2022–23 Catalog

Quinnipiac University's online catalog provides descriptions of courses, majors and minors offered by academic departments and programs, as well as other university-wide information such as the academic calendar, academic regulations, facilities, financial aid and tuition costs. Degree, major and minor requirements specified in the 2022–23 Catalog are valid for the Class of 2026. Other classes should follow the degree, major and minor requirements specified in the catalog for the year in which they entered Quinnipiac University. For additional questions, please contact the dean's office for the associated school.

No section of this catalog may be copied or reproduced without the permission of the Office of Marketing and Communications, Quinnipiac University.

Admission requirements, fees, rules and regulations and academic programs are updated in official bulletins of the university.

This catalog is provided to students and applicants for their general guidance only. It does not constitute a contract, either express or implied. Quinnipiac reserves the right to change any provision of this catalog at any time and for any reason.

Please understand that sometimes Quinnipiac may have to change the academic calendar, policies, fees, curricula, course schedule or modality, or any other matter addressed in this catalog without prior notice or may be required to cancel programs and courses for reasons beyond our control. For instance, a faculty member may not be available due to sickness or death, or we may not be able to offer or be forced to change the format in which courses or services are provided because of governmental orders, public health concerns, weather conditions, power failures, fire, strikes by employees, natural disasters, or accidents. These examples are not meant to be exhaustive or to describe all of the types of disruptions that could possibly occur.

If Quinnipiac determines, in its sole discretion, that any such changes or cancellations are necessary, it will exert reasonable efforts, when it judges them to be appropriate, to provide comparable services, facilities, or performance. However, Quinnipiac's inability or failure to do so shall not subject it to liability or to any obligation to provide refunds, credit, or other compensation, in whole or in part, for any tuition or fees paid. In any such case, Quinnipiac will give whatever notice is reasonably practical.

Sustainability Initiatives

We, as members of the Quinnipiac Community, strongly believe it is our responsibility to work toward a more environmentally sustainable society. The university utilizes renewable electricity and single-stream recycling. Campus buildings feature energy-efficient heating and cooling units, energy-efficient lighting fixtures, Green Guard carpeting and windows with energy-efficient thermal glazing. Whenever possible, environmentally

friendly paper and supplies are used. In fact, the initiative to move to an online catalog was approved in part because of the savings in paper for printed copies.

STATEMENTS ON NONDISCRIMINATION AND COMPLIANCE

Quinnipiac University has a strong commitment to the principles and practices of diversity throughout the university community. Women, members of minority groups and individuals with disabilities are encouraged to consider and apply for admission. Quinnipiac does not discriminate on the basis of race, color, creed, gender identity or expression, age, sexual orientation, national and ethnic origin, or disability status in the administration of its educational and admissions policies, employment policies, scholarship and loan programs, athletic programs or other university-administered programs.

Please see the Discrimination, Harassment and Bias-Motivated Acts and Behavior Policy (p. 105) for more information.

Quinnipiac is in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, and inquiries should be directed to the Learning Commons or to the Office of Human Resources. Quinnipiac complies with the Student Right to Know and Campus Security Act (PL 103-542) and those reports are available from the Office of Public Affairs. Quinnipiac maintains all federal and state requirements for a drug-free campus and workplace; information on student drug and alcohol programs is published in the Student Handbook (<http://catalog.qu.edu/handbooks/undergraduate/university-policies/prevention-alcohol-abuse-drug-use/>) and employee information is distributed through the Office of Human Resources. Graduation reports are available upon request from the Offices of Admissions and Registrar. Reports on athletic programs are available from the Department of Athletics and Recreation.

Parties may submit reports of discrimination, harassment and bias-motivated acts through the online reporting form.

Title IX Policy Against Gender-Based Discrimination and Sexual Misconduct

Title IX of the Education Amendments of 1972 prohibits discrimination based on sex in educational programs and activities that receive federal financial assistance. To ensure compliance with Title IX and other federal and state laws, Quinnipiac University has developed policies that prohibit discrimination and misconduct on the basis of gender, such as sexual misconduct, sexual violence, sexual harassment, intimate partner violence, stalking and any other gender-based harassment or misconduct.

Quinnipiac University is committed to providing an environment free from all forms of gender or sex discrimination and sexual misconduct. Members of the university community, guests and visitors have a right to be free from sexual harassment, violence and of gender-based discrimination and harassment. The policy is intended to define community standards and to outline the investigation and grievance process when those standards are violated.

These policies apply regardless of the complainant's or respondent's sexual orientation, sex, gender identity or expression, age, race, nationality, religion or ability. Harassment or discrimination based upon an individual's sexual orientation may be considered gender-based and be subject to the policy. Also, prohibitions against discrimination and

harassment do not extend to statements or written materials that are germane to the classroom or academic course of study.

Title IX inquiries may be referred to:

Dennis Kwarteng

Title IX Coordinator

275 Mount Carmel Avenue, CCE-180

Hamden, CT 06518

dennis.kwarteng@qu.edu

203-582-7327

Parties may submit reports of discrimination and misconduct on the basis of gender, including sexual misconduct, through the online reporting form.

Please see the Title IX (p. 121) page for the full policy.

ACCREDITATIONS AND PROFESSIONAL MEMBERSHIPS

Quinnipiac University is accredited by the New England Commission of Higher Education (formerly the Commission on Institutions of Higher Education of the New England Association of Schools and Colleges, Inc.).

Accreditation of an institution of higher education by the commission indicates that it meets or exceeds criteria for the assessment of institutional quality periodically applied through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the commission is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution. Inquiries regarding the accreditation status by the commission should be directed to the administrative staff of the institution. For comments and complaints, individuals may contact:

New England Commission of Higher Education
301 Edgewater Place, Suite 210
Wakefield, MA 01880
781-425 7785
Email: info@neche.org
<https://www.neche.org/for-the-public/comments-complaints/>

Quinnipiac also is accredited by the Office of Higher Education of the State of Connecticut and is authorized by the General Assembly of the state to confer such degrees and grant such diplomas as are authorized by the office. Contact information for filing a complaint with the Office of Higher Education:

Office of Higher Education
450 Columbus Boulevard, Suite 510
Hartford, CT 06103-1841
800-947-1800
<http://www.ctohe.org/studentcomplaints.shtml> (<http://www.ctohe.org/StudentComplaints.shtml/>)

The State Bar Examining Committee has approved the undergraduate programs of Quinnipiac for pre-law education.

Specific school accreditations are listed below.

College of Arts and Sciences

The legal studies minor/certificate has been approved by the American Bar Association as a paralegal education program.

School of Business

Quinnipiac's undergraduate and graduate business and accounting programs are accredited by AACSB International—the Association to Advance Collegiate Schools of Business. As a school of business with AACSB-accredited business and accounting programs, Quinnipiac meets

or exceeds established standards, as determined by periodic AACSB peer group review. The AACSB quality standards relate to curriculum, faculty resources, admission, degree requirements, library and computer facilities, financial resources and intellectual climate.

School of Communications

The Bachelor of Arts and Master of Science in Public Relations programs are certified by the Certification in Education for Public Relations (CEPR) through the Public Relations Society of America (PRSA).

School of Computing and Engineering

The BS in civil engineering, industrial engineering, mechanical engineering, software engineering and computer science programs are accredited by the Engineering Accreditation Commission of ABET, [abet.org](http://www.abet.org) (<http://www.abet.org>).

School of Education

The master of arts in teaching program and the educational leadership program are fully accredited by the Council for the Accreditation of Educator Preparation (CAEP) and the Connecticut Department of Education. The U.S. Department of Education recognizes CAEP as a specialized accrediting body for schools, colleges and departments of education.

School of Health Sciences

All programs in the Schools of Health Sciences have been approved by appropriate state and national agencies or are in the process of accreditation.

- The athletic training program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).
- The cardiovascular perfusion program is accredited by the Commission on Accreditation of Allied Health Education Programs.
- The social work program is fully accredited by the Council on Social Work Education (CSWE).
- The dual-degree bachelor of science/master of occupational therapy (BS/MOT) program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE). The entry-level doctor of occupational therapy (E-OTD) program is granted Candidacy Status by ACOTE. The E-OTD program must undergo a pre-accreditation review, complete an on-site evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT).
- The pathologists' assistant program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).
- The physical therapy program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE).
- The physician assistant graduate program is accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA).
- The radiologic sciences bachelor's degree program is accredited by the Joint Review Committee on Education in Radiologic Technology.
- The radiologist assistant program is formally recognized by the American Registry of Radiologic Technologists (ARRT).

School of Law

Quinnipiac University School of Law is fully approved by the Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association.

School of Medicine

The Frank H. Netter MD School of Medicine is accredited by the Liaison Committee on Medical Education. The school is also authorized by the state of Connecticut to award the MD degree. The Frank H. Netter MD School of Medicine is a member of the American Association of Medical Colleges.

School of Nursing

- The bachelor's degree program in nursing at Quinnipiac University is accredited by the Commission on Collegiate Nursing Education (ccneaccreditation.org (<https://ccneaccreditation.org>)).
- The master's degree program in nursing at Quinnipiac University is accredited by the Commission on Collegiate Nursing Education (ccneaccreditation.org (<https://ccneaccreditation.org>)).
- The Doctor of Nursing Practice program at Quinnipiac University is accredited by the Commission on Collegiate Nursing Education (ccneaccreditation.org (<https://ccneaccreditation.org>)).
- The doctor of nursing practice program for nurse anesthesia is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs (coacrna.org (<https://coacrna.org>)).

Both undergraduate and graduate nursing programs in Quinnipiac University's School of Nursing are endorsed by the American Holistic Nurses Credentialing Corporation (ahncc.org (<https://ahncc.org>)).

- The Center for Medicine, Nursing and Health Sciences Simulation Program (Area of Teaching/Education) is accredited by the Society for Simulation in Healthcare.

Quinnipiac University has been approved to participate in the National Council for State Authorization Reciprocity Agreements (SARA). SARA is an agreement among its member states, districts and U.S. territories that establishes comparable national standards for interstate offering of postsecondary distance-education courses and programs. The Connecticut Office of Higher Education is the portal agency for administration of SARA in Connecticut and is responsible for the resolution of out-of-state students' complaints against SARA institutions located in Connecticut.

Information about how to file a complaint with the Office of Higher Education is available on this website: [ctohe.org/SARA/Default.shtml](https://www.ctohe.org/SARA/Default.shtml) (<https://www.ctohe.org/SARA/Default.shtml>)

All correspondence, including institutional applications and student complaints, should be sent via email to ctsara@ctohe.org or via post to the following address:

SARA Coordinator
Office of Higher Education
450 Columbus Boulevard, Suite 510
Hartford, CT 06103-1841

Students may review information on the various accrediting agencies and accrediting reports by contacting the Office of Academic Innovation and Effectiveness.

PROFESSIONAL LICENSURE AND CERTIFICATION DISCLOSURES

Quinnipiac University offers a number of programs leading to professional licensure and/or certification. Effective July 1, 2020, U.S. Code of Federal Regulations 34 CFR 668.43 requires disclosures for all programs leading to a license or certification. These disclosures indicate whether the program meets licensure requirements, does not meet licensure requirements or has not yet been determined for each state.¹

Prospective and current students are advised to refer to the information below about state professional licensing and certification requirements and potential consequences of relocating to a different state at any time after admission to a degree program. Please note that the completion of a Quinnipiac University degree does not guarantee employment or eligibility to receive a license or credential in every state or location in that profession. In many cases, there are state laws and there may be additional requirements (e.g., background checks and/or fingerprinting, professional exams, years of supervised professional work experience, fee requirements, etc.). The state professional licensing boards make the ultimate decision as to whether or not an individual will be eligible to apply for licensure/certification based on the rules and regulations in place at the time the individual submits their application for licensure.

Relocation while enrolled in a program leading to professional licensure may impact students' ability to remain in the program, meet state licensing requirements, and/or receive financial aid funding. Students who are considering relocation are advised to first contact their academic program director and the student financial aid office to discuss the potential impact of relocation. Students are advised to also contact the state licensing agency for the state to which they are relocating, to determine new licensing requirements they may need to meet.

Programs for Licensure and Certification Disclosure

Accounting

Quinnipiac's Master of Science in Accounting program prepares graduates for the Uniform Certified Public Accountant (CPA) Examination and provides students with the appropriate coursework to meet the 150-hour education requirement for CPA certification in all states. The successful completion of the Uniform CPA Exam is a requirement for CPA licensure in all 55 jurisdictions (all 50 states, District of Columbia, Guam, Puerto Rico, Northern Mariana Islands and Virgin Islands). Access contact information on state accountancy boards (<https://us.aicpa.org/research/externallinks/stateboardsaccountancylinks/>).

Cardiovascular Perfusion

Quinnipiac's cardiovascular perfusion program is accredited through the Accreditation Committee – Perfusion Education (AC-PE) <http://www.ac-pe.org/>) by the Committee on Accreditation of Allied Health Education Programs (CAAHEP) <https://www.caahep.org/>) The program prepares students for certification in all states and territories of the U.S. including Washington, D.C., Guam, Puerto Rico and the U.S. Virgin Islands. To become a certified clinical perfusionist (CCP), graduates must pass the Perfusion Basic Sciences Exam (PBSE) and the Clinical Applications in Perfusion Exam (CAPE). Graduates are eligible to take the PBSE when they have completed

at least 75 procedures as a primary perfusionist and have graduated from the program. To be eligible for the CAPE, graduates must perform an additional 50 procedures after their graduation date, usually as an employee of a hospital. For more information on the certification exams: Visit American Board of Cardiovascular Perfusion website (<http://www.abcp.org/>)

Diagnostic Medical Sonography

Upon completion of their Bachelor of Science in Diagnostic Medical Sonography, students are eligible to apply for the American Registry of Diagnostic Medical Sonography certification. Graduates may take the Sonography Physics and Instrumentation examination in addition to the following ARDMS specialty examinations: abdomen and small parts, breast, musculoskeletal, vascular technology and obstetrics/gynecology. The BS in Diagnostic Medical Sonography meets the professional licensing requirements of states where licensure is required. Currently, Nevada, New Hampshire, New Mexico, North Dakota, and Oregon are the only states with approved legislation mandating the licensure of sonographers. For more information, visit the website (<https://www.sdms.org/advocacy/state-licensure/>) of the Society of Diagnostic Medical Sonography.

Education

Becoming a licensed teacher requires the teacher candidates meet the regulatory requirements of the state in which the teaching license is sought. While Quinnipiac University's School of Education, being located in Connecticut, has developed its licensure programs to fully meet the State of Connecticut's certification requirements, many of our teacher candidate students are hired out of state. While it is not possible for any one program to meet the extent, variation, and revisionary nature of the criteria for licensure in all 50 states, the School of Education's certification officer and faculty work with individual students as they progress through the program both to be aware of various state regulations and to support each student to successfully be licensed in the state they choose. Advising students as to the requirements that may need to be met, providing letters of support and transcript analyses to state departments outside of Connecticut, and proactively helping teacher candidates has successfully allowed our teacher candidates to understand and meet requirements that differ from the Connecticut state statutes and regulations for licensure. See information for out-of-state students from external licensing boards. (<https://www.nasdtc.net/page/InterstateAgreements/>)

Engineering

The curriculum of Quinnipiac's four engineering programs—BS Civil Engineering, BS Industrial Engineering, BS Mechanical Engineering and BS Software Engineering—meets the educational requirements for Professional Engineering (PE) licensure in all 50 states, the District of Columbia, Guam, Puerto Rico, and the U.S. Virgin Islands. View contact information for all state licensing boards at The National Society of Professional Engineers (NSPE) website (<https://www.nspe.org/resources/licensure/licensing-boards/>).

Law

Quinnipiac University School of Law is approved by the Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association, 321 North Clark Street, Chicago, IL 60654, 312-988-6738. All 50 states recognize graduation from an ABA-approved law school as meeting the legal education requirements for eligibility to sit for the bar examination. Candidates may also sit for the bar in Washington DC, Puerto Rico, and the U.S. Virgin Islands.

Medicine

The Quinnipiac University Frank H. Netter MD School of Medicine Program is accredited by the Liaison Committee on Medical Education (LCME) and thereby meets the academic requirements for state medical licensure in all 50 states, the District of Columbia, Guam, Puerto Rico and the U.S. Virgin Islands.

Nursing

The Bachelor of Science in Nursing program, Master of Science in Nursing program, and Doctor of Nursing Practice program at Quinnipiac University are accredited by the Commission on Collegiate Nursing Education (aacnursing.org/CCNE (<https://www.aacnursing.org/CCNE/>)). The Doctor of Nursing Practice (DNP) program for Nurse Anesthesia is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs (COA).

The Quinnipiac BS in Nursing Program meets the State of Connecticut education requirements for a Registered Nurse License. Quinnipiac has not determined if the program meets the state education requirements in any other State, US Territory, or District of Columbia. Applicants should investigate requirements prior to accepting an offer of admission to Quinnipiac for the BS in Nursing program. The licensure boards in each state establish their own requirements for licensure or certification for their state. The state professional licensing boards will make decisions on whether or not an individual is eligible for license based on regulation in place at time of application for licensure. Please see the National Council State Board of Nursing website for more guidance (<https://www.ncsbn.org/nurse-licensure-guidance.htm>) on Registered Nurse Licensure as well as the licensure requirements and contact information (<https://www.ncsbn.org/14730.htm>) for each state/jurisdiction.

The Quinnipiac MSN program with Family Nurse Practitioner and Adult-Gerontology Nurse Practitioner specializations qualify the graduate to sit for the national certification exams offered through AANP or ANCC. The conferred degree, plus national certification, will allow the graduate to apply for APRN (advanced practice nursing) licensure in all 50 states. View state-specific information about the advanced practice nursing licensing requirements (<https://www.nursinglicensure.org/articles/nurse-practitioner-license/>).

The Quinnipiac DNP Nurse Anesthesia program prepares students to become Certified Registered Nurse Anesthetists (CRNAs). CRNAs are licensed to practice in all 50 states and the District of Columbia. In many states, CRNAs are classified as a type of advanced practice registered nurse and must be licensed by the relevant state licensing authority. View state-specific information about the advanced practice nursing licensing requirements (<https://www.nursinglicensure.org/articles/nurse-practitioner-license/>).

Occupational Therapy

The Entry-Level Professional Doctor of Occupational Therapy (OTD) program at Quinnipiac University has applied for accreditation and has been granted Candidacy Status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located 6116 Executive Boulevard, Suite 200 North Bethesda, MD 20852-4929. ACOTE's contact information is as follows: phone: 301-652-6611 (ext. 2914); fax: 301-652-1417; email: accred@aota.org; website: acoteonline.org (<https://acoteonline.org/>)

As a program with Candidacy Status, Quinnipiac University may admit students into the Entry-Level OTD according to the approved timeline and may proceed to the Preaccreditation Review step of the accreditation

process. The program must have a preaccreditation review, complete an on-site evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). All states and jurisdictions require graduation from an ACOTE accredited occupational therapy program and passing the NBCOT exam is a requirement for state licensure. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

The American Occupational Therapy Association (AOTA) website (<https://www.aota.org/career/state-licensure/>) provides links to state regulations regarding qualifications and licensure, including continuing competency requirements, scope of practice by state and a list of the states that offer#temporary licensure#to graduates from ACOTE-accredited programs who have not yet passed the NBCOT exam.

Pathologists' Assistant

Quinnipiac University is a charter member of the American Association of Pathologists' Assistants (AAPA) and is a founding member of the Association of Pathologists' Assistant Training Programs. This MHS Pathologists' Assistant program is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) meeting all established didactic and clinical curriculum standards established. As such, this program meets all requirements for U.S. and Canadian certification/licensure for graduates through the American Society for Clinical Pathology (ASCP) which is fully recognized by all U.S. States and Canada.

Physical Therapy

The Physical Therapy program at Quinnipiac University has determined that its curriculum meets the state educational requirements for licensure or certification in all states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands secondary to its accreditation by the Commission on Accreditation in Physical Therapy Education, based on the following: CAPTE accreditation of a physical therapist program satisfies state educational requirements in all states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. Thus, students graduating from the Quinnipiac University CAPTE-accredited physical therapist education program are eligible to take the National Physical Therapy Examination and apply for licensure in all states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. For more information regarding state qualifications and licensure requirements, refer to the Federation of State Boards of Physical Therapy website (<https://www.fsbpt.org/>).

Physician Assistant

Quinnipiac's MHS Physician Assistant program is accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA) and prepares students for the National Certifying Exam (PANCE). PA's earn national certification from the National Commission on Certification of Physician Assistants (NCCPA). All 50 states require graduation from an accredited program and/or certification following successful completion of the PANCE as conditions for initial physician assistant licensure. By virtue of ARC-PA accreditation, Quinnipiac's physician assistant programs offers the curriculum necessary for licensure in all 50 states. View a complete summary of initial licensure requirements in all 50 states (<https://www.aapa.org/advocacy-central/state-advocacy/state-licensing/>). For information on the National Certification of PAs, visit the NCCPA website (<https://www.nccpa.net/>). For contact information for all states' licensing boards,

visit the AAPA website (<https://www.aapa.org/advocacy-central/state-advocacy/state-licensing/><https://www.aapa.org/advocacy-central/state-advocacy/state-licensing/>).

Radiologic Sciences

The Radiologic Sciences program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT) and meets all standards required for certification by the American Registry of Radiologic Technologists (ARRT) and to apply for initial licensure in all states. Some states require additional state sponsored training as part of the initial license application. Those requirements are the sole responsibility of the licensing state. Information regarding specific requirements of each state can be accessed at the ARRT website as well as the website of the American Society of Radiologic Technologists (ASRT).

Radiologist Assistant

The Radiologist Assistant program is formally recognized by the American Registry of Radiologic Technologists (ARRT). Students who graduate from the program will meet ARRT's educational eligibility requirement for certification and registration as Registered Radiologist Assistants. Currently there are different licensure requirements by state, which are available on the website of the American Society of Radiologic Technologists (ASRT).

Social Work

Quinnipiac University provides this disclosure regarding its educational qualifications for social work licensure. Students are responsible to review the requirements for states and jurisdictions prior to matriculation and financial obligations.

The MSW Program at Quinnipiac University is fully accredited by the Council on Social Work Education (CSWE). (<https://www.cswe.org/>) This accreditation by the CSWE meets the educational requirements for taking the Association of Social Work Boards (ASWB) exam and is the basic requirement for social work licensure in most states.

The MSW curriculum at Quinnipiac University meets the academic requirements for licensure as a licensed master social worker (LMSW) and licensed clinical social worker (LCSW) in Connecticut. The MSW degree from Quinnipiac University meets the initial educational requirements for graduate and clinical licensure requirements in all states, excepting California and New Mexico.

A determination has not been made regarding Alaska and U.S. territories such as American Samoa, Puerto Rico, and the US Virgin Islands. Please consult the appropriate licensing entities for states and jurisdictions regarding their specific and additional requirements for the licensure of social work professionals on the Association of Social Work Boards website (<http://aswbsocialworkregulations.org/licensingWebsitesReportBuilder.jsp>).

¹ *At this time, Quinnipiac cannot make a determination about whether any of its programs meet the requirements for professional licensure in the American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau.*

registrar@qu.edu

Federal School Code: 001420

In accordance with the Federal Educational Rights and Privacy Act of 1974, this record cannot be released to a third party without written consent.

Accreditation:

Quinnipiac University is accredited by the New England Commission of Higher Education.

Accreditation of an institution of higher education by the commission indicates that it meets or exceeds criteria for the assessment of institutional quality periodically applied through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Additional information may be found here: <https://catalog.qu.edu/accreditations-professional-memberships/>

Academic Calendar:

The University follows a semester based academic term structure. Academic calendar may be found here: <https://catalog.qu.edu/general-information/academic-calendar/>

Course Numbering:

Courses numbered in the 100-400 range are primarily offered at the Undergraduate level. Courses numbered in the 500-600 range are primarily offered at the Graduate level. Courses numbered in the 700-800 range are primarily offered to Medical School & Doctoral levels.

Course Credits:

The unit of credit at the University is the semester hour.

Grading System:

Letter Grade	Numerical Range	Grade Pt. Value
A	93-100	4.00
A-	90-92	3.67
B+	87-89	3.33
B	83-86	3.00
B-	80-82	2.67
C+	77-79	2.33

C	73-76	2.00
C-	70-72	1.67
D	60-69	1.00
F	0-59	0.00
W		0.00
I (incomplete)		0.00
P (Pass)		0.00
HP (High Pass School of Medicine)		N/A
S (Satisfactory)		0.00
H (Honors)		N/A
IP (In-Progress)		0.00
U (Unsatisfactory)		0.00
AU (Audit)		0.00
Z (audit; this grade type no longer offered after Spring 2017)		0.00
TR (Transfer Credit)		0.00
X (Grade not submitted)		0.00

Repeated Courses:

Repeated courses are annotated with a grade of 'R'; Only the most recent grade figures into the cumulative GPA calculation.

Grade Point Average:

The grade point average is obtained by dividing the total number of quality points earned at the University by the number of semester hours attempted for grades. Grades for courses transferred to the University are not calculated into the grade point average.

Academic Honors:

Dean's List: undergraduate students qualify by earning a GPA of at least 3.5 with no grade lower than C and 14 completed credits.

Degree honors:

Summa Cum Laude 3.90-4.00

Magna Cum Laude 3.70-3.89

Cum Laude 3.50-3.69

Students must earn 60+ credits while at Quinnipiac to receive degree honors.

Academic Good Standing:

A student fails to meet academic good standing requirements with a cumulative GPA below 2.0 and/or semester GPA is below 2.0 in any two consecutive semesters.

Academic Sanctions:

Academic warning: semester GPA below 2.0, credit deficiency, or lacking necessary English or Math requirements

Probation: due to GPA or credit deficiencies, or consecutive semesters with GPA under 2.0

Suspension: serious or repeated deficiencies. Students must leave for one semester

Dismissal: serious or repeated deficiencies. Students are separated from the University. After a period of one year a student must file a new application for admission

ABOUT QUINNIPIAC UNIVERSITY

Quinnipiac University is a private, coeducational, nonsectarian institution in Hamden and North Haven, Connecticut, offering more than 140 programs to an estimated 6,800 undergraduates and 3,000 graduate, medical and law students. Quinnipiac prepares graduates as enlightened global citizens equipped for the challenges and opportunities of 21st-century careers.

The university, founded in New Haven in 1929 with an emphasis on business, was known as the Connecticut College of Commerce until it changed its name in 1951 to Quinnipiac College. Soon thereafter, having outgrown its New Haven surroundings, the school moved to its 250-acre Mount Carmel Campus in Hamden, Connecticut, 90 minutes north of New York City, two hours from Boston and eight miles from metropolitan New Haven.

In 2000, the name Quinnipiac University was adopted to better reflect the quality and diversity of the school's programs at both the undergraduate and graduate levels. Over the years, Quinnipiac has experienced dramatic and steady growth. Its nine schools offer programs in business, communications, computing and engineering, education, health sciences, law, medicine, nursing and the arts and sciences and it is among only 2.1 percent of all U.S. universities with a medical school and a law school.

Over the past 20 years, Quinnipiac has expanded to three campuses in southeastern Connecticut and 21 athletic programs in Division I. It is home to the Quinnipiac University Poll, widely viewed as the gold standard in national and statewide polling.

The Mount Carmel Campus, next to Sleeping Giant State Park, contains academic buildings and residence halls. The nearby 250-acre York Hill Campus houses the People's United Center, residence halls for 2,000 students, and the Rocky Top Student Center. A third 150-acre campus in North Haven serves as home to the School of Education, School of Health Sciences, School of Law, School of Nursing, the Frank H. Netter MD School of Medicine, and other graduate programs.

Quinnipiac is recognized by U.S. News & World Report and Princeton Review's "The Best 385 Colleges." The *Chronicle of Higher Education* has named Quinnipiac among the "Great Colleges to Work For." For more information, please visit [qu.edu](https://www.quinnipiac.edu) (<https://www.quinnipiac.edu>). Connect with Quinnipiac on Facebook and follow Quinnipiac on Twitter @QuinnipiacU.

Academic Calendar

Summer 2022 Academic Calendar ¹

Summer Orientation and Open House 2022

May 23	Monday	Graduate Pathway to Success Program
May 30	Monday	Memorial Day – university holiday; no classes ²
June 5	Sunday	Open House for prospective undergraduate students
June 9-10	Thurs–Fri	First-year student orientation, session I
June 13-14	Mon–Tues	First-year student orientation, session II
June 16-17	Thurs–Fri	First-year student orientation, session III
June 20-21	Mon–Tues	First-year student orientation, session IV

June 22	Wednesday	Transfer student welcome, session I
June 23-24	Thurs–Fri	First-year student orientation, session V

Summer I Term 2022

May 23	Monday	Undergraduate and graduate classes begin
May 24	Tuesday	Add/drop registration period ends
May 30	Monday	Memorial Day – university holiday; no classes ²
June 10	Friday	Last day to withdraw from 5-week courses (May 23–June 24) with a grade of W ³
June 17	Friday	Last day to withdraw from 7-week courses (May 23–July 8) with a grade of W ³
June 24	Friday	Undergraduate and graduate classes end (5-week courses)
June 27	Monday	Final grades due (5-week courses)
July 4	Monday	Independence Day – university holiday; no classes ²
July 8	Friday	Undergraduate and graduate classes end (7-week courses)
July 11	Monday	Last day to withdraw from 12-week courses (May 23–Aug 12) with a grade of W ³
July 11	Monday	Final grades due (7-week courses)
August 12	Friday	Undergraduate and graduate classes end (12-week courses)
August 15	Monday	Final grades due (12-week courses)

Summer II Term 2022

July 11	Monday	Undergraduate and graduate classes begin
July 12	Tuesday	Add/drop registration period ends
July 29	Friday	Last day to withdraw from 5-week courses (July 11–Aug 12) with a grade of W ³
August 5	Friday	Last day to withdraw from 7-week courses (July 11–Aug 26) with a grade of W ³
August 12	Friday	Undergraduate and graduate classes end (5-week courses)
August 15	Monday	Final grades due (5-week courses)
August 26	Friday	Undergraduate and graduate classes end (7-week courses)
August 29	Monday	Final grades due (7-week courses)

2022–23 Academic Calendar ¹

Fall 2022

August 23	Tuesday	Graduate Pathway to Success Program
August 24-25	Wed–Thurs	First-year student orientation, session VI
August 25	Thursday	Transfer student welcome, session II
August 26-28	Fri–Sun	Welcome Weekend
August 29	Monday	Undergraduate and graduate classes begin; online classes begin
August 30	Tuesday	Add/drop registration period ends for first 7-week online courses (Aug 29–Oct 15)
September 2	Friday	Add/drop registration period ends for undergraduate and graduate 15-week courses (Aug 29–Dec 17)
September 5	Monday	Labor Day – university holiday; no classes

September 16-18	Fri–Sun	Bobcat Weekend
September 23	Friday	Last day to withdraw from first 7-week online courses (Aug 29–Oct 15) with a grade of W ³
September 24	Saturday	Open House for prospective undergraduate students
October 5	Wednesday	Yom Kippur – university holiday; no classes
October 10-15	Mon–Sat	Midterm examination period for 100-level courses
October 15	Saturday	Online classes end for first 7-week online courses (Aug 29–Oct 15)
October 17	Monday	Grades due for first 7-week courses (Aug 29–Oct 15)
October 23	Sunday	Open House for prospective undergraduate students
October 24	Monday	Online classes begin for second 7-week online courses (Oct 24–Dec 17)
October 25	Tuesday	Add/drop registration period ends for second 7-week online courses (Oct 24–Dec 17)
October 26	Wednesday	Midterm grades due for 100-level courses
November 4	Friday	Last day to withdraw from undergraduate and graduate 15-week courses (Aug 29–Dec 17) with a grade of W ³
November 12	Saturday	Open House for prospective undergraduate students
November 18	Friday	Last day to withdraw from second 7-week online courses (Oct 24–Dec 17) with a grade of W ³
November 21-26	Mon–Sat	No classes
November 24-25	Thurs–Fri	Thanksgiving holiday – university closed
December 10	Saturday	Undergraduate and graduate on-campus classes end
December 12	Monday	Study Day with no final exams, no classes; university open (does not apply to online 7-week courses)
December 13-17	Tue–Sat	Final examination period – undergraduate and graduate on-campus classes
December 17	Saturday	Online classes end
December 19	Monday	Final grades due
December 21–January 2	Wed–Mon	University closed for Winter Break

January Term 2023

January 3	Tuesday	Undergraduate and graduate classes begin
January 4	Wednesday	Add/drop registration period ends
January 13	Friday	Last day to withdraw with a grade of W ³
January 16	Monday	Martin Luther King Jr. Day – university holiday; no classes ²
January 20	Friday	Classes end; final examinations
January 23	Monday	Final grades due

Spring 2023

January 18	Wednesday	Graduate Pathway to Success Program
January 20	Friday	New undergraduate student orientation
January 23	Monday	Undergraduate and graduate classes begin; online classes begin
January 24	Tuesday	Add/drop registration period ends for first 7-week online courses (Jan 23–March 11)
January 27	Friday	Add/drop registration period ends for undergraduate and graduate 15-week courses (Jan 23–May 13)
February 17	Friday	Last day to withdraw from first 7-week online courses (Jan 23–March 11) with a grade of W ³
March 5	Sunday	Open House for prospective undergraduate students
March 6-11	Mon–Sat	Midterm examination period for 100-level courses
March 11	Saturday	Online classes end for first 7-week online courses (Jan 23 – March 11)
March 13-18	Mon–Sat	Undergraduate and graduate spring recess
March 13	Monday	Grades due for first 7-week courses (Jan 23–March 11)
March 20	Monday	Online classes begin for second 7-week online courses (March 20–May 6)
March 21	Tuesday	Add/drop registration period ends for second 7-week online courses (March 20–May 6)
March 22	Wednesday	Midterm grades due for 100-level courses
March 31	Friday	Last day to withdraw from undergraduate and graduate 15-week courses (Jan 23–May 13) with a grade of W ³
April 1-2	Sat–Sun	Admitted Students Experience
April 7	Friday	Good Friday – university holiday; no classes ²
April 14	Friday	Last day to withdraw from second 7-week online courses (March 20–May 6) with a grade of W ³
May 6	Saturday	Undergraduate and graduate classes end; online classes end
May 8	Monday	Study Day with no final exams, no classes; university open (does not apply to online 7-week courses)
May 9-13	Tue–Sat	Final examination period – undergraduate and graduate on-campus classes
May 12	Friday	Commencement – Frank H. Netter MD School of Medicine and School of Law
May 13	Saturday	Commencement – School of Business, School of Computing and Engineering and School of Health Sciences
May 14	Sunday	Commencement – College of Arts and Sciences, School of Communications, School of Nursing and School of Education
May 15	Monday	Final grades due

Summer Orientation and Open House 2023

May 22	Monday	Graduate Pathway to Success Program
May 29	Monday	Memorial Day – university holiday; no classes ²
June 4	Sunday	Open House for prospective undergraduate students
June 8-9	Thurs–Fri	First-year student orientation, session I
June 12-13	Mon–Tues	First-year student orientation, session II
June 15-16	Thurs–Fri	First-year student orientation, session III
June 19-20	Mon–Tues	First-year student orientation, session IV
June 21	Wednesday	Transfer student welcome, session I
June 22-23	Thurs–Fri	First-year student orientation, session V

Summer I Term 2023

May 22	Monday	Undergraduate and graduate classes begin
May 23	Tuesday	Add/drop registration period ends

June 9	Friday	Last day to withdraw from 5-week courses (May 22–June 23) with a grade of W ³
June 16	Friday	Last day to withdraw from 7-week courses (May 22–July 7) with a grade of W ³
June 23	Friday	Undergraduate and graduate classes end (5-week courses)
June 26	Monday	Final grades due (5-week courses)
July 4	Tuesday	Independence Day – university holiday; no classes ²
July 7	Friday	Undergraduate and graduate classes end (7-week courses)
July 10	Monday	Last day to withdraw from 12-week courses (May 22–Aug 11) with a grade of W ³
July 10	Monday	Final grades due (7-week courses)
August 11	Friday	Undergraduate and graduate classes end (12-week courses)
August 14	Monday	Final grades due (12-week courses)

Summer II Term 2023

July 10	Monday	Undergraduate and graduate classes begin
July 11	Tuesday	Add/drop registration period ends
July 28	Friday	Last day to withdraw from 5-week courses (July 10–Aug 11) with a grade of W ³
August 4	Friday	Last day to withdraw from 7-week courses (July 10–Aug 25) with a grade of W ³
August 11	Friday	Undergraduate and graduate classes end (5-week courses)
August 14	Monday	Final grades due (5-week courses)
August 25	Friday	Undergraduate and graduate classes end (7-week courses)
August 28	Monday	Final grades due (7-week courses)

2023–24 Academic Calendar ¹**Fall 2023**

August 22	Tuesday	Graduate Pathway to Success Program
August 23-24	Wed–Thurs	First-year student orientation, session VI

August 24	Thursday	Transfer student welcome, session II
August 25-27	Fri–Sun	Welcome Weekend
August 28	Monday	Undergraduate and graduate classes begin; online classes begin
August 29	Tuesday	Add/drop registration period ends for first 7-week online courses (Aug 28–Oct 14)
September 1	Friday	Add/drop registration period ends for undergraduate and graduate 15-week courses (Aug 29–Dec 17)
September 4	Monday	Labor Day – university holiday; no classes ²
September 22	Friday	Last day to withdraw from first 7-week online courses (Aug 29–Oct 15) with a grade of W ³
September 23	Saturday	Open House for prospective undergraduate students
September 25	Monday	Yom Kippur – university holiday; no classes
October 9-14	Mon–Sat	Midterm examination period for 100-level courses
October 14	Saturday	Online classes end for first 7-week online courses (Aug 28–Oct 14)
October 16	Monday	Grades due for first 7-week courses (Aug 28–Oct 14)
October 22	Sunday	Open House for prospective undergraduate students
October 23	Monday	Online classes begin for second 7-week online courses (Oct 23–Dec 16)
October 24	Tuesday	Add/drop registration period ends for second 7-week online courses (Oct 23–Dec 16)
October 25	Wednesday	Midterm grades due for 100-level courses
November 3	Friday	Last day to withdraw from undergraduate and graduate 15-week courses (Aug 28–Dec 16) with a grade of W ³
November 11	Saturday	Open House for prospective undergraduate students
November 17	Friday	Last day to withdraw from second 7-week online courses (Oct 23–Dec 16) with a grade of W ³
November 20-25	Mon–Sat	No classes
November 23-24	Thurs–Fri	Thanksgiving holiday – university closed
December 9	Saturday	Undergraduate and graduate on-campus classes end
December 11	Monday	Study Day with no final exams, no classes; university open (does not apply to online 7-week courses)
December 12-16	Tue–Sat	Final examination period – undergraduate and graduate on-campus classes
December 16	Saturday	Online classes end
December 18	Monday	Final grades due
December 24–January 1	Sat–Mon	University closed for Winter Break

January Term 2024

January 2	Tuesday	Undergraduate and graduate classes begin
January 3	Wednesday	Add/drop registration period ends
January 12	Friday	Last day to withdraw with a grade of W ³
January 15	Monday	Martin Luther King Jr. Day – university holiday; no classes ²
January 19	Friday	Classes end; final examinations
January 22	Monday	Final grades due

Spring 2024

January 17	Wednesday	Graduate Pathway to Success Program
January 19	Friday	New undergraduate student orientation
January 22	Monday	Undergraduate and graduate classes begin; online classes begin
January 23	Tuesday	Add/drop registration period ends for first 7-week online courses (Jan 22–March 9)
January 26	Friday	Add/drop registration period ends for undergraduate and graduate 15-week courses (Jan 22–May 11)
February 16	Friday	Last day to withdraw from first 7-week online courses (Jan 22–March 9) with a grade of W ³
March 3	Sunday	Open House for prospective undergraduate students
March 4-9	Mon–Sat	Midterm examination period for 100-level courses
March 9	Saturday	Online classes end for first 7-week online courses (Jan 22–March 9)
March 11-16	Mon–Sat	Undergraduate and graduate spring recess
March 11	Monday	Grades due for first 7-week courses (Jan 22–March 9)
March 18	Monday	Online classes begin for second 7-week online courses (March 18–May 4)
March 19	Tuesday	Add/drop registration period ends for second 7-week online courses (March 18–May 4)
March 20	Wednesday	Midterm grades due for 100-level courses
March 28	Thursday	Last day to withdraw from undergraduate and graduate 15-week courses (Jan 22–May 11) with a grade of W ³
March 29	Friday	Good Friday – university holiday; no classes ²
April 6-7	Sat–Sun	Admitted Students Experience
April 12	Friday	Last day to withdraw from second 7-week online courses (March 18–May 4) with a grade of W ³
May 4	Saturday	Undergraduate and graduate classes end; online classes end
May 6	Monday	Study Day with no final exams, no classes; university open (does not apply to online 7-week courses)
May 7-11	Tue–Sat	Final examination period – undergraduate and graduate on-campus classes
May 13	Monday	Final grades due

Quinnipiac's Mission

Our mission at Quinnipiac is to build the University of the Future with a strategy propelling us from our storied past toward an ambitious, inclusive and innovative future. We prepare graduates as enlightened global citizens equipped for the challenges and opportunities of 21st-century careers. We are a community that embraces positive change, inclusive excellence, kindness and generosity of spirit, with a commitment to lift the communities in which we live. Our students, faculty and staff are bold and curious, innovators and explorers. We partner with employers to understand and prepare graduates who meet their talent and technological needs, we embrace lifelong learning, and we pursue learning and scholarship that asks and addresses significant societal and scientific questions.

Our strategic plan describes our ideals, and articulates the present and future goals for academic programs, approaches to enriching equity and inclusivity, lifelong learning opportunities, ties to the communities we serve, alumni outreach, and capital programs that advance these goals. The plan is enabled through the nimble and forward-thinking nature of Quinnipiac as we work to become the University of the Future.

The plan rests on four pillars:

- a. Build an institution-wide mindset that prepares graduates for 21st-century careers and citizenship;
- b. Create an inclusive, excellence-driven community;
- c. Nurture and positively impact internal, local and global communities; and
- d. Foster lifelong connections and success.

Statement of Inclusive Values

At Quinnipiac University, we believe excellence is inclusive and built upon equity, so all groups feel welcome to fully participate in and contribute to our mission.

Achieving this level of excellence requires creating a sense of belonging for all individuals—especially historically marginalized members of society—by affirming the worth, dignity, legitimacy and equality of everyone in the Quinnipiac community and beyond, regardless of race, ethnicity, sex, age, sexual orientation, gender identity, disability, religion, national origin, political viewpoints, veteran status or socio-economic background.

Our university-wide culture is not built on any single program, initiative or action. Rather, it blossoms when guided by heartfelt care for the well-being of fellow community members. This is what inclusive excellence looks like at Quinnipiac:

- We bring our “whole selves” to our work and study, which means we bring our hearts as well as our minds.
- We stand for the quest for knowledge, encourage vigorous exchange of ideas, and foster honest, courageous conversations about sometimes uncomfortable subjects.

- We aim to always think and act with kindness to create a safe, respectful environment for these dialogues, with particular sensitivity to fellow community members’ individual or collective experiences.

Reasoned, academic and rigorous debate requires us to hear viewpoints with which we may disagree. However, those disagreements must not question the worth, dignity, legitimacy and equality of our fellow community members.

We affirm our belief in the ideals of inclusive excellence as a way to continue nurturing Quinnipiac as a university full of people who care deeply about each other and the communities around us.

Admissions

Admissions Procedures

Consistent with the university mission, Quinnipiac welcomes inquiries from serious students of all ages and backgrounds who are interested in professional preparation in fields related to business, communications, education, engineering, health sciences, nursing, public service, and the theoretical and applied disciplines in arts and sciences. An education at Quinnipiac integrates technical, professional and liberal studies. The students who benefit most from Quinnipiac are those who are motivated for a life of professional service and prepared to undertake a program of studies that is broad in its cultural perspectives, while being focused in its technical and professional dimensions. Quinnipiac University seeks students who wish to pursue professional careers, including those who, as yet, are undecided on their fields.

Students interested in Quinnipiac University are urged to acquaint themselves thoroughly with Quinnipiac as early in their decision-making process as possible. A campus visit and admissions interview is strongly encouraged. If a campus visit is not possible, prospective students are advised to meet with one of Quinnipiac’s representatives when they visit the student’s school, or to make arrangements for a video or telephone conference. The admissions office hosts on-campus interviews Monday through Friday year-round and group information sessions weekdays throughout the year and on Saturday mornings during the fall and spring semesters. Fall and spring open houses, Admitted Student Days (in late March or early April) and online interactive sessions also provide opportunities to learn more about Quinnipiac. We welcome your interest. Please call our toll-free number, 800-462-1944 or 203-582-8600, visit our Quinnipiac webpage (<http://www.qu.edu/visit/>), or email us at admissions@qu.edu.

Admissions Process

Students may apply using the Common Application or the Quinnipiac University application. Click here (<http://www.qu.edu/apply/>) for more information or to apply.

First-Year Students

First-year applicants may select the application plan that best suits their interests (see plans and associated deadlines below).

Early Decision (binding) - November 1

Early Action I* - November 15

Early Action II - January 1

Regular Decision - February 1

**For full consideration for the entry-level master's physician assistant, physical therapy, occupational therapy and traditional nursing programs, we strongly encourage candidates to apply Early Action I (November 15 application date).*

See the Quinnipiac application webpage (<http://www.qu.edu/apply/>) for details.

Admissions Requirements for First-Year Applicants

Admission to Quinnipiac University is competitive, and applicants are expected to present a strong college preparatory program in high school. All first-year applicants for admission are expected to present:

- A high school diploma from an approved secondary school or its equivalent prior to enrolling.
- A secondary school transcript showing as completed, or in progress, a college preparatory sequence including: English, four units; mathematics, three units (physical and occupational therapy, nursing, physician assistant and engineering applicants should have four years); science, three units (all health science, nursing and engineering applicants are expected to have four years including biology and chemistry; social science, two units; academic (college preparatory) electives, four units. Total academic units expected: 16. First-quarter grades in the senior year should be sent as soon as they are available.
- Test scores are OPTIONAL for most applicants. Students choosing to report scores should submit official score results for the Scholastic Reasoning Test (SAT I) of the College Entrance Examination Board (CEEB) or of the American College Testing Program (ACT). The writing portion is not required. Quinnipiac uses the highest individual scores on the SAT in evidence-based reading and writing and math or the highest ACT composite score. Additional information regarding test requirements:

Test scores optional (all majors in the following schools/colleges):

- Arts and Sciences
- Business
- Communications
- Computing and Engineering
- Health Sciences (recommended for some programs)

Test scores recommended:

- Nursing
- Physical Therapy (3+3/4+3)
- Occupational Therapy (4+1.5)
- Students interested in a 3+1 combined graduate program in biochemistry, biology, business, communications or education

Test scores required:

Official test scores are required, if available*

- Physician Assistant
- Law dual-degree (3+3)
- International students
- Home-schooled students

**Quinnipiac is monitoring the situation around testing restrictions due to COVID-19.*

Transfer Students

Transfer students may apply for either fall or spring admission (with certain program-specific exceptions listed below). The admissions committee reviews transfer applications once they are complete. Completed applications for the spring term are reviewed starting in late October; applications for the fall term are reviewed beginning in February (after prior fall term grades are received). Students are advised to apply as early as possible to be considered for their program of choice.

The recommended deadline for fall entry is April 1. The recommended deadline for spring entry is November 15. Additional application deadline information:

- BS in Athletic Training: March 1

Transfers considered only for the fall semester each year on a space-available, competitive basis

- BS in Radiologic Sciences: March 1

Transfers considered only for the fall semester each year on a space-available, competitive basis

- Accelerated BS in Nursing: January 1

Applicants considered only for the fall semester each year

- BS in Nursing: March 1

Transfers considered on a space-available, competitive basis for both fall and spring semesters

Admissions Requirements for Transfer Applicants

Transfer applicants must submit the documents listed above for first-year students with the following exceptions:

- One to three letters of recommendation.
- An official transcript from each post-high school institution attended, even if no courses were completed.
- A high school transcript with proof of graduation, unless an associate degree has been earned or will be earned prior to matriculation.
- Students seeking a second bachelor's degree need only submit the application form and official transcripts from all colleges or universities attended even if no courses were completed.
- The application fee for transfer applicants is \$65.

Most programs look for a minimum grade point average of 2.5 (3.0 for health sciences) for consideration. Those interested in the PT, OT and PA programs may only apply for entry to the program at the graduate level.

Quinnipiac works closely with the community and technical colleges in Connecticut and elsewhere, and recommends that students follow a transfer curriculum of study if their plan is to move to a four-year university. Students may wish to arrange an admissions appointment to discuss program requirements.

Quinnipiac is very credit friendly. Courses completed at a regionally accredited institution with a grade of C or better will transfer.

Accelerated Nursing Program

Applicants who are interested in the Accelerated BS in Nursing program must already have a bachelor's degree. Learn more about the Accelerated BS in Nursing program (p. 658) by visiting the website.

International Student Admissions

Quinnipiac prides itself on offering a culturally diverse environment for its students. Our strong academic reputation attracts talented students from over 50 countries so our students interact with people of many different faiths and cultural backgrounds.

Applicants from non-English speaking countries also must submit the following:

- Certified translations of all prior secondary and collegiate academic records.
- A teacher or counselor letter of recommendation.
- All international applicants must demonstrate adequate English proficiency to qualify for admission. English proficiency waivers are considered on a case-by-case basis after a student applies for admission. Considerations include, but are not limited to, the following: English as the primary language of school instruction; English as the first/native language; TOEFL of 80+; IELTS of 6.5+; Duolingo English Test (DET) of 105+
- Official documentation of financial support for undergraduate study and living expenses must be submitted to the admissions office before an I-20 can be issued to the student. The statement of financial support can be downloaded from the website.

Online Admissions

For information on Quinnipiac University online programs, click here (p. 932).

Advanced Standing/Placement

First-Year Advanced Standing

Advanced standing or placement will be considered for entering first-year students who have successfully completed college-level credit courses (with a grade of C or better on an official transcript) through a regionally accredited college or university, or who have achieved an acceptable score on an appropriate examination:

- Advanced Placement Program of the College Entrance Examination Board
- International Baccalaureate

Advanced Placement (AP) Policy

Score	Subject	Equivalency (Credit)
3	Art History	AR 103 (3 credits)
3	Art Studio Drawing	AR 251 (3 credits)
3	Art 2D Design	AR 159 (3 credits)
3	Art 3D Design	AR 159 (3 credits)
3	Biology	BIO 106 + BIO 107 (8 credits)
4	Biology	BIO 101 + BIO 102 (8 credits)
4	Chemistry	CHE 110 + CHE 111 (8 credits)

4	Computer Science A	CSC 110 (4 credits)
4	Computer Science Principles	CSC 105 (3 credits)
4	English Lang and Comp	EN 101 (3 credits)
4	English Lit and Comp	EN 102 (3 credits)
4	Environmental Science	SCI 139 + Lab (4 credits)
3	French Language	FR 101 + FR 102 (6 credits)
3	German Language	GR 101 + GR 102 (6 credits)
3	Government & Politics (US)	PO 131 (3 credits)
3	Government & Politics (Comparative)	PO 101 (3 credits)
3	History European	HS 111 + HS 112 (6 credits)
3	History US	HS 131 + HS 132 (6 credits)
3	Human Geography	GP 101 (3 credits)
3	Italian Language	IT 101 + IT 102 (6 credits)
3	Latin	FL 139 (3 credits)
3	Macroeconomics	EC 112 (3 credits)
4	Math Calculus AB	MA 151 (4 credits)
4	Math Calculus BC	MA 151 + MA 153 (6 credits)
3	Microeconomics	EC 111 (3 credits)
3	Music Theory	MU 230 (3 credits)
4	Physics 1	PHY 110 + PHY 110L (4 credits)
4	Physics 2	PHY 111 + PHY 111L (4 credits)
4	Physics C Electricity & Magnetism	PHY 122 (4 credits)
4	Physics C Mechanics	PHY 121 (4 credits)
3	Psychology	PS 101 (3 credits)
3	Spanish Language	SP 101 + SP 102 (6 credits)
3	Spanish Literature	SP 101 + SP 102 (6 credits)
4	Statistics	MA 275 (3 credits)
3	World History	HS 139 (3 credits)

AP science course equivalencies will be determined in consultation with an adviser for the following majors: engineering, biology, occupational therapy, physical therapy, nursing, radiologic sciences and entry-level master's physician assistant program.

Transfer Student Credit

An unofficial evaluation of credit is completed as part of the evaluation process for transfer students. Quinnipiac University normally grants transfer credit for college-level courses appropriate to the chosen curriculum completed with a grade of C or better at a regionally accredited college or university. The maximum number of transfer credits that may be accepted by Quinnipiac University is 75 credits. At

least one-half of the courses in a major must be taken at Quinnipiac University. Certain majors may request course completion within a five-year period. Official transfer of credit occurs once an admitted student matriculates into a program of study.

A student who has completed courses at an institution not granting degrees, or who has extensive experience in a specialized field, may submit College Level Examination Program (CLEP) exam scores to help determine placement. Quinnipiac University does not accept CLEP credits earned after a student is matriculated.

Tuition and Fees

Undergraduate Tuition and Financial Aid

Graduate Tuition and Financial Aid

School of Law Tuition and Financial Aid

School of Medicine Tuition and Financial Aid

Room and Board

Please visit the Quinnipiac University website for financial information and for housing options.

Quinnipiac requires that all students obtain a university ID card, known as the QCard. Various accounts are associated with the QCard, chiefly the required dining service and QCash.

Required Dining Service

Please visit the Quinnipiac website to find out more information about the required dining service plans.

QCash

Quinnipiac also offers QCash, a prepaid debit account that can be used to make a variety of cashless purchases. Please visit the Quinnipiac website to find out more information about the QCard.

University Laptop Program

All incoming students are expected to have a laptop that meets academic requirements and technical standards. Quinnipiac has a laptop program that is both cost effective and well supported. See the Student Resources and Services section for more information on the program.

Financial Aid

Quinnipiac seeks to assist each of its students to receive the maximum federal, state and institutional financial aid for which they are eligible. Institutional financial aid is available to full-time undergraduate students demonstrating eligibility according to Quinnipiac funding policies. Aid is provided as a "package," which may include grants, scholarships, campus employment (Work Study) and loans. It is the goal of Quinnipiac to coordinate aid eligibility to make a Quinnipiac education as affordable as possible.

Quinnipiac's financial aid policy is built on the principle of supplementing student and family contributions toward the cost of attending college. This principle is rooted in the belief that primary responsibility for meeting college costs rests with the student and the family. Financial aid eligibility, therefore, is measured between the cost of attending Quinnipiac and the reasonable support expected from student earnings

and savings and from family income, assets and resources. To help Quinnipiac allocate its funds to assist as many students as possible, financial aid applicants are requested to explore all sources of external support for which they might qualify.

Students should apply for financial aid by filing the Free Application for Federal Student Aid (FAFSA) by March 1 each year. All currently attending students who wish to apply for or renew their aid must file the FAFSA for renewal prior to April 1. Detailed information and links to both forms can be found on Quinnipiac's Tuition and Financial Aid webpage (<http://www.quinnipiac.edu/finaid/>). All financial aid applicants are required to meet Quinnipiac's standards for Satisfactory Academic Progress for financial aid recipients and applicants. The policy is published in the Student Handbook (p. 60) and is available online (<https://www.qu.edu/paying-for-college/undergraduate/apply-for-financial-aid/eligibility-and-policies/>) from the Office of Financial Aid.

Academic Scholarships

A variety of academic scholarships are awarded at the time of entry and are renewable. The value of most academic scholarships ranges from \$7,000-\$28,000 per year. Consideration for all scholarships is given to students based on their admission application. No additional forms are required for consideration. Visit Quinnipiac's Scholarships webpage (<https://www.qu.edu/tuition-financial-aid/scholarships.html>) for current academic scholarship award information as well as the criteria for renewal.

Veterans Benefits

Quinnipiac University accepts all U.S. Department of Veterans Affairs (VA) Education and Vocational Rehabilitation and Employment (VR&E) benefits available to eligible veterans and dependents. In addition, Quinnipiac is a proud participant of the Yellow Ribbon program, which provides additional funding for eligible students. Any student eligible and electing to utilize VA education benefits should apply for a Certificate of Eligibility (COE) at How to Apply for VA Education Benefits (va.gov) (<https://www.va.gov/education/how-to-apply/>). The COE must be submitted to Quinnipiac's director of veteran and military affairs prior to the start of classes. For more information or questions concerning VA benefits, contact 203-582-8867 or visit Quinnipiac's Veterans and Military Benefits webpage (<https://www.qu.edu/paying-for-college/undergraduate/types-of-aid/veterans-and-military-benefits/>). "GI Bill®" is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill

Military Tuition Assistance (TA)

Quinnipiac University has recently partnered with the Department of Defense via a Memorandum of Understanding (MOU), which provides eligible active and reserve military members the opportunity to receive TA from their respective service. To find out eligibility requirements, service members must visit their military installations' college office or visit their command career counselor.

Veteran Benefits and Reserve Officer Training Corps (ROTC)

Veteran Benefits

Pending Payment Compliance

In accordance with Title 38 US Code 3679(e), Quinnipiac University adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post-9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment to the institution is pending from VA. Quinnipiac University will not:

- Prevent the student's enrollment;
- Assess a late penalty fee to the student;
- Require the student to secure alternative or additional funding;
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities).

However, to qualify for this provision, such students may be required to:

- Produce the VA Certificate of Eligibility (COE) by the first week of class;
- Provide a written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA).

Air Force ROTC (Detachment 0009)

Quinnipiac students meeting Air Force requirements may participate in Air Force Reserve Officer Training Corps (AFROTC) cross-town at Yale University.

The AFROTC program is available to Quinnipiac University students at Yale University's main campus in New Haven. Through the AFROTC program, Quinnipiac University students, without paying extra tuition, can pursue a commission as an officer in the United States Air Force. The first-year and sophomore courses carry no military obligation and are open to all students. Air Force ROTC scholarships also are available for qualified students. These scholarships pay up to full tuition and fees, as well as money for books and a monthly tax-free stipend. Visit the Air Force ROTC Scholarship website (<https://www.afrotc.com/scholarships/>) for more information concerning scholarships.

Students enroll in a four-year or three-year (if they join at the start of sophomore year) AFROTC sequence. Students commute to New Haven on the days listed below for AFROTC-specific classes and events. Up to 17 credits may be transferred to Quinnipiac and counted toward degree requirements as free electives.

Qualified students should contact the AFROTC office at 203-432-9431 or visit the Yale AFROTC website (<https://afrotc.yalecollege.yale.edu/>).

AFROTC Courses

- **USAF 101/102 "The Foundations of the USAF"**
Thursdays, 1–1:50 p.m. or Fridays, 10:15–11:05 a.m.
- **USAF 201/202 "The Evolution of Air & Space Power"**
Thursdays, noon–12:50 p.m. or Fridays, 11:15–12:05 p.m.
- **USAF 301/302 "USAF Leadership Studies"**

Tuesdays, 8:30–11:20 a.m.

- **USAF 401/402 "National Security Affairs/Prep for Active Duty"**
Contact the ROTC department for class days/times.
- **Leadership Laboratory**—Thursdays, 7:30–9:10 p.m.
- **Physical Training**—Tuesdays, 6:30–7:30 a.m. and Thursdays, 6–7 a.m.

Army ROTC

The Army ROTC program is available to Quinnipiac University students at the University of New Haven's (UNH) campus in West Haven. The program is open to all physically qualified students who are U.S. citizens and meet other specific requirements. Students are required to be non-matriculated at UNH and enrolled in MSL-1101 (Military Science) with lab as well as physical training 3 days per week. Successful completion of the program can qualify the student for a commission in the United States Army, Army Reserve or Army National Guard. Potential students are required to interview with Army ROTC leadership prior to acceptance. For more information, contact the Army ROTC Recruiting Office at 203-931-2998 or visit the UNH Army ROTC website (<https://www.newhaven.edu/lee-college/undergraduate-programs/rotc/>). Visit the Army ROTC Scholarship website (<https://www.goarmy.com/rotc/scholarships.html>) for more information concerning scholarships.

Albert Schweitzer Institute

The Albert Schweitzer Institute is inspired by the ideals and example of 1952 Nobel Peace Prize Laureate Dr. Albert Schweitzer, who was known for his philosophy of *reverence for life* and his call to action and service: *to make one's life one's argument*.

The institute conducts programs locally and on a global basis, and focuses on environmental, health and peace efforts. The institute hosts Quinnipiac's Global Engagement Fellowship. The institute engages students with:

- Work on campus, in the Hamden community, and globally around food security and environmental justice;
- Speakers and conferences on peace and development globally at the United Nations, and on campus;
- Global learning and community engagement opportunities in Peru, Guatemala and elsewhere in the U.S. aimed at motivating young people to serve the community and the environment as a way of life.
- Management and oversight of a native plant pollinator garden, which is used as a living laboratory for the study of pollinator species and for the general relaxation and enjoyment of members of the Quinnipiac community.

The institute is located adjacent to the Mount Carmel Campus at 660 New Road in Hamden, Connecticut. For more information, please contact the office at 203-582-7875 or via email at schweitzer@qu.edu (schweitzer@quinnipiac.edu).

Carl Hansen Student Center

This multipurpose facility located on the Mount Carmel Campus provides opportunities for the Quinnipiac community to come together in a relaxed atmosphere. The Carl Hansen Student Center is home to Quinnipiac's main dining hall and a variety of services and functions which include:

Banking

As the official banking partner of Quinnipiac University, People's United Bank is available on campus via multiple automated teller machines (ATMs), nearby full-service branches at 3496 Whitney Avenue (203-248-1115) and 2165 Dixwell Avenue (203-281-0531) in Hamden, and online via [peoples.com](http://www.peoples.com) (<http://www.peoples.com>).

Bookstore

The bookstore, open to the Quinnipiac community and the public, is located in the lobby of the Carl Hansen Student Center, between the post office and the bank. The bookstore carries textbooks, general books, school supplies, licensed merchandise, insignia giftware, greeting cards and snacks, as well as health and personal care items.

Commuter Lockers

There are commuter lockers conveniently located on the second floor. Lockers are available at the beginning of the academic year on a first-come, first-served basis. Interested commuter students should contact the Office of Student Centers & Student Involvement or fill out a Commuter Locker Request Form, which can be found on Do You QU, under the Office of Student Centers & Student Involvement profile page.

Campus Information Booth

The Information Booth is centrally located on the first floor of the Carl Hansen Student Center near the main entrance. It is a resource for the Quinnipiac community and visitors. The Information Booth, staffed by student employees, is typically open Monday–Friday, 9 a.m. to 10 p.m. Student staff members are available to provide information pertaining to campus events and directions for procedures unique to student activities.

Office Locations

The Carl Hansen Student Center is home to several offices for student organizations such as the Student Government Association, the Student Programming Board and student media organizations, as well as fraternities and sororities. The center offers a multipurpose programming space, meeting space, student media suite, fraternity and sorority life suite, student organization and graphic arts suite, multicultural suite and prayer space. In addition, the Department of Campus Life (p. 25) is housed on the second floor of the Student Center in suite 202.

Post Office

The main post office, located on the first floor of the Carl Hansen Student Center, is open Monday through Thursday, 11 a.m. to 4:45 p.m. and Friday, 11 a.m. to 4 p.m. All residential students are assigned mailboxes.

Office of Campus Life

Campus Life is the center for co-curricular engagement where students find their place, pursue interests and develop passions, cultivate their leadership capacity, and nurture affinity for Quinnipiac.

Campus Life empowers students to take ownership of their educational journey. We create spaces where students develop as healthy leaders, citizens and critical thinkers who are prepared to lead change in our global society. Our collaborative co-curricular approach engages members of the Quinnipiac community in experiential learning, recreational opportunities, comprehensive campus-wide programming, high-impact service projects and dynamic leadership ventures. We cultivate an environment where resiliency, spirit, inclusive excellence, wellness, lifelong learning and affinity for Quinnipiac thrive.

The Department of Campus Life is located on the second floor of the Carl Hansen Student Center on Mount Carmel Campus in suite 202, as well as the fourth floor of the Rocky Top Student Center on the York Hill Campus. The staff can be reached at 203-582-8673 or at campuslife@qu.edu.

Student Learning Outcomes

Through engaging with Campus Life staff, programs and initiatives, students will:

- Lead within a variety of situational contexts.
- Gain the skills necessary to implement effective resolutions to challenges.
- Actively engage with the broader Quinnipiac and Hamden communities.
- Develop a strong affinity for the university.
- Articulate the impact of their co-curricular experience on their overall development.
- Model ethical and responsible behavior.
- Be advocates for the welfare of themselves and others.

Campus Recreation

Recreation

Quinnipiac University Recreation encompasses a variety of activities and locations, including: club sports, intramural sports, an eSports lab, three fitness centers, aerobic classes, open recreation and special events on all three campuses. Recreation also serves as one of the larger employers of undergraduate students on campus. Positions are available as intramural staff members and fitness center attendants.

Club Sports

The university recognizes 21 club sport teams. They compete against other universities without the time commitment of an NCAA Division I team.

Teams are student-led and allow for leadership opportunities through elected positions including president, vice president and treasurer.

Each team typically announces its tryout process before or at the Quinnipiac Involvement Fair each fall.

For more information on sports offered and contact info, please visit the Club Sports Page (<https://www.qu.edu/student-life/athletics-and-recreation/club-sports/>) on qu.edu.

Intramural Sports Program

The Quinnipiac intramural sports program offers a variety of sports activities in both competitive and recreational settings. Participants create their own teams, select their level of competition and vie for coveted championship T-shirts. Nearly 75 percent of the student body participates in one or more intramural activities.

Create an account on IM Leagues (<http://www.imleagues.com/quinnipiac/>) to:

- View the sport leagues and tournaments offered
- Review league rules, deadlines and details
- Create a team or join a team

Intramural offerings include:

- Basketball (5-on-5 and 3-on-3)
- Dodgeball
- Football
- Ice Hockey
- Soccer
- Tennis (singles & doubles)
- Ultimate Frisbee
- Volleyball
- Open skate
- Badminton
- Pickleball
- Lawn Games
- Virtual Challenges
- Dodgeball

For more information about intramural sports, visit the Campus Recreation MyQ page (<https://myq.quinnipiac.edu/Student%20Life/CampusRecreation/Pages/default.aspx>).

Fitness Classes and Programs

Campus Recreation offers a full schedule of free lunchtime and evening activities taught by certified student instructors. Activities include a variety of the latest trends including: Spinning®, Barre, Ugifit®, Boot Camp, Zumba®, Yoga and Pilates.

Classes usually begin during the second week of the fall and spring semesters. Classes are not scheduled during summer. The schedule is available to the Quinnipiac community via MyQ, on IMLeagues.com (<http://www.imleagues.com/>) as well as at the Fitness Centers.

For more information about fitness and aerobics classes, visit the Quinnipiac Recreation Website (<https://www.qu.edu/student-life/athletics-and-recreation/fitness-and-recreation/>).

Open Recreation

“Open Rec” hours are scheduled in both the Recreation Center and the dance studios on Mount Carmel Campus. Quinnipiac community members are encouraged to play basketball, volleyball and other games at the Recreation Center or use the mirrored dance studios to rehearse. Hours for these spaces are the same as for the fitness centers with daily schedules of previously reserved times posted at the doors.

Burt Kahn Court/Gymnasium

This hardwood floor facility located in the Athletic and Recreation Center on Mount Carmel Campus serves as the competitive site for Quinnipiac home volleyball games. The gymnasium also is used for university special events, intramurals and “open recreation.”

Recreation Center

The Recreation Center on Mount Carmel Campus has four multipurpose courts used for tennis, basketball, volleyball and other recreation activities. Dividers between each court allow for a variety of activities to take place simultaneously.

Fitness Centers

There are three fitness centers at Quinnipiac University. One is located in the Athletic and Recreation Center on the Mount Carmel Campus and includes:

- A full line of free weights
- A full circuit of strength equipment
- Abdominal equipment and stretching areas
- A full line of cardio equipment complete with treadmills, steppers, ellipticals, bikes and adaptive motion trainers (AMTs) on the corners of our suspended track

The next is located in the Rocky Top Student Center on our York Hill Campus and is outfitted with:

- A complete line of cardio equipment with network capabilities (installed January 2020)

- A new strength line including free weights, a full circuit, and abdominal workout equipment (installed summer 2021)

Our final fitness center is a satellite space on the North Haven Campus, with some cardio equipment, free weights and multi-functional strength equipment.

The fitness centers are open to all members of the Quinnipiac community. A valid Quinnipiac ID must be presented for entrance to the facility at all times.

The Mount Carmel and York Hill Fitness Centers are open Monday–Friday from 6 a.m.–10 p.m. and Saturday/Sunday 9 a.m.–10 p.m.

The North Haven Fitness Center is open Monday–Friday 9 a.m.–5 p.m.

Indoor Track

The suspended indoor track encircles our four Recreation Center courts on the Mount Carmel Campus. Students and staff may walk and jog upstairs while games and practices are being conducted downstairs. Nine laps of the track equal one full mile.

Cardio Corners

All four corners of the indoor track on the Mount Carmel Campus have been outfitted with various pieces of cardiovascular equipment. Each corner (approx. 2,800 square feet) has treadmills, ellipticals, steppers and bikes. Additionally, one corner is outfitted with multipurpose mats, stability balls and light weights.

Spinning® Room

There is a Spinning® room located in the fitness center on the York Hill Campus. There is an online bike reservations process. Use of this room is available during classes *only*.

Sports Equipment

Quinnipiac supplies most recreation equipment, such as spikeball sets, volleyballs, basketballs and tennis rackets. Equipment may be signed out at the fitness center reception desk with a Quinnipiac ID.

eSports Lab

The University opened an eSports Lab in December 2021 in Rocky Top 317. The Lab has 24 PC stations and a gaming console area for Nintendo Switch, Xbox & Playstation games. The lab is home to the University's eSports team and is utilized by Academic Courses in Game Design & Talent Management. Open recreation hours vary by semester and will be posted outside of the lab.

CARE (Community, Assessment, Response and Evaluation) Team

Quinnipiac is dedicated to supporting our students through high-touch practices from CARE (Community, Assessment, Response and Evaluation). The CARE team employs a caring, preventive, early intervention approach with students who exhibit concerning or disruptive behaviors.

Guided by university values of a student-oriented environment and a strong sense of community, the chair of CARE manages this

multidisciplinary team. The CARE team meets weekly to review and discuss new referrals, ongoing cases and the best course of action to support students of concern. CARE utilizes best practices from national organizations such as Higher Education Case Managers Association (HECMA) and the Association for Student Conduct Administration (ASCA).

By partnering with members of the Quinnipiac community, the CARE team works to promote student well-being and success in the context of community safety. CARE referrals are submitted by faculty, staff, students and community members. Referrals range from topics including: helping a student during difficult times such as the passing of a loved one; when a student needs support for their physical, emotional, mental, spiritual and/or financial health; and/or when a student is experiencing social challenges with roommates, friends and/or peers.

More information about the CARE team, behaviors of concern, how to make a referral and answers to frequently asked questions can be found on the CARE page (<https://myq.quinnipiac.edu/Student%20Life/CARE/Pages/default.html>) on MyQ. Concerned about a student? Let us know: CARE and Conduct Incident Reporting Form.

Career Development

Quinnipiac University offers an array of career information and support specifically geared to students in each of the schools. These services include:

- Individual career counseling and advising sessions
- Assistance with resume/cover letter writing and other job search correspondence
- Interview practice and preparation
- Connections with alumni and employers
- Alumni networking and mentorship portal
- Career fairs, panels and workshops
- Job and internship listings and strategy sessions
- Graduate school information
- School-specific career information

For further information please email qucc@qu.edu or visit the appropriate career development page on our website:

General Career Development (<https://www.qu.edu/info-for/career-development/>)

College of Arts and Sciences (<https://www.qu.edu/schools/arts-sciences/career-development.html>)

School of Business (<https://www.qu.edu/schools/business/career-development.html>)

School of Communications (<https://www.qu.edu/schools/communications/career-development.html>)

School of Computing and Engineering (<https://www.qu.edu/schools/engineering/career-development/>)

School of Health Sciences (<https://www.qu.edu/schools/health-sciences/career-development.html>)

School of Nursing (<https://www.qu.edu/schools/nursing/career-development.html>)

Clubs and Organizations

The Department of Campus Life is available to assist all student organizations and campus groups in program development and implementation of cocurricular activities. The staff, in conjunction with other student affairs personnel, provides a support system to foster personal growth and social competency through the development of group activities.

Additional information and guidelines for organizations, as well as procedures for initiating new clubs, are available in the Quinnipiac University Student Handbook and the Department of Campus Life. All policies and guidelines pertaining to organizations are subject to the interpretation of the Department of Campus Life.

Student organizations are grouped according to the following categories:

- Academic
- Arts & Entertainment
- Cultural, Spiritual & Identity
- Government & Program Boards
- Fraternity & Sorority Life
- Multimedia
- Political & Advocacy
- Recreational
- Service
- Spirit
- Student Media

For a detailed description of each organization visit Do You QU (<https://qu.campuslabs.com/engage/>).

Community Engagement

The Office of Community Engagement is located on the second floor of the Carl Hansen Student Center in the Campus Life suite. The office serves as a central resource for students, faculty and staff interested in volunteering in the local, national and international communities; provides support to students and faculty interested in community engagement and service learning; and is responsible for both expanding and coordinating programs that encourage service, civic engagement and volunteerism at the local, national and international level. The office also:

- Serves as a resource and contact for students, faculty and staff in the development of community service and philanthropic opportunities.
- Assists faculty in the development of service learning and experiential learning opportunities.
- Assists students, student organizations, campus offices and departments in the development, coordination and funding of community service activities.
- Develops and organizes the Alternative Break Trips that engage students in direct service to meet community needs.
- Acts as an advocate for, and adviser to, student organizations committed to service.
- Develops and maintains a database of local community agencies and nonprofits searching for volunteer assistance or open to hosting one-time small group service activities.

- Develops and manages the Community Work Study program, which offers students with work study awards the opportunity to work in local schools, nonprofits and municipal agencies; and
- Supports student groups, university departments and faculty in the design and coordination of events that advocate for and educate the community about the unmet needs and issues of social justice within our local communities and world.

Counseling Services

Counseling Services

Quinnipiac has contracted with Hartford HealthCare's Campus Care program to provide high-quality, coordinated health and wellness services to manage students' complete care needs, from physical and mental well-being to athletic training for the university's Division I athletes. Please check the university website for the most up-to-date information.

In cases of emergency, call 911 or contact the Department of Public Safety at 203-582-6200.

Counseling Services provides access to care for students seeking help for emotional distress. The goal is to assist students through brief therapy while addressing concerns that may be impacting negatively on academic performance or on the student's quality of life within the university community. Our counselors and part-time psychiatric providers are a resource for students struggling with stress, anxiety, depression, relationship problems, eating disorders and alcohol or drug abuse. Other common problems include difficulty making decisions, low self-esteem, procrastination or the stress of leaving home while adjusting to college life. Counseling staff members are available to assist any student who has been affected through physical or sexual violence or who may be grieving the loss of a loved one.

The following counseling services are available to all undergraduate and graduate students at no cost:

- individual counseling
- diagnostic evaluation
- medication management
- group therapy
- urgent visits
- mental health referrals
- consultation to faculty, staff and medical staff
- telehealth services

Counseling Services is located in the Health and Wellness Center on the Mount Carmel Campus. The office is open Monday through Friday from 9 a.m. to 5 p.m. Counseling services are available at all three campuses (Mount Carmel, York Hill Health Center and North Haven Campus).

Students wishing to schedule an appointment can call Counseling Services at 203-582-8680, choose option #1, and schedule an appointment by talking to the counseling center secretary.

Students can speak with a licensed mental health provider in the event of a mental health crisis 24/7, by calling 203-582-8680 and choosing option #3.

In cases of emergency, call 911 or contact the Department of Public Safety at 203-582-6200.

Department of Cultural and Global Engagement

Quinnipiac University fosters respect for each individual by honoring the differences inherent among people. As an intellectual community of learners and scholars, we recognize and appreciate our shared humanity. Acknowledging that we live in a pluralistic society, we have a genuine desire to ensure that all Quinnipiac community members feel empowered to express their own individuality. These principles underscore our central mission of teaching and learning and are vital to achieving national prominence and excellence in education. They also serve as the foundation for promoting our community's economic, social and cultural well-being.

The Department of Cultural and Global Engagement (DCGE) engages the campus and surrounding community. We help define, enable and foster an inclusive campus culture that embraces the diversity of identities, ideas and values.

The Department of Cultural and Global Engagement promotes and sustains multicultural and global education by mentoring and advising students, facilitating transformative cultural experiences, preparing students to be responsible global citizens, and enhancing creative and critical thinking through local and global academic engagement.

We believe in working in the intersection of internationalization and multicultural education, which provides creative opportunities for faculty, staff and administrators to:

- Help students understand multiculturalism and social justice in a global context.
- Develop intercultural skills.
- Broaden attitudes and experiences for students such as study abroad, global solidarity programs and courses with a travel component.
- Examine values, attitudes and responsibilities for local/global citizenship.
- See how power and privilege are shifting the local/global context.
- Prepare students to cooperate and compete in a multicultural and global workplace.

For more information, please contact the office at 203-582-8425.

Multicultural Education

Multicultural education promotes inclusion and celebrates the diversity of Quinnipiac through a host of services and programs. As part of the Department of Cultural and Global Engagement, our goal is to create an environment that reflects, supports and encourages students to celebrate their cultural heritage together. This area:

- Offers programming and training that enhances the Quinnipiac community's appreciation of various social identities, including race, gender and sexuality, socioeconomic class, and other cultural identities, and the practice of inclusive excellence among faculty, staff and students.
- Offers transitional support for incoming students of color, first-generation and international students through programs such as the QUEST Mentoring Program (p. 36), QU FYI (First-Year Immersion) (p. 36) and Sawhney Leadership Program (<https://www.qu.edu/student-life/diversity-and-inclusion/multicultural-education/sawhney-leadership-program/>).

- Works collaboratively with academic and administrative units to foster intercultural dialogue and programming.
- Delivers academic and social mentorship for underrepresented students to live, work, lead and succeed in a multicultural and global world.
- Assists and advises cultural student organizations in leadership development and program planning to enhance their active engagement and participation in the university and the local community.
- Provides space for high-impact learning around issues of diversity, equity and social justice through intergroup dialogues and educational programming.
- Provides opportunities for students and faculty to learn about, embrace and celebrate diverse ethnic, racial and cultural identities through training, workshops and programming.

Global Education

At Quinnipiac University, we feel a sense of obligation to work toward a more interconnected and globally engaged environment. We do this by increasing intentional global engagement opportunities for students, faculty and staff to learn both in and outside the classroom. Quinnipiac students participate in semester and short-term programs, internships, community engagement, clinical, research and faculty-led programs abroad in various countries such as Barbados, Costa Rica, Dominican Republic, Germany, Guatemala, Ireland, Italy, Japan, Morocco, Poland and Spain. Administered by the Department of Cultural and Global Engagement, study abroad programs provide the opportunity to develop responsible and engaged citizens by cultivating their cultural awareness and humility as well as skills and knowledge necessary to participate respectfully in the global community. All students are advised to plan early for study abroad and to discuss with their academic adviser to determine whether they can fulfill their graduation requirements through a study abroad program. Students also must attend an information session to understand the policies and procedures for our education abroad opportunities.

The following opportunities are available:

Semester Abroad (p. 50)

Students have an opportunity to study for a full semester (ranging from 4 to 6 months) at an international institution. Depending on the student's major, they can participate as early as spring semester of the first year through senior year.

Intersession (p. 51)

Short-term programs are offered during the winter or summer breaks. There are opportunities for faculty-led programs abroad, or programs offered through partner institutions.

Clinicals

Students from certain majors can fulfill some of their clinical affiliation or fieldwork with international partners.

Internships and experiential learning – These opportunities integrate the knowledge and theory learned in the classroom with practical application and skills development in a professional setting.

Community engagement – Students can participate in community-driven learning experiences by living with host families and engaging with long-term global partners.

Research – Students partner with Quinnipiac or international faculty to conduct and participate in independent or capstone research projects.

Exchange – This program involves a direct exchange of faculty and/or students between international partners for a semester or short-term period.

The Department of Cultural and Global Engagement supports students throughout their global education experiences by offering the following services:

- Pre-departure workshops
- Re-entry workshops
- Advising and mentorship
- Opportunities for students to take on leadership roles

International Students

The Department of Cultural and Global Engagement supports the international student population at Quinnipiac University. The department provides guidance on a wide range of topics for international students in the U.S., including immigration issues (visa regulations, work authorizations, travel), academic and cultural differences, and resources at Quinnipiac and in the local community. Each semester, the department hosts a comprehensive orientation program to prepare newly arrived international students and scholars for life and study at Quinnipiac University. The DCGE organizes on- and off-campus programs and events that are open to international and domestic students. The department also coordinates the Global Partners Program, a peer-support program that partners new international students with current students who serve as mentors.

For more information, contact the Department of Cultural and Global Engagement at 203-582-5215 or via email at international.student@qu.edu.

Fraternity and Sorority Life

Currently, over 19 percent of Quinnipiac undergraduate students are members of the 17 fraternities and sororities on campus. The Office of Fraternity & Sorority Life is committed to advancing fraternities and sororities through intellectual and interpersonal development within the Quinnipiac University community and beyond. The office is guided by a set of shared values, known as “Pillars,” which shape all community programming and initiatives from the new member experience through Commencement.

The Pillars are:

- Leadership through strength of character
- Growth through intellectual excellence
- Service through civic engagement
- Community through diversity and inclusion

The office provides programs that exemplify the values of the community, such as the Greek Leadership Series, Officer Training Academy, FOUNDATIONS: New Member Experience, Social Event Manager Training and more.

Staff in the Office of Fraternity & Sorority Life offer advisement, programming and experiences that are intended to complement the numerous occasions for leadership and involvement provided by

individual chapters and their respective governing councils. These experiences afford students opportunities to gain proficiency in the Campus Life learning outcomes.

Students have the opportunity to join a wide variety of organizations including those belonging to the National Panhellenic Conference, National Pan-Hellenic Council, National Association of Latino Fraternal Organizations, and North American Interfraternity Conference.

Quinnipiac also has chapters of national honor societies for fraternity/sorority students, Order of Omega, Rho Lambda and Gamma Sigma Alpha. Order of Omega is an academic and leadership honor society. Juniors and seniors with a GPA above or equal to the all-fraternity/sorority GPA are able to seek membership. Rho Lambda honors those women within the sorority community who have exhibited the highest qualities of leadership and service to their Greek community and their sorority. Gamma Sigma Alpha is an academic honor society open to fraternity/sorority members who are juniors or above and have earned at least a 3.5 cumulative GPA.

For more information call 203-582-7309 or email fslife@qu.edu (FSLife@qu.edu).

University Laptop Program

Faculty design their courses with the expectation that students will have computer technology in the classroom when requested. For that reason, all incoming students must have a laptop that meets our academic requirements and technical standards. To facilitate this need, Quinnipiac offers a laptop program (<https://www.qu.edu/info-for/information-technology-services/>) that is cost effective and exceptionally well supported both on and off campus. The recommended laptops are configured so that they meet the core needs of academic programs and are a key part of the campus computing infrastructure, designed to support new teaching and learning.

Learning Commons

The Learning Commons is a group of academic programs that provide support to members of the Quinnipiac community. On the Mount Carmel Campus, the Learning Commons is located in the north wing of the Arnold Bernhard Library. Please call reception with questions: 203-582-8628.

On the North Haven Campus, the Learning Commons is located on the second floor of the School of Law Center. Please call reception with questions: 203-582-7851. The Learning Commons offers the following support services:

Peer Academic Support

At Quinnipiac, the work a student does with their professor is complemented by a strong peer support system.

The **Peer Catalyst (PC) Program**, certified by the College Reading and Learning Association, supports mostly first-year students. Peer Catalysts serve both as facilitators of student learning and as observers of student behaviors and attitudes. These functions are complementary and allow PCs to be valuable resources to both students and faculty. Peer Catalysts, like their chemical namesakes, help students transition from one state to another, from being a high school student to being a QU student. PCs work alongside students and faculty members to support students' development of lifelong learning skills, achievement in FYS and other

courses, and utilization of opportunities on campus. Their work consists of taking part in class meetings and meeting with students out of class.

The **Peer Fellow Program**, developed from the Supplemental Instruction model by a certified coordinator, provides weekly study groups for various challenging gateway classes for majors. Trained in group dynamics and active learning, Peer Fellows attend each class meeting, develop a weekly agenda with the professor, and meet with interested students to work on topics and challenges so that students can increase their chance of academic success. Peer Fellow study session schedules are posted on the Learning Commons web page and also are available at our reception desk.

The **Peer Tutoring Program**, certified by the College Reading and Learning Association, provides individual tutoring for the great majority of 100-level courses and many 200- and 300-level courses, and supports many of the graduate degree programs. Students meet with peer tutors on an appointment basis to address material in a specific course. Tutors also can help students improve study skills, time and task management and academic goal-setting.

The **Study Table Program** serves students enrolled in various foundational courses, including mathematics, chemistry and physics. A study table is a venue of support where students can drop in with questions they may have on homework or an upcoming test. Study table mentors can support both individuals and groups. Students visiting a study table should bring prepared questions on specific topics so that there is a focus for the visit. Study tables are also useful for guided group support when students have similar questions in the same class. Study table schedules are posted on the Learning Commons web page and also are available at our reception desk.

Support for Students with Disabilities

The Office of Student Accessibility (OSA), located in the Learning Commons on both campuses, provides students with disabilities equal access to all university activities, programs and services. The office is led by a director and supported by an assistant director as well as accessibility coordinators. Working collaboratively with all university departments to engage and support the intellectual and social development of students with disabilities, the Office of Student Accessibility employs policies that promote equal access for academic excellence and the development of self-advocacy skills. Reasonable accommodations are provided based on submission of appropriate documentation, which is reviewed by the OSA staff in compliance with university policy, section 504 of the Rehabilitation Act, and the Americans with Disabilities Act as amended in 2008 (ADAAA). Questions and requests can be directed to access@qu.edu or 203-582-7600. Further information, including our Accommodation Request Form, can be found on our website.

Academic Development and Outreach

Students can work with one of our professional staff members to address their academic goals and to discover their strengths. Working closely with students' professors and other support staff, Quinnipiac's academic specialists and academic coaches provide students with opportunities to discover and leverage their strengths. Students can develop an action plan, work on problem solving, discuss new learning strategies, and many other topics necessary to students embracing academic challenge. Our professional staff also work with students who have been referred to our services by their faculty through Quinnipiac's early alert system. This program helps direct individual students to appropriate academic support during the semester and facilitates dialogue among those working to

support the student. Academic specialists and academic coaches also work with faculty to bring learning skills into the classroom.

Academic Coaches

Our academic coaches work specifically with first-year students, starting at orientation and carrying through their entire first year. A consistent point of contact for first-year students, academic coaches connect individually with first-year students over the summer to welcome them and to address any questions that may have arisen after their orientation. They provide developmental advising, addressing topics such as self-regulatory behaviors, appropriate autonomy, future focus, and the nature of self-efficacy, one's perceptions of one's abilities and values. Academic coaches are very aware of the transitional challenges faced by new members of our intellectual community and work to engage students in meeting those challenges successfully.

Academic coaches:

- connect individually with first-year students early, during orientation and throughout the entire first year
- help new students address Quinnipiac's academic expectations.
- engage in developmental advising
- discuss, model and encourage evidence-based learning strategies
- address transitional challenges faced by new members of our intellectual community

Academic Specialists

The academic specialists offer a similar set of resources as academic coaches, but their audiences are students beyond their first year, faculty members and programs. Academic specialists, by virtue of the breadth of their work, help students continue to develop the skills and mindsets introduced to them by our academic coaches. The specialists also work with faculty and programs, collaborating on student support initiatives. Academic specialists are full-time, professional staff members that generally work during business hours.

Academic specialists:

- help students continue to develop the skills and affects introduced to them by our academic coaches
- re-contextualize the evidence-based learning strategies and developmental work begun in the first year
- help students adjust to and address the increasing demands of cognition and affect, often through metacognition
- share data collected through Learning Commons support activities is shared with faculty and programs, identifying opportunities for support and development

Office of Student Conduct and Community Standards

The Office of Student Conduct and Community Standards promotes a safe and inclusive university environment by helping students and student organizations to engage positively with the university community, define their values, and demonstrate responsible behavior on and off campus.

The Office of Student Conduct and Community Standards:

- Advises and assists parties involved in conduct proceedings
- Trains and advises student conduct officers and student leaders

- Facilitates conduct meetings
- Reviews decisions of the code of conduct process
- Maintains all student disciplinary records
- Collects and disseminates data and trends concerning student conduct
- Provides educational outreach programs for students

The Office of Student Conduct and Community Standards is located in the Student Affairs Building on Bobcat Way and is open Monday through Friday, 9 a.m. to 5 p.m. For more information please call **203-582-8753**.

Making a Referral to the Office of Student Conduct and Community Standards CARE and Conduct Incident Reporting Form

The **CARE and Conduct Incident Reporting Form** (https://cm.maxient.com/reportingform.php?QuinnipiacUniv&layout_id=0) should be used to report any behaviors of concern to the appropriate individuals at Quinnipiac University, including but not limited to: concerns related to the well-being of a student, potential violations of the Student Code of Conduct (<http://catalog.qu.edu/handbooks/undergraduate/student-conduct-community-standards/student-code-conduct/>), and general student behavioral concerns regardless of whether they occur on or off campus.

NOTE: The form should **NOT** be used to report emergencies. If you or another person is in immediate danger, if a student is about to harm themselves or others, and/or if a student is found gravely disabled and cannot care for their health and safety please **call 911 immediately**. If you need immediate assistance in non-emergency situations or are concerned about the well-being of a student outside of business hours, please call Public Safety at 203-582-6200.

Student Learning Outcomes

As a result of participating in the Student Conduct process, students will achieve the following competencies:

- Critical Thinking and Reasoning:** Analyze their behavior and its effect on the community.
- Responsibility:** Identify the impact of personal decisions.
- Social Intelligence:** Define their personal values.

Department of Public Safety

The Department of Public Safety provides the following services for the university community:

- Vehicle and foot patrol of all three campuses, 24 hours a day, seven days a week.
- 24-hour staffing at campus gate entrances.
- Response to all emergencies and requests for assistance, including medical emergencies.
- Investigation of all complaints and completion of written follow-up reports.
- Regular security checks of all residential and academic buildings.
- Escort service (walking escort) 24 hours a day, seven days a week.
- Security services for all student and university events.

The Department of Public Safety maintains a close working relationship with local, state and federal law enforcement partners and other

emergency service agencies on matters related to the security and safety of the university community. For routine inquiries, the department can be reached at 203-582-6200. For emergencies, dial 911.

Office of Religious Life

The Office of Religious Life organizes religious programs and events at the university. The three staff religious leaders (Catholic priest/chaplain, Protestant chaplain and Muslim religious life coordinator) oversee their respective communities at Quinnipiac; they coordinate worship and prayer services, and provide spiritual/pastoral counseling. For those students belonging to a community not represented on campus, the office can provide assistance in making connections with local religious resources. The Office of Religious Life serves as a resource to the university on issues of religion, ethics and spirituality. The staff members work to raise the visibility of religion on campus through tradition-specific as well as interfaith programming, and when required, provide a religious presence at university events.

The Center for Religion

The Center for Religion is an integral part of the Office of Religious Life. Its mission is to bring religious voices, viewpoints, beliefs and practices into an engagement with the larger university community to help our students become more fully flourishing, humane individuals, empowered to change the world for the good. Everyone is welcome to participate in the center programs regardless of religion, perspective or belief. The center is committed to fostering a truly diverse, respectful and inclusive space at Quinnipiac.

For more information, contact the executive director of university religious life at 203-582-8257.

All Jewish events are held at the Peter C. Hereld House for Jewish Life, 560 New Road. For information about Jewish life at Quinnipiac, contact the rabbi at 203-582-8206.

Student Learning Outcomes

Through its mission to bring religious voices, viewpoints, beliefs and practices into an engagement with the larger university community, the Center for Religion creates programs focused around six areas, or vectors.

As a result of participating in a Center for Religion program, students will:

- Consider various viewpoints to expand their **religious literacy**.
- Identify opportunities for local, national and global **advocacy**.
- Explore the human experience through **social justice**.
- Examine **meaning and values**.
- Engage in **community building**.
- Appreciate diverse cultures through a **global encounter**.

Residential Life

Residential Life

Quinnipiac recognizes that learning occurs both in and outside of the classroom. The Office of Residential Life provides rich opportunities that promote student learning and enhance personal development. Students have the unique opportunity to live with students from a variety of diverse backgrounds.

The Office of Residential Life has two convenient locations for students. The Mount Carmel Campus office is located in the Student Affairs Center on Bobcat Way. The telephone number is 203-582-8666. The York Hill Campus office is located on the fourth floor of the Rocky Top Student Center. The telephone number is 203-582-3615.

University-Owned Housing

The university offers a variety of student housing options. Students typically progress toward more independent living from year to year.

Quinnipiac housing is guaranteed for three years for incoming first-year students. Approximately 4,000 students live in university housing, which includes traditional residence halls, suites, apartments and off-campus houses.

First-year students are offered a variety of living options: Irma, Dana, Commons and Ledges are traditional residence halls with two to three people to a room and a community bathroom; Mountain View, Larson, Perlroth and Troup are suite-style residence halls consisting of four double-occupancy rooms and a suite bathroom.

Sophomores choose between suite-style housing offered in the Village or apartments in the Hill, the Complex (Founders, Sahlin and Bakke) and the Crescent. The units in Larson, Perlroth and Troup feature four double-occupancy bedrooms. The units in Founders, Sahlin and Bakke feature one double-occupancy bedroom and two single-occupancy bedrooms. Sophomores and juniors may also live on the York Hill Campus in apartment-style housing offered in the Crescent.

Juniors and seniors may select from available apartment-style housing in the Crescent, Townhouses, Westview or off campus at Whitney Village. Apartments provide one to four bedrooms, a furnished living room, oversized bathroom and a kitchen.

Seniors and some juniors may also select from available apartment-style housing at Eastview and university-owned houses. Many seniors have single bedrooms. Students living in university-owned houses are minutes away from the Mount Carmel and York Hill campuses.

Graduate housing is available on a first-come, first-served basis. Students have single bedrooms in the Crescent, Whitney Village or our university-owned houses and apartments.

Three-Year Housing Requirement and Exception Process

Quinnipiac University wants students to engage in the full experience of living on campus to maximize their personal and professional development. As part of that experience, all full-time undergraduate students enrolling in the fall or spring are required to live in QU housing for their first three years (until the end of their sixth academic semester, not including summer or winter terms).

Registration as a full-time student at the university during any fall or spring academic term constitutes acceptance of the housing requirement and will result in a housing assignment and charge, unless the student has requested and been approved for release from the housing requirement by the Office of Residential Life.

We want to make a Quinnipiac experience accessible to all students and will be considerate of individual circumstances as it relates to this housing requirement. Requests for release from the housing requirement will be considered in limited circumstances such as the following:

- Students who are married (including civil union or domestic partnership)
- Students who have dependents
- Students who are 24 years of age or older, as of September 1 of the academic year
- Veterans
- Students who are participating in a university-approved academic experience, such as study abroad
- Documented hardship/family health condition
- Students who live within a 25-mile drive of campus at their permanent legal residence (home address) with a parent, legal guardian, sibling or will be living with an immediate family member (parent, grandparent, sibling) who is over the age of 25 at their permanent legal address.

Please know, the university reserves the unfettered right to make changes to this approach at any time based on world issues.

Residential Curriculum

The Office of Residential Life provides intentional learning experiences for all residential students through the implementation of our residential curriculum. The curriculum is a framework for providing sequential learning to students throughout their academic careers. Our curriculum focuses on five key competencies: wellness, social and emotional intelligence, academic and career success, inclusive excellence, and community citizenship. Our educational priority is that, by living on campus, students will develop a strong sense of self and become engaged, responsible and inclusive members of their current and future communities.

There are 22 learning outcomes of the residential curriculum.

- a. Identify types of wellness (physical, mental, social, emotional, spiritual and financial) and how they are connected.
- b. Demonstrate knowledge of campus and community resources that support wellness.
- c. Define healthy habits to maintain physical, mental and spiritual well-being.
- d. Gain an understanding of financial literacy.
- e. Reflect on their personal interests, values, skills, traits and identity.
- f. Effectively communicate needs, ideas, thoughts and perspectives.
- g. Acknowledge change and successfully manage conflict.
- h. Develop meaningful relationships through engagement in opportunities for connection and mentorship.
 - i. Understand the value of a well-rounded liberal arts education.
 - j. Demonstrate knowledge of university advising structure and related academic support resources.
- k. Utilize resources based on individual needs and aspirations.
 - l. Explore, assess and develop academic and professional interests, values and goals.
- m. Engage in experiences to explore the intersection of life, academics and career planning.
- n. Reflect upon and articulate dimensions of one's own identity.
- o. Recognize the needs, ideas and values of others.
- p. Participate in healthy and respectful dialogue about social identities, values and beliefs.
- q. Demonstrate a respect for others' lived experiences.

- r. Understand the strength that comes from diverse local, national and global perspectives.
- s. Recognize the impact of actions and words on community.
- t. Advocate for and with others.
- u. Participate in civic engagement to positively impact the community.
- v. Practice and promote local and global sustainability.

Rocky Top Student Center

The Rocky Top Student Center serves as the living room for the York Hill Campus. This lodge-inspired design, which uses 10 different types of wood, instantly transports students and community members with expansive vistas of New Haven and Long Island Sound. It is easy to marvel at the attention to detail in every aspect of the Rocky Top Student Center as students are surrounded by 293 representations of the Quinnipiac mascot.

Similar to the Carl Hansen Student Center, the Rocky Top Student Center aims to provide opportunities for the Quinnipiac community to come together in a relaxed atmosphere and also offers a variety of services and functions for all members of the Quinnipiac community which include:

Banking

There is an ATM located by the Information Center on the second floor of the Rocky Top Student Center near the main entrance for use during normal business hours.

eSports Lab

The eSports Lab in the Rocky Top Student Center is open to competitive and casual gamers. The facility features 24 PC stations and a lounge space to play console games. It is home to the 2021 MAAC Regular Season Champions SSBU team.

Information Booth

The Information Booth is centrally located on the second floor of the Rocky Top Student Center near the main entrance. It is a resource for the Quinnipiac community and visitors. The Information Booth, staffed by student employees, is open five days a week, Monday through Friday, 9 a.m. to 10 p.m. Student staff members are available to provide information pertaining to campus events and directions for procedures unique to student life on campus.

Office Locations

The fourth floor houses additional offices for the Department of Campus Life, the Office of Residential Life, and Wellness. In addition to these offices there is a shared organizational suite for the Student Government Association, Student Programming Board, and Residence Hall Council and a conference room for students, faculty and staff.

On the Rocks

On the Rocks Pub & Grill is located on the second floor of the Rocky Top Student Center. The space is outfitted with 16 flat screen TVs, gaming tables, an AV system and a variety of seating and dining options. On a limited basis, the space may be reserved for special events. Student organizations should follow typical event registration processes, while departments/offices may contact the Department of Facilities Events staff at universityscheduling@qu.edu.

Post Office

A post office is located in the Rocky Top Student Center on the second floor near the Information Booth. Mailboxes for residential students living on York Hill are also located in the building.

Public Safety

The York Hill Public Safety office is located on the first floor of the Rocky Top Student Center. Students can call or drop in to address any questions or concerns.

Student Health Services

The Rocky Top Student Center has traditionally housed a health center. Quinnipiac University is partnering with Hartford HealthCare to provide on-campus healthcare.

Division of Student Affairs

Student Affairs Vision Statement

To engage, educate and empower students.

Student Affairs Mission Statement

The Division of Student Affairs cultivates vibrant co-curricular experiences and partnerships that prepare students to discover and pursue their personal and professional goals. To foster a sense of belonging and affirm the value of all students, we develop inclusive and supportive learning environments. We provide exceptional services and opportunities that encourage students to thrive as responsible citizens.

The Division of Student Affairs includes the following offices:

- Dean of Students
- Campus Life: New Student & Family Orientation, Student Centers and Student Involvement, Fraternity and Sorority Life, Campus Recreation, and Community Service
- CARE Team
- Graduate Student Affairs
- Health and Wellness: Counseling Services, Student Health Services, Fitness and Well Being
- Religious Life
- Residential Life
- Student Conduct & Community Standards

Student Learning Outcomes

Student Affairs has integrated the Quinnipiac University Essential Learning Outcomes (p. 41) throughout the student experience. As such, students who engage in Student Affairs programs and experiences will:

- Demonstrate, integrate and apply knowledge
- Think critically and creatively
- Communicate effectively
- Conduct inquiry and analysis effectively
- Engage collaboratively and responsibly
- Act as responsible intercultural citizens of a diverse world

For office-specific programmatic learning outcomes, please see the following:

- Campus Life Learning Outcomes (p. 25)
- Religious Life Learning Outcomes (p. 32)
- Residential Life Learning Outcomes (p. 33)
- Student Conduct Learning Outcomes (p. 32)

Student Health Services

Quinnipiac has contracted with Hartford HealthCare's Campus Care program to provide high-quality, coordinated health and wellness services to manage students' complete care needs, from physical and mental well-being to athletic training for the university's Division I athletes. Please check the university website for the most up-to-date information.

In cases of emergency, call 911 or contact the Department of Public Safety at 203-582-6200.

Mount Carmel Campus

Located in the Health and Wellness Center on the Mount Carmel Campus, Student Health Services is open Monday–Friday, 8 a.m. to 8 p.m. and Saturday & Sunday, 10 a.m. to 4 p.m. The health center is staffed by a licensed provider during all open times. Licensed providers include a physician, nurse practitioner or physician assistant. The highest priority of the staff is meeting the emergent health needs of the student population and providing ongoing health education opportunities as an integral part of the college experience. All questions should be directed to Student Health Services at 203-582-8742.

Services are available only to students who have completed the Student Health Services requirements, which include an online personal health form, consent and signature page, tuberculosis screening/testing form and a copy of required immunizations. Students who do not comply are not permitted to register for classes or receive their university housing assignments. The information provided becomes the basis for the student's confidential medical record within Student Health Services.

All charges for referrals, diagnostic procedures and lab work will be billed directly to the student's insurance. Quest Diagnostic Laboratory is the default laboratory, where all specimens are sent unless the student advises the healthcare provider otherwise. To process bills for insurance reimbursement follow the instructions on the bill.

The following immunizations are required by law:

- Meningitis conjugate (A, C, Y, W) immunization is required of anyone living in university-owned housing and must be administered within five years of enrollment. Meningitis B vaccine is strongly recommended.
- Two MMR (measles, mumps and rubella) or positive titer, as indicated by lab report
- TB screening, per guidelines listed on the form
- Two Varicella (or proof of having the disease) or positive titer, as indicated by lab report
- Vaccination against Hepatitis B is strongly recommended and may be required by certain clinical programs.

Quinnipiac University has developed a health insurance plan especially for students. The plan provides coverage for illnesses and injuries that

occur on and off campus and includes special cost-saving features to keep the coverage as affordable as possible.

This is a hard waiver program, which means that all students **MUST** maintain major medical insurance. A student may waive health insurance coverage if they present evidence of other health insurance under a plan that provides benefits equal to or greater than the Quinnipiac University Student Health Insurance Plan. Students must document evidence of coverage and make an online waiver decision by the waiver deadline of August 31. Visit the Gallagher site at gallagherstudent.com for additional information regarding the plan. If you plan to waive, your current insurance must be fully compliant with the Affordable Care Act and provide access to doctors near your school. **You must also verify with your insurance company that Hartford HealthCare is an in-network provider.**

Prescriptions ordered by a health center provider may be sent to local pharmacies to be filled at the usual and customary fee or students have the option to purchase some prescribed medications through Student Health Services.

Class excuses are not issued to students. Students who are ill are expected to contact their respective professors to inform them of their illness. Particulars of student visits are not shared unless a student completes a release of information form. Parents or legal guardians are notified of serious illness and emergencies at the discretion of the professional staff. For additional information, visit the Student Health Services website on the Student Life tab at the top of the page.

Students under the age of 18 must obtain written parental consent prior to obtaining treatment at Student Health Services. The only exceptions are when immediate medical attention is necessary or the student seeks: 1) testing for HIV; 2) an examination or treatment of a venereal disease; 3) mental health treatment; 4) an abortion, or 5) alcohol or drug rehabilitation.

York Hill Campus

Student Health Services also has a location on the York Hill Campus, on the ground floor of the Rocky Top Student Center, opposite the "H" entrance of the Crescent Residence Hall. A healthcare provider, under the direction of the Student Health Services medical director, is available Monday through Friday, noon to 8 p.m. Again, services are available only to those students who have submitted the required information as outlined above.

Technology Assistance

All incoming students are required to have a laptop computer readily available to them with no exceptions. Information Services annually recommends a specific hardware and software laptop configuration that meets or exceeds these technical standards (specific information on the most current program can be found on the Quinnipiac laptop technology (<https://www.qu.edu/info-for/information-technology-services/>) webpage). By selecting the recommended laptop, students will receive exceptional service and support on and off campus. Students who elect to bring their own laptops to campus (other than the recommended ones) also will be afforded technology assistance often of a less comprehensive nature due to the many possible variations of alternatives. Quinnipiac has two Technology Centers, where faculty and students can receive computer repair services as well as assistance with various equipment and computer software programs licensed to

Quinnipiac University. Ultimately, it is the responsibility of the student to perform in the classroom.

Although laptops meet the vast majority of student needs, for those disciplines that require more specialized hardware or software, the university has more than 800 computers in 36 computer laboratories throughout the campus. In addition there are numerous virtual labs which host program-specific software available through virtual desktops that can be accessed from anywhere. The university maintains a secure and advanced data network that connects all university computers on all three Quinnipiac campuses. Students, faculty and staff are able to access this secure network through wired and wireless access. Wireless access is found across all three campuses, including the residence halls, classrooms, athletic fields and public areas.

The Arnold Bernhard Library is open from 8 a.m.–midnight Monday–Thursday, 8 a.m.–5 p.m. on Friday, 9 a.m.–5 p.m. on Saturday, and noon–midnight on Sunday during the academic year, and contains more than 50 publicly available computers. The library also provides an extensive collection of online bibliographic databases and full text journals for use in the library or remotely through the campus network.

Transitional Services for Underrepresented Students

Quinnipiac is committed to ensuring that underrepresented students (international students, students of color and first-generational students) have a successful educational experience.

QUEST Mentoring

The Quinnipiac University Enriching Student Transitions Program (QUEST) is a mentoring program focused on easing incoming underrepresented students' transition (students of color, first-generation and international students) to the university. The Department of Cultural and Global Engagement pairs incoming students with a faculty or staff mentor and a peer mentor to assist with the academic and social transitions. First-year students are recruited during the summer before their arrival in the fall semester.

QU First-Year Immersion

Research suggests that summer immersion programs help facilitate a successful student transition to university life, improve academic performance, increase retention rates and lead to on-time graduation. Quinnipiac University has established a First-Year Immersion (QU FYI) summer program for admitted students from traditionally underrepresented and marginalized groups. Students participate in social, cultural and academic initiatives during this residential program and fully immerse themselves into the Bobcat community while laying a solid foundation for future success.

For further information and assistance, please contact the Department of Cultural and Global Engagement at 203-582-8425.

Athletics

Quinnipiac recognizes the importance of athletics in student life. The university supports 21 highly competitive, Division I intercollegiate teams. For specific program information, email athletics@qu.edu.

Athletics

NCAA Division I intercollegiate athletic teams for men include baseball, basketball, cross-country, ice hockey, lacrosse, soccer and tennis. Women compete in acrobatics and tumbling, basketball, cross country, field hockey, golf, ice hockey, indoor and outdoor track, lacrosse, soccer, tennis, rugby, softball and volleyball.

Quinnipiac has full memberships in the following NCAA Division I conferences:

- Metro Atlantic Athletic Conference (MAAC)
- ECAC Men's and Women's Ice Hockey
- Big East (Field Hockey)
- National Collegiate Acrobatics and Tumbling Association
- National Intercollegiate Rugby Association (NIRA)

Spirit Groups

Several spirit groups lend their support to athletic teams. The Quinnipiac Pep Band, Boomer the Bobcat (mascot), Sideline Cheer and Ice Cats perform at a variety of athletic events. The university dance teams are often regular performers and crowd favorites as well!

Campus Resources

Bioanthropology Research Institute

Quinnipiac's Bioanthropology Research Institute, administered through the College of Arts and Sciences, provides research opportunities for students and faculty in a variety of disciplines; anthropology is naturally interdisciplinary, and our focus on imaging, bioarchaeology, and forensic science integrates the sciences, humanities and arts. Research projects, field experiences and international coursework provide unique opportunities to experience current and ancient cultures, often leading to publications and presentations at professional conferences. The Bioanthropology Research Institute has formal relationships with many well-known domestic and international museums.

Students should contact the Bioanthropology Research Institute for more information.

Clarice L. Buckman Center

This building houses science laboratories, faculty offices and classrooms. In the center is the Clarice L. Buckman Theater, a 177-seat auditorium, which is used for guest lectures.

Center for Communications and Engineering

The Center for Communications and Engineering houses the School of Communications, the School of Computing and Engineering and the Mount Carmel Auditorium. The main floor includes collaborative classrooms, a multimedia computer classroom, a design studio, an open media lab and an audio/video equipment loan facility. The lower level includes engineering workshops and a machine shop. The building also houses the Office of Multicultural and Global Engagement, the Center for Psychological Science, Academic Innovation and Effectiveness, plus faculty and administrative offices.

Echlin Center

Echlin Center houses the offices of Undergraduate Admissions and Financial Aid, faculty offices and classrooms. The Kresge Foundation Lecture Hall and Perlroth Boardroom are located here.

Terry W. Goodwin '67 Financial Technology Center

The 2,000 square-foot Terry W. Goodwin '67 Financial Technology Center, housed in the Lender building, is a state-of-the-art Wall Street trading room. The center provides access to various economics, accounting and financial information through subscriptions to Bloomberg, S&P Global Capital IQ, and Rotman Interactive Trader etc. Such subscriptions, along with the software installed in the center's computer workstations, enable students to retrieve real-time financial data, develop financial analytical skills, conduct trading simulations and build financial models. Students can make real-time investment decisions and learn how the financial markets work by managing a real-life student portfolio.

Ireland's Great Hunger Institute

Ireland's Great Hunger Institute is a scholarly resource for the study of the Great Hunger, also known as An Gorta Mór—the Famine that devastated Ireland from 1845 to 1852 and continues to have repercussions and relevance in the world today. Through a program of exhibitions, lectures, conferences, course offerings and publications, the institute fosters a deeper understanding of this tragedy and its causes and consequences. The institute's collection includes rare primary and secondary sources and artifacts relating to the history of modern Ireland. The institute is located on the Mount Carmel Campus. For more information about its work and program of events, please contact ighi@qu.edu (ighi@quinnipiac.edu).

Lender School of Business Center

The Lender School of Business Center at Quinnipiac University is a multipurpose complex that houses state-of-the-art collaborative classrooms with multi-screen, interactive technology; lecture capture classrooms with the latest learning support technology; student collaboration spaces for informal collaboration, meetings, and study; dedicated student team meeting rooms; a Career Development Resource Center with dedicated student and employer resources, interview rooms, and networking space; and faculty and dean's offices. This complex is also home to the People's United Center for Innovation and Entrepreneurship, where students can meet with their mentors for financial, legal, marketing and technical guidance in turning their ideas into viable business solutions.

Libraries

The Arnold Bernhard Library on Quinnipiac's Mount Carmel Campus and the Edward and Barbara Netter Health Sciences Library on the North Haven Campus serve the undergraduate and graduate populations of the university and provide support for the Quinnipiac University School of Law.

Approximately 48,000 square feet in size, the Arnold Bernhard Library provides 600 seats, 16 group rooms, a 30-seat instructional facility, more than 60 public computers and wireless connectivity. In addition to the group study rooms, the library features individual study carrels, tables, soft seating and rocking chairs, all with magnificent views. Supporting this facility are the combined staffs of the library, academic technology and media services. The Arnold Bernhard Library building also houses

the clock tower, the executive suite, the Provost suite, the Learning Commons, the Offices of Administrative Services, One Stop, Registrar and Procurement.

The Edward and Barbara Netter Health Sciences Library is the primary library for Quinnipiac University's Schools of Medicine, Nursing and Health Sciences. The library is equipped with 17 public computer workstations, printers, scanners, copiers, study carrels and plenty of soft seating, which provides spectacular views of the North Haven Campus.

Each library offers a large variety of web-based resources, including ebooks, e-journals and databases as well as print volumes, microforms and audiovisual materials.

Ed McMahon Communications Center

Housed within the Lender building is the Ed McMahon Communications Center (McMahon Center), a first-class digital media production facility providing students with a spacious, professional-level high-definition television (HDTV) studio, a wireless multi-platform newsroom with the Associated Press wire service through the Electronic News Production System (ENPS), advanced digital video editing suites, multiple 4K collaborative edit suites, production labs for mobile application design, website development, and motion graphics, a remote media production resource depot, and a screening room with HD video projection and theater-quality 7.1 surround sound. Additionally, there are over 90 iMac stations running the latest applications for digital media production including 360 technology and acquisition and a Virtual Reality Lab utilizing the latest hardware and software. Content is managed through a Ross media server with additional capture and distribution provided by LiveU and Youtube Live.

Quinnipiac University Poll

Quinnipiac University Poll, at 20-60 West Woods Road, regularly surveys residents in Colorado, Connecticut, Florida, Iowa, New Jersey, New York, Pennsylvania, Ohio, Virginia and nationally about political races and issues of local, regional and national concern.

Albert Schweitzer Institute

The Albert Schweitzer Institute at Quinnipiac University enhances the student experience through various travel and experiential learning opportunities focused on environment/sustainability, human health and development, and peace and human rights. The institute hosts world leaders on campus and explores issues related to Schweitzer's philosophy of *Reverence for Life*. The facility at 660 New Road contains a museum illustrating Schweitzer's legacy, a conference room that hosts exhibits and events, and outdoor gardens and green infrastructure. See the Albert Schweitzer Institute (p. 25) page for more information.

Theatre Arts Center

Located at 515 Sherman Avenue, this flexible 12,000-square-foot center is a specifically designed performance space, featuring a baby Steinway piano and a completely customizable layout. The facility includes a costume shop and storage, a scene shop, a lighting and management booth and academic spaces, making it a hub for theater and music performances. It also includes a black box theater.

ACADEMICS

Schools and Colleges

All Quinnipiac University programs fall within nine major academic areas:

- College of Arts and Sciences (p. 139)
- School of Business (p. 303)
- School of Communications (p. 359)
- School of Computing and Engineering (p. 409)
- School of Education (p. 442)
- School of Health Sciences (p. 468)
- School of Law (p. 581)
- Frank H. Netter MD School of Medicine (p. 639)
- School of Nursing

Programs

For information on any of Quinnipiac's programs, click on the appropriate link below:

- Bachelor's Degree Programs (p. 38)
- Undergraduate Minors (p. 44)
- Graduate and Combined Degree Programs (p. 42)
- Special programs, such as Pre-Law (p. 46), Pre-Dental (p. 45) and Pre-Medical Studies (p. 47) as well as the Honors Program (p. 44)

Academic Honors

Dean's List

Students who excel in scholarship by earning a grade point average of at least 3.50 with no grade lower than C are recognized by being placed on the dean's list. Full-time students must complete at least 14 credits in a semester, with at least 12 credits that have been graded on a letter grade basis (A through C), to be eligible. Part-time students must complete at least 6 credits during a semester.

Dean's List with Honors

Students who excel in scholarship by earning a grade point average of 4.00 are recognized by being placed on the dean's list with honors. Full-time students must complete at least 14 credits in a semester, with at least 12 credits that have been graded on a letter grade basis (A through C), to be eligible. Part-time students must complete at least 6 credits during a semester.

Degrees with Honors

Students who have demonstrated superior scholarship, who have fully completed all coursework and requirements for their bachelor's degrees and who have attended Quinnipiac for at least 60 credits immediately prior to graduation are eligible to receive degrees with honors. Designation on diplomas and transcripts is based on grade point averages as follows:

Summa Cum Laude	3.90–4.00
Magna Cum Laude	3.70–3.89
Cum Laude	3.50–3.69

GPA's are not rounded; they are truncated at the hundredths place.

A complete list of academic awards and honor societies is available in the Academic Awards and Honor Societies (p. 937) section of the catalog.

Undergraduate students with strong academic records and extensive intellectual curiosity may apply to the Honors Program (p. 44).

Academic Outcomes Assessment

Academic outcomes assessment at Quinnipiac University is based on objectives identified by faculty and administrators for specific academic and support programs. The process employs a variety of measurements to discover, as accurately as possible, whether the programs are achieving the student learning outcomes in areas such as general education and major programs of study.

The purpose of academic outcomes assessment is to produce feedback to the department, school/college or administrative unit on the performance of the curriculum, learning process and/or services, thereby allowing each unit to improve program offerings. As part of providing feedback to faculty, student work (that has been de-identified) may be used for faculty development. This type of assessment is not for the purpose of evaluating performance of an individual student, faculty member or staff member.

Measurements may be drawn from surveys, course evaluations, placement tests and a variety of other standardized or locally developed tests. For example, required course assignments and examinations may be used first as a basis for course placement or for assigning grades to a student, and then later used again in an outcomes assessment for an academic or support program. In these cases, the outcomes assessment is conducted as a process separate from and without influence on the course placement or grading process for individual students.

Whenever academic performances are used in outcomes assessment, confidentiality of individual student identities is strictly maintained. Outcomes assessment results for academic and support programs do not disclose analyses at the level of the individual student without written permission from the student.

Majors

Bachelor's Degree Programs

Quinnipiac offers undergraduate programs leading to bachelor of arts or bachelor of science degrees.

Bachelor of Arts (BA)

- Advertising and Integrated Communications (p. 403)
- Communications (p. 397)
- Computer Science (p. 426)
- Criminal Justice (p. 217)
- English (p. 197)
- Environmental Studies (p. 149)
- Film, Television and Media Arts
- Game Design and Development
- Gerontology (p. 278)
- Graphic and Interactive Design (p. 387)
- History (p. 207)

- Independent Major (p. 143)

Graduate Degree Programs and Dual-Degree Programs

See the Graduate Degrees page (p. 42) for information on Quinnipiac's graduate and dual-degree programs.

Center for Excellence in Teaching and Service to Students

The Center for Excellence in Teaching and Service to Students recognizes the exemplary work of our faculty and staff at Quinnipiac University. Each year, six distinguished members of our community are honored for their dedication to students and their significant contributions to Quinnipiac's evolution as the University of the Future. The Center for Excellence in Teaching and Service to Students serves an important role in supporting President Judy Olian's strategic plan and its four pillars – to build an institution-wide mindset that prepares graduates for 21st-century careers and leadership; to create an inclusive, excellence-driven community; to nurture and positively impact internal, local and global communities; and to foster lifelong connections and success. To this end, the Excellence in Teaching Award and the Excellence in Service to Students Award reflect the highest professional standards at Quinnipiac. The university holds a formal celebration each fall to honor the recipients.

Center for Interprofessional Healthcare Education

The Center for Interprofessional Healthcare Education uses a collaborative approach that helps develop healthcare professionals who are capable of providing evidence-based, coordinated and patient-centered health care. The center enables faculty, students and

community partners to learn together, identify effective and efficient delivery options and engage in team practice that meets the challenges of 21st-century healthcare.

The overarching purpose of the Center for Interprofessional Healthcare Education is to give students in the School of Health Sciences, School of Nursing, and Frank H. Netter MD School of Medicine the opportunity to develop skills in hands-on, team-based healthcare environments, preparing them for all of the obstacles inherent in modern healthcare.

Interprofessional (IP) education is when students from two or more professions learn about, from and with each other.¹ The goal of interprofessional education is to help prepare future health professionals for enhanced team-based care of patients and improved population health outcomes.²

Educational opportunities from the Center for Interprofessional Education revolve around the quadruple aim of healthcare: improve the patient experience of care, improve the health of populations, reduce the per capita cost of healthcare and improve the work life of healthcare providers.³ The center embeds the core competencies of interprofessional education (values and ethics, roles and responsibilities, interprofessional communication, and teams and teamwork²) into various learning activities to better prepare students to become high-quality healthcare providers.

The program of distinction is an optional program that enables groups of students from all of Quinnipiac's healthcare-based programs to develop the core competencies of interprofessional, team-based health care.

Program requirements include 60 hours of knowledge and skills development, experiential learning activities. Graduating with the distinction in interprofessional healthcare education gives students an advantage as it proves to employers that they have experienced the team dynamic that defines patient care today. A digital badge is a formal recognition certifying completion and competence of interprofessional education activities; badges can be displayed in a variety of online platforms including email, social media and social networking sites.

Visit the CIHE resource website on MyQ (<https://myq.quinnipiac.edu/Academics/CIPHE/Pages/default.aspx>) for a full list of offerings.

Visit the Interprofessional Healthcare (<https://www.qu.edu/academics/centers-and-institutes/center-for-interprofessional-healthcare-education/>) page on our website for more information.

Center for Teaching and Learning

Quinnipiac's Center for Teaching and Learning is a dedicated and passionate network of faculty and staff who work to build stronger educational communities and deliver more meaningful learning outcomes for our students. Together, we explore the principles of effective teaching, support scholarship and encourage collaboration across our three campuses, eight professional schools and the College of Arts and Sciences.

By infusing educational research with creative, critical and inclusive applications, the Center for Teaching and Learning encourages innovation and cross-pollination across our three campuses and professional support systems. Through the center, faculty and staff gain access to teaching guides built upon the latest scholarly literature in the space, arming them with the resources they need to better serve their students.

Our foundational materials empower educators to make student-centric adjustments to the ways in which they design courses for online and in-person formats, build a sense of community in unique learning environments, create assignments that promote active and engaged learning, assess student learning outcomes and leverage technology in the classroom.

We recognize that effective teaching is an ongoing pursuit of excellence — and one that is improved by constant discussion, discourse and the sharing of innovative ideas. Faculty and staff across all disciplines are encouraged to join us during assemblies, conferences, consortiums, development events, roundtables, seminars and more as we discover how to apply effective strategies across our diverse areas of professional expertise.

Essential Learning Outcomes

Approved by the Faculty Senate on March 15, 2021

A Quinnipiac University education provides students with both specialized knowledge of a discipline, and a broad understanding of human cultures and the physical and natural world. Quinnipiac graduates can integrate and apply knowledge from multiple perspectives found inside and outside of the classroom. They have a sufficient command of key forms of literacy, as well as the requisite intellectual, social, and personal skills and understanding, to identify and respond effectively to contemporary problems. Quinnipiac graduates demonstrate a number of key outcomes essential to the life and practice of a responsible, educated citizen, consciously and decisively. Graduates acquire these Essential Learning Outcomes (ELOs) through a purposeful integration of the University Curriculum, requirements within one's major, and co-curricular experiences.

- Disciplinary Knowledge
- Effective Communication
- Recognition of Differences and Equity
- Higher-Order Thinking
- Creative Thinking
- Inquiry and Analysis
- Social and Emotional Intelligence

For more information about the Essential Learning Outcomes, please see Quinnipiac's internal website (<https://myq.quinnipiac.edu/LearningParadigm/Pages/Essential-Learning-Outcomes.aspx>).

Experiential Learning Certificates

Inclusion, Diversity, Equity and Learning Certificate Program

The Inclusion, Diversity, Equity and Learning Certificate program (IDEAL) is intended for students who seek out opportunities to learn about the

broad variety of human experience. The College of Arts and Sciences offers a number of courses that focus on people in societies who have been historically underrepresented and underprivileged. By taking some of these courses, students are eligible to receive a certificate from the College of Arts and Sciences that reflects the commitment they have made to diversifying their college curriculum. Visit the IDEAL Certificate program page (<https://cas360.qu.edu/resources/ideal-certificate-program/>) for more information.

Community and Civic Engagement Badge

Students who are interested and meet the requirements are eligible to receive a badge from the Committee for Community and Civic Engagement that reflects the commitment they have made to be engaged community and world citizens through opportunities in designated courses and co-curricular community and civic engagement activities. Detailed information and application information can be found on the Community and Civic Engagement Badge page on MyQ. (<https://myq.quinnipiac.edu/Student%20Life/OOCS/Forms/Community%20and%20Civic%20Engagement%20Badge.pdf>)

Grading System

Achievement in a particular course is indicated by a letter grade that is translated into grade points for the student's record. Final grades are issued by the registrar at the close of each semester. Mid-semester standings are issued to first-year students in 100-level courses, apprising them of their progress.

Grade points earned in a course are determined by multiplying the point value of the letter grade (shown in the table below) by the number of credits of the course. A cumulative average is obtained by dividing the total number of grade points by the total number of credits taken at Quinnipiac and is calculated at the student level.

Faculty members are the most appropriate judges of how students perform academically. Except when a grade of Incomplete has been submitted, faculty shall not accept late work from students after the final course grade has been submitted to the Registrar or after the final grade due date, whichever comes first. Except when there are verifiable errors in the final grade calculation, faculty members shall not request changes in final course grades after submission to the Registrar.

Scale of Grades

Letter Grade	Numerical Range	Grade Pt. Value
A	93-100	4.00
A-	90-92	3.67
B+	87-89	3.33
B	83-86	3.00
B-	80-82	2.67
C+	77-79	2.33
C	73-76	2.00
C-	70-72	1.67
D	60-69	1.00
F	0-59	0.00

AU (audit)

Indicates the course was audited. This grade type is in effect for the Fall 2017 semester and beyond.

I (incomplete)

A grade of "Incomplete" or "I" indicates that a student has not satisfied all of the course requirements and has come to an agreement with the faculty member for an extension in order to complete the work. In addition, if grades are awarded while an academic integrity case is in progress, the faculty member must assign a temporary grade of "Incomplete" to the student pending the outcome of the academic integrity hearing board review process. Apart from academic integrity cases, the decision to issue a grade of Incomplete is made solely at the discretion of the faculty member. Incomplete grades must be requested by the student, and will be granted only if justified by compelling individual circumstances requiring additional time beyond the end of the semester to complete course requirements. A grade of Incomplete should not serve primarily as a mechanism to allow a failing student to earn a passing grade. Grades of Incomplete should be accompanied by a written plan for resolving the Incomplete grade, which includes documentation of outstanding work and the timeline for completion. This written plan shall be retained by the student, the faculty member and the department chair. An Incomplete grade automatically becomes an "F" if it is not removed within 30 calendar days following the end of the semester (last day of final exams) in which it was issued, or within a lesser period specified by the instructor. In exceptional cases, extensions beyond that normal period are permitted only with the written approval of the department chairperson. Any change in an Incomplete to a grade other than "F" after one year requires the written permission of the dean of the school, college or division.

W (withdrawal)

A student may withdraw from a course offered in a traditional semester (15 week) format up to the end of the 10th week of classes. For courses offered during the summer or in accelerated or other nontraditional formats, the withdrawal period extends up to the completion of 60 percent of the scheduled class sessions. Prior to the start of each semester, the specific withdrawal deadlines for all classes are published by the Office of the Registrar. Withdrawals must be recorded on an official form available in the registrar's office.

P (pass) Indicates "passed with credit" when no letter grade is given.

Z (audit) Indicates the course was audited. This grade type will no longer be offered after the Spring 2017 semester.

S (satisfactory) Indicates "passed with no credit."

U (unsatisfactory) Indicates "unsatisfactory work."

IP (in-progress) IP. Grade in Progress. This grade is intended for internships, research-based courses, thesis, dissertation, individual study, projects and seminar offerings. Other course types must have dean's approval and must have been filed with the registrar's office prior to grading. Failure to complete the work according to the agreed-upon timeline will result in a grade of "F." For courses required for degree completion, a grade must be given before the credential may be granted. Syllabi for courses approved for the IP grade option should note the reason for the provisional IP grade to be assigned at the end of the semester, as well as the time frame within which the students' final coursework will be evaluated and the IP grade will be replaced with a permanent grade. IP grades are not used in calculating grade point averages. Undergraduate students with grades of "IP" in a course(s) are not eligible for the dean's list.

Graduate and Combined Degree Programs

Arts and Sciences

- Accelerated Dual-Degree Bachelor's/JD (3+3) (p. 600)
- Accelerated Dual-Degree Bachelor's/MSW (3+2) (p. 281)

- Accelerated Dual-Degree BA in Theater/MBA (3+1) (p. 298)
- Accelerated Dual-Degree BS in Economics/MBA (3+1)
- Accelerated Dual-Degree BS in Economics/MS in Accounting (3+1)
- Accelerated Dual-Degree BS in Economics/MS in Business Analytics (3+1)
- Accelerated Dual-Degree BS in Economics/MS in Journalism (3+1)
- Accelerated Dual-Degree BS in Biochemistry/MS in Molecular and Cell Biology (3+1) (p. 173)
- Accelerated Dual-Degree BS in Biology/MS in Molecular and Cell Biology (3+1) (p. 165)
- Dual-Degree BA/MAT or BS/MAT in Elementary Education (4+1) (p. 684)
- Dual-Degree MA/MAT or BS/MAT in Secondary Education (4+1) (p. 687)
- Dual-Degree BA/MBA (4+1) (p. 689)
- Dual-Degree BS in Biology/MS in Molecular and Cell Biology (4+1) (p. 166)
- Master of Science in Molecular and Cell Biology (p. 168)
- Spanish Language for Medical Professionals Certificate (p. 241) (online)

Business

- Accelerated Dual-Degree BS/MS in Accounting (3+1)
- Accelerated Dual-Degree BS/MSBA (3+1)
- Accelerated Dual-Degree BS in Economics/MBA (3+1)
- Accelerated Dual-Degree BS in Economics/MS in Accounting (3+1)
- Accelerated Dual-Degree BS in Economics/MS in Business Analytics (3+1) (<http://catalog.qu.edu/arts-sciences/economics/economics-31-ba-msba/>)
- Accelerated Dual-Degree BS/MBA (3+1) (<http://catalog.qu.edu/graduate-studies/business/business-administration-mba/accelerated-four-year-bsm-ba/>)
- Dual-Degree BS/MS or BA/MS in Accounting (4+1)
- Dual-Degree BA/MBA (4+1) (p. 689)
- Dual-Degree BS/MBA (4+1) (p. 704)
- Dual-Degree BS/MSBA or BA/MSBA (4+1)
- JD/MBA (Juris Doctor) (p. 705)
- Master of Business Administration (p. 701) (online or on campus)
- Master of Science in Accounting (p. 705)
- Master of Science in Business Analytics (p. 708) (online or on campus)
- Master of Science in Organizational Leadership (p. 711) (online)
- Professional Master of Business Administration (online)

Communications

- Accelerated Dual-Degree Bachelor's/Master's (3+1) (p. 407)
- Accelerated Dual-Degree BS in Economics/MS in Journalism (3+1)
- Dual-Degree Bachelor's/Master's in Cinematic Production Management (4+1) (p. 727)
- Dual-Degree Bachelor's/Master's in Interactive Media and Communications (4+1) (p. 729)
- Dual-Degree Bachelor's/Master's in Journalism (4+1) (p. 730)
- Dual-Degree Bachelor's/Master's in Public Relations (4+1) (p. 731)
- Dual-Degree Bachelor's/Master's in Sports Journalism (4+1) (p. 733)

- Master of Arts in Cinematic Production Management (p. 720) (online)
- Master of Science in Interactive Media and Communications (p. 722) (online)
- Master of Science in Journalism (p. 723)
- Master of Science in Public Relations (p. 724) (online or on campus)
- Master of Science in Public Relations – Online/Professional Track (p. 725)
- Master of Science in Sports Journalism (p. 726)

Computing and Engineering

- Accelerated Dual-Degree Bachelor's/Master's (3+1)
- Badge in Enterprise Cybersecurity Risk Management in Healthcare (p. 737)
- Badge in Ethical Hacking and Penetration Testing (p. 737)
- Badge in Hands-On HIPAA Compliance Risk Management (p. 737)
- Badge in Hands-On HIPAA Security Risk Analysis and Risk Management (p. 737)
- Double-Degree BS in Industrial Engineering and BS in Health Science Studies (p. 482)
- Dual-Degree BA/MS or BS/MS in Cybersecurity (4+1) (p. 440)
- Master of Science in Cybersecurity (p. 737) (online)

Education

- Certificate of Completion in Special Education (p. 467) (online)
- Certificate in Online Course Design (p. 465) (online)
- Certificate in Social and Emotional Learning and School Climate (p. 454) (online)
- Dual-Degree BA/MAT or BS/MAT in Elementary Education (4+1) (p. 684)
- Dual-Degree BA/MAT or BS/MAT in Secondary Education (4+1) (p. 687)
- Dual-Degree BA/MS or BS/MS in Instructional Design and Technology (4+1) (p. 455)
- Master of Arts in Teaching – Elementary Education (p. 456)
- Master of Arts in Teaching – Secondary Education (p. 458)
- Master of Arts in Teaching – Special Education (p. 460)
- Master of Science in Instructional Design and Technology (p. 462) (online)
- Master of Science in Special Education (p. 463) (online)
- Sixth-Year Diploma in Educational Leadership (p. 465) (online)

Health Sciences

- Accelerated Dual-Degree Bachelor's/Master's in Social Work (3+2) (p. 281)
- Double-Degree BS in Industrial Engineering and BS in Health Science Studies (p. 482)
- Dual-Degree BS in Biomedical Sciences/MHS Pathologists' Assistant (4+2) (p. 489)
- Dual-Degree BS/MHS in Biomedical Sciences (4+1) (p. 491)
- Bachelor's/Doctor of Physical Therapy (DPT) (p. 558)
- Post-Baccalaureate Doctor of Occupational Therapy (p. 545)
- Master of Health Science in Advanced Medical Imaging and Leadership (p. 790)

- Master of Health Science in Biomedical Sciences (p. 792)
- Master of Health Science in Cardiovascular Perfusion (p. 796)
- Master of Health Science in Pathologists' Assistant (p. 815)
- Master of Health Science in Physician Assistant (p. 820)
- Master of Health Science in Radiologist Assistant (p. 824)
- Master of Social Work (p. 810)
- Post-Professional Occupational Therapy Doctorate (OTD) (p. 553) (online)

Law

Admission is through the School of Law. The School of Law has its own section of the academic catalog (p. 581) and student services handbook, to which readers should refer for information about School of Law policies, procedures and requirements for academic and other matters.

- Accelerated Dual-Degree Bachelor's/Juris Doctor (3+3) (p. 600)
- Juris Doctor/Master of Business Administration (JD/MBA) (p. 603)
- Juris Doctor/Master of Environmental Law and Policy (JD/MELP) (p. 603)
- Juris Doctor/Master of Regulation and Law (JD/MERL) (p. 603)
- Juris Doctor/Master of Food and Agriculture Law and Policy (JD/MFALP) (p. 603))
- Juris Doctor/Master of Social Work (JD/MSW) (p. 603)
- Juris Doctor Program (full-time) (p. 582)
- Juris Doctor Program (part-time) (p. 591)
- Master of Laws in Health Law (LLM) (p. 617)

Medicine

Admission is through the Frank H. Netter MD School of Medicine.

- Medical Doctor (MD) (p. 642)

Nursing

- Doctor of Nursing Practice – Nurse Anesthesia (p. 899) (post-bachelor's study)
- Doctor of Nursing Practice – Care of Populations (p. 906) (post-master's study)
- Doctor of Nursing Practice – Nursing Leadership (p. 909) (post-master's study)
- Doctor of Nursing Practice – Nurse Practitioner (p. 904) (for QU MSN NP graduates)
- Master of Science in Nursing – Adult-Gerontology Acute Care Nurse Practitioner (p. 912)
- Master of Science in Nursing – Adult-Gerontology Primary Care Nurse Practitioner (p. 916)
- Master of Science in Nursing – Family Nurse Practitioner (p. 918)
- Master of Science in Nursing – Operational Leadership (p. 921) (online)
- Master of Science in Nursing – RN to MSN Completion (p. 924) (online)
- Post-Master's Certificate – Adult-Gerontology Acute Care Nurse Practitioner (p. 927)

Honors Program

University Honors Program

The University Honors Program has been developed to foster the needs and interests of our most academically talented and committed students. The interdisciplinary program fosters a strong sense of community that is founded on core values of intellectual curiosity, academic leadership, community engagement and human rights advocacy.

Honors students participate in small seminar courses with instructors dedicated to working cooperatively to mold a unique learning environment. This student-centered approach supports increasingly independent learning and engages students in the larger campus as well as regional, national and world communities.

Honors students demonstrate an immense passion for learning and exploration beyond the immediate scope of their majors and participate in and contribute to campus culture through lectures, book discussions, symposiums and unique events that enhance the distinctive learning opportunities available in the university environment. Quinnipiac honors students have access to a special space on campus: the honors student lounge, which includes a small collection of books, informal seating, coffee and a kitchen that facilitates studying, conversation and honors committee meetings. In addition, honors students have the opportunity for off-campus learning experiences both in nearby areas such as Boston, New Haven and New York City and globally through our spring break study abroad program. Students also have professional development opportunities to present their research at national and regional honors conferences.

Honors students take a minimum of 8 honors level courses and experiences designated at the honors level as part of their existing University Curriculum or major courses; the program does not add additional credit requirements to the students' major work, and preserves freedom – and encourages students – to pursue electives and minors. Students in the honors program need to maintain a GPA of 3.3 or higher.

Each year, the honors program welcomes incoming first-year students with strong academic records and extensive intellectual curiosity. Entry to the program is either through invitation on your letter of acceptance to Quinnipiac University or by application on the Quinnipiac Honors Program webpage (see link below). Students who have received their invitation to the honors program will need to confirm their acceptance, and students who apply for admission to the honors program by April 1 will learn of their status before May 1. Interested students may inquire with the director or the admissions office at any time during the admissions process and into the summer. After their first or second semester, students with strong records of achievement and a demonstrated desire to share their intellectual curiosity and engagement with others may apply to join the program.

For details please see the Quinnipiac Honors Program webpage.

Minors

The purpose of a minor is to provide students with the opportunity to pursue an interest in a field outside of their major. Minors generally consist of six courses within a discipline or set of related disciplines with a progression of course levels. If a minor requires additional prerequisite

courses, these courses are clearly indicated in the description of the minor within the University Catalog.

A student may earn a minor in an area of study concurrently with the major degree but not subsequently. Normally credits counted toward the requirements of the major may not be used to meet the requirements of a minor. Each individual school/college may have additional policies on meeting minor requirements, which are listed in the University Catalog. Completed minors are noted on student transcripts.

To ensure sufficient time to complete a minor, students should submit an application to declare a desired minor prior to the end of their sophomore year. Completing a minor often necessitates taking additional courses beyond degree requirements.

To have a minor appear on their transcript, students should apply to declare a minor prior to their senior year. Applications to declare a minor may be obtained in the dean's office of the school/college offering the minor, which will refer the student to the designated adviser for the minor. The adviser will indicate on the application for the student the number of credits and the specific courses required. At least one-half of the credits needed for a minor must be taken at Quinnipiac. Under special circumstances a dean, with the permission of the provost, may suspend the admission of new students into a minor for an academic year.

The following is a list of approved minors:

- Accounting
- Advertising and Integrated Communications
- Anthropology
- Applied Statistics and Data Science
- Asian Studies
- Biology
- Biomedical Sciences
- Business
- Business Analytics
- Chemistry
- Computer Information Systems
- Computer Science
- Criminal Justice
- Economics
- English
- Entrepreneurship and Innovation
- Film and Television
- Finance
- Financial Communication and Business Journalism
- Fine Arts
- Game Design and Development
- Gerontology
- Global Public Health
- Health Care Management
- History
- History and Philosophy of Science
- Independent Minor
- International Business
- International Studies
- Irish Studies

- Italian
- Journalism
- Law in Society
- Legal Studies
- Management
- Marketing
- Mathematics
- Media Studies
- Microbiology and Immunology
- Middle Eastern Studies
- Music
- Nutrition
- Philosophy
- Political Science
- Psychology
- Public Diplomacy
- Public Relations
- Sociology
- Spanish
- Sports Studies
- Theater
- Women's and Gender Studies

Pre-Dental Studies

The pre-dental studies designation ("pre-dental designation") is designed for undergraduate students who are planning on pursuing DDS or DMD. Pre-dental designation status is not intended for students enrolled in QU's entry-level professional track programs. The pre-dental designation is **not a stand-alone program** and is completed in addition to the student's undergraduate degree and major. Application to dental school may require coursework outside of a specific major. The pre-dental designation allows students to enroll in and track completion of these core requirements. While the pre-dental designation will cover the majority of standard prerequisite courses, requirements may vary by dental school. **Students are responsible for checking their intended dental programs in advance of the AADSAS application process to determine if additional coursework is required.**

Students may enroll in the pre-dental designation after the start of classes by attending one "Pre-Med 101" workshop held by the director of pre-health advising. Undergraduate applicants should indicate their interest in pre-dental studies when applying to QU. This will automatically add you to the director's email list, whereby you will receive communication regarding Pre-Med 101 offerings prior to and after matriculation.

To receive the pre-dental studies designation upon graduation, the following are **required**:

- a. Cumulative GPA of 3.3 or above in required pre-dental designation courses
- b. Minimum of 18 credit hours of pre-dental designation coursework must be completed at Quinnipiac
- c. All coursework for pre-dental designations must be completed on-ground (no online coursework will be accepted)
- d. All attempts for repeated courses will determine GPA eligibility (grades will not be "replaced" for repeat courses)

- e. If coursework is completed elsewhere, it must be transferred in as QU credits and listed on the QU transcript

In addition to strong academic performance, pre-dental designation enrollees must actively pursue experiences and opportunities throughout their undergraduate years to gain exposure to dentistry and patient interaction. A wide range of skills and competencies should be developed through experiences such as:

- extended exposure to healthcare and dentistry (shadowing, clinical work, volunteering, etc.),
- research outside of the curriculum,
- substantial volunteer efforts and community involvement,
- leadership experiences.

Activities and experiences that develop and exhibit strong manual dexterity skills should also be pursued. Active participation in Pre-Health Advising Office educational workshops, advising and events is expected.

Transfer Students

Students who transfer to Quinnipiac University and wish to receive the pre-dental studies designation must complete a minimum of 18 credits of the required designation coursework at Quinnipiac. Grades received for pre-dental designation courses taken at other universities may be utilized for transfer student GPA calculations to determine eligibility.

Advanced Placement Credits

Many dental schools will not accept AP credits as replacement for prerequisite courses. Some dental schools may accept AP credits provided that the applicant completes advanced level coursework in the same discipline. Students are encouraged to check with the specific AP policies and course requirements of dental schools through the ADEA website (<http://www.adea.org>) and the ADEA Official Guide to Dental Schools.

Course Requirements

All courses listed in this section may count toward both the major (if applicable) and the pre-dental studies designation.

Required Courses (All Courses Required for a Minimum of 46 Credits)

Students must complete all of the listed required courses, as they are the minimum prerequisites for application to dental schools and cover content tested on the Dental Admission Test (DAT).

Code	Title	Credits
Required Courses		
Select one of the following:		4
BIO 101 & 101L	General Biology I and General Biology I Lab	
BIO 150 & 150L	General Biology for Majors and General Biology for Majors Laboratory	
Select one of the following:		4
BIO 102 & 102L	General Biology II and General Biology Lab II	

BIO 151 & 151L	Molecular and Cell Biology and Genetics and Molecular and Cell Biology and Genetics Lab	
Select one of the following:		4
PHY 110 & 110L	General Physics I and General Physics I Lab	
PHY 121	University Physics ((includes lab))	
Select one of the following courses:		4
PHY 111 & 111L	General Physics II and General Physics II Lab	
PHY 122	University Physics II ((includes lab))	
Required courses:		
CHE 110 & 110L	General Chemistry I and General Chemistry I Lab	4
CHE 111 & 111L	General Chemistry II and General Chemistry II Lab	4
CHE 210 & 210L	Organic Chemistry I and Organic Chemistry I Lab	4
CHE 211 & 211L	Organic Chemistry II and Organic Chemistry II Lab	4
CHE 315 & 315L	Biochemistry I and Biochemistry I Lab	4
BMS 370 & 370L	General Microbiology and General Microbiology Lab	4
MA 141	Calculus of a Single Variable	3
MA 275	Biostatistics	3

In addition to **required** pre-dental designation courses, students should **complete any two (2) English courses (p. 190) and Psychology 101 (PS 101)** to meet many dental school admission requirements. Advanced sciences such as Anatomy & Physiology, Genetics, Histology, and Cell Biology, as well as ethics and philosophy courses, are highly recommended.

Pre-Law

Students or graduates who have an interest in law school should contact the Quinnipiac University pre-law adviser, via email at prelawadvising@qu.edu, for further information and should join the Pre-Law Society to learn more about the LSAT, law school admissions and financial aid.

Law School Qualifications

Students interested in attending law school must have and should work toward success in each of the following during undergraduate study:

- *Undergraduate degree:* Student must have earned a bachelor (BA or BS) degree.
- *Standardized test:* Completion of the Law School Admission Test (LSAT) is required by most American Bar Association–approved law schools; some others will accept the Graduate Record Examination (GRE) in addition to or in lieu of the LSAT.
- *Curriculum:* No single pre-law course of study is required or recommended. Several broad objectives of pre-legal education, however, have been set forth by the Association of American Law Schools:
 - Developing fundamental reading skills;
 - The ability to think and write clearly and succinctly;

- Logical reasoning and analytical skills; and
- An appreciation of the social, political and economic foundations and complexities of our society.

Toward this end, every pre-law student should carefully choose, with the assistance of their academic adviser and/or the pre-law adviser, courses that will help build these skills and areas of knowledge.

Law School at Quinnipiac

Undergraduate students who wish to attend the School of Law at Quinnipiac may take one of two paths:

- *Accelerated:* Participate in the Accelerated Dual-Degree Bachelor's/ JD (3+3) program (p. 600) which allows students to complete their undergraduate and their law degree in six years, one year less than the traditional path.
- *Traditional:* Obtain a BA or BS degree in four years followed by three years of law school. (NOTE: Attending Quinnipiac University as an undergraduate student does not guarantee admission to the Quinnipiac School of Law.)

Pre-Medical Studies

The pre-medical studies designation ("pre-med designation") is designed for undergraduate students who are interested in pursuing doctoral or advanced professional degrees in medicine such as MD, DO, DDS/DMD, PharmD, OD, DPM, DPT or DVM. Pre-medical designation status is not intended for students enrolled in QU's entry-level professional track programs. Interested students may enroll in the pre-medical designation after the start of classes.

The pre-med designation is **not a stand-alone program** and is completed in addition to the student's undergraduate degree and major. Application to professional school may require coursework outside of a specific major. The pre-med designation allows students to enroll in and track completion of these core requirements. While the pre-med designation will cover the majority of standard prerequisite courses, requirements vary by program type and school. Students must check their intended programs in advance of the application process to determine whether additional coursework is required to apply.

Enrolled pre-health students may seek advice on preprofessional development and the professional school application process from the Pre-Health Advising Office. Advising services include: preparatory workshops, individual advising, assessment of readiness, long-term planning, application strategy, essay critiques, school selection assistance, mock interviews and guest speaker events. The Pre-Health Advising Office, along with the Health Professions Advisory Committee, provides committee letters of evaluation for eligible applicants to medical school.

For more information, please contact the director of pre-health advising at prehealthadvising@qu.edu (PrehealthAdvising@qu.edu).

Requirements

To receive the pre-medical studies designation upon graduation, the following conditions are **required**:

- Cumulative GPA of 3.3 or above in required pre-med designation courses
- Minimum of 18 credits of pre-med designation coursework must be completed at Quinnipiac

- All coursework for pre-medical designations must be completed on-ground (no online coursework will be accepted)
- All attempts for repeated courses will determine GPA eligibility (grades will not be "replaced" for repeated courses)
- If coursework is completed elsewhere, it must be transferred in as QU credits and listed on the QU transcript

In addition to strong academic performance, pre-med designation enrollees must actively pursue opportunities throughout their undergraduate years that help them gain knowledge about the healthcare field and their intended profession. A wide range of skills and competencies should be developed through experiences such as:

- extended exposure to healthcare (shadowing, clinical work, volunteering, etc.)
- research outside of the curriculum
- substantial volunteer efforts and community involvement
- leadership experiences

Active participation in Pre-Health Advising Office educational workshops, advising and events is expected. Students should carefully review the "Core Competencies for Entering Medical Students" and other student resources available through the Association of American Medical Colleges (<http://www.aamc.org>).

Transfer Students

Students who transfer to Quinnipiac University and wish to receive the pre-medical studies designation must complete a minimum of 18 credits of the required designation coursework at Quinnipiac. Grades received for pre-med designation courses taken at other universities may be utilized for transfer student GPA calculations to determine eligibility. Online courses will not be accepted for any pre-med designation requirements.

Advanced Placement Credits

Some professional schools may accept AP credits provided that applicants complete courses for which AP credit has been granted with a higher level course in the same discipline. Other schools, including many medical schools, do not accept AP credits as a replacement for prerequisite science courses. Students are encouraged to check with the specific AP policies and course requirements of any graduate health profession program to which they intend to apply.

Course Requirements

All courses listed in this section may count toward both the major (if applicable) and the pre-medical studies designation.

Required Courses (39 credits)

Students must complete all of the listed required courses, as they are the minimum prerequisites for application to most medical schools and form the basis of standardized admission tests such as Medical College Admission Test, Dental Admission Test, Optometry Admission Test or Pharmacy College Admission Test.

Code	Title	Credits

CHE 315 & 315L	Biochemistry I and Biochemistry I Lab	4
MA 141	Calculus of a Single Variable	3
Total Credits		39

In addition to the **required** pre-med designation courses, students applying to medical school **must plan to complete two English courses (p. 190), Psychology 101 (PS 101), Sociology 101 (SO 101), and one additional math course (p. 223) (Statistics recommended)** to meet many medical school admissions requirements and prepare for the MCAT exam. Humanities such as ethics and philosophy, and advanced sciences such as genetics, cell biology, and anatomy & physiology are highly recommended.

Students are encouraged to check the specific prerequisite course requirements of the professional program to which they intend to apply. Many professional schools recommend additional elective coursework to prepare for admission.

Pre-medical students should refer to the Association of American Medical Colleges (AAMC) and the online database of Medical School Admission Requirements (MSAR®) for full information regarding the required and recommended coursework for medical school. Resources can be found on the AAMC website (<http://www.aamc.org>).

Requirements for Graduation

Degrees are awarded three times a year: January, May and August.

Commencement exercises are held in the spring. Students may participate in the ceremony provided that:

- They have completed all requirements for their degree or are within 6–8 credits (two courses) of their degree;

- If they have credits to complete, they are enrolled in summer school; and
- They have a minimum 2.00 grade point average.

Although faculty advisers assist each student in the selection of courses, the responsibility for fulfilling the requirements of the program and all Quinnipiac University program and departmental academic requirements of study rests with the individual student.

For the Bachelor's Degree

- The satisfactory completion of at least 120 credits, of which the final 45 must be taken at Quinnipiac University. (Certain majors require the completion of more than 120 credits; see specific program requirements.)
- Completion of the University Curriculum common to all bachelor's degree programs.
- The satisfactory completion of the specific course standards and requirements of a student's chosen major (see curriculum descriptions).
- A grade point average of at least 2.00, with at least that average maintained during the final 60 credits of study, and any other GPA requirements imposed by the school, department or program. GPAs are not rounded; they are truncated at the hundredths place.
- School of Business students must complete a minimum of 50 percent of the business courses required for the degree at Quinnipiac (exclusive of 6 credits of economics).
- Up to 6 credits of workshop courses and/or fitness, leisure and wellness courses may be applied toward the degree requirement.

Majors

A student's major must be approved in advance by the department chair or program director (if applicable), and the student must follow the prescribed course of study leading to the completion of this major. At least one-half of the courses in a major must be taken at Quinnipiac University.

Co-Majors

A co-major is a program that is not meant to be a stand-alone program but must be taken in conjunction with another major program.

Double Majors

A student may request to major in two areas of study. The student must fulfill all department requirements in both areas and complete all school requirements in the school(s) granting the degree(s). The student receives one diploma if the degrees awarded are the same type. Those earning both a bachelor of science and a bachelor of arts degree will receive two diplomas.

Double Degrees

A student may earn two undergraduate degrees of different types (e.g., bachelor of arts, bachelor of science, bachelor of fine arts) provided that:

- All requirements for each degree are completed successfully, and concurrently
- All pertinent requirements of Quinnipiac and of the departments and schools involved are completed successfully, and
- Both degrees are conferred concurrently.

Second Degree

A second bachelor's degree may be earned, provided a minimum of 45 additional credits in residence have been earned, and all requirements have been satisfied.

Dual-Degree and Accelerated Dual-Degree Programs

A student may apply to a dual-degree program or accelerated dual-degree program, which allows the student to receive both an undergraduate and graduate degree. The student must fulfill all requirements of both degrees and while some of the classes may be taken concurrently, most work is completed sequentially. The student will receive one undergraduate diploma and one graduate diploma. In the accelerated dual-degree program, both degrees are completed in a shorter period of time than if the student attended each degree program separately. To complete the degrees in the compressed time period, it may be required for the student to take some courses over the summer and January terms.

Posthumous and In Memoriam Degrees

The conferral of Posthumous and In Memoriam degrees provides a means by which Quinnipiac can honor students whose education at Quinnipiac was tragically halted due to an untimely death, while at the same time upholding the requirements of integrity in the award of academic degrees.

Posthumous degrees can be awarded to an undergraduate or graduate student who was in academic good standing when they passed away during the last semester of their degree program at Quinnipiac. If the deceased student had completed sufficient work in order to be awarded course grades for their final semester, the student will be issued either the grade for which they were eligible at the time of their death or a passing grade. Grade determinations are made following discussion with the faculty member teaching the course in question and are approved by the school dean. If the deceased student had not completed sufficient coursework to be issued a passing grade, course substitutions permitting the completion of the degree will be approved and implemented via the variant procedure process. Posthumous degrees are regular degrees included in the official count of degrees and thus are awarded with an official diploma. Hence any Latin Honors for which the deceased student was eligible will be conferred.

In Memoriam degrees can be awarded to an undergraduate or graduate student whose death occurred prior to the student's last semester in their degree program. The In Memoriam degree honors a deceased student's progress toward a degree, but is not included in the official count of degrees. To be eligible for the In Memoriam degree, at the time the student's studies at Quinnipiac were halted due to an illness or accident leading to death, a deceased student must have been: 1) enrolled in classes in the current term or the most recent fall or spring term; and 2) in good academic standing. For any courses the student was enrolled in at the time of their death, the student will be issued either the grades they earned if sufficient coursework had been completed, or grades of W. The In Memoriam degree is awarded with a distinct document that affirms the student's good academic standing and progress toward a degree. Latin Honors are not applicable.

Service Learning Courses

The Community and Civic Engagement Committee in conjunction with the Center for Teaching and Learning works to ensure that students have access to courses that are rooted in best-educational practices and that enhance the university experience by offering courses and experiences

that are uniquely designed to expose students to Community and Civic Engagement and Service Learning opportunities.

Service Learning or Community and Civic Engagement classes integrate meaningful community service with instruction and reflection to enrich the learning experience, teach civic responsibility and strengthen communities. Quinnipiac University is a member of Campus Compact, a national coalition of college and university presidents dedicated to promoting community service, civic engagement and service learning in higher education.

Service learning is not volunteerism; nor is it an internship. Service learning is a curriculum-based initiative bringing together faculty, students and community organizations. Service Learning courses incorporate the following basic principles:

- Engagement is fostered through service projects with a community partner.
- Reflection on the experience of working on the community project is both an academic and personal process.
- Reciprocity is promoted by addressing real community needs.
- Dissemination means that previous courses serve as models of best practices for new courses.

The purpose is to assist community organizations by providing situation-specific student resources in activities consistent with the goals of a specific course. Through Service Learning, community organizations are more able to meet their objectives, faculty are more able to demonstrate key course concepts, and students are more able to relate course theory with actual situations and practices.

Community and Civic Engagement Student Learning Outcomes

- Ability to demonstrate intercultural knowledge and competence.
- Ability to demonstrate rapport with people from different walks of life through verbal and nonverbal communication, thoughtfulness in word choice and tone of voice, curiosity about others, respectfulness toward others and their experiences, and remaining resourceful even in the face of interpersonal conflict with members of the community.
- Ability to identify partner needs and offer suggestions to the design of the community project.
- Competency in evaluating one's expected role within the ecosystem of desired profession or community.
- Effectiveness in communicating how to address a community need.
- Ability to analyze aims, efforts and accomplishments that emerged from engagement in the community or service learning.
- Ability to competently and critically evaluate how community engagement has altered one's preparedness for entering chosen profession or community.
- Competency in professional dispositions as a result of service learning or community engagement.

Community and Civic Engagement Badge

Students who are interested and meet the requirements are eligible to receive a badge from the Committee for Community and Civic Engagement that reflects the commitment they have made to be engaged community and world citizens through opportunities in designated courses and co-curricular community and civic engagement activities. Detailed information and application information can be found on

the Community and Civic Engagement Badge page on MyQ. (<https://myq.quinnipiac.edu/Student%20Life/OOCS/Forms/Community%20and%20Civic%20Engagement%20Badge.pdf>)

Study Abroad

Education Abroad

At Quinnipiac University, we feel a sense of obligation to work toward a more interconnected and globally engaged environment. We do this by increasing intentional global engagement opportunities for students, faculty and staff to learn both in and outside the classroom. Quinnipiac students may have the opportunity to participate in semester and short-term programs, internships, community engagement, clinical, research and faculty-led programs abroad in various countries such as Barbados, Costa Rica, Dominican Republic, Germany, Guatemala, Ireland, Italy, Japan, Morocco, Poland and Spain. Administered by the Department of Cultural and Global Engagement, study abroad programs can develop responsible and engaged citizens by cultivating their cultural awareness, humility, skills and knowledge necessary to participate respectfully in the global community. All students are advised to plan early to study abroad and discuss with their academic adviser to determine whether they can fulfill their graduation requirements through a study abroad program. Students also must attend an information session to understand the policies and procedures for our education abroad opportunities.

For more information, contact the Department of Cultural and Global Engagement or visit the Quinnipiac Study Abroad website. (<https://educationabroad.qu.edu>)

Semester Abroad Policies

- a. Students must have a cumulative GPA of 3.0 to apply.
- b. Students must not have any current and/or pending conduct sanctions.
- c. The study abroad program must be preapproved by the Quinnipiac University Department of Cultural and Global Engagement.
- d. Students must maintain full-time status (12–16 QU credits) while abroad. Some countries limit enrollment to 12 QU credits.
- e. Students studying abroad must obtain approval from their academic advisers and respective dean(s) for all courses taken abroad. Students who fail to comply with policy and procedure, especially by not receiving course approval, will not receive credit and will be ineligible to study abroad through Quinnipiac University.
- f. The cost of study abroad includes, but is not limited to: Quinnipiac's tuition and residence fees (less the dining service fee) and required overseas emergency medical insurance and security assistance fee. The student may be responsible for paying security deposits, program application fees and/or program withdrawal fees. Additional expenses include, but are not limited to airfare, visas, passports, meals, academic materials, lab fees, internet usage, public transportation, personal travel, etc.
 - i. If a student is selected for a QU exchange program abroad, residence fees will be paid by the student directly to the host institution.
 - ii. The student is not charged for a QU meal plan.
- g. Students are required to live at the study abroad program residence facility.
- h. Students who receive financial assistance at Quinnipiac may apply their financial aid for study abroad, including federal aid, state grants, college grants and scholarships. Work-study cannot be applied.

- i. For Quinnipiac students studying abroad, the credits and grades for approved courses taken abroad become part of the student's academic transcript, and all grades are included in the calculation of the student's GPA. Grades are the exclusive prerogative of the faculty members teaching the courses. If students have questions about grading in any particular course, they must consult the faculty member teaching that course. Quinnipiac will not change grades issued by another institution.
- j. Students may not take classes for a pass-fail grade.

Short-Term Study Abroad Policies

- a. Students must maintain a cumulative GPA of 3.0 and must not have any current and/or pending conduct sanctions at the time of applying.
- b. The short-term study abroad program must be preapproved by the Department of Cultural and Global Engagement.
- c. Students shall be limited to two courses taken abroad during their short-term program.
- d. Students are not exempt from the Undergraduate Summer Credit Policy as outlined in the Course Schedule and Registration Bulletin, which prohibits students from taking more than 7 credits during the summer. If more courses are requested, the student must file a variant procedure form with their college or school dean.
- e. Students may be eligible to apply for financial aid if they are enrolled in 6 credits. Please inquire with the Financial Aid Office for further information.
- f. Students studying abroad must obtain approval from their academic advisers and respective dean(s) for all courses taken abroad. Students who fail to comply with policy and procedure, especially by not receiving course approval, will not receive credit and will be ineligible to study abroad.
- g. A grade of "C" or better will be accepted for transfer credits for all short-term study abroad programs. No letter grade is given for these credits. If the short-term program course grades are less than C, the credits are not accepted.
- h. When studying through a Quinnipiac-approved short-term study abroad program, the student must pay the program cost directly to the host institution or affiliates. The student is responsible for paying Quinnipiac's mandatory overseas emergency medical insurance and security assistance fee. This fee will be paid for the duration of the program. Failure to make the required payments will disqualify a student from receiving transfer credit.

Study Abroad Withdrawal Policies

Withdrawal from a semester or short-term program abroad initiated by the student, QU, the program providers and/or the host institution may result in, but not limited to, a loss of housing, flight, program fees and/or tuition.

- Regardless of the reason and effective date of withdrawal, it is the responsibility of students to immediately notify QU's Department of Cultural and Global Engagement in writing to understand the implications of their withdrawal actions.
- Depending on the circumstances of the withdrawal, the student may be subject to QU's student conduct process.
- If QU, the program providers and/or the host institution cancel a program (even after the program has started) for reasons beyond its control, including, but not limited to government actions (including those restricting travel), pandemics, fire, flood, explosion, earthquake or other natural forces, war, civil unrest, accident, terrorism, any strike

or labor disturbance or any other event similar to those enumerated above (a “force majeure” event), participants are not guaranteed refunds.

- If there are recoverable costs, they may include program fees, including tuition, housing, program-specific social/cultural activities/excursions, safety and security insurance, administrative costs and organized flights. Many of these costs are paid before the start of the program and are **not** typically recoverable. Students must understand these financial commitments in advance of committing to the study abroad program.
- There is no refund credit for a student who is suspended or expelled from the program for any reason.

Quinnipiac in Cork, Ireland

All Quinnipiac students have the opportunity to study at University College, Cork (UCC), in Ireland for a semester, academic year or summer term. Through this direct program, students are encouraged to fully participate in the programs and courses offered by UCC. Cork, Ireland, is a unique mix of a quaint Irish life with the bustle and convenience of a city. It is a hub of Irish music, culture, traditions, food and modern Irish life. The program includes:

- On-site orientation led by Quinnipiac faculty and staff: safety, protocol, academic advisement, cultural transitions, group meals, events, etc.
- UCC International student orientation
- Academic courses for many majors
- Discipline-focused workshops
- Wellness Retreat
- Involvement/community engagement opportunities
- Previous field excursions have included: Ring of Kerry, Blarney Castle, west coast of Ireland, family farm weekend in West Cork.

For more information about the UCC direct program, visit the Quinnipiac Study Abroad website. (<https://educationabroad.qu.edu>)

Washington, D.C., Semester Programs

Please visit the QU in DC (p. 258) page under the College of Arts and Sciences Department of Philosophy and Political Science.

Quinnipiac in LA Program

The Quinnipiac in Los Angeles program is offered during the fall and spring semesters as well as during the summer, giving undergraduate and graduate students the experience of working and studying in the nation's second largest city. QU in LA is open to all university students. QU in LA is open to both undergraduate and graduate students from all majors and programs. Undergraduate students must have at least a 3.0 GPA and have completed 57 credits before they arrive in Los Angeles. Graduate students must have a 3.0 GPA and have completed at least two graduate courses and at least one semester at Quinnipiac.

The program emphasizes experiential learning and is designed to enhance Quinnipiac's professionally oriented education. It is intended to expand Quinnipiac's career development programs, which prepare students to be contributors in the workplace from day one; meet the interests of students who want to experience and understand first hand the unique working environment of Los Angeles and the West Coast; and enable students to have internships, career practicum experience, a sense of independence and autonomy as part of our academic culture. For more information, go to Quinnipiac in Los Angeles

(<https://www.qu.edu/schools/communications/facilities-and-resources/quinnipiac-university-in-los-angeles/>).

Faculty-Led Courses Abroad

Quinnipiac faculty members also plan courses with a travel component to various countries during the January term, spring break, and summer terms. Some of the countries visited include Barbados, Bonaire, Costa Rica, Dominican Republic, Guatemala, Japan, Morocco and Poland. Students interested in participating in a Quinnipiac faculty-led course abroad should contact the Department of Cultural and Global Engagement or attend one of the information sessions offered throughout the year.

Community-Engaged Global Learning

During summer, winter and spring recess, Quinnipiac offers for-credit and non-credit bearing faculty-led programs to sites in the United States and abroad. These experiential learning programs, to carefully selected locations, are intentionally designed to foster unique educational opportunities made possible by crossing many borders: political, cultural, socioeconomic, environmental and national. Pre-trip orientation and on-site instruction are facilitated by Quinnipiac faculty or staff from the Department of Cultural and Global Engagement.

University Curriculum

Mission Statement

A Quinnipiac education fosters in-depth learning, the gaining of disciplinary expertise (the major), and promotes an interdisciplinary understanding of the expertise in local and global contexts (the University Curriculum). In addition, a QU education inspires students to learn how to work independently both in and outside the classroom to gain a closer and more complex sense of themselves as citizens, intellectuals and human beings. Through the University Curriculum, intentional learning is fostered by studying human cultures, artistic and literary expressions, the physical and natural worlds, and the forces that have shaped and continue to shape our world. Students develop a flexible and open mind, the capacity to learn from others, effective communication skills and the ability to influence potential solutions to global problems. Students demonstrate their abilities through classroom and civic engagement, in both their local and global communities. A student's education at Quinnipiac University is a single, reciprocal process with specialized education in the major integrated with general education, with each providing dimension to the other. In the way that the major leads a student to deep, disciplinary knowledge, general education leads a student to broad knowledge gained from multiple perspectives and in concert, they support the students' achievement as measured by the Essential Learning Outcomes. A Quinnipiac University graduate is a well-rounded individual who demonstrates knowledge of science, cultures, numeracy, the arts, history and society as well as an ability to apply learning to complex problems and challenges.

The requirements of the University Curriculum ensure that all students receive a broad education that exposes them to different perspectives and ways of knowing, producing lifelong learners who can, upon graduation, become leaders in their professions, in the communities where they live, and in their role as informed citizens. The University Curriculum also contributes significantly to the development of the Essential Learning Outcomes (p. 41) that are expected for graduates of Quinnipiac University.

Statement of Purpose for the Breadth Component

As a consequence of personal inquiry and a balanced, purposeful selection of courses representing diverse perspectives, students will:

- Demonstrate knowledge of science, cultures, numeracy, history, arts and society.
- Develop the skills, knowledge and diverse perspectives necessary to address complexity.
- Acquire the scientific and cultural literacy necessary to be an informed and ethical citizen who can contribute to local and global society.
- Reflect on and continue to develop meaning in their own lives and to see meaning in the lives of others.

This will be accomplished through a process whereby students:

- Practice and compare a balanced mix of disciplinary perspectives across the natural sciences, social sciences, humanities, math and fine arts.
- Progress toward achievement of the essential learning outcomes.
- Examine multiple perspectives, environments and cultures ranging from the local to the global.
- Interpret complex problems and challenges in novel ways, engendering and nurturing the habit of a flexible and open mind that seeks new opportunities and conceives new solutions.

University Curriculum for Bachelor's Degree Candidates

For all bachelor's degree candidates entering Quinnipiac University during or after Fall 2016, the University Curriculum consists of 46 credits as outlined in the following curriculum structure:

Foundations of Inquiry (4 classes = 12 credits)

Code	Title	Credits
FYS 101	First-Year Seminar	3
EN 101	Introduction to Academic Reading and Writing	3
EN 102	Academic Writing and Research	3
MA Mathematics		3
MA 110, MA 140, MA 141, MA 151, MA 170, MA 176, MA 205, MA 206, MA 229, MA 275, MA 285		
Total Credits		12

First-Year Seminar

A Quinnipiac University education is directed toward forming a mindset of life-time learning, establishing an inclusive, excellence-driven community, nurturing local and global communities, and fostering lifelong connections and success. The first-year seminar initiates such an education as the starting point of the University Curriculum. Each student enrolls in a faculty-designed seminar constructed to help examine a complex problem, an enduring question, or new ideas from multiple perspectives. This seminar is designed to accomplish three essential goals that help prepare students for 21st-century careers and citizenship. First, it introduces students to the concept of inquiry as a process that utilizes multiple approaches and perspectives to investigate problems, questions, or ideas systematically. Students learn that the process of

inquiry includes the collection, analysis and evaluation of various types of evidence. Second, the seminar enables students to practice inquiry through an investigation of a problem, question, or idea that faculty select from their areas of expertise. Finally, students begin to develop complex thinking skills that they will deepen throughout their undergraduate experience in the University Curriculum.

First-Year Writing

In the two-semester "Writing as Inquiry" foundational sequence of the University Curriculum, students are introduced to the idea that academic reading and writing are the forms of inquiry they will engage in throughout their education, including their major and capstone courses, and beyond. Reading and writing as forms of inquiry include comprehending difficult written materials across a variety of discourses, analyzing contexts and audiences and applying that analysis in their reading and writing practices. The courses in the breadth component will refine reading and writing as forms of inquiry in disciplinary and interdisciplinary contents, enabling an understanding of a variety of discourses and writing strategies for effective communication, including the conventions of writing as they influence the successful exchange of ideas in academic, professional and public forums.

Mathematics

Mathematics is both an art and a science, laying the foundation for many of the advances in modern science, technology and civilization. The power of mathematics lies in its focus on precise and logical reasoning to draw conclusions and make discoveries in many domains, both abstract and concrete. A student who studies mathematics learns strategies to solve problems, analyze situations, and justify conclusions. Mathematics is a foundational mode of inquiry required of all undergraduate students. Several courses fulfill this foundational requirement; each student selects the mathematics course based on interest and the requirements of their major.

Disciplinary Inquiry (4 classes = 13 credits)

In the "Disciplinary Inquiry" phase of the University Curriculum, students make their first encounters with specific knowledge and methodologies in the disciplinary areas. This phase familiarizes students with the kinds of knowledge produced in these disciplinary areas and thus inform their choices as they undertake their "Personal Inquiry."

Students select one course from each of the disciplinary areas:

- Natural Sciences: 4 credits
- Humanities: 3 credits
- Social Sciences: 3 credits
- Fine Arts: 3 credits

Personal Inquiry (6 classes = minimum 18 credits)

The "Personal Inquiry" (PI) phase requires 18 credits with at least three Disciplinary Inquiry areas represented. This allows students significant flexibility in the selection of coursework. The Personal Inquiry requirement has two parts:

Part 1: In addition to those selected under Disciplinary Inquiry above, students will select one course from three different disciplinary areas:

- Natural Sciences
- Humanities
- Social Sciences
- Fine Arts

Part 2: The remaining three courses can be from disciplinary areas in Part 1 and/or UC Breadth Electives. Students can combine Disciplinary Inquiry areas and UC Breadth Electives in any pattern that totals 9 to 12 credits. [Note: natural science courses that are treated by the Registrar as two separate courses (lecture and lab) shall be treated as *one course* for the purposes of the PI requirement. Students could thus take up to four lecture-lab pairings in the PI).

Integrative Capstone Experience (1 course = 3 credits)

If the Integrative Capstone is completed in the student's major, then the student selects an additional unrestricted course in the University Curriculum.

Intercultural Understanding (1 course = minimum 3 credits)

As students purposefully select courses and progress through the Breadth part of the curriculum, it is imperative that all students develop the skills, knowledge and diverse perspectives necessary to acquire the understanding necessary to be informed and ethical citizens who can contribute to the local and global society.

To achieve this goal, within their 31 breadth component credits students are required to take at least 3 credits in classes marked as "I" (Intercultural Understanding). The classes with "I" designation can be chosen from any area in Disciplinary and/or Personal Inquiry.

University Curriculum Breadth Electives (formerly called “UC Electives”)

University Curriculum (UC) Breadth Electives are courses with generalizable and transferrable knowledge that are based in a single academic discipline outside of the four Disciplinary Inquiry areas (Natural Sciences, Social Sciences, Humanities, Fine Arts) or that reflect nationally established interdisciplinary areas. Such courses increase the disciplinary, methodological and cultural perspectives available to students in the University Curriculum, thereby extending the breadth of their knowledge to navigate successfully a complex and dynamic world.

Policy for Students Who Fail FYS 101

First-year students entering the university in the fall semester who withdraw from or fail to receive a passing grade for FYS 101 during that semester are given one chance to repeat the course during the first spring semester that they are enrolled at Quinnipiac. If on their second attempt they fail to complete or pass the course successfully, they may not take FYS 101 again. The student who fails to complete FYS on their second attempt receives no credit for FYS 101 and the failing grade (F) or course withdrawal remains on their transcript. The student must thereafter substitute 3 credits from any other UC-designated course to count toward required general education credits.

FYS 101 Policy for Transfer Students

A student who transfers to Quinnipiac with less than sophomore standing (fewer than 27 credits) shall enroll in FYS 101 in the student's first semester at Quinnipiac. The policy for students who fail FYS also applies to transfer students with less than sophomore standing. Students who transfer to Quinnipiac with 27 or more credits must substitute any UC-designated course for FYS 101 to count toward the general education credits needed to graduate.

Students may consult the 2015–16 University Catalog for more information on the University Curriculum required of all bachelor's degree candidates who entered Quinnipiac University prior to Fall 2016.

Academic Good Standing Policy for Undergraduate Students

(Revised for May 2015)

Credit and GPA Requirements

To be in Academic Good Standing at Quinnipiac, undergraduate students must meet both minimum grade point average (GPA) and completed credit requirements.

A student fails to meet Academic Good Standing requirements if their:

- a. cumulative GPA is below 2.0
- b. semester GPA is below 2.0 in any two consecutive semesters

Any first-time, full-time student or first-time, full-time transfer student earning a GPA less than 2.0, but 1.2 or more, will be placed on Academic Warning in their first semester. Any first-time, full-time student or first-time, full-time transfer student earning a GPA less than 1.2 will be placed on Academic Probation. Students on Academic Warning are required to follow the same requirements as those on Academic Probation.

In addition to the GPA requirements, all students must complete coursework over a period no longer than 150 percent of their program length to maintain the satisfactory academic progress standards of the university. For example, a full-time student enrolled in a four-year degree program must successfully complete an average of 10 credits per semester registered.

A part-time student must complete an average of 6 credits per semester registered. Some individual degree programs have higher GPA and credit requirements for students to maintain program eligibility. Consequently, students should consult the program description in the Catalog for the requirements of their individual program.

The Academic Good Standing requirements for transfer students are based on the number of credits accepted for transfer. For example, students who enter Quinnipiac with 20 transfer credits are considered to have completed two semesters and are subject to the requirements of a third-semester student during their first semester at Quinnipiac. However, minimum GPA is based only on courses completed at Quinnipiac.

Students should also know that failure to meet the Academic Good Standing requirements may result in the loss of financial aid and or scholarship, and may affect their eligibility for campus housing. Also, individual programs may have other academic requirements to remain in good standing in their specific program. Students should refer to the program section of the Catalog for information regarding individual program requirements.

Sanctions

Any student who fails to achieve any of the requirements above is subject to one of the following sanctions:

Academic Probation

Probation serves as an official notification of deficiency that requires students to promptly address their deficiency(s). After the close of the previous semester, the Office of Academic Innovation & Effectiveness notifies students of their probation. Prior to the start of each semester, students on probation and their academic advisers are notified about this sanction; advisers and probationary students also are directed toward resources that support the Improvement Plan process. Before the end of the first week of classes, students on probation must submit an electronic copy of their Improvement Plan to their academic adviser and the Learning Commons. In their Improvement Plan, they should reflect on their past semester and indicate how they will improve their academic performance to remedy their academic deficiencies. Probationary students must meet with their adviser within the first two weeks of the next semester to have the adviser approve or amend the plan. Approved plans are forwarded to both their school/college dean's office and the Learning Commons. Probationary students must meet personally with their adviser a second time during preregistration to discuss their progress in meeting the goals of their Improvement Plan and their course selection for the next semester. Additionally, probationary students must email their adviser with a progress update every two weeks during their semester on probation. The Learning Commons has a variety of programs to support students on probation. Students on probation may register for courses in the usual fashion. However, students on probation must attend and successfully complete an Advanced Learning Tutorial with an academic specialist at the Learning Commons during their probationary semester. These meetings provide students support and strategies to assist them in correcting their deficiencies. Normally, students are not permitted to appeal probationary status. However, students who failed to achieve the completed credits requirement for documented medical reasons may appeal a probation decision.

Students on probation or credit deficient at the close of the semester may use summer or January classes to regain good standing to the degree this action follows existing academic policies. To remediate a deficiency in GPA, students must take a course offered by Quinnipiac University and comply with existing policies regarding summer and J-term courses. To remediate credit deficiency with courses taken at another university, students must comply with the Policy Regarding Transfer Credit (p. 135) from other institutions. If they are able to remediate their deficiency, they must appeal the change of academic status through the office of the Associate Vice President for Retention and Academic Success no later than the Friday of the first week of the subsequent semester. Appeals should be made in person and should include acknowledgement of current status, actions taken to remediate current status and discussion of changes intended for the next semester. A change in academic status will not be made without a successful appeal. A successful appeal will result in a notation to the student's transcript that indicates a new standing of Academic Warning, which is discussed below. Appeals to reinstate financial aid may also be addressed during this appeal process.

Suspension

Students who have serious or repeated deficiencies are subject to suspension. Suspended students must leave Quinnipiac for a period of one semester. Suspended students are required to use this period of suspension to review their academic goals and to improve their academic

skills. To facilitate this review and reflection, suspended students are assigned an academic specialist with whom to work during their suspension. Suspended students are encouraged to work closely with Learning Commons staff and other resources to prepare for their return to Quinnipiac. Additionally, credit will not be given for courses taken during the suspension period. Suspended students may return to Quinnipiac after the completion of the suspension period; in the semester of their return, they will be on Academic Warning and subject to its requirements. Further, suspended students are expected to work with their advisers or their associate deans for course selection prior to their return. Students returning from suspension and intending to enroll in summer or J-term courses that might contribute to their program must meet with their adviser or their associate dean before doing so.

Dismissal

Students with serious or repeated academic deficiencies are subject to dismissal from Quinnipiac. After a period of at least one year, dismissed students who have demonstrated academic achievement elsewhere may file a new application for admission to Quinnipiac. Permission to reapply does not guarantee readmission to Quinnipiac or to the program from which the student was dismissed.

Procedures

Academic records will be formally reviewed at the end of the fall and spring semesters.

With the exception of the first-time, full-time students and first-time, full-time transfer students as noted above, students are usually placed on probation after their first deficient semester. Individual students may be continued on probation for subsequent semesters if they make progress in addressing their deficiency. However, students who are deficient after a total of three semesters on probation, two semesters after the first-year, or two semesters after transferring to Quinnipiac are suspended or dismissed. Any student who has a GPA below 1.2 after two semesters is dismissed. Suspended and dismissed students may appeal their sanction to the Academic Appeals Committee, consisting of a representative from the Office of Academic Innovation & Effectiveness, undergraduate school and college deans or their designee (an associate dean), and two students appointed by the student government president.

The Appeals Committee may change a suspension or a dismissal to a lesser sanction. All notifications of decisions and of meeting times of the Appeals Committee are sent to the permanent address of affected students by Federal Express or First-Class Mail (probation notices only). It is the responsibility of students to be sure they can be contacted and, if necessary, respond promptly to committee notices. No parents, family members, attorneys or any other third parties are permitted to attend or participate in any academic hearing.

Academic Warning

In an effort to support academic success, the university places under review students whose previous academic performance indicates a risk to academic success. Students whose semester grade point average is less than 2.0 and students who have successfully appealed a change in probationary status, as noted above, will be placed on review. While this review is not an official notification of deficiency and these students are not on probation, both conditions may indicate a challenge to academic success. Like those students on probation, however, students under review are contacted by the Office of Academic Innovation & Effectiveness just after the close of the semester. Prior to the start of the next semester, these students and their academic advisers are reminded of the low semester GPA and directed toward resources. Following a

discussion of their academic record with their academic adviser or an academic specialist, students will be asked to develop an Improvement Plan and to meet regularly with an academic specialist. This review semester is intended to help students regain their momentum toward academic success.

Math and English Requirements

Full-time students are expected to have completed EN 101, EN 102 and MA 110 (or their equivalent) by the end of three semesters. Part-time students are expected to have met these requirements by the time they have completed 30 credits. Students may not withdraw from EN 101 or EN 101I. The first time a student fails to complete EN 101 or EN 101I successfully, a grade of "U" is issued. Each additional unsuccessful attempt at EN 101 or EN 101I results in a grade of "F." For more information, please review the course description.

Program Level Academic Good Standing Policy

All undergraduate and graduate students are expected to maintain each semester the required minimum GPA and/or course grade requirements set forth by their respective program of study (if applicable). Each program may have additional benchmarks that must be met to progress within the program of study. The student should refer to the program's description in this Catalog and to the program's student handbook (if applicable) for clarification for what is required to maintain their status within the program.

At the end of each semester, the program directors will compile a list of students who are deficient in meeting academic or clinical/professional achievement requirements. Utilizing the review process established by their program, the student will be notified via email of their status in the program. Deficient students may be: a) placed on probation; b) suspended; or c) dismissed. Students placed on probation remain in their program but in order to progress, must meet the performance standards specified in their probation notification letter.

If a deficient student believes their final grade was determined in an arbitrary, capricious or prejudicial manner, the student may appeal the final grade by following the Procedure to Appeal a Final Grade (p. 110). Only final grades may be appealed. If the grade appeal process results in a recalculated grade that removes all of the student's academic and/or clinical professional achievement deficiencies, then the sanction of probation, suspension or dismissal is removed. Students who are no longer suspended or dismissed may continue to progress in the program in the semester following the conclusion of the grade appeal process.

If a student is placed on suspension or dismissed, and the student believes there were errors in facts considered by their program or would like to explain extenuating circumstances affecting their academic performance, the student may appeal the suspension or dismissal.

If a suspended or dismissed student believes both that 1) their final grade was determined in an arbitrary, capricious or prejudicial manner, and 2) there are errors in the facts considered by their program or extenuating circumstances, then the student must first follow the Procedure to Appeal a Final Grade (p. 110). If after the conclusion of the grade appeal process the suspension or dismissal still stands, then the student may proceed with appealing the suspension or dismissal.

Appeals Process

- a. If the student's program has a student handbook or other document outlining a departmental level appeals process, the student should appeal the suspension or dismissal by following the guidelines outlined in their program's student handbook or document. Appeals at the departmental level must be submitted in writing within five business days of the student being sent via email a suspension or dismissal notice from their program. The appeals hearing date/time will be determined by the department based upon programmatic guidelines and the student will have the opportunity to attend if the student chooses. Students are responsible for checking their Quinnipiac email account even during examination and vacation periods. Excuses for not checking the mailbox, email account, or delays in mail delivery are not acceptable reasons for postponement of any deadline in the process. Following the departmental hearing, if the suspension or dismissal still stands, the student may appeal the sanction to the dean of their school.
- b. If the student's program does not have a student handbook or other document outlining a departmental level appeals process, the student should appeal the suspension or dismissal directly to the dean of their school.
- c. Appeals to the dean must be submitted in writing within five days of the receipt of the final decision from the department. Appeals to the dean should be based on errors in the facts considered by their program or extenuating circumstances. Upon hearing the appeal, the dean may decide to:
 - i. Concur with the program's initial decision. In this case the initial decision is final.
 - ii. Send the matter back to be reconsidered by the program.
 - iii. Change the sanctions decided by the program by decreasing or increasing the sanctions. In this case the dean's decision is final.
- d. If the decision is upheld and the student is dismissed, the student is encouraged to contact the Office of Career Development (p. 27) in their school to discuss alternative programs and career paths. After a period of at least one year, dismissed students who have demonstrated academic achievement elsewhere may file a new application for admission to Quinnipiac. Permission to reapply does not guarantee readmission to Quinnipiac or to the program from which the student was dismissed.
- e. No parents, family members, attorneys or any other third parties are permitted to attend or participate in any academic hearing.

Academic Integrity Policy

Updated Spring 2022

Introduction

In its Mission Statement, Quinnipiac University emphasizes its commitment to be an academic community. As an academic community, our students, faculty and staff work together to acquire and extend knowledge, develop skills and competencies and serve the greater good of our nation and local communities. Our individual and collective inquiry and pursuit of knowledge are only possible when each of us in

the community is aware of and strives to maintain a code of ethical practice and integrity. All communities, though diverse in their individual members, are based on a shared set of beliefs and values that serve as their foundation. **At Quinnipiac, our community has chosen integrity as one of its guiding principles.**

A. Integrity: The Foundation of Quinnipiac University ¹

Integrity means upholding a code or standard of values. In its most general sense integrity also means being complete. As an academic community, the completeness that we seek includes asking each individual to see life as a whole, and to understand how their actions affect self, others and the community. Individual actions also impact the community of higher education as a whole. In keeping with this commitment to the Quinnipiac community and the larger community of higher learning, Quinnipiac is a member of the Center for Academic Integrity (CAI), a consortium of institutions of higher education committed to the principle of integrity. Our Academic Integrity Policy is based on the six fundamental values outlined by the CAI: honesty, trust, responsibility, fairness, respect and courage.

Quinnipiac expects all members of our community, students, faculty and staff to uphold these six standards of integrity and to contribute to our larger culture of integrity.

Honesty

Honesty is the bedrock upon which integrity is based. Academic and professional honesty require that each individual conduct themselves openly and in keeping with the truth. Even more importantly, honesty requires actively searching for and upholding the truth. Honesty is critical for the production and exchange of knowledge and ideas that are the hallmark of an institution of higher learning.

Trust

Trust is essential for an academic community. Academic work almost always builds upon or extends from the work of others and all members of the community must respect the work of others. Each individual must trust that community members undertake their work in such a way that we build our knowledge, while freely and openly admitting our dependence upon the work of others. Community members also must endeavor to be worthy of the trust others have placed in us. This foundation of trust is vital to our community of inquiry and learning.

Responsibility

An academic or professional community provides its members with support, fellowship and intellectual stimulation. The price of these benefits is responsibility to the community. Therefore, all members of the university community must not only be committed to ethical practices themselves, but also must bear the responsibility of helping to encourage integrity among all community members.

Fairness

True communities celebrate the differences among their members while upholding the general principle that each individual should be treated equally. This basic principle of fairness to all is an aspect of integrity that guarantees each of us freedom to express our own individuality. This standard of fairness also carries the burden, however, of fair sanctions to those who violate the standards of the community.

Respect

The university is a gathering place where students and faculty come to learn about different ideas, cultures and ways of thinking—even those with which we may strongly disagree. This learning environment can be maintained only with mutual respect. This respect must be present

in the classroom, in our everyday encounters with each other, and in our individual work. Respect means listening to others, evaluating and criticizing their ideas fairly, and properly acknowledging all sources of material that are not originally ours.

Courage

Possessing courage is a show of character that demonstrates an undeniable commitment to values over negative repercussion. Students exhibiting courage establish and maintain high standards of academic integrity for themselves and others in their community. Faculty members demonstrate courage as they establish and enforce high standards for students, colleagues and themselves. Upholding academic integrity in any academic community requires courage of those who chose not to violate the shared standards and those who remain steadfast that accountability is ensured for those who in fact violate those standards.

B. Expectations for Integrity at Quinnipiac University

This policy is part of the larger educational effort at Quinnipiac University in which community members learn and practice ethical behavior.

All members of the Quinnipiac University community are expected to commit themselves to personal and academic integrity and to the six fundamental values by:

- Being honest in what they say, don't say, do and don't do
- Trusting others and being worthy of trust
- Acting responsibly and expecting responsible behavior from others
- Treating other members of the community fairly, and expecting fair consequences when mistakes are made
- Treating other members of the community and the educational process with respect, and expecting respect for oneself, one's views and one's abilities.

In keeping with these values, Quinnipiac University expects its community members to comply with the usual expectations for honest academic work. In general, community members:

- May not cheat on any work
- Must properly cite sources in all academic work
- May not provide or procure unauthorized assistance on any assignment or test
- May not falsify or alter university documents, tests or assignments
- May not impede the coursework of any other student
- May not do any other thing that violates or allows another person to violate the accepted standards of academic integrity.

Students, faculty and staff also should promote integrity by:

- Educating each other
- Discussing integrity in their classes
- Reporting violations when they occur.

Quinnipiac recognizes that reporting violations is difficult; however, reporting is necessary to maintain fairness as well as standards of integrity on campus. Reporting is part of each individual's responsibility as a member of the community.

This policy is overseen and administered by the Office of Academic Innovation & Effectiveness.

C. Resources

In its effort to uphold these standards of academic integrity, the university provides numerous educational and support resources to

reduce academic integrity violations. These resources may be found on the Academic Integrity MyQ site (<https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx>).

Preserving Academic Integrity

A. Community Responsibilities

1. Academic Integrity Policy

Every member of the community is expected to comply with Quinnipiac's Academic Integrity Policy. Each student must read the university's Academic Integrity Policy.

2. Promotion and Support of Integrity

Members of the community should support the general culture of integrity at Quinnipiac by maintaining an atmosphere of honesty and integrity on campus, and by talking about the value of integrity to one's educational experience and individual development.

Faculty members have a unique opportunity to promote the policy. They are encouraged to do so by:

- Describing in writing the objectives and requirements of the course at the beginning of the semester.
- Including a description of the Academic Integrity Policy and other materials promoting academic integrity on each course syllabus.
- Discussing and reviewing the importance of academic honesty and integrity with students, and reminding students that they must do their own work.
- Providing to students in writing the requirements and expectations for each academic assignment, including what practices and resources are authorized, to help students avoid inadvertent academic integrity violations.

Staff also can promote academic integrity by:

- Discussing the Academic Integrity Policy and the importance of integrity in interactions with students, student organizations and faculty.
- Emphasizing the importance of academic honesty and integrity with students and faculty and encouraging students to do their own work.

3. Proper Acknowledgment

Students, faculty and staff should understand the meaning of plagiarism and misrepresentation, understand how to properly acknowledge another's work, and apply these principles in all written, oral and electronic work.

4. Support of Policy

Each member of the community is expected to adhere to the Academic Integrity Policy personally and to support it generally. In keeping with their responsibility to the community, students, faculty and staff who are aware of inappropriate behavior and conduct with regard to the policy must report this information to the Academic Integrity Board.

5. Upholding Integrity

The community is expected to comply with the "spirit," not just the "letter," of this policy.

6. Mutual Respect

Treat all colleagues in the community (staff, faculty and students) with respect, fairness and honesty.

7. Confidentiality

Community members should ensure that all alleged incidents of academic dishonesty are kept confidential in accordance with FERPA.

8. Special Assignments

Faculty members often require students to pursue their academic work according to explicit guidelines or with specific equipment. In these cases, faculty members are obligated to make the special conditions of the assignment clear and to avoid arbitrary changes. Students are obligated to be sure they understand the conditions and should question the instructor if they do not understand.

B. Syllabus Statement

Faculty members are responsible for including a statement consistent with this policy and the academic integrity expectations of the Quinnipiac community in the syllabus of every course they facilitate. An example of such a statement is provided here as default for all university courses:

QU is committed to integrity and honesty in the educational process. As a member of the campus community and a student enrolled in this course, you agree to know and observe the university's Academic Integrity (AI) Policy. Academic misconduct includes, but is not limited to, cheating, facilitation, fabrication, unauthorized collaboration and plagiarism. You must produce original work and know what constitutes plagiarism. You must also know what constitutes cheating. If you are not certain what sources you can rely on when completing an assignment or exam, including any online assessment, you should contact me for clarification. All assignments you submit in this class must be original work completed by you for this specific course. A failure to abide by the AI Policy could lead to a grade penalty on the assessment, failure in the course, an "FAI" notation on your transcript, AI probation, suspension or any other sanction outlined in the university's AI Policy. If you have questions about what constitutes academic misconduct, please contact the course instructor or the Office of Academic Integrity.

C. Academic Integrity Board

1. Responsibilities

The Academic Integrity Board is responsible for investigating and adjudicating alleged violations of the Academic Integrity Policy and educating the university community about academic integrity issues. The Academic Integrity Board works closely with the director of academic integrity and the coordinators of academic integrity initiatives.

2. Composition

The Academic Integrity Board consists of full-time faculty members from each of the university's schools and colleges, full-time university staff members, and full-time undergraduate and graduate students. Temporary board members may be appointed on an as-needed basis by the director of academic integrity.

3. Selection and Tenure

Positions on the Academic Integrity Board are open to all students, full-time faculty and administrative staff.

- Faculty board members are appointed by the individual schools and colleges in accordance with school/college-based processes and approved by the director of academic integrity. At least one board member from each school is required; schools with 25 or more faculty members should have one additional board member for every 25 full-time faculty members.
- Staff board members are selected by the director of academic integrity. Individuals selected to serve can originate from any university department and should maintain both a personal and

professional interest in the academic integrity of the institution and its students.

- Student board members are selected by the director of academic integrity. Student members must have and maintain a minimum 2.5 GPA and cannot be under any type of academic or disciplinary sanctions.

Faculty members elected to the board will serve the duration of their elected term but may remain on the board with the permission of the individual college or school and the director of academic integrity. Staff appointed to the board will serve indefinitely at the discretion of the director of academic integrity. Students appointed to the board will serve while enrolled at the university at the discretion of the director of academic integrity.

If a member of the Academic Integrity Board is unable to or fails to perform their duties for a prolonged period of time, the director of academic integrity will remove the member and appoint a permanent replacement.

D. Office of Academic Integrity

The Office of Academic Integrity serves as the central office for all academic integrity administration in all Quinnipiac University colleges and schools except for the School of Law and School of Medicine.

1. Purpose

The purpose of the Office of Academic Integrity is to provide consistent advocacy, education and preservation of the academic community present at Quinnipiac.

2. Composition

The Office of Academic Integrity is comprised of the director of academic integrity and the Academic Integrity Board. The director of academic integrity is the chief administrator charged with organizing academic integrity efforts in the Quinnipiac community including the intake, processing and management of all reports and the subsequent cases. The Academic Integrity Board is the chief adjudicator of all academic integrity violations.

3. Record Keeping

- All records regarding alleged violations and academic judicial procedures are confidential in accordance with the Family Educational Rights and Privacy Act (FERPA).
- Records will be maintained by the Office of Academic Integrity and will be destroyed seven years after the case is concluded unless the sanction included dismissal or expulsion. These records will be maintained permanently by the Office of Academic Integrity.
- Records of multiple offenses will be maintained by the Office of Academic Integrity and will be made available to the relevant Academic Integrity Board members in the sanctions phase of a hearing or case review.

Academic Judicial Procedures for Student Violations

Students, faculty and staff must report any violation, including minor unintentional violations, directly to the director of academic integrity on the report form (see the Academic Integrity MyQ site (<https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx>)). Once a report of an alleged academic integrity violation has been filed, the case will be considered according to the procedures

set forth in this Academic Integrity Policy. All members of the university community are expected to follow this policy and to use its procedures.

Should it be necessary to invoke the academic judicial procedures during the January term, a Summer session or when circumstances require operation via a distance learning platform, every effort will be made to assemble the necessary committees from the academic integrity board from the preceding academic year. Should that prove impossible due to absences from campus, however, a designee of or the vice president of academic innovation & effectiveness and a designee of or the director of academic integrity have joint authority to assemble the necessary committees. They should make every attempt to maintain the same ratio of faculty, staff and student representation described in this policy.

A. Parties

1. Reporter

The reporter is the community member who learns of, witnesses or otherwise becomes aware of a potential violation of the Academic Integrity Policy and files a formal report with the Office of Academic Integrity. This person may be any member of the Quinnipiac University community or a person outside of the community with specific knowledge relevant to the behavior of an individual or individuals within the community. Unless this person is the faculty member for the course in which the Academic Integrity Policy was potentially violated, this person may not receive updates about the report that was filed.

2. Student

The student is the person within the Quinnipiac University community who has potentially violated the Academic Integrity Policy by conduct and therefore has been specifically named in a formal report filed with the Office of Academic Integrity. This person will be updated progressively through the process outlined in this policy.

3. Faculty Member

The faculty member is the instructor on record for the course in which the potential academic integrity violation was identified in the formal report with the Office of Academic Integrity. This person is expected to participate fully in all parts of the process outlined in this policy—except Joint Resolution (see below)—including compliance with the final sanctions. This person will be updated continually throughout the process outlined in this policy.

4. Witness

The witness is any person specifically identified in the formal report or any other person identified during the course of Academic Integrity Board investigation who may have knowledge of the conduct that violated the Academic Integrity Policy. In order to be considered a witness to a matter, this person must be willing to participate in a live interview with members of the Academic Integrity Board acting to resolve the matter involving the student. The witness's willingness to participate in an interview will be ascertained by the director of academic integrity prior to Academic Integrity Board contact. Witnesses, especially if Quinnipiac University students, cannot be compelled to appear in front of the student.

5. Adviser

The adviser is a member of the Quinnipiac University community—other than students or faculty from the Quinnipiac University School of Law—available to assist the student in preparing for the Academic Integrity Policy process. The student is not permitted to have legal representation, parents or family members to serve as an adviser or to be present in process interviews or meetings. An adviser may assist the student in preparing for the interview or meetings and may attend the interviews or meetings but may not speak during the interview process. The adviser is

not permitted to provide guidance to the student on how to proceed. It is the responsibility of the student to notify the adviser of the date and time of the interview. A student may make a written request to have an adviser assigned by the director of academic integrity. If a student requests an assigned adviser and then refuses this adviser, no further advisers will be assigned.

B. Violations

Students, faculty and staff must report any violation, including minor unintentional violations, directly to the director of academic integrity on the report form (see form on the MyQ website (<https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx>)).

Academic integrity violations encompass any act committed by a Quinnipiac student that compromises or subverts the integrity of the educational or research processes. Violations may fall under one or more category or violation. These offenses include, but are not limited to:

1. Plagiarism, Misrepresentation and Fabrication

Plagiarism

- Definition: Plagiarism refers to representing another person's words or ideas as one's own in any academic exercise, whether intentional or not. It is the responsibility of all students to understand the methods of proper attribution and to apply those principles in all written, oral and electronic submissions.
- Examples include, but are not limited to:
 - Copying information word for word from a source, without using quotation marks and giving proper acknowledgment/citation.
 - Paraphrasing (i.e., putting into one's own words) a source's text, without providing proper acknowledgment/citation. This violation occurs when the ideas or arguments of another are presented in such a way as to lead the reader to believe that these ideas originated with the writer.
 - Presenting as one's own any work (or portion thereof) that has been prepared in whole or in part by someone other than oneself. This includes using unauthorized assistance in preparing one's work and acquiring written work from an outside source. Outside sources include other persons, commercial organizations, electronic sources and other sources.
 - Reproducing (without proper citation) any other form of work of another person, such as a graphic element, a musical phrase, a proof, experimental data, experimental results, data or laboratory reports, in full or in part. This includes turning in work of another student as one's own work.

Misrepresentation

- Definition: Misrepresentation refers to any action in which the student acts to defraud or otherwise mislead the academic authority about some important aspect of the academic process to the extent that it provides an advantage for the student.
- Examples include, but are not limited to:
 - Arranging for another student to substitute for oneself in class, during an examination session or in the completion of any coursework.
 - Taking credit for work not done, such as taking credit for a team assignment without participating or contributing to the extent expected.
 - "Double Dipping" (multiple uses of the same work) or presenting the same or substantially the same written work (or portion thereof) as part of the course requirement for more than one

project or course, without the express prior written permission of the instructor(s) involved.

- If a student does wish to use another assignment as a base for additional credit, faculty should give the student the opportunity to submit in writing an explanation of the unique educational benefits of the new project.
- Falsifying one's GPA, dean's list status or academic achievement to secure a letter of recommendation, referral, committee letter, internship or approval to participate in an academic exercise/program or experiential opportunity.

Fabrication

- Definition: Fabrication refers to falsifying or misusing data in any academic exercise.
- Examples include, but are not limited to:
 - Falsifying data collected for any academic purpose.
 - Making up or presenting falsified data in papers, manuscripts, books or other documents submitted for publication or as course or degree requirements.
 - Making up a source for use in any assignment.
 - Citing a source one did not use.
 - Falsifying material cited.
 - Attempting to deceive any instructor by altering and resubmitting for additional credit assignments, tests, quizzes or exams that have been graded and returned.
 - Attempt to deceive any instructor or supervisor with respect to attendance in any class, internship or clinical setting.
 - Falsifying any information on any document relating to any course, internship or co-curricular activity (including signatures, hours, etc.).

2. Cheating and Stealing

Cheating

- Definition: Cheating refers to acting dishonestly or unfairly in order to create an advantage, especially in an exercise or examination.
- Examples include, but are not limited to:
 - Violating test and assignment procedures and restrictions established by the instructor to gain an unfair advantage on the test or assignment. If a student is uncertain or unaware of the instructor's expectations/procedures, the student must consult with the instructor beforehand.
 - Communicating or attempting to communicate answers, hints or suggestions during an examination.
 - Collaborating (without instructor permission) in the preparation and presentation of reports, laboratory reports or take-home examinations or other course assignments such as copying or giving aid or otherwise failing to abide by the university's or instructor's rules governing the exercise or examination to gain an unfair advantage on the exercise or examination.
 - Signing an attendance sheet for another student or having another student sign an attendance sheet on your behalf when attendance is part of the course grade.
 - The unauthorized sale, purchase, posting, dissemination or use of course materials including, but not limited to, lectures, computer software, exams, assignments, notes, problem sets, homework, papers/essays, research for papers/essays, and/or any other instructional materials.

Stealing

- Definition: Stealing refers to using (or attempting to use) unauthorized assistance in any academic exercise. It includes the stealing or unauthorized acquisition of a test or test answers or impeding the fair process of an examination in any way.
- Examples include, but are not limited to:
 - Copying from someone else's exam, paper or assignment.
 - Looking at someone else's exam before or during an examination.
 - Using another person's answers for an assignment.
 - Soliciting, obtaining, possessing or providing to another person an examination or portions of an exam, prior or subsequent to the administration of the exam, without the authorization of the instructor. Unless the instructor has given permission, students may not provide test questions to other students in any form—oral, written or electronic.
 - Stealing or attempting to steal an examination or answer key.
 - Sharing answers for or collaborating on a take-home assignment or examination without explicit permission from the instructor.

3. Possession or Use of Unauthorized Device or Materials

- Definition: Possession or use of unauthorized device or materials refers to a student's improper access to items that would provide an academic advantage to the student if utilized. This violation does not require that the student utilizes the items nor that the student receives the advantage; it requires only that access was available at a time that it would provide the unfair advantage.
- Examples include, but are not limited to:
 - Unauthorized use or possession of notes, supplemental notes, access passwords or any unauthorized materials during an examination, quiz or other assignment or evaluation.
 - Possessing an electronic device that contains unauthorized information for a test or assignment (e.g., programming one's computer or calculator inappropriately).
 - Using unauthorized materials (e.g., notes, textbooks, calculators, computers or other online sources) or the assistance of an unauthorized person in the preparation of a test or assignment.
 - Recording any portion of a classroom lecture or other instructional activity, or any conversation related to academics or the academic integrity process, without the express consent of the instructor, adviser or administrator.

4. Impeding Fair and Equal Access to the Educational and Research Process

- Definition: Impeding fair and equal access to the educational and research process refers to student conduct that disrupts any academic exercise in such a way that the student and/or other students are deprived of the learning, knowledge or educational value of the exercise as intended by the instructor.
- Examples of this violation include, but are not limited to:
 - Altering or changing an examination or comparable document so as to mislead other users or the reader.
 - Infringing upon the right of other students to fair and equal access to any library materials and comparable or related academic resources, including tampering with or damaging any library materials or comparable academic resources.
 - Attempting to prevent access by other users to the university's computer system and its resources, to degrade its system

performance, or to copy or destroy files or programs without consent.

- Intentionally disrupting the educational process in any manner.

5. Misrepresenting or Misusing One's Relationship with the University

- Definition: Misrepresenting or misusing one's relationship with the university refers to any action in which the student attempts to gain an advantage or consideration as a result of an improperly portrayed affiliation with or information from the university.
- Examples of this violation include, but are not limited to:
 - Falsifying, misusing, omitting or tampering with information (in any form, including written, oral or electronic) such as test scores, transcripts, letters of recommendation or statements of purpose, to gain initial or continued access to the university's programs or facilities.
 - Altering, changing, forging or misusing academic records or any official university form regarding oneself or others.
 - Misrepresenting one's status or affiliation with the university.
 - Misrepresenting one's own or another's identity for academic purposes or in an academic setting.
 - Causing any false information to be presented at an academic proceeding or intentionally destroying evidence important to an academic proceeding.
 - Failing to be fully cooperative and truthful if one has direct knowledge of an alleged violation of academic integrity.
 - Reporting an academic integrity violation known to be false.
 - Offering bribes (e.g., monetary remuneration, gifts or favors) to any university representative in exchange for special consideration or waiver of procedures.

6. Facilitation and Collusion

- Definition: Facilitation refers to knowingly or intentionally assisting any person in the commission of an academic integrity violation. Students who engage in facilitation are also subject to discipline for integrity violations. Collusion refers to assisting another student in an act of academic misconduct. Collusion differs from collaboration in that collaboration may be permitted in various courses. It is the responsibility of the student to know whether and to what extent collaborative activity is permitted.
- Examples of this violation include, but are not limited to:
 - Giving another student one's assignment or paper (or a portion thereof), for any reason, unless such sharing is specifically authorized by the instructor for whom the assignment was created.
 - Giving another student answers to a test or assignment.
 - Letting another student copy one's answers during an examination.
 - Creating unfair opportunities for students in all sections of a class to do well on tests or other assignments. Thus one may not give any test (or assignment) information, questions or answers to students in another class or other sections of the same class because it gives students in later sections an unfair advantage. Instructors also may explicitly ask students not to share information with students in other classes regardless of semesters. In those cases, the sharing of information is also a violation.

- Posting any academic work or information on academic sharing websites or other electronic sites with the intent of providing unauthorized help to current or future students.

7. Retaliation

- **Definition:** Retaliation refers to providing adverse assessment, scoring or reflection upon or otherwise acting or inducing adverse action toward anyone who reports an academic integrity violation, serves as a witness in an academic integrity case or participates in the investigation and resolution of an academic integrity case.
- Examples of this violation include, but are not limited to:
 - Submitting an inaccurately or unfairly poor peer review of someone's performance or work.
 - Intentionally losing, miscounting or otherwise failing to give full and due credit for the contributions made by another person.
 - Coercing or convincing others to adopt a poor outlook on the participation, presence or person of another.

C. Process

When a potential violation of the Academic Integrity Policy occurs, any Quinnipiac University community member who is aware of it should engage in this process as a means of addressing it. The process includes seven stages:

- Pre-Report
- Report
- Notice
- Response
- Adjudication
- Resolution
- Appeal

1. Pre-Report

All members of the university community are encouraged to discuss alleged violations with the director of academic integrity prior to filing a report to clarify and confirm procedures.

When a member of the university community suspects that a student has committed an academic integrity violation, that member must submit an academic integrity report. Before reporting the allegation to the Office of Academic Integrity, the following steps should be taken.

Investigate the Claim

- When a course instructor suspects an academic integrity violation has occurred, the instructor:
 - Should meet with the student suspected of violating the policy to discuss the suspicions.
 - Should gather information in support of the claim (i.e., papers and assignments).
 - Should speak with witnesses who may have information about the incident.
 - If after investigation, there is reasonable suspicion that an academic integrity violation has occurred, the instructor must file a report.
- When a member of the university community (other than the course instructor) suspects a violation of the Academic Integrity Policy, they must:
 - First discuss the matter with the course instructor. This is especially true when the allegation is based solely upon a student's account of what happened.

- This discussion will not only notify the faculty member of the suspicions but also prompt a preliminary investigation. The preliminary investigation should include gathering information to support the claim and speaking with potential witnesses.
- If after investigation, there is reason to believe a violation has occurred, the report may be filed by any member of the university community. Please note, the reporter's identity will be disclosed once notice is sent to the accused student.

2. Report

- Students, faculty and staff must report all substantial and all intentional violations. This written, formal report, presented on the report form, may be submitted by any member of the university community (student, faculty or staff) to the director of academic integrity. The integrity report form is available on the university's MyQ website (<https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx>).
- The report must provide the name of the student, the date(s) and a description of the alleged violation(s), detailed facts surrounding the alleged violation(s), the names of any witnesses and detailed factual information or documentation useful in determining the truth of the charge(s) made. If a report contains private or confidential information that is not related to the claim, extraneous prejudicial information, or information that cannot be verified by the academic integrity process, the director of academic integrity will reject the report. Upon revision, the report may be resubmitted.
- If witnesses are referred to but not identified within the report submitted to the director of academic integrity, their testimony cannot be verified by the academic integrity process and so the director of academic integrity will reject the report. Each instance of academic dishonesty involving a student must be reported separately unless the claims arise out of the same set of circumstances.
- All reports must be substantiated by information that directly relates to proving the claim. Extraneous prejudicial information will be inadmissible. Information that cannot be verified through the academic integrity process also will be inadmissible. Examples of inadmissible information:
 - The report includes prejudicial information about the accused student's academic integrity history.
 - The report includes hearsay information (i.e., when one witness says another witness told them that the accused student cheated on an exam).
 - The report includes the testimony of an anonymous witness.
 - The report includes private or confidential information that is not related to the claim and for which there is no "need to know."
 - This step will be necessary if inadmissible information is included in the initial report/documentation. When a report/supporting document contains inadmissible information, the director of academic integrity will reject the report/documentation. The reporter will be required to revise the report/documentation before the Office of Academic Integrity will accept and process the case.
- All academic integrity reports must be filed in a timely manner. All suspected violations must be reported to the director of academic integrity on the report form provided on the MyQ site (<https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx>). Reports must be submitted within 20 days of the date of the alleged incident or within 20 days of discovery of the alleged violation, whichever is later.

- f. Incidents involving multiple students must be reported on separate report forms to preserve each student's confidentiality. The director of academic integrity may, however, determine that two cases either involve collaboration between two students or are otherwise so connected that they should be considered as one case.

3. Notice

- a. Once it has been determined that the report and supporting documents conform to the standards set out in this policy, the student accused of the academic integrity violation will be notified of the claim. The reporter will receive a copy of the notice to confirm that the academic integrity process has been initiated.
- b. The director of academic integrity will provide written email notice to the student(s), staff and faculty member(s) involved to confirm that a complaint has been filed, to specify the alleged violation and to outline the academic judicial procedures. This notice will explain that within 48 hours/two business days of such notice the student is obligated to respond on the response form (see form on the MyQ website (<https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx>)). The parties involved are responsible for checking their Quinnipiac email account even during examination and vacation periods. Excuses for not checking the mailbox or email account or delays in mail delivery are not acceptable reasons for postponement of any deadline in the Academic Integrity Process.

4. Response

The student must fill out the response form within two business days (see form on the MyQ website (<https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx>)). Here the student will indicate whether they accept responsibility for the violation and how they wish to proceed. If a student accepts responsibility, they are admitting to having committed the academic integrity violation(s) reported.

5. Adjudication

5a. Joint Resolution

- a. If this is a first-time minor and unintentional violation and the faculty member and student can agree on an outcome, whether or not the instructor imposes a sanction, the instructor must submit a report form to the director of academic integrity so the university can monitor types of violations and take appropriate steps to remediate the cause. The student is also required to submit a response form. A joint resolution reflecting the terms of their agreement must be submitted to the director of academic integrity (see form on the MyQ website (<https://myq.quinnipiac.edu/Academics/Academic%20Integrity/Pages/default.aspx>)). A minor unintentional violation will be considered a first-time violation for the student and a subsequent offense will be treated as a second offense.
- b. If the student accepts responsibility and has not been found responsible for a previous violation of the Academic Integrity Policy, the student may request:
- i. The opportunity to communicate with the faculty member to discuss the violation and attempt to develop a joint student/faculty resolution.
 1. If both parties agree to the statement of the violation(s) and the sanction(s), they will prepare the joint resolution form (see form in MyQ). On this form they will specify the violation(s) and the jointly agreed sanction(s). This joint resolution will be forwarded to the director of academic integrity for final approval. If a conflict of interest occurs, the director can request Academic Integrity Board approval of

joint resolutions. The director can reject a joint resolution when further investigation of the incident is warranted.

2. Faculty members are not required to participate in a joint resolution session and may instead request that the case proceed to case review. It is anticipated and encouraged that a joint resolution will be worked out in a private meeting between the faculty member and the student(s) involved in a case. However, either the student or the faculty member can request that the director of academic integrity assign a member of the Academic Integrity Board to attend a joint resolution meeting as a neutral third party.
 - ii. Not to communicate with the faculty member. The student can elect instead to proceed directly to case review (see Case Review).
- c. If the student denies responsibility for the minor and unintentional violation or if the faculty member and the student cannot agree on an outcome, the case will proceed on to case review.
- d. A student who did not initially accept responsibility and has not been found responsible for a prior academic integrity violation may, at any time before a final board decision, change their response to accept responsibility in order to participate in the joint resolution process.

5b. Case Review

If a student with no prior academic integrity violation declares they are not responsible for the alleged violation, the case will proceed to a case review team for investigation.

If the student has been found responsible for an academic integrity violation and accepts responsibility for the subsequent violation, the case will proceed to case review unless the student requests a hearing. The case review team will investigate and decide on the appropriate sanction(s).

- a. When a matter proceeds to case review, the director of academic integrity will act expeditiously to select, from the Academic Integrity Board, a case review team consisting of one student and one faculty or staff board member, and will provide written notification to the student(s), staff and faculty member(s) involved indicating that a case review team has been assigned. Any member of the Academic Integrity Board who has a conflict of interest in the case must make that conflict known to the director of academic integrity.
- b. Acting with all reasonable dispatch, the case review team will interview separately the student(s), the faculty member(s) and any witnesses involved in the case. These interviews may occur in person or virtually via Zoom depending on applicable health and safety protocols to be determined by the university. If not prohibited by health and safety protocols, a party may be granted the opportunity to submit and/or review physical evidence when a virtual case review interview is conducted. As part of the investigation, the case review team will collect and review all evidence relevant to the case.
- c. If a student fails to respond to or comply with a letter/notification from the Academic Integrity Office or case review team, the rights and options presented herein are forfeited by the student. The case review may proceed without the student or faculty member present and a decision will be rendered. If a case review takes place without the student present, the student will be notified in writing via certified and electronic mail of the outcome of the investigation.
- d. Upon completing the review, the case review team will meet as soon as reasonably possible to determine whether sufficient evidence of a violation exists.

- i. If insufficient evidence of the alleged violation(s) is determined, the report and charges will be dismissed. Under these circumstances, no record of the report or the outcome will be retained. The director of academic integrity will inform the student(s) and other involved parties of this decision.
- ii. If the case review team finds by clear and convincing evidence that the student committed an academic integrity violation, the case review team shall then be informed of the student's prior record so that the student's entire history of academic integrity violation can be considered in issuing sanctions. In order to meet the clear and convincing evidence standard, the board must find it highly probable that the student committed the violation(s).
- iii. The case review team's determination shall be the final resolution in the case subject only to appeal by the student as specified in this policy.
- iv. The case review team will submit a written report of findings to the director of academic integrity. The director of academic integrity will notify the parties, in writing, of the case review team's final determination, the sanctions imposed and the appeal process.

5c. Hearing

If the student has been found responsible for a previous violation of the policy and denies responsibility for the subsequent violation, the case will automatically proceed to a hearing. When a case requires, the director of academic integrity will act with dispatch to convene a hearing board from the Academic Integrity Board.

- a. Each hearing board will consist of five members selected from the Academic Integrity Board: three students and two faculty/staff members. The director of academic integrity or a designated member of the Academic Integrity Board will chair each hearing. Any member of the Academic Integrity Board who has a conflict of interest in the case must make that conflict known to the chair of the Academic Integrity Hearing Board and the director of academic integrity.
- b. The director of academic integrity will notify the student(s) and faculty that are involved, in writing, of the academic judicial hearing procedures. The student may choose to meet with the director of academic integrity to be sure the student fully understands the procedures that will be followed during the hearing. The hearing board will meet as soon as reasonably possible.
- c. A hearing will be scheduled at a time that neither the student nor faculty member involved in the case has a class conflict. The hearing may occur in person or virtually via Zoom depending on applicable health and safety protocols to be determined by the university. If not prohibited by health and safety protocols, a party may be granted the opportunity to submit and/or review physical evidence when a virtual hearing is conducted. Notice of the time, date and place of the meeting will be sent to the parties involved via email at least 48 hours/two business days prior to the meeting. This letter will also provide notice that the student has the right to an adviser, who can be any member of the Quinnipiac University community other than a student or faculty member from the Quinnipiac University School of Law. A single request for postponement of up to five additional business days for an academic integrity hearing can be made to the director of academic integrity. The request must be for good cause and is subject to the availability of the hearing board and other parties involved in the case. Excuses for not checking the mailbox or email account or delays in mail delivery are not acceptable reasons for postponement. Academic integrity cases are heard as scheduled with or without the student present. All communications will be sent to the student's Quinnipiac email. If the student's Quinnipiac email has been disabled for any reason it is the responsibility of the student to notify the Office of Academic Integrity.
- d. The student appearing before the hearing board will not be permitted to have legal representation, parents, family members or students or faculty from the Quinnipiac University School of Law at the hearing. A student may request, in writing, to have an adviser assigned by the director of academic integrity. If a student requests an assigned adviser and then refuses this adviser, no further advisers will be assigned. An adviser may assist the student in preparing for the hearing and may attend the hearing but may not speak during the hearing process. The adviser is not permitted to provide guidance to the student on how to proceed. It is the responsibility of the student to notify the adviser of the date and time of the hearing.
- e. The procedure for the hearing will be as follows:
 - i. Each party will present a statement. The hearing board will ask questions of each party, examine evidence and interview witnesses if necessary.
 - ii. Upon conclusion of this discussion, each party will be asked if there is any additional information, discrepancies or questions that need to be presented or addressed.
 - iii. All parties will be asked to leave the room while the hearing board deliberates. After its discussion, the board will decide if there is clear and convincing evidence that indicates that the student is responsible for violation(s) of the Academic Integrity Policy by way of a simple majority vote. In order to meet the clear and convincing evidence standard, the board must find it highly probable that the student committed the violation(s).
 - iv. If the student is found to be responsible, the hearing board shall then be informed of the student's prior record so that the student's entire history of academic violation can be considered in issuing sanctions.
 - v. If the student is found responsible for the violation(s), the hearing board has full and unique authority to determine the sanction(s).
- f. Once the hearing board has reached a decision, the chair of the hearing board will ask the parties involved to return to the room, and the results of the deliberation will be presented. In addition, the chair of the hearing board will notify the parties involved and the director of academic integrity of the decision in writing via electronic mail following the hearing. The notice will explain the sanctions imposed by the hearing board and the appeal process.
- g. If insufficient evidence of the alleged violation(s) is determined, the report and charges will be dismissed. Under these circumstances, no record of the report or the outcome will be retained. The chair of the hearing board will inform the parties and the director of academic integrity of this decision in writing via electronic mail.
- h. If a student fails to respond to or comply with a letter/notification from the Academic Integrity Office or hearing board; attend a scheduled meeting with any academic integrity officer, hearing board or case review team member or faculty member; attend an academic judicial hearing; or abide by any of the procedures here noted in this policy, the rights and options presented herein are forfeited by the student. The case may proceed without the student or faculty present and a decision will be rendered. If a hearing takes place without the student present, the student will be notified in writing via certified and electronic mail of the outcome of the hearing.

6. Resolution

The director of academic integrity will notify the parties, in writing, of the case review team's final determination, the sanctions imposed and the appeal process.

Guidelines for Determining Sanctions

All violations of the Quinnipiac University Academic Integrity Policy are understood to be infractions against the community. For that reason, all violations are to be reported, adjudicated through the process and maintained as part of a student's record. However, within the consideration of the Academic Integrity Board, faculty member and student for the purposes of sanctioning can be the relative severity of the violation reported.

- a. **Minor:** A minor violation is one in which the faculty member or Academic Integrity Board finds a lesser offense with the actions of the student. This may be relative to how or where the violation occurred, the relatively small weight of the assignment on which the violation occurred, or other factors important to the faculty member and/or Academic Integrity Board.
- b. **Major:** A major violation is one in which the faculty member or Academic Integrity Board finds a more severe impact by the actions of the student. This may be determined relative to the manner in which the violation was carried out, the significant weight of the assignment on which the violation occurred, or other factors important to the faculty member and/or the Academic Integrity Board.
- c. **Intentional:** An intentional violation is one in which the student knowingly acted or likely should have known that specific actions were in violation of Academic Integrity Policy. Intentional violations come with a presumption that the student was attempting to gain an academic advantage through the action.
- d. **Unintentional:** An unintentional violation is one where the student did not know or likely would not have known that specific conduct was in violation of the Academic Integrity Policy. Unintentional violations do not have a presumption that the student acted in order to gain an academic advantage.

Below are guidelines for the Academic Integrity Board to consider when deciding which sanctions are appropriate in a case review determination or hearing board decision. However, the Academic Integrity Board may deem alternate sanctions appropriate in individual cases.

- a. First offenses may result in a grade penalty on the exam/assignment, a zero on the exam/assignment and/or failure of the course, but could lead to immediate academic integrity probation suspension, dismissal or expulsion. Probation is a pre-suspension sanction.
- b. Repeat and subsequent offenses will result in increasingly severe sanctions, including suspension, dismissal and expulsion. When a student on probation is found responsible for a subsequent academic integrity violation during the probationary period, the subsequent violation will automatically result in a one-semester suspension.
- c. If the student is sanctioned with failure of the course, a grade of FAI may be imposed to indicate that the failure was a result of an academic integrity sanction.
- d. In addition to above, the hearing board has the right to require the student to complete academic integrity projects, write letters of apology or any alternate educational sanction deemed appropriate for any violation, in addition to the automatic educational requirement implemented by the Office of Academic Integrity for every student found to be responsible for a violation of the Academic Integrity Policy.

- e. The hearing board has the authority to convert the W grade to an FAI upon finding the student responsible for an academic integrity violation.
- f. Any sanction resulting in a grade of WAI or FAI or in a suspension, dismissal or expulsion automatically will appear on a student's transcript. Students may submit to the vice president of academic innovation & effectiveness a petition to have this academic integrity notation removed from their record if two semesters/terms have passed from the time of the sanction with no further academic integrity violations, or the student completes the requirements for graduation (whichever one occurs first). Students will be required to have completed the Academic Integrity Remediation Process with the Office of Academic Integrity in order to have the notation removed.

7. Appeal

- a. An individual who has been found responsible for a violation of the Academic Integrity Policy may appeal the decision of the case review team or hearing board. Appeals must be made directly to a designee of or the vice president of academic innovation & effectiveness. During this appeal process, the original sanction is held in abeyance until an appeal decision has been made.
- b. A detailed formal letter of appeal must be submitted within 48 hours/ two business days of the student's receipt of written notification of the decision and must explain one or more of the following specific grounds for the appeal:
 - i. Improper academic judicial procedures that impacted the effective presentation of the student's case.
 - ii. Additional or new relevant information has been discovered.
 - iii. The sanction was not consistent or appropriate with the nature of the violation.
- c. A designee of or the vice president of academic innovation & effectiveness may meet with the individual involved and with any witnesses. A designee of or the vice president of academic innovation & effectiveness then will decide to:
 - i. Uphold the original decision on responsibility and the sanction imposed.
 - ii. Uphold the original decision on responsibility and modify the sanction imposed.
 - iii. Determine that improper procedures impacted the effective presentation of the student's case and order a new hearing to be held using proper procedures.
 - iv. Overturn the decision on responsibility.
- d. A designee of or the vice president of academic innovation & effectiveness will notify all appropriate individuals involved in the case, the director of academic integrity and any appropriate Quinnipiac University personnel (dean, registrar, One Stop, etc.) of the outcome of the appeal.

D. Guidelines

1. Consolidation

If multiple reports arising out of similar or the same set of circumstances are filed against a student, the separate reports may be investigated as one case.

2. Course Completion

If grades are awarded while the case is in progress, the faculty member must assign a temporary grade of "incomplete" to the student pending the outcome of the academic integrity hearing board review process. A faculty member should not automatically assign a grade (other than an "I") when a student is suspected of a violation of this policy. When an incomplete grade is assigned in a prerequisite course, a student may be

permitted to enroll in the subsequent course pending the outcome of the academic integrity case. If upon resolution of the academic integrity case, the student's grade does not meet the prerequisite requirements, the student will be withdrawn from the subsequent course.

3. Course Withdrawal

If a student withdraws from a class prior to the resolution of an academic integrity violation report, the withdrawal shall not impact the process of the academic integrity case. If the student is found responsible for an academic integrity violation, a grade of WAI will be imposed to indicate that the withdrawal was undertaken after a violation of the university's Academic Integrity Policy. The Academic Integrity Board has full and unique authority to determine sanctions as part of a case review investigation or academic integrity hearing and may convert the WAI to an FAI grade.

- a. The grade of WAI or FAI will automatically appear on a student's transcript.
- b. Students may submit to the vice president of academic innovation & effectiveness a petition to have the WAI or FAI academic integrity notation removed from their record if two semesters/terms have passed from the time of the sanction with no further academic integrity violations or the student completes the requirements for graduation (whichever one occurs first). Students will be required to have completed the Academic Integrity Remediation Process with the Office of Academic Integrity to have the notation removed.

4. Concurrent Reports

If a second report is filed against the student before there has been a resolution in the first case, whether the second report arises from the same or another course, resolution of the second case will be postponed until there has been a resolution in the first case.

5. Failure to Respond

If a student fails to respond to or comply with a letter/notification from the Academic Integrity Office or hearing board; attend a scheduled meeting with any academic integrity officer, hearing board or case review team member or faculty member; attend an academic judicial hearing; or abide by any of the procedures here noted in this policy, the rights and options presented herein are forfeited by the student. The case may proceed without the student or faculty member(s) present and a decision will be rendered. If a hearing takes place without the student present, the student will be notified in writing via certified and electronic mail of the outcome of the hearing.

6. Non-Compliance

- Students who fail to comply with the sanctions determined in a joint resolution will have their case proceed to a hearing where the academic integrity board will determine sanctions.
- Students who fail to comply with the sanctions determined by a case review team or hearing board will be subject to a one-semester suspension.
- Procedure:
 - Any student who appears to be in non-compliance with a joint resolution or a case review or a hearing board sanction will be notified by the director of academic integrity via email of the apparent noncompliance. The student will be informed of the non-compliance issues/facts and will be instructed to reply within 48 hours/two business days. The student also will be informed that an extension for compliance can be requested, in writing, to the director. No more than one extension will be granted by the director. If the student requests an extension for compliance, the

director will notify the student of the extension's approval/denial and the reasons for such.

- If the student does not reply within 48 hours/two business days of the notification of non-compliance, the student will be deemed to be non-compliant and the case will proceed to a hearing (joint resolution) or the student will be subject to a one-semester suspension (case review or hearing).
- Appeal of the suspension will occur in the same manner as all other suspensions (see Appeal section of the Academic Integrity Policy).

7. Curative

The Office of Academic Integrity can perform simple amendments and revisions to academic integrity reports for the purpose of correcting pertinent information (i.e., class, faculty or student information) and/or concealing information that could be used to identify persons who have an individual right to confidentiality (i.e., redacting other student names).

8. Post-Course Adjudication

If a student earns a final course grade and later is found responsible for academic integrity violation(s) in that same class, the academic integrity sanctions will take precedence over the initial grade and stand as a matter of course.

9. Separation

The Office of Academic Integrity maintains the ability to separate and initiate cases for multiple potential violations of academic integrity from a single report. The cases can be focused on different students (i.e., one report can initiate academic integrity cases on more than one student) and/or focused on different assignments for one student (i.e., one report can initiate an academic integrity case for the midterm examination and an academic integrity case for the final examination). Multiple cases extracted from a single academic integrity report must be confirmed with the faculty member for the class in which the potential violations took place prior to initiation.

10. Violations Outside of a Course

If a student with no prior academic integrity violation accepts responsibility for an action which violates the Academic Integrity Policy but is not related to a particular class, the joint resolution may be completed with the director of academic integrity. An example of this would be giving a fellow student a paper from a class taken in a previous semester. Joint resolutions completed with the director of academic integrity will be approved by the Academic Integrity Board.

E. Student Procedural Rights

A student who has been charged with a violation of the Academic Integrity Policy shall be granted the following procedural rights:

- a. **Confidentiality:** In accordance with FERPA and the Student Records Policy (p. 120), the right to have all records, files and proceedings kept confidential and shared with a Quinnipiac University official only when the official has a legitimate need to know.
- b. **Notice:** The right to be informed in writing of the specific violation(s) and inappropriate behavior in which the student is suspected of being involved.
- c. **Procedures:** The right to be informed orally and/or in writing of the academic integrity procedures.
- d. **Hearing:** The right to be notified in writing of the date, time and place of their hearing.

- e. **Evidence and Witnesses:** The right to know the nature of the evidence against them and the opportunity to present relevant evidence and witnesses on their behalf.
- f. **Adviser:** The right to have a member of the university community, other than a Quinnipiac University School of Law student or faculty member, act as an adviser and attend the case review interview and/or hearing. If the student so requests, the Office of Academic Integrity will appoint an adviser for the student. The adviser may attend the case review interview and the AI hearing, but may not attend the joint resolution discussion.
- g. **Written Decision:** The right to have written notice of the results of any case review or hearing.
- h. **Appeal:** The right to appeal a decision of a case review team or hearing board within 48 hours/two business days of receiving written notification of the final decision.
- i. **Defense:** The right to present a case against all alleged violation(s) and inappropriate behavior. This right maintains the option of remaining silent at any point without that silence being used against the student.

¹ This policy, and its emphasis on six principles of integrity, relies heavily upon the "The Fundamental Values of Academic Integrity," Third Edition, published by the International Center for Academic Integrity in 2021.

Animals on Campus

Updated Spring 2019

Section 1: General Policy

1.01 Policy Statement

Quinnipiac University ("university") allows individuals to bring animals on university property in accordance with federal laws and in other situations subject to the rules outlined in this policy.

The university supports the use of service and emotional support animals on campus as defined and regulated by federal and state laws. The university also supports the use of research and therapy animals used in approved research and teaching activities.

At the same time, it recognizes the health and safety risks potentially created by animals on campus. Animals, including pets of any kind (except fish, as noted in the Student Handbook (<http://catalog.qu.edu/handbooks/undergraduate/university-policies/animals/>)), are not permitted on university campuses or in university housing facilities, with the exception of service animals, approved emotional support animals, approved research animals and approved therapy animals.

1.02 Scope

This policy applies to employees, students, university affiliates, visitors, contractors and applicants for admission to or employment with the university. In addition to the general policy statement in Section 1.01, Section 2 applies specifically to employees. Section 3 applies specifically to students. Section 4 regards research and teaching animals. Sections 5 and 6 pertain to therapy animals.

This policy should not be read to grant an individual access to university property beyond that to which they would normally be granted.

1.03 Definitions

Campus – any university controlled and/or managed building, office or grounds.

Emotional Support Animals (ESA) – As defined by the Fair Housing Act, an emotional support animal may provide physical assistance, emotional support, calming, stability and other kinds of support. The presence of the animal must be necessary to provide the resident with a disability the use and enjoyment of the dwelling. The assistance performed by the animal must be directly related to the individual's disability. These emotional support animals are not service animals, which are defined in and protected by the Americans with Disabilities Act amendments. Further, non-domesticated, wild, potentially dangerous, venomous, endangered and/or illegal animals, including rodents, arachnids, reptiles and other exotic animals, are not permitted.

Handler – Person accompanying an animal or responsible for bringing it to campus.

Office of Student Accessibility (OSA) – The unit at Quinnipiac University that ensures equal access to academic and programmatic opportunity to students.

Pet – Any domestic animal including but not limited to amphibians, mammals, reptiles and birds kept for pleasure or companionship.

Research and Teaching Animals – Animals approved for use in direct support of the university's teaching and research missions and used in accordance with guideline established by the Institutional Animal Care and Use Committee (IACUC). The QU IACUC provides policies for meeting the ethical and legal requirements for the humane and ethical use of vertebrate animals.

Residential Living Area – The area defined by Residential Life as areas specific to residential activity. This designation will vary among the campuses. This designation also indicates the area in which an emotional support animal is allowed.

- *Mount Carmel Residential Living Area* – The region south of the stream, north of the Hilltop Lot, west of Hogan Lot, anything on Bobcat Way (including the Bobcat Den)
- *York Hill Residential Living Area* – The area comprised by the Townhouses, Eastview, Westview and Crescent Residence Halls (including the basketball and volleyball courts and outdoor patios)
- *Off-Campus Residential Living Areas* – All university-owned or leased off-campus residential properties

Service Animal – As defined by the Americans with Disabilities Act (ADA), a service animal is any dog that is individually trained to do work or perform tasks for the benefit of a person with a disability, including a physical, sensory, psychiatric, intellectual or other mental disability. The work the dog has been trained to do must be directly related to the person's disability. Examples include, but are not limited to, guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting/protecting an individual who is having a seizure and reminding an individual to take medication. The provision of emotional support, well-being, comfort or companionship does not constitute work or tasks under this definition. While dogs are the most common service animals, under certain circumstances, a miniature horse may qualify as a service animal. Other animals do not qualify as service animals.

Service Animal in Training – A service animal in training is a dog that is being trained as a service animal and includes a puppy that is being raised to become a service animal in training.

Therapy Animal – An animal working with a health care or mental health care professional in a therapeutic activity. The animal must have received training appropriate for animal assisted therapy/activities (AAT/AAA) as evidenced by receipt of the Canine Good Citizen certificate from the American Kennel Club, or registration by a national therapy animal organization, such as Pet Partners. A therapy animal is not an emotional assistance animal or a service animal.

Section 2: Employees Wishing to Bring Animals on Campus

This policy is section 2.14 of the Quinnipiac University Policy Manual 2016–17.

2.01 Policy Statement

The university prohibits bringing a pet (a domestic animal kept for pleasure or companionship) to work with the exception of animals providing ADA accommodations for a person with disabilities (service animals).

2.02 Service Animals

Service Animals: According to the Americans with Disabilities Act (ADA), a service animal is defined as “any animal individually trained to work or perform tasks for the benefit of an individual with a disability, including, but not limited to, guiding individuals with impaired vision, alerting individuals to an impending seizure or protecting individuals during one, and alerting individuals who are hearing impaired to intruders, or pulling a wheelchair and fetching dropped items.”

A person with a disability uses a service animal, such as a seeing-eye dog, as an auxiliary aid. Service animals are welcome in all buildings on the university property and may attend any class, meeting or other event. There may be an exception to certain areas, such as laboratories and facilities areas, etc.

Employees requesting accommodation for a disability that includes a service animal must provide appropriate documentation to human resources.

Requirements of service animals and their owners include:

- All animals must be immunized against rabies and/or other diseases common to that type of animal. All vaccinations must be current.
- State law requires that all dogs be licensed.
- Service animals must always wear an owner identification tag (which includes the name and phone number of the employee), license tag and rabies vaccination tag.
- Animals must be in good health.
- Animals must be on a leash, harness or other type of restraint at all times, unless the employee is unable to restrain the animal on a leash because of a disability.
- The owner must be in full control of the animal at all times. The care and supervision of the animal is solely the responsibility of the employee.

Reasonable behavior is expected from service animals while on the university property. The owners of disruptive and aggressive service animals may be asked to remove them from the university. If the improper

behavior happens repeatedly, the owner may be told not to bring the service animal into any facility until the owner takes significant steps to mitigate the behavior. Cleanliness of the service animal is mandatory. Consideration of others must be taken into account when providing maintenance and hygiene of service animals. The employee is expected to clean and dispose of all animal waste. Owners of service animals are responsible for all actions of the animal while on university property.

Section 3: Students Wishing to Bring Animals on Campus

This policy is Section 1.18 of the Guidelines and Procedures for Students with Disabilities (p. 86).

3.01 Scope

This policy applies to all students of the university.

3.02 Policy Statement

According to university policy (Human Resources Policy Manual (<https://myq.quinnipiac.edu/Welcome/HR/Documents/Policy%20Manuals%20and%20Procedures/Quinnipiac%20University%20Policy%20Manual%202021-22.pdf>), 2.14; Student Handbook: Residential Life (<http://catalog.qu.edu/handbooks/undergraduate/residential-life/residence-hall-staff-organizations/residential-life-policies/>)), animals, including pets of any kind (except fish, as noted in the Student Handbook), are not permitted on university campuses or in university housing facilities, with the exception of service animals. The university is, however, committed to providing access to its programs and services. Consequently, the university permits students with disabilities who require one to have an emotional support animal as a reasonable accommodation. Students may not bring a service animal or emotional support animal until it is approved by OSA and the Office of Residential Life, when applicable. Please note the definitions below to understand the difference between a service animal and an emotional support animal.

3.03 Definitions

(same as section 1.03)

Campus – any university controlled and/or managed building, office or grounds.

Emotional Support Animals (ESA) – As defined by the Fair Housing Act, an emotional support animal may provide physical assistance, emotional support, calming, stability and other kinds of support. The presence of the animal must be necessary in order to provide the resident with a disability the use and enjoyment of the dwelling. The assistance performed by the animal must be directly related to the individual’s disability. These emotional support animals are not service animals, which are defined in and protected by the Americans with Disabilities Act Amendments. Further, non-domesticated, wild, potentially dangerous, venomous, endangered and/or illegal animals, including rodents, arachnids, reptiles and other exotic animals, are not permitted.

Handler – Person accompanying an animal or responsible for bringing it to campus.

Office of Student Accessibility (OSA) – The unit at Quinnipiac University that ensures equal access to academic and programmatic opportunity to students.

Pet – Any domestic animal including but not limited to amphibians, mammals, reptiles and birds kept for pleasure or companionship.

Research and Teaching Animals – Animals approved for use in direct support of the university's teaching and research missions and used in accordance with guideline established by the Institutional Animal Care and Use Committee (IACUC). The QU IACUC provides policies for meeting the ethical and legal requirements for the humane and ethical use of vertebrate animals.

Residential Living Area - The area defined by Residential Life as areas specific to residential activity. This designation will vary among the campuses. This designation also indicates the area in which an Emotional Support Animal is allowed.

- *Mount Carmel Residential Living Area* – The region south of the stream, north of the Hilltop Lot, west of Hogan Lot, anything on Bobcat Way (including the Bobcat Den);
- *York Hill Residential Living Area* – The area comprised by the Townhouses, Eastview, Westview and Crescent Residence Halls (including the basketball and volleyball courts and outdoor patios);
- *Off-Campus Residential Living Areas* – All university-owned or leased off-campus residential properties.

Service Animal – As defined by the Americans with Disabilities Act (ADA), a service animal is any dog that is individually trained to do work or perform tasks for the benefit of a person with a disability, including a physical, sensory, psychiatric, intellectual or other mental disability. The work the dog has been trained to do must be directly related to the person's disability. Examples include, but are not limited to, guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting/protecting an individual who is having a seizure and reminding an individual to take medication. The provision of emotional support, well-being, comfort or companionship does not constitute work or tasks under this definition. While dogs are the most common service animals, under certain circumstances, a miniature horse may qualify as a service animal. Other animals do not qualify as service animals.

Service Animal in Training – A service animal in training is a dog that is being trained as a service animal and includes a puppy that is being raised to become a service animal in training.

Therapy Animal – An animal working with a health care or mental health care professional in a therapeutic activity. The animal must have received training appropriate for animal assisted therapy/activities (AAT/AAA) as evidenced by receipt of the Canine Good Citizen certificate from the American Kennel Club, or registration by a national therapy animal organization, such as Pet Partners. A Therapy animal is not an emotional assistance animal or a service animal.

3.04 Service Animals

Students who have a documented disability that requires the assistance of a service animal are permitted to bring such animals to campus. Service animals are permitted in all areas of campus where students are generally permitted to go. (Note Section 3.08 (p.) below for restrictions.)

A service animal shall be kept on a harness, leash or other tether at all times, unless the handler is unable to use such a tether due to a disability or the use of a tether would interfere with the animal's ability to safely and effectively perform its duties. If a tether is not utilized, the service animal must be otherwise under the handler's control (e.g., voice control, signals or other effective means). A service animal should wear a leash, harness, cape or other marker that identifies it as a service animal at all times when on campus.

When it is not obvious what service the animal provides, the handler may be asked whether the animal is required because of a disability and what task the animal is trained to perform. The handler need not present proof or documentation of the nature of his or her disability or the training or certification of the service animal.

3.05 Emotional Support Animals

Students are permitted to keep emotional support animals in on-campus housing on a case-by-case basis as a reasonable accommodation for a documented disability.

Emotional support animals may not travel throughout campus property with their handlers. To permit a handler with equal opportunity to use and enjoy university housing, emotional support animals are permitted within the handler's residential living area at all times. A formal agreement between residential life and the handler will be utilized to identify the area where the handler can take the emotional support animal depending upon the housing unit in which the handler resides. The Office of Residential Life defines the handler's residential living area. When being transported to and from campus, the emotional support animal must be placed in an animal carrier or controlled by leash or harness. While outside the handler's residential living area, the handler shall carry proof that the animal is an OSA-approved emotional support animal. Emotional support animals are not permitted in other university buildings.

In order to bring an emotional support animal to campus, the handler must contact OSA as early as possible to permit time to gather and review all necessary documentation. The OSA requires a reasonable amount of time to review documentation. The handler will be asked to provide documentation of his or her disability and medical documentation of the need for the emotional support animal. Such documentation must be from a licensed physician, psychiatrist, clinical social worker or other licensed mental health professional and provide that the animal provides emotional support that alleviates one or more of the identified symptoms or effects of an existing disability. Emotional distress from having to give up an animal because of a "no pets" policy does not qualify a student for an accommodation.

The handler also may be asked to provide the following information regarding the emotional support animal: 1) the type of animal; 2) the name of the animal; 3) a description of the animal; 4) whether the animal is housebroken; 5) the date of the animal's last medical examination; and 6) the date that the animal was acquired. Once the OSA has determined that an ESA is a reasonable accommodation, the handler must meet with staff in residential life to discuss the specifics of the accommodation and sign a formal agreement. Emotional support animals will not be allowed on campus without OSA and residential life approval.

3.06 Service Animals in Training

Connecticut law entitles any individual training a service animal to enter public spaces. A service animal in training is not allowed in controlled spaces including classrooms, residence halls and employee work areas. The service animal in training must be wearing a harness or an orange-colored leash and collar. The individual training a service animal must be employed by or authorized to engage in designated training activities by a service animal organization and who carries photographic identification indicating such employment and authorization, or an individual who volunteers for a service animal organization that authorizes such volunteers to raise dogs to become service animals, and causes the identification of such dog with either tags, ear tattoos, identifying bandanas (on puppies), identifying coats (on adult dogs), or leashes and collars.

3.07 Pets

Students are not permitted to have pets on university campuses or in university housing facilities (except fish, as noted in the Student Handbook: Residential Life (<http://catalog.qu.edu/handbooks/undergraduate/residential-life/residence-hall-staff-organizations/residential-life-policies/>)).

3.08 Restricted Areas

3.08.1 Service Animals

The university may prohibit the use of service animals in certain locations due to health and safety restrictions, such as areas in which the animal may be in danger, or where the animal's presence may compromise the integrity of research. Restricted areas may include, but are not limited to, food preparation areas, custodial closets, boiler rooms, research laboratories, clinical setting, classrooms or labs that contain research animals, areas requiring protective clothing, wood and metal shops, motor pools, areas with heavy machinery, and other areas as required by state or local law.

Limited exceptions to these restrictions may be made on a case-by-case basis in consultation with OSA and the person/department responsible for the restricted area.

A student who requires the use of a service animal to participate in a clinical training program should contact OSA and the head of his or her department. In no case may a service animal accompany a student into a patient's hospital room or examination room if prior approval is not granted.

3.08.2 Service Animals in Training

A service animal in training is not allowed in controlled spaces including classrooms, residence halls and employee work areas.

3.08.3 Emotional Support Animals

Emotional support animals are restricted from all areas except for the handler's designated living area, which is defined by the Office of Residential Life.

Students are expected to decline all invitations from other students to take the service animals or emotional support animal to restricted areas and non-authorized rooms or residence halls.

3.09 Conflicting Health Conditions

Residential life personnel will notify any roommates of the handler, and will make a reasonable effort to notify the residents of neighboring units to where the service animal or emotional support animal will be located.

Students with a medical condition that may be adversely affected by animals (e.g., asthma, severe allergies) should contact OSA with any health or safety concerns about exposure to a service or emotional support animal. OSA may request medical documentation of the student's condition to assist in determining whether the condition is disabling and whether there is a need for an accommodation. OSA will make every effort to resolve any conflict in a timely manner, taking into consideration the conflicting needs and/or accommodations of each person involved.

The university will accommodate individuals with medical conditions that require reasonable accommodation in order to live, work or attend class in proximity to service or emotional support animals, and alternative housing or work space arrangements will be made where appropriate.

3.10 Handler's Responsibilities

The handler of a service or emotional support animal living in university housing and/or frequenting campus is responsible for the following:

- The handler must meet first with the OSA and then with a representative of the Office of Residential Life in order to review and sign the Animal Agreement form prior to bringing the animal to campus.
- The handler must be in full control of the animal at all times.
- Only the handler may care for the animal. Handlers may not leave the animal in the care of another person on campus. The care of the animal is the responsibility of the handler at all times. The handler is responsible for identifying one alternative caretaker for the animal in case the handler becomes incapacitated for any reason.
- The handler must provide adequate care and supervision of the animal at his or her own expense. This includes training, cleanup and appropriate disposal of waste and proper hygiene. This also includes providing for the health of the animal, such as vaccination, annual check-ups and compliance with any state and local licensing requirements, including pursuant to General Statutes §22-338 and General Statutes §22-345. The handler is required to provide documentation on an annual basis regarding vaccinations and licensing to the Office of Residential Life. Furthermore, before bringing the animal to campus, the handler is required to provide documentation that the animal has a Certificate of Health from a licensed veterinarian and provide updated documentation on an annual basis. The Certificate of Health must state that the animal is free from clinical signs of infectious, contagious or communicable disease and is not from an area under rabies quarantine. The animal must have proof of current rabies vaccination given by veterinarian prior to date of importation and must have no exposure to rabies within the past 100 days.
- The animal must remain in a crate or other appropriate container in the handler's assigned bedroom when the handler is not in the room.
- If directed to by OSA, the handler is required to bring the animal to receive veterinarian attention.
- The handler must assure that the animal does not cause undue interference or disruption to other community members. An example of undue interference or disruption may include excessive barking.
- The handler will be liable for any harm caused by the animal, including bodily injury or property damage. This responsibility includes, but is not limited to, any expenses incurred for pest control, maintenance or cleaning above and beyond standard costs. Any such costs will be due at the time of repair and/or move-out, and the university shall have the right to bill the student account for any unmet obligations.
- The handler must notify OSA in writing if the animal is no longer needed or is no longer residing on university property. If the animal will be replaced, the handler must file a new request with OSA.
- The handler must permit scheduled inspection of his or her room for fleas, ticks or other pests as needed, and will be billed for any necessary pest treatment above and beyond standard pest management.
- The animal may not be left overnight to be cared for by another resident. Animals may be left alone for up to 24 hours. Animals must be taken with the handler if the handler leaves campus for a prolonged period (more than 24 hours).
- The handler must abide by all other applicable residential policies.

- Handlers are strongly encouraged to maintain renter's insurance, including liability coverage for the animal. The handler assumes full personal liability for any damage to property or persons caused by the animal. The handler shall be responsible for all liability and claims related to the animal. Quinnipiac University provides no indemnification to the animal or handler. Likewise, Quinnipiac University provides no personal property insurance coverage. Quinnipiac University is not the owner or keeper of any animal. Quinnipiac University shall not be responsible for any harm to the animal while on campus, including but not limited to, injury to the animal caused by pest management or lawn care products.
- It is strongly encouraged that animals be precluded from a raw protein diet in an effort to protect the public from significant health risks.
- If the handler resides in Quinnipiac University housing, the handler will notify the residence hall director if the animal escapes and is not recovered within one hour.
- Necessary precautions should be made for appropriate university personnel to enter student housing when the handler is not present. Precautions may include sharing pertinent information to appropriate university staff. The animal must be caged or crated, or removed from the room, during the time that university personnel are in the room. The university is not liable if the animal escapes during one of these visits.
- The handler is required to provide assistance and support to the animal during emergencies. University personnel are not responsible to provide any assistance or support to the animal, including but not limited to, during an emergency evacuation such as a fire alarm. In the event of a power outage or other disruption to university housing, the handler is responsible for making alternative boarding arrangements for the animal off campus. Accommodations are not available on campus during an emergency.

3.11 Responsibility of the Quinnipiac Community

All members of the Quinnipiac community, including faculty, staff and students, are expected to abide by the following:

- Service animals must be allowed to accompany their handlers at all times and in all places on campus, except where specifically prohibited (note Section 3.08 (p.) above).
- Community members should not touch, pet, feed or otherwise distract a service animal without the handler's permission, and they should avoid any action that might startle the service animal.
- Community members shall not attempt to separate a handler from his/her service animal.
- The nature of a person's disability is private, and no community member should inquire as to the details of a handler's disability or their reason for using a service or emotional support animal.
- Community members should contact OSA if they have any questions or concerns relating to any service or assistance animal.
- Community members should provide handlers with service animals with the right of way with respect to pedestrians, cyclists or skateboarders.

3.12 Removal of Animals from Campus

A faculty member or other university official may exclude a service animal from a classroom or other university facility if the handler is unable to control it or the animal is not housebroken (e.g., trained so that it controls its waste elimination, absent illness or accident).

The university reserves the right to remove or exclude a service animal or emotional support animal from campus if:

- The animal poses a direct threat to the health and safety of others. In determining whether the animal poses a direct threat, Quinnipiac University will make an individualized assessment to ascertain the nature, duration and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable modifications will mitigate the risk;
- The animal's presence causes an undue financial and administrative burden on the university. In determining whether the animal poses an undue financial and administrative burden, Quinnipiac University will make an individualized assessment to ascertain the cost of the requested accommodation; the financial resources of the university; the benefits that the accommodation would provide to the student; and the availability of alternative accommodations that would meet the student's disability-related needs.
- The animal's presence results in a fundamental alteration of the university's programs;
- The animal is ill or in poor health (e.g., animals with health conditions that pose a threat to others);
- The animal exhibits poor hygiene (e.g., visibly dirty, has a strong odor, not groomed, evidence of having fleas or ticks);
- The handler fails to comply with his/her responsibilities under this policy; or
- The animal creates an unmanageable disturbance or interference with the Quinnipiac community.

3.13 Violation of the Policy

Animals other than service animals or approved emotional support are not permitted on university campuses or in university housing facilities. Keeping any animal for a family member or friend or having a family member or friend visit with any animal other than a service animal for any length of time is prohibited.

A handler determined to be responsible for keeping animals other than service animals or approved emotional support animals in violation of this policy will be subject to fines or other sanctions. A handler will also be responsible for all damage or cleaning costs resulting from violation of this policy. The university reserves the right to remove animals other than service animals or approved emotional support animals from campus for violations of this policy. When so directed, the handler must remove the animal from campus and campus housing within 24 hours.

Violations of this policy may result in referral to the Student Code of Conduct process.

Section 4: Research and Teaching Animals

4.01 Policy Statement

Research and teaching animals are animals approved for use in direct support of the university's teaching and research missions and used in accordance with guidelines established by the Institutional Animal Care and Use Committee (IACUC). The QU IACUC provides policies for meeting the ethical and legal requirements for the humane and ethical use of vertebrate animals.

Section 5: Service Animals in Training

5.01 Policy Statement

Connecticut law entitles any individual training a service animal to enter public spaces. A service animal in training is not allowed in controlled

spaces on university property including classrooms, residence halls and employee work areas.

5.02 Conditions

- The service animal in training must be wearing a harness or an orange-colored leash and collar.
- The individual training a service animal must be employed by or authorized to engage in designated training activities by a service animal organization and who carries photographic identification indicating such employment and authorization, or an individual who volunteers for a service animal organization that authorizes such volunteers to raise dogs to become service animals, and causes the identification of such dog with either tags, ear tattoos, identifying bandanas (on puppies), identifying coats (on adult dogs), or leashes and collars.

Section 6: Therapy Animals

6.01 Policy Statement

A therapy animal trained for Animal Assisted Therapy/Activities (AAT/AAA) may be brought into appropriate university property to work with its trained handlers to provide service in conjunction with a university-approved program in one or more therapeutic activities under the following conditions.

6.02 Conditions

- Handlers must be health care or mental health care professionals. Students and other individuals are not allowed to bring therapy animals on campus.
- Each handler provides to the university documentation of the training for the therapy animal, as demonstrated by the attainment of the Canine Good Citizen title through the American Kennel Club or registration with a therapy animal organization, such as Pet Partners.
- Each handler provides to the university documentation showing that the handler has obtained and maintains liability insurance coverage protecting the university from claims arising out of the presence and utilization of the therapy dog and had obtained approval for the presence of the therapy animal from the appropriate university officials.
- Each handler executes an Animal Assisted Therapy-Handler Agreement, waiving claims against the university with respect to any injuries (including death) sustained by the therapy animal during the time the therapy animal is on campus working with its handler to provide service in conjunction with a university-approved program in one or more therapeutic activities.
- Each handler works with the department of facilities to schedule space and time for the Animal Assisted Therapy/Activities so that the university can convey to the university community the place and duration of the event. Notification to the university community must be made no less than one week prior to the event.

Background Checks

Policy and Procedures on Criminal Background Checks (CBC) for Health Professions Programs in the Quinnipiac University School of Health Sciences (SHS), School of Medicine (SOM) and School of Nursing (SON)
Revised 7/20/18, Revised 4/30/2019, Revised 5/28/2020, Revised 5/3/2021, Revised 5/10/2022.

Purpose

Health care providers are entrusted with the health, safety and welfare of patients. They have access to controlled substances and confidential information and operate in settings that require they exercise good judgment and ethical behavior. Therefore, an assessment of a student's suitability to function in such a setting is imperative to promote safety and the highest level of integrity in the delivery of health care. Clinical facilities are required by accreditation agencies, such as The Joint Commission, to conduct criminal background checks for security purposes on individuals who provide services within the facility and especially those who supervise care and render treatment. The Joint Commission indicates that students must have a criminal background check if mandated by state law for health care providers, or by the clinical facility's policy. To meet these requirements and to comply with the requirements stipulated in contracts between clinical agencies and the Schools of Medicine (SOM), Nursing (SON), and Health Sciences (SHS), all schools require criminal background checks of all students.

For all items in this document the primary dean's representative is as follows (but alternative designees may be named, as appropriate):

- The appropriate dean's representative for SON is the Assistant Dean for Student Services.
- The appropriate dean's representative in the SOM is the Associate Dean for Student Affairs.
- The appropriate dean's representative for SHS is the Assistant Dean for Career Development.

Policy Statement

This policy applies to all students prior to enrollment, at additional points in their curricula as specified in their program manuals and summarized in the Timing of Background Checks (p. 78), and/or prior to beginning clinical rotations or fieldwork placements as required by their assigned sites. Additionally, all students who have had a break in their enrollment (e.g., academic or other leave of absence, suspension, etc.) must have a background check prior to returning to their program. Students must comply with all applicable state and federal regulations as required by the State of Connecticut, the state in which they reside, and the state in which clinical or fieldwork placements are located. Coursework cannot begin until a cleared background check is on record in their school.

Timing of Criminal Background Checks

Completed criminal background check due dates are specific to each program within the SOM, SON and SHS, and are outlined below:

School	Department	Requirement
School of Medicine	All students	Prior to matriculation and again prior to first clerkship
School of Nursing	Full-time Undergraduate	Prior to junior year and as required by the clinical site
School of Nursing	Accelerated	Prior to program orientation and as required by the clinical site
School of Nursing	Graduate Program (MSN Nurse Practitioner)	Prior to program orientation and as required by the clinical site

School of Nursing	Graduate Program (BSN to DNP Nurse Anesthesia)	Prior to program orientation and as required by the clinical site
School of Nursing	Online Nursing Programs	August 24 prior to beginning fall semester and as required by the clinical site
School of Nursing	Students matriculating in Spring/Summer	Prior to the start of classes that semester and as required by the clinical site
School of Health Sciences	Athletic Training/Sports Medicine	Prior to program orientation
School of Health Sciences	Cardiovascular Perfusion	Prior to program orientation
School of Health Sciences	Diagnostic Medical Sonography	Prior to start of clinical component
School of Health Sciences	Advanced Medical Imaging and Leadership	Prior to program start
School of Health Sciences	Occupational Therapy	Prior to junior year, prior to spring semester of graduate year, and as required by the clinical site
School of Health Sciences	Pathologist's Assistant	Prior to program orientation and prior to start of clinical phase of the program
School of Health Sciences	Physician Assistant	Prior to program start date and again between May 13-31 prior to the start of clinical rotations
School of Health Sciences	Physical Therapy	Prior to program orientation
School of Health Sciences	Radiologist Assistant	Prior to program orientation
School of Health Sciences	Radiological Sciences	Prior to start of professional component
School of Health Sciences	Social Work	Prior to program orientation

Background Check Procedure

The university will designate an approved vendor(s) to conduct criminal background checks. All issues will be reported from the vendor(s) directly to the appropriate designee within each schools' dean's office. Results from vendors other than those designated by the university to conduct criminal background checks will not be accepted. If a clinical site requires a fingerprint background check, students may obtain a fingerprint check as outlined in Appendix 6 (p. 81). Incoming and current students must contact the designated vendor(s) and comply with instructions in authorizing and obtaining criminal background checks.

Incoming and current students are responsible for payment of any fees charged by the vendor(s) designated to provide the criminal background checks. The university insists that its vendor(s) conduct all criminal

background checks in compliance with the Fair Credit Reporting Act Standards and other applicable laws (see Appendix 1: (p. 81)A Summary of Your Rights Under the Fair Credit Reporting Act (p. 81)).

Incoming and current students are responsible for reviewing the information contained in any criminal background check required by the university for accuracy and completeness. Students may request verification of the accuracy of the report from the designated vendor(s). The designated vendor(s) will advise students of their rights and assist incoming or current students in verifying the accuracy of the report. It is the responsibility of the student to ensure that any misinformation in the initial criminal background check report is corrected with the vendor. The designated vendor(s) will not be involved in any decision made by the university.

Criminal background check reports and other submitted information are confidential and may only be reviewed by university officials and affiliated clinical or fieldwork facilities with a legitimate educational interest in the material in accordance with the *Family Educational Records and Privacy Act (FERPA)*.

Criminal background check reports and other submitted information of incoming and current students will be maintained in the designated office in accordance with the university's record retention schedule for student records. Criminal background check reports and other submitted information of applicants denied admission into the program will be maintained in accordance with the university's record retention policy.

All names (aliases) for which the student has been or is currently known must be included in the background check. Students who change their legal name while enrolled in the program, whether within or outside of the university must notify the program chair immediately and may be required to complete another background check under their new name. Falsification or omission of information or failure to report an arrest or name change that occurs while a student is enrolled in the program will result in consequences up to and including denial of admission or dismissal from the program and submission of an academic integrity violation report.

Failure to disclose all aliases and previous convictions will be considered falsification of records and will be grounds for disciplinary action up to and including withdrawal of an acceptance or dismissal from the program and/or submission of an academic integrity violation report.

Individuals are not required to disclose the existence of any arrest, criminal charge or conviction, the records of which have been erased pursuant to Sections 46b-146, 54-760 or 54-142a of the Connecticut General Statutes, or similar laws in other states. If discovery of a falsification or omission occurs post-admission, such discovery will be grounds for disciplinary action up to and including dismissal from the program, submission of an academic integrity violation report, and/or termination of enrollment for the student.

A criminal background check will be honored for the duration of enrollment if the student is continuously enrolled, unless a clinical or fieldwork site or the academic program requires an updated report, or the student is required to have an additional criminal background check due to a name change. A student who has a break in enrollment (e.g., suspension, leave of absence) is required to complete a new criminal background check.

Criminal activity that occurs while a student attends the university must be reported by the student to the dean **within 5 business days** of its occurrence and could result in disciplinary action, including dismissal.

Failure to report criminal activity or breach of university policy will be addressed through the university's academic integrity or student conduct disciplinary policies as determined by the dean's office and the *Background Check Review Committee* process outlined in this document.

A student with a positive criminal background check does not comply with clinical affiliation contractual agreements and, therefore the student's program will likely be unable to secure the clinical or fieldwork placements necessary to complete requirements for graduation. In addition, a student with a positive criminal background check may not comply with state board standards to test for licensure.

Incoming and current students will be advised that final program acceptance is dependent upon a successful background investigation. Incoming and current students are required to review the *Fair Credit Reporting Act Disclosure Authorization Form for Criminal Background Checks* (Appendix 2 (p. 81)).

The criminal background check will be conducted utilizing the following measures (see Appendix 5 (p. 81)):

- a. The background check must be completed by the approved vendor(s).
 - i. If a clinical site requires a fingerprint background check, students may obtain a fingerprint check as outlined in Appendix 6 (p. 81).
- b. The student must comply with the vendor's method for completing background checks.
- c. The standard criminal background check for Quinnipiac University includes:
 - i. Social Security Number Validation/Verification
 - ii. Criminal Record Searches (Statewide, County & Federal Searches)
 - iii. National Criminal Database Search
 - iv. Sex Offender Registry Search
 - v. OIG/GSA Search (Office of Inspector General/General Services Administration) Sanctions-Based Search
 - vi. Additional options are available if needed:
 1. International Criminal Record Check
 2. Education Verification
 3. Professional Licensing Verification
 4. Employment History Verification
 5. Other as determined by vendor
- d. All states in which the student has resided must be included in the report.
- e. If the accuracy of the background check is disputed by the student, it is the responsibility of the student to ensure that any misinformation in the initial criminal background check report is corrected with the vendor.

Criminal Background Check Report Scoring

The university will maintain a current contract with the outside vendor(s) and will provide the vendor(s) with Quinnipiac scoring criteria.

Report Results

Negative Criminal Background Checks

No further action by the student or school is required if the results of the student's background check are negative.

Positive Criminal Background Checks

Any student whose report indicates a positive result in their criminal background check will receive notification by email from the dean's office within 5 business days. Students are required within 5 business days of the emailed notification to schedule a time to discuss the findings with the appropriate dean/designee. Following that meeting, the student will be notified of the dean's decision within 5 business days regarding whether the student may begin or continue their program or be dismissed from the program in which he/she is enrolled.

Appeals Process

Any student who receives a letter of dismissal for a positive criminal background check may elect to proceed to the appeals process. Relevant considerations in the appeal may include: the date, nature, and number of convictions; the relationship the conviction bears to the duties and responsibilities of the position; and successful efforts toward rehabilitation.

The appeal must be made by the student in writing within 5 business days of the emailed notification of dismissal by the dean's office. It is the student's responsibility to initiate the appeal process by emailing a written appeal to the dean. The dean's office will schedule a meeting of the Background Check Review Committee within 14 business days of receipt of the appeal request and will notify the student of the meeting date. Students currently enrolled and attending classes will be permitted to attend classes but will not be permitted to begin or continue clinical or fieldwork experiences until the Background Check Review Committee has made a final decision.

Once a final decision is made regarding the student's appeal, the Background Check Review Committee will notify the student by email. The dean's office will copy all related correspondence to the appropriate chair and/or program director.

The decision of the Background Check Review Committee regarding the ability of an incoming student or current student to enter or continue in the program is final and cannot be appealed. The Office of Admissions and appropriate programs will be notified of the decision.

Background Check Review Committee

A Background Check Review Committee will be convened with the assistance of a representative of the dean's office. Members of the Background Check Review Committee will include representation from, but not limited to, the following offices:

- Dean of the school in which the student is enrolled
- Admissions
- Student Affairs
- Academic Affairs
- Finance (if applicable)

A careful review of the self-reported information in the applicant/current student's file will occur. This review will include:

- criminal convictions
- pending adjudications
- information in the criminal background check report
- relevant supplementary materials obtained from the applicant/current student and from other sources including court documents
- institutional policies and procedures

Factors considered in reviewing an individual case may include, but are not limited to:

- the nature, circumstances, and frequency of any reported offense(s)
- the length of time since the offense(s)
- available information that addresses efforts at rehabilitation
- the accuracy of the information provided by the student in their application materials
- the relationship between the duties to be performed as part of the educational program and the offense committed

Any incoming or current student who is referred to the Background Check Review Committee has the right to appear before that committee to contest or explain the findings from the criminal background check.

A student appearing before the Background Check Review Committee will not be permitted to have legal representation, parents, family members, or students or faculty from the Quinnipiac University School of Law at the appeal hearing. A student may request, in writing, to have an adviser assigned by the dean. If a student requests an assigned adviser and then refuses this adviser, no further advisers will be assigned. An adviser may assist the student in preparing for the appeal but may not attend the appeal.

Students receiving a positive report who are not dismissed and who elect to continue the program do so at their own risk (see (<https://catalog.qu.edu/university-policies/background-checks/#appendicestext>)Appendix 4: Quinnipiac University Disqualifying Crimes for Students (p. 81)). Because state licensure requirements are subject to change without notice, Quinnipiac University and the SON/SOM/SHS cannot guarantee that any student will be eligible to sit for any state examination, should there be any findings in their background check report. Students with a positive result who receive permission from the dean's office or the Background Check Review Committee to proceed in their program and who decide to continue in their program must sign a Student Waiver Regarding Background Check Results (see Appendix 3 (p. 81)).

Maintenance of Records and Confidentiality

Information obtained for the purpose of and during the criminal background check will be retained by the dean's office separate from other student educational and academic records. Confidentiality will be maintained consistent with FERPA guidelines. The program chair, program director and clinical coordinator will be provided with the student's name and the date the report was cleared or failed to clear. If a clinical or fieldwork site requires a copy of any report, the student must either email a copy of their report directly to the facility or sign a release form for the vendor(s) who will submit the report to the email address of the person authorized to receive it.

This document will be kept on file throughout the above student's duration of enrollment and for a period of 7 years thereafter.

Appendix 1: A Summary of Your Rights Under the Fair Credit Reporting Act

The federal Fair Credit Reporting Act (FCRA) promotes the accuracy, fairness and privacy of information in the files of consumer reporting agencies. There are many types of consumer reporting agencies, including credit bureaus and specialty agencies (such as agencies that

sell information about check writing histories, medical records, and rental history records). Here is a summary of your major rights under the FCRA.

For more information, including information about additional rights, visit Federal Trade Commission Consumer Rights Credit and Loans (<http://www.ftc.gov/credit/>) or write to:

Consumer Response Center, Room 130-A, Federal Trade Commission, 600 Pennsylvania Ave. N.W., Washington, D.C. 20580

You must be told if information in your file has been used against you.

Anyone who uses a credit report or another type of consumer report to deny your application for credit, insurance or employment – or to take another adverse action against you – must tell you, and must give you the name, address and phone number of the agency that provided the information.

You have the right to know what is in your file. You may request and obtain all the information about you in the files of a consumer reporting agency (your "file disclosure"). You will be required to provide proper identification, which may include your Social Security number. In many cases, the disclosure will be free. You are entitled to a free file disclosure if:

- a person has taken adverse action against you because of information in your credit report.
- you are the victim of identity theft and place a fraud alert in your file.
- your file contains inaccurate information as a result of fraud.
- you are on public assistance.
- you are unemployed but expect to apply for employment within 60 days.

In addition, by September 2005 all consumers will be entitled to one free disclosure every 12 months upon request from each nationwide credit bureau and from nationwide specialty consumer reporting agencies.

Visit Federal Trade Commission Consumer Rights Credit and Loans (<http://www.ftc.gov/credit/>) for additional information.

You have the right to dispute incomplete or inaccurate information. If you identify information in your file that is incomplete or inaccurate, and report it to the consumer reporting agency, the agency must investigate unless your dispute is frivolous. Visit Federal Trade Commission Consumer Rights Credit and Loans (<http://www.ftc.gov/credit/>) for an explanation of dispute procedures.

Consumer reporting agencies must correct or delete inaccurate, incomplete, or unverifiable information. Inaccurate, incomplete or unverifiable information must be removed or corrected usually within 30 days. However, a consumer reporting agency may continue to report information it has verified as accurate.

Consumer reporting agencies may not report outdated negative information. In most cases, a consumer reporting agency may not report negative information that is more than seven years old, or bankruptcies that are more than 10 years old.

Access to your file is limited. A consumer reporting agency may provide information about you only to people with a valid need – usually to consider an application with a creditor, insurer, employer, landlord, or other business. The FCRA specifies those with a valid need for access.

You must give your consent for reports to be provided to employers. A consumer reporting agency may not give out information about you to your employer, or a potential employer, academic institution or affiliated

educational sites without your written consent. For more information, visit Federal Trade Commission Consumer Rights Credit and Loans (<http://www.ftc.gov/credit/>).

You may seek damages from violators. If a consumer reporting agency, or, in some cases, a user of consumer reports or a furnisher of information to a consumer reporting agency violates the FCRA, you may be able to sue in state or federal court.

Identity theft victims and active duty military personnel have additional rights. For more information, visit Federal Trade Commission Consumer Rights Credit and Loans (<http://www.ftc.gov/credit/>).

Appendix 2: Fair Credit Reporting Act Disclosure and Authorization Form for Criminal Background Checks

I understand that, as a condition of admission to Quinnipiac University (QU)'s Schools of Medicine, Nursing and Health Sciences program, I will be required to obtain a criminal background check(s) through QU's nationwide application service. Accordingly, I hereby authorize QU or its agent(s) to conduct a criminal background check(s). I understand that this authorization shall be valid for subsequent criminal background check(s) during my participation in the School of Medicine, Nursing or Health Sciences program. Further, I also authorize clinical training facilities to conduct criminal background check(s), and the reporting agency to provide the results to QU and/or clinical or field work facilities. In all cases, all expenses associated with the criminal background check(s) are my responsibility, as applicable per my program.

If I am offered conditional admission, the offer will not be considered final, and I will not be permitted to enroll until completion of my criminal background check(s), with results deemed acceptable by QU. If the results of the criminal background check(s) are not deemed acceptable by QU, or if information received indicates that I have provided false or misleading statements, have omitted required information, or in any way I am unable to meet the requirements for completion of the program, the conditional admission will be denied or rescinded, and/or I will be disciplined or dismissed.

Appendix 3: Student Waiver Regarding Background Check Results

In the event of positive findings on the criminal background check, the student is required to acknowledge that the results of the criminal background check for the SOM, SON, and SHS at Quinnipiac University (the "results") were received. The student will be required to sign a document acknowledging that, to the best of the student's knowledge, the results are accurate, and will also acknowledge that the university has advised that because of these results the student may not be eligible for participation in clinical affiliations and may not be eligible to sit for the certification examination and/or individual state licensure in the student's desired profession.

Student must, after careful consideration, voluntarily elect to continue with as much of the curriculum for which they are cleared to participate regardless of the results. Student must be aware that they do so at their own risk, and agree that Quinnipiac University will not be liable in any way if they are unable to participate in clinical affiliations, sit for any certification examination and/or individual state licensure examination or

receive any benefit for which the student would otherwise be eligible but for the results.

Appendix 4: Quinnipiac University Disqualifying Crimes for SON Students

Criminal Background Check Reporting Criteria

Some criminal offenses preclude students from participating in patient care (i.e., red flags). In addition, some professional licensure boards include specific offenses which constitute those crimes for which licensure are prohibited. Several issues arising from the background check involve what constitutes a failing report and to what extent clinical sites would refuse a student based on the failed status. All felony cases listed below will be posted as a "FAIL." In addition, each clinical facility may require stringent criteria for placement.

Major Offenses

Red flags are those that indicate clear potential threat or harm to the community. These constitute an automatic failure of the criminal background check and dismissal from the program. Examples include but are not limited to:

- Abduction
- Arson (first through third degree); attempted arson
- Assault (first through fourth degree) including domestic assault (spousal abuse); assault by a caregiver against a vulnerable adult and related offenses when resulting in a felony
- Battery and related offenses when resulting in a felony
- Burglary; breaking and entering resulting in a felony
- Child abuse, neglect of a child, endangering the welfare of a child; malicious punishment of a child
 - Contributing to the delinquency or dependency of a child
 - Exploitation of a child; solicitation of children to engage in sexual conduct
 - Termination of parental rights resulting in a felony
- Coercion or attempt to coerce
- Controlled substances and illicit drugs-sale, distribution (including great bodily harm caused by distribution of drugs), delivery or possession of controlled substances and/or illicit drugs and related offenses when resulting in a felony
- Credit card crimes; credit card fraud, credit card theft, illegal use of a credit card
- Criminal abuse; neglect; financial exploitation of a vulnerable adult
- Embezzlement
- Forgery including check forgery and related offenses
- Fraud
- Harassment; stalking
- Hate crimes and related offenses
- Incest
- Kidnapping, false imprisonment
- Killing, murder, manslaughter, injury, death, assault of an unborn child by injury to the mother
- Lewd and lascivious behavior; indecent exposure when resulting in a felony
- Mistreatment of confined persons or residents or patients
- Murder, maiming, manslaughter, attempted murder, attempted maiming, attempted manslaughter

- Distribution of or possession of obscene literature and materials in any form, including pornography when resulting in a felony
- Obtaining signature by false pretense
- Prohibited acts of persons in familial or custodial authority
- Prostitution, sexual solicitation and related offenses
- Robbery and related offenses resulting in a felony
- Sexual abuse, sexual assault, sexual battery, rape, incest and other sexual offenses
- Sexual misconduct; criminal sexual conduct (first through fourth degree); indecent exposure; use of minors in sexual performance; possession of pictorial representations of minors resulting in felony convictions
- Shooting at or in a public transit vehicle or facility; drive-by shootings
- Tampering with a witness resulting in a felony
- Terrorist threats or actions
- Theft and related offenses resulting in a felony
- Vehicular homicide, vehicular assault, hit and run
- Weapon crimes (i.e., dangerous weapons, machine guns, short-barreled shotguns etc.) and related offenses
- Wounding – malicious wounding, unlawful wounding

Minor Offenses

Minor offenses will still appear as red but may not constitute an automatic failure of criminal background check. These will be reviewed independently by representatives from the dean's office and the program and a decision will be made on the nature of the crime and the nature of the position. If this review results in failure of the criminal background check and dismissal from the program, the student may appeal this result to the Background Check Review Committee.

Examples include but are not limited to:

- 10-year-old charge of possession of marijuana
- Driving Under the Influence
- Positive drug screen
- Riot resulting in a misdemeanor
- Shoplifting
- Disorderly conduct
- Failure to report maltreatment of a vulnerable adult

Appendix 5: Sample Criminal Background Check Contents

Analyzed Social Security Number Search – credit bureau data analyzed/ or names, SSNs & addresses

CT Statewide Criminal Records Repository – for CT residents only

County Criminal Records Search – searches conducted in all counties of residence outside of CT

National Criminal File Search – national database search covering more than 810 million criminal, sex offender and violation records, includes verification of hits

National Sexual Offender Database Search – database search covering sex offender records collected nationwide

OIG / GSA EPLS Search – search covers the federally mandated Health and Human Services Office of Inspector General's (OIG) List of Excluded

Individuals/Entities (LEIE), and the General Service Administration (GSA)-Excluded Parties List (EPLS)

SanctionsBase® – proprietary search covering sanctions, disciplinary and administrative actions taken by hundreds of federal and state healthcare regulatory authorities, including Food and Drug Administration, National Institutes of Health, GSA, Office of Foreign Asset Control, terrorist watch lists and more

Criminal Background Check, Recheck

Primary name and address only.

OIG & GSA Excluded Parties Search

SanctionsBase® search

Analyzed Social Security Number Search – credit bureau data analyzed for names, SSNs & addresses

County Criminal Records Search – current county only, searches conducted on current county of residence

National Criminal File Search – national database search covering more than 810 million criminal, sex offender and violation records, includes verification of hits

Appendix 6: Fingerprint Background Check Procedure

There are occasions when a clinical site may require a student to obtain a fingerprint background check. In these instances, the student must consult with their clinical coordinator, who will notify the university's Department of Public Safety that a fingerprint background check is to be obtained. The following options may or may not be available.

Connecticut Only Criminal History Searched by Fingerprint

For a fingerprint background check to be completed in the state of Connecticut, the student will:

- Obtain fingerprinting at one of the following locations:
 - Hamden Police Department, 2900 Dixwell Avenue, Hamden, CT 06518 – cost for Fingerprint is \$25.
 - State Police Headquarters, 1111 Country Club Road, Middletown, CT 06457 – cost for Fingerprint is \$15. Students may obtain fingerprints at the State Police headquarters while they are obtaining the background check.
- Complete a copy of the Criminal History Record Request Form ([http://www.ct.gov/despp/lib/despp/reports and records/dps-846-c.pdf](http://www.ct.gov/despp/lib/despp/reports%20and%20records/dps-846-c.pdf)).
 - Have results sent to the email address FingerPrints@qu.edu or the street address: Quinnipiac University Department of Public Safety, 275 Mount Carmel Ave., Hamden, CT 06518.
 - It is most expedient to have results sent electronically; mailed results can take several additional weeks to process.
- Take the completed fingerprint card AND the Criminal History Record Request Form along with \$50 to the State Police Headquarters, 1111 Country Club Road, Middletown CT. (The \$50 processing fee in addition to the \$15.00 fee charged for obtaining Fingerprints. Exact change is required.)

Outside of Connecticut Criminal History Searched by Fingerprint

For a fingerprint background check to be completed in a state other than Connecticut, the student will advise their clinical coordinator, who will coordinate with the associate vice president for finance to determine the process the student will follow to obtain the background check.

For All In-State and Out-Of-State Completed Results

The chief of public safety and/or their designee will be responsible for monitoring, receiving and storing all fingerprint results received via email (FingerPrints@qu.edu) or through the mail from the State of CT.

As soon as results have been received by the Department of Public Safety the chief and/or their designee will contact via email the clinical coordinator with the results of each individual students' fingerprints. Only a pass or fail result will be provided to the individual coordinator.

Any student who fails the Criminal History Record will follow the procedures outlined in this document. If the student would like to obtain more information regarding the result, they will be required to set up an appointment with the chief of public safety.

All students are required to confirm with their clinical facilities whether an updated background check or other information is required and complete these requirements prior to starting the rotation. Failure to successfully pass any of the clinical facility's requirements will preclude the student from participating in clinical or field work.

Class Attendance Policy

Approved by the Faculty Senate Spring 2012

Students are expected to attend all scheduled classes. In many classes and laboratories active student participation or performance is an essential part of the learning experience and absences may negatively affect the course grade. Each academic department or instructor will set a class attendance policy and feature it prominently in syllabi. Having informed the students of particular attendance requirements, the instructor should refer students with unsatisfactory attendance records to the Learning Commons through Advise, which can be accessed through Self Service in MyQ. Faculty members are reminded that the Early Warning policy of the university defines specific referral policies for attendance in 100-level courses.

Occasionally, students participating in intercollegiate athletics will be absent from classes because of scheduled athletic contests. It is the responsibility of those students to notify their instructors in advance of anticipated absences. If they give such advance notice to their instructors, they will be given the opportunity to make up any requirements for the courses.

Similarly, students who must miss classes because of religious obligations will be given the opportunity to make up course requirements if they have notified their instructors in advance of the anticipated absences. Academic and Student Affairs will notify faculty if students in their classes have been placed on Medical Leave or suspended via a Student Code of Conduct system decision.

Student-Athlete – Class Absence Policy

Class attendance is a student-athlete's first priority. Quinnipiac University adheres to the NCAA rules that prohibit student-athletes from missing class due to conflicts with a team's practice. NCAA rules do permit

student-athletes to miss class to participate in a home or away contest. During the season of competition, it is likely that class absences will occur. Every attempt is made to keep missed classes to a minimum. Nevertheless, it is Quinnipiac academic policy that should a class or test be missed for in-season athletic competition, the student be given the chance to make up the work provided the student notifies the professor in advance and makes appropriate arrangements. It is the student-athlete's responsibility to communicate with their professors PRIOR to a class being missed.

Student-athletes are expected to personally deliver the missed class form letter signed by the associate athletic director for academics and the NCAA faculty athletics representative to each professor at the beginning of the semester. The student-athlete's head coach will provide the team members with the letter detailing departure times of travel dates associated with away games and any home competition conflicts. Arrangements for make-up exams and quizzes MUST be handled before traveling to an athletic event, not after returning from the trip. In the event that an affiliated conference or NCAA Championship occurs during final exam time, the student-athlete is required to contact the appropriate faculty member at least two weeks before the scheduled examination or when the conflict is recognized. The purpose of this meeting is to discuss rescheduling the exam.

It is the student-athlete's responsibility to schedule classes so they will not regularly conflict with practice times or frequent travel days. It is important for each student-athlete to meet with instructors as early in the semester as possible to assess whether missed class time will be a problem.

If a problem does arise with any of these situations, contact the NCAA faculty athletics representative. Student-athletes may jeopardize their participation in the Quinnipiac University athletic program by failing to comply with the above procedures.

Conferral of Honorary Degrees Policy

The very highest honor bestowed by Quinnipiac University is the conferral of an honorary degree. The awarding of honorary degrees should exemplify and celebrate the values and ideals of the university.

Criteria for selection of recipients will include extraordinary and prolonged professional achievement at the very highest levels; groundbreaking and widely impactful scholarship; highly distinguished and extensive community or governmental service resulting in consequential change; and/or exceptional generosity in, and dedication to, advancing the mission of Quinnipiac University at the national or international levels.

Nomination Procedure

A call for nominations for honorary degrees will be issued twice a year. Nominations may be submitted to the Honorary Degree Committee by students, faculty and staff, parents, alumni and members of the Board of Trustees. The Honorary Degree Committee will consist of the provost, vice president for development & alumni affairs, vice president for marketing and communications, two senior faculty members with broad community interests selected by the provost, and one dean also selected by the provost. The faculty and dean will serve for two-year periods and may be reappointed after a period of two years off the committee.

Recommendations will be presented to the president after the committee has met and decided on nominations. The nominations are to be made with absolute confidentiality, and no nominee should have advance notice

of their nomination. Nominees will have been vetted with background checks prior to reaching the president.

The final decision to award an honorary degree rests with the president, who will notify the Board of Trustees.

Awarding of Honorary Degrees

Honorary degrees will be presented at the appropriate forum, which will vary depending on the university's and the recipient's needs and interests.

Course and Credit Requirements

Each course is measured in credits. Following the federal credit hour definition (*34CFR 600.2*) and accepted practices in higher education, Quinnipiac University defines a credit hour as equivalent to 50 to 60 minutes of direct faculty instruction and two hours of out-of-class student work for approximately 15 weeks. During fall and spring semesters, a 3-credit course typically meets for 150 minutes per week (three 50-minute class meetings or two 75-minute class meetings) for 15 weeks. At least an equivalent amount of direct faculty instruction and out-of-class student work is required for other activities leading to the award of academic credit (e.g., internships, clinical), for modalities in which classroom instruction ("seat time") is not the primary method of instruction (e.g., online courses), and for work completed in compressed semesters (summer and J-term). For example, to earn 3 credits for an internship or clinical course, students must complete a minimum of 120 hours of supervised work.

Regular class attendance is expected. A student whose attendance is unsatisfactory may be forced to withdraw from a course at the discretion of the instructor and consistent with Quinnipiac's withdrawal policy. See Class Attendance Policy (p. 84).

So far as is practicable, final examinations are regarded as part of the regular work for undergraduate courses. In courses for which a final examination would serve no useful purpose, a term essay or personal conference, problem-solving exercise, or other assignment may be substituted; work on the substitute exercise may take place during the final examination period. In some cases, faculty members may exempt from the final examination students whose work is of high quality. Conditions governing exemptions are determined by the faculty of the school concerned. See Final Exam Policy (p. 104).

Fall and Spring Course Load for Undergraduate Students

The usual full-time course load for undergraduate students is 12-16 credits per semester (fall and spring). Students in accelerated dual-degree programs and in some majors may be required to take more than 16 credits per fall or spring semester. See the program's curriculum for more information. Conversely, a student who enters with deficiencies may be allowed to take only three or four courses (12 credits or less). Some academic programs may limit the number of credits that may be taken in the fall and/or spring semesters.

Fall and Spring Course Load for Graduate Students

The usual load for graduate students is program-specific. See the program's curriculum for more information.

J-Term and Summer Course Load for Undergraduate Students

The usual load for undergraduate students in the condensed January term (J-term) is 3 or 4 credits. In the summer I and/or Summer II sessions, the usual load for undergraduate students is one to

three courses (3-10 credits total) per session. Some academic programs may limit the number of credits that may be taken in J-Term and/or the summer sessions. When determining the number of credits for which they plan to register, students should consider the rigor of their selected coursework, their history of academic success, work and other personal obligations, and other factors that may impact a student's academic life.

J-Term and Summer Course Load for Graduate Students

J-term and/or summer course loads for graduate students are program-specific (if applicable). See the program's curriculum for more information.

COVID-19 Assumption of Risk Policy Students:

The university has taken steps to implement substantial precautions to prevent the spread of COVID-19. By entering onto the Quinnipiac University campus, the student agrees to abide by all the university's policies and procedures related to COVID-19. The student voluntarily and knowingly assumes the risk of exposure to or infection of COVID-19 by using the services or premises, and that such exposure or infection may result in personal injury or illness. The student also acknowledges that it is impossible to fully mitigate the risk of becoming exposed to or infected by COVID-19 and that such exposure or infection may result from the actions, omissions or negligence of the student, university faculty and staff and other students or visitors to campus. The university will follow all state guidelines and provide guidance on proper protection to alleviate and/or decrease the spread of viruses.

Vendors:

The university has taken steps to implement substantial precautions to prevent the spread of COVID-19. By entering onto the Quinnipiac University campus, the vendor agrees to abide by all the university's policies and procedures related to COVID-19. The vendor voluntarily and knowingly assumes the risk of exposure to or infection of COVID-19 by using the services or premises, and that such exposure or infection may result in personal injury or illness. The vendor also acknowledges that it is impossible to fully mitigate the risk of becoming exposed to or infected by COVID-19 and that such exposure or infection may result from the actions, omissions or negligence of the vendor, university faculty and staff, students or visitors to campus. The university will follow all state guidelines and provide guidance on proper protection to alleviate and/or decrease the spread of viruses.

Faculty and Staff:

The university has taken steps to implement substantial precautions to prevent the spread of COVID-19. By entering onto the Quinnipiac University campus, the employee agrees to abide by all the university's policies and procedures related to COVID-19. The employee also acknowledges that it is impossible to fully mitigate the risk of becoming exposed to or infected by COVID-19 and that such exposure or infection may result from the actions, omissions or negligence of the employee, university faculty and staff, students or visitors to campus. The university will follow all state guidelines and provide guidance on proper protection to alleviate and/or decrease the spread of viruses.

Guidelines and Procedures for Students with Disabilities

Updated Spring 2021

Section 1: Policies and Procedures for Students with Disabilities

1.01 Statement on Disabilities

Quinnipiac University is committed to providing equal educational opportunities and full participation for students with disabilities. No qualified student will be excluded from participation in any university program or be subject to any form of discrimination based on disability.

Quinnipiac University recognizes its obligations to comply with the Americans with Disabilities Act of 1990, hereafter referred to as ADA, and Section 504 of the Rehabilitation Act of 1973, hereafter referred to as Section 504.

The ADA states: “No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, or accommodations of any place of public accommodation by any private entity who owns, leases (or leases to), or operates a place of public accommodation.” (28 C.F.R. § 36.201a) Section 504 states: “No otherwise qualified individual with a disability [...] shall, solely by reason of her or his disability, be excluded from the participation in, be denied benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance” (29 U.S.C. § 794). Consistent with its responsibilities, Quinnipiac University provides reasonable accommodations to promote equal educational opportunity.

The university provides staff members to ensure compliance with the ADA and Section 504. These staff members work directly with students, faculty and staff regarding reasonable accommodations and other assistance as needed. The university also maintains a grievance procedure for those students with disabilities who seek resolution of particular issues and desire a more formalized process. The grievance procedure is discussed in Section 3: ADA/504 Grievance Procedure (p. 99).

The Office of Student Accessibility

Located at the Learning Commons
Arnold Bernhard Library (Mount Carmel Campus) – AB-TLC
School of Law & Education (North Haven Campus) – SLE-340
Phone: 203-582-7600
Fax: 203-582-7610
Email: access@qu.edu

1.02 Institutional Rights and Responsibilities

Quinnipiac University through its dedicated offices has the **responsibility** to:

- Ensure that university courses, programs, services, activities and facilities, when viewed in their entirety, are offered in the most integrated and appropriate setting.
- Provide information regarding policies and procedures to students with disabilities and ensure its availability in accessible formats upon request.
- Evaluate students on their abilities, not their disabilities.

- Provide reasonable and appropriate accommodations, academic adjustments and/or auxiliary aids for students with disabilities upon a timely request by students.
- Maintain appropriate confidentiality of records and communication concerning students with disabilities except where disclosure is required by law or authorized by the student.

More specifically, personnel in these dedicated offices have the **responsibility** to:

- Assist students with disabilities who self-identify and meet university criteria for eligibility to receive reasonable and appropriate accommodations, academic adjustments, and/or auxiliary aids determined on a case-by-case basis.
- Assure appropriate confidentiality of all information pertaining to a student’s disability.
- Assure that the students receive appropriate reasonable accommodations based on documentation of the disability.
- Interact with the faculty, when appropriate.
- Inform students with disabilities of university policies and procedures for filing a formal grievance.

Serving students, the director of the Office of Student Accessibility and/or their designee have the **right** to:

- Require that students with disabilities conform with the university’s academic standards.
- As needed, request from a student current documentation completed by appropriate professional(s) to verify the need for reasonable accommodations, academic adjustments, and/or auxiliary aids. See Section 2: Criteria for Comprehensive Documentation of Disabilities (p. 94).
- Review the student’s need for reasonable accommodations, academic adjustments, and/or auxiliary aids with the professional(s) providing the documentation. This review is only conducted with the student’s signed consent authorizing such a discussion.
- Select among equally effective and appropriate accommodations, adjustments and/or auxiliary aids in consultation with the student.
- Deny a request for specific accommodations, academic adjustments, and/or auxiliary aids if the documentation does not identify a specific disability, fails to verify the need for the requested services, is not provided in a timely manner or does not identify the specific accommodation.
- Refuse to provide an accommodation, adjustment and/or auxiliary aid that is inappropriate or unreasonable including any that:
 - constitute a substantial change or fundamental alteration to an essential element of a course or program.
 - pose an undue burden on the university.

1.03 Responsibilities of the Office of Student Accessibility

- Promote disability as diversity and inclusive excellence.
- Support an institution-wide mindset of equal access for students to all educational opportunities, programs, and services.
- Empower students, thereby enhancing equity and providing a platform for innovation and inclusion.
- Advocate for and empower students in an effort to foster lifelong learners prepared for the demands of 21st-century careers and citizenship.

- e. Provide individual reasonable accommodations when environmental barriers cannot be eliminated following a thorough review of a student's disability documentation and self-report of associated challenges.

What is a reasonable accommodation?

Reasonable accommodations are modifications or adjustments to the tasks, environment or to the way things are usually done that enable individuals with disabilities to have an equal opportunity to participate in an academic program or a job (U.S. Department of **Education**, 2007).

There are three kinds of accommodations that are not considered reasonable:

- a. It is not a reasonable accommodation if making the accommodation or allowing participation poses a direct threat to the health or safety of others.
- b. It is not a reasonable accommodation if making the accommodation means making a substantial change in an essential element of the curriculum or a substantial alteration in the manner in which you provide your services.
- c. It is not a reasonable accommodation if it poses an undue financial or administrative burden.

1.04 Responsibilities of the Student

- a. Disclose a disability through the Office of Student Accessibility (OSA) by providing the appropriate documentation as detailed in the documentation guidelines.
- b. Engage in a conversation regarding disability-related challenges, history of use of accommodations and what academic adjustments/ accommodations have worked or not worked in the past.
- c. Discuss the intended course of study/classes and what types of didactic, laboratory, practical, clinical/fieldwork adjustments/ accommodations might be appropriate.
- d. Agree to reasonable accommodations and ensure that processes for utilizing accommodations are understood.
- e. Complete necessary paperwork as administered by the OSA.
- f. Provide accommodation letters to professors on a semester-by-semester basis; engage in a conversation with each professor to ensure awareness of reasonable accommodations.
- g. Communicate with the OSA regarding the effectiveness of accommodations.
- h. Provide updated documentation as needed, and/or to support the need for changes to reasonable accommodations.
- i. Re-request accommodations through the OSA on a semester-by-semester basis.

1.05 Responsibilities of the Faculty Member

- a. Provide only the accommodations that are recommended by the Office of Student Accessibility (OSA) via the student accommodation letter. Accommodation letters are produced on a semester-by-semester basis.
- b. Discuss with the OSA any concerns related to the accommodations that have been requested by the student during the initial contact with the faculty member.
- c. With respect to examinations:
 - i. Discuss the conditions under which the exam is to be administered.

- ii. If the student's exam is to be administered via the Learning Commons, ensure the timely delivery of the exam, along with all necessary instructions and materials for proper administration.
- d. Ensure the appropriate confidentiality of information regarding students with disabilities. Do not inquire regarding a student's disability. If a student discloses to the faculty member any disability-related information, encourage the student reach out to the OSA or facilitate an email introduction.
- e. Including an accessibility statement on your syllabus can help to:
 - i. Signal to all students in a course (not just those with disabilities) that you welcome discussion about individual differences in learning, encountered barriers, and ways to maximize access.
 - ii. Send a message that you value diversity and an inclusive learning environment.
 - iii. Open the door to communication and help students feel more comfortable approaching you.
 - iv. Normalize the accommodations process as just another part of the course.
 - v. Inform students about college procedures and available resources.

Faculty are encouraged to consider making a statement in class to further normalize the accommodations process and to encourage students to feel more comfortable approaching you.

A few sample syllabus statements are as follows:

Quinnipiac University is committed to creating a learning environment that meets the needs of its diverse student body. If you anticipate or experience any barriers to learning in this course, please feel welcome to discuss your concerns with me.

If you have a disability, or think you may have a disability, you may also want to meet with the Office of Student Accessibility, to begin this conversation or to request reasonable accommodations. Quinnipiac University complies with the Americans with Disabilities Act and Section 504 of the Rehabilitation Act of 1973.

Please contact the Office of Student Accessibility by emailing access@qu.edu or by calling 203-582-7600. If you have already been approved for accommodations through the Office of Student Accessibility, please meet with me so we can develop an implementation plan together.

1.06 The Interactive Process

Assisting faculty in understanding how accommodations are determined

The interactive process occurs when a student requests an accommodation, and further communication needs to occur between the student, the Office of Student Accessibility (OSA), and the designated liaison (program instructors or course directors). In this process, a look at programmatic technical standards and student learning outcomes will occur, ensuring that the reasonable accommodation will not fundamentally alter the nature of a course or program, or provide an undue hardship.

- a. **Step One (OSA/student):** Gaining basic information about the students' background and education history. A discussion about where a student has been and what they have been doing is a positive start.
- b. **Step Two (OSA/student):** Discuss disability documentation and work with student in discovering their self-knowledge of their disability, functional limitations/educational limitations. Some students are

well aware and knowledgeable about their disabling condition and educational limitations; for others, they may not have received supports in high school or have come to their disability later in life.

- c. **Step Three (OSA/student):** Gathering information on what academic adjustments/accommodations or supports they have used in the past.
- d. **Step Four (OSA/student):** Exploring what worked or what didn't. What were the benefits or pros and cons?
- e. **Step Five (OSA/student/liaison):** Discussing the intended course of study/classes and what types of didactic, laboratory, practical, clinical/fieldwork adjustments/accommodations might be appropriate. It is great if the student is knowledgeable, if not, the OSA can provide suggestions in addition to collaboration with program faculty or the course instructor. This process will likely involve a review of student learning outcomes and programmatic technical standards.
- f. **Step Six (OSA/student/liaison):** Examining prior knowledge of such accommodations and support and what training might be required.
- g. **Step Seven (OSA/student/liaison):** Coming to an agreement of what is needed and what is reasonable. Wherever possible taking the students' preference into consideration.
- h. **Step Eight (OSA/liaison):** Documenting the discussion, the course/class to be taken, the didactic, laboratory, practical, clinical/fieldwork adjustments/accommodations, services or training required.
- i. **Step Nine (OSA/liaison):** Ensuring the student understands the process for getting these services such as sending off accommodation letters, conversing with their professor, picking up a tape recorder, etc. The OSA will send a follow-up email to the student and program liaison documenting the conclusion of the discussion.
- j. **Step Ten (OSA/student/liaison):** Implementing the didactic, laboratory, practical, clinical/fieldwork adjustments/accommodations and/or services. This is completed on a semester-by-semester basis as a part of the interactive process, and is an ongoing process. It is a student's responsibility to report the effectiveness of the accommodation, and ongoing communication with the OSA is encouraged. The student needs to know and feel comfortable that if their needs change or the nature of the course or class they are undertaking changes they can come back for further discussion on what might be needed.

1.07 Resources for New Students

Welcome to Quinnipiac University! We hope that the following information will be helpful as you prepare for the transition to college and explore available resources to aide in your success as a college student.

When to Reach Out

Contact the Office of Student Accessibility (OSA) within the first couple of weeks that you are on campus so there is ample time to review your documentation, review requests, engage in the interactive process, implement accommodations, and update documentation, if necessary.

Please note that accommodations are never instated retroactively, so it is important to reach out early. If concerns or changes are needed to the reasonable accommodations throughout the course of the semester, reach out again to the OSA to engage in further discussion.

What to Expect

Quinnipiac University is committed to ensuring equal access and reasonable accommodations to eligible students with disabilities. One of the major differences between high school and college is that, in college,

the student is responsible for disclosing a disability, requesting services, and working with faculty to implement approved accommodations.

Tips for Self-Advocacy when Requesting Services

- a. You are the best expert on yourself! Be prepared to describe your disability and how it impacts you. A student's self-report is a critical component of an accommodation request in addition to the formal documentation from a medical or other provider.
- b. Be familiar with the documentation of disability you are submitting. Be prepared to discuss your strengths, areas of challenge, and any recommendations made by the evaluator/provider.
- c. Come to your initial appointment prepared with any questions or concerns you may have.

Another helpful reading can be accessed at the U.S. Department of Education and Office for Civil Rights, "Students with Disabilities Preparing for Postsecondary Education: Know Your Rights and Responsibilities." (<https://www2.ed.gov/about/offices/list/ocr/transition.html>)

1.08 High School Versus College

There are significant differences between accommodation services and academic expectations in high school and college for students with disabilities.

Applicable Laws

- **High School:** I.D.E.A. (Individuals with Disabilities Education Act). Section 504, Rehabilitation Act of 1973. I.D.E.A. is about success.
- **University:** A.D.A. (Americans with Disabilities Act of 1990). Section 504, Rehabilitation Act of 1973. A.D.A. is about access.

Required Documentation

- **High School:** I.E.P. (Individual Education Plan and/or 504 plan). School provides evaluation at no cost to student. Documentation focuses on determining whether student is eligible for services based on specific disability categories in I.D.E.A.
- **University:** High School I.E.P. and 504 may not be sufficient. Documentation guidelines specify information needed for each category of disability. Student must get evaluation at their own expense. Documentation must provide information on specific functional limitations that demonstrate the need for specific accommodations.

Self-Advocacy

- **High School:** Student is identified by the school and is supported by parents and teachers. Primary responsibility for arranging accommodations belongs to the school. Teachers approach you if they believe you need assistance. Teachers will reach out to parents for updates, guidance and concerns.
- **University:** Student must self-identify to the Office of Accessibility. Primary responsibility for self-advocacy and arranging accommodations belongs to the student. Student must initiate contact with the Office of Accessibility if you need assistance. Students must self-advocate and ask for guidance.

Parental Role

- **High School:** Parent has access to student records and can participate in the accommodation process. Parent advocates for student.
- **University:** Parent does not have access to student records without student's written consent. Student advocates for self.

Instruction

- **High School:** Teachers may modify curriculum and/or alter pace of assignments. Testing is frequent and covers small amounts of material. Makeup tests are often available. Teachers often take time to remind you of assignments and due dates.
- **University:** Grading and testing format changes (e.g., multiple choice vs. essay) are generally not available. Accommodations to how tests are given (extended time, test proctors) are available when supported by disability documentation. Testing is usually infrequent and may be cumulative, covering large amounts of material. Makeup tests are seldom an option; if they are, students need to request them. Professors expect students to read, save, and consult the course syllabus (outline); the syllabus spells out exactly what is expected of students, when assignments are due, and how students will be graded.

Student Responsibilities

- **High School:** Tutoring and study support may be a service provided as part of an I.E.P. or 504 plan. Students' time and assignments generally are structured by others. Student may study outside of class as little as 0 to 2 hours a week for each subject.
- **University:** Tutoring does not fall under Disability Services. Students with disabilities must seek out tutoring resources as they are available to all students. Student manage their own time and complete assignments independently. Student needs to study at least 2 to 3 hours outside of class for each hour in class.

1.09 Quinnipiac University Campus Resources

Counseling Services

The Quinnipiac University Health and Wellness Center offers a variety of counseling-related services. Students who are seeking help for emotional distress have access to care. The goal is to assist students through brief therapy while addressing concerns that may be affecting academic performance or the student's quality of life within the university community.

Our counselors are a resource for students struggling with stress, anxiety, depression, relationship problems, eating disorders and alcohol or drug abuse. Other common problems include difficulty making decisions, low self-esteem, procrastination, or the stress of leaving home while adjusting to college life. Counseling staff members are available to assist any student who has been affected through physical or sexual violence or who may be grieving the loss of a loved one. Counseling services are available to all undergraduate and graduate students at no cost.

Here is a link to schedule an appointment with counseling services. (<https://forms.quinnipiac.edu/CounselingIntake/Form.html>)

Dining Services

Chartwells Dining Services is committed to providing quality food and excellent service. The guarantee to you is that we will do everything possible to ensure your satisfaction. If you have any comments, concerns, suggestions, or praise about your dining experience, or need any special assistance, please reach out to Chartwells by visiting the Quinnipiac Dining Website (<https://www.dineoncampus.com/quinnipiac/>) or simply speaking with a dining services manager.

Department of Public Safety

The Department of Public Safety provides coverage of all campuses 24 hours a day, seven days a week. Part of the duties of public safety include: responding to all emergencies and requests for assistance, offering walking escort services on campus 24 hours a day, investigating complaints and submitting follow-up written reports,

maintaining relationships with area law enforcement and emergency service agencies.

To contact the Department of Public Safety, call or email: 203-582-6200 or public.safety@qu.edu (public.safety@quinnipiac.edu)
In case of an emergency, call **911** from any phone on campus.

Department of Residential Life

The Department of Residential Life is committed to excellence in the development of a living learning environment that contributes to student success.

To contact the Office of Residential Life, email: residentiallife@qu.edu

Individual Academic Counseling

Through Individual Academic Counseling, academic specialists help students prioritize tasks, develop effective college-level study habits, negotiate classroom difficulties, and cultivate habits of the mind consistent with lifelong learning and professional success. Academic specialists are full-time, professional staff members that generally work during business hours.

To make an appointment with an academic specialist, please contact:
Mount Carmel Campus: 203-582-8628
North Haven Campus: 203-582-7851

Information Technology

If you require computer-related assistance, the information services mission is in supporting student life, teaching, research and administration. If you require computer-related assistance, you can visit the Information Services webpage (https://myq.quinnipiac.edu/IT%20%20Libraries/Information%20Technology/Academic%20Technology/Pages/AT_Site_Redesign/MainIS.html) or stop in to one of the Tech Center locations:

Mount Carmel Campus/Arnold Bernhard Library: Room 138
North Haven Campus/Center for Medicine, Nursing and Health Sciences: MNH-338

Peer Tutoring

Over 60 peer tutors offer tutoring services for more than 400 courses. Students utilize this resource for a variety of reasons, including help in the writing process, assistance with homework problem sets and preparation for exams. Tutors received an A or A- in each course they tutor and were recommended by their professors. Tutorials are available in half-hour blocks every day of the week. To schedule a tutoring appointment, email learningcommons@qu.edu (LearningCommons@quinnipiac.edu) or call:

Mount Carmel Campus: 203-582-8628
North Haven Campus: 203-582-7851

1.10 Student Registration with the Office of Student Accessibility

Incoming and current Quinnipiac University students with disabilities who have not previously registered with the Office of Student Accessibility (OSA) and wish to request an accommodation should follow these steps:

1. **Submit documentation of disability:** Specific guidelines regarding documentation requirements are provided. Students may submit documentation to:

This link on qu.edu Accommodation Request Form for Students with Disabilities (PDF) (<https://www.qu.edu/499224/globalassets/>)

global/media/qu/documents/academics/learning-commons-support/accommodation-request-form-for-students-with-disabilities.pdf)

The Office of Student Accessibility

Located at the Learning Commons

Arnold Bernhard Library (Mount Carmel Campus) – AB-TLC
School of Law & School of Education (North Haven Campus) –

SLE-340

Fax: 203-582-7610

Email: access@qu.edu

2. Schedule an appointment: the student will need to schedule an initial appointment with the OSA. Incoming students should contact the office by email, phone or walk-in to schedule an appointment:

Phone: 203-582-7600

Email: access@qu.edu

Walk-In:

Mount Carmel Campus: Arnold Bernhard Library North Wing

North Haven: School of Law and School of Education – SLE-340

Phone options are available during the summer and for students currently off campus. If you need further assistance, feel free to contact us via email or phone.

3. Determination of Accommodations: During your meeting with a staff member from the Office of Student Accessibility, a thorough discussion will occur regarding your disability, your strengths, challenges, and program of study. Often, as a part of an interactive process, the student, the OSA and the faculty member will need to collaborate to determine reasonable accommodations in certain settings that are not just academic in nature (see laboratory, practical, clinical, fieldwork, internship). Upon completion of student's appointment and a decision on what accommodations may be considered reasonable, a student will receive an accommodation letter detailing the use of recommended reasonable accommodations.

Implementing the didactic, laboratory, practical, clinical/fieldwork adjustments/accommodations and/or services. This is completed on a semester-by-semester basis as a part of the interactive process and is an ongoing process. It is a student's responsibility to report the effectiveness of the accommodation, and ongoing communication with the OSA is encouraged. The student needs to know and feel comfortable that if their needs change or the nature of the course or class they are undertaking changes they can come back for further discussion on what might be needed.

1.11 Accommodations in Academic/Didactic Settings

Accommodations are required by law under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act (ADA).

Students who choose to disclose a disability and request academic/didactic accommodations should submit the Accommodation Request Form and relevant, supporting documentation that would substantiate the need for the accommodation (please see documentation guidelines).

A student will then meet with a representative from the Office of Student Accessibility (OSA) within an interactive process to determine which accommodations would be appropriate. Most often, this interactive process involves assessing the student learning outcomes of a course/program, in addition to the technical standards of a course/program. So long as the accommodation would not present an undue hardship or fundamental alteration, the accommodation may be deemed reasonable according to the ADA and Section 504.

Following this meeting, an official accommodation letter describing the nature of the accommodations will be provided to the student. It is the student's responsibility to forward their accommodation letter to their course instructors, for the courses which they would like to utilize their accommodations. Accommodations are effective beginning on the date the professor is presented the accommodation letter. Accommodations are not retroactive.

The student must contact their professors and to work collaboratively to help facilitate the arrangement of the accommodation. The accommodation process is premised upon an open and productive dialogue between the professor and the student. Students are encouraged by the OSA to discuss their accommodations with the professor; however, the student is not required to disclose or discuss specific disability-related information.

Please remember that all information regarding a disability is confidential and this information is subject to Quinnipiac University privacy guidelines for academic records.

1.12 Accommodations in Laboratory Settings

Accommodations are required by law under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act (ADA).

Students who choose to disclose a disability and request accommodations in a laboratory setting should submit the Accommodation Request Form and relevant, supporting documentation that would substantiate the need for the accommodation.

A student will then meet with a representative from the Office of Student Accessibility within an interactive process to determine which accommodations would be appropriate. Most often, this interactive process involves assessing the student learning outcomes of a course/program, in addition to the technical standards of a course/program. So long as the accommodation would not present an undue hardship or fundamental alteration, the accommodation may be deemed reasonable according to the ADA and Section 504.

Following this meeting, an official accommodation letter describing the nature of the lab accommodations will be provided to the student, for the courses which they would like to utilize their accommodations. Accommodations are effective beginning on the date the professor is presented the accommodation letter. Accommodations are not retroactive.

The student is advised to contact their professor(s) and to work collaboratively to help facilitate the arrangement of the accommodation. The accommodation process is premised upon an open and productive dialogue between the professor and the student. Students are encouraged by the Office of Student Accessibility to discuss their accommodations with the professor; however, the student is not required to disclose or discuss specific disability-related information.

Please remember that all information regarding a disability is confidential and this information is subject to Quinnipiac University privacy guidelines for academic records.

1.13 Accommodations Applicable to Off-Campus Educational Experiences: Clinical, Fieldwork, Externship, Internships

Students who are performing work in external settings are entitled to reasonable accommodations, as necessary, to perform the essential

duties of the clinical site as defined by Section 504 of the Rehabilitation Act and the Americans with Disabilities Act (ADA).

In the event that a student requires accommodations at an external site, the student should notify the Office of Student Accessibility as soon as possible and their course instructor, who should assist the student in engaging in the interactive process with the clinical coordinator/site.

In accordance with Section 504 and the ADA, accommodations at an external site must not:

- a. pose an undue financial or administrative burden
- b. fundamentally alter the nature or purpose of the course or assignment
- c. be inconsistent with essential academic requirements
- d. reduce or alter academic requirements
- e. substantially alter the method in which the course is taught or service is provided
- f. pose a direct threat to the health and safety of the student, patient or others

Typical academic accommodations (ex: extended test taking time, etc.) may not be transferable to an external site without first engaging in an interactive discussion process.

If following discussions through the interactive process between the Office of Student Accessibility, the student and the instructor, it is learned that accommodations at an external site are reasonable, an accommodation letter specific to clinical experiences will be provided to the student, instructor and clinical/fieldwork/externship/internship coordinator.

Accommodations will be re-visited each semester and will be dependent on the external site location and requirements.

1.14 Accommodations While Studying Abroad

Students who are interested in exploring study abroad opportunities should consider what impact their disability may have if/when they plan to travel overseas. Students are advised to reach out to the Office of Student Accessibility (OSA) as well as the Office of Global and Cultural Engagement to begin a discussion of what to expect when traveling abroad. This discussion should occur as students are exploring their options to ensure that the decision to study abroad will be a good fit.

In accordance with the deadlines for the Department of Cultural and Global Engagement for Study Abroad it is recommended that you start working with the Office of Student Accessibility up to a year in advance, or as soon as you start considering the option to study abroad.

Students who are registered with the Office of Student Accessibility who are eligible for reasonable accommodations under the Americans with Disabilities Act (ADA) and Section 504 (504) of the Rehabilitation Act may also be eligible for overseas accommodation when it can be arranged.

It is important to keep in mind that many foreign countries and study abroad programs overseas do not have the same accessibility laws (ADA/504) as in the United States. Therefore, it is imperative that you begin this discussion early in the exploration process as to learn about the types of accommodations that are typically provided in your host country. During this process the student is encouraged to be flexible and open-minded to differing ways of accommodating disability-related challenges.

If/when considering study abroad, please reach out to:

Office of Student Accessibility
 Located at the Learning Commons
 Arnold Bernhard Library (Mount Carmel) – AB-TLC
 School of Law & School of Education (North Haven) – SLE-340
 203-582-7600
 access@qu.edu (access@quinnipiac.edu)

If considering study abroad for the first time, it is suggested that a student do some preliminary research prior to such as:

- a. What are the physical environments like in the host country?
- b. How are the assignments different? Is learning mainly from lecture, readings, independent research, etc.?
- c. What housing options exist?
- d. Is transportation available and accessible?

Just as cultures differ, so do disability accommodations and perceptions. The key for any study abroad participant is flexibility.

Quick Tips for Students with Disabilities Going Abroad

- a. **Remember that other cultures may provide disability access in a different way**—learn about what types of accommodation are typically provided in your host country and be flexible and open to different ways of accommodating your disability.
- b. **Before you go, find out as much as you can about your host culture** and how they view disability by reading, talking to other students, and attending pre-departure orientation sessions. The more you know, the better prepared you will be for the interaction between your disability and the new environment.
- c. **Think about how you will answer questions** about your disability in the language of your host country—look up key vocabulary words ahead of time.
- d. **For further information, please visit:**

Diversity Abroad (<https://www.diversityabroad.com/articles/students-disabilities-abroad/>)

1.15 Residential Life/Housing Accommodations

As part of our mission to foster diverse and inclusive learning and living environments, Quinnipiac University is committed to supporting students with documented disabilities.

All students admitted to Quinnipiac University enjoy full access to its programs and services, including residential life. In accordance with Section 504 of the Rehabilitation Act and the Americans with Disabilities Act, Quinnipiac University has established procedures to ensure students with documented disabilities receive housing assignments that reasonably meet their needs as required by law.

For specific housing and other residential life information please go to <https://www.qu.edu/life/student/living-at-quinnipiac.html>

How Are Residential Life/Housing Accommodation Requests Reviewed?

Housing accommodation requests are reviewed on an individual basis. **It is important to note that students are not making a request for a specific housing assignment, but rather a request for an accommodation for**

equal access. Single rooms are granted as reasonable accommodations in only rare circumstances. Such requests will be reviewed by the Office of Student Accessibility (OSA) on a case-by-case basis.

Requests for particular housing assignments based on a student's preference, or a particular type of living environment, such as a certain type of room or location or desire for a quiet place to study will not be honored.

Students must submit the Accommodation Request Form or additional pertinent documentation from their medical provider substantiating the need for a housing accommodation.

The OSA reviews each request and determines an appropriate and reasonable housing accommodation. Once determined, accommodation recommendations are provided to the Associate Director of Residential Life.

Please note that Quinnipiac University does not grant accommodations solely based on the recommendations of care providers. The determination is made based on all information relevant to the documented functional limitations caused by the disability in relation to the place of residency.

Deadlines for requesting residential life/housing accommodations: Current Students

The deadlines for requesting housing accommodations are the following:

Current Juniors – November 1
Current First Year/Sophomores – March 1

Student requesting housing accommodations will meet with a representative from the Office of Student Accessibility (OSA) to discuss requested accommodations and to complete the interactive accommodation process. These deadlines allow the OSA adequate time to review requests prior to the complex lottery process. Please contact the Office of Residential Life regarding questions related to the Lottery Process. <https://www.qu.edu/life/student/living-at-quinnipiac.html>

Residential Life accommodations are based on the student's request. If approved, only the student and direct roommate will be affected. A student with an approved accommodation cannot request a full suite of individuals based on their approved accommodation.

Incoming Students

The deadline for requesting housing accommodations for incoming students is:

Incoming Students – June 24

An incoming student requesting housing accommodations will speak with a representative from the OSA to discuss requested accommodations and to complete the interactive accommodation process. Students with an approved accommodation can request up to one roommate.

Post-Deadline Requests

If a need for a housing accommodation request arises outside of the above timelines, students should still follow the same application process. The OSA will review post-deadline requests and the college will make every attempt to implement approved accommodations based on current availability. Please note that availability for certain types of accommodations may be limited at later points in the year. The OSA and

Office of Residential Life offers a wait list for those students who have been approved accommodations after the deadline.

1.16 Accommodations in the School of Law

Students taking classes in the Quinnipiac University School of Law should reach out to the Associate Dean of Students who will make a referral to the Office of Student Accessibility (OSA).

Please contact:
Associate Dean of Students
Quinnipiac University School of Law
203-582-3220

The OSA will review the disability documentation, and then engage in an interactive process with the Associate Dean of Students in determining accommodations that may be considered reasonable within the Quinnipiac University School of Law. Once accommodations are agreed upon, the student as well as the Associate Dean of Students will receive an accommodation letter detailing the accommodation and its' provision.

1.17 Accommodations in the Frank H. Netter MD School of Medicine

Students taking classes in the Quinnipiac University Frank H. Netter MD School of Medicine should reach out to the Associate Dean for Student Affairs who will make a referral to the Office of Student Accessibility (OSA).

Please contact:
Associate Dean for Student Affairs
Frank H. Netter MD School of Medicine
203-582-4859

The OSA will review the disability documentation, and then engage in an interactive process with the Associate Dean for Student Affairs in determining accommodations that may be considered reasonable within the Frank H. Netter School of Medicine. Once accommodations are agreed upon, the student as well as the Associate Dean for Student Affairs will receive an accommodation letter detailing the accommodation and its provision.

1.18 Emotional Support Animals, Service Animals and Therapy Animals

Quinnipiac University allows individuals to bring animals on university property in accordance with federal laws and in other situations subject to the rules outlined in this policy.

The university supports the use of service and emotional support animals on campus as defined and regulated by federal and state laws. The university also supports the use of research and therapy animals used in approved research and teaching activities.

At the same time, it recognizes the health and safety risks potentially created by animals on campus. Animals, including pets of any kind (except fish, as noted in the Student Handbook (<http://catalog.qu.edu/handbooks/undergraduate/university-policies/animals/>)), are not permitted on university campuses or in university housing facilities, with the exception of service animals, approved emotional support animals, approved research animals and approved therapy animals.

For the complete policy and guidance regarding animals on campus at Quinnipiac University, please visit this link in the campus catalog. (p. 73)

Service Animals

According to the Americans with Disabilities Act (ADA), a service animal is defined as “any dog individually trained to work or perform tasks for the benefit of an individual with a disability, including, but not limited to, guiding individuals with impaired vision, alerting individuals to an impending seizure or protecting individuals during one, and alerting individuals who are hearing impaired to intruders, or pulling a wheelchair and fetching dropped items.”

A person with a disability uses a service animal, such as a seeing-eye dog, as an auxiliary aid. Service animals are welcome in all buildings on the university property and may attend any class, meeting, or other event. There may be an exception to certain areas, such as laboratories and facilities areas, etc.

Reasonable behavior is expected from service animals while on the university property. The owners of disruptive and aggressive service animals may be asked to remove them from the university. If the improper behavior happens repeatedly, the owner may be told not to bring the service animal into any facility until the owner takes significant steps to mitigate the behavior. Cleanliness of the service animal is mandatory. Consideration of others must be taken into account when providing maintenance and hygiene of service animals. The employee is expected to clean and dispose of all animal waste. Owners of service animals are responsible for all actions of the animal while on university property.

Service Animal in Training

Connecticut law entitles any individual training a service animal to enter public spaces. A service animal in training is not allowed in controlled spaces on university property including classrooms, residence halls and employee work areas.

The service animal in training must be wearing a harness or an orange-colored leash and collar. The individual training a service animal must be employed by or authorized to engage in designated training activities by a service animal organization and who carries photographic identification indicating such employment and authorization, or an individual who volunteers for a service animal organization that authorizes such volunteers to raise dogs to become service animals, and causes the identification of such dog with either tags, ear tattoos, identifying bandanas (on puppies), identifying coats (on adult dogs), or leashes and collars.

Emotional Support Animals

Students are permitted to keep emotional support animals in on-campus housing on a case-by-case basis as a reasonable accommodation for a documented disability.

Emotional support animals may not travel throughout campus property with their handlers. To permit a handler with equal opportunity to use and enjoy university housing, emotional support animals are permitted within the handler's residential living area at all times. A formal agreement between residential life and the handler will be utilized to identify the area where the handler can take the emotional support animal depending upon the housing unit in which the handler resides. The Office of Residential Life defines the handler's residential living area. When being transported to and from campus, the emotional support animal must be placed in an animal carrier or controlled by leash or harness. While outside the handler's residential living area, the handler shall carry proof that the animal is an OSA-approved emotional support animal. Emotional support animals are not permitted in other university buildings.

In order to bring an emotional support animal to campus, the handler must contact OSA as early as possible to permit time to gather and

review all necessary documentation. The OSA requires a reasonable amount of time to review documentation. The handler will be asked to provide documentation of their disability and medical documentation of the need for the emotional support animal. Such documentation must be from a licensed physician, psychiatrist, clinical social worker or other licensed mental health professional and provide that the animal provides emotional support that alleviates one or more of the identified symptoms or effects of an existing disability. Emotional distress from having to give up an animal because of a “no pets” policy does not qualify a student for an accommodation.

The handler also may be asked to provide the following information regarding the emotional support animal:

- a. The type of animal;
- b. The name of the animal;
- c. A description of the animal;
- d. Whether the animal is housebroken;
- e. The date of the animal's last medical examination; and
- f. The date that the animal was acquired.

Once the OSA has determined that an ESA is a reasonable accommodation, the handler must meet with staff in residential life to discuss the specifics of the accommodation and sign a formal agreement. Emotional support animals will not be allowed on campus without OSA and residential life approval.

Therapy Animal

A therapy animal is an animal working with a health care or mental health care professional in a therapeutic activity. The animal must have received training appropriate for animal assisted therapy/activities (AAT/AAA) as evidenced by receipt of the Canine Good Citizen certificate from the American Kennel Club, or registration by a national therapy animal organization, such as Pet Partners. A therapy animal is not an emotional assistance animal or a service animal.

Handler's Responsibilities

The handler of a service or emotional support animal living in university housing and/or frequenting campus is responsible for the following:

- a. The handler must meet first with the OSA and then with a representative of the Office of Residential Life in order to review and sign the Animal Agreement form prior to bringing the animal to campus.
- b. The handler must be in full control of the animal at all times.
- c. Only the handler may care for the animal. Handlers may not leave the animal in the care of another person on campus. The care of the animal is the responsibility of the handler at all times. The handler is responsible for identifying one alternative caretaker for the animal in case the handler becomes incapacitated for any reason.
- d. The handler must provide adequate care and supervision of the animal at their own expense. This includes training, cleanup and appropriate disposal of waste and proper hygiene. This also includes providing for the health of the animal, such as vaccination, annual check-ups and compliance with any state and local licensing requirements, including pursuant to General Statutes §22-338 and General Statutes §22-345. The handler is required to provide documentation on an annual basis regarding vaccinations and licensing to the Office of Residential Life. Furthermore, before bringing the animal to campus, the handler is required to provide documentation that the animal has a Certificate of Health from a licensed veterinarian and provide updated documentation on an

annual basis. The Certificate of Health must state that the animal is free from clinical signs of infectious, contagious or communicable disease and is not from an area under rabies quarantine. The animal must have proof of current rabies vaccination given by veterinarian prior to date of importation and must have no exposure to rabies within the past 100 days.

- e. The animal must remain in a crate or other appropriate container in the handler's assigned bedroom when the handler is not in the room.
- f. If directed to by OSA, the handler is required to bring the animal to receive veterinarian attention.
- g. The handler must assure that the animal does not cause undue interference or disruption to other community members. An example of undue interference or disruption may include excessive barking.
- h. The handler will be liable for any harm caused by the animal, including bodily injury or property damage. This responsibility includes, but is not limited to, any expenses incurred for pest control, maintenance or cleaning above and beyond standard costs. Any such costs will be due at the time of repair and/or move-out, and the university shall have the right to bill the student account for any unmet obligations.
- i. The handler must notify OSA in writing if the animal is no longer needed or is no longer residing on university property. If the animal will be replaced, the handler must file a new request with OSA.
- j. The handler must permit scheduled inspection of their room for fleas, ticks or other pests as needed, and will be billed for any necessary pest treatment above and beyond standard pest management.
- k. The animal may not be left overnight to be cared for by another resident. Animals may be left alone for up to 24 hours. Animals must be taken with the handler if the handler leaves campus for a prolonged period (more than 24 hours).
- l. The handler must abide by all other applicable residential policies.
- m. Handlers are strongly encouraged to maintain renter's insurance, including liability coverage for the animal. The handler assumes full personal liability for any damage to property or persons caused by the animal. The handler shall be responsible for all liability and claims related to the animal. Quinnipiac University provides no indemnification to the animal or handler. Likewise, Quinnipiac University provides no personal property insurance coverage. Quinnipiac University is not the owner or keeper of any animal. Quinnipiac University shall not be responsible for any harm to the animal while on campus, including but not limited to, injury to the animal caused by pest management or lawn care products.
- n. It is strongly encouraged that animals be precluded from a raw protein diet in an effort to protect the public from significant health risks.
- o. If the handler resides in Quinnipiac University housing, the handler will notify the residence hall director if the animal escapes and is not recovered within one hour.
- p. Necessary precautions should be made for appropriate university personnel to enter student housing when the handler is not present. Precautions may include sharing pertinent information to appropriate university staff. The animal must be caged or crated, or removed from the room, during the time that university personnel are in the room. The university is not liable if the animal escapes during one of these visits.
- q. The handler is required to provide assistance and support to the animal during emergencies. University personnel are not responsible to provide any assistance or support to the animal, including but not limited to, during an emergency evacuation such as a fire alarm.

In the event of a power outage or other disruption to university housing, the handler is responsible for making alternative boarding arrangements for the animal off campus. Accommodations are not available on campus during an emergency.

Section 2: Criteria for Comprehensive Documentation of Disabilities

2.01 General Documentation Guidelines

Students who wish to disclose a disability and request an accommodation(s) should submit documentation in the form of the Quinnipiac University Accommodation Request Form and/or additional supporting documentation from a credentialed provider. Current and incoming students who do not have documentation of disability, have documentation that is not current, or does not meet the suggested guidelines, should still schedule a meeting with the Office of Student Accessibility. Documentation can be discussed during the initial meeting – no student should delay initiating a request out of concern for not having the appropriate paperwork.

If after reading these guidelines, you have any additional questions regarding documentation, please contact:

The Office of Student Accessibility
 Located at The Learning Commons
 Arnold Bernhard Library (Mount Carmel) – AB-TLC
 School of Law & Education (North Haven) SLE-340
 Fax: 203-582-7610
 Email: access@quinnipiac.edu

- a. **Documentation *must* be dated and signed with the appropriate credentials by the providing professional on letter head.**
- b. **A diagnostic statement identifying the disability from a licensed/certified professional:** The diagnosis should include a description of diagnostic methods, including the DSM-5 diagnosis if applicable, and criteria utilized along with the date of evaluation. The licensed professional providing the diagnosis cannot be a family member. Quinnipiac University reserves the right to require that a certified copy of the documentation be transmitted directly from the evaluator or professional to the college.
- c. **Current functional impact of the condition:** Describe the current relevant functional impact of the disability in an educational setting.
- d. **The expected progression of the disability over time:** Provide a description of the expected change in the functional impact of the condition over time. If the condition is variable, describe the known factors that may exacerbate the condition.
- e. **Treatment:** List treatments, medications, accommodations/ auxiliary aids, and/or services currently in use and their estimated effectiveness in addressing the impact of the condition. Include any significant side effects that may affect physical, perceptual, behavioral, or cognitive performance. List any additional recommendations/auxiliary aids along with a clear rationale of why they may be of benefit to the student. All recommendations will be evaluated on a case-by-case basis.
- f. **Supporting documents:** Students are encouraged to submit any past documentation or materials that establish a history of receiving appropriate accommodations in a previous academic setting when available. Secondary school accommodation plans such as IEPs or 504 Plans are helpful, but often do not provide sufficient information

to establish eligibility for the requested accommodations at the university level when submitted without a corresponding evaluation.

Submission of documentation is not the same as the request for accommodations. A student must schedule an appointment with the Office of Student Accessibility to engage in the interactive process and discuss reasonable accommodations in regard to the program of study, technical standards and student learning outcomes.

Confidentiality Statement

The Quinnipiac University Office of Student Accessibility (OSA) will not release any information at any point in the disability accommodation process regarding an individual's diagnosis or medical information without his or her informed written consent. Information will be released only on a "need to know" basis, except where otherwise required by law.

Students are advised to keep any disability-related information private from their professors, advisors, program faculty and staff.

2.02 Learning Disability Documentation Guidelines

Students requesting accommodations under the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act of 1973 must provide documentation of a diagnosed learning disability that substantially limits one or more major life activities. Documentation and recommendations must be appropriate to the postsecondary setting. The report must describe the current impact of the disability on the student's academic performance.

Accommodations are individually determined each semester and must be renewed on a semester-by-semester basis. Once the Office of Student Accessibility receives documentation, it is the student's responsibility to make an appointment with the Office of Student Accessibility to discuss their needs through an interactive process, and then to receive accommodations that semester. Please note that accommodations are never instated retroactively, so it is important to reach out early.

Documentation Guidelines: The following guidelines describe the necessary components of acceptable documentation for students with learning disabilities. Students are encouraged to provide their clinicians/treatment providers with a copy of these guidelines.

- a. Testing must be current, administered within the past three years for students age eighteen and older, and within one year for students under the age of eighteen. Because the provision of all reasonable accommodations and services is based upon assessment of the current impact of the student's disabilities on his/her academic performance, it is important to provide recent documentation. For that reason, dates of testing must be included in the report.
- b. Testing must be performed by a qualified evaluator: clinical or educational psychologists, learning disabilities specialists, or physicians known to specialize in learning disabilities. Information about their professional credentials, including licensing and certification, and their areas of specialization must be clearly listed in the report.
- c. Testing must involve a comprehensive psychoeducational evaluation and include a diagnostic interview and clinical summary.
- d. The evaluation report must indicate the norm-reference group. For example, the report must specifically indicate how the student performs in relationship to the average person in the general population.

The following areas must be assessed using standardized instruments. Actual scores from all instruments must be provided. If grade equivalent scores are included, they must be accompanied by standard scores and/or percentile rank scores.

Aptitude: The *Weschler Adult Intelligence Scale IV (WAIS-IV)* with subtest scores is the preferred instrument. The *Woodcock-Johnson Psychoeducational Battery III: Tests of Cognitive Ability* or the *Stanford-Binet Intelligence Scale-IV* are acceptable.

Achievement: Assessment of comprehensive academic achievement in the areas of reading (decoding and comprehension), mathematics (calculation and problem solving), oral language, and written expression (spelling, punctuation, capitalization, writing samples) is required. The *Woodcock-Johnson Psycho-educational Battery III: Tests of Achievement* is the preferred instrument. The *Scholastic Abilities Test for Adults (SATA)* and the *Stanford Test of Academic Skills (TASK)* are acceptable.

Other specific achievement such as the *Test of Written Language-3 (TOWL-3)*, *Woodcock Reading Mastery Tests-Revised*, the *Stanford Diagnostic Test*, and the *Nelson-Denny Reading Test* can be helpful when results are utilized to support other standardized instruments.

Additional notes:

- a. The *Wide Range Achievement Test 3 (WRAT-3)* is NOT a comprehensive measure of achievement and therefore should not be the only measure of overall achievement utilized.
- b. The Reading, Math, and Writing Fluency subtests of the *Woodcock-Johnson Psycho-educational Battery III: Tests of Achievement* and the One Minute Reading Rate subtest of the *Nelson-Denny Reading Test* should not be provided as the sole documentation of processing speed and/or reading, math, and writing speeds.
- c. Results from the *Nelson-Denny Reading Test* form G or H should be included for students who are documenting a reading disability. If the impairment involves reading speed, the *NDRT* should be administered under both standard and untimed conditions.

Information Processing: Specific areas of information processing (e.g., short and long-term memory; sequential memory; auditory and visual perception processing; processing speed) must be assessed.

- a. Use of the *Woodcock-Johnson Psychoeducational Battery III-Tests of Cognitive Ability* (Standard Battery-subtests 1-10) or subtests from the *Weschler Adult Intelligence Scale III (WAIS-IV)* are acceptable.
- b. A diagnosis as per the American Psychiatric Association's *Diagnostic and Statistical Manual – V (DSM-V)* is required. Terms such as "learning problems," "learning differences," "weaknesses," etc. are not the equivalent of learning disability.

Testing must demonstrate that the Learning Disability currently and substantially limits a major life activity, and indicate how the student's current participation in courses, programs, services, or any other activity of the University may be affected.

2.03 Physical/Medical Disability (Temporary or Permanent) Documentation Guidelines

Students requesting accommodations under the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act of 1973 must provide documentation of a temporary or permanent physical disability that substantially limits one or more major life activities. Examples of physical/medical permanent or temporary disabilities

include but are not limited to: chronic illnesses, traumatic/acquired brain injury, surgery, post-concussive syndrome, arthritis and mobility, chemical sensitivity, Cancer, AIDS etc. Documentation and recommendations must be appropriate to the postsecondary setting. The report must describe the current impact of the disability on the student's academic performance.

Accommodations are individually determined each semester and must be renewed on a semester-by-semester basis. Once the Office of Student Accessibility receives documentation, it is the student's responsibility to make an appointment with the Office of Student Accessibility to discuss their needs through an interactive process and then to receive accommodations that semester. Please note that accommodations are never instated retroactively, so it is important to reach out early.

Documentation Guidelines:

- a. Documentation must be current: Although some individuals have long-standing or permanent diagnoses, because of the changing manifestations of many physical disabilities, it is essential for those individuals to provide recent and appropriate documentation from a qualified evaluator.
- b. Documentation must be comprehensive and should include:
 - i. A clear, specific diagnosis of a disability and a statement outlining the ways the student is substantially limited in one or more major life activities
 - ii. Description of the current symptoms, fluctuating conditions/symptoms and prognosis
 - iii. A summary of assessment procedures used to make the diagnosis, as well as a date of diagnosis
 - iv. Medical information which may be important in a college/university environment, including any safety measures, medication, side effects of the prescribed medication, and whether there are crisis episodes associated with the disability.
 - v. Suggestions of reasonable accommodations that might be appropriate at the postsecondary level.

2.04 Attention Deficit Hyperactivity Disorder (ADD/ADHD) Documentation Guidelines

Students requesting accommodations under the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act of 1973 must provide documentation of the Attention Deficit Hyperactivity Disorder and that it substantially limits one or more major life activities. Documentation and recommendations must be appropriate to the postsecondary setting. The report must describe the current impact of the disability on the student's academic performance.

Accommodations are individually determined each semester and must be renewed on a semester-by-semester basis. Once the Office of Student Accessibility receives documentation, it is the student's responsibility to make an appointment with the Office of Student Accessibility to discuss their needs through an interactive process and then to receive accommodations that semester. Please note that accommodations are never instated retroactively, so it is important to reach out early.

Documentation Guidelines of ADD/ADHD must include all of the following elements:

- a. **The evaluation must be performed by a qualified individual:** The assessment must be provided by a licensed professional who has had training in and direct experience with ADD/ADHD, such as a psychologist, psychiatrist or primary care doctor.

- b. **Recency of documentation:** Evaluations must be dated within three years, with updates provided when relevant changes in behavior or medication occur.
- c. **Diagnostic Interview:** The summary must include the following information, and should be based on more sources than the student's self-report:
 - i. Evidence that the condition was exhibited in childhood in more than one setting
 - ii. A history of the individual's presenting attentional symptoms
 - iii. Impulsive/hyperactive or inattentive behaviors, as well as relevant medication history
- d. **Relevant testing:** Neuropsychological or psychoeducational assessments are recommended to determine the current impact of the condition on the individual's academic functioning.
 - i. The data must logically reflect a substantial limitation to learning for the individual that is requesting the accommodation.
- e. **Specific diagnosis:** This should not merely refer to symptoms and should correspond to a specific diagnosis as per the American Psychiatric Association's *Diagnostic and Statistical Manual – V (DSM-5)*. Based on the current predominant features, the appropriate sub-type should accompany the diagnosis.
- f. **Clinical summary:** A narrative clinical summary must include the following:
 - i. An indication that other possible causes of the presenting behavior have been ruled out. This report should indicate clear evidence of significant impairment in social, academic, or occupational functioning, and discuss present symptoms which do not occur exclusively during the course of a pervasive developmental disorder, schizophrenia, or other psychiatric disorder.
 - ii. Whether the evaluation occurred while the student was taking medication and how the results were affected
 - iii. A description of functional limitations and the impact of the condition on the student's current participation in courses, programs, services, or any other activities of the University
 - iv. Discussion of the student's use of medication and its ameliorative effects
 - v. Recommendations for academic accommodations, including a rationale for each

2.05 Mental Health/Emotional Disability Documentation Guidelines

Students requesting accommodations under the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act of 1973 must provide documentation of a psychiatric or emotional disability that substantially limits one or more major life activities. Examples of psychiatric/emotional disabilities include but are not limited to: depression, generalized anxiety, bipolar, schizophrenia, etc. Documentation and recommendations must be appropriate to the postsecondary setting. The report must describe the current impact of the disability on the student's academic performance.

Accommodations are individually determined each semester and must be renewed on a semester-by-semester basis. Once the Office of Student Accessibility receives documentation, it is the student's responsibility to make an appointment with the Office of Student Accessibility to discuss their needs through an interactive process and then to receive accommodations that semester. Please note that accommodations are never instated retroactively, so it is important to reach out early.

Documentation Guidelines:

- a. The evaluation must be performed and provided by a licensed psychologist, psychiatrist, psychiatric nurse practitioner, or clinical social worker. An assessment from a general physician typically does not suffice.
- b. Documentation must be dated within 6 months of the date of Office of Accessibility registration. Older evaluations will be considered if submitted with more recent supplemental documentation.
- c. Documentation must be comprehensive and should include:
 - i. Any counseling, specific therapies, current prescribed medications and any side-effects that would compromise academic functioning.
 - ii. Specific diagnosis that refers to symptoms and should correspond to a specific diagnosis as per the American Psychiatric Association's *Diagnostic and Statistical Manual – V (DSM-V)*. Please note that a diagnosis in and of itself does not automatically warrant approval of requested accommodations.
 - iii. A narrative clinical summary must describe a history of presenting symptoms, the current severity and expected duration of symptoms, a description of functional limitations and the impact of the disability on the student's current participation in courses, programs, services, or any other activities at the postsecondary level.
 - iv. Suggestions of reasonable accommodations that may be appropriate at the postsecondary level.

2.06 Auditory/Visual Disability Documentation Guidelines

Students requesting accommodations under the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act of 1973 must provide documentation of vision or hearing loss and describe how the disability substantially limits one or more major life activities. Documentation and recommendations must be appropriate to the postsecondary setting. The report must describe the current impact of the disability on the student's academic performance.

Accommodations are individually determined each semester and must be renewed on a semester-by-semester basis. Once the Office of Student Accessibility receives documentation, it is the student's responsibility to make an appointment with the Office of Student Accessibility to discuss their needs through an interactive process and then to receive accommodations that semester. Please note that accommodations are never instated retroactively, so it is important to reach out early.

Documentation Guidelines: Visual Impairments

Students requesting accommodations on the basis of low-vision or blindness must provide documentation consisting of:

- a. An ocular assessment or evaluation from an ophthalmologist, or a low-vision evaluation of residual visual function, where appropriate, which should be dated within 6 months, particularly if the condition is subject to change
- b. A description of current symptoms, fluctuating conditions/symptoms, and prognosis
- c. An assessment of functionally limiting manifestations of the vision disability
- d. A history of accommodations received in the past, if applicable
- e. Recommendations for reasonable accommodations that address the student's functional impairments, with particular regard to assistive

technology and alternate formats for print materials and a rationale in support of each recommendation

Documentation Guidelines: Hearing Impairments

Students who are deaf or hard-of-hearing must provide documentation consisting of:

- a. An audiological evaluation and/or audiogram which should be dated within 6 months, particularly if the condition is subject to change
- b. Pertinent history, including date and age of onset of hearing loss, current level of severity, and statement of whether the hearing loss is stable or progressive
- c. A clinical summary of the functional implications of the diagnostic data
- d. A history of accommodations received in the past, if applicable
- e. Recommendations for reasonable accommodations that address the student's functional impairments, with particular regard to communication devices and methods, such as sign-language interpreting services, assisted listening devices, CPrint, or CART services and a rationale in support of each recommendation

2.07 Autism Spectrum Disorder Documentation Guidelines

Students requesting accommodations under the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act of 1973 must provide documentation of an Autism Spectrum Disorder disability that substantially limits one or more major life activities. Documentation and recommendations must be appropriate to the postsecondary setting. The report must describe the current impact of the disability on the student's academic performance.

Accommodations are individually determined each semester and must be renewed on a semester-by-semester basis. Once the Office of Student Accessibility receives documentation, it is the student's responsibility to make an appointment with the Office of Student Accessibility to discuss their needs through an interactive process and then to receive accommodations that semester. Please note that accommodations are never instated retroactively, so it is important to reach out early.

Documentation Guidelines:

- a. The evaluation must be performed by a licensed individual who is qualified to evaluate and diagnose Autism Spectrum Disorders or who may serve as members of a diagnostic team. These individuals or team members may include developmental pediatricians, neurologists, clinical psychologists, neuropsychologists, psychiatrists or other qualified medical doctors.
- b. The name, title, and credentials of the qualified professional writing the report should be included. Information about licensure or certification, including the area of specialization, employment, and the state or province in which the individual practices, should also be clearly stated in the documentation. All reports should be typed on professional letterhead, dated within three years, and signed.
- c. Must be dated within three years including the current impact of the student's disability on his or her academic performance as well as the impact at the postsecondary level.
- d. Summary should include the specific diagnosis of an autism spectrum disorder based on the current DSM- V diagnostic criteria. The evaluator should provide a rationale and comprehensive supportive data to substantiate this diagnosis.

- e. Summary should address the severity and frequency of the symptoms, and indicates whether the symptoms constitute an impairment of a major life activity.
- f. Should examine and discuss the possibility of co-existing and/or alternative diagnoses, including learning and psychological disorders.
- g. Suggestion of reasonable accommodations that might be appropriate at the postsecondary level. Recommended accommodations should be pertinent to the anticipated academic environment.

2.08 Parking Accommodations

Students are encouraged to contact their Department of Motor Vehicles in their state of residency in order to obtain a valid, state-issued handicapped placard or license plate. Handicap accessible parking spaces are located throughout campus, marked by signage, and are reserved for vehicles displaying a valid state issued hangtag or license plate only. The handicapped placard must be present on the vehicle at all times and must be presented along with vehicle registration information to the Office of Student Accessibility (OSA), which will then be forwarded to the Parking and Transportation office. When a state issued placard is not acquired, a student can provide disability documentation to the OSA to engage in an interactive process in determining accommodations related to the access of courses, programs, services, activities, and facilities.

The OSA will review a student's disability documentation and will consider the student's request for a campus parking permit as a necessary, reasonable accommodation if:

- a. Under the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act of 1973, a student provides documentation of a temporary or permanent physical disability that substantially limits one or more major life activities.
- b. Documentation must be **current**: Although some individuals have long-standing or permanent diagnoses, because of the changing nature of many physical disabilities, it is essential for those individuals to provide recent and appropriate documentation from a qualified evaluator.

Documentation must be **comprehensive** and should include:

- a. A clear, specific diagnosis of a disability and a statement outlining the ways the student is substantially limited in one or more major life activities
- b. Description of the current symptoms, fluctuating conditions/symptoms and prognosis
- c. A summary of assessment procedures used to make the diagnosis, as well as a date of diagnosis
- d. Medical information which may be important in a college/university environment, including any safety measures, medication, side effects of the prescribed medication, and whether there are crisis episodes associated with the disability
- e. Suggestions of reasonable accommodations that might be appropriate at the postsecondary level

If parking is determined to be a necessary, reasonable accommodation in order to access Quinnipiac University courses, programs, services, activities and facilities, the campus parking permit issued to the student will be limited to the specific dates and in some occasions times for which the accommodation is necessary and reasonable, as described in the student's OSA parking permit.

Due to the limited parking spaces available, parking accommodation requests for a specific parking location based on convenience to accommodate activities such as doctor visits, grocery shopping, family conflicts or employment will not be granted.

For students looking to obtain an OSA parking permit, please contact:

The Office of Student Accessibility
 Located at The Learning Commons
 Arnold Bernhard Library (Mount Carmel) – AB-TLC
 School of Law & Education (North Haven) SLE-340
 203-582-7600
 access@quinnipiac.edu

Campus Transportation Options

- a. On-Demand Shuttle Service is available upon request by calling 203-691-1512. Quinnipiac operates 24-passenger busses that are ADA compliant with wheelchair lifts and handicap-accessible seating. Students who are on crutches or otherwise require assistance may access the lifts on these vehicles.
- b. Door-to-Door Service - the Department of Public Safety provides on campus door-to-door transportation (Mount Carmel campus only) via a patrol vehicle or golf cart upon request by calling 203-582-6200.

Parking Rules and Regulations

- a. Vehicles parked outside of their designated parking lot are subject to a citation or vehicle tow when found to be in violation of the parking rules and regulations.
- b. Parking decals must be displayed in the lower left inside corner (driver's side) of the windshield. Please display the current year decal only. The decal must be attached with its own adhesive, and **cannot be transferred to another vehicle or person**. The Department of Public Safety reserves the right to deny access to university properties to any vehicle not displaying the proper decal. Q-Cards MUST be presented upon request.
- c. Decals that are improperly attached, show signs of being transferred, duplicated or manipulated in any way will not be considered valid. The Department of Public Safety may seize invalid or misused parking decals at any time.
- d. The person to whom a vehicle is registered is responsible for all parking citations issued to the vehicle regardless of who is operating the vehicle. Parking citations cannot be transferred to another My Parking account.
- e. All parking citation payments are processed online in each student's My Parking account. Credit, debit and e-check are accepted forms of payment. All fines double after 15 days for nonpayment and a HOLD is placed on the student's account. Parking appeal information may be found in the complete parking rules and regulations, which may be found online.
- f. Unless noted above, all other parking areas and roadways are prohibited and will result in the issuance of a parking citation.
- g. A legal parking space is defined as an area specifically designated for parking, which typically is defined by parking blocks and/or painted surface lines and/or indicated with appropriate signage. Areas not identified as parking areas should be viewed as "**NO PARKING**" zones, and in most cases are considered a fire lane or safety hazard. Vehicles parked illegally will be issued a citation and **WILL BE TOWED** at the owner's expense. Parking on campus is prohibited on grass and in areas where it would mar landscaping,

create a safety hazard, or interfere with the use of University facilities. Such areas include, but are not limited to:

- i. Posted No Parking Zones
 - ii. Yellow zones
 - iii. Fire lanes
 - iv. Access areas
 - v. Crosswalks
 - vi. Sidewalks
 - vii. Hash mark areas
 - viii. Areas designed for special vehicles
- h. Removal of cones or barriers is not permitted. Violators will be issued a parking citation and towed at the owner's expense.

Quinnipiac University reserves the right to temporarily close any parking facility or parking lot, to revise traffic patterns to accommodate special events, maintenance or weather. When possible, advance notice of such changes will be provided. Vehicle owners must be available to move their vehicle upon request; vehicle owners who are traveling or otherwise plan to be absent and unable to remove a vehicle upon request, MUST park in a parking garage or risk being towed at the owner's expense.

For full Parking Rules & Regulations, please refer to the Department of Public Safety (<https://myq.quinnipiac.edu/Campus%20Offices/Security%20%20Safety/Services%20%20Regulations/Pages/ParkingRegulations.aspx>) webpage.

2.09 Medical Meal Plan Accommodation Policy

Quinnipiac Dining Services is a leader in providing fresh, delicious, and nutritious meals that students have come to know and love. Quinnipiac Dining Services is committed to meeting the dining needs of all students by creating new and garden-fresh meals that help contribute to the building of sharp minds and strong bodies through a healthful, balanced approach.

Students are required to meet with the Executive Chef of Quinnipiac Dining Services to help meal plan and determine what options best suit each students' specific dietary or nutritional needs.

Quinnipiac University is committed to the full participation of students with disabilities in all aspects of college life, including dining experiences. Students with documented disabilities for whom eating in a dining hall may not be viable due to medically necessitated dietary requirements may request a meal plan accommodation.

Accommodations to Quinnipiac University meal plans are very rare, and only will be considered on a case-by-case basis if Quinnipiac Dining Services cannot provide the student with alternative meals which would be both nutritious and safe.

The Office of Student Accessibility (OSA) works collaboratively with Quinnipiac Dining Services, Residential Life and Health and Wellness in order to provide dining accommodations to qualified students with disabilities.

According to the terms and conditions of the Quinnipiac Universities Residential Life and Dining policies, all full-time and part-time students are required to have a meal plan. Students can select from the Platinum, Gold and Silver meal plans. Students who are commuters will have the Bronze plan.

Meal plan accommodations depend upon the nature and degree of severity of the documented disability. While the Americans with

Disabilities Act of 1990 and its amendments of 2008 (ADAAA) require that priority consideration be given to the specific methods requested by the student, it does not imply that a particular accommodation must be granted if other suitable options are available or is deemed not reasonable.

Prior to requesting a medical meal plan accommodation, students with food limitations and/or allergies are required to contact and meet with a representative from Quinnipiac Dining Services.

Section 3: ADA/504 Grievance Procedure at Quinnipiac University

3.01 Grievances

Students who believe they have been subjected to discrimination on the basis of disability or have been denied access to services or accommodations required by law, have the right to use this grievance procedure. In general, the grievance procedure is designed to address disputes concerning the following:

- a. Disagreements regarding a requested service, accommodation or modification of a university practice or requirement;
- b. Inaccessibility of a program or activity;
- c. Harassment or discrimination on the basis of disability;
- d. Violation of privacy in the context of disability

Undergraduate and graduate students with inquiries regarding relevant Quinnipiac University policies or procedures should be directed to the Director of the Office of Student Accessibility whose office is located in the north wing of the Arnold Bernhard Library.

3.02 Informal Procedure

In the event an individual believes that he/she has received discriminatory treatment and has been unable to resolve the issue with the staff identified above, a student may follow an informal process to resolve the issue. Undergraduate and graduate students working with the ADA Coordinator may contact the associate vice president of retention and academic success (203-582-5338) or access@qu.edu. Students of the School of Law working with the associate dean of students (Law) should contact the dean of the School of Law. Contact with the appropriate person should be made within fifteen (15) days after the alleged discriminatory act or incident. Discretion may be exercised in the event contact is made after the 15-day period.

During this stage in the procedure, the complaining party is designated the "aggrieved individual" and the person(s) whom the aggrieved individual is complaining against should be designated the "alleged discriminating party."

The associate vice president of retention and academic success will not serve as an advocate for either the aggrieved individual or the alleged discriminating party, but merely process the allegation(s) and attempt to informally resolve the differences between the two parties within fifteen (15) days after being contacted by the aggrieved individual.

If the aggrieved individual is not satisfied with the outcome of the informal process, he/she may file a formal complaint within fifteen (15) days after the conclusion of the attempt to informally resolve the differences.

As outlined above, the informal process, theoretically, should not exceed forty-five (45) days.

3.03 Formal Procedure

Initial Process

The aggrieved individual initiates the formal procedure by filing a formal complaint in writing to the vice president of academic innovation and effectiveness. Once the complaint is filed, the status of the aggrieved individual changes to that of "complainant." The vice president of academic innovation and effectiveness may assist the complainant in properly filing a complaint; however, it is important that the vice president of academic innovation and effectiveness not serve as an advocate for the complainant. The formal complaint may be a simple written statement, but should include the following:

- a. The complainant's name, address, email address and phone number;
- b. A full description of the problem;
- c. A statement of the remedy requested;
- d. A statement setting forth the outcome of the informal procedure describe above.

Investigation

Once the complaint has been properly filed, the vice president of academic innovation and effectiveness, who shall serve as grievance officer, shall promptly initiate an investigation. In undertaking the investigation, the vice president may interview, consult with and/or request a written response to the issues raised in the grievance from any individual the vice president believes to have relevant information, including faculty, staff and students.

The complainant and the party against whom the grievance is directed shall have the right to have a representative. Each party shall indicate whether he or she is to be assisted by a representative and if, so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.

Upon completion of the investigation, the vice president will prepare and transmit to the student, and to the party against whom the grievance is directed, a final report containing a summary of the investigation, written findings and a proposed disposition. This transmission will be expected within thirty (30) calendar days of the filing of the formal complaint. The deadline may be extended by the vice president for good cause. The final report shall also be provided, where appropriate, to any university officer whose authority will be needed to carry out the proposed disposition.

Appeal

Within ten (10) calendar days of the issuance of the final report, the complainant or the party against whom the grievance is directed may appeal the vice president's determination to the provost. The written request for review must specify the particular substantive and or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the proposed disposition. Furthermore, the appeal must be directed only to issues raised in the formal complaint as filed or to procedural errors in the conduct of the grievance procedure itself, and not to new issues.

A copy of the provost's written decision will be expected within thirty (30) calendar days of the filing of the appeal and shall be sent to the parties, the grievance officer and, if appropriate, to the university officer whose authority will be needed to carry out the disposition. The deadline may be extended by the provost for good cause. The decision of the provost on the appeal is final.

This formal process does not preclude an individual's right to file a formal complaint with the Office for Civil Rights of the United States Department of Education, or any other federal agency.

Policy and Procedures on Drug Screens for Health Professions Programs

Policy and Procedures on Drug Screens for Health Professions Programs in the Quinnipiac University School of Health Sciences (SHS), School of Medicine (SOM) and School of Nursing (SON) - Revised 4.30.2019 - Revised 5.28.2020 - Revised 8.6.2020 - Revised 4.29.2021 - Revised 5.10.2022

Purpose

The School of Nursing (SON), School of Medicine (SOM) and School of Health Sciences (SHS) recognize that substance abuse is a significant public health problem in the United States, and that drug overdose is now the leading cause of death among Americans under 50 years of age. Unfortunately, the health risks and criminal matters that affect so many individuals include health care providers. Substance abuse may affect the ability of a health care provider to deliver safe, high-quality care. All providers have the legal and ethical responsibility to uphold the law that protects society from drug abuse.

This policy influences and augments the student's ability to maintain personal and professional integrity and facilitates the student's success both clinically and didactically. It promotes a healthy learning environment for the student. In the clinical setting, this policy enhances patient safety. It also fosters the development of professional health care providers who are well educated about the prevalence, adverse outcomes and responsibilities related to substance abuse.

For all items in this policy, the primary dean's representative is as follows (but alternative designees may be named, as appropriate):

The appropriate dean's representative for SON is the assistant dean for student services.

The appropriate dean's representative for SOM is the associate dean for student affairs.

The appropriate dean's representative for SHS is the assistant dean for career development.

Incoming students from all programs must read this policy as a condition of acceptance into the professional component in their program, whether or not their school/program requires a drug screen prior to matriculation. Addenda may be drafted by any or all of the three schools that modify this policy and its procedures. Please see the Appendix tab for the School of Nursing Appendix (p. 103).

Policy Statement

This policy applies to all students who have matriculated in the Schools of Nursing, Medicine and Health Sciences.

No student may consume or be under the influence of, or in possession of, alcohol or drugs, which may impair the student's ability to function safely while engaged in academic activities, regardless of venue. Students taking prescription drugs or over-the-counter medication are personally responsible for ensuring that, while taking such drugs or medications, they are not a safety risk to themselves or others while engaged in academic activities, regardless of venue. Improper use of

alcohol or other unauthorized substances in the academic or clinical setting will result in immediate removal from that setting and may result in dismissal from the program. Students also must comply with all local, state, and federal laws and regulations, as well as Quinnipiac University policies, regarding the possession, manufacture, use or distribution of controlled or *illegal* substances and alcohol.

In programs that require a negative drug screen prior to matriculation, final program acceptance is contingent upon drug screening clearance as listed in Figure 1. If a student does not complete their drug screen prior to program's deadline, that student risks delaying their start and may lose their seat in the program and forfeit their deposit.

A student who has a break in enrollment (e.g., academic leave of absence, other leave of absence, suspension, etc.) must repeat a drug screen prior to beginning classes using the guideline in Figure 1.

A drug screen or repeat drug screen may be required as a condition of clinical or fieldwork if requested by that facility. Timelines for completion of this screening are solely at the discretion of each contracted facility and are subject to change without notice. Students are required to comply with the requirements of their assigned clinical sites. A student may be required to have multiple drug screens during their enrollment in clinical and/or fieldwork. Costs associated with these screenings are the responsibility of the student. Students who are employed at an agency where they may also be doing clinical or fieldwork as part of the curriculum must comply with this drug screening policy regardless of whether a drug screen was completed as part of the employment process.

In either instance listed above, a negative dilute result is not an acceptable result; any student who has a negative dilute result on a drug screen is required to repeat the drug screen at their expense within five business days of receiving notification from the dean's office.

Any matriculated student found guilty of an alcohol or drug-related offense, including a Quinnipiac Code of Student Conduct violation, or other conviction that may affect the student's ability to deliver safe, high-quality care, will face sanctions up to and including dismissal from the school. If the confirmed offense involves unlawful possession, use, manufacture, distribution, diversion or improper use of any substances, the sanction is immediate dismissal from the program.

Students who are arrested for an alcohol or drug-related offense and who are matriculated in the Schools of Nursing, Medicine or Health Sciences must notify the appropriate dean of the event, in writing, immediately and no later than the same day the student returns to classes. If the student is enrolled in a clinical or fieldwork course, notification in writing to the appropriate dean is due no later than 24 hours prior to the assigned clinical or fieldwork day. No student with an arrest may attend a clinical or fieldwork experience until cleared by the dean.

A police report of the arrest must also be submitted to the appropriate dean within 10 business days. Students failing to follow the guideline for notification of an arrest and submission of a police report will face sanctions up to and including dismissal from the school.

Procedures

Figure 1: Timing of Drug Screen Requirements

School	Timing of Drug Screen Requirements
School of Medicine	All students – Year 3 before clerkship
	Anesthesiologist Assistant students – Prior to orientation
School of Nursing	Full-time undergraduate students – Prior to the junior year and then annually in July and as required by the clinical site
	Accelerated students – Prior to program orientation and then annually and as required by the clinical site
	Graduate Program: MSN Nurse Practitioner – Prior to program orientation and then annually and as required by the clinical site
	Graduate Program: BSN to DNP Nurse Anesthesia – Prior to program orientation and then annually and as required by the clinical site
	Online Nursing Programs – August 24 prior to beginning fall semester and then annually and as required by the clinical site
	Students matriculating in spring/summer – Prior to beginning spring/summer semester classes and then annually and required by the clinical site
School of Health Sciences	Athletic Training/Sports Medicine – As required by assigned clinical site
	Cardiovascular Perfusion – On entry, recheck prior to start of clinical assignment
	Diagnostic Medical Sonography – Prior to program orientation
	Occupational Therapy – As required by assigned clinical site
	Pathologists' Assistant – As required by assigned clinical site
	Physician Assistant – Between May 13-31 prior to the start of clinical rotations
	Physical Therapy – As required by assigned clinical site
	Radiologist Assistant – Prior to start of clinical assignment
	Radiological Sciences – Required
	Social Work – As required by assigned clinical site

Testing Procedure

The university will designate the approved vendor to conduct drug screens; students are responsible for payment of any fees charged by the vendor. All issues will be reported from the vendor(s) directly to the designee for the dean of the appropriate school. Results from vendors other than those designated by the university to conduct drug screens are not accepted. Incoming and current students must contact the designated vendor(s) and comply with instructions in obtaining a drug screen. Be advised that students should not drink coffee or too many fluids prior to their lab visit as these may cause a negative dilute result. As stated above, a negative dilute result is not acceptable; students with a negative dilute result are required to repeat the drug screen at their own expense.

Laboratory testing includes collection of the sample, transport to the laboratory, EMIT analysis, GC/MS confirmation by a SAM HSA-certified laboratory, and a test review by a medical review officer (MRO), if required. Students need to plan accordingly so that results are available by the deadline set by each school's dean or dean's designate. If results are not available prior to the deadline, the student will risk being dismissed after classes have begun. If results are not available prior to the start of a scheduled clinical experience, the start will be delayed, which may result in forfeiture of the clinical assignment.

Incoming and current students have the right to review the information contained in any drug screen required by the university for accuracy and completeness. A student may request verification of the accuracy of these reports from the designated vendor(s). The designated vendor(s) will advise the student of their rights and assist with verifying the accuracy of the report. It is the responsibility of the incoming or current student to ensure that any misinformation in the initial drug screening report is corrected with the vendor and that a written statement with supporting documentation indicating the correction is submitted to the appropriate dean or dean's designate. The designated vendor(s) are not involved in any decision made by the university.

Drug screening reports and other submitted information are confidential and may only be reviewed by university officials and affiliated clinical or fieldwork facilities with a legitimate educational interest in the material in accordance with the *Family Educational Records and Privacy Act (FERPA)*.

Drug screening reports and other submitted information of incoming and current students are maintained in the designated office in accordance with the university's record retention schedule for student records. Drug screening reports and other submitted information of applicants denied admission into the program are maintained in accordance with the university's record retention policy.

Drug testing required by the Schools of Nursing, Medicine and Health Sciences are conducted utilizing the following measures:

- The student must be tested at a facility of the approved vendor.
- The student must comply with the testing facility's methods and procedures for collecting samples.
- A Fourteen Panel Drug Screen is required, and drug screen cutoffs are consistent with industry standards as determined by the vendor. See Appendix 1. (p. 103)
- Urine testing is the primary method for drug screening.
- Serum, hair and saliva analysis or a combination of these may be tested to further validate or clarify urine results.

- The student will disclose any prescribed and over-the-counter medications, as well as any dietary habits that could modify the testing results to the MRO.
- If there is a positive result for a prescribed medication(s), a medical review officer will contact the student and ask for documentation of the student's prescription. If the MRO determines that the student provided appropriate documentation, the university will recognize the result as a pass. Quinnipiac will not receive a copy of the documentation.
- A student who is required to and submits to a drug or alcohol screening will be expected to authorize the release of the results to the school, other relevant university offices and clinical agencies, if requested. If the clinical site requests that the student send a copy of their drug screen report to that site, the student is responsible for doing so. The clinical site has the right to deny the student the clinical assignment based on the results. If the student refuses to send their results to the site or does not give the school permission to release the results to the site, then the clinical assignment will be forfeited, and the program's policies will apply.
- As per university policy, Connecticut state law permits the use of medical marijuana, however, in accordance with federal law and as a recipient of federal funding, the university does not permit the possession, use or distribution of marijuana. As such, students in possession of medical marijuana (issued in Connecticut or any other state) are not permitted to use or possess marijuana in any form on university owned or leased property, or at any university-sponsored programs, internships, externships or clinical assignments.
- If the accuracy of a positive test is disputed by the student, the student may request a retesting of samples by the facility; the cost of which to be borne by the student. Testing done outside the appropriate window of time will not be considered valid.
- Substance abuse is verified if either: a) the positive test result is not disputed or b) if the student-requested retest is positive.
 - If the test is inconclusive (please see Drug Screen Non-Clearance (p. 102) section for examples of inconclusive test results) or a retest is requested by the agency or by the faculty for cause, the student will not be permitted to conduct fieldwork or clinical until a conclusive negative result is received. The student may be allowed to attend classes while a result is pending, upon the approval of the dean's office.
- Students with samples yielding an invalid result must be re-tested within five business days of receiving notification from the dean's office. The student will be required to complete an alternative method other than urine testing if a second urine dilute result is found.
- The testing facility will make a final report of the test results (positive, negative or inconclusive) to the appropriate dean's office.

Drug Screening Clearance

The names and test results of all students will be forwarded to the reviewer designee for the school. A drug screen clearance will be reported to the appropriate program with the date of the test.

Drug Screening Non-Clearance

Any student who does not receive drug screen clearance will receive an email notification from the dean's office notifying the student that they have not been cleared.

Any student who does not have a negative result after a drug screen will receive an email notification from the dean's office notifying the student that they have not been cleared.

A student who has failed a drug and/or alcohol screening or received an inconclusive test result will be required to repeat the screening and will be responsible for payment of any fees charged by the vendor(s) for such testing. An inconclusive test result is based upon, but not limited to the following examples: a negative dilute urine screening, a test deemed invalid by the vendor MRO, and inability of the student to provide a sample. Students must be re-tested within five business days of receiving notification from the dean's office. If a second invalid/inconclusive result is found, the student is required to complete an alternative method other than urine testing. The student may be allowed to attend clinical training or fieldwork with the permission of the clinical site, and to attend classes while a result is pending, upon approval of the dean's office. If the student does not have a negative result after a third drug screen, the student will not be permitted to continue with their clinical experience or didactic coursework and will be dismissed from their program, pending the outcome of an appeal.

Appeal Process

Any student who does not have a negative result after a third drug screen will receive notification by email from the dean's office within five business days. Students are required within five business days of the emailed notification to schedule a time to discuss the findings with the appropriate dean/designee. Following that meeting, the student will be notified of the dean's decision within five business days regarding whether the student may begin or continue their program or be dismissed from the program in which they are enrolled.

Any student who is not admitted or who receives a letter of dismissal for a positive drug screen may elect to proceed to the appeals process.

The appeal must be made by the student in writing within five business days of the emailed notification of dismissal by the dean's office. It is the student's responsibility to initiate the appeal process by emailing a written appeal to the dean. The dean's office will schedule a meeting of the Drug Screen Review Committee within 14 business days of receipt of the appeal request and will notify the student of the meeting date. Students currently enrolled and attending classes will be permitted to attend classes but will not be permitted to begin or continue clinical or fieldwork experiences until the Drug Screen Review Committee has made a final decision.

Once a final decision is made regarding the student's appeal, the Drug Screen Review Committee will notify the student by email. The dean's office will copy all related correspondence to the chair and/or program director.

The decision of the Drug Screen Review Committee regarding the ability of an incoming student or current student to enter or continue in the program is final and cannot be appealed. The Office of Admissions and appropriate programs will be notified of the decision.

Drug Screen Review Committee

A Drug Screen Review Committee will be convened with the assistance of a representative of the dean's office. Members of the Drug Screen Review Committee will include representation from, but not limited to, the following offices:

- Dean of the school in which the student is enrolled
- Admissions
- Student Affairs

- Academic Affairs
- Finance (if applicable)

A careful review of the self-reported information in the applicant/current student's file will occur. This review will include:

- Information in the drug screen report/s
- Relevant supplementary materials obtained from the applicant/current student and from other sources including medical records provided by the applicant/current student
- Institutional policies and procedures

Factors considered in reviewing an individual case may include, but are not limited to:

- The accuracy of the information provided by the student in their application materials
- The relationship between the duties to be performed as part of the educational program and the offense committed
- Relevant medical history

Any incoming or current student who is referred to the Drug Screen Review Committee has the right to appear before that committee to contest or explain the findings from the drug screens.

A student appearing before the Drug Screen Review Committee will not be permitted to have legal representation, parents, family members, or students or faculty from the Quinnipiac University School of Law at the appeal hearing. A student may request, in writing, to have an adviser assigned by the dean. If a student requests an assigned adviser and then refuses this adviser, no further advisers will be assigned. An adviser may assist the student in preparing for the appeal but may not attend the appeal.

Maintenance of Records and Confidentiality

Information obtained for the purpose of conducting a drug screen or obtained during the drug screen will be retained by the Office of Student Affairs, separate from other student educational and academic records. Confidentiality will be maintained consistent with FERPA guidelines. In the event a clinical site requires a copy of any report, students must either email a copy of their report themselves to the requesting facility or sign a release form for the vendor(s) who will submit the report to the email address of the person authorized to receive it.

Appendix 1: Drug Screen Cutoffs Certiphi

Urine Drug Screen	Screen Cutoff	GC/MS Cutoff
Amphetamines	1000	500
Barbiturates	300	200
Benzodiazepines	300	300
Cocaine	300	150
Methadone	300	300
Methaqualone	300	300
Opiates	300	300

Appendix 2: School of Nursing Appendix

Revised -7.20.2018 Revised - 9.6.2019 Revised - 8.6.2020

Refers to Policy Statement – paragraph two (p. 100)

Improper use of alcohol or other unauthorized substances will result in immediate removal from clinical or fieldwork and is cause for termination from the program.

Refers to Testing Procedure number 12 (p. 100)

If a student's drug screen is reported as "inconclusive," the student needs to repeat the test at their own expense. If a student is unable to produce a sample, or fails to comply with all posted and verbal instructions at the lab site, the student is required to retest at their own expense.

Refers to Testing Procedure number 13 (p. 100)

Any student who does not receive drug screen clearance will receive an email notification from the dean's office within seven business days of receiving that report notifying the student that they have not been cleared. The student is required to complete an alternative method other than urine testing if a second urine dilute result is found. This testing must be completed within five business days of receiving notification from the dean's office. The SON has determined that the alternative method of testing for the student in this situation will be a 10 panel serum drug screen test (noted below) in conjunction with a repeat 14 panel urine test. The student is responsible for payment of any fees charged by the vendor(s) for such testing. Should either test yield a positive result, which would include another negative dilute urine drug screen, the student will be dismissed from the program. The student may appeal this decision to the dean of the School of Nursing (see Appeal Process (p. 103) in the policy).

10 Panel Serum Drug Screen

Drug	Screen Cutoff	GC/MS Cutoff

Propoxyphene	300	200

Testing for Cause

A student will be required to undergo drug or alcohol testing for cause when a School of Nursing faculty member, in consultation with program chair and the dean's office, determines there is reasonable suspicion that the student is impaired due to illegal drug or alcohol use, or the use or misuse of prescribed or over-the-counter medications based upon, but not limited to the following examples: unusual or aberrant behavior or patterns of abnormal or erratic behavior; physical symptoms of impairment; arrest or conviction for a drug or alcohol related offense; evidence of drug tampering, drug diversion, or misappropriation; direct observation of drug use or discrepant drug counts; alterations in student clinical, laboratory, fieldwork, and/or didactic performance that may not be attributed to other causes following a work-related injury or illness, with evidence that it may have been related to use of a controlled substance; observation of poor judgment or careless acts which caused or had the potential to cause patient injury, jeopardize the safety of self or others, or resulted in damage to equipment.

In drug and alcohol testing for cause cases, the cost of any required drug or alcohol testing will be borne by the School of Nursing at a facility chosen by the School of Nursing. A student who refuses to submit to testing will be regarded as having voluntarily relinquished their fieldwork or clinical responsibilities. Any attempt to delay, hinder, or tamper with any testing or to alter the results of testing will be considered a refusal to submit to testing and will be considered in violation of this policy and cause for dismissal from the program.

Falsification or omission of information or any attempt to delay, hinder, falsify or tamper with any testing, re-testing or results will be considered a refusal to comply with this policy. Failure or refusal to comply with the Drug Screen Policy will be grounds for disciplinary action including filing a violation report to University's Academic Integrity Board, notification of the Office of Student Conduct and/or dismissal from the program.

Final Examination Policy

Insofar as is practicable, a final examination is regarded as part of the regular work for undergraduate courses. In courses for which a final examination would serve no useful purpose, a term report, essay or personal conference may be substituted; work on the substitute exercise may take place during the final examination period.

Final examinations may be given only during the final examination period at the end of each term. Examination schedules are prepared and distributed by the Registrar. Faculty members may exempt from the final examination students whose work is of high quality. Conditions governing exemptions are determined by the department of the school/college/division concerned. No final examination may be held in the

week immediately preceding the official examination period. This does not exclude the giving of written lessons, quizzes or papers when such exercises form a regular part, week by week, of the work of the course. Faculty members must provide an opportunity for students to review their examination.

Students are expected to take no more than two final exams in one day.

- a. If a student has three regularly scheduled examinations in one day and one of these is a common or department exam, the department exam takes precedence.
- b. Second preference is given to an examination scheduled in the 6 p.m. to 10:15 p.m. time block.
- c. In the event that a student has three examinations scheduled in one day, it is the responsibility of the instructor scheduled for the latest day examination time (between 8 a.m. and 5:30 p.m.) to provide the make-up examination.
- d. In all cases, the common or department examination will take precedence.

If any students require a make-up exam, it is the faculty member's responsibility to administer it. Arrangements may be made between the faculty and the student, or it may be administered during the make-up exam period.

(The final exam schedule, including the designated make-up period, for each semester is posted on MyQ.)

Grievance Policy

The Quinnipiac University Grievance Policy is an umbrella policy to cover any type of grievance that is not considered under a separately defined policy. Redress for any grievances covered by the following policies must be pursued according to the procedures specified in those policies.

- Appeal of an academic suspension or academic dismissal (p. 60) from the university
- Appeal of an academic suspension or academic dismissal from an individual degree program (individual program requirements as stated in the University Catalog)
- Appeal of a final grade (p. 110)
- Appeal of an academic integrity (p. 62) sanction
- FERPA complaints (p. 120)
- Appeal of a student conduct sanction (Undergraduate Student Handbook (<http://catalog.qu.edu/handbooks/undergraduate/>) and Graduate Student Handbook (<http://catalog.qu.edu/handbooks/graduate/>))
- Appeal of the decision to return after an involuntary medical leave of absence (p. 107)
- Grievance procedure for issues regarding disabilities (p. 86)
- Complaints of inappropriate noise (Undergraduate Student Handbook (<http://catalog.qu.edu/handbooks/undergraduate/university-policies/noise/>) and Graduate Student Handbook (<http://catalog.qu.edu/handbooks/graduate/university-policies/policy-statement-noise/>))
- Title IX Discrimination and Harassment (Title IX Policy (p. 121))
- Financial aid appeal (financial aid website (<https://www.qu.edu/paying-for-college/>))

When a student has a complaint not covered by one of the above policies and procedures, the student is encouraged to discuss the matter first with the parties involved. If the matter cannot be resolved informally at

this level, then the student may file a written, formal complaint according to the following procedures.

A student grievance originating in any of the school or administrative units is handled by the chair or director responsible for the unit in which the grievance originates. Therefore, the written formal complaint should be submitted to the responsible chair or director within five business days of the failed attempt at an informal resolution. The chair or director should make a decision regarding the grievance within 10 business days of receiving the written complaint. A written appeal may be submitted within five business days either to the school dean exercising jurisdiction over that academic department or to the vice president/dean of students or designee for non-academic matters. The dean will inform the student within 10 business days of their decision. The dean's decision is the final decision. Quinnipiac does not permit retaliation of any kind against students for good faith reports of grievances.

Grievance Procedures for Students Enrolled in Distance Education under the State Authorization Reciprocity Agreement (SARA)

Pursuant to federal regulations, students enrolled in distance education (i.e., Quinnipiac's online classes or online programs) who are residents of states (other than Connecticut) that participate in SARA, may file a complaint to the Connecticut Office of Higher Education (OHE) after exhausting their options under Quinnipiac's grievance procedures. Note that issues regarding student life, such as discipline, grading, etc., fall solely within the purview of Quinnipiac and are not generally investigated. Additionally, the Office of Higher Education does not investigate anonymous complaints or provide legal advice.

Information about how to file a complaint with the Office of Higher Education is available on this website: ctohe.org/SARA/Default.shtml (<https://www.ctohe.org/SARA/Default.shtml>)

All correspondence, including institutional applications and student complaints, should be sent via email to ctsara@ctohe.org or via post to the following address:

SARA Coordinator
Office of Higher Education
450 Columbus Boulevard, Suite 510
Hartford, CT 06103-1841

Discrimination, Discriminatory Harassment, and Bias-Motivated Acts and Behavior Policy

Purpose of this Policy

The purpose of this policy is to promote an environment of mutual learning and respect at Quinnipiac University ("Quinnipiac" or "university"), and to clearly define prohibited behaviors that are contradictory to the university's commitment to inclusive excellence.

Discrimination, Discriminatory Harassment, and Bias-Motivated Acts and Behavior

Quinnipiac University values diversity, multiculturalism and respect for others. The university is committed to providing a safe and respectful educational experience and work environment free from discrimination and harassment on the basis of an individual's race, color, religion, gender, age, marital status, national origin, ancestry, alienage, physical or mental disability, sexual orientation, gender identity or expression, genetic information or any other characteristic protected by law. Students, faculty and staff are expected to adhere to a standard of conduct that is respectful of the rights of all parties.

Accordingly, the following behaviors are prohibited and will not be tolerated at Quinnipiac:

Discrimination: Conduct or speech that denies an individual participation in or access to the benefits of a university program or activity, or adversely affects an individual in the terms, conditions or privileges of the individual's employment, because of the person's race, color, religion, gender, age, marital status, national origin, ancestry, alienage, physical or mental disability, sexual orientation, gender identity or expression, genetic information or any other characteristic protected by law.

Discriminatory Harassment: Conduct or speech that is:

- a. based on race, color, religion, gender, age, marital status, national origin, ancestry, alienage, physical or mental disability, sexual orientation, gender identity or expression, genetic information or any other characteristic protected by law; and
- b. sufficiently serious that it unreasonably interferes with an individual's work performance, terms or conditions of employment, or participation or ability to benefit from a university program, or creates an intimidating, hostile or offensive environment for study, work or social living.

To qualify as harassment under this policy, the speech or conduct must be considered to be harassment by the listener/observer(s) and be objectively severe or pervasive enough that a reasonable person would agree that the speech or conduct constitutes harassment. In determining whether reported speech or conduct qualifies as harassment under this policy, the university will consider all circumstances surrounding the reported incident(s), including, without limitation, the frequency, location, severity, context and nature of the speech or conduct, including whether the speech or conduct is physically threatening or humiliating, rather than a merely offensive remark. The university may also consider the intent of the alleged party/parties.

Bias-Motivated Acts and Behaviors: An expression of hostility against the person or property of another, which reflects bias against a legally protected identity and contributes to or creates an unsafe or unwelcoming environment.

For the purpose of this policy, bias is defined as the personal, unreasoned judgment or attitude that inclines an individual to treat someone negatively because of the individual's actual or perceived race, color, religion, gender, age, marital status, national origin, ancestry, alienage, physical or mental disability, sexual orientation, gender identity or expression, genetic information or any other characteristic protected by law.

Bias-motivated acts and behaviors may be verbal, graphic and/or physical in nature. Incidents may qualify as bias-motivated acts or behavior even when delivered with humorous intent or presented as a joke or a prank.

Examples of bias-motivated acts and behaviors may include:

- Use of an identity-related slur in the presence of, or in communication with, one or more parties
- Mimicking or mocking an individual or group based on their legally protected identity (e.g., appearing in blackface)
- Creating derogatory graffiti or images/drawings related to a legally protected identity
- Imitating someone with a disability or imitating a cultural norm or practice
- Making jokes or using stereotypes when talking to someone

Hate Crimes: Hate crimes are a type of bias-motivated act or behavior in which the conduct constitutes a criminal offense against persons or property. Hate crimes are defined by Connecticut law and must be reported to the Quinnipiac University Department of Public Safety.

Scope of this policy

This policy applies to all members of the Quinnipiac University community, including students, faculty and staff, as well as applicants to any university program. This policy extends to all aspects of the university's educational programs, including academic, nonacademic and extracurricular activities. This policy applies to speech and conduct that occur on campus, off campus or online, where such conduct may endanger the health, safety and welfare of the Quinnipiac University community and/or adversely affect the university and its goals and objectives.

Protection Against Retaliation

Quinnipiac University will not tolerate retaliation against persons who report or charge discrimination, harassment or bias-motivated acts or behavior, or against those who testify, assist or participate in any investigation, proceeding or hearing involving a report of discrimination, harassment or bias-motivated acts or behavior.

Retaliation is speech or conduct that targets an individual or group because of their participation in a procedure related to this policy, where such conduct adversely impacts participation in a university program or activity and/or terms or conditions of employment.

Reporting Discrimination, Harassment and Bias-Motivated Acts or Behavior

Quinnipiac University encourages the reporting of all perceived incidents of discrimination, harassment or bias-motivated acts or behavior. Upon receiving a complaint of discrimination, harassment or bias-motivated acts or behavior, the university will conduct a prompt, thorough and impartial investigation into the allegations.

Complaints of discrimination, harassment or bias-motivated acts or behavior **against students** or registered student organizations will be addressed pursuant to the Student Code of Conduct.

Individuals reporting incidents pertaining to this policy should contact:

Dennis Kwarteng

Title IX Coordinator

275 Mount Carmel Avenue, CCE-180

Hamden, CT 06518

dennis.kwarteng@qu.edu

203-582-7327

Title IX Coordinator

275 Mount Carmel Avenue, CCE-180

Hamden, CT 06518

dennis.kwarteng@qu.edu

203-582-7327

Complaints of discrimination, harassment or bias-motivated acts or behavior **against employees** will be addressed by the Office of Human Resources or designee, pursuant to established policies and procedures.

Individuals reporting incidents pertaining to this policy should contact:

Anna Spragg

Office of Human Resources

554 Mount Carmel Avenue

Hamden, CT 06518

anna.spragg@qu.edu

203-582-7722

Upon completing the investigation, the university will take appropriate action, consistent with the results of the investigation. Disciplinary action may be taken against students, faculty or staff who violate this policy, up to and including dismissal from the university or termination of employment.

Quinnipiac University reserves the right to investigate circumstances that may involve discrimination, harassment or bias-motivated acts or behavior in situations where evidence suggests that discrimination, harassment or bias-motivated acts or behavior may have occurred, regardless of whether or not a formal complaint has been made.

Complaints of Discrimination and Harassment

This policy addresses speech and conduct that may be the subject of a disciplinary investigation.

The university complies with all federal and state laws regarding non-discrimination. The university does not discriminate on the basis of race, color, religion, gender, age, marital status, national origin, ancestry, alienage, physical or mental disability, sexual orientation, gender identity or expression, genetic information or any other characteristic protected by law.

If a student, faculty or staff member or other participant in a university program feels they have been discriminated against or harassed on the basis of sex or gender, they are encouraged to contact the Title IX coordinator. Complaints of sex or gender-based discrimination will be addressed pursuant to Quinnipiac's Title IX Policy Against Gender-Based Discrimination and Sexual Misconduct.

If a student, faculty or staff member or other participant in a university program feels they have been discriminated against or harassed on the basis of another protected characteristic, they are encouraged to contact:

Dennis Kwarteng

Inclement Weather Policy

It is Quinnipiac's policy to remain open under adverse weather conditions such as snowstorms, so that the university can meet its responsibilities to all of its students. Occasionally, weather conditions will prompt the university to delay, cancel or postpone classes or move to fully remote instruction. There are also times when the university closes because of adverse weather conditions.

It is ultimately the responsibility of the individual to determine whether it is safe to travel to and from the university. Staff members who are concerned about their safety or who have additional personal responsibilities resulting from a weather-related closing can use personal or vacation time when the university remains open. Staff members are required to notify their supervisors if they plan to use personal or vacation time.

Faculty members are expected to teach all classes when the university is open, and students are expected to attend them. Faculty members should communicate with students via Blackboard in a timely manner and transition to remote learning when extreme conditions prevent them from meeting a scheduled class in person.

Employees who are deemed essential staff are required to report to work regardless of whether the university is closed.

Information related to cancellation and closing is carried by the following university-affiliated media and resources:

QU Mobile Wireless Emergency Text Message System

Leaves of Absence

General Policies and Conditions for All Leaves

Leaves of absence are defined as a temporary separation from the university. Leaves of absence cannot be granted retroactively.

At the conclusion of the leave of absence, the student receives automatic readmission to the university. The granting of a leave of absence guarantees readmission to the academic program in which the student is enrolled when applying for a leave and permits the student to graduate by complying with the degree program requirements in effect when the leave is taken, provided that the courses are still offered. If requirements for graduation are changed after a student is first admitted to Quinnipiac, the

student can choose to follow either the former or the new requirements. During the leave of absence, Quinnipiac retains the student's deposit until completion or withdrawal.

Leaves of absence are not granted for the purpose of allowing a student to study at another university. In general, courses taken at another institution while a student is on a leave of absence will not be transferred in for credit at Quinnipiac.

If a student takes a leave of absence and later is suspended, dismissed, placed on warning for unsatisfactory academic performance (including academic integrity sanctions), or suspended or expelled as the result of a conduct decision, the sanctions take precedence over the leave of absence and stand as a matter of record. Any academic warning becomes operative at the time of return to the university. An involuntary medical leave of absence takes precedence over a voluntary leave of absence and the student must comply with the terms of the medical leave.

Academic Leaves of Absence

Academic (non-medical) leaves of absence may be arranged for one or two semesters subject to departmental and school approval. Students may request a leave using the university's electronic Leave of Absence form (<http://forms.quinnipiac.edu/LeaveOfAbsence/form.html>).

Students who do not return after the specified leave of absence period will be administratively withdrawn and will be required to reapply for admission to return to the university. In such instances there is no guarantee of readmission to the university and to the academic program in which the student was enrolled prior to the leave of absence.

Medical Leaves of Absence

Students who wish to withdraw from the university during an academic term for medical reasons (i.e., physical or mental health conditions that necessitate their absence), may request a medical leave of absence.

The student should provide supporting documentation of the medical condition from their treating provider to the associate dean of students for health and wellness or designee, who will review the documentation. A medical leave of absence may be granted for one or two semesters. Students may request a leave using the university's electronic Leave of Absence form (<http://forms.quinnipiac.edu/LeaveOfAbsence/form.html>).

Students who do not return after the specified leave of absence period will be administratively withdrawn and will be required to reapply for admission to return to the university. In such instances there is no guarantee of readmission.

Upon conclusion of the medical leave, the student must provide supporting documentation from their treating physician to the associate dean of students for health and wellness or designee. This documentation will be shared with the appropriate university staff, including the university's consulting medical professional, if warranted. The student will be advised of the outcome of this review and whether they are approved to return, with reasonable accommodations if applicable.

Military Leaves

Procedures for students taking military leave will be administered under the guidelines noted in volume 2 of chapter 3 of the Federal Student Aid Handbook (<https://fsapartners.ed.gov/sites/default/>

<files/2021-03/2021FSAHbkVol2Ch3.pdf>). Students who have been called to active duty can choose one of the following options:

- a. The student may withdraw from courses with a full tuition refund or tuition credit, in accordance with institutional and federal government guidelines.
- b. If a student has completed at least 50 percent of the coursework and upon recommendation of the student's dean, the student may elect to take "incompletes" and make special arrangement for course completion with individual instructors.

Students needing to take a military leave should contact the director of veteran and military affairs at 203-582-8867.

Students are eligible to return within five years following military service. However, the degree requirements may have changed, and they may be required to comply with degree program requirements in effect at the time of their return to the university.

Policy Statement on Photography and Recording

Quinnipiac University reserves the right to photograph and record (by use of still, video, audio or other medium) students, staff and faculty members on campus, at university-sponsored functions and events, and wherever university business is taking place. Quinnipiac University reserves the right to use, broadcast, distribute and/or publish any part of such images, likenesses, voices, appearances and/or performances for promotional, advertising, educational, social media or other purposes via printed materials and/or digital media.

Pregnant and Parenting Students Policy

Quinnipiac University is committed to creating an accessible and inclusive environment for pregnant and parenting students, where all individuals enjoy freedom from discrimination, including discrimination on the basis of sex, as defined by the Title IX of the Education Amendments of 1972. Sex discrimination, which can include discrimination based on pregnancy, marital status, or parental status, is prohibited and illegal in admissions, educational programs and activities, hiring, leave policies, employment policies, and health insurance coverage.

Students interested in obtaining an accommodation are encouraged to reach out to the Title IX coordinator to learn about their rights as pregnant or parenting students.

The university Title IX coordinator is:

Dennis Kwarteng, Title IX Coordinator

275 Mount Carmel Avenue, CCE-180, Hamden, CT 06518

dennis.kwarteng@qu.edu

203-582-7327

Reasonable Accommodations

Students have a right to reasonable accommodations for conditions related to pregnancy and parenting. The term "pregnancy" may include prenatal care, and childbirth or recovery from childbirth. The term

“parenting” refers to the postpartum period following childbirth and is interpreted to include the first year following pregnancy.

A reasonable accommodation is a modification that allows a pregnant or parenting student to benefit from a program or activity, where such an accommodation does not constitute a substantial change or fundamental alteration to an essential element of a course or program or pose an undue burden on the university. Accommodations may include, but are not limited to, leaves of absence, excused absences, modified class schedules, lactation accommodations, and alternative testing options.

Lactation Accommodations

A student may, at their discretion, express breast milk or breastfeed on campus, as needed. While individuals are not prohibited from breastfeeding in public spaces, the university will make reasonable efforts to provide a room or other location where the employee can express milk in private.

Information about lactation rooms is available at myq.quinnipiac.edu/Welcome/HR/LivingWell/Pages/LactationCenter.aspx (<https://myq.quinnipiac.edu/Welcome/HR/LivingWell/Pages/LactationCenter.aspx>)

How to Request an Accommodation

You may make a request for an accommodation in writing to the Title IX coordinator. A request for an accommodation should include:

- an explanation of why the person making the request requires an accommodation
- a description of the requested accommodation
- the expected duration of the accommodation (e.g., start and end dates)

Students who have a temporary disability caused or contributed to by pregnancy are not required to notify Quinnipiac University of their pregnancies. If students do not want to request a reasonable accommodation due to pregnancy they may request an accommodation pursuant to the Students with Disabilities Policy (p. 86).

Coordinating an Accommodation Under the Pregnant and Parenting Students Policy

Upon receipt of an accommodation request, the Title IX coordinator will schedule a meeting with the student making the request. A professor may also be present for this meeting to provide course-related guidance during the interactive process.

During the meeting, the student will discuss their request and all parties will discuss potential accommodation options.

If the Title IX coordinator determines that the accommodation request is not reasonable or would not be effective, parties will discuss other alternative accommodations. While students have a right to participate in a good faith interactive process, they do not have a right to a specific accommodation or to a preferred accommodation.

Approval Process

The Title IX coordinator will assist students in determining whether an effective and reasonable accommodation exists. The university may

request medical documentation from a health care provider to assist in the interactive process of determining an appropriate accommodation.

If an accommodation is approved, the university will send a written notification of approval to the student. This notification will include a summary of the accommodation and the duration of the accommodation.

If a specific accommodation request is denied, the university will provide an explanation for the denial.

Appealing a Denial for an Accommodation

Students who disagree with the accommodation decision may submit an appeal letter to the vice president for academic innovation and effectiveness.

An appeal may be made on the following bases:

- The student was not provided access to an interactive process
- A party involved in determining the reasonable accommodation had a bias or conflict that materially impacted the outcome of the interactive process

The appeal letter must include a summary of the requested accommodation and the grounds for appeal. The vice president for academic innovation and effectiveness or designee shall review the appeal and issue a decision within 10 business days.

If upon review, the vice president for academic innovation and effectiveness or designee determines that the appeal letter does not raise sufficient grounds for appeal, the appeal will be dismissed.

If upon review, the vice president for academic innovation and effectiveness or designee determines that the appeal letter does bring forth sufficient grounds for appeal, the vice president for academic innovation and effectiveness or designee may:

- Affirm the decision of the Title IX coordinator, upholding the denial;
- Approve the requested accommodation;
- Commence a meeting with the student and other necessary parties, for the purpose of reconsidering the accommodation request.

Modification of Accommodation

If a student needs to modify an accommodation, they should notify the Title IX coordinator in writing.

Absences Related to Pregnancy and Parenting

While the university will not assume that a pregnant student cannot attend school or participate in school activities, absences due to pregnancy or childbirth shall be excused for as long as is deemed medically necessary by the student's doctor.

Where possible, a student should make an accommodation request for an excused absence in advance of the missed class. Students may make up work they missed while out due to pregnancy or any related conditions, including recovery from childbirth. If a professor awards “points” for class attendance, students must be given the opportunity to earn back the credit from classes missed because of pregnancy.

Class Attendance and Participation in Activities

Pregnant and/or parenting students will not be prevented from attending class on the basis of pregnancy. As such, pregnant or parenting students may continue participating in activities and programs outside of class such as sporting, extracurricular activities, labs and career rotations.

Scholarships

The university will not terminate or reduce athletic, merit or need-based scholarships because of pregnancy or parenting.

Procedure to Appeal a Final Grade

Approved by the Faculty Senate in Spring 2019

This procedure is predicated on the assumption that instructors are always the most appropriate judges of how students perform academically. Therefore, this appeal process applies only in cases in which a student believes their final course grade was determined in an arbitrary, capricious or prejudicial manner. Only final course grades may be appealed. Failure of—or dissatisfaction with—a course, are not sufficient grounds to appeal a final grade.

Arbitrary, capricious or prejudicial grading is defined as:

- a. **Arbitrary:** A final course grade assigned on some basis other than performance in the course.
- b. **Capricious:** A final course grade assigned by a substantial, unreasonable or unannounced departure from the instructor's previously articulated grading standards and/or university policy.
- c. **Prejudicial:** A final course grade assigned by resorting to standards different from those that were applied to other students in that course.

In such a situation, the student must first try to resolve the matter with the instructor who assigned the grade. Students may not contact clinical preceptors/instructors, fieldwork supervisors, or internship supervisors to discuss or appeal a final grade. If a student in clinical/fieldwork course has questions regarding to whom the grade appeal should be submitted, the student should contact the program director.

To initiate a grade appeal, the student must submit a completed written grade appeal request form (available at the Registrar's Office MyQ page (<https://myq.quinnipiac.edu/Campus%20Offices/Registrar/Pages/default.aspx>)) to the course instructor within the fifth business day after date when final grades are due (see Academic Calendar in the Catalog to confirm the date). This written grade appeal request must include a description of why the student believes their final grade was determined in an arbitrary, capricious or prejudicial manner, and all relevant evidence (e.g., course syllabus, exams, projects, etc.). The department chairperson should be copied on the initial written request to the instructor, so that they can follow up if necessary. The instructor will provide the student with a written decision within five business days.

If the matter is not resolved to the student's satisfaction, the student may submit their written grade appeal request form to the chair of the department offering the course (or their designee) within two business days of receiving the faculty member's decision. The chairperson then has five business days in which to consult with the student and instructor, seek to mediate a mutually agreeable solution, and provide the student with a written decision. If the matter is not resolved to the

student's satisfaction, within two business days, the student may submit to the associate dean of the school/college offering the course (or designee) a written request for the formation of an appeal committee. This written request must be accompanied by a copy of the student's grade appeal request form, the instructor's written response and the chair's written decision.

Within five business days of receiving the written request, the associate dean (or designee) will appoint a three-member faculty committee composed of two individuals from within the department offering the course and a full-time faculty member of the student's choosing. The student must secure the participation of the full-time faculty member and provide the associate dean with written confirmation of the faculty's willingness to participate on the grade appeal committee. As this grade appeal procedure does not apply to the School of Law, law faculty may not serve on a grade appeal committee.

In the absence of a student preference, the associate dean will appoint the third faculty member from another department or another program within the college or school. If the associate dean is unable to appoint two faculty members from within the department, they will appoint two or more faculty members from outside the department. The faculty member assigning the grade and the chairperson may not participate in this decision process. The associate dean will provide the appeal committee with copies of the student's written grade appeal request, along with the instructor's and chair's written responses.

Within five business days, the appeal committee will consult with the student and instructor, review the evidence, and forward to the associate dean a written final determination of whether the committee by a majority vote affirms the final grade in the course or requires its recalculation by the course instructor, with chairperson oversight. This determination will be based on whether there is evidence that the final grade was determined in an arbitrary, capricious or prejudicial manner. After the instructor submits to the chairperson the recalculated grade, the chairperson will document the nature and date of any changes and forward the documentation to the associate dean. The associate dean will notify the student, instructor, and chairperson of the final resolution and if applicable, notify the registrar's office of the recalculated grade.

If the grade appeal process results in a recalculated grade, and the recalculated grade removes an academic deficiency that was preventing the student from progressing in their program or to the next sequential course, the student may continue to progress in the program/to the next course. Recalculated grades may not be appealed.

Special Circumstances:

If the chairperson is the instructor who assigned the grade, the student will contact the associate dean after failing to resolve the matter with the faculty member. If the associate dean is the instructor who assigned the grade, the student will contact the chairperson after failing to resolve the matter with the instructor. If the chairperson is unable to mediate a mutually agreeable resolution, within two business days of receiving the chairperson's response the student may submit to the dean of the school/college offering the course (or designee) a written request for the formation of an appeal committee, as described above.

If the instructor who assigned the final grade is no longer a Quinnipiac University employee (and therefore unavailable), the above process begins with the chairperson.

If a student does not receive a final course grade by the date grades are due, but on a later date, the student may submit a completed written

grade appeal request form to the course instructor, with a copy to the department chairperson, within the fifth business day after the date on which the grade is posted or the hold on the student's record is cleared.

The deadlines and timeframes for courses that do not follow the standard Academic Calendar may vary and be determined on a case-by-case basis.

The grade appeal process for the First-Year Writing (FYW) program follows a different procedure that allows for a re-evaluation of a student's portfolio of writing; please contact the coordinator directly for additional information. If the FYW appeal does not resolve the issue, the student then has the option to proceed with the above Procedure to Appeal a Final Grade, beginning with the College of Arts and Sciences associate dean.

Repeat of Courses with Grade of F, D or C-

A student who fails a required course must repeat that course. When the student earns a passing grade for the failed course, that grade and those credits are calculated in the student's cumulative average. The student's transcript will continue to display the failed course as part of the student's complete academic record. A student who fails an elective course may repeat that course to earn a passing grade. The passing grade and credits become part of the student's cumulative GPA; the record of the failing grade remains on the transcript.

Though the D grade normally is a passing grade, it is the prerogative of each department to set higher grade requirements in certain major courses. When such departmental requirements exist, students are so informed by their respective departments.

Courses with C- or D grades may be repeated only if the course is a foundation for further study or meets a specific graduation requirement. If a C- or D grade is repeated, no credits are added, but the most recent grade in the course applies.

Speaker Policy

Updated March 2021

Purpose of this Policy

The purpose of this policy is to protect opportunities for the full and free expression and exchange of ideas while ensuring the safety of the campus community.

Speaker Policy

Quinnipiac University seeks to foster a powerful learning environment where faculty are encouraged and supported to teach and research the most innovative ideas, and students are encouraged to engage in intense dialog and debate. This learning environment is enhanced by a diverse community comprising individuals from varied backgrounds, and with a multitude of viewpoints that may be controversial, uncomfortable to hear, or foreign to listeners' experiences. As part of our educational mission, it is the role of the university to bring such speakers into the learning environment so that the community hears, is challenged by, and challenges a broad range of ideas from a diverse set of speakers. Critical to achieving these aims is the expectation that all members of the university community will conduct themselves with truthfulness, openness to new ideas, and consideration for the individual rights of

others, including the right to hold, hear, consider or condemn opinions different from one's own views, or life experiences.

An invitation to speak at Quinnipiac does not include any license for unlawful activity, or for any activity that endangers or threatens to endanger the safety of members of the community or the campus physical facilities, or for any activity that disrupts or obstructs the functions of the university or threatens such disruption or obstruction. In the event that an invited speaker's presence raises concerns that their appearance might endanger personal safety or result in damage to facilities, a committee with representation from Academic Affairs, Student Affairs, the Faculty Senate, Public Safety and Facilities will be convened to make an assessment and advise the Management Committee. The Management Committee has final authority on invited speakers.

Nothing in this policy restricts the existing rights of Quinnipiac faculty, staff and students to fully express their ideas and opinions in accordance with university policy. However, each is expected to adhere to high standards of civility and respect in so doing.

Scope of this Policy

This policy pertains specifically to **non-university** speakers invited by Quinnipiac faculty, staff or student groups to non-class events on campus.

Student groups must consult with the dean of students, or designee, concerning the qualifications and appropriateness of the proposed speaker.

Use of the university's facilities in no way implies endorsement by the university of the views and opinions of speakers or event organizers.

To ensure that they are "permitted activities," political activities must be referred in advance to the appropriate office. The appropriate office will respond within one week.

- Faculty: Office of the Provost
- Staff: Office of Public Affairs
- Students: Office of the Dean of Students

Other applicable policies include the university's Event Management Rules and Regulations (<https://myq.quinnipiac.edu/Campus%20Offices/Public%20Affairs/Special%20Events%20Office/Pages/EventManagementRulesandRegulations.aspx>).

Payment of Honoraria, Transportation and Lodging for Speakers

Speakers from outside our university serve as important resources for our community as they share expertise and points of view across various disciplines and social issues. In most cases, the expectation is that the university will cover an external speaker's travel and lodging costs without additional remuneration. In less frequent cases, there may be speakers who are of high interest and value to the student, faculty and staff community who will not present without an honorarium. In this case, an honorarium of up to a maximum of \$5,000 may be considered, noting that this will be done infrequently, and that the general policy will be that most speakers will present without an honorarium, regardless of source of funds. Exceptions to pay more than \$5,000 for a speaker will be rare, submitted for consideration on a case-by-case basis to the management committee. Any exception requests should include a written explanation of the academic, educational and/or programmatic benefits/outcomes

the speaker will bring to the university. Speaking honoraria are separate from consulting or training fees that may be offered by outsiders.

Student Exposure Control Plan for Bloodborne and Airborne Pathogens

Updated September 2021

Approved policy for Quinnipiac University students who incur an accidental exposure to human blood (or other potentially infectious materials), or who may be exposed to airborne pathogens (e.g., the tuberculosis bacterium, SARS-CoV-2) while participating in a course/university-related activity (e.g., a laboratory, clinical training, athletics, etc.).

Please reference the Student Incident Policy (accident and injury) (p. 117)

Please reference the Student Incident Report Form (to be completed by student) (<http://forms.quinnipiac.edu/IncidentReportForm/form.html>)

Background Information

The university recognizes that some students, in their coursework, clinical practicums or other university-related activities, may accidentally be exposed to another person's blood/body fluids (including airborne droplets) through various activities such as an athletic injury, a needle puncture wound, a surgical accident, or caring for a patient who has tuberculosis. Exposure to human blood and certain body fluids (semen, vaginal secretions, cerebrospinal fluid, any body fluid containing visible blood and unfixated tissues) may put these students at risk of contracting a bloodborne pathogen. The major bloodborne pathogens are: hepatitis B virus (HBV), hepatitis C virus (HCV) and the human immunodeficiency virus (HIV). Exposure to airborne droplets from a patient with tuberculosis (coughing, sneezing) puts the students at risk of contracting tuberculosis. Students who have exposure to the droplets of patients with COVID-19, pertussis and meningococcal meningitis are also at risk for disease transmission. Students who are at greatest risk of these types of exposures (primarily, but not exclusively, health science students) must be educated about how to minimize or eliminate the likelihood of exposure to these potentially infectious fluids **before** they participate in these activities. Additionally, they must be informed as to how to proceed if they incur an exposure, either on or off campus, while participating in a course/university-related activity.

Currently, students who have a risk of exposure either on or off campus at clinical training sites are trained according to the Occupational Safety and Health Administrations (OSHA) Bloodborne Pathogen Standard (https://www.medicalcompliancecertification.com/covid19/?gclid=EA1aIQobChMIurm5lpf16QIVDTiGCh2KWgM8EAAYASAAEgJEOfd_BwE), which was developed in an attempt to minimize or eliminate employee risk of exposure to human blood/body fluids during the course of their work. This training includes discussion of the Centers for Disease Control (CDC) Universal Precautions (<https://www.cdc.gov/niosh/topics/bbp/universal.html>) document regarding infection control and information on the hepatitis B vaccine. This training is done either on campus by a faculty member, or at the student's clinical facility as part of an orientation presentation.

Bloodborne Pathogens

This section outlines a protocol to be followed by students regardless of location, if they incur an accidental exposure to human blood/body fluids while engaged in coursework or some other university-related activity. Exposure in this case means that another person's blood/body fluid has come into direct contact with some part of the student's body. This other person is referred to as the source individual. All bloodborne pathogen exposure incidents should be evaluated **immediately** since risk of post-exposure infection is dependent upon many factors and that treatment, if indicated, must be started as soon as possible in order to be maximally effective.

Bloodborne pathogens include but are not limited to Hepatitis B; Hepatitis C; Non-A, Non-B Hepatitis; Human Immunodeficiency Virus; Syphilis; and Malaria. These pathogens may be transmitted in blood or other potentially infectious materials, including cerebrospinal fluid, synovial fluid, pleural fluid, amniotic fluid, pericardial fluid, peritoneal fluid, semen, vaginal secretions, any body fluid contaminated with blood (saliva in dental procedures), and, in emergency situations, body fluids that cannot be recognized. Unfixed tissue or body organs other than intact skin and blood, organs and tissue from experimental animals infected with HIV or HBV are also considered potentially infectious materials.

Facts about HIV Exposure

- The average risk for HIV infection from all types of reported percutaneous exposures to HIV-infected blood is 0.3%. Risk is increased for exposures involving:
 - A deep injury to the healthcare worker
 - Visible blood on the device causing injury
 - A device previously placed in the source patient's vein or artery (e.g., needle used for phlebotomy)
 - Proven or presumed high viral load as demonstrated through testing of the source patient or in case of source patient death from AIDS complications within 60 days post exposure
- Identification of these risk factors in the case-controlled study suggests that the risk for HIV infection exceeds 0.3% for percutaneous exposures involving a large blood volume and/or higher HIV titer in blood. The risks after mucous membrane exposure on average is approximately 0.1% and on skin exposure less than 0.1% probably also dependent on the volume of blood and titer of HIV.
- Although information about the potency and toxicity of antiretroviral drugs is available from studies of HIV-infected patients, it is uncertain to what extent this information can be applied to uninfected persons receiving post-exposure prophylaxis (PEP).

Facts about Hepatitis B Exposure

For a needlestick exposure involving hepatitis B, the risk is considerably higher (i.e., 1 in 3 or ~33%) than for HIV. The risk is likely much lower in superficial or trivial needlestick injuries, and in skin/mucous membrane exposures, depending on specific circumstances. It is negligible in individuals who have completed a course of hepatitis B vaccine with confirmatory titers.

Facts about Hepatitis C Exposure

The average incidence of anti-HCV seroconversion after accidental needlestick injury from an HCV-positive source is about 2%.

Protocol to follow if exposed to human blood or other potentially infectious body fluids

AN EXPOSURE INCIDENT REQUIRES IMMEDIATE ACTION!

1. **Exposure Incidents** – The following events are considered an exposure:
 - i. percutaneous injury involving a potentially contaminated needle or other sharp instrument
 - ii. splash of blood or other potentially infectious materials to the eyes, mouth or mucous membranes
 - iii. blood or other potentially infectious materials contacting broken skin
 - iv. human bites that cause a break in the skin
2. **Steps to take in the event of an exposure or needlestick:**
 - i. **Do not panic!** It is not helpful. Clear thinking and immediate action are the best course of action.
 - ii. Wash the exposure area immediately for at least two minutes if possible. If it's a skin wound, wash well with water and disinfectant soap. Irrigate eyes with saline if available, otherwise use water. If it's a mouth exposure, wash mouth out well with water.
 - iii. Students should immediately report the incident to whomever is precepting or supervising them (including but not limited to their Quinnipiac University clinical coordinator).
 - iv. Before starting rotations, students should ask their preceptor for a copy of their site's exposure control plan if they are at a distant location such as out of state.
3. **Attempt to obtain the HIV/HBV/HCV status of the source individual.** If the exposure is judged to be "high risk," prophylactic anti-viral therapy may be started immediately in order to be maximally effective.
4. **Post-exposure risk evaluation and potential treatment:** The CDC now recommends that an individual with a significant exposure to blood or other potentially infectious body fluids of another individual should be seen and evaluated *within three hours* (or otherwise as soon as possible) of the exposure. **An exposure incident is to be treated as a medical emergency.**

Assessing Risk after an Exposure Incident

Assessing post-exposure risk is often very difficult to clearly evaluate. The student should try to provide, to the best of their ability, the following information about circumstances surrounding the exposure incident:

- a. The specific procedure involved (phlebotomy, surgery, etc.)
- b. Specific equipment involved (needle type/gauge, scalpel, pipet, etc.)
- c. Body surface exposed (skin, eyes, nose, mouth, percutaneous wound depth)
- d. Type of fluid exposed to (whole blood, serum/plasma, viral culture, semen, unfixed specimen, etc.)
- e. Personal protective equipment employed (gloves, gown, mask, etc.)
- f. Confirmed "active" COVID-19 exposure. Refer to "2. Active Exposure" below.
- g. Document the identity of the source patient.
 - i. Evaluation of the student's risk of infection may include drawing the student's blood for baseline testing for HIV, HBV, HCV, complete blood count, and blood chemistry screening, including liver function tests. Treatment, if indicated, may include initiation

of prophylactic anti-viral therapy. The cost of this medication should be borne by the student.

- ii. In general, a "**high risk**" exposure incident is one based on both transfer of a relatively large volume of infected patient blood (e.g., a deep needlestick injury with a large bore needle) and blood containing a high concentration of viral particles (e.g., early acute retroviral illness or end-stage AIDS). "**Increased risk**" means exposure to either one of the above. "**Low risk**" generally means exposure with minimal penetration (e.g., superficial skin injury of unfixed specimen, solid suture needle injury), low viral concentration fluids (e.g., saliva, urine), or exposure on fully intact skin.

Where to go if you have been exposed

Exposures at a site WITH on-site capability for initial care:

Students who are exposed at a clinical site with on-site capability for providing appropriate care for bloodborne exposure, such as an emergency department, will follow the clinical site protocol and seek immediate initial evaluation and treatment at the clinical site.

Exposures at a site WITHOUT on-site capability for initial care:

If the clinical site is without on-site capability for providing appropriate care for bloodborne or airborne exposure, then the student should be seen at:

MidState Medical Center MediQuick

61 Pomeroy Ave.

Meriden, Connecticut

203-694-5350

(Open 8 a.m. to 7 p.m. seven days a week.)

- It is advised to call ahead to let MediQuick know the student is coming (203-694-5350). Inform them about the accident so that they can expedite getting the student seen as soon as possible.
- If MediQuick is not open, then the student should be seen at a nearby hospital-affiliated urgent care center or hospital emergency department. The preferred site in the Hamden area is: **MidState Medical Center Emergency Department in Meriden, Connecticut.**
- If the student is out-of-state, they should be seen at a nearby hospital-affiliated urgent care center or hospital emergency department.

Post-exposure follow-up care with Infectious Disease Office

Follow-up care, if needed for the exposure, should be arranged with:

MidState Medical Center Infectious Disease Office

61 Pomeroy Ave.

Meriden, Connecticut

203-694-5444

(Note: The Infectious Disease Office is not the same office as MediQuick, but they are in the same office building.)

If the student is out-of-state, any needed exposure follow up should be arranged at a hospital-affiliated urgent care center, employee health or hospital emergency department.

The student is responsible for using their own health insurance or the university-purchased accident only policy through Gallagher Insurance Company to pay for any medical visits associated with their occupational exposure.

Payment of Services for an Exposure Incident

Students are responsible for using their own health insurance to pay for any medical visits associated with their occupational exposure. Students are also covered by an "accident only" student insurance program that has been coordinated through the university with the Gallagher Insurance company and information can be obtained via the Gallagher website (<https://www.gallagherstudent.com/students/student-home.php?idField=1113>) under My Student Health. See appendix 2 of the Student Incident Policy (p. 118).

Documentation of an Exposure Incident

All student exposure incidents, on or off campus, must be fully documented by filing a detailed **Student Incident Report Form** with the director of Quinnipiac University Student Health Services (FAX: 203-582-8924, TEL: 203-582-8742) and with the student's program director/department chairperson **within FIVE (5) days of the incident**. In addition to the electronic version of the form linked to above, copies may also be obtained from Student Health Services and from the Office of the Dean of Health Sciences in North Haven. Students who need assistance with completing the form should ask a faculty member in their program/department or a nurse from Student Health Services.

The student will also likely be required to fill out an incident report form at the clinical affiliate site for their records. It is very important that the forms are filled out thoroughly and completely in order to aid in post-exposure evaluation and follow-up, and to protect the student's legal rights in the future if necessary. The student should obtain copies of any and all post-incident evaluation/testing/treatment documents as follow-up will most likely occur at:

MidState Medical Center Infectious Disease
61 Pomeroy Ave.
Meriden, Connecticut
203-694-5444

All information related to an exposure incident will be kept confidential in the student's medical records file at Student Health Services at the university.

Types of Exposure

COVID Exposure

The following are guidelines for coronavirus, which includes SARS-CoV-2 and all new emerging diseases.

It is the expectation that all students follow the minimum guidelines defined by the CDC

Quinnipiac will follow the most current COVID-19 guidelines as described on the CDC website (<https://www.cdc.gov/coronavirus/2019-ncov/>) and as those guidelines are modified, they will supersede what is included below.

The following policy and procedure are designed for prompt identification and isolation for students identified as having unprotected exposure to COVID-19 in the clinical/practicum setting. This is considered a critical step in protecting patients, co-workers, visitors and others in the healthcare setting and community.

a. Defined unprotected exposure per CDC Guidelines for Health Care Professionals (HCP) (subject to change) as:

- HCP who had prolonged close contact with a patient, visitor or HCP with confirmed COVID-19. Exposures can also occur from a suspected case of COVID-19 or from a person under investigation (PUI) when testing has not yet occurred or if results are pending. Until more is known about transmission risks, it is reasonable to consider an exposure of 15 minutes or more as prolonged.
- HCP not wearing a respirator or face mask
- HCP not wearing eye protection if the person with COVID-19 was not wearing a cloth face covering or face mask
- HCP not wearing all recommended personal protective equipment (PPE) (i.e., gown, gloves, eye protection, respirator) while performing an aerosol-generating procedure

2. Active Exposure: a patient, visitor or HCP with confirmed **ACTIVE** COVID-19. This policy is designed so that exposure to patients who persistently test positive but are deemed to be non-active/non-infectious does not automatically require quarantine. In this scenario, clinical judgement is required (e.g., does the index individual have risk factors such as immunocompromise that make ongoing infection or shedding more likely). The Quinnipiac University program administrator, clinical affiliate preceptor and student will meet for final judgement and approval. This distinction protects the patient and students while posing less disruption to the overall academic practicum.

- The aforementioned statement follows the following CDC guidelines for "Interim Guidance for Managing Healthcare Personnel with SARS-CoV-2 Infection or Exposure to SARS-CoV-2 (<https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html>)."

Step 1: Quinnipiac students on a defined clerkship/clinical rotation are to follow their specific site policies and procedures in regard to reporting and quarantine rules. ALL other students are to proceed to the next steps and follow instructions.

Step 2: Student is to immediately inform program director and/or preceptor/supervisor.

Step 3: Complete the **Student Incident Report Form**.

Completing the form generates a report to Student Health Services and the school designee.

Quarantine if you have been in close contact (<https://www.cdc.gov/coronavirus/2019-ncov/php/contact-tracing/contact-tracing-plan/appendix.html#contact>) (within 6 feet of someone for a cumulative total of 15 minutes or more over a 24-hour period) with someone who has COVID-19, unless you have been fully vaccinated (<https://www.cdc.gov/coronavirus/2019-ncov/vaccines/fully-vaccinated.html>). People who are fully vaccinated do NOT need to quarantine after contact with someone who had COVID-19 unless they have symptoms (<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>). However, fully vaccinated people should get tested 3-5 days after their exposure, even if they don't have symptoms, and wear a mask indoors in public for 14 days following exposure or until their test result is negative.

Students can be tested at SHS or on their own. Students who are tested outside of SHS must upload a copy of their PCR to the patient portal @ <https://studenthealthservices.quinnipiac.edu>

If you are not vaccinated:**What to do**

- Stay home for 14 days after your last contact with a person who has COVID-19.
- You may shorten your quarantine to 10 days by testing with a PCR on day 8. Students can be tested at SHS or on their own. Students who are tested outside of SHS must upload a copy of their PCR to the patient portal @ <https://studenthealthservices.quinnipiac.edu>
- Watch for fever (100.4°F), cough, shortness of breath, or other symptoms (<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>) of COVID-19.
- If possible, stay away from people you live with, especially people who are at higher risk (<https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/>) for getting very sick from COVID-19.

After quarantine

- Watch for symptoms until 14 days after exposure.
- If you have symptoms, immediately self-isolate and contact Student Health Services or healthcare provider.

Step 4: Monitor closely for fever or other symptoms consistent with CDC Guidelines: Symptoms of Coronavirus (<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>).

If no symptoms develop, skip to Step 7.

Step 5: Students who exhibit symptoms:

- Seek medical attention and/or evaluation from Student Health Services (call 203-582-8742 first) or primary care physician or other healthcare facility.
- Follow the current CDC Guidelines: What to do if you are sick? (<https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html>)

Step 6: Active monitoring phase.

Student is to isolate with regular communication at least once a day with Student Health Services or someone designated by the university, and/or with primary care physician, if applicable.

Follow the current CDC Guidelines: Ending Isolation and Precautions for People with COVID-19: Interim Guidance (<https://www.cdc.gov/coronavirus/2019-ncov/hcp/duration-isolation.html>)

Step 7: Students can return to clinical/practicum duties if they have met the CDC guidelines. The university will follow current CDC guidelines for the following: Workplaces and Businesses (<https://www.cdc.gov/coronavirus/2019-ncov/daily-life-coping/returning-to-work.html>).

Students meeting the CDC guidelines will be cleared to return to clinical/practicum site duties by Student Health Services or their primary care physician. Documentation from a primary care physician must be provided to Student Health Services and the school designee.

- studenthealthservices@qu.edu
(Studenthealthservices@quinnipiac.edu)
- Fax: 203-582-8924

The student must notify the school designee.

Tuberculosis (TB) Exposure

The tuberculosis bacterium is spread from person-to-person through inhalation of small droplets produced during the coughing and sneezing

of an infected individual. Close contact with a person with untreated or undiagnosed pulmonary TB places healthy people at risk of acquiring the infection. Tuberculosis is treated with antibiotics.

If a student is exposed to TB during course-related activities, they should inform their instructor/clinical coordinator/supervisor as soon as possible. The student should fill out a **Student Incident Report Form**. The form will be electronically forwarded to the appropriate faculty and staff.

The student should follow up with QU Student Health Services for evaluation. Students are advised to call the QU Student Health Services first. In the event that Student Health Services is not available, such as when school is not in session, the student is directed to contact:

MidState Medical Center Infectious Disease Office
61 Pomeroy Ave.
Meriden, Connecticut
203-694-5444

If the student is engaged in coursework out of state, the student should check with their preceptor/faculty, and follow the protocols that are established at the facility. In the case where students are not under set protocols or policy, or there is any concern, the student should be evaluated at a nearby hospital-affiliated occupational medicine, urgent care center or primary care center. For students who are out of state, it is important to release, obtain and bring records and results of care and testing with them for follow up at QU Student Health Services upon their return to campus.

Post-exposure evaluation/treatment of an exposure incident may include the following:

1. Evaluation of student's risk given the exposure situation
2. Tuberculin test at time of exposure and 12 weeks post-exposure
 - a. Either the Tuberculin Skin Testing (TST; aka PPD) or the IGRA test are acceptable, but the same type of test must be used for both the baseline and the 12-week follow up.
 - b. For students who have had a reaction to the TST/PPD or had the bacille Calmette-Guerin (BCG) vaccine, the Interferon Gamma Release Assay (IGRA) test is a safe method to determine baseline and 12-week follow up.
3. After the initial and 12-week post exposure evaluation, the decision for specific treatment and follow-up will be made on a case-by-case basis by a qualified healthcare provider with the students' consent. Further testing and treatment may include:
 - a. A chest X-ray (as indicated)
 - b. Prophylactic therapy (as indicated)

Pertussis

Pertussis is a bacterium that is spread from person to person through the inhalation of contaminated droplets from an infected person. Pertussis is a vaccine preventable disease for children who are current on their vaccinations. However, pertussis immunity is not carried through to adulthood, and a booster is required for immunity. The CDC currently recommends any adult who has not had a tetanus diphtheria and pertussis (Tdap) vaccination as an adult to receive at least one dose.^{i, ii} Note most adults who have had a tetanus diphtheria booster have NOT received the one with pertussis.

If a student has been exposed to a laboratory-confirmed, documented case of pertussis during course-related activities, they should inform the instructor/clinical coordinator/supervisor as soon as possible. The student will then be directed to have a medical evaluation. The student should fill out a Student Incident Report Form (<http://>

forms.quinnipiac.edu/IncidentReportForm/form.html) (available online), which will be electronically routed to QU Student Health Services and the department chairperson/program director.

Within the next 2 business days, the student should follow up with QU Student Health Services for evaluation and prophylaxis if needed. Students are advised to call the QU Student Health Services first. In the event that Student Health Services is not available, such as when school is not in session, the student is directed to contact the Infectious Disease Office at MidState Medical Center (203-694-5444) 61 Pomeroy Ave., Meriden, Connecticut.

If on rotation out of state, the student should check with their preceptor, and follow their protocols. In the case where students are not under the policy, or there is any concern, the student should be evaluated at a nearby hospital-affiliated occupational medicine, urgent care center or primary care center.

Restrictions from clinical duties may occur; the CDC guidelines^{i, ii} recommend exclusion from duty for 5 days after initiating prophylaxis/treatment on any symptomatic healthcare worker after exposure. No restrictions for asymptomatic persons. Treatment may include prophylaxis with, erythromycin, azithromycin, or bactrim (Trimethoprim (TMP)/Sulfamethoxazole (SMX)) for 14 days. This will be addressed at the time of the evaluation; humans are not contagious immediately after an exposure.

Meningococcal Meningitis

Students in rotations may come in contact with patients infected with *neisseria meningitidis*, a common causative agent of one of the deadliest forms of meningitis. Although transmission from a patient to a healthcare worker is rare, unprotected contact with respiratory secretions can lead to infection. Because of the significant morbidity and mortality associated with the disease, students and healthcare workers with a known exposure are treated with prophylaxis. If a student has been exposed to a laboratory-confirmed, documented case of meningococcal meningitis during course-related activities, they should inform the instructor/clinical coordinator/supervisor as soon as possible.

If a student is exposed, they should inform their instructor/clinical coordinator/supervisor as soon as possible. The student should fill out a **Student Incident Report Form**. The form will be electronically forwarded to the appropriate faculty and staff.

If on rotation out of state, the student should check with their preceptor, and follow their protocols. In the case where students are not under the policy, or there is any concern, the student should be evaluated at a nearby hospital-affiliated occupational medicine, urgent care center or primary care center.

The student should be directed to have a medical evaluation at

MidState Medical Center MediQuick Urgent Care
61 Pomeroy Ave.
Meriden, Connecticut
203-694-5350

Meriden, Connecticut
203-694-5444

If out of state or at a distant location, the student should check with their preceptor and go to the local emergency room/urgent care center for initial evaluation and determination if prophylactic antibiotics are required.

The student should then follow up with QU Student Health Services. The student should fill out a **Student Incident Report Form**, which will be electronically routed to QU Student Health Services and the department chairperson/program director.

Restrictions from clinical duties may occur; the CDC guidelines^{i, ii} recommend exclusion from duty from clinical duties until 24 hours after starting prophylaxis for asymptomatic persons. Treatment may include prophylaxis with, rifampin, ciprofloxacin or ceftriaxone. This will be discussed at the time of evaluation. The student is not contagious immediately after exposure.

Prevention

It is our aim to prevent as many exposure incidents as possible by educating students properly and by reminding them to always remain aware of the risks as they perform their duties.

The following are guidelines for preventing student exposure incidents:

- a. **Attend and listen** carefully at all OSHA training sessions.
- b. **Obtain the full series** (3 injections over 6 months) of hepatitis B vaccine and check immunity (hepatitis B antibody in blood) one month after the last injection.
- c. **Pay careful attention** to instructors and learn/practice good technique for phlebotomy, handling and disposal of needles and sharp instruments, surgical procedures, etc.
- d. **Adhere to the principle of Universal Precautions**, which states that anyone's blood/Other Potentially Infectious Materials (OPIMs) may be potentially infectious and therefore everyone's blood and body fluids must be treated accordingly.
- e. **Use personal protective equipment** (e.g., gloves, gowns, face mask) as required to protect yourself.
- f. **Wash hands frequently** with antimicrobial soap under running water.
- g. **Keep hands/fingers** away from face and eyes.
- h. **Think about what you are doing. Most exposure incidents are due to carelessness!**

Student Incident Policy (Accident and Injury)

Policy reviewed April 1, 2019, by the University-Wide Safety Committee and the Clinical Education Compliance Committee.

Approved policy for Quinnipiac University students who are involved in an accident or suffer an injury while participating in a course/university-related activity both on or off-site (e.g., a laboratory, clinical training, athletics, etc.).

Please reference the Student Incident Report Form (to be completed by student). (<http://forms.quinnipiac.edu/IncidentReportForm/form.html>)

Please reference the Student Control Exposure Control Plan for Bloodborne and Airborne Pathogens. (p. 112)

Please reference Appendix 4 (p. 118) for instructions on how to file a claim.

Background Information

The university recognizes that some students, in their coursework, clinical practicums, or other university-related activities, may suffer an unforeseen accident. All students must be educated about how to minimize or eliminate the likelihood of an accident **before** they participate in these activities. Additionally, they must be informed as to how to proceed if they are involved in an accident, either on or off campus, while participating in a course/university-related activity.

If a student is involved in any unusual occurrence such as a fall or other mechanical injury, an allergic reaction, an accident in the lab, an exposure to airborne or bloodborne pathogens, an emergency transport, or a clinical event (e.g., medication error, etc.), either on campus, off campus at a university-related activity or at a clinical site, a Student Incident Report Form (<http://forms.quinnipiac.edu/IncidentReportForm/form.html>) needs to be completed.

It is to be completed and digitally approved by the student (when appropriate) and will be electronically routed to a supervising faculty/staff member and QU Student Health Services. In addition, if the student is on a clinical rotation, the clinical coordinator (as well as program director and affiliate site preceptor) should be notified about the incident within 24 hours. If a student suspects that they will need outside medical treatment as a result of this occurrence, they are encouraged to complete a Student Incident Report Form (<https://forms.quinnipiac.edu/IncidentReportForm/form.html>) as soon as possible.

QU students are expected to continue in their academic and clinical endeavors after an incident or exposure. If a health care provider deems the student unfit for work or if a student is required to be on limited light duty/responsibilities, then the student must make every effort to obtain a written note by the health care provider to be documented with Student Health Services and the program director/administrator. Once medically cleared by a health care provider, the student is expected to return to academic and clinical duties immediately. In regard to a bloodborne pathogen exposure, a quarantine may be needed for the safety of the student and/or public. Also, in the event of contracting a bloodborne pathogen infection, they are to refer to their specific department for bloodborne pathogen infections protocols if applicable (refer to student program handbook).

An Injury Requires Immediate Action!

Instructions: Students shall use the Student Incident Report Form (<http://forms.quinnipiac.edu/IncidentReportForm/form.html>) to report all injuries – no matter how minor. This helps faculty and staff to identify and correct hazards before they cause serious injuries. This form shall be completed by students as soon as possible and electronically forwarded to the staff member, instructor, clinical coordinator, program director or preceptor for further action.

Assessing Risk After an Injury

Assessing risk is often very difficult to clearly evaluate. The student should try to provide, to the best of their ability, the following information about circumstances surrounding the exposure incident:

- Location of incident
- Names of witnesses (if any)
- Why did the unsafe condition(s) exist?
- Why did the unsafe acts occur?
- Were the unsafe acts or conditions reported prior to the incident?
- Have there been similar incidents or near misses prior to this one?
- What changes could prevent this incident/near miss from happening again?

Where to Go if an Injury Has Occurred

An incident at a location WITH on-site capability for initial care

Students who experience an injury at a location with on-site capability for providing appropriate care, such as an emergency department, will follow the site's protocol and seek immediate initial evaluation and treatment at the site.

An incident at a location WITHOUT on-site capability for initial care

If the site is without on-site capability for providing appropriate care for the injury, then the student should be seen at:

MidState Medical Center's MediQuick
61 Pomeroy Ave., Meriden, Connecticut
203-694-5350
(Open 8 a.m. to 7 p.m. seven days/week)

- It is advised to call ahead to let MediQuick know the student is coming (203-694-5350). Inform them about the accident so that they can expedite getting the student seen as soon as possible.
- If MediQuick is not open, then the student should be seen at a nearby hospital-affiliated urgent care center or hospital emergency department. The preferred site in the Hamden area is: **MidState Medical Center Emergency Department, Meriden, Connecticut.**
- If the student is out-of-state, they should be seen at a nearby hospital-affiliated urgent care center or hospital emergency department.
- If the student is out-of-state, any needed follow up care should be arranged at a hospital-affiliated urgent care center, employee health or hospital emergency department.

The student is responsible for using their own health insurance or the university purchased accident only policy through Gallagher Special Risk to pay for any medical visits associated with their occupational incident.

Students can instruct MidState to directly bill Gallagher once their health insurance has adjudicated a claim.

Payment of Services for Incident

The student is responsible for using their own health insurance to pay for any medical visits associated with their injury. Students also are covered by an "accident only" student insurance program that has been coordinated through the university with the Gallagher Special Risk. See Appendix 2 (p. 118).

Documentation of an Incident

All student incidents, whether on or off campus, must be fully documented by filing a detailed Student Incident Report Form (<http://forms.quinnipiac.edu/IncidentReportForm/form.html>). If assistance is needed in filling it out, a staff member, a faculty member in the program/department or a nurse from Student Health Services can assist.

The report will be electronically routed to the director of the Quinnipiac University Student Health Services (FAX: 203-582-8924, TEL: 203-582-8742) and the faculty/staff selected on the form. The student is **responsible** for notifying their staff member, program director/department chairperson **within FIVE (5) days of the incident**. The student should then follow up with QU Student Health Services.

If on a clinical, the student will also likely be required to fill out a site-specific incident report form at the clinical affiliation site for their records. It is very important that the forms are filled out thoroughly and completely in order to aid in post-exposure evaluation and follow-up, and to protect the student's legal rights in the future, if necessary. The student should obtain copies of any and all post-incident evaluation/testing/treatment documents as follow-up will most likely occur at:

MidState Medical Center's MediQuick
61 Pomeroy Ave., Meriden, Connecticut
203-694-5350
(Open 8 a.m. to 7 p.m. seven days/week)

All information related to an incident will be kept confidential in the student's medical records file at Student Health Services at the university.

Prevention

It is our aim to prevent as many unusual incidents as possible by educating students properly and by reminding them to always remain aware of the risks as they perform their duties.

The following are guidelines for preventing student exposure incidents:

- Attend and listen** carefully at all Occupational Safety and Health Administration (OSHA) training sessions.
- Pay careful attention** to instructors and learn/practice good technique while being aware of surroundings.
- Adhere to the principle of Universal Precautions**, which states that anyone's blood/Other Potentially Infectious Materials (OPIMs) may be potentially infectious and therefore everyone's blood and body fluids must be treated accordingly.
- Use personal protective equipment** (e.g., gloves, gowns, face mask) as required to protect yourself.
- Think about what you are doing. Most incidents are due to carelessness!**

Appendix 1: MidState Medical Center Protocol for the Management of Post-Exposure Chemoprophylaxis following Potential Occupational Exposure to Bloodborne Pathogens

General Information

- The student will follow guidelines as listed within the Quinnipiac University Student Exposure Control Plan for Bloodborne and Airborne Pathogens. (p. 112)
- The student is responsible for using their own health insurance and for paying for the visits associated with post exposure follow-up. Claims not covered by the student's health insurance will be covered by Excess Student Accident Insurance.
- Students who are exposed at a clinical site **with** on-site capability for providing appropriate care for bloodborne exposure will follow the clinical site protocol and seek initial evaluation and treatment at the clinical site.
- Students who are exposed at a clinical site **without** on-site capability for providing appropriate care for bloodborne exposure will receive initial evaluation and treatment at:

MidState Medical Center's MediQuick
61 Pomeroy Ave., Meriden, Connecticut
203-694-5350
Hours of operation are 8 a.m. to 7 p.m.

Bloodborne Exposure Protocol

Students who are exposed at a clinical site without on-site capability for providing appropriate care for bloodborne or airborne exposure will follow steps 1–3 below. All students exposed will follow step 4 below.

1. Notification from Quinnipiac University Student

- Notification from Quinnipiac University Student to MediQuick (MQ) charge nurse of student exposure.
- Student arrives at MQ with copy of:
 - Completed MidState Medical Center Pre-Registration Form (<http://forms.quinnipiac.edu/IncidentReportForm/MidStateForm.pdf>).
 - Completed Quinnipiac University Release of Information Form. ([https://myq.quinnipiac.edu/Student%20Life/Student%20Health%20Services/Document%20Library/Release%20of%20Information%20\(Updated%205.22.19\).pdf](https://myq.quinnipiac.edu/Student%20Life/Student%20Health%20Services/Document%20Library/Release%20of%20Information%20(Updated%205.22.19).pdf))
 - Copy of Student Incident Report Form (<http://forms.quinnipiac.edu/IncidentReportForm/form.html>) (an electronic copy will be emailed to the student upon submission of online form).
 - Copy of hepatitis B vaccine status.
- Student reports to MQ Registrar and is fast tracked into treatment room where registration process will be completed.
- CBC, Renal & Hepatic chemical functions, baseline HIV and Hepatitis C antibody will be drawn.

2. Assessment

- The MQ physician and/or Licensed Independent Practitioner (LIP) will assess the extent of exposure and determine risk.

- The MQ physician and/or LIP will offer appropriate post-exposure prophylaxis (PEP) along with information on the prescribed medications and risks.

3. Intervention

- Permission for PEP regimen will be obtained.
- Perform other testing as indicated (including pregnancy test if indicated).

4. Follow-up (all exposed students)

- An appointment should be made by the student with the **Mid State Infectious Disease Group for 2 weeks post exposure follow-up**. This appointment can be made by contacting the **Infectious Disease Office at 203-694-5444** on the next business day following the immediate post exposure follow-up.
- If the immediate post-exposure follow-up was **not** done at MidState Medical Center, the student should request a copy of the lab work be copied to MidState Medical Center Department of Infectious Disease (FAX: 203-694-5373).
- The infectious disease physician will evaluate/counsel the student in two weeks for follow-up blood work and additional medication as needed. To make an appointment the student should call 203-694-5444. The office is located at 61 Pomeroy Ave., Meriden, Connecticut (note that the infectious disease office is **not** the same office as MediQuick but they are in the same office building).
- The infectious disease physician is available for consultation regarding the effects of PEP medication and medication changes, if appropriate.
- If the student is out-of-state, any needed exposure follow up should be arranged at a hospital-affiliated urgent care center or hospital emergency department.

Appendix 2: Gallagher Accidental Insurance Program for Students at Quinnipiac University FAQ – Excess Student Accident Insurance

Q. What is “**excess** student accident insurance” and why does Quinnipiac have a policy?

A. The concept of this is to prevent Quinnipiac students from incurring expenses due to accidents that occur while in school. An “excess” policy covers expenses that the student would otherwise be responsible for in the absence of this policy (i.e., co-pays, deductibles, and other amounts denied by primary insurance and shown as the patient responsibility on the primary **Explanation of Benefits** [EOB]).

Q. How do students become eligible? How does it work?

A. Every Quinnipiac student is automatically covered by the plan. When an accidental injury occurs a claim form (<https://forms.quinnipiac.edu/IncidentReportForm/BMIForm.pdf>) must be completed and sent to the claims company, BMI Benefits LLC.

Q. Do students need to have a claim form on file for every injury?

A. **Yes**. A new claim form must be filled out for each new injury.

Q. Do students still need to have primary insurance, since Quinnipiac has this policy?

A. **YES**, all students do. All full-time students must have a primary insurance policy. Quinnipiac’s excess student accident policy **ONLY** covers accidental injury related injury charges not paid by primary insurance and shown as the student’s responsibility on

the primary insurance EOB. It does not cover any bills associated with general illness or non-accidental injuries.

Q. What expenses does the Excess Student Accident Insurance policy cover?

A. The policy is designed to cover **most** expenses beyond primary insurance coverage for **accidental injuries**, up to of 100% Usual & Customary. This includes amounts shown as the patient responsibility on the primary insurance EOB: co-pays, co-insurance, high deductibles etc.

Q. What is the benefit period to incur bills/claims?

A. The benefit period is two years/104 weeks from the date of injury. This is on a per injury basis.

Q. Is there a deductible associated with the Student Accident Policy?

A. There is **no deductible**. This means that any accidental injury medical charges, from \$0.00 to \$5,000, not covered by primary insurance, and shown as the student’s responsibility on the primary EOB, will be paid up to 100% Usual & Customary.

Q. What insurance information does the student have to give a provider?

A. When students go to the hospital, doctor’s office, PT clinic, etc., they must remember to bring proof of primary insurance coverage and as well as the Excess Student Accident Insurance card for any expense not covered by primary insurance policy which can be obtained on the QU Student Health Services page on MyQ (<https://myq.quinnipiac.edu/Student%20Life/Student%20Health%20Services/Pages/default.aspx>) and claim form (<http://forms.quinnipiac.edu/IncidentReportForm/BMIForm.pdf>). The policy number is on the form.

Q. How will claims be processed?

A. Students do **NOT** pay bills. The provider will take primary insurance information, as well as the Excess Student Accident Policy information. Bills will be sent to the primary insurance for processing. If students remember to present the secondary insurance information upfront, providers should automatically send any outstanding balances to BMI Benefits LLC, to process under the excess insurance plan.

Q. What documents are needed for BMI Benefits, LLC. to process a claim?

A. The provider will send BMI Benefits the following documents:

- **Itemized bill** – This is called a **HCFA** or **UB92**, and it contains the following information:
 - Provider’s Name
 - Provider’s Address
 - Tax ID Number
 - Date(s) of Service
 - Type of Service(s) Rendered
 - The Fee for Each Procedure
- **Primary Explanation of Benefits** – This is a statement from the primary insurance company that outlines what charges will be covered and what the patient might owe. If a primary insurance company denies charges for one reason or another, a **DENIAL** will be sent instead of an EOB.

Q. What can cause a delay in processing and paying a claim?

A. BMI Benefits cannot process a claim that is missing one or more of the following documents: the injury claim form, the itemized bill or the primary EOB/denial. **They cannot accept balance due, balance forward, or past due statements for claims processing.**

Q. What if the student already paid the bills they received from an accidental injury after their primary insurance paid? Can they get reimbursed?

A. Students are not supposed to pay bills but if they have, yes, they can get reimbursed for costs they have already paid. To do this students need to submit a receipt or some other proof of payment along with the EOBs and HCFAs/UBs. Keep in mind it usually takes longer for these to be reimbursed. For this reason, providers should “bill” students for fees that are usually paid at the time of office visit. In other words, try to avoid paying any fees to providers up front, so they can be paid by the Excess Student Accident Policy instead.

Q. If students felt sick and went to the ER, will the Excess Student Accident Insurance plan help cover this?

A. Quinnipiac’s excess student accident insurance plan will **not** cover charges due to general illness. Therefore, services for general “non-accident” medical concerns (cold/flu, appendicitis for example) are not covered.

Q. What if a student hurts themselves playing intramurals or playing another sport in the off season? Will the plan cover them for that?

A. **Yes**, all student accident claims covered.

Q. Can students go to any doctor or provider for treatment, or do they have to use the Quinnipiac provided physicians for the excess student accident insurance policy to cover costs?

A. Quinnipiac’s excess student accident policy will cover services from **any provider**, for charges up to 100% Usual & Customary, as long as the provider bills the student’s primary insurance first (creating an EOB and itemized bill). This includes physicians in any insurance network, and other providers such as chiropractors, etc.

MidState Medical Center/MediQuick Pre-Registration Form (<http://forms.quinnipiac.edu/IncidentReportForm/MidStateForm.pdf>)

Appendix 4:

BMI Benefits Form and Reimbursement Claims (<http://forms.quinnipiac.edu/IncidentReportForm/BMIForm.pdf>)

Student Records Policy

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their educational records. These rights include:

- a. The right to inspect and review the student’s educational records within 45 days of the day Quinnipiac University receives a request for access. Students should submit to the registrar, dean, head of the academic department, or other appropriate official, written requests that identify the record(s) they wish to inspect. A Quinnipiac official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the Quinnipiac official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
- b. The right to request the amendment of the student’s education records that they believe are inaccurate, misleading or otherwise in violation of the student’s privacy rights under FERPA. A student who wishes to ask the university to amend a record should write to the Quinnipiac official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed. If Quinnipiac decides not to amend the record as requested by the student, the university will notify the student in writing of the decision and the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when they are notified of the right to a hearing.
- c. The right to provide written consent before Quinnipiac discloses personally identifiable information contained in the student’s educational records, except to the extent that FERPA authorizes disclosure without consent.

One exception that permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by Quinnipiac University in an administrative, supervisory, academic, research or support staff position (including but not limited to law enforcement unit personnel, health staff, and athletic staff and coaches); a person or company with whom Quinnipiac has contracted (such as an attorney, auditor or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing their tasks.

A school official has a legitimate educational interest if the official needs to review an educational record to fulfill their professional responsibility. Upon request, Quinnipiac also discloses educational records without consent to officials of another school in which a student seeks or intends to enroll.

Public Notice Designating Directory Information

Quinnipiac University designates the following information as public or “Directory Information” under FERPA, that is, information that can be made available to the general public by Quinnipiac without the student’s prior consent:

- i. Name
- ii. Address
- iii. Telephone number
- iv. Email address
- v. Date and place of birth
- vi. Secondary school
- vii. Hometown or city at the time
- viii. School or college
- ix. Major field of study
- x. Degree sought
- xi. Weight and height of athletic team members
- xii. Expected date of completion of degree requirements and graduation
- xiii. Degrees and awards received
- xiv. Honor societies
- xv. Dates of attendance
- xvi. Full- or part-time enrollment status
- xvii. Previous educational agency application for admission filed or institution attended
- xviii. Participation in officially recognized activities and sports
- xix. Name and address of parent or guardian
- xx. Photo images from ID cards

A student may refuse to permit the designation as “Directory Information” of any or all of the personally identifiable information listed above, except to school officials with legitimate educational interests and others as indicated. To do so, a student must make the request in writing to the Office of the Registrar (Registrar@quinnipiac.edu) by 5 p.m. on Friday of the first week of classes of the semester. Once filed, this request becomes a permanent part of the student’s record until the student instructs Quinnipiac University, in writing, to have the request removed.

- d. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Quinnipiac University to comply with the requirements of FERPA. The name and address of the office that administers FERPA are:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5920

While students have the right to inspect and review their educational records, Quinnipiac does not release copies of educational records to students or their representatives, including attorneys, even with consent of the student, unless the student would otherwise be unable to obtain access to review their records.

Title IX Policy Against Gender-Based Discrimination and Sexual Misconduct

Revised August 2020

Quinnipiac University is committed to providing an environment free from gender-based discrimination and harassment. Consistent with its commitment to addressing gender-based misconduct, the university complies with Title IX of the Education Amendments of 1972, which prohibits discrimination on the basis of sex in educational programs or activities that receive federal financial assistance. As such, Quinnipiac University is dedicated to fostering a healthy and safe environment in which members of the community can realize their full potential in an educational, working and living environment free from all forms of gender or sex discrimination and sexual misconduct.

Quinnipiac seeks to ensure that no student, faculty or staff member is excluded from participation in or denied the benefits of any university program or activity on the basis of sex. This includes all university activities, including, without limitation, academic, athletic, campus life, residential life programs and all aspects of employment. Students, faculty or staff who believe they have been subjected to or witnessed gender-based misconduct are encouraged to report these incidents. As discussed below, faculty, administration, athletic, human resources, public safety and student affairs staff are considered responsible employees under Title IX and are required to immediately report any incidents of sexual violence they observe. Upon receiving a report, the university will respond promptly, equitably and thoroughly. In addition, the university will take steps to prevent the recurrence of the misconduct and correct its effects, if appropriate.

Specifically with respect to athletics, the university is committed to the equitable treatment of male and female student-athletes. This includes, but is not limited to, equitable allocation of athletic participation opportunities, scholarships and benefits. The contact person in Athletics

for Title IX inquiries is Shanna Alexander, senior associate director of compliance and student development.

Prohibitions against discrimination and harassment do not extend to statements and written materials that are germane to the classroom or academic course of study.

When a respondent is found to have violated this policy, serious sanctions will be used to reasonably ensure that such actions are never repeated and steps will be taken to correct any discriminatory effects to the extent possible. This policy has been developed to reaffirm these principles and to provide recourse for those individuals whose rights have been violated. This policy is intended to define community expectations and to establish a mechanism for determining when those expectations have been violated.

This policy is lengthy and detailed because the university takes these issues and its legal obligations very seriously. Any Quinnipiac community member who has questions about the policy or the grievance procedures should seek clarification from the university’s Title IX coordinator.

- Pregnant and Parenting Student Modifications (p. 108)

Notice of the Title IX Coordinator

The university’s Title IX coordinator manages the university’s compliance with Title IX. The Title IX coordinator is a resource available to anyone seeking information or wishing to file a complaint. When a student, faculty or staff member, or other participant in the university’s programs and activities feels that they have been subjected to discrimination on the basis of sex in any university program or activity, including without limitation being subjected to sexual harassment, they may contact the Title IX coordinator or utilize the Title IX grievance procedures to bring concerns forward for the purpose of obtaining a prompt and equitable resolution.

The Title IX Discrimination and Harassment Policy is intended to define university standards and to outline the investigation and grievance processes.

The University Title IX Coordinator is:

Dennis Kwarteng

Title IX Coordinator

275 Mount Carmel Avenue, CCE-180

Hamden, CT 06518

dennis.kwarteng@qu.edu

203-582-7327

Deputy Title IX coordinators are designated and trained to address Title IX concerns and investigations.

Deputy Title IX Coordinator for faculty, staff and vendors:

Joanna Wayton

Talent Acquisition & HR Projects Specialist

554 Mount Carmel Avenue, MC-7, OF-HMN

Hamden, CT 06518

joanna.wayton@qu.edu

203-582-7738

Deputy Title IX Coordinator for athletics:

Shanna Alexander

Senior Associate Director of Compliance & Student Development

275 Mount Carmel Avenue, ACC-204

Hamden, CT 06518

shanna.alexander@qu.edu

203-582-7332

Amendment of Title IX Policies and Procedures

Where appropriate and with prior notice where applicable, these policies and grievance procedures may be modified or amended by the university Title IX coordinator.

Confidential Resources

On-campus resources are available that can provide confidentiality, sharing options and advice without any obligation to inform other university staff members unless requested. Such on-campus confidential resources include Counseling Services, Student Health Services and/or Religious Life and other designated resources. Additionally, community members can seek out assistance from an off-campus crisis center, which can maintain confidentiality. Faculty members and other university staff are *not* confidential resources and are required to contact the university Title IX coordinator or a deputy coordinator.

Quinnipiac Confidential Resources for Students

- Counseling Services — 203-582-8680
- Student Health Services — 203-582-8742
- Religious Life — 203-582-8257
- Peter C. Herald House for Jewish Life — 203-582-8206

Off-Campus Confidential Resources

- Connecticut Sexual Assault Crisis Services 24-hour confidential hotline — 1-888-999-5545
- Women and Families Center/Meriden — 203-235-9297
- Women and Families Center/New Haven — 203-389-5010
- Rape Crisis Center of Milford — 203-878-1212
- Rape, Abuse and Incest National Network crisis hotline — 1-800-656-HOPE
- Rape, Abuse and Incest National Network online hotline — hotline.rainn.org/online (<https://hotline.rainn.org/online/>)
- The Umbrella Center for Domestic Violence Services — 203-736-9944

- BHcare — 203-736-2601

Students who wish for the university to conduct a formal investigation into an allegation under Title IX must sign a formal complaint with the Title IX Office. Reports that are made anonymously or by third parties may not formally initiate grievance procedures as such.

The university reserves the opportunity to undertake an investigation where appropriate, even in cases where the university received an anonymous report or where the alleged victim and/or complainant chooses not to cooperate or participate. When weighing a complainant's request for confidentiality, to end an investigation and/or to not seek disciplinary action, the university will consider factors which may include the following: a risk of future acts of sexual violence; whether the reported sexual violence was allegedly perpetrated with a weapon; the age of the student subjected to the sexual violence; and whether the university possesses other means to obtain relevant evidence.

The university has a duty to report data about various forms of sexual misconduct in accordance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act). No personally identifiable information is disclosed, but statistical information is disclosed as part of the university's annual Campus Security Policy & Campus Crime Statistics Report. The information to be shared includes the date, location (residence hall, public property, off campus, etc.) and specific crime category.

Whether the incident occurred on or off campus, community members are encouraged to report sexual assault and other incidents of harassment to local police. Quinnipiac's Department of Public Safety can assist community members who wish to make a report to police. Electing not to report an incident to the police will not impact the university's investigation or Title IX grievance process. If a complainant is a minor, according to Connecticut state law, the university will make a report to the appropriate law enforcement agency.

To contact a local police department, contact Public Safety for assistance, or call:

- Hamden Police Department — 203-230-4000
- North Haven Police Department — 203-239-5321 ext. 224
- New Haven Police Department — 203-781-8200
- Connecticut State Police, Troop I — 800-956-8818 or 203-393-4200

If a community member decides not to file a complaint with the university, the university encourages the community member to seek out the available medical and mental health resources listed above. Community members who wish to make a complaint at a later date may contact any of the staff mentioned above at any time. Please note that a delay in reporting could affect the university's ability to gather information that could be needed to determine whether a person is responsible for sexual misconduct or gender-based discrimination.

Amnesty

Members of the university community may be reluctant to report incidents because of concerns that their own behavior may be a violation of university policies. The university will not pursue disciplinary action against students for disclosure of personal consumption of alcohol or other drugs where the disclosure is made in connection with a good

faith report or investigation of sexual misconduct. The university may initiate an assessment or educational discussion or pursue other non-disciplinary options regarding alcohol or other drug use.

Responsible Employees and Reporting

The university deems the Title IX coordinator, all faculty, administration, athletic, human resources, public safety, student affairs and student paraprofessional staff (resident assistants & orientation leaders under contract) as “responsible employees” of the university. A responsible employee is **required** to report any incidents of sexual violence, harassment or discrimination promptly to the university Title IX coordinator or deputy coordinator. Prompt reporting of such incidents makes investigation of the incident more effective and enhances the ability of the university to respond.

When reporting sexual harassment or discrimination, the Title IX coordinator or deputy coordinator will guide you in providing an initial report.

Privacy and Confidentiality

The university will make every effort to maintain the privacy of those involved in Title IX complaints and related processes. Only people who have a legitimate need to know about the matter will be informed, and materials and information prepared or acquired under Title IX procedures will be shared only as required and/or necessary with investigators, witnesses and other relevant parties.

Disclosure of such information also may be made if the university’s Title IX coordinator determines that such disclosure is necessary to protect the health, safety or well-being of the community. While the university’s Title IX coordinator will take into account any requests made by a party for confidentiality or that a Title IX matter not be investigated, the university’s Title IX coordinator will take appropriate steps to respond to the matter consistent with requirements of Title IX and the university’s obligation to the greater Quinnipiac community.

The university does not require, allow, rely upon, or otherwise use questions or evidence that constitute information protected under a legally recognized privilege, unless the person holding such privilege has waived the privilege.

Retaliation

The university will not tolerate any reprisals or retaliation that occur as a result of the good faith reporting of charges of sexual harassment or sex discrimination.

Neither the university nor other person may intimidate, threaten, coerce or discriminate against any individual for the purpose of interfering with any right or privilege secured by Title IX, or because the individual has made a report or complaint, testified, assisted or participated or refused to participate in any manner in an investigation, proceeding or hearing related to this policy.

Intimidation, threats, coercion or discrimination, including charges against an individual for code of conduct violations that do not involve sex discrimination or sexual harassment, but arise out of the same facts or circumstances as a report or complaint of sex discrimination, may constitute retaliation. Similarly, a report or formal complaint of sexual harassment, for the purpose of interfering with any right or privilege secured by this policy or related policies, may constitute retaliation.

Statement Regarding Complaint and Grievance Procedures

The complaint and grievance procedures contained herein have been developed to enable the university to receive, investigate and resolve complaints of discrimination on the basis of sex. These procedures are designed to provide a supportive process for individuals who report discrimination and to ensure a fair process for individuals who are accused of discriminatory conduct. Any Quinnipiac students, faculty or staff members who believe that they have been subjected to discrimination based upon sex in any university program or activity, that the university has failed to meet its Title IX obligations regarding equity in athletics, or that they have been subjected to sexual misconduct may bring such concerns to the attention of the university’s Title IX coordinator to obtain a prompt and equitable resolution. The university will make every effort to complete this process within 90 days of receiving a complaint.

The U.S. Department of Education, Office for Civil Rights (OCR) is the federal agency charged with enforcing compliance with Title IX. Anyone has the right to contact them directly.

Information regarding OCR can be found at:

Office for Civil Rights, 400 Maryland Avenue, SW, Washington, D.C. 20202-1100

- Customer Service Hotline: 800-421-3481
- Facsimile: 202-453-6012
- TDD: 877-521-2172
- Email: ocr@ed.gov
- Website: [ed.gov/ocr \(https://www2.ed.gov/about/offices/list/ocr/\)](https://www2.ed.gov/about/offices/list/ocr/)

Informal Complaints

Students, faculty and staff may bring concerns to the university’s Title IX coordinator or deputy coordinator on an informal basis. Informal complaints may be made in situations where an individual is not interested in moving forward with a Title IX process, or where an individual is requesting more information about the process.

Where appropriate, the Title IX coordinator or designee will provide information about how to file a formal complaint, a summary of grievance procedures, and information about supportive measures. A student is not required to file a formal complaint in order to access supportive measures.

Complainants who are considering bringing a formal complaint may at any time meet with the university’s Title IX coordinator, deputy coordinator, or designee who will discuss the matter and describe the grievance process.

The university Title IX coordinator has the authority to investigate allegations of discrimination prohibited by Title IX even absent the filing of a formal complaint, or after its subsequent withdrawal. The university has an obligation to the entire Quinnipiac community to take appropriate steps to prevent community members from being subjected to discrimination and sexual misconduct. As a result, there may be circumstances that will require the university Title IX coordinator

to proceed with investigating a formal or informal grievance even if a complainant specifically requests that the matter not be pursued.

Formal Complaints

Upon receipt of a report related to this policy, the Title IX coordinator must promptly contact complainant to discuss the availability of supportive measures, consider complainant's wishes with respect to supportive measures, inform complainant of the availability of supportive measures with or without the filing of a formal complaint, and explain to complainant the process for filing a formal complaint.

A formal complaint must be made in writing by the complainant or signed by the Title IX coordinator. The formal complaint must contain both an allegation of sexual harassment against a named respondent and a request that the university investigate the allegation of sexual harassment. At the time of filing a formal complaint, the complainant must be participating in or attempting to participate in an education program or activity of the university.

A formal complaint may be filed with the Title IX coordinator in person, by mail or by electronic mail.

The university may consolidate formal complaints where the allegations arise out of the same facts.

Dismissal of a Formal Complaint

If the conduct alleged in a formal complaint would not constitute sexual harassment as defined under the federal law and reflected in this policy, the university must dismiss the formal complaint.

The university must also dismiss a formal complaint that did not occur within the scope of the university's programs or activities, including complaints brought by individuals who are not currently participating in or attempting to participate in university programs or activities and complaints alleging conduct that did not occur against a person in the United States.

Such a dismissal does not preclude the university from responding to the allegation under other applicable university policies.

The university may dismiss the formal complaint or any allegations if at any time during the investigation or hearing: a complainant notifies the Title IX coordinator in writing that complainant would like to withdraw the formal complaint or any allegations therein, the respondent is no longer enrolled at or employed by the institution, or specific circumstances prevent the university from gathering evidence sufficient to reach a determination as to the formal complaint or allegations therein.

Upon dismissal of a formal complaint, the university must promptly send written notice of the dismissal and reason(s) therefor simultaneously to the parties. Either party can appeal from the university's dismissal of a formal complaint or any allegations therein using the Appeals procedure in this policy.

Informal Resolution

At any time prior to reaching a determination regarding responsibility, the university may suggest to the parties the possibility of facilitating an informal resolution process, such as mediation, to resolve the formal complaint without the need for a full investigation and adjudication. If it

is determined that an informal resolution may be appropriate, the Title IX coordinator or designee will consult with the parties.

Prior to facilitating an informal resolution to a formal complaint, the Title IX coordinator must provide the parties with written notice disclosing the sexual harassment allegations, the requirements of an informal resolution process, and any consequences from participating in the informal resolution process. Upon receipt of this document, complainants and respondents have five days to determine whether they consent to participation in the informal resolution.

The Title IX coordinator must obtain the parties' voluntary, written consent to the informal resolution process. Prior to agreeing to any resolution, any party has the right to withdraw from the informal resolution process and resume the grievance process with respect to the formal complaint. If a satisfactory resolution is reached through this informal process, the matter will be considered resolved. If these efforts are unsuccessful, the formal grievance process will continue.

Nothing in this section precludes a student from filing a complaint of retaliation for matters related to an informal resolution, nor does it preclude either party from filing complaints based on conduct that is alleged to occur following the university's facilitation of the informal resolution.

An informal resolution is not permitted to resolve allegations that an employee sexually harassed a student.

Complaints Regarding Allegations of Gender Inequity in a University Program or Activity, including Athletics

NOTE: Claims of sexual harassment are addressed separately. A separate grievance procedure is set forth for claims of sexual harassment and other related misconduct. See section on sexual harassment. (p. 125)

Grievance Procedures for Formal (i.e., Written) Grievances

A formal grievance process is initiated when a complainant submits a written statement to the university Title IX coordinator alleging discrimination on the basis of sex in any university program or activity, including, without limitation, academic programs, athletics, campus life, residential life and all aspects of employment. In the statement, complainant is encouraged to request any relief sought from the university. Prompt submission of formal grievances is encouraged.

Complaints relating to athletics will be addressed by the deputy Title IX coordinator for athletics:

Shanna Alexander

Senior Associate Director of Compliance & Student Development

275 Mount Carmel Avenue, ACC-204

Hamden, CT 06518

shanna.alexander@qu.edu

203-582-7332

Complaints relating to other university programs and activities will be addressed by the Title IX coordinator.

Dennis Kwarteng

Title IX Coordinator

275 Mount Carmel Avenue, CCE-180

Hamden, CT 06518

dennis.kwarteng@qu.edu

203-582-7327

The deputy Title IX coordinator or designee will consider the written grievance and may dismiss the grievance without further process or review if it is determined that the allegations, even if true, would not constitute a violation of this policy.

If the grievance is not dismissed, the deputy coordinator will interview the individual who submitted the written statement. Depending on the circumstances, the deputy coordinator also may interview others with relevant knowledge, review documentary materials, and take any other appropriate action to gather and consider information relevant to the grievance.

The deputy coordinator or designee will determine whether there has been a Title IX violation using a preponderance of the evidence standard and will consult with other university offices as necessary in reaching a decision regarding the written grievance. The deputy coordinator or designee will prepare a written report setting forth findings, conclusions and recommended actions to be taken, if applicable. The university Title IX coordinator will receive a copy of the report. Complainant also will receive a copy of the report, redacted at the discretion of the Title IX coordinator to protect the privacy of involved parties.

In the event the deputy coordinator or designee determines that there has been a violation, a report will be presented to the provost of Quinnipiac University (hereinafter "provost") or a designee. Upon notification of a violation, the provost, or a designee, will take appropriate action to ensure that the violation is remedied, prevent its recurrence and correct any discriminatory effects on complainant to the extent possible.

While the time it may take to investigate and resolve a Title IX grievance will depend on a variety of factors, including the nature and scope of the allegations, the university will seek to resolve the grievance promptly.

Appeals for Equity Grievances

If the deputy Title IX coordinator or designee finds there was no violation of Title IX, the complainant may notify the university Title IX coordinator of an intent to appeal the decision within five business days of learning of the determination. The complainant must submit an appeal letter from their university email. The appeal letter should specify the grounds upon which the appeal is based and should include any supporting materials. The complainant must submit the appeal letter within five business days of receiving the initial decision. The Title IX coordinator has the discretion to extend these deadlines.

The accepted grounds for an appeal are:

- New evidence that was not reasonably available at the time the determination regarding responsibility or dismissal was made, that could affect the outcome of the matter;

- Procedural irregularity that affected the outcome of the matter;
- The Title IX coordinator, investigator(s), or decision-maker(s) had a conflict of interest or bias for or against complainants or respondents generally or the individual complainant or respondent that affected the outcome of the matter; or
- The sanction(s) assigned by the hearing officer did not adhere to the sanction guidelines stated in this policy.

Upon receipt of a request for appeal, the Title IX coordinator will designate a trained senior university staff member to serve as the appeal officer. If the appeal letter(s) does not bring forward sufficient grounds for appeal, the officer will deny the appeal and the matter will be closed.

If the appeal officer determines that the appeal should be considered, the appeal officer may:

- Affirm the deputy coordinator's decision. In this case, the initial decision is final; or
- Modify the deputy coordinator's decision and present a report with findings and recommendations to the provost or a designee. Upon receipt of the appeal officer's report and recommendations, the provost, or designee, will take appropriate action to ensure that any violation is remedied.

Definitions and Scope of Sexual Misconduct

Quinnipiac prohibits any form of sexual harassment and sexual misconduct, as defined by this policy.

Sexual Harassment: conduct on the basis of sex that satisfies one or more of the following:

- An employee of the university conditioning the provision of an aid, benefit, or service of the university on an individual's participation in unwelcome sexual conduct;
- Unwelcome conduct determined by a reasonable person to be so severe, pervasive, and objectively offensive that it effectively denies a person equal access to the recipient's education program or activity; or
- "Sexual assault" as defined in 20 U.S.C. 1092(f)(6)(A)(v), "dating violence" as defined in 34 U.S.C. 12291(a)(10), "domestic violence" as defined in 34 U.S.C. 12291(a)(8), or "stalking" as defined in 34 U.S.C. 12291(a)(30).

Sexual Assault: An offense classified as forcible or nonforcible sex offense under the uniform crime reporting system of the Federal Bureau of Investigation. Any sexual act directed against another person, without the consent of the victim including instances where the victim is incapable of giving consent. Sexual assault includes forcible rape, forcible sodomy, sexual assault with an object, forcible fondling, incest and statutory rape.

Forcible Rape—The carnal knowledge of a person, forcibly and/or against that person's will or not forcibly or against the person's will in instances where the victim is incapable of giving consent because of their temporary or permanent mental or physical incapacity.

Forcible Sodomy—Oral or anal sexual intercourse with another person, forcibly and/or against that person's will or not forcibly or against the person's will in instances where the victim is incapable of giving consent because of their youth or because of their temporary or permanent mental or physical incapacity.

Sexual Assault With an Object—To use an object or instrument to unlawfully penetrate, however slightly, the genital or anal opening of the body of another person, forcibly and/or against that person's will or not forcibly or against the person's will in instances where the victim is incapable of giving consent because of their youth or because of their temporary or permanent mental or physical incapacity.

Forcible Fondling—The touching of the private body parts of another person for the purpose of sexual gratification, forcibly and/or against that person's will or not forcibly or against the person's will in instances where the victim is incapable of giving consent because of their youth or because of their temporary or permanent mental or physical incapacity.

Incest—Nonforcible sexual intercourse between persons who are related to each other within the degrees wherein marriage is prohibited by law.

Statutory Rape—Nonforcible sexual intercourse with a person who is under the statutory age of consent.

Dating Violence: Violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the victim; and where the existence of such a relationship shall be determined based on a consideration of the length of the relationship, the type of relationship and the frequency of interaction between the persons involved in the relationship.

Domestic Violence: Includes felony or misdemeanor crimes of violence committed by a current or former spouse or intimate partner of the victim, by a person with whom the victim shares a child in common, by a person who is cohabitating with or has cohabitated with the victim as a spouse or intimate partner, by a person similarly situated to a spouse of the victim under the domestic or family violence laws of the jurisdiction receiving grant monies, or by any other person against an adult or youth victim who is protected from that person's acts under the domestic or family violence laws of the jurisdiction.

Stalking: Engaging in a course of conduct directed at a specific person that would cause a reasonable person to fear for their safety or the safety of others, or suffer substantial emotional distress.

Statement on Consent

Consent is an active, knowing and voluntary exchange of affirmative words and/or actions which indicate a willingness to participate in a particular sexual activity. Consent must be freely and actively given. It is the responsibility of the initiator to obtain clear and affirmative responses at each stage of sexual involvement. The lack of a negative response is not consent. A person who is incapacitated by alcohol and/or drugs, whether voluntarily or involuntarily consumed, may not give consent. Neither consent to one form of sexual activity nor past relationships imply consent to future sexual activity.

Incapacitation is a state where a person lacks the capacity to understand or appreciate the fact, nature or extent of a sexual encounter.

- Sexual activity with a person who is demonstrably mentally or physically incapacitated (i.e., by alcohol or other drug use, unconsciousness or blackout) constitutes a violation of this policy.

- A person whose incapacity results from mental disability, sleep, involuntary physical restraint, or from the consumption (voluntary or otherwise) of incapacitating drugs cannot give consent.
- To give consent, a person must be of the legal age of consent. Under most circumstances, the age of consent in the state of Connecticut is sixteen. See Connecticut General Statutes § 46b-120, § 46b-127, § 46b-133d, § 53a-70, § 53a-71, and § 54-76b.
- Alcohol-related incapacity results from a level of alcohol ingestion that is more severe than impairment, being under the influence, drunkenness or intoxication.

Evidence of incapacity may be detected by physical cues, e.g., slurred speech, bloodshot eyes, the odor of alcohol on a person's breath or clothing, inability to maintain balance, vomiting, unusual or irrational behavior, and unconsciousness. Context is important in helping to determine incapacitation. Any of these particular cues alone do not necessarily indicate incapacity.

Force is the use of physical violence and/or imposing on someone physically to gain sexual access. Force also includes threats, intimidation and coercion that overcomes resistance or produces consent.

Coercion is unreasonable pressure for sexual activity. Coercion is the use of emotional manipulation to persuade someone to do something they may not want to do, such as being sexual or performing certain sexual acts. Being coerced into having sex or performing sexual acts is not consenting sex and is considered sexual misconduct.

Jurisdiction

Quinnipiac University is legally required to investigate formal complaints of sex discrimination, including sexual harassment, occurring in the university's educational programs or activities, against a person in the United States. Educational programs or activities include locations, events or circumstances over which the university exercised substantial control over both respondent and the context in which the sexual harassment occurs, and also includes any building owned or controlled by a student organization that is officially recognized by a post-secondary institution.

These policies and procedures shall be read to apply to any student, faculty member, staff member or third party who is presently participating or attempting to participate in a university program or activity. While complaints received will be investigated in accordance with this policy, complaints against students who have already withdrawn or graduated from Quinnipiac or against individuals who are no longer employed by the university will not be subject to Title IX grievance procedures.

Quinnipiac reserves the right to address, through the Student Code of Conduct or through university policies and procedures, incidents that occur off campus that may endanger the health, safety and welfare of self or others and/or adversely affect the university and/or the pursuit of its objectives.

Complaint Procedures for Sexual Misconduct

Any community members who believe they have been subject to sexual assault, sexual harassment or other sexual misconduct or has witnessed or learned of such an incident is encouraged to contact the university Title IX coordinator or a deputy coordinator directly. The Title IX coordinator ensures that complaints are handled by the appropriate deputy coordinator or designee for investigation, possible interim measures and resolution, and thereby ensures complainants have access

to medical, mental health, law enforcement and other resources that may be required.

Preservation of Physical Evidence

The university encourages all individuals to seek assistance from a medical provider and/or law enforcement immediately after an incident of sexual misconduct. This is the best option to ensure preservation of evidence and to begin a timely investigative and remedial response. The university will assist any community member to get to a safe place and will provide medical assistance, coordination with law enforcement, and information about the university's resources and complaint processes.

Handling of Complaints

Complaints against **students, visitors and individuals not affiliated with Quinnipiac** are addressed by the Title IX coordinator:

Dennis Kwarteng, Title IX Coordinator

275 Mount Carmel Avenue, CCE-180

Hamden, CT 06518

dennis.kwarteng@qu.edu

203-582-7327

Complaints against **faculty, staff and vendors** are handled by the deputy Title IX coordinator for faculty and staff. The deputy coordinator for faculty and programs is:

Joanna Wayton, Talent Acquisition & HR Projects Specialist

554 Mount Carmel Avenue, MC-7, OF-HMN

Hamden, CT 06518

joanna.wayton@qu.edu

203-582-7738

In situations in which a complaint is filed against a community member who embodies more than one status at the university (i.e., community member is a student and an employee), the university Title IX coordinator has the authority to appoint investigators (possibly from different areas of the institution) and determine the grievance process for the reported incident (student, faculty or nonfaculty employee). The selected grievance process shall have the authority to make final determinations affecting all individual statuses at the university.

Protective Orders

Students, Faculty, Staff or third parties involved in Quinnipiac programs or activities should bring any protective orders to the Department of Public Safety. The university will assist in making any necessary accommodations.

Grievance Procedures

Members of the university community, guests and visitors have a right to be free from sexual harassment, violence and gender-based harassment. When an allegation of misconduct is investigated, and a responding community member is found to have violated this policy, serious sanctions may be used in an effort to ensure that such actions are not repeated.

Any attempts to violate this policy are considered sufficient for having committed the violation itself. The use of alcohol or other drugs will not

be accepted as a defense or mitigating factor to a violation of this policy. These policies apply regardless of the complainant's or respondent's sexual orientation, sex, gender identity, age, race, nationality, religion or ability. Harassment or discrimination based upon an individual's sexual orientation may be considered gender-based and be subject to this policy. Reasonable accommodations will be provided, as needed, to permit students with disabilities to utilize the procedures set forth herein.

Rights of Parties in a Title IX Process

- The right to a prompt, thorough, and equitable Title IX process.
- The right to be treated with respect by university staff throughout the process and the right to a Title IX coordinator, investigator, decision-maker and facilitator of an informal resolution process that does not have a conflict of interest or bias.
- The right to receive sufficiently detailed written notice of the allegations, upon the university's receipt of a formal complaint.
- The right to confidentiality in any Title IX process, except as may be permitted by the Family Educational Rights and Privacy Act (FERPA), as required by law, or as necessary to carry out a Title IX proceeding.
- The right to discuss the allegations under investigation or to gather and present relevant evidence.
- The right to be notified of available counseling, mental and physical health services, and the availability of reasonable supportive measures.
- The right to receive written notice of any investigative interviews, meetings or hearings.
- The right to identify witnesses and other parties, and to request the Title IX coordinator or designee contact those individuals as part of the investigation.
- The right to have an adviser of choice present in a support or advisory role during the investigation and the administrative hearing.
- The right to report any incident to off-campus authorities and/or law enforcement and to be assisted by university staff in doing so.
- The right to have a live hearing, presided over by a trained and impartial hearing officer.
- The right to review all evidence gathered during the investigation, subject to limitations provided by law, including a draft copy of the report for at least 10 days, and to provide a response prior to the finalization of the report.
- The right to review all evidence that will be provided to the hearing officer, including the final report and the names of all known witnesses who may be called to provide statements during the administrative hearing, for 10 days prior to the hearing.
- The right to have the university request attendance and accommodate individuals called as witnesses for a hearing.
- The right to inspect the hearing script, upon request.
- The right to be present and participate in the administrative hearing.
- The right to participate in the administrative hearing remotely, upon request.

- The right to ask relevant questions of the other party and of witnesses during the administrative hearing, through an adviser of choice.
- The right to be informed of the outcome and sanction of any administrative hearing within one business day of a decision being rendered, and to receive that decision in writing.
- The right to appeal the finding and sanction of the hearing officer, in accordance with the appeal guidelines established in this policy.

Complainants in Title IX processes have the right to an investigation and appropriate resolution of all credible complaints of sexual misconduct, gender-based discrimination and/or harassment made in good faith to the university. Respondents have the right to be presumed “not responsible” throughout the Title IX process.

Standard of Evidence

The standard of evidence to be used to determine respondents’ responsibility is the preponderance of the evidence standard. This standard shall be used for formal complaints against both students and employees, including faculty, and to all formal complaints of sexual harassment.

Formal Investigation

If the Title IX coordinator determines that there is reasonable cause to pursue the complaint, a formal investigation will be initiated. The university has the burden of proof and the burden of gathering evidence sufficient to reach a determination regarding responsibility; the responsibility is not on the complainant or respondent. During the formal investigation, the Title IX coordinator or designated investigator will:

- identify at least one investigator to conduct the investigation. The Title IX coordinator may serve as an investigator if necessary;
- provide an equal opportunity for the parties to present witnesses, including fact and expert witnesses, and other inculpatory and exculpatory evidence;
- commence a thorough and impartial investigation by developing a strategic investigation plan, including a witness list, information list, intended investigation timeframe, and order of interviews for all witnesses and respondent;
- provide parties with sufficiently detailed written notice of alleged conduct, including the identities of the parties involved in the incident, if known, the conduct allegedly constituting sexual harassment, and the date and location of the alleged incident, if known;
- provide parties whose participation is invited or expected with written notice of the date, time, location, participants, and purpose of all hearings, investigative interviews, or other meetings, with sufficient time for the party to prepare to participate;
- complete the investigation in a reasonably timely manner, without unnecessary deviation from the intended timeline;
- document and communicate to parties the source of any reasonable delays, including absence of a party, a party’s adviser or a witness; concurrent law enforcement activity; or the need for language assistance or accommodation of disabilities;

- compile a comprehensive summary of evidence, including both inculpatory and exculpatory evidence;
- provide both parties an equal opportunity to inspect and review any evidence obtained as part of the investigation that is directly related to the allegations raised in the formal complaint, including the evidence upon which the university does not intend to rely in reaching a determination regarding responsibility and inculpatory or exculpatory evidence whether obtained from a party or other source, so that each party can meaningfully respond to the evidence prior to the conclusion of the investigation;
- maintain communication with complainant and respondent on the status of the investigation and overall process.

Upon completing a draft investigative report, the investigator shall provide a copy to complainant, respondent and each party’s respective advisers. Copies of the report must be delivered simultaneously. Complainant and respondent may review the report for a period of up to 10 days and may provide the investigator with additional documentation, including but not limited to a written response to the contents of the report.

At the end of the review period or upon receipt of confirmation that parties are prepared to move forward, the investigator must incorporate any provided information into a final report.

Upon completing the final investigative report, the investigator must simultaneously provide copies to the complainant, respondent, and each party’s respective advisers.

Following the delivery of the reports, the Title IX coordinator or designee must schedule an administrative hearing for no less than 10 days after the date of delivery. Additional information, including responses to the report’s content, may be presented at any time prior to the commencement of an administrative hearing or at designated times during the hearing.

Supportive Measures

All parties in a Title IX process have a right to supportive measures. Supportive measures are non-disciplinary, non-punitive individualized services offered as appropriate, as reasonably available, and without fee or charge to complainant or respondent before or after the filing of a formal complaint or where no formal complaint has been filed. Such measures are designed to restore or preserve equal access to the university’s education program or activity without unreasonably burdening the other party, including measures designed to protect the safety of all parties or the university’s educational environment, or deter sexual harassment. Supportive measures may include counseling, extensions of deadlines or other course-related adjustments, modifications of work or class schedules, campus escort services, mutual restrictions on contact between the parties, changes in work or housing locations, leaves of absence, increased security and monitoring of certain areas of the campus, and other similar measures.

Emergency Removal of Students and Employees

The university may, in emergency circumstances, limit or prohibit a respondent from accessing campus during the Title IX investigative process. Prior to issuing an interim removal of a respondent, the Title IX coordinator or designee must:

- undertake an individualized safety and risk analysis, which determines whether the presence of respondent poses an immediate threat to the physical health or safety of any individual within the Quinnipiac community;
- provide respondent with notice of alleged conduct; and
- provide respondent with notice of removal and information about how to challenge the removal.

Respondents may challenge a removal in writing within 3 days of the removal. The Title IX coordinator or designee shall evaluate the emergency removal by considering 1) the possible threat to the physical health or safety to individuals within the Quinnipiac community and 2) the reliability of the available information about the reported incident.

Administrative Leave of Employees

The university may place a non-student employee respondent on administrative leave during the pendency of a Title IX investigative process.

Title IX Administrative Hearing

Upon dissemination of the final report, the Title IX coordinator or designee will schedule an administrative hearing.

A single trained and impartial hearing officer shall review all evidence and conduct a hearing pursuant to this policy. The hearing officer is responsible for determining whether, under a preponderance of the evidence standard, the respondent is responsible for the alleged conduct. If respondent is found responsible, the hearing officer shall assign appropriate sanctions in accordance with this policy and with other related conduct processes, as described in the student Code of Conduct or in the Employee Handbook. The goal of the hearing is to provide a resolution through an equitable process, respecting the rights of all participants.

Requirements for the Hearing Officer

The hearing officer is an independent decision-maker who serves at the request of the Title IX coordinator. The hearing officer is responsible for conducting an administrative hearing, pursuant to an established hearing script. Through the administrative hearing, the hearing officer is required to objectively evaluate all relevant evidence, both inculpatory and exculpatory.

Any individual who serves as a hearing officer shall be trained annually pursuant to the training requirements under applicable state and federal law. The hearing officer is expected to serve impartially, avoiding prejudgment of the facts at issue, and be free of conflicts of interest, and bias. Additionally, the hearing officer must avoid credibility determinations based on a person's status as a complainant, respondent or witness.

Scope of Hearing Officer's Authority

The hearing officer has the authority to adjudicate alleged violations of the Student Code of Conduct or the Employee Handbook that are related to the same incident under review, though may not be directly related to gender-based conduct.

Advisers

Advisers serve as a moral and emotional support for students during the grievance procedures and can assist with meeting preparation. Advisers are not permitted to advocate for a student or speak on their behalf during a hearing, except for the purpose of conducting a cross-examination on relevant evidence. Parties who are witnesses to the incident or are otherwise involved in the matter before the hearing officer cannot serve as advisers.

Parties who intend to conduct a cross-examination of the opposite party or any witnesses must bring an advisor to the hearing. If a party does not have an adviser, the university will, upon request, provide a trained adviser to conduct any cross-examinations.

A party who requires that the university provide an adviser should notify the Title IX coordinator in writing at least 48 hours before the hearing. The university reserves right to establish restrictions regarding the extent to which the adviser may participate in the proceedings, so long as the restrictions apply equally to both parties.

Hearing Process

The Title IX coordinator or designated investigator will meet with both complainant and respondent prior to the hearing to outline the hearing process and answer questions. Prior to the hearing, the Title IX coordinator or designated investigator will:

- prepare a final copy of the investigative report, including any evidence gathered during the course of the investigation, to be disseminated to the hearing officer, complainant, respondent, and each party's adviser 10 days before the hearing;
- be available to both complainant and respondent to answer questions and address concerns with the process;
- schedule the administrative hearing, and select a hearing officer from the pool of eligible members based on availability and lack of conflict;
- contact witnesses and work to ensure their availability for the administrative hearing;
- arrange accommodations intended to limit contact between hearing participants (i.e., arranging accommodations in different rooms, setting up physical barriers in the hearing room);

At the administrative hearing, the following individuals may be present:

- Hearing Officer
- Adviser for Complainant(s)
- Adviser for Respondent(s)
- Witnesses (only one at any one time)
- Title IX Coordinator and/or Deputy Coordinator (if not an investigator)
- University Counsel

The hearing officer will conduct the hearing in accordance with the hearing script. The script ensures that the parties have an opportunity to give opening statements, that the hearing officer has the opportunity to ask questions of all parties and witnesses, and that both parties have an opportunity to ask relevant questions through cross-examination.

Additionally, the hearing script ensures:

- all parties are introduced;
- all allegations are read; and
- respondent is provided an opportunity to plead “responsible,” “not responsible,” or decline to make a plea, for each allegation.

If any individual should become disruptive during the hearing, including witnesses and advisors, the hearing officer maintains the discretion to remove that individual from the hearing.

Once the hearing officer has heard all evidence, including opening statements and cross-examinations, and has had an opportunity to ask questions of parties, witnesses, and the investigator(s), the hearing officer will deliberate privately to determine whether respondent is responsible for the alleged conduct.

After the hearing officer has made a decision, the hearing officer will reconvene with the hearing participants and will announce their conclusion. If respondent is found responsible for the alleged conduct, the hearing officer will commence the sanction phase of the hearing. If respondent is found not responsible for the alleged conduct, the hearing will end.

During the sanction phase of the hearing, the hearing officer will:

- accept optional impact statements from both parties, verbally and/or in writing;
- ask the Title IX coordinator or designee to disclose respondent’s past violations of the Code of Conduct or of the Employee Handbook, if any;
- ask the Title IX coordinator or designee for sanction parameters, as defined by university policy.

At the conclusion of the sanction phase, the hearing officer will deliberate privately. After a sanction decision is made, the hearing officer will reconvene with the participants of the hearing to announce the sanction decision and close the hearing.

After the conclusion of the hearing, the Title IX coordinator or designated investigator will meet with both parties separately and will answer any questions about the sanctions or any post-hearing requirements.

The hearing officer has two business days from the close of the hearing to produce a written decision letter to both parties. Once completed, the decision letter is delivered to the Title IX coordinator for simultaneous delivery to both parties.

Students needing accommodations may make requests through the Office of Student Accessibility. Employees needing accommodations may make requests through Human Resources.

Neither parties nor witnesses may use audio or video recording devices during a hearing. The university shall make an audiovisual recording, or transcript, of any live hearing and make it available to the parties for inspection and review.

Sanctions-only Hearing

Should respondent accept responsibility for alleged violations but disagree with the sanctions proposed by the Title IX coordinator, a sanctions-only hearing will be conducted. For a sanctions-only hearing, the hearing officer shall introduce the parties, read the charges, and ask

any questions necessary for determining an appropriate sanction. Once the hearing officer has asked any necessary questions, the hearing officer will advance directly to the sanction portion of the hearing.

Cross-Examination

The hearing officer must permit each party’s adviser to ask the other party and any witnesses all relevant questions and follow-up questions, including those challenging credibility. Such cross-examination at the live hearing must be conducted directly, orally, and in real time by the party’s adviser of choice and never by a party personally.

At the request of either party, the university will provide for the live hearing to occur with the parties located in separate rooms with technology enabling the decision-maker and parties to simultaneously see and hear the party or the witness answering questions.

Only relevant cross-examination and other questions may be asked of a party or witness. Before a complainant, respondent or witness answers a cross-examination or other question, the hearing officer must first determine whether the question is relevant and explain any decision to exclude a question as not relevant. If a party does not have an adviser present at the live hearing, the university will provide an advisor of the university’s choice to conduct cross-examination on behalf of that party.

Questions and evidence about complainant’s sexual predisposition or prior sexual behavior are not relevant, unless such questions and evidence about the complainant’s prior sexual behavior are offered to prove that someone other than the respondent committed the conduct alleged by the complainant, or if the questions and evidence concern specific incidents of the complainant’s prior sexual behavior with respect to the respondent and are offered to prove consent.

If a party or witness does not submit to cross-examination at the live hearing, the hearing officer must not rely on any statement of that party or witness in reaching a determination regarding responsibility. The hearing officer cannot draw an inference about the determination regarding responsibility based solely on a party’s or witness’s absence from the live hearing or refusal to answer cross-examination or other questions.

Sanctions

All sanctions shall be designed to maintain complainant’s equal access to education programs or activities.

Sanctioning Guidelines for Students

- Students found responsible for violating this policy in regard to fondling, dating violence, domestic violence, or stalking will likely receive a sanction ranging from probation to expulsion, depending upon the severity of the incident and any previous violations of the Student Code of Conduct.
- Students found responsible for violating this policy in regard to sexual assault that meets the definition of rape will likely receive a sanction of suspension, dismissal or expulsion.
- Students found responsible for violating this policy in regard to sexual harassment that creates a hostile environment will likely receive a sanction ranging from an official reprimand to expulsion, depending upon the severity of the incident and any previous violations of the Student Code of Conduct.
- The hearing officer will sanction students found responsible for violations of the Student Code of Conduct not related to this policy

in accordance with sanctions used in the general Student Conduct Process.

Sanctioning Guidelines for Employees

- Employees found responsible for violating this policy in regard to fondling, dating violence, domestic violence, or stalking will likely receive a sanction ranging from a written warning to termination, depending upon the severity of the incident and any previous violations of the Employee Handbook.
- Employees found responsible for violating this policy in regard to sexual assault that meets the definition of rape will likely be terminated from the university.
- Employees found responsible for violating this policy in regard to sexual harassment that creates a hostile environment will likely receive a sanction ranging from a written reprimand to termination, depending upon the severity of the incident and any previous violations of employment policies.
- The hearing officer may, at the discretion of Human Resources, issue sanctions for violations of the employment policies not related to this policy.

The hearing officer reserves the right to increase or decrease the recommended sanction guidelines listed above in the case of significant mitigating or aggravating factors. Neither the hearing officer nor the appeal officer will deviate from the guidelines listed above unless significant mitigating or aggravating factors exist. The hearing officer also reserves the rights to include additional sanctions, educational or otherwise.

Parental Notification of Students

Quinnipiac reserves the right to communicate with a parent or guardian of a student regarding any student conduct action taken by the university, in accordance with FERPA.

Appeals

After receiving notification of the hearing officer's decision, or after receiving notification that the university dismissed a formal complaint or any allegation therein, both complainant and respondent have five business days to notify the Title IX coordinator of their intent to appeal the decision. A formal letter of appeal specifying the grounds upon which the appeal is based and supporting information must be submitted within five days of notification of the hearing officer's decision or notification of dismissal. The Title IX coordinator has the discretion to extend the deadline for submission of a letter of appeal.

Sanction(s) imposed by the hearing officer will remain in effect while the appeal is pending. The letter of appeal specifies the grounds upon which the appeal is based, and how those grounds materially affected the outcome (responsibility or sanctions) of the original meeting.

The letter of appeal must be completed and signed by the student or submitted directly from the party's Quinnipiac University email account. The appeal officer may request follow-up information from the investigator(s) or from either party, as necessary to make a fair determination.

Complainants or respondents who fail to attend the administrative hearing forfeit the right to request an appeal.

Both parties may appeal regarding the determination of responsibility, and from the dismissal of a formal complaint or any allegations therein, on the following bases:

- new evidence that was not reasonably available at the time the determination regarding responsibility or dismissal was made, that could affect the outcome of the matter;
- procedural irregularity that affected the outcome of the matter;
- the Title IX coordinator, investigator(s), or decision-maker(s) had a conflict of interest or bias for or against complainants or respondents generally or the individual complainant or respondent that affected the outcome of the matter; or
- the sanction(s) assigned by the hearing officer did not adhere to the sanction guidelines stated in this policy.

The university Title IX coordinator receives the request for an appeal. Upon receipt, the Title IX coordinator designates a trained university staff member to serve as the appeal officer. Both parties shall be given equal opportunity to submit a written statement in support of, or challenging, the outcome. If the appeal letter(s) does not bring forward sufficient grounds for appeal, the officer will deny the appeal.

If the appeal officer determines that the appeal should be considered, the appeal officer may:

- affirm the decision of the hearing officer. In this case, the initial decision is final;
- remand the matter for re-investigation or re-hearing, depending on which is necessary to absolve the grievance process of error or irregularity; and/or
- initiate a new Title IX administrative hearing.

Compliance with Sanctions and Accommodations

At the conclusion of the Title IX grievance process, the Title IX coordinator will be responsible for ensuring compliance with all assigned sanctions.

Introduction

Quinnipiac University welcomes and values students of all genders. The purpose of this guide is to provide trans-identifying and transitioning students with information and resources that promote an inclusive campus experience.

Content in the guide focuses on student and campus-related student experiences and resources. Some of the information may also be useful to alumni, staff and faculty.

Trans-identifying and transitioning faculty and staff are welcome to seek supplemental information from the Title IX Office or from the Office of Human Resources.

Discrimination and Harassment

Title IX Policy Against Gender-Based Discrimination and Sexual Misconduct

Title IX of the Education Amendments of 1972 prohibits discrimination based on sex in educational programs and activities that receive federal financial assistance. To ensure compliance with Title IX and other federal and state laws, Quinnipiac University has developed policies that prohibit discrimination and misconduct on the basis of gender, such as sexual misconduct, sexual violence, sexual harassment, intimate

partner violence, stalking and any other gender-based harassment or misconduct.

Quinnipiac University is committed to providing an environment free from all forms of gender or sex discrimination and sexual misconduct.

Members of the university community, guests and visitors have a right to be free from sexual harassment, violence and of gender-based discrimination and harassment. The policy is intended to define community standards and to outline the investigation and grievance process when those standards are violated.

These policies apply regardless of the complainant's or respondent's sexual orientation, sex, gender identity or expression, age, race, nationality, religion or ability. Harassment or discrimination based upon an individual's sexual orientation may be considered gender-based and be subject to the policy. Also, prohibitions against discrimination and harassment do not extend to statements or written materials that are germane to the classroom or academic course of study.

Reporting Harassment or Discrimination Based on Sexual Orientation, Gender Expression, or Gender Identity

Students who believe they have experienced or witnessed an incident of discrimination or harassment should immediately contact the Title IX Coordinator:

Title IX Coordinator, Dennis Kwarteng, 203-582-7327

There are many additional people on campus who are trained and ready to help. You can reach out to the following individuals for assistance, or if you have questions about Quinnipiac's policies:

- Vice President for Equity, Inclusion, and Leadership Development, Donald Sawyer, 203-582-8964
- Vice President and Dean of Students, Monique Drucker, 203-582-8753
- Dean for Graduate Student Affairs, Gina Frank, 203-582-3542
- Associate Dean of Students, School of Law, Kathy Kuhar, 203-582-3220
- Associate Dean of Students, Netter School of Medicine, Steve Paik, 203-582-4859

For details on informal and formal complaints, please see the Title IX Policy Against Gender-Based Discrimination and Sexual Misconduct (p. 121).

Campus Resources

Gender-Inclusive Bathrooms

Gender-inclusive restrooms are available to people of all genders. These restrooms can benefit many different people, including parents and children, and people with disabilities who may require the accompaniment of an attendant of a different gender. At QU, our gender-inclusive restrooms are single-use lockable rooms with a toilet and sink, designed for use by one individual at a time, regardless of gender. Gender-inclusive restrooms are an inclusive space for students, faculty, staff and community members of all genders.

People at Quinnipiac are encouraged to use the restroom that corresponds to their gender identity.

The following is a list of gender-inclusive, single-stall restrooms on campus:

- MNH-148
- MNH-297
- SLE-309C
- LA-211
- ABLN-106
- AC-124B
- Rocky Top Student Center, York Hill Campus – 4th floor
- FOB, two stalls in basement
- Echlin, 2nd floor (on the Honor's end of the hallway)
- South end of Mount Carmel Dining Hall
- CAS3, downstairs
- CCE, first floor
- Student Affairs Center lobby

Confidential Resources

On-campus resources are available that can provide confidentiality, sharing options and advice without any obligation to inform other university staff members unless requested. Such on-campus confidential resources include counseling services, student health services (SHS) and/or religious life and other designated resources.

Student Health Services

SHS has two clinic locations: one on the Mount Carmel Campus and one on the York Hill Campus. They are staffed by registered nurses, physician assistants, nurse practitioners, and a supervising physician. You can schedule an appointment by logging in with your QU login to the student health services website (<https://studenthealthservices.quinnipiac.edu/home.aspx>). SHS can be reached by phone at 203-582-8742.

All SHS staff members receive education and training regarding gender identity and gender expression. The highest priority of the staff is meeting the emergent health needs of the student population and providing ongoing health education opportunities as an integral part of the college experience. If your health or medical needs require ongoing treatment, student health services staff can provide referrals to providers in the area that are aware and affirming of the needs of transgender and non-binary patients. Transportation to off-campus appointments is also available at no cost if scheduled when the health center is open. Call the health center at 203-582-8742 to schedule a ride to an off-campus appointment.

Appointments are also available with a registered dietitian, who can address nutritional concerns, and a wellness educator, who is trained in sexuality education and can provide resources. Call the health center at 203-582-8742 to make appointments with these staff members.

Additional information can be found on the Student Health Services website on MyQ (<https://myq.quinnipiac.edu/Student%20Life/Student%20Health%20Services/Pages/default.aspx>).

Counseling Services

The university counseling service also provides free confidential counseling for students who would like to talk to a mental health clinician. An appointment can be requested by completing the counseling intake form (<https://forms.quinnipiac.edu/CounselingIntake/Form.html>).

A confidential mental health clinician can be reached for crisis counseling over the phone at any time by dialing 203-582-6860, and following the menu.

Office of Religious Life and the Peter C. Herald House for Jewish Life

Students who prefer to seek confidential spiritual counseling can call the executive director of university religious life at 203-582-8257.

Students interested in speaking to the university rabbi may call 203-582-8206.

Non-Confidential Resources

Department of Cultural and Global Engagement

The Department of Cultural and Global Engagement, which can be reached at 203-582-8425, promotes inclusion and diversity through engaged learning for students, faculty and staff at Quinnipiac University. The department offers mentorship and support for underrepresented students, including students who are part of the LGBTQ+ community

Title IX

The Title IX coordinator responds to allegations of discrimination pursuant to university procedures in a manner that is prompt, thorough and equitable. The Title IX coordinator is a resource to students, faculty and staff and can answer questions about university policies, procedures and practices.

The Title IX coordinator can be reached by phone at 203-582-7327 or by email at dennis.kwarteng@qu.edu

Public Safety

Public Safety provides coverage on all three campuses 24 hours a day, seven days a week and can be reached at 203-582-6200 or public.safety@qu.edu (public.safety@quinnipiac.edu). Public Safety officers can respond to all emergencies and are available to serve as walking escorts 24 hours a day.

Off-Campus Resources

- New Haven Pride Center (<http://www.newhavenpridecenter.org/>)
- Anchor Health Initiative (<https://anchorhealthct.org/>) (Hamden health clinic with a mission to serve the LGBTQ+ community)
- Hartford Gay and Lesbian Health Collective (<https://www.hglhc.org/>)
- Triangle Community Center (<http://www.ctpridecenter.org/>)
- True Colors Sexual Minority and Youth Services (<https://ourtruecolors.org/>) (Hartford)
- OutCT (<http://outct.org/>) (New London)
- Connecticut TransAdvocacy Coalition (<http://www.transadvocacy.org/>)
- Planned Parenthood of Southern New England (<https://www.plannedparenthood.org/planned-parenthood-southern-new-england/>) has a New Haven location and provides a range of sexual health services for the LGBTQ+ community.

Student Organizations

The Gender and Sexuality Alliance

Gender and Sexuality Alliance (GSA) serves as a safe haven for all students who identify as members of the LGBTQ+ community, as well as allied supporters who want to get involved. In addition to providing a nurturing environment, GSA strives to educate students on issues facing the LGBTQ+ community currently and historically. Visit the GSA website (<https://qu.campuslabs.com/engage/organization/gsa/>) for more information.

Athletics

Quinnipiac seeks to ensure that no student, faculty or staff member is excluded from participation in or denied the benefits of any university

program or activity on the basis of sex, gender, gender identity, or gender expression. The prohibition on discrimination applies to all university activities including athletics and recreational sports.

NCAA Sports

For more information about inclusion in NCAA sports, please visit the NCAA's website for Inclusion of Transgender Student Athletes Handbook. You can also contact the director of compliance and student development, Shanna Alexander, at 203-582-7332.

Intramural Sports

A participant's affirmed gender identity will be respected when there are gender-specific rules or player ratio requirements for co-rec divisions. Transgender individuals may play on the team that best matches their gender identity. Quinnipiac recognizes that, for many, coming to know one's gender identity is not something that happens in an instant; it is a complex process that can occur over an extended period of time. Participants are encouraged to communicate their gender identity with the campus official who is responsible for approving the team entry on intramural leagues. The campus official who approves the team entry on IM Leagues should verify that the gender indicated on the form is based on the participant's self-identification and expressed gender identity, rather than on the sex indicated in official school records.

Club Sports

In keeping with the university's policy of non-discrimination and non-retaliation on the basis of gender identity and gender expression, the Quinnipiac Sport Club program supports and values an individual's right to access and utilize recreation facilities, restrooms, locker rooms, programs and services in accordance with an individual's gender identity and gender expression. Participation in club sports may have policies related to player eligibility that are stipulated by the national governing body of each sport. While the program does not have control over governing body policies, we support and advocate for the inclusion of all players, regardless of gender identity and gender expression.

Residential Life

Incoming students who have a gender or gender-identity related concern regarding university housing can speak with the associate director of residential life about housing options. The conversation will include a discussion about type of room, bathroom facilities and roommate matching options, after which a housing assignment will be made. A student may opt out of any accommodations offered prior to the start of the semester with no financial penalties. The associate director of residential life will be in touch, via email, with any students whose gender recorded on the new student housing questionnaire does not match the legal sex recorded in the university's data collection system. Students who would like to initiate this conversation in an alternative way, have questions about this housing process or who would like to learn more about the housing options available for students who identify as non-conforming or transgender should contact the associate director of residential life at 203-582-8736. All residential life staff members receive education and training regarding diversity and inclusion, including gender identity and gender expression.

Fraternity and Sorority Life

Quinnipiac welcomes students to join a fraternity or sorority that best reflects their gender identity. For information, students can contact the director of campus life for fraternity and sorority life, Katherine Pezzella, at 203-582-6487.

Updating Records Pertaining to Names and Gender Markers

Notifying the Registrar's Office of a Legal Name Change Student Employee – Human Resources

University students who also are employed and paid through university payroll must follow the same guidelines as all other employees for a name change.

A student employee must complete the change of name form request and submit official documentation. For the purposes of payroll, the name reflected on a person's Social Security card must match the paychecks issued.

Current Student – Registrar

Active students wishing to request a name change must do so through the Office of the Registrar. A current student would submit the name change request in writing (signature is required) along with a copy of one of the following:

- a. A marriage license
- b. New Social Security card
- c. New driver's license (or other form of government-issued ID)
- d. New passport
- e. Or other legal documentation confirming legal name change

Prospective Student – Admission

Prospective students requesting a name change should provide a written request to their specific Admissions Office (undergraduate, graduate, School of Law or School of Medicine).

The request should be made in writing (with signature) and one of the following should be submitted with the request:

- a. A marriage license
- b. New Social Security card
- c. New driver's license (or other form of government-issued ID)
- d. New passport
- e. Or other legal documentation confirming legal name change

Preferred Name Policy for Students

Quinnipiac University recognizes that some students prefer to identify themselves by a first name and/or middle name other than their legal name. Under Quinnipiac's preferred name policy, any student may choose to identify a preferred first and/or middle name in addition to the legal name. Quinnipiac's policy covers preferred first and middle names. Surnames can be changed only with a legal name change.

The student's preferred name will be used where possible in the course of university business and education. The legal name will be used only when it is required for business, legal and external reporting purposes. In some cases, in order to promote the use of the student's preferred name while ensuring accurate and legitimate reporting and utilization of education records, the student's preferred name will be utilized alongside the student's legal name. For detail, see the lists below.

Students may request use of a preferred first and/or middle name by contacting the Office of the Registrar. All requests are reviewed by the Office of the Registrar. Preferred names may not be used for purposes of fraud or misrepresentation. The university reserves the right to remove a preferred name if it contains inappropriate or offensive language. Legal names will be changed only when a student pursues a legal name change

with state and/or federal authorities as appropriate and then submits that documentation to the Office of the Registrar.

It may take seven or more business days for the request to be completed through all university information systems. Once the preferred name request has been approved and implemented, the student will be notified and may go to the QCard Office to obtain a QCard with the student's preferred name.

Preferred names only will be used in public or semi-public systems where names are visible to other students, instructors, faculty, campus officials, and the general public. Specific examples are:

- University ID card (if the student chooses to obtain a new QCard)
- Blackboard (official class rosters not on Blackboard will display the legal name as well)
- Email address display name (i.e., the name that appears in the "from" field of an email)
- Email Address Alias (i.e., email sent to preferredfirstname.lastname@qu.edu automatically will be forwarded to the primary email address, which is legalfirstname.lastname@qu.edu)

Students who wish that their preferred first name be read at Commencement should contact their school's dean's office prior to Commencement.

Both preferred names and legal names will be used in confidential administrative systems (non-public) used by staff, instructors, faculty and campus officials. These administrative systems require authentication and authorization for user access. The inclusion of both names in these confidential systems promotes use of the student's preferred name, while at the same time ensuring accurate and legitimate reporting and utilization of education records. Specific examples are:

- Official class rosters
- WebAdvisor/Self-Service – student view
- WebAdvisor/Self-Service – faculty view (e.g., grading rosters, adviser rosters)

Legal names only will be used when required for business, legal and external reporting purposes. Specific examples include, but are not limited to:

- Student conduct records
- Counseling and health records
- Immigration documentation
- Paychecks
- One Stop (formerly the Bursar's office) documentation
- Financial aid documentation
- Federal requests for information
- Enrollment verifications
- Transcripts
- Academic certifications and degree verifications
- Diplomas
- Printed Commencement program (the preferred name may be read out loud at Commencement – see above)
- Admissions correspondence
- Athletics rosters
- Department of Public Safety systems and documentation

34 C.F.R. § 106.45(b)(10) requires Quinnipiac University to publish any materials used for training Title IX coordinators, investigators, decision-makers and persons who facilitate informal resolutions on the university's website. In compliance with the law, the university has made available all training materials for public review.

- Title IX - Training for Title IX (pre-workshop) (https://www.qu.edu/globalassets/global/media/qu/documents/about/policies/title-ix/quinnipiac-title-ix_investigator-training-preworkshop-aug2020.pdf)
- Title IX - Training for Title IX Team Members (https://www.qu.edu/globalassets/global/media/qu/documents/about/policies/title-ix/quinnipiac-title-ix_investigator-training-aug2020.pdf)
- Title IX Training for Appeal Officers (https://www.qu.edu/globalassets/global/media/qu/documents/about/policies/title-ix/quinnipiac-title-ix_training-for-appeal-officers.pdf)
- Title IX Rights (<https://www.qu.edu/globalassets/global/media/qu/documents/about/policies/title-ix/quinnipiac-title-ix-rights-handout.pdf>)
- Preliminary Review (https://www.qu.edu/globalassets/global/media/qu/documents/about/policies/title-ix/quinnipiac-title-ix_preliminary-review.pdf)
- Conduct Grievance Procedures for Allegations of Discrimination Under Discrimination, Harassment and Bias-Motivated Acts and Behavior Policy (https://www.qu.edu/globalassets/global/media/qu/documents/about/policies/title-ix/quinnipiac-title-ix_t9-conduct-process.pdf)
- Policy Analysis for Allegations of Dating or Domestic Violence (https://www.qu.edu/globalassets/global/media/qu/documents/about/policies/title-ix/quinnipiac-title-ix_dating-and-domestic-violence.pdf)
- Policy Analysis for Allegations of Sexual Assault (https://www.qu.edu/globalassets/global/media/qu/documents/about/policies/title-ix/quinnipiac-title-ix_sexual-assault.pdf)
- Policy Analysis for Allegations of Sexual Harassment (https://www.qu.edu/globalassets/global/media/qu/documents/about/policies/title-ix/quinnipiac-title-ix_sexual-harassment-hostile-environment.pdf)
- Policy Analysis for Allegations of Stalking (https://www.qu.edu/globalassets/global/media/qu/documents/about/policies/title-ix/quinnipiac-title-ix_stalking.pdf)

Transfer Credit – Current Undergraduates

Quinnipiac University is committed to having its students take courses that best fit their required curricula at the appropriate academic level. Once undergraduate students have matriculated at Quinnipiac, they normally are not allowed to take courses for credit elsewhere. If there is a compelling academic reason, the university will accept up to two courses for transfer credit from an accredited institution, assuming grades of "C" or better. To receive credit, the course(s) must be preapproved by the appropriate dean based on an official course description provided by the student. Ordinarily, permission to take a summer or intersession course elsewhere is *NOT* given if:

- The course (or an equivalent that meets the requirement) is offered online during the same period by Quinnipiac.
- The course is offered during the same period on the Quinnipiac campus and the student is residing in the state of Connecticut.

If either of these two requirements is inappropriate for an individual student, they may petition for an exception from the dean through the university's Variant Procedure (p. 136) process. Once a student has completed (or transferred) a total of 48 credits, they will not be permitted to take a course at a junior or community college offering two-year terminal degrees. Students must take their final 45 credits at Quinnipiac. Students who study abroad during the summer or winter intersession are exempt from the two-course limit.

Quinnipiac University has different policies that apply to courses taken elsewhere through its approved Study Abroad (p. 50) and Washington, D.C., Semester (p. 258) programs.

Please see the Advanced Standing/Placement (p. 22) page of the catalog for more information on transferring credit for incoming first-year and incoming undergraduate transfer students.

Transfer Credit - Graduate Students

Graduate course credit completed with a grade of B or better at other regionally accredited institutions prior to matriculation at Quinnipiac *may* be transferred into a graduate program at Quinnipiac. Consistent with State Department of Education policies, upon individual review the MAT program may accept up to 6 transfer credits completed with a grade of B- or higher.

The normal transfer credit limit for each graduate program is indicated below, although additional transfer credits may be considered on an individual basis. Requests for transfer of credit must be submitted to the appropriate graduate program director along with official transcripts from the institution(s) where the credits were earned. Ordinarily, transfer of credit is granted for courses demonstrated to be similar in content, level of instruction and objectives to courses within a student's graduate curriculum at Quinnipiac. Additional program-specific requirements are indicated below.

Graduate programs that do not accept transfer credits:

- MHS in Advanced Medical Imaging and Leadership
- MHS in Cardiovascular Perfusion
- Master of Occupational Therapy
- Doctor of Physical Therapy
- MHS in Physician Assistant
- MHS in Pathologists' Assistant
- MHS in Radiologist Assistant
- MD program
- MS in Organizational Leadership

Graduate programs that may accept up to 3 transfer credits

- MS in Accounting
- MS in Business Analytics
- Occupational Therapy Doctorate
- Occupational Therapy Certificate
- Online Course Design Certificate
- Professional Master of Business Administration

Graduate programs that may accept up to 6 transfer credits:

- MAT Elementary Education
- MAT Secondary Education
- MS in Cybersecurity
- MS in Instructional Design and Technology

- MS in Special Education
- Special Education Certificate

Graduate programs that may accept up to 9 transfer credits:

- MHS in Biomedical Sciences
- Master of Business Administration
- MS in Molecular and Cell Biology
- Master of Science in Nursing
- Doctor of Nursing Practice
- Educational Leadership Certificate
- MS in Interactive Media and Design
- MS in Journalism
- MS in Sports Journalism
- MS in Public Relations

All MSN and DNP nursing programs will only consider transfer of course credit taken within the last five years. In addition, the Nurse Anesthesia program will only consider transfer credits of the nursing core essentials, not sciences or anesthesia courses. For the JD program, the maximum number of credits a student can transfer from another law school is 30.

For the MSW program, a maximum of 9 credits may be transferred from CSWE-accredited MSW programs; only 6 of these may be for electives. A maximum of 6 graduate credits from a related discipline may be eligible for transfer credit. Only courses completed with a grade of B or higher within five years of matriculation into the Quinnipiac MSW program will be considered for transfer.

Graduate level courses taken to complete a degree program at Quinnipiac may be applied to a second graduate degree (but not to a third graduate degree). These courses must be part of the approved curriculum of the second degree. No more than 25 percent of the combined credits in the two degree programs and no more than 50 percent of the credits in any one degree may be double-counted. For example, for two master's degrees requiring 30 credits each, 25 percent of the combined 60 credits may be double-counted (i.e., 15 credits). Students in dual-degree programs (combined undergraduate and graduate) may not transfer graduate course credit from another institution.

Tutorial Study

Quinnipiac University makes every effort to schedule courses so students can complete their curriculum in a convenient period of time. Occasionally, a student may need to take a course not scheduled during a particular semester to complete a program or meet a professional requirement. In such cases, students may request to take a course on an individual, tutorial basis. Courses taught on a tutorial basis may not have regularly scheduled class times. However, tutorial courses have the same academic standards and performance requirements of regularly scheduled courses. Applications for tutorial courses ("Individual Study Form") can be obtained from the program director, who will refer the student to the proper faculty member. The application with the instructor's signature must be filed before the first day of classes together with a registration form.

Use of Graduate Course Credits by Undergraduate Students

Advanced undergraduate students who lack a bachelor's degree may take graduate courses in some programs. Graduate courses are taught at an

advanced level and no special consideration is made for undergraduate students who have enrolled in graduate classes on a space-available basis. With the permission of the dean's office of the school/college, up to three courses (9–12 graduate credits) may be used to fulfill undergraduate degree requirements. These credits may be applied to meet the requirements of a subsequent graduate degree program if they are a part of the approved curriculum of the graduate program. Students enrolled in accelerated dual-degree programs may have the opportunity to apply more graduate courses to an undergraduate degree (see the program's curriculum for details). However, a full year of study (minimum of 18 graduate credits) must be taken after the conferral of the undergraduate degree to earn a graduate degree. Students also must meet all of the curriculum and graduation requirements of their individual graduate degree program.

Variant Procedure Policy

All Quinnipiac University academic policies and requirements are designed to maintain the standards of academic quality and accreditation, and to promote student learning. Students and faculty are bound by the policies and requirements outlined in this catalog. However, individual circumstances may warrant a student to petition to be exempted or granted a variance from a particular policy or requirement. This petition should be stated briefly by the student on the electronic Variant Procedure Form, which is available on the Registrar's Office MyQ site. It is strongly recommended that the variant form be accompanied by a letter of explanation and supportive documentation.

The Variant Procedure Form must be examined in turn by the department chair or program director, academic dean of the student's home school/college (or designee) and the vice president for academic innovation and effectiveness. The final decision to accept or deny the variant procedure request will be made by the vice president for academic innovation and effectiveness.

Withdrawal from a Course

Approved by the Faculty Senate in Spring 2019

Regular Withdrawal

Students can drop courses through the fifth class day of the term (Fall/Spring 15-week courses) or through the second class day of the term (Summer sessions I and II, Fall/Spring 7-week courses, J-term). If a course is dropped during these periods, no record of registration in the course will appear on the student's academic record. However, tuition charges may still apply. Students should refer to the university's refund policies (<https://www.qu.edu/one-stop-student-administrative-services/managing-student-finances/policy-information/withdrawal-and-refund-policies/>) for more information.

Dropping a course after the add/drop period has ended is considered a course withdrawal. A student may withdraw from a course offered in a traditional semester (15-week) format up to the end of the 10th week of classes. For courses offered during the summer or in accelerated or other nontraditional formats, the withdrawal period extends up to the completion of 60 percent of the scheduled class sessions. Course withdrawals after the end of add/drop period are considered "attempted but not completed" course credits and are noted on a student's transcript with a non-punitive grade of W, which is not included in GPA calculations.

For *full-time undergraduate students*, in accordance with the undergraduate refund policy (<https://www.qu.edu/one-stop-student->

administrative-services/managing-student-finances/policy-information/withdrawal-and-refund-policies/?contentTab=tab-16168), there is **no tuition refund** in any circumstance for course withdrawals after add/drop period. *Graduate and part-time students* should refer to the university website for the graduate and part-time refund policy (<https://www.qu.edu/one-stop-student-administrative-services/managing-student-finances/policy-information/withdrawal-and-refund-policies/?contentTab=tab-16169>).

Course withdrawal also may impact a student's satisfactory academic progress and financial aid eligibility.

Late Withdrawal

Students are expected to know when the last day to drop a class is and govern themselves accordingly. A late withdrawal may be granted only when a student has experienced circumstances of such serious and compelling nature that the student could not reasonably have been expected to satisfactorily complete the academic period or submit a petition for regular withdrawal by the deadline specified in this policy and on the Academic Calendar (p. 16). Such serious and compelling circumstances may include (but are not limited to) hospitalization, debilitating mental illness, or equivalent distress.

Following the regular withdrawal deadline, until the last day of classes but before the course grade has been conferred, students may request a **late withdrawal** by contacting the dean (or designee) of the student's home school. The request must be accompanied by appropriate documentation to substantiate the student's reasons for seeking late withdrawal. If the request is approved, the dean (or designee) will notify the instructor, contact the Office of the Registrar to process the late withdrawal and the student will receive a non-punitive grade of "W" in the course. The decision of the dean (or designee) regarding late withdrawals is final. There is **no tuition refund** in any circumstance for late course withdrawals.

Exceptional Circumstances

In the event a student experiences circumstances of such serious and compelling nature that the student could not reasonably have been expected to complete the final exam period or submit a petition for regular or late withdrawal by the deadlines specified in this policy and on the Academic Calendar (p. 16), the student may submit a variant procedure (p. 136) request to seek a non-punitive "W" in a course.

The variant procedure must be accompanied by appropriate documentation to substantiate the student's reasons for seeking the course withdrawal. The deadlines for submitting this variant procedure request are February 1 for the immediately preceding Fall semester, March 1 for the immediately preceding J-term, July 1 for the immediately preceding Spring semester, and October 1 for the immediately preceding Summer session(s). Once a degree has been conferred, no retroactive course withdrawals are permissible. Petitions submitted after the deadlines may be summarily denied for untimeliness. If the request is approved, the vice president of academic innovation & effectiveness will notify the instructor and contact the Office of the Registrar to process the withdrawal so that the student receives a non-punitive grade of "W" in the course. The decision of the vice president of academic innovation and effectiveness regarding course withdrawals is final. There is **no tuition refund** in any circumstance for late course withdrawals.

Summary of Course Withdrawal Deadlines

See the Academic Calendar (p. 16) to determine the exact date of the add/drop and withdrawal deadlines. All forms/requests must be submitted by 11:59 p.m. on the deadline date.

Term	Add/Drop Deadline	Regular Withdrawal Deadline
Fall (15-week courses)	End of 5th class day of the semester	End of 10th week of classes (Friday)
Fall (7-week courses)	End of 2nd class day of the semester	End of 4th week of classes (Friday)
J-Term	End of 2nd class day of the term	After 60% of classes
Spring (15-week courses)	End 5th class day of the semester	End of 10th week of classes (Friday)
Spring (7-week courses)	End of 2nd class day of the semester	End of 4th week of classes (Friday)
Summer I and II	End of 2nd class day of the session	After 60% of classes, e.g., end of 3rd week of classes for 5-week courses; end of 4th week of classes for 7-week courses (Friday).
Courses in accelerated & nontraditional formats	End of 2nd day after course start	After 60% of classes

Withdrawal from the University

Students considering withdrawal from Quinnipiac University should meet with their academic adviser or department chair to explore the available alternatives. If withdrawal is the student's final decision, it is recommended that they meet with the dean of their school.

Honorable release is granted when all financial obligations to Quinnipiac University have been met. The refund policy is available in the One Stop office.

A student receiving aid for education for the Veterans Administration must consult with the registrar and comply with Veterans Administration regulations. A student holding a Stafford Loan or Nursing Student Loan must have an interview in the financial aid office to ensure a clear understanding of repayment obligations. For details, see the One Stop webpage (<https://qu.edu/onestop/>).

If a student plans to withdraw and later is suspended, dismissed, placed on warning for unsatisfactory academic performance (including academic integrity sanctions), or suspended or expelled as the result of a judicial decision, the sanctions take precedence over the withdrawal and stand as a matter of record. Any academic warning becomes operative in the event that the student is readmitted to the university.

Administrative Withdrawal

Students are administratively withdrawn by the university if they have not registered for classes by the end of the drop/add period of any semester, if they have not returned to the university when the approved period of leave of absence has expired, or if they have not returned at the time specified after academic or disciplinary suspension and the period of suspension has not been extended.

Students who have been administratively withdrawn from the university must reapply for readmission. Readmission to Quinnipiac University is not guaranteed. A student who is granted readmission to the university may not be guaranteed readmission to the major in which they were enrolled at the time of administrative withdrawal. All students who are readmitted after an administrative withdrawal must comply with degree program requirements in effect at the time of readmission.

Readmission

Students who are not on an official leave of absence and who wish to return to Quinnipiac University must apply for readmission through the Admissions Office. Students with an official leave of absence who have been away from the university for two full semesters and completed less than two full semesters at Quinnipiac must reapply for admission. Official transcripts of any colleges attended while the student has been away from Quinnipiac must be provided. The Office of Admissions, the Office of Academic Innovation & Effectiveness, and the Dean of Students office will determine the student's eligibility for readmission.

A student who is granted readmission to the university may not be guaranteed readmission to the major in which they were enrolled at the time of administrative withdrawal. All students who are readmitted after an administrative withdrawal must comply with degree program requirements in effect at the time of readmission.

General Requirements

The requirements for the bachelor of arts and bachelor of science degrees are qualitative and quantitative. Completion of 120 credits with a grade point average of C or better is not in itself sufficient to qualify for graduation. In addition to the general Quinnipiac requirements, eligibility for most bachelor of arts and bachelor of science degrees requires the satisfactory completion of both arts and sciences requirements and those in a major or field of concentration. Specific major requirements are noted below under the individual departmental or area descriptions. Students should be cautioned that an average of C, or 2.0, in the

student's major is a minimum requirement for each major and that some departments may require higher standards as noted.

Of the 120 credits required for the bachelor's degree, only 6 credits of workshop courses and/or physical education courses may be applied. Primary responsibility for knowing and completing all course requirements rests with the student.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Academic Advising

The College of Arts and Sciences places every student, upon matriculation, with an individual faculty adviser who can best help him or her form a personalized academic plan. An outcome of each academic adviser's individualized guidance is that students come to understand the relationship between a particular discipline and a range of satisfying careers. Students also learn how an arts and sciences major can prepare them especially well for a life of consequence and meaning. Although the primary responsibility for setting academic goals and selecting courses rests with the student, the academic adviser fosters an ongoing conversation that cultivates self-reflection and development.

Students who enter the College of Arts and Sciences with a declared major are matched with a faculty adviser in that department. Each undeclared student works individually with an academic adviser to design a plan that is uniquely tailored to his or her needs and interests. During the preregistration period each semester, all students in arts and sciences meet with their academic advisers before selecting and registering for courses.

Career Development

In the College of Arts and Sciences, the career development office works with students to create and navigate a personalized career development program including major choice, personal branding, resume and LinkedIn development, networking, job search, professional development opportunities and graduate school advisement. Students can gain valuable work experience and explore career options through participation in credit-bearing experiential learning opportunities, including internships, research projects, shadowing, community service and part-time and summer employment.

Degrees in Arts and Sciences

Bachelor's Degrees

The College of Arts and Sciences offers bachelor of arts (p. 141) and bachelor of science degrees (p. 141).

Collaborative for Interdisciplinary/Integrative Studies (p. 143)

The Collaborative for Interdisciplinary/Integrative Studies affords students opportunities through advising, coursework and fieldwork to put into practice the relevance and value of the arts and sciences for their everyday lives. It houses the Environmental Science major, Environmental Studies co-major, the Interdisciplinary Studies major, the Independent major, the Sustainability and Environmental Policy major, the Independent

minor, and eight interdisciplinary minors (Asian Studies, Global Public Health, History and Philosophy of Science, International Studies, Irish Studies, Middle Eastern Studies, Sports Studies, and Women's and Gender Studies).

Independent Major (p. 143)

A student may design a unique major program to fit his or her individual goals. The responsibility for the planning of such a program rests with the student proposing it. A proposal for an independent major must contain suitable justification and a coherent curricular plan. The full proposal must be submitted to the dean for approval and also must have the approval of a three-member faculty committee, chosen by the student, which will work with the student to plan the program. Independent major proposals must be submitted no later than the first semester of the junior year. Independent majors must include at least 24 credits of coursework at the 300 level or above, as well as a capstone project or final evaluation project that is outlined in the proposal.

Graduate Degrees

Master's Degree in Molecular and Cell Biology

The Master's Degree in Molecular and Cell Biology is a two-year program for students who have already earned their bachelor's degree in a biological, medical or scientific field. The mission of the Department of Biological Sciences is to prepare students for employment in research fields available in pharmaceutical companies, universities and hospitals as well as to provide an excellent foundation for students intending to pursue studies in professional health care fields and doctoral programs.

Dual Degrees

The College of Arts and Sciences offers several dual-degree programs (p. 139) allowing highly motivated students to connect undergraduate studies directly to graduate degrees and professional preparation.

Minors

In addition to major programs, a student may apply to have a minor recorded on his or her transcript. The College of Arts and Sciences offers minors in most of the subjects offering a major as well as a variety of interdisciplinary minors (<http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/#text>) and an Independent Minor (p. 144). Arts and sciences students may complete a minor in one of the other schools to explore areas of interest in a pre-professional field while still obtaining the benefits of a flexible arts and sciences education. Students interested in a minor may consult the department chairperson or the faculty member listed for information/advising.

For a complete list of College of Arts and Science minors, please see Minors (p. 141).

Mission Statement

The faculty and students of the College of Arts and Sciences share a belief in the value of a comprehensive college education—an education that requires foundational study in the natural sciences, social sciences, humanities and fine arts, as well as a concentration in one of 24 majors. A degree in arts and sciences helps students build fulfilling and meaningful lives and is a strong basis for a preprofessional education. Careers in the 21st century require great creativity, critical thinking and fine writing. The ability to think is more important than any narrow job preparation. The arts and sciences curricula require demanding study while providing extensive faculty support in small classes and laboratories.

Whether a student is pursuing a bachelor of science or bachelor of arts degree, he or she is part of a learning community in which students and faculty are makers of knowledge, not simply receivers and dispensers. Faculty and students study and experience a society increasingly defined by global, scientific and cultural awareness and a diversity of populations. The course of study provides ample opportunity for students to participate in internships that help to bridge their education and its application. The college also offers several combined programs that connect undergraduate studies directly to graduate degrees and professional preparation. Most importantly, students in the arts and sciences engage in an exciting, well-rounded program of study that is both fulfilling and rewarding.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the **Admissions** page of this catalog.

Transfer Requirements

Transfer students should apply for admission by mid-November for the Spring (January) semester, or by April 1 for fall (August) entry. Official transcripts from all institutions attended must be provided. Most programs look for a minimum grade point average of 2.5 (some higher) for consideration.

Quinnipiac normally grants transfer credit for courses appropriate to the chosen curriculum, completed with a grade of C or better, at a regionally accredited post-secondary institution.

Bachelor of Arts

- Bachelor of Arts in Criminal Justice (p. 217)
- Bachelor of Arts in English (p. 197)
- Bachelor of Arts in Environmental Studies (p. 149)

College of Arts and Sciences Curriculum

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Collaborative for Interdisciplinary/Integrative Studies

The Collaborative for Interdisciplinary/Integrative Studies provides students with opportunities—through advising, coursework and fieldwork—to put into practice the relevance and value of the arts and sciences for their everyday lives. The Collaborative oversees the administration of interdisciplinary programs, supports the development of interdisciplinary curricula and initiatives, and promotes collaboration among faculty in teaching and research. It houses the Interdisciplinary Studies major, the Environmental Science major, the Environmental Studies co-major, the Sustainability and Environmental Policy major, the Independent Major, the Independent Minor and eight interdisciplinary minors (Asian Studies (p. 144), Global Public Health (p. 145), History and Philosophy of Science (p. 146), International Studies (p. 146), Irish Studies (p. 147), Middle Eastern Studies (p. 147), Sports Studies (p. 148) and Women's and Gender Studies (p. 148)). In addition, the Collaborative sponsors interdisciplinary initiatives, as well as programs and events that are open to and benefit the entire university community.

The Collaborative for Interdisciplinary/Integrative Studies is a signature program of the College of Arts and Sciences at Quinnipiac University, launched in 2016 with generous support from the Davis Educational Foundation. Its mission is to afford students and faculty opportunities to put into practice the relevance and value of the arts and sciences for their everyday lives. The Collaborative oversees the administration of interdisciplinary programs, supports the development of interdisciplinary curricula and initiatives, and promotes collaboration among faculty in teaching and research.

Interdisciplinary Minors (<http://catalog.qu.edu/arts-sciences/interdisciplinary-minors/#text>)

ED 220. Introduction to Education Studies. 3 Credits.

This course is required for students pursuing an Interdisciplinary Studies major in the College of Arts and Sciences with a concentration in Education Studies. The course explores a multidisciplinary understanding of global and American Education. Students consider the role of education in creating a more equitable society by analyzing the policies and philosophies that have shaped and are shaping schooling in the U.S. and throughout the world. Historical changes in education, critical analyses of policy debates in current education, the effects of legal policies in the classroom, the influences of cultural shifts and contemporary issues are all considered. Students also are introduced to basic concepts and terminology in the educational discipline, and develop a critical lens for evaluating educational resources, texts and data. Only IDS majors may register for this course. Students are not allowed to receive credit for more than one of the following courses: ED 220 and ED 260.

Prerequisites: Take ED 140.

Offered: Every year, Spring

ED 380. Research Methods in Education Studies. 3 Credits.

This course is required for students pursuing an Interdisciplinary Studies major in the College of Arts and Sciences with a concentration in Education Studies. The course is an upper-level UG education research course, intended to equip students with an understanding of the primary genres of educational research including action research, theoretical/conceptual research, case studies and ethnography. While quantitative inquiry also is addressed in the course, the focus is on qualitative research methods, given their important role and purpose in education. This course serves as an important preparatory course for ED 550, a graduate-level research course required of candidates who choose to pursue an MAT in Elementary or Secondary Education at Quinnipiac.

Prerequisites: Take IDS 200 and; ED 220 or ED 260.

Offered: Every year, Fall

IDS 200. Rise of Disciplinary. 3 Credits.

In this course, students draw on what they have learned in and about academic disciplines up to this point in their studies to explore the foundations and perspectives of traditional academic disciplines. Students evaluate the insights and methods of individual disciplines as they relate to a topic or issue of interest. This course prepares students to apply disciplinary insights, methods and other characteristics from multiple fields to form a more complex understanding of a current topic or issue. Restricted to IDS majors.

Prerequisites: At least junior standing required.

Offered: Every year, Fall and Spring

IDS 400. Transdisciplinary Project. 3 Credits.

This seminar is the capstone course of the Interdisciplinary Studies major. Students design an individual integrative project using a transdisciplinary lens. The project can be creative, empirical, theoretical and/or professionally focused. Restricted to IDS majors.

Prerequisites: Take ED 380. Senior standing and prior completion of research methods component in concentration.

Offered: Every year, Spring

Independent Major

Program Contact: Hillary Haldane (Hillary.Haldane@quinnipiac.edu)
203-582-3822

While housed in the College of Arts and Sciences, the independent major is open to any undergraduate student regardless of school. In this program, students will design a unique major to fit their individual goals. The student is responsible for proposing and planning the course

of study. The proposal must contain suitable justification and a coherent curricular plan. The full proposal must be submitted to the director of the Collaborative for Interdisciplinary/Integrative Studies for approval by no later than the first semester of the junior year and also must have the approval of a three-member faculty committee, chosen by the student, which works with the student to plan and carry out the program. Program proposals will be accepted before March 1 for review in the spring semester, and before October 15 for review in the fall semester.

Curriculum

The independent major is designed for any undergraduate student who would like to focus their attention in a specific area of study not currently offered by the university. Independent major programs are designed individually by students, in consultation with a faculty member in the College of Arts and Sciences. Therefore, the curriculum for this major will vary by student. All independent majors must meet the following criteria:

- The major must consist of a minimum of 30 credits (may include some courses already completed).
- No fewer than 24 of the 30 credits must be at the 300 level or above. Note: CAS 420 does **not** count.
- The major plan must include a final assessment, which can take the form of a class or a project. The final assessment plan must be submitted by the second half of the junior year, and the assessment itself must be evaluated by the student's committee at the end of the senior year.
- All University Curriculum (p. 51) requirements must be completed, outside the major.
- Students in the College of Arts and Sciences must complete the foreign language requirement.
- Any minor requirements must be completed outside the major.

Student Learning Outcomes

With an individually designed curriculum, specific student learning outcomes vary. Every student works toward the following outcomes through the proposal process alone.

- Effective Communication:** Communicate effectively in speaking and in writing.
- Social Intelligence:** Engage collaboratively and responsibly; interact attentively and appropriately with others.
- Cognitive Complexity:** Evaluate multiple perspectives on an issue, acknowledging the potential for complexity and ambiguity.
- Critical and Creative Thinking:** Think independently and creatively from an informed understanding.
- Analysis:** Demonstrate competency in evaluating and constructing arguments based on logic and evidence.

Independent Minor

Program Contact: Hillary Haldane
(Hillary.Haldane@quinnipiac.edu) 203-582-3822

While housed in the College of Arts and Sciences, the independent minor is open to any undergraduate student regardless of school. Students in this minor design a unique program to fit their personal, academic and professional goals. The responsibility for the planning of such a program rests with the student proposing it, and a proposal for an independent minor must contain suitable justification, a coherent curricular plan and an appropriate title. The proposal must be submitted to the director of

the Collaborative for Interdisciplinary/Integrative Studies for approval and also must have the approval of a full-time CAS faculty member, chosen by the student, who will serve as the student's adviser and work with the student to plan the program.

Independent minors must include at least 18 credits of coursework, at least 6 of which must be completed at the 300 level or above, and at least 12 of which must be in courses housed in CAS.

Full independent minor proposals should be submitted no later than the second semester of the sophomore year to start by no later than the first semester of the junior year. Independent minor proposals will be accepted before March 1 for review in the spring semester, and before October 15 for review in the fall semester.

The independent minor is designed for students of any major who would like to focus their attention in a specific area of study not currently offered by the university. Independent minor programs are designed individually by students, in consultation with CAS faculty. Therefore, the curriculum for this minor will vary by student. Areas of focus might include:

- Single subjects for which no minor currently exists, such as Non-Western Literature or Ethics.
- Interdisciplinary fields, such as African-American Studies, French Studies, Forensics, Genomics, Scientific Illustration or Public Policy.
- Problem-based inquiry, such as individual rights vs. public good, violent/non-violent activism or ending water/food insecurity.
- Skill areas, such as public speaking, leadership or creativity/innovation, or skills related to any of the Essential Learning Outcomes.

Program Minimum Requirements

- The minor must consist of a minimum of 18 credits (may include up to three courses already completed).
- No fewer than 6 of the 18 credits must be at the 300 level or above (neither Global Community nor the UC Integrative Capstone may count).
- At least 12 credits for the minor must be completed in courses offered by CAS departments.
- None of the courses included in the minor may overlap with courses in the major, or with courses in another declared minor.
- Independent minors may not be declared retroactively or based on more than 9 credits already completed or in progress.

Minor in Asian Studies

Program Contact: Nita Prasad
(Nita.Prasad@quinnipiac.edu) 203-582-3729

The minor in Asian Studies facilitates the interdisciplinary study of this critical region that is home to the majority of the world's population. The program provides students with a comprehensive introduction to the history, society and cultures of South Asia, East Asia and Southeast Asia, and fosters an interdisciplinary understanding of the social, political and economic forces that characterize the region, both in the present and in the past. Coursework also tracks the cultural exchanges between Asia and the West and their influence on the global political and economic climate.

The Asian Studies minor provides a deeper understanding and appreciation of modern Asian cultures and is the perfect supplement

for personal or academic interests in the region. Foreign language courses, offered in both Chinese and Japanese, are especially useful for cultural immersion while studying abroad, volunteering or pursuing job opportunities in careers such as teaching, business, finance and humanitarian work.

To complete the minor in Asian Studies, students are required to take six courses (18 credits).

Asian Studies Minor Curriculum

To complete the minor in Asian Studies, students are required to take six courses (18 credits).

Code	Title	Credits
Language		
Select 6 credits of the following:		6
JP 101	Elementary Japanese I	
JP 102	Elementary Japanese II	
JP 201	Intermediate Japanese I	
JP 202	Intermediate Japanese II

PO 331	Topics in Comparative Government	
CN 215	Virtual Internship in China	
CN 220	Art of War for Business Strategies and Leadership	
CN 230	Chinese Health Regimens	

AR 104 Survey of Non-Western Art

Special topics courses relevant to the minor are offered on a rotating basis to supplement the courses listed above.

Total Credits 18

Minor in Global Public Health

Program Contact: David Hill (David.Hill@quinnipiac.edu) 203-582-3944 or Wendy Sewack (Wendy.Sewack@qu.edu)

The minor in global public health provides an interdisciplinary focus of study that enables students to understand and promote individual and population health throughout the world. This is accomplished via a range of courses that provide relevant and rigorous intellectual learning, community and international education, and a capstone course in the senior year. This minor is suitable for students with a wide range of interests in the humanities, business, as well as the arts and the sciences, as each of these disciplines contributes to addressing the diversity and complexity of global public health issues. Students are encouraged to explore the variety of course offerings to enrich their academic experience in the minor. Each student is assigned a faculty adviser, who provides guidance in completing the required components of the minor.

Students are eligible to apply for the minor beginning first semester (fall) sophomore year. Accepted students are notified in October, and officially enroll in the minor the following spring. The minor requires a substantial level of commitment from students, so applicants should carefully consider whether they can meet the expectations of course study, community and international education and a capstone experience.

For application details, interested students should contact the Institute for Global Public Health at the Frank H. Netter MD School of Medicine (GPHMinor@qu.edu (GPHMinor@quinnipiac.edu)).

Global Public Health Minor Curriculum

Students must complete 18 total credits (usually six courses). GPH 201 and GPH 301 are required courses.

Community and International Education: There are two distinct requirements. Students must complete a Quinnipiac-approved four-week international academic experience, typically in a low-income country. With approval, students could complete this requirement by traveling to an under-served area of the United States. Financial support is given for the international experience. Students also are required to engage in community education with a community health organization for at least two semesters. With prior approval, one semester of this requirement can be integrated into a Quinnipiac service learning course.

Code	Title	Credits
Required Courses		
GPH 201	Introduction to Global Public Health	3
GPH 301	Capstone in Global Public Health	3
Select four courses in consultation with your adviser.		12
Total Credits		18

Minor in History and Philosophy of Science

Program Contact: Anat Biletzki (anat.biletzki@qu.edu) 203-582-3930

This interdisciplinary program seeks to introduce students to the historical, philosophical and sociological issues raised by the dominant place that science has assumed in our world. Science is defined broadly to encompass both scientific theory and practical applications of scientific knowledge. To pursue a minor in History and Philosophy of Science therefore means to consider technology, the practice of medicine, the health sciences, and aspects of the human sciences in addition to the traditional physical, chemical and biological sciences. Students develop the skills to understand, assess and critique the place of, and changes in, science and technology and to evaluate the ways in which these changes impact society.

Students also explore and understand the pace of change in science and technology and develop critical thinking and writing skills applicable to a broad range of professional pursuits such as technical writing or science journalism. The program is designed to expose students to a wide range of courses offered by different schools throughout the university, while establishing a solid foundation in the humanistic tradition of the arts and sciences. The course of study is designed to build upon the knowledge and skills developed in the student's major by providing a greater interdisciplinary scope and a consideration of philosophical, historical and ethical issues on topics relating to science and technology.

History and Philosophy of Science Minor Curriculum

To complete a minor in History and Philosophy of Science, students are required to complete six courses (18 credits). All students take both The Rise of Modern Science (HS 230) and Philosophy of Science and Technology (PL 235). In addition, students take 12 credits from the list of approved courses:

Code	Title	Credits
BIO 205	Bioethics	3
BIO 383	Evolution	3
BMS 117	The Human Organism	3
BMS 278	Research and Technology	3
BMS 474	Power of Plagues	3
CSC 350	Intelligent Systems	3
HS 220	American Environmental History (ENV 221)	3
HS 330	History of Western Medicine	3
HS 394	Doctors, Disease and Death in the Western World	4
HSC 315	Bioethical Issues in the 21st Century	3
MSS 320	Communication Technologies: Evolution and Impact	3
PL 222	Bioethics	3
PL 320	Thought and Work of Albert Schweitzer (SL: Service Learning)	3
PS 309	History of Psychology	3

SO 280	Sociology of Health and Illness	3
SO 360	Sociology of Mental Health	3

In consultation with the program director, students design a course of study with a coherent focus related to their interests and major field. These courses of study will have a central theme or area of study that falls within the general scope of the program.

Minor in International Studies

Program Contact: Sean Duffy (Sean.Duffy@quinnipiac.edu) 203-582-8324

A minor in International Studies is designed to stress connections between "classroom" learning and the international experience as well as to increase program options available to students with an interest in international studies who are pursuing major programs of study in another field. Students pursuing a minor in International Studies are required to complete 18 credits distributed across relevant curricular areas. Students are encouraged to meet with the international studies adviser to declare the minor by the end of their sophomore year or early in their junior year.

International Studies Minor Curriculum

Students are required to satisfy the following requirements within the 18-credit minor; at least 6 credits must be completed at the 300 level.

Code	Title	Credits
Select two world language courses at the 200-level or above ¹		6
Select one course that explores a non-American culture. Examples include: ²		3
AN 101	Local Cultures, Global Issues	
AN 210	Gender/Sex/Sexuality (WGS 211)	
HS 227	Russian Cultural and Intellectual History	
HS 229	Irish History	
HS 235	Blood and Revolution in China/Asian Studies	
HS 236	Japan's Modern Empire/Asian Studies	
HS 273	African History and Culture	
HS 274	Modern India	
IT 210	Italy: A Journey Through its Food, History and Culture (in Eng.)	
IT 211	Italian Cinema (in Eng.)	
Select one course in international business/economics at the introductory or advanced level depending on the student's major concentration:		3
EC 350	International Economics	
IB 201	Globalization and International Business	
IB 311	International Marketing	
IB 324	Negotiating Internationally	
Select one course in geography, philosophy or political science. Examples include:		3
GP 101	Introduction to Geography (ENV 150)	

GP 323	Human and Economic Geography (ENV 323)
PL 266	Global Philosophies
PL 312	Philosophy of War and Peace (PO 312)
PL 337	Human Rights: Theory and Practice (PO 337)
PO 211	Introduction to International Relations
PO 309	Public Diplomacy
PO 313	Development, Globalization and Colonialism
PO 317	International Law (LE 317)
PO 328	Politics and Governance in Africa
PO 333	Middle Eastern History and Politics
PO 334	Topics in African Politics

Complete a capstone course in international studies, decided in consultation with the international studies adviser.

Total Credits 15

¹ In languages without advanced course offerings, students may complete two courses in a second language where the first language was pursued through the 102 course.

² Courses offered in history, art, comparative literature/culture or anthropology all can satisfy this requirement.

Students are encouraged, but not required, to take off-campus studies, either in the form of a study abroad or an internship in, for example, Washington, D.C.

Minor in Irish Studies

Program Contact: Christine Kinealy (Christine.Kinealy@quinnipiac.edu) 203-582-4564

This interdisciplinary and multidisciplinary program introduces students to the history, people and cultures of Ireland, both pre- and post-Partition. Students choose from a range of courses that provide relevant and rigorous intellectual learning, internships, study trips to Ireland and a capstone course that utilizes the unique range of Irish sources available within Quinnipiac University.

This minor is suitable for students with interests in the humanities, the arts and the sciences, as well as those interested in colonial and post-colonial studies, conflict resolution, human rights and social justice. Each of these topics, individually and collectively, contributes to our understanding of the diversity, complexity and potential of viewing Irish Studies within a global context. Students are encouraged to spend a semester in an Irish university, but this is not compulsory.

Students are eligible to apply for the minor in the first semester of sophomore year. Interested students should contact Ireland's Great Hunger Institute or the Department of History.

Irish Studies Minor Curriculum

Students must complete 18 total credits (usually six courses) in Irish Studies and related disciplines.

Code	Title	Credits
IRST 101	Introduction to Irish Studies	3
HS 229	Irish History	3
IRST 300	Special Topics in Irish History (Capstone equivalent 300-level course)	3
Select 9 credits in electives in approved courses in subject areas such as English, philosophy, political science, history, music and film, video and interactive media.		9
Total Credits		18

Students have an opportunity to complete courses for the minor at a partner university or institution in Ireland. Credits also are available through relevant internships in Ireland or at Quinnipiac University.

Minor in Middle Eastern Studies

Program Contact: Nita Prasad (Nita.Prasad@quinnipiac.edu) 203-582-3729

The minor in Middle Eastern Studies facilitates the interdisciplinary study of the Middle East, offering insights into the language, history, culture, politics and religions of this ethnically diverse geographical region. The program recognizes the interconnectedness of the peoples of the Middle East, and emphasizes the interactions between the Middle East and the wider global community, in both the past and present. Courses included in the minor encompass the Arab World, Turkey, Israel, Iran and North Africa. While current political and military conflicts are covered, no single topic, academic discipline or political ideology dominates the programming; students are able to engage with a number of approaches and disciplines, ranging from ancient Middle Eastern religions to contemporary political economies of Middle Eastern countries.

Middle Eastern Studies Minor Curriculum

Code	Title	Credits
Select six of the following courses (18 credits) after consultation with the program director:		18
ARB 101	Elementary Arabic I	
ARB 102	Elementary Arabic II	
HBR 101	Introduction to Modern Hebrew	
HBR 102	Introduction to Elementary Modern Hebrew II	
HS 307	The Holocaust	
HS 208	Twentieth-Century World History	
HS 333	The Middle East, 1300-1919; Critical Issues	
PO 211	Introduction to International Relations	
PO 333	Middle Eastern History and Politics	
HS 234	Borders & Battles: Conflict and the Legacy of Empire	
HS 232	The Rise and Fall of the British Empire	
Total Credits		18

Special topics courses relevant to the minor are offered on a rotating basis to supplement the courses listed above. Examples include

Introduction to Judaism or The Anthropology of Morocco: Gender and Indigeneity.

Minor in Sports Studies

Program Contacts: Michael Sheehan
(Michael.Sheehan@qu.edu) 203-582-6439 Rich Hanley
(Richard.Hanley@qu.edu) 203-582-8439

Whether as a participant in sports or as a spectator, people throughout the world have contributed to the creation of a multi-billion dollar industry. Sport is a profound social phenomenon, the study of which can provide the student with deep insights into the dynamics of our society.

The goal of the interdisciplinary sports studies minor is to foster an understanding of the role of sport in society and culture, to explore the complex relationships between sport and various industries and institutions (business, medicine, media, politics, law, etc.), and to prepare students for careers in sports-related industries by raising awareness of the major issues facing professionals in these fields. This minor also seeks to make connections between what students learn in the University Curriculum and their major coursework by illustrating how sport bridges various disciplines.

Sports Studies Minor Curriculum

Students can complete the minor by taking six courses for a total of 18 credits. All students must take SPS 101. In addition, students must select at least one SPS course from two of the four areas (arts and sciences, business, communications, health science), with the remaining credits coming from any of the courses offered as part of the minor. Students from the School of Communications can take no more than 6 credits in communications. Classes are cross-listed with the SPS designation.

Code	Title	Credits
Required Course:		
SPS 101	Introduction to Sports Studies	3
Select five of the following:		15
SPS/JRN 106	Multimedia Production Techniques for Sports (JRN 106)

SPS 488	Internship
SPS 498	Student Media Independent Study
SPS 399	Independent Study
SPS 499	Independent Study

Total Credits **18**

Minor in Women's and Gender Studies

Program Contact: Lauren Sardi (Lauren.Sardi@qu.edu) 203-582-8215

Women's and gender studies is an interdisciplinary program that explores how sex, gender and sexuality structure human societies, cultures, politics, economies, arts and aesthetics, and it examines the multitude of femininities, masculinities and transgender identities within a matrix of power relations constituted by race/ethnicity, class, sexuality, ability and nationality. Women's and gender studies puts women—in all their diversity—at the center of inquiry, and is feminist, queer and anti-racist in perspective. WGS invites students to engage with the ways in which gender and sexuality operate in all societies, institutions and ideologies and to critically examine the political and historical nature of knowledge production. We draw on many disciplines, including history, literature, political science, psychology, sociology, anthropology, philosophy, media, communications, cultural studies and the law, to emphasize rigorous critical thinking, imagination and creativity.

Women's and Gender Studies Minor Curriculum

For a minor in women's and gender studies, students take six courses.

Code	Title	Credits
Required Courses:		
WGS 101	Introduction to Women's and Gender Studies	3
WGS 301	Women's and Gender Studies Capstone ¹	3
Select four of the following:		12
WGS 200	Special Topics in Women's and Gender Studies	
WGS 202	Gender and Aging (SO/GT 202)	
WGS 210	Human Sexuality (PS 210)	
WGS 211	Cross Cultural Perspectives on Gender, Sex and Sexuality (AN 210)	
WGS 219	Feminist Political Thought (PO 219)	
WGS 232	Women in the Criminal Justice System (CJ/SO 232)	

WGS 235	Literature by Women (EN 235)
WGS 250	Gender and the Law (LE 250)
WGS 252	The Science of Human Diversity (AN 252)
WGS 253	Sexual Violence (CJ 253)
WGS 255	Sociology of Families (SO 255)
WGS 262	Psychology of Women and Gender(PS 262)
WGS 265	Work and Occupations (SO265)
WGS 275	Sexual Violence Victim Advocacy(CJ 275)
WGS 284	LGBTQ Identities and Communities (SO/PS 284)

WGS 309	Women in America: 1920-Present (HS 309)
WGS 311	Diversity in the Media (MSS 311)
WGS 315	Women Artists (AR 325)
WGS 326	Witches and Werewolves in the Early Modern World (HS 326)
WGS 328	Gender in the Non-Western World (HS 328)
WGS 330	Philosophy and Gender (PL 330)
WGS 338	American Literature by Women of Color (EN 338)
WGS 345	Media Users & Audiences (MSS 345)
WGS 359	Women's and Gender Studies Elective
WGS 387	Women and Public Policy (PO 387)
WGS 392	Internship in the Community
WGS 395	Feminist Theory and the Body
WGS 450	Black Cinema and TV(FTM 450)
Total Credits	18

¹ Should be taken during junior or senior year.

Bachelor of Arts in Environmental Studies (Co-Major)

Program Contact:

The co-major in Environmental Studies (BA) is designed to integrate and to be completed in tandem with another major. Students who declare the co-major as part of their program of study will be considered double majors. However, the Environmental Studies (BA) co-major is not designed to be and may not be completed as a stand-alone major.

The Environmental Studies (BA) co-major seeks to bring environmental science and environmental policy into conversation with one another to meet the urgent need for ethical, sustainable solutions based on a fundamental understanding of the scientific, social and cultural dimensions of environmental issues. As a secondary major that is completed alongside a primary major, the Environmental Studies (BA) co-major adds another dimension to this goal by providing points of intentional connection and integration with other fields of study. Students in any major with an interest in studying the environment are invited to imagine how they can create a unique path leading to numerous academic and professional opportunities.

BA in Environmental Studies (Co-Major) Curriculum

Students co-majoring in Environmental Studies must complete the following requirements:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Environmental Studies Co-Major Program		
ENV 101	Introduction to Environmental Studies	3
ENV 120 & 120L	Foundations of Biology and Chemistry, Exploring Your Environment and Foundations of Biology and Chemistry Lab, Exploring Your Environment Lab ²	4
ENV 215	Research Methods in Environmental Studies ²	3
ENV 220 & 220L	Environmental Science and Environmental Science Lab	4
ENV 230	Sustainable Development (AN 230)	3
ENV 222	Environmental Geography and Culture (GP 222)	3
PL 226	Environmental Ethics	3
ENV 390	Environmental Writing (EN 390)	3
IDS 200	Rise of Disciplinarity	3
IDS 400	Transdisciplinary Project	3
Cognate Course ³		
MA 275	Biostatistics	3
Free Electives ⁴		33-36
Total Credits (depending on primary major)		120

¹ All students must complete the 46 credits of the University Curriculum (p. 51).

² Students with primary majors in the natural sciences may substitute science and methods courses in their majors for these courses, if appropriate. Similar substitutions may be possible for other majors as well.

³ Required courses that support the Environmental Studies co-major and may be used to fulfill requirements outside the major

⁴ These credits will be needed, all or in part, to complete the primary major.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon graduation, all Environmental Studies co-majors will be able to demonstrate the following competencies:

- Cognitive Skills:** Interdisciplinary knowledge, critical/creative thinking and problem solving, cognitive complexity, analysis and evaluation.
- Communication:** Oral and written presentation, intercultural awareness.
- Application:** Experiential learning, technical training, career preparation.

Bachelor of Arts in Interdisciplinary Studies/Concentration in Education Studies

Program Contact:

The Interdisciplinary Studies major exposes students to a number of disciplines and academic areas, and emphasizes critique, analysis, evaluation, and the development and iterative application of skills in critical thinking, writing, public speaking, data gathering, evaluation and presentation. This type of academic foundation prepares students for virtually any academic path or career of their choosing.

BA in Interdisciplinary Studies/Concentration in Education Studies Program of Study

Students majoring in Interdisciplinary Studies/Concentration in Education Studies must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Interdisciplinary Studies Core Courses		
IDS 200	Rise of Disciplinarity	3
IDS 400	Transdisciplinary Project	3
Concentration Requirements		
ED 220	Introduction to Education Studies	3
ED 380	Research Methods in Education Studies	3
Cross-Disciplinary Study		12
One course (3 cr.) each in English, history, math and science		
Interdisciplinary Study		12
One upper-level course (3 cr.) in each of the following disciplines: English, history, math and science ²		

Free Electives	17
Total Credits	102-105

¹ All students must complete the 46 credits of the University Curriculum (p. 51).

² Course level 200 and above

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon graduation, all Interdisciplinary Studies majors will be able to demonstrate the following competencies:

- Core Competence:** Understand the issues relevant to and methodologies appropriate for conducting research and engaging with core issues in their field of concentration.
- Critical Thinking:** Critique and apply appropriate methodology or methodologies in research of a given topic.
- Evaluate Information:** Identify, evaluate and interpret sources of information.
- Analysis:** Analyze data.
- Cognitive Complexity:** Construct an interpretive argument.
- Effective Oral/Written Presentation:** Present facts, analysis and arguments effectively.

Bachelor of Arts in Sustainability and Environmental Policy

Program Contact:

Students in the Sustainability and Environmental Policy (BA) program gain understanding and practice in communicating environmental challenges and developments to a variety of audiences, while developing a particular appreciation for how policy can address these challenges. Students utilize foundational knowledge in the sciences and ethics to examine the effects of human actions on the environment from multiple perspectives, choosing from courses in economics, political science, environmental law, sustainable development and history/geography. The program emphasizes experiential learning in the classroom and in regional, national and international settings. Sustainability and Environmental Policy (BA) majors learn through research methods and statistics how to understand and conduct environmental sustainability research, which they put to work in the culminating Transdisciplinary Project capstone.

Sustainability and Environmental Policy Core		
ENV 120 & 120L	Foundations of Biology and Chemistry, Exploring Your Environment and Foundations of Biology and Chemistry Lab, Exploring Your Environment Lab	4
ENV 215	Research Methods in Environmental Studies	3
Choose two of the following courses:		6
EC 304	Environmental Economics (ENV 304)	
LE 355	Environmental Law (ENV 355)	
PO 209	Environmental Politics and Policy (ENV 209)	
Electives ²		6-8
Free Electives		24-33
Total Credits		120

¹ All students must complete the 46 credits of the University Curriculum (p. 51).

² Choose two electives from the areas of Economics, Government/Policy, Law; Data Science and Analysis; Culture, Geography, History, Society; Climate/Earth Science/Geology; or Biology/Ecology/Health.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon graduation, all Sustainability and Environmental Policy majors will be able to demonstrate the following competencies:

- **Interdisciplinary Knowledge:** A broad knowledge base of principles in natural sciences, social sciences, humanities and fine arts, with cognate knowledge in mathematics.

- **Critical/Creative Thinking and Problem Solving:** The ability to apply knowledge and skills to work toward solutions to increasingly complex problems, envision alternative approaches and identify and evaluate potential solutions.
- **Cognitive Complexity:** The ability to draw upon scientific, social scientific, humanistic and artistic methods and thought to envision and develop creative solutions to problems.
- **Analysis and Evaluation:** The ability to analyze and evaluate scientific evidence and assess ideas against available evidence.
- **Experiential Learning:** The ability to apply acquired knowledge and skills to investigate problems by working on domestic and international projects in unscripted, living contexts.
- **Effective Oral/Written Presentation:** The ability to present facts, analysis and arguments effectively to communicate to multiple audiences.
- **Technical Training:** The relevant knowledge and hands-on skills to be able to work safely and independently in laboratory and field settings to collect and record data.
- **Intercultural Awareness:** Global awareness and local sensitivity to different populations, their values and objectives, and the ways in which these populations are affected by environmental phenomena.
- **Career Preparation:** Competitive preparedness for entry-level employment in a changing marketplace or for acceptance into a graduate or professional degree program.

Bachelor of Science in Environmental Science

Program Contact:

In the Environmental Science (BS) program, students develop a strong foundation in biological and physical sciences as they learn how these processes shape the natural world and what impact humans have on the environment. Students use this foundational knowledge as they examine the effects of human actions on the environment from multiple perspectives, including political, legal, economic, cultural and sociological. The program emphasizes experiential learning in the classroom and in regional, national and international settings. Environmental Science (BS) majors learn how to conduct environmental science research in a variety of subdisciplines and how to critically analyze and evaluate data, as well as integrate basic science principles and apply that knowledge to analysis and solutions of current environmental issues.

BS in Environmental Science Curriculum

Code	Title	Credits
	University Curriculum ¹	46
	Modern Language Requirement	3-6

Department of Biological Sciences

Programs in the Department of Biological Sciences provide scientific training as part of an arts and sciences education and develop an understanding of the nature of biological systems. The courses we offer furnish a broad scientific background for advanced study in various biological and medical areas.

A note about advanced placement equivalencies: Students who receive a score of 3 on the AP biology exam can receive credit for BIO 106 and BIO 107, which meet the needs of students in non-science areas. Students who receive a score of 4 on the AP biology exam can receive credit for BIO 101 and BIO 102. For students majoring in the natural sciences, we strongly encourage students to begin with BIO 150 and BIO 151, regardless of whether they receive credit for BIO 101 and BIO 102.

The mission of the Department of Biological Sciences is to provide students with the breadth and depth of knowledge in biology as follows:

1. Knowledge and Comprehension: Successful completion of the following objectives establishes that students have achieved an appropriate understanding of foundational biological concepts.
 - a. Apply critical thinking and the scientific method to community/world issues and decision-making.
 - b. Evaluate the quality and validity of scientific evidence.
 - c. Create an understanding of biology as a whole by integrating and synthesizing information from multiple biological subdisciplines.
2. Applications and Analysis: Successful completion of the following objectives demonstrates that students have the ability to apply foundational knowledge and analyze information/data to make meaning from it.
 - a. Demonstrate basic skills and an understanding of safety procedures in the field and/or laboratory.
 - b. Organize and interpret experimental data (from their own experiments and/or those in primary literature sources).
 - c. Design and perform well-controlled experiments
3. Self and Society: Successful completion of the following objectives indicates that students successfully utilize biological knowledge to present and defend opinions in a variety of arenas.
 - a. Develop an in-depth understanding of the complexity of the natural world by understanding how a biologist thinks about complex systems.
 - b. Apply scientific methodology and knowledge of biological facts to real-world problems.

Bachelor's Degree

- Bachelor of Science in Biology (p. 161)

Minor

- Minor in Biology (p. 164)

Dual-Degree Programs

- Accelerated Dual-Degree BS/MS in Molecular and Cell Biology (3+1) (p. 165)
- Dual-Degree BS/MS in Molecular and Cell Biology (4+1) (p. 166)

Master of Science

- Master of Science in Molecular and Cell Biology (p. 168)

Biology (BIO)

BIO 101. General Biology I. 3 Credits.

This course considers the basic concepts of life science with emphasis on the methods of science and the role of science in society, an introduction to evolution, the chemistry of life, and molecular and cellular evolution. Selected topics include cell structure and function, respiration and photosynthesis, cellular biochemistry, the central dogma of biology, regulation of gene expression, cell cycles, and animal reproduction and development. This course is primarily for students in health science programs or in the School of Engineering. First semester of a full-year course; must be taken in sequence. Must be taken in conjunction with BIO 101L.

Corequisites: Take BIO 101L.

Offered: Every year, All

UC: Natural Sciences

BIO 101H. Honors General Biology I. 3 Credits.

This course considers the basic concepts of the life science, with emphasis on the diversity of life, the physical and chemical nature of living matter, the form and function of the cell and organism, and the ecological relationships among living organisms. Selected topics in structural, functional, developmental, environmental and systematic biology are included. An honors section lecture and laboratory are available. Full-year course, must be taken in sequence.

Corequisites: Take BIO 101HL;

Offered: Every year, Fall

UC: Natural Sciences

BIO 101HL. Honors General Biology I Lab. 1 Credit.

Lab to accompany BIO 101H. (2 lab hrs.)

Corequisites: Take BIO 101H;

Offered: Every year, Fall

UC: Natural Sciences

BIO 101L. General Biology I Lab. 1 Credit.

Lab to accompany BIO 101. Selected projects develop skills in experimental design, data analysis and scientific writing. (2 lab hrs.) Must be taken in conjunction with BIO 101.

Corequisites: Take BIO 101.

Offered: Every year, All

UC: Natural Sciences

BIO 102. General Biology II. 3 Credits.

This course covers the basic concepts of life science with an emphasis on animal anatomy and physiology, the nervous system, evolutionary mechanisms and ecological principles. Selected topics include microevolution, speciation, macroevolution, animal behavior and application of comparative anatomy and physiology to illuminate evolutionary relationships and their ecological context. This course is primarily for students in health science programs or in the School of Engineering. Second semester of a full-year course; must be taken in sequence. Must be taken in conjunction with BIO 102L.

Prerequisites: Take BIO 101, BIO 101L; Minimum grade C-.

Corequisites: Take BIO 102L.

Offered: Every year, Spring and Summer

UC: Natural Sciences

BIO 102H. Honors General Biology II.**3 Credits.**

This course covers the basic concepts of the life science, with emphasis on the diversity of life, the physical and chemical nature of living matter, the form and function of the cell and organism, and the ecological relationships among living organisms. Selected topics in structural, functional, developmental, environmental and systematic biology are included. An honors section lecture and lab are available. Full-year course, should be taken in sequence.

Prerequisites: Take BIO 101 BIO 101L; Minimum grade C-;**Offered:** Every year, Spring**UC:** Natural Sciences**BIO 102L. General Biology Lab II.****1 Credit.**

Lab to accompany BIO 102. Selected projects develop skills in experimental design, data analysis and scientific writing. (2 lab hrs.) Must be taken in conjunction with BIO 102.

Prerequisites: Take BIO 101, BIO 101L; Minimum grade C-.**Corequisites:** Take BIO 102.**Offered:** Every year, Spring and Summer**UC:** Natural Sciences**BIO 106. Science and Society: Concepts and Current Issues.****3 Credits.**

This course introduces natural science to the nonscientist with an emphasis on problems confronting society. Current health and scientific issues in the news are emphasized to help students recognize the importance of science in their daily lives. This course is designed for non-science majors. May not be taken for credit concurrently with or after completion of BIO 161. Must be taken in conjunction with BIO 106L.

Corequisites: Take BIO 106L.**Offered:** As needed**UC:** Natural Sciences**BIO 106L. Science and Society: Concepts and Current Issues Lab.****1 Credit.**

Lab to accompany BIO 106. (2 lab hrs.) May not be taken for credit concurrently or after completion of BIO 161. Must be taken in conjunction with BIO 106.

Corequisites: Take BIO 106.**Offered:** As needed**UC:** Natural Sciences**BIO 107. Everyday Biology.****3 Credits.**

This project-based lecture course introduces the non-scientist to relationships between biological principles and everyday life. Students will discuss and explore the application of basic biological principles to current topics including cancer, health, addiction, immunity, photosynthesis, evolution, sustainability, and the environment. This course is designed for non-science majors. Must be taken in conjunction with BIO 107L.

Corequisites: Take BIO 107L**Offered:** Every year, All**UC:** Natural Sciences**BIO 107L. Everyday Biology Lab.****1 Credit.**

Lab to accompany BIO 107 (2 lab hours). This laboratory course, designed for non-science majors, emphasizes exploration of the natural sciences. Laboratory experiments will focus on problems confronting society, including relationships between humans and the environment. Must be taken in conjunction with BIO 107.

Corequisites: Take BIO 107**Offered:** Every year, All**UC:** Natural Sciences**BIO 120. The Biology of Beer.****3 Credits.**

This lecture course uses the biological processes of beer production and consumption as a framework for examining basic principles of molecular, cellular and organismal biology. Students begin by studying the life cycle of the brewer's yeast and the process of fermentation. They then consider how the human body responds to beer, and finally, they examine the biological basis of alcoholism and fetal alcohol syndrome. This course is designed for non-science majors.

Offered: As needed**UC:** Natural Sciences**BIO 125. Cross My Heart: An Introduction to the Human Cardiovascular System.****3 Credits.**

Heart and blood vessel disease is the leading cause of death in both men and women. This lecture course is designed for non-science majors interested in examining basic principles of the anatomy and physiology of the heart, and in understanding common disease conditions. Discussion focuses on risk factors and steps to preventing disease. An overview of common diagnostic tests and treatments introduces students to the identification and management of common disorders. May not be taken for credit concurrently with or after completion of BIO 212 or BIO 350.

Offered: Every year, Spring**UC:** Natural Sciences**BIO 128. Global Health Challenges: a Human Perspective.****3 Credits.**

This course addresses a series of topics that elucidate and address challenges in global public health, with an emphasis on neglected tropical diseases and the profound impact that they have on humanity. Biological information concerning the etiology, pathology and epidemiology of the diseases is presented at the level of the nonscientist. Emphasis is placed on the impacts of such diseases on education, socioeconomic and stigmatization. Must be taken in conjunction with BIO 128L.

Corequisites: Take BIO 128L.**Offered:** Every year, Fall**UC:** Natural Sciences**BIO 128L. Global Health Challenges Lab.****1 Credit.**

Lab to accompany BIO 128L (2 lab hours). Selected projects introduce students to the basics of the scientific method, experimental design, data analysis and scientific writing. Must be taken in conjunction with BIO 128.

Corequisites: Take BIO 128.**Offered:** Every year, Fall**UC:** Natural Sciences**BIO 150. General Biology for Majors.****4 Credits.**

Students develop sound learning strategies and introductory knowledge within five core concepts in biology: science as a way of knowing, chemistry of life, structure and function relationships; major pathways and transformations of energy and matter, as well as living systems as interactive and interconnected. This is the first course of a three-course sequence for biology and related majors. Must be taken in conjunction with BIO 150L.

Corequisites: Take BIO 150L.**Offered:** Every year, Fall**UC:** Natural Sciences**BIO 150L. General Biology for Majors Laboratory.****0 Credits.**

Lab and Power Hour to accompany BIO 150 (3 hours). Students take an investigative/inquiry-based approach and become competent within the process of science including experimental design and analysis, as well as scientific communication and collaboration. Must be taken in conjunction with BIO 150.

Corequisites: Take BIO 150.**Offered:** Every year, Fall**UC:** Natural Sciences

BIO 151. Molecular and Cell Biology and Genetics. 4 Credits.

Students investigate key concepts in molecular and cell biology and genetics. Topics include evolution, the central dogma, regulation of gene expression, cell communication, classical genetics, immunology, cancer and cell division. Must be taken in conjunction with BIO 151L.

Prerequisites: Take BIO 150, BIO 150L; Minimum grade C-.

Corequisites: Take BIO 151L.

Offered: Every year, Spring

UC: Natural Sciences

BIO 151L. Molecular and Cell Biology and Genetics Lab. 0 Credits.

Lab and Power Hour to accompany BIO 151(3 lab hours). Selected projects enable students to develop skills in experimental design through an investigative/inquiry-based approach, data analysis and scientific writing. Must be taken in conjunction with BIO 151.

Prerequisites: Take BIO 150, BIO 150L; Minimum grade C-.

Corequisites: Take BIO 151.

Offered: Every year, Spring

UC: Natural Sciences

BIO 152. Ecological and Biological Diversity. 4 Credits.

Students develop a deeper understanding of central concepts and issues in ecology and biodiversity by building on information and skills acquired in BIO 150 and BIO 151. Specific areas of interest include populations and forces that regulate them, species concepts, and the ecological roles and evolutionary significance of key organisms. Must be taken in conjunction with BIO 152L.

Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L; Minimum grade C-.

Corequisites: Take BIO 152L.

Offered: Every year, Fall and Spring

BIO 152L. Ecological and Biological Diversity Laboratory. 0 Credits.

Lab to accompany BIO 152(2 lab hours). Selected activities, field experiences and exercises develop skills in observation, documentation, experimental design, data analysis and scientific written and oral communication. Must be taken in conjunction with BIO 152.

Corequisites: Take BIO 152.

Offered: Every year, Fall and Spring

BIO 161. Introduction to the Biological Aspects of Science and Society. 3 Credits.

This course introduces natural science to the nonscientist with an emphasis on current problems confronting society. Current health and scientific issues in the news are emphasized to help students recognize the importance of science in their daily lives. This course is designed for nonscience majors. May not be taken for credit concurrently or after completion of BIO 106.

Offered: As needed

UC: Natural Sciences

BIO 202. Inside Out: An Introduction to Human Form and Function. 3 Credits.

This course is designed for non-science majors interested in learning about the foundational principles of human anatomy and physiology—what we look like on the inside and how it all fits together. Emphasis is placed on the language of anatomy and the structure and function of the skeletal and muscular systems; the course also examines the cardiovascular, nervous, respiratory, digestive, urinary, and reproductive systems. Featuring an innovative format with hands-on learning at the forefront, students will explore real human bones and anatomical models with the support of a 3D anatomy visualization program, perform guided dissections of select animal specimens, and generate real-time physiological data from their own bodies. Real-world applications to careers and clinical correlates will be integrated into weekly activities and formal assessments. May not be taken for credit concurrently with or after completion of BIO 211 or BIO 212.

Offered: Every other year, Spring and Summer

UC: Natural Sciences

BIO 205. Bioethics. 3 Credits.

This course explores major ethical issues arising from advances in biomedical technology, such as when human life begins, the ethics of assisted reproduction, cloning, stem cell research and genetic engineering, among others. Emphasis is on understanding the science behind the various biotechnologies and applying sound moral reasoning to the ethical issues discussed.

Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L or PL 101 or PS 101.

Offered: Every year, Spring

UC: Natural Sciences

BIO 207. Coral Reef Organismal Diversity - An Immersive Approach. 3 Credits.

In this hands-on course, participants focus on a series of topics related to coral reef and marine ecology, with an emphasis on adaptations to underwater life, conspecific and interspecific relationships, and the role conservation and education play in developing responsible tourism practices. Students study the underwater world in a way that relatively few people do: directly via SCUBA diving in Bonaire, Netherlands Antilles. Students are expected to complete multiple dives per day and use their observations to discuss reef structure, animal behavior, conservation and eco-tourism. By the start of the course, students must either possess (at a minimum) Open Water SCUBA certification or have completed the online portion of PADI Open Water Certification with the understanding that they will complete the practicum portion in the first two days on Bonaire.

Offered: Every year, Summer

BIO 208. Introduction to Forensic Science. 3 Credits.

This course begins with a historical overview of the discipline as a method of understanding the contemporary field of forensics. Scientific principles and practices are applied to specific examples within crime scene and evidence analysis including, but not limited to physical evidence, glass and soil, organic and inorganic substances, hair and fibers, toxicology, serology and fingerprinting. Additionally, students utilize FBI cases, popular press and television to evaluate the use of science and distinguish among science, law and entertainment. Must be taken in conjunction with BIO 208L.

Corequisites: Take BIO 208L.

Offered: Every year, Spring

UC: Natural Sciences

BIO 208L. Introduction to Forensic Science Laboratory. 1 Credit.

Students develop skills in observation, measurement, microscopy, glass fracture patterns, soil and footprint analysis, chromatography, spectrophotometry, hair and fiber analysis, fingerprinting and DNA analysis. The culmination of the laboratory experience involves synthesis of lecture and laboratory activities into a single class project that begins with control of a simulated crime scene and evidence search patterns, and continues through processing evidence, evidence analysis and presentation of results. Must be taken in conjunction with BIO 208. (3 lab hrs.)

Corequisites: Take BIO 208.

Offered: Every year, Spring

UC: Natural Sciences

BIO 211. Human Anatomy and Physiology I. 3 Credits.

This advanced course provides a comprehensive analysis of human anatomy and physiology, including a detailed examination of molecular and cellular aspects of cell and organ function and metabolism incorporated with system physiology in the human body. Systems studied in the course include integumentary, skeletal, muscle, nervous, special senses and endocrine. Emphasis is on function and homeostasis. Relevant diseases also are presented. Primarily for students in bachelor's degree health science programs. First semester of a full-year course; must be taken in sequence. Must be taken in conjunction with BIO 211L.

Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L; Minimum grade C-.

Corequisites: Take BIO 211L.

Offered: Every year, Fall and Spring

BIO 211L. Human Anatomy and Physiology Lab I. 1 Credit.

Lab to accompany BIO 211. A detailed study of the major body systems utilizing anatomical models, cadavers, animal specimens, histological slides, physiological experiments and simulations. (3 lab hrs.) Must be taken in conjunction with BIO 211.

Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L; Minimum grade C-.

Corequisites: Take BIO 211.

Offered: Every year, Fall and Summer

BIO 212. Human Anatomy and Physiology II. 3 Credits.

This course is a continuation of BIO 211 with an emphasis on the anatomy and physiology of the major body systems. Systems studied in this course include cardiovascular, lymphatic, immune, respiratory, urinary, digestive and reproductive. Emphasis is on structure, function, interdependence and the maintenance of homeostasis. Relevant diseases also are presented. Primarily for students in bachelor's degree health science programs. Second semester of a full-year course; must be taken in sequence. Must be taken in conjunction with BIO 212L.

Prerequisites: Take BIO 211, BIO 211L; Minimum grade C-.

Corequisites: Take BIO 212L.

Offered: Every year, Spring and Summer

BIO 212L. Human Anatomy and Physiology II Lab. 1 Credit.

Lab to accompany BIO 212. A detailed study of the major body systems utilizing anatomical models, cadavers, animal specimens, histological slides, physiological experiments and simulations. Must be taken in conjunction with BIO 212. (3 lab hrs.)

Prerequisites: Take BIO 211, BIO 211L; Minimum grade C-.

Corequisites: Take BIO 212.

Offered: Every year, Spring and Summer

BIO 215. Environmental Biotechnology. 3 Credits.

This course focuses on foundational components of biotechnology, with an emphasis on microbial ecology, microbial metabolism and the importance of microorganisms in the environment. Students will learn about the traditional and emerging environmental biotechnological approaches currently being employed to address environmental problems and achieve a working knowledge of the science involved in wastewater treatment, clean-up of industrial waste streams, bioremediation, and bioenergy production with focus on recent progress and novel approaches that offer new insights into environmental biotechnology. Students will also engage in the scientific process, working in small groups on a project of their own design, and producing and delivering a professional in-class presentation.

Prerequisites: Take 1 group; Take BIO 102 BIO 102L; Take BIO 151;

Offered: Every other year, Spring

BIO 225. Physiological Diversity. 3 Credits.

This course provides an analysis of the physical and chemical processes that maintain animal life, including humans. Lectures cover the interdependent function of molecules, cells, organs and tissues as they relate to organismal function and fitness. Physiological principles are examined in a comparative framework and investigated through inquiry-based activities such as case study analyses and the reading of primary literature. Emphasis is on the roles of physiology in the maintenance of homeostasis throughout the life cycle of an animal. Must be taken in conjunction with BIO 225L.

Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.

Corequisites: Take BIO 225L.

Offered: Every other year, Fall

BIO 225L. Physiological Diversity Lab. 1 Credit.

Lab to accompany BIO 222 (3 lab hours). This course complements the BIO 225 lecture section by allowing students to investigate physiological principles via experimentation and case study analyses. Must be taken in conjunction with BIO 225.

Corequisites: Take BIO 225.

Offered: Every other year, Fall

BIO 240. Cellular Communication. 3 Credits.

This class focuses on the molecular mechanisms by which cells communicate with each other. Using examples from both prokaryotes and eukaryotes, students examine how cells release signaling molecules and then consider how target cells recognize and respond to the signals. Participants discuss how the basic processes are altered in diseases of signal processing such as cancer, diabetes and depression.

Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.

Offered: Every year, Fall

BIO 250. Biology Journal Club. 1 Credit.

BIO 250 is a scientific journal club in which students present published research papers to their peers, providing the background necessary for their peers to understand the experiments and discussing the implications of the science.

Prerequisites: Take BIO 101 or BIO 150; Minimum grade C-.

Offered: Every year, Fall and Spring

- BIO 282. Genetics.** **3 Credits.**
 This course considers the basic principles of inheritance, including data analysis and problem-solving skills. Students gain laboratory experience with a variety of techniques and organisms of current research importance, as well as with solving problems and analyzing data. Emphasis is on sound logic, creative thought and experimental design. Must be taken in conjunction with BIO 282L.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Corequisites: Take BIO 282L.
Offered: Every year, Fall
UC: Natural Sciences
- BIO 282L. Genetics Lab.** **1 Credit.**
 Lab to accompany BIO 282 (3 lab hours). This course introduces the fundamental principles of classical genetics using model organisms of medical and research relevance. Basic molecular genetic concepts are also introduced. Must be taken in conjunction with BIO 282.
Corequisites: Take BIO 282.
Offered: Every year, Fall
UC: Natural Sciences
- BIO 298. Research Methods in Biology.** **3 Credits.**
 This introduction to biological research includes discussion and demonstrated skills in library use, literature citation, academic integrity, experimental design and statistical and graphical treatment of data. It culminates in the collaborative design, preparation and presentation of a scientific research project. This course also includes exploration of the skills and values important to careers in science. Primary emphasis is given to the development of scientific literacy, critical thinking and reasoning, and written and oral communication.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Offered: Every year, Fall and Spring
- BIO 300. Special Topics.** **3-4 Credits.**
 Special topics in biology.
Prerequisites: Take BIO 101, BIO 102 or BIO 150, BIO 151.
Corequisites: Take BIO 300L.
Offered: As needed
- BIO 300L. Special Topics Lab.** **1 Credit.**
 Lab to accompany BIO 300.
Corequisites: Take BIO 300.
Offered: As needed
- BIO 317. Developmental Biology.** **2 Credits.**
 This course is an introduction to the basic developmental processes that enable a single cell to differentiate and create entire organ systems. Various animal models are explored, compared and integrated to illustrate key molecular and cellular events that lead to the formation of an entire organism. Must be taken in conjunction with BIO 317L.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Corequisites: Take BIO 317L.
Offered: Every other year, Spring
- BIO 317L. Developmental Biology Lab.** **2 Credits.**
 Lab to accompany BIO 317 (3 lab hours). This project-based laboratory uses a variety of different model systems to examine development. Must be taken in conjunction with BIO 317.
Corequisites: Take BIO 317.
Offered: Every other year, Spring
- BIO 323. Invertebrate Zoology.** **3 Credits.**
 This course introduces the basic adaptive features of the major invertebrate groups with emphasis on structure, classification, ecology and evolution, utilizing both lab and field studies. Must be taken in conjunction with BIO 323L.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Corequisites: Take BIO 323L.
Offered: Every other year, Spring
- BIO 323L. Invertebrate Zoology Lab.** **1 Credit.**
 Lab to accompany BIO 323. (3 lab hrs.) Must be taken in conjunction with BIO 323.
Corequisites: Take BIO 323.
Offered: Every other year, Spring
- BIO 324. Vertebrate Zoology.** **3 Credits.**
 This course examines the origin, diversity, adaptations, and natural history of the main vertebrate lineages: fishes, amphibians, reptiles (including dinosaurs and birds), and mammals. We will consider how environmental changes that have occurred over the billions of years of the Earth's existence have shaped the morphological, physiological, and behavioral features in each vertebrate class. In doing so, students will examine the anatomy and physiology of major body systems, including the skeletal, circulatory, integumentary, urinary, reproductive, respiratory, and nervous systems of vertebrates. Must be taken in conjunction with BIO 324L.
Prerequisites: Take BIO 102 and BIO 102L or take BIO 151 and BIO 151L
Corequisites: Take BIO 324L
Offered: Every other year, Fall
- BIO 324L. Vertebrate Zoology Lab.** **1 Credit.**
 This course complements the lecture course (BIO 324) to examine the origin, diversity, adaptations, and natural history of the main vertebrate lineages: fishes, amphibians, reptiles (including dinosaurs and birds), and mammals. In the laboratory course, students will perform dissections and view specimens to better understand the comparative anatomy and physiology of the major vertebrate groupings. In doing so, students will examine the anatomy and physiology of major body systems, including the skeletal, circulatory, integumentary, urinary, reproductive, respiratory, and nervous systems of vertebrates. (3 lab hrs.) Must be taken in conjunction with BIO 324.
Corequisites: Take BIO 324
- BIO 328. Human Clinical Parasitology.** **3 Credits.**
 This course considers the biology of protozoan and helminth parasites of humans and includes an introduction to tropical medicine. Lectures focus on the life cycles of selected parasites and epidemiology and pathology of selected parasitic diseases. Laboratory work focuses on clinical diagnosis, diagnostic techniques (including immunodiagnostic techniques), recognition of vectors, and experimental life cycle studies using both living and preserved materials. Must be taken in conjunction with BIO 328L.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Corequisites: Take BIO 328L.
Offered: Every other year, Spring
- BIO 328L. Human Clinical Parasitology Lab.** **1 Credit.**
 Lab to accompany BIO 328. (3 lab hrs.) Must be taken in conjunction with BIO 328.
Corequisites: Take BIO 328.
Offered: Every other year, Spring

- BIO 329. Neurobiology.** **3 Credits.**
This course provides an introduction to molecular, cellular and systems neuroscience. After exploring basic topics including electrical excitability, neurotransmitters and receptors, the course considers higher-level integrated systems such as the sensory systems. Human disorders are discussed to highlight the importance of proper functioning of the various components of the nervous system.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L and CHE 111, CHE 111L; Minimum grade C-.
Offered: Every year, Spring
- BIO 346. Cell Physiology.** **3 Credits.**
This course examines the physiology of the cell with emphasis on the structure and function of the eukaryotic cell. Topics include intracellular transport, cytoskeleton, movement, communication and control of cellular reproduction. The lab involves current techniques for studying proteins, cellular components and living organisms. Must be taken in conjunction with BIO 346L.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L; and CHE 210, CHE 210L.
Corequisites: Take BIO 346L.
Offered: Every year, Fall
- BIO 346L. Cell Physiology Lab.** **1 Credit.**
Lab to accompany BIO 346 (3 lab hours). This project-based laboratory uses current techniques for separating and studying cellular proteins and components and observing living organisms. The lab culminates with a major project investigating eukaryotic motility and cell structure. (3 lab hrs.) Must be taken in conjunction with BIO 346.
Corequisites: Take BIO 346.
Offered: Every year, Fall
- BIO 350. Cardiovascular Physiology.** **3 Credits.**
The focus of this course is to advance the study of the mammalian heart. This clinically-oriented course examines the structure and function of the heart, electrophysiology, cardiac cycle, cardiac output, blood vessels, hemodynamics and blood pressure. Students participate in "Grand Rounds" presentations while learning about cardiovascular pathologies. May not be taken for credit concurrently with or after completion of BIO 125.
Prerequisites: Take BIO 212.
Offered: Every other year, Fall
- BIO 352. Botany.** **2 Credits.**
The biology of plants, focusing on morphology, physiology, growth, genetics, evolution, ecology, ethnobotany and their importance to humans.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Corequisites: Take BIO 352L.
Offered: As needed
- BIO 352L. Botany Lab.** **2 Credits.**
Lab to accompany BIO 352. (4 lab hrs.)
Corequisites: Take BIO 352.
Offered: As needed
- BIO 356. Aquatic Ecology.** **2 Credits.**
This introduction to the study of the biology, chemistry, geology and the physics of ponds, lakes and streams includes studies of life histories of representative freshwater organisms. Students receive field training in limnological techniques.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Corequisites: Take BIO 356L.
Offered: As needed
- BIO 356L. Aquatic Ecology Lab.** **2 Credits.**
Lab to accompany BIO 356. (4 lab hrs.)
Corequisites: Take BIO 356.
Offered: As needed
- BIO 358. Conservation Biology.** **2 Credits.**
This course examines the effects humans have on the ecosystem and explores how plants and animals have adapted to the changing planet. Students learn how to quantify changes in the ecological communities and begin to explore possible solutions to environmental issues. Completion of BIO 152, BIO 152L is recommended but not required. Must be taken in conjunction with BIO 358L.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Corequisites: Take BIO 358L.
Offered: Every other year, Spring
- BIO 358L. Conservation Biology Lab.** **2 Credits.**
Lab to accompany BIO 358(3 lab hours). This course will explore different ecosystems and practice skills quantifying ecological changes. Students will design and execute their own experiment examining the effects of humans on the ecosystem. Must be taken in conjunction with BIO 358.
Corequisites: Take BIO 358.
Offered: Every other year, Spring
- BIO 365. Cancer Biology.** **3 Credits.**
This course provides an overview of cancer biology. With a focus on the molecular genetics of cancer, the course explores the identification of the genes and biochemical pathways which when disrupted lead to a deregulation of cell growth and differentiation. A discussion of disease pathology includes tumor classification, prognosis and current treatment options.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Offered: Every other year, Spring
- BIO 375. Physiological Models for Human Disease.** **3 Credits.**
This course investigates cellular and molecular mechanisms of animal physiology using a variety of animal model systems including *Drosophila melanogaster* (fruit fly), *Caenorhabditis elegans* (roundworm), *Dugesia tigrina* (planaria), *Danio rerio* (zebrafish) and *Gallus gallus domesticus* (chicken). Students are introduced to current applications of several experimental models for biomedical research on human health and diseases. Must be taken in conjunction with BIO 375L.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Corequisites: Take BIO 375L.
Offered: Every other year, Fall
- BIO 375L. Physiological Models for Human Disease Lab.** **1 Credit.**
Lab to accompany BIO 375(3 lab hours). Students work in groups to design and carry out experiments using one of four model systems listed *Drosophila melanogaster* (Fruit Fly), *Caenorhabditis elegans* (Roundworm), *Dugesia tigrina* (Planaria) and *Danio rerio* (Zebrafish). Students analyze experimental data and present findings via oral presentations. Must be taken in conjunction with BIO 375.
Corequisites: Take BIO 375.
Offered: Every other year, Fall

- BIO 382. Human Genetics.** **3 Credits.**
This course examines the genetic mechanism in humans, including data analysis and problem-solving skills. The course includes an exposure to techniques for analysis of genetic variation in humans, the structure of the human genome, the implication of human genetic variation, somatic cell genetics, an introduction to medical genetics, DNA analysis, and the implications of genetic knowledge in the context of modern society and culture. Must be taken in conjunction with BIO 382L.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Corequisites: Take BIO 382L.
Offered: Every other year, Spring
- BIO 382L. Human Genetics Lab.** **1 Credit.**
Lab to accompany BIO 382. (3 lab hrs.) Must be taken in conjunction with BIO 382.
Prerequisites: Take BIO 101, BIO 101L and BIO 102, BIO 102 or; Take BIO 150, BIO 150L and BIO 151, BIO 151L.
Corequisites: Take BIO 382.
Offered: Every other year, Spring
- BIO 383. Evolution.** **3 Credits.**
This course examines the mechanisms of evolutionary change and surveys the evolutionary and phylogenetic history of life on earth. Using primary research, students focus on how form, function and life histories of organisms have evolved.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L.
Offered: Every other year, Spring
- BIO 385. Explorations in Biology.** **1-4 Credits.**
In this course, guided individual and group assignments in Blackboard focus on synthesis of foundational knowledge in biology, development of scientific literacy, critical and creative thinking and communication skills and preparation for careers in science as responsible citizens. This course must be completed during the ongoing experiential learning project/experience, which must relate to the biological sciences and occur outside the classroom. The experiential learning project and course credit must be approved by the academic coordinator prior to enrollment.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L and BIO 298; Minimum grade C-.
Offered: Every year, All
- BIO 399H. Honors Research in Biological Sciences.** **3 Credits.**
This course targets students who are majoring in the biological sciences and are seeking university honors and/or departmental honors. In this capstone seminar, students participate in in-depth examination of primary research papers. The material relates to a central theme chosen by the professor.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L and BIO 298.
Offered: As needed
- BIO 471. Molecular Genetics.** **3 Credits.**
This course introduces students to the theory and practice of DNA manipulation that is involved in modern molecular biology, including cancer research, cellular development, regulation of differentiation and construction of designer genes in plants, animals, humans, microorganisms and virus. These methods are common in health research, industrial discovery and environmental remediation. The lecture and the laboratory, which involves DNA manipulation and gene cloning, are designed for students interested in careers in medicine, biotechnology, microbiology and graduate programs. Must be taken in conjunction with BIO 471L.
Prerequisites: Take BIO 102, BIO 102L or BIO 151, BIO 151L and CHE 110, CHE 111.
Corequisites: Take BIO 471L.
Offered: Every other year, Spring
- BIO 471L. Molecular Genetics Lab.** **1 Credit.**
Lab to accompany BIO 471. (3 lab hrs.) Must be taken in conjunction with BIO 471.
Corequisites: Take BIO 471.
Offered: Every other year, Spring
- BIO 491. Independent Research in Biological Science.** **1 Credit.**
Students participate in original independent research under the guidance of a full-time Quinnipiac faculty member in the Department of Biological Sciences. The student is required to submit for approval an independent research proposal describing the research to be conducted in this one-credit course. Students may take a total of 8 credits of Independent Research through enrollment in BIO 491, BIO 492, BIO 493, BIO 494.
Offered: Every year, All
- BIO 492. Independent Research in Biological Sciences.** **2 Credits.**
Students participate in original independent research under the guidance of a full-time Quinnipiac faculty member in the Department of Biological Sciences. The student is required to submit for approval an independent research proposal describing the research to be conducted in this two-credit course. Students may take a total of 8 credits of Independent Research through enrollment in BIO 491, BIO 492, BIO 493, BIO 494.
Offered: Every year, All
- BIO 493. Independent Research in Biological Sciences.** **3 Credits.**
Students participate in original independent research under the guidance of a full-time Quinnipiac faculty member in the Department of Biological Sciences. The student is required to submit for approval an independent research proposal describing the research to be conducted in this three-credit course. Students may take a total of 8 credits of Independent Research through enrollment in BIO 491, BIO 492, BIO 493, BIO 494.
Offered: Every year, All
- BIO 494. Independent Research in Biological Sciences.** **4 Credits.**
Students participate in original independent research under the guidance of a full-time Quinnipiac faculty member in the Department of Biological Sciences. The student is required to submit for approval an independent research proposal describing the research to be conducted in this four-credit course. Students may take a total of 8 credits of Independent Research through enrollment in BIO 491, BIO 492, BIO 493, BIO 494.
Offered: Every year, All
- BIO 498. Independent Study in Biology.** **1-4 Credits.**
Students may take a total of 8 credits of Independent Study/research through enrollment in BIO 498, BIO 499.
Offered: As needed
- BIO 499. Independent Study in Biology.** **1-4 Credits.**
Students may take a total of 8 credits of Independent Study/research through enrollment in BIO 498, BIO 499.
Offered: As needed
- BIO 500. Special Topics in Molecular and Cell Biology.** **3 Credits.**
- BIO 501. Special Topics: Advanced Protein Methods.** **4 Credits.**
Offered: As needed
- BIO 505. Writing and Science.** **3 Credits.**
This course reviews how scientific results and ideas are communicated and reviewed. Course content includes the storage and retrieval of scientific information, data presentation (table, figures, graphics), the writing of reports and papers as well as the preparation of publications for peer review. Copyright, patent law and the ethical issues involved in scientific communication also are considered. Assignments include oral and written presentations and attendance at assigned seminars and meetings.
Offered: As needed

- BIO 510. Special Topics.** **3-4 Credits.**
Offered: As needed
- BIO 515. Advanced Biochemistry.** **4 Credits.**
 This course offers advanced insights into major areas of biochemistry, including the structure and function of biological molecules, cell and membrane structure and function, bioenergetics and enzyme function, and cellular metabolism. This is a suitable prerequisite for many graduate courses.
Offered: Every year, Spring
- BIO 517. Advanced Developmental Biology.** **3 Credits.**
 This graduate-level course is an in-depth investigation into the processes that enable a single cell to become an entire multicellular organism with specialized organs and tissues. Various model organisms are explored, compared, and integrated to illustrate key molecular and cellular mechanisms that lead to the formation of whole organisms, and how those mechanisms have been modified through evolution to generate organismal diversity. Emphasis is on a critical analysis of the primary literature related to these topics.
Offered: As needed
- BIO 521. Stem Cell Biology.** **3 Credits.**
 This course provides a comprehensive overview of stem cell biology. Participants explore the topics of embryonic and adult stem cells, stem cell characteristics, reprogramming, stem cell therapies and tissue regeneration. Primary research literature associated with each topic is discussed and students gain an understanding of the role of stem cells in health and disease.
Offered: Every year, Spring
- BIO 523. Classical Genetics.** **1 Credit.**
 This 1-credit course is aimed at graduate students who are preparing to teach in the biological sciences and are preparing for the PRAXIS exam-specifically the Biology Content Test. In this interactive course, students review foundational information pertaining to classical genetics and further develop a knowledge base by participating in in-depth examination of primary research papers.
Offered: As needed
- BIO 524. Evolution.** **1 Credit.**
 This 1-credit course is aimed at graduate students who are preparing to teach in the biological sciences and are preparing for the PRAXIS exam-specifically the Biology Content Test. In this interactive course, students review foundational information pertaining to evolution and further develop a knowledge base by participating in in-depth examination of primary research papers.
Offered: As needed
- BIO 525. Diversity of Life and Organismal Biology.** **2 Credits.**
 This 2-credit course is aimed at graduate students who are preparing to teach in the biological sciences and are preparing for the PRAXIS exam-specifically the Biology Content Test. In this interactive course, students review foundational information pertaining to organismal biology and further develop a knowledge base by participating in in-depth examination of primary research papers.
Offered: As needed
- BIO 526. Ecology.** **2 Credits.**
 This 2-credit course targets graduate students who are preparing to teach in the biological sciences and are preparing for the PRAXIS exam-specifically the Biology Content Test. In this interactive course, students review foundational information pertaining to ecology and further develop a knowledge base by participating in in-depth examination of primary research papers.
Offered: As needed
- BIO 540. Cell Signaling.** **3 Credits.**
 This course focuses on the molecular mechanisms by which cells communicate with each other. Using examples from both prokaryotes and eukaryotes, students examine how cells release signaling molecules and how target cells recognize and respond to the signals. Discussions center on how signal processing is altered in diseases such as cancer, autoimmune disorders and some bacterial infections. Emphasis is on a critical analysis of the primary literature related to these topics.
Offered: As needed
- BIO 550. Graduate Journal Club - Molecular Cell Biology.** **1 Credit.**
 This course is a graduate-level scientific journal club in which students present recent ground-breaking published research papers in the fields of Molecular Biology, Cell Biology and Biochemistry. This course will develop students' ability to critically assess scientific literature including the interpretation of appropriate experimental design, data analysis and the broader implications of new scientific advances. Credit: 1 credit; may be taken a maximum of 3 times for credit
Offered: As needed
- BIO 562. Bioinformatics.** **3 Credits.**
 This hands-on course is for students seeking to understand methods of sequence and structural analysis using nucleic acid and protein databases. An understanding of the database format provides the basis for sequence analysis and alignment to determine common evolutionary origins, RNA secondary structure, gene prediction and regulation, protein structure prediction and classification, genome analysis and analysis of microarrays.
Offered: As needed
- BIO 568. Molecular and Cell Biology.** **4 Credits.**
 This course examines the cell from a molecular perspective. Cell composition, structure and organization are investigated in order to understand how cells grow, divide and respond to different intracellular and extracellular signals.
Offered: Every year, Fall
- BIO 571. Molecular Genetics.** **4 Credits.**
 This study of the prokaryotic and eukaryotic genetic material including transcription, translation, DNA replication and repair, gene cloning techniques, the regulation of the synthesis of gene products and genomics. Emphasis is placed on new genetic techniques that are used in industry and medicine.
Offered: Every year, Fall
- BIO 589. Molecular and Cell Neurobiology.** **3 Credits.**
 This course provides students with a detailed foundation of the basic principles of cellular and molecular neurobiology. Through lectures and interactive simulations, students become fluent in modern experimental approaches to explore and understand the properties of electrical signaling and cell-cell communication. Students apply their knowledge in independent projects investigating the physical basis of a disease of neurophysiological origin.
Offered: As needed
- BIO 605. DNA Methods Laboratory.** **4 Credits.**
 This project lab course enables students to develop hands-on experience with the basic techniques in cell and molecular biology including DNA purification, cloning, and gene expression analysis.
Prerequisites: Take BIO 571.
Offered: Every year, Spring

BIO 606. Protein Methods Laboratory. 4 Credits.

This project-based lab course enables students to develop hands-on experience with basic techniques in cell biology and protein biochemistry including protein purification, chromatographic and electrophoretic techniques, and immunoanalysis.

Prerequisites: Take BIO 515.

Offered: Every year, Fall

BIO 649. Independent Research. 2 Credits.

Students work independently to define and conduct original research. This course is required for students anticipating thesis work in Molecular and Cell Biology, and is conducted under the guidance and with the approval of a thesis adviser and thesis committee.

Offered: As needed

BIO 650. Thesis I in Molecular and Cell Biology. 4 Credits.

This course is a requirement for the thesis option within the MS in Molecular and Cell Biology. Students must demonstrate both breadth and depth of knowledge in their field of specialization. They also must demonstrate scientific research skills and present their findings to a thesis committee and the greater molecular and cell biology community.

Prerequisites: Take BIO 649.

Offered: Every year, All

BIO 651. Thesis II in Molecular and Cell Biology. 4 Credits.

Thesis II is a requirement for the thesis option MS in Molecular and Cell Biology. Students complete their independent research project, write an original thesis describing their research results, defend their thesis in front of a thesis committee, and give a presentation to the greater molecular and cell biology community.

Prerequisites: Take BIO 650

Offered: Every year, All

BIO 675. Comp Exam in Molecular and Cell Biology. 2 Credits.

The written comprehensive exam is a requirement of the non-thesis option for the MS in Molecular and Cell Biology. Students must demonstrate both breadth and depth of knowledge by illustrating a command of the subject matter obtained from individual courses into unified concepts which link the student's own specialization to other fields of study. Students are encouraged to meet with the program director before registering for the comprehensive exam. Minimum grade of a B- is required to pass the comprehensive examination.

Prerequisites: Take a minimum of four of the five following courses: BIO 515 BIO 568 BIO 571 BIO 605 BIO 606.

Offered: Every year, Fall and Spring

BIO 688. Independent Study. 1-4 Credits.

Offered: As needed

BIO 689. Independent Study. 1-4 Credits.

Offered: As needed

Bachelor of Science in Biology

Program Contact: Deborah Clark (Deborah.Clark@qu.edu) 203-582-8270

The BS in Biology program provides students with a biological, chemical and physical science foundation on which they can build a graduate degree in natural science or education, or it can be used to pursue advanced degrees in the fields of medicine, dentistry, veterinary medicine or other healthcare professions. Those choosing to end their formal education with the bachelor's degree will have a sufficient level of sophistication in biological science to assume a variety of positions with research institutions, governmental agencies or industry.

Students choose courses and follow a curriculum determined in consultation with their adviser.

A note about Advanced Placement equivalencies: Students who receive a score of 3 on the AP Biology Exam can receive credit for BIO 106 and BIO 107. BIO 106 and BIO 107 meet the needs of students in non-science areas. Students who receive a score of 4 on the AP Biology Exam can receive credit for BIO 101 and BIO 102. For students majoring in the natural sciences, we strongly encourage students to begin with BIO 150 and BIO 151, regardless of whether they receive credit for BIO 101 and BIO 102.

Graduation requirements: Majors in the Department of Biological Sciences must achieve an overall GPA of 2.0 and a science GPA of 2.25 for graduation. The science GPA is calculated from courses with prefixes of BIO, BMS, CHE, PHY and SCI. In addition, courses used to satisfy the Biological Science Core or Biology Elective Requirements must have a minimum grade of C-.

Independent Study in Biology

- Independent Study/Research can be used to satisfy the departmental requirement for Experiential Learning.
- Independent Study cannot be used to satisfy departmental requirements other than Experiential Learning.
- Students may not exceed a total of 8 credits of Independent Study while completing their undergraduate work.

Honors in Biology

- An overall GPA of 3.0 or better is required. A GPA of 3.5 in biology is required.
- Students should announce in writing their intention to pursue honors in biology to both the department chair and academic adviser, no later than May 1 in the spring term of their junior year.
- Departmental honors students are required to take BIO 399H (Honors Research in Biological Sciences).
- Students are each responsible for obtaining a sponsor for their senior research project prior to May 1 of their junior year.
- Successful completion of a senior research project is required. The project must include:
 - A written proposal;
 - The actual completion of an approved research project under the supervision and sponsorship of a full-time faculty member in the Department of Biological Sciences;
 - The presentation of the outcome of the research project in the written format approved by the department; and
 - A seminar presentation of the outcome of the research project.
- Evidence of excellence in speaking and writing skills, documented by term papers, written work, oral presentations, and grades, as determined by the committee.
- The actual granting of honors in biology is determined by all full-time faculty in the Department of Biological Sciences.

A list of the department faculty and their research interests is available on the CAS360 website. (<https://cas360.qu.edu/>)

BS in Biology Curriculum

Students majoring in biology must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Biological Science Core Requirements		
BIO 150 & 150L	General Biology for Majors and General Biology for Majors Laboratory	4
BIO 151 & 151L	Molecular and Cell Biology and Genetics and Molecular and Cell Biology and Genetics Lab	4
BIO 152 & 152L	Ecological and Biological Diversity and Ecological and Biological Diversity Laboratory	4
BIO 298	Research Methods in Biology	3
Physical Science Core Requirements		
CHE 110 & 110L	General Chemistry I and General Chemistry I Lab	4
CHE 111 & 111L	General Chemistry II and General Chemistry II Lab	4
CHE 210 & 210L	Organic Chemistry I and Organic Chemistry I Lab	4
CHE 211 & 211L	Organic Chemistry II and Organic Chemistry II Lab	4
PHY 110 & 110L	General Physics I and General Physics I Lab	4
PHY 111 & 111L	General Physics II and General Physics II Lab	4
Biology Electives ²		
Select a minimum of one course from each of the following categories:		
Molecular and Cellular Electives:		3
BIO 240	Cellular Communication	
BIO 282 & 282L	Genetics and Genetics Lab	
BIO 317 & 317L	Developmental Biology and Developmental Biology Lab	
BIO 346 & 346L	Cell Physiology and Cell Physiology Lab	
BIO 365	Cancer Biology	
BIO 382 & 382L	Human Genetics and Human Genetics Lab	
BIO 471 & 471L	Molecular Genetics and Molecular Genetics Lab	
Organismal Electives:		3
BIO 215	Environmental Biotechnology	
BIO 300	Special Topics	
BIO 323 & 323L	Invertebrate Zoology and Invertebrate Zoology Lab	
BIO 324 & 324L	Vertebrate Zoology and Vertebrate Zoology Lab	
BIO 328 & 328L	Human Clinical Parasitology and Human Clinical Parasitology Lab	
BIO 352 & 352L	Botany and Botany Lab	
BIO 358 & 358L	Conservation Biology and Conservation Biology Lab	
BIO 375 & 375L	Physiological Models for Human Disease and Physiological Models for Human Disease Lab	
BIO 383	Evolution	
Physiology Electives:		3
BIO 211 & 211L	Human Anatomy and Physiology I and Human Anatomy and Physiology Lab I	
BIO 212 & 212L	Human Anatomy and Physiology II and Human Anatomy and Physiology II Lab	
BIO 225 & 225L	Physiological Diversity and Physiological Diversity Lab	
BIO 329	Neurobiology	
BIO 350	Cardiovascular Physiology	
Experiential Learning (Biological Component):		
BIO 385	Explorations in Biology	1-4
BIO 491	Independent Research in Biological Science	1
BIO 492	Independent Research in Biological Sciences	2
BIO 493	Independent Research in Biological Sciences	3
BIO 494	Independent Research in Biological Sciences	4
BIO 498	Independent Study in Biology	1-4
BIO 499	Independent Study in Biology	1-4
Open Electives		20-31
Total Credits		130-153

Students choose courses and follow a curriculum determined in consultation with their adviser. The minimum number of credits required for graduation is 120. Students take open electives to fulfill the minimum number of credits for graduation. A sample course plan that fulfills the requirements for the Biology major is shown below. Individual planning will vary based on a number of factors (e.g., Advanced Placement and/or transfer credits).

Code	Title	Credits
First Year		
Fall Semester		
BIO 150 & 150L	General Biology for Majors and General Biology for Majors Laboratory	4
CHE 110 & 110L	General Chemistry I and General Chemistry I Lab	4
EN 101	Introduction to Academic Reading and Writing	3
FYS 101	First-Year Seminar	3
MA 140	Pre-Calculus	3
Spring Semester		

BIO 151 & 151L	Molecular and Cell Biology and Genetics and Molecular and Cell Biology and Genetics Lab	4
CHE 111 & 111L	General Chemistry II and General Chemistry II Lab	4
EN 102	Academic Writing and Research	3
MA 141	Calculus of a Single Variable	3
Second Year		
Fall Semester

Open Electives		5

¹ All students must complete the 46 credits of the University Curriculum (p. 51).

² Corequisite courses must be taken simultaneously.

³ Some biology courses have no laboratory component and are 3-credit rather than 4-credit courses.

⁴ Take BIO 152 & BIO 152L or BIO 298.

Initial placement in the English and mathematics courses is determined by placement exam and an evaluation of high school units presented. Students intending to pursue graduate or professional studies (medicine, dentistry, osteopathy or veterinary medicine) are advised to complete at least one semester of calculus. A minimum of MA 141 is required for graduation. BIO 150/BIO 150L, BIO 151/BIO 151L and BIO 152/BIO 152L are required for graduation. Students intending to pursue studies in professional health care fields are advised to complete additional courses chosen in consultation with their adviser.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the Bachelor of Science in Biological Sciences, students will demonstrate:

- Knowledge and Comprehension:** Successful completion of the following objectives establishes that students have achieved an appropriate understanding of foundational biological concepts.
 - Apply critical thinking and the scientific method to community/world issues and decision-making.
 - Evaluate the quality and validity of scientific evidence.
 - Create an understanding of biology as a whole by integrating and synthesizing information from multiple biological subdisciplines.
- Applications and Analysis:** Successful completion of the following objectives demonstrates that students have the ability to apply foundational knowledge and analyze information/data to make meaning from it.
 - Demonstrate basic skills and an understanding of safety procedures in the field and/or laboratory.
 - Organize and interpret experimental data (from their own experiments and/or those in primary literature sources).
 - Design and perform well controlled experiments.
- Self and Society:** Successful completion of the following objectives indicates that students successfully utilize biological knowledge to present and defend opinions in a variety of arenas.
 - Develop an in-depth understanding of the complexity of the natural world by understanding how a biologist thinks about complex systems.
 - Apply scientific methodology and knowledge of biological facts to real-world problems.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Suggested Transfer Curriculum for BS in Biology

A minimum of 60 credits is required for transfer into the BS in Biology program. Below is a sample plan of study for the first two years.

Course	Title	Credits
First Year		
Fall Semester		
English I		3
General Biology I with Lab		4
General Chemistry I with Lab		4
Math - Pre-Calculus		3
Credits		14
Spring Semester		
English II		3
General Biology II with Lab		4
General Chemistry II with Lab		4
Math - Calculus		3
Elective		3
Credits		17
Second Year		
Fall Semester		
Anatomy & Physiology I with Lab or Genetics with Lab		4
General Physics I with Lab or Organic Chemistry I with Lab		4
Elective		3
Elective		3
Credits		14
Spring Semester		
Anatomy & Physiology I or II with Lab or Genetics with Lab		4
General Physics II with Lab or Organic Chemistry II with Lab		4
Elective		4
Elective		3
Credits		15
Total Credits		60

Pre-Medical Studies Program

Students majoring in Health Science Studies, Biology, Biomedical Sciences or the natural science track of Behavioral Neuroscience may

fully participate in the pre-medical studies program. The curriculum in this degree program can fulfill the science prerequisites for most professional schools. Students should refer to Pre-Medical Studies (p. 47) for more information about the pre-medical studies program and contact the Health Professions Advisory Committee for further academic advising.

Minor in Biology

Program Contact: Lisa Kaplan (lisa.kaplan@qu.edu) 203-582-3588

Biology forms the foundation of a diverse array of fields, from zoology and botany to veterinary medicine and genetics. What's exciting about this minor is that you'll have a tremendous amount of control over the direction your experience takes. With an adviser from the Department of Biological Sciences, you'll chart your own path through the curriculum, choosing from a range of courses that fit your interests and your career ambitions. You'll have the flexibility to choose electives that broaden your knowledge and understanding of biology, or focus on a specific area of interest, such as ecology or physiology. Our biology minor is a perfect complement to any major including those in the other sciences and related fields, such as chemistry and engineering.

Biology Minor Curriculum

A minor in biology requires the completion of at least 20 BIO credits, 12 of which must be beyond the 100-level courses. At least one BIO course used to satisfy the minor requirements must be classified as an open, unrestricted or free elective course on the student's Academic Evaluation/Progress Report. A minimum grade of C- must be achieved in all courses for the minor with an overall minimum cumulative GPA of 2.0. Students who wish to minor in biology are required to consult with the adviser to biology minors within the Biology Department to design a minor that best meets their needs.

Code	Title	Credits
Possible courses include:		
BIO 101 & 101L	General Biology I and General Biology I Lab	4
BIO 102 & 102L	General Biology II and General Biology Lab II	4
BIO 106 & 106L	Science and Society: Concepts and Current Issues and Science and Society: Concepts and Current Issues Lab	4
BIO 107 & 107L	Everyday Biology and Everyday Biology Lab	4
BIO 120	The Biology of Beer	3
BIO 125	Cross My Heart: An Introduction to the Human Cardiovascular System	3
BIO 128 & 128L	Global Health Challenges: a Human Perspective and Global Health Challenges Lab	4
BIO 150 & 150L	General Biology for Majors and General Biology for Majors Laboratory	4
BIO 151 & 151L	Molecular and Cell Biology and Genetics and Molecular and Cell Biology and Genetics Lab	4

BIO 152 & 152L	Ecological and Biological Diversity and Ecological and Biological Diversity Laboratory	4
BIO 161	Introduction to the Biological Aspects of Science and Society	3
BIO 202	Inside Out: An Introduction to Human Form and Function	3
BIO 205	Bioethics	3
BIO 208 & 208L	Introduction to Forensic Science and Introduction to Forensic Science Laboratory	4
BIO 211 & 211L	Human Anatomy and Physiology I and Human Anatomy and Physiology Lab I	4
BIO 212 & 212L	Human Anatomy and Physiology II and Human Anatomy and Physiology II Lab	4
BIO 215	Environmental Biotechnology	3
BIO 225 & 225L	Physiological Diversity and Physiological Diversity Lab	4
BIO 240	Cellular Communication	3
BIO 250	Biology Journal Club	1
BIO 282 & 282L	Genetics and Genetics Lab	4
BIO 298	Research Methods in Biology	3
BIO 300 & 300L	Special Topics and Special Topics Lab	4-5
BIO 317 & 317L	Developmental Biology and Developmental Biology Lab	4
BIO 323 & 323L	Invertebrate Zoology and Invertebrate Zoology Lab	4
BIO 324 & 324L	Vertebrate Zoology and Vertebrate Zoology Lab	4
BIO 328 & 328L	Human Clinical Parasitology and Human Clinical Parasitology Lab	4
BIO 329	Neurobiology	3
BIO 346 & 346L	Cell Physiology and Cell Physiology Lab	4
BIO 350	Cardiovascular Physiology	3
BIO 352 & 352L	Botany and Botany Lab	4
BIO 356 & 356L	Aquatic Ecology and Aquatic Ecology Lab	4
BIO 358 & 358L	Conservation Biology and Conservation Biology Lab	4
BIO 365	Cancer Biology	3
BIO 375 & 375L	Physiological Models for Human Disease and Physiological Models for Human Disease Lab	4
BIO 382 & 382L	Human Genetics and Human Genetics Lab	4
BIO 383	Evolution	3
BIO 385	Explorations in Biology	1-4
BIO 471	Molecular Genetics	3

BIO 491	Independent Research in Biological Science	1
BIO 492	Independent Research in Biological Sciences	2
BIO 493	Independent Research in Biological Sciences	3
BIO 494	Independent Research in Biological Sciences	4
BIO 498	Independent Study in Biology	1-4
BIO 499	Independent Study in Biology	1-4

Accelerated Dual-Degree BS in Biology/MS in Molecular and Cell Biology (3+1)

Program Contact: Deborah Clark (Deborah.Clark@qu.edu) 203-582-8270

For highly qualified students, the Accelerated Dual-Degree BS in Biology/MS in Molecular and Cell Biology (3+1) provides an opportunity for students to achieve both a Bachelor of Science in Biology and a Master of Science within the field of Molecular and Cell Biology within a 4-year time frame typically associated with only an undergraduate education. The requirements and policies for the undergraduate degree are the same as described on the Bachelor of Science in Biology (p. 161) page, except that students in the 3+1 combined BS/MS program must maintain a GPA of at least 3.0 at the end of each school year for continued participation in the program. The requirements and policies for the graduate degree are the same as described on the Master of Science in Molecular and Cell Biology (p. 168) page.

Accelerated Dual-Degree BS in Biology/MS in Molecular and Cell Biology (3+1) Recommended Curriculum

The minimum number of credits required for the undergraduate degree is 120, and the minimum number of credits required for the graduate degree is 34. A maximum of 9 graduate credits may be used to fulfill both undergraduate and graduate requirements.

The Accelerated Dual-Degree BS/MS program is designed for outstanding biology majors. Students are offered acceptance into the program upon admission to Quinnipiac University.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Dual-Degree BS in Biology/MS in Molecular and Cell Biology (4+1)

Program Contact: Deborah Clark (deborah.clark@qu.edu) 203-582-8270

The Department of Biological Sciences offers a Dual-Degree BS in Biology and MS in Molecular and Cell Biology. The MS in Molecular and Cell Biology provides an excellent foundation for students intending to pursue studies in professional healthcare fields and doctoral programs. It also offers a competitive edge for students wishing to pursue a career in biotechnology and biopharmaceutical industries.

Upon satisfactory completion of all of the undergraduate curriculum requirements, students receive a Bachelor of Science in Biology. The requirements and policies for the undergraduate degree are the same as described on the Bachelor of Science in Biology (p. 161) page. Students complete graduate-level biology courses during their senior year; the requirements and policies for the graduate degree are the same as described on the Master of Science in Molecular and Cell Biology (p. 168) page. A maximum of 9 graduate credits may be used to fulfill both undergraduate and graduate requirements. Students must maintain an overall GPA of 3.0 for all graduate courses. Students earn the MS in

Molecular and Cell Biology upon satisfactory completion of all of the graduate curriculum requirements.

Dual-Degree BS in Biology/MS in Molecular and Cell Biology (4+1) Curriculum

Students who choose to pursue the five-year Master's Degree in Molecular and Cell Biology are required to complete the following courses by the end of their junior year:

Code	Title	Credits
CHE 210 & 210L	Organic Chemistry I and Organic Chemistry I Lab	4
CHE 211 & 211L	Organic Chemistry II and Organic Chemistry II Lab	4
PHY 110 & 110L	General Physics I and General Physics I Lab	4
PHY 111 & 111L	General Physics II and General Physics II Lab	4

A minimum of two Biology Electives in separate elective categories (Molecular and Cellular Biology, Organismal, Physiology, or Experiential Learning).

An elective in Molecular and Cellular Biology is strongly recommended.

Recommended Curriculum

Students choose courses and follow a curriculum determined in consultation with their adviser. The minimum number of credits required for the undergraduate degree is 120, and the minimum number of credits required for the graduate degree is 34. A maximum of 9 graduate credits may be used to fulfill both undergraduate and graduate requirements. A sample course plan that fulfills the requirements for the 4+1 program is shown below.

Individual planning will vary based on a number of factors, including, for instance, Advanced Placement and/or transfer credits.

BIO 675 Comp Exam in Molecular and Cell Biology

2 **Thesis Option**

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Master of Science in Molecular and Cell Biology

Program Contact: Alexandre de Lencastre
(Alexandre.deLencastre@qu.edu) 203-582-5024

The College of Arts and Sciences offers a Master of Science in Molecular and Cell Biology program for both part-time and full-time students. Through the graduate program, the mission of the Department of Biological Sciences is to prepare students for employment in research fields available in pharmaceutical companies, universities and hospitals as well as to provide an excellent foundation for students intending to pursue studies in professional health care fields and doctoral programs. To achieve this goal, the program provides the students with highly specialized lecture and laboratory courses relevant in this rapidly growing field.

MS in Molecular and Cell Biology Program of Study

The 34 credits required for the Master of Science in Molecular and Cell Biology include five courses (20 credits) in the science core, elective courses chosen in consultation with the program director and a thesis or non-thesis option (the non-thesis option requires the successful completion of a comprehensive examination; the thesis option requires 2 additional credits, for a total of 36 credits). Students must maintain a minimum cumulative GPA of 3.0 to remain in the MCB program. A minimum grade of C is required in all graduate courses.

MS Thesis

The MS thesis option involves original laboratory research performed under the guidance of a thesis mentor, a thesis committee and the director of the molecular and cell biology program. The thesis option requires the successful completion of 3 courses: BIO 649, BIO 650 and BIO 651. Students must have a GPA >3.5 to be eligible for the thesis track and pre-approval by program director. The thesis committee evaluates a student's progress by approving the research project, assessing student progress and advising the student whenever the need arises.

Comprehensive Examination

The written comprehensive exam (BIO 675) is a requirement of the non-thesis option for the MS in Molecular and Cell Biology. Students must demonstrate both breadth and depth of knowledge by illustrating a command of the subject matter obtained from individual courses into unified concepts, which link the student's own specialization to other fields of study. Completion of a minimum of four of the five core curriculum courses is required to register for the comprehensive examination. A minimum grade of a B- is required to pass the comprehensive examination. Students must meet with the program director before registering for the comprehensive exam.

Student Learning Outcomes

Upon completion of a Master of Science in Molecular and Cell Biology (MCB), students will demonstrate the following competencies:

- Foundational Knowledge:** Understand fundamental concepts in molecular genetics, cell biology and biochemistry and apply their knowledge to new findings in the field of molecular and cell biology.
- Application and Analysis:** Employ modern laboratory techniques used in DNA and protein research and interpret experimental data.
- Scientific Knowledge:** Analyze, synthesize and discuss primary scientific literature from peer-reviewed journals in the field.
- Communication Excellence:** Present scientific content to an audience in a professional manner.
- Advanced Knowledge:** Author scientific critiques and/or reviews in a manner consistent with the standards of professional scientific writing.

Admission

Applicants who have a bachelor's degree in a biological, medical or scientific field are eligible for admission to the Master of Science in Molecular and Cell Biology program. Applications may be obtained from the Office of Graduate Admissions (<http://www.qu.edu/gradadmission/>) and are accepted for fall or spring enrollment. A complete application consists of the following:

- application form and fee
- a letter of intent including a detailed autobiography of personal, professional and educational achievements
- two letters of recommendation (at least one letter should be from a science faculty member)
- official transcripts of all undergraduate and graduate work completed

A cumulative undergraduate GPA of 3.0 is preferred and undergraduate course work in biochemistry, microbiology, molecular biology and/or genetics is highly recommended. Although Graduate Record Examination (GRE) scores are not required, the scores can provide another indication of a student's academic readiness. Applicants should refer to the Graduate Admission Requirements (p. 675) found in this catalog.

Department of Chemistry and Physical Sciences

For students majoring in chemistry or biochemistry, the department provides an intensive program of study in the major areas of chemistry with an emphasis on developing skills in analytical thinking and problem-solving, evaluation and interpretation of data, effective communication of scientific information, and research methodologies, while also exploring the applications of chemistry that permeate our lives. Sufficient flexibility through open electives allows students to emphasize personal career goals.

Students are prepared for entry-level positions in chemical, pharmaceutical or academic research laboratory settings or in non-traditional settings, which rely on the background and skills that have been acquired. Their education also prepares them for entry into graduate programs of study in chemistry, biochemistry, environmental science, biomedical sciences, pharmacy, secondary education, medicine or law.

The department also provides a chemistry minor program structured to give students a balanced exposure to the major areas of chemistry and opportunities to develop associated skills. Providing this opportunity is an important asset for students studying in other programs, particularly those pursuing careers in the biomedical and biological sciences.

The department also offers courses in chemistry and physics tailored to the support of programs in the basic and health sciences, nursing and engineering. These programs all have a strong reliance on the ability of students to understand and apply the fundamental concepts of chemistry and physics and to demonstrate clear analytical thinking and problem-solving skills developed in these courses.

The mission of the Department of Chemistry and Physical Sciences is to provide undergraduate coursework in chemistry and the physical sciences in a student-centered, supportive learning environment characterized by small classes with access to faculty and well-equipped laboratory facilities where students can actively engage in the investigative process of science.

In addition, it is the mission of the department to offer stimulating coursework in the physical sciences for non-science majors as part of the University Curriculum so that all students can develop an appreciation of the process of science, engage in scientific investigative experiences, understand the role of science in their everyday lives and be prepared to make informed value judgments in our highly technological society.

- Bachelor of Science in Chemistry (p. 177)
- Bachelor of Science in Biochemistry (p. 175)

- Accelerated Dual-Degree BS in Biochemistry/MS in Molecular and Cell Biology (3+1) (p. 173)
- Minor in Chemistry (p. 178)

Chemistry (CHE)

CHE 101. Fundamentals of General, Organic and Biological Chemistry I. 3 Credits.

Students study the general fundamentals of chemistry: which includes atomic theory and radioactivity, bonding (including ions and molecules), stoichiometry, states of matter, and solutions including solubility, acids, bases and buffers. Students who have already received credit for CHE 110 with a grade of C- or higher are not eligible to take CHE 101.

Prerequisites: Take MA 107; Minimum grade C- or Math placement score of 3.

Corequisites: Take CHE 101L.

Offered: Every year, Fall

UC: Natural Sciences

CHE 101L. Fundamentals of General, Organic and Biological Chemistry I Lab. 1 Credit.

Lab must be taken with CHE 101. (2.5 lab hrs.)

Corequisites: Take CHE 101.

Offered: Every year, Fall

UC: Natural Sciences

CHE 102. Fundamentals of General, Organic and Biological Chemistry II. 3 Credits.

Students study the fundamental chemistry of carbon and the structural and functional relationships of hydrocarbons, alcohols, aldehydes, ketones, esters, carboxylic acids, amines, carbohydrates, lipids and proteins and their application to biochemistry.

Prerequisites: Take CHE 101, CHE 101L; Minimum grade C-.

Corequisites: Take CHE 102L.

Offered: Every year, Spring

UC: Natural Sciences

CHE 102L. Fundamentals of General, Organic and Biological Chemistry II Lab. 1 Credit.

Lab must be taken with CHE 102. (2.5 lab hrs.)

Prerequisites: Take CHE 101, CHE 101L; Minimum grade C-.

Corequisites: Take CHE 102.

Offered: Every year, Spring

UC: Natural Sciences

CHE 106. Chemical Principles with Biological Applications. 3 Credits.

Students learn about atomic theory (including radioactivity), bonding (including ions and molecules) and intermolecular forces, states of matter, solutions (including solubility, acids and bases, buffers, electrolytes and nonelectrolytes), carbon compounds and functional groups, biomolecules (such as carbohydrates, fatty acids, and amino acids and proteins), receptors, enzymes, nucleic acids and DNA. Students apply these fundamental chemical principles to a variety of health-related case studies. (Enrollment restricted to nursing majors)

Prerequisites: Take MA 107; Minimum grade C-; or Math placement score of 3.

Corequisites: Take CHE 106L.

Offered: Every year, Fall and Spring

CHE 106L. Chemical Principles with Biological Applications Lab. 1 Credit.

Lab to accompany CHE 106. (3 lab hrs.)

Corequisites: Take CHE 106.

Offered: Every year, Fall and Spring

CHE 110. General Chemistry I. 3 Credits.

Students study the atomic theory of matter, nomenclature, chemical formulas and reaction equations, stoichiometry, the gas laws and the kinetic molecular theory, thermochemistry, atomic structure, periodicity of the elements, chemical bonding and molecular structure. (Note: this course is designed for science majors.)

Prerequisites: Take MA 107; Minimum grade C- or Math placement score of 3.

Corequisites: Take CHE 110L.

Offered: Every year, All

UC: Natural Sciences

CHE 110L. General Chemistry I Lab. 1 Credit.

Lab must be taken with CHE 110. (3 lab hrs.)

Corequisites: Take CHE 110.

Offered: Every year, All

UC: Natural Sciences

CHE 111. General Chemistry II. 3 Credits.

Students study intermolecular forces, properties of solutions, kinetics, chemical equilibrium, pH, acid-base solution chemistry, thermodynamics and electrochemistry. Problem-solving is emphasized.

Prerequisites: Take CHE 110, CHE 110L; Minimum grade C-.

Corequisites: Take CHE 111L.

Offered: Every year, Spring and Summer

UC: Natural Sciences

CHE 111L. General Chemistry II Lab. 1 Credit.

Lab must be taken with CHE 111. (3 lab hrs.)

Prerequisites: Take CHE 110, CHE 110L; Minimum grade C-.

Corequisites: Take CHE 111.

Offered: Every year, Spring and Summer

UC: Natural Sciences

CHE 202. Chemistry of Macro- and Micronutrients. 4 Credits.

Students investigate the fundamental chemistry of macro- and micronutrients through lectures, projects on current research in the chemistry of food, and integrated online chemistry activities. Emphasis is on the study of the chemistry of the following food components: carbohydrates, fats, proteins, vitamins, minerals and water. The different nutrient needs of non-human animal species are also examined.

Enrollment in this course is restricted to students in the online degree completion programs. Students cannot receive credit for CHE 202 AND either SCI 161 or SCI 105. This course is offered online only.

Offered: Every other year, Summer

CHE 210. Organic Chemistry I. 3 Credits.

Students study the principles that govern the properties, reactions, and methods of preparation of organic compounds correlated with reaction mechanisms, stereochemistry, conformational analysis, resonance, and transition state theory, as well as the nomenclature of organic compounds. Specific functional groups studied include alkanes, alkyl halides, alkenes and alkynes.

Prerequisites: Take CHE 111, CHE 111L; Minimum grade C-.

Corequisites: Take CHE 210L.

Offered: Every year, Fall and Summer

CHE 210L. Organic Chemistry I Lab. 1 Credit.

Lab must be taken with CHE 210. (3 lab hrs.)

Corequisites: Take CHE 210.

Offered: Every year, Fall and Summer

- CHE 211. Organic Chemistry II.** **3 Credits.**
This course is a continuation of CHE 210. Students study specific groups such as aromatic compounds, alcohols and phenols, aldehydes, ketones, carboxylic acids and their derivatives and amines, and their analysis by infrared and nuclear magnetic resonance spectroscopy.
Prerequisites: Take CHE 210, CHE 210L; Minimum grade C-.
Corequisites: Take CHE 211L.
Offered: Every year, Spring and Summer
- CHE 211L. Organic Chemistry II Lab.** **1 Credit.**
Lab must be taken with CHE 211. (3 lab hrs.)
Corequisites: Take CHE 211.
Offered: Every year, Spring and Summer
- CHE 215. Analytical Chemistry.** **3 Credits.**
Students study the principles and practice of classical and modern chemical analysis. The following topics are studied: statistical treatment of analytical data, error analysis, experimental design and sample preparation, simple and complex equilibria, gravimetric analysis, potentiometry and spectrophotometry. Intended for chemistry and biochemistry majors and chemistry minors.
Prerequisites: Take CHE 111, CHE 111L; Minimum grade C-.
Corequisites: Take CHE 215L.
Offered: Every year, Fall and Spring
- CHE 215L. Analytical Chemistry Lab.** **1 Credit.**
Lab must be taken with CHE 215. (3 lab hrs.)
Corequisites: Take CHE 215.
Offered: Every year, Fall and Spring
- CHE 300. Special Topics.** **3 Credits.**
Prerequisites: Take two 200-level chemistry courses.
Offered: As needed
- CHE 301. Physical Chemistry I.** **3 Credits.**
Students investigate the underlying theories of chemical phenomena. The laws and fundamental equations of equilibrium thermodynamics are applied to the quantitative treatment of chemical equilibria, phase equilibria, electrochemical equilibria and ionic equilibria. The principles of chemical kinetics and reaction mechanisms also are investigated.
Prerequisites: Take CHE 111, CHE 111L; MA 141 or MA 151; and PHY 111, PHY 111L or PHY 122; Minimum grade C-.
Corequisites: Take CHE 301L.
Offered: Every year, Fall
- CHE 301L. Physical Chemistry I Lab.** **1 Credit.**
Lab must be taken with CHE 301. (3 lab hrs.)
Corequisites: Take CHE 301.
Offered: Every year, Fall
- CHE 302. Physical Chemistry II.** **3 Credits.**
Students study quantum theory, spectroscopy and statistical thermodynamics. The study of quantum mechanics is used to provide the basis for developing an understanding of atomic and molecular spectroscopy and chemical bonding.
Prerequisites: Take CHE 301; Minimum grade C-.
Corequisites: Take CHE 302L.
Offered: Every year, Spring
- CHE 302L. Physical Chemistry II Lab.** **1 Credit.**
Lab must be taken with CHE 302. (3 lab hrs.)
Corequisites: Take CHE 302.
Offered: Every year, Spring
- CHE 305. Instrumental Analysis.** **3 Credits.**
Students investigate the following instrumental analysis techniques: FTIR, NMR, UV-VIS, spectroscopy and separation methods including gas and liquid chromatography, mass spectrometry and other current techniques. Basic principles of electronics relating to the design and operation of chemical instrumentation are also discussed.
Prerequisites: Take CHE 211, CHE 211L and CHE 215, CHE 215L; Minimum grade C-.
Corequisites: Take CHE 305L.
Offered: Every year, Spring
- CHE 305L. Instrumental Analysis Lab.** **1 Credit.**
Lab must be taken with CHE 305. (3 lab hrs.)
Corequisites: Take CHE 305.
Offered: Every year, Spring
- CHE 315. Biochemistry I.** **3 Credits.**
Students engage in a comprehensive study of biologically active compounds and their metabolism, biosynthesis and relationship to biological systems, and a detailed study of bioenergetics, enzyme kinetics and buffer systems.
Prerequisites: Take CHE 211, CHE 211L; Minimum grade C-.
Offered: Every year, All
- CHE 315L. Biochemistry I Lab.** **1 Credit.**
Students carry out a series of experiments that expose them to the basic principles of biochemical techniques including biomolecule quantitation, protein and carbohydrate purification and analysis, and enzyme kinetics. CHE 315 must be taken prior to, or concurrently with CHE 315L. (3 lab hrs.)
Corequisites: Take CHE 315.
Offered: Every year, Fall and Spring
- CHE 316. Biochemistry II.** **3 Credits.**
Students examine the key metabolic pathways of carbohydrates, fatty acids, amino acids and nucleotides with a focus on the structural biology, thermodynamics and regulation of key enzymes. Nucleic acids, DNA and RNA are investigated to understand the chemical principles that govern the flow of genetic information. Students apply key concepts toward an understanding of the molecular basis of disease (e.g., type II diabetes/ metabolic syndrome).
Prerequisites: Take CHE 315; Minimum grade C-.
Offered: Every other year, Spring
- CHE 399. Independent Study in Chemistry I.** **1-3 Credits.**
Permission of the chairperson is required. May be taken in more than one semester for up to a total of 6 credits.
Offered: All
- CHE 410. Inorganic Chemistry.** **3 Credits.**
Students study the electronic structure of atoms, ionic and covalent bonding, acid-base chemistry and non-aqueous solvents, coordination chemistry, and periodicity. Symmetry and chemical applications of group theory are introduced.
Prerequisites: Take CHE 111; Minimum grade C-.
Offered: Every other year, Fall
- CHE 420. Chemistry Integrative Capstone.** **3 Credits.**
Topics in chemistry including history, ethics, environmental issues and current developments are explored from a scientific perspective. Through oral and written work, students demonstrate connections between their general education, co-curricular activities, major coursework and experiential learning project(s) in chemistry.
Prerequisites: Senior status as a chemistry/biochemistry major or approval of chairperson.
Offered: Every year, Spring

CHE 475. Chemistry Seminar I. 1 Credit.

Students attend research group meetings and outside seminars. Students prepare and present a literature-based seminar on a topic approved by their research mentor. (Enrollment restricted to senior chemistry and biochemistry majors.)

Corequisites: Take CHE 490.

Offered: Every year, Fall

CHE 476. Chemistry Seminar II. 1 Credit.

Students attend research group meetings and outside seminars. Students prepare and present a seminar and a poster presentation on their research project. (Enrollment restricted to senior chemistry and biochemistry majors.)

Prerequisites: Take CHE 475 and CHE 490.

Corequisites: Take CHE 491.

Offered: Every year, Spring

CHE 490. Chemistry Research I. 3 Credits.

Students work closely with a faculty mentor on a chemistry research project. A minimum of 100 lab hours or equivalent is required. (Enrollment restricted to senior chemistry and biochemistry majors.)

Corequisites: Take CHE 475.

Offered: Every year, Fall

CHE 491. Chemistry Research II. 3 Credits.

Students continue their work on a chemistry research project, which they began in CHE 490. A minimum of 100 lab hours or equivalent is required. (Enrollment restricted to senior chemistry and biochemistry majors.)

Prerequisites: Take CHE 475 and CHE 490.

Corequisites: Take CHE 476.

Offered: Every year, Spring

Physics (PHY)

PHY 101. Elements of Physics. 3 Credits.

Students study the basic principles of physics and some important applications. Kinematics, Newton's laws of motion, circular motion, torque, fluid dynamics, electrostatics, circuits, waves, sound and light are studied. This course is suitable for both science and non-science majors. Students who have credit for PHY 110 or PHY 121 may not register for PHY 101.

Prerequisites: Take MA 107 minimum grade C- or Math placement score of 3.

Corequisites: Take PHY 101L.

Offered: Every year, Fall and Spring

UC: Natural Sciences

PHY 101L. Elements of Physics Lab. 1 Credit.

Lab must be taken with PHY 101. (2 lab hrs.)

Corequisites: Take PHY 101.

Offered: Every year, Fall and Spring

UC: Natural Sciences

PHY 105. Physics of Music. 3 Credits.

Students study the principles of wave mechanics and emphasize applications associated with sound, music and instruments. Topics cover the anatomy of waves and sound, the structure and physics of instruments (guitar, trumpet, drums, piano, etc), human voice, singing and speech, musical harmony and scales, architecture acoustics and electronic communication and sound digitization. This course is designed for non-science majors with no previous coursework in physics or any background in music. This course will use mathematics and algebra but not be the focus of the course. Any math background acceptable. No prerequisites.

Corequisites: Take PHY 105L;

UC: Natural Sciences

PHY 105L. Physics of Music Lab. 1 Credit.

Corequisites: Take PHY 105;

UC: Natural Sciences

PHY 107. Introduction to Astronomy. 3 Credits.

This course provides students with an overview of the principles and techniques used for observing the night sky, components of the Solar System, Milky Way galaxy and the universe. Students assemble the required tools to examine recent and historic data that is used to build models of the ever-evolving universe. Using hands-on activities, students apply concepts and techniques related to the structure of our solar system, reading and plotting celestial coordinates, gravitation, features and operation of telescopes, methods of determining astronomical distance, stellar and cosmic evolution, and general relativity. Required nighttime telescope observation sessions reinforce lecture concepts. This course is intended for non-science majors and will use basic geometry and algebra for modeling.

Corequisites: Math Placement level of 2 or higher.

Offered: Every year, Spring

UC: Natural Sciences

PHY 110. General Physics I. 3 Credits.

Students use algebra and trigonometry to examine the fundamentals of Newtonian mechanics. Topics include kinematics and dynamics, momentum, energy, and rotating rigid-body equilibrium and dynamics. This course is designed primarily for science majors. Must be taken in conjunction with PHY 110L.

Prerequisites: Take MA 107; minimum grade C-; or Math placement score of 3.

Corequisites: Take PHY 110L.

Offered: Every year, Fall and Summer

UC: Natural Sciences

PHY 110L. General Physics I Lab. 1 Credit.

Lab must be taken with PHY 110. (2 lab hrs.)

Corequisites: Take PHY 110.

Offered: Every year, Fall and Summer

UC: Natural Sciences

PHY 111. General Physics II. 3 Credits.

Students use algebra and trigonometry to examine the fundamentals of classical electromagnetic theory. Topics include electrostatics, magnetostatics, dc circuits, electromagnetic waves, and geometric and wave optics. Must be taken in conjunction with PHY 111L. This course is designed primarily for science majors.

Prerequisites: Take PHY 110, PHY 110L; Minimum grade C-.

Corequisites: Take PHY 111L.

Offered: Every year, Spring and Summer

UC: Natural Sciences

PHY 111L. General Physics II Lab.**1 Credit.**

Lab must be taken with PHY 111. (2 lab hrs.)

Corequisites: Take PHY 111.**Offered:** Every year, Spring and Summer**UC:** Natural Sciences**PHY 121. University Physics.****4 Credits.**

Students use calculus to examine classical Newtonian mechanics in an integrated lecture and laboratory classroom. Through experimentation, computer modeling and group problem-solving, students apply physics principles to predict the outcome of reality-based and open-ended problems. Topics include kinematics, Newton's laws, conservation of energy and momentum, torque, and equilibrium of static bodies and fluids. (6 studio-lab hrs.)

Prerequisites: Take MA 141 or MA 151; Minimum grade C-.**Offered:** Every year, Fall and Spring**UC:** Natural Sciences**PHY 122. University Physics II.****4 Credits.**

Students use calculus to examine classical electromagnetism in an integrated lecture and laboratory classroom. Through experimentation, computer modeling, and group problem-solving, students apply physics principles to predict the outcome of reality-based and open-ended problems. Topics include electrostatics, magnetostatics, dc circuits, Maxwell's equations, and electromagnetic radiation. (6 studio-lab hrs.)

Prerequisites: Take PHY 121; Minimum grade C-.**Offered:** Every year, Fall and Spring**UC:** Natural Sciences**PHY 202. Physics of Life and Technology.****4 Credits.**

Students study the basic principles of physics including everyday applications and their use in applied technology. Topics include Newton's Laws of Motion and Gravity, torque, sound, light and optics, electricity and magnetism. These principles are examined through the study of roller coasters, space travel, musical instruments, the mechanics of muscle movements, sports and sport technology, the circuitry of the human brain, medical imaging using light and sound, optics of the human eye, lasers and elementary circuits. Enrollment in this course is restricted to students in the Online Bachelor of Science in Health Science Studies degree completion program. Students may not receive credit for PHY 202 if they already have credit for PHY 101 or PHY 110.

Prerequisites: Basic algebraic skills; MA 107 or MA 110 or higher; or a Math placement score of 3 or higher.**Offered:** As needed**Science (SCI)****SCI 102. Earth Sciences.****3 Credits.**

This course provides an introduction to the methods of Earth science. Students study the physical, chemical, and biological processes that combine to produce geological processes with attention focused on plate, tectonic environments, processes, and forces, Earth system surface processes, and climate change. This course is designed for nonscience majors.

Corequisites: Take SCI 102L.**Offered:** Every year, All**UC:** Natural Sciences**SCI 102L. Earth Sciences Lab.****1 Credit.**

Lab must be taken with SCI 102. (2 lab hrs.)

Corequisites: Take SCI 102.**Offered:** Every year, All**UC:** Natural Sciences**SCI 105. Chemistry and Nutrition.****3 Credits.**

Students study the fundamental chemistry and nutritional role of food components including carbohydrates, fats and proteins, as well as the importance of vitamins, minerals, and water in the diet. Students learn about recent developments in nutrition and how nutrition research is conducted. Students apply these concepts to analyze and improve their own diets. This course is designed for non-science majors. Students may not receive credit for both SCI 105 and SCI 161.

Corequisites: Take SCI 105L.**Offered:** Every year, Spring**UC:** Natural Sciences**SCI 105L. Chemistry and Nutrition Lab.****1 Credit.**

Lab must be taken with SCI 105. (2 lab hrs.)

Corequisites: Take SCI 105.**Offered:** Every year, Spring**UC:** Natural Sciences**SCI 161. Nutrition: an Investigative Experience.****3 Credits.**

Students study the fundamental chemistry and nutritional role of food components including carbohydrates, fats and proteins, as well as the importance of vitamins, minerals, and water in the diet. Students learn about recent developments in nutrition and how nutrition research is conducted. Students apply these concepts to analyze and improve their own diets. This course is designed for non-science majors. Students may not receive credit for both SCI 161 and SCI 105.

Offered: Every year, All**UC:** Natural Sciences**SCI 202. Environmental Science.****4 Credits.**

Students investigate the Earth's environmental systems and the impact of human activity (ecological footprint) on the planet through the study of renewable and nonrenewable resources, toxic substances in the soil, water and the atmosphere, the impact of pollution on the hydrological cycle, ozone depletion, ground water contamination, and the causes of global climate change. Students examine efforts being made to protect the Earth's environment and to promote sustainable strategies to solve the problems of economic, political and social policies, which impact all of Earth's resources. Enrollment in this course is restricted to students in online BS degree completion programs. This course is offered online only.

Offered: Every year, Spring**SCI 261. Natural Disasters.****3 Credits.**

Students study the causes, occurrence, and consequences of natural disasters. They will analyze the scientific basis of the physical causes, distribution, and frequency of disasters such as earthquakes, volcanoes, hurricanes, floods, mass wasting and tsunamis. Naturally occurring disasters and the role of human activities in both contributing to and mitigation of natural disasters are studied. Case studies of local, regional, and global examples of historical and recent disasters will be used.

Prerequisites: Take EN 101**Offered:** Every year, Spring**UC:** Natural Sciences

Accelerated Dual-Degree BS in Biochemistry/MS in Molecular & Cell Biology (3+1)

Program Contact: Robert Collins (robert.collins@qu.edu) 203-582-6407

For highly qualified students, the Accelerated Dual-Degree BS in Biochemistry/MS in Molecular and Cell Biology (3+1) provides an opportunity for students to achieve both a Bachelor of Science and a

Master of Science within the field of Molecular and Cell Biology within a 4-year time frame typically associated with only an undergraduate education. Students must maintain a GPA of at least 3.0 at the end of each school year for continued participation in the program.

Accelerated Dual-Degree BS in Biochemistry/MS in Molecular and Cell Biology (3+1) Recommended Curriculum

The minimum number of credits required for the undergraduate degree is 120, and the minimum number of credits required for the graduate degree is 34. A maximum of 9 graduate credits may be used to fulfill both undergraduate and graduate requirements.

Course	Title	Credits
First Year		
Fall Semester		
BIO 150 & 150L	General Biology for Majors and General Biology for Majors Laboratory	4
CHE 110 & 110L	General Chemistry I and General Chemistry I Lab	4

Total Credits		145

The Accelerated Dual-Degree BS/MS program is designed for outstanding biochemistry majors—those who rank in the top 20 percent of their high school class and who have a combined SAT score of 1200. Students are invited to join the program prior to matriculation. This program has several features, including flat tuition for the entire four years.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Bachelor of Science in Biochemistry

Program Contact: Carol Fenn (Carol.Fenn@quinnipiac.edu)
203-582-8254

A BS in Biochemistry gives you the skills to become a research associate studying the ways molecules react with one another, or a laboratory technician analyzing biochemical metabolites in the pursuit of new pharmaceuticals. You may become a biochemist in a food development laboratory, write copy for technical publications or work for a consumer products company developing a more effective sunscreen.

We teach you to evaluate and interpret data, hone your analytical thinking skills and present the results of your scientific research to various audiences. An independent research project strengthens the skills you develop in the classroom. Students are encouraged to pursue real-life work experience in the form of internships at industrial, academic and governmental laboratories.

Your degree in biochemistry qualifies you to work as a research assistant in a chemical, pharmaceutical or academic research laboratory upon graduation, but you'll also have the foundation to pursue an advanced degree in several fields including medicine, pharmacy, veterinary medicine or law.

An independent research project directed by a full-time faculty member in the department is required of all students in this program. This research project plays a key role for you to develop a deeper understanding of the biochemistry involved, build skills necessary to work independently and to communicate effectively the results of your research.

BS in Biochemistry Curriculum

Initial placement in English and mathematics courses is determined by placement examinations and an evaluation of high school units presented. Students who do not place directly into MA 141 or MA 151 should take MA 140. MA 153 and MA 154 are strongly recommended.

Biochemistry majors must maintain a minimum grade of C- in all required chemistry, physics, biology and mathematics courses. Any required course not listed in the course descriptions may be considered for scheduling when the need arises. All 4-credit science courses have a laboratory component. Chemistry and biology electives must be selected with the advice and approval of the department adviser. Open electives should be selected based upon student interests and career goals from offerings in all schools.

Students majoring in biochemistry must complete the following requirements:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Biochemistry Core Requirements		
CHE 110 & 110L	General Chemistry I and General Chemistry I Lab	4
CHE 111 & 111L	General Chemistry II and General Chemistry II Lab	4
CHE 210 & 210L	Organic Chemistry I and Organic Chemistry I Lab	4
CHE 211 & 211L	Organic Chemistry II and Organic Chemistry II Lab	4
CHE 215 & 215L	Analytical Chemistry and Analytical Chemistry Lab	4

BIO 151 & 151L	Molecular and Cell Biology and Genetics and Molecular and Cell Biology and Genetics Lab	4
Open Electives ⁷		
Total Credits		120

¹ All students must complete the University Curriculum (p. 51) requirements.

² Typically CHE 300 (offerings vary).

³ Advanced biology electives for the biochemistry major are chosen in consultation with the departmental adviser.

⁴ Required courses, which support the biochemistry major and may be used to satisfy requirements outside the major.

⁵ MA 151 may be substituted for MA 141. MA 153 and MA 154 are also highly recommended but not required.

⁶ PHY 121 and PHY 122 may be substituted.

⁷ Students take open electives to fulfill the minimum number of credits for graduation. Number of credits may vary depending on foreign language and math placement scores. Some cognate course credits may apply toward the University Curriculum.

Minimum number of credits required for graduation is 120.

Modern Language Requirement

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102 level, and all students are encouraged to pursue a balanced program of study.

Student Learning Outcomes

Upon completion of the biochemistry degree program, students will demonstrate the following competencies:

- Disciplinary Knowledge:** Develop a broad knowledge base of chemical principles in the areas of general, organic, analytical, physical and biochemistry along with cognate knowledge in the areas of biology, physics and mathematics.
- Laboratory Skills:** Develop relevant knowledge and hands-on skills to be able to work safely and independently in a chemistry laboratory setting to collect, record and evaluate experimental data including the utilization of both classical and instrumental techniques.
- Scientific Information Literacy:** Conduct relevant field-specific searches of scientific databases to locate research articles related to a topic or problem and gain experience in reading, interpreting and discussing research literature in the field.
- Research Experience:** Apply acquired knowledge and skills to investigate problems by working on independent mentored project(s) through a senior research project, independent research, internship(s) and/or summer research study.
- Critical Thinking and Problem-Solving:** Apply knowledge and skills to solve increasingly complex conceptual and quantitative problems in the field.
- Scientific Communication:** Demonstrate competency in oral and written expression of the results of their laboratory work through written lab reports, poster presentations and seminar presentations.
- Career Advancement:** Be competitive for employment in an entry-level field-related position or acceptance into a graduate or professional degree program.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for BS in Biochemistry

A minimum of 60 credits is required for transfer into the BS in Biochemistry program, and the following courses must be completed: general chemistry 1 and 2, organic chemistry 1 and 2, general biology 1, and physics 1. Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Bachelor of Science in Chemistry

Program Contact: Carol Fenn (Carol.Fenn@quinnipiac.edu)
203-582-8254

Chemistry majors explore the world on the molecular level. Students gain knowledge about the wide range of properties and reactions of inorganic, organic and biological compounds. Lab courses enable you to carry out syntheses and analyze materials. You also get hands-on access to a sophisticated array of instruments, which include a variety of spectrophotometers and chromatographic systems, to help build confidence in your ability to solve complex problems in the field. You can individualize your experience by taking electives in specialized areas, such as environmental chemistry, or pursue a minor in a completely different but complementary field to meet your career goals.

We teach you to evaluate and interpret data, hone your analytical thinking skills and present the results of your scientific research to various audiences. Because of our small class sizes and highly accessible faculty, you'll get plenty of support and the personal attention you need. An independent research project strengthens the skills you develop in the classroom. Students are encouraged to pursue real-life work experience in the form of internships.

Your degree in chemistry qualifies you to work as a laboratory or research assistant in an academic, consumer product, pharmaceutical or industrial research or quality control laboratory upon graduation, but you'll also have the foundation to pursue an advanced degree in a specific area of chemistry or in other fields including medicine, pharmacy, veterinary medicine or law.

BS in Chemistry Curriculum

Initial placement in English and mathematics courses is determined by placement examinations and an evaluation of high school units presented. Students who do not place directly into MA 141 or MA 151 should take MA 140. MA 153 and MA 154 are strongly recommended.

Chemistry majors must maintain a minimum grade of C- in all required chemistry, physics and mathematics courses. Any required course not listed in the course descriptions may be considered for scheduling when the need arises. All 4-credit science courses have a laboratory component. Chemistry electives must be selected with the advice and approval of the department adviser. Open electives should be selected based upon student interests and career goals from offerings in all schools.

Students majoring in chemistry must complete the following requirements:

Code	Title	Credits
	University Curriculum ¹	46
	Modern Language Requirement	3-6
	Chemistry Core Requirements	

CHE 110 & 110L	General Chemistry I and General Chemistry I Lab	4
CHE 111 & 111L	General Chemistry II and General Chemistry II Lab	4
CHE 210 & 210L	Organic Chemistry I and Organic Chemistry I Lab	4
CHE 211 & 211L	Organic Chemistry II and Organic Chemistry II Lab	4
CHE 215 & 215L	Analytical Chemistry and Analytical Chemistry Lab	4
CHE 301 & 301L	Physical Chemistry I and Physical Chemistry I Lab	4
CHE 302 & 302L	Physical Chemistry II and Physical Chemistry II Lab	4
CHE 305 & 305L	Instrumental Analysis and Instrumental Analysis Lab	4
CHE 315 & 315L	Biochemistry I and Biochemistry I Lab	4
CHE 410	Inorganic Chemistry	3
CHE 420	Chemistry Integrative Capstone	3
CHE 475	Chemistry Seminar I	1
CHE 476	Chemistry Seminar II	1
CHE 490	Chemistry Research I	3
CHE 491	Chemistry Research II	3
	Upper level CHE elective course ²	3
Cognate Courses ³		
MA 141	Calculus of a Single Variable ^{3,4}	3
PHY 110 & 110L	General Physics I and General Physics I Lab ^{3,5}	4
PHY 111 & 111L	General Physics II and General Physics II Lab ^{3,5}	4
Open electives ⁶		
Total Credits		113-116

¹ [All students must complete the University Curriculum \(p. 51\) requirements.](#)

² Typically CHE 300.

³ Required courses, which support the chemistry major and may be used to satisfy requirements outside of the major.

⁴ [MA 151 may be substituted for MA 141. MA 153 and MA 154 are also highly recommended but not required.](#)

⁵ PHY 121 and PHY 122 may be substituted.

⁶ Students take open electives to fulfill the minimum number of credits for graduation. Number of credits may vary depending on foreign language and math placement scores. Some cognate course credits may count toward the University Curriculum requirements.

Minimum number of credits required for graduation is 120.

Modern Language Requirement

The College of Arts and Sciences offers bachelor of arts and bachelor of science degrees. Students earning either degree must complete one foreign language through the 102 level, and all students are encouraged to pursue a balanced program of study.

Student Learning Outcomes

Upon completion of the chemistry program, students will demonstrate the following competencies:

- Disciplinary Knowledge:** Develop a broad knowledge base of chemical principles in the areas of general, organic, analytical, inorganic, physical, and biochemistry along with cognate knowledge in the areas of physics and mathematics.
- Laboratory Skills:** Develop relevant knowledge and hands-on skills to be able to work safely and independently in a chemistry laboratory setting to collect, record and evaluate experimental data including the utilization of both classical and instrumental techniques.
- Scientific Information Literacy:** Conduct relevant field-specific searches of scientific databases to locate research articles related to a topic or problem and gain experience in reading, interpreting and discussing research literature in the field.
- Research Experience:** Apply acquired knowledge and skills to investigate problems by working on independent mentored project(s) through a senior research project, independent research, internship(s) and/or summer research study.
- Critical Thinking and Problem Solving:** Apply knowledge and skills to solve increasingly complex conceptual and quantitative problems in the field.
- Scientific Communication:** Demonstrate competency in oral and written expression of the results of their laboratory work through written lab reports, poster presentations and seminar presentations.
- Career Advancement:** Be competitive for employment in an entry-level field-related position or acceptance into a graduate or professional degree program.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).

- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a chemistry major).

Suggested Transfer Curriculum for BS in Chemistry

A minimum of 60 credits is required for transfer into the BS in Chemistry program, and the following courses must be completed: general chemistry 1 and 2, calculus 1, organic chemistry 1 and 2 and physics 1 and 2 (calculus 2 is also highly recommended, but not required). Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Minor in Chemistry

Program Contact: Carol Fenn (carol.fenn@qu.edu) 203-582-8254

The highly technical nature of our daily living has increased the need for a working knowledge of chemistry in biological sciences, medical sciences, law, business, government, academia and many more areas.

Students majoring in programs other than chemistry can be recognized as having additional proficiency in chemistry by successfully completing this balanced program. Candidates must apply to the chemistry department to enter this program and be enrolled concurrently in a major undergraduate program.

Chemistry Minor Curriculum

The program consists of a minimum of 24 credits of chemistry distributed between 20 credits of required courses and 4 credits of elective courses consistent with the following specifications: The minimum grade required for each course is a C-.

Code	Title	Credits
Required		
CHE 110 & 110L	General Chemistry I and General Chemistry I Lab	4
CHE 111 & 111L	General Chemistry II and General Chemistry II Lab	4
CHE 210 & 210L	Organic Chemistry I and Organic Chemistry I Lab	4
CHE 211 & 211L	Organic Chemistry II and Organic Chemistry II Lab	4
CHE 215 & 215L	Analytical Chemistry and Analytical Chemistry Lab	4
Elective		
Select one of the following:		4
CHE 301 & 301L	Physical Chemistry I and Physical Chemistry I Lab	
CHE 305 & 305L	Instrumental Analysis and Instrumental Analysis Lab	
CHE 315 & 315L	Biochemistry I and Biochemistry I Lab	
Total Credits		24

Department of Economics

The Department of Economics places a particularly strong emphasis on a well-rounded liberal arts education, ethical judgment and the ability to assess past and present public policies. We encourage a friendly, supportive environment for all students, promote student-professor interaction and build a community of scholars.

Students who have earned a degree in economics have gone on to careers in banking, consulting, financial research, the government, the hedge fund industry, insurance firms such as Travelers and industrial firms such as General Electric and United Technologies. Besides preparing a student for graduate study in economics, the major provides excellent preparation for graduate study in business, law and public policy.

The mission of the Department of Economics is to offer students educational opportunities that emphasize the relationship of theory to practice preparing them to become accomplished citizens and professionals capable of critical thinking and independent analysis.

- Bachelor of Science in Data Science (p. 228)
- Bachelor of Science in Economics (p. 187)
- Minor in Applied Statistics and Data Science (p. 230)
- Minor in Economics (p. 189)

- Accelerated Dual-Degree BS in Economics/MBA (3+1) (p. 181)
- Accelerated Dual-Degree BS in Economics/MS in Accounting (3+1) (p. 182)
- Accelerated Dual-Degree BS in Economics/MS in Business Analytics (3+1) (<http://catalog.qu.edu/arts-sciences/economics/economics-31-ba-msba/>)
- Accelerated Dual-Degree BS in Economics/MS in Journalism (3+1) (p. 185)

Economics (EC)

EC 101. Chocolate, Cheating and Climate Change - Everyday

Economics. 3 Credits.

This course explores how economics touches our everyday lives including everything from our choice of chocolate, to the decision whether or not to cheat, to the global economics of climate change. Designed for non-majors, we take a less mathematical approach to exploring these issues, including the use of news media, experiments, and class discussion. Not open to students who have taken EC 111 or EC 112.

Offered: Every year, Spring

UC: Social Sciences

EC 111. Principles of Microeconomics.

3 Credits.

This course examines scarcity and choice, demand and supply, government price setting and taxes, elasticity, production and cost, and the theory of the firm. A writing component is required.

Offered: Every year, All

UC: Social Sciences

EC 112. Principles of Macroeconomics.

3 Credits.

This course examines the determinants of national income, unemployment and inflation. In addition, students learn how fiscal policy and monetary policy influence the economy. A writing component is required.

Prerequisites: Take EC 111.

Offered: Every year, All

UC: Social Sciences

EC 112H. Honors Principles of Macroeconomics.

3 Credits.

This examination and application of basic macroeconomic theory covers scarcity and choice, unemployment and inflation, national income accounts, Keynesian and alternative models of income determination, fiscal policy and monetary theory and policy. A writing component is required. Calculus is used in this course.

Prerequisites: Take EC 111.

Offered: As needed

UC: Social Sciences

EC 205. Current Economic Issues.

3 Credits.

This course includes discussion and analysis of current economic issues as determined by the news, students' interest and instructor discretion.

Prerequisites: Take EC 111, EC 112.

Offered: Every other year

EC 206. Urban Economics.

3 Credits.

This course provides an economic analysis of urban problems and potential policy solutions to those problems. Topics include land use patterns and zoning, poverty, housing, crime, education, transportation and environmental issues. As part of the course, students build their own city and address all of these issues through the Sim City simulation.

Prerequisites: Take EC 111.

Offered: Every other year

UC: Social Sciences

- EC 211. Intermediate Microeconomics. 3 Credits.**
This advanced analysis of microeconomic theory includes study of consumer theory with use of indifference curves and budget constraints, firm theory with use of isoquants and isocosts, market structures and market failures. Calculus is used in this course.
Prerequisites: Take EC 111.
Offered: Every year
- EC 212. Intermediate Macroeconomics. 3 Credits.**
This course helps students to understand two phenomena: long-run growth and business cycles. The section of the course devoted to long-run growth emphasizes the importance of technological change for increasing the standard of living. The section devoted to business cycles emphasizes the short-run macroeconomic analysis and the roles of fiscal and monetary policy in a modern economy.
Prerequisites: Take EC 112.
Offered: Every year
- EC 272. Advanced Applied Statistics. 3 Credits.**
This course teaches statistical methods and concepts used in business decision making and social science research. Topics include sampling distributions, estimation, hypothesis testing, correlation, linear regression and forecasting.
Prerequisites: Take MA 170, MA 176, MA 206 or MA 275.
Offered: Every year, All
- EC 304. Environmental Economics (ENV 304). 3 Credits.**
This course examines environmental issues and their economic impact. Topics include economic efficiency both in market and nonmarket activities; dynamic efficiency for nonrenewable and renewable resources; how environmental problems are modeled from an economic perspective; and principles of environmental policy design at the state and federal level.
Prerequisites: Take EC 111.
Offered: Every other year
- EC 320. Law and Economics. 3 Credits.**
This course covers the application of microeconomic theory to the law. Topics covered include the efficiency and welfare aspects of property rights, contract law, torts and criminal law, and the impact of changes in the law on economic agents.
Prerequisites: Take EC 111.
Offered: Every other year
- EC 325. Sports Economics (SPS 325). 3 Credits.**
The primary focus of this course is professional sports. Topics include microeconomic foundations of sports economics, industrial organization of the sport industry, antitrust and regulation, financing sports stadiums, labor issues and the economics of college sports.
Prerequisites: Take EC 111.
Offered: Every other year
- EC 330. Public Finance. 3 Credits.**
This course examines the role of government in the economy. Tools of economic analysis are applied to government taxation and expenditure policies. The efficiency and welfare implications of government intervention in the economy are analyzed.
Prerequisites: Take EC 111.
Offered: Every other year
- EC 341. Money and Banking. 3 Credits.**
This examination of the institutions and theory of monetary systems considers the domestic and international macroeconomic impacts of changes in monetary policy.
Prerequisites: Take EC 112.
Offered: Every other year
- EC 350. International Economics. 3 Credits.**
This course examines international trade theories, trade policies, exchange rate determination models and macroeconomic policies in open economies.
Prerequisites: Take EC 112.
Offered: Every other year
- EC 352. Industrial Organization. 3 Credits.**
Market structures are examined with an emphasis on the imperfectly competitive markets. Market failures and regulation and antitrust also are considered.
Prerequisites: Take EC 111.
Offered: Every other year
- EC 355. Game Theory. 3 Credits.**
Applied game theory analysis of real-world strategic environments in economics and business. Topics include: Normal form games, Nash equilibrium, mixed strategies, repeated games, sequential games with perfect and imperfect information, sub-game perfect equilibrium and principal-agent problems.
Prerequisites: Take EC 111.
Offered: Every other year
- EC 361. Labor Economics. 3 Credits.**
This course examines the application of microeconomic theory to labor markets and also considers, unions, labor market, immigration, discrimination and other topics.
Prerequisites: Take EC 111.
Offered: Every other year
- EC 364. Managerial Economics. 3 Credits.**
This course considers the application of microeconomic theory to firm management, firm theory, market structures. It includes basic applied regression analysis.
Prerequisites: Take EC 111.
Offered: As needed
- EC 365. Econometrics. 3 Credits.**
This course provides an introduction to the statistical methods and tools used in applied economic research. Topics include model specification estimation, and inference in the simple and multivariate regression model. The use of statistical software is required.
Prerequisites: Take EC 112; EC 272, MA 206, MA 275, MA 285 or PS 206.
Offered: Every year, Fall and Spring
- EC 366. Advanced Econometrics. 3 Credits.**
This course surveys econometric methods and tools that are particularly useful for applied microeconomic research. The course is structured around a series of projects that require students to build and estimate econometric models. Lectures complement the projects by providing the link between econometric theory and actual empirical practice.
Prerequisites: Take EC 365.
Offered: As needed
- EC 375. Development Economics. 3 Credits.**
This course analyzes the economic issues facing developing countries around the world. Topics include international aid, inequality, the determinants of economic growth, corruption, education and human capital, micro-financing, and the role of multinational firms in these impoverished regions.
Prerequisites: Take EC 112.
Offered: As needed

EC 396. Economics Internship. 3 Credits.

Internships in economics must be approved by the department chair and the dean in accordance with college regulations.

Offered: As needed

EC 399. Independent Study. 1-6 Credits.**EC 450. Senior Seminar. 3 Credits.**

This capstone seminar is designed for senior economics majors. Students draw on the tools developed in the economics program to produce a research paper or project on an original topic. Students may be required to present their results and conclusions to the class and other faculty members. Topics are chosen by the student in consultation with the instructor.

Prerequisites: Take EC 211 or EC 212 and Senior Standing.

Offered: Every year, Fall

EC 498. Special Topics in Economics. 1-6 Credits.

Independent study of special topics. Permission of sponsoring faculty, department chair and dean required.

Offered: As needed

EC 600. Managerial Economics. 3 Credits.

This course considers the practical application of the tools of economic analysis to the solution of important business problems. An examination of analysis of demand, cost and output, market structure and pricing policies is included.

Offered: Every year, All

EC 670. International Trade. 3 Credits.

This course provides a general overview of the economics of international trade. Throughout the course, students study trade models, such as the Heckscher-Ohlin model, and discuss new issues in international trade and international business, including foreign direct investment and offshoring. Topics include gains and losses from trade, factor endowment, tariffs and quotas, and the effect of trade on wages.

Prerequisites: Take EC 600.

Offered: As needed

EC 671. International Macroeconomics. 3 Credits.

This course provides a rigorous analysis of theory and practice in international macroeconomics. Topics include in-depth study of open economy macroeconomic analysis, monetary theory, balance of payments, exchange rate systems, and international monetary systems.

Prerequisites: Take EC 600.

Offered: As needed

Accelerated Dual-Degree BS in Economics/MBA (3+1)

Program Contact: Linda Fisher (Linda.Fisher@qu.edu) 203-582-3396

The Accelerated Dual-Degree BS in Economics/MBA (3+1) program offers highly motivated students an opportunity to earn a BS in Economics and an MBA from the School of Business in just 4 years. Both degrees are completed in full without compromise. Students continue to have the ability to study abroad or engage in a program such as QU in DC.

This program offers advantages to students who have a passion for economics and ambitions for a career in the global business landscape. The study of economics develops a student's critical thinking and analytical skills. Students planning careers as managers often seek a strong general education. A student who wishes to have their resume stand out from the pack, while developing the above skills and earning

a respected degree in business, might consider this 3+1 program as a differentiator.

Additionally, this program offers advantages to students who wish to pursue leadership roles within the business world or government. There is a demand within industry for skilled leaders who possess strong business administration skills paired with a core understanding of economics. Examples of high-paying jobs that 3+1 students would be uniquely qualified for include: policy analyst, management consultant, global management, financial analyst, operations manager, and pricing analyst. By pairing their passion for economics with the MBA, economics students substantially increase their employability and earning power upon graduation without compromising the personal, interpersonal and intellectual growth that a liberal arts education offers.

Student Learning Outcomes

Upon completion of the undergraduate program, students will demonstrate the following competencies:

- 1. Knowledge of Economics:** Students demonstrate and can apply the core theories of economics.
- 2. Quantitative Reasoning:** Students develop the ability to represent mathematical information symbolically, visually, numerically and verbally, and to interpret mathematical models such as graphs, tables and schematics to draw inferences. They also develop an ability to use arithmetical, algebraic, geometric and statistical methods to solve social and business problems.

3. Critical Thinking: Students develop the ability to recognize problems and to acquire, assess and synthesize information to analyze social and business problems.

Upon completion of the MBA program, students will have developed and emphasize skills in the following areas:

- 1. Business Analytics:** Demonstrate facility with quantitative methods and tools and an ability to interpret financial metrics.
- 2. Managing People:** Demonstrate an ability to understand models and applications of leadership and social intelligence.
- 3. Managing Organizations:** Demonstrate an ability to understand organizational behavior and structures and the importance of effective communication.
- 4. Strategic Integration:** Assess and diagnose a situation and to formulate and implement effective decisions and responses to business problems.
- 5. Ethics:** Identify ethical issues related to business situations and to develop appropriate situational responses consistent with organizational and societal values.
- 6. Knowledge of Business Disciplines:** Demonstrate knowledge of business disciplines (marketing, management, finance and managerial accounting) and the connection between disciplines.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission Requirements: Accelerated Dual-Degree BS/MBA (3+1)

The Accelerated Dual-Degree BS/MBA (3+1) program does not have a separate application process. Students admitted to the College of Arts and Sciences who meet the program criteria will be invited to enter the program. To be considered for this accelerated program, students generally must be ranked in the top 20 percent of their high school class, and must have a total SAT score (critical reading and math) of 1200 or higher, or an ACT composite score of 27 or higher.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page (p. 20) of this catalog.

Accelerated Dual-Degree BS in Economics/MS in Accounting (3+1)

Program Contact: Linda Fisher (Linda.Fisher@qu.edu) 203-582-3396

The Accelerated Dual-Degree BS in Economics/MS in Accounting (3+1) program offers highly motivated students an opportunity to earn a

bachelor's degree in economics and a master's degree in accounting from the School of Business in just 4 years. Both degrees are completed in full without compromise.

This program offers advantages to students who have a passion for economics and ambitions for a career that combines economics and accounting. The study of economics develops your critical thinking and analytical skills. Students who would like to have their resume stand out from the pack, while developing an exceptional skillset and earning a respected degree in business might consider this 3+1 program as a differentiator.

Additionally, this program offers advantages to students who wish to pursue careers in professional services firms, business corporations, governmental agencies, and business consulting firms among others. The program uniquely qualifies these graduates as accounting professionals in public and private accounting, as well as in government. By pairing their passion for economics with the Master of Science in Accounting (p. 705), economics students substantially increase their employability and earning power upon graduation without compromising the personal, interpersonal and intellectual growth that a liberal arts education offers.

Student Learning Outcomes

Upon completion of the undergraduate program, students will demonstrate the following competencies:

- Knowledge of Economics:** Students demonstrate and can apply the core theories of economics.

- b. **Quantitative Reasoning:** Students develop the ability to represent mathematical information symbolically, visually, numerically and verbally, and to interpret mathematical models such as graphs, tables and schematics to draw inferences. They also develop an ability to use arithmetical, algebraic, geometric and statistical methods to solve social and business problems.
- c. **Critical Thinking:** Students develop the ability to recognize problems and to acquire, assess and synthesize information to analyze social and business problems.

Upon completion of the MS in Accounting program, students will demonstrate the following competencies:

Students who graduate with this degree will demonstrate:

- a. **Professional Communication:** an ability to communicate complex accounting reports and other financial information in both technical and common language; a proficiency in the use of information technology packages to process information and to effectively complete tasks in applicable areas.
- b. **Business Analytics and Critical Thinking:** proficiency in the use of statistical and analytical tools to analyze complex accounting problems and the ability to make practical and reliable decisions as appropriate to resolve problems.
- c. **Business Environment:** the capacity to recognize ethical issues encountered in public and private accounting environments and consider resolutions that are legal and ethical with appropriate consideration on the firms' material stakeholders; knowledge of the issues involved in Multinational Corporation accounting including a strong understanding of the issues in international financial reporting standards.
- d. **Accounting Integration:** knowledge of the principles and standards applied to financial reporting for U.S. corporations (U.S. GAAP) and to financial reporting for specialized industries and organizations such as nonprofits and governments; an understanding of the relevant professional standards.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission Requirements: Accelerated Dual-Degree BS in Economics/MS in Accounting (3+1)

Accelerated Dual-Degree BS in Economics/MS in Business Analytics (3+1)

Program Contact: Linda Fisher (Linda.Fisher@qu.edu) 203-582-3396

The Accelerated Dual-Degree BS in Economics/Master of Science in Business Analytics (3+1) program offers highly motivated students an opportunity to earn both degrees from the School of Business in just 4 years. Both degrees are completed in full without compromise. Students continue to have the ability to study abroad or engage in a program such as QU in DC.

This program offers advantages to students who have a passion for economics and ambitions for a career that combines economics and business analytics. The study of economics develops your critical thinking and analytical skills. Students who want their resume to stand out from the pack, while developing the above skills and earning a respected degree in business, might consider this 3+1 program as a differentiator.

Additionally, this program offers advantages to students who wish to pursue careers such as data analysts, business intelligence analysts, program and marketing managers, and big data analytics specialists among other career paths. The program uniquely qualifies these graduates by pairing their passion for economics with the MS in Business Analytics. Economics students substantially increase their employability and earning power upon graduation without compromising the personal, interpersonal and intellectual growth that a liberal arts education offers.

Student Learning Outcomes

Upon completion of the undergraduate program, students will demonstrate the following competencies:

- 1. Knowledge of Economics:** Students demonstrate and can apply the core theories of economics.
- 2. Quantitative Reasoning:** Students develop the ability to represent mathematical information symbolically, visually, numerically and verbally, and to interpret mathematical models such as graphs, tables and schematics to draw inferences. They also develop an ability to use arithmetical, algebraic, geometric and statistical methods to solve social and business problems.
- 3. Critical Thinking:** Students develop the ability to recognize problems and to acquire, assess and synthesize information to analyze social and business problems.

Upon completion of the MS in Business Analytics program, students will demonstrate the following competencies:

- 1. Data Analysis:** Evaluate different techniques used to analyze data.
- 2. Data Management:** Explain how data is stored, accessed and retrieved.
- 3. Analytical Reasoning:** Apply business analytics techniques and utilize analytical tools for organizational decision making.
- 4. Critical Thinking:** Demonstrate skills in interpreting and presenting analytical results.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission Requirements: Accelerated Dual-Degree BS/MS (3+1)

The Accelerated Dual-Degree BS/MS (3+1) program does not have a separate application process. Students admitted to the College of Arts and Sciences who meet the program criteria will be invited to enter the program. To be considered for this accelerated program, students generally must be ranked in the top 20 percent of their high school class, and must have a total SAT score (critical reading and math) of 1200 or higher, or an ACT composite score of 27 or higher.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions page (p. 20) of this catalog.

Accelerated Dual-Degree BS in Economics/MS in Journalism (3+1)

Program Contact: Linda Fisher (Linda.Fisher@qu.edu) 203-582-3396

The Accelerated Dual-Degree BS in Economics/MS in Journalism (3+1) program offers highly motivated students an opportunity to earn a BS in Economics from the College of Arts and Sciences and an MS in Journalism from the School of Communications in just 4 years. Both

degrees are completed in full without compromise. Students continue to have the ability to study abroad or engage in a program such as QU in DC.

This program offers advantages to students who have a passion for economics and ambitions for a career in journalism. The study of economics develops a student's critical thinking and analytical skills. The program is designed so that students, in consultation with their adviser, develop areas of inquiry to engage in a deep exploration of current issues. With the foundation of economic coursework, students are equipped with the knowledge and insight that lead to high-quality journalistic work particularly with application to the field of economics.

Examples of jobs that 3+1 students would be uniquely qualified for include: data journalist, economics news reporter, economy reporter, growth and economy reporter, labor and economics reporter, economics writer/editor and economic development reporter. By pairing their passion for journalism with the foundation of economics, students substantially increase their employability and job prospects upon graduation.

Student Learning Outcomes

Upon completion of the undergraduate program, students will demonstrate the following competencies:

- 1. Knowledge of Economics:** Students demonstrate and can apply the core theories of economics.
- 2. Quantitative Reasoning:** Students develop the ability to represent mathematical information symbolically, visually, numerically and verbally, and to interpret mathematical models such as graphs, tables and schematics to draw inferences. They also develop an ability to use arithmetical, algebraic, geometric and statistical methods to solve social and business problems.

3. **Critical Thinking:** Students develop the ability to recognize problems and to acquire, assess and synthesize information to analyze social and business problems.

Upon completion of the MS in Journalism program, students should be able to demonstrate the following competencies:

1. **Understand** professional journalistic practices, ethical standards and technologies and be able to apply reason to develop ideas within these structures.
2. **Analyze** information based on journalistic practices of research, interviews and observation.
3. **Evaluate** information in determining the story's narrative structure and reach via social media and other applications.
4. **Report and compose** a story—either visual, multimedia or text—that informs, enlightens, entertains and is useful to the reader or audience within professional journalistic reporting and writing practices and ethical standards.

Bachelor of Science in Economics

Program Contact: Donn Johnson (Donn.Johnson@quinnipiac.edu)
203-582-8205

The BS in Economics program teaches students the core theories of economics. Students learn to analyze social and business problems and to examine the proper role of the market and the government in solving these problems. They are able to apply their analytical skills to analyze and interpret economic behavior and forecast political and societal trends. Students have the opportunity to take specialized courses such as Environmental Economics (EC 304), Game Theory (EC 355), Law and Economics (EC 320), Money and Banking (EC 341) and Public Finance (EC 330).

Besides studying essential economic theories, students also learn to analyze individual markets and assess the impact public policy has on the economy. The Economics major has four tracks allowing students the flexibility to choose their own path through the major. This versatile major makes students attractive to employers and prepares students for a successful career in banking, government, law, the insurance industry and elsewhere.

Recent economics majors have secured prominent jobs with the Federal Reserve Board, General Electric, Liberty Mutual, Oppenheimer Funds and other industrial and insurance firms.

BS in Economics Curriculum

Students majoring in economics must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Economics Core Requirements		
EC 111	Principles of Microeconomics	3
EC 112	Principles of Macroeconomics	3
EC 211	Intermediate Microeconomics	3
EC 212	Intermediate Macroeconomics	3
EC 272	Advanced Applied Statistics	3
EC 450	Senior Seminar	3
Additional coursework to satisfy Economics track chosen ²		15-18
Free Electives		35-38
Total Credits		120

¹ All students must complete the University Curriculum (p. 51) requirements

² Students may request permission from the Economics Department Chair to use one non-economics course to fulfill their major requirements.

Track Options (Complete One Track)

General Economics Track

This track provides students with a well-rounded curriculum to prepare them for any number of careers including, but not limited to banking, consulting, financial research, the government, the hedge fund industry and insurance firms.

Code	Title	Credits
EC 365	Econometrics	3
Four additional Economics courses at the 200 level or above		12

Policy Track

This track allows students who are leaning toward a career in public policy to focus more on courses in that area, while still maintaining flexibility for other career options.

Code	Title	Credits
Four additional Economics courses at the 200 level or above		12

Two additional Social Science courses at the 200 level or above	6
---	---

Commerce Track

This track allows students who are leaning toward a career in commerce or industry to focus more on courses in business, while still maintaining flexibility for other career options.

Code	Title	Credits
Four additional Economics courses at the 200 level or above		12
Two additional School of Business courses at the 200 level or above		6

Quantitative Track

This track provides students with strong mathematical and analytic skills to further develop those skills in preparation for the more data-driven careers in government and business, as well as develop the skills to help them succeed at the graduate level in economics.

Code	Title	Credits
EC 365	Econometrics	3
Three additional Economics courses at the 200 level or above		9
Two additional quantitative courses including:		6
Any Data Science Course		
EC 366	Advanced Econometrics	
MA 140	Pre-Calculus	
MA 141	Calculus of a Single Variable	
MA 150	Integral Calculus With Applications	
MA 151	Calculus I	
MA 152	Calculus II	
MA 153	Calculus II: Part A	
MA 154	Calculus II: Part B	
MA 229	Linear Algebra	
MA 251	Calculus III	
MA 265	Matrix Algebra and Differential Equations	
Any 300-level Mathematics Course		

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

- Knowledge of Economics:** Students demonstrate and can apply the core theories of economics.
- Quantitative Reasoning:** Students develop the ability to represent mathematical information symbolically, visually, numerically and

verbally, and to interpret mathematical models such as graphs, tables and schematics to draw inferences. They also develop an ability to use arithmetical, algebraic, geometric and statistical methods to solve social and business problems.

- Critical Thinking:** Students develop the ability to recognize problems and to acquire, assess and synthesize information to analyze social and business problems.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).

- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for BS in Economics

A minimum of 60 credits is required for transfer into the BS in Economics program. Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Course	Title	Credits

Students planning to transfer into the BS in Economics major at Quinnipiac University are highly encouraged to contact the Economics Department Chair, Donn Johnson (Donn.Johnson@qu.edu).

Minor in Economics

Program Contact: Donn Johnson (Donn.Johnson@quinnipiac.edu)
203-582-8205

Acquiring a foundation in economics offers a versatile, big-picture perspective that can prove advantageous in the fields of government, politics, business and the nonprofit world. In addition to mastering the principles of micro and macroeconomics, you will enhance your critical thinking and quantitative reasoning skills in ways that address modern problems facing businesses. You'll also learn about common economic theories and the role they play in the global economy.

Students work with the department chair to select four additional courses based on their interests. These electives can include courses such as Money and Banking, Sports Economics and Public Finance. Whether you plan to pursue a career in law, finance or public policy, this program will complement your major and provide you with additional tools to use in your chosen field.

Students wishing to augment their field of study with the perspective and skills of economics are encouraged to consider an economics minor. In addition to the University Curriculum economics courses (EC 111 and EC 112), students must complete four additional economics courses for the minor. The courses used for the minor are subject to approval by the department chair.

Economics Minor Curriculum

In addition to the University Curriculum economics courses (EC 111 and EC 112), students must complete four additional economics courses

for the minor. Students may request permission from the economics department chair to use one non-economics course to fulfill their minor requirements.

Code	Title	Credits
Possible courses include:		
EC 111	Principles of Microeconomics	3
EC 112	Principles of Macroeconomics	3
EC 205	Current Economic Issues	3
EC 206	Urban Economics	3
EC 211	Intermediate Microeconomics	3
EC 212	Intermediate Macroeconomics	3
EC 272	Advanced Applied Statistics	3
EC 320	Law and Economics	3
EC 325	Sports Economics (SPS 325)	3
EC 330	Public Finance	3
EC 341	Money and Banking	3
EC 350	International Economics	3
EC 352	Industrial Organization	3
EC 355	Game Theory	3
EC 361	Labor Economics	3
EC 364	Managerial Economics	3
EC 365	Econometrics	3
EC 366	Advanced Econometrics	3
EC 375	Development Economics	3

Department of English

The English major provides a solid foundation in the study of the genres of literature, literary theory, literary history, rhetoric and composition, and creative writing, leading to the senior seminar capstone course in which students produce their own extended, original project. Students consult with advisers regularly to ensure that their personal, intellectual, creative and professional goals are being met. Students in the English major program are well prepared for entering graduate study in English, elementary and secondary education, law, business and library science and for careers in government, public service, not-for-profit foundations, public relations and advertising, print and digital publishing and other business fields that need skilled writers and researchers and creative problem-solvers. The department also offers two optional concentrations within the 36-credit English major: creative writing and English study for secondary education. Both of these concentrations have more specific requirements than our general major. The English major, whether students choose a concentration or not, is a good preparation for many careers, and graduate study.

The English minor offers the same critical and creative engagements with texts as does the major. Students can choose from a variety of courses to help deepen their critical and writing acumen. The minor is designed to support any major by honing the student's analytical and writing skills.

The Department of English supports four programs: the first-year writing program, the English major, the English minor and the five-year BA/MAT program in Elementary or Secondary Education. All first-year students entering Quinnipiac University must take EN 101 and EN 102. Students who wish to major, double major or minor in English can apply to the chair of the English department at any time. Students who are interested in the creative writing or secondary education concentrations are encouraged to declare their concentration with their academic adviser as early as

possible. Students who are planning to enter the five-year BA/MAT programs in Elementary or Secondary Education will need to apply to the School of Education in their sophomore year. All students in all English programs must maintain an overall 2.5 GPA, be in good academic standing and must satisfy all major and minor requirements.

Co-curricular activities are important to the educational goals of many English majors and minors. As a community of readers and writers, the English department supports the English Literary Club, open to all Quinnipiac students, and *Montage*, the undergraduate literary journal. The department hosts creative writing events, showcasing professional creative writers and artists, and student writers and artists. Students who excel in their studies will be invited to join Sigma Tau Delta, the International Honor Society for English majors.

The mission of the Department of English is to engage students to become:

Serious Readers: English majors take reading (and re-reading) seriously. We analyze and discuss the nuances of poetic form, narrative voice and critical argument. We study historical and cultural contexts in order to grasp and internalize new and unfamiliar perspectives. We read to dissect, and we read to enlarge. English majors read the world around them with open minds and critical precision.

Skillful Writers: Language is the English major's medium. We combine words and phrases the way painters combine colors and textures. We write to make sense of our reading, to organize our thoughts, and to express ourselves in clear and compelling ways. In writing workshops, we learn the value of collaboration and constructive criticism as we hone our craft. The practice of effective communication through writing makes the English major a sought-after candidate for a wide variety of 21st-century careers.

Global Thinkers: The nature of the English major is to work toward understanding, valuing and respecting the traditions of peoples from a variety of cultures. English majors encounter a wide array of human experience in the literature we study, and we celebrate the ways difference and diversity expand our appreciation for the complex worlds that we navigate.

Creative Problem Solvers: Where some see problems, the English major sees possibilities. The world of the English major is the world of the imagination. We learn to read old and familiar expressions in new and unexpected ways. We value innovation over stagnation and novelty over cliché. The ability to confront an issue with a variety of approaches and perspectives gives the English major an edge when it comes to solving problems.

- Bachelor of Arts in English (p. 197)
- Minor in English (p. 199)

English (EN)

EN 101. Introduction to Academic Reading and Writing. 3 Credits.

This course introduces students to the ways that writing is grounded in reading and that inquiry is essential to learning. Through attentive reading of academic texts, students are given authority as learners to undertake serious intellectual projects that emphasize critical and creative thinking. Instructors guide students through sequenced reading and writing assignments and highlight the revision process of multiple-draft writing that leads to increasingly complex thinking and rhetorical presentation. As a community of learners, students begin to recognize academic writing as a site where knowledge is produced, understood and communicated. Portfolio assessment; grade of C- or better required to pass EN 101. Full-time students are expected to have completed EN 101 and EN 102 by the end of three semesters. Refer to the undergraduate Academic Good Standing Policy for details.

Offered: Every year, All

EN 101I. Introduction to Academic Reading and Writing Intensive. 3 Credits.

EN 101I is essentially the same course as EN 101; however it meets five hours per week. This class is intended for students who feel that they may need more support in complex reading and/or essay writing. The additional class time allows for more contact with the professor and more feedback and discussion with peers. Portfolio assessment; grade of C- or better required to pass. Full-time students are expected to have completed EN 101 and EN 102 by the end of three semesters. Refer to undergraduate Academic Good Standing Policy for details.

Offered: Every year, All

EN 102. Academic Writing and Research. 3 Credits.

Building on the practices of EN 101, this course introduces students to the kind of critical and creative thinking necessary to understand the relationship between academic research and argumentation. Working with a broad range of academic texts, students undertake projects that focus on a field of inquiry and that lead to increasingly proficient rhetorical presentation. Students develop a practical understanding of the ways in which critical thinking, writing and research all depend upon a shared process of inquiry that can be applied across disciplines and within their chosen majors. Portfolio assessment. Full-time students are expected to have completed EN 101 and EN 102 by the end of three semesters. Refer to the undergraduate Academic Good Standing Policy for details.

Prerequisites: Take EN 101 or EN 101I.

Offered: Every year, All

EN 102H. Honors Academic Writing and Research. 3 Credits.

This EN 102 class is reserved for Honors Program students and exceptional students from Fall EN 101 classes. Portfolio assessment.

Prerequisites: Take EN 101.

Offered: Every year, Spring

EN 103H. Advanced Academic Writing and Research. 3 Credits.

This course satisfies all first-year writing requirements. Through readings of a broad range of academic texts, students learn to write for academic success. EN 103H integrates the practices of academic reading and writing so that students learn to think critically and creatively as they conduct inquiry in diverse and increasingly rigorous scholarly contexts. With instructor guidance, students undertake self-directed projects and develop rich collaborations among peers, including shared commentary, research and revision, enabling students to identify and transfer best practices to their future performance as readers, writers and thinkers across disciplines, and within their chosen majors. Portfolio assessment. Placement score of 6 required.

Offered: Every year, Fall

EN 200. Special Topics in Literature. 3 Credits.

Students are introduced to readings in literature dealing with a single theme or specific problem, e.g., mystery/detective fiction, masterpieces of Jewish literature, comedy, etc. The course may be repeated for credit when topic changes. Specific titles are announced from time to time.

Offered: As needed

EN 201. Creative Writing. 3 Credits.

This course blends seminar and workshop approaches to the reading and writing of imaginative literature. Students compose and revise original works in multiple genres, maintain a writer's journal, and assemble a comprehensive final portfolio.

Offered: Every year, All

EN 202. Introduction to Creative Nonfiction. 3 Credits.

Students read a variety of short works with an eye toward understanding the stylistic techniques employed by contemporary writers of creative nonfiction. Students are then asked to employ a number of stylistic techniques in their own short works of creative nonfiction. The class emphasizes reading like a writer, writing as a process, the writing workshop, and careful revision and editing.

Offered: Every year, Fall

EN 203. Practicing Stylistics. 3 Credits.

Students review and practice the fundamental rules governing language, focusing specifically on grammar and syntax. They analyze and practice their own emerging style through imitation and revision exercises across a variety of poetic, fictional and nonfictional models. Required reading includes "The Art of Styling Sentences," "Exercises in Style" and "Stylish Academic Writing." The class culminates with a deeply revised portfolio of original efforts and a final referenced essay on what style means—and how to achieve it.

Offered: Every year, All

EN 204. Reading Literature. 3 Credits.

What is literature for? Why read it? Is it relevant in the electronic age? Is there something we can point to and say "that's literature" as a category? The course is about how we read literature as a way of thinking about some answers to those questions. Students read some short stories, poems and perhaps a short novel, argue about what they mean, and what their purpose might be in our lives.

Offered: Every other year, Spring

UC: Humanities

EN 205. Introduction to Fiction Writing. 3 Credits.

This course introduces students to the process of fiction writing. Writing prompts derive mainly from our reading and discussion of published short stories. Participants also read and discuss a handful of pieces "on writing" by established writers to help guide the process. The course is designed to help students hone their craft by writing habitually, composing numerous beginnings, and then working through a selective process to find and complete those pieces with the greatest potential to succeed. Throughout the semester, students draft, revise, edit and polish a total of four short stories. This a foundational course in fiction writing, which means that we focus mainly on the basics of character development and prose style.

Offered: Every year, Fall

EN 206. Introduction to Writing Poetry. 3 Credits.

This course gives students a strong foundation in the formal traditions of poetry in English from blank verse to free verse. Students work closely with Robert Pinsky's "The Sounds of Poetry" to get a grasp of the basic, formal principles of the art, the better to hear poems and understand the ways in which they work. Students explore a variety of poetic forms, reading and discussing poems that exemplify these forms and practicing their own poems based on these models. For the final project of the semester, students assemble a portfolio of all their work, introduced by a reflective essay.

Offered: Every year, Fall

EN 207. Interactive Storytelling and Narrative (GDD 250). 3 Credits.

This course explores the craft and purpose of interactive storytelling. Course content will cover both the creation and analysis of various interactive texts. Students in this class will combine basic coding language with creative writing principles to produce a complex interactive narrative. The interactive narrative will serve as a semester-long project that emphasizes autonomous characters, a responsive setting, and meaningful story branches navigated by a user. Students will also develop a theoretical understanding of interactive media.

Offered: As needed

EN 208. Greek Tragedy. 3 Credits.

This comprehensive survey of Greek tragedy pays special attention to tragic theory and to the evolution of classical drama from its birth in the cult of Dionysus to its culmination in fifth-century B.C. Athens. The extant plays of Aeschylus and Sophocles and selected plays by Euripides are examined with special emphasis on form.

Offered: As needed

UC: Humanities

EN 209. Love Stories. 3 Credits.

Everyone likes a good love story, right? And everyone hopes, and expects, to have his/her/their own "love story" someday. These stories are everywhere: on TV, in movies and in books we read. This course will explore the idea of love in literature throughout the modern era: how it is part of many of our great narratives, contextualized by its culture and history. In literary history, there are some iconic love stories that we still value, that we still see as universal. If we take love seriously, can we question it? Is it a universal human emotion apart from history or politics? Is love contextualized within an historical moment, by heterosexual normativity, by our notions of family and marriage, by race and class? What are we taught by literature about love?

Offered: Every other year, Spring

UC: Humanities

- EN 210. The Art of Poetry. 3 Credits.**
Students undertake close reading and discussion of the genre of poetry not limited by historical period. Attention is paid to technique, formal and stylistic qualities, and repeated themes in an attempt to experience and understand poetry.
Offered: Every other year, Spring
UC: Humanities
- EN 212. The Personal Essay. 3 Credits.**
This course features a historical analysis of the genre's origins across 30 centuries of writing—from the earliest records of writing, to contemporary American writers of the form. Theoretical analysis of the genre draws on Greek conceptions of "persona" to modern psychological ideas of "personhood" and "impersonation," to linguistic considerations of the first-person singular and plural pronouns. The five-paragraph format also is drawn into theoretical discussion and practical critique. Students write several "personal" and "academic" essays.
Offered: Every other year, Fall
UC: Humanities
- EN 213. The Nature Essay (ENV 213). 3 Credits.**
This advanced writing course focuses on the history and evolution of human thinking about nature and our relationship to it. Looking first at Biblical, Greek, Roman and Medieval sources, students concentrate on American writers, beginning with Lewis and Clark and ending with a longer reading by a contemporary naturalist writer (e.g., Annie Dillard, Norman Maclean, Terry Tempest Williams, Barry Lopez). In-class journals and formal writing assignments are used to advance discussion and emphasize persuasion and argumentation.
Offered: Every other year, Fall
UC: Humanities
- EN 214. The History Essay. 3 Credits.**
This genre-based course in writing the historical essay is not a history course. It is a writing course that concentrates on the technique of the essay and introduces the principles of writing historical literature. Students explore history as a problem-solving tool, wherein the lessons from studying the past can be useful in understanding the present. The course examines newer (and more controversial) areas of cultural and social history.
Offered: As needed
- EN 215. The Travel Essay. 3 Credits.**
This genre-based advanced writing course provides a historical overview of nonfiction, travel writing and its emergence as an area of scholarly interest. It explores the ways in which travel writers create narrative personae, construct essays to persuade readers to their perspective, and help to compose the identities of the peoples and cultures about whom they write. Emphasis is on the sustained examination and practice of student writing.
Offered: Every other year, Spring
UC: Humanities
- EN 220. The Short Story As a Genre. 3 Credits.**
This course asks students to explore several remarkable stories across more than two centuries and from a variety of cultures and perspectives. It also helps students to read as literary, writerly critics. The history of how the short story form itself - the genre - has developed is a corner stone of the course's structure. Authors discussed may include the following internationally recognized masters, among others: Poe, Melville, Chopin, Hurston, Kawabata, Hemingway, Baldwin, Bambara, Erdrich, Alexie, Zadie Smith, and Diaz.
Offered: Every year, Spring
UC: Humanities
- EN 222. Comics and Graphic Novels. 3 Credits.**
This course explores comics and graphic novels emphasizing contemporary works. Students consider the (often unnoticed) complexity of the comics form, as well as its historical development and representative genres. Readings are drawn from many different genres; and survey a wide variety of national origins, the better to represent the inevitable human diversity embodied in comics creation and reading. Students have the chance to develop an original portfolio that focuses on any creator, genre or theme of their choosing.
Offered: Every year, Spring
UC: Humanities
- EN 223. Hippies, Punks and Rude Boys. 3 Credits.**
In the years after World War II, youth culture became a significant part of British life. Year by year, decade by decade, new cultural types emerged: angry young men, mods, hippies, rude boys, punks, skinheads. In this class, students consider how these social types are represented by the literature of the period. Doing so provides us with a vantage point for considering the intersection of social identities (race, class, gender, sexuality) and the relationship between literary culture and wider cultural and historical trends.
Offered: Every year, Fall
UC: Humanities, Intercultural Understand
- EN 230. Reading the Environment (ENV 235). 3 Credits.**
We live at an unprecedented juncture in human and natural history: the burning of greenhouse gases for energy has transformed the world, initiating a period of human abundance and environmental destruction. In this class, students read texts that address the environment, seeking to understand the rhetorical and generic gestures through which we engage our carbon-based realities.
Offered: Every year, Spring
UC: Humanities
- EN 235. Literature by Women (WGS 235). 3 Credits.**
With the question of what it means to extract a canon of literature defined by gender as its center, this course enables students to consider the ways in which women have contributed a language and form to the literary tradition. In particular, the course explores the process by which this literature, often written from the margins of experience, has shaped how we read today. Varied female authors are discussed, including Woolf, Dickinson, Jewett, Hurston, Morrison, Cisneros, Kincaid, Abouzeid, Kingston, and Dangarembga among others.
Offered: Every year, Fall
UC: Humanities, Intercultural Understand
- EN 240. Survey of English Literature I. 3 Credits.**
Students gain an understanding and appreciation of literature through the study of the cultural background, the literary work itself, and the life of the author. This course explores the literary history of English literature from Anglo-Saxon times through the 18th century.
Offered: Every year, Fall
UC: Humanities

- EN 241. Medieval Romances. 3 Credits.**
This course focuses on the most popular medieval literary genre, the romance. This genre encompasses a hero's quest, including knights, battles, magic and damsels in distress or otherwise. Participants read both French Breton lais and Middle English verse romances (in translation) that flourished in 13th- and 14th-century England, with particular attention to the Arthurian legend as well as social, cultural and historical factors that gave rise to this literature. Some attention is given to the attraction of contemporary audiences to elements that had their genesis in medieval romance.
Offered: Every other year, Fall
UC: Humanities
- EN 250. Survey of English Literature II. 3 Credits.**
This course explores the literary history of English literature from Romanticism to Modernism. Students gain an understanding and appreciation of this literature through the study of the cultural milieu, the literary work itself, and the life of the author.
Offered: Every year, Spring
UC: Humanities
- EN 255. The Supernatural in Nineteenth. 3 Credits.**
Monsters, Vampires, Ghosts and Zombies. Need I say
Offered: Every other year, Spring
- EN 260. Survey of American Literature I. 3 Credits.**
This course explores the development of American literature as reflected in the works of major authors and works from the Colonial era through the Civil War. Students gain an understanding and appreciation of this literature through study of the cultural background, the literary work itself, and the life of the author. Major authors may include Bradstreet, Emerson, Thoreau, Whitman, Hawthorne, Melville and Davis.
Offered: Every year, Fall
UC: Humanities
- EN 265. Black Writers in and Beyond the US. 3 Credits.**
This survey course explores African-American literature from Colonial times to the present, concentrating on 20th-century literature. Emphasis is placed upon close reading of selected texts in light of the changing sociocultural conditions faced by African Americans.
Offered: Every year, Spring
UC: Humanities, Intercultural Understand
- EN 270. Survey of American Literature II. 3 Credits.**
This course explores the development of American literature as reflected in the works of major authors from the Civil War to the present. Students gain an understanding and appreciation of literature through study of the cultural background, the literary work itself, and the life of the author. Major authors include Emily Dickinson, Fitzgerald, Hemingway, Faulkner, T.S. Eliot, Philip Roth and Marilyn Robinson.
Offered: Every year, Spring
UC: Humanities
- EN 277. Literature of the Americas. 3 Credits.**
Focusing on the 20th to 21st centuries, this course examines writers from Canada, Latin America, the Caribbean and the United States, who typically emerge from historically underrepresented groups. These literary works engage the lived experiences of indigeneity, enslavement, imperialism, migration and globalization, to explore the ties that bind the many peoples of the Western hemisphere.
Offered: Every year, Spring
UC: Humanities, Intercultural Understand
- EN 280. The European Tradition in Literature I. 3 Credits.**
This survey course presents selected European masterpieces, both written in English and in translation, including representative selections from Homer to 1700. Emphasis is on literary and philosophic values with attention to methods of literary analysis as applicable to works by Virgil, Dante, Cervantes and others. The course presents historical backgrounds and study in the generic traditions of literature.
Offered: Every year, Fall
UC: Humanities
- EN 281. The European Tradition in Literature II. 3 Credits.**
This survey course presents selected European masterpieces, both written in English and in translation, including representative works from 1700 to the present. Emphasis is on literary and philosophic values with attention to methods of literary analysis as applicable to the works of Moliere, Voltaire, Rousseau, Goethe, Pushkin, Flaubert, Dostoyevsky, Chekhov, Mann and Kafka. The course combines historical backgrounds and study in the generic traditions of literature.
Offered: Every year, Spring
UC: Humanities
- EN 299. Independent Study. 1-3 Credits.**
In-depth focus on a specific author, topic or area. Topic must be specified in advance.
Offered: As needed
- EN 300. Special Topics in Literature. 3 Credits.**
This course explores readings in literature dealing with a single author, theme, or specific problem. The course may be repeated for credit when topic changes. Specific titles are announced from time to time.
Prerequisites: Take one 200-level English course.
Offered: As needed
- EN 301. Advanced Fiction-Writing Workshop. 3 Credits.**
This advanced fiction-writing course uses a workshop approach to help students understand and experience the process of drafting, revising and editing short stories, as well as the importance of reading and critiquing the work of their peers. Students read contemporary short fiction and give formal presentations on print and web-based literary journals and magazines. Each student chooses a public venue (e.g., public reading, website, blog, etc.) and presents selections from his/her work. The final portfolio represents the breadth of the students' work, including multiple drafts of stories, workshop comments, reading responses and a writer's journal.
Prerequisites: Take EN 201 ,EN 202 or EN 205.
Offered: Every year, Fall
- EN 302. Advanced Creative Nonfiction. 3 Credits.**
This advanced writing course focuses on the reading, analyzing and writing of creative nonfiction. Students read essay and book-length works of creative nonfiction with an emphasis on understanding authorial presence, issues of audience, questions of truth and memory and artistic techniques. Students are asked to employ what they learn from studying masterworks of creative nonfiction to their own longer works of creative nonfiction.
Prerequisites: Take EN 201, EN 202 or EN 205.
Offered: Every other year, Spring

EN 303. The Art of Audio Narrative (FTM 380 GDD 303). 3 Credits.

This course is about storytelling. Students learn the basics of multitrack audio recording and mixing. They write and produce fiction and nonfiction audio narratives. Each project is shared in a stimulating and mutually supportive workshop environment. Students read and listen widely to gain a sense of the history and theory of radio art. Participants also spend time identifying target audiences and looking at ways to distribute student work to the larger world of public and independent radio.

Prerequisites: Take EN 201, EN 202 or EN 205.

Offered: Every other year, Fall

EN 304. Junior Seminar in Critical Theory. 3 Credits.

Junior Seminar introduces students to principles and textual questions that permeate and animate contemporary literary studies. Students gain knowledge of current theoretical terminology, and some of its implications for the ways we read and analyze texts in the discipline of English. A major focus of the class is on how these principles and terms are put into practice in scholarship on literature. The Junior Seminar is a preparation course for advanced work in the English major, particularly the Senior Seminar. This course must be taken in the junior year.

Prerequisites: Take one 200-level English course.

Offered: Every year, Fall

EN 306. Advanced Poetry Writing Workshop. 3 Credits.

This course assumes a prior foundation in the reading of poetry and the practice of writing in traditional forms and seeks to push students to write original poems in a contemporary idiom. Students write a poem on assignment each week, drawing from readings of contemporary poetry collections as well as additional model poems. Students perform their own work publicly and attend literary events to observe and respond to how other writers perform their work. This practice culminates in a public reading given by the whole class. The final project is to assemble a chapbook of poems.

Prerequisites: Take EN 201 or EN 206.

Offered: Every year, Spring

EN 308. Composing America. 3 Credits.

This research-based, advanced composition and period course is a hybrid that crosses the divide between the study of literature and the study of rhetoric. Students investigate the intersection between literature and literacy/composition practices in the U.S. from World War II through the Vietnam War (1939-72). Participants consider how the U.S. has been composed through the acts of reading and writing by studying a variety of texts (poetry, drama, novels, travel, anthropology, folktales, music, theory, film and art).

Prerequisites: Take one 200-level English course.

Offered: Every other year, Spring

EN 320. Studies in the Novel. 3 Credits.

Students explore the development of the novel from its beginning to the present through discussion of the theories of prose narration. Special attention is given to characteristics of the genre. The course may be repeated for credit when topic changes (e.g., American novel, English novel, Continental novel).

Prerequisites: Take one 200-level English course.

Offered: Every other year, Spring

EN 321. Twentieth-Century British Literature. 3 Credits.

In this course, we will be reading British fiction, but doing so in a somewhat different manner. Scholars have long emphasized the experiments of modernism in the early Twentieth Century and, indeed, we will begin there in the works of Joseph Conrad and Virginia Woolf. But we're going to take a broader view: we will cover the whole century, not just its early years, and we'll read genre literature often excluded from serious consideration. So our itinerary includes not only the modernists, but also writers as diverse as Agatha Christie, Graham Greene and the world's latest Nobel Laureate in literature, Kazuo Ishiguro. In doing so, we will examine how the provincial English at last began to acknowledge the world-how they began to see their own empire and its aftermath-and how this more globally minded writing ties together a century of literary and popular narratives.

Prerequisites: Take one 200-level English course.

Offered: Every Third Year, Spring

EN 322. Modern British Literature (1900-1945). 3 Credits.

This course focuses on readings in British literature of the early 20th century. Students study writers such as Conrad, Lawrence, Joyce, Yeats and Eliot against a background of social and political crises from 1900 to 1950.

Prerequisites: Take one 200-level English course.

Offered: Every other year, Spring

EN 323. Contemporary British Literature (1945-Present). 3 Credits.

Devastated by Hitler's Blitz, Britain watched its empire crumble and its global power recede. In a nation of social troubles, British writers began again to write for the public. From the Beatles to the Rushdie affair, British culture has thrived in the face of rapid change by producing a literature of social engagement and aesthetic vibrancy. This course includes texts that speak to these wider historical currents and the aesthetic and intellectual life of Britain since 1945.

Prerequisites: Take one 200-level English course.

Offered: Every other year, Spring

EN 324. The Gothic Novel. 3 Credits.

This course offers a historical survey of the Gothic genre, from Horace Walpole's 1764 "The Castle of Otranto" leading to its many variations in subsequent centuries: terror narratives, the political gothic, the female gothic, science and crime and the postmodern gothic. The course considers the Gothic genre's deployment in historical, social and cultural contexts, as well as the structural and epistemological changes that have emerged since the late 18th century.

Prerequisites: Take one 200-level English course.

Offered: Every Third Year, Fall

EN 325. History of the English Language. 3 Credits.

This course introduces students to the origins and development of the English language and to its social, cultural and historical contexts. It is required of all English majors in the MAT program.

Prerequisites: Take one 200-level English course.

Offered: Every year, Spring

EN 326. Modern Irish Drama. 3 Credits.

This course surveys the development of modern Irish dramas, from W.B. Yeats and the writers of the Gaelic Revival (1884-1916) to more current dramatists such as Tom Murphy and Brian Friel. The material not only covers the powerful body of work produced by Yeats, Synge and Lady Gregory (along with its influence on European and American drama) but also ranges over the work of G.B. Shaw, Brendan Behan, Sean O'Casey and Martin McDonagh. Students also consider modern works of the Irish stage, especially by women (e.g., Elizabeth Kuti) and other voices.

Prerequisites: Take one 200-level English course.

Offered: As needed

- EN 330. World Literature. 3 Credits.**
This course addresses literary topics by reading texts drawn from various national, regional or transnational literatures.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall
- EN 338. American Literature by Women of Color (WGS 338). 3 Credits.**
This course explores the diverse literary traditions, themes and narrative strategies employed by American women of color, including black, Latina, Asian and Native American female writers. Students examine how race, ethnicity and gender affect form, content, language and style in literature. Writers include: Silko, Erdrich, Morrison, Walker, Angelou, Giovanni, Tan, Kingston, Yamamoto, Cisneros and Viramontes.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring
- EN 340. Immigrant Fictions. 3 Credits.**
This course explores fiction by/about immigrants, examining U.S. history and culture through their stories. Participants focus primarily on 20th- and 21st-century texts by Jewish, Latin American, Caribbean, Asian and African migrants to understand how they represent the race, class and gender barriers (and opportunities) that underlie the American Dream. We also use critical scholarship on racial formation, immigration, citizenship, human rights and diaspora to produce presentations and essays. Students use these concepts to help theorize how the most marginalized "aliens" have made America the complex and contradictory nation it is today.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring
- EN 341. Chaucer and the Medieval Period. 3 Credits.**
This course presents a critical interpretation, in its historical setting, of the chief imaginative work in England of the period, "The Canterbury Tales." Additional works of Chaucer and other representative dramatic and lyric poetry also are included. Attention is given to the cultural and artistic setting.
Prerequisites: Take one 200-level English course.
Offered: Every year, Fall
- EN 343. Shakespeare: Histories and Comedies. 3 Credits.**
Extensive structural and thematic analysis of Shakespeare's histories and comedies is the basis of this course, which concentrates on selected problems of scholarship, criticism and performance.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall
- EN 344. Shakespeare: Tragedies and Romances. 3 Credits.**
Extensive structural and thematic analysis of Shakespeare's tragedies and romances is the basis of this course, which concentrates on selected problems of scholarship, criticism and performance.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall
- EN 345. English Literature of the Renaissance. 3 Credits.**
This intensive study of the principal genres of 16th-century English literature, including lyric poetry (Sidney) and Romance such as "The Faerie Queen" (Spenser), places special emphasis on the major works of the Elizabethan period. Some attention is given to the medieval background, Renaissance art and music, and Continental literature.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring
- EN 348. Milton and the 17th Century. 3 Credits.**
This intensive study of literature within this revolutionary period emphasizes the cultural context for poetry, prose and drama in England from 1603 to about 1665. The course focuses on Milton's "Paradise Lost" and on works of other major writers, such as the metaphysical poets (Donne, Marvell, Herbert), and Ben Jonson, Francis Bacon and Thomas Middleton (drama).
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring
- EN 350. 18th-Century British Literature (1660-1800). 3 Credits.**
The idea that literature is changing in form and content as well as in its social function is central to the study of literature in the long 18th century: what's at stake in the change? This course explores this question by reading a variety of texts including Defoe's "Robinson Crusoe," Swift's "Gulliver's Travels," Pope's "Essay on Man," and Eliza Haywood's "Fantomina," among others, works that seem to be rather strange literature by modern standards. Participants also read about the "rise" of print culture, the many historical changes of the period, such as the rise of the colonial empire, and the change from a poetics of the elite to the aesthetics of feeling.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall
- EN 351. Studies in Rhetoric and Writing. 3 Credits.**
This is an advanced course in the theory and practice of argumentation. Students learn the foundations of Aristotelian rhetoric and then apply an understanding of Logos, Pathos, Ethos and Telos to various topics of historical and contemporary concern—most prominently on the cognitive, social and political changes effected by the 500-year-old Gutenberg Revolution (The Age of the Book) and their rapid disruption and undoing via the Digital Revolution (The Age of the Screen). Weekly papers and some heavy reading requirements.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring
- EN 352. British Romanticism (1785-1832). 3 Credits.**
This period of time is revolutionary: the Industrial Revolution, the agricultural revolution, the political revolutions in France and America, a literary revolution that constructs a broader reading public, and a print revolution that expands the publishing industry. In this course, students question what these revolutions have to do with novels, poetry and essays of the period, and explore how literature of this period help "revolutionize" the individual, nature and society at the same time that it seems to "romanticize" them.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Spring
- EN 355. Victorian Literature (1832-1901). 3 Credits.**
During the Victorian period, the industrial age in England reached its height as the nation expanded its cultural and economic borders to become the world power that was the British Empire. It was a time when immense wealth was coupled with immense poverty, and "propriety, duty and family" was the slogan of Victorian morality but hidden in the open was the growth of brothels and the drug trade. It was the first age where literacy was widespread, and reading was the primary entertainment for the elite and the masses. Students explore the variety of literature in which the Victorians imagined themselves and the world they lived in.
Prerequisites: Take one 200-level English course.
Offered: Every other year, Fall
- EN 358. English Elective. 3 Credits.**

EN 361. Origins of U.S. Literature (1492-1865). 3 Credits.

At the heart of our national literature lies a complex early narrative. It contains darker issues with an unresolved past, conflicting histories, encounters with the "other," our Calvinist relationship with nature and nurture, a mixed psychology as colonials and revolutionaries, and the tension between our aspiration to be the city on the hill and the realities of life on the edge of wilderness. It also contains the exuberance of the "new Adam" (and Eve), where we can start the story over again and again. This course invites students to test and interrogate these ideas by reading authors in the founding traditions of U.S. literature, such as Bradstreet, Edwards, Rowlandson, Equiano, Wheatley, Brockden Brown, Emerson, and Hawthorne.

Prerequisites: Take one 200-level English course.

Offered: Every other year, Spring

EN 365. The American Renaissance (1830-1865). 3 Credits.

This course presents a study of the dichotomy in the literature of the American Renaissance as reflected in such works as "Self-Reliance," "The American Scholar," "Civil Disobedience," "Walden," "Song of Myself," "The Scarlet Letter" and "Moby Dick."

Prerequisites: Take one 200-level English course.

Offered: Every year, Fall

EN 366. Modern U.S. Literature (1900-1945). 3 Credits.

The early 20th-century movement known as Modernism was an exhilarating time when the Western world's artists and thinkers were exploring how to represent human experience authentically. In the context of U.S. contributions to this era, students investigate questions of aesthetic innovation (especially in poetry), literary subgenres, popular vs. high culture, and national and ethnic identity (including the Harlem Renaissance). Representative authors might include Cather, Frost, Hammett, Hemingway, Hurston, Larsen, Stein, Stevens, Toomer and Yeziarska.

Prerequisites: Take one 200-level English course.

Offered: Every other year, Fall

EN 367. Contemporary U.S. Literature (1945-Present). 3 Credits.

After World II, the U.S. experienced profound change, including the Atomic Age and the Cold War (and later wars on drugs and terrorism), unprecedented global travel and migration, Civil and Human Rights movements, and astonishing technological revolution. Engaging these seismic shifts, cultural expressions have changed as well. This course focuses on the late 20th- to 21st-century writers who reimagined our world, among them Postmodernists such as Nabokov, political writers such as Kerouac, writers of color such as Morrison, and poets and innovators of form such as Plath or Anzaldua.

Prerequisites: Take one 200-level English course.

Offered: Every other year, Spring

EN 373. Modernist American Poetry. 3 Credits.

Introduces "Modernism" and "Modernist" poetry to enable close readings of modernist forerunners Walt Whitman and Emily Dickinson and onward through the 1960s. Major poets include Pound, Eliot, Crane, Williams, Hughes, Stevens, Moore, Bishop, Ginsberg, Knight, Sexton and Kinnell. Emphasis is on applying a deepened historical sense of what Modernism was and what it now means through individual poems and across poets and poetic schools. Students write final long essays analyzing American modernist themes, poetic forms and cultural frames.

Prerequisites: Take one 200-level English course.

Offered: Every other year, Fall

EN 380. Realism and Naturalism in U.S. Literature (1865-1930). 3 Credits.

U.S. Realism and Naturalism were late 19th-/early 20th-century aesthetic movements that emerged after Romanticism. The nation's post-Civil War mood produced a literature that reflected forces from industrialism and social migration to Darwinism and the "New Woman." In this course, students examine literature written in relation to those forces and specifically study how the novel matures in the U.S. tradition. Authors may include Twain, James, Chopin, Chesnutt, Howells, Wharton, and Crane.

Prerequisites: Take one 200-level English course.

Offered: Every other year, Fall

EN 390. Environmental Writing (ENV 390). 3 Credits.

This course considers the rhetoric of environmental communication. How can we write to reach audiences both professional and public? Explaining scientific knowledge is tricky at the best of times, but environmental communication is now burdened by extraordinary political, social, and cultural complexities. You will develop your rhetorical sensitivity and linguistic facility by analyzing historical examples and practicing genres (both technical genres like the proposal and public facing ones like articles and essays).

Prerequisites: Take EN 101 and EN 102; or EN 103H.

Offered: As needed

EN 399. Independent Study. 1-6 Credits.

In-depth focus on a specific author, topic, or area. Topic must be specified in advance.

Prerequisites: Take EN 101.

Offered: As needed

EN 460. Senior Seminar Capstone. 3 Credits.

Senior Seminar focuses on sustained intellectual inquiry about literature, highlighting your own literary interests. It offers students the opportunity to develop expertise on a text/field/question of their choice, while providing them with a process and a community to rely on for support and feedback. In this course, students conduct independent research on a literary text. Building and contributing to an intellectual community, students write, revise and present a major argumentative essay. Open to senior English majors only.

Prerequisites: Take EN 304.

Offered: Every year, All

EN 470. Senior Thesis. 3 Credits.

Senior thesis is open to English majors who are candidates for honors in English. Candidates must be recommended by a member of the English faculty, who consents to serve as adviser for the thesis. This adviser and the student select two additional faculty to serve as a reading committee for the student's final thesis presentation.

Prerequisites: Take EN 204 or EN 304 and one 300-level English course.

Offered: Every year, All

EN 499. Independent Study. 3 Credits.

EN 500. Special Topics in Literature. 4 Credits.
Extensive reading and intensive analysis of literature dealing with a single theme or specific problem.

Offered: As needed

EN 541. Poetry for Prospective High School Teachers. 4 Credits.

This course is an examination of the way poetry operates as a social practice, one that uses many forms and one that has served different purposes at different times. To that end, students examine a range of British and American poetry throughout literary history, in both form and technique, and attempt to situate it culturally. Although this is considered a genre course, it focuses on why students might want to read poetry and what they do with it, rather than defining it as a stable and universal category.

Offered: Every year, Fall

EN 544. Adolescent Literature - Graduate Writing Project. 1 Credit.

This course must be completed in conjunction with EN 554, Literature for Youth and Adolescence. The project is designed as an in-depth study across three selected, multi-genre adolescent literature texts in order to research the historical and cultural contexts of the works, providing critical analyses and interpretations within and across genres. The project requires written work of 12-15 pages that demonstrates students' ability to apply literary, cultural, historical and theoretical understandings to literature in ways that exhibit deep interpretive skills, while also reflecting on the process of promoting those same skills in adolescent readers as promoted by the Common Core State Standards.

Corequisites: Take EN 554.

Offered: As needed

EN 551. Advanced Studies in Writing. 4 Credits.

This course aims to make students metacognitive practitioners of writing. It is a course in applied linguistics designed to immerse students in English language practice by reading and writing, making them conscious of the grammatical components, structures and semantics involved in producing writing.

Offered: Every year, Summer

EN 554. Young Adult Literature. 4 Credits.

This is a multi-genre course that asks students to consider the evolving category of young adult literature with an emphasis on literary and cultural analysis. By pairing primary texts with both seminal and recent criticism, students consider historical and contemporary examples of young adult literature, focusing on questions of coming-of-age, ethnicity, sexuality, canonicity, trauma and identity.

Prerequisites: Take EN 460.

Offered: Every year, Spring

Bachelor of Arts in English

Program Contact: Valerie Smith (valerie.smith@qu.edu) (p. 7)
203-582-8452

The English Department inspires students to engage with big ideas in literature and to express themselves in writing with eloquence and style. By studying great works of prose and poetry from the medieval period to the present, students deepen their understanding of diverse cultures, histories and sociopolitical perspectives. In our intensive writing courses, students hone their skills with language and find their unique voices as poets, fiction writers, essayists and critics. English majors practice strong writing, active reading, careful research and creative thinking, all of which are crucial skills for success in 21st-century careers.

As an English major, you'll work closely with a faculty adviser to craft a curriculum that focuses on your literary interests and career goals. All English majors have the option of declaring a concentration in creative writing or secondary education, tailoring their curriculum to focus in these areas. Our flexible 36-credit major is also ideal for adding a double major or minor in complementary disciplines like Law and Society,

Psychology, Drama, Biology, Film, Journalism, Game Design, Public Relations and many others.

English majors are encouraged to pursue internships. The flexible major allows students to pursue 1-credit, repeatable internships in supervised fieldwork related to writing or reading to investigate career opportunities and to develop professional contacts. Interested students should see their adviser and the CAS Career Development Office.

An Honors Thesis in English is also available. Students who have an overall 3.3 GPA and a 3.5 in the English major may seek the recommendation of any English department faculty member to pursue a Senior Thesis Project (EN 470) in addition to the capstone course (EN 460). Students who are planning to attend graduate school in English or other related fields, might discuss taking advantage of this opportunity with their advisers.

BA in English Curriculum

Students majoring in English must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
English Major Requirements		
Flexible Requirements:		
Select at least 6 EN credits at the 300 level from each category (A and B) and an additional 9 credits at the 200 or 300 level from either category; courses cannot count for multiple categories:		
A. Language, Rhetoric, Genre and Form		
B. Periods, Places, Cultures and Identities		
Advanced Requirements		
Select one from each of the following categories:		9
Literary History Underrepresented Writers:		
EN 223	Hippies, Punks and Rude Boys	
EN 235	Literature by Women (WGS 235)	
EN 265	Black Writers in and Beyond the US	
EN 277	Literature of the Americas	
EN 338	American Literature by Women of Color (WGS 338)	
EN 340	Immigrant Fictions	
Literary History I:		
EN 341	Chaucer and the Medieval Period	
EN 345	English Literature of the Renaissance	
EN 348	Milton and the 17th Century	
EN 350	18th-Century British Literature (1660-1800)	
EN 361	Origins of U.S. Literature (1492-1865)	
Literary History II:		
EN 308	Composing America	
EN 321	Twentieth-Century British Literature	
EN 322	Modern British Literature (1900-1945)	

EN 323	Contemporary British Literature (1945-Present)	
EN 352	British Romanticism (1785-1832)	
EN 355	Victorian Literature (1832-1901)	
EN 365	The American Renaissance (1830-1865)	
EN 366	Modern U.S. Literature (1900-1945)	
EN 367	Contemporary U.S. Literature (1945-Present)	
EN 304	Junior Seminar in Critical Theory	3
EN 460	Senior Seminar Capstone	3
Free Electives		17-20
Total Credits		81-87

Concentration in Creative Writing Curriculum

All students wishing to fulfill the requirements for a concentration in creative writing must take the following courses:

Code	Title	Credits
	Select two 200-level creative writing courses	6
	Select two 300-level advanced creative writing workshops ²	6
	Select one course in contemporary/post-WWII literature, including but not limited to the following:	3
EN 220	The Short Story As a Genre	
EN 308	Composing America	
EN 322	Modern British Literature (1900-1945)	
EN 323	Contemporary British Literature (1945-Present)	
EN 366	Modern U.S. Literature (1900-1945)	
EN 367	Contemporary U.S. Literature (1945-Present)	
EN 373	Modernist American Poetry	
Total Credits		15

¹ All students must complete the 46 credits of the University Curriculum (p. 51).

² The 300-level workshop can be repeated once for credit (i.e., a student interested in fiction can take the Advanced Fiction Workshop up to two times). Credits in the concentration can count for flexible and advanced requirements.

Concentration in Secondary Education Curriculum

To earn the concentration in secondary education, students complete 18 credits, including:

Code	Title	Credits
Credits in the concentration can count for flexible and advanced requirements		
	One course in British literature	3
	Two courses in American literature	6

One course in Shakespeare	3
One course in advanced composition	3
History of the English Language	3
Total Credits	18

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the program, students will have achieved the following competencies:

- Written communication:** an increasing command of language use and conventions.
- Writing to learn:** growth in writing effectively to learn about and convey knowledge and ideas about literature in essays and/or creative texts.
- Writing proficiency:** the ability to summarize and synthesize written materials into a fluent, coherent and edited text.
- Inquiry-driven analysis:** the ability to read texts proficiently and critically leading to rigorous analysis that explains the complexities, difficulties, ambiguities and contradictions in texts.
- Critical thinking:** the ability to evaluate and compose arguments based on logic and evidence, using counterarguments.
- Creative thinking:** strong integrative skills and an ability to see patterns and connections among texts and arguments.
- Research methods:** the ability to investigate the contexts of critical and creative writing, including historical context, literary history, canons, language and terms appropriate to literature and textuality; facility with theoretical and scholarly materials; perform research using methods employed in the analysis of various forms of writing.
- Cultural understanding:** the ability to determine how forms of writing create meanings, values and ideas, and how writing exposes social and economic perspectives and conflicts among nations, peoples and individuals throughout global history; assess how different forms of writing operate to pose questions about culture and question cultural assumptions.

Concentration in Creative Writing

English majors can earn a concentration in creative writing by completing 15 or more credits, within the 36-credit major, in creative writing and contemporary literature courses. Students who earn the concentration in creative writing not only hone their compositional, reading and analytical skills in one or more genres, but they also build a foundation for understanding and utilizing the power of creativity in their professional lives after college. This concentration is especially recommended to those students who hope to pursue a master of fine arts degree. Successful completion of the concentration in creative writing is indicated on students' transcripts.

Concentration in Secondary Education

English majors who are planning to teach high school need a more structured curriculum tailored to state requirements and discipline-specific knowledge of literature. To earn the concentration in secondary education, students complete 18 credits, within the 36-credit major, in a strong, broadly based literature and expertise in writing foundation. The concentration enables them to move to graduate level work successfully, and greatly benefits them in their professional lives as high school teachers. Students use the flexible and advanced requirements to explore a range of courses in national literatures, genres, authors and writing.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for BA in English

A minimum of 60 credits is required for transfer into the BA in English program. Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Minor in English

Program Contact: Valerie Smith (valerie.smith@qu.edu) 203-582-8452

Professional advancement often depends on good reading aptitude, as well as sound writing and rhetorical techniques along with critical and creative thinking. With an English minor, you'll explore literature while you also hone your communication skills. These are must-have talents to work in creative fields, such as screenwriting, advertising and publishing. They are also important in other careers where you may have to write a grant proposal, a contract, a persuasive argument for a legal case, a public policy or a business plan. This minor can complement any major.

The Department of English offers a minor in English for students who wish to study literature and improve their writing abilities—both creative and critical. Students whose professional advancement depends on good reading aptitude, sound writing and rhetorical techniques, and critical and creative thinking are encouraged to apply to the chair of the English department.

English Minor Curriculum

To complete the minor, students must take 18 credits of English coursework; at least 9 credits must be at the 300 level.

Department of History

The study of history is a long-established foundation for education since it builds critical skills of gathering and interpreting evidence, crafting arguments, engaging in research and developing polished presentations both written and oral. As a result, students earning a degree in history are prepared to pursue a wide range of career options. Some continue their education in graduate school in the humanities, social sciences, education or law; others pursue careers in public service, business and the arts.

Studying history helps students to appreciate their place in the world through a deeper understanding of the connection between the past and the present, a better awareness of the variety of human experience, and a more complete understanding of the rich diversity of cultures.

The faculty regularly reviews and updates the history curriculum to reflect the changing nature of the historical discipline; conducts exit interviews with graduating seniors to assess their experience in the major; and collects and updates survey information from graduates concerning their experiences after graduation.

The mission of the Department of History is twofold. First, it provides an intensive program of study for students majoring in history. Second, the Department of History provides opportunities for all students at Quinnipiac to familiarize themselves with the past through the study of history across time and around the world.

- Bachelor of Arts in History (p. 207)
- Minor in History (p. 209)

History (HS)

- HS 111. The Rise of the West.** **3 Credits.**
Beginning with the origins of Western civilizations in the ancient Near East, students examine the development of Western culture and society from its beginnings through the 16th century, with emphasis on the nature and values of three successive polities: the classical world of Greece and Rome, the Middle Ages, and the origins of the modern world in the Renaissance/Reformation. Consideration is given to the idea of "the West" and its interaction with and contact with non-Western cultures and peoples.
Offered: Every year, All
UC: Humanities
- HS 112. The West in the World.** **3 Credits.**
Beginning with the emergence of the modern state in the 16th century, students examine the social, political, economic and cultural developments of Western civilization and its interaction with the rest of the world. Emphasis is on the growth of science and technology in the 17th century, the emergence of the Enlightenment in the 18th century, the age of industrialization, nationalism and imperialism, social upheaval in the 19th century, the domination of the West over the world and challenges to that domination during the 20th century.
Offered: Every year, All
UC: Humanities
- HS 122. Modern World History.** **3 Credits.**
This course examines key developments in world history beginning in roughly 1300 with the rise of the Turco-Mongol Empires and ending with the nationalist and independence movements of the 20th century. Students examine and analyze major events that occurred in the non-Western world. Special attention is paid to South Asia, East Asia, Africa and the Middle East. Students gain a better understanding of the history and culture of these regions, as well as how the non-Western world has impacted the global community, both past and present.
Offered: Every year, All
UC: Humanities, Intercultural Understand
- HS 131. U.S. History to 1877.** **3 Credits.**
This course traces the formation and expansion of the American nation from Colonial settlement through Reconstruction using selected episodes. Themes explored include the development of a national identity, models of citizenship, the role of government, and divisions based upon gender, ethnicity, race and class.
Offered: Every year, All
UC: Humanities
- HS 132. U.S. History Since Reconstruction.** **3 Credits.**
This course explores the evolution of the American people and their nation through the major political, social and economic changes of the late 19th century to the present. Key themes include changing expectations of governance, the quest to achieve the full promise of the Declaration of Independence and the U.S. ascent to global hegemony.
Offered: Every year, All
UC: Humanities
- HS 200. Special Topics in History.** **3 Credits.**
This course includes readings and discussion of historical topics of special interest to students enrolled in the course.
Offered: As needed, All
- HS 201. Historical Writing.** **3 Credits.**
The practice of history is founded on the ability to write clearly. In this intensive writing seminar, students are introduced to the fundamentals of historical writing, including the basics of grammar and sentence structure, the construction of good paragraphs and the crafting of a historical narrative. Since writing and thinking are intimately linked, students also practice the art of historical thinking, including the development of historical arguments, the critical use of historical sources and the appropriate use of historical documentation using the Chicago Manual of Style. Majors only.
Offered: As needed
- HS 208. Twentieth-Century World History.** **3 Credits.**
This course covers the history of the world since the 19th century focusing on the experiences and perspectives of the non-Western world. Students study the rise of nationalism, the disintegration of empires, and the growth of communal and ethnic strife across the globe in the 20th century.
Offered: Every year, All
UC: Humanities, Intercultural Understand
- HS 209. Twentieth-Century Europe.** **3 Credits.**
Events in Europe during the 20th century radically transformed the world. The century began, and perhaps ended, in periods of vibrant intellectual, social and cultural development and optimism. In between these eras, however, Europe was at the center of the two bloodiest wars humanity has ever known and the rise of brutal totalitarian states. Students examine the complex cross currents in European society during the period roughly from the 1890s to the present, focusing on the political, social, intellectual and economic developments in European society that helped shape this turbulent century. Students also learn about the impact of non-European peoples, particularly those of Africa and Asia, on internal European developments.
Offered: Every year, All
UC: Humanities
- HS 210. Contemporary America.** **3 Credits.**
This survey of American history from 1945 to the present focuses on both social and political matters. Students study topics including the McCarthy era and the nuclear age, the civil and women's rights movements, Nixon and the Watergate crisis, gay liberation, the Reagan revolution and end of the Cold War, and the era of American global dominance and its challenges. Particular attention is given to the impact of the diverse cultures and peoples that have emerged in contemporary American society.
Offered: Every year, All
UC: Humanities
- HS 210H. Honors Contemporary America.** **3 Credits.**
This survey of American history from 1945 to the present focuses on both domestic and foreign policy matters including the Cold War, the McCarthy era, the civil rights movement, the "great society," Vietnam, Nixon and the Watergate crisis.
Offered: As needed
UC: Humanities
- HS 211. Popular Culture in American History.** **3 Credits.**
This course focuses on an interpretation of American history through popular culture. Samples of popular culture materials in various historical periods are examined with special attention to music, film, television and sports.
Offered: As needed
UC: Humanities

HS 213. The Roman World.**3 Credits.**

This course examines the historical evolution of Rome which, through its laws, language, literature and institutions, has strongly influenced the modern world. How did the Romans win their Empire? What was the character of these people? And what was the essence of the Roman achievement?

Offered: Every Third Year, Fall**UC:** Humanities**HS 214. Ancient Greek History (PL 214).****3 Credits.**

"Ancient Greece" stretches chronologically from the third millennium BC until the 4th century BC and ranges geographically from modern day Turkey (what the Greeks called Ionia) to Sicily and the Italian peninsula (what the Romans called Magna Graeca). This course focuses on that part of Greek history that runs from the late Bronze Age period of Mycenaean Palace culture (approximately 1400 BC) to the end of the Peloponnesian Wars (in 404 BCE). The course emphasizes primary sources (such as literary sources and inscriptions) and challenges students to use primary sources as the basis for historical interpretations of the political, social, cultural and intellectual institutions of ancient Greece, such as democracy, tyranny, slavery, tragedy and philosophy. The course concludes with a role-playing Reacting to the Past historical simulation (that explores the options open to Athens in the aftermath of her defeat by Sparta).

Offered: Every other year, Fall**UC:** Humanities**HS 215. American Business History.****3 Credits.**

Students examine the origins, development, and growth of the American economic and financial systems. They will explore the American economy during the colonial, revolutionary, and pre-Civil War periods, and then examine aspects post-civil War industrial growth during the so-called 'Gilded Age'. In examining the 20th century, students will explore topics including antitrust movements, World War I and the Roaring 20s, the stock market crash and Great Depression, and the end of the gold standard. The course will end with an examination of the post-WWII economic boom, 1970s inflation, the tech bubble of the 1990s, and the 2008 financial crisis.

Offered: As needed, All**HS 219. Colonial America and the Atlantic World.****3 Credits.**

In this course, students examine the history of Colonial America within the context of the Atlantic World. They expand their knowledge beyond the well-known narrative of the original 13 British colonies that developed into the United States of America and gain an appreciation for the complexity and diversity that characterized life on this continent. Students learn about various pre-Columbian civilizations. Then, they explore the colonies that Europeans established on indigenous lands and the wars that they fought to maintain and expand their empires. Students end the course by analyzing the Revolutionary War and the establishment of our nation. Throughout the course, students learn the perspectives of the Native Americans, Europeans and Africans who lived during this remarkable period.

Offered: Every other year, Spring**UC:** Humanities**HS 220. American Environmental History (ENV 221).****3 Credits.**

This course examines American society's interaction with nature since the arrival of Europeans in the 15th century. Students consider the intentions and values that guided the use of America's natural resources and the transformation of its landscape. While this historical legacy is most apparent in America's agricultural, industrial and conservation activities, it has been equally profound in the rise of America's environmental movement, tourism, recreation, ecological research and global environmental awareness. Since we are located in the New England/Mid-Atlantic region, this course occasionally departs from the broad survey of American environmental history and treats issues that are particularly germane to the region.

Offered: Every other year, Spring**UC:** Humanities**HS 224. The Real Housewives of the Early Modern World.****3 Credits.**

Scholars tend to explore the major movements of the early modern world through the writings of the men. What if we inverted this world, and we asked what were all the women up to? Women whether they were wives, monarchs, mothers, peasants, daughters, prostitutes, or nuns were present during this era of radical change. They stood along-side reformers, artists, warriors, and rulers (some even ruled themselves). This course explores this period through the varied lives of women and explore how women up and down the social hierarchy found opportunities for agency in a patriarchal world.

Offered: Every Third Year, Fall**UC:** Humanities**HS 225. Scotland: Macbeth to Bonnie Prince Charlie.****3 Credits.**

This course examines the complex political and cultural history of Scotland from the period of the middle ages to the eighteenth century. Scotland's history can be relevant to comparative discussions of independence, colonization, and cultural identity. Bringing Scottish history in from the margins offers students a unique window into a history and culture that has broad significance today.

Offered: Every Third Year, Spring**UC:** Humanities**HS 227. Russian Cultural and Intellectual History.****3 Credits.**

Students are introduced to changing concepts of authority and the role of reason in the ordering of social and cultural values, the cultural mission of Russian Orthodoxy, the growth of a secular cultural elite, and the modern struggle to define individual and community and values in literature. This course includes readings in Russian thought and literature.

Offered: As needed**UC:** Humanities**HS 228. Twentieth-Century Russia.****3 Credits.**

This course considers Russian politics, society and culture in the 20th century, the Soviets in world affairs, and changing American views of the former Soviet Union.

Offered: As needed**UC:** Humanities**HS 229. Irish History.****3 Credits.**

This examination of Irish history from the pre-Christian Celtic era to modern times focuses on the changing character of Irish culture reflected in literary, political and religious documents. Special consideration is given to the origins of modern political and sectarian conflicts through a consideration of the history of Anglo-Irish relations, particularly the ramifications of the Tudor conquest, the Great Hunger and the rise of Irish nationalism.

Offered: Every other year, Spring**UC:** Humanities

HS 230. The Rise of Modern Science. 3 Credits.

In this course students explore the development of modern science since Copernicus and the impact that science has had on our world in the past four centuries. Students examine the major historical developments in astronomy, physics, chemistry, biology and medicine over the past 400 years. They also explore the complex interaction of science with society especially its contact with issues in religion, politics and gender. No specific background in science is required.

Offered: As needed

UC: Humanities

HS 231. The World of Tudor/Stuart Britain. 3 Credits.

This course explores early modern Britain from the establishment of the Tudor monarchy in 1485 until the end of the Stuart kings with the Glorious Revolution of 1688. Areas of focus include: Henry VIII, the Reformation, Elizabeth I, Shakespeare's London, Scotland's witch trials, and the English Civil War. Through exposure to and examination of primary source documents and historical interpretations, students come to see how the history of early modern Britain holds foundations for the modern world.

Offered: Every other year, Spring

UC: Humanities

HS 232. The Rise and Fall of the British Empire. 3 Credits.

This course analyzes the expansion, consolidation, workings and eventual disintegration of the British Empire from the 17th century until its collapse in the 20th century. It touches on the colonial experiences of North America, the West Indies, India, China, the Middle East, Australia, Ireland and Africa. Students examine the emergence of nationalism in the colonized regions. Special emphasis is placed on how the major colonies were affected by the international imperial context, as well as the contributions that subject peoples and cultures made to colonial history and the trajectory of the empire.

Offered: Every other year, Fall

UC: Humanities

HS 234. Borders & Battles: Conflict and the Legacy of Empire. 3 Credits.

This course examines the historical roots of several 19th- and 20th geopolitical conflicts that were partially instigated by the redrawing of geographical boundaries. Taking a close look at geopolitical conflicts in the Americas, Asia, Africa, and Europe, we consider the ways in which physical boundaries shape ideas of nationhood, culture, and identity as well how official and informal understandings of identity impact the drawing of borders. The course aims to unpack and evaluate colonial policies and subsequent postcolonial legacies, as well as more recent attempts by the global community to reverse them. As such, this course introduces students to the concept of postcolonialism, decoloniality, and critically, demonstrates how events in the past continue to influence the contemporary world, at both a macro and micro level.

Offered: Every other year, Fall

HS 235. Blood and Revolution in China/ Asian Studies. 3 Credits.

This course offers a general survey of modern Chinese history. We begin with the height of the Qing Dynasty in the 18th century and end with the Tiananmen Square Incident in 1989. As we explore this time period, students learn about cosplaying emperors, tiger hunts, the global drug trade, Christian rebels, Japanese imperialists, scheming warlords, female martial artists and impassioned revolutionaries. Their stories illuminate how China transformed itself from an empire to a nation.

Offered: Every other year, All

UC: Humanities

HS 236. Japan's Modern Empire/Asian Studies. 3 Credits.

This course offers a general survey of modern Japanese history. We begin with the Meiji Restoration of the 19th century and end with the death of Emperor Hirohito in 1989. Throughout the semester we explore the causes and impact of Japan's rise as a modern empire. We also discuss the legacy of Japanese empire through an exploration of contemporary Japanese pop culture.

Offered: Every other year, All

UC: Humanities

HS 241. African-American Experiences to Reconstruction. 3 Credits.

This course examines the history of the United States by looking at African-American experiences up to the end of the 19th century. Using a wide array of primary materials from songs to autobiographies to speeches, in print and audiovisual forms, students explore how people of African descent conceptualized and constructed their identities and navigated their struggles against inequalities. A central theme is that people of African descent living in America created themselves under circumstances of inhumanity, exploitation and oppression.

Offered: Every Third Year, Fall

UC: Humanities

HS 242. African-American Experience Since Reconstruction. 3 Credits.

Although emancipation and reconstruction amendments ended a particular set of oppression and exploitation, the legal conferral of citizenship for African Americans neither ended institutional racism nor secured the redistribution of resources that had hitherto entrenched inequalities, prejudices and the denial of opportunities to black people. In this course, students examine how African Americans cultivated, expressed and debated the possibilities of, and alternatives to, equal inclusion and participation in American democracy and society in the last three decades of the 19th century and throughout the 20th century.

Offered: Every Third Year, Spring

UC: Humanities

HS 254. Colonial Latin America. 3 Credits.

This course offers an introduction and examination of the history of Latin America and its people from Pre-Columbian times through independence. The course focuses on both the indigenous and European peoples and the many consequences of their interactions. Some areas of examination include European expansion and conquest, the impact on and reactions of indigenous populations, the formation of a colonial society, issues of race, ethnicity, class and gender, and the establishment of economic and political structures.

Offered: Every other year, All

UC: Humanities, Intercultural Understand

HS 270. The East Is Red: Communism in Asia. 3 Credits.

This course offers an introduction to the theory and practice of communism in Asia. Though the influence of communism on South Asia is discussed, most course readings cover the countries of East and Southeast Asia, namely North Korea, China, Vietnam and Cambodia. Students are exposed to the theoretical writings of important figures in Asian communist history from Karl Marx to Xi Jinping. Students also learn about the social and political impact of communist movements and Marxist theory in the Asian region.

Offered: Every other year, All

UC: Humanities

HS 271. Monks, Kings and Rebels: Mainland Southeast Asia. 3 Credits.

This course offers a general survey of the history of Mainland Southeast Asia, including Thailand, Cambodia, Myanmar, Laos and Vietnam. We begin with the introduction of Buddhism and end with the fall of the Khmer Rouge. Emphasis is placed on the Angkor Wat, colonial and Vietnam War periods.

Offered: Every other year, All

UC: Humanities

HS 272. Pirates and Matriarchs: Island Southeast Asia. 3 Credits.

This course offers a general survey of the history of Island Southeast Asia, including countries such as the Philippines, Indonesia, Singapore and Malaysia. We begin with the introduction of Islam and end with a discussion of contemporary China's growing influence in the South China Sea. Some topics for discussion include the matriarchal Muslim cultures of Indonesia and the American colonization of the Philippines.

Offered: Every other year, All

UC: Humanities

HS 273. African History and Culture. 3 Credits.

This course presents an introduction to traditional African culture and the different patterns of historical development south of the Sahara. Topics include the role of trade in the rise of Sudanic and East Coast civilizations, diversity of political European presence before and after the partition of Africa, and contemporary trends since independence.

Offered: As needed, All

HS 274. Modern India. 3 Credits.

This course examines the history of the South Asian subcontinent during the British colonial and postcolonial periods. Beginning in roughly 1700, students examine the establishment of British rule, the rise of nationalism and the independence movement, and the history of the Indian republic in the twentieth century. The course presents key historiographical debates and developments in the history of the subcontinent, such as the decline of the Mughal Empire, the foundations of British rule, Hindu-Muslim relations, the impact of the Raj on social and familial relations, and the Kashmir dispute.

Offered: Every other year, Spring

UC: Humanities

HS 282. Global Environmental History (ENV 282). 3 Credits.

This course provides an introduction to the major issues in global environmental history and their relevance to contemporary global environmental politics. The first half of this class focuses on how approaches to environmental management have differed across the world due to differences in culture, politics, history, and ecology. The second half of the course focuses on explaining the origins of contemporary environmentalism, as well as why global disparities in environmental regulation continue to exist.

Offered: Every other year, All

UC: Humanities

HS 286. Introduction to Medieval Europe. 3 Credits.

This course provides a general overview of the Middle Ages from late Antiquity to the crises of the 14th century. It explores the period of European history that holds the foundations of much of western society. Topics of particular significance include: the Medieval Church, the rise of the university, relations with the East, the Crusades and the growth of towns and trade.

Offered: Every other year, All

UC: Humanities

HS 300. Special Topics in American History. 3 Credits.

This course focuses on readings and discussion of historical topics of special interest to students enrolled in the course.

Prerequisites: Take one 200-level history course.

Offered: As needed, All

HS 301. Special Topics II - European History. 3 Credits.

This course focuses on readings and discussion of historical topics of special interest to students enrolled in the course.

Prerequisites: Take one 200-level history course.

HS 302. Special Topics III: Global History. 3 Credits.

This course focuses on readings and discussion of historical topics of special interest to students enrolled in the course.

Prerequisites: Take one 200 level history course.

Offered: Every year, Fall

HS 303. Historiography. 3 Credits.

This advanced seminar is intended for majors and other students interested in deepening their knowledge of the techniques of reading, writing, researching and interpreting history. Students get a broad introduction to the concept of historiography and consider the ways in which thinking about the past has changed over time.

Prerequisites: Take one 200-level history course.

Offered: Every year, All

HS 305. Vietnam (COM 305). 3 Credits.

This course presents a study of the Vietnam Era and draws conclusions about policy for the future. Media coverage of the war and its effect on both national policy and political change are emphasized.

Prerequisites: Take one 200-level history course or MSS 101.

Offered: Every year, All

HS 306. Frederick Douglass and Ireland. 3 Credits.

In August 1845, Frederick Douglass, then a 27-year-old fugitive slave, arrived in Dublin, the capital of Ireland. He intended to visit for only four days, to oversee the re-publication of his autobiographical, Narrative, but he stayed in the country for four months. When he left, he described his time there as being "transformative." Throughout the remainder of his long life, Douglass would refer to how Ireland - its colonial status, its religious struggles, its endemic poverty - had helped to shape his political philosophies. This course explores why Ireland played such an important part in his political and intellectual development.

Prerequisites: Take IRST 101 or one 200-level history course.

Offered: As needed

HS 307. The Holocaust. 3 Credits.

Through an examination of historical texts, literature and film, this course examines the systematic destruction of 10 million human beings at the hands of the Third Reich.

Prerequisites: Take one 200-level history course.

Offered: Every year, All

HS 312. The Age of Pericles. 3 Credits.

This course examines the history and culture of Athens within the context of the large world of Greece and its neighbors across the Mediterranean world during the tumultuous 5th century.

Prerequisites: Take one 200-level history course or PL 101.

Offered: Every other year, Fall

- HS 317. The European Reformation. 3 Credits.**
 This course explores Western Christendom from the late Middle Ages through the 17th century during the Age of Reformation. The central focus of the course is religion, but since the Reformation did not occur in isolation, it addresses a variety of themes in the study of early modern Europe. The aim of this course is to understand the major figures, movements and ideas that contributed to the division of Western Christendom into numerous confessional communities.
Prerequisites: Take one 200-level history course.
Offered: Every other year, All
- HS 321. European History, 1914-1945. 3 Credits.**
 This course presents a study of World War I and its economic, social, political and ideological consequences. The collapse of the Versailles settlement and interwar period is considered. World War II is covered, as are diplomatic and military consequences for the Cold War era.
Prerequisites: Take one 200-level history course.
Offered: Every Third Year, All
- HS 322. History of World War I. 3 Credits.**
 The origins of World War I and the problems of mass mobilization, war aims, weaponry and political attitudes are analyzed. The major military encounters, the war as it affected non-Europeans and the diplomacy of neutrality are discussed. Emphasis is on the peace treaties and the repercussions.
Prerequisites: Take one 200-level history course.
Offered: As needed, All
- HS 323. World War II. 3 Credits.**
 This in-depth study of the diplomatic, political and military aspects of World War II, 1939-1945, presents the background of the war in Europe and East Asia and the course of events in all major theaters of operations. Wartime conferences and long-term outcomes are discussed.
Prerequisites: Take one 200-level history course.
Offered: As needed, All
- HS 325. History of England: 1688 to the Present. 3 Credits.**
 The history of the English people from the "glorious revolution" to the present is explored. Primary focus is on the major political, constitutional, religious, economic and social developments that have contributed to the making of modern Britain. Themes include: the rise of the middle class, the expanding powers of Parliament, the Industrial Revolution and the acquisition and loss of empire.
Prerequisites: Take one 200-level history course.
Offered: As needed, All
- HS 326. Witches and Werewolves in the Early Modern World (WGS 326). 3 Credits.**
 This course explores the general belief in witchcraft and other supernatural creatures in the larger context of religion and culture in the early modern world. Participants examine how belief in the supernatural led to a widespread fear and persecution of individuals deemed witches or other consorts of the devil. Using the groundbreaking work of historians, and the primary documents of the period, this course examines the origins and processes of the witch trials. Since approximately 75 percent of those in Europe accused of witchcraft were women, the course examines how gender, misogyny and scapegoating shaped the persecution and prosecution of the more vulnerable members of premodern society. More broadly, the class examines how Christianity both affirmed and condemned these beliefs and practices and how people used "superstition" to make sense of the world around them.
Prerequisites: Take one 200-level history course.
Offered: Every other year, Fall
- HS 327. Islamic Societies and Cultures to 1300. 3 Credits.**
 Students are introduced to the history of the Islamic peoples. The course attempts to impart an understanding of the identity, character and accomplishments of Arabic-speaking world. Particular emphasis is on the life of Muhammad, and on the political, economic, social and cultural achievements of the medieval Islamic empire.
Prerequisites: Take one 200-level history course.
Offered: As needed, All
- HS 328. Gender in the Non-Western World (WGS 328). 3 Credits.**
 This course provides an in-depth examination of critical issues in gender across several parts of the non-western world. We examine case studies, trends, and developments in the gender histories of Asia, the Middle East, and Oceania. In so doing, the course asks students to consider how gender intersects with politics, science, religion, and economy in these diverse locations. The course begins in the late medieval with the royal women of the Mongol Empire in Eastern and Central Asia. We retain our focus on the Turko-Mongol empires as we move into the early modern, and consider Ottoman women in the Middle East, Mughal women in India. As we move into the modern period, we reflect on the way gender was changed and impacted during the imperial period in India, Egypt and Palestine. Finally, the course unpacks the complicated relationship between gender and nationalism in formerly colonized societies.
Prerequisites: Take one 200-level history course; or WGS 101 or WGS 101H.
Offered: Every Third Year, All
- HS 330. History of Western Medicine. 3 Credits.**
 This course examines the development of the Western medical tradition from its origins in the ancient Near East to modern times. The course emphasizes an understanding of medical theory and practice in relation to larger social, intellectual and scientific developments in the West. Topics include Hippocratic and Galenic medicine, medieval medical theory and practice, the emergence of new medical ideas in the Renaissance, and the development of modern scientific medicine.
Prerequisites: Take one 200-level history course.
Offered: As needed, All
- HS 332. History of India. 3 Credits.**
 Students examine the history of the South Asian subcontinent between 1500 and 1950, roughly. Beginning with the establishment of the Mughal Empire in approximately 1526, students critically discuss the shift from "native" empire to British rule in the 1800s, as well as look at the various challenges to British rule and the Indian independence movement of the 20th century and its effects. Along the way, students analyze key historiographical debates on the history of the subcontinent, such as the reasons for the decline of the Mughal Empire, the foundations of British rule, Hindu-Muslims relations, and the impact of the Raj on social and familial relations. Students should expect to attend lecture regularly, participate in weekly class discussions, as well as demonstrate mastery over the material in written assignments.
Prerequisites: Take one 200-level history course.
Offered: Every other year, All

HS 333. The Middle East, 1300-1919; Critical Issues. 3 Credits.

Students analyze the economic, cultural and political developments in the Middle East between 1300 and 1919, beginning with the rise of the Ottoman Empire in roughly 1300 through the gradual shift from Ottoman to European influence in the 19th century. Students also discuss the rise of nationalism and the effect of World War I on the political map of the Middle East, paying close attention to events in Saudi Arabia and modern-day Israel. Emphasis is placed on certain "critical issues" in the study of the Middle East, such as the status of women, terrorism and the place of Islam in Middle Eastern history. Participants take a close look at both contemporary viewpoints and historiographical debates surrounding these issues. Students should expect to attend lecture regularly, participate in weekly class discussions, as well as demonstrate mastery over the material in written assignments.

Prerequisites: Take one 200-level history course.

Offered: Every other year, All

HS 334. Bollywood and History: Constructing India's Past. 3 Credits.

Cinema is the most widespread and easily accessible form of communication in India, capable of both reflecting and reshaping public opinion on critical issues. This course examines the writing and the rewriting of Indian history as portrayed in works of fiction, including films and novels. Starting with the Mughal period and ending in the postcolonial era, we discuss the ways in which films and novels have reconstructed India's past according to particular biases or agendas. The course necessarily uncovers multiple perspectives on Indian history, thus highlighting the contested nature of history. We evaluate works of fiction in light of historiographical debates and current political developments on the subcontinent.

Prerequisites: Take one 200-level history course.

Offered: Every Third Year, All

HS 340. Native American History. 3 Credits.

This course examines the history of Native Americans from Pre-Contact to the present day. Using a wide array of primary and secondary materials, students learn about various indigenous groups and explore their interactions with each other and with Europeans and Americans. This course dispels stereotypes about Native Americans and encourage students to appreciate native peoples' cultural and linguistic diversity and longevity. This course also analyzes contemporary problems that face indigenous populations like battles over tribal citizenship and land rights. This course employs both print and audiovisual works to supports students' understanding of these complex topics.

Prerequisites: Take one 200-level history course.

Offered: Every Third Year, All

HS 341. The American Revolution. 3 Credits.

Through lectures and discussions based on source and secondary readings, this course considers American history from 1763 to 1787, the pre-Revolutionary period, military, political and theoretical aspects of the Revolution, the Confederation, and the writing of the Constitution. Emphasis is on the political thought that culminated in the creation of the Constitution.

Prerequisites: Take one 200-level history course.

Offered: Every other year, All

HS 344. Civil War and Reconstruction. 3 Credits.

The economic, social and political history of the United States in the mid-19th century is examined with emphasis upon the Civil War. Also explored are long-range and immediate causes for Southern secession, the military, naval and diplomatic conflict; domestic developments North and South, 1861-65; postwar problems and the history of Reconstruction, 1865-77.

Prerequisites: Take one 200-level history course.

Offered: Every other year, All

HS 349. American Maritime History (ENV 349). 3 Credits.

This course examines America's historic activities on the world's oceans, and on the bays, rivers and Great Lakes that are within its national boundaries. Students consider the economic, cultural, political and naval uses of these bodies of water from the 16th century to the present. Within this broad framework, this course considers how Americans used marine and freshwater environments to conduct trade, build communities, engage in war and diplomacy, use nature's bounty and participate in recreational activities. These themes illuminate the value Americans placed on maritime affairs, and provide insight into the American mariner's world, the American maritime community alongshore and the rippling effects of maritime activity throughout wider American society.

Prerequisites: Take one 200-level history course.

Offered: Every other year, All

HS 350. Introduction to Public History. 3 Credits.

This course provides an introduction to the field of public history. There are a variety of opinions on what constitutes public history, but generally it is considered to be the presentation of history to broad audiences outside the traditional classroom setting. The practice and presentation of history along these lines usually takes the form of museum exhibition, historic preservation, cultural/historic resource management, public programming, documentary film and oral history, but it is hardly limited to these areas. This course aims to introduce students to these exciting possibilities, and to appreciate the ever-widening scope of the public historian in the new media age.

Prerequisites: Take one 200-level history course.

Offered: Every other year, All

HS 360. The Two Koreas. 3 Credits.

This course offers a general survey of Korean History from the Choson Dynasty to the present. Special attention is paid to the twentieth-century histories of North and South Korea, including the Japanese colonial period as well as the Korean War and its aftermath. Students engage with North and South Korean media ranging from North Korean films to K-Pop.

Prerequisites: Take one 200-level history course.

Offered: Every Third Year, All

HS 391. Colonizing the Body. 4 Credits.

This course takes an in-depth look at the ways in which empire and imperial policies reshaped and reformulated the body of the colonized subject, setting up social categories of difference that corresponded neatly to European imperial notions of biological difference. Using India as a case study, it examines how Indian bodies were "scientifically" classified, categorized and redefined to underscore and perpetuate European political dominance. The course highlights imperial policies that buttressed certain privileged notions of racial, gendered, economic/occupational and anatomical difference.

Offered: Every year, Fall

HS 394. Doctors, Disease and Death in the Western World. 4 Credits.

In this course, students learn about the complex and varied history of health, healing, disease and death in the Western world from the time of the ancient Egyptians to modern day. This course is thematic in its focus. Students study various aspects of the history of medicine and through that study come to a better understanding of the biological, social, intellectual, cultural and institutional contexts in which the process of living and dying has been constructed in the Western experience.

Offered: Every year, Spring

HS 399. Independent Study in History. 1-6 Credits.

Individual study of special area including internships. By agreement of the student and with prior permission of the department chairperson, the student may undertake directed readings with discussion, examination and reports as arranged by the instructor in an area of the student's interest not normally offered through scheduled courses. Available to history majors or other equally qualified students.

Offered: As needed, All

HS 408. Seminars in History. 3 Credits.

Seminars are taught by members of the department in areas of their special competence. Topics are selected in consultation with juniors in the major. Emphasis is on organization and presentation of research. Open to history majors or other qualified students in their second-semester or senior year by permission of department and instructor.

Prerequisites: Take HS 303.

Offered: Every year, All

HS 524. Approaches to World History. 4 Credits.

This course examines various approaches to, and interpretations of, world history. The course has a topical format, with the specific focus shifting depending on contemporary global issues, recent interpretive innovations in the field and the interests of the instructor and the students. A specific goal of the class is to offer future teachers approaches to modern world history that will aid them in lesson planning and development. More generally, the goals of this class include the improvement of written and oral communication skills and the development of critical thinking skills through the examination of primary and secondary sources and the construction of interpretative arguments.

Offered: Every year, All

HS 525. History of the Atlantic World From the 15th to 19th Century. 4 Credits.

This course explores the world made by contact, exchanges and clashes between European, Africans and Americans between the early 1400s to the late 1800s. The key assertion underpinning this course is that, despite social and cultural distinctiveness, Europe, Africa and America were interconnected, and are best understood as a "regional system" where each part is most intelligible by investigating its relationship to the whole. Using a thematic and chronological approach, this course explores critical themes that not only link these sub-regions but also give them distinctive historical character. Global trade networks, migration and settlement, colonization and imperialism, cultural and epidemiological transmission, race and gender relations and demographic reconfigurations are among the topics investigated in this course.

Offered: Every other year, All

HS 526. Approaches to U.S. History. 4 Credits.

This course examines various approaches to, and interpretations of, U.S. history. The course focuses on a specific topic in American history and varies according to contemporary global issues, recent historiographical shifts, methodological innovations and/or the interests of the instructor and the students. One goal of this class is to offer future and present primary, middle and secondary schoolteachers approaches to U.S. history that may aid them in content and lesson planning. This course also uses typical historical methods, including the examination of primary and secondary sources and the construction of interpretative arguments, to develop written and oral communication skills as well as critical thinking.

Offered: Every year, Spring

HS 527. Approaches to Modern European History. 4 Credits.

This course examines modern European history from a variety of standpoints. The course has a topical format—the specific focus shifts depending on contemporary issues and events, recent interpretive innovations in European history and the interests of the instructor and the students. In addition to deepening their knowledge of recent European history, the course also aids future teachers in developing rigorous and historically rich lessons for their students.

Offered: Every year, Fall

Bachelor of Arts in History

Program Contact: David Valone (David.Valone@quinnipiac.edu)
203-582-5269

As a history major, you take a broad range of courses that introduce you to aspects of history from a wide variety of perspectives and time periods. All history majors must take at least two courses in American history, two courses in European history, and two courses in world history. Students also take a required course in historical writing, and majors take a junior level seminar on historiography that introduces them to the actual production of historical knowledge and the creation of historical narratives and interpretive frameworks. In addition, all history majors are encouraged to have an experiential learning experience through a study abroad experience, an internship in history, or by taking the Introduction to Public History course. In their senior year, all history students write a senior thesis that gives them a chance to put into practice everything they have learned throughout their work in the major. The remainder of the required 36 credits in history is made up of history electives chosen by students based on their interests in consultation with their adviser. Through a history major at Quinnipiac, you will gain a broad understanding of past events, plus critical thinking skills and writing expertise, all of which will prepare you for a number of careers, from curator of a museum exhibit on Middle Eastern art to grant writer for a large teaching hospital. If you have a talent for languages, you could become an intelligence officer with the FBI, or you can choose to continue your education with a graduate degree in education, law or medicine.

Students normally apply for admission to the major before or during their sophomore year. Applications must be made to, and approved by, the chairperson. Acceptance is usually approved for all applicants in good standing academically.

Continuation in the major is dependent upon a satisfactory level of performance in all courses, with special reference to work in history.

Note about internships: The department is able to provide student internships with area historical societies and also attempts to place

qualified students in credit-related internships with area governmental organizations.

BA in History Curriculum

Students majoring in history must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
History Core Requirements ^{2,3,4}		
	European History	6
	American History	6
	Global History	6
	Select four electives 300 level or above	12
HS 201	Historical Writing	3
HS 303	Historiography	3
HS 408	Seminars in History	3
Free Electives		14-17
Total Credits		102-108

¹ All students must complete the University Curriculum (p. 51) requirements.

² No more than three courses may be at the 100 level.

³ The minimum requirement (36 credits) must be met with a grade of C or better in all courses.

⁴ Some courses will fill more than one requirement. Students take a total of 36 history credits.

Note about internships: The department is able to provide student internships with area historical societies and also attempts to place qualified students in credit-related internships with area governmental organizations.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

- Critical thinking:** Analyze, synthesize and evaluate historical information from multiple sources.
- Inquiry and analysis:** Distinguish between fact and fiction by employing a full range of techniques and methods used to gain historical knowledge while understanding that there is no one historical truth.
- Effective communication:** Produce a polished and thoroughly researched written work of history that engages with both primary sources and the secondary literature.

- Diversity and cultural awareness:** Become familiar with multiple cultures and diverse people from around the world and in different time periods.
- Oral communication:** Convey their historical knowledge verbally through public presentations.
- Historical knowledge:** Develop an understanding of the general chronology of the past and demonstrate an understanding of cause and effect in history.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for BA in History

A minimum of 60 credits is required for transfer into the BA in History program. Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Minor in History

Program Contact: David Valone (David.Valone@quinnipiac.edu)
203-582-5269

Learning to view our modern world through the lens of history is a valuable skill that will shape your understanding of politics, economics, science and art. This program explores major events in American, European and world history. You'll enrich your liberal arts experience and develop a background that will prove useful in many fields, such as business, law, education or government. You'll hone your writing and research skills while discovering the rich histories of countries and cultures from ancient times through modern day.

You'll have the flexibility to chart your own path through this minor. With the guidance of the department chair, you can focus on your particular areas of interest and choose from a diverse selection of classes in topics such as World War II, ancient Greece, the European Renaissance, and Asian and Middle Eastern history.

Minor in History Curriculum

A minor in history is recorded upon completion of at least 18 credits with a grade of C or better in all courses. Students must select at least one course (3 credits) from each of the following areas of history: American, European and global. At least two courses (6 credits) must be at the 300 level or above and should be chosen with the consultation of the department chair. No more than three classes can be at the 100 level.

Code	Title	Credits
HS 111	The Rise of the West	3
HS 112	The West in the World	3

Department of Justice and Law

The Department of Justice and Law offers students a humanities-based approach to law and the legal system within the context of a liberal arts education and a social science perspective on law breaking behavior, crime as a social phenomenon and methods of social control.

The BA in Law in Society provides an avenue for majors to understand the multifaceted dimensions of legal discourse, including the historical context in which the legal system was fashioned, the ethical implications of the construction and implementation of legal rules, and the policy impact that contemporary legal decisions continue to have on various aspects of governance in both the public and private spheres. Our students are exposed to essential aspects of legal practice, procedure and methodology, and are taught to bridge their practical understanding of the legal profession by placing those skills in a broader context and recognizing laws as being reflective of broader elements of social change.

The focus of the major is on how law reflects the values of society and constantly adapts to changes in societal behavior and opinion. We look at how laws affect the relationships between individuals and groups in society, and of groups to each other. We discuss issues such as justice, equity and the balance between the rights of individuals and the public interest from a legal, historical and societal viewpoint. The Law in Society major develops specific legal research, writing and critical thinking

skills, all within a framework of the ethical and statutory constraints confronting the legal professions. After graduation, many of our students continue their education by attending law or graduate school. Others work in law-related settings, such as working as a paralegal in a law office or business. Other graduates have become social workers, teachers and business owners.

The BA in Criminal Justice educates students on topics from the evaluation of institutions of formal social control, such as policing, courts and corrections, to advocating for crime victims. The program places particular emphasis on experiential learning through its carefully structured internships and its community-based coursework.

The department also offers minors in Criminal Justice and Law in Society, and there is an additional minor/certificate in Legal Studies, approved by the American Bar Association, that provides students with the opportunity to study legal practice and prepares them to work as paralegals.

The department is home to the Micro-Credit Institute (MCI). It is an alternative structure for Diversity, Equity and Inclusion education designed to deliver skills, education and community experiences in innovative one-credit formats. MCI began with the belief that students should have the opportunity to fill their 16th credit with a course that aids in the advancement and support of DEI education.

Quinnipiac University's Bachelor of Arts in Law in Society approaches the study of law, legal processes and legal institutions in the tradition of the humanities. The classic values of a liberal arts education are combined with the critical thinking, analytical writing and oral presentation skills of the legal profession and prepare graduates to become active and thoughtful citizens in their local and global communities. The Law in Society major culminates with the integration of the classroom component with professional skills development in which students complete both a scholarly thesis and an internship in a professional, law-related setting.

The Criminal Justice program prepares students for work in the diverse and challenging criminal justice field. Recent developments, including growth of the prison population and increasing numbers of prisoners returning to communities, create challenges our criminal justice majors are prepared to meet. Our program combines theory with practice as our majors learn in the classroom and the professional world. While students take courses dealing with topics such as policing, crime by juveniles, corrections and forensic science, a required 120-hour internship lets them apply their classroom experiences in a professional setting. Our internship program is unique as we meet with each student to assess their professional interests before recommending appropriate internship sites. In addition to 120 hours at the internship site, students participate in a weekly seminar to connect skills they take from the internship to their coursework. Students have the option to complete two different internships that teach them about criminal justice work across diverse settings. Our graduates are employed in a range of fields including policing (local, state and federal), law, social work and probation, and some pursue advanced degrees in criminal justice or related fields. Criminal justice majors benefit from small class sizes and advising loads so they have ready access to faculty to help them shape their educational experience to best fit their professional and personal aspirations.

- Bachelor of Arts in Criminal Justice (p. 217)
- Bachelor of Arts in Law in Society (p. 219)

- Minor/Certificate in Legal Studies (p. 221)

Criminal Justice (CJ)

CJ 101. Crime and Society.

3 Credits.

This course examines crime as a cultural phenomenon and as a problem of social control. Topics include the nature of law, characteristics of the criminal justice system, types of crime, as well as the critical evaluation of theories of crime.

Offered: Every year, Fall and Spring

UC: Social Sciences, Intercultural Understand

CJ 200. Special Topics.

3 Credits.

A variety of special topics courses are periodically offered.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: As needed

CJ 205. From College to Career (SO/GT 205).

1 Credit.

This course introduces sociology, gerontology and criminal justice majors to the preprofessional skills and knowledge they need to practice prior to obtaining their internship. Students are introduced to practical skills that will benefit them throughout their professional careers ranging from self-reflection to resume writing and email etiquette. Students meet regularly to discuss the breadth of potential careers in sociology, criminal justice and gerontology through interaction with departmental faculty and practitioners in the field. For criminal justice majors only. This course is graded on a pass/fail basis. For CJ majors only

Prerequisites: Take CJ 101.

Offered: Every year, Fall and Spring

CJ 225. Addiction and Crime.

3 Credits.

This course will examine the impact of addiction on both the justice system and those processed through it. Specific topics include understanding the addiction process and exploring the impact of addiction on justice system resources. The course will examine how addiction contributes to justice system involvement and explore best practices to address it within the criminal justice system.

Prerequisites: Take SO 101 SO 101H SO 225 SO 244 or CJ 101;

Offered: Every year, Fall

CJ 232. Women in the Criminal Justice System (SO/WGS 232). **3 Credits.**

This course examines the changing patterns of women's criminality, the experiences of women who are processed as crime victims, and the evolution of women's role in law, law enforcement and corrections.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Spring

UC: Social Sciences, Intercultural Understand

CJ 241. Police and Policing.

3 Credits.

This course considers the history and development of functions in policing. Issues and controversies in policing such as: training, police ideology, police management styles, the development of a working police "personality," the appropriate use of force, racial profiling, police corruption, patrol, professionalism, due process and vocational considerations are examined.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Fall and Spring

UC: Social Sciences

CJ 243. Investigative Techniques.

3 Credits.

This course provides students with knowledge of basic concepts of case and crime scene investigation; scene and investigative personnel management; nature of investigative personnel roles; steps in the processing of scenes and evidence; methods of documentation; general and specialized techniques for the recognition, identification and individualization of evidence; sources of investigative information; interview techniques; reconstruction of events; and legal and ethical considerations during criminal investigations. For majors only.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Spring

CJ 250. Youth Crime (SO 250).

3 Credits.

This course deals with youth crime as distinct from adult crime. Students examine the development of the juvenile delinquency concept and justification for classifying juveniles who offend as separate from adults. Factors contributing to the onset of juvenile delinquency and relevant research also are examined. The course considers development and current functions of the juvenile justice system, paying particular attention to the challenges justice officials face daily. A range of widely used treatment strategies for dealing with juveniles who offend is examined.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Fall

UC: Social Sciences, Intercultural Understand

CJ 251. Probation Parole and Community Corrections.

3 Credits.

People who offend are sentenced to one of these alternatives to incarceration in order to change or control behavior. Methods of supervision, special goals such as shock probation or parole, electronic and other "high-tech" monitoring, controversies over effectiveness and punitive aspects of these technologies are considered.

Prerequisites: Take SO 101 SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Spring

CJ 253. Sexual Violence (WGS 253).

3 Credits.

This course takes a historical perspective on the societal and psychological aspects of sexual violence as it applies to the criminal justice system. It includes an examination of the etiology of sexual abuse as a law enforcement issue and explores the societal impact of sexual violence upon both those who commit violence and those who are the victims of it. The course encourages students to deepen their understanding of the social, structural and individual treatment modalities that are employed within the system to decrease sexual violence.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Spring

CJ 261. Prisons and Jails.

3 Credits.

This course covers incarceration in both prisons and jails. Students examine incarceration as a social phenomenon, exploring its connections to political, economic and cultural forces in society. Participants investigate the history of imprisonment, theories of punishment and the (intended and unintended) societal ramifications of incarceration. Topics include prison architecture, social classifications, prison culture and inmate social structure, violence in prison, "Supermax" prisons, rehabilitation and prisoner reentry.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Fall and Spring

UC: Social Sciences, Intercultural Understand

CJ 263. Prosecution and Sentencing.**3 Credits.**

This course will examine the role of the court system with particular emphasis on the role and obligations of prosecutors. The course examines the role of prosecutors and considers how prosecutors impact sentencing decisions made in court. Particular attention will be given to the plea-bargaining process, the courtroom work group, and the impact of legal and extra-legal factors in sentencing.

Prerequisites: TAKE SO 101 SO 101H SO 225 SO 244 OR CJ 101;

Offered: Every year, Fall and Spring

CJ 271. Public Order Crimes (SO 271).**3 Credits.**

Approximately two-thirds of the individuals incarcerated inside U.S. correctional institutions have been found guilty of public order crimes, "moral crimes" or crimes not likely to have a self-identified victim. This course concentrates on crimes associated with such activities as illegitimate gambling, consensual sex and the criminal use and sale of both legal and illegal substances.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Spring

CJ 275. Sexual Violence Victim Advocacy (WGS 275).**3 Credits.**

This class prepares students to be peer educators on sexual assault, and the hours spent in class may be counted towards state certification for rape crisis victim advocacy. The class is centered on the victim's perspective on sexual assault and sexual abuse, as well as educating others about helping rape survivors. The course will cover basic information about sexual violence and rape myths, the protocol for reporting rape in different venues (e.g., on campus, police, hospital, rape crisis center), policies on sexual assault, and methods for assisting survivors. The class is recommended for those students interested in becoming rape crisis victim advocates and/or providing peer education about sexual assault on campus. As such, the course does require attendance in class, as well as out-of-class assignments, including an on-call component that could require students to respond to hospital calls to support victims who are receiving the rape kit examination. Students who complete the certification program will be eligible to volunteer on campus under the supervision of the Rape Crisis Center in Meriden. Certified victim advocates are expected to be available for on campus volunteer work during the two semesters following the class. Instructor permission required.

Offered: Every year, Fall

CJ 290. Criminal Justice Research Methods.**3 Credits.**

This course provides an introduction to social science research methods used in the criminal justice field. Students examine how qualitative and quantitative research methods apply to social science research. The course places particular emphasis on the importance of scientific methods in reaching informed conclusions. Students examine a number of methods commonly used in social science disciplines and learn how to interpret the results of research conducted using these methods. Understanding how social scientists investigate social phenomena allows students to accurately interpret and apply findings from criminal justice research. Students should complete the course by the end of their sophomore year or second year in the major. Majors only.

Prerequisites: Take CJ 101.

Offered: Every year, Fall and Spring

CJ 300. Special Topics.**3 Credits.**

A variety of advanced special topics courses are periodically offered.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: As needed

CJ 320. Victimology.**3 Credits.**

Historically, the primary concern of the justice system was the apprehension and punishment of people who offend. More recently, however, the needs of crime victims are increasingly recognized both formally and informally in the justice process. This course examines the emergence of victimology as a field of study and the origins and impacts of victim stigma. Students learn about the range of harms crime victims experience and the importance of addressing victim needs throughout the justice process.

Prerequisites: Take SO 101 SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Fall

CJ 325. Advanced Victimology.**3 Credits.**

Theories of victimology are increasingly being studied in an effort to provide comprehensive services to victims of crime. Beyond recognizing the needs of victims, we must study the most effective ways of providing services. This course will focus on Trauma Informed delivery of services to victims of crime, with an emphasis on developing both theoretical and pragmatic knowledge that can be used to assist victims with tangible and intangible needs. Class discussions and collaborative work will center on the analysis of empirical patterns of various victimizations and methods employed to enhance victim assistance.

Prerequisites: Take SO 101 SO 101H SO 225 SO 244 or CJ 101;

Offered: Every year, Spring

CJ 330. Perspectives on Violence (SO 330).**3 Credits.**

This course explores the many ways that violence is viewed in our society. Topics include types of violence, empirical evidence of incidence, characteristics of violent crimes, motivation to offend, victim profiles and sociological and theoretical explanations.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Fall

CJ 333. Drugs, Alcohol and Society (SO 333).**3 Credits.**

This analytical discussion-based course explores the use of drugs and alcohol in U.S. society. The emphasis is on drug and alcohol use and abuse as a social phenomenon. Students explore issues such as the relationship of drug use to particular groups in society (age, sex, race/ethnicity); patterns of drug use and abuse; the promotion of drugs by the media; and drug and alcohol abuse in historical perspective. Students also learn about drug categories, drug education, prevention and treatment and about drug laws.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Summer

UC: Breadth Elective, University Curriculum Ele, Intercultural Understand

CJ 343. Forensic Issues in Law Enforcement.**3 Credits.**

This course presents an overview of the scientific method and its application to the analysis of physical evidence as it impacts law enforcement investigations. Topics include the study of basic methods of documentation, collection and preservation of physical evidence; general schemes for the analysis of chemical and biological evidence; identification and individualization of firearms, fingerprints, imprints, hairs, fibers, blood and body fluids, paint, drugs and poisons, and other materials associated with crimes. The course material is reinforced through the use of actual case studies, hands-on exercises and class exercises.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Fall

CJ 351. Corrections Counseling. 3 Credits.

This course provides a comprehensive investigation of mental health and correctional systems, including residential and community-based treatment programs and correctional supervision methods. Students will develop critical thinking skills relating to best practices in a variety of correctional settings. Various offender populations will be addressed including those with mental health disorders, substance abuse disorders, sex offenders, women offenders, and highly resistant and severely anti-social offenders.

Corequisites: TAKE SO 101 SO 101H SO 225 SO 244 or CJ 101;

Offered: Every year, Spring

CJ 355. Crime and Media (SO 355). 3 Credits.

Despite little direct contact with people who offend or with the criminal justice system, people typically hold strong opinions about crime-related issues. The goal of this course is to understand how media sources shape our attitudes and beliefs about crime and how we "should" respond to it. To this end, participants examine media involvement in constructing the reality of crime and justice and its implications for the justice process.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Spring

UC: Breadth Elective, University Curriculum Ele

CJ 360. Inside-Out Prison Exchange Seminar. 3 Credits.

The "Inside-Out" Prison Exchange seminar is part of a national movement giving undergraduate students (outside students) and currently incarcerated individuals (inside students) an opportunity to learn together. This course, being offered to Quinnipiac students and male students at a Connecticut state prison, asks students to examine the impact of status upon American life by considering issues of personal and collective voice in communities, variation in access to conventional success opportunities, and the effect of status upon ability to effectively engage in local and national communities. Through application of theoretical perspectives and consideration of practical experience, students are exposed to a diversity of material that allows them to more fully examine and understand the complex impact of social status upon American life. Note: this course takes place inside a Connecticut state prison.

Prerequisites: Instructor discretion.

Offered: Every year, Fall

CJ 370. Constitution, Ethics and Policing. 3 Credits.

Students are introduced to the constitutional limitations and ethical considerations that affect police behavior. These include use of force, coercion, entrapment, right to counsel, wiretapping, confessions and exclusionary rule.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: Every year, Fall

CJ 375. Family Violence. 3 Credits.

This course covers the study of family violence, including patterns, trends, and explanations of offender behavior as well as the effects of being the victim of criminal behaviors committed within the context of the family. The course concepts cover theories and methodologies used to study family violence, as well as discussion of policies in place to intervene in these types of crime, including child maltreatment in the family, intimate partner abuse, and elder abuse.

Prerequisites: TAKE SO 101 SO 101H OR CJ 101;

Offered: Every year, Fall

CJ 385. Senior Seminar in Criminal Justice Policy. 3 Credits.

This senior-level course examines social policy as applied to a selected aspect of the criminal justice field. Senior status in criminal justice major required.

Prerequisites: Take CJ 290.

Offered: Every year, Fall and Spring

CJ 392. Internship in the Community (SO 392/GT 392). 3 Credits.

For criminal justice majors in their junior or senior year only. Students each complete 120 hours of supervised fieldwork in a community agency along with one hour per week in a classroom setting. Coursework and class content include written and oral reflection, focusing on professional issues, along with criminal justice concepts and theory. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator one semester prior to begin the placement process.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101; and CJ 205.

Offered: Every year, Fall and Spring

CJ 394. Advanced Internship in the Community (SO 394/GT 394). 3 Credits.

This is a second internship available to criminal justice majors in their junior or senior year only. Students complete 135 hours of supervised fieldwork in a community agency along with one hour per week in the advanced internship class. Students build upon the knowledge gained from their first internship experience to deepen their understanding of concepts and theory through extended written and oral reflection. Students also assess their interpersonal strengths and weaknesses in preparation for graduate school and/or future employment. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator one semester prior to begin the placement process.

Prerequisites: Take CJ 392.

Offered: As needed

CJ 399. Independent Study in Criminal Justice. 1-6 Credits.

By arrangement with individual instructor. This course addresses the special intellectual interests of a student and focuses on an issue of special or timely importance.

Prerequisites: Take SO 101, SO 101H SO 225 SO 244 or CJ 101.

Offered: As needed

Justice Studies (JS)

JS 101. Introduction to Justice Studies. 3 Credits.

Introduction to Justice Studies engages with the topic of justice in contemporary society (what it is, who gets to define it, who gets to administer it, and who gets more access to it). The course takes a holistic approach that engages the problem of injustice as a human problem through the exploration of contemporary events. As an introductory course, it is designed to raise critical questions, explore pressing problems, and to give a broad overview of careers dealing with contemporary justice issues, justice systems, and the administration of justice.

Offered: As needed, Fall and Spring

Legal Studies (LE)

LE 101. Introduction to the American Legal System. 3 Credits.

Students are introduced to the American system of law and legal structure and gain an overview of several areas of law. Topics include basic legal concepts, the structure of the American court system, as well as legal theory and procedure.

Offered: Every year, All

UC: Humanities

LE 101H. Honors Introduction to the American Legal System. 3 Credits.

Students are introduced to the American system of law and legal structure, and gain an overview of several areas of law. Topics include basic legal concepts, the structure of the American court system, as well as legal theory and procedure.

Offered: As needed

LE 115. Criminal Law. 3 Credits.

This overview of the American system of criminal justice includes study of its various institutions, such as the criminal courts, police, prosecutors and defense attorneys, and jails and prisons. The Fourth Amendment (Search and Seizure) and the Fifth Amendment (Privilege Against Self-Incrimination) are studied. Also explored are schools of thought underlying criminal prosecution and correctional philosophy.

Offered: Every year, Fall and Spring

LE 150. Introduction to Mock Trial. 1 Credit.

This experiential learning course introduces students to the legal skills associated with bringing a case to trial. Students develop skills in trial advocacy through a progressive development of techniques related to the trial of a case using an established fact pattern throughout the semester. Skills in trial procedure, legal analysis, evidentiary argument and oral advocacy are developed throughout the course, which culminates in the presentation of a trial based upon the established fact pattern.

Offered: Every year, Spring

LE 159. Legal Studies Elective. 3 Credits.

Offered: As needed

LE 160. Competitive Mock Trial. 1 Credit.

This course is designed for students who intend to compete in mock trial competitions throughout the fall semester. Students develop and enhance skills related to trial procedure, legal analysis and oral advocacy through preparation for competition at mock trial tournaments during the fall semester through the preparation of direct and cross examinations, opening and closing arguments and the portrayal of witness roles. They attend one or more mock trial tournaments during the fall semester in preparation for the American Mock Trial Association Regional Tournament in February. Students are permitted to repeat this course, for 3 credits total.

Offered: Every year, Fall

LE 200. Special Topics. 3 Credits.

Prerequisites: Take LE 101.

Offered: As needed

LE 211. Legal Reasoning, Research and Writing I. 3 Credits.

This course introduces students to legal research, both in print and online sources, and provides a foundation in legal reasoning, writing and citation in the context of objective, predictive legal documents. Students learn how to move from a fact pattern, through researching and analyzing the controlling law, to presenting the student's legal analysis in the form of formal legal memoranda.

Prerequisites: Take LE 101, EN 102 or Take LE 101, EN 103H

Offered: Every year, Fall and Spring

LE 212. Legal Reasoning, Research and Writing II. 3 Credits.

Building on the skills learned in LE 211, students in this course refine and further develop their analytical, research and writing skills and learn to present their findings in a wider variety of legal documents. Students also are introduced to persuasive legal writing and advocacy.

Prerequisites: Take LE 211.

Offered: Every year, Fall and Spring

LE 224. Sports Law (SPS 224). 3 Credits.

Students explore the legal concepts surrounding sports, including contracts, torts, crimes and Title IX. Legal issues involve all sports and level of athletics, include professional, amateur, student and fans.

Prerequisites: Take LE 101.

Offered: Every year, Spring

LE 225. Alternative Dispute Resolution. 3 Credits.

Students explore the various methods of dispute resolution that are available in the private sector, as alternatives to traditional litigation. Students learn to distinguish the various forms of dispute resolution, determine who participates in each form, how they participate and the advantages and disadvantages of each. Students role play in the various methods to more fully understand the mechanisms of alternative dispute resolution.

Prerequisites: Take LE 101.

Offered: Every Third Year, Fall

LE 233. Law for Everyday Life. 3 Credits.

This course introduces students to the practical legal implications of everyday adult living and helps students understand the legal aspects of different issues which they may be involved with as they live their adult lives. Topics such as renting or buying a home, employment, insurance, marriage, credit and many others are covered.

Prerequisites: Take LE 101.

Offered: Every year, Fall and Spring

UC: Humanities

LE 250. Gender and the Law (WGS 250). 3 Credits.

This course focuses on legal issues regarding gender, including the differential treatment of women, men and transgender people in the legal system, and contemporary responses to gender issues in society. (Alternative Perspective)

Prerequisites: Take LE 101 or WGS 101.

Offered: Every Third Year, Fall

LE 300. Special Topics. 3 Credits.

Prerequisites: Take 6 credits from legal studies courses.

Offered: As needed

LE 305. Civil Procedures. 3 Credits.

This course provides students with a basic understanding of the procedure of civil litigation from the beginning of a conflict to its final resolution, from both a theoretical and practical approach. The course covers the beginning of the litigation process, from when a client first contacts an attorney, through motions and pleadings, by following a torts case. Jurisdiction, torts, client interviewing, fact investigation, pleadings, motion practice, discovery and settlement are covered. The role of the attorneys, paralegals and other non-lawyer professionals, is discussed.

Prerequisites: Take LE 212 and junior status.

Offered: Every year, Fall and Spring

- LE 312. Family Law. 3 Credits.**
This course presents a study of how law relates to the family as a functioning entity, examination of family law practice, current issues in family law and equal protection, and preparation of documents for dissolution of marriage. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Spring
- LE 315. Wills, Probate and Estate Administration. 3 Credits.**
Legal concepts and statutes pertaining to wills and probate are examined, with special emphasis on preparation of forms necessary in administration of an estate. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Spring
- LE 317. International Law (PO 317). 3 Credits.**
Students are introduced to the nature and development of international law as part of the global political system. They explore sources of international law from treaties, custom, general principles, judicial decision and scholarly writing. Other topics include the connection between international and national law, dispute resolution using arbitration and national and international court cases, use of law to manage international conflict, negotiation, and legal issues concerning shared resources. (Alternative Perspective)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Fall
- LE 318. Human Rights Law and Global Justice. 3 Credits.**
What is a human right? How do particular political and historical contexts influence our understanding of rights and the construction of legal rules? This course focuses on the legal statutes and cases that constitute human rights jurisprudence, and also on the human interest stories that inform and shape those rights from a cross-cultural context. Students work with a local organization to gain a better understanding of what an abstract notion of "human rights" means to individuals. (Alternative Perspective)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Fall and Spring
- LE 319. International Law and the Individual. 3 Credits.**
This course considers the complex legal issues surrounding private interactions between individuals from different nations. Students explore the sources of law that may apply when a citizen of one country lives and works in another country or simply has dealings on a business or personal level with persons from other countries. Topics include immigration, customs, taxation, banking, family law, traveling, health care, voting and criminal justice. (Alternative Perspective)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every Third Year, Fall
- LE 320. Land Transfer and Closing Procedures. 3 Credits.**
This course presents background for the sources of real estate law; land and its elements, the nature of property, the concept of ownership, and land titles and interest in land; procedures for conveying interest in land recording statutes; and searching titles. Emphasis is given to the preparation, coordination and completion of real estate closings. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Fall
- LE 322. Health Care Law (HSC 322). 3 Credits.**
This course provides an overview of the legal issues faced by health care providers and patients. Students explore various topics arising from the organization and financing of health care, provider liability, bioethics and public health. The course focuses on the way in which law impacts the delivery of health care in the United States.
Prerequisites: Take 6 credits from legal studies; or Take LE 101 and HSC 220 or GT 263.
Offered: Every year, Summer
- LE 328. Employment Law. 3 Credits.**
This course provides an overview of the legal relationship between employer and employee and a basic understanding of employment-related law and its impact on the employer/employee relationship. Students study both federal and state laws applicable to the employer/employee relationship. Areas covered include the basis for the employer/employee relationship, pre-employment concerns, diversity and discrimination issues, discrimination actions, termination of the employer/employee relationship, ethical issues in employment law and current issues. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Fall
- LE 329. European Union Law. 3 Credits.**
This course focuses on the European Union and its relationship with the United States. It covers the origin and development of the European Union, the institutions of the EU and the law-making process in the EU. Certain specific legal regimes in the EU, including "the four freedoms," EU business and anti-trust law, and the EU's common security and foreign policy are discussed. The course includes a travel abroad option, spending spring break in Brussels, the primary seat of the EU regional "government." Day trips to the medieval city of Bruges, Belgium and to Aachen, Germany round out the experience. (Alternative Perspective)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every Third Year, Spring
- LE 330. Law of Business Entities. 3 Credits.**
In this study of the different types of business entities, including corporations, partnerships and limited liability companies/partnerships, emphasis is given to researching and drafting documents involved in the formation, maintenance and dissolution of business entities. (Practice)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every other year, Fall
- LE 336. Immigration Law. 3 Credits.**
The course introduces students to the basic legal principles relating to immigration to the United States. Students learn how to analyze immigration options for potential non-immigrants and immigrants. Students gain an understanding of the different avenues of immigrating to the U.S. on a temporary or permanent basis, as well as how to become a U.S. citizen and immigration law compliance. Refugee issues and status are also discussed. (Alternative Perspective)
Prerequisites: Take 6 credits from legal studies courses.
Offered: Every Third Year, Spring
- LE 340. American Constitutional Law (PO353). 3 Credits.**
The United States Constitution and how it has been interpreted by the Supreme Court are studied in this course. The class examines Supreme Court decisions with a focus on analysis and legal reasoning.
Prerequisites: Take PO 131 or 6 credits from subject LE.
Offered: Every year, Fall and Spring

LE 342. Comparative Constitutional Law (PO 342). 3 Credits.

Students compare the legal structures and fundamental principles typically found in constitutions by studying the constitutions of several different countries. The course explores the structure of government; the distinction between legislative, executive and judicial authority; the incorporation of fundamental human rights; the relationship between church and state; free speech and the press, and social welfare rights. Participants analyze the distinction between constitutional law and domestic law and assess the role of various constitutional frameworks in a global society. (Alternative Perspective)

Prerequisites: Take 6 credits from legal studies courses or take PO 131 or PO 101.

Offered: Every other year, Fall

LE 345. Intellectual Property. 3 Credits.

This course introduces students to the different areas of intellectual property law, including patents, trademarks, trade secrets and copyright law. Intellectual property protects products created by writers, artists and inventors. Preparation of necessary documents is covered. (Practice)

Prerequisites: Take 6 credits from legal studies courses.

Offered: Every other year, Spring

LE 350. Federal Indian Law. 3 Credits.

The relationship between the federal government and Native Americans and tribes is considered from a historical and practical perspective, along with current topics in Indian law. Practice applications before the two Connecticut tribal courts are covered as well. (Alternative Perspective) (Practice)

Prerequisites: Take 6 credits from legal studies courses.

Offered: Every Third Year, Spring

LE 355. Environmental Law (ENV 355). 3 Credits.

This course provides an overview of federal environmental law, the way law protects the natural environment and government policies created to protect or exploit the environment. In this class, we explore issues impacting the environment, and how the law can both benefit and disadvantage the environment. (Practice)

Prerequisites: Take 6 credits from legal studies courses.

Offered: Every other year, Fall

LE 356. International Environmental Law (ENV 356). 3 Credits.

This course gives students an overview of the legal and political framework that constitutes international environmental law. We examine the characteristics of international law and distinguish it from domestic law, looking at the various actors and their roles in the system. Students become familiar with the key principles of international environmental law such as the precautionary principle, sovereignty and sustainable development. Issues examined include climate change, the oceans, and the relationship between trade and the environment. (Alternative Perspective)

Prerequisites: Take 6 credits from legal studies courses.

Offered: Every other year, Fall

LE 360. Mediation. 3 Credits.

This course approaches mediation from the mediator's perspective. Students develop a sophisticated understanding of the legal and ethical aspects of mediation and learn to mediate disputes between parties in the context of civil, criminal and family disputes. Students also learn how to use mediation techniques to resolve disputes in non-legal settings. The course employs mediation exercises, role plays, simulations, self-critique and group discussions to demonstrate and evaluate effective communication skills, bargaining strategies, mediation styles and intervention techniques. (Practice)

Prerequisites: Take 6 credits from legal studies courses.

Offered: Every other year, Spring

LE 370. Negotiation. 3 Credits.

This course provides students with a thorough understanding of the theory, strategy and practice of negotiation, both transactional and as a dispute resolution method. Students learn to negotiate to resolve problems and communicate effectively, within an ethical framework. The course uses negotiation strategy, exercises, role plays, group discussions and reflective writing to demonstrate and evaluate negotiation techniques and styles. (Practice)

Prerequisites: Take 6 credits from legal studies courses.

Offered: Every year, Fall

LE 485. Legal Internship Seminar. 3 Credits.

Students are placed in a supervised legal internship in a law office, government office, nonprofit organization or other legal setting for 10 hours per week. During the weekly seminar, students discuss legal ethics, professional responsibility and career development. They also complete a legal memo on a complex topic incorporating principles from the core legal studies courses, as well as participate in a mock appellate oral argument. Students also produce a journal focused on their guiding question in completion of the Capstone requirement. For majors and students completing the Minor/Certificate in Legal Studies only.

Prerequisites: Take LE 305 and senior status required.

Offered: Every year, Fall and Spring

LE 490. Senior Seminar in Law in Society. 3 Credits.

In this seminar, students must research a legal issue of their choosing; critically examine how our legal system addresses, or fails to address, the issue; and recommend a change in our approach, suggest an alternative interpretation, or highlight a particularly effective response to the issue. Students ultimately produce legal scholarship with a focused thesis developed through substantial research and analysis. The course culminates in each student completing a publishable quality thesis and presenting that work to the class orally. For majors only.

Prerequisites: Take LE 305 and senior status required.

Offered: Every year, Fall and Spring

LE 499. Independent Study in Legal Studies. 1-4 Credits.**Micro Credit Institute (MCI)****MCI 100. Negotiation for Success. 1 Credit.**

This is a one credit course that has been developed based on the premise that everyone is involved in some form of negotiation every day. Negotiation is indeed an essential skill that is called upon frequently in our private as well as professional life. From the shop floor to the boardroom, negotiation is something that one cannot avoid. Knowing how to negotiate, and more importantly, how to manage it well, is the key to increasing sales effectiveness, developing sound working relationships with co-workers, building better customer relations, achieving career goals, and obtaining a higher salary. The course is open to everyone but is designed especially for first-generation college student.

Offered: As needed

MCI 101. Health, Aging and Intersectionality. 1 Credit.

This course explores the intersections between illness, aging and identity. Students will have the opportunity to find new ways to approach, reflect on and talk about topics ranging from aging and disability to issues limiting the health and wellness of underrepresented and marginalized groups through language, poetry and other mediums.

Offered: As needed

MCI 102. Octavia Butler: Black Feminist Sci Fi Pioneer. 1 Credit.

This one-credit course focuses on the best author you've (probably) never heard of. Winner of the MacArthur "Genius Grant" and Hugo and Nebula awards for science fiction, Octavia Butler's short stories and novels focus on blood and biology, power and subjugation. She writes about slavery and time travel, love and space travel, an epidemic cured only by art, and a woman captured by aliens who births a new hybrid species. We will discuss the intersection of race and gender in fictional worlds and real ones. We will also consider the purpose of reading literature, as well as what "counts" as literary. This course has no prerequisites and welcomes anyone and everyone who wants to join us.

Offered: As needed

MCI 103. Higher Education in Prison: Past, Present and Future. 1 Credit.

This course focuses on the longstanding, but only recently attended to, field of higher education in prison. Since the late 19th century, higher education institutions and religious institutions have provided myriad educational opportunities for incarcerated people; recently, with justice and education advocates figuring prominently in getting the 1994 Pell ban repealed and movies like "College Behind Bars" being such a success, the spotlight has increased on higher education in prison programs. This course will explore the history of these programs, the current landscape of the field, as well as hear from experts currently building the field into a comprehensive discipline with impacted persons co-leading the charge. This course is open to anyone interested in learning more about higher education in prison.

Offered: As needed

MCI 104. Women and Body Image in the Age of Social Media. 1 Credit.

Throughout this one-credit course, we will learn about the history of mass media and how it has both reflected and reshaped women's body image, with a focus on the rise of social media and how it continues to play a role in women's conceptions of their own body image. We will be reading a number of scholarly articles and books that look specifically at issues of embodiment and the intersection of gender, sexuality, race/ethnicity, and social class. We will also be investigating and developing a more positive and sustainable relationship between our own social media usage and our bodies. Please note that this course is not appropriate for anyone who has any form of eating disorder/disordered eating/body dysmorphia. Due to its content, this course may trigger previous or current conditions. Please use discretion when considering if this course is appropriate for you.

Offered: As needed

MCI 105. Intro to Judaism. 1 Credit.

The intention of this one-credit program is to explore and explain basic Judaism with its binding principles. This program is geared towards students of every faith.

Offered: As needed

MCI 106. Questioning Mother Culture. 1 Credit.

Drawing from Daniel Quinn's *Ishmael*, this course will challenge us to first notice how Western industrialization's Mother Culture impacts our daily lives. Next, the course will offer opportunities for rethinking new narratives for creating a more just, equitable, sustainable cultural landscape.

Offered: As needed

MCI 108. Why No HBCUs in Connecticut. 1 Credit.

Despite the obvious geographic concentration of Historically Black Colleges & Universities (HBCUs) in the southeastern part of the United States, Connecticut was - or was supposed to be - a pioneer in this educational revolution. One of the first HBCUs, the Negro College, was actually planned and proposed in New Haven, in the shadow of Yale University and several years before the founding of any HBCU still in existence; so what happened? Flashback through time to find out in this one-credit course.

Offered: As needed

MCI 110. Race: A Dangerous Symbol. 1 Credit.

This one-credit course is intended to explore how the racial symbolic system plays itself out in the everyday world, and the ease and advantages that White-Americans have in navigating the everyday world. The course will directly address the difficulties, disadvantages, micro-aggressions and violence that people of color face in their everyday worlds, as a result of the American symbolic system surrounding race. The course is designed to provide a cultural theory of symbolic self in a pervasive racialized system.

Offered: As needed

MCI 120. Intergenerational Dialogues. 1 Credit.

This one-credit course is designed to bring students into the community to interact, study and learn about social justice issues in an intergenerational environment. Topics, location and number of meetings will vary depending on the professor offering it.

Offered: As needed

MCI 150. Queering the Screen: LGBTQ Representation in Movies. 1 Credit.

This one-credit, seven-week course will explore lesbian, gay, bisexual, transgender, and queer (LGBTQ) characters in movies over the last 100 years and how these films reflect our understanding of sexuality and gender expression. Representations of LGBTQ characters on film date back to early silent movies; however, political and religious agendas have often suppressed these representations and perpetuated negative societal views and intolerance. Even so, these films have also contributed to the positive development of LGBTQ identity and the LGBTQ rights movement. This on-ground, discussion-based course is open to anyone interested in LGBTQ history and/or film.

Offered: As needed

MCI 190. Special Topics. 1 Credit.

Offered: As needed

Quinnipiac's Minor/Certificate in Legal Studies is approved by the American Bar Association.

Bachelor of Arts in Criminal Justice

Program Contact: Alan Bruce (p. 7) 203-582-8458

The criminal justice degree program offers students a comprehensive examination into law-breaking behavior, crime as a social phenomenon and methods of social control. Students complete coursework ranging from the evaluation of institutions of formal social control, such as policing, courts and corrections, to advocating for crime victims. The program places particular emphasis on experiential learning through its carefully structured internships and its community-based coursework. Upon successful degree completion, students are prepared to pursue advanced degrees (in a variety of areas including law school and social work) or assume careers in fields such as policing, corrections, law, social work, public administration, teaching, international peacekeeping and other areas of public policy related to crime, victimization and the administration of justice. Graduates who pursue careers outside the

criminal justice field gain transferrable skills—critical thinking, problem identification, advanced oral and written communication—that are fundamental to success in any career.

Criminal Justice Curriculum

Students majoring in Criminal Justice must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Criminal Justice Core Requirements		
CJ 101	Crime and Society	3
SO 101	Introduction to Sociology	3
CJ 205	From College to Career (SO/GT 205)	1
SO 241	Sociology of Race and Ethnicity	3
CJ 241	Police and Policing	3
CJ 261	Prisons and Jails	3
CJ 290	Criminal Justice Research Methods	3
CJ 392	Internship in the Community (SO 392/GT 392)	3
CJ 385	Senior Seminar in Criminal Justice Policy	3
Select one of the following crime typologies options:		3
CJ 225	Addiction and Crime	
CJ 232	Women in the Criminal Justice System (SO/WGS 232) (course cross-listed)	
CJ 250	Youth Crime (SO 250)	
CJ 253	Sexual Violence (WGS 253)	
CJ 271	Public Order Crimes (SO 271)	
Select one of the following criminal justice in practice options:		3
LE 225	Alternative Dispute Resolution	
CJ 200	Special Topics	
CJ 243	Investigative Techniques	
CJ 251	Probation Parole and Community Corrections	
CJ 263	Prosecution and Sentencing	
CJ 275	Sexual Violence Victim Advocacy (WGS 275)	
PS 283	Introduction to Forensic Psychology	
Select two of the following advanced elective options:		6
CJ 320	Victimology	
CJ 325	Advanced Victimology	
CJ 330	Perspectives on Violence (SO 330)	
CJ 333	Drugs, Alcohol and Society (SO 333)	
CJ 343	Forensic Issues in Law Enforcement	
CJ 351	Corrections Counseling	
CJ 355	Crime and Media (SO 355)	
SO 360	Sociology of Mental Health	
CJ 360	Inside-Out Prison Exchange Seminar	

CJ 370	Constitution, Ethics and Policing	
CJ 375	Family Violence	
CJ 394	Advanced Internship in the Community (SO 394/GT 394)	
CJ 399	Independent Study in Criminal Justice ²	
Free Electives		16-19
Total Credits		102-108

¹ All students must complete the 46 credits of the University Curriculum (p. 51).

² May count as a crime typologies, criminal justice in practice or advanced elective option.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

- Diversity** – Students will recognize the influence that different forms of diversity have upon their worldview and how diversity impacts the criminal justice system.
- Scientific Literacy** – Students will be able to identify the steps of the scientific process, formulate scientific questions and distinguish between anecdotal and empirical evidence.
- Social Responsibility** – Students will understand how the criminal justice system functions as one part of the larger environmental system, and understand that its current format is not inevitable but the products of historical factors and the interconnectedness of individual actions and societal decisions.
- Communication** – Students will be able to argue a clearly defined position with civility, using credible evidence with appropriate citation of sources.
- Critical Thinking** – Students will understand multiple perspectives on significant crime-related topics and the importance of examining these from multiple perspectives and the significance of utilizing different data sources when examining these concepts. Basic disciplinary theory and terminology are applied.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in

the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for BA in Criminal Justice

A minimum of 60 credits is required for transfer into the BA in Criminal Justice program. If possible, it is recommended that students complete Introduction to Criminology, Introduction to Criminal Justice and Introduction to Sociology prior to transferring to Quinnipiac. Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Course	Title	Credits
First Year		
Fall Semester		
English I		3
Introduction to Criminal Justice		3
Statistics		3

Credits		15
Total Credits		60-62

Bachelor of Arts in Law in Society

Program Contact: Michelle D. Miller
(michelle.miller@qu.edu) 203-582-3231

A humanities-based approach to law exposes students to different methodologies and distinct approaches to understanding the law in our society. Our comprehensive curriculum introduces students to the foundational aspects of the field of law before challenging them to explore how the law shapes — and is shaped by — particular perspectives, historical contexts and actual practice.

As students navigate both required and elective courses, they master different methods of approaching and solving complex legal problems. Throughout the program, students will investigate the complexities of our legal systems; discover how civil and constitutional systems work; and learn to research, reason and write about the law. These skills will be sharpened beyond the classroom as students complete a professional internship and gain hands-on experience in a law setting.

The Law in Society major culminates in a senior capstone course, which provides the opportunity for students to complete independent research on a legal topic of their choosing and develop a thesis that draws from their coursework and their internship experience. Through this integration of humanities, practical skills and experiential learning, the major has been approved by the American Bar Association as a paralegal program.

Graduates from the program are extraordinarily well prepared for a variety of careers in law and other related fields. Our graduates have excelled in roles spanning policy, compliance, government and politics, social services, criminal justice and conflict resolution. Many students continue their studies in law school, but career prospects don't end at the courtroom or law office. The skills of legal reasoning and critical thinking translate into fields as diverse as policy, mediation, local law enforcement, social services, education and human relations.

BA in Law in Society Curriculum

Students majoring in Law in Society must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Law in Society Core Requirements		

Students must earn a grade of C or better in all Law in Society core requirements at the 200 level or above to move to the next required courses.

LE 101	Introduction to the American Legal System	3
LE 211	Legal Reasoning, Research and Writing I	3
LE 212	Legal Reasoning, Research and Writing II	3
LE 305	Civil Procedures	3
LE 340	American Constitutional Law (PO353)	3
LE 485	Legal Internship Seminar	3
LE 490	Senior Seminar in Law in Society	3

Law in Society Elective Courses

At least 9 credits must be at the 300 level:

Legal Practice Electives

Select two courses of the following: 6

LE 312	Family Law	
LE 315	Wills, Probate and Estate Administration	
LE 320	Land Transfer and Closing Procedures	
LE 328	Employment Law	
LE 330	Law of Business Entities	
LE 345	Intellectual Property	
LE 355	Environmental Law (ENV 355)	
LE 360	Mediation	
LE 370	Negotiation	

Alternative Perspectives in the Law Electives

Select one of the following: 3

LE 250	Gender and the Law (WGS 250)	
LE 317	International Law (PO 317)	
LE 319	International Law and the Individual	
LE 329	European Union Law	
LE 336	Immigration Law	
LE 342	Comparative Constitutional Law (PO 342)	
LE 356	International Environmental Law (ENV 356)	

Additional Legal Studies Electives

LE 115	Criminal Law	
LE 150	Introduction to Mock Trial	
LE 160	Competitive Mock Trial (may be taken up to three times, or twice if LE 150 was taken)	
LE 200	Special Topics	
LE 224	Sports Law (SPS 224)	
LE 233	Law for Everyday Life	
LE 300	Special Topics	
LE 312	Family Law	
LE 322	Health Care Law (HSC 322)	

Three additional courses chosen from any LE elective, including those in Legal Practice and Alternative Perspectives 9

Additional Requirements

SO 101	Introduction to Sociology	3
	Select a 200-level English course	3
	Select an American History course	3
Free Electives		5-8
Total Credits		102-108

¹ All students must complete the University Curriculum (p. 51) requirements.

Students also must complete a minor in any other department within the university. All Legal Specialty transfer courses will be evaluated by the program director to determine their equivalencies and to ensure that the quality and integrity of the program are maintained if such credit is granted. At least nine credits of Legal Specialty courses, including the Internship experience, must be taken at Quinnipiac University. A maximum of nine credits of Legal Specialty courses may be transferred. Quinnipiac does not award Legal Specialty credit by examination or portfolio.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

- Understand and critically assess** how law is made, interpreted and applied in different contexts within the United States and abroad.
- Research, analyze and write** a scholarly paper on a chosen topic related to law, incorporating humanities-based inquiry.
- Formulate and present** a coherent, well-supported legal argument in both written and oral form to diverse audiences.
- Apply their legal skills and knowledge** of the humanities in a professional law-related setting, consistent with ethical standards governing the legal profession.
- Understand the political, historical and social conditions** underlying and affecting the law.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in

the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Minor in Criminal Justice

Program Contact: Alan Bruce (p. 7) 203-582-8458

Exploring fundamental issues inherent in the criminal justice system provides valuable insight into some of today's most complex societal challenges, including growth of the prison population and the ever-increasing number of formerly incarcerated individuals returning to communities. From the role mental illness plays in crime to the impact of drugs and alcohol on our communities, this minor examines an eclectic array of crime and justice topics that complement many majors including sociology, political science and psychology.

You'll have the flexibility to shape the program in a way that reflects your interests and enhances your professional goals, and you'll have plenty of support and guidance from a faculty with a broad range of expertise in the criminal justice field. You will meet one-on-one with the program director, and together design a minor that's right for you, choosing from a varied selection of courses such as Crime and Media, Sexual Violence, Organized Crime and Investigative Techniques.

Criminal Justice Minor Curriculum

To complete the minor, students must complete 15 credits in criminal justice studies at any level and one 300-level criminal justice class for a total of 18 credits. Students should meet with the program director to select appropriate courses. A student majoring in gerontology or sociology can minor in criminal justice. Courses taken for a minor may not count toward a gerontology or sociology major. Courses taken for a gerontology or sociology major may not count toward a minor.

Students in the criminal justice minor may choose from the following courses:

Code	Title	Credits
Select 18 credits from the following:		
CJ 101	Crime and Society	3
CJ 225	Addiction and Crime	3
CJ 232	Women in the Criminal Justice System (SO/WGS 232)	3
CJ 241	Police and Policing	3
CJ 243	Investigative Techniques	3
CJ 250	Youth Crime (SO 250)	3
CJ 251	Probation Parole and Community Corrections	3
CJ 253	Sexual Violence (WGS 253)	3
CJ 261	Prisons and Jails	3
CJ 263	Prosecution and Sentencing	3
CJ 271	Public Order Crimes (SO 271)	3
CJ 275	Sexual Violence Victim Advocacy (WGS 275)	3
CJ 320	Victimology	3
CJ 325	Advanced Victimology	3
CJ 330	Perspectives on Violence (SO 330)	3

CJ 333	Drugs, Alcohol and Society (SO 333)	3
CJ 343	Forensic Issues in Law Enforcement	3
CJ 351	Corrections Counseling	3
CJ 355	Crime and Media (SO 355)	3
CJ 360	Inside-Out Prison Exchange Seminar	3
CJ 370	Constitution, Ethics and Policing	3
CJ 375	Family Violence	3

Minor in Law in Society

Program Contact: Michelle D. Miller
(michelle.miller@qu.edu) 203-582-3231

The minor in Law in Society is designed for students who are interested in learning more about law and the American legal system. Law is the binding force in society. It reflects the values of society and is constantly changing as society changes. Law deals with issues such as justice, equity and the balance between the rights of individuals and the public interest. Students in this program learn of their legal rights and responsibilities in today's society. This minor introduces students to the historical and current issues facing society through its legal system. The minor is not designed to prepare students to work as paralegals and is not approved by the American Bar Association.

Minor Policy: Students may complete only one minor using the same courses. Majors may not complete a minor within the same department.

Law in Society Minor Curriculum

Code	Title	Credits
Required courses

Minor/Certificate in Legal Studies (ABA-Approved)

Program Contact: Michelle D. Miller
(michelle.miller@qu.edu) 203-582-3231

Quinnipiac University's ABA-approved Minor/Certificate in Legal Studies is designed to provide students with the knowledge and skills needed to be successful in the paralegal profession. The minor is planned and taught by lawyers to provide students with a solid grounding in the fundamentals of the legal system. The courses chosen for the minor prepare students to work as a paralegal in diverse legal settings. The legal studies minor/certificate has been approved by the American Bar Association as a paralegal education program. A paralegal performs specifically delegated substantive legal work under the supervision of an attorney. While paralegals may not give legal advice to clients or appear in court on their behalf, these highly skilled professionals perform a wide range of tasks and play an integral role in the delivery of legal services.

The education focuses on particular core areas of the law and on developing specific legal research, writing and critical thinking skills, all within a framework of the ethical and statutory constraints confronting the paralegal profession. This combination of theoretical classwork with real-world experience, along with exposure to traditional liberal arts and general education and a major in another discipline at Quinnipiac, prepares legal studies certificate students for a broad range of professional opportunities.

Minor Policy: Students may complete only one minor using the same courses. Majors may not complete a minor within the same department.

Legal Studies Minor/Certificate Curriculum

A total of 21 credits are required for completion of the minor/certificate. All Legal Specialty transfer courses will be evaluated by the program director to determine their equivalencies and to ensure that the quality and integrity of the program are maintained if such credit is granted. At least nine credits of Legal Specialty courses, including the Internship experience, must be taken at Quinnipiac University. A maximum of nine credits of Legal Specialty courses may be transferred. Quinnipiac does not award Legal Specialty credit by examination or portfolio.

Code	Title	Credits
Required Courses		15
LE 101	Introduction to the American Legal System	
LE 211	Legal Reasoning, Research and Writing I	
LE 212	Legal Reasoning, Research and Writing II	
LE 305	Civil Procedures	
LE 485	Legal Internship Seminar	
Legal Studies Electives (choose two from electives approved as Legal Practice. Other courses cannot be substituted.)		6
LE 312	Family Law	
LE 315	Wills, Probate and Estate Administration	
LE 320	Land Transfer and Closing Procedures	
LE 328	Employment Law	
LE 330	Law of Business Entities	
LE 345	Intellectual Property	
LE 355	Environmental Law (ENV 355)	

LE 360 Mediation

LE 370 Negotiation

Learning Outcomes

Students who graduate with a Minor/Certificate in Legal Studies will demonstrate the following competencies:

- Understand and critically assess** how law is made, interpreted and applied in the United States.
- Analyze** a legal problem, research and synthesize the law, apply it to a set of facts, and write a legal memo using a generally accepted format for the legal profession with proper legal citation.
- Draft, review, organize and manage** legal documents and correspondence using proper format and appropriate content.
- Formulate and present** a coherent, well-supported legal argument in both written and oral form to diverse audiences.
- Apply** their legal skills and knowledge in a professional legal setting, consistent with ethical standards governing the legal profession.

Department of Mathematics and Statistics

The power of mathematics lies in its focus on precise and logical reasoning to draw conclusions and make discoveries in many domains, both abstract and concrete. The idea of mathematics as a process of carrying out procedures and following rules to produce a single right answer is a misconception. At the college level, the discipline is fully realized as a way of thinking, which can be applied in almost any context, wherever the basis for what is true or false can be understood while minimizing fuzziness or ambiguity.

The starting point in mathematics is not a large body of facts but is instead a small number of ideas that are made precise and thoroughly understood. Mathematical knowledge is built from these in a way that gives us access to the steps that form the logical basis for why something makes sense.

Times have changed. We live in a world where decisions need to be justified with data and conclusions need to be quantified. To be effective, we must critically evaluate judgments based on data and quantifiable observations, and present arguments in a logical fashion. Presenting conclusions alone is not enough; they must be explained in a way that convinces others, supported by sound logical reasoning. This kind of argument is the focus of mathematics.

Ultimately, mathematics builds our ability to create new knowledge, justify new conclusions, and make new discoveries in any realm where logical thought yields power — which is to say, just about everywhere.

Consequently, the study of mathematics will better enable you to succeed in other disciplines, from chemistry to political science to sociology, at a more advanced level. This is also why mathematics majors find careers doing advanced work in consulting, government, analytics, engineering, education and other fields.

Mathematics is the symbolic language of nature. More than numbers and symbols, it encompasses the logic and methodology of reasoning and provides the tools for making decisions, interpreting observations, explaining natural phenomena and solving problems. It is both a subject

with widespread applications to the sciences and social sciences and a subject of intrinsic intellectual interest.

Students majoring in mathematics acquire the mathematical skills necessary to be successful in their chosen field and become informed and responsible citizens, and learn to appreciate the relevance of mathematics in society.

- Bachelor of Arts in Mathematics (p. 227)
- Bachelor of Science in Data Science (p. 228)
- Minor in Applied Statistics and Data Science (p. 230)
- Minor in Mathematics (p. 229)

Mathematics (MA)

MA 100. Basic Algebra. 3 Credits.

This course reviews basic arithmetic and algebraic skills and introduces mathematical methods to the entering student with little or no mathematics background, with the goal of providing sufficient skill to take coursework requiring two years of college preparatory mathematics. Students are expected to participate in three hours of coursework per week. MA 100 is for institutional credit and does not apply to graduation requirements. Note: Students may not withdraw from MA 100. Students who fail MA 100 the first time receive a grade of Unsatisfactory. If the student does not pass the second time, then a failure is recorded on the student's record.

Offered: Every year, Fall and Spring

MA 107. College Algebra. 3 Credits.

This course reviews the fundamentals of algebra. Students learn about the following topics: the real number system, factoring and expanding polynomials, properties of logarithms and exponentials, linear equations and inequalities, quadratic equations and inequalities, absolute value equations and inequalities, systems of equations and inequalities, functions and their graphs, and algebra of functions, including composition, and inverse functions. This course is designed for students who need to improve their algebraic skills to prepare for future mathematics courses such as Applied Calculus, Pre-Calculus, or Statistics. MA 107 does not fulfill the Quantitative Literacy requirement. Prerequisite: A math placement level of 2 or above, or successful completion of MA 100.

Offered: Every year, All

MA 110. Contemporary Mathematics. 3 Credits.

This course introduces students to the study of mathematics as a discipline and also presents topics that are applicable to students' everyday lives. Topics include logic, probability and statistics and financial mathematics. The course also covers two topics from the following list: geometry, set theory, number theory, measurement, problem solving, mathematical systems, scientific applications, history of mathematics. Topics are chosen by the instructor. Students should check the mathematics requirements for their major before selecting their first course in mathematics. MA 110 is not designed to be a prerequisite for any calculus course. Prerequisite: A math placement level of 2 or above, or successful completion of MA 100.

Offered: Every year, All

MA 140. Pre-Calculus. 3 Credits.

This course concentrates on topics that students need to understand profoundly to succeed in calculus. Students learn about the following topics: functions and their graphs, exponents and logarithms and trigonometry. There is a focus on basic concepts and visualization of problems. The material has many real-life applications. Use of a TI-83 or TI-84 calculator is required. Primary emphasis is on developing the following New Synthesis proficiencies: quantitative reasoning and critical thinking and reasoning.

Prerequisites: Take MA 107; Minimum grade C- or placement level of 3.

Offered: Every year, All

UC: Breadth Elective, University Curriculum Ele

MA 141. Calculus of a Single Variable. 3 Credits.

This course covers functions, graphs, limits, continuity, derivatives, applications of derivatives, antiderivatives and definite integrals, as well as the Fundamental Theorem of Calculus. This course significantly advances the following Essential Learning Outcomes: quantitative reasoning, critical thinking and reasoning. Many sections require a TI-83/84 calculator (or the equivalent); check with the instructor. Students cannot receive credit for both MA 141 and MA 151.

Prerequisites: Take MA 140; Minimum grade C; or placement level of 5.

Offered: Every year, All

UC: Breadth Elective, University Curriculum Ele

MA 141H. Honors Calculus of a Single Variable. 3 Credits.

This course covers functions, graphs, limits, continuity, derivatives, applications of derivatives, antiderivatives and definite integrals, as well as the Fundamental Theorem of Calculus. This course significantly advances the following Essential Learning Outcomes: quantitative reasoning, critical thinking and reasoning. Many sections require a TI-83/84 calculator (or the equivalent); check with the instructor. Students cannot receive credit for both MA 141 and MA 151.

Prerequisites: Take MA 140; Minimum grade C; or placement level of 5.

Offered: As needed

UC: University Curriculum Ele

MA 150. Integral Calculus With Applications. 1 Credit.

This course provides a bridge from MA 141 to MA 152 or MA 153. Students review basic integration rules, integration by substitution, The Fundamental Theorem of Calculus, numerical integration and applications of integration, including area between curves, volumes, arc length and applications from physics. A graphing calculator is required; the TI-83 or TI-84 is recommended.

Prerequisites: Take MA 141 or MA 141H; Minimum grade C-.

Offered: Every year, Fall and Spring

MA 151. Calculus I. 4 Credits.

This course covers functions and graphs, limits and continuity, derivatives, applications of derivatives, antiderivatives and definite integrals, the Fundamental Theorem of Calculus, numerical integration and applications of definite integrals. A graphing calculator is required; the TI-83 or TI-84 is recommended. Students cannot receive credit for both MA 151 and MA 141.

Prerequisites: Take MA 140; Minimum grade C; or placement level of 5.

Offered: Every year, Fall and Spring

UC: Breadth Elective, University Curriculum Ele

MA 152. Calculus II.**4 Credits.**

This course covers techniques of integration, improper integrals, differential equations, infinite series, parametric equations, polar coordinates, vectors, operations on vectors, and three-dimensional coordinate systems.

Prerequisites: Take MA 151 or MA 141; Minimum grade C-.

Corequisites: Take MA 150.

Offered: As needed

MA 153. Calculus II: Part A.**2 Credits.**

Students in this course study techniques of integration and infinite sequences and series. Techniques studied include u-substitution, integrals involving logarithms and inverse trigonometric functions, trigonometric integrals, trigonometric substitution, integration by parts, and partial fractions. For infinite series, the course includes a study of convergence, tests of convergence, power series, and Taylor and Maclaurin series. Additional topics include indeterminate forms, L'Hopital's Rule, and improper integrals. Offered the first half of each semester.

Prerequisites: Take MA 141 or MA 151. Minimum Grade C-.

Offered: Every year, Fall and Spring

MA 154. Calculus II: Part B.**2 Credits.**

In this course students study differential equations, conic sections, parametric equations, polar coordinates, vectors, operations on vectors, lines and planes in space, three-dimensional coordinate systems (cylindrical and spherical coordinates) and quadric surfaces. Offered the second half of each semester.

Prerequisites: MA 151; or MA 141 and MA 150; Minimum grade C-.

Corequisites: Take MA 153.

Offered: Every year, Fall and Spring

MA 170. Probability and Data Analysis.**3 Credits.**

This course teaches students the fundamentals of probability and solves real-life probability problems. Students learn to use graphical techniques and descriptive statistics to analyze data. Topics include: ratios, proportions, percentages, empirical and theoretical probability calculations, conditional probability and independence, Bayes' Theorem, expected value, discrete probability distributions, continuous probability distributions, descriptive statistics for central tendency and variability, graphical techniques including histograms and scatter diagrams, and analyzing data sets. The course also includes an introduction to Excel and prepares students for future courses in statistics and analytics.

Prerequisites: Take MA 100; Minimum grade C-; or placement level of 2.

Offered: Every year, Fall and Spring

UC: Breadth Elective

MA 176. Baseball and Statistics (SPS 176).**3 Credits.**

This course covers Sabermetrics: the use of standard statistical topics to analyze data derived from baseball records. The book, "Moneyball," is read to understand how Billy Beane used statistics to bring success to the Oakland Athletics. The standard statistical topics covered include exploratory data analysis, elementary probability, discrete probability distributions, normal probability distributions, sampling distributions, regression and correlation. Learning to use Excel to do statistical analysis is an integral part of the course. Students must possess a basic knowledge of baseball.

Prerequisites: Take MA 100; or placement level of 2.

Offered: Every year, Fall and Spring

UC: Breadth Elective

MA 205. Introduction to Discrete Mathematics (CSC 205).**3 Credits.**

This course introduces students to basic concepts and structures of discrete mathematics. Topics can include propositional and predicate logic, sets and set operations, functions, proof techniques, counting problems, probability and basic number theory. Applications include computer science, biology, social sciences, law and the physical sciences.

Prerequisites: Take CSC 110 or MA 110 or higher; Grade of C- or better.

Offered: Every year, Spring

MA 206. Statistics for the Behavioral Sciences.**3 Credits.**

This course presents a study of statistical procedures pertinent to the work of the social and behavioral scientist. Students are introduced to descriptive procedures, confidence intervals, hypothesis testing, regression and correlation, analysis of variance and non-parametric techniques. Students are not allowed to receive credit for more than one of the following courses: MA 206, MA 275 and MA 285.

Prerequisites: Take MA 107 MA 170 or MA 176; Minimum grade C-; or placement level of 3.

Offered: Every year, All

MA 229. Linear Algebra.**3 Credits.**

This course covers the basic concepts of linear algebra, along with an introduction to the language and techniques of formal mathematics. Topics include systems of linear equations, vector spaces, linear transformations, matrices, determinants and eigenvalues.

Offered: Every year, Spring

MA 251. Calculus III.**4 Credits.**

This course covers vector functions, derivatives and integrals of vector functions, arc length and curvature, motion in space, functions of several variables, limits and continuity, partial derivatives, tangent planes and linear approximations, directional derivatives and the gradient vector, maximum and minimum values, Lagrange multipliers, multiple integration in Cartesian, cylindrical and spherical coordinates, surface area, vector fields, line integrals, Green's theorem, curl and divergence, surface integrals, Stoke's theorem and divergence theorem.

Prerequisites: Take MA 152 or MA 154; Minimum grade C-.

Offered: Every year, All

MA 265. Matrix Algebra and Differential Equations.**4 Credits.**

This course covers the basic concepts of both linear algebra and ordinary differential equations with an emphasis on applications in science and engineering. Linear algebra topics include systems of linear equations, vector spaces and subspaces, linear transformations, matrix algebra, determinants and eigenvalues. Differential equation topics include solutions to first, second and higher order homogeneous and nonhomogeneous differential equations. Solution methods include use of eigenvalues and eigenvectors, Laplace transforms, infinite series and numerical approximations. Special differential equations including Legendre, Bessel, Hermite and Chebyshev equations also are discussed as well as transformations for autonomous equations. A graphing calculator is recommended (TI-83 or TI-84) as well as knowledge of Excel. Students cannot receive credit for both MA 265 and MA 365.

Prerequisites: Take MA 152 or MA 153; Minimum grade C-.

Offered: Every year, Spring

- MA 275. Biostatistics.** **3 Credits.**
Students are introduced to the application of statistical techniques to the biological and health sciences with emphasis on probability laws, sampling and parameter estimation, central limit theorem, test of hypothesis, correlation, regression and analysis of variance. Students are not allowed to receive credit for more than one of the following courses: MA 206, MA 275 and MA 285.
Prerequisites: Take MA 107, MA 170, MA 176 or MA 140; Minimum grade C- or placement level of 4.
Offered: Every year, All
- MA 275H. Honors Biostatistics.** **3 Credits.**
Students are introduced to the application of statistical techniques to the biological and health sciences with emphasis on probability laws, sampling and parameter estimation, central limit theorem, test of hypothesis, correlation, regression and analysis of variance.
Prerequisites: Take MA 107 MA 170 MA 176 or MA 140; Minimum grade C- or placement level of 4.
Offered: As needed
- MA 285. Applied Statistics.** **3 Credits.**
This introductory statistics course is intended primarily for students majoring in engineering, mathematics or the sciences. Emphasis is on using statistics to answer questions in the physical and social sciences. Topics include descriptive statistics, probability, point and interval estimation, hypothesis testing, correlation and regression, analysis of variance, chi-square tests and nonparametric methods. Students are required to analyze real data sets using Excel, SAS, SPSS or similar computer programs. Students are not allowed to receive credit for more than one of the following courses: MA 206, MA 275 and MA 285.
Prerequisites: Take MA 141, MA 141H or MA 151; Minimum grade C-.
Offered: All
- MA 299. Independent Study in Mathematics.** **1-6 Credits.**
This individual study in a specialized area is open to juniors and seniors by special arrangement with the department chairman. This is a structured program of reading, problem solving and experiments established through conferences with a member of the mathematics faculty. Graded by examination or term project.
Offered: Every year, All
- MA 300. Special Topics.** **3 Credits.**
Offered: As needed, All
- MA 301. Foundations of Advanced Mathematics.** **3 Credits.**
This course is an exploration of the language and nature of mathematics. Emphasis is placed on developing the students' ability to construct and write mathematical proofs and helping students read and understand mathematical reasoning. Various techniques of proof are discussed, including direct, contrapositive, induction, contradiction and counterexample. Mathematical content includes elementary logic, quantifiers, set theory, relations, functions and number systems. Other topics are at the instructor's discretion, and may include number theory, graph theory, point-set topology or counting problems.
Prerequisites: Take MA 229 or MA 205; Minimum grade C-.
Offered: Every year, Fall
- MA 305. Discrete Mathematics.** **3 Credits.**
Students study various topics in discrete mathematics, such as proof by induction, recurrence relations, cardinality of a set, the pigeonhole principle, counting techniques, probability and graph theory.
Prerequisites: Take MA 301 or CSC 205; Minimum grade C-.
Offered: Every other year, Fall
- MA 315. Theory of Computation (CSC 315).** **3 Credits.**
This course provides an introduction to the classical theory of computer science with the aim of developing a mathematical understanding of the nature of computing by trying to answer one overarching question: "What are the fundamental capabilities and limitations of computers?" Specific topics include finite automata and formal languages (How do we define a model of computation?), computability (What can be computed? and How do we prove something cannot be computed?) and complexity (What makes some problems so much harder than others to solve? and What is the P versus NP question and why is it important?).
Prerequisites: Take MA 301 or CSC 215; Minimum grade C-.
Offered: Every other year, Spring
- MA 318. Cryptography (CSC 318).** **3 Credits.**
Students study methods of transmitting information securely in the face of a malicious adversary deliberately trying to read or alter it. Participants also discuss various possible attacks on these communications. Students learn about classical private-key systems, the Data Encryption Standard (DES), the RSA public-key algorithm, discrete logarithms, hash functions and digital signatures. Additional topics may include the Advanced Encryption Standard (AES), digital cash, games, zero-knowledge techniques and information theory, as well as topics chosen by the students together with the instructor for presentations.
Prerequisites: Take MA 229 or CSC 215. Minimum grade C-.
Offered: Every other year, Spring
- MA 321. Abstract Algebra.** **3 Credits.**
This course presents a study of topics selected from groups, normal groups, rings, ideals, integral domains, fields, polynomial rings and isomorphism theorems.
Prerequisites: Take MA 229, MA 301; Minimum grade C-.
Offered: Every year, Spring
- MA 341. Advanced Calculus.** **3 Credits.**
The concepts of limit, continuity, differentiation and Riemann integration are studied in depth. Also considered are sequences and series, improper integrals, and Riemann-Stieltjes Integral.
Prerequisites: Take MA 152 or MA 153; and MA 301 Minimum grade C-.
Offered: Every year, Fall
- MA 351. Real Analysis.** **3 Credits.**
This course examines the theoretic foundations of continuity, differentiation and integration at a more abstract level than MA 341. The class reinforces and further expands on proof techniques covered in MA 301. Topics include: convergence of sequences and series, construction of the real number system, metric spaces, dense sets, continuity, compactness, connectedness, differentiation, Riemann-Stieltjes Integral and sequences of functions. Students who wish to pursue graduate studies in mathematics are strongly encouraged to take this class. It is recommended that students take MA 341 before attempting this class.
Prerequisites: Take MA 142 or MA 152 and MA 301; Minimum grade C-.
Offered: Every other year, Spring
- MA 365. Ordinary Differential Equations.** **3 Credits.**
Students are introduced to standard methods for solving ordinary differential equations, including Laplace transforms as well as singular solutions, series solutions and the system of linear differential equations. Existence and uniqueness theorems also are introduced, as are geometrical interpretation and applications. Students cannot receive credit for both MA 265 and MA 365.
Prerequisites: Take MA 152 or MA 154; and MA 229; Minimum grade C-.
Offered: Every other year, Fall

- MA 370. Number Theory.** **3 Credits.**
Topics include representation of integers, primes, the Fundamental Theorem of Arithmetic, divisibility, modular arithmetic, Fermat's Little Theorem and Euler's Theorem, perfect numbers, and Diophantine equations. Additional topics may include quadratic residues, sums of squares, and Fermat's Last Theorem.
Prerequisites: take 1 course; from subject MA; from level 300; Minimum grade C-.
Offered: Every other year, Spring
- MA 371. Mathematical Statistics and Probability I.** **3 Credits.**
This course covers foundations of probability, random variables and select probability distributions with applications. Topics include sample spaces and events; conditional probability; independence; expected value, variance and other moments; joint densities; and probability distributions including the normal, Poisson, Binomial and other distributions.
Prerequisites: Take MA 251 MA 301; Minimum grade C-.
Offered: Every other year, Fall
- MA 372. Mathematical Statistics and Probability II.** **3 Credits.**
Students are introduced to general principles of estimation and testing hypotheses; small sample distributions; regression and correlation; design of experiments and analysis of variance; nonparametric techniques; and other methods.
Prerequisites: Take MA 371; Minimum grade C-.
Offered: Every other year, Spring
- MA 378. Mathematical Modeling.** **3 Credits.**
Students develop mathematical models for problems in biology, environment, health sciences and politics.
Prerequisites: Take MA 141, MA 141H or MA 151 and MA 229; Minimum grade C-.
Offered: Every other year, Fall
- MA 399. Independent Study in Mathematics.** **1-6 Credits.**
This individual study in a specialized area is open to juniors and seniors by special arrangement with the department chairman. This is a structured program of reading, problem solving and experiments established through conferences with a member of the mathematics faculty. Graded by examination or term project.
Offered: As needed, Spring
- MA 421. Advanced Algebra.** **3 Credits.**
Advanced topics in algebra include Sylow theorems (groups), field extensions, and Galois theory. If time permits, Jordan form of matrices, modules, and introduction to category theory are included.
Prerequisites: Take MA 321; Minimum grade C-.
Offered: As needed, Spring
- MA 451. Elements of Point-Set Topology.** **3 Credits.**
Open sets, closed sets and topological spaces are considered. Also covered are connectedness and compactness, functions, limit points and continuity. Metric spaces are introduced as well as completeness and the Heine-Borel property. Construction of real numbers is introduced.
Prerequisites: Take MA 341; Minimum grade C-.
Offered: As needed
- MA 490. Mathematics Senior Seminar.** **3 Credits.**
Students work on a senior-level project, culminating in a written and oral report. For senior mathematics majors.
Offered: Every year, Spring
- MA 499. Independent Study in Mathematics.** **1-6 Credits.**
This individual study in a specialized area is open to juniors and seniors by special arrangement with the department chairman. This is a structured program of reading, problem solving and experiments established through conferences with a member of the mathematics faculty. Graded by examination or term project.
Offered: As needed, Spring
- MA 521. Algebraic Reasoning.** **2 Credits.**
Students apply proof-based reasoning in the context of different algebraic systems, including groups, rings and fields. Specific examples include finite fields and matrix rings, as well as the real and complex numbers. Emphasis is placed on the interplay between axiomatic algebra and the existence and solution of algebraic equations.
Offered: Every year, Summer
- MA 522. Analytic Reasoning.** **2 Credits.**
Students explore properties of the real numbers and functions of real numbers based on the completeness axiom, including continuity in the context of powers and roots, exponentials and logarithms, and the trigonometric functions. Definitions and properties of these functions are developed and proved, with an emphasis on their reliance on continuity.
Offered: Every year, Fall
- MA 541. Complex Variables.** **2 Credits.**
This course introduces students to the complex number system. Topics include historical development, arithmetic, algebraic operations, geometrical interpretations, solving polynomials. Emphasis is placed on viewing the field of complex numbers from multiple perspectives to see connections between geometry, algebra, and trigonometry.
Offered: Every year, Fall
- MA 580. Euclidean and Non-Euclidean Geometry.** **4 Credits.**
Students study concepts in Absolute, Euclidean and non-Euclidean geometries, including planar geometry, hyperbolic geometry, and spherical geometry. In particular, students explore topics which may include finite geometries, axiom systems, transformations and symmetries, analytic geometry, circles, triangles, quadrilaterals, the parallel postulate, Pythagorean Theorem, area and similarity.
Offered: Every year, Spring
- MA 583. Mathematics: Historical Insights.** **2 Credits.**
Students explore mathematics from various historical perspectives. In particular, they investigate the contributions of ancient Babylonian, Egyptian and Persian cultures, and consider the historical methods of solving quadratic and cubic equations, as well as development of the calculus.
Offered: Every year, Summer

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).

- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for a BA in Mathematics

A minimum of 60 credits is required for transfer into the BA in Mathematics. Below is a recommended plan of study for first two years prior to matriculation at Quinnipiac University.

If a student begins their studies at a level lower than Calculus 1 (for instance, MAT 186) it is recommended that they take summer classes to catch up by the end of the spring semester of their second year. Classes numbered below MAT 210 may transfer in as general college credit, but would not apply toward the Mathematics major.

Bachelor of Arts in Mathematics

Program Contact: Cornelius Nelan (cornelius.nelan@qu.edu)
203-582-8003

The power of mathematics lies in its focus on precise and logical reasoning to draw conclusions and make discoveries in many domains, both abstract and concrete.

The idea of mathematics as a process of carrying out procedures and following rules to produce a single right answer is a misconception. At the college level, the discipline is fully realized as a way of thinking, which can be applied in almost any context, wherever the basis for what is true or false can be understood while minimizing fuzziness or ambiguity.

The starting point in mathematics is not a large body of facts, but is instead a small number of ideas that are made precise and thoroughly understood. Mathematical knowledge is built from these in a way that gives us access to the steps that form the logical basis for why something makes sense.

Times have changed. We live in a world where decisions need to be justified with data and conclusions need to be quantified. To be effective, we must critically evaluate judgments based on data and quantifiable observations, and present arguments in a logical fashion. Presenting conclusions alone is not enough; they must be explained in a way that convinces others, supported by sound logical reasoning. This kind of argument is the focus of mathematics.

Ultimately, mathematics builds our ability to create new knowledge, justify new conclusions, and make new discoveries in any realm where logical thought yields power—which is to say, just about everywhere.

Consequently, the study of mathematics will better enable you to succeed in other disciplines, from chemistry to political science to sociology, at a more advanced level. This is also why mathematics majors find careers doing advanced work in consulting, government, analytics, engineering, education and other important fields.

BA in Mathematics Curriculum

Students majoring in mathematics must meet the following requirements for graduation. Note: A C- or better is required for all departmental prerequisites, unless otherwise stated. Students are required to maintain a GPA of 2.0 or better for all courses used to fulfill the mathematics major.

Code	Title	Credits
University Curriculum ¹		46

¹ All students must complete the University Curriculum (p. 51) requirements.

While students must consult with their major adviser in planning a course of study, the department provides the following recommendations.

- Students interested in **teaching** must take MA 285 or MA 371.
- Students interested in **statistics** should consider:

Code	Title	Credits
MA 371	Mathematical Statistics and Probability I	3
MA 372	Mathematical Statistics and Probability II	3
MA 378	Mathematical Modeling	3

- Students interested in **Actuarial Studies** should take MA 371, MA 372, and MA 378. CSC 110 is also recommended along with a Minor in Finance (p. 338) or Business (p. 356).

Code	Title	Credits
MA 285	Applied Statistics	3

MA 372	Mathematical Statistics and Probability II	3
MA 378	Mathematical Modeling	3
EC 111	Principles of Microeconomics	3
AC 211	Financial Accounting	3
CSC 110	Programming and Problem Solving	3

Also possibly consider:

EC 112	Principles of Macroeconomics	3
FIN 201	Fundamentals of Financial Management	3
FIN 310	Investment Analysis	3

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Students graduating with a major in mathematics will demonstrate the following competencies:

- Application:** Apply the fundamental concepts of calculus and linear algebra to solve both abstract and applied problems.
- Communication:** Communicate mathematics effectively, both orally and in writing.
- Collaboration:** Collaborate effectively to understand and solve mathematical problems.
- Abstraction:** Recognize and describe abstractions that unify mathematical structures and problems.
- Appreciation:** Articulate an understanding of the nature and value of mathematics and the unique epistemology of the subject.
- Technology:** Apply appropriate technology in exploring mathematical concepts and solving mathematical problems.
- Independence:** Independently investigate and acquire mathematical knowledge and formulate strategies to solve mathematical problems.
- Analysis:** Read and judge the validity of mathematical proofs and write proofs that are clear and valid.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Bachelor of Science in Data Science

Program Contact: Jill Shahverdian (Jill.Shahverdian@qu.edu)
203-582-3663

The BS in Data Science program teaches students to analyze data, interpret data and draw meaningful conclusions. Students learn the mathematical and statistical foundations of data science and how those

principles may be applied to cutting-edge tools and technology. Our project-based courses provide the opportunity for students to use the analytic skills and technical knowledge of data science to investigate a question in their minor (or second major).

Glassdoor has ranked data scientist as the best job in America for four consecutive years. Opportunities requiring this skill set develop across nearly all industry sectors including finance and insurance, health care and social assistance, manufacturing, professional, scientific and technical services, and retail trade.

BS in Data Science Curriculum

Students majoring in Data Science must meet the following requirements for graduation. Note: a C- or better is required for all program prerequisites, unless otherwise stated. Students are required to maintain a GPA of 2.0 or better for all courses used to fulfill the Data Science major.

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
DS Core		
CSC 110 & 110L	Programming and Problem Solving and Programming and Problem Solving Lab	3-4
	or CSC 106 Introduction to Programming for Engineers	
DS 110	Introduction to Data Science	3
DS 201	Introduction to Python	1
DS 210	Algorithms for Data Science	4
DS 380	Data Mining	3
DS 385	Machine Learning	3
DS 480	Data Science Capstone	3
EC 365	Econometrics	3
MA 151	Calculus I	4
MA 229	Linear Algebra	3
MA 285	Applied Statistics	3
	or EC 272 Advanced Applied Statistics	
DS Electives (Take two courses from the following list)		6-8
DS 215	Communicating with Data	
DS 325	Database Systems	
DS 350	Big Data	
EC 366	Advanced Econometrics	
MA 153 & MA 154	Calculus II: Part A and Calculus II: Part B	
MA 251	Calculus III	
Minor Courses ²		18
Free Electives		11-14
Total Credits		120

¹ All students must complete the University Curriculum (p. 51) requirements.

² Students enrolled in the Bachelor of Science in Data Science program are required to complete a minor (typically 18 credits) to complement the knowledge and skills developed in the major. Students may select

a minor from any program within or outside of the College of Arts and Sciences.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the Data Science degree, students will

- **Have a deep understanding** of the mathematical, statistical and computer science concepts necessary for data science.
- **Understand** the technology stack necessary to bring quantitative analysis to production in any industry or academic setting.
- **Utilize** complicated data and advanced machine learning models to solve real-world problems—whether that is predicting customer retention or identifying the impact of rain on floodplain soil conditions.
- **Leverage** these skills and expertise in a chosen domain (e.g., biology, business, economics, history, psychology).

Minor in Mathematics

Program Contact: Cornelius Nelan
(Cornelius.Nelan@qu.edu) 203-582-8003

Mathematics is a universal language that is essential in the natural and social sciences, business and engineering. This minor gives you more than just a way to fine-tune specific mathematical skills; it also offers an opportunity to strengthen your logic, reasoning and problem-solving capabilities.

In the mathematics minor, courses in advanced statistics teach you to analyze complex data and perform high-level research, while cryptography courses provide an introduction to the world of securing data and IT security. Geometric concepts apply as much to set design and the visual arts as they do to architecture and civil engineering. Students develop expertise that is applicable in nearly every field, from computer science and finance to education and healthcare, and obtain tools that provide a competitive advantage.

To complete a minor in mathematics, a student is required to complete 18 credits of mathematics classes.

Mathematics Minor Curriculum

Code	Title	Credits
Six credits of Calculus at the level of 141 or above		6
MA 229	Linear Algebra	3
Select three electives in consultation with the department chairperson ¹		9
Total Credits		18

¹ At least one of the three electives must be at the 300 level. Courses numbered below MA 141 may be approved at the discretion of the

department chairperson. Students are required to maintain a GPA of 2.0 or better for all courses used to fulfill the mathematics minor.

Minor in Applied Statistics and Data Science (ASDS)

Program Contact: Jill Shahverdian (jill.shahverdian@qu.edu)
203-582-3663

The minor in Applied Statistics and Data Science is available to a student in any major. The six required courses are designed to develop students into critical consumers of data, who can work with data and present data in a way that tells a story, enabling effective decision-making and problem solving. Critical thinkers who can analyze data to help solve organizational problems are already in high demand and future growth is predicted to be robust.

Students who complete this minor will have a toolkit they can use in their daily lives, which can be applied to any field of study or career path.

Applied Statistics and Data Science Minor Curriculum

The minor in Applied Statistics and Data Science requires six courses. Students are required to maintain a GPA of 2.0 or better for all courses used to fulfill the ASDS minor.

Code	Title	Credits
DS 110	Introduction to Data Science	3
EC 365	Econometrics	3
Select one of the following:		3-4
MA 141	Calculus of a Single Variable	
MA 151	Calculus I	
MA 170	Probability and Data Analysis	
Select one of the following:		3
EC 272	Advanced Applied Statistics	
MA 206	Statistics for the Behavioral Sciences	
MA 275	Biostatistics	
MA 285	Applied Statistics	
PS 206	Introduction to Statistics in Psychology	
Two courses chosen in consultation with the program director		6
Total Credits		18-19

Department of Modern Languages, Literatures and Cultures

The Department of Modern Languages, Literatures and Cultures offers a major in Spanish Language and Cultures and minors in Italian and Spanish. Students can also explore a treasure trove of other languages at the introductory (and, in some cases, through to the intermediate) level in American Sign Language, Arabic, Chinese, French, German, Hebrew, Japanese and Polish.

The study of modern languages, along with the literatures and cultures associated with them, is valuable both personally and professionally.

Students develop effective communication skills as well as cultural critical thinking and knowledge commensurate with the level of study achieved. In this way, the Department of Modern Languages, Literatures and Cultures importantly contributes to the educational foundation for a changing world of diverse cultures and people.

Language Placement

Students who continue the study of a modern language begun prior to college must take a placement exam to be placed at the course level for which they qualify. For more information please visit cas360.qu.edu/ (<https://cas360.qu.edu/>) and search for "Language Placement Exam."

Study Away

Study away is encouraged for all students, especially those majoring in Spanish or minoring in Italian or Spanish. Quinnipiac facilitates wonderful opportunities for study away and accepts relevant credit from colleges and universities abroad. Please visit the Study Abroad page (p. 50) for additional information.

The mission of the Department of Modern Languages, Literatures and Cultures is to help students develop effective communication skills and cultural critical thinking and knowledge in their chosen language of study. Students thus build a strong educational foundation to thrive as global citizens whose minds are opened to new ways of thinking, communicating and perceiving the world in all of its rich multidimensionality.

- Bachelor of Arts in Spanish Language and Cultures (p. 238)
- Minor in Italian (p. 240)
- Minor in Spanish (p. 241)
- Spanish Language for Medical Professionals Certificate (p. 241)

Arabic (ARB)

ARB 101. Elementary Arabic I. 3 Credits.

This course introduces students to the Modern Standard Arabic (MSA) language and to cultures of the Arabic-speaking world. Students develop accuracy and fluency in pronunciation and writing of Arabic letters, comprehension of basic vocabulary and language structures, the ability to use culturally appropriate social greetings and other expressions, as well as the basics of grammar. Students further acquire insights into the culture and diversity of the Arabic-speaking world.

Offered: Every year, Fall and Spring

UC: Breadth Elective

ARB 102. Elementary Arabic II. 3 Credits.

This course is a continuation of Arabic 101.

Prerequisites: Take ARB 101.

Offered: Every year, Fall and Spring

UC: Breadth Elective, University Curriculum Ele

ARB 201. Continuing Elementary Arabic III. 3 Credits.

This course is a continuation of the study of Modern Standard Arabic. Students further develop their listening comprehension, speaking, reading and writing abilities, and their understanding of the cultures of the Arabic-speaking world.

Prerequisites: Take ARB 102.

Offered: As needed

UC: Breadth Elective, University Curriculum Ele

ARB 210. Arab Culture and Society. 3 Credits.

This course examines the historical, social, religious, cultural and artistic aspects of the modern Arab world. Students are exposed to traditions and customs of the Arabs in the Modern Middle East. Additionally, they become familiar with the diversity of the region and gain knowledge of the history and development of Arabic culture from the classical period to the present and the major cultural institutions of the Arabic-speaking world. The course provides students with a view of the cultural contours of the modern Arab world and the richness of the Arab cultural heritage.

Offered: As needed

UC: Humanities, Intercultural Understand

ARB 299. Independent Study: Advanced Arabic. 3 Credits.

The subject varies based on faculty and student interests.

Chinese (CN)

CN 101. Elementary Chinese I. 3 Credits.

This course is an introduction to Mandarin Chinese as a spoken and written language. Students develop reading, writing, oral comprehension and speaking ability in basic Chinese. Chinese culture, customs and business practice are introduced.

Offered: Every year, Fall

UC: Breadth Elective, University Curriculum Ele

CN 102. Elementary Chinese II. 3 Credits.

This course is a continuation of Chinese 101.

Prerequisites: Take CN 101.

Offered: Every year, Spring

UC: Breadth Elective, University Curriculum Ele

CN 201. Intermediate Chinese I. 3 Credits.

Grammar is enhanced for strengthening sentence patterns. Students are expected to communicate mostly in Chinese during class and write a longer essay for presentation. Students are exposed to everyday life topics, and cultural highlights increase understanding of current and past Chinese cultural phenomena.

Prerequisites: Take CN 102.

Offered: As needed

UC: Breadth Elective, University Curriculum Ele

CN 202. Intermediate Chinese II. 3 Credits.

This course is a continuation of CN 201.

Prerequisites: Take CN 201.

Offered: As needed

UC: Breadth Elective, University Curriculum Ele

CN 210. Chinese Culture and Civilization. 3 Credits.

This course introduces students to Chinese culture and civilization across time and regions. It provides an overview for students to grasp the important cultural concepts and to understand the great inventions created by China. Subjects include food and cuisine, traditional clothes, architecture and scenery, festival celebrations, Chinese arts, literature and proverbs, traditions and taboos, religious beliefs, and Chinese medicine. The course is conducted in English and does not require prior knowledge of Chinese.

Prerequisites: Take EN 101 EN 1011 or EN 103H.

Offered: As needed

UC: Humanities, Intercultural Understand

CN 215. Virtual Internship in China. 3 Credits.

Students across all majors are welcome to apply. Students obtain valuable work experience not available in a classroom setting, as well as the opportunity to acquaint themselves with a field of interest to them. Step outside the classroom and immerse yourself in real work experiences in a multicultural environment. Knowledge of the Chinese language is not a requirement. There is a program fee for this internship. Please contact Prof. Cher Lin for more information

Offered: As needed

CN 220. Art of War for Business Strategies and Leadership. 3 Credits.

"If you know the enemy and know yourself, you need not fear the result of a hundred battles. If you know yourself but not the enemy, for every victory gained you will also suffer a defeat. If you know neither the enemy nor yourself, you will succumb in every battle" (Sun Tzu). This course introduces The Art of War by interpreting first Sun Tzu's original words, highlighted with the historical warfare events. Students examine the application of business strategies on the fields of business, commerce and industries. The principles of how to build great leadership and interpersonal skills from Sun Tzu's wisdom are outlined and introduced. The practice for employing the doctrines of The Art of War from many different business firms and industries worldwide are also referred to as examples. Based on Sun Tzu's wisdom and The Art of War's doctrines, students can transfer the knowledge from the battlefield to business management and communication. Moreover, students benefit from learning Chinese politics, language, culture and history.

Offered: As needed

CN 230. Chinese Health Regimens. 3 Credits.

This course is taught in English. It introduces how to balance Yin and Yang, and nourish the three treasures (Essence, Qi and Spirit) in a human body from the theories of relaxation, exercises, fengshui (geomancy), massage and food therapy. Students learn how healthier body and living styles can be cultivated according to the rhythm of various seasons, solar terms and even different hours in a day. It is a preventive way for caring for life, maintaining both physical and psychological health, preventing and curing diseases as well as promoting longevity.

Offered: As needed

French (FR)

FR 101. Elementary French I. 3 Credits.

This introduction to the French language focuses on oral practice, basic grammar study, reading, and writing. Cultural practices and traditions of the French-speaking world are also presented. Students who have three or more years of high school French with grades of B or above may not take this course for credit.

Offered: Every year, Fall and Spring

UC: Breadth Elective, University Curriculum Ele

FR 102. Elementary French II. 3 Credits.

This course is a continuation of FR 101.

Prerequisites: Take FR 101 or placement into FR 102.

Offered: Every year, Fall and Spring

UC: Breadth Elective, University Curriculum Ele

FR 201. Intermediate French I. 3 Credits.

This course is for students who wish to develop further their ability to read, write and speak French. Reading is drawn from a wide variety of fictional works and forms (short story, plays, and poems) on topics of general interest. Students also broaden their knowledge of the French-speaking world to expand their ability to make cross-cultural comparisons.

Prerequisites: Take FR 102 or placement into FR 201.

Offered: Every year, Fall

UC: Breadth Elective, University Curriculum Ele

FR 202. Intermediate French II. 3 Credits.

This course is a continuation of FR 201.

Prerequisites: Take FR 201.

Offered: Every year, Spring

UC: Breadth Elective, University Curriculum Ele

FR 299. Independent Study. 3 Credits.

By special arrangement with instructor and with approval of department chair.

Offered: As needed, All

FR 301. Advanced French I. 3 Credits.

Students examine selections from modern French literature, based on shorter prose works. Basic language skills are reinforced and critical skills are introduced. Culture is also integrated with language using a wide variety of sources.

Prerequisites: Take FR 202 or placement into FR 301.

Offered: As needed, Fall

UC: Breadth Elective

FR 302. Advanced French II. 3 Credits.

This course is a continuation of FR 301.

Prerequisites: Take FR 301.

Offered: As needed, Spring

UC: Breadth Elective, University Curriculum Ele

FR 399. Independent Study. 3 Credits.

By special arrangement with instructor and with approval of department chair.

Offered: As needed

German (GR)

GR 101. Elementary German I. 3 Credits.

This introduction to the German language includes oral practice, the study of basic grammar, and practice in reading and writing. Cultural practices, artifacts, and traditions provide a focal point for application of grammar and vocabulary. Students who have three or more years of high school German with grades of B or above may not take this course for credit.

Offered: Every year, Fall

UC: Breadth Elective, University Curriculum Ele

GR 102. Elementary German II. 3 Credits.

This course is a continuation of GR 101.

Prerequisites: Take GR 101 or placement into GR 102.

Offered: Every year, Spring

UC: Breadth Elective, University Curriculum Ele

GR 210. Introduction to German Culture. 3 Credits.

This course taught in English offers an introduction to important historical events, figures, movements and ideas that have shaped the culture of German-speaking countries. Students learn about aspects of daily life, traditions, philosophical movements, and cultural artifacts in architecture, literature, art, film and music.

Prerequisites: Take EN 101.

Offered: As needed

UC: Humanities, Intercultural Understand

Hebrew (HBR)

HBR 101. Introduction to Modern Hebrew. 3 Credits.

This is an introductory course in modern Hebrew. Students begin to achieve basic proficiency in reading, writing, speaking and comprehending modern Hebrew. Culture is integrated with language using a wide variety of sources. Students are introduced to the Hebrew alphabet and use Hebrew script. They learn elementary conversational skills and basic Hebrew grammar.

Offered: Every year, Fall

UC: Breadth Elective, University Curriculum Ele

HBR 102. Introduction to Elementary Modern Hebrew II. 3 Credits.

This course is a continuation of Hebrew 101. Students review and expand their grammatical study leading to deeper comprehension of style and usage. Students learn the fundamentals of grammar and syntax as well as idioms and special expressions. Emphasis is given to all four communicative skills (speaking, reading, listening and writing). The semester covers the study of the present tense, basics of the past tense, and some of the future tense in most of the conjugation models as well as numbers, colors, and daily life situations, etc. Culture is also integrated into the course as students learn the language.

Prerequisites: Take HBR 101.

Offered: Every year, Spring

UC: Breadth Elective, University Curriculum Ele

HBR 115. Basic Jewish Literacy. 3 Credits.

The purpose of this course is to introduce, explain and educate students of all faiths about the basic tenets of Judaism. Upon completion of the course, students will acquire an understanding of the Hebrew alphabet, fundamental Judaic beliefs, the Torah, Modern Israel, and more. This course does not fulfill the CAS language requirement.

Offered: As needed, Spring

HBR 210. Biblical Interpretation. 3 Credits.

This interdisciplinary course introduces students to the religious life and thought of ancient Israel through exploration and close readings of the Hebrew Bible, the Old Testament. Using the biblical interpretive tool of Midrash, students gain a deeper appreciation for the words of scripture.

Italian (IT)

IT 101. Elementary Italian I. 3 Credits.

This course is designed for students who have no previous knowledge of Italian. The course includes instruction and practice in all four language skills: speaking, reading, writing and listening comprehension, with emphasis on communication and oral proficiency. In addition, students explore aspects of Italian life and culture. Students who have three or more years of high school Italian with grades of B or above may not take this course for credit.

Offered: Every year, Fall and Spring

UC: Breadth Elective, University Curriculum Ele

- IT 102. Elementary Italian II.** **3 Credits.**
This course is a continuation of IT 101.
Prerequisites: Take IT 101 or placement into IT 102.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele
- IT 200. Italian: Special Topics.** **3 Credits.**
Taught in English.
Prerequisites: Take EN 101.
Offered: As needed
- IT 201. Intermediate Italian I.** **3 Credits.**
This third-semester course includes instruction and practice in all four language skills: speaking, reading, writing and listening comprehension, with emphasis on communication and oral proficiency. In addition, students explore aspects of Italian life and culture through analysis of selected authentic readings and films.
Prerequisites: Take IT 102 or placement into IT 201.
Offered: Every year, Fall
UC: Breadth Elective, University Curriculum Ele
- IT 202. Intermediate Italian II.** **3 Credits.**
This course is a continuation of Italian 201.
Prerequisites: Take IT 201 or placement into IT 202.
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Ele
- IT 210. Italy: A Journey Through its Food, History and Culture (in Eng.).** **3 Credits.**
The study of Italian food—examined from a literary, historical, socioeconomic, political and environmental perspective—guides students' exploration of Italian culture. Starting with ancient Rome, students study how the production, preparation and consumption of food have given shape to Italian identity, drawing from representative literary, artistic and historical works, as well as scholarly sources. Finally, Italian food culture is considered in relation to contemporary issues such as globalization and sustainability. Taught in English.
Prerequisites: Take EN 101.
Offered: Every other year, Spring
UC: Humanities, Intercultural Understand
- IT 211. Italian Cinema (in Eng.).** **3 Credits.**
The study of Italian cinema and its main movements and periods guides students' exploration of Italian culture. From the postwar era to the hyper-contemporary, students study the most representative films of Italian cinema in order to analyze the ways in which cultural and national identity have been portrayed and typified by filmmakers representing a variety of cinematic and historical periods and genres. Taught in English.
Prerequisites: Take EN 101.
Offered: Every other year, Spring
UC: Fine Arts, Intercultural Understand
- IT 212. Florence and the Making of the Renaissance (in Eng.).** **3 Credits.**
This course explores a time—the Renaissance—and a place—Florence—in which many defining features of modernity first took shape and became object of critical thinking. Students examine major authors and genres, from short fiction and poetry to political and scientific treatises, and contextualize them within the artistic, political and social framework of their time. Topics include critical perspectives on notions of the individual and community, as well as their interplay with questions of social status, gender and sexuality; Florence as proto-capitalist society and the emergence of modern banking; education and artistic expression as forms of empowerment and vehicles for social change. Taught in English.
Prerequisites: Take EN 101.
Offered: Every other year, Fall
UC: Humanities, Intercultural Understand
- IT 299. Independent Study.** **3 Credits.**
Offered: As needed
- IT 301. Advanced Italian I.** **3 Credits.**
This course develops oral and written language skills to a high degree of proficiency, while exploring major social and cultural trends in 20th-century Italy. Topics such as politics, popular culture, history and gastronomy are examined through authentic texts and a variety of media.
Prerequisites: Take IT 202 or permission of the instructor.
Offered: As needed
UC: Breadth Elective, University Curriculum Ele
- IT 302. Advanced Italian II.** **3 Credits.**
This course develops oral and written language skills to a high degree of proficiency, while exploring major social and cultural trends in contemporary Italy. Topics such as politics, popular culture, history and gastronomy are examined through authentic texts and a variety of media.
Prerequisites: Take IT 202 or permission of instructor.
Offered: Every other year, Spring
UC: Breadth Elective, University Curriculum Ele
- IT 316. Introduction to Italian Literature and Culture.** **3 Credits.**
This course explores the evolution of Italian literature from its origins to modern day, placing representative texts within an interdisciplinary perspective. Through response papers and presentations in the target language, students further perfect written and oral skills, and develop the necessary foundation for more advanced study in the target language.
Prerequisites: Take IT 202 or permission of the instructor.
Offered: As needed
- IT 320. Italy's Cities.** **3 Credits.**
This course explores the history, literature and visual art of Italy's cities and their unique contribution to Western civilization, while continuing to refine oral and written skills in the target language.
Prerequisites: Take IT 202 or permission of instructor.
Offered: As needed
- IT 399. Independent Study.** **3 Credits.**
Offered: As needed

Japanese (JP)

JP 101. Elementary Japanese I. 3 Credits.

This introduction to Japanese as a spoken and written language includes intensive drills in the basic structures of the language. Elementary reading materials are used for vocabulary building, analytical exercises and discussion. Students learn about Japanese culture, customs and business practices. Basic Japanese scripts are introduced concurrently with other skills.

Offered: Every year, Fall

UC: Breadth Elective, University Curriculum Ele

JP 102. Elementary Japanese II. 3 Credits.

This course is a continuation of JP 101.

Prerequisites: Take JP 101.

Offered: Every year, Spring

UC: Breadth Elective, University Curriculum Ele

JP 199. Independent Study. 3 Credits.

The subject varies based on faculty and student interests.

Offered: As needed, All

JP 201. Intermediate Japanese I. 3 Credits.

This course advances students' Japanese language foundation to the intermediate level by further developing their language skills. Students also learn about Japanese culture and customs.

Offered: As needed

UC: Breadth Elective

JP 202. Intermediate Japanese II. 3 Credits.

This course is a continuation of JP 201.

Prerequisites: Take JP 201;

Offered: As needed

UC: Breadth Elective

JP 210. Introduction to Japanese Culture. 3 Credits.

This course provides students with an overview of Japanese culture, including the history, arts, tradition, beliefs, customs, behaviors, society, food and other topics. Upon successful completion of the course, students possess a better understanding of Japan's culture and its people. Students expand their horizons with their new knowledge to understand a different culture and viewpoints. The course is conducted in English and does not require prior knowledge of Japanese.

Prerequisites: Take EN 101 or EN 103H

Offered: As needed

UC: Humanities, Intercultural Understand

JP 299. Independent Study. 3 Credits.

The subject varies based on faculty and student interests.

JP 499. Independent Study. 3 Credits.

The subject varies based on faculty and student interests.

Offered: As needed, All

Polish (POL)

POL 101. Elementary Polish I. 3 Credits.

This is an intensive Basic Polish course offered fully online. Students will learn basic expressions and grammar structures that will help them communicate and ask questions in the Polish language. Cultural topics covered include family, directions, city buildings, leisure time, restaurants, and cuisine.

Offered: As needed, Summer

UC: Breadth Elective

POL 102. Elementary Polish II. 3 Credits.

This is an intensive Basic Polish (102) course offered fully online. Students will learn basic expressions and grammar structures that will help them communicate and ask questions in the Polish language. Cultural topics covered include travel destinations, restaurants, foreign language acquisition, currency and prices, shopping, celebrations and festivals.

Prerequisites: Take POL 101.

Offered: As needed, Summer

UC: Breadth Elective

Spanish (SP)

SP 101. Elementary Spanish I. 3 Credits.

Spanish as a spoken and written language is introduced in this course, which includes intensive drills in the basic structures of the language. Elementary reading material is used for vocabulary building, analytical exercises, and discussion. Cultural practices and traditions of the Spanish-speaking world are also presented. Students who have three or more years of high school Spanish with grades of B or above may not take this course for credit.

Offered: Every year, Fall and Spring

UC: Breadth Elective, University Curriculum Ele

SP 101H. Honors Elementary Spanish I. 3 Credits.

Spanish as a spoken and written language is introduced in this course, which includes intensive drills in the basic structures of the language. Elementary reading material is used for vocabulary building, analytical exercises, and discussion. Cultural practices and traditions of the Spanish-speaking world are also presented. Students who have three or more years of high school Spanish with grades of B or above may not take this course for credit.

Offered: Every year, Fall and Spring

UC: Breadth Elective, University Curriculum Ele

SP 101L. Intensive Oral and Written Practice in Spanish. 1 Credit.

This course is a supplement to SP 101 and SP 102 but independent of these courses. It provides intensive practice in the areas of conversation, listening comprehension, reading, and writing. It is open to any student currently taking SP 101, SP 102 or those who have previously taken Spanish courses at the elementary level and are seeking to improve their Spanish skills. The course does not count toward fulfilling a language requirement, minor or major. It can be taken twice for credit during different semesters and is graded on a pass/fail basis.

Offered: As needed

SP 102. Elementary Spanish II. 3 Credits.

This course is a continuation of SP 101.

Prerequisites: Take SP 101 or placement into SP 102.

Offered: Every year, Fall and Spring

UC: Breadth Elective, University Curriculum Ele

- SP 105. Spanish for Health Professions. 3 Credits.**
 This course introduces the non-native Spanish-speaking student to basic vocabulary, phrases and cultural considerations necessary to communicate effectively with Spanish speakers in a clinical setting. The course prepares students to perform daily activities and tasks such as collecting and assessing a medical history, assessing health risks, making appointments with Spanish-speaking patients, and includes cultural content. No science or health science background is required. Additionally, there is no language prerequisite but students may find prior language learning experience useful. Students wishing to acquire general conversational skills or fluency in Spanish should enroll in traditional Spanish language classes.
Offered: As needed
UC: Breadth Elective
- SP 199. Independent Study in Spanish. 3 Credits.**
Offered: As needed
- SP 200. Special Topics in Spanish. 3 Credits.**
 The subject varies based on faculty and student interests.
Offered: As needed
- SP 201. Intermediate Spanish I. 3 Credits.**
 This course includes conversational practice and a review of grammar. Students develop the four language skills: listening, speaking, reading and writing. They also broaden their knowledge of the Spanish-speaking world to expand their ability to make cross-cultural comparisons.
Prerequisites: Take SP 102 or placement into SP 201.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele
- SP 201L. Intensive Oral and Written Practice in Intermediate Spanish. 1 Credit.**
 This course is a supplement to SP 201 and SP 202 but independent of these courses. It provides intensive practice in the areas of conversation, listening comprehension, reading, and writing. The lab is open to students currently taking SP 201, SP 202 or those who have previously taken Spanish courses at the intermediate level and are seeking to improve their Spanish skills. The course does not count toward fulfilling a language requirement, minor or major. It can be taken twice for credit during different semesters and is graded on a pass/fail basis.

 This course is a continuation of SP 201.
Prerequisites: Take SP 201.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele
- SP 203. Environmental Spanish (ENV 203). 3 Credits.**
 This course is taught in Spanish and introduces students to vocabulary related to nature, the environment, protecting the planet, and also to the lexicon necessary to discuss topics in environmental science and policy. Students acquire important historical and cultural environmental perspectives from various Hispanic countries to understand more precisely present-day perceptions and efforts related to conservation and sustainability. Environmental issues and concerns in Spanish-speaking nations are explored. No previous science or environmental studies background is required. It is open to any student who can speak Spanish either as a heritage language speaker or who has had at least three years of Spanish in high school or at least three semesters in college. Students with less than the Spanish minimum prerequisite should contact the professor for permission to join.
Offered: As needed
UC: Breadth Elective
- SP 205. Cultura Puertorriqueña. 3 Credits.**
 This course is taught in Spanish and introduces students to the rich and dynamic culture of Puerto Rico. Students develop a deeper understanding of artistic, economic, educational, health, historical, literary, political, religious, musical, folkloric, sports, social trends, and more. Students also gain deeper insights and perspectives about Puerto Rico's unique ethnic and linguistic diversity. The course combines readings, films, and discussions. It is open to any student who can speak Spanish either as a heritage language speaker or who has had at least three years of Spanish in high school or at least three semesters in college. Students with less than the Spanish minimum prerequisite should contact the professor for permission to join.
Offered: As needed
UC: Humanities, Intercultural Understand
- SP 210. The Culture and Civilization of Spain. 3 Credits.**
 This course is taught in English and introduces students to the rich and dynamic culture of Spain. Students develop a deeper understanding of artistic, economic, historical, literary, philosophical, political, religious and social trends. Students also gain deeper insights and perspectives with regard to Spain's unique ethnic and linguistic diversity.
Offered: As needed
UC: Humanities, Intercultural Understand
- SP 215. Spanish for Business. 3 Credits.**
 This course introduces students to basic vocabulary, grammar, phrases, and cultural perspectives necessary to communicate effectively with Spanish speakers in a business setting. Students practice conversational skills related to typical situations that business professionals encounter in the workplace. It is open to any student who can speak Spanish either as a heritage language speaker or who has had at least three years of Spanish in high school or at least three semesters in college. Students with less than the Spanish minimum prerequisite should contact the professor for permission to join.
Offered: As needed
UC: Breadth Elective
- SP 220. Legal Spanish. 3 Credits.**
 This course is designed to teach students the basic terminology and concepts necessary to communicate effectively with Spanish-speaking clients in a legal setting. Classes consist of grammar review, legal concepts and terminology, and an introduction to linguistic variations of Spanish in the United States, specifically, Connecticut. This course is open to any student who can speak Spanish either as a heritage language speaker or who has had at least three years of Spanish in high school or at least three semesters in college. Students with less than the Spanish minimum prerequisite should contact the professor for permission to join.
Offered: As needed

- SP 225. Cultura Cubana. 3 Credits.**
Cuban culture is diverse, complex, and truly fascinating. With many different influences throughout its history - Amerindian, European, and African - a particular national identity has emerged. Students learn about economics, politics, science, medicine, health care, technology, religion, music, and the history of the revolution since its inception. Students also gain insights about how the island has changed since the revolution of 1959 and what makes Cuba a country different from the rest of Latin America and the world. The course combines readings, films, and discussions. It is open to any student who can speak Spanish either as a heritage language speaker or who has had at least three years of Spanish in high school or at least three semesters in college. Students with less than the Spanish minimum prerequisite should contact the professor for permission to join.
Offered: As needed
- SP 226. Exploring Global Engagement through Language. 3 Credits.**
Students enrolled in this course will "cross" multiple borders through intentionally designed virtual engagement with language learners in Nicaragua. The course will begin with an exploration of the meaning of culture, as students collaboratively investigate their selves as cultured beings and consider the cultural communities to which they belong. The course will then introduce multiple frameworks, theories, historical contexts, best practices, and ethical considerations around the theme of global engagement and students will grapple with these concepts alongside their Nicaraguan counterparts. Through readings, case studies, discussions, individual and group activities - in both English and Spanish - students will gain a deeper understanding of the diverse perspectives on global engagement while simultaneously participating in a global engagement experience which uses language to build community and maintain strong global partnerships.
Offered: As needed
- SP 259. Spanish Elective. 3 Credits.**
Offered: As needed
- SP 289. Spanish Elective. 3 Credits.**
- SP 299. Independent Study. 3 Credits.**
Directed study in topics in Spanish language, culture or literature of special interest to the student.
Offered: As needed, All
- SP 300. Special Topics in Spanish. 3 Credits.**
The subject varies based on faculty and student interests.
Prerequisites: Take SP 302.
Offered: As needed
- SP 301. Advanced Spanish I. 3 Credits.**
This course is designed to help students develop their communication skills in listening, speaking, reading, and writing to a high degree of proficiency. Major grammatical structures are reviewed and reinforced. Culture is integrated with language using a wide variety of sources as students also learn about Hispanic cultures and global issues in greater depth.
Prerequisites: Take SP 202 or placement into SP 301.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele
- SP 301L. Intensive Oral and Written Practice in Advanced Spanish. 1 Credit.**
This course is a supplement to SP 301 and SP 302 but independent of these courses. It provides intensive practice in the areas of conversation, listening comprehension, reading and writing. It is open to students currently taking SP 301, SP 302 or those who have previously taken Spanish courses at the advanced level and are seeking to improve their Spanish skills. The course does not count toward fulfilling a language requirement, minor or major. It can be taken twice for credit during different semesters and is graded on a pass/fail basis.
Offered: As needed
- SP 302. Advanced Spanish II. 3 Credits.**
This course is a continuation of SP 301.
Offered: Every year, Fall and Spring
UC: Breadth Elective, University Curriculum Ele
- SP 310. Spanish for Health Professions I. 3 Credits.**
This 7- week, online, asynchronous course designed for future and current health care professionals (doctors, emergency medical technicians, emergency responders, hospital administrators, medical assistants, nurses, nutritionists, physical therapists, physician assistants, pre-dental medicine/dentists, pre-medicine/medicine, social workers, and others) at all levels in their education with post-intermediate knowledge of Spanish. Students review grammatical structures needed to interact effectively with patients, acquire intercultural awareness, and learn essential medical and technical terminology while engaging in rigorous practice in reading, writing, speaking, and listening with the goal of providing better health care for Spanish-speaking patients. The need for health care professionals with the ability to interview patients, record medical histories, discuss diagnoses, prognoses, treatments, and more in a culturally sensitive way continues to increase. This course is conducted in Spanish. Post-intermediate knowledge of Spanish is required. SP 301 or permission of program contact.
Offered: As needed, Summer
- SP 311. Spanish for Health Professions II. 3 Credits.**
This 7- week, online, asynchronous course is the continuation of SP 310 that targets a wide variety of current and future health care professionals who understand the urgent need to learn medical Spanish to provide inclusive and quality care to Spanish-speaking patients.
Offered: As needed, Summer
- SP 312. Advanced Conversation. 3 Credits.**
This course is designed to improve oral skills for non-native speakers. Students enlarge and enrich their vocabulary through meaningful practice. They also learn tools for conversational management such as initiating and ending exchanges and changing topics. Students additionally develop knowledge of culturally relevant content that leads to the principal focus on speaking. SP 312 can be waived for students proficient in conversation who should then take another 300-level Spanish course.
Prerequisites: Take SP 302.
Offered: As needed
UC: Breadth Elective, University Curriculum Ele
- SP 317. Approaches to Literary Genres. 3 Credits.**
This course, taught in Spanish, is designed to familiarize students with general approaches to literature: how to read/talk about a poem as opposed to a play, etc. Students read and discuss, in Spanish, works from various genres.
Prerequisites: Take SP 302.
Offered: As needed

- SP 321. Masterpieces of Spanish Literature. 3 Credits.**
Major literary productions of Spain are studied, including works by or selections from Lazarillo de Tormes, Garcilaso, Cervantes, Galdos and Lorca.
Prerequisites: Take SP 302.
Offered: As needed
- SP 328. Spanish American Literature from the Conquest to 1880. 3 Credits.**
Representative selections of Spanish-American literature from its origins to "Modernismo" are studied. Works of poetry, prose fiction, theater, and the essay are analyzed by a diverse range of the periods' writers are analyzed.
Prerequisites: Take SP 302.
Offered: As needed
- SP 329. Spanish American Literature from 1880 to Present. 3 Credits.**
Representative selections of Spanish American writings since "Modernismo" are studied. Works of poetry, fiction and drama are analyzed in terms of their sociopolitical contexts as well as in terms of the dominant literary movements of the period.
Prerequisites: Take SP 302.
Offered: As needed
- SP 335. Nineteenth-Century Literature of Spain. 3 Credits.**
The romantic, realist and naturalist movements are studied.
Prerequisites: Take SP 302.
Offered: As needed
- SP 343. Culture of Spain. 3 Credits.**
This course focuses on broad themes of politics, history, literature, philosophy, regional languages, religion, education, the media, art, music, architecture, ethnic diversity and traditions of Spain. By examining the past and present, students gain deeper insights into the Spanish character and world view. Instruction of this course is in Spanish.
Offered: As needed
UC: Humanities
- SP 348. Spanish Drama and Poetry of the Golden Age. 3 Credits.**
This course focuses on readings and discussion of the works of Calderon de la Barca, Lope de Vega and contemporaries.
Prerequisites: Take SP 302.
Offered: As needed
- SP 351. The Modern Spanish Short Story. 3 Credits.**
The short story as a genre as well as 19th- and 20th-century Spanish and Latin American masterpieces of the short story are explored. Students engage in close literary and linguistic analyses and also consider cultural and historical contexts.
Prerequisites: Take SP 302.
Offered: As needed
- SP 370. History of the Romance Languages. 3 Credits.**
Students study the historical linguistic development of Spanish in comparison with the other Romance languages: Catalan, French, Italian, Portuguese, Rhetian, Sardinian and Romanian. Students also compare the modern dialects of Spanish.
Prerequisites: Take SP 302.
Offered: As needed, Fall
- SP 371. Survey of Spanish-American Literature. 3 Credits.**
This course explores Spanish-American literature from the time of the Conquest to the present.
Prerequisites: Take SP 302.
Offered: As needed, Fall
- SP 373. Latin American Cultures I. 3 Credits.**
Selected topics of Latin American cultures from their Spanish and pre-Columbian roots to the end of Independence are studied. Readings are drawn from history as well as literature. This course is taught in Spanish and open to any student who can speak Spanish either as a heritage language speaker or who has had at least three years of high school Spanish or at least three semesters in college. Students with less than the Spanish minimum prerequisite should contact the professor for permission to join.
Offered: As needed
- SP 374. Latin American Cultures II. 3 Credits.**
Selected topics of Latin American cultures from the end of Independence to the present are studied. Readings are drawn from history as well as literature.
Prerequisites: Take SP 302.
Offered: Every year, Spring
- SP 376. The Spanish Caribbean. 3 Credits.**
This course studies people, history and society as well as artistic and literary expression of Puerto Rico, Cuba and the Dominican Republic. Also, features of the Spanish language as spoken in the Caribbean are considered.
Prerequisites: Take SP 302.
Offered: As needed
- SP 399. Independent Study. 3 Credits.**
Directed study in topics in Spanish language, culture or literature of special interest to the student.
Offered: As needed, All
- SP 401. Advanced Spanish Grammar. 3 Credits.**
This culminating course, designed to increase and perfect the knowledge of students who possess a strong command of Spanish grammar, includes instruction in verb tense usage, sentence syntax, lexical choices and idiomatic usage. Exercises to solidify knowledge are used extensively.
Prerequisites: Take SP 302.
Offered: As needed
- SP 450. Senior Seminar. 3 Credits.**
This seminar is devoted to an in-depth study of Don Quijote de la Mancha. The novel is read, discussed and analyzed in terms of the sociopolitical context and in terms of the dominant literature of the period.
Prerequisites: Take SP 302.
Offered: Every year, Spring
- SP 500. Special Topics. 3 Credits.**
The subject varies based on faculty and student interests.
Offered: As needed
- SP 501. Spanish Grammar. 3 Credits.**
This intensive study of the Spanish language at the advanced level builds on students' prior knowledge of the forms and paradigms of Spanish. Students receive instruction in verb tense usage, sentence syntax, lexical choices, nuances of word order and idiomatic usage. Emphasis is placed on composition skills and clarity of expression. Exercises to solidify knowledge are used extensively.
Prerequisites: Take SP 302.
Offered: As needed

SP 510. Spanish for Health Professions I. 3 Credits.

This 7-week, online, asynchronous course is designed for future and current health care professionals (doctors, emergency medical technicians, emergency responders, hospital administrators, medical assistants, nurses, nutritionists, physical therapists, physician assistants, pre-dental medicine/dentists, pre-medicine/medicine, social workers, and others) with post-intermediate knowledge of Spanish. Students review grammatical structures needed to interact effectively with patients, acquire intercultural awareness, and learn essential medical and technical terminology while engaging in rigorous practice in reading, writing, speaking, and listening with the goal of providing better health care for Spanish-speaking patients. The need for health care professionals with the ability to interview patients, record medical histories, discuss diagnoses, prognoses, treatments, and more in a culturally sensitive way continues to increase. This graduate course is conducted in Spanish and requires the completion of a final project in consultation with the instructor.

Offered: As needed, Summer

SP 511. Spanish for Health Professions II. 3 Credits.

This 7-week, online, asynchronous course is the continuation of SP 510 that targets a wide variety of current and future health care professionals who understand the urgent need to learn medical Spanish to provide inclusive and quality care to Spanish-speaking patients. This course is conducted in Spanish and requires the completion of a final project in consultation with the instructor.

Offered: As needed, Summer

SP 517. Literary Genres. 3 Credits.

Literary genres and their manifestations in Spanish and Spanish-American literature are studied in depth in this course.

Offered: As needed

SP 528. Spanish-American Literature. 3 Credits.

This study of the major literary productions from Spanish America begins with the Conquest, continues through the Colonial period, Independence, modernism, and early 20th-century realism, and concludes with manifestations of late 20th-century experimentation.

Offered: As needed

SP 548. Golden Age Drama and Poetry. 3 Credits.

This study of the major dramatists and poets of the Siglo de Oro (16th and 17th centuries) of Spain covers Renaissance and Baroque styles. Major authors considered include Lope de Vega, Tirso de Molina, Calderón de la Barca, Garcilaso and Góngora.

Offered: As needed

SP 551L. Intensive Oral and Written Practice in Advanced Spanish for Teachers. 1 Credit.

Intensive oral and written practice to accompany a graduate MAT Spanish course. Students practice proficiency in Spanish at the Advanced-Low ACTFL OPI and WPT.

Offered: Every year, Spring

SP 552L. Intensive Oral and Written Practice in Advanced Spanish for Teachers. 1 Credit.

Intensive oral and written practice to accompany a graduate MAT Spanish course. Students practice proficiency in Spanish at the Advanced-Low ACTFL OPI and WPT.

Offered: Every year, Fall

SP 553L. Intensive Oral and Written Practice in Advanced Spanish for Teachers. 1 Credit.

Intensive oral and written practice to accompany a graduate MAT Spanish course. Students practice proficiency in Spanish at the Advanced-Low ACTFL OPI and WPT.

Offered: Every year, Summer

SP 570. The Modern Spanish Short Story. 3 Credits.

The short story as a genre as well as 19th- and 20th-century masterpieces written in Spain and Latin America are explored with close literary and linguistic analysis of each text and also consideration of its cultural context.

Offered: As needed

SP 571. The Romance Languages. 3 Credits.

This linguistics course examines the origins and development of Romance languages with particular attention to Spanish.

Offered: Every year, All

SP 576. The Spanish Caribbean. 3 Credits.

This course studies the peoples, history and society of Puerto Rico, Cuba and the Dominican Republic as well as their artistic and literary expression. Also, features of the Spanish language (semantics and grammar) as spoken in the Caribbean are examined.

Offered: As needed

SP 599. Independent Study. 1-6 Credits.

Directed study in topics in Spanish language, culture or literature of special interest to the student.

Offered: As needed, All

Bachelor of Arts in Spanish Language and Cultures

Program Contact: Aileen Dever (Aileen.Dever@qu.edu) 203-582-8500

The study of Spanish Language and Cultures offers a number of advantages. Students become proficient in oral and written Spanish and also learn about the rich cultural heritage, art, literature and history of Spain and Spanish-American countries. Students with language skills and international awareness are highly prized in the workplace.

The program has three components: Spanish language (written and oral); culture of Spain and Latin America; and major literary works in Spanish. A degree in Spanish helps to prepare students for successful careers that depend on facility with the language and familiarity with the culture and include fields such as communications, criminal justice, education, government, health care, international business, journalism, law, public relations and others. The Spanish major requires completion of 36 credits, with a grade of C or higher. At least 18 credits of the 36 credits required for the major must be completed on campus.

Double majors are encouraged.

Honor Society

The department rewards students who do outstanding work in Spanish language courses with membership in Sigma Delta Pi, the national Spanish language honor society.

BA in Spanish Language and Cultures Curriculum

Students majoring in Spanish Language and Cultures must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Spanish Core Requirements		
Written and oral fluency in Spanish:		
Complete the following or their equivalent:		9
SP 301	Advanced Spanish I	
SP 302	Advanced Spanish II	
SP 312	Advanced Conversation ²	
Cultural literacy, including a familiarity with Hispanic cultures and fine arts, historical and sociopolitical matters, and/or linguistics:		
Complete 12 credits in courses on Spanish culture or Spanish American culture taught in Spanish		12
Possible courses include:		
SP 343	Culture of Spain	
SP 370	History of the Romance Languages	
SP 373	Latin American Cultures I	
SP 374	Latin American Cultures II	
SP 376	The Spanish Caribbean	
SP 401	Advanced Spanish Grammar	
Knowledge of major works of literature written in Spanish:		
Complete 12 credits in courses on Spanish or Spanish-American literature taught in Spanish		12
Possible courses include:		
SP 317	Approaches to Literary Genres	
SP 321	Masterpieces of Spanish Literature	
SP 329	Spanish American Literature from 1880 to Present	
SP 328	Spanish American Literature from the Conquest to 1880	
SP 335	Nineteenth-Century Literature of Spain	
SP 348	Spanish Drama and Poetry of the Golden Age	
SP 351	The Modern Spanish Short Story	
SP 371	Survey of Spanish-American Literature	
Complete Senior Seminar		
SP 450	Senior Seminar	3
Free Electives		17-20
Total Credits		102-108

¹ All students must complete the University Curriculum (p. 51) requirements.

² This course might be waived for students with demonstrated proficiency in oral Spanish—those students would take 3 additional

credits in cultural literacy or knowledge of major works of literature written in Spanish.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the bachelor's degree in Spanish Language and Cultures, students will demonstrate the following proficiencies:

- 1. Oral and Written Communication:** Attain a high degree of linguistic proficiency in spoken and written expression. Students will achieve reading and writing literacy as well as oral and aural ability to communicate in Spanish.
- 2. Critical and Creative Thinking:** Re-envision new ways to think about themselves and the rich multi-dimensionality of the world in which they live.
- 3. Diversity Awareness and Sensitivity:** Demonstrate intercultural competency to interpret and address complex problems that require knowledge and understanding of diverse perspectives to work collaboratively and constructively with others. Students will acquire knowledge of the traditions as well as the ethnic and cultural backgrounds of Spanish-speaking peoples.
- 4. Analysis:** Evaluate ideas, sources and contexts to base arguments on evidence and reason. Students will be able to read and analyze a variety of recognized works of peninsular Spanish and Spanish-American literatures.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for BA in Spanish

A minimum of 60 credits is required for transfer into the BA in Spanish program. Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Course	Title	Credits
First Year		
Fall Semester		
English I		3
Elementary Spanish I		4
Elective		3
Elective		3
Elective		3
Credits		16

Total Credits	59-62

Quinnipiac encourages transfer students to consider studying abroad at Colegio Delibes in Salamanca, Spain, during the summer after the sophomore year. Students could take "Intensive Course A" for 5 weeks and 100 contact hours to transfer SP 301 and SP 302 to Quinnipiac, or could study for 4 weeks for credits for SP 301 only. For more information on this study-abroad opportunity, please contact Professor Aileen Dever (aileen.dever@qu.edu).

Minor in Italian

Program Contact: Filippo Naitana (Filippo.Naitana@qu.edu)
203-582-3334

The Italian minor offers a strong foundation in Italian language and culture, giving access to the country's extraordinarily rich tradition as well as the significant professional advantages of being proficient in a world language. In particular, it can open the door to careers in government, international business, fashion and design, the food and automotive industries and education. A distinct feature of the minor is the breadth of its curriculum, which includes full-immersion language courses at the beginning, intermediate and advanced levels, literature seminars taught entirely in Italian, and interdisciplinary courses such as "Florence and the Making of the Renaissance" and "Italy: A Journey Through its Food, History and Culture," which are taught in English.

You'll also have a wide variety of opportunities to explore Italian art and culture and hone your language skills through study abroad programs with our partners in Florence and Perugia, Italy. Quinnipiac will also coordinate internships and service-learning projects abroad for you at a range of sites: you could be learning about the international wine business at the Roccafiore Winery, helping teachers design English language workshops and curricula at a local high school, or perhaps gaining valuable management and marketing experience at a luxury textiles business thriving in the new global economy.

The minor consists of six courses, at least two of which must be at the 300 level.

Italian Minor Curriculum

The minor consists of six courses (18 credits), at least two of which must be at the 300 level. A grade of C or higher must be achieved in all courses for the minor. At least 9 credits must be taken on campus.

Minor in Spanish

Program Contact: Aileen Dever (Aileen.Dever@qu.edu) 203-582-8500

Spanish is the official language of 21 countries and territories, and is spoken by nearly half a billion people. Acquiring a basic foundation in Spanish can be a valuable asset in many fields, from business and education to government and healthcare. This program immerses students in the language, so they acquire a cultural understanding of Spanish-speaking people in the United States and around the world.

Students will have the flexibility to shape their minor and hone their language skills in electives that explore a broad range of topics. In addition to exploring subjects as varied as pre-Columbian civilizations and contemporary cultures, students can choose to study abroad in Spain or throughout Latin America. Some students opt for a semester program and others for intensive summer immersion at Colegio Delibes in Salamanca, Spain.

The minor in Spanish offers students a solid foundation in Spanish and a well-rounded entry to Spanish-speaking cultures with practical benefits in travel and work. The minor includes six courses (18 credits), all of which must be taught in Spanish. At least two of the six courses are required to be at the 300 level. A grade of C or higher must be achieved in all courses for the minor. At least 9 credits must be taken on campus. Eligible Spanish minors have the opportunity for induction into *Sigma Delta Pi*, the National Spanish Honor Society.

Spanish Language for Medical Professionals Certificate

Program Contact: Aileen Dever (Aileen.Dever@quinnipiac.edu) 203-582-8500

There is a critical need for healthcare professionals who are proficient in medical Spanish and culturally sensitive. Students will engage in intensive listening, speaking, reading and writing activities in Spanish at the post-intermediate level to acquire the medical terminology and cultural awareness to practice more ethical, inclusive patient care. This certificate was created in the belief that limited English should never be a barrier to receiving excellent and equitable care.

Students who complete the courses during their undergraduate or graduate program will earn a certificate in Spanish Language for Medical Professionals.

Department of Philosophy and Political Science

The Department of Philosophy and Political Science supports programs in philosophy and political science: each provides a balanced offering

of courses that offer both a broad overview of each discipline and the opportunity to focus more specifically in special topic areas. The department also is committed to experiential learning, and offers opportunities to study both philosophy and political science topics in ways that allow for a personal engagement with the topic area through study abroad, seminars in Washington, D.C., Service Learning courses and internship opportunities, and close collaboration with the Albert Schweitzer Institute at Quinnipiac.

In addition to majors, the department offers minors in philosophy and political science that are tailored to complement a student's major field of study, and supports a variety of multidisciplinary minor programs including women's and gender studies, the history and philosophy of science, international studies, Latin American studies, European Union studies, and Middle East studies.

The mission of the Department of Philosophy and Political Science is to develop educated students who are responsible for recognizing and respecting diverse worldviews, capable of evaluating systems of thought, oppression and power in communities, and motivated to engage in personal and social action.

Philosophy (PL)

PL 101. Introduction to Philosophy. 3 Credits.

This course introduces students to a number of central questions in philosophy through critical exploration of ideas from selected great philosophers. It engages students in the close study of several fundamental issues that have arisen in the course of the development of the philosophical tradition—such as free will, our knowledge of the "external" world, and the meaning and value of truth and justice—giving students the basic tools for further work in philosophy.

Offered: Every year, Fall and Spring

UC: Humanities

PL 102. Introduction to Ethics. 3 Credits.

This course explores the meanings of such normative distinctions as good/bad, right/wrong and good/evil. Students critically examine theories of morality such as egoism, utilitarianism, deontological ethics, divine command theory, natural law theory, sentimentalism and virtue ethics, as well as a challenge to all ethical theorizing: the case for moral relativism. Students focus on the practical implications of theory: understandings are brought to bear on various real-life ethical issues such as war, poverty, racism, abortion and substance abuse.

Offered: Every year, Spring and Summer

UC: Humanities

PL 102H. Honors Introduction to Ethics. 3 Credits.

This course explores the meanings of such normative distinctions as good/bad, right/wrong and good/evil. Students critically examine theories of morality such as egoism, utilitarianism, deontological ethics, divine command theory, natural law theory, sentimentalism and virtue ethics, as well as a challenge to all ethical theorizing: the case for moral relativism. Students focus on the practical implications of theory: understandings are brought to bear on various real-life ethical issues such as war, poverty, racism, abortion and substance abuse.

Offered: Every other year

UC: Humanities

PL 103. Logical Reasoning. 3 Credits.

This course teaches students to recognize and evaluate logical patterns that recur in all language intended to persuade by reason. Students learn proof techniques for logical pattern evaluation, techniques to recognize and evaluate fallacies, and ways of understanding logical patterns in longer, extended passages. The goal of the course is to improve students' natural ability to think clearly and critically by learning to apply logic to arguments in public, academic and private life.

Offered: Every year, Fall

UC: Humanities

PL 200. Special Topics in Philosophy. 3 Credits.

Offered: As needed

PL 214. Ancient Greek History (HS 214). 3 Credits.

"Ancient Greece" stretches chronologically from the third millennium BC until the 4th century BC and ranges geographically from modern day Turkey (what the Greeks called Ionia) to Sicily and the Italian peninsula (what the Romans called Magna Graeca). This course focuses on that part of Greek history that runs from the late Bronze Age period of Mycenaean Palace culture (approximately 1400 BC) to the end of the Peloponnesian Wars (in 404 BCE). The course emphasizes primary sources (such as literary sources and inscriptions) and challenges students to use primary sources as the basis for historical interpretations of the political, social, cultural, and intellectual institutions of ancient Greece, such as democracy, tyranny, slavery, tragedy, and philosophy. The course concludes with a role-playing Reacting to the Past historical simulation (that explores the options open to Athens in the aftermath of her defeat by Sparta).

Offered: Every other year, Fall

PL 222. Bioethics. 3 Credits.

Students analyze complex ethical issues in contemporary bioethics using relevant technical vocabulary and methods from philosophy, in partnership with information from the contemporary biosciences and the health care professions. Ethical theories covered include deontology, utilitarianism, virtue-based approaches to ethics, ethics of care, feminist ethics, contractarianism, and African ethics. Bioethical issues may include: stem cell research, human subjects research, human enhancement, reproductive medicine, euthanasia, advance directives and end-of-life care, resource allocation, organ transplantation, the right to health care, global health, and addressing injustices and discrimination in health care and medicine.

Prerequisites: Take one 100-level philosophy course or FYS 101.

Offered: Every year, Fall

UC: Breadth Elective, Intercultural Understand

- PL 226. Environmental Ethics. 3 Credits.**
 In this course, students critically assess environmental ethical issues arising at the intersections of philosophy and the sciences, using relevant ethical theory and evidence. Issues examined include but are not limited to: climate change; climate change denialism and public engagement with scientists and the sciences; the ethics of innovations in the discrete sciences; habitat preservation and loss; resource depletion; rights of humans, non-human animals, and ecosystems; ecocentrism; pollution; health; energy; corporate responsibility; sustainability; climate justice; environmental migration; future generations. Students explore individual, societal, and global perspectives on environmental ethics, and critically assess responses to environmental injustices and inequalities, including those of race, gender, and class.
Offered: Every other year, Fall
- PL 233. Business Ethics. 3 Credits.**
 This course helps students develop a framework for ethical decision-making, particularly in cases of business management. Students learn to identify ethical issues, apply various models of ethical decision-making, and analyze ethical cases in areas ranging from consumer rights to corporate responsibility. Topics include assessing and analyzing the ethics environment of business and identifying and managing ethics in a developing world including, human rights, environmental sustainability and technology.
Prerequisites: Take one 100 or 200 or 300-level philosophy course.
Offered: Every other year, Spring
- PL 235. Philosophy of Science and Technology. 3 Credits.**
 Students consider the history and nature of, and assumptions and values involved in, the scientific method; the logic of scientific explanation and theory construction; philosophical and ethical problems in selected natural, social and human sciences.
Prerequisites: Take one 100-level philosophy course or FYS 101.
Offered: Every other year, Spring
UC: Breadth Elective
- PL 236. Philosophy of Language. 3 Credits.**
 This course focuses on the attempt to understand the nature of language and its relationship with speakers, their thoughts and the world. Students explore such questions as: What is language? How do we understand one another? Can we think without language? What is the connection between words and the objects to which they refer? What is meaning? What determines the truth and falsehood of our statements? Do we have innate linguistic abilities or do we learn to speak by observing the behavior of other speakers? Various philosophical theories about language are attempts to answer such questions. These are discussed, along with their far-reaching consequences for other areas of philosophy.
Prerequisites: Take one 100-level philosophy course or FYS 101.
Offered: Every other year, Spring
UC: Humanities
- PL 237. Philosophy of Mind. 3 Credits.**
 Are minds physical or non-physical? Is free will real or an illusion? Is consciousness computational? Can we build artificial minds? How can we explain phenomena such as emotions, delusions and pain? What are we, and where is the boundary between ourselves and our environment? In this course, students explore these and other issues in the contemporary philosophy of mind, focusing on questions that emerge at the intersection of philosophy, psychology, psychiatry, neuroscience and artificial intelligence.
Prerequisites: Take one 100-level philosophy course or FYS 101.
Offered: Every other year, Spring
UC: Humanities
- PL 240. Philosophy of Sport (SPS 240). 3 Credits.**
 This course examines the notion that humans are "homo ludens" or beings who play from two perspectives. In the first part of the course, students look at such questions as: what is the nature or essence of sports? And how do we distinguish or define sports as distinct from other kinds of activities? In the second part of the course, students examine the relationship between sports and ethics, with a focus on topics such as what is fair play, whether athletic enhancement is cheating, what is gender equity within sports in society, and how do collegiate sports compare with professional sports.
Prerequisites: Take one 100-level philosophy course or FYS 101.
Offered: Every other year, Spring
UC: Humanities
- PL 250. Philosophy of Art. 3 Credits.**
 What is beauty? What does it mean to experience something—perhaps art or nature—aesthetically? What is art? What is the nature of artistic inspiration? What is—or what should be—the purpose of art? How does one determine the value of art? Is some art worthless? What is the relationship between art and truth? Should artistic expression ever be censored? How have racism, sexism and consumerism impacted the art world? These are some of the questions to be discussed as we consider aesthetic experience and artistic expression—in the visual arts, but also in music, dance, film, drama and other forms.
Prerequisites: Take one 100-level philosophy course or FYS 101.
Offered: Every other year, Spring
UC: Humanities
- PL 266. Global Philosophies. 3 Credits.**
 In this course, students explore global traditions in philosophy developed by people from diverse cultures, beyond Europe and the United States. Participants devote particular attention to insights and questions raised with regard to possible relationships or contrasts between diverse global philosophies and our existing assumptions, beliefs and values. Potential topics and course materials may include both classical and contemporary sources from Australia, Africa, the Caribbean, China, India, Japan, the Muslim world, the Pacific Islands and Latin America. Owing to the breadth of the field, the focus of the course shifts, reflecting the interests and work of the instructor in any particular semester.
Prerequisites: Take one 100-level philosophy course or FYS 101.
Offered: Every other year, Fall
UC: Humanities, Intercultural Understand
- PL 267. Philosophy of Religion. 3 Credits.**
 Religious language, religious experience and religious institutions make up a significant part of life in both traditional and modern cultures. This course analyzes the concepts and terms that are used in religious discourse, including God, holiness, redemption, idolatry, creation, eternal life and sacrifice, among others. Such analysis leads to questions regarding religious statements such as "God exists," "The cow is holy," and "If you fast, you will be redeemed" and their relationship with ordinary, everyday experience, as well as with science and with morality. Most important is the fundamental philosophical question "what is religion?"; answering it means moving beyond philosophy to anthropology, sociology, and of course psychology.
Prerequisites: Take one 100-level philosophy course or FYS 101.
Offered: Every other year, Spring
UC: Humanities

- PL 299. Independent Study in Philosophy.** **1-3 Credits.**
Tutorial study or independent projects in selected areas of philosophy are completed under the direction of a faculty member. This course may not be used as a substitute for required courses in the major or minor. 1, 2 or 3 credits (must be agreed on in advance by the student and faculty member, and approved by the department chairperson).
Offered: Every year, Fall and Spring
- PL 312. Philosophy of War and Peace (PO 312).** **3 Credits.**
This course draws on what philosophers, legal scholars and political scientists have written about the nature, limits and morality of warfare. Students study the general frameworks for evaluating warfare in the theories of realism, pacifism and just war, and then turn to the evaluation of historical case studies concerning when it is just to initiate war, how war is to be conducted justly once it is initiated, and the obligations of combatants following war. Readings include both historical authors, such as Thucydides and Thomas Aquinas, and contemporary theorists, such as Michael Walzer and Jeff McMahan.
Prerequisites: Take one 100 or 200 or 300-level philosophy course; or PO 211; or PO 215.
Offered: Every other year, Spring
- PL 320. Thought and Work of Albert Schweitzer (SL: Service Learning).** **3 Credits.**
Albert Schweitzer (1875-1965) made significant, often controversial contributions in several areas: music, philosophy, religion, medical care, service to human need, animal rights and ecological awareness. In 1952 Schweitzer was awarded the Nobel Peace Prize for his many decades of humanitarian work at his "jungle hospital" in West Africa. In his 80s, he became one of the most active voices in the struggle against the testing of nuclear weapons. Because Schweitzer considered his philosophy to be primarily one of action and service ("My life is my argument") service learning is an important component of the course. Quinnipiac's Albert Schweitzer Institute offers students many kinds of projects and activities reflecting Schweitzer's many areas of involvement. In this course, students critically explore Schweitzer's life, thought and work and their application to some of the moral problems and cultural and political issues we face today.
Prerequisites: Take one 100 or 200 or 300-level philosophy course; or PO 211; or PO 215.
Offered: Every other year, Spring
- PL 330. Philosophy and Gender (WGS 330).** **3 Credits.**
Students investigate the notions of sex and gender and the debate over social versus biological underpinnings of expressions of masculinity and femininity. The relevance of historical views on sex, gender and relations between the sexes to current patterns and developments are considered. Issues facing men and women, as well as policies and reforms designed to address them are examined. Participants also consider the intersection between sex/gender and race, ethnicity, class and sexual orientation. Finally, the impact of gendered perspectives on contemporary philosophy, especially epistemology, ethics and social and political philosophy, is considered.
Prerequisites: Take one 100 or 200 or 300-level philosophy course; or one course from women's studies.
Offered: Every other year, Spring
- PL 331. Philosophy of Humor.** **3 Credits.**
Historically, many thinkers have viewed humor with scorn while others have not considered it a topic worthy of philosophical investigation. This course explores the nature and value of humor in our daily lives and examines humor critically as a virtue that can help us take ourselves less seriously and live better lives. Students analyze the major accounts of humor such as the superiority, incongruity and relief theories highlighting the strengths and weaknesses of each theory. Adopting a critical philosophical lens, students also explore some important connections between humor and aesthetics, ethics and education.
Prerequisites: Take one 100 or 200 or 300-level philosophy course.
Offered: Every other year, Fall
- PL 332. Ancient Philosophy.** **3 Credits.**
This course explores Greek and Roman philosophy through a focus on the concepts of *erôs* and *philia* or love and friendship. Students examine how Epic poetry, Greek tragedy, Plato, Aristotle, Epicurus, Stoicism and Lucretius reflected on the place of love and friendship in a life well-lived.
Prerequisites: Take one 100 or 200 or 300-level philosophy course.
Offered: Every year, Fall
UC: Humanities
- PL 333. Modern Philosophy.** **3 Credits.**
From the mid-16th through the 18th century, movements such as the Renaissance, the Reformation, the development of the modern sciences and increasing international trade and colonization introduced a new era of philosophy. Students explore human understanding, critically analyzing issues that potentially include the mind-body relationship, freedom and determinism, the nature of reality, the existence of God, perception, personhood and personal identity, the scope and limits of knowledge, and the value and limitations of our intellectual heritage from this period. Authors may include Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume and Kant.
Prerequisites: Take PL 101; or take 1 course from subject PL from level 200 or 300.
Offered: Every year, Spring
UC: Humanities
- PL 334. Medieval Philosophy.** **3 Credits.**
This course focuses on the history of medieval philosophy. Students discuss figures from the Christian, Islamic and Jewish traditions, including Augustine, Boethius, Ibn Sina, Al-Ghazali, Ibn Rushd, Maimonides, Aquinas, Scotus and Ockham. Particular attention is given to examine the manner in which these philosophers confronted and assimilated Aristotelian philosophy and how they anticipate certain dimensions of modern philosophy.
Prerequisites: Take one 100 or 200 or 300-level philosophy course.
Offered: Every Third Year, Spring
UC: Humanities
- PL 335. Contemporary Philosophy (PO 336).** **3 Credits.**
Students explore diverse responses to political, social, and ethical issues from dynamic movements in 19th, 20th, and 21st-century philosophy and political theory. Potential topics may include Marxism, existentialism, phenomenology, feminism, poststructuralism, postcolonialism, and philosophy of race and gender. Potential material includes work by Hegel, Marx, Nietzsche, Du Bois, Sartre, de Beauvoir, Lorde, Merleau-Ponty, Arendt, Young, Foucault, Fanon, Biko, Derrida, and Butler.
Prerequisites: Take one 100 or 200 or 300-level philosophy course; or PO 215; or PO 219; or PO 315.
Offered: Every year, Fall
UC: Humanities

PL 337. Human Rights: Theory and Practice (PO 337). 3 Credits.

This course provides a rigorous and critical introduction to the foundation, structure and operation of the international human rights movement. It begins with leading conceptual and theoretical discussions, moving on to the institutions and functioning of the international human rights mechanisms, including nongovernmental and intergovernmental organizations. It covers cutting-edge human rights issues—gender and race discrimination, religion and state, national security and terrorism—placing them in the context of current political conflict and human rights discourse.

Prerequisites: Take one 100 or 200 or 300-level philosophy course; or PO 211; or PO 215.

Offered: Every other year, Fall

PL 338. Paradoxes. 3 Credits.

Paradoxes have been with us since a Cretan said "all Cretans are liars," and Zeno showed us how the tortoise could beat Achilles. Originally considered a problem for logical—and mathematical—thought, paradoxes run the gamut from logic to mathematics, to language, to science, to art and to ethics. This course presents the definition(s) of paradox, reviews some of the principal paradoxes known to us and asks about their essence: what is paradoxical about paradoxes? It then moves on to examine paradoxes in ethics, thereby asking about the real, paradoxical world of human—psychological and social—behavior.

Prerequisites: Take one 100 or 200 or 300-level philosophy course.

Offered: Every Third Year, Fall

UC: Humanities

PL 340. Philosophy of Sex and Love. 3 Credits.

This course presents a study of philosophical ideas on sex and love, the views of both Western and Eastern religions, and a critique of the moral issues concerning different types of sexual and love relationships. The significance of these viewpoints for living well is considered.

Prerequisites: Take one 100 or 200 or 300-level philosophy course.

Offered: Every other year, Fall

PL 368. Philosophy of Death and Dying. 3 Credits.

What does it mean to live and what does it mean to die? How do we distinguish life and death, living and dying? Is there a way to "die well" in the same way that we assume there is a way to "live well"? How do we justify our beliefs about issues of life and death? Is suicide ethically defensible? Do we have a duty to prevent death? Should we consider death an evil, and could it ever be a good? Should we care about our posthumous reputations? Students in this course explore these and related questions, drawing important insights from a range of relevant philosophical literature and personal narratives on death and dying.

Prerequisites: Take one 100 or 200 or 300-level philosophy course.

Offered: Every other year, Spring

PL 395. Critical Game Studies (GDD 395). 3 Credits.

In this course, students address current research in game studies, ludology or play theory, to develop critical, conceptual and cultural understandings of narrative, meaning and identity in digital games. The course also addresses the design and development of serious and meaningful games and the aesthetic, social and technological implications of new emerging forms such as digital storytelling, interactive theater, virtual worlds and locative media.

Prerequisites: Take GDD 101; or GDD 110; or one 100-level philosophy course.

Offered: Every year, Spring

PL 399. Directed Research in Philosophy. 3 Credits.

This is a more intensive directed research opportunity than that offered in PL 299. The course involves students in substantial independent research and writing projects in selected areas of philosophy, completed under the direction of a faculty member. This course may not be used as a substitute for required courses in the major or minor.

Offered: Every year, Fall and Spring

PL 400. Special Topics in Philosophy. 3 Credits.

Prerequisites: Take one 100-level philosophy course; or FYS 101.

Offered: As needed

PL 401. Senior Seminar. 3 Credits.

This is a writing and research seminar for senior philosophy majors. Students engage with philosophical primary and secondary readings in group discussion. They prepare and present a senior thesis on a topic of their choice, with guidance by faculty from the department.

Prerequisites: Must be a PL Major with Senior Status.

Offered: Every year, Spring

Political Science (PO)

PO 101. Issues in Politics. 3 Credits.

Students explore issues of current relevance in local, domestic and international politics. Each individually themed seminar provides an introduction to the systematic analysis of power relations in relevant local, national or global spheres of life. Students approach the seminar's theme in a way that develops an understanding of the major political ideologies, the behavior of relevant social actors and governmental institutions, and the capacity to engage as responsible citizens.

Offered: Every year, All

UC: Social Sciences

PO 101H. Issues in Politics-Honors. 3 Credits.

Students explore issues of current relevance in local, domestic and international politics. Each individually themed seminar provides an introduction to the systematic analysis of power relations in relevant local, national or global spheres of life. Students approach the seminar's theme in a way that develops an understanding of the major political ideologies, the behavior of relevant social actors and governmental institutions, and the capacity to engage as responsible citizens.

PO 131. Introduction to American Government and Politics. 3 Credits.

This course covers the development of the constitution, the nature of Federalism, the state and the national government. Students explore the duties and powers of the President, Congress, the Supreme Court and administrative agencies. Political parties, the nominating process, elections and electoral behavior as well as political interest groups and public opinion are considered.

Offered: Every year, Fall and Spring

UC: Social Sciences

PO 131H. Introduction to American Government. 3 Credits.

This course covers the development of the constitution, the nature of Federalism, the state and the national government. Students explore the duties and powers of the President, Congress, the Supreme Court and administrative agencies. Political parties, the nominating process, elections and electoral behavior as well as political interest groups and public opinion are considered.

Offered: Every year, Fall and Spring

UC: Social Sciences

PO 200. Special Topics. 3 Credits.

Prerequisites: Take PO 131 or FYS 101.

Offered: As needed

PO 205. Public Policy and Administration. 3 Credits.

Students in this introductory course develop not only an ability to understand, evaluate and design public policy, but also a capacity for ethical and effective leadership, particularly in the public sector. Students explore questions such as: What is the role of government in our lives? How is public policy made, and what are the forces that shape public policy? What public policies should government implement? How can public policies be implemented and evaluated?

Prerequisites: Take PO 101, PO 131 or FYS 101.

Offered: Every year, Fall

UC: Social Sciences

PO 206. Ethics and Public Policy. 3 Credits.

In this seminar, students grapple with ethical dilemmas and tradeoffs in public policy and politics. The seminar focuses primarily on leadership issues in the public policy realm, as distinct from those found in public administration or business management. Topics include lying and secrecy by public officials, health care, the use of violence, treatment of minorities, poverty, gender equity, whistleblowers, conflict of interest and governmental codes of ethical conduct. Students with background interests in political science, journalism, business and the sciences are welcome. Course readings emphasize classic works on ethics and political theory, as well as detailed ethically challenging cases from past and present. Students explore these cases through role playing, papers and classroom discussion.

Prerequisites: Take PO 131 or FYS 101.

Offered: Every year, Spring

UC: Social Sciences

PO 208. Career Readiness in Washington DC. 3 Credits.

A combination of one-on-one career advising, workshops, career research, events, and networking opportunities in Washington DC, designed to complement what students learn while interning in Quinnipiac's Washington Semester program ("QU in DC"). The course helps students in any major at the University to reflect on their personal and professional goals and talents, and how to take the next steps in their careers. By the end of the semester, students will have a stronger professional network and an online professional portfolio to showcase their work and thinking to future employers and graduate programs. Every year; Fall, Spring, and Summer Semesters. Only students in the Quinnipiac Washington Semester Program may take this course.

Offered: Every year, Fall and Spring

PO 209. Environmental Politics and Policy (ENV 209). 3 Credits.

Perhaps no other issue area is as potentially disruptive to stability as that which is defined by the crises in our environment. From the local, to the national and global levels, the exhaustion of natural resources, population growth and threats presented by climate change and the accumulation of toxins and trash in the atmosphere, on land and in the world's oceans, demand the attention of government at every level. In this course, students engage with policy debate around these and other issues, such as the ways environmental issues overlap with issues of local and global justice. They explore the political factors that have influenced environmental policy debates historically and currently, in the U.S. and on comparative and international bases.

Prerequisites: Take PO 101 or FYS 101.

Offered: Every other year, Fall

UC: Social Sciences

PO 211. Introduction to International Relations. 3 Credits.

Students are introduced to the study of politics on the global level. The course focuses on the nature of the international system of nation-states, including the importance of state sovereignty, the political interactions between states, and the causes of war and peace. Additional topics include understanding the domestic bases for foreign policy decisions, the different tools available for state action in the international realm (diplomacy, espionage, military intervention), the increasing importance of international economic relations, and the function and evolution of international law and organizations.

Prerequisites: Take PO 101, PO 131 or FYS 101.

Offered: Every year, Fall and Spring

UC: Social Sciences

PO 215. Political Theory. 3 Credits.

In this course, students survey political philosophy, from Aristotle and Plato through Mill and Marx. Students use these thinkers as a way to explore both the enduring and contemporary issues such as the nature of society, the nature of government, and the nature of freedom, justice and the law.

Prerequisites: Take PO 101 or PO 131 or PL 101.

Offered: Every year, Fall and Spring

UC: Social Sciences

PO 215H. Honors Political Theory. 3 Credits.

This seminar is for students in the university Honors Program. Readings, papers and discussions in the history of political thought touch on contemporary issues such as the nature of justice, gender, the meaning of rights and responsibilities, the scope of government, democracy, the relationship between society and human nature. Prerequisites: PO 101 or consent of instructor.

Offered: As needed, All

PO 216. American Political Thought. 3 Credits.

Students are introduced to major ideas of social justice and political power in America from colonial New England to the modern American state. Special emphasis is on major debates on social issues in American history, including Constitutional structure and reform, slavery, race and building an immigrant society, church and state, industrialism and technology, civil rights and citizenship, and democracy and reform. Major authors and readings include Winthrop, Jefferson, Paine, the Federalist Papers, Lincoln, Dewey, Roosevelt and M.L. King.

Prerequisites: Take PO 131 or FYS 101.

Offered: Every other year, Spring

UC: Social Sciences

PO 219. Feminist Political Thought (WGS 219). 3 Credits.

Students explore different approaches to explain the status of women. Theoretical perspectives that students consider may include: liberal feminism, radical feminism, Marxist/socialist feminism, feminism of care, conservative feminism and global feminism, among others. Students critically evaluate political concepts such as freedom, equality, rights and oppression, as well as learn about how different thinkers have conceptualized gender, politics, power and the role of the state. The course requires careful reading, intensive class discussion and multiple writing assignments.

Prerequisites: Take PO 101, PO 131, PL 101, PS 101, SO 101 or WGS 101.

Offered: Every other year, Spring

UC: Social Sciences

- PO 221. Introduction to Latin America. 3 Credits.**
This is the transdisciplinary introductory course for the minor in Latin American studies. Various disciplines, including history, anthropology, economics and languages, are interwoven in an exploration of concepts, behaviors and traditions associated with Latin America. A survey of Latin American regions spanning the Revolutionary period to the present, with a focus on the past 50 years, is utilized to focus the content.
Prerequisites: Take PO 101 or FYS 101.
Offered: Every other year, Fall
UC: Social Sciences
- PO 225. American Political Movements. 3 Credits.**
In this class, students explore key movements in American political society over the past 150 years, and analyze how social groups have organized to demand political change in the U.S. Students study political movements organized around race, gender, social class and sexual identity/orientation.
Prerequisites: Take PO 101, PO 131 or FYS 101.
Offered: Every year, Fall
- PO 227. The Politics of Intimacy. 3 Credits.**
How do our thoughts about inclusion and citizenship shape our ideas about sexual and political freedom? In what ways has the democratic process sought to affirm American values by limiting individual choices? In this course, students explore the ways that intimacy has been regulated, through a thematic investigation of legal and political challenges in areas such as trans/interracial adoption, same-sex marriage, interracial marriage, sex and race in the American South, statutory rape, sexual violence, sex education and reproductive rights.
Prerequisites: Take PO 131 or FYS 101.
Offered: Every other year, Fall
UC: Social Sciences
- PO 231. Elections and Political Parties (SL: Service Learning). 3 Credits.**
This course offers an intensive analysis of elections and parties in the U.S. and other nations. Special emphasis is placed on the development of competitive political party systems as vital to the success of democracy. Topics include the history of elections and campaigns, the role of gender, ethnicity and class in modern political parties, voting behavior, party strategies, campaign advertising, fundraising, and media coverage of elections. The course includes classroom visits by party leaders and candidates, and requires students to participate in direct observation as participants in an election campaign.
Prerequisites: Take PO 131.
Offered: Every other year, Fall
UC: Social Sciences
- PO 245. Politics of Global Capitalism. 3 Credits.**
This introduction to the analysis and understanding of the international economy from a political perspective centers on the increasing internationalization, or globalization, of the capitalist market economy. This is analyzed from three perspectives, each of which raises different political issues and strategies: neoliberalism, economic nationalism (neomercantilism) and Marxism. Current issues dealing with international trade and finance, the environment, Third World development and marginalization, and gender/race issues in the international economy are discussed.
Prerequisites: Take PO 211 or EC 111.
Offered: Every Third Year, Spring
UC: Social Sciences
- PO 247. Actors and Processes in U.S. Foreign Policy. 3 Credits.**
This introduction to U.S. foreign policy and how it is made combines a study of world politics, American political processes and current events. The course focuses on actors and policy processes, including the role of Congress, the President, interest groups, the mass media and public opinion (among others), and the influence of ideology on U.S. foreign policy. The course examines several 20th-century international crises, asking: what lessons were learned by these experiences, and how do these episodes illuminate the formation of foreign policy in the United States? The post-Cold War world is examined as a context of current challenges to American foreign policy.
Prerequisites: Take PO 211 or PO 131.
Offered: Every other year, Spring
UC: Social Sciences
- PO 280. Congress and the President. 3 Credits.**
This course surveys the historical development of the executive and legislative branches of the U.S. government. The course surveys the Constitutional foundations, evolutionary growth and contemporary research on the U.S. presidency and Congress. The goal of the course is to highlight how many of the current conflicts between the President and Congress have deep historical roots.
Prerequisites: Take PO 131.
Offered: Every other year, Fall
UC: Social Sciences
- PO 295. Internship in Political Science. 1-3 Credits.**
This internship requires students to complete a minimum of between 50 and 100 hours of on-site work, keep a field journal and complete a 5-8 page final report that summarizes activities and documents what the internship contributed to student learning in political science.
Prerequisites: Take PO 131.
Offered: As needed
- PO 297. Simulating International Organizations. 1 Credit.**
Students prepare to participate in various external simulations of the activities of the United Nations, African Union, North Atlantic Treaty Organization, European Union and other international organizations. Students are trained in the preparation of mock resolutions and they learn the essentials of international diplomacy and proper protocol at international meetings to enable them to successfully compete in model meetings across the U.S. and elsewhere.
Offered: Every year, Fall
- PO 299. Independent Study in Political Science. 1-3 Credits.**
This course is directed by a faculty member with background in the student's area of research. Participants are required to write a series of papers (minimum of three to five pages) during the semester or a single research paper (8 to 15 pages long).
Offered: Every year, All
- PO 300. Special Topics. 3 Credits.**
Prerequisites: Take PO 101 or FYS 101.
Offered: As needed, All

PO 302. The Global Civic Dilemma.**4 Credits.**

In this course, students explore what constitutes an ethical civic life by working from philosophical principles through an understanding of the basis of government on the local, national and international levels, to civic participation. The course is structured around several tensions, as well as the many key concepts in the age-old quest for understanding what makes for the ideal social order: self and other, individual and community, public and private, human agency and social structure; governance, state, society; the political and economic; liberalism and conservatism (and their variants); three main approaches to ethics; and how to arbitrate between ethical standards when they come into disagreement.

Prerequisites: Admission into Online Degree Completion program.**Offered:** Every year, Spring Online**PO 303. Political Inquiry.****3 Credits.**

This course, designed for political science majors in their sophomore year, examines the culture of inquiry in political science as a problem-solving or a critical discipline and contributes toward political understanding through multiple reading, thinking and writing exercises. Course material focuses on current issues in politics and government and asks how political scientists might respond. The course emphasizes theory development and hypothesis formation; various methodological approaches; and several sub-disciplinary perspectives within political science. For political science majors only. Sophomore status is required.

Prerequisites: Take PO 211 PO 215 or PO 225.**Offered:** Every year, Fall**PO 307. Introduction to Nonprofit Mana.****3 Credits.**

This course connects theory and practice by examining a variety of management techniques utilized in running nonprofit organizations. Course readings, discussions and videos cover strategic planning, writing and fulfilling mission statements, facilitating governance, designing effective fundraising tactics, evaluating programs, managing finances, and legal responsibilities. The course also covers the formation of the nonprofit sector and its differences from the public and for-profit sectors. The class format consists of interactive discussions and applied projects/group work designed to help students understand the nonprofit sector and nonprofit management. Students are strongly encouraged to undertake a volunteer experience with a nonprofit during the semester.

Offered: As needed**PO 309. Public Diplomacy.****3 Credits.**

This course examines concepts, issues and practices in public diplomacy, or the management of a nation's communications and relationships with foreign publics who have the ability to affect national and international interests. The course focuses on U.S. public diplomacy's past, present, and future. Students examine & apply theoretical and practical aspects of public diplomacy, looking closely at the purpose and value of public diplomacy in governments and other institutions, the roles and responsibilities of public diplomacy specialists, and principles of strategic practices.

Offered: As needed**UC:** Breadth Elective**PO 311. Topics in International Relations.****3 Credits.**

This advanced seminar focuses on in-depth critical analysis of current issues and themes in international relations. It may deal with topics from issues of war, peace and security, to the politics of the international economy, emerging international cultural norms, and international law. The course requires careful reading, intensive class discussion and multiple writing assignments.

Prerequisites: Take PO 211 or Department approval.**Offered:** As needed**PO 312. Philosophy of War and Peace (PL 312).****3 Credits.**

This course draws on what philosophers, legal scholars and political scientists have written about the nature, limits and morality of warfare. Students study the general frameworks for evaluating warfare in the theories of realism, pacifism and just war, and then turn to the evaluation of historical case studies concerning when it is just to initiate war, how war is to be conducted justly once it is initiated, and the obligations of combatants following war. Readings include both historical authors, such as Thucydides and Thomas Aquinas, and contemporary theorists, such as Michael Walzer and Jeff McMahan.

Prerequisites: Take PL 101; or one 200 or 300-level philosophy course; or PO 211; or PO 215.**Offered:** Every other year, Spring**PO 313. Development, Globalization and Colonialism.****3 Credits.**

An introduction to settled approaches of development, globalization and order. This course discusses theories that have attempted to justify European colonialism, and theories that are critical of those colonial legacies. Students analyze and criticize various liberal civilization theories; Keynesian economics, Marxism, neoliberalism and sustainable development. Students discuss the ways in which previously accepted knowledges and approaches from different disciplines have contributed in the construction and institutionalization of perspectives that continue to shape the lives of peoples throughout the world. Additionally, students are encouraged to examine their own experiences in the world and their proximities to the perspectives discussed.

Prerequisites: Take PO 101 FYS 101 or EN 101.**Offered:** Every other year, Spring**UC:** Social Sciences, Intercultural Understand**PO 315. Democratic Theory and Practice.****3 Credits.**

This course examines the relationship between democratic ideas and practices in the foundation of democratic regimes and the formulation of public policy. Topics include the nature of obligations between the citizen and the community, diversity, feminism, identity politics, equal rights and powers and the role of groups in policy making. Major policy issues covered include election reforms, racial and gender-based inequalities, the environment, and welfare and human rights in foreign policy. Students are expected to participate in group projects and discussions and do extensive analytical writing.

Prerequisites: Take PO 215 or PO 216**Offered:** Every Third Year, Fall**PO 317. International Law (LE 317).****3 Credits.**

Students are introduced to the nature and development of international law as part of the global political system. Students explore sources of international law from treaties, custom, general principles, judicial decisions and scholarly writing. Other topics include the connection between international law and national law; the role of states and individuals; dispute resolution using arbitration and national and international court cases; use of law to manage international conflict; negotiation; and legal issues concerning shared resources.

Prerequisites: Take PO 211 or LE 101.**Offered:** Every year, Fall

PO 319. International Interventions.**3 Credits.**

Why does the international community intervene in some countries and not in others during periods of civil crisis? What do these variations in the patterns of interventions tell us about the foreign policies of countries and the relations between states in the international system? Students explore answers to these and related questions by investigating the politics, history and dynamics of international interventions to address civil crises since World War II. Students examine select case studies of intervention and nonintervention to understand more fully why and when the world community responds in the context of international law, national interest and the emerging consensus around the protection and promotion of human rights.

Prerequisites: Take PO 211.**Offered:** Every other year, Spring**PO 321. Comparative Government.****3 Credits.**

This course presents a comparative study of political institutions, forms of government, leaders, socioeconomic processes, development strategies, cultures and traditions in diverse political systems across time and space. Students learn about governing and political processes that explain important differences or similarities in political outcomes among countries, such as: why some countries are democracies and others are not, why some countries provide universal health care for their citizens while others do not, and why some countries experience war or economic depressions while others do not. Students examine the major theoretical, conceptual and methodological approaches that scholars have employed within the subfield of comparative politics and are trained to employ some of those skills in their own analysis and research.

Prerequisites: Take PO 211 or PO 215.**Offered:** Every other year, Spring**PO 325. Political Psychology and Public Opinion.****3 Credits.**

Students are introduced to the basics of polling, the social and psychological foundations of political thoughts and attitudes, and elementary techniques in data analysis. Students explore beyond descriptions of what people believe and what ideas they act upon to the psychological processes that explain why they think as they do: How susceptible are people to marketing and political persuasion? Why do people obey or disobey authorities? What are the sources of prejudice and the triggers that explain political behavior? Students learn to be wise consumers of survey information, gaining skills in distinguishing legitimate public opinion research from pseudo-polls, fundraising and soliciting under the guise of survey research.

Prerequisites: Take PO 211, PO 215 or PO 225;**Offered:** Every other year, Spring**PO 326. Polling and Opinion a Quinnipiac Signature Seminar.****3 Credits.**

An opportunity for students to experience an exciting one-of-a-kind partnership with the nationally recognized Quinnipiac University Poll. The goal of the seminar is for students to see how polling works from inside the Quinnipiac University Poll and become critical consumers of polls. The Course will emphasize basic civic skills for evaluating and analyzing survey data. Topics include elections, partisanship, health policy, racial attitudes, gender and political toleration. ?No prior coursework in statistics is necessary. This course satisfies the "political inquiry" requirement in the political science major.

Prerequisites: Any 200-level Political Science Course**Offered:** As needed**PO 326H. Polling and Opinion a Quinnipiac Signature Seminar.****3 Credits.**

An opportunity for students to experience an exciting one-of-a-kind partnership with the nationally recognized Quinnipiac University Poll. The goal of the seminar is for students to see how polling works from inside the Quinnipiac University Poll and become critical consumers of polls. The Course will emphasize basic civic skills for evaluating and analyzing survey data. Topics include elections, partisanship, health policy, racial attitudes, gender and political toleration. ?No prior coursework in statistics is necessary. This course satisfies the "political inquiry" requirement in the political science major.

Prerequisites: Any 200-level Political Science Course**Offered:** As needed**PO 328. Politics and Governance in Africa.****3 Credits.**

This course introduces students to the study of politics in Africa by examining changes and continuities in the political and socio-economic development of the 48 sub-Saharan African countries from the pre-independence period through the contemporary era. Students are introduced to important issues in the study of African politics as well as the various methodological and theoretical concepts employed in the study of these issues by scholars and analysts.

Prerequisites: Take PO 211.**Offered:** Every other year, Fall**PO 331. Topics in Comparative Government.****3 Credits.**

This course provides an in-depth examination of government institutions and practices, social and political forces and movements, and cultural traditions in particular regions of the world, such as Asia, Africa, Middle East, Latin America and Europe.

Prerequisites: Take PO 211.**Offered:** As needed, All**PO 332. European Politics.****3 Credits.**

This course is designed to provide a general introduction to European politics by exploring the dynamics of integration in Europe. The issues discussed relate to the general theoretical treatment of integration phenomena, the political economy of integration of Europe and its membership expansion, and the structural and behavioral implication of the open market. Of particular relevance to course discussions are the changing notions of security, economics, trade, market regulations and cooperation on the global scene. Special attention is paid to the single currency (the Euro) and how it impacts the process of integration in Europe.

Prerequisites: Take PO 211**Offered:** Every other year, Fall**PO 333. Middle Eastern History and Politics.****3 Credits.**

This course is designed to explore both historical and contemporary political and socioeconomic developments in the Middle Eastern region. The course begins with a historical review of the demise of the Ottoman Empire, the anti-colonialist revolt, the emergence of Israel, secular nationalism, the rise of Islamism and the post-Islamist era. The focus of the course then shifts to an examination of such issues as geopolitics, oil, the Palestinian-Israeli conflict, peace process, Persian Gulf wars, the great-powers' involvement and interests in this area, terrorism, and globalization and its impact in the region.

Prerequisites: Take PO 211.**Offered:** Every Third Year, Spring

PO 334. Topics in African Politics.**3 Credits.**

Students study the broad scope of politics taking place on the African continent, while investigating the unique cultural and historical heritage of African societies including colonialism and the challenges of creating independent states, and the more recent history of conflict that has inhibited development in so many countries. Students also study post-conflict reconciliation and development in the African context, including economic growth and the bright future that is possible if African countries can solve their most serious problems and remain free of conflict.

Prerequisites: Take PO 211.**Offered:** Every Third Year, Fall**PO 335. Politics of Race and Ethnicity.****3 Credits.**

What lessons can be drawn from recent political events such as the election of the first Indian-American governor, the first African-American president and the appointment of the first Latina to the Supreme Court? The story of American political development has been one of constant invention and reinvention. Central to the story has been the role of individual and collective identities in shaping what it means to be an American citizen. With political history as a context, students examine the political presence of major ethnic and racial communities in the U.S.—Irish, Italian, Asian, Jewish, Native, African-American and Latino. Key policy issues such as immigration, education and affirmative action provide the focal point for exploring the processes of group formation, identity and political mobilization as expressed through protest, pop culture, economic development, political participation and the building of community institutions and networks.

Prerequisites: Take PO 101 or PO 131.**Offered:** Every other year, Spring**PO 336. Contemporary Social and Political Philosophy (PL 335).****3 Credits.**

Students explore diverse responses to political, social and ethical issues from dynamic movements in 19th, 20th, and 21st-century philosophy and political theory. Potential topics may include Marxism, existentialism, phenomenology, feminism, poststructuralism, postcolonialism, and philosophy of race and gender. Potential material includes work by Hegel, Marx, Nietzsche, Du Bois, Sartre, de Beauvoir, Lorde, Merleau-Ponty, Arendt, Young, Foucault, Fanon, Biko, Derrida, and Butler.

Prerequisites: Take one 100 or 200 or 300-level philosophy course; or PO 215; or PO 219; or PO 315.**Offered:** Every other year, Spring**PO 337. Human Rights: Theory and Practice (PL 337).****3 Credits.**

Students address the philosophical fundamentals of human rights while emphasizing the practical aspects of human rights work, the purpose being to understand the ways in which human rights scholars, activists and international and governmental officials argue about human rights and their implementation.

Prerequisites: Take PL 101; or one 100 or 200 or 300-level philosophy course; or PO 211; or PO 215.**Offered:** Every other year, Fall**PO 342. Comparative Constitutional Law (LE 342).****3 Credits.**

Students compare the legal structures and fundamental principles typically found in constitutions by studying the constitutions of several different countries. The course explores the structure of government; the distinction between legislative, executive and judicial authority; the incorporation of fundamental human rights; the relationship between church and state, free speech and the press, and social welfare rights. Participants analyze the distinction between constitutional law and domestic law and assess the role of various constitutional frameworks in a global society.

Prerequisites: Take PO 131 or PO 211 or LE 101.**Offered:** Every other year, Spring**PO 349. Political Communication (MSS 349).****3 Credits.**

Students investigate the politics of communication in America and the uses of communication in politics. Topics include the technological nature of the mass media in the global and U.S. political economy, implications for democracy of the new communication technologies, the agenda setting function of mass media, political rhetoric and persuasion in the information age, and the role of propaganda in peace and war. Students learn critical analysis of media messages, how to deal with communication from different cultures, and skills in the use of information technology. Students write analytical papers and complete a substantial research project.

Prerequisites: Take PO 131.**Offered:** Every other year, Fall**PO 353. American Constitutional Law (LE340).****3 Credits.**

This course presents an intensive study of the development of constitutional law through the analysis of significant Supreme Court decisions. Topics include: the judicial process and the Supreme Court; Federalism, the states and the division of powers; the basis of national power, taxation, commerce and sovereignty; the separation of powers; the Judiciary, Congress and the Presidency; interstate relations and national supremacy; the electorate; citizenship and the right to vote.

Prerequisites: Take PO 131 or 6 credits from subject LE.**Offered:** Every year, Fall and Spring**PO 354. Civil Rights and Civil Liberties.****3 Credits.**

This course considers the Bill of Rights and its ratification, the Fourteenth Amendment, and competing theories for interpreting and applying these texts. Topics to be discussed as a class include: freedom of expression, freedom of speech, the press, religion, and assembly; the establishment clause and the separation of church and state; fundamental rights, substantive due process and the right to privacy; the Fifth, Ninth and Fourteenth Amendments; the equal protection clause and three standards of Supreme Court review; the incorporation doctrine; suspect classifications, race discrimination and discrimination against women, sexual minorities, and the poor; the power to protect individuals and affirmative action.

Prerequisites: Take PO 131 or LE 101.**Offered:** Every other year, Spring**PO 360. Topics in American Politics.****3 Credits.**

This advanced course on a specially selected topic in American politics or public policy examines the relationships between public issues and political institutions. Topics may focus on policy analysis, political parties, interest groups, public opinion, Congress, the Presidency and the courts. Course requires class participation and numerous research or writing assignments.

Prerequisites: Take PO 131.**Offered:** Every other year, Spring

PO 362. Presidential Election Campaigns (SL: Service Learning). 3 Credits.

This advanced seminar combines intensive campaigning fieldwork and academic study of presidential campaigns and electoral processes. Students evaluate the emerging efforts to reform the electoral process and the campaign financing system, analyze new techniques of communication and persuasion, explore the history of the current presidential nomination and election process, voter behavior and psychology, research new campaign management techniques, and the practical essentials of grassroots activism. As part of the course requirements, students participate in an intensive internship for approximately 15 days in residence at the New Hampshire primary. Students must pay a course fee to cover the cost of the class residency in New Hampshire. Two field trips occur during the semester from Friday to Sunday, and some of the residency occurs during the January term.

Prerequisites: Take PO 131 or PO 231.

Corequisites: Take PO 362L.

Offered: Every Third Year, Fall

PO 362L. Presidential Election Campaign Lab. 1 Credit.

Lab to accompany PO 362.

Corequisites: Take PO 362.

Offered: As needed

PO 365. Inside Washington, D.C.. 3 Credits.

In this intensive, two-week seminar in Washington, D.C., students interact with well-known speakers from government, the media and academia to discuss the current major issues confronting Congress and the President. In the second week, students confront dilemmas regarding how the media covers national politics and policy. Students participate in daily site visits, tours and special events. They engage with topics such as the impact of national elections, the nature of conflict and bargaining in political institutions, foreign policy dilemmas, the gatekeeper function of the media, "spin" and media control, media bias and the rise of new media. Eight-hour days are the minimum expectation during the two-week program. Students must apply for the course through the QU in DC program and meet university academic achievement standards to be admitted to the seminar.

Prerequisites: Departmental approval of application through QU in DC program.

Offered: Every year, Spring

PO 370. State and Local Government. 3 Credits.

The role of states in the federal system is analyzed. Structure and problems of state and local governments are examined. Special attention is paid to challenges of local, regional and state governance in Connecticut and the New England states.

Prerequisites: Take PO 131.

Offered: Every year, Spring

PO 387. Women and Public Policy (WGS 387). 3 Credits.

Students examine the major public policy issues affecting gender relations in the United States today, including: reproductive rights and abortion, labor policy, welfare policy, sexual and domestic violence. Students discover the process by which issues of importance to gender equality have historically emerged on the public agenda, the ways in which policy debate is shaped once an issue becomes a public problem and the competing policy paradigms surrounding these controversial policy issues. Given the possible trauma associated with the topics of the class, students need to use their discretion in signing up to take this class.

Prerequisites: Take PO 131 or WGS 101.

Offered: Every other year, Spring

PO 390. Urban Public Policy. 3 Credits.

The course introduces students to the public policy and governance processes in urban areas. Students analyze and evaluate how government has responded to, and struggled with, urban social, economic and technological changes. How and why have urban leaders sometimes succeeded, and sometimes failed, to master these challenges? Can past successes and failures reliably guide citizens and leaders in the future? Policy areas covered may include transportation, housing, education, crime, environmental sustainability and immigration. Particular attention is paid to case studies of urban policy in Connecticut, in comparison to other urbanized regions around the US and in cities around the world.

Prerequisites: Take PO 131.

Offered: Every Third Year, Spring

PO 395. Advanced Internship. 1-9 Credits.

This advanced internship requires students to complete more than 100 hours of on-site work; keep a field journal; complete a final report that summarizes activities and documents what the internship contributed to student learning in political science; and complete a research paper at least 10 pages in length, based on research relevant to the internship duties and done during the semester of the internship. With permission of instructor.

Prerequisites: Take PO 131.

Offered: Every year, All

PO 399. Independent Study in Political Science. 1-10 Credits.

This independent study is directed by a faculty member with background in the student's area of research. Participants are required to write a series of papers (minimum of three to five pages) during the course of a semester, or a single research paper (15 to 20 pages).

Offered: Every year, All

PO 408. Senior Seminar. 3 Credits.

This is a capstone course for senior political science majors. Students integrate prior learning with a seminar topic announced each year, and prepare and present original research to their peers in the form of a senior thesis, related to a common seminar theme announced each year. The seminar allows students to apply the knowledge and methodology they have learned in previous courses to a particular project.

Prerequisites: Take PO 303; Political Science majors with senior status.

Offered: Every year, Spring

PO 496. Independent Study in Political Science. 3 Credits.

This independent study is directed by a faculty member with background in the student's area of research. This advanced independent study requires a major research paper of at least 20 pages in length that makes an original contribution to knowledge in political science.

PO 497. TWC QU in DC Semester. 6-16 Credits.

Students are registered by arrangement for credits during their QU in DC semester program at Quinnipiac's institutional partner, The Washington Center (TWC). Fall and Spring QU in DC students earn 16 credits; Summer students earn 6 to 9 credits. Upon successful completion of the program in Washington, D.C., credit for specific courses and internships is recorded in the student's academic transcript.

Prerequisites: Approval for participation by Director of QU in DC.

Offered: Every year, All

PO 498. WMI QU in DC Semester. 6-16 Credits.

Students are registered by arrangement for credits during their QU in DC semester program at Quinnipiac's institutional partner, The Washington Media Institute (WMI). Fall and Spring QU in DC students earn 16 credits; Summer students earn 6 to 9 credits. Upon successful completion of the program in Washington, D.C., credit for specific courses and internships is recorded in the student's academic transcript.

Prerequisites: Approval for participation by Director of QU in DC.

Offered: Every year, All

PO 499. AU QU in DC Semester. 3-16 Credits.

Students are registered by arrangement for credits during their QU in DC semester program at Quinnipiac's institutional partner, American University (AU). Fall and Spring QU in DC students earn 16 credits; Summer students earn 6 to 9 credits. Upon successful completion of the program in Washington, D.C., credit for specific courses and internships is recorded in the student's academic transcript.

Prerequisites: Approval for participation by Director of QU in DC.

Offered: Every year, All

Bachelor of Arts in Philosophy

Program Contact: Jennifer Sacco (jennifer.sacco@quinnipiac.edu)
203-582-8972

Philosophy is an ancient project, but one that continues to evolve as humans respond ethically to challenges in the coming century: peace, environmental sustainability, globalization, technology, the needs for health and security, and the yearning for love and justice. The philosophy major is structured to equip students with the conceptual tools and techniques of inquiry necessary to arrive at thoughtful responses to the world's challenges through their knowledge of different eras, themes and figures in the history of philosophy, both inside and outside the Western tradition.

Students learn to reflect critically, ethically and holistically on the significance of these tools and techniques to their own lives and to the world they are about to inherit. Students develop analytical and research skills in philosophical inquiry as they explore the history of philosophy and the current status of the main problems in epistemology, metaphysics and ethics.

Students who major in philosophy develop competence in reasoning techniques, and will appraise the validity (and invalidity) of arguments, expose hidden assumptions, recognize fallacies and make a precise and coherent case in support of their own views. Philosophy graduates will be skilled in combining and synthesizing information from a wide range of sources, and in reflecting on their own thinking and experience. Students complete the major with a senior seminar in which they isolate and define a specific philosophical question that they explore in a senior thesis.

BA in Philosophy Curriculum

Students must obtain a minimum grade of C in all philosophy courses. No more than 6 credits of independent study (PL 299, PL 399) may count toward completion of the major. Students majoring in philosophy must meet the following requirements:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Philosophy Core Requirements		
PL 101	Introduction to Philosophy	3

PL 102	Introduction to Ethics	3
PL 103	Logical Reasoning	3
PL 332	Ancient Philosophy	3
PL 333	Modern Philosophy	3
PL 401	Senior Seminar	3

Total Credits 102-108

¹ All students must complete the University Curriculum (p. 51) requirements.

² In addition to philosophy courses, a student may count up to two of the cognate courses toward completion of the philosophy major.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the

modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

- a. **Knowledge:** Demonstrate understanding of the major traditions, themes and figures in metaphysics, epistemology and ethics across global history and as they emerge in specific cultures, regions or nations of the world.
- b. **Reflection:** Ability to reflect critically, ethically and holistically on human problems affecting their lives (e.g., peace, environmental sustainability, globalization, technology, health, death, social and political justice), and to isolate and define specific philosophical questions for further inquiry.
- c. **Critical Thinking:** Ability to use inquiry and critical thinking techniques for detecting fallacies and for appraising the validity of arguments.
- d. **Synthesis:** Skills of creatively synthesizing new ideas, based on knowledge from a diverse range of historical, regional and cultural perspectives.
- e. **Communication:** Ability to communicate effectively one's own views and judgments in precise, reasoned, coherent and persuasive writing and speaking.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Bachelor of Arts in Political Science

Program Contact: Jennifer Sacco (jennifer.sacco@quinnipiac.edu)
203-582-8972

The Bachelor of Arts in Political Science program provides courses that balance social scientific analysis of power relations with a focus on the politics and values of community. Through their coursework and activities, students develop foundational knowledge regarding the causes and consequences of socioeconomic inequalities in the U.S. and around the world; the rise of the U.S. as a global power and how that power is used; the major environmental, political and socioeconomic threats facing the global community; and the historical development of American democracy and its application to contemporary political challenges.

Political science majors also develop the ability to engage in normative and empirical forms of inquiry: they can explain how different subfields in the discipline approach the study of politics scientifically, and they can critically analyze the justifications for individual political actions and

governmental policies using normative and ethical reasoning. Students complete the major with a senior seminar in which they engage major questions in political science and develop a sustained, independently conceived contribution to these questions in the form of a senior thesis. Upon graduation, political science majors have the tools necessary for active, informed and sustained engagement with the political process.

In addition to the core requirements common to all political science majors, students may choose to concentrate their studies either in the politics track, the public policy and leadership track, or the global affairs track. For more information about these three tracks, see the Tracks tab (p. 255). The department strongly advises students as they design their academic and professional development outside the political science major. Extracurricular leadership activities, courses in diversity, and a background in statistics and economics are encouraged as ways to support learning in the public policy and leadership track.

Because experiences in government or politics are key to learning how to apply and transfer knowledge gained in the classroom to the professional or civic realm, political science majors at Quinnipiac are required to have a for-credit experiential learning course or internship. Students may choose between an advanced internship, a course in the QU in DC (p. 258) program, a political science course taken as part of a Study Abroad (p. 50) semester, or a course where academic learning is integrated with a community service learning project. More information about the experiential learning requirement can be found on the Curriculum tab (p. 253).

BA in Political Science Curriculum

The BA in Political Science requires the completion of courses in the University Curriculum, the CAS curriculum and the political science core curriculum, with a minimum grade of C in all courses. No more than 6 credits of internship (PO 295, PO 395) may count toward the completion of the major. Students majoring in political science must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Political Science Core Courses		
PO 131	Introduction to American Government and Politics	3
PO 211	Introduction to International Relations	3
PO 215	Political Theory	3
PO 225	American Political Movements	3
PO 303	Political Inquiry	3
PO 408	Senior Seminar	3
PO 395 or PO 365 or PO 326 or a Service Learning course or QU in DC course or Study Abroad course in politics or other course approved by the department.		3-6
Political Science Track electives or cognate courses (choose a track from the list below)		15
Free Electives		17
Total Credits		102-108

Experiential Requirement

At Quinnipiac, political science majors are required to have a for-credit experiential learning course or internship. Students may choose between an advanced internship, a course in the QU in DC (p. 258) program, a political science course taken as part of a Study Abroad (p. 50) semester, or a course where academic learning is integrated with a community service learning project. Students should plan with their academic advisers early to complete this requirement before the start of their senior year. With department approval, this requirement may be completed with one of the following:

- A political science advanced internship PO 395 of 3 or more credits;
- A political science course taken in a study abroad (p. 50) program;
- A political science course taken in the QU in DC program (p. 258) or PO 365;
- A service learning course in any discipline (must have "SL" designation).

Electives: Tracks in Political Science

Students choosing to focus their studies in the politics track, the public policy and leadership track, or the global affairs track, may choose from among the following electives beyond the core required courses:

Politics Track

Code	Title	Credits
Select 15 credits of the following political science or cognate courses		15

Political Science courses:

PO 101	Issues in Politics
PO 205	Public Policy and Administration
PO 206	Ethics and Public Policy
PO 208	Career Readiness in Washington DC
PO 209	Environmental Politics and Policy (ENV 209)
PO 216	American Political Thought
PO 219	Feminist Political Thought (WGS 219)
PO 221	Introduction to Latin America
PO 227	The Politics of Intimacy
PO 231	Elections and Political Parties (SL: Service Learning)
PO 245	Politics of Global Capitalism
PO 247	Actors and Processes in U.S. Foreign Policy
PO 280	Congress and the President
PO 295	Internship in Political Science
PO 297	Simulating International Organizations
PO 299	Independent Study in Political Science
PO 300	Special Topics
PO 302	The Global Civic Dilemma
PO 311	Topics in International Relations
PO 312	Philosophy of War and Peace (PL 312)
PO 313	Development, Globalization and Colonialism

PO 315	Democratic Theory and Practice
PO 317	International Law (LE 317)
PO 319	International Interventions
PO 321	Comparative Government
PO 325	Political Psychology and Public Opinion
PO 326	Polling and Opinion a Quinnipiac Signature Seminar
PO 328	Politics and Governance in Africa
PO 331	Topics in Comparative Government
PO 332	European Politics
PO 334	Topics in African Politics
PO 335	Politics of Race and Ethnicity
PO 336	Contemporary Social and Political Philosophy (PL 335)
PO 337	Human Rights: Theory and Practice (PL 337)
PO 342	Comparative Constitutional Law (LE 342)
PO 349	Political Communication (MSS 349)
PO 353	American Constitutional Law (LE340)
PO 354	Civil Rights and Civil Liberties
PO 360	Topics in American Politics
PO 362	Presidential Election Campaigns (SL: Service Learning)
PO 365	Inside Washington, D.C.
PO 370	State and Local Government
PO 387	Women and Public Policy (WGS 387)
PO 390	Urban Public Policy
PO 399	Independent Study in Political Science

Total Credits 15

¹ All students must complete the University Curriculum (p. 51) requirements.

² In addition to political science courses, a student may count up to two of the cognate courses toward completion of the political science major.

Modern Language Curriculum

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

- Understanding:** Knowledge and understanding of the scope of political theory, history, diverse human interests and cultures, and a wide range of political phenomena (e.g., intercultural relations, institutions, systems of power, electoral systems, political behavior, policy issues, forms of political action, and rival accounts of political stability and change).
- Empirical Inquiry:** Ability to assess diverse theories and empirical evidence in the political science field, to independently frame a research question with a research design, and to then carry out a basic exploratory investigation.
- Normative Inquiry:** Capacity for normative analysis of politics, founded on knowledge of the core concepts and history of political theory. Major texts, multiple schools of thought, and diverse cultural theoretical perspectives.
- Responsible Engagement:** Capability for reflection on one's own experiences of action in civic or political engagement, in a way which synthesizes empirical inquiry, normative inquiry, ethical responsibility, and respect for diverse perspectives in the political world.
- Communication:** Verbal and written ability to communicate one's political judgments in clear, organized, concise and reasoned persuasive arguments, supported by analysis of moral norms, empirical evidence.

Politics Track

The politics track provides students with a general background in political issues, policies and topics according to the interests of the student. Students may select any of the electives offered in the department to complete this track. The politics track is ideal for students interested in experiencing a wide variety of topics and exploring diverse forms of political phenomena—from local government to national policy to global issues.

Public Policy and Leadership Track

The public policy and leadership track provides students with the opportunity to undertake an academic and experiential program that will develop the intellectual tools for leadership and public service in government and nongovernmental organizations. Courses and experiential programs within this concentration emphasize the study of civic engagement, leadership skills, institutional design, the policymaking process and the ethical responsibilities of leadership within an increasingly diverse community. This track is distinctive in how it

combines the study of public policy with analysis of the increasingly important ethical dilemmas of public leadership in issues of gender, race and ethnicity.

Global Affairs Track

The global affairs track provides students with the experience and intellectual tools for service and leadership in governmental and nongovernmental organizations that operate in the international/global realm. The program of study emphasizes an interdisciplinary approach to the study of politics and organization at the international level; in addition to work in political science, a student following this track is encouraged to pursue upper-level courses in anthropology, sociology, history, economics, language and management. Students may choose to further specialize with a geographic region of focus based around the study of comparative politics or an institutional focus based around the study of international law and organizations.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for BA in Political Science

A minimum of 60 credits is required for transfer into the BA in Political Science program. Students are recommended to take either Introduction

to Political Science or Introduction to International Relations (or both), as well as a data analysis or statistics course. Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Minor in Philosophy

Program Contact: Jennifer Sacco (jennifer.sacco@quinnipiac.edu)
203-582-8972

A basic understanding of philosophy complements virtually every subject, from science to the humanities. With a minor in philosophy, students discover how the wisdom of ancient philosophers applies to our modern world and study a vast array of global philosophies, cultures and religions. You will examine some of the most pressing moral and ethical questions facing the world today. You'll learn not only how to think independently and logically, but also how to effectively communicate your thoughts—essential and transferable professional skills, particularly in the fields of medicine, politics, law and teaching.

Students have the flexibility to design your minor by choosing from a wide selection of courses that explore areas such as philosophy of art, human rights, bioethics, war and technology.

Quinnipiac's minor in philosophy offers an adventure in thinking and talking about our own ideas as well as those of great philosophers, past and present, with reference to the moral life, power and wealth, and humanity's relation to nature and to the future of the planet.

Minor in Political Science

Program Contact: Jennifer Sacco (jennifer.sacco@quinnipiac.edu)
203-582-8972

Political science is profoundly relevant in fields beyond government, such as medicine, business, technology, economics and law. This minor examines the history, theory and science behind how governments operate and how they relate to the people they serve. In your classes, you will discuss politics in local, national and international contexts and explore the ways in which politics influences society.

You will have the flexibility to design a program based on your interests and that complements your major. You can choose from courses that focus on international relations, political communication, public opinion, political movements, constitutional principles, colonialism, and

presidential politics, to name a few. You are also free to experience the political arena first-hand through an internship with the Connecticut Legislature in Hartford or a local campaign. Or, you can learn about political journalism by working at a media outlet. Whatever your career ambitions, a basic foundation in political science will be an effective launching pad.

A minor in political science is awarded upon completion of 18 credits in political science with a grade of C or better. At least 6 credits must be earned at the 300 level or above. No more than 3 credits of internship in political science (PO 295 or PO 395) may count toward completion of the minor.

Political Science Minor Curriculum

QU in DC

Program Director: Scott McLean (scott.mclean@qu.edu) 203-582-8686

Quinnipiac in Washington, D.C. ("QU in DC") encompasses both individual seminars in D.C., as well as semester-long programs combining a seminar with a semester-long internship in the student's field of choice. The program is open to students in any major. Grades earned in the program automatically apply to completion of the BA degree. With major department approval, courses and internships may be counted toward completion of a major or minor. Quinnipiac financial aid applies, and Quinnipiac students are eligible for additional merit-based scholarships. Costs may vary depending on the type of D.C. internship selected, but in most cases, the net cost to the student for a semester in D.C. is equal to, or less than, the cost of a semester on the Quinnipiac campus. Internships and courses are available for students who are interested in advocacy, business, media, journalism, national security, diplomacy and public policy. Students who are interested in pursuing this program

are urged to begin the planning and consultation process with their academic advisers a year prior to the projected start of a semester in D.C. Quinnipiac students must have a 3.0 GPA or better to be eligible, and they should not be under any judicial sanctions. Students may have the GPA requirement waived by application to the QU in DC program director. For details about the programs and application deadlines, please go to the QU in DC webpage (<https://www.qu.edu/schools/arts-and-sciences/facilities-and-resources/quinnipiac-university-in-washington-dc/>) and contact the director of the program by email or at 203-582-8686.

Department of Psychology

Psychologists study phenomena such as behavior, emotions, cognitions and interactions from many perspectives. Given the diversity of ways of investigating psychological phenomena, students in both psychology and behavioral neuroscience study the discipline from several vantage points, including the biological, cognitive, social, developmental and scientist-practitioner perspectives. In this way, students come to appreciate the complexity of the field.

In both majors, the BS in Psychology and the BS in Behavioral Neuroscience, the department offers preparation for admission to graduate and professional schools and employment after graduation. Students are encouraged to engage with their learning in various ways, both in the classroom and in co-curricular activities, such as internships, independent study and/or by concentrating their studies in a particular area of psychology. They learn to design and conduct research, analyze data using statistical software and use academic search engines. Students learn the importance of first impressions and how to behave professionally. They also learn how to be self-disciplined; all seniors complete a substantial piece of scholarly work in which they demonstrate their understanding of the science of psychology or behavioral neuroscience and how these areas are connected with other areas of inquiry.

The mission of the Department of Psychology is to introduce students to the broad field of scientific psychology while offering them an education in the true liberal arts tradition. The psychology faculty members are committed to helping students become more sophisticated readers of scientific texts, more effective writers and more articulate speakers. These skills are linked to the development of critical thinking, a primary goal of the faculty. Courses require students to read primary research publications, to write in expository style and to speak their minds. Students engage in these activities as a way to learn about different kinds of research and about competing theories. The psychology program is designed to produce independent thinkers and lifelong learners.

- Bachelor of Science in Psychology (p. 263)
- Bachelor of Science in Behavioral Neuroscience (p. 266)
 - Pre-Medical Studies (p. 47)
- Minor in Psychology (p. 268)

Psychology (PS)

PS 101. Introduction to Psychology. 3 Credits.

Students are introduced to the background and breadth of contemporary psychological science. Five perspectives on the study of psychology form the basis for topics within the course, these include the biological, cognitive, social, developmental and scientist-practitioner perspectives. The course emphasizes psychology's philosophical origins, its research methods, and the relationship of the discipline of psychology with other areas of inquiry. A minimum grade of C- is required in this course to advance to any 200-level PS course.

Offered: Every year, All

UC: Social Sciences

PS 101H. Honors Introduction to Psychology. 3 Credits.

Students are introduced to the background and breadth of contemporary psychological science. Natural science, social science and applied science form the basis for topics within the course such as psychology's philosophical origins, its research methods, the study of learning, neuroscience, issues in mental illness, child development and the application of psychology to contemporary social issues. A minimum grade of C- is required in this course to advance to any 200-level PS course.

Offered: As needed

PS 199. Independent Study. 1 Credit.

PS 200. Special Topics in Psychology. 3 Credits.

Offered in response to special demands and conditions. See current announcements at time of registration (available on request at psychology department office).

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: As needed

PS 206. Introduction to Statistics in Psychology. 3 Credits.

This course covers statistical concepts and procedures as they apply to psychology. Students learn to perform statistical tests using both calculators and SPSS. Topics include: descriptive statistics, Z scores, t-tests, chi-square, correlation and analysis of variance. For Psychology and Behavioral Neuroscience majors only. Minimum grade of C- is required to pass.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit; and MA 110, MA 140, MA 141, MA 151 or MA 170.

Offered: Every year, Fall and Spring

PS 210. Human Sexuality (WGS 210). 3 Credits.

This course focuses on human sexuality, including the physiological, psychological and social aspects of sexuality. Students are encouraged to consider diverse perspectives, e.g., in sexual orientation, experiences, beliefs and behaviors. Additional course topics include: domestic violence, abuse, sexual assault and harassment.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: Every year, Fall and Spring

UC: Social Sciences, Intercultural Understand

PS 232. The Concept of Personality and Its Development. 3 Credits.

Personality is viewed from a variety of perspectives, including theories of its formation, social functioning and human evolution. Certain theories are examined, as are philosophical implications underlying diverse models of the nature of personality.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: Every year, All

UC: Social Sciences

PS 233. Cognitive Psychology. 3 Credits.

Cognition is studied from a multi-method perspective with an emphasis on information-processing. Topics include models of memory, memory distortion, perception, expertise, cognitive neuroscience, imagery, problem solving, language and cognitive development. The interrelationship between applied and basic research is emphasized.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: Every year, Fall and Spring

PS 234. Adult Development & Aging (GT 234). 3 Credits.

Facts, theory and current issues in adult development and aging are covered in this course, which focuses on physical, cognitive and psychosocial development as well as family and career patterns.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: Every year, Fall and Spring

UC: Social Sciences

PS 235. Communicating Effectively: A Cognitive Perspective. 3 Credits.

What do turn signals, lions' roars, and this paragraph have in common?

They're all forms of communication. Not only is communication everywhere, but employers consistently list effective communication as a skill that they look for in new hires. What is communication? How can we learn to communicate more effectively? We will explore these questions using traditional topics (e.g., attention, memory, judgment and decision-making) and methods from Cognitive Psychology.

Prerequisites: Take PS 101; Minimum grade C-,TR;

Offered: As needed

PS 236. Child and Adolescent Development. 3 Credits.

Prenatal period, infancy, early childhood, middle childhood and adolescence are surveyed in terms of an individual's physical, cognitive and social/emotional development. Students learn about the major theories and research methods used by developmental psychologists. Results of research studies are used to think about real-world applications.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: Every year, Fall and Spring

UC: Social Sciences

PS 242. School Psychology. 3 Credits.

Theoretical and pragmatic concerns of the school psychologist are considered. Topics include child development, psychoeducational assessment, applied behavior analysis, special education legislation, and the role of the public schools as a social institution. Identification and treatments of various school-related exceptionalities such as learning and intellectual disabilities, speech and language disorders, autism, ADHD and giftedness are investigated.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: As needed

PS 244. Psychology of Prejudice. 3 Credits.

This course presents an analysis of intergroup discrimination and prejudice. The focus is on group and individual determinants of factors that produce this social phenomenon. Insights from disciplines of history, economics and sociology are included, as well as an overview of the successes and failures of the theories and programs to reduce prejudice.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: As needed

UC: Social Sciences, Intercultural Understand

PS 245. Exploring Psychological Perspectives through Film. 3 Credits.

This course adopts a real-world approach to psychology by focusing on how the classic and contemporary films we watch and enjoy influence our identity, our behaviors, and our attitudes. The course also demonstrates how five psychological perspectives (developmental, cognitive, physiological, scientist-practitioner, and social) are incorporated into popular films.

Prerequisites: Take PS 101;

Offered: As needed

PS 250. Parenting Science. 3 Credits.

This course surveys research topics that pertain to effective parenting, such as parental discipline practices, and the effects of media on development. Research is drawn from fields such as developmental psychology, cognitive psychology, abnormal psychology and anthropology.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: As needed

PS 251. Introduction to Conditioning and Learning. 3 Credits.

This course introduces students to the history, philosophical bases and contemporary issues in respondent and operant conditioning in particular and in learning in general. It surveys current applications of basic theory and research including behavior modification, and examines the social controversy generated by applications.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: As needed

PS 252. Physiological Psychology. 3 Credits.

This course is an introduction to the interactions between biological and psychological processing that are the basis for emotion, cognition and behavior. Topics include research methods, brain structure and function, neural plasticity, sleep, learning, memory, reproduction, drug action, sensation, perception and psychological disorders.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: Every year, All

PS 261. Social Psychology. 3 Credits.

This course examines the effect of social forces on the individual, and the role of the situational context in human behavior. Topics include attitudes and behavior, issues in social cognition, attributions, helping behavior, interpersonal relationships, group dynamics, aggression, stereotypes, cross-cultural psychology, and aspects of social psychology and law.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: Every year, Fall and Spring

UC: Social Sciences

PS 262. Psychology of Women and Gender (WGS 262). 3 Credits.

In this course, students examine the complexity of gendered experiences from a psychological science perspective and explore the research regarding gender differences and gender relations. Many approaches are taken to understand gender, including biological, social, evolutionary, cognitive and cultural points of view. The goal is for students to appreciate the complexities of gender and to challenge one's assumptions and judgments about gender.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: Every year, Fall

UC: Social Sciences, Intercultural Understand

PS 265. Psychology in the Workplace. 3 Credits.

This course takes a scientist-practitioner perspective in psychology to examine the application of psychological principles and practices to business, industrial and organizational settings. The course explores the ways Industrial-Organizational (I-O) psychologists study and develop evidence-based interventions for such issues as job analysis, personnel selection, training, performance appraisal, employee attitudes, worker motivation, occupational stress and health, leadership, teams and organizational development.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: Every year, All

UC: Social Sciences

PS 272. Abnormal Psychology. 3 Credits.

Causes, description and classifications of abnormal behavior and "mental illness" are explored, along with theories of psychopathology. Both historical and contemporary approaches to understanding mental health problems and their treatment are examined, with an emphasis on evidence-based approaches to mental health care.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: Every year, All

UC: Social Sciences

PS 272H. Honors Abnormal Psychology. 3 Credits.

Causes, description and classifications of abnormal behavior and "mental illness" are explored, along with theories of psychopathology. Both historical and contemporary approaches to understanding mental health problems and their treatment are examined, with an emphasis on evidence-based approaches to mental health care.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: As needed

PS 283. Introduction to Forensic Psychology. 3 Credits.

Students learn about both the theoretical and applied components to the field of forensic psychology. The theoretical aspect of the course addresses criminality from a psychological perspective by examining theories of aggression, for example. Applied sections of the course explore the intersection of psychology and the legal system as well as crime scene behavioral analysis and offender profiling.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: As needed

PS 284. LGBTQ Identities and Communities (SO/WGS 284). 3 Credits.

This course explores the social, socioeconomic, historical, psychological, and political factors that have contributed to our understanding of what it means to be gay, lesbian, bisexual, transgender, or queer (LGBTQ). Psychological research on identity development, the social construction of identity, and the psychological, social, and political benefits associated with "identifying" as LGBTQ, are discussed. The course explores historical events that led to the development of LGBTQ communities and the benefits of being involved in these communities, including the positive impact of allies. Finally, the course explores the positive and negative effects of the LGBTQ community becoming more mainstream.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: As needed

UC: Social Sciences, Intercultural Understand

PS 290. The Psychology of Self-Improvement: Popular and Scientific Perspectives. 3 Credits.

This course provides an introduction to the popular and scientific psychological literature related to self-improvement. Students learn about important concepts such as mindset, grit, goal-setting, procrastination, as well aspects of health psychology (e.g., sleep, nutrition, and exercise) and the importance of social relationships. Students also gain a greater facility with reading and critically evaluating different types of literature and navigating conflicting claims of self-improvement.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: As needed

PS 299. Independent Study in Psychology. 1-6 Credits.

Prerequisites: Take PS 101; Minimum grade C- or transfer credit.

Offered: As needed

PS 300. Special Topics in Psychology. 3 Credits.

Offered in response to special demands and conditions. See current announcements at time of registration (available on request at psychology department office).

Prerequisites: Take two courses from psychology.

Offered: As needed

PS 307. Introduction to Research Methods in Psychology with Lab. 4 Credits.

This course provides an introduction to the tools, methods and findings of classic and contemporary experimental and non-experimental psychology. Topics include logical reasoning, statistical inference, research ethics, research design and APA style report writing. Course includes both lecture and lab components. For Psychology and Behavioral Neuroscience majors. Minimum grade of C- is required to pass.

Prerequisites: Take PS 206; Minimum grade C-.

Offered: Every year, Fall and Spring

PS 308. Advanced Research Methods in Psychology with Lab. 4 Credits.

This course builds on the statistical analyses, experimental methods and nonexperimental methods learned in PS 206 and PS 307. Each section focuses on a different area of study in psychology or neuroscience. Students design, conduct and formally present a major piece of psychological research, including statistical analysis, on a topic in that research area. Course includes both lecture and lab components. For Psychology and Behavioral Neuroscience majors only. Minimum grade of C- is required to pass.

Prerequisites: Take PS 307; Minimum grade C-.

Offered: Every year, Fall and Spring

PS 309. History of Psychology. 3 Credits.

This is a course for advanced psychology majors. It covers philosophies dating back to ancient Greece. Participants review the history of scientific thought and of brain science. They trace the emergence of the science of psychology and the development of different systems of thought or theoretical perspectives within psychology. Students compare and contrast psychological perspectives in terms of how they have both deepened and limited our understanding. This course is taken in the senior year.

Prerequisites: Take PS 307.

Offered: As needed

PS 320. Psychology of Sport and Exercise (SPS 320). 3 Credits.

This course provides an overview of psychological research related to sport and exercise. Topics from a variety of perspectives within psychology are covered, including personality, motivation, group dynamics, concentration and health and well-being. The course emphasizes the importance of a thorough understanding of underlying theoretical concepts as well as practical applications to teaching, coaching and one's personal exercise regimen.

Prerequisites: Take two courses from psychology.

Offered: Every other year, Fall

PS 325. Health Psychology. 3 Credits.

The application and contribution of psychological research and practice to the promotion and maintenance of health and the prevention and treatment of illness are explored. Topics covered include stress and illness, psychological aspects of pain, management of chronic and terminal illness, obesity, smoking and other addictive behaviors, sleep disturbances, personality factors in illness and patient-practitioner interaction.

Prerequisites: Take one 200-level psychology course.

Offered: As needed

PS 333. Applied Cognition. 3 Credits.

Through hands-on projects and active engagement, students learn how principles of cognitive psychology are applied in the modern workforce. Some of the topics explored include consumer psychology and behavioral design, human factors and ergonomics, and data science. By applying cognitive principles to real-world problems, students gain a deeper understanding of cognitive findings and theories and learn about the opportunities and necessary skills for pursuing a career related to cognitive psychology.

Prerequisites: Take PS 233.

Offered: As needed

PS 353. Research Methods in Behavioral Neuroscience. 3 Credits.

This course provides a comprehensive view of biological and physiological psychology and the methods utilized in behavioral neuroscience research. Topics may include measurement and techniques of animal behavior, ethics and guidelines associated with neuroscience research, logic of experimental design, immunohistochemistry, ELISA, neurophysiology, gross anatomy and scientific presentation skills. This is a recommended course for behavioral neuroscience majors and gives students a background to succeed in research endeavors. A minimum grade of C- is required to pass this course.

Prerequisites: Take PS 252; and PS 307 or BIO 298.

Offered: Every year, Fall

PS 354. Sensation and Perception. 3 Credits.

This course considers the sensory systems as gateways to the mind. Psychological mechanisms of vision, audition, taste, smell, pain and other senses are explored, as well as the psychophysics, anatomy and physiology of these sensory systems.

Prerequisites: Take PS 233 or PS 252.

Offered: Every year, Fall

PS 355. Advanced Psychology of Learning. 4 Credits.

This course presents an advanced study of the history, philosophical bases and contemporary issues in respondent and operant conditioning in particular, and in learning in general; a survey of current applications of basic theory and research including behavior modification; and examination of the social controversy generated by such applications. Lab accompanies the course.

Prerequisites: Take one 200-level psychology course.

Offered: As needed

- PS 355L. Psychology of Learning Lab.** **0 Credits.**
Lab to accompany PS 355.
Offered: As needed
- PS 357. Drugs, Brain and Behavior.** **3 Credits.**
This course introduces students to the effects and mechanisms of action of psychoactive drugs. Drugs used in the treatment of psychological disorders as well as drugs of abuse are covered. In addition to describing basic principles of neuropharmacology, the course covers theories of tolerance, dependence and abuse in depth. Pharmacotherapy for substance abuse and major mental disorders is described from both a biological and clinical perspective. A minimum grade of C- in PS 252 is required to take this course.
Prerequisites: Take PS 252; Minimum grade C-.
Offered: Every year, Spring
- PS 359. Psychology Elective.** **3 Credits.**
- PS 360. Psychology of Meditation.** **3 Credits.**
This course investigates the similarities and differences in meditation made by Western scientific approaches and the Buddhist traditions from which they primarily derive and hold them both up to experiential and scientific scrutiny. We will consider modern Western psychological evidence for the benefits of meditation associated with physical, emotional, and mental health. We will spend a lot of time "meditating" or more precisely, observing, becoming familiar with, and transforming, the only mind we can have any direct, first-person experience of; our own. Topics will include mindfulness-based approaches to physical and psychological well-being, cultivation of positive emotions and various ways of dealing with negative emotions.
Prerequisites: Take two 200-level psychology courses
Offered: As needed
- PS 366. Advanced Personnel Psychology.** **3 Credits.**
This course presents an in-depth exploration of the traditional ideas and innovations of industrial psychology. Topics include, but are not limited to: recruitment and selection of employees, development and implementation of performance appraisal systems, issues involved in training employees, employment law and labor-management relations.
Prerequisites: Take PS 265.
Offered: As needed
- PS 367. Advanced Organizational Psychology.** **3 Credits.**
The history and new developments within organizational psychology are examined closely. Topics include, but are not limited to: organizational theory, research and theories of leadership, leadership development, motivating employees, job attitudes, teamwork, work-family balance and workplace stress.
Prerequisites: Take PS 265.
Offered: As needed
- PS 368. Occupational Health Psychology.** **3 Credits.**
This course explores the history and development of research and practice in the field of occupational health psychology. Topics include, but are not limited to, stress theories and models, specific stressors and strains, safety, employee health and well-being, work schedules, the work/non-work interface and occupational health interventions.
Prerequisites: Take PS 265.
Offered: As needed
- PS 371. Clinical Psychology.** **3 Credits.**
The principles and practices of clinical psychology are introduced. The course includes a review of legal-ethical issues and the training of clinical psychologists. The course focuses on methods of clinical assessment and the practice of psychotherapy, including extensive use of case studies.
Prerequisites: Take PS 272.
Offered: Every year, Spring
- PS 372. Child Psychopathology.** **3 Credits.**
This course provides students with an understanding of child and adolescent problems within the framework of developmental and child clinical psychology. Theoretical and methodological issues are addressed early in the course. Thereafter, the nature, etiology and treatment of a wide range of psychological disorders affecting children from infancy through adolescence is examined.
Prerequisites: Take PS 272.
Offered: As needed
- PS 373. Positive Psychology.** **3 Credits.**
This course reviews and evaluates recent developments in positive psychology. Historical foundations are discussed, including the work of William James and Abraham Maslow. Research on resilience, positive coping and post-traumatic growth are covered, as well as topics such as gratitude, forgiveness, compassion, happiness and mindful meditation.
Prerequisites: Take PS 272.
Offered: As needed
- PS 383. Psychology and the Law.** **3 Credits.**
Psychological science offers much in understanding and reforming our legal system with empirical research regarding criminal investigations, trials, and the punishment and rehabilitation of adults and adolescents. The course explores police interrogations; the myth of deception detection; false confessions; eyewitness identifications and testimony; pseudoscientific and scientific forensic testing; judicial and jury decision making; and adolescent experiences in facilities.
Prerequisites: Take two psychology courses.
Offered: As needed
- PS 391. Applied Clinical Science Seminar (SL: Service Learning).** **3 Credits.**
For psychology majors in the applied clinical science concentration only. Professional, theoretical, clinical and ethical issues related to each student's fieldwork experience represent the content of the course. Students are simultaneously registered in PS 393.
Prerequisites: Take PS 371.
Offered: Every year, Fall
- PS 393. Fieldwork in Applied Clinical Science (SL: Service Learning).** **3 Credits.**
For Psychology majors in the applied clinical science concentration only. Students are placed in a community service agency to gain supervised experience in applied clinical programs. Placements total a minimum of 120 hours during the semester, and may include youth counseling agencies, rehabilitation services, mental health clinics, research sites, centers for people with mental retardation, psychiatric hospitals, schools for special populations and others. Due to a commitment of services to clients or patients, particularly strict standards of attendance and responsibility are maintained. PS 393 is taken in conjunction with PS 391. All students in PS 393 must plan to take PS 394 in the spring semester. This course is graded pass/fail.
Prerequisites: Take PS 371.
Offered: Every year, Fall

PS 394. Fieldwork in Applied Clinical Science (SL: Service Learning). 3 Credits.

For psychology majors in the applied clinical science concentration only. Students are placed in a community service agency to gain supervised experience in applied clinical programs. Placements total a minimum of 120 hours during the semester, may include youth counseling agencies, rehabilitation services, mental health clinics, research sites, centers for people with mental retardation, psychiatric hospitals, schools for special populations and others. Due to a service commitment to clients or patients, particularly strict standards of attendance and responsibility are maintained. This course is graded pass/fail.

Prerequisites: Take PS 391, PS 393.

Offered: Every year, Spring

PS 397. Fieldwork in Industrial/Organizational Psychology. 3 Credits.

For psychology majors in the industrial-organizational concentration only. Students are placed in a corporation or consulting firm under the supervision of an industrial-organizational psychologist or HR manager. A minimum of 120 hours of work is required. Due to a commitment to professionalism, particularly strict standards of attendance and responsibility are maintained. This course is graded on a pass/fail basis.

Offered: As needed

PS 399. Independent Study in Psychology. 1-6 Credits.

Pursuit in depth of a specific topic or area. Topics and expected outcome must be specified in advance, groups interested in the same topic may meet together.

Offered: As needed

PS 401. Integrative Capstone for Psychology and Behavioral Neuroscience Majors. 3 Credits.

This seminar is the capstone course for Psychology and Behavioral Neuroscience seniors only. It consists of extensive readings of original research, theory and history on a topic selected by the student under the guidance of the professor. A senior thesis, written according to departmental standards, is a central part of the requirement. As a capstone course, this course must be taken as a seminar during the academic year and cannot be taken as a tutorial. Most sections are offered in the spring. Senior standing required. This course counts as the university's Integrative Capstone requirement for PS and BNS majors.

Prerequisites: Take PS 308 or PS 353; Minimum grade C-.

Offered: Every year, Fall and Spring

PS 409. Senior Seminar in Psychology. 3 Credits.

This seminar is the capstone course for psychology seniors only. It consists of extensive readings of original research and theory on a topic selected by the student under the guidance of the professor. A senior thesis, written according to departmental standards, is a central part of the requirement. As a capstone course, this course must be taken as a seminar during the academic year and cannot be taken as a tutorial. Most sections are offered in the spring. Senior standing required.

Prerequisites: Take PS 308 or PS 353.

Offered: As needed

PS 499. Independent Study in Psychology. 1-6 Credits.

Same as PS 399 but on the senior level. Topic and objective must be specified in advance. Students limited to a maximum of six hours of independent study per year, unless warranted by exceptional circumstances.

Prerequisites: Take PS 307, PS 308.

Offered: As needed, All

Bachelor of Science in Psychology

Program Contact: Paul LoCasto (Paul.LoCasto@qu.com) 203-582-3725

Psychology explores phenomena from multiple perspectives and is an ideal starting point for many careers. Our students go on to graduate level work in psychology and pursue careers in a wide range of fields including school psychology, industrial-organizational psychology, and many mental health fields. This degree also prepares students for success in fields such as law, education and business, which require strong critical-thinking skills and a solid understanding of interpersonal relationships. In this program, students work with experienced faculty members who research intriguing topics, such as how we read stories, workplace relationships, aggressive behaviors, and mindfulness.

Academic studies will be augmented by lab courses that involve designing psychological studies and collecting data. Students can participate in supervised fieldwork in one of our concentrations to gain experience applying their knowledge of psychology to a real-world setting. Quinnipiac provides real-world experience based on students' interests. In addition to participating in summer research projects at institutions across the country, our students have interned at a battered women's center, psychiatric in-patient clinics and national corporations. Our psychology majors graduate well prepared to enter the workforce or to pursue an advanced degree.

BS in Psychology Curriculum

In addition to the lab-based science required by the University Curriculum, psychology majors are required to complete one additional lab-based science course outside of psychology, one additional social science outside of psychology, one course that explores issues of multiculturalism and/or diversity, and a foreign language up to the 102 level. *NOTE:* The department strongly encourages psychology majors to take courses in biology.

Students majoring in psychology must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Psychology Requirements		
Psychological Science Core		
PS 101	Introduction to Psychology ²	3
PS 206	Introduction to Statistics in Psychology ²	3
PS 307	Introduction to Research Methods in Psychology with Lab ²	4
PS 308	Advanced Research Methods in Psychology with Lab ²	4
PS 401	Integrative Capstone for Psychology and Behavioral Neuroscience Majors ³	3
Psychology Perspectives		
Biological Perspective (select one) ⁴		3
PS 252	Physiological Psychology	
Cognitive Perspective (select one) ⁴		3
PS 233	Cognitive Psychology	

PS 235	Communicating Effectively: A Cognitive Perspective	
Developmental Perspective (select one) ⁴		3
PS 236	Child and Adolescent Development	
Social Perspective (select one) ⁴		3
PS 261	Social Psychology	
Scientist-Practitioner Perspective (select one)		3
PS 272	Abnormal Psychology	
PS 265	Psychology in the Workplace	
Psychology Electives		
Select one psychology course at the 200 level or higher		3
Select one psychology course at the 300 level		3
Additional Degree Requirements		
Select one additional Natural Science course with a Lab		4
Select one Diversity/Multicultural course		3
Select one Social Science course outside of Psychology		3
Free Electives		23
Total Credits		120-123

¹ All students must complete the 46 credits of the University Curriculum (p. 51).

² Students must earn a grade of C- or higher before moving on to the next course.

³ Senior standing required. Must be taken as a seminar during the regular academic year.

⁴ Additional courses may be designated to fulfill this requirement.

Psychology majors also have the opportunity to engage in supervised fieldwork and intensive study within one of three concentrations.

Applied Clinical Science Concentration

Students may apply to enroll in the applied clinical science (ACS) concentration within the psychology major. The program prepares students for careers related to clinical psychology and provides the basis for graduate work in fields such as social work, counseling and school psychology. A minimum 3.0 overall GPA is required to participate in the ACS concentration fieldwork courses. Space is limited in the fieldwork courses and, therefore, in some years enrollment in the concentration may be awarded on a competitive basis.

ACS students must take:

Code	Title	Credits
PS 272	Abnormal Psychology	3
PS 371	Clinical Psychology	3
PS 391	Applied Clinical Science Seminar (SL: Service Learning)	3
PS 393	Fieldwork in Applied Clinical Science (SL: Service Learning)	3
PS 394	Fieldwork in Applied Clinical Science (SL: Service Learning)	3
Total Credits		15

The ACS program emphasizes:

- Mental health fields as possible careers.
- Conceptions of mental illness, both past and present.
- Evidence-based treatment techniques in clinical psychology and related fields.

Applied Cognition Concentration

The applied cognition concentration focuses on providing students with the opportunity to gain job-relevant skills while exploring cognition. Students are exposed to major theories and methods in cognitive psychology, along with applications of cognitive psychology to the workplace (e.g., design thinking, task analysis, survey design) and careers that use insights and methods from cognitive psychology (e.g., behavioral engineering). Because cognitive psychology draws on a range of disciplines, students will also have the opportunity to explore cognition from a different field.

Applied Cognition students must take:

Code	Title	Credits
PS 233	Cognitive Psychology	3
PS 333	Applied Cognition	3
Elective ¹		3
Skill-Building ²		3

¹ Elective from a related discipline (e.g. computer science, philosophy, industrial or software engineering) to be decided upon by student in consultation with a faculty member in the cognitive perspective.

² Skill-building through internship, independent research, or relevant training (e.g. certification of technical skill) to be decided upon by student in consultation with a faculty member in the cognitive perspective.

The Applied Cognition program emphasizes:

- Applying theories and methods from cognitive psychology to real-world contexts
- Exploring and experiencing multidisciplinary careers in cognitive psychology
- Building marketable skills that are relevant for a range of careers (e.g., public speaking, collaboration), as well as specific skills that are relevant for jobs in cognitive psychology (e.g., task analysis, survey design)

Applied Work and Organizational Psychology Concentration

Students may elect to enroll in the applied work and organizational psychology program within the psychology major. The program exposes students to career possibilities in industrial-organizational (I-O) psychology areas and provides the basis for further study related to fields such as I-O psychology and management. Applied work and organizational psychology students must take:

Code	Title	Credits
PS 265	Psychology in the Workplace	3
PS 397	Fieldwork in Industrial/Organizational Psychology	3
Select one of the following:		3
PS 366	Advanced Personnel Psychology	

PS 367 Advanced Organizational Psychology

PS 368 Occupational Health Psychology

Total Credits 9

The applied work and organizational psychology program emphasizes:

- Using psychological principles to study and improve working conditions.
- Developing and practicing marketable skills that are relevant for a range of careers (e.g., public speaking, collaboration), as well as specific skills that are relevant for jobs in industrial-organizational psychology or human resource management (e.g., job analysis, test validation, training design).
- Gaining relevant, hands-on experience in careers related to industrial-organizational psychology and human resource management.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes ¹

- Breadth of Knowledge of Psychology:** Use and evaluate various psychological perspectives to evaluate and predict complexities in affect, behavior and cognition; understand the history of the field and how psychology fits with other disciplines.
- Scientific Reasoning:** Conduct, interpret and evaluate scientific studies in terms of the reliability, validity and generalizability of the research designs; develop open-mindedness, curiosity and amiable skepticism toward claims.
- Ethical Responsibility:** Apply ethical standards to research and practice situations; demonstrate interpersonal sensitivity in work and communities.
- Communication Skills:** Demonstrate flexibility and clarity of argument in both written and oral communication.
- Personal Development:** Apply psychological thinking to issues encountered in work and personal life, such as using evidence to solve problems; engage in teamwork as well as self-reflection and self-management.

¹ *Note, our discussion draws upon APA Guidelines for the Undergraduate Psychology Major.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in

the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for BS in Psychology

A minimum of 60 credits is required for transfer into the BS in Psychology program. Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Course	Title	Credits
First Year		
Fall Semester		
English I		3
Statistics		3
General Psychology I		3
Elective		3
Elective		3
Credits		15
Spring Semester		
English II		3
Psychology Elective		3
Elective		3-4
Elective		3
Elective		3
Credits		15-16
Second Year		
Fall Semester		
Abnormal Psychology		3
Elective		3-4
Elective		3
Elective		3

Elective	3
Credits	15-16
Spring Semester	
Psychology Elective	3
Elective	3
Elective	3
Elective	3
Elective	3
Credits	15
Total Credits	60-62

Please note: The BS in Psychology program at Quinnipiac University requires at least 50% (24 credits) of the psychology major requirements to be taken at Quinnipiac.

Bachelor of Science in Behavioral Neuroscience

Program Contact: Todd Ahern (Todd.Ahern@quinnipiac.edu)
203-582-6402

Behavioral neuroscience is an interdisciplinary field that studies brain and behavior in a multifaceted and integrative way. The behavioral neuroscience major is a course of study that emphasizes the interaction between the psychological and biological foundations of behavior. Behavioral neuroscience majors choose one of two tracks (Natural Science track or Psychological Science track) based on their individual goals and interests. Students can participate in supervised concentrations offered in our department to gain experience in applying their knowledge of psychology to a real-world setting.

The Natural Science track is a science-intensive program that provides training to students who have primary interests in the biological sciences as applied to psychology and behavior. The curriculum in this track can fulfill the science prerequisites for most professional schools such as medical school and students may fully participate in the Pre-Medical Studies program. Students are eligible for participating in the Master of Science in Molecular and Cell Biology program (p. 168) or the Master of Health Sciences in Biomedical Sciences (p. 792) and their respective dual-degree programs (p. 153).

The Psychological Science track includes a core set of courses in biology, chemistry and physics, but is more psychology-intensive than the Natural Science Track. This track would be appropriate for those who are most interested in aspects of psychology that are most directly related to physiology and brain function, and how they relate to behavior. The curriculum in this track prepares students for entry to graduate programs or employment in behavioral neuroscience and related fields.

Students seeking a BS in Behavioral Neuroscience must complete requirements for the University Curriculum and a foreign language up to the 102 level. Initial placement in English and mathematics scores is determined by examination and evaluation of high school units presented. Within the major, behavioral neuroscience students take a set of courses that emphasize scientific reasoning. After taking PS 101, all majors take PS 206, PS 307, PS 308 or PS 353, and PS 401 in separate semesters. The capstone course, PS 401, must be taken in the senior year, taken as a seminar during the regular academic year, and following completion of PS 308 or PS 353. In each of the following sequence courses, students must earn a grade of C- or higher before moving on to

the next course: PS 206, PS 307, PS 308 or PS 353. **Students must earn a grade of C- or higher** in PS 101 before moving on to any 200-level PS courses and in PS 252 before moving on to the PS 357 course. All majors are encouraged to work closely with their academic adviser to plan their progress through the major.

BS in Behavioral Neuroscience: Natural Science Track

Students on the natural science track must complete a biological and physical science core, and a psychology core.

BIO 151	Molecular and Cell Biology and Genetics	4
CHE 110	General Chemistry I	3
CHE 111	General Chemistry II	3
PS 101	Introduction to Psychology	3

¹ All students must complete the 46 credits of the University Curriculum (p. 51).

² Some of these courses can fulfill the University Curriculum requirements.

³ Students who do not directly place into MA 141 should take MA 140.

All majors are encouraged to work closely with their academic adviser to plan their progress through the major.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes¹

- Breadth of Knowledge of Psychology:** Use and evaluate various psychological perspectives to evaluate and predict complexities in affect, behavior and cognition; understand the history of the field and how psychology fits with other disciplines.
- Scientific Reasoning:** Conduct, interpret and evaluate scientific studies in terms of the reliability, validity and generalizability of the research designs; develop open-mindedness, curiosity and amiable skepticism toward claims.

- c. **Ethical Responsibility:** Apply ethical standards to research and practice situations; demonstrate interpersonal sensitivity in work and communities.
- d. **Communication Skills:** Demonstrate flexibility and clarity of argument in both written and oral communication.
- e. **Personal Development:** Apply psychological thinking to issues encountered in work and personal life, such as using evidence to solve problems; engage in teamwork as well as self-reflection and self-management.

¹ Note, our discussion draws upon American Psychological Association's (APA) Guidelines for the Undergraduate Psychology Major.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Pre-Medical Studies Program

Students majoring in Health Science Studies, Biology, Biomedical Sciences or the natural science track of Behavioral Neuroscience may fully participate in the pre-medical studies program. The curriculum in this degree program can fulfill the science prerequisites for most professional schools. Students should refer to Pre-Medical Studies (p. 47) for more information about the pre-medical studies program and contact the Health Professions Advisory Committee for further academic advising.

Minor in Psychology

Program Contact: William Jellison (William.Jellison@qu.edu)
203-582-3724

Psychology is a fascinating and complex discipline with a rich history and a range of subfields that intersect in some capacity with nearly every other field of academic study. The minor allows you to select topics that most complement your academic and career goals. Courses offered focus on the major perspectives in the field (namely, the biological, cognitive, social, developmental and scientist-practitioner) as well as other specialized areas of interest (e.g., clinical psychology, school psychology, forensic psychology and health psychology).

The minor requires 18 credits of psychology courses, no more than 6 of which can be at the 100 level. Course selection should be based on the student's interest and goals; however the following courses are reserved for majors only: PS 206, PS 307, PS 308, PS 353, PS 391, PS 393, PS 394 and PS 401.

Psychology Minor Curriculum

Students wishing to minor in psychology take 18 credits in psychology. No more than two courses (6 credits) may be at the 100 level. Course selection should be based on the student's interest and goals.

Code	Title	Credits
Possible courses include:		
PS 101	Introduction to Psychology	3
PS 200	Special Topics in Psychology	3
PS 210	Human Sexuality (WGS 210)	3
PS 232	The Concept of Personality and Its Development	3
PS 233	Cognitive Psychology	3
PS 234	Adult Development & Aging (GT 234)	3
PS 235	Communicating Effectively: A Cognitive Perspective	3
PS 236	Child and Adolescent Development	3
PS 242	School Psychology	3
PS 244	Psychology of Prejudice	3
PS 245	Exploring Psychological Perspectives through Film	3
PS 250	Parenting Science	3
PS 251	Introduction to Conditioning and Learning	3
PS 252	Physiological Psychology	3
PS 261	Social Psychology	3
PS 262	Psychology of Women and Gender (WGS 262)	3
PS 265	Psychology in the Workplace	3
PS 272	Abnormal Psychology	3
PS 283	Introduction to Forensic Psychology	3
PS 284	LGBTQ Identities and Communities (SO/WGS 284)	3
PS 290	The Psychology of Self-Improvement: Popular and Scientific Perspectives	3
PS 300	Special Topics in Psychology	3
PS 320	Psychology of Sport and Exercise (SPS 320)	3
PS 325	Health Psychology	3
PS 333	Applied Cognition	3
PS 354	Sensation and Perception	3
PS 355	Advanced Psychology of Learning	4
PS 357	Drugs, Brain and Behavior	3
PS 360	Psychology of Meditation	3
PS 366	Advanced Personnel Psychology	3
PS 367	Advanced Organizational Psychology	3
PS 368	Occupational Health Psychology	3
PS 371	Clinical Psychology	3
PS 372	Child Psychopathology	3
PS 373	Positive Psychology	3
PS 383	Psychology and the Law	3

The following courses are reserved for majors only:

Code	Title	Credits
PS 206	Introduction to Statistics in Psychology	3
PS 307	Introduction to Research Methods in Psychology with Lab	4
PS 308	Advanced Research Methods in Psychology with Lab	4
All Psychology Internship Courses		
PS 353	Research Methods in Behavioral Neuroscience	3
PS 401	Integrative Capstone for Psychology and Behavioral Neuroscience Majors	3

Department of Sociology and Anthropology

The Department of Sociology and Anthropology embraces a range of disciplines and their related subfields: anthropology, gerontology and sociology. Our graduates are represented in careers such as social work, teaching, healthcare, politics, law, nonprofits, public administration and social policy. In addition to course content, students who choose one of these majors or minors acquire a valuable set of skills useful in their future professions or in graduate education, including:

Diversity Awareness. Students go outside their comfort zone to not only witness but identify with and appreciate the perspective of diverse groups.

Social Scientific Literacy. Students learn the logic of research methodology and are able to understand and critique the results of scientific research generated by scholars in the discipline.

Critical Thinking. Students apply disciplinary theories and concepts to interpret various social phenomena and scholarship from multiple perspectives through clear oral and written articulation.

Sociological Understanding of Society. Students discuss the theories, critical concepts and ideas that form the basis of disciplinary knowledge and understand how social structure affects the distribution of cultural and material resources across social groups.

The department offers majors in Sociology and Gerontology. More information about the different options is available on the Majors tab (p. 269). Coursework in the department provides students with skills that make them invaluable as workers, as community leaders and as citizens of a diverse, interconnected nation and world. Our majors graduate with the ability to appreciate diversity, to facilitate discussions across diverse viewpoints, to gather and assess evidence, and to evaluate programs and then “think outside the box” to act as leaders of innovation and change in the workplace.

The core of the Sociology and Gerontology majors is our internship program. As one of the first departments at Quinnipiac to have centered our majors around an applied internship, we have 35 years of experience in helping students translate their classroom knowledge into real-world, in-demand job skills. In addition to rigorous academic preparation, the department stresses the applicability and usefulness of this training

through an upper-division experience in any number of internships at professional settings.

Anthropology, Gerontology and Sociology are united by a core set of classes designed to cultivate an appreciation for social and cultural diversity as well as to give students applied data analysis skills relevant to a career in any field. Students are taught to observe the ways that social and cultural forces shape both groups and individuals, and are provided with the skills of scientific inquiry that will enable them to be critical thinkers who can analyze the causes and consequences of social interaction in a wide range of settings.

Majors in the Department Sociology

Sociology is the discipline of understanding society and social groups. Quinnipiac University offers a sociology degree, in which students can choose all their elective coursework from courses within the program, or students may choose a concentration in social services or in medicine and health to focus their course of study. Through their study, students learn how groups interact and the social reasons for individual and group behaviors. Coursework is enriched by a required internship. Internships let students apply their classroom experiences in professional settings. Our internship program is unique as we meet with each student to assess their professional interests before recommending appropriate internship sites. In addition to 120 hours at the internship site, students participate in a weekly seminar to connect skills they take from the internship to their coursework and to form a community among their peers. Sociology majors also have the option to complete two different internships that teach them about working in diverse settings. Our major equips students with the applied skills, capabilities and work experience to enable them to begin careers immediately upon graduation or to pursue graduate education in related areas. As such, sociology is applicable to a wide range of fields for which understanding groups, social interactions and diversity are essential: social work, teaching, healthcare, politics, law, nonprofits, public administration and social policy among others. Our program requirements incorporate the skills needed for the 21st-century workforce: diversity awareness, critical thinking, quantitative social scientific reasoning and a sociological understanding of society.

Gerontology

Older Americans comprise the fastest growing age group in the country and careers in aging are growing right along with the elderly population. Our state-licensed interdisciplinary program in gerontology focuses on the diverse needs and characteristics of America’s rapidly growing senior population. This program builds the foundation for you to enter a rewarding profession in a field with incredible demand—among the highest of all occupational fields. Our program is intentionally designed to blend the academic and the professional from your first year through your senior year. You will build your knowledge of aging and older people with diverse topical courses in gerontology, sociology, psychology and biology. You’ll also develop skills with courses on research methods and statistics, which provide valuable tools for any career. During your junior year and under the direction of our dedicated internship coordinator, you’ll continue to incorporate professional skills, build ties to the community, and connect with potential employers in our required year-long internship. In your senior year, you will have the opportunity to synthesize your knowledge and skills by writing a grant proposal in our senior seminar. This course integrates content, skills, and professional connections in the community to prepare you for excellence in any career you may choose in the field of gerontology.

- Bachelor of Arts in Gerontology (p. 278)
- Bachelor of Arts in Sociology (p. 279)
- Accelerated Dual-Degree Bachelor's/MSW (3+2) (p. 281)
- Minor in Anthropology (p. 283)
- Minor in Gerontology (p. 284)
- Minor in Sociology (p. 284)

Anthropology (AN)

AN 101. Local Cultures, Global Issues. 3 Credits.

This introductory course provides a broad overview of cultural anthropology, giving students the tools to understand, speak and write about human diversities and similarities cross-culturally. Course materials emphasize issues of race, ethnicity, class and gender, making visible for students the inequalities and power dimensions embedded in societies throughout the globe.

Offered: Every year, All

UC: Social Sciences, Intercultural Understand

AN 103. Dirt, Artifacts and Ideas. 3 Credits.

This course introduces students to the social science of archaeology, one of the four subdisciplines within anthropology. Students explore the history and methodology of archaeology, human evolution and adaptation. They learn to interpret archaeological data and study the relationship between humans and the natural environment. The ethics of doing archaeological fieldwork and the contemporary debates within the discipline also are discussed.

Offered: Every year, All

UC: Social Sciences, Intercultural Understand

AN 104. Bones, Genes and Everything In Between. 3 Credits.

In this course, students explore human origins and modern human diversity from a holistic, biocultural evolutionary perspective. Participants begin with the processes of evolution and natural selection, along with the mechanisms of genetic inheritance at the molecular level and its role in modern human diversity. Next they focus on our closest living relatives, the non-human primates, and then discuss the evidence for primate and human evolution found in the fossil record. The course concludes by exploring the origins of modern humans and their dispersal across the globe.

Corequisites: Take AN 104L.

Offered: Every year, Fall

UC: Natural Sciences

AN 104L. Bones, Genes and Everything In Between. 1 Credit.

Lab to accompany AN 104.

Corequisites: Take AN 104.

Offered: Every year, Fall

UC: Natural Sciences

AN 200. Special Topics. 3 Credits.

Subject varies each semester according to student and faculty interest.

Offered: As needed, All

AN 210. Gender/Sex/Sexuality (WGS 211). 3 Credits.

This course introduces students to the social and cultural constructions of gender, sex and sexuality around the world. Students discover the way anthropologists approach these topics. They explore the constructions as they relate to notions of biology, family, households, work, migration, inequality/inequity, economics and class status, violence, and race and ethnicity. Discussions focus on what gender, sex and sexuality are, what they mean and how they theoretically and practically matter as categories.

Offered: Every other year

UC: Social Sciences, Intercultural Understand

AN 215. Introduction to Language Studies. 3 Credits.

Human language involves much more than vocabulary and grammar. It is a dynamic, complex system for conveying meaning via sound, images/text, and gestures. In this interdisciplinary course, students will explore the structural components of language, including sound patterns, word formation, syntax, and semantics, and understand how these phenomena evolve over time. Regional, social, and cultural impact on language development will also be covered. Based on this foundation, students will pursue individual projects on linguistic topics of their choice, such as language acquisition, neurolinguistics, computational linguistics, or forensic linguistics. This course assumes no prior study of linguistics or foreign languages. All reading and discussion will be in English. This course does not fulfill a foreign language requirement.

Prerequisites: Take FYS 101

Offered: As needed

AN 227. Rites of Passage. 3 Credits.

In this course, students examine the study abroad experience as a life turning point, looking through the lens of traditional Rites of Passage Theory, as put forth by anthropologist Arnold van Gennep. They connect each of the traditional Rites of Passage phases to the study abroad experience (i.e., separation, liminality and reincorporation) and begin to develop an understanding of why rites of passage were/are formulated, and how to apply the concepts and elements presented in traditional Rites of Passage Theory not only to the study abroad experience, but also to personal, academic and professional turning points throughout one's life.

Offered: Every year, All

UC: Breadth Elective, University Curriculum Ele

AN 230. Sustainable Development (ENV 230). 3 Credits.

This course introduces students to the concept and practice of "development" from an anthropological perspective. Students learn how to assess and critique the ideological threads in development discourses, and are able to identify how anthropological approaches to development differ from other social sciences and allied disciplines. Students also learn how classical social theory continues to influence policy makers and international aid bureaucrats.

Offered: As needed

UC: Social Sciences, Intercultural Understand

AN 233. Practicing Archaeology. 3 Credits.

Archaeology is an exciting multidisciplinary field that combines approaches from the social and natural sciences to reconstruct human behavior. In this course, students explore the theories and methods that guide archaeological inquiry through lectures, class discussions and interactive laboratory and field exercises. Guest lectures will highlight various specializations and applications in the field, including geographic information systems, archaeological chemistry, bioarchaeology, museum curation, public archaeology and cultural resource management. Archaeological case studies will focus on the Indigenous history and prehistory of southern New England including the Quinipiac land and people.

Offered: Every year, Fall

UC: Social Sciences

AN 237. Health and Medicine Around the World. 3 Credits.

This course takes a comparative study approach by looking at the diverse ways in which societies throughout the world both define and respond to disease and illness. Special attention is paid to how differently people understand the body and its relation to illness, and the importance of cross-cultural understanding for treating and curing illness in pluralistic societies.

Offered: Every other year

UC: Social Sciences, Intercultural Understand

AN 240. Ethnography: Learning from Others. 3 Credits.

This course introduces students to ethnographic theory, method, practice and application within the discipline of anthropology. The goals are: 1) to provide students with a background of the history of ethnography; 2) to introduce students to the range of ethnographic writings in the contemporary era; 3) to encourage students to think about what ethnographic writings teach us and why they matter; 4) to compare ethnography to other forms of academic and popular writings; and 5) to consider the ethical dimensions and dilemmas of conducting ethnographic research.

Offered: As needed

UC: Social Sciences

AN 242. Anthropology of Cannabis. 3 Credits.

The Anthropology of Cannabis explores the archaeological, cross-cultural, and contemporary political, symbolic, linguistic, and sociobehavioral influence of cannabis on human existence. In this class students will explore the long history of the cannabis plant and other "drugs" in human life; the war on drugs; the racialized and gendered implication of criminalization; and what the legalization of cannabis in multiple states in the US and around the world means for the plant's future.

Offered: As needed

UC: Social Sciences

AN 243. Ancient Food For Thought (ENV 243). 3 Credits.

In this course, students explore the origins (and consequences) of food production and consumption from an anthropological perspective. Participants examine evidence for ancient diets in a variety of different societies (hunter-gatherer, pastoral and agricultural). They analyze the relationship between our diet and other aspects of culture and explore how these types of societies have changed over the past several thousand years. Students then review contemporary environmental and health problems related to food production and consumption and draw from the past to understand and potentially address these issues.

Offered: Every year, Spring

UC: Social Sciences, Intercultural Understand

AN 250. Forensic Anthropology. 3 Credits.

This course provides a general introduction to forensic anthropology, an applied subfield of biological anthropology, wherein human remains of medico-legal significance are analyzed. Students review the history of the field, basic skeletal anatomy and human biological variation, recovery of human remains and how time since death can be established. The course also covers the identification of trauma and disease in both modern and prehistoric skeletons, as well as markers of individualization that may lead to positive identification.

Offered: Every other year

UC: Breadth Elective, University Curriculum Ele

AN 252. The Science of Human Diversity (WGS 252). 3 Credits.

This course surveys human phenotypic variation through an evolutionary and biocultural perspective. The role of genetics and environment (including culture) is discussed in relation to the heritability of human differences. Participants also consider how culture and society shape an understanding of human biology. Topics as diverse as environmental adaptations, "race," sex differences, aging, growth, nutrition, demography and genetic disorders are addressed from this biocultural perspective.

Offered: As needed

UC: Breadth Elective, University Curriculum Ele, Intercultural Understand

AN 272. Sh t Happens: a Natural History of Human Waste (ENV 282). 3 Credits.

This course explores the natural history of human excrement. Human waste is something that we are all intimately familiar with, yet rarely discuss (or at least, we rarely admit to discussing it). But, it tells an incredible story about our lives and our interactions with the environment. We study ancient feces to learn about diet and health in the past; we look at cross-cultural studies to understand different types of contemporary waste disposal and cultural understanding of human waste; we learn about the gut microbiome, which may influence our emotions; we study our closest living relatives and their relationship with bodily waste.

Offered: Every year, Spring

UC: Breadth Elective

AN 299. Independent Study. 1-6 Credits.

Pursuit in depth of a specific topic. The topic and credit are to be arranged with an instructor.

Offered: As needed, All

AN 300. Special Topics. 3 Credits.

Subject varies each semester according to student and faculty interest.

Offered: As needed, All

Gerontology (GT)

GT 200. Biology of Aging (BMS 200). 3 Credits.

The aim of the course is to study the specific and primary changes in physiological mechanisms that result in the process of aging. See description for BMS 200.

Prerequisites: Take BIO 101 BIO 102 or BIO 150 BIO 151 or BMS 117 BMS 162.

Offered: Every year, All

GT 202. Gender and Aging (SO/WGS 202). 3 Credits.

The purpose of this advanced seminar is to study older women's and men's experiences with aging. The focus is on the complex interplay between age and gender as we examine the social, economic and policy issues surrounding the needs of older women and men.

Offered: As needed, Summer

- GT 205. From College to Career (SO/CJ 205).** **1 Credit.**
 This course introduces sociology, gerontology and criminal justice majors to the preprofessional skills and knowledge they need to practice prior to obtaining their internship. Students also are introduced to practical skills that will benefit them throughout their professional careers ranging from self-reflection to resume writing and email etiquette. Students meet regularly to discuss the breadth of potential careers in sociology, criminal justice and gerontology through interaction with departmental faculty and practitioners in the field. For gerontology majors only. This course is graded on a pass/fail basis.
Offered: Every year, Fall and Spring
- GT 211. Introduction to Social Work (SO 211).** **3 Credits.**
 This course provides students with an introduction to social work profession, including its historical roots, its fundamental principles and its areas of practice. The course provides an overview of social work methods, skills, values, ethics and the social service delivery system. Students develop an introductory understanding of how psychological and social theories influence social work practice with individuals, groups and communities.
Prerequisites: Take SO 101 SO 101H SO 225 or SO 244
Offered: Every year, Fall and Spring
- GT 220. Special Topics in Gerontology.** **3 Credits.**
Offered: As needed
- GT 234. Adult Developmental Psychology (PS 234).** **3 Credits.**
 This course considers facts, theory and speculation about adult development and aging. Focus is on physical, cognitive and social development as well as family and career patterns for periods of young, middle and late adulthood.
Prerequisites: Take PS 101.
Offered: Every other year
UC: Social Sciences
- GT 263. Aging in Society Aging (SO 263).** **3 Credits.**
 This introduction to gerontology focuses on the myths and realities of aging explored through historic, demographic and sociological analyses of the conditions of elderly people in our society. Students critically examine the diversity of aging experiences in the U.S. The ways in which social and cultural factors enter into the aging process are also considered.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Fall and Spring
UC: Social Sciences, Intercultural Understand
- GT 270. Community Program Development (SO 270).** **3 Credits.**
 This course addresses the creation of community-based programs and services especially within the nonprofit and public sectors. Topics covered include: approaches to leadership, community engagement, needs identification, problem analysis, models of intervention, and elements of grant proposal writing.
Prerequisites: Take SO 101 SO 101H SO 225 OR SO 244
Offered: As needed
- GT 290. Research Methods (SO 290).** **3 Credits.**
 This course introduces students to social science research methods. Students examine how qualitative and quantitative research methods apply to social science research. The course places particular emphasis on the importance of scientific methods in reaching informed conclusions. Students examine a number of methods commonly used in social science disciplines and learn how to interpret the results of research conducted using these methods. Understanding how social scientists investigate social phenomena allows students to accurately interpret and apply findings from social science research. Students should complete the course by the end of their sophomore year or second year in the major.
Prerequisites: Take SO 101 SO 101H SO 225 OR SO 244
Offered: Every year, All
- GT 300. Special Topics in Gerontology.** **3 Credits.**
Offered: As needed
- GT 305. Sociology of Death and Dying (SO 305).** **3 Credits.**
 Death is studied from the perspective of social interaction between the dying person, professional caregivers and family members and loved ones. Attitudes and values about death, cultural components of grief, and the function of bereavement are examined. Particular attention is paid to the social organization of "death work" and dying in bureaucratic settings, such as hospitals and nursing homes, as opposed to the non-bureaucratic structure of hospice care.
Offered: Every year, Fall and Spring
- GT 315. Case Management (SO 315).** **3 Credits.**
 Case management is a process used widely throughout health and social services as a means of assessing, planning, coordinating, monitoring and evaluating the services needed to respond to an individual's health and/or service needs to attain the dual goals of quality and cost effective care. Students in gerontology, sociology, psychology, and criminal justice are likely to encounter the various roles or models of case management practice as they pursue careers in human services. This course provides a foundation for case management practice in various social service settings.
Prerequisites: Take SO 101 SO 101H SO 225 OR SO 244
Offered: As needed
- GT 365. Aging and Social Problems (SO 365).** **3 Credits.**
 This course considers the social policies associated with aging, particularly in the areas of health, housing, financing and family life and the governmental policies, past, present and future, that deal with these problems.
Prerequisites: Take SO 101 or SO 101H.
Offered: Every year, Summer
UC: Breadth Elective, Intercultural Understand
- GT 382. Studying Social Issues with Statistics (SO 382).** **3 Credits.**
 In this course, students learn basic introductory-level statistics and quantitative reasoning skills necessary for careers in gerontology. Through hands-on application, students learn research design, basic statistical data collection and data analysis. For gerontology majors only, junior or above.
Prerequisites: Take GT 290.
Offered: Every year, Spring

GT 392. Internship in the Community (SO 392). 3 Credits.

For gerontology majors in their junior or senior year only. Students each complete 120 hours of supervised fieldwork in an agency that serves the elderly, along with one hour per week in a seminar. Coursework and seminar content include written and oral reflection focusing on the student's experience. Professional issues, along with academic concepts and theory, are explored in relation to the agency and the community it serves. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator one semester prior to beginning the placement process.

Prerequisites: Take GT 205, GT 263.

Offered: Every year, Fall and Spring

GT 394. Advanced Internship in the Community. 3 Credits.

This is a required second internship for gerontology majors in their junior or senior year only. Students complete 135 hours of supervised fieldwork in a community agency that serves the elderly along with one hour per week in the advanced internship class. Students build upon the knowledge gained from their first internship experience to deepen their understanding of concepts and theory through extended written and oral reflection. Students also assess their interpersonal strengths and weaknesses in preparation for graduate school and/or future employment. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator one semester prior to begin the placement process.

Prerequisites: Take GT 392.

Offered: Every year, Spring

GT 400. Senior Seminar (SO 400). 3 Credits.

This senior seminar is designed as the capstone course for students majoring in sociology and gerontology. Students research a sociological or aging-related topic of their choosing and write a thesis based on their work. All senior theses represent a culmination of majors' academic experiences in the department. For gerontology majors only in the senior year.

Prerequisites: Take GT 290.

Offered: Every year, Fall and Spring

Sociology (SO)

SO 101. Introduction to Sociology. 3 Credits.

Our society and culture influence who we are, how we feel about ourselves, and how we interact with others. This course investigates the ways in which our social institutions such as the family, the government, politics, religion, health care and others shape our experience. Students also look at the ways in which gender, sexuality, race/ethnicity and social class affect their life. The differences that characterize a stratified society in opportunity, reward, achievement and social class are discussed.

Offered: Every year, All

UC: Social Sciences

SO 101H. Honors Introduction to Sociology. 3 Credits.

Our society and culture influence who we are, how we feel about ourselves, and how we interact with others. This course investigates the ways in which our social institutions such as the family, the government, politics, religion, health care and others shape our experience. Students also look at the ways in which gender, sexuality, race/ethnicity and social class affect their life. The differences that characterize a stratified society in opportunity, reward, achievement and social class are discussed.

Offered: As needed

UC: Social Sciences

SO 200. Special Topics. 3 Credits.

A variety of special topics courses are offered every year.

Offered: As needed

SO 201. Sociological Theory. 3 Credits.

This course helps students develop a working knowledge of theory and understand its relevance in other sociological courses they take. In part, it examines Freud's depiction of the human condition as an epic battle between our individual selfish drives and society's overbearing shame, Marx's claim that revolution is inevitable, Weber's belief that we have sacrificed the human spirit at the altar of efficiency, Mills' claim that we have become cheerful robots in a machine-like society, and Baudrillard's thesis that truth has been murdered in the perfect crime.

Prerequisites: Take SO 101 or SO 101H or SO 225 or SO 244;

Offered: As needed

UC: Social Sciences

SO 202. Gender and Aging (GT/WGS 202). 3 Credits.

The purpose of this advanced seminar is to study older women's and men's experiences with aging. The focus is on the complex interplay between age and gender as we examine the social, economic and policy issues surrounding the needs of older women and men.

Offered: As needed, Summer

SO 203. How to Get Rich:Sociology in Action. 3 Credits.

Designed for the general student interested in how to increase their likelihood of getting rich after college, this course teaches the basic skills needed to achieve financial success: budgeting, investing, and debt management. Most importantly, you will also learn how you can make money work for you, rather than you working for money. These basic lessons will be approached through sociological literature that will teach you the ways that advertisements, culture, your socialization with money and your positionality impact your ability to financially excel in the world outside of college. By learning the tricks of what can keep you down, you also learn invaluable skills that will help you potentially save money to invest for your future.

Offered: As needed

UC: Social Sciences

SO 205. From College to Career (CJ/GT 205). 1 Credit.

This course introduces sociology, gerontology and criminal justice majors to the preprofessional skills and knowledge they need to practice prior to obtaining their internship. Students also are introduced to practical skills that benefit them throughout their professional careers ranging from self-reflection to resume writing and email etiquette. Students meet regularly to discuss the breadth of potential careers in sociology, criminal justice and gerontology through interaction with departmental faculty and practitioners in the field. For sociology majors only. This course is graded on a pass/fail basis.

Offered: Every year, Fall and Spring

SO 211. Introduction to Social Work (GT 211). 3 Credits.

This course provides students with an introduction to social work profession, including its historical roots, its fundamental principles and its areas of practice. The course provides an overview of social work methods, skills, values, ethics and the social service delivery system. Students develop an introductory understanding of how psychological and social theories influence social work practice with individuals, groups and communities.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244

Offered: Every year, Fall and Spring

SO 225. Social Problems.**3 Credits.**

What is a social problem? How does something become defined and recognized as a social problem? In this course, students examine the social systems, relationships, benefits and duties that shape our lives, both locally and globally. What are the major problems facing society today? What are their consequences? How can we effectively address social problems? Students explore these questions and more through examining topics such as racism, economic inequality, sexualities, families, immigration and the environment. In discussing these and other issues, students develop their sociological imaginations, learning how to see their individual lives as connected to patterns and systems in the larger social world.

Offered: As needed**UC:** Social Sciences**SO 232. Women in the Criminal Justice System (CJ/WGS 232). 3 Credits.**

This course examines the changing patterns of women's criminality, the experiences of women who are processed as crime victims, and the evolution of women's role in law, law enforcement and corrections.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** Every year, Spring**UC:** Social Sciences**SO 235. American Culture and Society.****3 Credits.**

The course examines what it means to be an American. Students explore the structure of American culture and discuss more specific American cultural manifestations in areas such as love, consumerism, childrearing and sport. These topics are covered via an assessment of the health versus pathology of American culture. Course material is rooted in sociological literature within the field of culture and personality.

Offered: As needed**SO 238. Sociology Through Film.****3 Credits.**

This course is an examination of American society through film viewing, academic reading and discussion. Historically, film has been used to depict American culture as distinct from other cultures, socialize American children, represent the individual in American family life, religion and education, and to create cultural representations of gender and race. Each of these themes is examined, and the course concludes with an analysis of the concepts of social class and corporate power and as conveyed through film.

Offered: As needed**SO 241. Sociology of Race and Ethnicity.****3 Credits.**

The impact of ethnic and racial identity in the United States is examined with particular consideration of the processes of prejudice and discrimination, social class identity and mobility, and the distribution and exercise of social, economic and political power.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** Every year, Fall and Spring**UC:** Social Sciences, Intercultural Understand**SO 241H. Honors Sociology of Race and Ethnicity.****3 Credits.**

The impact of ethnic and racial identity in the United States is examined with particular consideration of the processes of prejudice and discrimination, social class identity and mobility, and the distribution and exercise of social, economic and political power.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** Every year, Fall and Spring**UC:** Social Sciences**SO 244. Social Inequalities.****3 Credits.**

This course examines systems of inequality and how they grow out of, and are reinforced by, both structural and cultural factors. Topics include: social class, race, ethnicity, gender, sexuality, the interrelationships of all of these as forces of stratification, and how they are manifested in societal institutions such as the economy, the educational system and the criminal justice system.

Prerequisites: Take SO 101 or SO 101H.**Offered:** Every year, Fall and Spring**UC:** Social Sciences, Intercultural Understand**SO 244H. Honors the Invisible Ladder. Social Inequalities Inequalities.****3 Credits.**

This course examines systems of inequality and how they grow out of, and are reinforced by, both structural and cultural factors. Topics include: social class, race, ethnicity, gender, sexuality, the interrelationships of all of these as forces of stratification, and how they are manifested in societal institutions such as the economy, the educational system and the criminal justice system.

Prerequisites: Take SO 101 or SO 101H.**Offered:** Every year, Fall and Spring**UC:** Social Sciences, Intercultural Understand**SO 250. Youth Crime (CJ 250).****3 Credits.**

This course deals with youth crime as distinct from adult offending. Students examine the development of the juvenile delinquency concept and justification for classifying juvenile offenders as separate from adults. Factors contributing to the onset of juvenile delinquency and relevant research also are examined. The course considers development and current functions of the juvenile justice system, paying particular attention to the challenges justice officials face daily. A range of widely used treatment strategies for dealing with juvenile offenders is examined.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** Every year, Fall**UC:** Social Sciences, Intercultural Understand**SO 255. Sociology of Families (WGS 255).****3 Credits.**

In this introductory course, students critically examine families in the U.S., both historically and in the current day. Topics include the ways in which families have evolved over time and the effect of economic and social factors (such as race, class and gender) on family life. Students learn about the diversity of families in other cultures and current issues facing families.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** Every year, Spring**UC:** Social Sciences**SO 260. Social Control and Deviance.****3 Credits.**

This course covers classical and contemporary sociological theories of deviance as well as a discussion on the ways in which sociologists define the concepts of deviance and stigma. Course material covers a variety of social issues, which are situated within the intersection of deviance and race, social class, sexuality and religion. Topics include: privileged/underprivileged deviance, substance abuse and physical violence. Participants also look at the ways in which social behavior is formally and informally controlled through various sanctions and the implementation of public policies.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** Every other year**UC:** Social Sciences, Intercultural Understand

SO 263. Aging in Society of Aging (GT 263).**3 Credits.**

This introduction to gerontology focuses on the myths and realities of aging explored through historic, demographic and sociological analyses of the conditions of elderly people in our society. Students critically examine the diversity of aging experiences in the U.S. The ways in which social and cultural factors enter into the aging process are also considered.

Prerequisites: Take SO 101 or SO 101H.**Offered:** Every year, Fall and Spring**UC:** Social Sciences, Intercultural Understand**SO 265. Work and Occupations (WGS 265).****3 Credits.**

This course considers the meaning and experiences of work and occupations in the U.S. States during the 20th and 21st centuries. Students examine how work gives meaning to and shapes our lives in profound ways. Topics explored are trends in the current labor market-the types of occupations and jobs that are available, what those occupations and jobs are like, and what these characteristics mean for the lives of the people who hold them. Also considered is how work and social inequality are related and how work shapes and is shaped by our social identities.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** As needed**UC:** Social Sciences**SO 266. Population and Society.****3 Credits.**

This course is designed to provide a basic understanding of demographic structures and processes of different types of societies. Students learn about the basic components used in demographic inquiry -population growth, mortality (deaths), fertility (births), and migration (population movement) - and gain knowledge necessary to use those concepts to evaluate societal issues such as marriage trends, jobs, lifestyles, and choices about having children. Students learn the importance of demographic factors in their personal lives and their social world.

Offered: Every year, Fall and Spring**UC:** Social Sciences, Intercultural Understand**SO 270. Community Program Development (GT 270).****3 Credits.**

This course addresses the creation of community-based programs and services especially within the nonprofit and public sectors. Topics covered include: approaches to leadership, community engagement, needs identification, problem analysis, models of intervention, and elements of grant proposal writing.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** As needed**SO 271. Public Order Crimes (CJ 271).****3 Credits.**

Approximately two-thirds of the inmates in U.S. correctional institutions have been found guilty of public order crimes, "moral crimes," or crimes not likely to have a self-identified victim. This course concentrates on crimes associated with such activities as illegitimate gambling, consensual sex, and the criminal use and sale of both legal and illegal substances.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** As needed**SO 272. Education and Society.****3 Credits.**

Schools from kindergarten to the university as they relate to the community and the economic and political systems are considered. Also explored are the historical development of education; values imparted through education; the social process in the classroom; contemporary conflicts centering in the schools.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** As needed**UC:** Social Sciences, Intercultural Understand**SO 280. Sociology of Health and Illness.****3 Credits.**

This course explores the social model to studying health and illness. Meaning(s) and experience(s) of health and illness are socially produced, and are shaped by the interaction of external social environments in which people live (culture and community), and the internal environment (human body). Experiences of health and illness are also influenced by socio-demographic variables (race, class, gender, age, etc.), highlighting disparities in health and health care delivery. The course examines a number of topics of interest to medical sociologists and health care professionals in the field, such as the medicalization of society, determinants of health, social construction of illness, and the social organization of health care.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** Every year, Fall**UC:** Social Sciences, Intercultural Understand**SO 284. LGBTQ Identities and Communities (PS/WGS 284).****3 Credits.**

This course explores the social, socioeconomic, historical, psychological and political factors that have contributed to our understanding of what it means to be gay, lesbian, bisexual, transgender, or queer (LGBTQ). Psychological research on identity development, the social construction of identity, and the psychological, social, and political benefits associated with "identifying" as LGBTQ, are discussed. The course explores historical events that led to the development of LGBTQ communities and the benefits of being involved in these communities, including the positive impact of allies. Finally, the course explores the positive and negative effects of the LGBTQ community becoming more mainstream.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** As needed**SO 285. Protest and Social Change (WGS 285).****3 Credits.**

This course explores past and present social movements and other forms of resistance in the U.S. and around the world, focusing on the factors that influence their emergence, the shapes they take, and their outcomes. The course also includes discussion of how to organize one's own community to create social change. Students examine movements such as the Black Lives Matter movement, the #MeToo movement, the LGBTQ+ rights movement, the anti-war movement, and the climate justice movement.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** As needed**UC:** Social Sciences, Intercultural Understand**SO 290. Research Methods (GT 290).****3 Credits.**

This course introduces students to social science research methods. Students examine how qualitative and quantitative research methods apply to social science research. The course places particular emphasis on the importance of scientific methods in reaching informed conclusions. Students examine a number of methods commonly used in social science disciplines and learn how to interpret the results of research conducted using these methods. Understanding how social scientists investigate social phenomena allows students to accurately interpret and apply findings from social science research. Students should complete the course by the end of their sophomore year or second year in the major.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;**Offered:** Every year, Fall

SO 302. Sociology of Sexualities (WGS 302). 3 Credits.

This course explores the social construction and social control of sexualities with a particular focus on the intersection of sexualities, gender, race, and class. We examine the socially constructed meanings of sexual practices and sexual identities. Specifically, we begin by looking at the ways in which sexuality is historically and socially positioned, and we discuss how sexuality is regulated (formally and informally). We also examine cultural expectations, understandings, and expressions of sexualities.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;

Offered: Every year

SO 303. Popular Culture and the Media (WGS 303). 3 Credits.

The course explores popular culture with the purpose of learning about current American life in the context of change. It focuses on the relationship between popular culture, the media, and the broader social, economic and political environment. Popular media, leisure pursuits, news, sports, entertainment, and material consumption are considered. Attention is paid to the accumulated research from a wide variety of sources and visions.

Prerequisites: Take SO 101 SO 101H SO 225 SO 244;

Offered: Every year, January Term

SO 304. Sociology of Gender (WGS 304). 3 Credits.

This course focuses on how society constructs notions/images of femininity and masculinity and how these influence our lives. Participants look at cultural views of language, body and the media, as well as theoretical approaches to understanding the complexities of gender distinctions in our society.

Prerequisites: Take SO 101 SO 101H SO 225 SO 244;

Offered: Every year, Spring

UC: Breadth Elective, University Curriculum Ele

SO 305. Sociology of Death and Dying (GT 305). 3 Credits.

Death is studied from the perspective of social interaction between the dying person, professional caregivers and family members and loved ones. Attitudes and values about death, cultural components of grief, and the function of bereavement are examined. Particular attention is paid to the social organization of "death work" and dying in bureaucratic settings, such as hospitals and nursing homes, as opposed to the non-bureaucratic structure of hospice care.

Offered: Every year, Fall and Spring

SO 306. Masculinities (WGS 306). 3 Credits.

In this course, students examine the organization, maintenance and understandings of popular and historical conceptions of masculinities within the United States. The class explores the norms, values and beliefs that circulate within the realm of masculinities. Additional topics include media, boyhood, work, health, relationships, sexualities, bodies, families and violence. Students develop an understanding of the ways in which gender is a relational concept that takes on meaning through personal relationships and societal constructs.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;

Offered: Every other year

UC: Breadth Elective, University Curriculum Ele

SO 307. Sociology of Sport (SPS 307). 3 Credits.

This course includes the analysis of sport as a social and cultural institution and the interrelations between sport and societal subsystems. Students explore selected sociocultural aspects of sport and exercise, and analyze contemporary problems associated with sport, including race relations, the tradition and emergent role of females, leisure behaviors, aggression and violence, as well as political and economic concerns.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;

Offered: Every year, All

SO 308. The Immigrant Experience. 3 Credits.

For much of its history, people have come to the U.S. from other countries seeking economic opportunities, family reunification, or asylum. While many Americans welcome immigrants and the strengths they bring, others fear immigrants' influence on society and want to restrict migration. In this course, students explore questions such as: Why do people migrate? How has immigration shaped the U.S. throughout its history? How does immigration impact the American economy and culture? How has immigration policy changed over time, and what role has racism played in immigration policies? Why is immigration such a divisive issue, and what role do politicians and the media play in sowing that division? Using a sociological perspective, students learn about the decisions and experiences of immigrants as well as the impact of immigration on society.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;

Offered: Every year, Fall

UC: Breadth Elective, University Curriculum Ele

SO 310. Sociology of Childhood. 3 Credits.

This course presents an overview of the social, economic and political factors that have influenced the historical and contemporary experiences of children and the child rearing process. Students examine the intersection of childhood with things like the changing shape of families, educational institutions, peer groups and the media. The diversity of the childhood experience is considered as well as the impact of experiences like poverty, divorce, community violence, and the juvenile justice system on the lives of children, both inside and outside of the U.S.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;

Offered: Every year, Fall

SO 315. Case Management (GT 315). 3 Credits.

Case management is a process used widely throughout health and social services as a means of assessing, planning, coordinating, monitoring and evaluating the services needed to respond to an individual's health and/or service needs to attain the dual goals of quality and cost effective care. Students in gerontology, sociology, psychology, and criminal justice are likely to encounter the various roles or models of case management practice as they pursue careers in human services. This course provides a foundation for case management practice in various social service settings.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;

Offered: As needed

- SO 317. Religion and Society. 3 Credits.**
 This course begins with an introduction to Buddhism, Christianity, Hinduism, Islam and Judaism. The remainder of the course examines the relationship between religion and society. Students explore questions such as: Are young Americans becoming less religious? What role does religion play in politics, and why? What is religious inequality, and how does it produce religious discrimination? How does religion intersect with other social positions like race, gender, and sexuality? Does religion cause violence, or is it merely used by violent groups to justify their actions? Can religion be a source for protest and social change? Using a sociological perspective, students learn about why religion continues to have a strong influence on social life in the modern world.
Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;
Offered: Every other year
UC: Breadth Elective, University Curriculum Ele
- SO 320. Sociology of Hip-Hop Culture. 3 Credits.**
 This course examines the formation, growth and current state of hip-hop culture through a sociological lens. Through a rigorous analysis of hip-hop, students are challenged to think critically and sociologically about the culture and its place in society and develop a clearer understanding of the history and social significance of the culture. Participants cover topics such as race, capitalism, misogyny, cultural appropriation, urban policy and feminism. This course serves as a space for students to analyze the societal structures and forces that influence the culture, as well as how hip-hop influences the world.
Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;
Offered: As needed
UC: Breadth Elective, University Curriculum Ele, Intercultural Understand
- SO 330. Perspectives on Violence (CJ 330). 3 Credits.**
 This course explores the many ways that violence is viewed in our society. Topics include types of violence, empirical evidence of incidence, characteristics of violent crimes, offender motivation, victim profiles, and sociological and theoretical explanations.
Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;
Offered: Every year, Fall
- SO 333. Drugs, Alcohol and Society (CJ 333). 3 Credits.**
 This analytical discussion-based course explores the use of drugs and alcohol in U.S. society. The emphasis is on drug and alcohol use and abuse as a social phenomenon. Students explore issues such as the relationship of drug use to particular groups in society (age, sex, race/ethnicity); patterns of drug use and abuse; the promotion of drugs by the media; and drug and alcohol abuse in historical perspective. Students also learn about drug categories, drug education, prevention and treatment and about drug laws.
Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;
Offered: Every year, Summer
UC: Breadth Elective, Intercultural Understand
- SO 355. Crime and Media (CJ 355). 3 Credits.**
 Despite little direct contact with offenders or the criminal justice system, people typically hold strong opinions about crime-related issues. The goal of this course is to understand how media sources shape our attitudes and beliefs about crime and how we "should" respond to it. To this end, participants examine media involvement in constructing the reality of crime and justice and its implications for the justice process.
Prerequisites: Take SO 101 SO 101H SO 225 or SO 244 or CJ 101;
Offered: Every year, Spring
UC: Breadth Elective, University Curriculum Ele, Intercultural Understand
- SO 360. Sociology of Mental Health. 3 Credits.**
 This course explores the social model to studying mental health and illness. Meaning(s) and experience(s) of mental health and illness are socially produced. Experiences of mental health and illness are also influenced by socio-demographic variables (race, class, gender, age, etc.), highlighting disparities in mental health and mental health care delivery. The course examines core areas of the sociological study of mental health & illness, including theory, methods, and policy. The course also explores a variety of topical areas of interest to sociologists and mental health care professionals in the field, such as social stress, stigmatization, medicalization of mental illness, social construction of mental illness, and the social organization of mental health care.
Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;
Offered: Every year, Spring
- SO 365. Aging and Social Problems (GT 365). 3 Credits.**
 This course considers social policies associated with aging, particularly in the areas of health, housing, financing and family life and the governmental policies past, present and future that deal with these problems.
Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;
Offered: Every year, January Term
UC: Breadth Elective, University Curriculum Ele, Intercultural Understand
- SO 370. Adoption and Society. 3 Credits.**
 This course provides an overview of adoption, past and present, including the major changes in adoption practice and public perception of adoption over the years. Course material includes issues pertaining to the adoption of children born in the U.S. and those born overseas, children adopted as newborn infants and those adopted past infancy from the foster care system. Discussion and readings address unplanned pregnancy considerations, trans-racial and transcultural adoption, children with special medical and emotional needs, open adoption and birth-family contact search and reunion, and adoption-related issues across the lifecycle.
Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;
Offered: Every year, Spring
- SO 375. Sociology of the Everyday. 3 Credits.**
 The course examines how everyday interactions both create and shape social reality. Through an examination of humor, embarrassment, street behavior, family behavior and work behavior, as well as interaction between acquaintances, friends and intimate partners, the course examines how we make up everyday reality as we go. Emphasis is placed on micro-level theoretical perspectives drawing from social psychology and symbolic interactionism.
Offered: As needed
UC: Breadth Elective, University Curriculum Ele
- SO 382. Studying Social Issues with Statistics (GT 382). 3 Credits.**
 In this course, students learn basic introductory-level statistics and quantitative reasoning skills necessary for careers in sociology, including social services and health-related fields. Through hands-on application, students learn research design, basic statistical data collection and data analysis. For sociology majors only, junior or above.
Prerequisites: Take SO 290.
Offered: Every year, Spring

SO 392. Internship in the Community (CJ 392/GT 392). 3 Credits.

For sociology or social services majors in their junior or senior year only. Students each complete 120 hours of supervised fieldwork in a community organization along with one hour per week in a seminar. Coursework and seminar content include written and oral reflection focusing on the student's experience. Professional issues, along with academic concepts and theory, are explored in relation to the organization and the community it serves. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator at least one semester prior to begin the placement process.

Prerequisites: Take SO 101 SO 101H SO 225 or SO 244;

Offered: Every year, Fall and Spring

SO 394. Advanced Internship in the Community (CJ/GT 394). 3 Credits.

A second internship for sociology majors in their junior or senior year only. Students complete 135 hours of supervised fieldwork in a community agency along with one hour per week in the advanced internship seminar. Students build upon the knowledge gained from their first internship experience to deepen their understanding of concepts and theory through extended written and oral reflection. Students also assess their interpersonal strengths and weaknesses in preparation for graduate school and/or future employment. Successful completion of the course requires adherence to a high standard of professionalism. Students are required to meet with the internship coordinator one semester prior to begin the placement process.

Prerequisites: Take SO 392.

Offered: As needed

SO 400. Senior Seminar (GT 400). 3 Credits.

This senior seminar is designed as the capstone course for students majoring in sociology and gerontology. Students research a sociological or aging-related topic of their choosing and write a thesis based on their work. All senior theses represent a culmination of majors' academic experiences in the department. For gerontology majors only in the senior year.

Prerequisites: Take GT 290 or SO 290

Offered: Every year

SO 500. Social Science Research Methods. 3 Credits.

In this course, students not only learn about what social scientists know, but also focus on how they know what they know. Students learn about the ways social scientists gather information in the study of our social world, how to do sociological research and how to evaluate the research of others. This is an active learning class in which participants learn by doing. In the beginning of the course, students focus on the fundamentals of research including the scientific method, the complexity of social research, ethics in research, value-free research and research design. This course is restricted to medical students only.

Offered: As needed

Bachelor of Arts in Gerontology

Program Contact: Catherine Richards Solomon
(Catherine.Solomon@quinnipiac.edu) 203-582-5264

Quinnipiac is one of the few universities to offer an undergraduate major that anticipates one of the growing realities in our society: the rise in the number of older Americans. Every aspect of our society will be affected by the rapidly growing number of people over age 65. Gerontology prepares students to have careers that can address these societal changes. Jobs related to gerontology are among the fastest growing in the U.S. right now, and can be found in a range of professions, from health and business to policy and social programs. Nearly every

profession entails working with clients over 65. Our curriculum is unique in that it provides students with a broad understanding of the various issues older individuals and their families face in later life: how our families and social networks changes as we age, the effects of aging on our minds and bodies, and which social programs and policies exist to help older people and families. Because the effects of an aging population are so far-reaching, the program is interdisciplinary, including courses from sociology, psychology, biology, health sciences, philosophy and law.

Gerontology majors also complete two semester-long internships in public or private agencies involved directly with the elderly, such as senior centers, retirement complexes, hospitals, rehabilitation facilities, community aging services, case management agencies and nursing homes. Students are prepared to continue their education or assume careers in aging-related areas such as social work, law, public health, medicine, health administration and public policy.

Gerontology Curriculum

Students majoring in gerontology must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Gerontology Core Requirements		
SO 101	Introduction to Sociology ²	3
PS 101	Introduction to Psychology ²	3
GT 205	From College to Career (SO/CJ 205)	1
GT 263	Aging in Society Aging (SO 263)	3
PS 234	Adult Development & Aging (GT 234)	3
GT 290	Research Methods (SO 290)	3
BMS 200	Biomedical Basis and Experience of Human Aging ²	3
GT 382	Studying Social Issues with Statistics (SO 382)	3
GT 400	Senior Seminar (SO 400)	3
Two internships in the community:		
GT 392	Internship in the Community (SO 392)	3
GT 394	Advanced Internship in the Community	3
Select two of the following:		6
SO 241	Sociology of Race and Ethnicity ²	
SO 244	Social Inequalities	
SO 255	Sociology of Families (WGS 255) ²	
SO 266	Population and Society ²	
SO 280	Sociology of Health and Illness ²	
SO 305	Sociology of Death and Dying (GT 305)	
SO 360	Sociology of Mental Health	
PL 368	Philosophy of Death and Dying	
PS 325	Health Psychology	
HSC 220	Health Care Essentials: Structure, Policy and Professionalism	
HSC 262	Nutrition in Health and Illness	

Select one of the following:	3
GT 211 Introduction to Social Work (SO 211)	
GT 270 Community Program Development (SO 270)	
GT 315 Case Management (SO 315)	
GT 365 Aging and Social Problems (SO 365)	
LE 322 Health Care Law (HSC 322)	
Free Electives	13-16
Total Credits	102-108

¹ All students must complete the University Curriculum (p. 51) requirements.

² These courses also satisfy University Curriculum requirements.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

- Diversity Awareness:** Students learn to identify the perspectives of diverse groups among the older population and the effect of group membership on the aging processes and later life experiences.
- Social Scientific Literacy:** Students learn the logic of research methodology and be able to understand and critique the results of scientific research generated by scholars in the discipline.
- Critical Thinking:** Students apply interdisciplinary theories and concepts to interpret various social phenomena and scholarship from multiple perspectives through clear oral and written articulation.
- Critical Understanding of Aging Society:** Students are able to discuss the theories, critical concepts and ideas that form the basis of gerontology's interdisciplinary knowledge and will understand how social structure affects the distribution of cultural and material resources among older Americans as well as how it shapes the aging experience.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Bachelor of Arts in Sociology

Program Contact: Xi Chen (Xi.Chen@qu.edu) 203-582-6408

Students interested in careers in therapy, social work and social justice, as well as those interested in law and politics, are often attracted to sociology. American society is in the midst of rapid social change, which affects families, schools, the economy, healthcare systems and social institutions. Students in the Sociology major graduate with marketable skills equipping them to analyze social change and address a wide range of social issues.

Sociology majors examine invisible structural forces and learn how these affect organizations and individuals. They analyze broader social trends, including trends in illness and wellness, changes in marriage and family formations, rates of educational attainment or patterns of hiring in organizations. These valuable sociological skills can be used to study nearly any aspect of social life—schooling, health and well-being, religious devotion, immigration patterns and more. Sociology majors find a place to explore and develop their own unique interests and talents with thoughtful mentorship and guidance from faculty in the department.

The required internship course, which is one of the program's capstone experiences, allows students to apply their sociological skills in real world situations. Through the close mentorship of our departmental internship coordinator, students gain valuable insight into how their acquired knowledge and capabilities translate into marketable job skills. The program retains a long list of possible placement sites—from work in schools, hospitals and foster care settings to providing assistance with newly arrived immigrants to mentoring disadvantaged youth—to ensure that students can match their internship experience to their interests. Graduating seniors in Sociology are well prepared to continue their education or assume careers in teaching, social work, public administration, healthcare, law and criminal justice.

Social Services Concentration

A sociology degree with a concentration in social services integrates a traditional liberal arts education with the specialized training and field background for students who intend to pursue a career in social services or pursue graduate education in social work, health-related fields or public administration. Society is increasingly faced with challenges in delivery of social services to a growing set of underserved populations. For students who want to work for a social service agency, for nonprofits who help disadvantaged individuals or families, for mental health and counseling services, in social work or for local and state government, this concentration provides a perfect background. Students focus their coursework in the areas of social institutions, social inequalities and social issues. They also complete an advanced internship in the field, providing them with the experience and expertise to work with a wide range of client needs. For those wishing to pursue graduate education in social work, the concentration provides necessary background coursework helpful for success in graduate programs as well as work experience that will help distinguish students in the application process.

Medicine and Health Concentration

In our increasingly diverse nation, there is a growing need for medical professionals who understand how cultural and social factors affect individuals' health statuses, behaviors and interactions with the medical community. This concentration is well suited for students who wish to pursue careers and/or graduate work in any health-related field: medicine, mental health, drug and alcohol abuse prevention/treatment or nonprofits

addressing the mental and physical health of their clients. Students focus their coursework in such areas as sociology or anthropology of medicine, death and dying, disability, illness and mental health. Through this coursework, students learn about the varying medical and health needs of diverse populations, including the causes and consequences of health disparities, that will enable them to improve the health of groups with different cultural and social needs. Students in this concentration may complete their internships in hospitals, hospices or other health-related settings.

BA in Sociology Curriculum

Students majoring in sociology must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Sociology Core Requirements		
SO 101	Introduction to Sociology	3
	or SO 225 Social Problems	
	or SO 244 Social Inequalities	
SO 205	From College to Career (CJ/GT 205)	1
SO 244	Social Inequalities	3
SO 290	Research Methods (GT 290)	3
SO 392	Internship in the Community (CJ 392/GT 392)	3
SO 382	Studying Social Issues with Statistics (GT 382) ²	3
SO 400	Senior Seminar (GT 400)	3
Select 6 electives ³		18
Free Electives		16-20
Total Credits		102-109

¹ All students must complete the University Curriculum (p. 51) requirements.

² If students take MA 206 to fulfill the university quantitative literacy requirement, MA 206 can be used to fulfill the sociology statistics requirement. The sociology statistics course (SO 382) cannot be used for the university quantitative literacy requirement.

³ One of the electives could include AN 101 or AN 103; and one could be a criminal justice (CJ) course that is not cross-listed with sociology.

If students wish to focus their electives, they may take three classes (9 credits) of their 6 electives in either a social services concentration or a medicine and health concentration.

Social Services Concentration

For this applied concentration, students must take:

Code	Title	Credits
SO 394	Advanced Internship in the Community (CJ/GT 394)	3
Select three of the following:		9
SO 225	Social Problems	
SO 232	Women in the Criminal Justice System (CJ/WGS 232)	
SO 250	Youth Crime (CJ 250)	

SO 260	Social Control and Deviance
SO 270	Community Program Development (GT 270)
SO 211	Introduction to Social Work (GT 211)
SO 315	Case Management (GT 315)

Total Credits 12

Medicine and Health Concentration

For this concentration, students choose three classes (9 credits) from this list (one course may be from anthropology):

Code	Title	Credits
Select three of the following:		
AN 250	Forensic Anthropology	9
SO 263	Aging in Society of Aging (GT 263)	
SO 266	Population and Society	
SO 280	Sociology of Health and Illness	
SO 305	Sociology of Death and Dying (GT 305)	
SO 315	Case Management (GT 315)	
SO 333	Drugs, Alcohol and Society (CJ 333)	
SO 360	Sociology of Mental Health	

Total Credits 9

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

- Diversity Awareness:** Students learn to identify the perspectives of diverse groups and the effect of group membership on life experiences and life chances.
- Social Scientific Literacy:** Students learn the logic of research methodology and to be able to understand and critique the results of scientific research generated by scholars in the discipline.
- Critical Thinking:** Students apply disciplinary theories and concepts to interpret various social phenomena and scholarship from multiple perspectives through clear oral and written articulation.
- Sociological Understanding of Society:** Students are able to discuss the theories, critical concepts and ideas that form the basis of disciplinary knowledge and will understand how social structure affects the distribution of cultural and material resources across social groups.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for BA in Sociology

A minimum of 60 credits is required for transfer into the BA in Sociology program. Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Course	Title	Credits
First Year		
Fall Semester		
English I		3
Principles of Sociology		3
Elective		3
Elective		3
Elective		3
Credits		15
Spring Semester		
English II		3
Sociology Elective		3
Elective		3-4
Elective		3

Elective	3

Total Credits	
60-62	

Please note: The BA in Sociology program at Quinnipiac University requires the completion of an internship. Students transferring in their junior year should expect to take the pre-internship course (SO 205) in the fall of their junior year, then can complete their internship in any subsequent semester.

Accelerated Dual-Degree Bachelor's/MSW (3+2)

Program Contact: Catherine Solomon (catherine.solomon@qu.edu) 203-582-5264 Stephanie Jacobson (stephanie.jacobson@quinnipiac.edu) 203-582-8907

This direct-entry Accelerated Dual-Degree Bachelor's to Master of Social Work (3+2) program is an excellent choice for students seeking a rewarding and successful career as a clinical social worker and mental health professional. Through this accelerated dual-degree program, students complete both their bachelor's degree and their Master of Social Work (p. 810) degree in just 5 years. Incoming first-year students in the College of Arts and Sciences majoring in psychology, sociology, criminal justice and gerontology are eligible to be assessed for admittance to this program.

Quinnipiac University's MSW program prepares social workers for specialized practice in health and mental health. The curriculum emphasizes interprofessional education to familiarize students with a team-based approach to health and mental health care. The MSW program equips students with clinical social work skills, including counseling, crisis intervention and trauma-informed treatments, as well as the ability to access social welfare and community resources. Students are prepared for social work licensure as part of MSW coursework. Graduates of this MSW program meet eligibility requirements for both the LMSW and the LCSW.

Social work is the major provider of mental health care and one of the fastest-growing occupations in the United States. Graduates of this MSW program enter a broad range of high-demand fields. Hospitals, rehabilitation facilities, mental health clinics, schools, health departments, social welfare, criminal justice and community organizations rely on social workers to provide health and mental

health care to a wide variety of clients. This includes treating persons with trauma, such as veterans with PTSD; people with chronic mental illnesses; and many others. Social workers are also a crucial link between clients and other professionals, ensuring that people receive critical mental health care, advocacy and access to resources.

Communicate with the program contacts listed above for further information on this Accelerated Dual-Degree Bachelor's to Master of Social Work (3+2) program.

Accelerated Dual-Degree Bachelor's/MSW (3+2) Curriculum Requirements

The most common majors for students who are anticipating graduate study in social work are Sociology, Criminal Justice, Gerontology and Psychology¹; however this accelerated dual-degree program is open to students in any Arts and Sciences major. Students are advised that this accelerated degree will require overloads and summer coursework to complete the bachelor's degree in three years.

Students must work with their advisers to carefully plan their course of study to ensure completion of the BA or BS degree in three years. Students admitted to the program take 9 credits of graduate coursework in their third year. Suggested curriculum is as follows:

Course	Title	Credits
First Year		
Fall Semester		
EN 101	Introduction to Academic Reading and Writing	3

Credits		16
Total Credits		120-121

Once admitted to the program, students must maintain an undergraduate GPA of 3.0, complete 20 credits in liberal arts, and a statistics course with a grade of C or higher. Additionally, students must achieve a grade of B or higher in their three graduate courses. A maximum of 9 credits may be used to fulfill both undergraduate and graduate requirements. Students earn their Master of Social Work upon satisfactory completion of all of the graduate curriculum requirements.

¹ Psychology majors who are interested in the dual-degree program follow a different curriculum, and should consult with their adviser.

² Courses are chosen in consultation with an adviser to meet the requirements for Personal Inquiry I and Personal Inquiry II.

³ Course counts as UC Capstone

⁴ Criminal Justice majors must complete UC Capstone.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in

the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Please note: Students cannot be added to the Accelerated Dual-Degree Bachelor's to MSW (3+2) program after the add/drop period at Quinnipiac University.

Minor in Anthropology

Program Contact: Julia Giblin (Julia.Giblin@quinnipiac.edu) 203-582-8381

Anthropology is the study of humans in the broadest sense: through time and across geographical space, as social beings and as biological creatures. Anthropologists are interested in the big questions about what makes us human, and how living and past cultures are similar and different. Most importantly, anthropologists explore what we can learn from other people cross-culturally, from our ancestors in the past and from our primate relatives.

Studying anthropology allows students to understand the complexity of human diversity and to develop confidence in one's ability to work collaboratively with people from vastly different backgrounds and life experiences. Anthropology is a perfect area of study for anyone interested in learning about other cultures and ways of life, and offers excellent preparation for any career choice. Anthropology students find work in such fields as medicine, law, nongovernmental and nonprofit organizations, government, public health, sustainable development and international aid, and education. Anthropology offers students important training in persuasive writing, scientific research and data analysis, and critical thinking.

To complete the minor, students must take 18 credits of anthropology coursework.

Anthropology Minor Curriculum

Code	Title	Credits
Take six courses (18 credits) from the following:		
AN 101	Local Cultures, Global Issues	3
AN 103	Dirt, Artifacts and Ideas	3
AN 104 & 104L	Bones, Genes and Everything In Between and Bones, Genes and Everything In Between	4
AN 210	Gender/Sex/Sexuality (WGS 211)	3
AN 227	Rites of Passage	3
AN 230	Sustainable Development (ENV 230)	3
AN 233	Practicing Archaeology	3
AN 237	Health and Medicine Around the World	3
AN 240	Ethnography: Learning from Others	3
AN 243	Ancient Food For Thought (ENV 243)	3
AN 250	Forensic Anthropology	3
AN 252	The Science of Human Diversity (WGS 252)	3
AN 272	Sh t Happens: a Natural History of Human Waste (ENV 282)	3

AN 299	Independent Study	3
AN 300	Special Topics	3

Minor in Gerontology

Program Contact: Catherine Richards Solomon
(Catherine.Solomon@quinnipiac.edu) 203-582-5264

The minor in gerontology familiarizes you with one of our society's most prevalent issues: the dramatic increase in its aging population. Interdisciplinary courses teach you about the many dimensions of the aging process, and help you to understand the range of social, psychological and physiological issues facing our country's advanced-age population. You'll gain the skills to interpret and perform statistical analysis and research, as well as learn about the variety of programs, products, services and other resources available to older adults.

The study of gerontology complements a range of majors, including law, sociology, psychology and public health. Whether your primary interest includes the direct care of seniors or the legislature that protects them, a variety of electives enable you to focus on an area most related to your goals. The gerontology minor opens the door to future volunteering opportunities, or to careers dedicated to making a direct, positive impact on the lives of the elderly and their families.

Gerontology Minor Curriculum

For the gerontology minor, students should work with the program director to select 18 credits of coursework in gerontology. A student majoring in criminal justice or sociology can minor in gerontology. Courses taken for a minor may not count toward a CJ or SO major. Courses taken for a CJ or SO major may not count toward a minor.

Code	Title	Credits
Select 18 credits from the following:		
GT 211	Introduction to Social Work (SO 211)	3
GT 234	Adult Developmental Psychology (PS 234)	3
GT 263	Aging in Society Aging (SO 263)	3
GT 270	Community Program Development (SO 270)	3
GT 300	Special Topics in Gerontology	3
GT 305	Sociology of Death and Dying (SO 305)	3
GT 315	Case Management (SO 315)	3
GT 365	Aging and Social Problems (SO 365)	3
Students may choose one of the following Sociology courses toward the minor:		3
SO 241	Sociology of Race and Ethnicity	
SO 244	Social Inequalities	
SO 255	Sociology of Families (WGS 255)	
SO 266	Population and Society	
SO 280	Sociology of Health and Illness	
SO 304	Sociology of Gender (WGS 304)	

Minor in Sociology

Program Contact: Xi Chen (Xi.Chen@qu.edu) 203-582-6408

Through a minor in sociology, you'll explore the diverse communities and social groups that make up our society, and also examine the many factors influencing their behaviors—from work opportunities and educational attainment to healthcare availability, law enforcement policies and pop-culture trends. You'll understand how factors such as these determine social relationships and organization and learn how various economic and political forces affect the creation of social legislation and the availability of resources.

You will choose from a variety of elective courses that enable you to focus the minor on topics that not only align with your academic interests and career goals but also broaden your perspective in your chosen field. Courses in family dynamics, gender, race, immigration and deviance complement many majors. The ability to examine broader social trends and apply observations in everyday interactions is a crucial skill for social workers, healthcare providers, members of law enforcement and educators at all levels.

For the sociology minor, students are welcome to work with the program director to select 18 credits of coursework that align with the student's interests in the field. A student majoring in gerontology can minor in sociology. Courses taken for a minor may not count toward a GT major. Courses for a GT major may not count toward an SO minor.

Sociology Minor Curriculum

Code	Title	Credits
Take six courses (18 credits) from the following:		
SO 101	Introduction to Sociology	3

SO 375	Sociology of the Everyday	3

Department of Visual and Performing Arts

The Department of Visual and Performing Arts is an interdisciplinary department that offers students the opportunity to study the history, theory and practice of art, design, theater, game design and music. The visual arts programs foster the development of creative processes for the creation of innovative works of art and design while situating the work in the broader contexts of history and culture. The performing arts programs include courses in the history of the disciplines and techniques of performance, which are enriched by an active theater production program and performing ensembles.

Programs in the Department of Visual and Performing Arts offer students a foundation in creative thinking that is recognized as critical to problem-solving and conceptualization, qualities increasingly valued by leaders and organizations in all areas of society.

The Department of Visual and Performing Arts at Quinnipiac University is committed to providing our students with the opportunity to develop creative thinking skills through experiential learning as a part of their general education and in pre-professional programs. Through study of the practice, theory and history of music, theater, visual art and game design, we provide an opportunity for students to explore their creative abilities in a hands-on environment.

Bachelor's Degrees

- Bachelor of Arts in Game Design and Development (p. 295)
- Bachelor of Arts in Theater (p. 296)

Dual-Degrees

- Accelerated Dual-Degree BA in Theater/MBA (3+1) (p. 298)

Minors

- Minor in Fine Arts (p. 300)
- Minor in Game Design and Development (p. 300)
- Minor in Music (p. 301)
- Minor in Theater (p. 301)
- Performing Arts Workshop (p. 302)

Art (AR)

AR 101. Introduction to Art. 3 Credits.

This course is a study of major art forms and a probe into the nature of the creative process and public response. The course combines art history with hands-on activities. It is intended for students who plan to take only one art course.

Offered: As needed

UC: Fine Arts

AR 102. Art History: Ancient Through Medieval. 3 Credits.

This introductory course considers art as seen in its cultural and historical context from prehistory through the medieval period. Students explore the stylistic elements that make great works typical of their era.

Offered: Every year, All

UC: Fine Arts

AR 102H. Honors Art History I. 3 Credits.

This introductory course considers art as seen in its cultural and historical context from prehistory through the medieval period. Students explore the stylistic elements that make great works typical of their era.

Offered: As needed

UC: Fine Arts

AR 103. Art History: Renaissance Through Contemporary. 3 Credits.

This introductory course considers art as seen in its cultural and historical context from the Renaissance through the contemporary era. Students explore the stylistic elements that make great works typical of their era.

Offered: Every year, All

UC: Fine Arts

AR 103H. Art History: Renaissance Through Contemporary. 3 Credits.

Honors Course – This introductory course considers art as seen in its cultural and historical context from the Renaissance through the contemporary era. Students explore the stylistic elements that make great works typical of their era.

UC: Fine Arts

AR 104. Survey of Non-Western Art. 3 Credits.

Participants study the major themes and forms of non-Western arts from East Asia, South Asia, Africa, the Pre-Columbian Americas and Oceania, with emphasis on their cultural, philosophical and religious contexts. Students define works of art both formally and within the framework of their method of manufacture, audience and cultural value. They also explore aspects of various non-Western religions, cultural considerations and influences in relation to the works. Students with little experience of or no prior courses in art history learn the basic terminology and methodology of the field.

Offered: Every year, All

UC: Fine Arts

AR 105. American Art. 3 Credits.

This course serves as an introduction to the history of art in the United States from the pre-colonial period to the present. The curriculum includes a careful analysis of representative works reinforced by visits to area art galleries.

Offered: Every year, All

UC: Fine Arts

AR 115. Drawing for Anime, Games. 3 Credits.

Offered: Every year, All

AR 140. Basic Visual Design. 3 Credits.

This course exposes students to the basics of two-dimensional design. Topics include the elements of design, the principles of order and how these basics combine to create exceptional composition in various forms of art.

Offered: Every year, All

UC: Fine Arts

- AR 158. Photography I. 3 Credits.**
This beginning course in still photography is designed to teach basic photographic techniques. Additional topics include lighting, advertising, fashion and portrait photography. Students must provide a fully adjustable digital camera or Digital Single Lens Reflex (DSLR) camera.
Offered: Every year, All
UC: Fine Arts
- AR 165. Introduction to Digital Art. 3 Credits.**
This Introduction to Digital Art will explore the historical and contemporary discourse of digital art and introduce students to techniques to make their digital dreams a reality. In this course, students will learn the fundamentals of 2-dimensional image making using various digital applications. An emphasis will be placed on the formal, technical, and conceptual treatment of digital art, as well as each student's unique creative vision.
Offered: As needed
- AR 175. Special Topics in Art History. 3 Credits.**
This group of courses introduces art history by way of particular themes. Each covers at least three eras or movements in art history, exploring imagery, sculpture, architecture and decorative arts. Topics include: The Art and Architecture of Health and Medicine; Art and Propaganda; The Art and Imagery of Weaponry and War; Art and Love; Art and Death; and The Image of the Divine.
Offered: As needed
UC: Fine Arts
- AR 175H. Honors -Special Topics in Art History. 3 Credits.**
This group of courses introduces art history by way of particular themes. Each covers at least three eras or movements in art history, exploring imagery, sculpture, architecture and decorative arts. Topics include: The Art and Architecture of Health and Medicine; Art and Propaganda; The Art and Imagery of Weaponry and War; Art and Love; Art and Death; and The Image of the Divine.
Offered: As needed
UC: Fine Arts
- AR 200. Special Topics Course. 3 Credits.**
- AR 210. The Creative Process. 3 Credits.**
This course introduces students to the creative process in the visual arts. Students learn to evaluate and critique their personal artwork as well as the work of others to develop a working process that enables them to go from initial thought to final product. Topics include: how to expand on initial ideas, the proper use of a sketchbook, looking at and evaluating famous works of art, and how to know when a work of art is finished.
Offered: Every year, All
UC: Fine Arts
- AR 240. Graphic Design. 3 Credits.**
Students gain practical experience in the creation of pictorial devices used to disseminate product information, including drawing, painting, illustration and typography.
Prerequisites: Take AR 140.
Offered: As needed
UC: Fine Arts
- AR 241. Color Theory. 3 Credits.**
This course introduces students to the basics of color theory in design. Participants explore different topics through a series of short in-class projects and longer out of class assignments. Topics include the use of the grey scale, color mixing, color harmonies and discord, among others.
Offered: Every year, All
UC: Fine Arts
- AR 242. Cartooning. 3 Credits.**
This course provides an overview of the history of the comic and cartoon arts, and explores a variety of cartooning techniques. While studying the techniques of the masters, students plan, and eventually execute their own original cartoons. This class is open to absolute beginners as well as students with previous drawing, painting and cartooning experience.
Offered: As needed
UC: Fine Arts
- AR 250. Studio Art: Special Topic. 3 Credits.**
Students gain hands-on experience in creative art. The medium varies from year to year and from section to section.
Offered: As needed, All
UC: Fine Arts
- AR 251. Studio Art: Drawing. 3 Credits.**
This studio course serves as an introduction to basic drawing skills. Subjects may include still life, landscape and portraits. Work is done in pencil, ink and other media.
Offered: Every year, All
UC: Fine Arts
- AR 252. Studio Art: Painting. 3 Credits.**
This studio course serves as an introduction to basic painting skills. Coursework includes specialized painting techniques, color theory and assignments based on both traditional and contemporary styles. All work is completed in acrylic painting media with some mixed media components.
Offered: Every year, All
UC: Fine Arts
- AR 253. Studio Art: Sculpture. 3 Credits.**
This studio course introduces students to sculpture and three-dimensional design using a variety of materials. Students gain an understanding and appreciation of basic techniques and processes involved in creating sculpture and learn how a three-dimensional object impacts its environment.
Offered: Every year, All
UC: Fine Arts
- AR 254. Studio Art: Printmaking. 3 Credits.**
This studio course serves as an introduction to the many processes used in printmaking. Techniques studied include those used in woodcut and linoleum cut, etching and drypoint, monotype and monoprint, embossment and lithography.
Offered: Every year, All
UC: Fine Arts
- AR 257. Ap Studio Art Introduction to Studio Methods. 3 Credits.**
This eight-week accelerated course introduces students to basic studio methods. Both traditional and contemporary techniques are explored through a series of short in-class projects and longer out-of-class assignments. Coursework includes techniques and materials for a variety of media, including drawing, painting, watercolor, sculpture and printmaking.
Offered: As needed
UC: Fine Arts
- AR 258. Photography II. 3 Credits.**
This course is a continuation of Photography I (AR 158). From daguerreotypes to digital, photography's history and future are discussed through slide lectures and hands-on activities. Each student must provide an adjustable digital or film 35 mm. camera, and photo processing.
Prerequisites: Take AR 158.
Offered: Every year, All
UC: Fine Arts

- AR 262. Studio Art: Watercolor.** **3 Credits.**
This course introduces students to the basics of watercolor. Participants explore different topics through a series of short in-class projects and longer out-of-class assignments. Topics include specialized watercolor painting techniques, color theory and assignments based on both traditional and contemporary styles. All work is completed in watercolor with some mixed media components.
Offered: Every year, All
UC: Fine Arts
- AR 263. Studio Art: Collage.** **3 Credits.**
This hands-on studio course enables students to explore materials and techniques involved in the art of making a collage. This course looks at various ways to incorporate pre-made materials into more elaborate finished projects. Participants use a variety of materials including both manmade and natural objects as well as various painting, drawing and sculpture media.
Offered: Every year, All
UC: Fine Arts
- AR 299. Independent Study.** **3 Credits.**
Offered: As needed, All
- AR 300. Special Topics in Art History.** **3 Credits.**
Upper-level special topics courses in studio art or art history. Prerequisites vary by section.
Prerequisites: Take AR 102 or AR 103 or AR 104 or AR 105.
Offered: As needed, All
UC: Fine Arts
- AR 303. Studio Art: Advanced Drawing.** **3 Credits.**
This advanced drawing class expands on knowledge gained in an introductory level drawing course. Topics include both traditional and contemporary techniques and advanced composition. Work is completed in various drawing materials, including charcoal, pencil, conte and ink.
Prerequisites: Take AR 251.
Offered: Every year, All
UC: Fine Arts
- AR 304. Studio Art: Advanced Painting.** **3 Credits.**
This advanced painting class enhances knowledge gained in an introductory level painting course. Specialized painting techniques include expanded color theory as well as an introduction to contemporary techniques. All work is completed in acrylic paint with some mixed media components.
Prerequisites: Take AR 252.
Offered: Every year, All
UC: Fine Arts
- AR 305. Special Topics in Studio Art.** **3 Credits.**
Offered: As needed
UC: Fine Arts
- AR 317. Art of the Italian Renaissance.** **3 Credits.**
This course covers the period from c.1350-1600 in Italy. Participants study the painters, sculptors and architects of the period, including their artistic techniques, styles and use of symbolism. Topics include the writings by artists of the time as well as an examination of those artists and artistic movements that served as precursors to this compelling period of art history. Students further study the political, religious, economic and scientific advances of the period, including opportunities for women and the influence of regional geography on the arts.
Prerequisites: Take AR 102, AR 103, AR 104 or AR 105.
Offered: As needed
UC: Fine Arts
- AR 325. Women Artists (WGS 315).** **3 Credits.**
This art history course focuses on the lives and artwork of women such as Hildegard von Bingen, Mary Cassatt, Frida Kahlo and Georgia O'Keefe.
Prerequisites: Take one of the following: AR 102, AR 103, AR 104 or AR 105.
Offered: As needed
UC: Fine Arts
- AR 335. Digital Photography.** **3 Credits.**
This course is designed to help students learn digital camera operation, as well as computer-based image correction and manipulation through the use of Adobe Photoshop. Participants explore relevant topics through class lectures, demonstrations, in-class exercises and out-of-class assignments. Topics include the methods and techniques used to create, edit and critically judge digital images.
Prerequisites: Take one of the following: AR 140, AR 158.
Offered: As needed
UC: Fine Arts
- AR 360. Innovation in the Arts and Sciences.** **3 Credits.**
This course reviews science and art practices to explore how innovations occur. Because discovery and invention go hand in hand, students consider the ethics of constructing according to needs, imagination and a sense of what the world should be. Particular attention is paid to the values of diversity, from disciplines to cultures. Junior or senior status is required.
Offered: As needed
UC: Fine Arts
- AR 380. Interactive Art.** **3 Credits.**
This course presents an interdisciplinary examination of the functions in art, literature and theater through readings and discussions of selected creative and critical works. Topics include self-organization, open systems, emergence, complexity, pragmatism and play. Students use the final project to demonstrate a practical understanding of interactive processes. Junior or senior status is required.
Offered: As needed
UC: Fine Arts
- AR 499. Independent Study.** **3 Credits.**
Advanced independent studio work in painting, printmaking, graphic design, photography.
Offered: As needed, All
- ## Game Design and Development (GDD)
- GDD 101. Introduction to Game Design.** **3 Credits.**
This course introduces students to the practice of game design (board, card, dice, physical games, videogames), theories of game design and play, the study of the social effects of games, the role of serious games for teaching and learning and production practices in the game industry. Students learn critical analysis of games and the process of design documentation.
Offered: Every year, All
- GDD 102. Drawing for Games and Animation.** **3 Credits.**
In this course, students learn basics of proportion, anatomy, weight and balance to develop characters for video games and 2D and 3D animation. Topics include approaches to stylization such as animé and graphic novels. Students use traditional pencil and paper as well as Adobe Photoshop and other software.
Offered: Every year, Fall

GDD 110. Introduction to Visual Design for Games. 3 Credits.

This foundation course prepares students for upper-level coursework by introducing critical, analytical and problem-solving strategies for researching and developing graphics for games. Topics include layout, color theory, font management, logo design, and user interface design. Practical hands-on methods include visual research, design journals, thumbnail sketches, concept art, pixel art, storyboarding and 2D development tools. Completed artwork is then integrated into game engines.

Offered: Every year, Fall

GDD 140. Creativity and Computation. 3 Credits.

This course teaches software literacy within the visual arts and visual literacy within technology. Students develop basic coding expertise and the confidence necessary to create interactive artwork and games. The course teaches essential 21st-century skills including computational and systems thinking, along with quantitative reasoning coupled with creative problem solving and generative visual aesthetics. No previous experience with programming necessary.

Offered: Every year, Fall

UC: Fine Arts

GDD 175. Special Topics in Game Design. 3 Credits.

Courses of particular interest to game design students offered on an occasional basis. These courses have no prerequisite. See the Special Topics Bulletin on the Registrar's website for specific course descriptions.

Offered: As needed

GDD 200. Introduction to Game Development. 3 Credits.

This course provides a practical, hands-on overview of game development. Students learn how to make games from scratch by using a game engine to code behaviors and manipulate assets. Individual game development concepts are introduced incrementally. Students are required to demonstrate their understanding of these concepts through creative project work. Some programming experience is required.

Prerequisites: Take GDD 140 or CSC 110 or equivalent college level programming course.

Offered: Every year, Spring

GDD 201. Professionalism Practice for Game Design. 3 Credits.

In this course, students practice the skills necessary for professional work in game development. They develop a portfolio that showcases their skills and work using HTML, CSS, and Javascript and create polished game design process documentation. Topics include: researching and applying game analysis and theory to creative practice, brainstorming, prototyping, and playtesting game pitches.

Offered: Every year, Fall

GDD 202. Game Art I. 3 Credits.

This course introduces students to the basic skills and pipeline for creating 2D and 3D assets for games and animation. Topics include: lighting, modeling and textures. Artwork is integrated into 3D game engines and optimized for performance.

Prerequisites: Take GDD 102 or GDD 110 or permission of the program director.

Offered: Every year, Fall

GDD 207. Digital Music Composition for Games. 3 Credits.

This course covers the fundamentals of audio creation and implementation for games using a variety of software and digital tools. Readings on theory are integrated with group discussions and critique of student work. Classwork is project-based and students are encouraged to design audio for projects being developed in other classes.

Offered: As needed

GDD 210. Game Lab I: Team Projects. 3 Credits.

This is the first of a two-course sequence focusing on game production, coding, prototyping and playtesting. In Game Lab I, students work individually and in teams to define and develop game concepts, research content, develop game mechanics, create game assets and build working prototypes. Prerequisite may be waived with permission of the program director.

Prerequisites: Take GDD 200.

Offered: Every year, Fall

GDD 211. Game Lab II: Team Projects. 3 Credits.

This course is a continuation of GDD 210. Students continue to work in teams to build working prototypes while learning about the game development process, project management, play testing and usability testing. Prerequisite may be waived with permission of the program director.

Prerequisites: Take GDD 210.

Offered: Every year, Spring

GDD 215. eSports Management. 3 Credits.

This course is designed to teach students how to recruit, retain, develop and manage eSports teams. Students also explore the eSports industry, its rise and growth, trends in the space and where the field is likely to go. Finally, students discuss the business of eSports and look at possible opportunities that may arise from the growth of this new competitive space, including impacts on student athletes and colleges, professional teams, the world of sports (including the Olympics), and sponsorships. Prerequisite may be waived with permission of the program director.

Prerequisites: Take GDD 101.

Offered: As needed

GDD 250. Interactive Storytelling and Narrative (EN 207). 3 Credits.

This course draws from English and Game Development & Design to explore the craft and purpose of interactive storytelling. Course content will cover both the creation and analysis of various interactive texts. Students in this class will combine basic coding language with creative writing principles to produce a complex interactive narrative. The interactive narrative will serve as a semester-long project that emphasizes autonomous characters, a responsive setting, and meaningful story branches navigated by a user. Students will also develop a theoretical understanding of interactive media

Offered: As needed

GDD 290. Internship. 1-3 Credits.

Under the supervision of a faculty member and a participating private company, corporation, institution or community organization, students gain real-world experience working in the field of game design or related fields. For majors or minors in game design and development. Requires permission of the program director.

Offered: Every year, All

GDD 301. Game Design Tools and Processes. 3 Credits.

Students examine games from different perspectives and investigate how those perspectives affect the design process. Project work encourages students to consider the physical, cognitive and narrative potential in games. Students use a number of game-making tools that support these perspectives.

Prerequisites: Take GDD 210 or CSC 110.

Offered: Every year, Spring

- GDD 302. Game Art II. 3 Credits.**
Students continue working with software tools required for designing and building 2D and 3D assets such as characters, costumes, props, levels, environments and worlds.
Prerequisites: Take GDD 202.
Offered: Every year, Spring
- GDD 303. The Art of Audio Narrative (FTM 380 EN 303). 3 Credits.**
This course is about storytelling. Students learn the basics of multi-track audio recording and mixing. They write and produce fiction and nonfiction audio narratives. Each project is shared in a stimulating and mutually supportive workshop environment. Students read and listen widely to gain a sense of the history and theory of radio art. Participants also spend time identifying target audiences and looking at ways to distribute student work to the larger world of public and independent radio. Prerequisite may be waived with permission of program director.
Prerequisites: Take GDD 101.
Offered: Every other year, Fall
- GDD 310. Game Lab III: Team. 3 Credits.**
The topic of this Game Lab rotates to allow students to explore other game engines, modalities, and publishing formats for games. These include: Introduction to Unreal and Mobile Game Design, and Advanced AR/VR. Prerequisite may be waived with permission of the program director.
Prerequisites: Take GDD 211.
Offered: Every year, Fall
- GDD 311. Game Lab IV: Team Projects. 3 Credits.**
This Game Lab provides students with an experiential learning opportunity by building a game for a client or for publication. Students work in teams to build working prototypes and manage the life cycle of the game development process including troubleshooting, playtesting, usability testing and revisions. Prerequisite may be waived with permission of the program director.
Prerequisites: Permission of instructor.
Offered: Every year, Spring
- GDD 314. VR/AR Development for Games. 3 Credits.**
This course is an exploration into the potentials of Augmented and Virtual Reality in play and games. Students learn the skills to design and develop Virtual Reality applications for dedicated headsets and Augmented Reality applications for smartphones in Unity. Prerequisite may be waived with permission of the program director.
Prerequisites: Take GDD 200.
Offered: Every year, Spring
- GDD 316. Advanced Topics in Game Development. 3 Credits.**
Modern games rely on a range of algorithms and mathematical techniques to generate compelling dynamic game mechanics. This course develops advanced topics through mediated examples, playtesting and collaborative projects. Students build working prototypes that leverage applied math to generate complex game mechanics. The course will review basic mathematical tools for game physics, transforms, trajectory and mesh generation. More complex behaviors and movements are addressed through algorithms for procedural generation, agents, artificial intelligence, swarms and dynamic surfaces.
Prerequisites: Take GDD 200 or CSC 110
Offered: Every year, Spring
- GDD 320. Cross Collaboration. 1-2 Credits.**
This course enables students not enrolled in the course to collaborate with a game team in a GDD Game Lab. Students are responsible for defining course deliverables in consultation with their teammates and the faculty teaching the Game Lab. Permission of the program director needed.
Offered: As needed
- GDD 350. Board Game Design. 3 Credits.**
This course provides an introduction to the design of table-top and board games. Board games share many ideas with digital games but utilize different game mechanics. Designing for board games explores the practice of alternate approaches to game design, and the skills learned in this class can be applied to both. Topics include design, history, manufacturing and different genres such as classic board games, deck-building games and card-based strategy games.
Offered: As needed
- GDD 370. Acting and Directing for Game Design. 3 Credits.**
This course provides an introduction to the craft of directing and acting for game production. Topics include story analysis and interpretation, director's concept, and the history and theories of directing. Students learn the basic principles of acting, including scene analysis, motivation, intention and character work. They perform exercises, monologues and scenes. Additional topics include methods of actor coaching, rehearsal techniques and working with the creative game design team.
Offered: As needed
- GDD 380. The Business of Games. 3 Credits.**
This course helps students gain an understanding of how to develop and run a successful video game business. Students look at existing businesses and new businesses as models and cautionary tales. Topics include developing financials, how to market a business, building a strong company culture, how to crowdfund and how to incorporate.
Offered: As needed
- GDD 390. Internship. 1-3 Credits.**
Under the supervision of a faculty member and a participating private company, corporation, institution or community organization, students gain real-world experience working in the field of game design or related fields. For majors or minors in game design and development. Requires permission of the program director.
Offered: Every year, All
- GDD 394. History of Video Games. 3 Credits.**
Video games are an interactive medium grounded in step-by-step innovation in console and computer systems combined with parallel development in software capabilities. This course examines the cultural, social and educational aspects of games and considers how they changed over time in response to market pressures, societal concerns about content and technological development. Students play and analyze historical games, learn how to write game reviews and research new phenomenon in game development.
Prerequisites: Take GDD 101 or permission of the program director.
Offered: Every year, Spring
- GDD 395. Critical Game Studies Seminar (PL 395). 3 Credits.**
In this course, students address topics in game studies, ludology or play theory to develop critical, conceptual and cultural understandings of narrative, meaning and identity in games. The course also addresses the design and development of serious and meaningful games and the aesthetic, social and technological implications of new emerging forms. Prerequisite may be waived with permission of the program director.
Prerequisites: Take GDD 101 or PL 101.
Offered: Fall

GDD 396. Games, Learning & Society. 3 Credits.

This course addresses the design, use, and assessment of serious and meaningful games in education. The class has both theoretical and applied components. Students will conduct literature reviews to understand current practice in a specific area of applied games, i.e. outcomes assessment, data collection, games for physical therapy, games for diabetes management, games to train surgeons, etc. and then produce a research paper on their area of focus. Students will then design, prototype, and test an applied game that addresses an actual societal need. Partnership with outside individuals and institutions is encouraged and supported.

Offered: As needed

GDD 399. Independent Study. 1-6 Credits.

Under the supervision of a faculty member, students pursue self-directed research and in-depth study in a subject that is not covered by the existing curriculum.

Offered: As needed

GDD 402. Game Art III. 3 Credits.

Students continue with more advanced work using software tools required for designing and building art assets. Topics include techniques of advanced 3D modeling, rigging, texturing, lighting, motion capture and animation, scene planning, virtual camera angles, rendering, editing and compositing.

Prerequisites: Take GDD 302.

Offered: Every year, Fall

GDD 403. Professional Apprenticeship. 1-2 Credits.

This course provides students with the opportunity to work one-on-one with a game industry professional to advance and refine their skills. Students are responsible for defining course deliverables in consultation with their professional mentor. Permission of the Program Director necessary.

Offered: As needed

GDD 405. Game Audio Design. 3 Credits.

This course covers sound design for games while exploring techniques of digital sound synthesis, recording, sampling and editing. Prerequisite may be waived with permission of program director.

Prerequisites: Take GDD 200.

Offered: As needed

GDD 410. Game Lab V: Team Projects. 3 Credits.

Game Lab V and VI form a two-course sequence that builds upon the knowledge and skills of prior courses. With a focus on the process of iteration, this course extends the experience of game production, coding, prototyping and playtesting gained in previous Game Labs. Students learn the basics of agile development and how to put it into practice. For game design and development majors.

Prerequisites: Take GDD 211 and senior status or permission of the program director.

Offered: Every year, Fall

GDD 411. Game Lab VI: Team Projects. 3 Credits.

This course is a continuation of Game Lab V. At the end of the semester, teams present a working game and provide documentation of their design and development process. Prerequisite: For game design and development majors.

Prerequisites: Take GDD 410 and senior status or permission of the program director.

Offered: Every year, Spring

GDD 490. Internship. 1-3 Credits.

Under the supervision of a faculty member and a participating private company, corporation, institution or community organization, students gain real-world experience working in the field of game design or related fields. For majors or minors in game design and development. Requires permission of the program director.

Offered: Every year, All

GDD 495. Senior Project and Seminar I. 3 Credits.

This course is the senior capstone in the major. Students reflect on how their academic experience and extracurricular activities during their undergraduate years have shaped their personal goals and aspirations. Students refine and polish their portfolio, produce a resume and other professional materials and prepare for their careers after graduation.

Prerequisites: Requires senior status and a major or minor in game design and development.

Offered: Every year, Spring

GDD 499. Independent Study. 1-6 Credits.

Under the supervision of a faculty member, students pursue self-directed research and in-depth study in a subject that is not covered by the existing curriculum. Prerequisite: Junior or senior standing.

Prerequisites: GDD tutorial courses required for graduation are offered as needed.

Offered: As needed

GDD 520. Games Learning & Society. 3 Credits.

This course addresses the design, use, and assessm

Offered: Every year, Fall and Spring

Music (MU)

MU 110. Private Music Lessons. 1 Credit.

Music lessons give Quinnipiac students the opportunity to study the piano, guitar, voice, violin, viola or woodwind instruments with a highly skilled professional artist. In private music lessons, students develop an understanding of the fundamental elements of playing a musical instrument including: musical notation, proper technique, music theory and performance. No prior musical training is required as lessons are tailored by the instructor to be appropriate for any level of study. Students may choose to perform in program recitals that are held each semester, if they choose to do so.

Offered: Every year, All

UC: Fine Arts

MU 130. Understanding Music. 3 Credits.

Students study elements of musical form and style in an effort to discover how music works. This course investigates the most important figures from the history of Western music as well as some world music and contemporary composers.

Offered: Every year, All

UC: Fine Arts

MU 130H. Honors Understanding Music. 3 Credits.

Students study elements of musical form and style in an effort to discover how music works. This course investigates the most important figures from the history of Western music as well as some world music and contemporary composers.

Offered: Every year, All

UC: Fine Arts

- MU 150. American Popular Music: From the Blues to Hip Hop. 3 Credits.**
This course investigates the musical and cultural history of American popular music. The course looks at many different styles of music including Jazz, Blues, Rock n Roll, Country and Hip-Hop. The course studies the musical style and the social, cultural, political and historical contexts from which American popular music emerged.
Offered: Every year, Fall and Spring
UC: Fine Arts
- MU 150H. Honors: American Popular Music: From the Blues to Hip Hop. 3 Credits.**
This course investigates the musical and cultural history of American popular music. The course looks at many different styles of music including Jazz, Blues, Rock n Roll, Country and Hip-Hop. The course studies the musical style and the social, cultural, political and historical contexts from which American popular music emerged.
Offered: Every year, Fall and Spring
UC: Fine Arts
- MU 175. Special Topics in Music. 3 Credits.**
Offered: As needed
UC: Fine Arts
- MU 190. Quinipiac University Singers. 1 Credit.**
This workshop in music is devoted to the study, singing and presentation of choral music from a variety of periods. The course focuses on specific vocal and ensemble techniques. Students of every experience and ability level are encouraged to attend.
Offered: Every year, All
UC: Fine Arts
- MU 191. Quinipiac Chamber Orchestra. 1 Credit.**
Students perform chamber music and orchestral compositions. A wide variety of styles including classical, film and popular music are performed. All instruments are used and students of every experience and ability level are encouraged to attend.
Offered: Every year, All
UC: Fine Arts
- MU 194. Jazz Ensemble. 1 Credit.**
Students explore and perform literature written for big band and smaller ensembles. A wide variety of styles, composers and arrangers are covered. Students of every experience and ability level are encouraged to attend.
Offered: Every year, All
UC: Fine Arts
- MU 200. Special Topics. 3 Credits.**
Offered: As needed, All
UC: Fine Arts
- MU 211. History of Jazz. 3 Credits.**
This course investigates the origins and history of Jazz from its beginning in the early twentieth century through present avant-garde forms. Jazz literature is surveyed with an analysis of important soloists, small jazz groups and large ensembles.
Offered: Every year, All
UC: Fine Arts
- MU 211H. Honors History of Jazz. 3 Credits.**
This course covers the origins and history of the jazz idiom from its beginning in the early twentieth century through present avant-garde forms. Jazz literature is surveyed with an analysis of important soloists, small jazz groups and large ensembles.
Offered: Every year, All
UC: Fine Arts
- MU 213. Music of the 20th Century. 3 Credits.**
This course examines the transformations that took place in art music from the late romantic era to the end of the twentieth century. The course presents a diverse spectrum of musical styles and explores how popular forms of music, world music, and changes in society have impacted musical culture here and abroad.
Prerequisites: Take 3 credits from subject MU.
Offered: As needed
UC: Fine Arts
- MU 230. Music Theory I. 3 Credits.**
This course is designed to give students a solid and practical basis for appreciation or participation of musical experiences. Emphasis is placed on study of the basic elements of music theory including rhythm, melody, harmony, modes, scales, key signature, and intervals.
Offered: Every year, Fall
UC: Fine Arts
- MU 250. Music and Human Identity. 3 Credits.**
This course explores how specific disabilities contributed to the formation of a composer or performer's musical identity. This course places special emphasis on how disabilities influence creative and performance standards within a culture. Students discuss musicians from many different genres, including classical, jazz and pop music.
Offered: Every year, Fall and Spring
UC: Fine Arts
- MU 280. Music and Our Life's Work. 4 Credits.**
The objective of this course is to empower students with information to help them understand and appreciate various genres of music and their connection to our life's work. Utilizing a group cooperative learning approach, students engage in directed listening activities and investigation of select Western Art Music examples. They explore the societal and historical influences that have contributed to the development of music, as well as the effect of music on our daily lives. For their culminating project, "Music and Your Major," students articulate the relationship of music to the work that they do.
Offered: As needed
UC: Fine Arts
- MU 299. Independent Study. 1-3 Credits.**
By special arrangement with instructor and with approval of department chair.
Offered: Every year, All
- MU 300. Music Directed Study. 1-3 Credits.**
Offered: As needed
- MU 330. Music Theory II. 3 Credits.**
This course studies the range, timbre, transposition and uses of various instruments in consort. Fundamental techniques of arranging, vocal and instrumental are considered.
Prerequisites: Take MU 230.
Offered: Every year, Spring
UC: Fine Arts
- MU 399. Independent Study. 3 Credits.**
By special arrangement with instructor and with approval of department chair.
Offered: Every year, All

Theater (DR)

DR 101. Understanding Theater. 3 Credits.

This course presents an introduction to the practices and purposes of theater through attending plays, readings in theater history, dramatic theory and stage production work.

Offered: Every year, All

UC: Fine Arts

DR 140. Stagecraft. 3 Credits.

Stagecraft is a practical, semester-long workshop on the process of transforming a design concept into a workable end. This course provides an introduction to the theory, techniques, materials and equipment of theater technology with an emphasis on the ways in which practical considerations inform the process and product of theater making. Areas of study include set and costume construction, scene painting, lighting, projection and sound. The course incorporates extensive practical work both in and outside of class; and students are required to complete 28 hours of technical production work for the mainstage production season.

Offered: Every year, Fall and Spring

UC: Fine Arts

DR 150. Performance Fundamentals. 3 Credits.

This course provides an introduction to the basic vocal, physical and improvisational skills necessary for successful performance in a variety of areas. Skills to be emphasized include vocal support and projection, physical relaxation and focus, diction, articulation and improvisational techniques. Students interested in broadcast journalism, newscasting, public relations and advocacy, as well as more theatrical areas of public performance, learn to work effectively in front of an audience while maintaining focus and energy.

Offered: As needed

UC: Fine Arts

DR 160. Acting I. 3 Credits.

Students are introduced to the basic principles of acting, including scene analysis, motivation, intention and character work. Students perform exercises, monologues and scenes.

Offered: Every year, Fall and Spring

UC: Fine Arts

DR 181. Improvisational Acting. 3 Credits.

This course introduces students to long-form improvisational theater. In this form, actors build scenes from scratch with only a one-word suggestion from the audience. This course is an introductory course and is suitable for students with or without prior performance experience. The semester culminates with a class performance for an invited audience.

Offered: Every year, Fall and Spring

UC: Fine Arts

DR 191. Theater Practice I. 1 Credit.

Students complete a minimum 40 hours of production work or related professional experience. Students must obtain approval from the theater program director before beginning their work. Approval is not automatic. Students are expected to articulate how the proposed experiential learning aligns with their post-graduation goals.

Offered: As needed

DR 199. Independent Study. 1-3 Credits.

A student may, in collaboration with an instructor, create course which focuses on specific area of dramatic study. Internships and work on university theater program productions are possible areas of focus.

Offered: As needed

DR 200. Special Topics. 3 Credits.

This course focuses on a specialized area of theater study. Past topics have included unique performance approaches, scenic and lighting design and special topics in theater history and dramatic literature. Course may be repeated for credit.

Offered: As needed

UC: Fine Arts

DR 220. Voice and Movement. 3 Credits.

This course covers practical laboratory work in vocal production and movement, utilizing developmental techniques of Kristen Linklater, Alexander Feldenkrais, Jerzy Grotowski, Michael Chekhov, with special emphasis on individual coaching and problem solving. Studio work also may include techniques of characterization, including neutral and character mask exploration, work with classical texts, and acquisition of dialect skills.

Offered: Every year, Fall

UC: Fine Arts

DR 221. Voice and Diction. 3 Credits.

Speaking clearly is a valuable skill that serves the individual in any facet of her/his post-university life. A dynamic speaking voice can convey emotion, captivate an audience and propel a career forward regardless of whether your goal is to become an actor, an on-air personality, a businessperson, a doctor, a social worker, a teacher or a lawyer. Perfecting the skills offered by Voice & Diction helps the student excel in all areas of life in and beyond university. No prior performance experience is necessary. Students who would like to improve their public speaking and communication skills find great benefits from this course.

Offered: As needed

UC: Fine Arts

DR 230. Directing I. 3 Credits.

This course serves as an introduction to the craft of the theatrical director. Topics include play analysis and interpretation, director's concept, visual composition and the history and theories of directing. Also included: methods of actor coaching, rehearsal techniques and working with the creative team of designers, dramaturges and production staff. As a final project, each student directs a scene that is presented in a student workshop performance at the end of the semester.

Offered: Every year, All

UC: Fine Arts

DR 250. Stage Management. 3 Credits.

This course introduces current stage management theory and practices. Students will learn about the role of the stage manager; read first and second-hand accounts of current practicing stage managers; discover how a stage manager is responsible for the atmosphere of a production; apply theory to assignments and projects; engage in hands on activities to learn the technical aspects of the position, and reflect and evaluate on their personal process. These topics will be presented through readings, lectures, activities, demonstrations, and discussions, and applied through assignments and projects. Classwork will be evaluated through discussion participation, assignments, and projects

Offered: As needed

UC: Fine Arts

DR 257. Design for the Theater. 3 Credits.

This course provides an introduction to theatrical design history, process and implementation. Students explore the concept of design and what it is in the theater. They read first- and second-hand accounts of historic designers and movements in theatrical design. They examine the design process and apply it to class projects. They also reflect and evaluate on their personal process. These topics are presented through readings, lectures and discussions, and applied through group and individual assignments. Although the main focus is scenic, lighting and costume design, all aspects of theater are explored. This course is suitable for students with or without prior theater experience.

Offered: Every year, All

UC: Fine Arts

DR 260. Acting for Film/Tv. 3 Credits.

This is an intermediate studio course in which students gain experience in the specialized performance skills demanded by the film and television mediums. Students work on monologues and scenes that emphasize truth and emotional reality and receive training in the techniques of Stanislavski, Lee Strasberg and Sanford Meisner. When scheduling permits, students collaborate with a mass communications video production class in filming/taping acting scenes.

Offered: Every year, Fall and Spring

UC: Fine Arts

DR 261. Auditioning for the Actor. 3 Credits.

In this course, students learn how to excel at all aspects of the audition process. From how to select and perform audition appropriate monologues, to mock interviews and self-presentation tips, students learn how to succeed. All students are required to complete the course with a headshot and resume as well as two audition-ready monologues. This course is open to all students regardless of major. No prior acting experience is necessary. Students who would like to improve their public speaking, interview and interpersonal skills find great benefits from this course.

Offered: As needed

UC: Fine Arts

DR 270. World Theater History and Dramatic Literature I. 3 Credits.

In this course, students integrate a multicultural history of world theater with the study of performance traditions and dramatic literature. Participants study the ritual foundations of theater through the theater of the early Renaissance period, emphasizing the importance of historical and literary research in devising actual production concepts for period plays. Students apply their knowledge in active and creative projects. Does not have to be taken in sequence with DR 275.

Offered: Every year, Fall

UC: Fine Arts

DR 270H. Honors World Theater History and Dramatic Literature I. 3 Credits.

This course covers the historical development of European theater covering the Classical, Medieval and Early Modern periods. It also examines various types of non-Western performance traditions with a focus on India, Africa, Japan and China. Plays from each time period are read and placed within their historical, political and cultural contexts. The historical development of theater architecture, stage craft, acting theory, and the changing status of the theater artist also is explored. Students apply their knowledge in scholarly and creative projects. Does not have to be taken in sequence with DR 275.

DR 275. World Theater History and Dramatic Literature II. 3 Credits.

This course traces the development of European theater from the Renaissance through the late 19th century and the beginning of modern drama. It also examines non-Western performance traditions in India, China, Japan and Africa. Students learn the importance of locating dramatic literature within its cultural, political and historical contexts. The historical development of theater architecture, stage craft, acting theory, and the changing status of the theater artist also is explored. Students apply their knowledge in scholarly and creative projects. Does not have to be taken in sequence with DR 270.

Offered: Every year, Spring

UC: Fine Arts

DR 282. Landscapes and Lenses. 3 Credits.

This course will teach critical engagement with the field of theatre through application of social justice theory. Topics will include critical race and gender theory and its application to the American theatre of yesterday and today. This course is ideal for anybody interested in making theatre a more egalitarian and restorative industry. No prerequisites are required.

Offered: Every year, Spring

UC: Fine Arts

DR 286. Script Analysis. 3 Credits.

Students learn methods of script analysis that can be used to successfully interpret dramatic texts for performance & production. This skill is essential for all theater practitioners and can be useful to any student who wishes to sharpen his or her analytical and interpretive skills.

Offered: Every year, Fall and Spring

UC: Fine Arts

DR 288. From Script to Stage (WGS 288). 3 Credits.

In this course, students study four scripts of plays being produced in nearby professional theatres, such as Long Wharf Theatre, Yale Repertory Theatre, TheaterWorks, and Hartford Stage. Through writing and discussion, students develop their own ideas about how these scripts might be presented onstage most effectively. Then the students and their instructor travel by bus to see each production. Upon returning, students discuss how each production compared with their own visions. Finally, students write reviews of each production they have seen, thereby learning not only how to analyze a theater production, but also how to write a strongly persuasive essay.

Offered: Every year, Spring

UC: Fine Arts

DR 290. Acting for Classical Stage. 3 Credits.

This intermediate studio course emphasizes the performance skills necessary to execute a classical role. Students work on monologues and scenes drawn from the plays of the Greek tragedians, Shakespeare, Moliere and the writers of the English Restoration. Students acquire the techniques necessary to speak verse and to physically embody a classical character.

Offered: As needed

UC: Fine Arts

DR 291. Theater Practice II. 3 Credits.

Students complete a minimum 120 hours of production work or related professional experience. Students must obtain approval from the theater program director before beginning their work. Approval is not automatic. Students are expected to articulate how the proposed experiential learning aligns with their post-graduation goals.

Offered: As needed

- DR 299. Independent Study.** **1-6 Credits.**
This intermediate level tutorial course stresses independent investigation of a topic in theater/drama selected in consultation with the instructor. One conference weekly; oral and written reports. Course may be repeated for credit.
Offered: As needed
- DR 305. Theater for Young Audiences.** **3 Credits.**
This seminar course allows students to explore various aspects of creating theater for young audiences. Performance skills in improvisation and creative dramatics, adaptation of fairy tales, folklore and other children's literature for plays, and the integration of drama into classroom curriculum are emphasized. Students conduct enrichment workshops at participating area schools and/or perform for young audiences in staged readings, workshops and/or fully mounted productions. Community outreach and service learning are emphasized. Requires permission of instructor. This course may be repeated for credit.
Offered: Every year, Spring
UC: Fine Arts
- DR 307. Drafting and Rendering for Theater.** **3 Credits.**
This studio course explores hand drafting and color rendering for the theater. Students learn to generate hand drafting of ground plans and detail drawings and then interpret these plans into sketches and watercolor renderings. Students use pencils, acrylic paints, watercolor paints and an array of hand drafting tools to communicate their theatrical designs.
Offered: Every other year, Spring
UC: Fine Arts
- DR 335. Musical Theater Performance.** **3 Credits.**
In this studio course, students gain expertise in the special skills and techniques necessary to perform in the musical theater style. Each student performs solo, duet and trio musical theater selections with CD accompaniment. (Music is provided; however, students may choose a different solo piece, provided they have the accompaniment track or access to a pianist.) As a culminating exercise, students select pieces drawn from the semester's performance exercises, and these pieces are performed with appropriate costumes, props and choreography in a public cabaret setting.
Offered: Every year, Spring
UC: Fine Arts
- DR 340. Scenic Design.** **3 Credits.**
This class provides an introduction to the world of scenic design. Through discussion, reading, lecture and demonstration, participants explore the theory and practice of designing for the stage. Using this as a base, students research, sketch, paint and model designs for two plays. By investigating the design process in both an academic and hands-on manner, students gain knowledge in the area of scenic design as well as generally improving their problem-solving skills. Students are expected to purchase materials for sketching and model making.
Prerequisites: Take 1 DR course.
Offered: Every other year, Fall
UC: Fine Arts
- DR 341. Lighting Design for the Theater.** **3 Credits.**
This course provides hands-on experience with the technical and design elements of stage lighting. Students use equipment and techniques directly relating to the theatrical productions scheduled in a given semester, using an artistic and collaborative approach and working with lighting systems in a theater.
Prerequisites: Take DR 140 or DR 257.
Offered: Every other year, Spring
UC: Fine Arts
- DR 342. Costume Design.** **3 Credits.**
This course provides an introduction to the theory, techniques, materials and equipment of costuming. Participants focus on costume construction, fabric, fasteners, sewing machine use, dyeing techniques and costume design. Extensive practical work is completed on an individual student basis. Students participate in costume construction for two productions during the semester.
Offered: Every other year, Fall
UC: Fine Arts
- DR 345. Dance for the Musical Theater.** **3 Credits.**
Students learn musical theater dance styles and choreography through studio performance. As a culminating exercise, students select dance pieces to perform with appropriate costumes, props and choreography in a cabaret setting open to the public.
Offered: Every year, Fall
UC: Fine Arts
- DR 350. Playwriting: The Ten-Minute Play.** **3 Credits.**
This course centers on the 10-minute play. Students develop their own unique styles and strategies for writing short plays. In addition to writing their own plays, students complete a series of writing exercises designed to develop specific skills. The semester culminates with a public reading of each student's best work.
Offered: Every year, Fall
UC: Fine Arts
- DR 360. Acting II.** **3 Credits.**
In this studio course, student actors use exercises in acting technique to deepen and refine their ability to create reality on stage. Students explore the skills necessary to create a sense of truth on stage, beginning with scene analysis and enhanced by weekly in-class scene showings. Discussions on reading written by industry leaders focus on how to apply performance techniques to students' individual scenes and daily lives.
Prerequisites: Take DR 160.
Offered: As needed
UC: Fine Arts
- DR 370. Internship, Conservatory or Professional Experience.** **3 Credits.**
Senior theater majors are required to complete a minimum of 120 hours at an internship, conservatory or professional experience in theater or a related field. Students must obtain approval from the theater program director before beginning their work. Approval is not automatic. Students are expected to articulate how the proposed experiential learning aligns with their post-graduation goals.
Prerequisites: Senior status required.
Offered: Every year, Fall
- DR 375. History and Dramatic Literature of the Contemporary Theater.** **3 Credits.**
This advanced seminar class encompasses a socio-historical study of dramatic literature and theory from the beginnings of the modern era to the present with an emphasis on relevance to contemporary performance techniques. The course examines such movements as realism, naturalism, futurism, symbolism, expressionism, surrealism, constructivism and absurdism, studying the texts, artists and critics of the modernist and post-modernist movements in an attempt to locate contemporary theater within its social, historical and political contexts.
Offered: As needed
UC: Fine Arts

DR 380. Theater Administration.**3 Credits.**

Students explore the economic, legal and managerial aspects of professional theater. The course examines the roles of producers, managers, agents, house managers and box office managers as well as the responsibilities of marketing, programming, touring, public relations, strategic planning and fundraising.

Offered: Every other year, Fall**UC:** Fine Arts**DR 391. Playwriting: The Full-Length Play.****3 Credits.**

This course centers on the full-length play. Students develop their own unique styles and strategies for writing plays while exploring the diverse techniques employed by the playwrights who have already established a foundation for the craft. The semester culminates with a public reading of each student's best work.

Offered: Every year, Spring**DR 410. Senior Seminar.****3 Credits.**

This seminar is required for all senior theater majors. Students engage in a culminating project. During their junior year, students work with an adviser to prepare and submit a detailed proposal outlining their project. Approval is not automatic. Projects are reviewed by a faculty committee and students may be asked to submit revisions or alternative proposals.

Offered: Every year, Spring

Bachelor of Arts in Game Design and Development

Program Contact: Elena Bertozzi (elena.bertozzi@qu.edu) 203-582-7998

The Bachelor of Arts in Game Design and Development is a pre-professional program that prepares students for a variety of career options including online digital technology and its many applications, the highly competitive game design industry, or the pursuit of additional study at the graduate level. This is an applied, interdisciplinary major that focuses on the meaningful application of game technologies beyond commercial entertainment by addressing serious topics regarding the environment, health care and education including STEM and STEAM (science, technology, engineering, arts and math) initiatives. Students acquire a solid foundation in critical thinking and writing, foundations of design, user behavior, systems thinking, as well as an understanding of the cultural impacts of games. They develop specialized technical skills and competence in game design including coding, content development, outcomes assessment and quality assurance. The major provides students with skills that are readily applied to the real world and the curriculum supports and enables experiential learning opportunities such as internships, study abroad and collaborations with external partners.

There are a total of 42 credits in the major. The major has 11 required courses. Students build a core skill set and learn to collaborate with others in Game Labs where cross-disciplinary teams build complete polished games. Students choose which areas they wish to specialize in by taking two classes from any one of the concentrations and one elective from any other concentration. Concentrations include: Programming, Technology, Design Process, Art, Game Studies, Business, Writing, and Audio. In the senior year, the program culminates in a capstone experience when students take the Senior Project and Seminar.

A grade of C- or better is required in all game design and development courses and prerequisites. Students with a GPA of less than 2.0 will be put on probation. After two semesters on probation, students will be advised to change majors.

BA in Game Design and Development Curriculum

It is recommended that students majoring in Game Design and Development pursue a minor, or double major, or take courses in a complementary discipline such as graphic interactive design or computer science.

All majors are required to participate in some form of experiential learning: study abroad, internship or academic/professional product collaboration.

Students majoring in Game Design and Development must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Game Design & Development Core Requirements		33
GDD 101	Introduction to Game Design	
GDD 110	Introduction to Visual Design for Games	
GDD 140	Creativity and Computation	
GDD 200	Introduction to Game Development	
GDD 201	Professionalism Practice for Game Design	
GDD 210	Game Lab I: Team Projects	
GDD 211	Game Lab II: Team Projects	
GDD 311	Game Lab IV: Team Projects ² or GDD 390 Internship	
GDD 410	Game Lab V: Team Projects	
GDD 411	Game Lab VI: Team Projects	
GDD 495	Senior Project and Seminar I	
Concentrations ³		9
With the recommendation of the student's advisor and/or the program director, students select two courses from their primary concentration and one elective from any other concentration		
Technology		
GDD 301	Game Design Tools and Processes	
GDD 310	Game Lab III: Team	
GDD 314	VR/AR Development for Games	
GDD 316	Advanced Topics in Game Development	
Art		
GDD 102	Drawing for Games and Animation	
GDD 202	Game Art I	
GDD 302	Game Art II	
GDD 402	Game Art III

GDD 301	Game Design Tools and Processes
GDD 350	Board Game Design
GDD 370	Acting and Directing for Game Design
IDD 110	Design Research and Methods
Programming	
CSC 111	Data Structures and Abstraction
GDD 316	Advanced Topics in Game Development
SER 120	Object-Oriented Design and Programming
SER 225	Introduction to Software Development
Free Electives	11-14
Total Credits	102-108

¹ All students must complete the University Curriculum (p. 51) requirements.

² Participating in the QU in LA Program or study abroad can also fulfill this requirement.

³ Students wishing to take courses from the above list must complete any prerequisites required by individual departments/programs or schools.

Elective substitutions are permitted with prior approval of the program director.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

- Computational and Systems Thinking:** Be fluent in at least one programming language and associated game engine to construct fully functional working games.
- Critical/Analytical Thinking and Communication:** Play and analyze games using academic research methods, exhibit effective written and verbal communication skills and apply this analysis to the game design process.
- Design Process Thinking:** Prototype, reflect critically on workflow and process, incorporate feedback, and iterate.
- Creative Thinking and Problem Solving:** Generate inventive, novel and imaginative ideas for game design concepts and nimbly respond to design and implementation challenges.
- Multidisciplinary and Diverse Perspective Thinking:** Understand the issues surrounding topics of representation and diversity in game development and be able to discuss them and design games that address them.
- Teamwork and Experiential Learning Expertise:** Collaborate with teams of colleagues with different skill sets to produce work using established game development best practices with a clear definition of scope, responsibilities, progress and assessment of results.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Bachelor of Arts in Theater

Program Contact: Abigail Copeland (p. 7) 203-582-7301

The Bachelor of Arts in Theater at Quinnipiac University prepares students for meaningful careers and graduate studies in all areas of theater performance and production.

After completing the core requirements, upper-class students enroll in advanced electives and participate in a senior seminar where they engage in a culminating project. All theater majors are required to complete at

least one competitive internship, professional experience or conservatory semester. Students are strongly encouraged to take on portfolio building roles within our Main Stage season and at local professional theaters.

The Main Stage season includes contemporary and classical plays, popular musicals and original works. Professional artists are infused into our process to expose students to current practices and develop career-enhancing relationships that will serve them long after they graduate.

The BA in Theater is a great choice for students who enjoy collaboration and wish to explore creative careers within the theater arts and allied disciplines.

BA in Theater Curriculum

Students majoring in theater must meet the following requirements for graduation:

Code	Title	Credits
University Curriculum ¹		46
Modern Language Requirement		3-6
Theater Core Requirements		
DR 140	Stagecraft	3
DR 160	Acting I	3
DR 230	Directing I	3
Select two of:		6
DR 270	World Theater History and Dramatic Literature I

Any DR Course		
Any DR Course 200-level or higher		
Free Electives		17-20
Total Credits		102-108

¹ All students must complete the University Curriculum (p. 51) requirements.

Modern Language Requirement

All CAS students (both bachelor of science and bachelor of arts) must complete one modern language through the 102 level. Modern language courses may also count toward the UC Personal Inquiry II requirement. Students who have taken a language in high school should take the modern language placement test for that language. Students with

placement scores at the 201 level or higher have demonstrated language competency and thus have passed out of the language requirement.

Student Learning Outcomes

Upon completion of the BA in Theater, students will demonstrate the following competencies:

- Understanding:** Students develop an understanding of the roles and responsibilities of theater artists: actor, director, scenic/lighting/costume designer, technical director and playwright.
- Conceptual and Critical Thinking:** Students develop skills to think conceptually and critically about text, performance and production.
- Self-Appraisal:** Students will develop the skills to self-assess, critique and revise their own work.
- Literacy:** Students will develop a fundamental knowledge of theatrical history as well as dramatic literature.
- Production Skills and Knowledge:** Students will develop the skills and techniques necessary for realizing a variety of theatrical styles.
- Collaboration Skills:** Students will develop skills in collective problem solving.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Quinnipiac University agrees to accept the general education embedded in these associate degree programs in accordance with Quinnipiac preferred choices for general education as meeting all the requirements of its undergraduate general education except for the Integrative Capstone Experience and where courses are encumbered by the major (e.g., General Chemistry for the Disciplinary Inquiry Natural Science requirement for a Biochemistry major).

Suggested Transfer Curriculum for BA in Theater

A minimum of 60 credits is required for transfer into the BA in Theater program. Below is a recommended plan of study for the first two years prior to matriculation at Quinnipiac University.

Course	Title	Credits
First Year		
Fall Semester		
English I		3
Theater History I		3
Acting I		3

Total Credits		60-62

Students planning to transfer into the BA in Theater program at Quinnipiac University are highly encouraged to contact the Theater program director, Kevin Daly (Kevin.Daly@qu.edu), to discuss ways they can begin preparing for their senior project proposal during their first two years of college.

Accelerated Dual-Degree BA in Theater/MBA (3+1)

Program Contact: Abigail Copeland (p. 7) 203-582-7301

The Accelerated Dual-Degree BA/MBA (3+1) program offers highly motivated students an opportunity to earn a BA in Theater and an MBA from the School of Business in just 4 years. Both degrees are completed in full without compromise.

This program offers advantages to students who have a passion for theater and ambitions for a career in the global business landscape.

The study of theater sharpens self-confidence and public speaking skills while developing empathy. Theater students engage in hands-on problem solving, take on leadership roles, and become creative thinkers with intrinsic, "get the job done" work ethics. A student who wishes to have their resume stand out from the pack, while developing the above skills and earning a respected degree in business might consider this 3+1 program as a differentiator.

Additionally, this program offers advantages to students who wish to pursue leadership roles within the professional entertainment industry. There is a demand within the industry for skilled leaders who possess strong business administration skills paired with a core understanding of theater arts. Examples of high-paying jobs that 3+1 students would be uniquely qualified for include: executive director, producer, managing director, artistic director, director of development, business manager and operations manager. By pairing their passion for theater with the MBA degree, theater students substantially increase their employability and earning power upon graduation without compromising the personal, interpersonal and intellectual growth that a liberal arts education offers.

BA in Theater/MBA Program of Study

This rigorous program of study includes extra courses during the fall and spring sessions, as well as summer sessions to complete the degree requirements for both a BA and an MBA in just four years.

Student Outcomes

Upon completion of the BA in Theater, students will demonstrate the following competencies:

- Understanding:** Develop an understanding of the roles and responsibilities of theater artists: actor, director, scenic/lighting/costume designer, technical director and playwright.
- Conceptual and Critical Thinking:** Develop skills to think conceptually and critically about text, performance and production.
- Self-Appraisal:** Develop the skills to self-assess, critique and revise their own work.
- Literacy:** Develop a fundamental knowledge of theatrical history as well as dramatic literature.
- Production Skills and Knowledge:** Develop the skills and techniques necessary for realizing a variety of theatrical styles.
- Collaboration Skills:** Develop skills in collective problem-solving.

Upon completion of the MBA program, students will develop and emphasize skills in the following areas:

- Business Analytics:** Demonstrate facility with quantitative methods and tools and an ability to interpret financial metrics.
- Managing People:** Demonstrate an ability to understand models and applications of leadership and social intelligence.
- Managing Organizations:** Demonstrate an ability to understand organizational behavior and structures and the importance of effective communication.
- Strategic Integration:** Assess and diagnose a situation and to formulate and implement effective decisions and responses to business problems.
- Ethics:** Identify ethical issues related to business situations and to develop appropriate situational responses consistent with organizational and societal values.
- Knowledge of Business Disciplines:** Demonstrate knowledge of business disciplines (marketing, management, finance and managerial accounting) and the connection between disciplines.

Admission Requirements: College of Arts and Sciences

The requirements for admission into the undergraduate College of Arts and Sciences programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in

the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the Admissions (p. 20) page of this catalog.

Minor in Fine Arts

Program Contact: Stephen Henderson
(Stephen.Henderson@quinnipiac.edu) 203-582-3751

The Department of Visual and Performing Arts offers a minor for students interested in exploring the fine arts. The different tracks in fine arts are designed to advance each student's unique abilities in creative thinking and artistic processes, in addition to developing a basic foundation in visual literacy.

A Minor in Fine Arts not only expands your knowledge of artists and their work, but also refines the lens through which you view, understand and critique works of art—from the medieval period to the present day. Whether your interest is focused exclusively in the history and interpretation of art, or whether you are seeking a more hands-on approach to develop your artistic skills, three separate tracks enable you to engage with subject matter on terms that match your personal goals.

The art history track traces the development of aesthetic movements and the artists associated with them. It also enriches your understanding of how the visual arts shape various cultural and social contexts. The studio art track enables you to experiment with materials, artistic strategies, composition and form. Regardless of your level of skill, courses in visual design, drawing, photography and other disciplines give you the opportunity to express your own concepts. The interdisciplinary track blends art history with courses in music, drama and film to illustrate the degree to which the visual arts have inspired and informed other expressive mediums.

Fine Arts Minor Curriculum

Students electing this minor must complete the courses under one of the following three tracks (18 credits).

Fine Arts: Studio Art Track

Code	Title	Credits
AR 102	Art History: Ancient Through Medieval	3
or AR 103	Art History: Renaissance Through Contemporary	
AR 140	Basic Visual Design	3
AR 251	Studio Art: Drawing	3
Select three additional courses from the following:		9
AR 158	Photography I	
AR 210	The Creative Process	
AR 241	Color Theory	
AR 250	Studio Art: Special Topic	
AR 252	Studio Art: Painting	
AR 254	Studio Art: Printmaking	
AR 258	Photography II	
AR 262	Studio Art: Watercolor	
AR 263	Studio Art: Collage	
Total Credits		18

Fine Arts: Art History Track

Code	Title	Credits
AR 102	Art History: Ancient Through Medieval	3
or AR 103	Art History: Renaissance Through Contemporary	
Select four additional courses from the following:		12
AR 102	Art History: Ancient Through Medieval	
AR 103	Art History: Renaissance Through Contemporary	
AR 104	Survey of Non-Western Art	
AR 105	American Art	
AR 165	Introduction to Digital Art	
AR 175	Special Topics in Art History	
Select a sixth course in consultation with the program director or department chair		3
Total Credits		18

Fine Arts: Interdisciplinary Track

Code	Title	Credits
AR 102	Art History: Ancient Through Medieval	3
or AR 103	Art History: Renaissance Through Contemporary	
Select five courses in art, music and/or drama ¹		15
Total Credits		18

¹ In consultation with the chair, certain film courses may be applicable. At least two courses must be at the 200 level or higher. Due to the interdisciplinary nature of this minor, courses from at least two disciplines must be taken with a maximum of four courses from any single discipline.

Minor in Game Design and Development

Program Contact: Elena Bertozzi (Elena.Bertozzi@qu.edu) 203-582-7998

The Game Design and Development minor provides students with a solid foundation in fundamental principles and concepts in game design, and the opportunity to develop some specialized technical skills and competence. A minor may be combined with any major inside or outside the College of Arts and Sciences, complementing majors or minors in other disciplines on campus (18 credits).

Game Design and Development Minor Curriculum

Code	Title	Credits
Minor Core Requirements		9
GDD 101	Introduction to Game Design	
GDD 140	Creativity and Computation	
GDD 200	Introduction to Game Development	
Minor Electives		9

Select any three courses from the following list in consultation with your adviser. Minors are encouraged to take additional courses as free electives outside their major at the 300-400 level. ¹

GDD 102	Drawing for Games and Animation
GDD 175	Special Topics in Game Design
GDD 201	Professionalism Practice for Game Design
GDD 202	Game Art I
GDD 210	Game Lab I: Team Projects
GDD 211	Game Lab II: Team Projects
GDD 250	Interactive Storytelling and Narrative (EN 207)
GDD 301	Game Design Tools and Processes
GDD 302	Game Art II
GDD 303	The Art of Audio Narrative (FTM 380 EN 303)
GDD 310	Game Lab III: Team
GDD 311	Game Lab IV: Team Projects
GDD 314	VR/AR Development for Games
GDD 316	Advanced Topics in Game Development
GDD 350	Board Game Design
GDD 380	The Business of Games
GDD 394	History of Video Games
GDD 395	Critical Game Studies Seminar (PL 395)
GDD 396	Games, Learning & Society
GDD 402	Game Art III
GDD 405	Game Audio Design
Total Credits	18

¹ Substitutions to this list are permitted with prior approval of the program director.

Minor in Music

Program Contact: George Sprenghelmeyer
(George.Sprenghelmeyer@quinnipiac.edu) 203-582-6426

The music minor offers students a broad spectrum of the subject both as an art form and as a global "language." Students are required to master the rudiments of musical theory and to emerge with a comprehensive view of music history as well as the fundamentals of informed listening. Students also study an instrument of their choosing and participate in one of the university's performing ensembles. Given the prominence music continues to hold culturally, its interdisciplinary relationships make it well-suited to the interests of students majoring in a variety of fields and also offers students an outlet for artistic expression. The music minor is 18 credits.

Music Minor Curriculum

Code	Title	Credits
Required Courses		
Take three semesters of MU 110 (Private Music Lessons) 1 credit per semester		3

MU 110	Private Music Lessons	
MU 230	Music Theory I	3
MU 330	Music Theory II	3
Select three semesters of a performing ensemble (1 credit each):		3
MU 190	Quinnipiac University Singers	
MU 191	Quinnipiac Chamber Orchestra	
MU 194	Jazz Ensemble	
MU 200	Special Topics	
Elective MU courses		6
Total Credits		18

Minor in Theater

Program Contact: A (Kevin.Daly@quinnipiac.edu)bigail Copeland
(p. 7) 203-582-7301

The theater minor provides students with a background in the primary areas of theater study and production while allowing them the flexibility to explore their particular interests.

Students select courses from an array of offerings in acting, directing, playwriting, design, stagecraft, theater administration and theater history. Students also may earn theater practicum credit by working on the Main Stage productions. A total of 18 credits is required to complete the minor.

Theater Minor Curriculum

Students select courses from an array of offerings in acting, directing, playwriting, design, stagecraft, theater administration and theater history. Students also may earn theater practicum credit by working on the Main Stage productions (18 credits).

Career Development

In the School of Business, members of the Office of Career Development work with students to plan the academic and professional components of each student's education. They explore career interests, guide students through a career development process and provide assistance with internships, resume preparation and employment interviews.

Internship Programs

Undergraduate business students are encouraged to gain valuable career experience by participating in an internship program. Both paid and unpaid internships in a range of industries are available on QUCC; however, students may find their internships by other means such as LinkedIn and other professional networking.

To register for an Internship for Credit course:

The Internship for Credit course requires advanced approval from the School of Business Career Development Office. Once a student has

secured an internship, they must apply for an Internship for Credit on QUCC under the Experiential Learning tab. Upon application approval, students are automatically enrolled in the General Business Internship course, SB 488. SB 488 is the academic course that must be taken during the same semester (or summer term) in which the student completes their internship. To assure flexibility in managing internships and coursework, SB 488 is an online course. There is no retroactive credit for prior internships.

Determination of credit hours:

One academic credit is awarded for every 50 hours of internship work, with a maximum up to 3 credits per semester or term, and unless a student is completing a double major, only 3 credits can be earned in a given semester for an internship experience. If an internship extends beyond the length of one semester, students may apply for SB 188 in the following semester to receive up to an additional 3 credits for the internship. A maximum 6 academic credits may be earned for internship experiences. Students who are completing a double major can earn up to 3 credits in each major (a total of 6 credits) for internship experiences.

For more information:

For more information please contact the Assistant Director of Career Development: David.Bouton@qu.edu

Mission Statement

The School of Business is a student-centered educational community focused on preparing students for achievement and leadership in their professional careers.

Values

The development of our students as passionate learners and emerging professionals.

The impact of alumni, students and faculty in business and in the community.

Applied learning that integrates the classroom with meaningful and impactful activities such as internships, student competitions, faculty-student research, student consulting, international opportunities (study abroad, student exchange, immersion experiences, internships).

The active support of faculty scholarship that emphasizes contributions to practice and pedagogy.

Mutually beneficial collaborations with the business community that advances the education of our students and the research of our faculty.

A collegial, respectful and responsible environment where members of the community act with integrity, honesty, fairness and tolerance.

Diversity in people and in ideas.

Learning Goals

Business Knowledge: Apply the basic business theories and concepts to understand and solve business problems.

Business Analytics: Effectively gather, assess and utilize data to understand, improve and communicate business decisions.

Communication: Communicate business ideas effectively through written communications, oral communications and presentations, and digital media.

Critical Thinking: Utilize information or research findings to analyze problems and determine appropriate solutions.

Business Ethics: Apply ethical frameworks to evaluate situations and determine appropriate solutions.

Cultural Adaptability: Recognize and apply knowledge and diversity within and across individual and groups.

Professionalism: Exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

- Dual-Degree BS/MBA (4+1) (p. 704)
- Dual-Degree BS/MS or BA/MS in Accounting (4+1) (p. 708)
- Dual-Degree BS/MSBA or BA/MSBA (4+1) (p. 710)
- JD/MBA (Juris Doctor) (p. 705)

For specific information about the mission and learning goals for each of the graduate programs, please visit the university website at qu.edu (<http://www.qu.edu>).

Business Core Curriculum

The common requirements for graduation with the bachelor of science degree for all business majors include completion of the University Curriculum (that covers fundamental areas such as English, mathematics, science, social sciences, the humanities and the arts), the business core curriculum and the major requirements. The business core challenges each student to develop a knowledge and skill base for further study within the business disciplines, and the major requirements provide students with specialized knowledge within a field of business.

In addition to the traditional business core coursework in accounting, business law, economics, finance, international business, management and marketing, the school also offers a seminar designed to begin the professional development process required to be successful in today's competitive business world.

Code	Title	Credits
AC 211	Financial Accounting	3
AC 212	Managerial Accounting	3
BLW 221	Business Law and Society	3

University Curriculum for School of Business

Foundations of Inquiry (four classes = 12 credits)

Code	Title	Credits
FYS 101	First-Year Seminar	3
EN 101	Introduction to Academic Reading and Writing	3
EN 102	Academic Writing and Research	3
MA 170	Probability and Data Analysis	3

Total Credits 12

Disciplinary Inquiry (four classes = 13 credits)

In the "Disciplinary Inquiry" phase of the University Curriculum, students make their first encounters with specific knowledge and methodologies in the disciplinary areas. This phase familiarizes students with the kinds of knowledge produced in these disciplinary areas and thus informs their choices as they undertake their "Personal Inquiry." Additionally, students are proceeding upon their Personal Quest as they take these and all breadth courses, including reflection upon their Guiding Question.

Students select EC 111 and one course from each of the remaining disciplinary areas as follows:

- Natural Sciences: any 4-credit UC science course
- Humanities: any 3-credit UC humanities course
- Social Sciences: EC 111
- Fine Arts: any 3-credit UC fine arts course

Personal Inquiry (six classes = minimum 18 credits)

The "Personal Inquiry" (PI) phase requires 18 credits with at least three Disciplinary Inquiry areas represented. This allows students significant flexibility in the selection of coursework as they pursue their Guiding Questions. The Personal Inquiry requirement has two parts:

Part 1 (three courses): In addition to those selected under Disciplinary Inquiry above, students select EC 112 from the Social Sciences and a course from two of the remaining disciplinary areas: Natural Sciences, Humanities and Fine Arts.

Part 2 (three courses): The remaining courses are IB 201 and any two other UC courses from the disciplinary areas in Part 1 and/or UC Breadth Electives. Students can combine Disciplinary Inquiry areas and UC Breadth Electives in any pattern that totals 9 to 12 credits. [Note: natural science courses that are treated by the Registrar as two separate courses (lecture and lab) shall be treated as *one course* for the purposes of the PI requirement. Students could thus take up to four lecture-lab pairings in the PI.]

Integrative Capstone Experience (one course = 3 credits)

The Integrative Capstone is offered in the School of Business. Students select an additional unrestricted course in the University Curriculum.

Intercultural Understanding (one course = minimum 3 credits)

As students purposefully select courses and progress through the Breadth part of the curriculum, it is imperative that all students develop the skills, knowledge and diverse perspectives necessary to address the complexity of their Guiding Questions, and to acquire the understanding necessary to be informed and ethical citizens who can contribute to the local and global society.

To achieve this goal, within their 31 breadth component credits students are required to take at least 3 credits in classes marked as "I" (Intercultural Understanding). The classes with "I" designation can be chosen from any area in Disciplinary and/or Personal Inquiry.

University Curriculum Breadth Electives (formerly called UC "Electives")

University Curriculum (UC) Breadth Electives are courses with generalizable and transferrable knowledge that are based in a single academic discipline outside of the four Disciplinary Inquiry areas (Natural Sciences, Social Sciences, Humanities, Fine Arts) or that reflect nationally established interdisciplinary areas. Such courses increase the disciplinary, methodological and cultural perspectives available to students in the University Curriculum, thereby extending the breadth of their knowledge to navigate successfully a complex and dynamic world.

Policy for Students Who Fail FYS 101

First-year students who are entering the University in the fall semester who withdraw from or fail to receive a passing grade for FYS 101 during that semester are given one chance to repeat the course during the first spring semester that they are enrolled at Quinnipiac. If they fail to complete the course successfully on a second attempt, they may not take FYS 101 again. They may not withdraw from the course on the second attempt. The failing student receives no credit for FYS 101, the failing grade (F) remains and he/she must substitute 3 credits from any other UC-designated course to count toward required general education credits.

FYS 101 Policy for Transfer Students

A student who transfers to Quinnipiac with less than sophomore standing (fewer than 27 credits) shall enroll in FYS 101 in their first semester at Quinnipiac. Students who transfer to Quinnipiac with 27 or more credits must substitute any UC-designated course for FYS 101, to count toward the general education credits needed to graduate. They also will complete a series of self-guided online modules by the start of their second semester at Quinnipiac, designed to ensure students successfully complete their remaining general education requirements and prepare for the integrative capstone experience.

Bachelor of Business Administration

Program Contact: Anthony Asare (Anthony.Asare@qu.edu) 203-582-3452

Degree Completion Program

This online program is designed for business professionals who have an associate's degree or a minimum of 30 transferrable credits and would like to pursue a four-year degree in business.

Nontraditional, adult professionals who are looking to change careers or increase their opportunities as well as recent associate degree graduates who wish to continue their studies may complete this program part-time via a distance education format through QU Online with a curriculum that builds on the individual's prior educational preparation.

Total Credits		121

¹ 3 credits of fine arts, 6 credits of humanities, 7 credits of science and 9 credits of UC electives. Students can complete this requirement in part with up to four 4-credit advanced core courses.

Student Learning Outcomes

Upon completion of the Bachelor of Business Administration program, students will demonstrate the following competencies:

- Effective Communication and Social Intelligence:** Capabilities with respect to effective written and oral communications, and the interpersonal skills required to work effectively as a member of a team.
- Business Strategy and Integration:** An understanding of the interdependence of the various functional areas of business, and the ability to make a well-reasoned recommendation concerning a business situation.
- Knowledge of Core Business Functions:** An understanding of core business functions and an ability to apply functional knowledge to practical business problems.
- Ethics, Diversity and Globalization:** Ability to identify ethical issues related to business practices, to recognize the complexity and ambiguity of those issues, to apply of an ethical decision-making framework, and to formulate an ethically justifiable solution; an awareness and appreciation of the diversity in the workplace; and an awareness of issues surrounding the globalization of both domestic and international business activities as well as the ability to develop strategies to address those issues.

Admission requirements include an associate degree from a regionally accredited college or university, or equivalent coursework totaling a minimum of 30 transferable credits, with a grade point average of at least 2.5; transcripts from all post-secondary institutions attended; and a resume.

The application process is managed through the Undergraduate Admissions Office (<https://www.qu.edu/admissions/undergraduate/apply/transfer/>).

Department of Accounting

Quinnipiac's accounting curriculum provides a blend of relevant expertise and rigor that will set a foundation for your career. The Bachelor of Science in Accounting program features a broad business education, designed to foster the technical competence and analytical skills required to maximize each student's potential as a business professional. Sometimes referred to as the language of business, accounting is used to communicate financial and other information to people, organizations and governments, and is integral to effective management.

An understanding of accounting is necessary to thrive in various accounting, finance and management settings. The accessibility of Quinnipiac's faculty and staff, the resources provided to students, and the school's contacts in the business world all contribute to the success of accounting majors.

Mission Statement

The mission of the Department of Accounting is to prepare students for successful careers in accounting and related fields. The department's

mission is guided by the missions of the university and the School of Business. To fulfill our mission, we strive to:

Create and support a learning environment that produces students who are inquisitive, thoughtful and engaged participants in the process of continuous learning and development, and who have:

- An understanding of business and accounting concepts and requisite technical skills
- Critical thinking skills required to identify problems, gather and interpret information with an appropriate level of professional skepticism, evaluate alternatives and formulate solutions
- An understanding of ethical issues in accounting, personal responsibility and integrity
- Skills for working in collaborative environments
- Respect for diverse opinions and cultural backgrounds
- Effective verbal and written communication skills

Recruit and retain faculty who, in collaboration with students, accounting professionals and the business community:

- Deliver current and engaging curricula informed by practice and research
- Foster an engaging learning environment that promotes an expectation of the highest ethical standards and practices
- Produce research that advances knowledge and informs their teaching, including contributions to practice, pedagogical, case and discipline-based scholarship
- Contribute to department service, school and university communities and the broader academic community
- Bachelor of Science in Accounting (p. 313)
- Bachelor of Science in Computer Information Systems and Accounting (p. 321)
Students who wish to specialize in computer information systems with applications in accounting may earn a dual-degree in computer information systems and accounting.
- Minor in Accounting (p. 314)
- Master of Science in Accounting (p. 705)
- Accelerated Dual-Degree BS/MSA (3+1) (p. 706)
- Dual-Degree BS/MSA or BA/MSA (4+1) (p. 708)

Accounting (AC)

AC 110. Accounting: Tools for Everyday Life. 3 Credits.

This course provides an introduction to topics in accounting that everyone encounters in life regardless of their career choices. The course covers personal financial planning topics such as budgeting, debt and taxation as well as how accounting relates to data analysis, public policy, ethics and entrepreneurship. Throughout the semester, students develop skills in Excel and learn to critically examine current events related to the course's topics.

Offered: Every year, Summer

AC 211. Financial Accounting. 3 Credits.

This course introduces students to the purposes of financial statements and the recognition, measurement and disclosure concepts and methods underlying financial statements. Students begin to use and interpret financial statements and the related impact of elementary transactions and events on those statements.

Prerequisites: Take MA 107 or higher.

Offered: Every year, All

AC 212. Managerial Accounting. 3 Credits.

This course provides an introduction to the uses of accounting information by managers for internal reporting and decision making. Students begin to focus on classifying, measuring and analyzing product and service costs for decision making, budget preparation and performance evaluation.

Prerequisites: Take AC 211.

Offered: Every year, All

AC 305. Intermediate Accounting I. 3 Credits.

This course is the first of three intermediate-level courses. Students study the conceptual framework, standards, roles of standard-setting bodies and presentation of financial statements. Additional topics include the recognition, measurement and reporting of cash, receivables and inventories. In addition to U.S. Generally Accepted Accounting Principles (GAAP), students also are exposed to International Financial Reporting Standards (IFRS).

Prerequisites: Take AC 211.

Offered: Every year, Spring

AC 306. Intermediate Accounting II. 3 Credits.

This continuation of intermediate accounting covers such topics as property, plant and equipment, intangible assets, current liabilities and contingencies, long-term liabilities, stockholders' equity and earnings per share. In addition to U.S. Generally Accepted Accounting Principles (GAAP), students also are exposed to the International Financial Reporting Standards (IFRS). AC 306 may be taken concurrently with AC 307.

Prerequisites: Take AC 305.

Offered: Every year, Fall

AC 307. Intermediate Accounting III. 3 Credits.

This continuation of intermediate accounting covers such topics as investments, revenue recognition, accounting for income taxes, pensions, leases, accounting changes and correction of errors, the statement of cash flows, and disclosure issues. In addition to U.S. Generally Accepted Accounting Principles (GAAP), students also are exposed to the International Financial Reporting Standards (IFRS). AC 307 may be taken concurrently with AC 306. Minimum grade for accounting majors B-. Accounting majors must have B- or better in the prerequisite course.

Prerequisites: Take AC 305.

Corequisites: Take AC 306.

Offered: Every year, Fall and Spring

AC 323. Cost Accounting. 3 Credits.

This class includes an in-depth treatment of accounting theories and practices used to control and manage costs. Topics include job-order, process, activity-based costing systems, cost variance analysis, budgeting, cost-volume-profit analysis and product mix decisions.

Prerequisites: Take AC 212.

Offered: Every year, Spring

- AC 335. Accounting Systems. 3 Credits.**
This class introduces the use of information technology in accounting systems. Topics include design, development, implementation, control and audit of information systems used to generate and manage accounting information.
Prerequisites: Take AC 212.
Offered: Every year, Spring
- AC 350. Advanced Excel Programming (CIS 350). 3 Credits.**
This course utilizes advanced topics in Excel to solve a range of complex business problems. Topics include: spreadsheet design, the use of complex formulas, functions, list and data management, macros and Visual Basic for Applications.
Offered: Every year, All
- AC 359. Accounting Elective. 3 Credits.**
- AC 402. Accounting Internship. 3 Credits.**
This internship is open to accounting majors. Students must complete the internship application form to receive credit. This course is graded on a pass/fail basis. A minimum of 150 hours is required.
Offered: Every year, All
- AC 405. Advanced Accounting. 3 Credits.**
This course provides an in-depth study of accounting principles and analysis of problems for business combinations (mergers and acquisitions), and an introduction to governmental and not-for profit accounting.
Prerequisites: Take AC 306.
Offered: Every year, Spring
- AC 411. Auditing Theory and Practice. 3 Credits.**
This course focuses on an introduction to auditing standards and to audit practice. It includes an examination of auditor independence and ethical responsibilities, audit risk, audit evidence, internal controls and development of an overall audit plan.
Prerequisites: Take AC 305.
Offered: Every year, Fall
- AC 412. Advanced Auditing. 3 Credits.**
This continuation of AC 411 includes coverage of the steps necessary to complete an audit engagement. These steps include the design and performance of appropriate tests of controls, substantive tests of transactions and tests of details of balances for an audit of a company's balance sheet and income statement accounts.
Prerequisites: Take AC 411.
Offered: Every year, Spring
- AC 431. Federal Income Taxation of Individuals. 3 Credits.**
This course introduces students to the research, analysis and planning of individual federal income tax with emphasis on the identification of the proper taxpayer, the concepts of income, characterization of income, timing of income (realization and recognition), deductions, deferral and non-recognition of income.
Prerequisites: Take AC 212.
Offered: Every year, Fall
- AC 432. Federal Income Taxation of Business Entities. 3 Credits.**
This course considers the tax effects of formation, operation and liquidation of business entities. Students identify and analyze data relevant to the taxation of different business entities. Emphasis is placed on issues and data identification, research and analysis of relevant tax information that affects entities' elections and alternative tax treatments.
Prerequisites: Take AC 431.
Offered: Every year, Spring
- AC 499. Independent Research. 3 Credits.**
Independent research supervised by a faculty member. Requires the approval of the faculty member, chair of the department and dean of the business school.
Offered: Every year, All
- AC 635. Advanced Topics in Financial Accounting and Reporting. 3 Credits.**
This course provides an in-depth study of advanced topics in financial accounting and reporting. The topics covered include the accounting for multinational entities, segment and interim reporting, SEC reporting, and the accounting for partnerships and corporations in financial difficulty. Students learn standard-related research skills and complete several research cases using the FASB codification database.
Prerequisites: Take one undergraduate intermediate accounting course.
Offered: Every year, Fall
- AC 640. Financial Statement Analysis. 3 Credits.**
In this course, students gain additional understanding of how firms communicate through financial statements. They learn how to use financial statement analysis in strategic decision making. Students learn to interpret financial statements, analyze cash flows and make judgments about the quality of earnings, assets and liabilities. Students cannot receive credit for both AC 613 and AC 640.
Prerequisites: Take one undergraduate intermediate accounting course.
Offered: Every year, Fall
- AC 645. Information Assurance. 3 Credits.**
This course is designed to broaden and deepen students' conceptual and technical understanding of the CPA's attest function, provide students with a framework for analyzing contemporary auditing and assurance issues, and help students understand the complete audit of a client. This course utilizes case studies to study current issues and practices associated with information assurance services.
Prerequisites: Take one undergraduate accounting auditing course.
Offered: Every year, Fall
- AC 650. Advanced Accounting Information Systems. 3 Credits.**
This course provides students with in-depth knowledge of the role accounting information systems play in a business environment. Using a combination of course delivery methods, this course emphasizes information, communication and networking technology--in the context of business processes, transaction cycles and internal control structures--that enhances the production of accurate and reliable accounting information.
Prerequisites: Take one undergraduate accounting information systems course.
Offered: Every year, Fall
- AC 660. Strategic Management Control Systems. 3 Credits.**
This course provides students with broad exposure to the ways in which management control systems and management accounting information are used to support various organizations' strategies. The course involves both textbook/problem-based and case-based learning methods to cover issues related to strategy selection, performance evaluation, organizational profitability, customer profitability, organizational structure, and employee compensation. Special emphasis is placed on ethical considerations, not-for-profit organizations and sustainability issues.
Offered: Every year, Spring

AC 665. Forensic Accounting and Fraud Examination. 3 Credits.

This course provides a survey of forensic accounting and fraud examination. Students gain an understanding of different types of fraud, sources of evidence and analysis of fraud schemes highlighting the skills needed to identify and investigate fraudulent accounting allegations. This course employs case studies to study current issues, practices and techniques related to fraud examination and forensic accounting services.

Offered: Every year, Spring

AC 670. Advanced Business Law, Regulation, Ethics and Reporting Environments. 3 Credits.

In this course, students learn to identify and resolve complex legal and ethical issues typically encountered by businesses. Emphasis is placed on business law topics relevant to the accounting profession. Topics may include agency law and worker classification, formation and performance of contracts, debtors, creditors, guarantors, secured transactions, bankruptcy, federal securities regulation, formation, operation, termination of business entities, and liability of accountants.

Prerequisites: Take one undergraduate business law course.

Offered: Every year, Spring

AC 675. Governmental and Not-For-Profit Accounting. 3 Credits.

This course provides an in-depth study of the financial reporting concepts and standards applicable to state and local governments, and not-for-profit entities such as colleges and universities, health care entities, and voluntary health and welfare organizations. It emphasizes the differences between governmental and private sector (for-profit) accounting. Particular attention is placed on the preparation and analysis of governmental financial reports.

Prerequisites: Take one undergraduate intermediate accounting course.

Offered: Every year, Spring

AC 680. Advanced Federal Income Taxation and Tax Research. 3 Credits.

In this course, students gain the knowledge and understanding of concepts and laws relating to federal income taxation of individuals and entities. In addition, students learn how to apply the knowledge and skills gained from this course in professional tax preparation and tax advisory positions. Some of the topics covered include federal tax process, procedures, accounting and planning, as well as federal taxation of individuals, entities (C corporations, S corporations, partnerships, trusts and estates and exempt organizations) and taxation of property transactions.

Offered: Every year, Spring

Bachelor of Science in Accounting

Program Contact: Nelson Alino (Nelson.Alino@qu.edu) 203-582-3827

The Bachelor of Science in Accounting program at Quinnipiac University provides a foundation in the principles, concepts and practices of accounting, and equips graduates with general business knowledge along with technical expertise that is necessary for success in early careers in accounting and related fields.

Quinnipiac accounting graduates often receive job offers in the summer before their senior year. They connect with potential employers early in their studies by participating in career fairs and accounting networking events on campus, which bring representatives from local, regional and international accounting firms, as well as representatives from industry and government. Accounting majors also use these opportunities to interact with alumni and other representatives from their future profession.

Through these contacts and through the support of career services staff, many students obtain internships. These on-the-job experiences provide opportunities to integrate classroom learning into a real-world environment to clarify career goals.

Upon graduation, many accounting majors join public accounting firms. These firms generally offer services including auditing, consulting, income tax planning and preparation, and the compilation and review of financial statements. Some graduates go into management and private industry accounting, where they prepare financial statements, develop budgets, perform cost analyses or conduct internal audits. An accounting background is highly valued in business; many CEOs and presidents come from accounting and finance departments.

BS in Accounting Curriculum

A total of 122 credits is required for graduation with the degree of BS in Accounting. The accounting curriculum provides students with the foundational accounting skills to take on accounting and financial leadership roles in organizations and provides the flexibility for students to take electives that best align with their career interests.

*CPA CONCENTRATION

Students may elect to enroll in the CPA concentration within the accounting major. The program exposes students to advanced technical accounting topics in preparation for the Uniform Certified Public Accountant Examination and careers in public accounting. (Students should verify their state's CPA requirements as part of their planning process.)

To earn the CPA concentration, students must complete all the following accounting electives: AC 405, AC 412, AC 432.

Student Learning Outcomes

Upon completion of the program, students will demonstrate the following competencies:

- Business Knowledge:** Students apply basic business theories and concepts to understand and solve business problems.
- Business Analytics:** Students effectively gather, assess and utilize data to understand, improve and communicate business decisions using Excel and other analytical tools.
- Communication:** Students communicate business ideas effectively through written communications, oral communications and presentations, and digital media.
- Critical Thinking:** Students utilize information and research findings to analyze problems and determine appropriate solutions.
- Business Ethics:** Students apply ethical frameworks to evaluate situations and determine appropriate solutions.
- Cultural Adaptability:** Students recognize and apply knowledge of diversity within and across individual and groups.
- Professionalism:** Students exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

Admission Requirements: School of Business

The requirements for admission into the undergraduate School of Business programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the **Admissions** page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Suggested Transfer Curriculum for BS in Accounting

A minimum of 60 credits is required for transfer into the BS in Accounting program. Below is a sample plan of study for the first two years prior to matriculation at Quinnipiac University.

Course	Title	Credits
First Year		
Fall Semester		
English I		3
Introduction to Business		3
Microeconomics		3
Business Statistics		3
History Elective		3
Credits		15
Spring Semester		
English II		3
Macroeconomics		3
Financial Accounting		3
Information Systems		3
Marketing		3
Credits		15
Second Year		
Fall Semester		
Managerial Accounting		3
Finance		3
International Business		3
Management		3
Art Elective		3
Credits		15
Spring Semester		
Operations Management		3
Business Law		3
Science Elective with Lab		4
Social Science Elective		3
Additional Elective (Business or other)		3
Credits		16
Total Credits		61

Minor in Accounting

Program Contact: Nelson Alino (Nelson.Alino@qu.edu) 203-582-3827

Students wishing to augment their field of study with the perspective and tools of accounting are encouraged to consider a minor in accounting.

You don't have to work in business or finance to reap the benefits of accounting. The tools and broad perspective the accounting minor offers can prove useful in virtually every profession, as well as in your personal life. If you're interested in augmenting your major and broadening your professional skills, this is a great way to gain a familiarity with the central tenets of accounting.

This six-course program examines managerial and financial accounting and offers a number of electives such as Auditing Theory and Practice and Advanced Federal Income Tax Procedure. Our faculty members bring a wealth of experience to the classroom, having worked as certified public accountants, business professionals and lawyers.

Accounting Minor Curriculum

The minor in accounting requires six courses. Students wishing to minor in accounting must complete:

Code	Title	Credits
AC 211	Financial Accounting	3
AC 212	Managerial Accounting	3
AC 305	Intermediate Accounting I	3
Select three of the following:		9
AC 306	Intermediate Accounting II	
AC 307	Intermediate Accounting III	
AC 323	Cost Accounting	
AC 335	Accounting Systems	
AC/CIS 350	Advanced Excel Programming (CIS 350)	
AC 405	Advanced Accounting	
AC 411	Auditing Theory and Practice	
AC 412	Advanced Auditing	
AC 431	Federal Income Taxation of Individuals	
AC 432	Federal Income Taxation of Business Entities	
Total Credits		18

Department of Computer Information Systems

Graduates of the Computer Information Systems program are business problem solvers who assist firms to be more competitive via the use of technology. Those who choose the Computer Information Systems major enjoy technology and also enjoy working with people.

The department prides itself on excellence in teaching, and fosters a supportive learning environment that provides students with the opportunity to develop the expertise required to distinguish themselves both academically and professionally. Career tracks of program graduates include high-demand positions in data management, network management, information systems security administration, systems analysis, web development and mobile applications support.

The demand for CIS graduates over the next decade is outstanding with job growth projected to increase rapidly. Currently there are more career openings for CIS majors than there are graduates available to fill the positions; consequently, starting salaries are among the highest of all undergraduate business majors. All CIS students who qualify complete internships, many resulting in offers of full-time employment upon graduation.

- Bachelor of Science in Computer Information Systems (p. 319)

- Bachelor of Science in Computer Information Systems and Accounting (p. 321)

- Bachelor of Science in Business Analytics (p. 318)

- Master of Science in Business Analytics (p. 708)

- Minor in Business Analytics (p. 322)

- Minor in Computer Information Systems (p. 322)

- Accelerated Dual-Degree BS/MSBA (3+1) (p. 710)

- Dual-Degree BS/MSBA or BA/MSBA (4+1) (p. 710)

Computer Information Systems (CIS)

CIS 101. Introduction to Information Systems. 3 Credits.

This course introduces students to the analysis, design and development of information systems using the example of a mobile application. In a semester-long, team-based project, students develop a prototype and business case for a mobile application that addresses a defined business need. Students learn how information systems are developed while simultaneously learning how to gather, analyze and present data for decision-making in a business environment.

Offered: Every year, All

CIS 225. Systems Analysis and Design. 3 Credits.

This course provides an introduction to the phased, problem-solving approach commonly used by organizations to examine and improve their information systems. Topics include analysis of a business problem or opportunity; determining what role, if any, computer-based technologies can play in addressing the business need; articulating the business requirements for the technology-based solution; specifying alternative approaches to acquiring the technology capabilities needed to address the business requirements; and specifying the detailed requirements for the information systems solution.

Prerequisites: Take CIS 101.

Offered: Every year, Fall

CIS 245. Object-Oriented Programming. 3 Credits.

This course provides an introduction to object-oriented programming using a high-level programming language such as Python. The course covers the basics of how one constructs a program from a series of simple instructions. Basic features of functional and object-oriented programming are covered. Common programming techniques necessary to create simple but useful applications are explained.

Prerequisites: Take CIS 101.

Offered: Every year, Spring

CIS 255. Data Visualization. 3 Credits.

This course provides an introduction as well as hands-on experience in the field of data visualization. Students learn basic visualization design and evaluation principles to create meaningful displays of quantitative and qualitative data. They also learn techniques for visualizing multivariate, temporal, text-based, geospatial, hierarchical and network/graph-based data.

Offered: Every year, Spring

UC: Breadth Elective

CIS 265. Mobile Application Development. 3 Credits.

This project-based course covers the use of mobile applications in business and the issues involved in mobile application development. It also explores the principles and tools involved in the design and construction of applications for mobile devices.

Prerequisites: Take CIS 101.

Offered: As needed, Spring

CIS 267. HTML and CSS. 3 Credits.

This course introduces students to the fundamentals of HTML and CSS, which are two of the core technologies used to build websites. In this project-based course, students learn how to build modern websites using professional tools and workflows. Topics include design principles, responsive layouts, interactivity, video and audio, accessibility, performance optimization and version control systems.

Prerequisites: Take CIS 101.

Offered: Every other year, Fall

- CIS 299. Independent Study.** **1-6 Credits.**
- CIS 300. Special Topics.** **3 Credits.**
Offered: As needed
- CIS 301. Enterprise Systems.** **3 Credits.**
An Enterprise Resource Planning (ERP) system is software that runs all areas of an organization including accounting and finance, human resources (HR), sales and distribution, production, purchasing and inventory. ERP systems are cross-functional, process-centered, and based on industry best practices. This course covers both ERP theory and practice; the course content includes the evolution of ERP systems, business process reengineering, process mapping, the ERP life cycle, ERP functionality, ERP add-ons and security and risk management issues.
Prerequisites: Take CIS 101.
Offered: Every year, Spring
- CIS 350. Data Analysis with Excel (AC 350).** **3 Credits.**
This course utilizes advanced topics in Excel to solve a range of complex business problems. Topics include: spreadsheet design, the use of complex formulas, functions, list and data management, macros and Visual Basic for Applications.
Offered: Every year, All
UC: Breadth Elective
- CIS 351. Database Programming and Design.** **3 Credits.**
This course presents the use of database architecture and programming as a tool for developing integrated solutions for the information requirements of a modern business environment. Students work to identify business solutions by identifying the appropriate database design, and to understand how that design supports the business requirements. Students learn how to design, build and query databases using Microsoft SQL Server.
Offered: Every year, Fall
- CIS 360. Programming in Excel.** **3 Credits.**
This course teaches students how to create Excel macros in Visual Basic for Applications (VBA). In the course students will learn to create hotkeys, how to compile code, loops, and logic statements. No prior experience in coding is needed.
Prerequisites: Take CIS 245
Offered: As needed
- CIS 381. Web Development.** **3 Credits.**
This course introduces students to the development of modern web applications. In this project-based course, students learn how to develop web applications that adhere to industry best practices and leverage the latest tools and technologies. Equal emphasis is placed on front end and back end aspects of web development. Topics include architectural patterns, database integration, authentication and authorization, security and web services.
Prerequisites: Take CIS 101.
Offered: Every other year, Fall
- CIS 411. Information Systems Security.** **3 Credits.**
This course introduces students to the fundamental principles and topics of information technology security and risk management at the organizational level. Students learn critical security principles that enable them to plan, develop and perform security tasks. The course addresses hardware, software, processes, communications, applications and policies and procedures with respect to organizational IT security and risk management.
Prerequisites: Take CIS 101.
Offered: As needed
- CIS 440. IT Project Management.** **3 Credits.**
This course evaluates the principles of Agile Project Management, using the scrum framework. The roles, events, artifacts, gathering requirements, estimation, values, and theory from the scrum framework are evaluated. In addition, differences between agile and traditional project management methods of software development are described. Students work on a development project to get a hands-on experience of working on a scrum team.
Prerequisites: Take CIS 125 or CIS 225.
Offered: Every year, Fall
- CIS 484. Information Systems Internship.** **3 Credits.**
Students gain experience by employing their skills in a professional setting under practicing professionals. This internship involves in-depth work related to user-defined information needs and is usually completed in the summer between the student's junior and senior years. Students must obtain approval and register prior to starting the work experience. Permission of department chair required.
Prerequisites: Take CIS 245.
Offered: Every year, All
- CIS 488. Independent Study.** **1-6 Credits.**
- CIS 490. Computer Information Systems Capstone.** **3 Credits.**
Students employ skills learned in all other CIS coursework, and are required to deliver a project that may encompass project management, systems analysis and design, enterprise systems, database management systems and programming. Students are responsible for managing the entire project from conceptual design to final deliverable.
Prerequisites: Take CIS 245, CIS 351 CIS 440.
Offered: Every year, Spring
- CIS 600. Information Systems Strategy.** **3 Credits.**
Students develop the ability to analyze and identify opportunities to improve the effectiveness of organizations through the use of appropriate information technologies. Technologies that influence organizational strategies, structure, risks and processes are emphasized. Ethical, global and security issues also are covered.
Offered: As needed
- ## Business Analytics & Information Systems (BAN)
- BAN 220. Data Mining for Business Insights.** **3 Credits.**
This course focuses on analyzing data sets to find patterns and anomalies, with the goal of extracting valuable information. The course covers basic concepts, methods, and techniques used in data mining, including data exploration, dimension reduction and data preparation.
Prerequisites: Take CIS 245 or prior python programming course
Offered: Every year, Fall
- BAN 300. Business Data Analysis with R.** **3 Credits.**
This course introduces students to R, a widely used statistical programming language. Students learn to read data, write functions, analyze data and create visualizations in R.
Prerequisites: Take EC 271 or EC 272 or MA 170 or MA 176 or MA 206 or MA 275 or MA 275H or MA 285.
Offered: Every year, Fall

- BAN 310. Web Analytics.** **3 Credits.**
This course introduces students to the concept and use of web analytics. Topics covered include measurement planning, data collection, audience characteristics, traffic acquisition and user behavior. Students use Google Analytics to apply their learning and take the Google Analytics Individual Qualification exam to demonstrate their proficiency at the completion of this course.
Offered: Every year, Spring
- BAN 320. Big Data.** **3 Credits.**
The course focuses on the concept and techniques used for managing big data. The course explores how big data is used within organizations to support analytics. Emphasis is on the Hadoop platform and supplemental tools that are used within a Hadoop environment to design and maintain a big data infrastructure.
Prerequisites: Take CIS 351.
Offered: As needed
- BAN 410. Social Media Analytics.** **3 Credits.**
This course covers social media strategies and applications, implications for business, privacy issues associated with social media, and factors contributing to social change. Business cases evaluating the use and value of social media are examined and social network analysis and visualization are utilized.
Prerequisites: Take BAN 300 or CIS 245.
Offered: Every year, Spring
- BAN 420. Machine Learning and Artificial Intelligence for Business.** **3 Credits.**
The course introduces machine learning techniques for predictive modeling of business problems and opportunities. It covers the process of formulating a business analytics research hypothesis, developing business objectives, data selection, preparation and partitioning to successfully design, build and evaluate predictive models. Predictive modeling techniques such as classification and decision trees, neural networks, regression, random forests and other techniques are covered.
Prerequisites: Take BAN 220.
Offered: Every year, Spring
- BAN 484. Business Analytics Internship.** **3 Credits.**
Students gain experience by employing their skills in a professional setting under practicing professionals. This internship involves in-depth work related to analytics and is usually completed in the summer between the student's junior and senior years or during their senior year. Students must obtain approval to register for this course prior to starting the work experience. Permission of the department chair or internship coordinator is required.
Prerequisites: Take BAN 220.
Offered: Every year, All
- BAN 610. Introduction to Business Analytics.** **3 Credits.**
This course develops ideas for helping to make decisions based upon the examination of data. Topics include variability, data display and summary statistics, regression, and correlation, probability, probability distributions, sampling, the central limit theorem, confidence intervals and hypothesis testing. Attention is also given to the design of experiments and analysis of variance, frequency distributions, statistical inference and sampling theory.
Offered: Every year, Fall and Spring
- BAN 615. Predictive Business Analytics.** **3 Credits.**
The course introduces the techniques of predictive modeling and analytics in a data-rich business environment. It covers the process of formulating business objectives, data selection, preparation and partition to successfully design, build, evaluate and implement predictive models for a variety of practical business applications (such as marketing, customer retention, delinquency and collection analytics, fraud detection and insurance). Predictive models such as classification and decision trees, neural networks, regressions, pattern discovery analysis and other techniques are studied.
Prerequisites: Take BAN 610.
Offered: Every year, Fall
- BAN 621. Data Management.** **3 Credits.**
The concepts, principles, issues and techniques for managing corporate data resources are covered, including techniques for managing the design and development of large database systems. Data warehousing, data mining and database administration are emphasized. Students engage in hands-on-learning and work individually or in teams to complete a real-world project using contemporary data management tools and techniques.
Offered: Every year, Fall and Spring
- BAN 622. Data Warehousing.** **3 Credits.**
This course focuses on the design and implementation of data warehouses, identifying key architecture differences between data warehouses and transactional databases. It also focuses on the interface to data warehouses to better understand how large amounts of information are used to enable organizations to make better decisions.
Prerequisites: Take BAN 621.
Offered: Every year, Spring
- BAN 628. Data Mining for Competitive Advantage.** **3 Credits.**
This course focuses on the application of common data mining techniques. Students focus on developing business solutions by applying techniques such as market basket analysis, association rules, cluster analysis and time series.
Offered: Every year, Fall
- BAN 629. Text Analytics.** **3 Credits.**
This course builds upon previously introduced data mining methods, focusing specifically on techniques for text extraction and mining. Topics include efficient text indexing; document clustering and classification; information retrieval models; enhancement of structured data; scenario detection techniques; and using textual data in predictive models.
Offered: As needed
- BAN 650. Data Visualization for Managers.** **3 Credits.**
This course provides an introduction as well as hands-on experience to the field of data visualization. Students learn basic visualization design and evaluation principles to create meaningful displays of quantitative and qualitative data. They learn techniques for visualizing multivariate, temporal, text-based, geospatial, hierarchical and network/graph-based data.
Prerequisites: Can only take 1 from list: BAN 650 or PMBA 626.
Offered: Every year, Fall and Spring
- BAN 660. Optimization.** **3 Credits.**
This course focuses on developing computational methods to solve various business optimization problems. Students will formulate and solve a variety of optimization problems including linear, integer, mixed-integer, and non-linear. The course also covers understanding decision making under uncertainty
Offered: As needed

BAN 661. Web Analytics and Web Intelligence. 3 Credits.

This course focuses on the analysis of a variety of web metrics including tracking, traffic and visitor behavior, tactics and strategies to successfully market on the Web to make data-driven decisions. Business analytics tools and techniques are utilized to extract and analyze web-scale data to guide strategic decision making. Topics address solutions for measurably higher leads, sales, brand recognition, customer satisfaction or lower service costs.

Prerequisites: Take BAN 610.

Offered: As needed

BAN 663. Business Data Analytics with R. 3 Credits.

Students learn to program and use R for effective data analysis. Reading data, accessing R packages, writing functions, debugging, profiling code and organizing and commenting code also are covered. Working examples of topics in statistical data analysis are provided. The course also addresses installation and configuration of software as necessary for a statistical programming environment.

Offered: As needed

BAN 664. Health Care Analytics. 3 Credits.

This course provides a foundation on data analytics in health care and an understanding of the main concepts and issues. Contemporary tools and technologies are applied to develop an analytics solution to selected health care problems.

Offered: As needed

BAN 665. Big Data and Hadoop. 3 Credits.

The concept, principles, issues and techniques for managing Big Data information management resources are covered. The course explores how Big Data fits into an organization's information management strategy. Focus is on the Hadoop platform, emphasizing how it is used to design and maintain Big Data to support analytics.

Offered: As needed

BAN 667. Design and Analysis of Business Information Systems. 3 Credits.

This course considers systems-development methods, analysis and design techniques with a focus on object-oriented analysis and design. The application of systems analysis and design concepts using current tools, techniques and approaches is covered. Students engage in hands-on learning and work in teams to complete a real-world project using contemporary analysis and design methodologies and tools.

Offered: As needed

BAN 668. Python Programming for Data Analysis. 3 Credits.

After briefly covering the basics of Python programming, the course will show how students can use Python for simple text analysis. The course will then delve deeper and cover topics such as acquiring and cleaning data, and analyze the data using various statistical analysis modules that are available for Python. Students will work on independent short Python programming projects, as well as data analysis projects using Python.

Offered: Every year, Fall

BAN 669. Project Management. 3 Credits.

This course develops a foundation of concepts and solutions required for successful completion of a project. Topics include planning, scheduling, controlling, resource allocation and performance measurement.

Offered: As needed

BAN 675. Special Topics. 3 Credits.

Offered: As needed

BAN 688. Business Analytics Independent Study. 3 Credits.

Offered: Every year, All

BAN 689. Business Analytics Independent Study. 1-6 Credits.

Offered: Every year, All

BAN 690. Business Analytics Capstone. 3 Credits.

The capstone course in the MSBA program is designed to enable students to directly utilize what has been learned in the tools and applications courses to analyze and offer solutions for a major business challenge. A definition of the problem, analysis of options and a comprehensive presentation of findings and solutions are required components of the course.

Prerequisites: Take BAN 610, BAN 615, BAN 621, BAN 650, BAN 668.

Offered: Every year, Fall and Summer

Bachelor of Science in Business Analytics

Program Contact: Kiku Jones (kiku.jones@qu.edu) 203-582-5040

The BS in Business Analytics program teaches the skills needed to extract and manage data, as well as design and implement analytics-based solutions. Upon graduating, you'll be positioned for a rewarding career as an analyst in marketing research, finance, advertising, management and supply chain operations, to name just a few. Our multidisciplinary curriculum combines core business knowledge with a strong foundation in skills including data mining and analysis, database management, and predictive modeling. Courses utilize the same tools and software used by professional data analysts, including SQL programming language, Tableau and Python.

BS in Business Analytics Curriculum

As with all programs within the School of Business, students must meet the requirements of the University Curriculum (p. 51), the School of Business Core Curriculum, and the specific requirements of the major for a total of 122 credits:

Code	Title	Credits
Business Core Curriculum		
Complete the Business Core Curriculum (p. 304)		43
University Curriculum		
Complete the University Curriculum for School of Business (p. 305)		34
Business Analytics Core		
CIS 245	Object-Oriented Programming	3
CIS 255	Data Visualization	3
CIS 350	Data Analysis with Excel (AC 350)	3
CIS 351	Database Programming and Design	3
BAN 220	Data Mining for Business Insights	3
BAN 300	Business Data Analysis with R	3
BAN 420	Machine Learning and Artificial Intelligence for Business	3
BAN Elective Courses		
Select 2 of the following BAN electives:		6
BAN 310	Web Analytics	
BAN 410	Social Media Analytics	
CIS 360	Programming in Excel	
FIN 325	Financial Analytics	
IB 362	Cross-Cultural Business Research Part I	

MK 321	Marketing Analytics	
MG 342	Supply Chain Analytics	
SB 488	Business Internship	
Open Electives		
Select 18 credits		18
Total Credits		122

Student Learning Outcomes

Students who graduate with this degree will demonstrate:

- Business Knowledge:** Students apply basic business theories and concepts to understand and solve business problems.
- Business Analytics:** Students effectively gather, assess and utilize data to understand, improve and communicate business decisions using Excel and other analytical tools.
- Communication:** Students communicate business ideas effectively through written communications, oral communications and presentations, and digital media.
- Critical Thinking:** Students utilize information and research findings to analyze problems and determine appropriate solutions.
- Business Ethics:** Students apply ethical frameworks to evaluate situations and determine appropriate solutions.
- Cultural Adaptability:** Students recognize and apply knowledge of diversity within and across individual and groups.
- Professionalism:** Students exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

Admission Requirements: School of Business

The requirements for admission into the undergraduate School of Business programs are the same as those for admission to Quinnipiac University.

Bachelor of Science in Computer Information Systems

Program Contact: Kiku Jones (kiku.jones@qu.edu) 203-582-5040

Computer information systems is where business and technology meet. CIS graduates bridge the gap between IT and business needs. They possess the knowledge and skill to become effective managers, developers and users of information systems. The CIS program focuses on data analysis, teamwork, project management and system development using a "hands-on" learning approach with real-world applications and projects. Successful students have an interest in problem solving using technology, business and management.

Students who major in computer information systems are in high demand in the job market. They acquire advanced skills along with an understanding of the role information systems play in organizations. CIS graduates are prepared for careers as systems analysts, business analysts, database administrators, web designers, project managers or IT consultants.

BS in Computer Information Systems Curriculum

As with all programs within the School of Business, students must meet the requirements of the University Curriculum (p. 51), the School of Business Core Curriculum, and the specific requirements of the major for a total of 122 credits:

Bachelor of Science in Computer Information Systems and Accounting

Program Contact: Kiku Jones (kiku.jones@qu.edu) 203-582-5040

There is a great industry demand for students who wish to specialize in computer information systems with applications in accounting.

In the digital age, the languages of business and technology are mutually inclusive. Dual competency doubles your skill set, and positions you for success in a multitude of roles. We'll teach you to design and maintain financial databases, assess the cost of hardware and software, and manage teams of IT professionals. These skills are crucial to commercial businesses, hospitals, banks, law offices and nonprofit organizations.

As the architect of a company's technological infrastructure, you'll implement and secure its accounting information system. You'll ensure that financial information is accurate and accessible to managers, CFOs, auditors and others. These responsibilities prepare you for leadership roles as an information technology accountant, systems auditor, IT director and chief information officer.

BS in Computer Information Systems and Accounting Curriculum

Students may earn a Bachelor of Science in computer information systems and accounting by completing the requirements of the University Curriculum (p. 51), the Business Core Curriculum, and specific requirements outlined below for a total of 122 credits.

Code	Title	Credits
Business Core Curriculum		
	Complete the Business Core Curriculum (p. 304)	43
University Curriculum		
	Complete the University Curriculum for School of Business (p. 305)	34

Student Learning Outcomes

Students who graduate with this degree will demonstrate:

- Business Knowledge:** Students apply basic business theories and concepts to understand and solve business problems.
- Business Analytics:** Students effectively gather, assess and utilize data to understand, improve and communicate business decisions using Excel and other analytical tools.
- Communication:** Students communicate business ideas effectively through written communications, oral communications and presentations, and digital media.
- Critical Thinking:** Students utilize information and research findings to analyze problems and determine appropriate solutions.
- Business Ethics:** Students apply ethical frameworks to evaluate situations and determine appropriate solutions.
- Cultural Adaptability:** Students recognize and apply knowledge of diversity within and across individual and groups.
- Professionalism:** Students exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

Admission Requirements: School of Business

The requirements for admission into the undergraduate School of Business programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the **Admissions** page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Suggested Transfer Curriculum for BS in Computer Information Systems and Accounting

A minimum of 60 credits is required for transfer into the BS in Computer Information Systems and Accounting program. Below is a sample plan of study for the first two years prior to matriculation at Quinnipiac University.

Minor in Computer Information Systems

Program Contact: Kiku Jones (kiku.jones@qu.edu) 203-582-5040

Information systems are vital to businesses. They are used in problem solving, analysis and decision making at all levels of management. This minor provides you with a strong, functional background in information technology. Proficiency in web programming, data management, networking and data security help you to resolve a range of business issues for many different employers. The ability to track supply chains, and improve electronic business and e-commerce strategies gives you an additional advantage in administrative and managerial roles.

Courses not only make you a more effective user of information technology, but a more informed consumer as well. You'll be able to assess the strengths and weaknesses of various programs, hardware and software on the market, ensuring that the right ones are chosen and implemented. Whether you plan to work for yourself, or in fields as diverse as telecommunications, health care and law, you'll know that the technology you depend on functions effectively and reliably, and that important information is protected at all times.

The minor in computer information systems complements the major in a wide variety of disciplines. It provides the students with the skills to serve

as effective users of information technology within their respective major areas and allows them to become more savvy personal consumers of information technology. The minor is structured to provide each student with the opportunity to select courses that support their own interests.

Computer Information Systems Minor Curriculum

The minor in computer information systems requires the completion of 18 credits as follows:

Code	Title	Credits
CIS Minor Requirements:		
CIS 101	Introduction to Information Systems	3
CIS 225	Systems Analysis and Design	3
Choose four CIS electives from the following:		12
CIS 245	Object-Oriented Programming	
CIS 265	Mobile Application Development	
CIS 267	HTML and CSS

CIS 381	Web Development	
CIS 411	Information Systems Security	
CIS 440	IT Project Management	
CIS 484	Information Systems Internship	
Total Credits		18

Department of Entrepreneurship, International Business and Strategy

The Department of Entrepreneurship, International Business and Strategy offers degree programs in Entrepreneurship and Innovation as well as International Business. Both include a rigorous and rounded academic curriculum complemented by extracurricular and service-learning involvement in the region's business activity. Our degree programs establish a foundation in sound business practices along with an appreciation and understanding of the arts and sciences.

Students hone the skills necessary for successful application of their cutting-edge knowledge in a business or other organizational setting. The majors offer specific functional courses that provide students with the theoretical foundations needed for critical thinking and solid business decision making; a focus on developing key conceptual, analytical and practical competencies, frequent interaction with the local business community as well as opportunities for internships and field projects. The programs educate students who are interested in starting their own business, working in a family business or working for an established business or startup.

The department provides many opportunities for experiential learning and direct contact with businesses, practitioners and entrepreneurs both within and outside of the classroom. Some examples of these opportunities include study abroad programs, international internships, business model competitions and student clubs. The Entrepreneurship Club is a Quinnipiac University chapter of the national Collegiate Entrepreneurs' Organization, dedicated to bolstering inventive students, their ideas and their entrepreneurial spirit. The club brings in entrepreneur

speakers and holds events promoting student entrepreneurs on campus. The International Business Society is a student organization that is active in establishing and strengthening ties with local companies through projects on export and foreign market entry for local business and entrepreneurs.

- Bachelor of Science in Entrepreneurship and Innovation (p. 327)
- Minor in Entrepreneurship and Innovation (p. 332)
- Bachelor of Science in International Business (p. 329)
- Minor in International Business (p. 332)
- Master of Science in Organizational Leadership (p. 711) (online)
- Global Supply Chain Certificate (p. 331)
- Entrepreneurship and Innovation Interdisciplinary Certificate (p. 331)

Entrepreneurship (ENT)

ENT 110. Entrepreneurship and Innovative Responses to the Coronavirus. 3 Credits.

This course introduces students to how entrepreneurs and organizations are responding to the coronavirus. In this most unprecedented moment, we examine how entrepreneurs and organizations are coming up with creative and innovative solutions to combat the effect of the virus on individuals, communities and our economy. The course helps students develop an understanding of entrepreneurial and innovative thinking and how they can use this perspective to solve important problems.

Offered: As needed

ENT 210. Introduction to Entrepreneurial Thinking and Practice. 3 Credits.

Entrepreneurship is much more than the process of starting a company. Entrepreneurship is a habit of mind and an attitude. It is a skill set applicable to pursuing innovation in organizations, personal and career contexts, and an approach to life built around innovative thinking, calculated daring and proactive behavior. This course introduces students to the entrepreneurial mindset, the context of entrepreneurship, and skills necessary to use the entrepreneurial mindset in the workplace, in starting a new venture and in one's personal life.

Offered: Every year, All

UC: Breadth Elective

ENT 220. The Business of Music. 3 Credits.

The business of music is an introductory course for students interested in the performing or non-performing aspects of the music industry especially the knowledge of business necessary for success. Topics include copyright law, music publishing, music licensing, record operations, and music marketing.

Offered: As needed

ENT 250. Idea Validation and Business Model Development. 3 Credits.

In this class, students work through a series of engagement exercises that represent the pre-launch activities of a growth-oriented startup. This class shows you how to thoughtfully take your idea from business concept through initial launch and culminates with the development of crowdfunding pitch or some other type of event like an Entrepreneurs Fair. This course applies to both domestic and global businesses.

Offered: Every year, Fall and Spring

ENT 290. Creating Digital Businesses. 3 Credits.

Students form their own teams to develop a digital business idea into a viable business and assisted to launch their business. Students learn about content creation, business concepts and presentation skills in preparation for a successful launch.

Offered: As needed

- ENT 299. Special Topics in Entrepreneurship.** 3 Credits.
Topics vary. Permission of department chair required.
Offered: As needed
- ENT 310. Creativity and Innovation Management.** 3 Credits.
This course enables students to gain an understanding of the theory and process of creative thinking as related to the entrepreneurial mindset for creative problem solving and develop skills in problem identification and solution. Topics include the creative process, exploring new ways of looking at problems, and developing novel yet feasible solutions. Students will learn the differences between innovation in startups and existing organizations. The creative process will be applied to both new ventures and to corporate innovation in both domestic and global businesses.
Offered: Every year, Fall
- ENT 320. Small Business Marketing.** 3 Credits.
This course applies the principles of marketing to the process of developing a marketing plan and strategy for the small business. Students explore how the marketing plan integrates into the overall business plan and how it applies to small business operations and strategy implementation. By reviewing case studies of successful contemporary entrepreneurs, participants develop a further understanding of what personal characteristics and insights the entrepreneur and small business owner must cultivate to be successful in marketing.
Prerequisites: Take ENT 210.
Offered: Every year, Fall
- ENT 330. Entrepreneurial Finance.** 3 Credits.
This course addresses the myriad financial problems faced by the entrepreneur and by new and emerging businesses. The sources of capital—bootstrap, debt and equity—each have their merits and caveats for ownership and management of the new company. Other topics include: crowdfunding, financial forecasting and developing key performance metrics.
Offered: Every year, Spring
- ENT 331. Family or Small Business Financing.** 3 Credits.
This course addresses the financial aspects of small business and family business companies. The core financial aspects of business problems encountered by those running a small or family business are covered through the discussion of financial topics including working capital management, forecasting, budgeting, financial statements, small business administration programs, succession planning, and alternative solutions to commonly encountered financial problems.
Offered: As needed
- ENT 340. Opportunity Recognition and Negotiation.** 3 Credits.
This course builds students' skills in negotiation using relevant theory and practical applications in the course. These skills may be applied to acquisition of resources for a business, for personal resources such as salary and benefits, and for any situation in which working with one or more individuals requires reaching agreement.
Offered: Every year, Spring
- ENT 350. Social Entrepreneurship.** 3 Credits.
Social entrepreneurship examines the practice of identifying, starting, and growing successful mission-driven for-profit and nonprofit ventures, that is, organizations that strive to advance social or environmental change through innovative solutions. This course provides a socially relevant academic experience that enables students to gain in-depth insights into economic, social, and environmental value creation across a number of sectors/areas including but not limited to poverty alleviation, energy, health, food security, environmental issues and education.
Offered: Every year, Spring
UC: Breadth Elective, Intercultural Understand
- ENT 360. Small and Family Business.** 3 Credits.
This course helps students understand how to successfully operate an existing family or small business. The course further covers the unique characteristics that distinguish a family or small business from other businesses including estate planning and succession planning.
Offered: As needed
- ENT 361. Managing the Family or Small Business.** 3 Credits.
This class is focused on leadership, hiring, growing/improving, motivating, and firing employees, and working with higher ups in an organization. It specifically addresses the challenges when those individuals have long tenure with the business or are family members.
Offered: As needed
- ENT 371. Business Plan Competition.** 3 Credits.
This course prepares students to compete in business competitions with their business ideas. These competitions might include the QU business model competition, the CT state competition, and other state and national competitions. Students work with a faculty mentor and also work as a group to refine, improve and deliver a successful pitch or business model presentation.
Offered: Every year, Spring
- ENT 410. Creating New Business Models.** 3 Credits.
Students ideate and explore the development of business models for a digital, product or service business.
Prerequisites: Take ENT 210.
Offered: Every year, Fall
- ENT 420. Business Launch.** 3 Credits.
In this course, students learn and apply the fundamentals of implementing a successful business. Any type of business may be implemented and may include technology, service, product, arts, social, etc. This course provides students with the knowledge and skills necessary to select the businesses that are right for them and to executive on their business plans and successfully launch their business. Students will systematically learn and do what is required for the successful launch of a new venture. In this course students may launch a real business or a practice business.
Prerequisites: Take ENT 210 ENT 250;
Offered: Every year, Fall
- ENT 430. Practicum in Entrepreneurship.** 3 Credits.
This course is specifically designed for students with the passion to create a new entrepreneurial venture. This course is for students who are ready to take their idea to an actual launch or to further grow an existing business. Students who take the course are given the unique opportunity to present a business plan and pitch to a panel of distinguished alumni including angel investors and venture capitalists. Registration by permission only.
Offered: As needed

ENT 488. Entrepreneurship Internship. 3 Credits.

Students gain work experience under the joint supervision of a faculty member and practicing manager or business owner. Students must meet School of Business internship requirements. This course is graded on a pass/fail basis.

Prerequisites: Take ENT 210.

Offered: Every year, All

ENT 490. Field Projects. 3 Credits.

Students work independently or as part of a team on a project or topic of their choice under the supervision of a faculty member. The project may involve researching a special entrepreneurship topic, working on an aspect of a new business startup or working with a business or organization.

Offered: As needed

ENT 499. Independent Research in Entrepreneurship. 1-6 Credits.

Approval of a sponsoring faculty, the department chair and the dean is required.

Offered: As needed

ENT 610. Entrepreneurship and Franchising. 3 Credits.

Franchising is a \$1 trillion direct sales business. To some financial analysts, franchising is the purest form of capitalism and entrepreneurship. This course looks at how entrepreneurs can expand their business model by adapting the franchise model. Students examine the benefits of franchising, and the hurdles and pitfalls to avoid. Participants use actual cases of entrepreneurs, develop a franchise model and make a final presentation to a panel of entrepreneurs and successful franchisors.

Offered: As needed

ENT 620. Corporate Entrepreneurship. 3 Credits.

This course is designed for intrapreneurs who want to apply their entrepreneurial spirit to innovate within established organizations, as well as for managers whose goal is to build and manage innovation processes in the organization. Students learn techniques and best practices that combine innovation strategies, start-up thinking and entrepreneurial methods to accomplish organizational innovation in its many forms, from product/service innovation and business model innovation, to innovation for social and environmental purposes. The course uses case studies, readings and projects.

Offered: As needed

ENT 625. Entrepreneurship. 3 Credits.

The course deals with the creation and management of new businesses and the institutionalization of innovation in existing businesses. Students are introduced to a body of knowledge on the successful planning, implementation, and management of entrepreneurial ventures. The objective of the course is to provide the knowledge and the ability to identify and assess business opportunity and estimate the resource requirements necessary to success. Production of a business plan is required.

Offered: As needed

ENT 688. Entrepreneurship Independent Study. 3 Credits.**International Business (IB)****IB 105. International Business Environment. 3 Credits.**

This course provides an introduction to the worldwide business environment in which we live and work. The course reviews the cultural, social, political, geographical and economic factors that shape economic institutions and activities in the U.S. and other countries. Global business interactions also are studied. This course is geared primarily toward non-business majors.

Offered: Every year, Fall and Spring

UC: Social Sciences, Intercultural Understand

IB 120. Introduction to Doing Business in the European Union. 3 Credits.

This course focuses on the fundamentals of business practice and business culture in Europe. Poland is used as a case study. The course introduces European business practices and principles in the context of the modern global economy. It includes topics of the European financial market, European regulation, Polish industrial structure, Polish political and economic systems, and history with a focus on the economic transformation and Poland's growing position of economic powerhouse in Europe today. The overarching objective of this course is to provide students with the basic but comprehensive skills and knowledge they need to get involved in international business with focus on EU/Poland. IB 120 is one of the courses that enable students to work toward the Global Business Affairs Polish Certificate or may be taken as a stand alone course.

Offered: As needed

IB 201. Globalization and International Business. 3 Credits.

This course introduces students to issues concerning globalization and international business. Students examine the critical role of international trade and investment as well as the impact of multinational corporations on the globalization process. The challenges and opportunities of international business are covered in detail. Global issues such as poverty, economic development and education, and the formulation of sustainable, environmentally-friendly development strategies are addressed. Insights are drawn from social sciences disciplines such as economics, political science, sociology and cultural geography

Offered: Every year, All

UC: Social Sciences, Intercultural Understand

IB 201H. Honors International Business. 3 Credits.

This course advances students' understanding of international business interactions and the global marketplace. Topics include: theories of international trade; theories of foreign direct investment and multinational corporations; globalization and the nature of international business; international organizations, international monetary systems and global financial market; foreign business environments; and management of international business opportunities and operations. The insights are drawn from economics, political science, psychology and other sources.

Prerequisites: Take FYS 101 or FYS 150.

Offered: As needed

IB 300. Special Topics in International Business. 3 Credits.

Prerequisites: Take IB 201.

Offered: As needed

- IB 311. International Marketing. 3 Credits.**
The course addresses environmental components of international marketing that affect business. Students learn about product, price, place and promotion in a global context. Additional topics include regional integration, emerging markets, global marketing strategies and research methods.
Prerequisites: Take IB 201.
Offered: Every year, All
- IB 313. International Marketing Research. 3 Credits.**
Students learn to understand and satisfy marketing managers' information needs: demand potential, competition, regulations and accepted procedures in relevant business/geographic areas. Research design, quantitative and qualitative data collection, questionnaire design, data analysis, implications of results and written/oral reports are included. This methodological course assumes basic understanding of marketing in a global/multi-cultural environment. MA 170 prerequisite waived with Math Placement score of 4.0 or higher.
Prerequisites: Take IB 201; and MA 170 or MA 206 or equivalent.
Offered: Every year, Spring
- IB 320. Introduction to Global Entrepreneurship. 3 Credits.**
This course introduces students to the major topics in global entrepreneurship, including: 1) the critical roles of national governments, multilateral institutions and international agreements in shaping the rules and conditions that shaped global opportunities and challenges; 2) the role of international entrepreneurship in this complex global environment; and 3) issues concerning how to identify opportunities, build a start-up, manage its growth and resources in a global environment. The course introduces some important skills, such as country risk analysis, business model building and valuation of an international business opportunity. The course is taught by lecture, case analysis and experiential projects.
Prerequisites: Take IB 201.
Offered: Every year, Spring
- IB 324. Negotiating Internationally. 3 Credits.**
The course focuses on analyzing the international context of different dimensions of negotiations and related topics, such as communication, conflict, conflict resolution, group, power, influence, persuasion and mediation. Special emphasis is placed on understanding how culture influences the processes as well as styles of negotiation behavior of different nationalities.
Prerequisites: Take IB 201 or LE 225 or LE 370.
Offered: Every year, Fall
- IB 335. International Finance. 3 Credits.**
This course focuses on the financial management of multinational corporations. It includes topics of the global financial market, foreign exchange risk management, financing decisions, investment decisions and funds remittance/transfer decisions when firms operate in a competitive global economy and face currency risks, political and regulatory risks.
Prerequisites: Take IB 201, FIN 201.
Offered: Every year, Fall and Spring
- IB 345. Global Supply Chain. 3 Credits.**
This course covers issues related to the global procurement decision-making process from multiple perspectives, including strategy, tactical and operational. Topics may include, but are not limited to: order processing, quality control, value analysis, warehousing, inventory control, reverse logistics, green supply chain, offshoring and outsourcing, and international transportation, financing, risk, customs and incoterms.
Prerequisites: Take IB 201.
Offered: Every year, Spring
- IB 352. International Management. 3 Credits.**
This course addresses the theory and practice of strategic management and organizational behavior in a global environment with a specific emphasis on international human resource management. Additional topics include: cross-cultural communication, selection and management of expatriates, and global leadership skills. Students read and interpret international management research articles.
Prerequisites: Take IB 105 or IB 201.
Offered: Every year, Fall
- IB 362. Cross-Cultural Business Research Part 1. 3 Credits.**
This is the first of a two-part sequence (the second being IB 363). The objective of the IB 362- IB 363 series is to produce a hypotheses driven academic research poster which empirically addresses a cross-cultural/international business issue. Due to the high intensity of interaction with the instructor, these courses allow limited enrollment and require an instructor interview and permission to register. IB 352 is recommended as a prerequisite.
Prerequisites: Take IB 201.
Offered: As needed
- IB 363. Cross-Cultural Business Research Part 2. 3 Credits.**
This course is the second of a two-part sequence. Building directly on IB 362, this course aims to complete an academic research paper that could be submitted to an international academic research conference. Working closely with the instructor, the student completes appropriate statistical analyses of the data collected and develop and write a literature review leading to research hypotheses, and methodology, a description of results, as well as a discussion section interpreting these results and including research limitations and suggestions for future research.
Prerequisites: Take IB 362.
Offered: As needed
- IB 399. International Business Independent Study. 1-6 Credits.**
Offered: As needed
- IB 401. International Strategy and Business Plan. 3 Credits.**
Students develop a comprehensive business model for a country market-entry project. This macro-environmental/country assessment includes current events, industry analysis, marketing strategy, management strategy, corporate social responsibility decisions, global supply chain strategy, financial considerations, and critical success factors for implementation.
Prerequisites: Take IB 313, IB 335, IB 352, IB 345.
Offered: Every year, Spring
- IB 488. International Business Internship. 3 Credits.**
This internship in international business must be approved by the department chair and the dean in accordance with school regulations. This course is graded on a pass/fail basis.
Prerequisites: Take IB 201.
Offered: Every year, All
- IB 611. International Corporate Finance. 3 Credits.**
Students gain an understanding and appreciation of the additional risks and opportunities that occur once a firm goes international. They develop a working knowledge of tools used by international firms to deal with those risks and opportunities. The topics include international financial markets, foreign exchange risk measurement and management, political risk, financial engineering, investment project evaluation, managing short-term funds, etc.
Prerequisites: Take MBA 640, MBA 660.
Offered: As needed

IB 623. International Business Negotiation. 3 Credits.

This course analyzes different forms of negotiations and related themes in an international context. Topics include the negotiation process, communication, conflict resolution, value creation, value claiming, influence strategies, closing and renegotiation. Special emphasis is placed on examining how culture affects negotiation. Negotiation behavior and styles of a few selected nationalities also are discussed.

Offered: As needed

IB 688. Independent Study-International Business. 3 Credits.

Permission of the MBA director and School of Business Associate Dean is required.

Offered: As needed

IB 689. Independent Study-International Business. 3 Credits.

Permission of the MBA director and School of Business Associate Dean is required.

Offered: As needed

Strategy (STR)

STR 210. Artificial Intelligence in the Business World: Disruptions, Trends, the Value of Humans. 3 Credits.

This course delves into Artificial Intelligence (AI) and how it is affecting the business world today and in the future. Students explore disruptions caused by AI, identify and discover new trends in AI, and investigate what it means to be human in a rapidly changing environment. Students identify potential issues, define the value of humans, evaluate various models of decision-making (human alone, AI alone, vs. human and AI together), and anticipate how they will strategically use this knowledge in their future.

Offered: As needed, Summer

STR 610. Business Sustainability. 3 Credits.

This course provides students with a comprehensive conceptual and applied understanding of the sustainability challenges and opportunities facing corporations on a global scale, with primary emphasis on environmental sustainability. Students are exposed to a variety of pressing sustainability issues and to frameworks, techniques and approaches for successfully dealing with them.

Offered: Every year

STR 620. Technology and Innovation Management. 3 Credits.

Technology and innovation have become key resources for corporate profitability and competitive advantage in firms. Managed properly, technological innovations are a primary source of competitive advantage for firms. This course explores the strategic role of technology and innovation in the success of firms. Classroom learning is facilitated primarily through case analyses.

Offered: Every year

STR 630. Corporate Governance and Strategy. 3 Credits.

Corporate governance deals with the complex set of relationships between the corporation and its stakeholders. This course emphasizes governance issues in publicly traded companies and addresses the roles and responsibilities of managers, the board of directors, shareholders and others. Governance best practices as well as governance legal and ethical violations are discussed. Important government regulations including Sarbanes-Oxley are covered.

Offered: As needed

Bachelor of Science in Entrepreneurship and Innovation

Program Contact: Robert Yawson (Robert.Yawson@qu.edu)
(Robert.Yawson@qu.edu) 203-582-5023

Entrepreneurship is an important driver of growth for both the national and international economy. Students are prepared to think innovatively, develop new ideas for existing businesses, and create new business ventures. However, entrepreneurship is even more than the creation of a new business venture. Entrepreneurship encompasses seeking opportunity, identifying and acknowledging risk and, most importantly, persisting until the idea becomes reality. Entrepreneurial thinking can be applied to all contexts and organizations. At Quinnipiac University, we facilitate the development of an entrepreneurial mindset and attitude in our students; this enables them to apply their unique attributes and skills to realize innovative ideas in a variety of settings including profit and not-for-profit organizations, new and existing ventures, and in business and non-business activities. The development of an entrepreneurial mindset creates career opportunities for students whether starting their own business or going to work in a large or small organization.

The Entrepreneurship and Innovation program includes a rigorous and rounded academic curriculum complemented by extracurricular and service learning involvement in the region's business activity. The program develops entrepreneurial thinking, establishes a foundation in sound business practices along with an appreciation and understanding of the arts and sciences, and hones the skills necessary for successful entrepreneurship and small business management. This is accomplished through a distinct and innovative curriculum.

The program is highly experiential, allowing students to work on team and individual projects to develop and improve businesses and business ideas. Students compete in regional and national business plan competitions and interact with various agencies and financial institutions supportive of entrepreneur and small business success. The program includes local, regional and national companies and small business owners sharing their expertise and experiences as an important element in the program's educational process.

BS in Entrepreneurship and Innovation Curriculum

Students majoring in Entrepreneurship and Innovation are required to complete 122 credits.

Student Learning Outcomes

Students who graduate with this degree will demonstrate the following competencies:

- Business Knowledge:** Students apply basic business theories and concepts to understand and solve business problems.
- Business Analytics:** Students effectively gather, assess and utilize data to understand, improve and communicate business decisions using Excel and other analytical tools.
- Communication:** Students communicate business ideas effectively through written communications, oral communications and presentations, and digital media.
- Critical Thinking:** Students utilize information and research findings to analyze problems and determine appropriate solutions.
- Business Ethics:** Students apply ethical frameworks to evaluate situations and determine appropriate solutions.
- Cultural Adaptability:** Students recognize and apply knowledge of diversity within and across individual and groups.
- Professionalism:** Students exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

Admission Requirements: School of Business

The requirements for admission into the undergraduate School of Business programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the **Admissions** page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Suggested Transfer Curriculum for BS in Entrepreneurship and Innovation

A minimum of 60 credits is required for transfer into the BS in Entrepreneurship and Innovation program. Below is a sample plan

of study for the first two years prior to matriculation at Quinnipiac University.

Bachelor of Science in International Business

Program Contact: Robert Yawson (Robert.Yawson@qu.edu)
203-582-5023

Corporations, nonprofits and government agencies from around the world need talented professionals who have the ability to successfully work in culturally diverse environments and possess a knowledge of global markets and international business trends. International business students learn how to work with culturally diverse businesses and populations, and develop critical thinking and analytical skills. Students also develop a foundation in international finance, international marketing, global supply chain, and international management and strategy, and also learn how to work with international data and its sources. Graduates with this background are prepared for careers in global supply chain management, international marketing and marketing research, business development, financial analysis and business consulting.

Students in the IB major are encouraged to immerse in a foreign country with a study-abroad program to better understand its history, politics, business and culture. Students also may complete an internship while studying abroad. Alternatively, internships with local businesses or major firms in neighboring New York City enable students to apply their knowledge in a real-world setting. IB majors can also graduate with a certificate in Global Supply Chain (p. 331).

BS in International Business Curriculum

The BS in International Business requires the completion of 122 credits.

Entrepreneurship and Innovation Interdisciplinary Certificate

Overview

This is a 12-credit certificate program designed for non-business majors at QU and non-QU students or external parties. The three required courses provide students with the fundamental language, knowledge, leadership and communication skills related to entrepreneurship and innovation. The option course provides students with discipline or industry-specific depth in areas relevant to entrepreneurship and innovation. They are offered through departments across the university.

Goals

To promote the growth of the entrepreneurial ecosystem at QU and to support the interdisciplinary initiatives that exist at the university. This certificate enables *non-business* students at QU to add an Entrepreneurship & Innovation certificate to their core program or a non-QU student or external party to take 3-4 courses in E&I.

Learning Objectives

- Learn the entrepreneurial process and mindset.
- Learn the process in evaluating whether their idea is desired by customers.
- Learn how to evaluate customer interest in their product or service.
- Learn the steps in how to take an idea to business creation.
- Learn how corporate innovation works and how to develop ideas within an organization or apply to oneself.

Business students who are interested in entrepreneurship & innovation should add a minor. Non-business students who want more depth of entrepreneurship & innovation can also add a minor.

The Entrepreneurship & Innovation certificate for *non-business* students includes three (3) required courses and a choice of one of three elective courses or the substitution of a course in the student's major area or other discipline of interest.

The certificate courses draw from a large set of interdisciplinary fields in the social sciences and scientific methods such as psychology, sociology, economics, creativity theory, experimental research, etc. In addition, the elective list from the other schools includes courses that address the culture or environment of decisions, types of problems, or other innovative or entrepreneurial topics. (See below for illustrative list, subject to changes and additions.) The fourth course will be approved by the certificate adviser or Chair of the Entrepreneurship, International Business and Strategy Department.

Entrepreneurship & Innovation Certificate Curriculum

Code	Title	Credits
Required Courses		
ENT 210	Introduction to Entrepreneurial Thinking and Practice	3

ENT 250	Idea Validation and Business Model Development	3
ENT 310	Creativity and Innovation Management	3

CSC 106	Introduction to Programming for Engineers	
DR 181	Improvise Acting	

Total Credits 15

Global Supply Chain Certificate

Program Contact: Robert Yawson (Robert.Yawson@qu.edu)
(Robert.Yawson@qu.edu) 203-582-5023

Facing a growing demand for trained global supply chain personnel in virtually all industries today, this career-directed program is designed in response to the growing needs of companies to globally source their raw materials and components, as well as, export their products to foreign markets. This certificate addresses a range of knowledge and skills necessary for a strong foundation in global supply chain activities.

The five courses of the certificate program can be applied to the BS in International Business (p. 329).

Global Supply Chain Certificate Program of Study

MG 342	Supply Chain Analytics	
MG 343	Procurement and Sourcing	
Total Credits		15

¹ Internship must be in Supply Chain area.

Minor in Entrepreneurship and Innovation

Program Contact: Robert Yawson
(Robert.Yawson@qu.edu) 203-582-5023

A minor in entrepreneurship and innovation gives you a strong foundation in sound business practices, sharpens your business management skills and teaches you how to think like an entrepreneur. This minor provides the expertise necessary for professionals in any field who must run their own business operation. You'll create business plans, engage in entrepreneurial activities and work on team and individual projects to develop and improve business ideas.

You'll learn from a rich network of faculty and staff that provides the guidance necessary to launch a business or join a burgeoning company. In the classroom, during internships and at networking events, you can tap into the expertise and experience of local and national company executives, as well as small business owners who have achieved success.

Both business and non-business school students are encouraged to minor in entrepreneurship and innovation. The minor enables students to supplement their main area of interest with the basic skills necessary to create a business plan and engage in the entrepreneurial activities and learning experiences offered by the university.

Minor in International Business

Program Contact: Robert Yawson
(Robert.Yawson@qu.edu) 203-582-5023

Multinational corporations and nonprofits alike look for talented professionals who have the core business skills and the technological competence to represent and grow their interests abroad. A minor in international business increases your knowledge of both the global marketplace and global business trends. You'll learn how traditional disciplines such as finance, marketing and sales vary in international settings, as well as how to adapt managerial and leadership techniques to the needs of foreign environments.

This program also helps develop vital communication skills as well as a sense of cultural awareness. Electives ground you in the social, economic and political context of international business. You'll learn to think globally, and how to effectively negotiate across many different cultures. Whatever your career goals entail, the international business minor contributes an important level of depth to your education, and can open doors to careers both at home and abroad.

International Business Minor Curriculum

Students wishing to minor in international business must complete 18 credits.

Department of Finance

The Department of Finance is committed to providing high-quality teaching and learning activities so that graduates are well prepared to compete in the global community.

The BS in Finance prepares graduates for career opportunities in both the financial services sector as well as in non-financial businesses. Students can focus on courses that include investment management, including equities and fixed income analysis, asset valuation and portfolio management; financial technology and innovation; and corporate finance. The program also prepares students for graduate work in finance, business administration, law and other related disciplines.

Mission Statement

The mission of the Department of Finance is to provide a high-quality educational experience for students, produce high-quality scholarly research, and contribute to the intellectual and cultural life of the university and community.

- Bachelor of Science in Finance (p. 336)
- Minor in Finance (p. 338)

Finance (FIN)

FIN 201. Fundamentals of Financial Management. 3 Credits.

This course introduces students to the theory and practice of financial management. Topics include the uses and valuation of securities, the structure and purpose of capital markets, financial risk, interest rates and yield curves, and corporate financial analysis and decision making.

Prerequisites: Take EC 111.

Offered: Every year, All

FIN 300. Special Topics. 3 Credits.

Prerequisites: Take FIN 310, FIN 320.

Offered: As needed

FIN 310. Investment Analysis. 3 Credits.

This course introduces students to the theory and practice of investment analysis. Emphasis is on the uses, characteristics and valuation of fixed income securities, equities and derivatives in the global financial marketplace. Students are exposed to both classical and modern theories of evaluating and quantifying financial risks and returns.

Prerequisites: Take FIN 201.

Offered: Every year, Fall

FIN 315. Financial Planning: A Service Learning Course. 3 Credits.

Students are introduced to financial planning, which includes budgeting, credit, insurance and risk management, investments, income tax planning and retirement planning as they apply to consumer decision-making. Students also explore the importance of financial education in reducing poverty and create financial awareness in the community through a service learning project. As part of the service learning project, students design and organize basic financial education workshops for local high school students.

Prerequisites: Take FIN 201.

Offered: As needed

- FIN 320. Financial Modeling. 3 Credits.**
 This course examines standard financial models and data analysis in the areas of capital budgeting, financial statement analysis, asset pricing, portfolio management and performance, hedging and option pricing. Students learn to extract, model and analyze data using computer spreadsheets.
Prerequisites: Take FIN 201.
Offered: Every year, Fall and Summer
- FIN 325. Financial Analytics. 3 Credits.**
 This course focuses on the further development of analytical skills used by investors, analysts and managers. Students learn methods of data acquisition and storage. Subsequently, they apply and analyze relevant statistical tools and methods analyze and interpret the results to aid appropriate decision making.
Prerequisites: Take FIN 201, CIS 245.
Offered: Every year, Fall
- FIN 345. Risk Management & Insurance. 3 Credits.**
 This course covers risk management principles and the nature of insurance as a risk-transferring device to reduce various loss exposures. Topics include insurance programs, financial aspects of insurance companies and markets, insurance industry structure, managerial aspects of underwriting and pricing, and public policy issues.
Prerequisites: Take FIN 201.
Offered: Every year, Fall
- FIN 350. Financial Markets and Institutions. 3 Credits.**
 This course presents a study of financial markets and intermediaries in a global setting with emphasis on how funds flow from investors in financial assets to investors in real assets. The types and functions of markets and institutions that exist today are discussed along with the differences between them. Topics include the role of monetary policy and the operations of central banks; the regulatory environment in which financial markets and institutions operate; and the financial instruments traded in the markets today.
Prerequisites: Take FIN 201.
Offered: Every year, Spring and Summer
- FIN 355. Retirement Planning and Employee Benefits. 3 Credits.**
 This course provides students with an understanding of the retirement planning process. The main objectives are to learn the usefulness of retirement plans and employment-based benefits, and to develop recommendations on important retirement and employee benefit decisions. Topics include: Social Security, qualified retirement plans, nonqualified retirement plans, self-employed plans, IRAs, group life insurance, group disability insurance and group health insurance.
Prerequisites: Take FIN 201.
Offered: As needed
- FIN 356. Real Estate Finance. 3 Credits.**
 This course examines the structure of real estate markets. Topics include principles of mortgage lending; property appraisal; the secondary mortgage market; mortgage securitization and valuation; residential and commercial real estate investment; leverage and capital structure for real estate project analysis; and real estate investment in the portfolio context.
Prerequisites: Take FIN 201.
Offered: Every year, Spring
- FIN 360. Financial Statement Analysis. 3 Credits.**
 This course focuses on the development of analytical skills used by investors and analysts in their evaluation of various financial statements. Topics include the review and analysis of balance sheets, income statements and statements of cash flow; ratio analysis and developing pro forma financial statements to support equity analysis and credit analysis.
Prerequisites: Take FIN 201.
Offered: Every year, Fall and Summer
- FIN 370. Commodities. 3 Credits.**
 This course introduces students to the fundamental and technical analysis of commodity markets with application to real market problems. Strategy development and risk management are studied with alternative market concepts and unconventional views.
Prerequisites: Take FIN 310.
Offered: Every year, Spring
- FIN 380. Intermediate Corporate Finance. 3 Credits.**
 Students gain an advanced understanding of corporate finance. The main objectives are to learn to apply financial concepts, construct and implement financial decision models, and relate various financial theories to one another. Topics include capital budgeting, the valuation of firms, capital structure, cost of capital, dividend policy and risk management.
Prerequisites: Take FIN 201.
Offered: Every year, Spring and Summer
- FIN 420. Bank Management and Loan Underwriting. 3 Credits.**
 This course focuses on the theory and techniques used to underwrite bank loans and manage a bank loan portfolio. Other fundamental bank processes such as management of liquidity, investment portfolios, funding costs and capital adequacy also are examined. Emphasis is placed on the application of real-world best practices.
Prerequisites: Take FIN 350.
Offered: Every year, Spring
- FIN 430. Portfolio Theory and Practice. 3 Credits.**
 This course offers a rigorous examination of the theory and practice of portfolio management. Topics include portfolio construction, valuation and performance measurement. Equity and fixed-income portfolio strategies are considered as well as the use of futures and options in portfolio management.
Prerequisites: Take FIN 310, FIN 320.
Offered: As needed
- FIN 440. Introduction to Fixed Income Analytics. 3 Credits.**
 This course introduces students to the analytical processes associated with fixed income investing. The course bridges the gap between valuing bonds based on a yield to maturity and valuing bonds as a package of zero-coupon instruments. The concepts of theoretical spot rates, par rates of the on-the-run treasury securities, duration and convexity are discussed. A binomial model is explained and used to value bonds that have built-in options.
Prerequisites: Take FIN 310, FIN 320.
Offered: Every year, Fall
- FIN 450. Applied Portfolio Management. 3 Credits.**
 Students apply investment and portfolio management techniques and strategies in a real-life environment by managing a portion of the Quinnipiac University Endowment fund—the Student-Managed Portfolio. Students are responsible for developing investment strategies, constructing, monitoring and rebalancing the portfolio, and reporting on actual portfolio performance. Permission of instructor required.
Prerequisites: Take FIN 310, FIN 320, FIN 360.
Offered: Every year, All

- FIN 451. Applied Portfolio Management II.** **3 Credits.**
 This course is a continuation of FIN 450 for students who have excelled in Applied Portfolio Management I and wish to take a leadership role in the management of the fund. Permission of instructor required.
Prerequisites: Take FIN 450.
Offered: Every year, All
- FIN 460. Mergers and Acquisitions.** **3 Credits.**
 This course presents the theory and evidence of corporate acquisitions and restructuring activities. Topics include the foundations of mergers and restructuring, the valuation of assets, various means of financing acquisitions, defensive strategies, as well as post-merger, acquisition, and takeover performance.
Prerequisites: Take FIN 380.
Offered: Every year, Spring
- FIN 465. Working Capital Management.** **3 Credits.**
 This course examines the theory and practice of cash and liquidity management. Topics include cash management, credit and accounts receivable management, collections and cash concentrations, short-term investments and borrowing, forecasting cash flows, and international cash management.
Prerequisites: Take FIN 201.
Offered: As needed
- FIN 470. Trading Strategies and Practices.** **3 Credits.**
 This course introduces financial market microstructure and trading strategies to students. The lectures focus on how trading on exchanges is organized and regulated as well as price formation, informational efficiency and liquidity. Various trading strategies are explored using the Rotman Interactive Trading simulation.
Prerequisites: Take FIN 370.
Offered: Every year, Fall
- FIN 480. Valuation of Privately Held Businesses.** **3 Credits.**
 This course involves the analysis of company and financial information as well as understanding the impact the economy and industry can have on the value of a private company. Fundamental analysis is examined in detail and applied to private and public corporations. Topics include valuation, forecasting growth and value generation in a firm, assessing the quality of and normalizing earnings, analyzing risk and determining pricing multiples and the cost of capital.
Prerequisites: Take FIN 380.
Offered: Every other year, Spring
- FIN 485. Derivative Securities.** **3 Credits.**
 This course introduces students to derivatives and the markets in which they are traded. Emphasis is on the techniques for the valuation of options, futures and related contracts as well as the use of derivative contracts in investments, corporate finance and risk management and engineering of structured products.
Prerequisites: Take FIN 310.
Offered: Every year, Spring
- FIN 488. Finance Internship.** **3 Credits.**
 This internship in finance must be approved by the department chair and the dean in accordance with school and departmental regulations. Junior/senior status is required. This course is graded on a pass/fail basis.
Prerequisites: Take FIN 201.
Offered: Every year, All
- FIN 498. Independent Study.** **3 Credits.**
 Students may make an individual in-depth study of a topic of current interest in the field of banking or investment management. Objectives and methods must be submitted in writing to supervising instructor prior to time of enrollment.
Offered: As needed
- FIN 499. Independent Study in Managerial Finance.** **3 Credits.**
 This course provides an opportunity for individual in-depth study of a topic of current interest in the field of managerial finance. Objectives and methods submitted in writing to supervising instructor prior to time of enrollment.
Offered: As needed
- FIN 604. Risk Management.** **3 Credits.**
 This course provides a broad perspective of risk management including traditional risk management and insurance practices as well as financial risk management and hedging with derivative contracts. Emphasis is on making risk-management decisions that maximize shareholder value.
Prerequisites: Take MBA 640.
Offered: As needed
- FIN 610. Global Investments Analysis.** **3 Credits.**
 This course focuses on the theory and practice of investment analysis in a global environment. Topics include relative, intrinsic and no-arbitrage valuation models, classical and modern theories of risk and return, introductory asset allocation and portfolio optimization techniques, market structure, and the role of institutions. The emphasis is on equity products, but fixed income and derivative securities also are covered. Prerequisite required except if you completed an undergraduate Finance degree.
Prerequisites: Take MBA 640.
Offered: Every year, Fall
- FIN 612. Fixed Income Investments.** **3 Credits.**
 This course rigorously evaluates fixed-income securities, including default-free bonds, floating-rate notes and corporate bonds. Closely related financial instruments, such as forwards and futures on fixed-income securities, bond options and interest rate swaps are strongly emphasized. In addition to analyzing specific types of fixed-income securities, students examine the tools used in bond portfolio management.
Prerequisites: Take MBA 640.
Offered: As needed
- FIN 615. Emerging Financial Markets.** **3 Credits.**
 This course is an introduction to emerging financial markets. Market instruments, regulations and players in these markets are thoroughly covered. The risk and return framework of investing in emerging markets also is explored.
Prerequisites: Take MBA 640.
Offered: As needed
- FIN 616. Derivatives.** **3 Credits.**
 This course provides an in-depth analysis of derivative securities (futures, options, swaps, and other contingent claims). Topics include valuation, hedging, market structure, trading strategies and the application of option pricing theory to agency problems, financial contracting and capital budgeting.
Prerequisites: Take FIN 610.
Offered: As needed

FIN 630. Portfolio Theory and Practice. 3 Credits.

This course provides a rigorous examination of modern portfolio theory and practice. Emphasis is on the design of portfolio objectives, advanced asset allocation and portfolio optimization techniques, and the use of futures and options in portfolio management. Legal and ethical obligations also are discussed.

Prerequisites: Take FIN 610.

Offered: As needed

FIN 660. Cases in Corporate Finance. 3 Credits.

This applications-oriented course deals with cases involving working capital, mergers, corporate valuation and capital budgeting analysis and planning. The course reinforces and applies concepts and techniques from accounting and financial economics in a practical setting.

Prerequisites: Take MBA 640.

Offered: As needed

FIN 665. Issues in Equity Compensation. 3 Credits.

This course is a seminar in the theory and practice of equity compensation. Students are introduced to the economic and managerial incentives for utilizing equity compensation as well as the agency, corporate governance, valuation and accounting issues that arise when firms utilize equity compensation.

Prerequisites: Take MBA 640.

Offered: As needed

FIN 670. Trading and Exchanges. 3 Credits.

This course introduces students to the market microstructure of equity markets. The impact of the design, organization and regulation of equity markets on trading is explored. Students utilize real-world trading simulations to learn and reinforce concepts.

Prerequisites: Take FIN 610.

Offered: As needed

FIN 680. Blockchain and Cryptocurrencies. 3 Credits.

This class is an overview of evolving area of blockchain technologies, with a focus on investing in cryptocurrencies. The architecture of cryptocurrencies will be studied as well as analyzing cryptocurrency pricing and Initial Coin Offerings (ICO). We will also analyze potential barriers to entry in cryptocurrencies, and how new product development may affect industry structure in economy and financial services industry. Regulations, consumer protection, privacy, and security issues will also be discussed.

Prerequisites: Take MBA 640;

Offered: As needed

FIN 688. Independent Study - Finance. 3 Credits.

Permission of the MBA director and School of Business dean is required.

Offered: As needed

FIN 689. Independent Study - Finance. 1-6 Credits.

Permission of the MBA director and School of Business dean is required.

Offered: As needed

FIN 697. Special Topics in Finance. 3 Credits.

Offered: As needed

Bachelor of Science in Finance

Program Contact: Surya Chelikani (Surya.Chelikani@quinnipiac.edu)
203-582-3826

Students majoring in Finance gain an understanding of key financial skills and concepts, and hone their analytical reasoning skills. They receive hands-on experience in money management, develop proficiency in data gathering and also learn the importance of ethical considerations in

financial decision making. Graduates are able to explain core financial terms and concepts and apply them to real business and financial problems. They understand modern financial theory and its application to corporate financial decision making, valuation, financial markets and institutions, and portfolio management.

Students may take an investment management focus to prepare them to pursue their interest in the financial services sector working in investment banking, portfolio management or investment analysis. Upon completion of the finance core and investment management courses, students will have the educational requirements to sit for the Chartered Financial Analyst (CFA) Level I examination.

Students may also study financial technology and innovation, focusing on the emergence of transformative technologies in the finance sector, including cryptocurrency, peer-to-peer lending, crowdfunding, blockchain and technology-driven disruptive financial strategies. In this focus area, students learn Fintech applications in wealth management, insurance, banking, risk management and portfolio optimization. The focus instills the necessary expertise to enable students to pursue careers in the newly emerging area of Fintech.

Students may focus in corporate finance and prepare for careers in the management and operations of large and small corporations. Upon completion of the finance core and select corporate finance courses, students will have the educational requirements to sit for the Certified Management Accountant (CMA) certification exam, which demonstrates knowledge and proficiency in corporate financial planning and analysis, decision support and ethics. Alternatively, students may prepare to sit for the Certified Treasury Professional (CTP) designation, which exhibits knowledge and skills needed of treasury professionals.

Student learning opportunities are enhanced by the resources available within the Terry W. Goodwin '67 Financial Technology Center (FTC). The center allows students to access real-time financial data, develop financial models, conduct trading simulations and analyze financial and economic data. Students earn Bloomberg Market Concepts (BMC) certifications using the resources available at the FTC. Students have the opportunity to participate in the Student Managed Portfolio, an extension of the University's endowment fund. Leadership and educational opportunities come from participating in the Global Asset Management Education (G.A.M.E.) Forum as well as CFA "Investment Research Challenge," Bloomberg Trading competition, and Rotman Trading competitions.

Extracurricular activities include the Investment Club. This student-led organization sponsors investment challenges, campus speakers and trips to financial markets and institutions. The club also provides students peer-centered opportunities to develop their networking, team building and leadership skills. Outstanding students are eligible to be inducted into the Financial Management Association (FMA) National Honor Society.

BS in Finance Curriculum

Graduation with a BS in finance requires that the student complete 122 credits.

Code	Title	Credits
Business Core Curriculum		
	Complete the Business Core Curriculum (p. 304)	43
University Curriculum		

Complete the University Curriculum for School of Business (p. 305) 34

Student Learning Outcomes

Upon completion of this degree program, students will demonstrate:

- Business Knowledge:** Students apply basic business theories and concepts to understand and solve business problems.
- Business Analytics:** Students effectively gather, assess and utilize data to understand, improve and communicate business decisions using Excel and other analytical tools.
- Communication:** Students communicate business ideas effectively through written communications, oral communications and presentations, and digital media.
- Critical Thinking:** Students utilize information and research findings to analyze problems and determine appropriate solutions.
- Business Ethics:** Students apply ethical frameworks to evaluate situations and determine appropriate solutions.
- Cultural Adaptability:** Students recognize and apply knowledge and diversity within and across individual and groups.
- Professionalism:** Students exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

Admission Requirements: School of Business

The requirements for admission into the undergraduate School of Business programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in

the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the **Admissions** page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Suggested Transfer Curriculum for BS in Finance

A minimum of 60 credits is required for transfer into the BS in Finance program. Below is a sample plan of study for the first two years prior to matriculation at Quinnipiac University.

Minor in Finance

Program Contact: Surya Chelikan (Surya.Chelikani@quinnipiac.edu)
203-582-3826

The tools you'll acquire as a finance minor can be applied in fields as varied as health care and technology, public policy and nonprofit work. A basic understanding of how to create budgets and analyze financial data is an appealing skill set—one that employers look for, and one that can help you in whichever career path you decide to pursue.

You'll examine issues of financial management, global investment, financial markets, financial technology and innovation, and corporate finance. And, while developing a foundation in these core areas, you'll have some flexibility to complement the program with one non-finance course. Our Terry W. Goodwin '67 Financial Technology Center is a great resource for exploring your interest in finance and offers opportunities to practice building financial models and analyzing real-time economic data.

Finance Minor Curriculum

Students wishing to minor in finance must complete 18 credits.

Code	Title	Credits
FIN 201	Fundamentals of Financial Management	3
Select five of the following six finance core courses:		15
FIN 310	Investment Analysis	
FIN 320	Financial Modeling	
FIN 325	Financial Analytics	
FIN 350	Financial Markets and Institutions	
FIN 360	Financial Statement Analysis	
FIN 380	Intermediate Corporate Finance	
Total Credits		18

Students may request permission to use one non-finance course to fulfill their minor requirements.

Department of Management

The mission of the Department of Management is to: 1) build students' core competencies in management through engaged learning and real-world application; 2) prepare students for successful careers in their chosen fields; and 3) empower students to use their knowledge, skills and abilities to positively contribute to their organizations and communities.

In particular, students completing a degree in Applied Business, Human Resource Management, Supply Chain Management, or Talent Management in Sports, eSports, or Entertainment are able to apply management systems to assess employee and organizational needs in different types of organizational environments; utilize qualitative and quantitative models, theories and concepts; communicate in written, oral and digital formats to management at any level; develop recommendations for improvement to organizational processes, practices or policies; demonstrate persuasion, empathy, fairness and an

ability to handle conflict when dealing with and responding to coworkers, supervisors, subordinates, customers or suppliers; and acquire advanced knowledge of theoretical underpinnings and current best practices in organizational processes. Students will be agents of change in the workplace by implementing modern, agile workplace strategies.

- Bachelor of Science in Applied Business (p. 342)
- Bachelor of Science in Human Resource Management (p. 344)
- Bachelor of Science in Supply Chain Management (p. 345)
- Bachelor of Science in Talent Management (p. 347)
- Minor in Management (p. 349)
- Minor in Health Care Management (p. 357)

Management (MG)

MG 110. Leadership Success Factors: Enhancing your Professionalism and Presence. 3 Credits.

As students graduate and enter the workforce, understanding professionalism helps them to navigate successfully in their career. This course is designed to help students to know their value and worth, both now and in the future. The course modules are developed to help students to increase their knowledge of human resource management best practices and gain confidence in knowing their negotiation position. Students gain awareness, skills and proficiency.

Offered: As needed

MG 112. A Cause and a Name: Building and Managing a Nonprofit. 3 Credits.

This course connects theory and practice by examining a variety of management strategies utilized in running nonprofit organizations. Course readings, discussions and videos cover strategic planning, writing and fulfilling mission statements, facilitating governance, designing effective fundraising tactics, evaluating programs, financial management, and legal responsibilities. The course also covers the formation of the nonprofit sector and its differences from the public and for-profit sectors. Students are strongly encouraged to undertake a volunteer experience with a nonprofit during the semester.

Offered: As needed

MG 120. Take Control of Your Life with Six Sigma. 3 Credits.

This course teaches the basic concepts of Six Sigma, which includes process and product improvement principals via minimizing variations and wastes. The methodology is often implemented in manufacturing and service companies, but can be applied to an individual's personal life as well. Through this course, students are able to explain the Six Sigma philosophy, use DMAIC (Define, Measure, Analyze, Improve and Control), define and mitigate variation in processes, and use root cause and Pareto analysis to take the control of a process.

Offered: As needed

MG 130. Art of Persuasion and Negotiation. 3 Credits.

Every day, people negotiate with friends, family members, merchants, co-workers, and potential or current employers about matters big and small such as household chores, work schedules, salaries and purchases of items like cars and homes. However, many people do not feel comfortable negotiating and therefore shy away from starting a negotiation even if it means losing an opportunity to better their lives. In this interactive course, students evaluate their personal strengths and weaknesses in negotiations, recognize commonly used manipulative negotiation tactics used by difficult negotiators, learn strategies to prepare for negotiations and to ethically influence and persuade people to move in their direction, and learn to effectively negotiate creative deals that are satisfying for all involved parties.

Offered: As needed

MG 202. Sports Leadership. 3 Credits.

This course offers an opportunity for students to explore leadership as a crucial component of success in several contexts, including sports business. Some of the questions this course examines include: How are good leaders developed? What makes a leader successful? How do organizational and situational factors influence leadership? Students explore various leadership theories and topics including leadership development, ethics, motivation, communication, diversity and gender within the context of sports business.

Offered: As needed

MG 205. Organizational Management. 3 Credits.

This course introduces the principles of management, covering concepts such as organizations, leadership, and operations. This course prepares students to better understand the management and operations of organizations by integrating management concepts with the student's professional and academic interests. Inspired focus on the importance of developing empathetic, balanced, and transparent leaders. Developing culturally competent, technically savvy individuals that contribute towards the greater good in any organization. Whether the focus is on increased efficiency through trained human capital or advances in organizational processes, the course will prepare students to effect change immediately. Students may not receive credit for MG 105, MG 210 and MG 205.

Offered: Every year, All

UC: Breadth Elective, University Curriculum Ele

MG 211. Operations and Supply Chain Management. 3 Credits.

The nature of competition is not between companies but rather between supply chains. This course focuses on the operations in a supply chain framework. Students develop a sophisticated understanding of supply chain perspectives and learn to analyze operational decisions using quantitative models. Topics may include, but are not limited to: purchasing, forecasting, inventory, capacity-planning and information technology.

Prerequisites: Take MA 170 or MA 176 or Take EC 272, MA 206, MA 275 MA 285 or PS 206.

Offered: Every year, All

MG 300. Special Topics. 3 Credits.

Offered: As needed

MG 301. Group and Virtual Team Processes. 3 Credits.

Students gain advanced knowledge of best practices related to effective group processes. This course provides a hands-on, experiential approach to the development of personal and interpersonal competencies that prepare students to excel at working in cross-functional as well as multicultural teams. Contemporary issues related to groups such as virtual teaming also are explored.

Offered: As needed

MG 302. Managing People, Projects and Change. 3 Credits.

The course provides a foundation of human resource management practices including: staffing, employment law, training and development, compensation and benefits. Understanding alternative approaches to managing people, strategic projects and organizational change. In addition, the course focuses on creating agile leaders that are mindful, flexible, resilient and cognitively ready to use project management methodologies in the workforce.

Prerequisites: Take MG 105 MG 205 or MG 210.

Offered: Every year, Fall and Spring

MG 303. Immersive Leadership Experience. 3 Credits.

You will work with a mentor in an immersive leadership experience on a hands-on project that matters to you as you enhance your creativity, critical thinking, and interpersonal skills while having high community impact. What experiences have helped you to grow as an individual? Do you have a passion project you'd like to lead? What impact would you like to make? This course helps you explore your personal and professional growth while at QU and enables you to express your achievements to others in meaningful ways. Through experiential learning opportunities, coupled with reflective faculty advising, you'll be empowered to transform what you've learned into something tangible that you can share with others to make employers and graduate schools sit up and take notice. Instructor consent required.

Prerequisites: Take EN 101;

Offered: As needed, Fall

UC: Breadth Elective

MG 304. Software Applications for Business. 3 Credits.

The course instructs students on the importance of using data to empower informed business decisions. Using Excel, Access and SQL, the course focuses on both the conceptual and technical aspects of designing systems to help managers turn raw data into information.

Prerequisites: Take MG 105 MG 205 or MG 210.

Offered: As needed

MG 305. Applied Design Thinking. 3 Credits.

This course uses experiential learning to introduce concepts of design thinking. Students gain hands-on knowledge by using a design thinking process to address real-world problems. Students develop creative thinking and design skills that can be used for both business and non-business organizations.

Prerequisites: Take MG 105 MG 205 or MG 210.

Offered: Every year, Fall

MG 306. Staffing: Recruitment, Selection and Placement. 3 Credits.

In this course, students learn how to design and carry out various staffing activities effectively within labor market and legal constraints. Staffing activities include recruitment (whom to recruit, where and when to recruit, and how to recruit); selection (whom to hire and why); and placement (in which jobs, at what time, and in what career progressions).

Prerequisites: Take MG 302.

Offered: Every year, Fall

MG 307. Introduction to Nonprofit Management. 3 Credits.

This course connects theory and practice by examining a variety of management techniques utilized in running nonprofit organizations. Course readings, discussions and videos cover strategic planning, writing and fulfilling mission statements, facilitating governance, designing effective fundraising tactics, evaluating programs, managing finances, and legal responsibilities. The course also covers the formation of the nonprofit sector and its differences from the public and for-profit sectors. The class format consists of interactive discussions and applied projects/group work designed to help students understand the nonprofit sector and nonprofit management. Students are strongly encouraged to undertake a volunteer experience with a nonprofit during the semester.

Offered: As needed

MG 308. Women in Leadership. 3 Credits.

This course examines challenges and opportunities related to women's leadership development. Topics addressed include research on gender and leadership styles, traits, and effectiveness; effects of stereotypes, prejudice, and discrimination on women's under-representation in leadership; identity and intersectionality of women's leadership; and strategies for systemic change. The course includes discussion, reflection, and guest speakers. This course provides students with an analytic framework to understand the mechanisms that generate gaps in gender equality in positions of power and leadership and explore interventions to close these gaps.

Offered: As needed

MG 311. Advancing Employment Relations. 3 Credits.

The objective of this course is to enable students to evaluate HR policies against principles of employment law and labor relations. Students learn about laws and policies designed to protect equal employment opportunities (e.g., civil rights, disabilities and family leave) and compensate employees for occupational injuries and illnesses. The impact of management on labor relations and the development of managerial approaches to achieve labor-management cooperation are discussed using an ethics and social responsibility lens.

Prerequisites: Take MG 302.

Offered: Every year, Spring

MG 312. Sports Management. 3 Credits.

This course offers an opportunity for students to gain information and understanding of the various practices and procedures associated with sport administration and management. Organizational structure, management decisions and challenges, as well as career opportunities at the professional, intercollegiate, interscholastic, youth and community sport levels are explored. The areas of sports tourism, sport management agencies and sport facility and event management are analyzed in terms of their impact on the management and business of sports.

Prerequisites: Take MG 105 MG 210 or MG 205.

Offered: Every year, Fall and Spring

MG 320. Emotional Intelligence in the Workplace. 3 Credits.

This course provides the student with an understanding of the role of emotional intelligence in everyday living and in the development of the leadership phenomenon. Topics include: anatomy of emotions; emotional intelligence and self-management; the role of emotional intelligence in business and in leadership development; education for emotional literacy; and assessing emotional intelligence.

Offered: Every year, Fall

MG 321. Data-Driven Decision Making. 3 Credits.

This course develops fundamental knowledge and skills for applying management science models to business decision making with applications in Human Resource Management and Operations across manufacturing, service, production, and other environments. Topics may include: optimization and simulation modeling, decision analysis, regression and risk models. In depth use of Excel and/or R.

Prerequisites: Take MG 105 or MG 210 or MG 205 and MG 211.

Offered: Every year, Fall and Spring

MG 325. Negotiations and Problem Solving. 3 Credits.

Negotiation is the art and science of securing agreements between two or more interdependent parties. Hence, the purpose of this course, which is grounded in the major concepts and theories of bargaining, negotiation, and mediation, is to develop an understanding of the decision making process in situations that require two or more people to jointly solve a problem that they can't solve on their own. The course covers both psychological and strategic dynamics of negotiation and utilizes a combination of simulations and analysis to help students build their own personal experience in the classroom and in the real world.

Offered: Every year, Fall and Spring

MG 330. Business and Society. 3 Credits.

This course aims to introduce students to how business ethics shapes the decision-making process. Students will review how for-profit, and non-profit organizations interact with society and how legal and political environments can impact business. In the course, students will review elements necessary to make ethical decisions by defining the key definitions, issues, and theories of business ethics. Through class discussions and case studies, students explore the theoretical foundations of business ethics and learn how to develop an ability to recognize and address ethical questions. This course helps students learn how to address complex problems and develop decision-making skills to help implement meaningful change and contributions.

Prerequisites: Take SB 101, BLW 221.

Offered: As needed

MG 335. Project Management. 3 Credits.

This course addresses the project management processes of initiation, planning, executing, monitoring, controlling, and closing. Topics include: integration, scope, schedule, cost, communications, risk, quality, human resources, procurement management, and stakeholder management. Project management competencies, skills, and tools are applied to more efficiently and effectively execute real world projects.

Prerequisites: Take MG 105 or MG 205 or MG 210; and MG 211.

Offered: Every year, Fall and Spring

MG 340. Transportation and Logistics Management. 3 Credits.

This course introduces the strategies, concepts, and techniques of logistics from a supply chain management perspective. Students examine the firm as a complete business operating within an integrated network of suppliers, customers, and logistics activities. Topics include transportation, distribution, supply chain networks, carrier selection, management of incoming supplies and services, storage, and sustainability.

Prerequisites: Take MG 211 or IER 360.

Offered: Every year, Spring

- MG 341. Service Operations Management. 3 Credits.**
This course examines the management of services, focusing on both the strategic and operational aspects of designing new services, assessing and improving service quality, improving the efficiency and effectiveness of service processes, and how new technologies can be integrated into service operations to help achieve these objectives.
Prerequisites: Take MG 211 or IER 360.
Offered: Every year, Fall
- MG 342. Supply Chain Analytics. 3 Credits.**
This course focuses on key supply chain functions and provides hands-on learning to help students understand and analyze data that may be available for the supply chain. The design aspect of supply chain is emphasized. Modeling and deriving insights are facilitated through extensive use of Excel.
Prerequisites: Take MG 211 or IER 360.
Offered: As needed
- MG 343. Procurement and Sourcing. 3 Credits.**
This course explores procurement and sourcing from a supply chain perspective. Students gain an understanding of the procurement process within a global context by applying tools and techniques involved in the purchasing process. Topics include (but are not limited to) the procurement process, strategic sourcing, strategic, tactical and operational issues in procurement decision making, ethics in procurement, buy vs. make decisions, supplier selection and evaluation, supplier development, e-procurement, etc.
Offered: Every year, Fall
- MG 345. Training and Development. 3 Credits.**
Today's ever-changing global marketplace is marked by continual advancements in technologies and associated management processes. In response, HR professionals must create learning environments to expand the knowledge-based capacities of organizations. In this course, students learn how to conduct needs assessments, how to design effective training and development programs to meet those needs and how to evaluate the returns to investments in training and development against organizational goals.
Prerequisites: Take MG 302.
Offered: Every year, Fall
- MG 355. Compensation and Benefits. 3 Credits.**
This course provides students with an understanding of compensation and salary administration in both private and public settings. Additional topics include performance management, pay for performance, employee benefits and overall employee satisfaction. This course provides students with the introduction to compensation analysis skills along with an understanding of best practices in implementing an effective total compensation program in an organization.
Prerequisites: Take MG 302.
Offered: Every year, Spring
- MG 360. Power and Politics of Leadership. 3 Credits.**
A fundamental component for success as a leader is developing a clear understanding of power and influence processes and knowing how to act on that knowledge. The central theories and strategies of leadership within an organizational context are reviewed. Individual expectations and values are considered in terms of their impact upon leading other organizational members. Recent leadership research, practice and experience are examined as a challenge for leaders of the 21st-century business organization.
Offered: As needed
- MG 399. Independent Study In Management. 3 Credits.**
Study designed jointly by student and sponsoring faculty. Permission of adviser and chair required.
Offered: As needed, All
- MG 402. Management Senior Seminar. 3 Credits.**
This course is the culminating course in the supply chain major and the human resource management major, which develops students as whole managers and leaders capable of applying and excelling at technical, human and conceptual skills. Students exhibit the skills needed to analyze, integrate and communicate information both in written and oral formats. Students apply concepts and theory relevant to organizational and individual management. Students think critically when solving organizational issues while being mindful of technology, relevant research and practical application.
Corequisites: Take MG 302, MG 321, MG 325.
Offered: Every year, Spring
- MG 488. Management Internship. 3 Credits.**
This student-in-residence program includes work experience under the joint supervision of a sponsoring faculty and practicing manager or business owner. Approval of a sponsoring faculty member, the department chair and the assistant dean is required. This course is graded on a pass/fail basis.
Prerequisites: Take MG 210 or MG 205 or MG 211.
Offered: Every year, All
- MG 603. Project Management. 3 Credits.**
This course goes beyond basic Project Management (PM) competencies for students to learn technology, tools, and techniques applicable in any industry and career. This course decomposes the technical and managerial challenges associated with the field of PM. Students learn how these skills can be applied to produce business/organizational results that require collaborative relationships, leadership, integration, and execution. Students can receive credit for only one of the following courses: MG 603, OL 640 and BAN 669.
Offered: As needed
- MG 611. Designing Mentoring and Coaching Programs. 3 Credits.**
This course explores the theories and applications of employee development, mentoring and coaching. Students gain experience in the design, development and operation of formal mentoring and coaching programs in organizations. Return on investment of mentoring and coaching programs and empirically supported best practices are discussed.
Offered: As needed
- MG 639. Special Topics. 3 Credits.**
Offered: As needed
- MG 641. Supply Chain Resilience. 3 Credits.**
This course offers an integrated view of analytical decision making in organizations considering supply chain resilient systems that include suppliers, manufacturers, warehouses, transportation, retailers, and services providers. Using current business issues and cases, the course emphasizes on students' analytical skills of evaluating a firm's supply chain resilience and students' problem-solving abilities to propose potential resolutions.
Prerequisites: Take MBA 635.
Offered: As needed

MG 642. Logistics Management.**3 Credits.**

Logistics ensures the flow of raw materials and finished products in a supply chain. Given the global commerce, the flow of materials has increased the size and complexity of logistical operations. In this course, students develop an understanding of functional areas of logistics: order processing, transportation, inventory, warehousing, materials handling and packaging and facility design. Within these functional areas, students learn to analyze the trade-offs involved with key decisions. The course strongly emphasizes the use of analytical models and methods for the decision-making process. Excel is the platform considered for decision-making purposes.

Offered: As needed**MG 643. Strategic Sourcing and Supply Management.****3 Credits.**

This course explores strategic sourcing and supply management in the industrial purchasing cycle for operating supplies, raw materials, components and services. The course includes the use of Excel-based analytical models and methods to enhance the decision-making process. Topics include strategic issues relating to the procurement decision process including supplier selection and evaluation, supplier development, make-versus-buy decision, JIT purchasing, e-purchasing and the interrelationships between purchasing and other areas of the organization and the supply chain.

Prerequisites: Take MBA 635.**Offered:** As needed**MG 688. Independent Study - Management.****3 Credits.**

Requires permission from a faculty sponsor and from the MBA director and School of Business dean.

Offered: As needed, All

Bachelor of Science in Applied Business

Program Contact: Julia Fullick-Jagiela (Julia.Fullick-Jagiela@qu.edu)
203-582-5034

The Bachelor of Science in Applied Business program aims to prepare industry-ready graduates to identify, describe, analyze and resolve business problems in the private and public sectors. Graduates of the program possess the capacity to apply interdisciplinary knowledge and skills to practical business situations to thrive in a dynamic and increasingly technology driven business environment. The program prepares students to transition into positions in diversified industries such as manufacturing, technology and services, advertising and sales, financial, investment and insurance services, supply chain and distribution and corporate services. Furthermore, the program integrates core business courses with major field coursework and emphasizes professional development, analytical skills, communication skills, critical thinking skills and cultural adaptability through internship opportunities.

BS in Applied Business Curriculum

Students majoring in applied business are required to complete 122 credits.

Student Learning Outcomes

Students who graduate with a Bachelor of Science in Applied Business will demonstrate the following proficiencies:

- Business Knowledge:** Students apply basic business theories and concepts to understand and solve business problems.
- Business Analytics:** Students effectively gather, assess and utilize data to understand, improve and communicate business decisions using Excel and other analytical tools.
- Communication:** Students communicate business ideas effectively through written communications, oral communications and presentations, and digital media.
- Critical Thinking:** Students utilize information and research findings to analyze problems and determine appropriate solutions.
- Business Ethics:** Students apply ethical frameworks to evaluate situations and determine appropriate solutions.
- Cultural Adaptability:** Students recognize and apply knowledge of diversity within and across individual and groups.
- Professionalism:** Students exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

Admission Requirements: School of Business

The requirements for admission into the undergraduate School of Business programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the **Admissions** page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Suggested Transfer Curriculum for BS in Applied Business

A minimum of 60 credits is required for transfer into the BS in Applied Business program. Below is a sample plan of study for the first two years prior to matriculation at Quinnipiac University.

Bachelor of Science in Human Resource Management

Program Contact: Julia Fullick-Jagiela (Julia.Fullick-Jagiela@qu.edu)
203-582-5034

Driven by powerful changes in the business environment, organizations of all types—from start-ups to multinationals, not-for-profit to governmental, local to global—are demanding strategic leadership from human resource professionals. Today, the breadth and depth of business knowledge, as well as the mastery of management skills required of HR professionals, are unprecedented.

The Bachelor of Science in Human Resource Management teaches students to be agents of change in the workplace by implementing modern, agile workplace strategies. They also learn how to ensure the sustained positivity and productivity of an organization's most valuable component: people. Competent, culturally sensitive and highly organized, human resource specialists add significant value to any organization and display competence in an array of specialized areas, including employee and labor relations; compensation and benefits; training and development; HR analytics; and diversity, equity and inclusive excellence.

The degree program is fully aligned with the HR curriculum recognized by the Society for Human Resource Management (SHRM) and prepares students for positions such as HR generalist, as well as roles in training and development, staffing and recruitment, HR information systems (HRIS), diversity, equity and inclusion, compensation and benefits. The program integrates core business knowledge with major field coursework and emphasizes professional development, negotiation skills, analytical skills, communication skills, leadership development and legal understanding

BS in Human Resource Management Curriculum

Students majoring in human resource management are required to complete 122 credits.

Bachelor of Science in Talent Management

Program Contact: Tuvana Rua (Tuvana.Rua@qu.edu) 203-582-7485

The Bachelor of Science in Talent Management aims to prepare industry-ready graduates in the fields of sports, eSports or entertainment. With three unique tracks designed to teach students the business side of sports, eSports or entertainment, the program equips students with the necessary skill set to successfully manage the behind-the-scenes functions, such as marketing, finance, facility management, and event management relying on data and technology. Furthermore, the program helps students develop management and leadership skills and apply them to professional and amateur sports, eSports or entertainment settings. Finally, the program provides opportunities for professional development, analytical skills, communication skills, critical thinking skills and cultural adaptability through applied course projects and internship opportunities.

Minor in Management

Program Contact: Julia Fullick-Jagiela (Julia.Fullick-Jagiela@qu.edu)
203-582-5034

Whether you plan to work at a startup, a large business or a nonprofit, having the skills to guide your staff through the challenges of a modern working environment will make you a valuable asset in any field. Our management minor gives you the foundational skills and knowledge to assess employee and organizational needs, develop effective communication practices and conflict resolution skills to ensure that employees are content and effective members of a team. You also will gain a broad perspective on how businesses operate efficiently.

This program can be largely customized. Of the six courses you'll take to complete the minor, only one—Essentials of Management & Organizational Behavior—is required. You are free to choose the remaining five from courses that explore key areas such as supply chain management, human resources and project management.

Management Minor Curriculum

The minor in management requires a total of 18 credits.

Department of Marketing

The Department of Marketing seeks to empower students with the knowledge and tools necessary to compete successfully in today's challenging global business environment. Ethical considerations, international aspects and cultural diversity topics are included throughout the department's programs of study. The department aims to offer high-quality teaching and a small-group learning environment. Through a variety of classroom and internship experiences, and global exchange programs, majors are prepared to apply academic concepts to business situations and also to use them as personal resources in planning their future. In addition, students are prepared to enhance their knowledge of the field through active pursuit of lifelong learning. In support of these objectives, the department offers resources to carry out and enhance faculty activities such as classroom teaching, supervision of internships and independent studies, individual and club advising,

professional development, research and the ongoing development of these majors.

- Bachelor of Science in Marketing (p. 353)
- Bachelor of Science in Biomedical Marketing (p. 352)
- Minor in Marketing (p. 356)

Marketing (MK)

MK 201. Marketing Principles. 3 Credits.

This course surveys marketing from the decision-making point of view, with emphasis on the conceptual and analytical components of the subject, and a synthesis of new marketing concepts with economics, behavioral sciences and mathematics.

Offered: Every year, All

MK 210. Consumer Behavior and Marketing Communications. 3 Credits.

Consumers play a central role in determining the fate of the firm's marketing efforts. This course draws on theories from psychology, sociology, anthropology and economics to understand consumption behaviors of individuals and groups. Current models of consumer behavior are surveyed, and students consider the strategic implications of marketing communications.

Prerequisites: Take MK 201.

Offered: Every year, Fall and Spring

MK 300. Special Topics in Marketing. 3 Credits.

Special Topics in Marketing

Offered: As needed

MK 301. Internet Marketing. 3 Credits.

This course explores the rapidly evolving world of Internet marketing and examines the strategies and tactics that firms can use to utilize the Internet as an effective marketing tool. Students discuss search engine marketing, social media tools, web site design and Internet advertising. The course also examines the role of the Internet as a channel of distribution

Prerequisites: Take MK 201.

Offered: Every year, Spring

MK 312. Advertising. 3 Credits.

Current practices in advertising including strategy and planning, copy and layout, media selection and scheduling, and budgeting are examined. Advertising is considered from the inception of researched ideas and concepts through the completed presentation. Students gain experience in creating advertisements for the major media.

Prerequisites: Take MK 201.

Offered: Every year, Fall

MK 315. Media Planning. 3 Credits.

This course considers strategic media planning and its role in advertising and marketing. Emphasis is on the strategic and creative selection, scheduling and evaluation of traditional and non-traditional media vehicles to effectively and efficiently deliver advertising messages to target audiences. Students examine the relative strengths of various media and scheduling options for advertising both goods and services, and learn tools and techniques used to analyze media opportunities (e.g., computerized allocation software and/or other modeling techniques). Students gain hands-on experience through development of a media plan.

Prerequisites: Take MK 201.

Offered: As needed

- MK 320. Marketing Research. 3 Credits.**
Students learn to understand and satisfy marketing managers' information needs: demand potential, competition, regulations and accepted procedures in relevant business/geographic areas. The course covers research design, quantitative and qualitative data collection, data analysis and implications of results. Written/oral reports are expected. This methodological course assumes a basic understanding of marketing in a global environment.
Prerequisites: Take MK 201 and one course from: MA 170, MA 206, MA 275 EC 272 or PS 206.
Offered: Every year, Fall and Spring
- MK 321. Marketing Analytics. 3 Credits.**
Topics covered in this course include market segmentation, marketing mix analysis, product bundle optimization and social network analysis. Students are introduced to the basics of effective visual presentation of quantitative information. Weekly assignments with real business data allow students to explore a variety of analytic techniques and answer actual problems. Students leave with a knowledge of a variety of advanced techniques, in-demand analytic reasoning skills and an understanding of methodological debates, trade-offs and resource allocation for data projects.
Prerequisites: Take MK 320
Offered: Every year, Fall and Spring
- MK 322. Advanced Research Methodologies and Analytical Techniques. 3 Credits.**
This course addresses advanced research methodologies and analytical techniques used in marketing and user experience research. Topics include experimental design and advanced data-analysis techniques. Students develop practical skills in the analysis of survey and experimental data and gain hands-on experience with state-of-the-art technologies.
Prerequisites: Take MK 320;
Offered: As needed
- MK 324. Business-To-Business Marketing. 3 Credits.**
This course examines the development of marketing strategies of firms that market to other firms or organizations. Integrating characteristics that distinguish business markets from consumer markets throughout the semester, topics include unique aspects of selecting target markets and elements of the marketing mix. Cases, projects, articles and exercises stress the problems facing actual business marketing firms today.
Prerequisites: Take MK 201.
Offered: Every other year, Spring
- MK 326. Fashion Marketing. 3 Credits.**
This course introduces students to many facets of the fashion industry from the design of a product through the consumer purchase. The class covers several fashion-related topics including design elements; fashion psychology and consumer behavior; social media marketing; sustainable and ethical sourcing and disposal; fashion financials and analytics; retail merchandising and global fashion supply chains. Students also get to participate in an experiential project designed to allow them to create a marketing plan for a fashion business idea.
Prerequisites: Take MK 201.
Offered: Every year, Fall
- MK 327. Fashion Buying and Merchandising. 3 Credits.**
This course provides students with an understanding of the core functions of buyers and merchandisers in the fashion and beauty industry. Contemporary practices in design, buying, merchandising, importing and exporting, global supply chain management, and retail management are examined. Students learn to forecast trends by applying the data-driven analytics techniques used by professionals in the industry. The course relies on experiential learning activities to help students develop expertise in buying and merchandising.
Prerequisites: Take MK 201;
Offered: As needed
- MK 332. Advertising and Integrated Brand Promotion. 3 Credits.**
This course focuses on theory, application and practice of strategic marketing communications. Current practices in integrated brand promotion are examined including the strategic application of advertising and other promotional tools. Strategy and planning, copy and layout, media selection and scheduling, and budgeting are examined. Students gain experience in traditional and digital media.
Prerequisites: Take MK 201.
Offered: Every year, Fall and Spring
- MK 333. Digital Marketing and Electronic Channels of Distribution. 3 Credits.**
Digital marketing is rapidly evolving, and technological advances are changing channels of distribution in fundamental ways. This course examines the strategies and tactics that firms utilize to engage customers through digital, mobile, and search engine marketing. The strategic use of social media is explored. The role of the Internet as a channel of distribution is considered including the roles of channel members, channel performance evaluation, and logistics.
Prerequisites: Take MK 201.
Offered: Every year, Fall
- MK 334. Product, Pricing and Distribution Strategy. 3 Credits.**
New product development and strategic product management are examined. The design, evaluation and management of distribution channels are considered. Students learn to integrate economic, financial, legal and marketing principles to develop pricing strategy and evaluate the behavioral implications of pricing decisions.
Prerequisites: Take MK 201.
Offered: Every year, Spring
- MK 350. Marketing History. 3 Credits.**
This seminar examines the development of modern marketing in America from the mid-19th century through the 20th century. The course focuses on how pioneering entrepreneurs such as Kellogg, Sears, Heinz, Hershey and others created brands that became household names and in the process revolutionized marketing practice. Students discuss assigned readings, films and field trips. Research assignments and a term paper also need to be completed.
Prerequisites: Take MK 201.
Offered: As needed
- MK 355. Services Marketing. 3 Credits.**
This course examines how marketing principles are applied to the management of service business, including health organizations. Topics include: definition of services, services as products, managing the service encounter, buyer behavior and customer relations, service quality, marketing and human resources management, service accessibility, pricing of services, promotion of services, and international marketing of services.
Prerequisites: Take MK 201.
Offered: As needed

MK 362. Sustainability, Marketing and Corporate Social Responsibility. 3 Credits.

Consumption and marketing are considered in the context of sustainability. Principles of sustainability marketing and corporate social responsibility are introduced. Core marketing concepts are leveraged to address sustainable development while supporting business growth and competitive advantage. Career opportunities in sustainability marketing are explored.

Prerequisites: Take MK 201.

Offered: As needed

MK 364. Sports and Entertainment Marketing. 3 Credits.

The multi-billion-dollar, global industries of sports and entertainment marketing are examined. Fundamental marketing concepts are applied to the ever-evolving landscape of sports and entertainment. Strategic brand partnerships, sponsorships, licensing, and talent marketing initiatives are developed to meet marketing objectives. Career opportunities in sports and entertainment marketing are explored.

Prerequisites: Take MK 201.

Offered: Every year, Fall

MK 383. Professional Selling and Sales Management. 3 Credits.

The study and application of skills required to sell products, services or ideas. Emphasis is on the development of an effective sales presentation focusing on the needs of the consumer or organization. The course stresses the importance of knowing the company and its products as well as the selling environment and customer. In addition, the issues involved in managing a sales force are addressed. These include sales planning and forecasting, selection, recruitment, training and compensation of salespeople and integration with other elements of the marketing mix.

Prerequisites: Take MK 201.

Offered: Every year, Fall

MK 401. Marketing Practicum. 3 Credits.

This course is the capstone experience for marketing majors and focuses on the integration of contemporary marketing practices to develop comprehensive marketing strategies. Students develop critical decision-making skills through the application of analytical tools in case studies, simulations, and hands-on learning opportunities. Critical thinking, teamwork, and effective communication are emphasized. Senior Standing is required.

Prerequisites: Take MK 210 MK 320.

Offered: Every year, Spring

MK 405. Seminar in Biomedical Marketing Strategy. 3 Credits.

This course explores the unique aspects of marketing strategy in the biomedical industry from the perspective of biomedical firms, hospitals and government agencies. Topics include the purchase decision process, marketing research, product development and pricing strategy. Students gain current biomedical industry knowledge through articles, cases and completion of a marketing plan project in partnership with a biomedical firm.

Corequisites: Take MK 334.

Offered: Every other year, Spring

MK 488. Marketing Internship. 3 Credits.

This internship in marketing must be approved by the department chair and the dean in accordance with school regulations. Junior/senior status is required. This course is graded on a pass/fail basis.

Prerequisites: Take MK 201.

Offered: Every year, All

MK 495. Biomedical Marketing Internship. 3 Credits.

This internship is required of biomedical marketing majors and must be done with a company or institution that is related to biomedical products or services.

Prerequisites: Take MK 201.

Offered: Every year, All

MK 610. Research for Marketing and Business Decisions. 3 Credits.

The course provides a managerial approach to market research activities. The goal is to enable students to evaluate market research projects and to interpret and apply research information toward marketing decisions. The research process is discussed and qualitative as well as quantitative methodologies are systematically reviewed. Attention is paid to how to analyze and present research findings.

Prerequisites: Take MBA 645.

Offered: As needed

MK 612. New Product Marketing. 3 Credits.

This course introduces students to the specialized areas, within marketing management, of product development, brand management and pricing strategy. The primary topic of the course is new product management. This includes strategic planning, idea generation, business analysis, design, testing and introduction of new products to market. Related topics are issues in brand management and pricing strategy and tactics.

Prerequisites: Take MBA 645.

Offered: As needed

MK 615. Managing Marketing Channels. 3 Credits.

This is an introduction to the design, evaluation and management of distribution channels. Topics include strategic issues in designing distribution channels, channel member roles, managing channel conflict, evaluation of channel performance, motivation of channel members, managing a hybrid mix of traditional and non-traditional channels, and channel logistics (transportation, inventory, materials handling and information management).

Prerequisites: Take MBA 645.

Offered: As needed

MK 616. Digital Marketing. 3 Credits.

This course introduces students to topics and issues employed by marketing managers as they develop and implement their digital marketing strategies. Topics include; marketing analytics, digital business models, digital marketing channels, search engine marketing, social media and mobile marketing. The class incorporates experiential learning opportunities which enable students to bridge the gap between marketing theory and managerial practice.

Prerequisites: Take MBA 645.

Offered: As needed

MK 619. Marketing Analytics. 3 Credits.

Topics covered in this course include market segmentation, marketing mix analysis, product bundle optimization and social network analysis. In addition, students are introduced to the basics of effective visual presentation of quantitative information. Weekly homework with real business data allows students to explore a variety of analytic techniques and answer actual problems. Students leave with a knowledge of a variety of advanced techniques, in-demand analytic reasoning skills, and an understanding of methodological debates, trade-offs, and resource allocation for data projects.

Prerequisites: Take MBA 645.

Offered: As needed

MK 620. Applied Consumer Behavior Research. 3 Credits.

This course provides a basic understanding of the major concepts and theories in consumer decision-making and behavior and how these can be used as the basis for empirical research on the way consumers process information, form preferences and make buying choices. This is a course in which theories from psychology, sociology and economics are applied to the study of consumer behavior.

Prerequisites: Take MBA 645.

Offered: As needed

MK 697. Special Topics in Marketing. 3 Credits.

This special topics course includes treatment level of one or more issues in marketing. Subject matter varies at each course offering depending upon the interest of students and faculty, and changes in the marketplace.

Offered: As needed

Bachelor of Science in Biomedical Marketing

Program Contact: Charles Brooks (charles.brooks@qu.edu)
203-582-8333

The marketing of biomedical products, including pharmaceuticals, is a fast growing industry, and a large number of companies specializing in biomedical sciences are located in the Northeast, many in Connecticut. The department offers a degree in biomedical marketing, aimed at satisfying the need for students with knowledge of the fundamentals of marketing as well as an understanding of the science behind the development of biomedical products. At completion of the program, a Quinnipiac graduate has a degree unique among colleges and universities in the Northeast. Our graduates find jobs in the marketing departments of pharmaceutical companies and biotechnology firms, as medical sales representatives, marketing diagnostic testing products to laboratories or medical equipment to hospitals and clinics, or marketing over-the-counter drugs for consumer product companies.

BS in Biomedical Marketing Curriculum

The Bachelor of Science in Biomedical Marketing requires the completion of 121 credits as outlined here:

Student Learning Outcomes

Upon completion of the program, students will achieve the following competencies:

- Business Knowledge:** Students apply basic business theories and concepts to understand and solve business problems.
- Business Analytics:** Students effectively gather, assess and utilize data to understand, improve and communicate business decisions using Excel and other analytical tools.
- Communication:** Students communicate business ideas effectively through written communications, oral communications and presentations, and digital media.
- Critical Thinking:** Students utilize information and research findings to analyze problems and determine appropriate solutions.
- Business Ethics:** Students apply ethical frameworks to evaluate situations and determine appropriate solutions.
- Cultural Adaptability:** Students recognize and apply knowledge of diversity within and across individual and groups.
- Professionalism:** Students exhibit professional behavior, including a strong work ethic in their classes, in their interactions with faculty, staff and colleagues, and in their team assignments.

Admission Requirements: School of Business

The requirements for admission into the undergraduate School of Business programs are the same as those for admission to Quinnipiac University.

Admission to the university is competitive, and applicants are expected to present a strong college prep program in high school. Prospective first-year students are strongly encouraged to file an application as early in the senior year as possible, and arrange to have first quarter grades sent from their high school counselor as soon as they are available.

For detailed admission requirements, including required documents, please visit the [Admissions](#) page of this catalog.

Seamless Transfer Agreement with Gateway Community College (GCC), Housatonic Community College (HCC) and Norwalk Community College (NCC)

Under this Transfer Agreement, GCC, HCC and NCC graduates will be guaranteed admission into a bachelor's degree program with third year (junior) status at Quinnipiac University on the condition that they:

- Graduate with an associate in arts, an associate in science in business, College of Technology engineering science, nursing or an allied health degree with a minimum cumulative GPA of 3.0 (this may be higher in specific programs).
- Satisfy all other Quinnipiac University transfer admission requirements and requirements for intended major.

Suggested Transfer Curriculum for BS in Biomedical Marketing

A minimum of 60 credits is required for transfer into the BS in Biomedical Marketing program. Below is a sample plan of study for the first two years prior to matriculation at Quinnipiac University.

Bachelor of Science in Marketing

Program Contact: Charles Brooks (charles.brooks@qu.edu)
203-582-8333

The Bachelor of Science in Marketing is designed to provide students with a comprehensive understanding of marketing concepts and practices. The marketing major combines core business courses with specialized marketing concentrations that position students for careers across multiple industries.

Quinnipiac's student chapter of the American Marketing Association provides students with opportunities to network with business professionals and gain hands-on experience working on industry projects.

Students have access to a variety of state-of-the-art facilities including the Marketing Insights Lab, the Sales Center and Quinnipiac's Polling Institute. These facilities are integrated into the marketing curriculum to help students develop expertise that helps them stand out in the career market. Students are also encouraged to take advantage of internships and study abroad opportunities available to marketing students.

Marketing majors can generalize in marketing with the Marketing Management Concentration or specialize in:

- Digital, Mobile, and Social Media Marketing
- Fashion Marketing
- Sports and Entertainment Marketing
- Marketing Research and Analytics
- Sales and Negotiation

The Marketing Management Concentration is designed for students who want a broad-based coverage of marketing that can be applied to a wide range of career paths.

The Digital, Mobile, and Social Media Marketing Concentration is built on the foundation of the marketing core with specialized courses in digital marketing and marketing analytics. Within the concentration, students can take electives that align with their interests and career goals. Electives are available in mobile application development, web development, entrepreneurship and analytics.

The Fashion Marketing Concentration focuses on specialized courses in fashion marketing, fashion buying and fashion merchandising. Sustainability, brand promotion and digital marketing are important considerations in fashion. Electives in each of these areas are available

to students in the Fashion Marketing Concentration. Fashion electives can also be completed as part of a study abroad program.

The Sports and Entertainment Marketing Concentration is built on the marketing core with specialized courses in sports and entertainment marketing as well as brand promotion. Electives include selected courses from the Sports Studies minor such as Sports Law, Sports Management and Sports Economics.

The Marketing Research and Analytics Concentration is designed for students that want a marketing concentration with a heavier emphasis on quantitative methods. The concentration leverages the resources in the Marketing Insights Lab. Electives include Data Mining, Web Analytics, Social Media Analytics, Game Theory and Econometrics.

Sales is a common career path in marketing with many entry-level marketing positions in sales. The Sales and Negotiation Concentration includes courses in sales and business-to-business marketing, as well as electives in negotiations, communications, data visualization and leadership. The concentration leverages resources in the Sales Center.

Minor in Marketing

Program Contact: Charles Brooks (charles.brooks@qu.edu)
203-582-8333

Throughout modern history, the field of marketing has adapted and evolved with each new breakthrough in technology, from the printing press to radio to the Internet. And now with mobile technology and social media, marketing professionals can find an audience virtually anytime, anywhere, with some creative and innovative ideas. But the fundamentals of marketing aren't only useful for selling products. Those skills play a crucial role in politics, education and the nonprofit world as well.

This program will familiarize you with the essential concepts of marketing and consumer behavior, and you'll have the flexibility to tailor the minor to your interests by choosing half the courses you take from our diverse marketing curriculum. With the approval of the department chair, you can select classes that examine areas such as advertising, media planning, internet marketing and marketing history.

Marketing Minor Curriculum

The marketing minor requires the completion of 18 credits.

Code	Title	Credits
MK 201	Marketing Principles	3
MK 210	Consumer Behavior and Marketing Communications	3
MK 320	Marketing Research	3
Select 9 additional credits of marketing courses approved by the chair of the department		9

or POL 102	Elementary Polish II	
Total Credits		15

* Must be taken in Poland and could also fulfill the requirements of the SB 360 International Business Immersion.

** SB 360 (Travel to Poland) and IB 399 (Consulting with Polish Companies through the Central European Institute).

Minor in Business

Program Contact: TBD

Business acumen doesn't just apply to traditional business owners, marketing executives and financial planners. Sound judgment and the ability to make quick decisions are skills that translate to virtually every field and trade. The business minor gives you a broad understanding of the major disciplines at work daily in companies of all sizes and specialties. Whether you're an independent photographer, a website designer or a software engineer, you'll learn how to effectively market your services to stand out from the competition. Accounting skills enable you to better manage your own money and personal resources, while a working knowledge of finance and investment strategies may help you to one day turn a side passion into a viable business.

The business world is about more than just dollars and cents. Leadership qualities are universal, whether you're in a boardroom, classroom or operating room. Organizational skills, creative problem solving and an ability to assess strengths and weaknesses make you a valuable asset to a host of employers, and prepare you for future supervisory and management roles.

The minor in business is available to students outside of the School of Business who are enrolled in bachelor of arts or the bachelor of science programs. The intention of this minor is to provide students with a broad perspective of the disciplines that affect organizations.

Business Minor Curriculum

Students must complete the following four classes, in addition to any two business courses for which the student has completed the prerequisites.

Code	Title	Credits
AC 211	Financial Accounting	3
FIN 201	Fundamentals of Financial Management ¹	3
MG 205	Organizational Management	3
MK 201	Marketing Principles ¹	3
Select any two electives from business disciplines AC, BAN, BLW, CIS, ENT, FIN, HM, IB, MG, MK, SB		6
Total Credits		18

¹ Note: EC 111 is a prerequisite for FIN 201.

Minor in Health Care Management

Program Contact: Nitish Patidar (nitish.patidar@qu.edu) 203-582-7908

The minor in health care management provides students with a foundational understanding of healthcare systems and employment options in this exciting and growing field. The business of healthcare is everywhere: insurance companies, hospitals, clinical practices, branding firms, pharmaceuticals and medical devices. Regardless of the student's career focus, this minor expands their understanding of the language of healthcare systems and enhances job prospects in the healthcare industry. Students learn how healthcare systems are managed, the ways in which healthcare relies on analytics, and the influence of government policies on the business of healthcare. Additionally, students may customize their studies with coursework in finance, analytics, supply chain, or entrepreneurship and strategy.

Health Care Management Minor Curriculum

Students must complete the following four courses, in addition to any two business courses, for which the student has completed the prerequisites. A total of 18 credits are required.

Code	Title	Credits
Core		
HM 201	Introduction to Healthcare Management	3
HM 365	Health Care Analysis	3
HM 404	Legal Aspects of Health Care Delivery	3
MG 205	Organizational Management or MG 210	3

Code	Title	Credits
Students may choose any two electives ¹		6

School Overview

The School of Communications offers bachelor's degrees in advertising and integrated communications; film, television and media arts; graphic and interactive design; journalism; media studies; and public relations, as well as master's degrees in cinematic production management, interactive media and communications, journalism, public relations and sports journalism. The school also has well-established relationships with more than 1,000 private and nonprofit communications organizations, offering advanced students internship opportunities in professional settings. Students are encouraged to explore and advance their educational and professional interests while gaining the critical practical experience and training to develop a portfolio of work before they graduate.

To assist in the twin goals of offering our faculty a high-level view of innovations in the media world as well as offering our students high-quality internships and post-graduation employment, the school has created the Alumni Advisory Board (<https://www.qu.edu/schools/communications/alumni-advisory-board.html>), consisting of media leaders and executives.

On campus, students work in one of the finest university media education facilities in the Northeast — the Ed McMahon Communications Center. The center features a spacious, professional-level, all-digital 4K television studio; a media innovation classroom; 4K collaborative editing suites; and a 7.1 surround sound screening theater. The center is equipped with state-of-the-art technology, including numerous iMac stations running the latest applications for post-production and animation. It includes an automated podcast studio, and is staffed with highly skilled media professionals to instruct and assist our students. Additional classrooms and labs, along with the Quinnipiac University Podcast Studio, the Open-Air Production Studio, "The Agency" (a student-run integrated communications agency offering design, advertising and public relations services to clients), a design studio, a Remote Equipment Depot, the "Hub" student computer center, and independent study facilities are located in the Center for Communications and Engineering, which also houses the school's faculty and administrative offices.

Undergraduate Studies

School Requirements

Beyond the University Curriculum requirements, students pursuing a bachelor of arts degree in the School of Communications must complete the following:

- 9 credits in the school-wide core
- all major requirements (outlined below)
- a minor (typically 18 credits) to be chosen in consultation with the student's adviser
- 2 credits in the Seminars for Success: COM 101 and COM 201
- 6 credits in the area of "global issues and cultures." The School of Communications maintains a list of acceptable courses to satisfy this requirement.
- two additional courses outside the School of Communications, one of which must be at the 200 level or higher.
- *Note:* The BA and BFA degrees in film, television and media arts requires DR 150, DR 160 or DR 220 and one additional course outside the School of Communications at the 200 level or higher. Students pursuing the BFA degree are not required to complete a minor.

Academic Expectations: Students are expected to achieve a B- (2.67 GPA) or better in School of Communications courses during their first semester in the School of Communications. Students who do not meet this standard will be notified and are required to meet with a representative from the dean's office to address their academic progress and develop a plan for improvement.

Transfer Credits: The School of Communications accepts up to 18 transfer credits toward major requirements. Additional courses may apply to UC or elective courses as appropriate.

Advising

Academic advising in the School of Communications fosters a collaborative relationship between student and adviser. Our academic advising program is dedicated to guiding undergraduates in achieving intellectual and personal growth and preparing them for professional success in a diverse and changing global community. Faculty and staff of the School of Communications advise all students. During each student's undergraduate career, he or she is paired with a faculty adviser who will serve as a guide and mentor. Although the primary responsibility for course selection rests with the student, the adviser assists in reviewing the student's program plan and discussing course selection during a mandatory advising meeting each semester prior to course registration. Students are required to schedule and attend a meeting with their assigned adviser each semester by their advising deadline.

Note: The primary responsibility for the completion of all prerequisites for courses belongs to the student. Students who take courses without the proper prerequisites, or who complete the prerequisites after taking the courses, may lose credits toward their degree requirements. Students may not repeat a course for credit except to remove an F grade or, under special circumstances, to remove a C- or D grade in a school requirement, a prerequisite, or within the major.

Career Development

In the School of Communications, career development staff work with students to explore communications career interests and assist with application materials unique to communications industries such as

portfolios and resume reels. There is a strong focus on networking, particularly with alumni of the School of Communications, to prepare students to land internships and launch careers in fields that require specific searching techniques and rely heavily on referrals. Students learn about a variety of job structures from traditional full-time roles to freelance work common in some areas of industry. Staff play an integral part in the career curriculum of the school and are the instructors of both the Media Career Development course, required for all Communications students to graduate, and all credit-bearing internship courses.

Mission

The mission of the School of Communications is to educate communications professionals. We prepare active citizens with the tools to be self-reflective critical thinkers, creative problem-solvers, and transformative storytellers.

Values

The School of Communications faculty and staff believe that the voices of all people should be heard, and that any ensuing debate be based on considered thought and evidence and without any dehumanizing words or actions.

We believe that educating communications professionals must happen in an environment that is grounded in respect for different cultures and experiences.

We believe in justice, equality and compassion as principles that guide our decisions and actions.

We believe in practicing an ethics of care that responds to the needs of each individual in our community.

We believe that our curricula and classrooms should be inclusive spaces where everyone should feel comfortable to bring their whole selves.

We believe that students, faculty and staff should reflect the diversity of our society and that they should see themselves represented in the materials that we teach.

We acknowledge the institutionalized inequalities that limit access to higher education and the ways in which the School has benefited from them, including the indigenous land on which Quinnipiac University stands.

Commitment

The School reaffirms its commitment to equalizing access to education for all students and will provide resources, recruitment tools and programs to mitigate the challenges that marginalized students face in higher education.

The School will engage in a continual process of self-examination and adaptation that recognizes the ways in which we participate in and benefit from the current system.

The School will educate students who will be active citizens, eager to join in the building of democracy and equipped to identify and fight against injustice.

The School will regularly evaluate and inspect our curriculum to ensure it is inclusive and designed to provide students with the concepts and vocabulary they need to effectively communicate in a multicultural society.

The School will participate in a continuing process of growth that is transparent and accountable to all members of our community.

Bachelor of Arts

- Bachelor of Arts in Advertising and Integrated Communications (p. 403)
- Bachelor of Arts in Communications (p. 397) (Media Studies)
- Bachelor of Arts in Film, Television and Media Arts (p. 382)
- Bachelor of Arts in Graphic and Interactive Design (p. 387)

- Master of Arts in Cinematic Production Management (p. 720)
- Master of Science in Interactive Media and Communications (p. 722)
- Master of Science in Journalism (p. 723)
- Master of Science in Public Relations (p. 724)
- Master of Science in Public Relations - Online/Professional Track (p. 725)
- Master of Science in Sports Journalism (p. 726)

Dual-Degree Programs

- Dual-Degree Bachelor's/Master's in Cinematic Production Management (4+1) (p. 727)
- Dual-Degree Bachelor's/Master's in Interactive Media and Communications (4+1) (p. 729)
- Dual-Degree Bachelor's/Master's in Journalism (4+1) (p. 730)
- Dual-Degree Bachelor's/Master's in Public Relations (4+1) (p. 731)

- Dual-Degree Bachelor's/Master's in Sports Journalism (4+1) (p. 733)

Communications (COM)

COM 101. Communications First-Year Seminar. 1 Credit.

This first-semester course is designed to ease the transition to college and to acquaint first-year School of Communications students with timely and important resources and information. Students hear from faculty members in each of the departments within the School of Communications to learn more about the majors offered. Students also learn how to create their own success in college and as lifelong learners through development of important skills. Topics include effective communication, time management, study skills and degree requirements. This class is required of all first-year and transfer students entering with 0-26 college credits.

Offered: Every year, Fall and Spring

COM 120. Media Industries and Trends. 3 Credits.

This course introduces students to the structure, function, uses and social implications of media industries. Students examine the ways individual industries inform, entertain and influence media consumers. Significant focus is placed on media literacy. The course also surveys issues related to ownership, regulation, ethics and globalization. The main objectives of COM 120 are to help students understand media professions, industries and technologies in relation to key trends, including the increasing commercialization of media products, the consolidation and convergence of media industries, and the implications these processes hold for society. The course fosters the development of skills including the ability to access, analyze and properly cite sources for research on the media.

Offered: Every year, Fall and Spring

COM 130. Visual Design. 3 Credits.

This course introduces students to the design process using professional-level software for digital image creation and editing, typesetting and typography, page layout and design in preparation for advanced course work. Students produce course projects that demonstrate creativity, design concepts, critical thinking, aesthetic principles and basic technical competence.

Offered: Every year, Fall and Spring

COM 140. Storytelling. 3 Credits.

This survey course has been designed to reinforce grammatical standards of the English language while introducing students to the basic tenets of dramatic, journalistic and strategic writing. Through the examination of a single theme, students learn to tell stories using these three writing styles as they identify and connect with specified audiences.

Offered: Every year, Fall and Spring

COM 150. Public Speaking: Principles and Practice. 3 Credits.

This course examines the principles of oral communication and presentation skills and puts those principles into practice. Through multiple assignments, students increase their confidence in delivering presentations and demonstrate effective research skills, speech development and preparation, and delivery. Additionally, critical thinking and listening skills are demonstrated through oral and written critiques.

Offered: Every year, Fall and Spring

UC: Breadth Elective

COM 159. Communications Elective. 3 Credits.

COM 201. Media Career Development.**1 Credit.**

This course introduces students to the career development process and covers the skills needed to create a personal career plan. It includes topics such as self-assessment, career research, resume and cover letter preparation, networking and interviewing practice, as well as strategies for internship/job searches. Course material is geared specifically toward media/communication careers. The course is graded on a pass/fail basis. Students majoring in communications cannot count COM 201 toward their major electives.

Offered: Every year, Fall and Spring**COM 215. Social Media and Society.****3 Credits.**

The focus of this course is to provide students the foundational skills necessary to become "influencers" in the social space. Students evaluate the relationship of social media with various communication industries. They examine the rise of social media and its effect on social interaction and audience behaviors, and analyze social media strategies and their effectiveness from a personal and organizational perspective. Projects require students to engage with a variety of social media platforms and tools.

Offered: Every year, All**UC:** Breadth Elective**COM 301. Communications Career Practicum.****1 Credit.**

This course offers practical training in a communications-related occupation. Students complete a minimum of 40 hours of supervised fieldwork (paid or unpaid) in a professional setting. Practicum placements must be approved by the internship program director in accordance with the school policies and prior to earning credit. At least sophomore status required. This course is graded on a pass/fail basis.

Offered: Every year, All**COM 302. Communications Career Practicum II.****1 Credit.**

This course continues practical training in a communications-related occupation. Students complete a minimum of 40 hours of supervised fieldwork (paid or unpaid) in a professional setting. Practicum placements must be approved by the internship program director in accordance with the school policies and prior to earning credit. At least sophomore status required. This course is graded on a pass/fail basis.

Prerequisites: Take COM 301 and permission of department chair.**Offered:** Every year, All**COM 303. Communications Career Practicum III.****1 Credit.**

This course fulfills the 40 hour experiential learning opportunity in a communications-related occupation. Students complete a minimum of 40 hours of supervised fieldwork (paid or unpaid) in a professional setting. Practicum placements must be approved by the internship program director in accordance with the school policies and prior to earning credit. At least sophomore status required. This course is graded on a pass/fail basis.

Prerequisites: Take COM 302 and permission of department chair.**Offered:** Every year, All**COM 340. Exploring Communications Abroad.****3 Credits.**

This multisection, global perspective course introduces students to the worldwide development of communications, including communication practices, infrastructure, environments and specializations. Students conduct primary and secondary research on communications in a specific country or in a cross-cultural context. The topics can range from international cinema through storytelling and global branding to documentary filmmaking depending on the specialty of the instructor. This course includes a short-term study-abroad component directly related to the topic.

Offered: Every year, Fall and Spring**UC:** Breadth Elective, Intercultural Understand**COM 350. Media Culture and Arts of Los Angeles.****3 Credits.**

This course introduces students to the diverse media companies based in Los Angeles as well as the influence of local history, art and culture on the past, present, and future of the city. The class examines industries including, but not limited to: journalism, film and television writing, video production, podcasting and web design. Students complete a final project focused on a Los Angeles media company.

Offered: Every year, Fall and Spring**UC:** Breadth Elective, University Curriculum Ele**COM 490. Communications Career Internship.****3 Credits.**

This course aims to promote professional growth and advancement through observation and participation in jointly supervised major-related fieldwork with a business or organization (paid or unpaid). The course also provides the opportunity for students to meet and work with active professionals in an industry directly aligned with their major while refining their own career goals. Students complete a minimum of 120-hours of supervised fieldwork in a professional setting evaluated by the internship supervisor and the school's internship coordinator. The internship placements must be approved via QUCC prior to student earning credit and in accordance with the school policies. A student must have completed a minimum of 57 credits as a prerequisite. This course is graded on a pass/fail basis. (Can be taken currently with COM 491 upon department chair approval.)

Prerequisites: Take COM 201 and a minimum of 57 credits completed.**Offered:** Every year, All**COM 491. Communications Career Internship II.****3 Credits.**

This course aims to promote professional growth and advancement through observation and participation in jointly supervised fieldwork with a cooperating communications-related business or organization (paid or unpaid). The course also provides the opportunity for students to meet and work with active communications professionals while refining their own career goals and maximizing opportunities. Students complete a minimum of 120-hours of supervised fieldwork in a professional setting evaluated by the internship supervisor and the school's internship coordinator. The internship placements must be approved in accordance with the school policies and prior to student earning credit. Junior/Senior status is required. This course is graded on a pass/fail basis. (Repeatable or concurrent with COM 490 upon department chair approval.)

Prerequisites: Take COM 201, COM 490 and permission of department chair.**Offered:** Every year, All

Cinematic Production Management (FTM)

FTM 501. Production Reconstruction.**3 Credits.**

: This class will teach and expand students' understanding of all aspects of prepping a feature film through lectures, experiential role-playing and weekly assignments. Students will analyze a produced film and will "recreate" all the steps to get into production including scheduling and budgeting through the use of industry standard software.

Offered: Every year, Fall**FTM 502. Advanced Production Management Workflow.****3 Credits.**

Students gain an overview of studio, independent, broadcast and streaming platforms content and management workflow needs. Contemporary practices in pre-production and production are stressed. Students pre-produce an episodic television show from the perspective of various production personnel and hold production meetings to gain an understanding of the pre-production and production process workflow for theatrical, TV episodic, TV situation comedy and documentary production including interactions with talent agencies and union signatory contracts.

FTM 503. Creative Development. 3 Credits.

Students learn to shape stories for the screen and gain a comprehensive understanding of concept development, dramatic structuring, character development and dialogue. They learn the mechanics involved in the development of new projects, including script coverage, sourcing material, script notes, creative meetings, packaging a project, and how to effectively navigate the development journey.

Offered: Every year, Spring

FTM 504. Production Scheduling and Introduction to Production Budgeting. 3 Credits.

Students are given a finished but unproduced short screenplay or television episode and learn to break down and fully schedule that project. Theory of scheduling and output of details from the program are stressed.

FTM 505. Entertainment Law and Deal Making Practice. 3 Credits.

Students gain an overview of contemporary entertainment law in regards to production including options, contracts, negotiations, copyright, IP, and licensing. Topics covers include how a producer protects themselves legally, find representation, and how to close deals.

FTM 506. Screenwriting II and Production Workshop. 3 Credits.

Students author a theatrical feature screenplay or a pilot for an episodic television series or the full production plan for a documentary television multi-part series. In addition, they will also author, pre-produce, shoot, edit and distribute a 5-minute micro film.

Offered: Every year, Spring

FTM 507. Production Budgeting. 3 Credits.

Using industry-standard software packages, students plan and budget an unproduced short film. Special attention is paid to: location(s) of shoot; union globals and fringes and non-union and union taxes; contemporary practice in completion bonds. Guild and DGA surety bonds and Insurance requirements are also stressed.

FTM 508. Domestic and Worldwide Distribution and Sales for Film and TV. 3 Credits.

Students gain an overview of contemporary domestic and international production management practices: office administration, paperwork and work flow; carnets, business visas, insurance and surety bond liability and management; industry national and international HR practices and payroll; international, state and local film, television and documentary production rules and regulations; tax incentives and responsibilities; national and international trade unions rules, rates, penalties, common regulations, compliances, visa requirements and international signatory practices.

FTM 509. Principles of Film, Television and Streaming Media Analytics, Sales and Distribution. 3 Credits.

Students gain an overview of film, television and streaming media analytics and their applications. The international sales marketplace is examined with special emphasis agreements for international advertising, distribution and marketing. Students will create a business plan for a production company.

FTM 510. Principles of Post-Production Management. 3 Credits.

Students gain an overview of post-production management including: staff roles and post production responsibilities, data storage and management, directors and authors rights and responsibilities to final cut, licensing, graphics and titling.

FTM 601. Production Management Thesis Production. 6 Credits.

Students polish their screenplay to final draft, schedule and budget their script, finalize their look book and produce a three to four scene sizzle reel of their script. Thesis Paper on topic of film required.,Students finalize their optioned (or authored) screenplay, schedule and budget their script, create a finance plan, pitch deck and look book, and produce a "proof of concept" or a rip reel. Pitch final project to professional producer(s) and financier(s).

Film, Television and Media Arts (FTM)

FTM 100. Special topics in Film, Television, and Media Arts. 3 Credits.

This course is only open to high school students in the QU Academy program. The content of this course is specialized and varies by semester and by section. A variety of topics in film, television, and media arts may be covered. Students should consult the course description in the schedule for details on specific offerings.

Offered: As needed

FTM 102. Understanding Film. 3 Credits.

This survey of the art, industry and techniques of global cinema introduces students to the significance of film as an international medium. By exposing students to the work of outstanding filmmakers and to the major elements of film language, the course helps students develop their critical faculties and visual literacy. The course includes some weekly 2 1/2-hour screenings of full-length theatrical feature films and other short clip screenings and lecture/discussion sessions.

Offered: Every year, All

UC: Fine Arts

FTM 110. Single Camera Production. 3 Credits.

This course gives students a thorough grounding in the basic techniques of audio and video storytelling. Students learn basic audio production, visual composition, field camera practice, lighting fundamentals and digital video editing. This is a hands-on course that requires students to produce a number of media projects throughout the semester.

Offered: Every year, All

FTM 112. Multicamera Production. 3 Credits.

This second course introduces students to the techniques of designing and producing creative and effective audiovisual communications primarily in a studio setting. Students learn to develop creative concepts and to take them from script to screen. Lighting, and principles of good composition, structure and program design are emphasized.

Prerequisites: Take FTM 110.

Offered: Every year, All

FTM 230. Animation and Mobile Media. 3 Credits.

This course introduces the concepts and production techniques that prepare students for creative work in mobile media. Students completing this course learn how to produce animated and interactive content for the web and mobile devices or kiosks. Projects may include simple animations, interactive stories, photo and video viewers, web interfaces, green screen, animations for video, and video projects optimized for the web.

Offered: As needed

FTM 240. Analysis of the Moving Image. 3 Credits.

How do we read images? This course explores the techniques used to create moving image media-including film, television and interactive media-from a formal and aesthetic perspective. Students learn to think and write critically about how the techniques of production work to communicate ideas and convey meaning and emotion to viewers. Sophomore status required.

Offered: Every year, All

- FTM 245. Intermediate Production. 3 Credits.**
Media messages are created to meet a variety of goals, which are tailored to appeal to defined audiences. Media can be designed to entertain, to inform, to educate, to persuade or to sell. In this course, students are challenged to discern what makes a good story or project idea for each of several different content objectives. Students work through all phases of preproduction and production including scriptwriting, scheduling and budgeting as they complete a series of projects during the semester, with special emphasis on creative conceptualization, message and writing.
Prerequisites: Take FTM 110, FTM 112 and Sophomore status required.
Offered: Every year, All
- FTM 280. Visual Effects (VFX) Techniques. 3 Credits.**
This is a foundational course in the field of visual effects, involving intensive hands-on production and post-production training. Topics include compositing, keying, rotoscoping, tracking, retouching, color manipulation, matching, mattes and cinematography and lighting for VFX. Preproduction concepts and techniques specific to VFX creation also are covered.
Prerequisites: Take FTM 110 and FTM 112.
Offered: As needed, All
- FTM 300. Special Topics. 3 Credits.**
New or experimental courses on a variety of topics in film, television and media arts that in the past have ranged from the impact of social media to visual effects.
Offered: As needed
- FTM 320. History of Film I (to 1975). 3 Credits.**
This course, the first in a two-semester sequence, provides a foundation in the history and aesthetics of moving image arts. Through individual films, clips, lectures and discussion, students analyze the major international film movements, their genres, directors and themes that have contributed to the development of narrative cinema. Organized thematically, films are chosen to showcase aesthetic, historical, technological and ideological concepts and their impact on the evolution of film from its inception to 1975. Sophomore status required.
Offered: Every year, Fall
UC: Fine Arts
- FTM 322. History of Film (and Television) II. 3 Credits.**
This course explores the history and aesthetics of moving image arts in film and also television from 1975 to the present. Through individual films, excerpts from films and television clips, lectures and discussion, students analyze the evolution of global television and major international film movements, their genres, directors and themes to understand how they have contributed to the development of television entertainment and narrative cinema. Organized thematically, works of film and television are chosen to showcase aesthetic, historical, technological and ideological concepts and their impact on the evolution of film and television. Sophomore status required.
Offered: Every year, Spring
UC: Fine Arts
- FTM 330. Emerging Cinematography Techniques. 3 Credits.**
This course is designed to engage students in the cutting edge of cinematography and lighting. Students undertake in-depth exploration of developing concepts and become familiar with emerging technologies, equipment and narrative techniques through lectures, demonstrations and hands-on exercises.
Prerequisites: Take FTM 110 and FTM 112.
Offered: As needed, All
- FTM 342. Directing Film and Television. 3 Credits.**
Students are introduced to the history, theory and basic concepts of narrative single camera field and multicamera studio direction for current and developing distribution platforms. This course emphasizes principles of dramatic structure, script breakdown and analysis, visualization and story boarding, preproduction scheduling and casting, working with actors to effectively shape performances and working with crew. Students prepare and direct a series of short scenes.
Prerequisites: Take FTM 110, FTM 112.
Offered: Every year, Spring
- FTM 355. Documentary Production. 3 Credits.**
This course challenges students to master the conceptual and technical skills of visual storytelling to produce more advanced, single-camera field projects on selected, specialized topics that may change from semester to semester. Past course content has included documentary production in South Africa and in Ireland, as well as in the United States. The course emphasizes professional production roles, including writing and directing, scheduling and production management, production, post-production, distribution and marketing. Sophomore status required.
Offered: Every year, Spring
- FTM 372. Screenwriting. 3 Credits.**
Students learn to shape stories for the screen. Emphasis is on dramatic structuring, character development, pacing and dialogue. Professional screenplays are analyzed and discussed, and final projects give students the opportunity to develop an original short screenplay.
Prerequisites: Take FTM 245 or permission of the department chair.
Offered: Every year, All
- FTM 375. Projects in Single Camera and Lighting. 3 Credits.**
This course covers such topics as the characteristics and qualities of light, lighting control, principles of visual composition and design, color, contrast, the properties of lenses, how film emulsions and image sensors react to light, filters, matte boxes and other image control devices, metering and exposure control, the effective use of various lighting instruments and accessories, electrical safety and the basics of gripping and gaffing on set and on location. Students learn in an active, hands-on workshop environment and produce a major project.
Prerequisites: Take FTM 110.
Offered: Every year, Fall
- FTM 380. Projects in Audio Production. 3 Credits.**
In this course, students learn the theory and technique behind audio capture, editing and mixing. With audio production, students learn how to record for voice, ambience and other film/radio/TV applications. In mixing, students learn how to combine disparate audio ideas in order to make meaningful expressions that can complicate and amplify visual media. Participants learn that audio storytelling goes beyond language and can be employed for emotional effect in surprising ways. Students learn the basics of working in a DAW (Digital Audio Workspace) and also learn how to "round trip" audio through the Adobe Creative Suite. Participants learn how to improve audio in their own projects while also learning about careers such as sound mixer and podcast producer. No previous musical or technical training is required to take this course.
Prerequisites: Take FTM 110.
Offered: As needed, All

FTM 390. Projects in Multicamera Production. 3 Credits.

Attracting and keeping the audience's attention is the first responsibility of the director. This course gives students the opportunity to explore the art and craft of directing in a multicamera, high-definition studio environment. Participants examine the roles and responsibilities of the director, including shot composition, crew motivation, calling a live production and ethics. Students are asked to visually design a television program from concept to completion in a number of genres, including news, sports, sitcoms, dramas and commercials.

Prerequisites: Take FTM 110, FTM 112.

Offered: Every year, Fall

FTM 392. Post-Production Techniques. 3 Credits.

In this course, students explore such topics as the expressive capability of the editing process; how editing functions to "create" time, tempo, and visual rhythm; the "building" of scenes in editing to achieve various dramatic goals; and telling the story through careful control of sound and image over time. Students gain experience in using the tools and techniques of modern digital post-production technology. Topics include post-production workflow, the art of the cut, the Rule of Six, audio mixing, sound design, foley, primary color grading, and secondary color grading. Software utilized includes the Adobe Creative Suite and DaVinci Resolve.

Prerequisites: Take FTM 110, FTM 112.

Offered: As needed

FTM 393. Animation Techniques. 3 Credits.

Students learn to create sophisticated 2D and 3D still and animated electronic graphics for video that are aesthetically pleasing, expressive and meaningful. Principles of good design, composition and color are stressed, as well as the ability to produce visual interest in support of communication goals.

Prerequisites: Take FTM 110, FTM 112.

Offered: Every year, All

FTM 397. Summer Production Project. 4 Credits.

This advanced production course is for juniors majoring in film, television and media arts. It takes place on campus or on the Nice, France, campus of a major French film and video institute (ESRA, Paris), and involves the writing, shooting and editing of a polished video project that is then presented to a professional jury.

Prerequisites: Take FTM 110, FTM 112.

Offered: As needed, Summer

FTM 399. Independent Study. 1-6 Credits.

Prerequisites: Take FTM 110, FTM 112.

Offered: As needed

FTM 450. Senior Seminar in Film and Television. 3 Credits.

This seminar entails an in-depth examination of issues and research perspectives in film and television. Seminar titles vary each term and may cover subject areas such as film history, reality television, political documentaries, docudrama and contemporary trends in the media industry. Students should consult the School of Communications course bulletin for information about each semester's offerings. Senior status is usually required.

Offered: Every year, All

FTM 493. Senior Project Colloquy: Preproduction. 3 Credits.

This required 3-credit discussion, development, preproduction and production course must be taken in the semester prior to the student's undertaking of the Senior Project. Meeting collectively and individually, all fourth-year FTM students must be enrolled in this course in order to conceptualize and prepare preproduction materials essential for the successful completion of the Senior Project, and to undertake a new short production project, retrospective of their previous work. Individual class sessions are devoted to each aspect of preproduction and assignments that relate to each aspect are completed during the term. Senior status in FTM is required.

Offered: Every year, Fall

FTM 495. Senior Project Colloquy: Production. 3 Credits.

In this capstone course, students are asked to create an individual thesis project that reflects the highest level of their abilities. From pitching their individual project ideas through writing, production and post-production, students are pushed to work at the peak of their skills. The creativity, quality and professionalism of the finished projects are judged by outside professionals and faculty and staff from the School of Communications FTM program, and give graduating seniors important portfolio material. Senior status in FTM is required.

Prerequisites: Take FTM 493.

Offered: Every year, Spring

FTM 499. Independent Study. 3 Credits.

Graphic and Interactive Design (GID)

GID 110. Design Research and Methods. 3 Credits.

This foundation course in research methods for art and design introduces informed strategies for problem solving and prepares students for upper-level coursework in graphic and interactive design. Emphasis is placed on the role of critical thinking in the design process. Theoretical models of design analysis are introduced. Practical hands-on methods include visual research, design journals, thumbnail sketches, mind maps, storyboards, comprehensives, diagramming, prototyping, case studies, topic and content development and other forms of conceptualization.

Offered: Every year, Fall

GID 161. Web Design I. 3 Credits.

This course extends the knowledge and practice of visual design using professional-level software for the creation of web design in preparation for advanced coursework. Students produce course projects that demonstrate creativity, design concepts, critical thinking, aesthetic principles and basic technical competence.

Prerequisites: Take IDD 110 or GID 110; and COM 130.

Offered: Every year, Fall and Spring

GID 200. Special Topics in Graphics and Interactive Design. 3 Credits.

Offered: As needed

GID 205. Visual Thinking: Practice and Process. 4 Credits.

This course builds a foundation in visual thinking practices and cultivates a better understanding of the creative process. Students examine the ways in which images communicate meaning and how visual thinking can be used as an alternative to and enhancement of verbal and quantitative thinking. Insights and applications to different fields including psychology, art, medicine, literature and business are explored throughout. The study and practice of a variety of visual thinking techniques build the foundation for generating innovative concepts and developing personal creative and visual thinking practices. No previous art, design or drawing experience necessary.

Offered: As needed

GID 210. Graphic Design History. 3 Credits.

This course surveys the historical and cultural events, movements and achievements that laid the groundwork for the contemporary practices and products of graphic design. Through lecture, video, discussion, research and studio projects, students are introduced to the visual history, the innovators and the technologies that influenced and transformed the practices of visual communication.

Prerequisites: Take IDD 110 or GID 110.

Offered: As needed

GID 250. Web Design II. 3 Credits.

This intermediate web design course provides further study in current industry standards for UX/UI design. User experience and user interface methods are explored and practiced in addition to a grounding in information architecture processes and techniques. Websites are developed using responsive design requirements.

Prerequisites: Take IDD 110 and IDD 161 or GID 110 and GID 161.

Offered: Every year, Spring

GID 270. Typography I. 3 Credits.

This course enables the student to both understand type and to use it as a design element. Using current computer graphics technology, topics explored include the use of type, page layout, color and the importing of graphics. Using professional page layout software, students create projects that demonstrate both design aesthetics and technical skills. Finished pieces are printed and become part of the student's portfolio.

Prerequisites: Take COM 130; and IDD 110 or GID 110.

Offered: Every year, Fall

GID 300. Special Topics in GID. 3 Credits.

Prerequisites: Take IDD 161 or GID 161 or COM 130.

Offered: As needed

GID 301. Motion Graphics I. 3 Credits.

This course explores aesthetic, critical and technical topics in motion graphics and 2D animation. Students produce projects that demonstrate knowledge and understanding of 2D animation and motion graphics used in the field of design.

Prerequisites: Take IDD 110 and IDD 161; or GID 110 and GID 161.

Offered: Every year, Fall and Spring

GID 305. Digital Photography. 3 Credits.

This course explores the aesthetic, critical and technical topics in the creation of photographic images. Through practice, research and critique, students develop the conceptual, technical and critical skills needed to create innovative photographic projects.

Offered: As needed

GID 315. Mobile Interaction Design. 3 Credits.

This course covers practical techniques for researching, designing and prototyping mobile applications and experiences. Some of the topics covered include wireframe creation, user studies and paper and digital prototyping.

Prerequisites: Take IDD 301 or GID 301.

Offered: Every year, Spring

GID 370. Typography II. 3 Credits.

This course picks up where GID 270 leaves off by instructing in advanced typographic design; the use of grid structures; juxtapositions of type and image; and preparation for offset printing. Using the current computer technology, students create projects that demonstrate both an advanced knowledge of design/typography and current digital production processes. Finished pieces are printed and become part of the student's professional portfolio.

Prerequisites: Take IDD 270 or GID 270.

Offered: As needed

GID 399. Advanced Independent Studio Work in Graphic and Interactive Design. 1-6 Credits.

Advanced independent studio work in graphic and interactive design.

Offered: As needed

GID 400. Special Topics in GID. 3 Credits.

Prerequisites: Take IDD 301 or GID 301.

Offered: As needed

GID 410. Web Design III. 3 Credits.

This course explores advanced aesthetic, critical and technical topics in website design, development, structure and information architecture. Students use problem-solving methods of design research and analysis combined with authoring and scripting environments to enhance design, interaction, usability and effective communication. Topics include current processes and technologies of web design and web standards. Senior status required.

Prerequisites: Take IDD 250 and IDD 301; or GID 250 and GID 301.

Offered: Every year, Fall

GID 440. Motion Graphics II. 3 Credits.

This course explores advanced aesthetic, critical and technical topics in motion graphics and animation. Topics include typography and motion graphic design and layout, editing digital video, and audio. Students use problem-solving methods of design research and analysis to produce digital video animations that demonstrate both knowledge and understanding of motion graphics, and that provide them with professional entry into the field.

Prerequisites: Take IDD 301 or GID 301.

Offered: As needed

GID 480. Senior Seminar and Portfolio. 3 Credits.

In this course, students consider critical issues in interactive design and prepare a portfolio, website, resume and other professional materials. For majors in graphic and interactive design. Senior status is required.

Prerequisites: Take GID 410.

Offered: Every year, Spring

GID 499. Advanced Independent Studio Work in Graphic and Interactive Design. 3 Credits.

Advanced independent studio work in graphic and interactive design.

Offered: As needed

Interactive Media and Communications (ICM)

ICM 500. Special Topics in Interactive Media. 3 Credits.

The subject matter for this course varies depending on industry and professional trends.

Offered: As needed

ICM 501. Foundations in Graduate Studies. 3 Credits.

A sequence of readings, practices and exercises introduces the students to the "deep work" required of master's-level study. Through structured discussions, presentations, projects and readings, students build the knowledge base and critical skills required to formulate methodological research and practice across media. Each student sets up a portfolio site for the collection of research and practice artifacts created throughout the master's coursework.

Offered: Every year, Fall and Spring

- ICM 502. Visual Design. 3 Credits.**
This course covers the principles and practices associated with graphic design as a way to make complex information easier to understand and use. With a primary focus on typography as the fundamental means of conveying content, the course emphasizes the creative process of organizing and visualizing type and images through hierarchy, spatial organization of grid structures, positive and negative space, depth perception, transparency, and color theory. Readings locate design and typography within the larger history of visual art and graphic design and in relation to technology developments. Students who majored in GID at Quinnipiac as undergraduates, or those with professional graphic design experience should choose another course.
Offered: Every year, Spring and Summer
- ICM 504. Motion Across Media. 3 Credits.**
This course covers the concepts of motion design across multiple platforms. Students are challenged to analyze and create effective animations using the entire design process, including research, preproduction, storyboarding, and production techniques. Analysis of navigation, storytelling, visual design, and message delivery inform the application of methods. The focus is on communicating ideas to the audience effectively through motion in its many forms, whether on desktops, smart phones, tablets, or kiosks.
Offered: Every year, Fall and Summer
- ICM 505. Web Technologies. 3 Credits.**
This course introduces the foundational techniques of creating web-based content. Through a series of exercises, participants learn how interactive networks are organized, where to find the information necessary to create standards-based systems, and gain elementary experience designing and building sites.
Offered: Every year, Spring and Summer
- ICM 506. Writing for Interactive Media. 3 Credits.**
Good writing skills are a necessity for professional communication in spite of the changing media landscape. In this course students create, develop and hone a distinct written voice within varied media environments. Much of professional media work involves creating a consistent voice or presence for a person, organization or company. Participants focus on how to accomplish (or enhance) this process using effective compositional techniques.
Offered: Every year, All
- ICM 508. Audio and Video Design. 3 Credits.**
This course covers the aesthetic and technical principles and practices used to create video and audio content for cross platform and device delivery. Effective storytelling and message delivery concepts are emphasized while exploring various production techniques including storyboarding, script, an introduction to audio production, cinematography, lighting, interviewing, editing, and effective media distribution.
Offered: Every year, All
- ICM 512. Principles of User Experience Design. 3 Credits.**
This course explores the ever-changing processes and methods of user experience design. The Human-Centered Design and Design Thinking process are studied through readings and hands-on projects that cover empathy, the psychology of the user, problem definition, and ideation methods.
Offered: Every year, Fall and Spring
- ICM 513. Content Strategy. 3 Credits.**
Content is critical in today's media landscape, but without a strategic plan, it can remain invisible to the audience you wish to reach. In this course, students learn the best ways to design and implement a content strategy to engage a targeted audience. They are immersed in the planning for the creation and distribution of engaging stories and information. Students become content strategy practitioners who know how to use words, pictures, video, and social and mobile media to build an audience and communicate value.
Offered: Every year, Fall and Spring
- ICM 514. Understanding Your Audience. 3 Credits.**
Usability is the study of discrepancies between expected and actual user behavior. The course introduces students to empirical user research methods such as contextual inquiry, ethnographic studies, card sorting, and cognitive walkthroughs, that provide the foundation for user-centered interaction and communications design. In addition, students conduct effective usability tests, interviews, and surveys.
Offered: Every year, Fall and Spring
- ICM 517. Ideation, Prototyping and Testing. 3 Credits.**
Ideation, prototyping and testing teaches students how to use low and high-fidelity sketching, information architecture, flowcharts, wireframes, user interface design, and functional prototypes for a variety of design problems. Through a series of creative projects, students learn various methods for each of these steps in the development of design products.
Offered: Every year, Spring and Summer
- ICM 518. Visual Storytelling. 3 Credits.**
The course provides an introduction to the concept of visual storytelling and immerses students in the theory and practice of creating and delivering visual narratives in digital environments. The course includes both the history of visual storytelling as well as contemporary approaches used in a variety of information related disciplines. Students analyze examples of work and apply that knowledge to create their own visual narratives
Offered: Every year, Fall and Spring
- ICM 522. Social Media Practice and Techniques. 3 Credits.**
The widespread use of social media in society has created a communications environment built on platforms that encourage contribution and collaboration through user-created media and interaction. This course explores the underlying concepts, development and management of social media platforms as well as the creation of effective approaches to facilitate a viable social media presence.
Offered: Every year, Fall and Spring
- ICM 524. Social Media Analytics. 3 Credits.**
This course gives students a working knowledge of the social media analytics process and analytics tools, along with their application to communications objectives within real-world situations.
Offered: Every year, Fall and Summer
- ICM 528. Content Creation. 3 Credits.**
In this course, we explore the creation of engaging content. Students are guided through the process of planning and creating a suite of related projects in the medium(s) of their choice (writing, video, audio, image making.) The focus is on the conceptual processes and practices used in developing a unique and persuasive body of work to be distributed across mediums. Areas of interest are researched and then developed into a series of related pieces.
Offered: Every year, Spring and Summer

ICM 529. Data Visualization.**3 Credits.**

This is a course in finding and telling visual stories from data. Students explore fundamental principles of data analysis and visual techniques, examine chart types and when to use them, and learn how to acquire, process and filter data. Through an understanding of data visualization best practices and audience analysis, students are able to identify and articulate what makes a successful information design. Industry-standard software tools are used to create static and interactive graphics—including charts, maps and diagrams—that make information more accessible to the intended audiences.

Offered: As needed, Fall and Summer Online**ICM 530. Independent Study.****3 Credits.**

This is an elective course offered to accommodate students who seek advanced study in an area of the discipline. The topic and scope of the course are developed by the student in consultation with a faculty adviser, subject to approval by the program director and department chair.

Offered: As needed, All**ICM 531. Graduate Internship.****3 Credits.**

This elective course provides interactive media students with the opportunity to work in a professional setting to acquire additional skills and insights into their chosen area of study. Students completing this course are required to work in a supervised environment. All internships must be approved by the graduate program director.

Offered: As needed, All**ICM 540. Interactive Communications Abroad.****3 Credits.**

This multi-section course introduces students to the worldwide development of communications, including communication practices, infrastructure, environments, and specializations. Students conduct primary and secondary research on communications in a particular country or cross-cultural context. The topics can range from international visual arts through storytelling, global branding, and design, depending on the specialty of the instructor. This course includes a short-term study-abroad component directly related to the topic of the course, where students will be able to expand their skills and knowledge in a new environment. An interactive communications graduate-level final project is required.

Offered: As needed**ICM 601. Master's Capstone.****3 Credits.**

Students create a professional quality web portfolio selected from the best work from their courses and experiences in the master's program. Each student is facilitated through the process of identifying and packaging works, creating a consistent message and image using the products of their research and practice.

Offered: Every year, Spring and Summer

Journalism (JRN)

JRN 100. Special Topics in Journalism.**3 Credits.**

This course is only open to high school students in the QU Academy program. The content of this course is specialized and varies by semester and by section. A variety of topics in journalism may be covered. Students should consult the course description in the schedule for details on specific offerings.

Offered: As needed**JRN 106. Multimedia Production Techniques (SPS 106).****3 Credits.**

Students learn the fundamentals of multimedia production, including the use of digital cameras and related equipment, to tell simple stories and the use of editing software to prepare them for distribution. Students learn the rudiments of video-camera use, composition and lighting, capturing audio, continuity, interviewing, voiceovers, music beds, graphics, and shooting and editing action. Students produce b-roll, features, interviews, location pieces and story packages pertaining to their concentrations or areas of interest.

Offered: Every year, All**JRN 199. Journalism Independent Study.****1-6 Credits.****JRN 200. Special Topics in Journalism.****3 Credits.**

Students engage in a detailed examination of current issues in journalism in a format that may incorporate academic research, journalistic writing and multimedia presentations. Students should consult the School of Communications course bulletin for information about each semester's offerings.

Offered: As needed**JRN 205. Photojournalism Fundamentals.****3 Credits.**

This hands-on course focuses on creating compelling, original news photography using the latest DSLR and Mirrorless cameras that journalists in the field are using today. Students learn about the basics of photography in this course and how to shape those technical skills into competent photojournalism.

Offered: Every other year, Spring**UC:** Fine Arts**JRN 260. News Writing.****3 Credits.**

This course teaches the principles and practices of news writing for digital platforms and print. Journalists must acquire skills to identify a news story and its essential elements, gather information efficiently, place it in a meaningful context, and write concise and compelling accounts. The readings, discussions, exercises and assignments for this course are designed to help students acquire such skills and understand how to utilize them wisely.

Prerequisites: Take COM 140.**Offered:** Every year, All**JRN 263. Broadcast News Writing.****3 Credits.**

Students are introduced to the fundamentals of writing for the broadcast media in a professional environment. Topics include writing for radio and television, as well as integrating sound and video into news stories. The course also provides a basic understanding of primary journalistic values such as accuracy and fairness as they apply to broadcast news.

Prerequisites: Take COM 140.**Offered:** Every year, All**JRN 275. News Reporting.****3 Credits.**

This course is focused on news reporting. Students learn how to gather, analyze and use information for journalistic stories. They learn to identify and use digital databases and resources, conduct thought-provoking interviews, and search and locate public documents in ethical and legal manners.

Prerequisites: Take JRN 260 or JRN 263.**Offered:** Every year, All

- JRN 280. The Art of the Podcast (SPS 280).** **3 Credits.**
This hands-on course explores creative audio storytelling via the podcast. Students learn how to research, write, record, edit and self-publish creative nonfiction and fictional stories that are both original, and emulate some of the most popular podcasts on the market. Special emphasis is placed on audio gathering techniques, storytelling techniques and interviewing for live and recorded shows.
Offered: As needed, Spring
- JRN 285. Mobile Journalism: The Future of News.** **3 Credits.**
News consumption on smartphones and tablets has surpassed that of desktops and newspapers, making mobile devices key to the future of news. Students examine the impact of this trend on the future of journalism, learn about the technologies necessary to produce news on these devices, critique the user experience provided by various apps and mobile websites, and produce a news app of their own. They also learn how to cover news events using mobile technology, how to produce mobile news stories and how to work in a mobile newsroom.
Prerequisites: Take COM 140.
Offered: As needed, Spring
- JRN 291. Reporting for Television I.** **3 Credits.**
Students learn the principles of producing television news packages, which they shoot and edit using HD non-linear equipment. All students cover news and sports primarily off campus. The focus is on writing, news judgment, content, interviewing, use of voice and doing stand-ups. Stories can air on the TV newscast that is broadcast live weekly.
Prerequisites: Take JRN 106 or SPS 106; and JRN 260 or JRN 263.
Offered: Every year, All
- JRN 300. Special Topics in Journalism.** **3 Credits.**
Students engage in a detailed examination of current issues in journalism in a format that may incorporate academic research, journalistic writing and multimedia presentations. Students should consult the School of Communications course bulletin for information about each semester's offerings.
Prerequisites: Take COM 140.
Offered: As needed, All
- JRN 301. Special Topics.** **4 Credits.**
Offered: As needed
- JRN 311. Reporting for Television II.** **3 Credits.**
In this course, students produce in-depth television stories. Pieces are longer to allow the student to explore issues in greater detail. Stories can air on the TV newscast that is broadcast live weekly.
Prerequisites: Take JRN 291.
Offered: As needed
- JRN 315. The Art of Journalistic Interviewing.** **3 Credits.**
Compelling stories don't just happen. They come from strong interviewing skills that tell stories people care about. Students learn how to ask questions that elicit pithy responses, emotion and expertise, using in-class and out-of-class exercises. Students also analyze and critique the interviewing styles used by professional journalists, as well as the work of their classmates.
Prerequisites: Take JRN 106 or SPS 106; and COM 140.
Offered: As needed
- JRN 325. Telling Global Stories.** **3 Credits.**
Using multimedia to gather and present facts lets journalists expand the scope of their storytelling. Students in this course examine current international journalism trends and socioeconomic and political issues specific to a developing country, learn fact-gathering techniques, and travel to that country during spring break to put into practice what they have learned. After spring break, students work on an interdisciplinary multimedia project.
Offered: As needed, Spring
- JRN 341. Sporting Culture Through Nonfiction.** **3 Credits.**
It has often been said that sport is a microcosm of society, but many rhetoric scholars have begun to suggest that sport plays a role in constituting society and is "defined by a range of political practices, including allocations of resources, representations of identity, projections of nationalism and globalization, activism and change." This directed readings course examines American culture, as well as comparative values, through nonfictional accounts of sport.
Offered: As needed, Summer Online
- JRN 343. Literary Journalism in the '60s.** **3 Credits.**
The 1960s stand out as an era of change and turbulence in 20th-century America. Throughout the 1960s and 1970s, these nonfiction writers and journalists wrote in a personal style that became known as "Literary Journalism," or "The New Journalism." This directed reading course requires students to analyze the historical and contemporary views of major literary journalists.
Offered: As needed, Summer Online
UC: University Curriculum Ele
- JRN 359. Journalism Elective.** **3 Credits.**
- JRN 360. Watchdog Reporting.** **3 Credits.**
In this course, students learn and practice watchdog journalism, helping to inform our communities and keeping public figures and institutions in check. Students cover in-depth news off campus, on topics such as crime, public health, politics, education and the environment. In conversations with working journalists, students learn both innovative and proven strategies for reporting. Students also work individually and in teams to publish stories and multimedia projects based on public data, documents and interviews.
Prerequisites: Take JRN 260 or JRN 263.
Offered: As needed, Spring
- JRN 361. Sports Reporting (SPS 361).** **3 Credits.**
This course introduces students to coverage of sports for the news media and includes writing game stories and sports profiles.
Prerequisites: Take JRN 260 or JRN 263.
Offered: Every year, All
- JRN 362. The Story of Football (SPS 362).** **3 Credits.**
This course traces the historical trajectory of American football and the coaches, players and media portrayals that transformed the game from a 19th-century collegiate test of manliness to what it is today: a spectator sport of immense appeal whose popularity endures despite more than a century of concerns over the game's debilitating and sometimes lethal violence.
Offered: Every year, Fall

- JRN 364. Sports Broadcasting.** **3 Credits.**
This course introduces students to the concepts and content of what makes a good sports broadcaster. Aspects of sports broadcasting, both from inside the studio and outside on the field of play are explored. Students will learn and take on all the roles involved in sports broadcasting: that of a studio host, play by play, analyst, sideline reporter, interviewer and more.
Prerequisites: Take JRN 263
Offered: Every year, All
- JRN 365. Effective Editing.** **3 Credits.**
Students learn the basics of editing online text, magazines and newspapers, with an emphasis on copyediting, headline writing, composition and story packaging.
Prerequisites: Take JRN 275.
Offered: As needed
- JRN 372. Entrepreneurial Media (The MIC Project).** **3 Credits.**
This course addresses the fiscal and distribution challenges faced by journalists and media professionals and empowers student teams to construct sustainable business models. Students experiment with the latest technology, exchange ideas with some of the industry's most prominent thinkers and developers, and create content or products for viable media business ventures. Open to all School of Communications students.
Prerequisites: Take COM 140
Offered: Every year, Fall
- JRN 375. Cultural and Entertainment Journalism.** **3 Credits.**
Students learn how to write about arts and culture by reporting on local events and developing a theoretical framework for cultural reviewing. Topics include television, music, theater and film. In addition to hands-on reporting assignments, coursework includes readings, screenings and fieldwork.
Prerequisites: Take COM 140 or permission of instructor.
Offered: Every other year, Fall
- JRN 380. Fundamentals of Digital Journalism.** **3 Credits.**
This course covers the principles and practices associated with researching and producing stories for digital media. Students are required to produce stories that include textual, audio, video and interactive elements.
Prerequisites: Take JRN 106 or SPS 106; and JRN 260 or JRN 263.
Offered: Every year, All
- JRN 388. Business Reporting: Following the money.** **3 Credits.**
Students learn methods and tactics of writing about businesses for mass communication. The course covers why and how companies operate and how to write stories about corporate news from public records and other sources.
Offered: Every other year, Spring
- JRN 395. Broadcast Performance.** **3 Credits.**
This course explores the variety of skills required to communicate effectively through broadcasting. Students learn and practice on-air presentation techniques for effective delivery and interpretation. The course focuses on voice, voice control and the phrasing interpretation of copy and body language. Study focuses on performance techniques, creativity, writing and analytical skills needed to communicate effectively. Open to broadcast and print students.
Prerequisites: Take JRN 106 or SPS 106; and JRN 263.
Offered: As needed
- JRN 399. Journalism Independent Study.** **3 Credits.**
- JRN 400. Special Topics in Journalism.** **3 Credits.**
Students should consult the School of Communications course bulletin for information regarding each semester's offerings.
Offered: As needed
- JRN 450. Senior Seminar.** **3 Credits.**
This seminar entails an in-depth examination of issues and research perspectives in journalism. Seminar titles vary each term and may include topics such as ethics in journalism, diversity in the newsroom, and international journalism practices. Students should consult the School of Communications course bulletin for information about each semester's offerings.
Offered: Every year, All
- JRN 470. Narrative Journalism.** **3 Credits.**
Students in this class learn to report and write long-form articles suitable for publication in online and print magazines. Over a series of major writing assignments, students apply their research and interviewing skills to produce exhaustively reported and elegantly written articles. Topics in the course include: lead writing, article structure, interviewing, the use of statistics and the application of narrative techniques to journalistic writing.
Prerequisites: Take JRN 275.
Offered: As needed
- JRN 480. Advanced Digital Journalism.** **3 Credits.**
Many newsrooms now combine multiple types of media to immerse readers and make complex stories more digestible. This course covers the reporting and production skills needed to build many of these new forms, including interactive graphics and maps, and advanced audio and video projects. Students also study past and present interactive journalism projects and meet with some of the professionals who designed them.
Prerequisites: Take JRN 380.
Offered: As needed
- JRN 488. The International Money Trail.** **3 Credits.**
Business and investment, regulation and corruption, fraud and philanthropy are often global, making students who can track money across borders especially valuable. This course is designed to teach journalists, financiers, investigators, and strategic communicators to use financial analysis and digging skills on the international money trail. This course builds on JRN 388 and serves as the capstone for the minor in Financial Communications and Business Journalism.
Prerequisites: Take JRN 388;
Offered: As needed, All
- JRN 495. Advanced Reporting.** **3 Credits.**
This course stresses individual enterprise reporting, in which students plan, report, write and produce stories suitable for print or multimedia that demonstrate their command of skills acquired during the course of study. Emphasis is placed on the role of the professional journalist as an ethical practitioner who represents and reflects the wider public in its economic, ethnic and racial diversity.
Prerequisites: Take JRN 380.
Offered: As needed
- JRN 496. The QNN Newscast.** **3 Credits.**
In this course students act as producers, news and sports reporters, writers, editors and anchors as they put on a live weekly newscast. Newscasts are recorded and critiqued for student portfolios.
Prerequisites: Take JRN 291.
Offered: Every year, All

- JRN 498. Journalism Capstone. 4 Credits.**
In this capstone course for the journalism major, students work on long, in-depth pieces of journalism across platforms. The stories include numerical or statistical information, multiple interviews from a variety of diverse sources, and show the students' command of the techniques used to produce and present news in print, broadcast and digital environments. Senior status required.
Offered: Every year, All
- JRN 499. Independent Study. 1-6 Credits.**
- JRN 500. Special Topics in Journalism. 3 Credits.**
This course consists of seminar-based classes that consider emerging areas of scholarly research or industry developments in journalism, with a particular focus on how a specific research activity or industry development illustrates issues regarding economic, gender and social groups.
Offered: As needed
- JRN 501. Reporting and Fact-Checking. 3 Credits.**
Students are introduced to the basic practices and tools of journalism, which include interviewing, identifying and accessing public documents, writing leads and constructing organized, balanced stories.
Offered: Every year, Fall
- JRN 504. Digital Essentials. 3 Credits.**
The capacity to gather information and report the news remains at the core of the journalism profession. This course focuses on the fundamentals of news writing while also engaging students in emerging social media and other tools to present comprehensive news stories to all audiences.
Offered: Every year, Spring
- JRN 521. Audio Storytelling. 3 Credits.**
Writing for the ear requires skills in preparing scripts, natural sound and audio recording and editing. This course prepares students to compose stories for radio news and podcasts, with a focus on developing the style of conversational broadcast writing common to National Public Radio.
Offered: Every year, Fall
- JRN 524. TV Reporting. 3 Credits.**
Visual news stories as broadcast by networks, affiliates and cable news channels and in evolving digital formats require skills in both storytelling and technology for shooting and editing video. This course covers the essentials of shooting video, editing and field reporting and producing.
Offered: Every year, Fall
- JRN 528. Data Journalism. 3 Credits.**
Information graphics are now an integral component of news, conveying big data into readily understood formats such as diagrams and charts. This course teaches students how to visually organize information and apply it to news stories for broadcast or online presentation.
Offered: As needed
- JRN 530. Independent Study (ICM530). 3 Credits.**
This is a special course offered to accommodate students who seek advanced practical training or advanced research in an area not directly included in the curriculum. The topic and scope of the course is developed by the student in consultation with a faculty adviser, subject to approval by the dean.
Offered: Every year, All
- JRN 531. Graduate Internship. 3 Credits.**
Experience in association with working professionals is essential to securing career opportunities. Students completing an elective internship to secure such experience are required to work in a supervised environment, approved by the graduate program director.
Offered: Every year, All
- JRN 541. Sporting Culture Through Nonfiction. 3 Credits.**
It has often been said that sport is a microcosm of society, but many rhetoric scholars have begun to suggest that sport plays a role in constituting society and is "defined by a range of political practices, including allocations of resources, representations of identity, projections of nationalism and globalization, activism and change." This directed readings course examines American culture, as well as comparative values, through nonfictional accounts of sport.
Offered: Every year, Summer Online
- JRN 543. Literary Journalism in the '60s. 3 Credits.**
The 1960s stand out as an era of change and turbulence in 20th-century America. Throughout the 1960s and 1970s, these nonfiction writers and journalists wrote in a personal style that became known as "Literary Journalism," or "the New Journalism." This directed reading course requires students to analyze the historical and contemporary views of major literary journalists.
Offered: Every year, Summer Online
- JRN 545. TV Production. 3 Credits.**
This course introduces students to the technical production skills that go into a daily news telecast. Newsroom organization, story development (from idea to the air) and the principles and practices of professional producers are studied.
Offered: Every year, Fall
- JRN 546. Digital News Production. 3 Credits.**
This course explores topics related to social media, such as the viral video clip from a Tweet or the verified source through social media. Students learn the skills, tools and best practices of digital and video content production, as well as social coordination in the news arena. They also explore logistical and ethical concerns in the social medium.
Offered: Every year, Spring
- JRN 552. Media Law and Ethics. 3 Credits.**
A thorough knowledge of laws and ethical behavior is essential to the professional practice of journalism. As such, this course covers the legal and ethical dimensions of media communications across platforms, with an emphasis on First Amendment, privacy and copyright issues.
Offered: Every year, Spring
- JRN 562. Sports Law and Ethics. 3 Credits.**
Federal antitrust law and regulations show that college and professional sports are treated as special components of American culture. This course examines the legal structure that grants special privileges to sports and to the ethical challenges sports journalists confront in going beyond the games to find the story.
Offered: Every year, Spring
- JRN 563. Sports Analytics. 3 Credits.**
Deciphering the volumes of data produced by high school, college and professional sports teams is an essential part of sports reporting. This course introduces students to the ever-growing volumes of statistics across major sports and shows how to transform such data into useful information.
Offered: Every year, Spring

JRN 564. Presenting and Producing Radio Sports. 3 Credits.

Radio remains an essential and effective medium for listening to games and for engaging the audience with live talk shows that discuss teams, players, sports and the action of the competition. This course presents students with the principles and practices of radio sports.

Offered: Every year, Fall

JRN 565. Presenting and Producing Television Sports: Remote. 3 Credits.

Students in this course write, produce and distribute a 30-minute sports program for broadcast featuring stories that illustrate intriguing and inspiring stories of a Division I college athletic department. Every student engages in shooting, editing, writing, interviewing, presenting and distributing the final product. Additionally, students originate and perform local and national style sports highlight segments along with live in-depth interviews.

Offered: Every year, Spring

JRN 566. Presenting and Producing Television Sports: Studio. 3 Credits.

Pre-game, post-game and intermission reports are among the most important aspects of televised sports, as each reveals and promotes the storylines through which games are covered. This course introduces students to the concepts and content behind the production of studio shows.

Offered: Every year, Fall

JRN 572. Researching and Writing the News Documentary. 3 Credits.

The complexities of producing the news documentary range from finding the right story to pursue to uncovering the proper visuals to help tell it. This course provides students with the skills to research, write, and produce visual nonfiction, long-form projects rooted in history or current events.

Offered: As needed

JRN 573. Sports Literature. 3 Credits.

Sports serve as a critical metaphor for American life in nonfiction works such as "Friday Night Lights," in novels such as "End Zone," in plays such as "Death of a Salesman" and in films such as "Raging Bull." This course examines why sports are prominent in cultural works that attempt to reveal the meaning of America.

Offered: As needed

JRN 574. Crafting the Sports Feature. 3 Credits.

Feature writers capture athletes when they are most noble, frail or otherwise vulnerable or heroic. They also capture the moment when a game means more than that. This course teaches students to apply creative vitality to their ideas and writing on sports outside of game stories.

Offered: Every year, Fall

JRN 588. Business Reporting: Following the Money. 3 Credits.

Students learn methods and tactics of writing about businesses for mass communication. The course covers why and how companies operate and how to write stories about corporate news from public records and other sources.

Offered: Every other year, Spring

JRN 589. Critical Issues in Sports. 3 Credits.

From health concerns to labor conflicts, the workaday world often intrudes on the bubble that protects the mythology of sport. Through reason, analysis and writing, students interact with vital issues that emerge from the seemingly routine day-to-day coverage of games.

Offered: Every year, Spring

JRN 595. Sports Clinical. 3 Credits.

Students completing the sports journalism program must participate in the Sports Clinical. This course focuses on advanced broadcast, multimedia, documentary and long-form reporting and to deepen the experience and training in a given area of specialization in terms of platform and subject matter.

Offered: Every year, Spring

JRN 600. Capstone Proposal. 3 Credits.

Students completing the journalism program conduct research and do preliminary reporting to write a capstone project proposal based on their area of inquiry. The faculty adviser and graduate program director must approve the topic. This course is graded on a pass/fail basis.

Offered: Every year, All

JRN 601. Capstone Project. 3 Credits.

Students completing the journalism program must complete a capstone project. Under the guidance of their faculty adviser, students create an original, in-depth, professional-quality journalism project. This course is graded on a pass/fail basis.

Offered: Every year, All

Media Studies (MSS)

MSS 119. Sign Language Workshop. 1 Credit.

The course presents an introduction to basic sign language, its basic vocabulary, sentence structure and grammar. Students gain practice in reading and execution of signs.

Offered: As needed

MSS 131. Media Innovators. 3 Credits.

This course examines how media companies develop and refine media products and platforms. Learners examine how media companies anticipate and/or respond to different cultural, technological, and economic structures that create constraints and leave open the possibilities for media practitioners. Using a case study approach, the course explores how decision-makers have adapted to the dynamic media marketplace, the types of data they solicit, and the ways in which they confront the risks associated with creating and distributing media products. This course replaces MSS231; students may not receive credit for both.

Offered: Every year

MSS 139. Mass Comm Elective. 3 Credits.

Offered: Every year, All

MSS 220. Media, History and Memory. 3 Credits.

This course examines the relationship between media, history and memory, focusing on the role various media play in shaping both individual and collective memories of historical figures, events and eras. Students are introduced to historical research methods and evaluate a variety of archival media texts, including photographs, newspaper and magazine articles, newsreels, movies, TV shows and audio recordings. In the major course project, students interview a family or community member about a particular historical event. The resulting essay analyzes the connections between individual memory, collective memory, and the media's influence on both.

Prerequisites: Take EN 102 or EN 103H

Offered: Every year, Fall and Spring

UC: Humanities

- MSS 231. Media and Society. 3 Credits.**
The objectives for this course are twofold: to foster an understanding of the social context within which media professionals work and to provide an environment in which students develop analytical skills required for effective and ethical participation in our media-saturated culture as citizens and potential media professionals. Students create a mock proposal for a media project in which they address how different cultural, political, economic and technological structures create constraints and leave open the possibilities for media practitioners, users and audiences. They also work in teams to critique contemporary social media issues.
Prerequisites: Take COM 120.
Offered: Every year, Spring
- MSS 300. Special Topics. 3 Credits.**
Topics vary each semester depending on faculty and student interests.
Offered: As needed
- MSS 311. Diversity in the Media (WGS 311). 3 Credits.**
This course examines the role of media in the construction of social categories such as gender, race, class and sexual orientation. Students learn about the media as one of a number of social institutions—including religion, education and family—that influence our understanding of cultural difference. The course presents a variety of perspectives that address diversity in relation to both print and electronic media, emphasizing popular culture. Media diversity issues are analyzed in relation to ownership, representation, audience reception and the media workforce. Junior status required.
Prerequisites: Take WGS 101 or COM 120.
Offered: Every other year
- MSS 320. Communication Technologies: Evolution and Impact. 3 Credits.**
This course explores the rapid spread of technology in the 21st century. Students examine the development, diffusion, and cultural impact of older technologies (e.g. the telephone, radio, television) for lessons that can be applied to more recent technological developments (e.g. the smartphone, streaming media, and social media). This blueprint is then used to predict, evaluate, and critique emerging technologies and the effects that they may have on culture, politics, economics, and everyday life in the next 10-20 years.
Prerequisites: Take COM 120.
Offered: As needed
- MSS 332. Media Research Methods. 3 Credits.**
The course introduces students to a variety of media research methods through readings and hands-on exercises. Goals include helping students become knowledgeable and critical readers of media-related research produced in both industry and academic settings, and teaching students fundamental aspects of conducting media research and leading-edge strategies for effectively communicating research findings. Students perform original research using techniques including interviews, focus groups, content analysis and surveys. They also learn about statistics, social media tracking and research ethics. Junior status required.
Prerequisites: Take COM 120, MSS 131 or MSS 231.
Offered: Every year, Fall
- MSS 340. Communications Law and Policy. 3 Credits.**
This course helps students to develop an awareness and understanding of laws, regulations and professional standards of practice that apply to the work of communications practitioners. Attention is given to First Amendment guarantees, libel, privacy, journalist's privilege, copyright, media and advertising regulation. Selected cases are highlighted as examples of opinions handed down by state and federal courts. Junior status is required.
Prerequisites: Take MSS 131 or MSS 231 or STC 101 or STC 102.
Offered: Every year, Fall and Spring
- MSS 345. Media Users and Audiences (WGS 345). 3 Credits.**
This course considers popular, institutional and academic perspectives on media users and audiences in the U.S. and abroad. Students develop an understanding of how people choose and interpret media content, how marketers and media producers perceive audiences, popular assumptions about media effects on audiences and how social media use blurs boundaries between audiences and producers. Students develop and apply critical thinking and written and oral communication skills in assignments that address contemporary debates surrounding audiences and media users, including an in-depth analysis of fan cultures.
Prerequisites: Take EN 102 or EN 103H; and COM 120 or WGS 101.
Offered: Every year
- MSS 346. Global Communication. 3 Credits.**
The course analyzes the roles information media and popular culture play in modern debates about political power, global economy and cultural identity. The relative influences of different communication technologies in relationships among global, transnational and local cultures also are examined.
Prerequisites: Take COM 120.
Offered: Every other year
- MSS 349. Political Communication (PO 349). 3 Credits.**
This course explores the relationship between media and politics in the U.S. Students learn about the history of political communication, the role of image-making and image-management in political communication, the impact of the media on public policy, and the current state of our mediated political culture. In the major course project, student teams develop a comprehensive campaign communication strategy for a political candidate.
Prerequisites: Take COM 120 or PO 101.
Offered: Every other year
- MSS 400. Special Topics. 3 Credits.**
Topics vary each semester depending on faculty and student interests.
Offered: As needed, Fall and Spring
- MSS 420. Sports, Media and Society (SPS 420). 3 Credits.**
This course examines the social, political, economic and historical significance of the intersection of sports, media and society. Participants examine such questions as: What role have sports played in shaping cultures throughout history? What is the relationship between sports and media? How do sports, through the media, influence U.S. culture today? What is the role of sports media professionals in U.S. culture? Junior status required.
Prerequisites: Take COM 120 or SPS 101.
Offered: Every year, Spring
- MSS 441. Celebrity Culture. 3 Credits.**
This seminar explores modern communication networks through the lens of celebrity. Through a variety of readings and videos, including pieces using media effects and cultural studies approaches, the course addresses the following questions: How, and by whom, is the idea of celebrity shaped? What cultural meanings are conveyed by celebrity? How does celebrity change the way we think about important social issues? What is the impact of celebrity on the industry? How is the concept of celebrity shifting? And just why are we so fascinated by celebrity? The final course project involves creating a plan for a celebrity to rehabilitate/reshape their public image.
Prerequisites: Take MSS 131 or MSS 231.
Offered: Every other year

MSS 442. Media Critics and Influencers. 3 Credits.

In this course, students learn what it takes to be a professional media critic and/or a social media influencer. Students analyze and produce criticism of TV, movies, music, apps, games, etc. and study what makes today's top social media influencers so successful. Students examine some of the best practices in popular media criticism/influence while developing their own voices. They also learn to produce content aimed at engaging their target audience. In their final project, students create their own blog, vlog, or podcast.

Prerequisites: Take MSS 131 or MSS 231.

Offered: Every other year

MSS 443. Crime, Media and Culture. 3 Credits.

This course examines the role of industrialized media in the social construction of crime, criminals, victims, social order, and deviance. We also consider why crime is represented so frequently in a variety of mainstream media genres, including news, docudramas, video games, popular music, and fictional dramas in both television and film. The course also discusses ways in which social media and digital surveillance technologies have been harnessed in relation to crime. Central themes of the course include theoretical debates related to media effects and critical media consumers, as well as how crime narratives can either demonize or glamorize segments of society.

Prerequisites: Take MSS 131 or MSS 231.

Offered: Every other year

MSS 444. Popular Music. 3 Credits.

Despite its salience as a mass medium, popular music remains understudied in the discipline of media studies. Therefore, in order to provide students with a better understanding of popular music, this seminar involves the following: critically listening to and writing about popular music; considering music's role in identity (class, gender and sexuality, racial and ethnic, etc.) formation; examining the influence of media and technology on popular music; and understanding the music industry.

Prerequisites: Take MSS 131 or MSS 231.

Offered: Every other year

MSS 450. Senior Seminar. 3 Credits.

This seminar includes an in-depth examination of issues and research perspectives in media studies. Topics vary each term, focusing on the different media and current literature in the field. Senior status required.

Offered: Every year, Fall and Spring

MSS 491. Research Project. 3 Credits.

Students conduct an in-depth research project under faculty supervision.

Prerequisites: Take MSS 332.

Offered: As needed

MSS 495. Media Trend Forecasting and Strategy. 3 Credits.

In this media studies capstone course, students analyze the various forces impacting media industries, professionals, and users, tracking current trends and forecasting future influences. Students study the issues facing media producers/users and strategize creative responses to the challenges of operating in an ever-changing media environment, applying critical thinking, research and creative problem-solving skills to real-world situations in their capstone project, a Media Consultant Report. Students also are expected to demonstrate professional oral and written communication skills in their final project and a weekly Media Trends blog. Senior status required.

Prerequisites: Take MSS 131 or MSS 231; and MSS 332 or STC 332

Offered: Every year, Spring

MSS 499. Independent Study. 1-6 Credits.

Students may arrange to do an in-depth study of a topic under faculty supervision.

Offered: As needed

Strategic Communication (STC)

STC 101. Principles of Public Relations. 3 Credits.

This course traces the development of the public relations discipline and examines the role of public relations in organizations and society. Students are introduced to the role that public relations plays in communicating to individuals, groups and society at large. Basic public relations principles and theories are examined. Students are introduced to critical thinking and reasoning concepts as well as the various professional roles in the field.

Offered: Every year, Fall and Spring

UC: Breadth Elective, University Curriculum Ele

STC 102. Principles of Advertising and Integrated Communications. 3 Credits.

Principles of Advertising and Integrated Communication is an introductory course that provides a comprehensive overview of the practices of advertising and integrated communication (ADIC) as they are used by organizations to maximize the impact of unified messages and promotions on consumers and other stakeholders. The course is designed to introduce students to contemporary issues and practices as well as to analyze ethical considerations involved in the basic principles within the communications campaign planning process.

Offered: Every year, Fall and Spring

UC: Breadth Elective, University Curriculum Ele

STC 201. Writing for Strategic Communications. 3 Credits.

Written communication is central to most public relations careers. Clear and persuasive writing is one of the tools used in public relations to convey clients' messages to target publics. This writing-intensive course introduces students to the world of professional public relations writing. Topics include press releases and other print tactics, online content and social media. Students are involved in both in-class and out-of-class assignments.

Prerequisites: Take STC 101 or STC 102; and COM 140.

Offered: Every year, Fall and Spring

STC 215. Web, Mobile and Interactive Design. 3 Credits.

Students learn how to create desktop and mobile multimedia elements using web development software, HTML5, CSS3 and simple scripting. Students design projects that include functional websites, animated content and interactive experiences.

Prerequisites: Take COM 130 and JRN 106 or FTM 110.

Offered: Every year, Fall and Spring

STC 309. Public Diplomacy. 3 Credits.

This course examines concepts, issues and practices in public diplomacy, or the management of a nation's communications and relationships with foreign publics who have the ability to affect national and international interests. Students examine theoretical and practical aspects of public diplomacy, looking closely at the purpose and value of public diplomacy in governments and other institutions, the roles and responsibilities of public diplomacy specialists, and principles of strategic practices. Students apply what they have learned in the development of public diplomacy materials.

Prerequisites: Take STC 101.

Offered: Every year, Spring

UC: Breadth Elective

- STC 311. Sports Public Relations (SPS 311). 3 Credits.**
This class is a comprehensive review of sports management and sports event planning. Students examine such topics as strategic planning, budgeting and time management.
Offered: Every year, Spring
- STC 320. Strategies for Social Media. 3 Credits.**
This course addresses the impact of social and mobile media in an integrated profession. It focuses on strategically using social media to conduct research and monitor issues, to develop, implement and evaluate the success of public relations, advertising and integrated communication efforts. The course emphasizes strategic usage of such social media tools as social networks, social bookmarking sites, blogs, podcasts/vodcasts, discussion boards and conferences, wikis, mobile media and geolocation apps.
Prerequisites: Take STC 201.
Offered: Every year, Fall and Spring
- STC 332. Communication Research and Analysis. 3 Credits.**
Quantitative reasoning is expected of today's strategic communication professional, and this course presents an exploration of both quantitative and qualitative research methods. Students learn how to use principles of scientific research and data analysis to establish, monitor and evaluate communication efforts.
Prerequisites: Take STC 101 or STC 102.
Offered: Every year, Fall and Spring
- STC 335. Media Systems and Planning. 3 Credits.**
In this course, students learn about traditional as well as new and emerging technologies, with particular emphasis on their strengths and weaknesses as message carriers. Discussions include an overview of commonly used metrics and sources of data in the advertising and communications industries. Students then use this knowledge to plan and budget for integrated communication plans that capitalize on paid, earned and owned outlets.
Prerequisites: Take STC 332.
Offered: Every year, Spring
- STC 341. Corporate Public Relations. 3 Credits.**
This course provides students with the knowledge and skills required for positions in the corporate sector. Topics include media relations, employee communication, community relations, investor relations and crisis communication. Students hone their written communication and critical thinking skills in this class.
Prerequisites: Take STC 201.
Offered: As needed
- STC 343. Nonprofit Public Relations. 3 Credits.**
This course is designed for students who are interested in nonprofit public relations practice. Nonprofit practitioners help organizations manage their relationships by using many types of communication. This class helps students hone the skills that enable them to prosper as nonprofit public relations professionals. Written communication skills, along with other skills, are stressed.
Prerequisites: Take STC 201.
Offered: As needed
- STC 344. Global Strategic Communications Management. 3 Credits.**
This course is designed to explore the global reach of strategic communication, its challenges, opportunities and worldwide development. It examines how various communication disciplines such as advertising, integrated marketing communication and public relations work together in various cultures, and geopolitical and socio-economic systems. Students explore strategic communication practices from a cosmopolitan perspective while focusing on understanding global, national and local audiences in order to create an integrated strategic communication plan that strengthens brand images.
Prerequisites: Take STC 101 or STC 102.
Offered: As needed
- STC 345. Investor Relations. 3 Credits.**
This course is designed for students who may wish to enter the field of investor relations. Students are introduced to the main activities carried out by investor relations professionals and to concepts such as finance and accounting.
Prerequisites: Take STC 201.
Offered: As needed
- STC 346. Strategic Health Communication. 3 Credits.**
The course presents a social scientific exploration of the field of strategic health communications, with particular attention to analysis and practice of health communication relationships and messages. Participants examine theories of health behavior change and media effects. Health is discussed from an ecological perspective, considering how various social structures impact community and individual health and cultural differences regarding health. Students consider examples of mediated health campaigns and research evaluating their effectiveness. They examine the interplay among theory, research and practice, with a special emphasis on how theory informs practice.
Prerequisites: Take STC 201.
Offered: As needed
- STC 348. Public Relations Event Planning. 3 Credits.**
This course emphasizes the fundamentals of event planning, from developing the event, choosing a site and activities, promoting the event, accommodating the audience, coordinating volunteers, overseeing a safe event environment, and assessing the event after completion. At the end of the course, based upon the readings and real-life application, the student should be able to appreciate and understand how to plan a first-rate event, regardless of the client, theme or environment.
Prerequisites: Take STC 201.
Offered: As needed
- STC 349. Media Relations. 3 Credits.**
This course gives students an understanding of the priorities and expectations of various types of contemporary media and how to successfully engage them through research-based strategies and tactics designed to reach key audiences. At the conclusion of the course, students should be well-practiced in various forms of working with journalists and the public via multiple media.
Prerequisites: Take STC 201.
Offered: As needed
- STC 400. Special Topics. 3 Credits.**
The content of this course is specialized and varies from semester to semester. Students may inquire at the School of Communications front desk to learn more about the topic being offered.
Prerequisites: Take STC 201.
Offered: As needed

- STC 401. Bateman Competition Research. 1-3 Credits.**
This course is designed to prepare students for advanced public relations problem-solving, the development of strategic public relations plans and the execution of a comprehensive public relations program. Students develop and implement a public relations program based on the four-step public relations process by competing in the national Public Relations Student Society of America Bateman Case Study Competition.
Prerequisites: Take STC 201 and permission of instructor.
Offered: As needed
- STC 402. Bateman Competition Campaigns. 2 Credits.**
Prerequisites: Take STC 332, STC 401.
Offered: As needed
- STC 405. The Agency. 3 Credits.**
The Agency is a student-run, interdisciplinary firm in which students produce professional work under the direction of faculty. Specializing in Public Relations, Graphic and Interactive Design, and Advertising and Integrated Communications, students collaborate on teams to manage and produce visual, written and digital work for a variety of clients in the communications field. Students apply different research methodologies, tools and techniques, and tactics to achieve desired strategic outcomes and present their projects to clients. Course is repeatable with permission of instructor.
Offered: Every year, Fall and Spring
- STC 410. Branding Strategies. 3 Credits.**
In this course, students consider how brands work and examine them as the guiding forces for integrated communication campaigns. Students identify the common characteristics of successful brands and explore the tools and techniques that are used to build brand equity.
Prerequisites: Take STC 332.
Offered: Every year, Fall
- STC 450. Crisis Communication Management. 3 Credits.**
This senior seminar for public relations majors is focused on crisis management. The course examines institutional crisis communication from a management perspective with an emphasis on crisis prevention, planning and response. Senior-level students in STC 450 apply skills they have learned throughout the program to crisis case studies. Students are called on to demonstrate oral and written communication skills along with proficiencies in such areas as critical thinking, reasoning and creative thinking.
Prerequisites: Take STC 332.
Offered: Every year, Fall and Spring
- STC 485. Advertising and Integrated Communications Campaigns. 3 Credits.**
This course is the capstone course in the advertising sequence. It utilizes a team-based, project-driven approach to advertising with real-life clients. Each team engages in the conception, research, planning and execution of a unique advertising campaign for an entire semester. Students learn to work within client guidelines, strategic creative and media planning, budgetary considerations and post-campaign analysis. In this capstone experience, students develop a full-scale integrated communications campaign, including conducting secondary and primary research, strategic planning and the production of associated creative deliverables. Students also gain experience in pitching to clients and evaluating the success and impact of the campaign.
Prerequisites: Take STC 201, STC 332.
Offered: Every year, Spring
- STC 495. Public Relations Campaigns. 3 Credits.**
STC495 is the capstone course for students preparing for a career in public relations. Students develop the mindset of a strategic communicator through case analyses, problem-solving exercises, and completion of a signature work. Attention is focused on the public relations planning process and student teams develop strategic public relations plans for actual clients. Writing, research and presentation skills are expected.
Prerequisites: Take STC 101, STC 201, STC 332.
Offered: Every year, Fall and Spring
- STC 499. Public Relations Ind Study. 1-6 Credits.**
Offered: As needed
- STC 501. Principles and Theories of Public Relations. 3 Credits.**
Students are introduced to the growing body of knowledge in the discipline and gain expertise that contributes to professional competence in public relations. Students examine the function of public relations in organizations and society, review contemporary and historical roles of public relations professionals and explore the practice of public relations in various public and private settings. Students also learn the latest theoretical approaches to public relations and apply these approaches to contemporary public relations management practices.
Offered: Every year, Fall
- STC 502. Public Relations Research Methods. 3 Credits.**
This course examines the applied use of research in public relations program development. Students learn methodologies appropriate for conducting secondary analyses and primary research. Both quantitative and qualitative methods are addressed, such as secondary analysis, content analysis, survey research, focus groups, participant observation, case study and experimentation.
Offered: Every year, Fall
- STC 504. Law and Ethics in Public Relations. 3 Credits.**
Students become familiar with legal and industry standards for legally and ethically practicing public relations. The course aims to instill an appreciation for freedom of expression and the First Amendment; to impart a functional understanding of legal rules and principles relevant to public relations practice in the U.S.; to enhance students' ability to identify the moral and ethical dimensions of issues that arise in public relations practice; and to develop analytical and critical thinking skills that encourage students to make and justify ethical decisions.
Offered: Every year, Fall
- STC 505. Public Relations Writing. 3 Credits.**
This course helps students develop professional-quality public relations writing skills. Students prepare a variety of public relations materials, such as news releases and other media materials; copy for internal magazines, reports, newsletters, brochures, institutional/advocacy advertising; video/audio scripts; web site copy; and speeches. Upon completion of this course, students have a professional portfolio of public relations writing samples.
Offered: Every year, Spring
- STC 506. Public Relations Management. 3 Credits.**
This course focuses on the business management aspects of public relations, such as policy formation, project direction, resource management, client relations, budgeting and counseling. Special emphasis is placed on public relations' contribution to an institution's mission and effectiveness.
Offered: Every year, Spring

STC 507. Strategic Planning in Public Relations. 3 Credits.

This course familiarizes students with the public relations strategic planning process. Students examine contemporary case studies that demonstrate the public relations planning process and apply what they have learned to the development and presentation of a public relations campaign plan for a client.

Prerequisites: Take STC 501.

Offered: As needed

STC 510. Crisis Management. 3 Credits.

This course examines institutional crisis communication from a management perspective with an emphasis on crisis prevention, planning and response. Students are required to read and discuss selected articles from the crisis management literature, research and develop case studies of contemporary crises, and participate in simulations designed to develop professional expertise and practical skills in crisis management, including the management of information, management of public communication, strategic planning, problem solving, message production and issues management.

Offered: As needed

STC 511. Global Strategy. 3 Credits.

This course examines concepts, issues and practices in international public relations across the borders and focuses on the challenges, opportunities, and the worldwide development of public relations. The course aims to inform you about the variables that affect public relations practice in the international realm and assist you in understanding of other countries' domestic public relations given the various cultures, geopolitical and socio-economic systems. Participants look closely at how governments, corporations, multinationals and nongovernmental organizations employ international public relations strategies around the world. Students also examine similarities between international public relations and public diplomacy and the effects of international public relations on images of nations.

Offered: As needed

STC 512. Investor Relations. 3 Credits.
