional and social intelligence, and power and politics. Contemporary issues in leadership provide opportunity for practical application and personal reflection.

Prerequisites: Can only take 1 from list: OL 601, PMBA 622 or MBA 625.

Offered: Every year, All

OL 630. Performance Management and HR Analytics.**3 Credits.**

This course focuses on the theoretical and practical application of performance management and HRIS. The importance of an effective performance management system is examined. An effective performance management system includes a continuous process of identifying factors and integrated approaches that align individual and team competencies with organizational goals. Students gain a conceptual understanding of key factors involved in assessing performance management systems in small and large organizations.

Offered: Every year

RN to MSN Program (online)

Program Contact: Peter Longley (Peter.Longley@qu.edu) 203-582-7676

The RN to MSN program is designed for individuals who are licensed as registered nurses and interested in pursuing a master's degree in nursing with a focus in operational leadership. At the completion of this program, students will obtain both a Bachelor of Science in Nursing (BSN) and a Master of Science in Nursing (MSN). This program is taught using a distance education format. The curriculum builds on the individual's prior educational preparation and incorporates the American Association of Colleges of Nursing (AACN) Essentials of Baccalaureate Education for Professional Nursing Practice as well as the Essentials of Master's Education in Nursing.

The School of Nursing is not accepting applications to the RN to MSN program at this time.

HM 600. Foundations of Health Care Management. 3 Credits.

This course expands the student's understanding of: 1) the organization and functions of various health services organizations/systems and their interrelationships; 2) basic concepts of management planning, organizing, leading, staffing and controlling as they relate to issues critical to the mission and strategic positioning of the organization/system; and 3) the utilization of scarce resources to deliver optimum health care at reasonable cost.

Offered: Every year, Fall

- NUR 382. Nursing Science and Information Literacy. 3 Credits.**
This online course examines nursing science and its use in nursing practice. Students are introduced to clinical reasoning and disciplinary and interdisciplinary concepts. This course also focuses on information literacy and information management in the delivery of quality patient care.
Offered: Every year, Fall Online
- NUR 410. Integrative Health and Healing. 3 Credits.**
This course explores the core holistic concepts of nutrition, fresh air, light, quiet, and cleanliness as they relate to contemporary integrative health practices and interventions ranging from nutrition to meditation and their application to whole person health.
Offered: Every year, Spring and Summer Online
- NUR 478. Evidence-Based Nursing Practice. 3 Credits.**
This course focuses on the knowledge, attitudes, and skills necessary for evidence-based decision making in clinical practice. Students learn the basic elements of evidence-based practice and use evidence to improve practice. The course includes one credit of application in a fieldwork setting.
Offered: Every year, Summer Online
- NUR 480. Interprofessional Practice and Quality Improvement. 3 Credits.**
This course describes and applies quality improvement methods to address problems identified in practice and actions needed to effect a positive change for care. The process and significance of interprofessional practice and collaboration in the delivery of patient care and in engagement with performance improvement are described. Open to RN-BSN students only.
Offered: Every year, Spring Online
- NUR 484. Community and Population Health Nursing. 3 Credits.**
This course investigates concepts of community and public health nursing. Emphasis is on health promotion with a focus on the role of the community and public health nurse for individuals, groups, and populations. The delivery of safe, evidence-based, holistic centered care is demonstrated during fieldwork conducted in a community setting.
Offered: Every year, Fall Online
- NUR 486. Contemporary Issues and Roles in Nursing Practice. 3 Credits.**
This course analyzes trends and issues in contemporary health care and their effect on the consumer, the nursing profession, and society. It incorporates social intelligence, diversity awareness, creativity and sensitivity required for leadership roles and management functions in dynamic health care environments. This course includes 1 credit of clinical practice.
Offered: Every year, Spring Online
- NUR 500. Biostatistics. 1 Credit.**
This biostatistics course is an introduction to probability concepts and statistical tests currently used in the biological and health sciences. The course covers the application of statistics to data analysis. An emphasis is placed on inferential statistics, which includes estimation, confidence intervals, means, variances and proportions.
Offered: Every year, All Online
- NUR 514. Epidemiology and Population Health. 2 Credits.**
This course introduces epidemiologic principles, methods and data used in advanced nursing practice. Data and evidence from research are used to: assess acute and chronic population health problems/topics, provide effective possible interventions; and address and examine outcomes.
Offered: Every year, Spring and Summer Online
- NUR 516. Health Policy and Organizational Systems. 2 Credits.**
This course provides an introduction to various social and political policy environments impacting advanced nursing practice and health care systems. Students examine issues that inform health care policy, organization and financing. Nursing's advocacy role in shaping policy in organizational, social and political venues is emphasized.
Offered: Every year, Fall and Summer Online
- NUR 538. Applying Data to Practice. 1 Credit.**
This online seminar introduces students to the uses of data in the health care setting. Students learn to interpret data and how to use it to improve patient care outcomes. In addition, they examine electronic data transfer methods and displays that illustrate performance. Finally, students debate the ethical aspects of data access, security and use.
Offered: Every year, Fall Online
- NUR 540. Educational Principles for the Health Care Professional. 3 Credits.**
This course examines the theoretical perspectives of education as it relates to educational leadership and professional development for adult learners. Teaching/learning theories, models and principles are examined as preparation for the design, development, evaluation and revision of professional development-related curricula. Instructional strategies and teaching techniques adapted for diverse populations are explored.
Offered: Every year, Fall Online
- NUR 542. Introduction to Health Care Finance. 2 Credits.**
This 2-credit online graduate course provides an overview of basic budgeting concepts and processes integral to project planning and project management. Students also are introduced to foundational principles of marketing.
Offered: Every year, Summer Online
- NUR 543. Capstone. 3 Credits.**
This capstone practicum is a culminating experience integrating knowledge and skill learned in other courses into the practice setting. Students complete a synthesis practicum that is an intensive mentored experience in operational leadership in a selected area of interest. (1-credit seminar, 2 credits/240 hours of practicum)
Offered: Every year, Spring Online
- NUR 544. Introduction to Informatics. 3 Credits.**
This online course provides essential knowledge and skills in health care informatics to enhance the quality of patient care and outcomes through the assessment, development, implementation, use and evaluation of information technologies. It prepares the nurse to support evidence-based practice and manage patient-care technologies to deliver and enhance interprofessional care and communication for improved coordination of care. The 1-credit practicum provides the opportunity for students to apply essential knowledge and skills in health care informatics. (120 practicum hours)
Offered: Every year, Summer Online
- OL 601. Foundations of Organizational Behavior and Leadership. 3 Credits.**
This course explores foundational concepts of leadership through the exploration of traditional leadership theory cultural, emotional and social intelligence, and power and politics. Contemporary issues in leadership provide opportunity for practical application and personal reflection.
Prerequisites: Can only take 1 from list: OL 601, PMBA 622 or MBA 625.
Offered: Every year, All

OL 630. Performance Management and HR Analytics. 3 Credits.

This course focuses on the theoretical and practical application of performance management and HRIS. The importance of an effective performance management system is examined. An effective performance management system includes a continuous process of identifying factors and integrated approaches that align individual and team competencies with organizational goals. Students gain a conceptual understanding of key factors involved in assessing performance management systems in small and large organizations.

Offered: Every year

NUR 688. Human Factors and Patient Safety. 3 Credits.

This course examines issues related to human error and patient safety with an emphasis on crisis management. Students explore the theoretical basis of human error, patient safety and quality assurance in health care. This course introduces a systems approach to error investigation and analysis, and integrates concepts of teamwork, crisis management, simulation and monitoring systems in medical practice.

Offered: Every year

Post-Master's Certificate

The Post-Master's Certificate (PMC) prepares nurse practitioners to broaden their scope of practice to other patient populations as providers. You will gain the theory and skills to effectively provide care and prescribe in another nurse practitioner specialty. In addition to learning to assess healthcare problems, you will learn the pharmacological, non-pharmacological and interventional skills required for the chosen population. The PMC programs are online with two distinct, focused immersions on campus. Completion of a PMC program confers eligibility to take a national certification exam for that nurse practitioner specialty.

Student Learning Outcomes

Graduates of the Post-Master's Certificate program are prepared for higher level professional practice and leadership roles in a variety of healthcare settings, as well as advanced study at the doctoral level.

Specifically, graduates will be able to:

- Incorporate** knowledge from the sciences and humanities for improvement of health care across diverse settings.
- Demonstrate** leadership abilities encompassing ethical and critical decision-making that embraces a systems perspective.
- Apply** appropriate measurement and analysis methods related to organizational quality and safety.
- Apply** evidence-based findings to resolve practice problems, and serve as a catalyst for change.
- Use** informatics and healthcare technology to integrate and coordinate care.
- Participate** in policy development and advocacy strategies at the system level to influence health and health care.
- Collaborate** effectively on interprofessional teams to improve health outcomes.
- Integrate** principles of clinical and population health into care delivery and management.
- Deliver** direct and/or indirect nursing practice interventions at the master's level of practice.

Post-Master's Certificate Programs

- Adult-Gerontology Acute Care Nurse Practitioner (p. 927)

Admission Requirements

An applicant to the Post-Master's Certificate program must be a registered nurse or NCLEX-eligible nurse and have a bachelor's degree in nursing or another field. An undergraduate cumulative GPA of 3.0 or better is required. Applicants should submit the following to the Office of Graduate Admissions:

- A completed admissions application including a resume and a personal statement addressing the following:
 - professional goals and motivations
 - a nursing experience that has influenced or shaped your practice
 - a healthcare problem that interests you for potential doctoral study.
- Official transcripts from all schools previously attended.
- Official recent results of the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) for international applicants.
- Two letters of recommendation from persons with authority to evaluate your professional ability.
- Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.

Candidates applying for full-time admission for the fall term must submit a completed application by May 1. Candidates may be on a waitlist for the fall in the event a space becomes available. However, acceptances are not deferred and wait-listed candidates need to reapply for the following fall. Exceptions may be made in rare circumstances by the chair of the graduate nursing program.

All accepted students are required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptances are conditional until satisfactory completion of both.

Post-Master's Certificate: Adult-Gerontology Acute Care Nurse Practitioner

Contact: Philip Martinez (Philip.Martinez@qu.edu) 203-582-7687

The Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) Post-Master's Certificate (PMC) prepares nurse practitioners to further their careers in acute care settings as providers. You will gain the theory and skills to effectively provide care and prescribe for patients with acute health issues. In addition to learning to assess acute care problems, you will learn the pharmacological, non-pharmacological and interventional skills required in acute care settings. This program is online with two distinct, focused immersions on campus. Completion of this program makes you eligible to take a national certification exam for adult-gerontology acute care nurse practitioners.

Total Credits		26

Curriculum Note:

The semester-by-semester Learning Pathway for this program is available in the School of Nursing.

The curriculum for this program is subject to modification as deemed necessary by the nursing faculty to provide students with the most meaningful educational experience and to remain current with professional standards and guidelines.

Student Learning Outcomes

Graduates of the Post-Master's Certificate program are prepared for higher level professional practice and leadership roles in a variety of healthcare settings, as well as advanced study at the doctoral level.

Specifically, graduates will be able to:

- Incorporate** knowledge from the sciences and humanities for improvement of health care across diverse settings.
- Demonstrate** leadership abilities encompassing ethical and critical decision-making that embraces a systems perspective.
- Apply** appropriate measurement and analysis methods related to organizational quality and safety.
- Apply** evidence-based findings to resolve practice problems, and serve as a catalyst for change.
- Use** informatics and healthcare technology to integrate and coordinate care.
- Participate** in policy development and advocacy strategies at the system level to influence health and health care.
- Collaborate** effectively on interprofessional teams to improve health outcomes.
- Integrate** principles of clinical and population health into care delivery and management.
- Deliver** direct and/or indirect nursing practice interventions at the master's level of practice.

Admission Requirements

An applicant to the Post-Master's Certificate program must be a registered nurse or NCLEX-eligible nurse and have a bachelor's degree in nursing or another field. An undergraduate cumulative GPA of 3.0 or better is required. Applicants should submit the following to the Office of Graduate Admissions:

- A completed admissions application including a resume and a personal statement addressing the following:
 - professional goals and motivations
 - a nursing experience that has influenced or shaped your practice
 - a healthcare problem that interests you for potential doctoral study.

- Official transcripts from all schools previously attended.
- Official recent results of the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) for international applicants.
- Two letters of recommendation from persons with authority to evaluate your professional ability.
- Proof of current licensure or eligibility for licensure as a registered nurse in the state of Connecticut.

Candidates applying for full-time admission for the fall term must submit a completed application by May 1. Candidates may be on a waitlist for the fall in the event a space becomes available. However, acceptances are not deferred and wait-listed candidates need to reapply for the following fall. Exceptions may be made in rare circumstances by the chair of the graduate nursing program.

All accepted students are required to complete a background check and urine drug screen following acceptance and before the start of classes. Acceptances are conditional until satisfactory completion of both.

Progression Requirements

Students are expected to take courses in the order they are presented on the curriculum pathways. Any student wishing to take a course out of sequence must seek permission from the graduate program chair. To preserve quality in our clinical placements, we are not able to accommodate a change in program specialty except on a space-available basis. If a change is desired, students should speak with the graduate program director early in the curriculum to check on any opportunities for change and be placed on a waiting list, if necessary.

According to Quinnipiac University policy, all graduate students are expected to maintain a grade point average (GPA) of at least 3.0 on a 4.0 scale. Full-time graduate students are required to achieve a 3.0 GPA each semester. Part-time graduate students must have an overall GPA of 3.0 upon completion of 9 credits and must maintain a cumulative GPA of 3.0 thereafter. The grading scale of the Graduate Nursing Program is consistent with that of the university.

A student who earns less than a B minus grade in any nursing course will not progress into the next semester. The student is allowed to repeat the course once at Quinnipiac University provided that the course and the subsequent curriculum sequence are offered and must achieve a B minus or better. The student must achieve a minimum grade of B minus in all subsequent nursing courses. Failure to meet this requirement will result in dismissal from the program. A student who earns unsatisfactory grades (grade of less than B minus) in two or more nursing courses in any semester is not eligible to repeat the courses and will be required to withdraw from the program.

In clinical practica, students must receive a grade of B minus or better on the final faculty and preceptor clinical evaluations in order to pass the course and progress into the next semester. If a student is not performing satisfactorily in clinical according to the preceptor and/or faculty site visitor, a final faculty visit and evaluation of clinical performance will be made by a full-time faculty member, and this final grade must be B minus or better to pass the course.

A student who receives a grade of Incomplete (I) in any nursing courses or practica must meet all course requirements for conversion to a grade before the start of the subsequent semester.

For post-master's students, transfer students, or students returning from an elective leave of absence during their course of study, selected courses must have been completed within a specified period of time. For Pathophysiology, credit will be recognized if the course was taken during the previous five years. For Advanced Health Assessment, Pharmacology and any program specialty course, credit will be recognized if the course was taken during the previous three years. For any of these courses which do not meet the specified period of time, the course must be re-taken for credit. Students may be asked to audit courses if the interruption to the continuity of their curriculum plan has been significant.

At the end of each semester, the chair of the graduate nursing programs reviews the cumulative GPA and academic record of graduate nursing students. The graduate nursing program chair will notify both the associate dean and the student, in writing, of the student's failure to meet the academic requirements. Students who are performing at an unsatisfactory level will be: a) placed on probation; b) suspended; or c) dismissed. Students placed on academic probation remain in their program but must take specified corrective action to meet program performance standards. Students should meet with their advisers to identify learning strategies to help them accomplish these goals and the student should draft a list or narrative of these strategies, which will serve as a learning contract. A copy of this contract will be placed in the student's folder and should be reviewed periodically with their adviser. Students must demonstrate a significantly increased GPA at the end of that semester to continue in the program. Students placed on suspension may also need to take specified actions as directed by the academic dean, graduate nursing program chair or academic adviser.

Appeal Process

- a. A student wishing to appeal a progression decision must write a letter to the chair of the graduate nursing program within one week of receiving notice of their inability to progress.
- b. Appeals will be considered by a Faculty Appeals Committee and results will be communicated in writing to the student.
- c. A student wishing to appeal a course grade should follow the grade appeal process (p. 110).

NUR 660. Advanced Specialty Diagnostics & Assessment I. 2 Credits.

This course provides an overview of diagnostic tools, procedures, and exams in the assessment, diagnosing, and treating of individuals with acute/critical illness. This course will be delivered in a hybrid format, with students completing online content including topics such as ECG interpretation, diagnostic exam evaluation and interpretation as well as an on-ground clinical residency where the emphasis will be on competence in a variety of procedures specific to the acute care nurse practitioner. The emphasis is not only on learning skills, but also on the appropriate use of these skills in a healing context.

Prerequisites: Take NUR 520, NUR 520L, NUR 530 and NUR 522
Offered: As needed

NUR 661. Introduction to Acute Care Clinical Practicum and Seminar. 2 Credits.

This course provides a theoretical and practical framework for the practice of an acute care nurse practitioner caring for the adult and geriatric populations with acute and chronic complex problems. Students learn to apply diagnostic reasoning skills and critical thinking. Students complete 120 clinical hours in acute care settings where they demonstrate the ability to provide evidence-based care. An accompanying online clinical conference allows students to discuss the scope of an acute care nurse practitioner as well as management of acute care illnesses.

Prerequisites: Take NUR 520, NUR 520L, NUR 530 and NUR 522
Offered: As needed

NUR 662. Advanced AGACNP Pharmacology. 2 Credits.

This course builds upon the previous advanced pharmacology course and specifically discusses medications used in the inpatient setting. Students learn the use of medications, their interactions and polypharmacy issues that are specific to the acute care setting.

Offered: As needed

NUR 663. Acute Care Practicum & Seminar I. 3 Credits.

Emphasis in this first of three clinical courses is to use diagnostic reasoning, critical thinking, and patient analysis to focus on assessment, identifying differential diagnoses, and managing acutely or critically ill individuals using clinical practice guidelines. Students complete 240 direct care clinical hours in the inpatient acute or critical care setting. In addition to clinical hours, students engage in a one hour weekly clinical conference to present patient problems including a holistic approach to patient needs, differential diagnoses and specific clinical issues.

Prerequisites: Take NUR 660 NUR 661 NUR 661 and NUR 662
Corequisites: Take NUR 664

Offered: As needed

NUR 664. Common Problems in Acute Care. 3 Credits.

The first of three courses regarding common problems in acute care will focus on the pathophysiology and management of common acute and critical illnesses in individuals. Evidence-based, multidisciplinary management approaches to selected health problems are discussed. The course is grounded by a holistic approach to care; case studies are used to promote clinical reasoning. Topics include acid/base balance and fluid/electrolyte issues, cardiovascular, respiratory, and renal disease.

Prerequisites: Take NUR 660 NUR 661 and NUR 662
Offered: As needed

NUR 665. Acute Care Practicum & Seminar II. 3 Credits.

In the second of three clinical courses, students will continue to progress using the knowledge learned in previous courses to begin building safe and effective evidence-based plans of care. They 240 direct care clinical hours in the inpatient acute or critical care setting. Emphasis in this course is not only on refining assessment, differential diagnoses and management, but also building case load. Weekly one hour clinical conferences focus on presenting cases, discussing holistic approaches to critical care and refining differential diagnoses and treatment plans.

Prerequisites: Take NUR 663
Corequisites: Take NUR 666
Offered: As needed

NUR 666. Common Problems in Acute Care II. 3 Credits.

The second of three courses regarding common problems in acute care will focus on the pathophysiology and management of common acute and critical illnesses in individuals. An opportunity to refine differential diagnosis and management of challenging health concerns in diverse populations is provided by the use of case studies. Topics include trauma, shock, endocrine, GI, Infectious disease, and musculoskeletal issues. The course is grounded by a holistic approach to care.

Prerequisites: Take NUR 664

Offered: As needed

NUR 667. Acute Care Practicum & Seminar III. 3 Credits.

The final of three clinical courses requires students to use all of the foundational skills learned in previous courses to provide evidence-based care to promote healing in an increasing and varied case load of acute or critically ill patients. Students will build complete plans of care using the theoretical and clinical knowledge from other courses. Weekly clinical conferences serve to provide students opportunities to discuss challenging acute and critical care issues as well as provide opportunities to present data in a team like setting.

Prerequisites: Take NUR 665 and NUR 668

Corequisites: Take NUR 668

Offered: As needed

NUR 668. Common Problems in Acute Care III. 3 Credits.

The third and final of three courses regarding common problems in acute care will focus on more complex illnesses, their pathophysiology and management. Topics include neurology, oncology, integumentary, hepatic, hematology, psychological and cognitive health disorders, and multi-system disorders. Learning is enhanced using case studies. The course is grounded by a holistic approach to care.

Prerequisites: Take NUR 666

Offered: As needed

NUR 669. Advanced Specialty Diagnostics & Assessment II. 2 Credits.

This course provides an overview of advanced diagnostic tools, procedures, and exams in the assessment, diagnosing, and treating of individuals with acute/critical illness. This course will be delivered in a hybrid format, with students completing online content as well as an on-ground clinical residency where the emphasis will be on competence in more advanced procedures specific to the acute care nurse practitioner. The emphasis is not only on learning skills, but also on the appropriate use of these skills in a healing context.

Prerequisites: Take NUR 663 NUR 664

Offered: As needed

Mission Statement

The mission of Quinnipiac University's online programs is to partner with all university schools and colleges to deliver high-quality, student-centric academic programs in a virtual, collaborative classroom.

About Online Learning

Quinnipiac University was an early adopter of online learning, having launched its first online programs in 2001. Over the years, Quinnipiac has developed a high level of expertise in the design and delivery of online learning. Online programs allow students to complete their course work weekly without attending class at a scheduled date and time.

In addition to traditional on-campus programs, Quinnipiac University offers online bachelor's degree completion, master's degree, doctoral degree and certificate programs through the university's School of Business, School of Communications, School of Computing and Engineering, School of Education, School of Nursing and School of Health Sciences.

Quinnipiac University also offers undergraduate courses online during the summer. This popular option allows students to advance in their programs, catch up on required or prerequisite courses or expedite their time to degree completion. For information on summer program offerings, visit Quinnipiac's online programs (https://quonline.quinnipiac.edu/online-programs/online-summer-courses/?utm_source=QU&utm_medium=referral&utm_campaign=QU-catalog&utm_content=summer-courses) website.

Quinnipiac University's online programs offer students the best of both worlds by combining convenience and flexibility with an educational community that encourages personal connections, faculty guidance and the opportunity to consult and collaborate with peers.

Requirements for Graduation

Please review the requirements for graduation by clicking on the appropriate program below:

Undergraduate Degree Completion Programs

- Spanish Language Certificate for Medical Professionals (p. 241)
- Bachelor of Business Administration (p. 309)
- Bachelor of Science in Health Science Studies (p. 496)
- Bachelor of Science in Nursing (RN to BSN) (p. 667)
- RN to MSN in Operational Leadership (p. 924)

Graduate Programs

- Spanish Language Certificate for Medical Professionals (p. 241)
- Professional MBA (p. 712)
- Master of Arts in Cinematic Production Management (p. 720)
- Master of Science in Business Analytics (p. 708)
- Master of Science in Cybersecurity (p. 737)
- Master of Science in Instructional Design and Technology (p. 462)
- Master of Science in Interactive Media and Communications (p. 722)
- Master of Science in Nursing in Operational Leadership (p. 921)
- Master of Science in Organizational Leadership (p. 711)
- Master of Science in Public Relations (p. 725)
- Master of Science in Special Education (p. 463)
- Sixth-Year Diploma in Educational Leadership (p.)
- Occupational Therapy Doctorate (p. 553)
- Post-Master's Doctor of Nursing Practice (p. 898)
- Certificate in Social and Emotional Learning and School Climate (p. 454)
- Graduate Certificate in Online Course Design (p. 465)
- Special Education Certificate of Completion (p. 467)

Academic Policies

Undergraduate Academic Policies (p. 60)

Graduate Academic Policies (p. 678)

Online Admissions

For information about online admissions, visit online.qu.edu (<http://quonline.quinnipiac.edu>) or call 203-582-3918. The application, along with the appropriate fee, is to be submitted with official transcripts of all college-level work completed at other institutions. Applicants must also submit a personal statement and resume and supply the names and email addresses of two professional or academic references. Individual graduate programs may have additional application requirements.

International Student Admission

Applications for graduate study from international students are welcomed.

All applicants from non-English-speaking countries must, in addition to all of the regular admissions requirements, provide TOEFL (Test of English as a Foreign Language) scores (go to ets.org (<http://www.ets.org>)). In general, a minimum TOEFL iBT score of 90, Internet-based (575 paper-based, 233 computer-based) is required for admission. In lieu of TOEFL, applicants may submit IELTS (International English Language Testing System) scores (go to ielts.org (<http://www.ielts.org>)). A minimum score of 6.5 on this exam, "B" or above on the CAE (Certificate of Advanced English), or "C" or above on the CPE (Certificate of Proficiency in English) is required. In lieu of TOEFL or IELTS, applicants may submit PTE-A (Pearson Test of English Academic) scores (available at pearsonPTE.com

(<http://www.pearsonPTE.com>)). A minimum PTE-A score of 61 is required. TOEFL, IELTS and PTE scores are valid for two years.

Candidates holding degrees from foreign institutions must provide notarized English translations and an official evaluation of their postsecondary records from an academic credential evaluation service.

Admission Standards

Quinnipiac offers a variety of programs online. Please review program specific admission standards by clicking on the appropriate program below:

Undergraduate Degree Completion Programs

- Bachelor of Business Administration (p. 310)
- Bachelor of Science in Health Science Studies (p. 497)
- Bachelor of Science in Nursing (RN to BSN) (p. 668)
- RN to MSN in Operational Leadership (p. 925)

Graduate Programs

- Professional MBA (p. 713)
- Master of Arts in Cinematic Production Management (p. 721)
- Master of Science in Business Analytics (p. 709)
- Master of Science in Cybersecurity (p. 738)
- Master of Science in Instructional Design and Technology (p. 463)
- Master of Science in Interactive Media & Communications (p. 723)
- Master of Science in Nursing in Operational Leadership (p. 922)
- Master of Science in Organizational Leadership (p. 712)
- Master of Science in Public Relations (p. 726)
- Master of Science in Special Education (p. 465)
- Sixth-Year Diploma in Educational Leadership (p. 467)
- Occupational Therapy Doctorate (p. 555)
- Post-Master's Doctor of Nursing Practice (p. 899)
- Certificate in Social and Emotional Learning and School Climate (p. 455)
- Graduate Certificate in Online Course Design (p. 465)
- Special Education Certificate of Completion (p. 467)

Note: Meeting minimum admission standards does not guarantee admission.

If admitted, the successful candidate should plan to consult with his or her academic adviser to review the program requirements for graduation.

Transfer of Credit and Challenge Policy

Undergraduate

For undergraduate transfer of credit policies, click here (p. 20).

Graduate

Graduate course credit completed with a grade of B or better at other regionally accredited institutions may be transferred into a graduate program at Quinnipiac. Requests for transfer of credit must be submitted to the appropriate graduate program director along with official transcripts from the institution(s) where the credits were earned. Ordinarily, transfer of credit is granted for courses demonstrated to be similar in content, level of instruction and objectives to courses within a student's graduate curriculum at Quinnipiac.

The Professional MBA program accepts up to 3 credits. The MS in Business Analytics program accepts up to 3 credits.

Graduate-level courses taken to complete a degree program at Quinnipiac may be applied to a second graduate degree. These courses must be part of the approved curriculum of the second degree. Further, a minimum of 15 credits of additional coursework must be completed before the conferral of a second degree.

Financial Aid

Our goal at Quinnipiac University Online Financial Aid is to provide students with the adequate financial aid resources needed to pursue their educational goals without financial disruption. Our office provides students with courteous and efficient service while complying with all federal, state and university policies and regulations.

Students seeking financial aid must complete the Free Application for Federal Student Aid (FAFSA) (<https://studentaid.gov/h/apply-for-aid/fafsa/>) and use school code 001402.

Students are encouraged to complete their financial aid paperwork as early as possible to ensure timely processing of aid prior to the beginning of their start term. Bills are due approximately one month prior to the start of classes, so it is important to allow adequate processing time to remain in good standing with the university.

To be eligible for financial aid students must:

- a. be a U.S. citizen, permanent resident or eligible non-citizen
- b. satisfy any outstanding requirements that arise from the processing of the FAFSA
- c. register with the Selective Service System at [sss.gov](https://www.sss.gov/) (<https://www.sss.gov/>) (male students)
- d. be accepted by Quinnipiac into a degree program
- e. meet the university's minimum satisfactory academic progress standards for continuation of aid
- f. register at least half-time (5-8 credits for graduate students; 6 credits for undergraduate students)

Upon successful completion of the financial aid process, students receive an offer letter via their Quinnipiac University email account that outlines all of the aid for which they qualify. Students can accept or decline the award and apply for additional resources to cover their balance, if needed. Students also have the option to apply for private loans, outside scholarships, payment plans or veterans' benefits (if applicable).

For complete details on financial aid programs, visit [qu.edu](https://www.qu.edu/paying-for-college/) (<https://www.qu.edu/paying-for-college/>). We would also like to stress that our main mode of communication with our online students is through their Quinnipiac email account, so please remember to check it often!

ACADEMIC AWARDS AND HONOR SOCIETIES

Undergraduate Academic Awards

Academic Affairs

BRAMS Scholar Award

This award is presented annually to a graduating high school senior who is part of the Quinnipiac University/Betsy Ross Arts Magnet School Partnership. Award recipients are selected based on academic achievement.

President's Scholarship Award

This award by the president of Quinnipiac goes to the student who has attained the highest scholastic standing in the graduating class and who has completed at least 90 credits at Quinnipiac.

Student Writing Awards

Quinnipiac University Writing Across the Curriculum recognizes exemplary student writing both in and across the disciplines. Students working in the arts, humanities, social sciences, communications, STEM, business, nursing and health sciences have received cash prizes, gift cards, books and the honor of having their writing published in the Quinnipiac University Casebook, as published by the College of Arts and Sciences and edited by the First-Year Writing Program.

Alumni/Parent Relations

Alumni Association Academic Achievement Awards

At graduation, the Alumni Association presents an award to the honors student from each of the undergraduate schools who has attained the highest scholastic standing and who has completed 90 credits at QU. These awards are made possible by the Alumni Association Board.

Alumni Chair Award

This award honors the graduating senior who has demonstrated outstanding leadership, commitment to creating student awareness of the Alumni Association and facilitating increased interaction between alumni and students.

College of Arts and Sciences

Christopher Becker Memorial Prize in History

The History Department awards the Becker Prize to the graduating senior with the highest overall grade point average.

Beta Beta Beta Award

This award is presented to the graduating senior in the Department of Biological Sciences who is a member of the Beta Beta Beta National Biological Honor Society (Upsilon Chapter) and has attained the highest academic standing.

College of Arts and Sciences Award for Special Achievement

This award is given to the graduating senior in the College of Arts and Sciences who has a record of exceptional achievement in the face of adversity. The award was established in honor of Morris Woskow, former professor of psychology and dean.

James Fickes Award for Excellence in Mathematics

This award is given to the senior mathematics major who has shown the greatest achievement and future promise as a mathematician, and who has demonstrated leadership both in and outside the classroom.

Barry Fritz Award in Psychology

This prize is given each spring to a senior in psychology who has completed an independent study project that is both creative and relevant. These two qualities characterized the research of Professor Barry Fritz, in whose honor the award was established. To be considered, the project must be completed by the fall of senior year, but also could be completed in previous years.

Joan Phillips Gordon Prize in Sociology

This award, in honor of Joan Phillips Gordon, former chair of the sociology department, is presented annually to a senior in sociology, social services, criminal justice or gerontology, who has demonstrated outstanding academic and leadership qualities.

The Lynne Gershenson Hodgson Prize in Gerontology

This award, in honor of Professor Emerita Lynne Gershenson Hodgson, former chair of the Department of Sociology, Criminal Justice and Anthropology, is presented annually to a senior gerontology major or a departmental major who has pursued interests related to the field of gerontology, and who has demonstrated outstanding academic and leadership qualities.

Legal Studies Book Award

This prize is given annually to the senior Law in Society student with the highest grade point average who has demonstrated exceptional ability in the major, and who has contributed to the departmental culture of excellence.

Outstanding Engagement in the Field of Anthropology

The Outstanding Engagement in the Field of Anthropology award is given to a graduating Quinnipiac senior who embodies and exemplifies the core values and ethos of the discipline. The award is given to a student who has sought opportunities to share their knowledge of the field with others, either through outreach, research or other forms of service; has incorporated anthropological lessons and ideas into their overall college experiences; and demonstrates the importance of learning with, and from, others.

Benjamin Page Award in Philosophy

This award, in honor of Professor Benjamin Page, who demonstrated extraordinary commitment to philosophy at Quinnipiac for more than 40 years, is given to the graduating student who has similarly contributed to upholding the value of philosophy at Quinnipiac.

R. Gordon Pauluccy Graduation Prize in Psychology

This award, established by the Pauluccy family, is made annually to the senior major in psychology who has the highest overall grade point average.

Political Science Best Senior Thesis Award

The political science faculty established this award to recognize graduating senior students in political science who have submitted outstanding as well as original theses.

Political Science Outstanding Senior Award

This award recognizes a senior in political science who has shown high academic achievement, made a significant contribution to campus life and/or shown excellent leadership qualities.

Ronald J. Quirk Spanish Writing Contest

The Department of Modern Languages, Literatures and Cultures sponsors an annual Spanish writing contest. Eligible students are junior or senior Spanish majors who write an essay in Spanish, which is judged by departmental professors. The first- and second-place winners

are honored at the College of Arts and Sciences award dinner with a commendation and a monetary prize.

The Matt Rafferty Memorial Economics Department Student Achievement Award

This award is given to the student majoring in economics who has shown outstanding academic achievement and contributed significantly to the department.

Rachel Ranis Prize in Social Justice

This award, conferred in recognition of Professor Ranis, is presented to a senior in sociology, social services, criminal justice or gerontology, who has demonstrated a passion for social justice.

Alice B. Remail Memorial Award

This award is presented to the graduating student majoring in English with the highest academic record and is given in memory of a distinguished member of the department.

Aurea C. Schoonmaker Spanish Award

In honor of Professor Aurea C. Schoonmaker's 43 years of exemplary teaching at Quinnipiac University, this prize is awarded to the senior Spanish major with the highest grade point average.

Senior Service Prize in Criminal Justice

This award is presented to the senior criminal justice major who exhibits extraordinary service to the program, campus life and community.

Alfred P. Stiernotte Memorial Prize

This award is presented to the graduating student who has earned distinction in the study of philosophy.

Orville J. Sweeting Memorial Chemistry Award

This award, in memory of Orville J. Sweeting, former faculty member and Quinnipiac provost, is presented to a graduating senior who has exhibited outstanding achievement in both the academic and senior research setting in chemistry or biochemistry.

School of Business

Award for Academic Excellence - Bachelor of Business Administration

This award is presented to a graduating Bachelor of Business Administration student who has demonstrated outstanding academic achievement in the program.

Bellizzi-McMullen Leadership Award

The Bellizzi-McMullen Leadership Award is named in memory of Professor Emeritus Frank Bellizzi and Professor Emeritus Ron McMullen, who are together recognized for their dedication and passion in cultivating the leadership skills of Quinnipiac students. Well loved by students and faculty, Professors Bellizzi and McMullen embodied the values they taught – emotional intelligence and compassion for others.

This award is given each year to a senior Management student who exhibits the qualities consistent with these values. This award recognizes students who demonstrate emotional intelligence and compassion in leadership roles, on campus or in the community, and superior academic performance.

Biomedical Marketing Department Student Achievement Award

This award is presented to a graduating student exhibiting outstanding scholarship, independent creativity and extracurricular activities directly related to biomedical marketing.

Business Analytics Outstanding Senior Award

This award is presented to an outstanding Business Analytics senior in recognition of academic excellence and student leadership.

Entrepreneurship Student Achievement Award

This award is presented to the senior entrepreneurship major who has demonstrated outstanding achievement in entrepreneurial activities and academic performance.

Finance Department Outstanding Senior Award

This award is presented to a graduating senior for academic achievement in finance.

International Business Award

This award is given to a graduating senior in international business for demonstrating academic excellence and professional qualities within the international business program.

Ronald Marangell Award

This award is presented to an outstanding graduating accounting major in memory of Ronald Marangell, a former Quinnipiac accounting student.

Marketing Department Student Achievement Award

This award is presented to a student possessing expertise in marketing who has made contributions to the field and the marketing department.

Bruce Saulnier Computer Information Systems Outstanding Senior Award

This award is presented to an outstanding Computer Information Systems senior in recognition of academic excellence and student leadership.

Edward J. Scannell Prize

This award, in memory of a former trustee, is given to two graduating business students who have demonstrated outstanding citizenship.

School of Communications

Outstanding Achievement in Advertising and Integrated Communications

This award is presented to a graduating senior from the School of Communications in the advertising and integrated communications program, who has shown high academic achievement, made significant contributions to the program, campus life and/or has shown excellent leadership qualities on campus.

Outstanding Achievement in Film, Television and Media Arts (BA)

This award is presented to a graduating senior from the School of Communications in the film, television and media arts bachelor of arts program, who has shown high academic achievement, made significant contributions to the program, campus life and/or has shown excellent leadership qualities on campus.

Outstanding Achievement in Film, Television and Media Arts (BFA)

This award is presented to a graduating senior from the School of Communications in the film, television and media arts bachelor of fine arts program, who has shown high academic achievement, made significant contributions to the program, campus life and/or has shown excellent leadership qualities on campus.

Outstanding Achievement in Graphic and Interactive Design

This award is presented to a graduating senior from the School of Communications in the graphic and interactive design program, who has shown high academic achievement, made significant contributions to the

program, campus life and/or has shown excellent leadership qualities on campus.

Outstanding Achievement in Journalism

This award is presented to a graduating senior from the School of Communications in the journalism program who has shown high academic achievement, made significant contributions to the program, campus life and/or shown excellent leadership qualities on campus.

Outstanding Achievement in Media Studies

This award is presented to a graduating senior from the School of Communications in the media studies program who has shown academic achievement, made significant contributions to the program, campus life and/or shown excellent leadership qualities on campus.

Outstanding Achievement in Public Relations

This award is presented to a graduating senior from the School of Communications in the public relations program, who has shown high academic achievement, made significant contributions to the program, campus life and/or has shown excellent leadership qualities on campus.

Overall Achievement Award

This award is presented to a graduating senior from the School of Communications who has shown high academic achievement, made significant contributions to the program, campus life and/or shown excellent leadership qualities on campus.

School of Computing and Engineering

Outstanding Achievement in Civil Engineering

This award is presented to an outstanding civil engineering senior in recognition of academic excellence and student leadership.

Outstanding Achievement in Computer Science (BA)

This award is presented to an outstanding BA in computer science senior in recognition of academic excellence and student leadership.

Outstanding Achievement in Computer Science (BS)

This award is presented to an outstanding BS in computer science senior in recognition of academic excellence and student leadership.

Outstanding Achievement in Industrial Engineering

This award is presented to an outstanding industrial engineering senior in recognition of academic excellence and student leadership.

Outstanding Achievement in Mechanical Engineering

This award is presented to an outstanding mechanical engineering senior in recognition of academic excellence and student leadership.

Outstanding Achievement in Software Engineering

This award is presented to an outstanding software engineering senior in recognition of academic excellence and student leadership.

School of Health Sciences

Biomedical Sciences Achievement Award

This award is given each year to a senior majoring in biomedical sciences who has demonstrated exceptional academic achievement and who has contributed significantly through service to the Quinnipiac community and to the greater community beyond the university.

Diagnostic Medical Sonography Achievement Award

This award is given each year to a senior majoring in diagnostic medical sonography who has shown exceptional academic achievement and who has contributed significantly to the department.

Health Science Studies BS Degree Completion Program Achievement Award

This award recognizes a graduating senior from the part-time, online, Health Science BS-Completion Program who has shown exceptional academic achievement.

Health Science Studies Student Achievement Award

This award is given each year to a senior majoring in health science studies who has shown exceptional academic achievement and has contributed to the program, school or university.

Medical Microbiology and Immunology Student Achievement Award

This award is presented annually to a senior medical microbiology and immunology major who has demonstrated exceptional academic achievement, and who has contributed significantly to the understanding, promotion and advancement of medical microbiology and immunology.

Occupational Therapy Academic Achievement Award

This award recognizes a graduating senior who has demonstrated outstanding academic work in all aspects of the curriculum (didactic, clinical, laboratory) including distinguished contributions to the occupational therapy department.

Occupational Therapy Service Leadership Award

This award recognizes a graduating senior who has demonstrated distinguished service to the university and community at large while exemplifying the values of the occupational therapy profession.

Ryan J. O'Neil Academic Excellence Award

This award is presented to the senior Entry-Level Master's Physician Assistant (ELMPA) student who has most exemplified leadership, academic excellence, a cooperative attitude and the strength of character of a future health care professional. The award is in memory of Ryan J. O'Neil, a former ELMPA student.

Harold Potts Memorial Physical Therapy Award

The award, given in memory of Harold Potts, former chairman, professor and founder of the physical therapy program at Quinnipiac, is presented from the faculty to an undergraduate third- or fourth-year physical therapy student, who will be entering into the graduate program in the coming year, who has demonstrated academic and leadership excellence, as well as exemplary service to the program, community and has the potential for exemplary service to the profession.

Radiologic Sciences Student Achievement Award

This award is given each year to a graduating senior majoring in radiologic sciences who has shown exceptional academic achievement and who has contributed significantly to the department.

Joseph J. Woods, PhD, Athletic Training/Sports Medicine Outstanding Student Award

This award is given to a senior athletic training student in good academic standing that emulates the legacy Joseph J. Woods, PhD, set forth by putting others first. This student has demonstrated leadership qualities, commitment to community service, good mentorship and outstanding character. This student has made a meaningful impact to the Athletic Training and Sports Medicine Program, the School of Health Sciences or the Quinnipiac community at large.

School of Nursing

Holistic Nursing Practice Award

This award recognizes clinical excellence and exceptional potential in the discipline of nursing. It is presented to the senior nursing student who has demonstrated a strong commitment to the unity of body, mind, emotion and spirit in the delivery of health care.

Keiser Foundation Student Loan Repayment Award

The Keiser Foundation Award is presented after graduation to two senior or graduate nursing students with preference given to United States veterans. The students are chosen based upon financial need, merit and extracurricular commitment in the healthcare field.

Benjamin T. and Juliette Adelle Trewin Award for Academic Excellence in Nursing

This award recognizes academic excellence and exceptional potential in the discipline of nursing. It is presented to the senior nursing student with the highest overall grade point average. The award is supported by the Benjamin T. and Juliette Adelle Trewin Memorial Endowed Fund, which was established for the nursing program by Estelle Trewin Beecher in memory of her parents.

Benjamin T. and Juliette Adelle Trewin Award for Professional Leadership in Nursing

This award recognizes outstanding leadership and exceptional potential in the discipline of nursing. It is presented to the senior nursing student who has made significant contributions to the nursing program and the greater community of nursing. The award is supported by the Benjamin T. and Juliette Adelle Trewin Memorial Endowed Fund, which was established for the nursing program by Estelle Trewin Beecher in memory of her parents.

Student Affairs

Cardinal Joseph Bernardin Distinguished Service Award

This award recognizes a graduating senior who has contributed significantly to the spiritual, religious and moral welfare of the Catholic community at Quinnipiac.

Outstanding Senior Award

This award is given to a graduating senior who has at least a 3.25 GPA, is in good standing with the university and has sustained engagement in a student organization, program or cause on campus or in the community over their Quinnipiac career; evidenced learning through the achievement of multiple personal or professional goals; developed excellent collaboration skills; and demonstrated dedication and impact in the university and surrounding communities.

Outstanding Student Affairs Leadership Award

This award is given to a graduating undergraduate Quinnipiac student who has achieved at least a 3.25 GPA, is in good standing with the university and has demonstrated outstanding leadership qualities; worked closely with university staff on at least one project, program or initiative; exhibited a cooperative attitude; and measurably improved the student experience at Quinnipiac.

H. Pearce Family Community Leadership Award

This award is given to a graduating undergraduate Quinnipiac student who is in good standing with the university and has best exemplified the spirit of volunteer community service during their years at Quinnipiac University.

Philip Troup Achievement Prize

In honor of the first president of Quinnipiac, this prize is given to a graduating senior who has contributed most to the welfare of Quinnipiac through strength of character and qualities of leadership.

Graduate Academic Awards

Academic Awards

Faculty Award for Academic Excellence

These awards recognize students who have distinguished themselves for both outstanding academic achievement and contributions to the program, as determined by the faculty.

- Master of Arts in Cinematic Production Management
- Master of Business Administration
- Master of Science in Accounting
- Master of Science in Business Analytics
- Master of Science in Cybersecurity
- Master of Science in Interactive Media and Communications
- Master of Science in Journalism
- Master of Science in Organizational Leadership
- Master of Science in Public Relations
- Master of Science in Sports Journalism
- Professional Master of Business Administration

Academic Excellence Awards

These awards recognize the outstanding academic achievement of graduate students who have completed their programs of study. In the opinion of the program directors, these students have excelled in all phases (didactic and/or clinical/laboratory) of their graduate education.

- Doctor of Nursing Practice
- Entry-Level Master of Occupational Therapy
- Entry-Level Professional Doctor of Occupational Therapy
- Master of Health Science/Advanced Medical Imaging and Leadership
- Master of Health Science/Biomedical Sciences
- Master of Health Science/Physician Assistant
- Master of Health Science/Radiologist Assistant
- Master of Science in Molecular and Cell Biology
- Master of Science in Nursing
- Master of Social Work

School of Health Sciences

Gaylord Specialty Healthcare Scholarship Award

This award is given by Gaylord Hospital to two third-year graduate physical therapy students. The award recognizes students who have exemplified Gaylord Hospital's five values: integrity, compassion, accountability, respect and excellence. These values are the foundation in helping Gaylord provide and achieve the dedicated caring service that has become the hallmark of its employee philosophy.

Dr. Kenneth V. Kaloustian Award

This award is given to a second-year graduate student in the pathologists' assistant program. This award recognizes outstanding performance in both academic and clinical areas of study. The individual is chosen based on high moral character, leadership qualities and a significant contribution to both the program and to Quinnipiac University.

Post-Professional Doctor of Occupational Therapy Achievement Award

This award is given each year to a doctoral student who has completed their program of study and who has demonstrated academic and leadership excellence and the potential for exemplary service to the profession.

William B. Shaffer Jr. Award

The cardiovascular perfusion program presents this award to a graduate student who has exhibited outstanding performance in both academic and clinical areas of study. The individual is chosen based on high moral character, leadership qualities and a significant contribution to both the program and to Quinnipiac University.

Mark F. Tantorski Memorial Award

In memory of Mark F. Tantorski, a 1980 graduate of the physical therapy program, an award is made to a third-year graduate student in physical therapy who has exhibited academic excellence, high moral character and leadership qualities and, through co-curricular activities in the area of physical therapy, has added to their professional growth.

School of Nursing

Holistic Nursing Practice Award

This award recognizes clinical excellence and exceptional potential in the discipline of nursing. It is presented to nursing students who have demonstrated a strong commitment to the unity of body, mind, emotion and spirit in the delivery of health care.

The Keiser Foundation Student Loan Repayment Award

The Keiser Foundation Award is presented after graduation to two senior or graduate nursing students with preference given to United States veterans. The students are chosen based upon financial need, merit and extracurricular commitment in the healthcare field.

Undergraduate Honor Societies

College of Arts and Sciences

Alpha Kappa Delta

Alpha Kappa Delta is an international sociology honor society designed to stimulate scholarship and promote the scientific study of society.

Alpha Psi Omega

Alpha Psi Omega recognizes excellence in all areas of theater study and production. Membership is based on cumulative grade point average and achievement during the university main stage theater production season in the areas of performance, technical production and theater administration.

Lambda Epsilon Chi

Lambda Epsilon Chi is the national honor society for Law in Society students and recognizes those students who have demonstrated superior academic performance in a legal studies program.

Phi Alpha Theta History Honors Society

The Quinnipiac chapter runs events on campus for students interested in history. The chapter sponsors trips to historical sites and museums as well as regional and national history conferences. Students are eligible to join if they have Quinnipiac credit for at least four college-level history courses. Three of the history courses must be completed at QU. Students need a 3.0 GPA overall and a 3.1 in history courses.

Phi Sigma Biological Honors Society

The Phi Sigma Biological Sciences Honor Society is a national honor society that promotes research and academic excellence in the biological

sciences. Undergraduate students are invited to become members if they have achieved junior status, are in the top 30 percent of their class and are actively engaged in, or have participated in research at Quinnipiac University under the direct supervision of a Quinnipiac faculty member in an area related to the biological sciences.

Phi Sigma Tau

Phi Sigma Tau is the International Honor Society in Philosophy. Students in all schools of the university who have taken two or more philosophy courses and maintained a GPA of 3.33 or higher in both their philosophy courses and their overall GPA are eligible for induction into Phi Sigma Tau.

Pi Sigma Alpha

Pi Sigma Alpha, the National Political Science Honor Society, is the only honor society for college students of political science and government in the U.S. The political science program annually nominates juniors and seniors who have excelled both in political science and their overall coursework. Its purpose is to stimulate scholarship and intelligent interest in political science, and to honor political science majors and minors who display leadership and academic achievement.

Psi Chi

Psi Chi is the international psychology honor society, founded for the purposes of recognizing and promoting excellence in the science and application of psychology.

Sigma Delta Pi

Sigma Delta Pi, the national honor society in Spanish, honors students who attain excellence in the study of the Spanish language and the literatures and cultures of Spanish-speaking people. To be considered for membership in Sigma Delta Pi, a student must: be a junior, have a GPA of 3.2 overall, maintain a GPA of 3.2 in all Spanish courses, and have completed 18 credits in Spanish at the 200 level or above, including two semesters of advanced Spanish language courses as well as an advanced course in Hispanic literature or culture.

Sigma Phi Omega

Sigma Phi Omega, the national academic honor society in gerontology, recognizes the excellence of those who study gerontology/aging. The society seeks to promote scholarship, professionalism, friendship and services to older persons, and to recognize exemplary achievement in gerontology/aging studies and related fields.

Sigma Tau Delta International English Honor Society

Sigma Tau Delta's central purpose is to confer distinction upon students of the English language and literature in undergraduate, graduate and professional studies. Our members have the opportunity to be recognized for their outstanding achievements, enrich their education and advance their careers.

School of Business

Beta Alpha Psi

Beta Alpha Psi is an honorary organization for financial information students and professionals. Membership is open to accounting majors and is based on cumulative grade point average and achievement in accounting courses.

Beta Gamma Sigma

Beta Gamma Sigma is the National Business Honor Society. Only schools of business accredited by AACSB International—The Association to Advance Collegiate Schools of Business, may have a chapter of this

society. Membership is by invitation only and invitees must be in the top 10 percent of their class.

Financial Management Association International—National Honor Society

The FMA National Honor Society recognizes scholastic achievement of students who have demonstrated superior scholarship. Individuals accepted for membership have the distinction of belonging to the only honorary society that specifically recognizes the achievement of finance majors who demonstrate expertise in finance and financial decision making.

School of Communications

Lambda Pi Eta

Lambda Pi Eta is the National Communication Association's official honor society. Quinnipiac's Tau Delta chapter seeks to recognize, foster and reward outstanding scholastic achievement; stimulate interest in the field of communication; promote and encourage professional development; provide an opportunity to discuss and exchange ideas in the field of communication; promote closer relationships between faculty and students; and explore options for graduate education in communication studies.

School of Computing and Engineering

eta Pi

eta Pi is the School of Computing and Engineering's honor society for engineering majors. Its goal is to recognize those who have conferred honor upon their alma mater by distinguished scholarship and exemplary character as students in engineering or by their attainments as alumni in the field of engineering. Student membership is based on scholastic performance and exemplary character.

School of Health Sciences

Alpha Eta Honor Society

Alpha Eta is the national honor society that recognizes scholarship and academic achievement of health professions students enrolled in undergraduate and graduate programs.

Pi Theta Epsilon

Pi Theta Epsilon is a national honor society that recognizes outstanding scholarship and service to the occupational therapy profession.

School of Nursing

Sigma Theta Tau International Honor Society of Nursing

Tau Rho is the Quinnipiac University chapter of Sigma Theta Tau International Honor Society of Nursing. The mission of this honor society is to advance world health and celebrate nursing excellence in scholarship, leadership and service. Membership is by invitation to undergraduate and graduate students who demonstrate excellence in scholarship and academics.

Graduate Honor Societies

College of Arts and Sciences

Phi Sigma Biological Honors Society

Phi Sigma Biological Sciences Honor Society is a national honor society that promotes research and academic excellence in the biological sciences. Graduate students are invited to become members if they are in the top 30 percent of their class and are actively engaged in, or have participated in research at Quinnipiac University under the direct

supervision of a Quinnipiac faculty member in an area related to the biological sciences.

School of Business

Beta Gamma Sigma

Beta Gamma Sigma is the National Business Honor Society. Only schools of business that are accredited by AACSB International - The Association to Advance Collegiate Schools of Business, may have a chapter of this society. Membership is by invitation only and invitees must be in the top 20 percent of their class.

School of Health Sciences

Alpha Eta Honor Society

Alpha Eta is the national honor society that recognizes scholarship and academic achievement of health professions students enrolled in undergraduate and graduate programs.

School of Nursing

Sigma Theta Tau International Honor Society of Nursing

Tau Rho is the Quinnipiac University chapter of Sigma Theta Tau International Honor Society of Nursing. The mission of this honor society is to advance world health and celebrate nursing excellence in scholarship, leadership and service. Membership is by invitation to undergraduate and graduate students who demonstrate excellence in scholarship and academics.

About Quinnipiac University	16	Advanced Medical Imaging and Leadership	790
Academic Awards and Honor Societies	937	Advanced Standing Master of Social Work	813
Academic Calendar	16	Advanced Standing/Placement	22
Academic Calendar	582	Albert Schweitzer Institute	25
Academic Calendar	641	Animals on Campus	73
Academic Calendar	582	Appendix A	637
Academic Calendar	641	Appendix A	637
Academic Good Standing (General)	60	Appendix B	637
Academic Good Standing (Program Level)	62	Appendix B	637
Academic Honors	38	Archived Catalogs	943
Academic Integrity	62	Athletics	36
Academic Outcomes Assessment	38	B	
Academic Regulations	617	Bachelor of Arts in Advertising and Integrated Communications	403
Academic Regulations	617	Bachelor of Arts in Communications	397
Academics	38	Bachelor of Arts in Computer Science	426
Accelerated BSN Program for Second Degree Students	658	Bachelor of Arts in Criminal Justice	217
Accelerated Computing and Engineering Dual-Degree Bachelor's/Master's (3+1)	440	Bachelor of Arts in English	197
Accelerated Dual-Degree BA/MBA in Theater (3+1)	298	Bachelor of Arts in Environmental Studies (Co-Major)	149
Accelerated Dual-Degree BA/MBA in Theater (3+1)	298	Bachelor of Arts in Film, Television and Media Arts	382
Accelerated Dual-Degree Bachelor's/JD (3+3) Program	600	Bachelor of Arts in Game Design and Development	295
Accelerated Dual-Degree Bachelor's/MSW (3+2)	281	Bachelor of Arts in Gerontology	278
Accelerated Dual-Degree Bachelor's/MSW (3+2)	281	Bachelor of Arts in Graphic and Interactive Design	387
Accelerated Dual-Degree BS in Biochemistry/MS in Molecular & Cell Biology (3+1)	173	Bachelor of Arts in History	207
Accelerated Dual-Degree BS in Economics/MBA (3+1)	181	Bachelor of Arts in Interdisciplinary Studies	150
Accelerated Dual-Degree BS in Economics/MS in Accounting (3+1)	182	Bachelor of Arts in Journalism	392
Accelerated Dual-Degree BS in Economics/MS in Business Analytics (3+1)	184	Bachelor of Arts in Law in Society	219
Accelerated Dual-Degree BS in Economics/MS in Journalism (3+1)	185	Bachelor of Arts in Mathematics	227
Accelerated Dual-Degree BS in Health Science Studies/Master of Social Work (3+2)	487	Bachelor of Arts in Philosophy	252
Accelerated Dual-Degree BS/MBA (3+1)	702	Bachelor of Arts in Political Science	253
Accelerated Dual-Degree BS/MHS in Advanced Medical Imaging and Leadership (3+1)	498	Bachelor of Arts in Professional Studies	672
Accelerated Dual-Degree BS/MS in Accounting (3+1)	706	Bachelor of Arts in Public Relations	404
Accelerated Dual-Degree BS/MS in Business Analytics (3+1)	710	Bachelor of Arts in Sociology	279
Accelerated Dual-Degree BS/MS in Molecular and Cell Biology (3+1)	165	Bachelor of Arts in Spanish Language and Cultures	238
Accelerated Dual-Degree BS/MS in Molecular and Cell Biology (3+1)	165	Bachelor of Arts in Sustainability and Environmental Policy	150
Accreditations and Professional Memberships	9	Bachelor of Arts in Theater	296
Admissions	20	Bachelor of Business Administration	309
		Bachelor of Fine Arts in Film, Television and Media Arts	383
		Bachelor of Science in Accounting	313
		Bachelor of Science in Applied Business	342
		Bachelor of Science in Athletic Training	569
		Bachelor of Science in Behavioral Neuroscience	266
		Bachelor of Science in Biochemistry	175

Bachelor of Science in Biology	161	CARE	27
Bachelor of Science in Biomedical Marketing	352	Career Development	27
Bachelor of Science in Biomedical Sciences	471	Carl Hansen Student Center	25
Bachelor of Science in Business Analytics	318	Center for Excellence in Teaching and Service to Students	39
Bachelor of Science in Chemistry	177	Center for Interprofessional Healthcare Education	39
Bachelor of Science in Civil Engineering	428	Center for Teaching and Learning	40
Bachelor of Science in Computer Information Systems	319	Certificate in Lean Six Sigma – Green Belt	439
Bachelor of Science in Computer Information Systems and Accounting	321	Certificate in Six Sigma – Black Belt	439
Bachelor of Science in Computer Science	430	Certificate in Social and Emotional Learning and School Climate	454
Bachelor of Science in Data Science	228	Certificate in Social and Emotional Learning and School Climate	454
Bachelor of Science in Diagnostic Medical Sonography	502	Civil Advocacy and Dispute Resolution	604
Bachelor of Science in Economics	187	Civil Advocacy and Dispute Resolution	604
Bachelor of Science in Entrepreneurship and Innovation	327	Class Attendance	84
Bachelor of Science in Environmental Science	151	Clinics and Externship Courses	615
Bachelor of Science in Finance	336	Clinics and Externship Courses	615
Bachelor of Science in Health Science Studies	474	Clubs and Organizations	28
Bachelor of Science in Health Science Studies	672	Collaborative for Interdisciplinary/Integrative Studies	143
Bachelor of Science in Human Resource Management	344	College of Arts and Sciences	139
Bachelor of Science in Industrial Engineering	432	College of Arts and Sciences	679
Bachelor of Science in International Business	329	College of Arts and Sciences Curriculum	143
Bachelor of Science in Marketing	353	Communications Accelerated Dual-Degree (3+1) programs	407
Bachelor of Science in Mechanical Engineering	434	Communications Dual-Degree (4+1) programs	408
Bachelor of Science in Medical Microbiology and Immunology	484	Community Engagement	28
Bachelor of Science in Nursing	662	Conferral of Honorary Degrees	84
Bachelor of Science in Psychology	263	Counseling Services	28
Bachelor of Science in Radiologic Sciences	507	Course and Credit Requirements	85
Bachelor of Science in Software Engineering	436	COVID-19 Assumption of Risk	85
Bachelor of Science in Supply Chain Management	345	Criminal Law and Advocacy	605
Bachelor of Science in Talent Management	347	Criminal Law and Advocacy	605
Bachelor's Degree Programs	38	Cultural and Global Engagement	29
Background Checks	78		
Badge in Enterprise Cybersecurity Risk Management in Healthcare	737	D	
Badge in Ethical Hacking and Penetration Testing	737	Department of Accounting	310
Badge in Hands-On HIPAA Compliance Risk Management	737	Department of Biological Sciences	152
Badge in Hands-On HIPAA Security Risk Analysis and Risk Management	737	Department of Biomedical Sciences	470
Biomedical Sciences One Year Option	795	Department of Chemistry and Physical Sciences	169
Biomedical Sciences Program	792	Department of Computer Information Systems	315
		Department of Diagnostic Imaging	498
		Department of Economics	179
		Department of Engineering	410
C		Department of English	189
Campus Life	25	Department of Entrepreneurship, International Business and Strategy .	323
Campus Resources	36	Department of Film, Television and Media Arts	378
Cardiovascular Perfusion Program	796		

Department of Finance	333	Dual-Degree BS in Health Science Studies/Doctor of Physical Therapy (3+3)	558
Department of History	200	Dual-Degree BS in Health Science Studies/Doctor of Physical Therapy (4+3)	559
Department of Interactive Media and Design	385	Dual-Degree BS in Health Science Studies/MHS Physician Assistant ..	566
Department of Journalism	388	Dual-Degree BS/MBA (4+1)	704
Department of Justice and Law	210	Dual-Degree BS/MHS Biomedical Sciences to Pathologists' Assistant (4+2)	489
Department of Management	338	Dual-Degree BS/MHS in Biomedical Sciences (4+1)	491
Department of Marketing	349	Dual-Degree BS/MOT	529
Department of Mathematics and Statistics	222	Dual-Degree BS/MS in Molecular and Cell Biology (4+1)	166
Department of Media Studies	395	Dual-Degree BS/MS in Molecular and Cell Biology (4+1)	166
Department of Modern Languages, Literatures and Cultures	230	Dual-Degree BS/OTD	537
Department of Occupational Therapy	512	Dual-Degree JD/MBA	603
Department of Philosophy and Political Science	241	Dual-Degree JD/MBA	705
Department of Physical Therapy	556	Dual-Degree JD/MBA	603
Department of Physician Assistant Studies	561	Dual-Degree JD/MELP	603
Department of Psychology	258	Dual-Degree JD/MELP	603
Department of Rehabilitation, Health and Wellness	569	Dual-Degree JD/MELP	603
Department of Social Work	577	Dual-Degree JD/MERL	603
Department of Sociology and Anthropology	269	Dual-Degree JD/MERL	603
Department of Strategic Communication	399	Dual-Degree JD/MFALP	603
Department of Visual and Performing Arts	285	Dual-Degree JD/MFALP	603
Departments	40	Dual-Degree JD/MSW	603
Disabilities	86	Dual-Degree JD/MSW	603
Discrimination, Discriminatory Harassment and Bias-Motivated Acts and Behavior	105	E	
Doctor of Nursing Practice (DNP)	898	Entrepreneurship and Innovation Interdisciplinary Certificate	331
Doctor of Physical Therapy (DPT)	799	Entry-Level Dual-Degree Bachelor of Science to Doctor of Physical Therapy	557
Double-Degree BS in Industrial Engineering and BS in Health Science Studies	482	Entry-Level Master's Physician Assistant	565
Drug Screen Policy	100	Essential Learning Outcomes	41
Dual-Degree BA/MAT or BS/MAT in Elementary Education (4+1)	684	Experiential Learning Certificates	41
Dual-Degree BA/MAT or BS/MAT in Secondary Education (4+1)	687	F	
Dual-Degree BA/MBA (4+1)	689	Family Law	607
Dual-Degree BA/MS or BS/MS in Cybersecurity (4+1)	440	Family Law	607
